HLTAMB007 Assess and deliver basic clinical care

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites Supersedes HLTAMBCR401C.

Application

This unit of competency describes the knowledge and skills required to conduct clinical assessment and deliver basic clinical care in a pre-hospital/out-of-hospital environment.

This unit applies to pre-hospital/out-of-hospital health care workers. The worker provides basic life support and prioritises clinical care of a patient in accordance with established clinical practice guidelines.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Make initial incident and patient assessment	1.1 Conduct pre-planning before arrival at scene based on information communicated in the request for service 1.2 Conduct scene survey according to established clinical guidelines and protocols 1.3 Conduct primary survey of patient including taking vital signs

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
	1.4 Conduct a secondary survey, including a systematic physical examination of the whole body using applied clinical knowledge
	1.5 Obtain and document history of the event
	1.6 Identify patient's main complaints as a basis for systematic prioritised treatment
	1.7 Apply situational knowledge of the patient to guide selection of appropriate treatment options
	1.8 Determine the time-critical issues given resource considerations
	1.9 Assess transport requirements and appropriate destination, versus transport criticality, to ensure requirements of urgency and patient care are met
2. Plan basic pre-hospital/out-of-hospital patient care	2.1 Establish priorities of care based on initial patient assessment according to established clinical guidelines and protocols
	2.2 Develop a treatment plan and outline treatment priorities
	2.3 Identify and develop contingency plans based on mechanisms of injury and potential for patient deterioration according to established clinical guidelines and protocols
3. Implement basic patient care procedures	3.1 Implement all patient care procedures and pharmacological therapies within own level of expertise and authority to practise, and the limits of clinical guidelines and protocols
	3.2 Identify the need to seek assistance immediately where the situation or patient's condition requires treatment that is outside scope or authority to practise
	3.3 Operate equipment as required for patient management according to manufacturer or supplier's instructions and clinical guidelines and protocols
	3.4 Apply infection prevention and control principles to patient care

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
	3.5 Use safe lifting and patient handling techniques in accordance with workplace health and safety (WHS) requirements and organisation policy and procedures
4. Monitor basic patient care and modify as required	4.1 Re-assess patient at appropriate intervals and modify treatment as required according to established clinical guidelines and protocols
	4.2 Monitor pharmacological outcomes, noting effectiveness of treatment regime and amend according to patient's condition
5. Handover patient to a healthcare facility	5.1 Document relevant patient details according to established clinical guidelines and protocols
	5.2 Maintain patient confidentiality at all times
	5.3 Ensure documentation for clinical handover procedures contains all necessary information
	5.4 Convey information appropriately to authorised individuals involved in ongoing patient care
	5.5 Maintain patient care until responsibility for patient is taken over by staff of the receiving agency

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTAMB007 Assess and deliver basic clinical care

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites Supersedes HLTAMBCR401C.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage task and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 80 hours under clinical supervision in the workplace
- performed a clinical assessment and implemented basic care in an pre-hospital/out-of-hospital context on 3 different patients for an illness or trauma impacting health status including:
  - performing primary survey
  - performing secondary survey – systematic head to toe physical body examination including vital signs and level of consciousness
  - planning and implementing basic clinical care based on assessment and time-criticality
  - monitoring patient
  - safely delivering patient to receiving facility or service
- performed basic life support on an adult, child and infant simulation manikin according to established clinical guidelines and protocols.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

© Commonwealth of Australia, 2025 HumanAbility

- assessment and interpretation of vital signs including:
  - level of consciousness, covering for example
    - Glasgow Coma Score (GCS)
    - alert, voice, pain, unconscious (AVPU)
  - respiratory status assessment – for example, rate, rhythm, effort and breath sounds
  - temperature status – for example, febrile or afebrile or hypothermic
  - blood volume and perfusion status assessment– for example pulse, blood pressure, capillary refill and skin
- basic anatomy and physiology in recognising body systems:
  - cardiovascular
  - respiratory
  - musculo-skeletal
  - endocrine
  - nervous
  - digestive
  - urinary
  - reproductive
  - integumentary
  - lymphatic
  - special senses
- basic life support, including procedures and equipment used as specified within established clinical guidelines and protocols
- chief complaints when attending pre-hospital/out-of-hospital situations including trauma and medical disorders and possible actions to alleviate complaints
- clinical practice guidelines and protocols
- how to accurately obtain and document patient medical history including pre-existing conditions, allergies, social and emotional wellbeing, and current medication or treatment plans to provide to receiving health facility workers
- national and State/Territory legal and ethical considerations for emergency health care workers relevant to pre-hospital/out-of-hospital care, and how these are applied in organisations including:
  - children in the workplace
  - continuing professional education
  - discrimination
  - duty of care
  - human rights
  - informed consent
  - mandatory reporting
  - practitioner/client boundaries
  - privacy, confidentiality and disclosure

© Commonwealth of Australia, 2025 HumanAbility

  - specific Commonwealth legislation and State/Territory legislation or regulation for health care workers including, for example:
    - children and young people
    - anti-discrimination
    - disability
    - health, drugs and poisons
    - mental health
    - health records and information privacy
    - industrial relations
  - National Safety and Quality Health Service (NSQHS) Standards
  - industrial regulations
  - work role boundaries – responsibilities and limitations
  - work health and safety
- organisational administrative and patient care policies and procedures
- primary survey and secondary survey
- receiving facility requirements or how to access these requirements
- recognise the patterns of illness and injury relevant to the delivery of basic clinical patient care
- situations where the required patient treatment is outside the scope or authority to practice of the attending worker.

Assessment Conditions

Skills and knowledge must be demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely.

The requirement in the performance evidence for performing clinical assessments and implementing basic clinical care for 3 patients for an illness or a trauma must have been demonstrated using simulation before being demonstrated in the workplace and with members of the public.

The following conditions must be met for this unit:

- use of suitable facilities, resources and equipment as per local governing body including:
  - simulation adult, child, infant manikins
  - vital signs monitoring devices
  - organisation policies and procedures and/or established clinical guidelines/protocols on which the candidate bases the planning process.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTAMB008 Assess and deliver standard clinical care

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTAMBAS501B/ HLTAMBCR502C Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites. Minimum hours added.

Application

This unit of competency describes the skills and knowledge required to conduct clinical assessments and deliver standard patient care in the pre-hospital/out-of-hospital environment.

This unit applies to pre-hospital/out-of-hospital health care workers. The worker provides advanced life support, prioritises clinical care, implements time-critical health care procedures and therapies, and monitors patients based on patient needs and in accordance with established clinical practice guidelines.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Perform pre-hospital/out-of-hospital patient assessment	1.1 Conduct pre-planning of assessment before arrival at scene based on information communicated in the request for service
	1.2 Perform appropriate clinical surveys to collect and analyse assessment information at critical points in time

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
	1.3 Use applied clinical knowledge to assess the mechanism of injury, pattern of injury and potential for injury to identify any non-obvious clinical signs during patient assessment
	1.4 Use a critical questioning process to make links between patient's illness or injury and information found at the scene
	1.5 Base patient assessment on a demonstrable and clearly thought out series of problem solving steps or linkages
2. Identify variations in physical health status	2.1 Integrate principles of anatomy and pathophysiology with assessment data for specific conditions, disorders and injuries
	2.2 Identify variations from normal homeostasis and body system functions using established clinical guidelines/protocols
	2.3 Identify variations to cellular metabolism when assessing patient for poor states of perfusion
	2.4 Analyse the need for and potential impact of treatments and pharmacological therapies on patient's health status
	2.5 Identify the effects on patient's health status of pharmacological therapies based on pharmacology, pharmacokinetics and pharmacodynamics
	2.6 Use diagnostic reasoning when determining the potential for injury or illness
3. Plan pre-hospital/out-of-hospital patient care	3.1 Identify main patient complaints as a basis for prioritised treatment and care based on assessed patient needs and overall assessment of the scene
	3.2 Analyse clinical and situational data gathered to plan treatment
	3.3 Establish patient management plan based on primary and secondary survey, known patient history, assessment of the scene and factors related to distance from hospital

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
	or medical care
	3.4 Evaluate the injury and potential for deterioration and develop contingency plans based on mechanisms of injury
	3.5 Systematically evaluate and interpret patient assessment information to make judgements regarding patient care requirements
	3.6 Ensure judgement, which forms the basis on which treatment is planned, can be reasonably justified in terms of the information available at the time
	3.7 Differentiate between patients who require rapid stabilisation and transport because of trauma or illness, and those who require further on-the-scene assessment and management
	3.8 Determine time-critical issues given resource considerations
4. Implement pre-hospital/out-of-hospital patient care procedures	4.1 Implement all care and treatment procedures to the level of own expertise and within established clinical guidelines and protocols
	4.2 Commence pharmacological therapies as patient's presenting condition determines, with reference to established clinical guidelines and protocols and pharmacological requirements
	4.3 Recognise the need for assistance where the situation or patient's condition requires treatment that is outside the practice guidelines and seek help immediately
5. Monitor and evaluate pre-hospital/out-of-hospital patient care	5.1 Monitor all aspects of patient's condition at appropriate intervals to establish trends
	5.2 Assess potential effects on patient's condition of procedures implemented
	5.3 Monitor pharmacological therapy, noting effectiveness of treatment regime and amend according to patient's condition
	5.4 Recognise changes in patient's condition and adapt

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
	management according to the scope or authority to practice of the attending officer
	5.5 Evaluate patient care interventions used against pre-hospital/out-of-hospital best practice for clinical care
6. Hand over patient requiring pre-hospital/out-of-hospital patient care to receiving facility	6.1 Document relevant patient details according to local standard operation procedures
	6.2 Maintain patient confidentiality at all times
	6.3 Ensure documentation for handover procedures conveys all necessary information
	6.4 Maintain patient care until responsibility for patient care is taken over by staff of the receiving agency
	6.5 Convey information appropriately to those individuals involved in ongoing patient care to facilitate understanding and optimise continuing patient care

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to *performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTAMB008 Assess and deliver standard clinical care

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTAMBAS501B/ HLTAMBCR502C Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites. minimum hours added

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 160 hours under clinical supervision in the workplace
- performed a clinical assessment and implemented standard care in a pre-hospital/out-of-hospital context on 5 different patients for an illness or trauma impacting health status including:
  - performing primary survey
  - performing secondary survey – systematic head to toe physical body examination including vital signs and level of consciousness
  - considering psychosocial, developmental and cultural considerations
  - considering mechanism of injury, pattern of injury and potential for injury
  - planning and implementing standard clinical care based on assessment and time-criticality
  - monitoring patient and implementing health care procedures and/or therapies
  - safely delivering patient to receiving facility or service
- implemented the following standard clinical care interventions under a variety of conditions and circumstances within the established clinical guidelines and protocols:
  - providing airway management for a patient
  - attaching leads, recording and interpreting an electrocardiograph (ECG) to analyse cardiac dysrhythmia

© Commonwealth of Australia, 2025 HumanAbility

  - performing manual direct current counter shock on an adult simulation manikin according to established clinical guidelines and protocols
  - administering and responding to the effects of pharmacological therapy to treat and manage patient's illness or condition
- performed advanced life support on an adult, child and infant simulation manikin according to established clinical guidelines and protocols.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- assessment and interpretation of vital signs
- advanced life support and advanced resuscitation, including procedures and equipment used as specified within established clinical guidelines and protocols
- critical thinking and diagnostic reasoning techniques and processes:
  - process of critical questioning including purposeful, informed questioning in the clinical setting to make sense of the information presented at the scene of injury or illness
  - process of diagnostic reasoning in the clinical setting, which requires careful identification of key problems, issues and the risks involved in responding to patient needs
  - potential impacts of a range of factors in relation to identified body systems and their components
    - internal (such as physical, mental, emotional factors)
    - external (for example, in relation to specific patient assessment procedures)
  - concept of rapid stabilisation and transport including:
    - golden hour
    - chain of survival
    - time critical
    - priority status
    - transport consideration – for example, ground or aeromedical
- causes and effects of trauma including:
  - kinematics of trauma
  - blunt, penetrating, falls, blasts and motor vehicle accidents
  - crush injuries and compartment syndrome
  - physical laws of energy exchange (Newton's laws of motion)
  - cavitation
  - impact and clinical consideration for trauma to pregnant person
- common environmental emergencies

© Commonwealth of Australia, 2025 HumanAbility

- how to accurately obtain and document patient medical history including, pre-existing conditions, allergies, social and emotional wellbeing and current medication or treatment plans to provide to receiving health facility workers
- national and State/Territory legal and ethical considerations for emergency health care workers relevant to pre-hospital/out-of-hospital care, and how these are applied in organisations including:
  - children in the workplace
  - continuing professional education
  - discrimination
  - duty of care
  - human rights
  - informed consent
  - mandatory reporting
  - practice standards
  - practitioner/client boundaries
  - privacy, confidentiality and disclosure
  - specific Commonwealth and State/Territory legislation or regulation for health care workers including covering, for example:
    - children and young people
    - anti-discrimination
    - disability
    - health, drugs and poisons
    - mental health
    - health records and information privacy
    - industrial relations
  - National Safety and Quality Health Service (NSQHS) Standards
  - work role boundaries – responsibilities and limitations
  - work health and safety
- organisation policies, procedures and established clinical guidelines and protocols for patient care and emergency equipment
- pharmacology therapy and concepts underpinning pharmacology:
  - pharmacological agents for the management of common disorders
  - pharmacokinetics including routes of administration – enteral, parenteral, inhalation, topical
  - preparation, properties, uses and actions of pharmacology
  - pharmacology terminology
  - absorption, distribution, metabolism and excretion of pharmacological products by the body
  - pharmacodynamics- pharmacological interactions
  - safe storage, handling and disposal of pharmacological products

© Commonwealth of Australia, 2025 HumanAbility

  - jurisdictional protocols and guidelines associated with administration, duration, magnitude and pharmacological response
- primary survey and secondary survey
- variations from normal functioning of body systems involving anatomy, physiology and pathophysiology, including:
  - pathophysiology of integumentary system including:
    - compromised integumentary system burns trauma or injury caused by the interaction of energy (thermal, chemical, electrical, or radiation)
    - pathophysiology of burns injuries, local and systemic responses and burn shock
    - classifications of burns injury and extent and severity of burns injury
  - pathophysiology of musculo-skeletal injury including:
    - soft tissue injury
    - causes and types of fractures, dislocations, strains and sprains
  - pathophysiology of the cardiovascular system including:
    - cardiovascular insult
    - how to interpret and analyse dysrhythmias and apply electric shock to obtain normal rhythm – for example asystole, ventricular fibrillations, ventricular tachycardia or heart block
    - classifications and complications of shock including hypovolaemia, cardiogenic and distributive
  - pathophysiology of the neurovascular system including:
    - brain injury including – concussion, contusion, Diffuse Axonal Injury (DAI), haematomas
    - traumatic brain injury including – primary and secondary injury, cerebral perfusion, raised intracranial pressure, herniation, cerebral agitation or irritation
    - cerebral thrombosis, transient ischaemic attack (TIA), cerebral embolism and cerebral haemorrhage
    - dementia
    - seizures and febrile convulsions
    - autonomic dysreflexia
  - poisoning, envenomation or overdose emergencies including:
    - neurotoxins, myotoxins, haemotoxins, illicit drugs
    - chemical, biological and radiological
  - pathophysiology of the respiratory system including:
    - differences in paediatric and adult airways
    - thoracic disorders or trauma
    - respiratory disorders including asthma, acute respiratory distress syndrome, croup, epiglottis, pneumonia, emphysema, chronic obstructive airway disease
    - gas laws and gas exchange (Boyle, Dalton, Charles, Henry)
    - external and internal ventilation and respiration
    - principles of lung volumes – minute volume and oxygenation

© Commonwealth of Australia, 2025 HumanAbility

- pathophysiology of the digestive and endocrine system including:
  - abdominal disorders including diabetes mellitus, thyroid and adrenal gland conditions
  - nutritional disorders, appendicitis, gastroenteritis and hepatitis
  - abdominal trauma including visceral, referred and somatic pain, gastro-intestinal bleeding
- processes of metabolism including:
  - cellular respiration
  - anaerobic and aerobic energy production
- pathophysiology of the urinary and reproductive system including:
  - acute and chronic renal failure and obstetric and gynaecological disorders (for example, ectopic pregnancy, spontaneous abortion, vaginal haemorrhage, pelvic inflammatory disease, endometriosis)
  - stages of labour – pre-delivery emergencies and post-delivery emergencies
  - assessing neonate body temperature and Apgar scores

• situations where the patient requires treatment that is outside the scope or authority to practice of the attending worker.

Assessment Conditions

Skills and knowledge must be demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely.

The requirement in the performance evidence to implement standard clinical care interventions under a variety of conditions and circumstances within the established clinical guidelines and protocols, must have been demonstrated using simulation before being demonstrated in the workplace and with members of the public.

The following conditions must be met for this unit:

• use of suitable facilities, resources and equipment as per local governing body including:
  - simulation adult, child, infant manikins suitable for simulation of clinical skills
  - vital signs monitoring devices
  - ECG recording device
  - placebo samples of pharmacological preparations for use in simulation scenarios.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTAMB009 Deliver intensive clinical care

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Supersedes HLTAMBCR603B Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites.

Application

This unit of competency describes the skills and knowledge required to deliver advanced clinical pre-hospital/out-of-hospital patient care at a specialised level by assessing the needs of a patient, planning and administering intensive clinical care, and monitoring the state of the patient.

This unit applies to pre-hospital/out-of-hospital health care workers. Workers follow established clinical guidelines and protocols and work independently, applying specialised knowledge of pathophysiology and pharmacology to perform intensive clinical care.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Assess need for specialised intervention	1.1 Assess patient on the basis of a high level of clinical knowledge and a high level of contemporary clinical evidence based practice 1.2 Confirm that assessment of the need for specialised intervention is based on a demonstrable and clearly

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	thought out series of problem-solving steps or linkages
	1.3 Analyse and explain the patient assessment process when subject to clinical audit
2. Analyse information from clinical assessment to make a judgement about specialised pre-hospital/out-of-hospital patient care	2.1 Use systematic evaluation of patient assessment to interpret and make judgements regarding specialised patient care requirements
	2.2 Confirm judgement is in line with high level contemporary evidence based practice and organisation clinical practice guidelines/protocols
	2.3 Justify that the judgement, which forms the basis on which specialised treatment is planned, is reasonable in terms of the information available at the time
3. Plan specialised pre-hospital/out-of-hospital patient care	3.1 Establish priorities of care, based on assessment of the total scene and drawing on specialised knowledge and experience
	3.2 Recognise and interpret mechanisms of injury and potential for patient deterioration in conjunction with factors inherent in patient's condition, environment and potential impact of procedures or movement
	3.3 Develop contingency plans, based on mechanisms of injury and potential for patient deterioration
	3.4 Establish patient management plan, based on analysis of the scene and the patient and drawing on high level clinical knowledge
	3.5 Determine patient's potential or actual time criticality versus transport criticality
4. Implement procedures for specialised pre-hospital/out-of-hospital patient care	4.1 Commence all patient care procedures and pharmacological therapies as patient's presenting condition determines, with reference to local clinical and legislative guidelines and pharmacological requirements
	4.2 Confirm all actions are in accordance with established clinical guidelines and protocols.
	4.3 Consult and collaborate with designated medical authorities as required

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
5. Monitor specialised pre-hospital/out-of-hospital patient care and modify as required	5.1 Monitor all aspects of patient's condition including vital signs at appropriate intervals to establish trends in terms of specialised procedures, interventions or knowledge 5.2 Assess potential effects of procedures implemented on patient's condition 5.3 Monitor pharmacological therapy noting effectiveness of treatment regime, and amend according to patient's condition 5.4 Recognise changes in patient's condition and adapt management according to the scope or authority to practice of the attending officer 5.5 Recognise the need for assistance and seek help immediately where the situation or patient's condition requires treatment outside the scope or authority to practice of the attending officer 5.6 Maintain and/or modify treatment, according to patient need as determined by the re-assessment process
6. Hand over patient requiring specialised care	6.1 Document relevant patient details according to organisation clinical practice guidelines/protocols 6.2 Maintain patient confidentiality at all times 6.3 Ensure documentation for handover procedures conveys all necessary information 6.4 Convey information appropriately to those individuals involved in ongoing patient care to facilitate understanding and optimise continuing patient care 6.5 Maintain patient care until responsibility for patient care is taken over by staff of the receiving agency

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential *to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTAMB009 Deliver intensive clinical care

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Supersedes HLTAMBCR603B Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during at least 80 hours under clinical supervision in the workplace
- delivered intensive clinical care in the workplace to 1 person to detect and correct any immediate life threatening conditions including:
  - demonstrating the capacity to take into account subtle factors affecting the patient's condition, from a broad range of areas
  - making sound judgements on provision of patient care based on pathophysiology and pharmacology knowledge
  - applying advanced skills to provide appropriate care for complex clinical conditions
  - applying the clinical problem-solving process as it applies to specialised patient care
- performed each of the following 5 intensive clinical care interventions in the workplace or in a simulated environment, which are procedures approved for specialised patient care based upon organisation policies and procedures and in accordance with established clinical guidelines/protocols:
  - applied leads, recorded and interpreted an electrocardiograph (ECG) to analyse cardiac dysrhythmia performed an endotracheal intubation for airway management
  - performed intravenous (IV) cannulation to provide intravenous fluid therapy
  - performed intraosseous (IO) needle insertion to provide a non-collapsible entry point into the systemic venous system for fluid therapy
  - performed decompression of a tension pneumothorax with a needle

© Commonwealth of Australia, 2025 HumanAbility

  - performed defibrillation for a cardiac condition
- administered pharmacological therapy in the workplace to 1 patient according to established clinical guidelines and protocols.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- specialised patient care in the field of pre-hospital/out-of-hospital care – detailed knowledge to enable accurate judgement and service delivery
- the structure and function of major organs (detailed and appropriate to this level) including a detailed understanding of heart structure and function (including electrophysiology, dysrhythmias)
- cell transport systems
- pharmacological processes and actions, indications and contraindications (appropriate to this level)
- cellular respiration (glycolysis, Krebs's Cycle, electron transport chain) and ATP production
- how to recognise the signs and symptoms of a broad range of clinical conditions and the (provisional) diagnosis of same
- advanced comprehension of trauma issues
- medical emergencies (advanced understanding including diving, altitude, temperature, overdose and poisoning, crush injuries and obstetrics)
- effects of intrinsic factors (such as age, health) and extrinsic factors (such as environment, medications) on patient condition and treatment
- human maintenance systems (including immunity and haemostasis)
- specialised patient care procedures and equipment used according to established clinical guidelines and protocols including IV and IO interventions used for fluid, blood and medication therapy
- patient social and emotional wellbeing related to trauma
- receiving facility requirements or how to access these requirements
- function of documentation being provided
- national and State/Territory legal and ethical requirements and considerations for emergency health care workers relevant to pre-hospital/out-of-hospital care, and how these are applied in organisations including:
  - children in the workplace
  - continuing professional education
  - discrimination
  - duty of care
  - human rights
  - informed consent

© Commonwealth of Australia, 2025 HumanAbility

  - mandatory reporting
  - practice standards
  - practitioner/client boundaries
  - privacy, confidentiality and disclosure
  - specific Commonwealth legislation and State/Territory legislation or regulation for health care workers including covering, for example:
    - children and young people
    - anti-discrimination
    - disability
    - health, drugs and poisons
    - mental health
    - health records and information privacy
    - industrial relations
  - National Safety and Quality Health Service (NSQHS) Standards
  - work role boundaries – responsibilities and limitations
  - work health and safety
- organisation policies, procedures and established clinical guidelines and protocols for patient care and emergency equipment.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment as specified in the performance evidence.

The requirement in the performance evidence to perform 5 intensive clinical care interventions in the workplace must have been demonstrated using simulation before being demonstrated in the workplace and with members of the public.

The following conditions must be met for this unit:

- use of suitable facilities, resources and equipment as per local governing body including:
  - simulation adult, child, infant and obstetric manikins suitable for simulation of clinical skills
  - defibrillator
  - 12 lead ECG leads and recording device
  - vital signs monitoring equipment
  - sample medications used in emergency treatment
  - oxygen resuscitation system with oxygen cylinder and oximeter and selection of oxygen masks with tubing
  - simulation model suitable for simulation insertion of an oropharyngeal airway
  - IV cannulation equipment and IV fluid therapy equipment

© Commonwealth of Australia, 2025 HumanAbility

- IO needle insertion equipment
- modelling of industry operating conditions, including contingencies should be included in simulations and scenarios that reflect pre-hospital/out-of-hospital clinical care work.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTAMB010 Manage and coordinate resources for emergency operations

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites Supersedes HLTAMBMA601D

Application

This unit of competency describes the skills and knowledge to manage, monitor and coordinate emergency service operations and resources controlling the use of emergency resources.

This unit applies to pre-hospital/out-of-hospital health care workers.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Maintain operations to meet quality standards	1.1 Ensure supplies necessary for operations are available and meet organisation requirements 1.2 Ensure operations within the area of responsibility meet service delivery specifications 1.3 Provide accurate information and advice to staff, members of the public and related organisations in line

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	with organisation policy and within the own area of responsibility
	1.4 Communicate operational information to the appropriate people in a manner and at a level and pace to promote understanding
	1.5 Ensure systems to monitor quality, time and cost specifications for service provided are fully and correctly implemented and maintained
	1.6 Recognise factors that may disrupt operations and take appropriate action to minimise their effects
	1.7 Maintain complete and accurate records of operations in own area of responsibility in accordance with established clinical guidelines and protocols
	1.8 Promptly communicate recommendations for improving efficiency of operations and quality of service to the appropriate people
	1.9 Ensure the scene is secure for emergency personnel in consultation with the incident controller for emergency operations
2. Create and maintain conditions conducive to productive work and quality service	2.1 Ensure the work environment is as conducive to work activity as possible
	2.2 Establish and maintain a sufficient supply of resources to meet community needs
	2.3 Ensure staff working conditions and use of resources satisfy current legislation and organisation guidelines
	2.4 Ensure frequency of maintenance and the use of equipment conform to established clinical guidelines/protocols
	2.5 Where resources do not meet requirements, refer the matter to appropriate person
	2.6 Promptly report workplace accidents and incidents to appropriate person and record as required
	2.7 Promptly refer recommendations for improving conditions to appropriate person
	2.8 Ensure all necessary records are complete, accurate and legible and available to authorised person when required
	2.9 Review records to ensure completeness and accuracy

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	in accordance with organisation policy and procedures
3. Monitor and control use of resources	3.1 Maintain expenditure within agreed budgets, ensuring it conforms to organisation procedures and does not compromise future spending requirements 3.2 Clearly explain the contribution each team member can make to control of resources 3.3 Ensure records of expenditure are complete, accurate and legible 3.4 Ensure prompt corrective action is taken in response to actual or potential significant deviations from plans 3.5 Promptly refer requests for expenditure outside own responsibility to the appropriate person

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential *to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTAMB010 Manage and coordinate resources for emergency operations

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites Supersedes HLTAMBMA601D

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- managed and coordinated 1 emergency operation including:
  - ensuring the following supplies necessary for operations are available and meet service delivery specifications, organisation standards, schedules and procedures:
    - material supplies
    - equipment and technology
    - information required to coordinate resources
    - financial information
  - recognising factors that impact efficiency of operations and reporting on strategies to control resources for future operations.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- patient care and assessment clinical standard guidelines
- emergency resources requirements
- organisation policies and procedures and established clinical guidelines and protocols
- relevant legislation and industrial guidelines

© Commonwealth of Australia, 2025 HumanAbility

- management of budgets and finance
- information technology and record-keeping.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, resources and equipment as per local governing body including:
  - management plans and strategies and established clinical guidelines and protocols on which to base the planning.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTAMB011 Manage a routine non-emergency scene

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Removed public safety elements from this unit. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Supersedes HLTAMBSC401B

Application

This unit describes the skills and knowledge required to manage routine non-emergency situations that are not anticipated to be life-threatening to ensure safety at the scene.

This unit applies to pre-hospital/out-of-hospital health care workers.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Attend non-emergency scene	1.1 Undertake appropriate roles as prescribed by Acts, regulations and organisation policies and procedures 1.2 Identify and maintain lines of communication with others according to communication protocols and organisation policy and procedures 1.3 Support collaborative planning and action in accordance with emergency operational procedures

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
2. Take appropriate measures to ensure safety at the scene	2.1 Identify real or potential hazards where there are risks to participants or bystanders
	2.2 Position vehicle, equipment and resources to facilitate safe access and departure and protect self, colleague and patient
	2.3 Wear personal protective equipment at the scene in accordance with emergency operational procedures
	2.4 Identify opportunities to utilise emergency resources and improvise as required to secure the scene
	2.5 Minimise risk by enlisting hazard reduction agents to enable patient treatment in hazard-free, or hazard-reduced, environment
	2.6 Prepare for possible escalation of situation into an emergency

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential *to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTAMB011 Manage a routine non-emergency scene

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Removed public safety elements from this unit. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Supersedes HLTAMBSC401B

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- managed 1 routine non-emergency scene including:
  - taken appropriate measures to ensure safety
  - identified hazards, real or potential, where there are risks to participants or bystanders
  - minimised risk by enlisting hazard reduction agents
  - made decisions to ensure rapid and safe access and egress
  - used available resources.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- command, control and coordination responsibilities – working knowledge
- how to evaluate management strategies used in routine non-emergency activities
- hazards and potential hazards at a scene and their effect on safe access and egress
- relevant policies and procedures relating to non-emergency management, including:
  - organisation policies and procedures
  - allied service procedures
  - State/Territory policies and procedures

© Commonwealth of Australia, 2025 HumanAbility

- relevant current national standards such as:
  - Australian Emergency Management Handbook Series
  - National Emergency Risk Assessment Guidelines
  - Australian/New Zealand Standard AS/NZS ISO 31000:2009 Risk management – Principles and guidelines
  - National Safety and Quality Health Service (NSQHS) Standards
  - Australian guidelines for the prevention and control of infection in healthcare (2010).

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, resources and equipment as per local governing body including:
  - vehicle or equipment
  - personal protective equipment
  - organisation policies and procedures on which the candidate bases the planning process.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTAMB012 Communicate in complex situations to support health care

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Merged HLTAMBFC301D/HLTAMBFC402C

Application

This unit of competency describes the skills and knowledge required to effectively communicate with patients, colleagues and health providers in complex situations using verbal and non-verbal interactions. It requires workers to address these significant challenges in the context of providing a health care service.

This unit applies to pre-hospital/out-of-hospital health care workers in a range of settings where direct patient contact is involved.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Communicate with patients and/or colleagues	1.1 Establish rapport through open, sensitive and confident manner 1.2 Obtain information from patient or others with sensitivity and respect for confidentiality as demanded by the situation

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	1.3 Convey information to patient or carer about care procedures in a manner and at a time consistent with the overall need of the patient and the situation as a whole
	1.4 Clarify and respect the role and authority of allied personnel involved in the situation
	1.5 Monitor patient's understanding of information and adjust the mode of communication according to the needs and urgency of the situation
2. Use effective communication techniques	2.1 Introduce self appropriately and ensure communication with patients and colleagues reflects an understanding and respect for individual differences and needs
	2.2 Use interviewing and active listening techniques to identify, clarify and confirm situation needs
	2.3 Detect any barriers to effective communication and ensure communication is clear and relevant to situation, context and activities undertaken
	2.4 Observe discretion and confidentiality, and treat patients, members of the public and colleagues with respect at all times, especially when using touch and other non-verbal means of communication
	2.5 Identify early signs of potentially complex or difficult situations or problems, and respond in a caring, firm, confident and reassuring manner
	2.6 Deal with conflict or the potential for conflict in a manner that prevents escalation.
	2.7 Seek advice and assistance about communication difficulties with patients and colleagues from supervisor to maintain effective communication.
3. Convey and receive information using available modes of communication	3.1 Use communication codes and equipment correctly.
	3.2 Convey complex information clearly and accurately using job specific communication systems
	3.3 Acknowledge and where required clarify information received using active listening to ensure information is correctly understood

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
4. Promote a positive public profile	4.1 Complete all documentation for required reports and records accurately and within identified time frames 4.2 Ensure clarity and accuracy of all recorded communications with people involved with health care support outside of health facilities and services 4.3 Ensure standards of personal presentation are appropriate to the organisation

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to *performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTAMB012 Communicate in complex situations to support health care

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Merged HLTAMBFC301D/HLTAMBFC402C

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- verbally communicated to patients and developed responses to meet the differing needs for each of the following 5 complex situations:
  - extrication from a motor vehicle accident
  - providing emergency care to a person under the influence of substance misuse
  - providing emergency care to a person who has a mental health condition
  - providing emergency care to a person who has been assaulted
  - providing emergency care to a person under stress due to a life-threating situation
- provided complex information clearly and accurately using a written response on at least 1 occasion.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- effective communication techniques appropriate to communication requirements of specific job role including:
  - codes and communication terminology
  - preparing handover reports
- communication and interpersonal skills including:
  - using interviewing techniques

© Commonwealth of Australia, 2025 HumanAbility

  - asking questions
  - using active listening
  - asking for clarification and probing
  - responding to a range of views
  - showing empathy with patient, carers and/or colleagues
  - demonstrating awareness of complex communication needs of a person with hearing difficulties or speech impediment
  - demonstrating awareness of complex communication needs of people with:
    - communication-related disabilities
    - mental health conditions
    - pharmacological and alcohol addiction or misuse
    - adverse behavioural responses to unfamiliar environments
  - complex communication needs of a person under stress due to situations to themselves or others such as trauma, death and life threatening situations
- organisation operating procedures applying to identified situations where complex communication needs may be present
- relevant communication codes and systems
- referral processes of organisation and counselling services
- roles of relevant allied health personnel
- relevant guidelines and organisation procedures relevant to the job role.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as, using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors

HLTAMB013 Contribute to managing the scene of an emergency

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Supersedes HLTAMBSC503B

Application

This unit describes the skills and knowledge required to manage procedures, provide security and communicate with other services involved with patient care at the scene of an emergency. It describes skills required in emergency situations, which may involve coordination with and by other emergency services personnel.

This unit applies to pre-hospital/out-of-hospital health care workers.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes of a unit of competency.	The Performance Criteria specify the level of performance required to demonstrate achievement of the Element.
1. Assess the environment to identify real and potential hazards	1.1 Gather information to enable accurate assessment of the situation or incident 1.2 Accurately identify existing and potential hazards. 1.3 Assess the approach to an incident, identifying visible signs of danger 1.4 Position appropriate resources to facilitate safe and

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes of a unit of competency.	The Performance Criteria specify the level of performance required to demonstrate achievement of the Element.
	timely access and egress
2. Communicate with those involved in the incident	2.1 Communicate information in a clear, concise and comprehensive manner about the incident or scene to coordinator and medical and other emergency and allied services
	2.2 Provide information to people involved in the incident, or facilitate others to do so
	2.3 Communicate and gather information from other organisations at the scene to inform the improvement of services and avoid duplication of effort
3. Control hazards	3.1 Ensure security and safety of the scene and negate or minimise existing and potential hazards to patients, colleagues and others
	3.2 Use personal protective clothing and equipment for infection prevention and workplace health and safety
	3.3 Manage appropriately any resistive or combative patients or others to ensure security of the scene
	3.4 Use hazard-controlling resources safely
4. Establish relationships and lines of communication with other services and networks	4.1 Develop and use relationships in a way that benefits the organisation by drawing on shared expertise, information and resources
	4.2 Work effectively as part of a multidisciplinary emergency team, communicating in a clear, concise and comprehensive manner
	4.3 Support mutual cooperation through contribution to relevant network meetings or forums
	4.4 Consult with affected and interested parties to support organisation goals and objectives
5. Evaluate the emergency	5.1 Monitor the environment at the scene to identify

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes of a unit of competency.	The Performance Criteria specify the level of performance required to demonstrate achievement of the Element.
scene environment	changes that may compromise safety or patient care
	5.2 Recognise environmental changes requiring additional resources and promptly communicate this to appropriate agencies
	5.3 Gather and evaluate data from other organisations to inform improvements in managing emergency scenes

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to *performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTAMB013 Contribute to managing the scene of an emergency

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Supersedes HLTAMBSC503B

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- contributed to managing 1 emergency scene including:
  - acknowledging and responding to a range of views and clarifying information from persons at the scene
  - establishing and maintaining inter-service communication and liaising and networking with personnel from other services to negotiate solutions of required tasks
  - identifying and managing any hazards at the scene and facilitating information to the public concerning safety
  - managing multiple competing priorities
  - identifying and implementing available resources in accordance with established clinical guidelines and protocols.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- relevant policies and procedures relating to emergency management including:
  - organisation policies and procedures
  - allied service procedures
  - State/Territory policies and procedures

© Commonwealth of Australia, 2025 HumanAbility

- working knowledge of command, control and coordination responsibilities
- relevant current national standards such as
  - Australian Emergency Management Handbook Series
  - National Emergency Risk Assessment Guidelines
  - Australian/New Zealand Standard AS/NZS ISO 31000:2009 Risk management – Principles and guidelines
  - National Safety and Quality Health Service (NSQHS) Standards
  - Australian Guidelines for the Prevention and Control of Infection in Healthcare 2010
- real and potential hazards and their effects
  - procedures and techniques required to control resistive or combative patients or others in order to secure the scene
- roles and responsibilities of other organisations including services provided by medical and other emergency and allied agencies, and their limitations
- current practices, procedures and equipment used in communicating in the workplace including:
  - organisation confidentiality requirements
  - organisation policy and procedures relating to liaison with other organisations.

Assessment Conditions

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations cannot be provided in the workplace. The following conditions must be met for this unit:

- use of suitable facilities, resources and equipment as per local governing body including:
  - emergency vehicles
  - personal protective equipment
  - specialised equipment used in safe removal and egress
  - organisation policies and procedures or established clinical guidelines and protocols on which the candidate bases the planning process.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTAMB014 Transport non-emergency patients under operational conditions

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Supersedes HLTAMBT301B

Application

This unit describes the skills and knowledge required to load, unload and drive vehicles safely to transport non-emergency patients to and from a facility or service. It includes using communication equipment and checking vehicles and equipment in order to restock and remedy faults.

This unit applies to pre-hospital/out-of-hospital health care workers.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare and check vehicle and equipment	1.1 Check vehicle and equipment systematically and comprehensively based on a local vehicle checklist or inventory 1.2 Conduct vehicle checks on a regular basis according to organisation procedures to ensure continuing serviceability of vehicle and equipment

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	1.3 Ensure interior and exterior cleanliness of vehicle in accordance with organisation policies and procedures for minimisation of infection risk to both non-emergency personnel and patients
	1.4 Maintain vehicle operating stock to acceptable minimum and maximum levels
	1.5 Maintain vehicle and equipment according to established clinical guidelines and protocols
2. Ensure faults in vehicle and equipment are remedied	2.1 Identify and report general nature of fault and liaise with organisation to remedy fault
	2.2 Assess risk of further damage to malfunctioning vehicle or equipment against patient care priorities, and communicate decisions to appropriate workers
	2.3 Rectify minor faults where possible
	2.4 Establish need for additional or replacement resources, and communicate to appropriate personnel
3. Convey and receive information using necessary modes of communication	3.1 Update knowledge to ensure communication techniques and procedures are consistent with relevant legislation and established clinical guidelines and protocols
	3.2 Notify appropriate receiving facility according to local standard non-emergency patient transport procedures
4. Load, unload and secure non-emergency patient and other specific personnel for transportation	4.1 Load and unload patient, consistent with safe work practices and organisation policy and procedures
	4.2 Check with patient that appropriate support or assistance during loading or unloading is being undertaken
	4.3 Transport appropriate personnel to accompany the patient, where such a need has been identified and there is a capacity to do so, in accordance with established clinical guidelines/protocols
	4.4 Organise and secure equipment in accordance with relevant Australian Standards, legislation and organisation policies and procedures

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
5. Drive vehicle	5.1 Drive vehicle in a manner that avoids exacerbation of patient's condition 5.2 Drive vehicle under operational conditions in a low risk manner and according to legal requirements 5.3 Ensure communication is established between driver and patient or patient care officer to ensure effective observation and patient care during transport 5.4 Consult map or Global Positioning System (GPS) accurately when required 5.5 Take the most efficient route by monitoring factors likely to cause delays or route deviations

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential *to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Assessment Requirements for HLTAMB014 Transport non-emergency patients under operational conditions

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Supersedes HLTAMBT301B

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- checked the safety of transport vehicle and safely transported 3 different non-emergency patients under operational conditions including loading and unloading.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- methods of loading and unloading non-emergency patients
- organisation policy and procedures for vehicles used for transportation of non-emergency patients, equipment in vehicles and vehicle checks
- relevant acts, regulations and organisation policies procedures related to transport of non-emergency patients including:
  - manual handling and lifting
  - care and/or restraint of patient during transportation – for example a patient with a mental health condition or a child
  - non-emergency patient care procedures during transportation
  - State/Territory road rules and regulations when driving emergency vehicles
- stock inventory and the safe storage and disposal of pharmacological products
- use of communications equipment and systems, and knowledge of relevant procedures
- vehicle and non-emergency resources organisation operating procedures.

© Commonwealth of Australia, 2025 HumanAbility

Assessment Conditions

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations cannot be provided in the workplace.

The requirement in the performance evidence for checking the safety of transport vehicle and safely transporting 3 non-emergency patients under operational conditions must have been demonstrated using simulation before being demonstrated in the workplace and with members of the public.

The following conditions must be met for this unit:

- use of suitable facilities, resources and equipment as per local governing body including:
  - transport vehicle (emergency or non-emergency)
  - stretcher
  - communication protocols, devices and equipment used in emergency vehicles
  - access to real people for whom the candidate provides transport.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Release	Comments
Release 2	This version was released in *HLT Health Training Package release 3.0.* Update to mapping and metadata. Equivalent competency outcome.
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Supersedes HLTAN402D. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to complete specific client related preparation tasks. It includes client preparation and transfer, the attachment and detachment of equipment and positioning the client for different procedures.

The unit applies to anaesthetic technicians working under the direction of, and in consultation with, an anaesthetist in any hospital or day surgery setting.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
1. Receive and prepare client	1.1 Greet client, confirm identity, correlate with identification band, client notes, consent form and follow other identification procedures according to organisation policy
	1.2 Acknowledge accompanying relatives and carers sensitively and appropriately
	1.3 Obtain verbal confirmation of surgical procedure and location if applicable
	1.4 Note any client factors that impact on their care
	1.5 Complete preparation tasks or check that these have been completed by others and provide clear information to client
	1.6 Monitor the client's safety, physical and emotional wellbeing through continual observation
	1.7 Identify, record and immediately report any variations, discrepancies and changes to the client, their documentation or their wishes to the anaesthetist and other relevant personnel
	1.8 Label client property and store securely in accordance with organisation policy
2. Attach and detach equipment	2.1 Select routine monitoring and other equipment in accordance with anaesthetist's preference
	2.2 Prepare skin and attach correctly, following infection prevention and control procedures
	2.3 Set equipment in operation and confirm functioning
	2.4 Carefully detach equipment with minimum risk of damage to client, staff or equipment, once the anaesthetist indicates that it is no longer required
	2.5 Clean and restore equipment ready for reuse
3. Provide assistance with insertion of intravenous cannulation	3.1 Liaise with anaesthetist to confirm requirements
	3.2 Observe client behaviour and respond to situations where support is required

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
	3.3. Provide optimum conditions to facilitate access
	3.4 Select, prepare and provide anaesthetic medical officer with required equipment in an aseptic manner
	3.5 Following insertion, adequately and safely secure the device
	3.6 Dispose of waste/sharps in accordance with waste management policies and infection control guidelines
4. Assist with transfer of clients	4.1 Plan to transfer client into procedural/operating room according to operational requirements
	4.2 Ensure relevant personnel and client are aware of the actions to be performed
	4.3 Detach equipment/infusions not required from the client before the transfer takes place
	4.4 Ensure equipment attached to the client is safely and correctly adjusted during transfer
	4.5 Employ safe moving and handling techniques during client transfer
	4.6 Ensure movement is conducted safely and client discomfort minimised
	4.7 Correctly re-connect and adjust equipment/infusions on completion of transfer, as necessary
	4.8 Maintain client’s dignity during transfer
5. Assist with positioning of clients	5.1 Inform client of positioning procedures to be completed, and seek his/her cooperation when appropriate
	5.2 Position client in consultation with other health care professionals
	5.3 Ensure all relevant equipment is available, is functioning correctly and is correctly attached/placed in accordance with the anaesthetist’s and surgeon’s preferences and the individual needs of the client
	5.4 Ensure client is protected from injury in collaboration

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
	with other relevant health professionals
	5.5 Obtain assistance to position client when necessary
	5.6 Observe any abnormal responses and report any action required to be taken to the anaesthetist

Foundation Skills

The Foundation Skills describe those required skills (employability skills, language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTANA001 Prepare clients for anaesthesia

Modification History

Release	Comments
Release 2	This version was released in *HLT Health Training Package release 3.0.* Update to mapping and metadata. Equivalent competency outcome.
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Supersedes HLTAN402D. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed established technical, infection control and safety procedures to receive, prepare, transfer and position at least 10 different clients for procedures involving anaesthesia
- placed patients in all of the following positions:
  - prone
  - lateral
  - lithotomy
  - supine
  - Trendelenburg
  - reverse Trendelenburg
- used the following equipment correctly:
  - beds
  - theatre trolley
  - operating table

© Commonwealth of Australia, 2025 HumanAbility

- patient handling equipment, including specialised equipment
- wheelchairs

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations (national, state/territory) for client preparation, and how these are applied in organisations:
  - codes of practice
  - duty of care
  - infection prevention and control
  - informed consent
  - mandatory reporting
  - privacy, confidentiality and disclosure
  - records management
  - rights and responsibilities of workers, employers and clients
  - work role boundaries – responsibilities and limitations
  - work health and safety (WHS), manual handling and safe client transfer and positioning techniques
- function and use of surgical safety lists
- client drains and traction attachments
- pre-medications and their effects relevant to providing assistance in anaesthesia
- anatomy, physiology and pathophysiology factors that impact client positioning and equipment interface for different client groups
- medical terminology specific to client procedures:
  - preparation
  - attachment/detachment of equipment
  - positioning
  - transfer
- clinical documentation and handover, including World Health Organisation *Surgical safety checklist*
- tasks involved in client preparation for surgery including:
  - premedications/routine medications
  - antithromboembolytic devices
  - removal of personnel items
  - toileting
  - fasting
  - pathology testing
  - clinical measurements

© Commonwealth of Australia, 2025 HumanAbility

  - radiological investigations
  - prewarming
  - surgical site preparation
- how to attach routine monitoring and equipment, including:
  - electrocardiography (ECG)
  - non-invasive blood pressure cuff
  - pulse oximetry
  - gas analyers
  - antithrombembolytic devices
  - diathermy plate
  - warming devices
  - client padding/protection
- intravenous access techniques & equipment used

Assessment Conditions

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations have not been provided in the workplace. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources
- modelling of industry operating conditions, including presence of situations requiring problem solving in non-routine situations

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTANA002 Monitor clients during anaesthesia

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence - incorporates content from multiple units, including HLTAN403D/HLTAN404D.

Application

This unit describes the skills and knowledge required to observe and monitor clients, taking a broad range of clinical tests and measurements.

The unit applies to anaesthetic technicians working under the direction of, and in consultation with, an anaesthetist in any hospital or day surgery setting.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
1. Observe client	1.1 Read and interpret information in client records 1.2 Check client's physiological parameters as directed 1.3 Identify deviations from acceptable limits, check equipment for true reading and report to the anaesthetist

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
	1.4 Identify and respond to signs of client discomfort, distress or adverse reaction within role responsibility
2. Take measurements and samples	2.1 Select and prepare equipment suited to test or measurement being conducted
	2.2 Prepare client according to requirements of test or measurement
	2.3 Maintain aseptic technique during collection of body fluid for analysis
	2.4 Accurately measure client's fluid intake and output/loss
	2.5 Perform measurement or take samples in accordance with manufacturer's guidelines and organisation policies and procedures
	2.6 Determine quality of measurement or sample based on established procedures
3. Report measurements	3.1 Read test results and report to the anaesthetist
	3.2 Promptly identify and report abnormal findings to the anaesthetist
	3.3 Document results of measurement or ensure documentation is completed

Foundation Skills

The Foundation Skills describe those required skills (employability skills, language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTANA002 Monitor clients during anaesthesia

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence - incorporates content from multiple units, including HLTAN403D/HLTAN404D.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- provided monitoring assistance to an anaesthetist during at least 5 procedures
- followed established technical and infection control procedures to undertake each of the following clinical measurements and tests at least twice:
  - arterial blood gases
  - blood pressure
  - blood glucose level
  - circulation
  - electrocardiography (ECG)
  - 12 lead ECG
  - haemoglobin
  - inspired/expired gases (Functional inspiratory oxygen (FiO2), Functional expiratory oxygen (FeO2), end-tidal carbon dioxide (ETCO2), tidal volume (TV), inspiratory pressure, minute volume (MV), respiratory rate (RR), minimal alveolar concentration (MAC)
  - level of consciousness
  - neuromuscular function
  - oxygenation (oximetry, FiO2, partial pressure oxygen (PaO2)

© Commonwealth of Australia, 2025 HumanAbility

- pulse
- respiration
- temperature
- fluid balance

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations (national, state/territory) for client monitoring, and how these are applied in organisations:
  - codes of practice
  - duty of care
  - infection prevention and control
  - informed consent
  - mandatory reporting
  - manufacturer's guidelines
  - privacy, confidentiality and disclosure
  - records management
  - rights and responsibilities of workers, employers and clients
  - work role boundaries – responsibilities and limitations
  - work health and safety
- clinical measurements undertaken by anaesthetic technicians:
  - purpose
  - how they are undertaken
  - normal results and variations from normal
  - implications of abnormal results for all of the following:
    - arterial blood gases
    - blood pressure
    - blood glucose level
    - peripheral perfusion/skin colour
    - haemodynamic (non-invasive blood pressure, invasive blood pressure, central venous pressure, pulmonary artery wedge pressure, pulse, heart rate, cardiac output)
    - dermatomes
    - ECG
    - 12 lead ECG
    - haemoglobin
    - blood tests samples for urea and electrolytes (U&E), coagulation profile (coags), full blood count (FBC),

© Commonwealth of Australia, 2025 HumanAbility

    - inspired/expired gases (FiO2, FeO2, ETCO2, TV, insp pressure, MV, RR, MAC)
    - level of consciousness clinical observation & entropy/bispectral index monitoring)
    - neuromuscular function
    - oxygenation (oximetry, FiO2, PaO2
    - pain assessment
    - temperature
    - acid base balance
    - heart & lung sounds
- fluid balance monitoring requirements, including:
    - urine
    - gastrointestinal
    - blood
    - irrigation
    - intravenous
    - intra-arterial
- clinical documentation requirements
- principles of biomedical science for anaesthesia:
    - electrical potential
    - fibreoptics
    - hydrostatic/atmospheric/oncotic pressure
    - oscillometry
    - photometrics/photoelectrics
    - thermistor
    - transducers

Assessment Conditions

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations have not been provided in the workplace. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including those required by tests specified in performance evidence
- modelling of industry operating conditions, including presence of situations requiring problem solving in non-routine situations

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTANA003 Assist with airway management

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence- incorporates content from multiple units, including HLTAN403D/HLTAN404D.

Application

This unit describes the skills and knowledge required provide assistance to the anaesthetist in airway management during anaesthesia and resuscitation, including difficult and emergency airways.

The unit applies to anaesthetic technicians working under the direction of, and in consultation with, an anaesthetist, in any hospital or day surgery setting.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
1. Select, check and prepare airway management equipment in accordance with manufacturer's guidelines	1.1 Review information about client and type of surgical procedure and anticipate type and calculate size of airway management equipment 1.2 Identify and respond to situations where anaesthetist

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
	needs to confirm selection
	1.3 Conduct pre-use safety check of selected equipment
	1.4 Diagnose airway management equipment faults and rectify within scope of role
	1.5 Prepare and position equipment for use following safe manual handling techniques
2. Perform bag and mask ventilation	2.1 Position patient for bag/mask ventilation
	2.2 Confirm adequate ventilation and rectify any issues preventing adequate ventilation
	2.3 Insert oropharyngeal and/or nasopharyngeal airway if indicated
	2.4 In consultation with the anaesthetist determine when to cease bag/mask ventilation
3. Assist with insertion of supraglottic airway devices (SAD)	3.1 Select, conduct pre-use check and prepare (SAD)
	3.2 Anticipate needs of the anaesthetist
	3.3 Assist with positioning of client
	3.4 Provide assistance during insertion
	3.5 Inflate cuff of SAD in accordance with manufacturer’s guidelines, clinical indications and anaesthetist’s directions
	3.6 Secure airway into position when directed
4. Assist with insertion of endotracheal, orally or nasally and/or endobronchial tubes	4.1 Select, conduct pre-use check and prepare endotracheal or endobronchial tube and other intubation equipment
	4.2 Assist with positioning of client for intubation
	4.3 Anticipate needs of the anaesthetist
	4.4 Provide assistance with insertion including use of stylet, bougie and/or cricoid manipulation
	4.5 If applicable, inflate cuff according to industry

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
	standard.
	4.6 When indicated, assist with insertion of throat pack including appropriate documentation of insertion/removal
	4.7 If directed, use a stethoscope to identify breathing sounds
	4.8 Secure airway into position when directed
5. Assist with rapid sequence induction	5.1 Determine rationale for rapid sequence induction
	5.2 Select, conduct pre-use check and prepare equipment for rapid sequence induction
	5.3 Inform client of procedures to be completed by the anaesthetic technician
	5.4 Apply cricoid pressure , monitor patient for vomiting and remove pressure when instructed by the anaesthetist
	5.5 Assist with insertion of endotracheal tube
	5.6 Secure airway into position if directed.
6. Assist with predicted difficult airway/intubation	6.1 Discuss and confirm equipment preparation, intubation plan and contingencies with anaesthetist
	6.2 Select, undertake pre-use safety checks and prepare required equipment
	6.3 Inform client of tasks to be undertaken by anaesthetic technician.
	6.4 Anticipate anaesthetist needs in patient preparation and assist throughout intubation
	6.5 When appropriate, return clean equipment to storage location and send used equipment for processing.
	6.6 Debrief with anaesthetic team on outcome of intubation.
7. Assist with connection/ disconnection of client to/from	7.1 Select and prepare ventilation equipment and materials

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
ventilation equipment	7.2 Set ventilation modes and parameters and ensure warning devices are switched on, tested and are registering that the equipment is safe prior to use with client
	7.3 Observe equipment whilst in use and take action immediately if fault develops to avoid danger to equipment, clients and staff
	7.4 Follow established procedures to rectify faulty equipment
	7.5 Check client's physiological parameters when required or as directed by anaesthetist
	7.6 Identify, validate and report deviations from acceptable limits of physiological parameters to the medical practitioner
	7.7 Report signs of client discomfort, distress or adverse reaction to the anaesthetist
8. Assist in management of client's airway during emergence phase	8.1 Assist anaesthetist with client positioning to facilitate management of client's airway
	8.2 Assist anaesthetist to optimise oxygenation of client
	8.3 Assist with oral/nasal/endotracheal/SAD suctioning.
	8.4 Assist anaesthetist as required during SAD removal or extubation and be prepared for possible reintubation
	8.5 Provide reassurance to the client and take action to limit injury
	8.6 Observe client's condition throughout the procedure and take action when required or at the direction of the anaesthetist

Foundation Skills

The Foundation Skills describe those required skills (employability skills, language,

© Commonwealth of Australia, 2025 HumanAbility

literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTANA003 Assist with airway management

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence- incorporates content from multiple units, including HLTAN403D/HLTAN404D.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed established airway management processes and techniques including performing or assisting with at least 10 of each of the following:
  - pre-oxygenation
  - bag or mask ventiliation
  - Supraglottic Airway Device (SAD) insertion
  - oral insertion of endotracheal tubes
  - airway management during emergence
- followed established airway management processes and techniques including performing or assisting with at least 3 of each of the following:
  - endobronchial tube insertion
  - nasal insertion of endotracheal tubes
  - laser tubes
  - rapid sequence induction
  - predicted difficult airway
  - attaching clients to ventilators
  - tracheostomy tube

© Commonwealth of Australia, 2025 HumanAbility

- performed or assisted with airway management on different client types of varied ages, both conscious and unconscious
- responded and adapted to airway management problems:
  - routine
  - unpredictable

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations (national, state/territory) for airway management, and how these are applied in organisations:
  - codes of practice
  - duty of care
  - infection prevention and control
  - informed consent
  - mandatory reporting
  - privacy, confidentiality and disclosure
  - records management
  - rights and responsibilities of workers, employers and clients
  - work role boundaries – responsibilities and limitations
  - work health and safety (WHS)
- considerations for airway management in different types of surgery, including:
  - general/regional/local anaesthetic and sedation
  - remote site - radiology, electroconvulsive therapy (ECT) & endoscopy
  - general/gastro-intestinal surgery
  - ear, nose and throat surgery
  - gynaecological surgery
  - obstetric surgery
  - orthopaedic surgery
  - vascular surgery
  - urological surgery
  - oral/dental/maxillofacial surgery
  - cardiothoracic surgery
  - neurosurgery
  - plastic surgery
  - trauma/emergency surgery
  - ophthalmic surgery
  - paediatric

© Commonwealth of Australia, 2025 HumanAbility

- airway equipment, including function and operating guidelines, use, indications and limitations, and criteria for withdrawal for:
  - laryngoscopes blades
  - fibreoptic bronchoscopes
  - videoscopes
  - cricothyrotomy kits
  - oral and nasal airways
  - oral endotracheal tubes
  - laser tubes
  - nasal endotracheal tubes
  - tracheostomy tubes
  - endobronchial tubes
  - supraglottic airway devices
  - jet insufflations
  - intubation adjuncts – bougie, stylet, Magill's forceps
- types of suction equipment, its indication for use and hazards associated with usage
- airway management procedures, common issues and scope of technician role in:
  - bag or mask ventilation
  - Supraglottic airway device insertion
  - insertion of endotracheal tube, orally or nasally and endobronchial tubes
  - rapid sequence induction
  - predicted difficult airway
  - airway management during emergence
  - emergency airway algorithms
  - gas induction
- client considerations for airway management:
  - relationship between client positioning techniques and optimal airway management
  - pre-medications and their effects on respiration
  - causes, signs and symptoms of loss of airway
  - remedial actions to address loss of airway
  - type of surgery, including shared airway
- anatomy, physiology and pathophysiology factors that impact airway management for different client groups
- medical terminology specific to airway management
- roles and responsibilities of those participating in the anaesthetic procedure
- Australian and New Zealand College of Anaesthetists (ANZCA) *Policy guidelines* and *Difficult airway society guidelines*

Assessment Conditions

The following aspects of the performance evidence must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations have not been provided in the workplace:

- followed established airway management processes and techniques including performing or assisting with at least 10 of each of the following:
  - pre-oxygenation
  - bag or mask ventilation
  - SAD insertion
  - oral insertion of endotracheal tubes
  - airway management during emergence

The following aspects of the performance evidence must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions:

- followed established airway management processes and techniques including performing or assisting with at least 3 of each of the following:
  - laser tubes
  - rapid sequence induction
  - predicted difficult airway
  - attaching clients to ventilators
  - nasal insertion of endotracheal tubes
  - endobronchial tube insertion
  - gas induction
  - tracheostomy tube
  - failed airway scenarios

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - airway management equipment:
    - nasal and oral endotracheal tubes
    - tracheostomy tubes
    - laryngoscopes, including video, conventional, McCoy and fibreoptic
    - video or fibreoptic bronchoscopes
    - endobronchial tubes/endobronchial blockers
    - other difficult intubation equipment
    - emergency airway equipment
    - intubation aids (e.g. stylet, bougie, exchange catheter)
    - oropharyngeal/nasopharyngeal airways
    - Supraglottic airways
    - anaesthetic circuits

© Commonwealth of Australia, 2025 HumanAbility

    - self inflating bag resuscitator
    - face masks
    - connectors
    - filters
    - Magill's forceps
  - general medical equipment:
    - suction equipment for oesophageal and tracheal suction
    - throat packs
    - lubricant
    - scissors
    - syringes
  - monitoring equipment:
    - electrocardiography (ECG)
    - stethoscope
    - oxygen and gas analyser, spirometer, airway pressure and carbon dioxide monitor
    - cuff pressure gauge
    - pulse oximetry
    - neuromuscular transmission monitor
    - arterial blood gas measurement
  - personal protective equipment
  - paediatric & adult mannequins for initial simulated assessment
- modelling of industry operating conditions, including presence of situations requiring problem solving in non-routine situations

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTANA004 Respond to anaesthesia related emergencies

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to recognise signs of client deterioration that pose an immediate threat to life and respond appropriately, including the preparation of drugs used in emergency situations.

This unit applies to anaesthetic technicians working under the direction of, and in consultation with, an anaesthetist/medical officer in any hospital or day surgery setting.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
1. Recognise clinical emergencies	1.1 Recognise signs of deterioration in clients and immediately report to appropriate clinician
	2.1 Monitor, interpret and promptly recognise abnormal equipment readings and immediately report abnormal values to anaesthetist/medical staff

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
2. Respond to clinical emergencies	2.1 Maintain client's vital functions pending attendance of medical staff
	2.2 Use communication escalation techniques according to organisation procedures
	2.3 Promptly obtain emergency equipment and make ready for relevant medical staff
	2.4 Assist the anaesthetist/medical staff to perform any emergency procedures under direction
	2.5 Assist with the medical management of the client and allocate work to other team members according to priority
3. Prepare drugs for administration in emergency situations	3.1 Ensure required drugs, diluents and fluids are to hand
	3.2 Read expiry date for each drug, diluent or fluid and check it has not been exceeded
	3.3 Make accurate calculations to prepare drug to correct nature, quantity and dilution based on medical officer requirements
	3.4 Check drugs with an authorised person prior to and after mixing
	3.5 Use correct equipment and maintain sterility of drug and diluent
	3.6 Check final drug dilution with anaesthetist or medical officer
	3.7 Administer drugs under the direction and supervision of the anaesthetist
	3.8 Complete medication documentation in accordance with organisation policies and procedures
4. Finalise emergency procedures	4.1 Document accurate and complete record of emergency situation and actions taken according to scope of own role
	4.2 Participate in emergency de-brief according to

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
	organisation procedures
	4.3 Review own role in emergency and identify potential actions to support future improvement

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential *to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTANA004 Respond to anaesthesia related emergencies

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- determined and actioned response to diverse emergency situations, including:
  - respiratory/ airway emergencies:
    - difficult/compromised airway
    - can’t intubate can’t ventilate
    - bronchospasm
    - pneumothorax
    - laryngospasm
    - aspiration
    - suxamethonium apnoea
    - hypoxia/hypoxaemia
    - hypercarbia
  - cardiac emergencies:
    - ventricular fibrillation
    - ventricular tachycardia
    - pulseless electrical activity
    - asystole
    - third degree heart block

© Commonwealth of Australia, 2025 HumanAbility

    - cardiac arrhythmias which pose threat to life for individual clients
    - perioperative myocardial infarcts
    - cardiac tamponade
  - malignant hyperthermia
  - hypothermia
  - hypovolaemic shock/massive blood loss
  - severe hypotension
  - severe hypertension
  - pulmonary hypertension
  - anaphylactic shock
  - thromboembolism or pulmonary embolism – fat, thrombus, air/gas, amniotic fluid
  - pulmonary oedema & negative pressure pulmonary oedema
  - local anaesthetic toxicity
  - total spinal
  - metabolic and endocrine abnormalities
  - drug administration error and adverse drug reaction
  - septic shower
- followed established procedures for use of emergency equipment/ consumables, including:
  - difficult airway trolley and other airway and suction equipment
  - cardiac arrest trolley and defibrillator
  - heating/cooling equipment
  - infusion/transfusion equipment
  - monitoring equipment
  - medications
  - chest drains

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations (national, state/territory) for emergencies, and how these are applied in organisations:
  - codes of practice
  - duty of care
  - infection prevention and control
  - informed consent
  - mandatory reporting
  - privacy, confidentiality and disclosure
  - records management

© Commonwealth of Australia, 2025 HumanAbility

  - rights and responsibilities of workers, employers and clients
  - work role boundaries – responsibilities and limitations in emergencies
  - work health and safety
- the following anaesthetic emergencies, their signs, symptoms, physiological and non-physiological causes, treatment or resolution and prediction:
  - respiratory/ airway emergencies:
    - difficult/compromised airway
    - can’t intubate can’t ventilate
    - bronchospasm
    - pneumothorax
    - laryngospasm
    - aspiration
    - suxamethonium apnoea
    - hypoxia/hypoxaemia
    - hypercarbia
  - cardiac emergencies:
    - ventricular fibrillation
    - ventricular tachycardia
    - pulseless electrical activity
    - asystole
    - third degree heart block
    - cardiac arrhythmias which pose threat to life for individual clients
    - perioperative myocardial infarcts
    - cardiac tamponade
  - malignant hyperthermia
  - hypothermia
  - hypovolaemic shock/massive blood loss)
  - severe hypotension
  - severe hypertension
  - pulmonary hypertension
  - anaphylactic shock
  - thromboembolism or pulmonary embolism – fat, thrombus, air/gas, amniotic fluid
  - pulmonary oedema & negative pressure pulmonary oedema
  - local anaesthetic toxicity
  - total spinal
  - metabolic and endocrine abnormalities
  - drug administration error and adverse drug reaction
  - septic shower
- external emergencies including equipment failure, equipment/consumable supply shortage, weather events, fire and power outage

© Commonwealth of Australia, 2025 HumanAbility

- algorithms used to de-escalate anaesthetic emergencies
- crisis management basic principles including internal and external crisis sources
- methods, principles and procedures for dealing with emergencies, including:
  - problem solving techniques
  - graded assertiveness
  - crisis communication principles
  - clinical handover
  - multidisciplinary team structure and functions
  - situation monitoring/situational awareness
  - massive transfusion protocol
  - Australian Resuscitation Council guidelines
  - Australian and New Zealand College of Anaesthetists (ANZCA) *Anaphylaxis guidelines*
  - ANZCA *Malignant hyperthermia guidelines*
- features, functions and safe use of emergency equipment
- emergency drug administration:
  - equipment
  - routes of administration in anaesthesia context
  - types, functions and effects of different drugs
  - legislation and protocols

Assessment Conditions

Skills must have been demonstrated in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including those to simulate management of all emergencies identified in the Performance Evidence:
- modelling of industry operating conditions, including presence of situations requiring problem solving in non-routine situations

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTANA005 Maintain quality and supply of anaesthetic equipment and consumables

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTAN408/HLTAN506. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to check functioning of equipment, implement routine and planned equipment maintenance, and maintain the supply of anaesthetic supplies. It also covers the evaluation of new equipment.

The unit applies to anaesthetic technicians working in any hospital or day surgery setting.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards, and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
1. Check functioning and conduct routine maintenance	1.1 Check availability of minimum equipment requirements as per Australia New Zealand College of Anaesthetists (ANZCA) policy guidelines 1.2 Perform safety checks 1.3 Ensure anaesthetic equipment is functioning correctly

© Commonwealth of Australia, 2025 HumanAbility

	and rectify any routine problems
	1.4 Clean and safely store equipment
	1.5 Report hazardous, damaged or faulty equipment and arrange repairs
	1.6 Disassemble and clean anaesthetic equipment
	1.7 Dispose of disposable/single use items
2. Maintain adequate stock levels of anaesthetic consumable items	2.1 Access and interpret stock documentation, store and rotate stock, check stock levels and take action to maintain supply
	2.2 Communicate unavailability of stock to relevant personnel
	2.3 Identify when to withdraw and dispose of stock in compliance with health hazard notices and environmental protection authority
	2.4 Dispose of expired stock safely in accordance with legislative requirements
	2.5 Ensure product disclosure information, technical data sheets and material safety data sheets are available and referenced as required
3. Implement planned maintenance	3.1 Identify maintenance procedures and appropriate documentation
	3.2 Maintain anaesthetic and monitoring equipment
	3.3 Complete regular servicing in accordance with scope of own role
	3.4 Complete accurate maintenance documentation and escalate to relevant personnel any issue
	3.5 Review maintenance records and update
4. Arrange repairs of anaesthetic equipment	4.1 Identify anaesthetic equipment faults and place safety hazard label on anaesthetic equipment
	4.2 Complete repair request documentation and give to relevant personnel for actioning
	4.3 Complete routine and minor anaesthetic equipment repairs

© Commonwealth of Australia, 2025 HumanAbility

5. Orientate staff to anaesthetic and monitoring equipment	5.1 Provide instruction on anaesthetic equipment to other members of the multidisciplinary team 5.2 Provide in-service training on anaesthetic equipment to other members of the multidisciplinary team
6. Evaluate anaesthetic and monitoring equipment for purchase	6.1 Develop evaluation criteria and documentation for equipment being considered for trialling or purchase in consultation with the anaesthetist 6.2 Apply agreed criteria to evaluation and provide recommendations for purchase 6.3 Provide feedback to companies on products under development, as requested

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential *to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTANA005 Maintain quality and supply of anaesthetic equipment and consumables

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTAN408/HLTAN506. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed legislation, industry standards & code of practice, manufacturer's guidelines and organisation procedures to maintain the standard and supply of anaesthetic equipment and supplies for at least one facility, including:
  - routine cleaning and care
  - planned maintenance and servicing
  - arranging repairs
  - testing for functionality and safety, including ANZCA level 2 and level 3 check of the anaesthetic machine
- provided in service training on at least one piece of equipment
- evaluated one piece of equipment

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- types of anaesthetic equipment and consumables required:
  - medications, forms and other consumables

© Commonwealth of Australia, 2025 HumanAbility

- anaesthetic airway, breathing, infusion monitoring devices
- emergency equipment
- non-disposable equipment

- areas that require anaesthesia related equipment and consumables:
  - anaesthetic and emergency trolleys
  - induction room and/or store rooms
  - anaesthetic machines
- set-up & safety checks, principles & limitation of operation, features/functions and safe use of anaesthetic and monitoring equipment, including their service schedule, storage, disassembly and cleaning requirements, including:
  - anaesthetic machine and components, including:
    - alarms and measurement devices
    - suction and scavenger
    - ventilator
    - bulk and local gas supply equipment
    - vaporisers
  - breathing systems/circuits and attachments
  - airway and breathing equipment including:
    - fibreoptic, video and other intubation aids
    - consumables
    - breathing circuits and portable ventilators
    - invasive and no-invasive monitoring equipment
    - emergency equipment
    - thermoregulation equipment
    - infusion and rapid infusion equipment
    - tourniquets and exsanguinators
    - antithromboembolitic
    - diathermy
- routine problems that occur with different types of equipment and how to rectify within own scope
- principles of physics and measurement as it relates to anaesthetic practice, including:
  - thermodynamics
  - gas laws
  - fluid dynamics
  - potentiometry
  - optics
  - transducers
  - vaporisation
  - ultrasound
- basic electronic components and their function

© Commonwealth of Australia, 2025 HumanAbility

- legal and ethical considerations (national, state/territory) for management of equipment and consumables, and how these are applied in organisations:
  - codes of practice
  - duty of care
  - infection prevention and control
  - records management
  - rights and responsibilities of workers and employers
  - work role boundaries – responsibilities and limitations
  - work health and safety (WHS):
    - electrical safety requirements for equipment
    - gas safety

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, modelling of industry operating conditions, including presence of situations requiring problem solving in non-routine situations

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTANA006 Assist with clinical procedures used in anaesthesia

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to plan and prepare for anaesthesia for a range of surgical specialities, and provide assistance to the anaesthetist during regional anaesthesia, invasive monitoring and other anaesthetic related procedures. It includes the ability to prepare and monitor both client and equipment during the procedure.

This unit applies to anaesthetic technicians working under the direction of, and in consultation with, an anaesthetist in any hospital or day surgery setting.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
1. Prepare client and equipment	1.1 Read procedure information, check anaesthetist requirements and surgical factors that may impact on the anaesthetic procedure 1.2 Develop and communicate individualised anaesthesia

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
	plan in collaboration with anaesthetist
	1.3 Select and prepare equipment and materials in relation to sequence and requirements of the clients and their anaesthetic procedure
	1.4 Ensure all relevant anaesthetic equipment and materials are clean/disinfected/sterile, functioning correctly, prepared for use, and if necessary, calibrated
	1.5 Position equipment and materials for accessibility
	1.6 Accurately document accountable anaesthetic items
	1.7 Position the client for the procedure and provide optimum conditions to facilitate access
	1.8 Check environment for administration of anaesthesia and adjust accordingly
2. Provide assistance to the anaesthetist	2.1 Provide assistance to the anaesthetist during anaesthetic procedures and the induction, maintenance and completion of anaesthesia
	2.2 Check client’s physiological parameters when required or as directed by anaesthetist
	2.3 Complete required documentation
	2.4 Identify, validate and report deviations from acceptable limits of the client’s physiological parameters to the anaesthetist
	2.5 Report signs of client discomfort, distress or adverse reaction to the anaesthetist
	2.6 Assist with the perioperative medical management of the patient
3. Restore equipment and environment at completion of procedure	3.1 Clean, disinfect or sterilise equipment in accordance with infection control guidelines and manufacturer’s instructions
	3.2 Manage faulty equipment in accordance with organisation policies and procedures and manufacturer's guidelines

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
	3.3 Restore the environment to required status
	3.4 Restock consumables according to facility requirements

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential *to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTANA006 Assist with clinical procedures used in anaesthesia

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- planned, prepared and assisted during induction, maintenance and completion of anaesthesia for each of the following for at least two lists each:
  - general surgery/gastro-intestinal – major laparotomy & minor surgery
  - ear, nose and throat surgery
  - gynaecological surgery - major & minor
  - obstetric surgery
  - orthopaedic surgery - major & minor
  - vascular surgery - major & minor
  - urological surgery - major & minor
  - ophthalmic surgery
  - paediatric – minor ear nose and throat (ENT), general & orthopaedic
  - remote site anaesthesia – radiology, electroconvulsive therapy (ECT), endoscopy
- provided assistance with each of the following procedures on at least 3 occasions, ensuring use of aseptic technique:
  - spinal
  - arterial line
  - central venous catheter

© Commonwealth of Australia, 2025 HumanAbility

- provided assistance with each of the following procedures on at least 2 occasions, ensuring use of aseptic technique:
  - local
  - regional blocks including use of ultrasound
    - upper limb
    - lower limb
    - TAP block
  - epidural/combined spinal-epidural
  - caudal
  - peripherally inserted central catheter
  - midline catheter
  - transoesophageal echocardiograph (TOE)
  - blood patch
  - intercostal drainage
  - pain management procedures (e.g. chemical sympathectomy)
  - vascular 'cut downs'
  - external pacing
  - pulmonary artery catheter
  - balloon pump
  - intracranial pressure monitoring
  - 12 lead ECG
- monitored physiological parameters with reference to standard values of normal physiological function for each client's usual parameters

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations (national, state/territory) for clinical procedures, and how these are applied in organisations:
  - codes of practice
  - duty of care
  - infection prevention and control
  - informed consent
  - mandatory reporting
  - privacy, confidentiality and disclosure
  - records management and clinical documentation
  - rights and responsibilities of workers, employers and clients
  - work role boundaries – responsibilities and limitations
  - work health and safety (WHS)

© Commonwealth of Australia, 2025 HumanAbility

- types of regional and invasive procedures, how they are performed, and the anaesthetic technician's role, for the following:
  - spinal
  - epidural
  - combined spinal-epidural
  - caudal
  - local
  - regional blocks, including use of ultrasound
    - upper limb
    - lower limb
    - TAP block
  - blood patch
  - arterial line
  - central venous catheter
  - peripherally inserted central catheter (PICC)
  - midline catheter
  - transoesophageal echocardiograph (TOE)
  - intercostal drainage
  - pain management procedures
  - vascular 'cut downs'
  - external pacing
  - pulmonary artery catheter
  - balloon pump
  - intracranial pressure monitoring
  - cell salvage/autotransfusion
  - 12 lead ECG
  - spinal cord monitoring
- types of equipment used for regional and invasive procedures, including function and operating guidelines, use, indications and limitations, and criteria for withdrawal
- monitoring of and maintenance of stock levels perioperatively, including CO2 absorber, medications, fluids, consumables
- anatomy, physiology factors that impact regional and invasive procedures for different client groups
- pre-medications and their effects
- types of surgery – emergency/urgent/elective/day case
- types of common surgical procedures, their classification and factors for planning, preparation and management of anaesthesia, including:
  - general surgery/gastro-intestinal – major laparotomy & minor
  - ear, nose and throat surgery
  - gynaecological surgery - major & minor
  - obstetric surgery

© Commonwealth of Australia, 2025 HumanAbility

  - orthopaedic surgery - major & minor
  - vascular surgery - major & minor
  - urological surgery - major & minor
  - ophthalmic surgery
  - paediatric – minor ENT, general & orthopaedic
  - dental/faciomaxillary surgery
  - cardiothoracic Surgery
  - neurosurgery
  - plastic/Reconstructive Surgery
  - trauma/emergency surgery
  - remote site anaesthesia - radiology, ECT/endoscopy
- indications for surgery and risk factors
- surgical approaches and duration of surgery
- position of clients for surgery
- common anaesthetic and surgical complications
- risk of anaesthetic technique for surgical procedure
- specialty medications required perioperatively
- expected blood loss for different types of surgery
- events during surgery that could affect anaesthesia, including:
  - massive blood loss
  - client repositioning
  - cross clamping and unclamping of aorta and other major blood vessels
  - orthopaedic bone cement syndrome
  - transurethral resection of the prostate (TURP) syndrome
  - application/release of tourniquet
  - tourniquet time
  - abdominal carbon dioxide insufflation
- co-existing diseases and their perioperative medical management
- age of the client and associated risks
- types of anaesthetic techniques and preference card systems
- intraoperative procedures, including:
  - nasogastric tube placement and suctioning
  - endotracheal tube suctioning
  - tracheostomy toileting
  - rapid infusion, blood transfusion & massive transfusion protocol
  - fluid balance-urine, gastric, blood loss & infusion
  - invasive/non-invasive clinical measurements
  - airway exchange
  - pain management techniques
  - invasive/non-invasive clinical measurement planning options

© Commonwealth of Australia, 2025 HumanAbility

    - airway management planning options
- ancillary equipment choices
- pressure and nerve care
- normal range of motion for client
- thermal management
- prevention of thromboembolism
- patient emotional and physiological responses to surgery
- procedures for transfer of anaesthetised patient to intensive care or radiology and equipment used
- communication techniques within multidisciplinary team in operating theatre environment

Assessment Conditions

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations have not been provided in the workplace. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including those required by procedures nominated in the Performance Evidence
- modelling of industry operating conditions, including presence of situations requiring problem solving in non-routine situations

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTANA007 Monitor medications in the anaesthetic environment

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to access and prepare medications, fluids, blood and blood products prescribed by the anaesthetist, to monitor client responses.

The unit applies to anaesthetic technicians working under the direction of, and in consultation with, an anaesthetist in any hospital or day surgery setting.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
1. Access medications	1.1 Access medications when directed by anaesthetist or other health professional 1.2 Follow legal and organisation procedures to obtain drugs 1.3 Identify indication of medication

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
2. Prepare medications for administration	2.1 Read client records for information that may impact medication administration 2.2 Communicate details from client records to anaesthetist or health professional 2.3 Accurately measure, calculate and confirm medication dosages as directed by health professional and in accordance with requirements for specific medications 2.4 Aseptically prepare and correctly label intravenous drugs 2.5 Program infusion device and confirm program with second authorised person 2.6 Safely dispose of waste and sharps
3. Monitor and record client responses	3.1 Identify adverse client responses and report to anaesthetist 3.2 Recognise and respond to acute and delayed adverse reactions to drugs within role of responsibility 3.3 Accurately record responses
4. Store medications	4.1 Secure, restock and store medications according to law and health care environmental policy 4.2 Identify and dispose of date expired medications 4.3 Complete accurate drug documentation
5. Prepare for and administer intravascular fluid, blood or blood products	5.1 Access and select intravascular solution, blood or blood product according to prescription 5.2 Confirm selected solution is fit for use 5.3 Select infusion set, connectors and/or filters 5.4 Assemble equipment and materials and prime in an aseptic manner ready for use 5.5 Program equipment according to prescription and confirm client identity with another authorised person

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
	5.6 Administer and monitor infusion and infusion site
	5.7 Store infusion equipment and solutions correctly

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential *to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTANA007 Monitor medications in the anaesthetic environment

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- accessed, prepared and monitored medications, fluids, blood and blood products in accordance with legislation and the organisation's medication and delegation policies and practice under the supervision of a health professional on at least 10 different occasions
- administered crystalloids, colloids, blood & blood products
- programmed infusion devices at least twice
- set up rapid infusion device at least twice
- prepared drugs for administration via each of the following routes at least twice:
  - inhalational
  - intravenous
  - intramuscular
  - oral
  - subcutaneous
  - topical

© Commonwealth of Australia, 2025 HumanAbility

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations (national, state/territory) for the handling and administration of medications, and how these are applied in organisations:
  - approved drug and fluid abbreviations
  - Australian and New Zealand scheduling for drugs and poisons
  - Australian and New Zealand Society of Blood Transfusion guidelines (ANZSBT)
  - codes of practice
  - records management requirements
  - storage
  - work role boundaries – responsibilities and limitations
  - rights and responsibilities of workers, employers and clients
  - work health and safety (WHS)
- pharmacology for drugs commonly used in anaesthesia, including:
  - sources of drugs (natural/endorphins/synthetic)
  - drug nomenclature (chemical/generic/brand names)
  - drug classifications
  - common abbreviations
  - pharmacodynamics - drug receptor interactions/dose-response relationships/therapeutic index
  - pharmacokinetics (ADME) absorption/distribution/metabolism/excretion
  - pharmacotherapeutics
  - adverse drug reactions and interactions
  - toxicity/toxicology
- drug administration routes:
  - enteral medication – endotracheal, sublingual, buccal, rectal, vaginal, urethral
  - parenteral medication - intravenous, intramuscular, intraosseous, intracardiac, intraarticular, intrauterine, intrathecal, subcutaneous, intra-arterial, inhalational
  - topical medication - subcutaneous, transnasal, transdermal, ocular, inhalational, aural
- formulations, including
  - wafers
  - tablets
  - lozenges
  - capsules
  - elixir
  - suspension
  - solutions
  - creams

© Commonwealth of Australia, 2025 HumanAbility

- major drug groups used in anaesthesia - presentation, formulation, indication, mode of action, system of delivery and administration routes, precautions, side effects, contraindications and adverse reactions, storage requirements, factors influencing drug actions, dosage variations for different types of clients for all of the following:
  - inhalational induction agents
  - intravenous induction agents
  - analgesics
  - non steroidal anti-inflammatory drugs (NSAID)
  - anti-emetics
  - muscle relaxants
  - respiratory medications
  - anticoagulants
  - local anaesthetics
  - antibiotics
  - cardiovascular medication, including diuretics
  - electrolytes
- drugs used in the management of the following conditions (which may complicate or co-exist with anaesthesia):
  - adrenal dysfunction
  - anaphylaxis
  - angina
  - bronchospasm
  - cardiac arrest
  - cardiac arrhythmias
  - congestive heart failure
  - coagulopathies
  - deep vein thrombosis
  - endocrine dysfunction
  - hypoglycaemia
  - hypotension
  - hyperglycaemia
  - hypertension
  - pulmonary oedema/embolism
  - raised intracranial/intra-ocular pressure
  - respiratory depression/compromise
  - stroke
  - seizure
  - uterine atony
- methods of drug preparation, including:
  - dilutions

© Commonwealth of Australia, 2025 HumanAbility

  - reconstitutions
- factors to consider when calculating medication dosages including:
  - calculation formulae
  - calculation of dosages of injectable drugs (liquid, solid, unit dosages)
  - flow rate drops per minute
  - flow rate millilitres per hour
  - duration of infusion
  - paediatric dosage calculations (body weight, surface area, age related dose reduction)
  - geriatric dosage calculations (body weight, surface area and age)
- methods of storage and handling of medication
- equipment for administration of medications, including:
  - volumetric pumps
  - syringe drivers
  - consumables
- infusion products and equipment:
  - rapid infusers
  - warming devices
  - burettes
  - infusion sets and attachments
  - blood and blood products
  - crystalloids
  - colloids
- massive transfusion protocol
- emergency medical management of anaphylaxis and adverse drug/fluid reactions

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
- manufacturer's instructions
- organisation policies and procedures
- MIMS
- Australian & New Zealand Society of Blood Transfusion (ANZSBT)
- Australian and New Zealand College of Anaesthetists (ANZCA)
- medications
- modelling of industry operating conditions, including presence of situations requiring problem solving in non-routine situations

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTARO001 Develop aromatherapy practice

Modification History

Release	Comments
Release 2	This version was released in *HLT Health Training Package release 3.0.* Update to mapping and metadata. Equivalent competency outcome.
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Supersedes HLTARO401C. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Application

This unit of competency describes the skills and knowledge required to establish the foundations of aromatherapy practice, evaluate what makes a sustainable practice and then to develop an approach to own practice.

This unit applies to aromatherapists.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Establish foundations of aromatherapy practice	1.1 Identify, access and interpret information on central philosophies of aromatherapy practice 1.2 Evaluate the aromatherapy system of treatment and

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	its application to current health issues
	1.3 Compare and contrast aromatherapy, other complementary health modalities and broader health practice
2. Represent the aromatherapy framework	2.1 Determine information needs of different individuals and groups
	2.2 Identify key messages that represent the philosophy and practice of aromatherapy
	2.3 Communicate information about aromatherapy at level of depth appropriate to audience needs
3. Determine requirements for sustainable aromatherapy practice	3.1 Identify key issues that affect the development and sustainability of professional practice
	3.2 Take account of economic, environmental, human and social considerations and their impact on professional practice
	3.3 Establish a personal health strategy that supports aromatherapy practice
	3.4 Access, interpret and collate information that supports professional practice
4. Develop approach to own practice	4.1 Reflect on professional goals and aspirations
	4.2 Identify and assess professional opportunities in aromatherapy
	4.3 Reflect on the opportunities and constraints of individual personal circumstances
	4.4 Make decisions about practice direction, based on reflection and research
	4.5 Develop practical strategies that address own practice goals

Assessment Requirements for HLTARO001 Develop aromatherapy practice

Modification History

Release	Comments
Release 2	This version was released in *HLT Health Training Package release 3.0.* Update to mapping and metadata. Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Supersedes HLTARO401C. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- used critical thinking skills to:
  - review and reflect on information from a range of sources about aromatherapy practice
  - evaluate and articulate requirements for sustainable aromatherapy practice
- communicated key messages about aromatherapy therapy to meet the information needs of at least 3 different individuals or groups
- developed goals for own practice that reflect the values and philosophies of aromatherapy

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- philosophies and principles of aromatherapy therapy:
  - historical development of aromatherapy
  - central philosophies
  - key individuals contributing to development

© Commonwealth of Australia, 2025 HumanAbility

    - aromatherapy system of treatment
    - different types of aromatherapy treatments and their key benefits, features and purpose
    - psycho-aromatherapy – how this terms is used, what it is and the role of mind-body connection in aromatherapy practice
- key features of complementary therapies used in conjunction with aromatherapy, including:
    - massage
    - reflexology
- key features of allied health services and their relationship to aromatherapy, including:
    - reflexology
    - naturopathy
    - counselling
- place of aromatherapy practice in the broader health care system
- features and differences of allopathic and naturopathic approaches to health and health treatments
- professional aromatherapy networks and industry bodies
- features of aromatherapy product retailing
- different models of professional aromatherapy practice and their key features:
    - sole practitioners
    - employment opportunities in retail and multi-modality clinics
- issues for consideration in personal health strategy:
    - health and diet
    - rest
    - exercise
    - stress management
    - personal contraindications to particular aromatic plant oils
- components of sustainable practice:
    - economic – opportunities and viability
    - environmental
    - human – personal health, professional development
    - social responsibility
    - aromatherapy self-care
- legal and ethical considerations (national and state/territory) and how these are applied in individual practice:
    - children in the workplace
    - codes of conduct
    - continuing professional education
    - discrimination
    - dignity of risk
    - duty of care
    - human rights

© Commonwealth of Australia, 2025 HumanAbility

- infection control
- informed consent
- insurance requirements
- mandatory reporting
- practitioner/client boundaries
- privacy, confidentiality and disclosure
- records management
- work role boundaries – responsibilities and limitations
- work health and safety

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTARO002 Source and prepare aromatherapy products

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Additional assessor requirements

Application

This unit describes the skills and knowledge required to source safe and reliable aromatherapy ingredients and products, and to prepare customised oil blends and other products for use in aromatherapy practice using a sound knowledge of chemistry. It does not include the preparation of aromatic medicines for internal use.

This unit applies to aromatherapists.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Recognise factors that affect chemistry and quality of aromatherapy products	1.1 Evaluate the chemistry and chemical processes that affect the properties and quality of aromatherapy products 1.2 Evaluate the impact of different production processes on the chemistry and quality of aromatic plant oils

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
2. Source product suppliers	2.1 Establish options for the supply of natural and manufactured aromatherapy products 2.2 Evaluate the quality of suppliers and their products based on standards used to indicate aromatic plant oil quality 2.3 Obtain products from authorised and reputable sources
3. Handle and store products	3.1 Determine storage requirements for different types of aromatherapy ingredients and products 3.2 Maintain ingredient and product integrity through correct handling and storage 3.3 Maintain stock levels according to clinic requirements
4. Prepare oil formulations for use in products	4.1 Establish form and quantity of products from order or treatment plan 4.2 Select and assemble ingredients according to order or client requirements 4.3 Select, check and prepare equipment for operational readiness 4.4 Follow procedures to prevent contamination of or by the product 4.5 Make accurate calculations for quantities and ratios 4.6 Blend ingredients according to aromatherapy methodology
5. Finalise product processes	5.1 Package and label correct quantities into suitable containers with clear and accurate labelling as per legal requirements 5.2 Provide accurate instructions for administration and care of products as required 5.3 Complete accurate documentation according to clinic guidelines and legal and workplace requirements

© Commonwealth of Australia, 2025 HumanAbility

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTARO002 Source and prepare aromatherapy products

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Additional assessor requirements

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- investigated and confirmed reliable sources of natural and manufactured aromatherapy products
- followed preparation processes that meet pharmaceutical guidelines and legal requirements for at least 20 different aromatherapy products:
  - checked materials and equipment
  - followed processes that protect integrity of the product
  - made accurate calculations and measurements
  - packaged and accurately labelled products
  - completed accurate documentation
- prepared different product types, including all of the following at least 3 times:
  - creams
  - ointments
  - lotions
  - oil blends
  - tinctures
  - extracts
  - gels
  - balms

© Commonwealth of Australia, 2025 HumanAbility

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations (national and state/territory) for the preparation and supply of aromatherapy products:
  - Therapeutic Goods Administration (TGA) guidelines
  - labelling
  - principles of manufacturing
  - quality control procedures
  - records management
  - work health and safety – hazards and controls for aromatherapy products
- chemistry fundamentals used in aromatic therapy product preparation:
  - classification of substances
  - understanding matter
  - chemical reactions
  - atomic structure, elements and the periodic table
  - molecules, molecular formula and compounds
    - bonding
    - isoprene units
    - variability in carbon-based molecular structure
  - name and structure of functional groups
    - alcohols
    - phenols
    - aldehydes
    - ketones
    - acids
    - esters
    - ethers
  - solubility and the differences between hydrophilic, hyrdrophobic, lipophilic and lipophobic
- sources of aromatherapy ingredients and products and methods to determine quality of supplies
- plant identification systems
  - common names
  - synonym
  - botanical names
  - plant families
- essences and how they relate to plant materials
- processes used to obtain aromatic material:

© Commonwealth of Australia, 2025 HumanAbility

  - extraction methods
  - distillation
  - cohabation
  - rectification
- differences between essential oils and carrier oils
- origins, chemical components, properties and uses of at least 60 essential oils, including interactions and synergies:
  - odiferousity
  - volatility
  - flammability
  - concentration
  - viscosity
  - lipophilicity
- origins, chemical components, properties and uses of at least 15 carrier oils:
  - grading process
  - how they are used as additives
  - extraction methods
- features of other mediums used as carrier oils in aromatherapy:
  - alcohol
  - clay
  - creams
  - dispersants
  - gels
  - hydrosols
  - macerations
  - lotions
  - ointments
  - tinctures
  - water
- techniques to prepare aromatherapy products from source materials, including:
  - creams
  - ointments
  - lotions
  - oil blends
  - tinctures
  - extracts
  - gels
  - balms
- aromatherapy product preparation equipment and instrumentation components, their purpose and operation

© Commonwealth of Australia, 2025 HumanAbility

- handling and storage requirements to maintain integrity of products before, during and after preparation:
  - types and colour of containers
  - decantation
  - use of drop dispensers
  - exposure to heat and light
- types of instructions that accompany aromatherapy products, including dosage and treatment protocol

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated dispensary environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - secure storage areas
  - measuring equipment
  - sterile containers
  - labels
  - natural and manufactured aromatherapy products
- modelling of industry operating conditions, including preparation of products for the general public
- supervision by a person who meets the assessor requirements outlined below

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must:

- have at least 3 years current clinical experience working as a clinical aromatherapist providing services to the general public
- hold practising membership of an Australian professional body that represents clinical aromatherapists
- fulfil the continuing professional development requirements of the professional body to which they belong

HLTARO003 Perform aromatherapy health assessments

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTARO402B/HLTARO405B/HLTARO406B. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Minimum clinic hours added. Additional assessor requirements.

Application

This unit describes the skills and knowledge required to assess the needs of clients presenting with therapeutic needs. It requires the ability to gather client information, make an overall assessment about treatment needs and bring information together to develop a treatment plan.

This unit applies to clinical aromatherapists.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Determine scope of client needs	1.1 Explore and clarify client expectations 1.2 Provide clear information about scope and limits of services to be provided 1.3 Collect accurate and relevant information and record

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	in a form which can be interpreted readily by other professionals
	1.4 Recognise needs that are beyond scope of own practice and make referrals to other health care professionals as required
	1.5 Identify and respond to any barriers to information gathering and assessment
	1.6 Seek client information respectfully and sensitively, using purposeful, systematic and diplomatic questions
	1.7 Manage information in a confidential and secure way
2. Assess presenting signs and symptoms of condition	2.1 Provide information about the physical assessment process and obtain client consent to proceed
	2.2 Follow clinical and practitioner hygiene procedures
	2.3 Seek client feedback on comfort levels and maintain client dignity at all times
	2.4 Assess client through palpation
	2.5 Integrate observation and sensory information gathering techniques
	2.6 Use ongoing questioning with client to gain further information as required
3. Develop holistic aromatherapy treatment plan	3.1 Correlate results of physical assessment of presenting condition with case history
	3.2 Consider available western medical or current aromatherapy research information and incorporate into analysis within scope of own practice
	3.3 Identify condition according to stage and related implications
	3.4 Identify indication or contraindication precautions determined by assessment as part of treatment planning
	3.5 Select appropriate aromatherapy compounds in accordance with optimal methods of administration based on client assessment indications

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	3.6 Determine dose, duration and frequency of treatments
	3.7 Use professional judgement to draw sound conclusions about treatment needs
	3.8 Accurately document proposed treatment plan
4. Confirm assessment and treatment plan with client	4.1 Discuss assessment and rationale with the client
	4.2 Assign and agree priorities and expectations in consultation with the client
	4.3 Respond to client enquiries using language the client understands
	4.4 Discuss referral and collaborative options with the client as required

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTARO003 Perform aromatherapy health assessments

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTARO402/405/406. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Minimum clinic hours added. Additional assessor requirements

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 120 hours of aromatherapy client consultation work
- prepared for and managed at least 60 different aromatherapy assessments. Clients must include males and females from different stages of life with varied presentations
- used an aromatherapy framework to assess the therapeutic needs of clients using all of the following techniques:
  - observation
  - palpation
  - skin inspection
- interacted effectively with clients:
  - clearly articulated information about services, treatment options and rationale
  - engaged clients in decision making

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

© Commonwealth of Australia, 2025 HumanAbility

- legal and ethical considerations (national and state/territory) for client assessment:
  - codes of conduct
  - duty of care
  - informed consent
  - mandatory reporting
  - practitioner/client boundaries
  - privacy, confidentiality and disclosure
  - records management
  - work role boundaries
    - working within scope of practice
    - presenting symptoms that require referral to a medical practitioner
  - work health and safety
- referral options for practitioners:
  - professional health services including complementary health modalities
  - community resources and support services
  - types and availability of further medical testing
- factors and barriers that may impact on assessment
  - physical
  - psychological
  - cultural
- factors that affect individual health status:
  - constitution
  - lifestyle
  - diet
  - personal and medical history
  - values and attitudes
  - balance of rest and activity
  - physical environment
  - social environment
- client information required for assessment and the scope and depth of information needed around:
  - client objectives and expectations
  - client history and its components
  - client current state of health
  - signs and symptoms
    - onset
    - duration
    - location
    - quality and severity
    - non-verbal

© Commonwealth of Australia, 2025 HumanAbility

- different ways that signs and symptoms of conditions present and how these are interpreted in an aromatherapy framework:
  - physical
  - psychological
  - social
  - spiritual
- aromatherapy diagnostic techniques, how and when they are used
  - observation
  - palpation
  - skin inspection
- ways in which aromatic plant oils and carrier mediums enter the body:
  - absorption
  - metabolism
  - olfactory
  - respiratory
  - orally
  - via other orifices
- degree to which different oils penetrate the epidermis
- how essential oils interact with different body systems, including:
  - integumentary system
  - respiratory system
  - neuroendocrine system
  - immune system
- features of aromatic plant oils that benefit disorders of different body systems:
  - integumentary (eczema, psoriasis, burns, wounds)
  - respiratory
  - nervous (olfactory, limbic)
  - circulatory
  - muscular
  - digestive
  - reproductive
  - endocrine
- aromatherapy materia medica, including the properties and therapeutic uses of at least 60 essential oils
- indicators for the use of different administration methods, including:
  - massage
  - baths
  - vapourisation
  - compresses
  - topical applications

© Commonwealth of Australia, 2025 HumanAbility

- possible reactions, contra-indications to treatment and/or limitations for aromatherapy assessment and treatment
- relational dynamics within and between human behaviour, anatomy and physiology, pathology and the natural world
- treatment planning techniques and considerations

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated clinical environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - health assessment consultation forms
  - private consultation area
- modelling of industry operating conditions, including provision of services to the general public
- clinic supervision by a person who meets the assessor requirements outlined below for at least 80 of the 120 hours of client consultation work

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must:

- have at least 3 years current experience working as a clinical aromatherapist providing services to the general public
- hold practising membership of an Australian professional body that represents clinical aromatherapists
- fulfil the continuing professional development requirements of the professional body to which they belong

HLTARO004 Provide therapeutic aromatherapy treatments

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Minimum clinic hours added. Additional assessor requirements.

Application

This unit describes the skills and knowledge required to prepare for and provide therapeutic aromatherapy treatments other than massage. Treatments are based on the outcomes of an existing health assessment.

This unit applies to clinical aromatherapists.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare client for treatment	1.1 Interpret treatment plan and clearly outline how the treatment will be provided and managed 1.2 Explain factors which may interfere with the effectiveness of the treatment 1.3 Inform the client of possible physical or emotional reactions during and following a session and the appropriate course of action to take

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.4 Follow established protocols to physically prepare the client for treatment
	1.5 Confirm client consent for treatment
2. Prepare treatment oils and equipment	2.1 Select oils and ingredients based on assessment indications and treatment plan
	2.2 Blend and prepare oils to suit the treatment and its mode of administration
	2.3 Select and safely set up equipment according to treatment requirements
3. Administer aromatherapy treatments	3.1 Follow established aromatherapy treatment sequences and techniques using prepared oils and products
	3.2 Use the condition and response of the client as a continual feedback to the initial assessment
	3.3 Position client to optimise their comfort while allowing for optimum application of techniques
	3.4 Maintain client dignity through use of draping where required
	3.5 Maintain postures that ensure a controlled distribution of body weight
	3.6 Maintain client-focused attention throughout the treatment session
	3.7 Recognise reactions to treatment and respond promptly if necessary
4. Provide advice and resources to the client	4.1 Provide clear information on therapeutic techniques being used, their therapeutic benefits and the underpinning philosophy
	4.2 Educate client in relevant and practical techniques that support the treatment plan
	4.3 Answer client queries with clarity, using appropriate language

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	4.4 Use honesty and integrity when explaining treatment plans, schedules and recommendations to the client
	4.5 Promote client independence and responsibility in treatment when appropriate
	4.6 Accurately document treatment provided and recommendations made to client

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTARO004 Provide therapeutic aromatherapy treatments

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Minimum clinic hours added. Additional assessor requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 120 hours of aromatherapy client consultation work
- prepared for and managed at least 60 aromatherapy treatment sessions. Clients must include males and females from different stages of life with varied presentations
- provided each of the following therapeutic treatments during the client consultation sessions according to client needs and aromatherapy principles and procedures:
  - compresses
  - poultices
  - mists/spritzes
  - dermal applications
  - vapourisation/inhalation
  - frictions

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations (national and state/territory) for treatment provision:

© Commonwealth of Australia, 2025 HumanAbility

    - codes of conduct
    - duty of care
    - informed consent
    - mandatory reporting
    - practitioner/client boundaries
    - privacy, confidentiality and disclosure
    - records management
    - work role boundaries
        - working within scope of practice
        - presenting symptoms that require referral to a medical practitioner
    - work health and safety
- aromatherapy treatment techniques and how to apply them, including what each technique does, what effects it might have and what the cautions and contraindications are – for the following:
    - compresses
    - poultices
    - mists/spritzes
    - dermal applications
    - vapourisation/inhalation
    - hydrotherapy – foot/hand bath, sitz, bath/spa, shower to prepare for homecare
    - frictions
- potential reactions during treatment and how to respond:
    - discomfort
    - emotional reactions
    - feedback - verbal, tactile, visual
    - muscular spasms
    - body temperature discomfort
    - deep relaxation
- potential reactions following treatment and appropriate client advice to provide
- types of advice and resources that can be provided to clients for their use outside the clinical environment
- documentation requirements for recording treatment details

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated clinical environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
    - client information – case history, treatment plan
    - private consultation area
    - towels/sheets for draping

© Commonwealth of Australia, 2025 HumanAbility

  - essential oils
  - compresses
  - poultices
  - mists/spritzes
  - dermal applications
  - vapourisation/inhalation equipment
- modelling of industry operating conditions, including provision of services to the general public
- clinic supervision by a person who meets the assessor requirements outlined below for at least 80 of the 120 hours of client consultation work

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must:

- have at least 3 years current experience working as a clinical aromatherapist providing services to the general public
- hold practising membership of an Australian professional body that represents clinical aromatherapists
- fulfil the continuing professional development requirements of the professional body to which they belong

HLTARO005 Provide aromatherapy massage treatments

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Minimum clinic hours added. Additional assessor requirements.

Application

This unit describes the skills and knowledge required to prepare for, provide and monitor aromatherapy massage treatments, including the Micheline Arcier aromatherapy full body massage. Treatments are based on the outcomes of an existing health assessment.

This unit applies to clinical aromatherapists.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare client for treatment	1.1 Interpret treatment plan and clearly outline how the treatment will be provided and managed 1.2 Explain factors which may interfere with the effectiveness of the treatment 1.3 Inform the client of possible physical or emotional reactions during and following a session and the

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	appropriate course of action to take
	1.4 Follow established protocols to physically prepare the client for treatment
	1.5 Confirm client consent for treatment
2. Formulate aromatherapy massage blends	2.1 Select aromatic plant oils as indicated for their therapeutic action on areas to be massaged
	2.2 Integrate findings of health assessment into oil selection
	2.3 Check client aroma preferences
	2.4 Blend oils using proportions appropriate to areas to be massaged, presenting condition and client characteristics
3. Follow aromatherapy massage techniques and sequences	3.1 Determine treatment sequence, location and degree of pressure according to assessment indications
	3.2 Use the condition and response of the client as a continual feedback to the initial assessment
	3.3 Position client to optimise their comfort and support while allowing for optimum application of techniques
	3.4 Maintain client dignity through use of draping
	3.5 Maintain therapist postures that ensure a controlled distribution of body weight
	3.6 Maintain client-focused attention throughout the treatment session
	3.7 Recognise reactions to treatment and respond promptly if necessary
4. Provide advice and resources to the client	4.1 Educate client in relevant and practical techniques that support the treatment plan
	4.2 Answer client queries with clarity, using appropriate language
	4.3 Use honesty and integrity when explaining treatment

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	plans, schedules and recommendations to the client
	4.4 Promote client independence and responsibility in treatment when appropriate
	4.5 Discuss and agree on evaluation strategies
	4.6 Accurately document treatment provided and details of client communications

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTARO005 Provide aromatherapy massage treatments

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Minimum clinic hours added. Additional assessor requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 120 hours of aromatherapy client consultation work
- prepared for and managed at least 60 aromatherapy massage sessions. Clients must include males and females from different stages of life with varied presentations
- provided aromatherapy massage treatments:
  - full body massage using Micheline Arcier technique
  - partial body massages
- selected and used blends suited to both client and condition
- followed correct sequences and used all of the following techniques appropriately:
  - effleurage
  - energy techniques
  - lymphatic drainage
  - cross over stroke
  - longitudinal stroking
  - passive soft tissue movement
  - gliding techniques
  - kneading
  - friction techniques
  - compressive techniques

© Commonwealth of Australia, 2025 HumanAbility

- percussion techniques

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations (national and state/territory) for massage treatments:
- codes of conduct
- duty of care
- informed consent
- mandatory reporting
- practitioner/client boundaries
- privacy, confidentiality and disclosure
- records management
- work role boundaries
  - working within scope of practice
  - presenting symptoms that require referral to a medical practitioner
- work health and safety
- aromatherapy and other massage techniques and how to apply them, including what each technique does, what effects in might have and what the cautions and contraindications are, for the following:
  - effleurage
  - energy techniques
  - lymphatic drainage
  - cross over stroke
  - longitudinal stroking
  - passive soft tissue movement
  - gliding techniques
  - kneading
  - friction techniques
  - compressive techniques
  - percussion techniques
- endangerment sites - where they are and how to use palpatory skills in these areas according to scope of practice
- potential reactions during treatment and how to respond:
  - discomfort
  - emotional reactions
  - feedback - verbal, tactile, visual
  - muscular spasms
  - body temperature discomfort

© Commonwealth of Australia, 2025 HumanAbility

    - deep relaxation
- potential reactions following treatment and appropriate client advice to provide
- types of advice and resources that can be provided to clients for their use outside the clinical environment
- documentation requirements for recording treatment details

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated clinical environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
    - client information – case history, treatment plan
    - private consultation area
    - adjustable height massage table
    - towels/sheets for draping
    - oils/balms
    - aromatic essential oil, CO2 and other extracts
- modelling of industry operating conditions, including provision of services to the general public
- clinic supervision by a person who meets the assessor requirements outlined below for at least 80 of the 120 hours of client consultation work

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must:

- have at least 3 years current experience working as a clinical aromatherapist providing services to the general public
- hold practising membership of an Australian professional body that represents clinical aromatherapists
- fulfil the continuing professional development requirements of the professional body to which they belong

HLTARO006 Adapt aromatherapy treatments to specific needs

Modification History

Release	Comments
Release 2	Corrections to typographical errors in Performance evidence. Equivalent outcome.
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTARO509B/HLTARO511C. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Minimum clinic hours added. Additional assessor requirements.

Application

This unit describes the skills and knowledge required to adapt assessment and treatment strategies to meet the needs of clients of different genders and at different stages of life. It also includes the requirement to be able to identify and respond to other specific needs with which the practitioner may be unfamiliar.

This unit applies to clinical aromatherapists.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Adapt assessment and treatment strategies to stages of life	1.1 Anticipate and take account of client sensitivities to ensure client dignity is maintained 1.2 Tailor approaches that take account of different

	cognitive abilities of clients at different stages of life
	1.3 Adjust physical processes to take account client capabilities and physical body features
	1.4 Recognise norms and deviations associated with age and gender
	1.5 Obtain appropriate consents from others when appropriate
2. Respond to unfamiliar presentations	2.1 Recognise situations where presenting cases or aspects of presenting cases fall outside current knowledge base or expertise
	2.2 Refer client to other practitioners when case is not appropriate to own scope of practice
	2.3 Identify, access and interpret sources of additional information and advice when appropriate to continue with the case
	2.4 Enhance own capacity to deal with the case by conducting case specific research
	2.5 Integrate findings into client treatment plans and record details
3. Extend and expand own knowledge base	3.1 Pro-actively identify and respond to professional development opportunities
	3.2 Develop and adjust work practices as part of ongoing practice development

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

- children in the workplace
- codes of conduct
- discrimination:
  - age
  - disability
  - racial
  - sex
- duty of care
- informed consent
- mandatory reporting
- practitioner/client boundaries
- privacy, confidentiality and disclosure
- records management
- work role boundaries
  - working within scope of practice
  - presenting symptoms that require referral to a medical practitioner
- work health and safety
- treatment management factors that must be considered for clients of different genders and at different stages of life
  - case taking
  - variations in approach to physical examination
- major developmental milestones for different stages of life
- features of common health conditions that affect the following groups and how those conditions are assessed and treated in the aromatherapy framework:
  - children
  - adolescents
  - adult females at different stages of life
  - adult males at different stages of life
- factors for consideration when providing any form of palliative care
- professional responsibilities when presenting cases fall outside of practitioner's current scope of practice, including:
  - when referral is appropriate or required
  - information and advice sources
  - case research techniques

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated clinical environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:

HLTARO007 Monitor and evaluate aromatherapy treatments

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Minimum clinic hours added. Additional assessor requirements.

Application

This unit describes the skills and knowledge required to monitor and evaluate aromatherapy treatments, both from an individual client and whole of practice perspective.

This unit applies to clinical aromatherapists.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Evaluate client progress	1.1 Seek client feedback about treatment impacts and compliance with the treatment plan 1.2 Make own observations and assessment of client changes based on aromatherapy framework 1.3 Evaluate treatment impacts in relation to client's physical, mental, spiritual and emotional wellbeing 1.4 Compare changes and improvements with expectations in the treatment plan, existing research and

Assessment Requirements for HLTARO007 Monitor and evaluate aromatherapy treatments

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Minimum clinic hours added. Additional assessor requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 120 hours of aromatherapy client consultation work
- managed at least 60 different aromatherapy assessment and treatment sessions - clients must include males and females from different stages of life with varied presentations
- monitored and evaluated treatments provided to at least 5 different clients with at least 3 treatments per client

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations (national and state/territory) for monitoring and evaluation:
  - children in the workplace
  - codes of conduct
  - duty of care
  - informed consent
  - mandatory reporting
  - practitioner/client boundaries

© Commonwealth of Australia, 2025 HumanAbility

    - privacy, confidentiality and disclosure
    - records management
    - work role boundaries
        - working within scope of practice
        - presenting symptoms that require referral to a medical practitioner
    - work health and safety
- types of criteria by which aromatherapy treatments are evaluated
- expectations of treatment for different conditions and client groups, and factors that impact on those expectations:
    - client history
    - contraindications
    - compliance
    - interactions with other treatments
- sources of research and evidence that support aromatherapy practice
- principles underpinning continuation or variation of treatment
- professional development opportunities in aromatherapy

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated clinical environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
    - client information – case history, treatment plan
    - private consultation area
    - adjustable height massage table
    - towels/sheets for draping
    - essential oils
    - compresses
- modelling of industry operating conditions, including provision of services to the general public
- clinic supervision by a person who meets the assessor requirements outlined below for at least 80 of the 120 hours of client consultation work

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must:

- have at least 3 years current experience working as a clinical aromatherapist providing services to the general public
- hold practising membership of an Australian professional body that represents clinical aromatherapists

© Commonwealth of Australia, 2025 HumanAbility

- fulfil the continuing professional development requirements of the professional body to which they belong

HLTARO008 Prepare and dispense aromatic formulations

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTARO606C/HLTARO607C. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Additional assessor requirements.

Application

This unit describes the skills and knowledge required to obtain and store materials, prepare aromatic formulations and dispense those formulations according to a pre-prepared script or order.

This unit applies to clinical aromatherpists preparing complex formulations that may be for external or internal use. Note that the aromatic aromatherapist provides the preparation and relevant accompanying advice but does not administer these aromatic preparations.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
1. Obtain and store materials	1.1 Source natural and manufactured materials from authorised and reputable sources 1.2 Determine storage requirements for different types of materials 1.3 Maintain integrity of materials through correct

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
	handling and storage
	1.4 Maintain stock levels according to clinic requirements
2. Prepare aromatic formulations	2.1 Check and prepare equipment for operational readiness
	2.2 Select and assemble ingredients according to order
	2.3 Make accurate calculations for quantities and ratios
	2.4 Prepare medicine according to aromatic medicine methodology
	2.5 Label and store aromatic substances according to legal requirements
3. Dispense aromatic preparations	3.1 Establish form and quantity of required aromatic preparations from prescription or order
	3.2 Follow procedures to prevent contamination of or by the aromatic substances
	3.3 Check and prepare dispensing equipment for operational readiness
	3.4 Select and assemble prescribed aromatic preparations
	3.5 Package and label correct quantities into suitable containers with clear and accurate labelling
	3.6 Provide accurate instructions for administration and care of aromatic preparations
	3.7 Complete accurate dispensing documentation according to clinic guidelines and legal requirements

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

© Commonwealth of Australia, 2025 HumanAbility

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTARO008 Prepare and dispense aromatic formulations

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTARO606C/HLTARO607C. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Additional assessor requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed dispensing processes that meet pharmaceutical guidelines and legal requirements for at least 10 different aromatic preparations, including all of the following at least once:
  - creams and lotions
  - ointments
  - capsules
  - gels
  - gargles
  - suppositories
  - tinctures
  - extracts
  - pessaries
  - compress, poultice

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

© Commonwealth of Australia, 2025 HumanAbility

- legal and ethical considerations (national and state/territory) requirements for the preparation and supply of aromatherapy products:
  - Therapeutic Goods Administration (TGA) guidelines
  - labelling
  - principles of manufacturing
  - quality control procedures
  - records management
  - work health and safety – hazards and controls for aromatic preparations
- sources of aromatic preparations and their raw ingredients and methods to determine quality
- different forms of aromatic preparations and how they are administered
- techniques to prepare aromatic preparations from source materials
- aromatic preparations and allopathic drug interactions as outlined in medical pharmaceutical reference of drug interactions and aromatic medicine texts
- aromatic preparation dispensing principles and methods in reference to good manufacturing practices
- significance and methods of monitoring control points within the dispensing process
- equipment and instrumentation components, purpose and operation
- waste handling requirements and procedures
- environmental conditions required to maintain integrity of aromatic substances before, during and after preparation
- types of instructions that must accompany aromatic preparations
- procedures to prevent contamination of aromatic preparations

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated dispensary environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - secure storage areas
  - measuring equipment
  - sterile containers
  - labels
  - natural and manufactured medicinal substances for preparation
  - distilled water
- modelling of industry operating conditions, including provision of formulations to the general public
- dispensary supervision by a person who meets the assessor requirements outlined below

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

© Commonwealth of Australia, 2025 HumanAbility

In addition, assessors must:

- have at least 5 years current experience working as a clinical aromatherapist providing services to the general public
- hold practising membership of an Australian professional body that represents clinical aromatherapists
- fulfil the continuing professional development requirements of the professional body to which they belong

HLTARO009 Select and advise on aromatic therapies

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTARO604B/HLTARO605B. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Additional assessor requirements.

Application

This unit describes the skills and knowledge required to determine an aromatic treatment strategy based on an existing health assessment, provide relevant advice to the client and complete treatment documentation. This unit refers to the use of essential oils for internal preparations. Note that the clinical aromatherapist provides the preparation and relevant accompanying advice but does not administer these aromatic preparations.

This unit applies to experienced clinical aromatherapists using specialised aromatic formulations and therapies.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Determine treatment strategy	1.1 Determine the treatment strategy, prognosis and therapeutic expectations according to the health condition, client needs and stage of life 1.2 Evaluate the impact of disease phase or stage on treatment selection

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.3 Consider treatment and advice provided by other health care professionals
	1.4 Identify and respond to the need for further research in developing the treatment strategy
	1.5 Select aromatic preparations and administration method based on individual case presentation
	1.6 Take into account factors which may interfere with the effectiveness of the treatment for each essential oil and aromatic extract
	1.7 Take into account possible treatment reactions for each essential oil and aromatic extracts and prescription
	1.8 Take into account contra-indications for essential oils, aromatic extracts and prescription
2. Provide advice and resources to the client	2.1 Clearly explain treatment rationale and expectations
	2.2 Provide clear instructions for taking aromatic preparations, and negotiate according to client needs
	2.3 Explain factors which may interfere with the effectiveness of the treatment
	2.4 Negotiate the management of selected aromatic preparations in relation to any other current medicines
	2.5 Obtain client consent for treatment
	2.6 Request client to monitor responses to the aromatic preparations and to contact practitioner as required
	2.7 Clarify and agree responsibilities of practitioner and client within the treatment plan
	2.8 Explain and agree treatment evaluation strategies
3. Complete treatment documentation	3.1 Document accurate details of aromatic preparations to be provided
	3.2 Record details of treatment recommendations in client file
	3.3 Record arrangements for treatment review according to clinic guidelines

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
4. Monitor and evaluate treatment	4.1 Evaluate client progress against agreed evaluation strategies 4.2 Adjust treatment based on evaluation of client progress in consultation with client 4.3 Identify areas for further research to support client outcomes

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTARO009 Select and advise on aromatic therapies

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTARO604B/HLTARO605B. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Additional assessor requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- undertaken a structured process of critical analysis, research and reflection to determine, document and evaluate aromatic therapy treatment strategies that include preparations for internal administration for at least 15 different clients, all of whom must have been seen at least 3 times. Clients must include males and females from different stages of life with varied presentations
- interacted effectively with clients through the provision of clear information on the treatment strategy

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations (national and state/territory) for working with aromatic therapies that include formulations for internal use:
  - children in the workplace
  - codes of conduct
  - duty of care
  - informed consent
  - mandatory reporting

© Commonwealth of Australia, 2025 HumanAbility

    - practitioner/client boundaries
    - privacy, confidentiality and disclosure
    - records management
    - work role boundaries
        - working within scope of practice
        - presenting symptoms that require referral to a medical practitioner
    - work health and safety
- groups of aromatic preparations, how to distinguish between them, according to actions, active constituents, body systems and plant families
- interrelationships and incompatibilities (chemical and physical) between aromatic formulation groups
- types and features of internal preparations:
    - water-based preparations using dispersing agents
    - capsules
    - absorbent tablets
    - sub-lingual preparations
    - eye, ear, nose and throat preparations
    - inhalations
    - mixture with herbal tinctures
    - suppositories
    - pessaries
- at least 30 aromatic oils that can be used for internal applications, preparations or purposes including:
    - origin
    - characteristics
    - therapeutic applications
    - modes of administration
    - interactions with other drugs
    - contraindications to use
- essential oils and aromatic extracts:
    - that exhibit potential toxicity at low dosages
    - appropriate dosages and methods of applications
    - specific contraindications for use
    - specific essential oils and aromatic extracts to be avoided for use
- pharmacodynamics of aromatic preparations and pharmaceutical drugs:
    - drug administration
    - absorption
    - distribution
    - metabolism
    - excretion

© Commonwealth of Australia, 2025 HumanAbility

- pharmacodynamics of aromatic preparations and pharmaceutical drugs:
  - theory of drug action
  - factors modifying drug effect and dosage
  - drug toxicity and toxicology
- pharmacology of aromatic preparations and pharmaceutical drugs, their classifications, usage and side effects
- pharmacology of aromatic preparations and their interactions with over the counter (OTC) vitamin, mineral and herbal preparations – usage and side effects

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated clinical environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - client information – case history, treatment plan
  - private consultation area
  - aromatic medicines
- modelling of industry operating conditions, including provision of services to the general public
- clinic supervision by a person who meets the assessor requirements outlined below

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must:

- have at least 5 years current experience working as a clinical aromatherapist providing services to the general public
- hold practising membership of an Australian professional body that represents clinical aromatherapists and aromatic medicine
- fulfil the continuing professional development requirements of the professional body to which they belong

HLTAUD001 Assess hearing

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to prepare for, conduct and interpret the results of hearing assessments in adults. It includes the ability to establish a positive client relationship, develop realistic goals with the client and to recognise situations where referral to other health professionals is required.

This unit applies to any person who assesses hearing. This may include audiometrists, allied health assistants who support audiologists in health care organisations, nurses and Aboriginal and Torres Strait Islander health workers. Work is conducted according to AS/NZ 1269.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for hearing assessments	1.1 Ensure information, including required forms, is accessible and ready for use 1.2 Achieve required ambient noise levels in preparation

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	of testing environment
	1.3 Prepare, calibrate and check equipment and instruments
	1.4 Ensure personal protective equipment is available and used
2. Establish a positive relationship with the client	2.1 Take client case history and explain practice/hearing service administrative procedures
	2.2 Determine client's expectations through questioning and active listening
	2.3 Gain consent from clients where applicable
	2.4 Give client the opportunity to ask questions and discuss concerns
	2.5 Identify and respond to special needs of client
	2.6 Maintain confidentiality of client information
3. Conduct otoscopy	3.1 Follow personal hygiene and infection control procedures
	3.2 Conduct otoscopy in a non-threatening manner and produce valid, reliable and accurate results in accordance with relevant policy and procedures
	3.3 Identify and respond to any abnormalities of the ear canal
	3.4 Identify contra-indications for proceeding with further hearing assessments
	3.5 Make referral to appropriate agency for further assessment and treatment if required
4. Test hearing	4.1 Explain procedure to client using language the client understands
	4.2 Identify significant features of client history
	4.3 Select and conduct appropriate hearing tests

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	following procedures for correct use of equipment
	4.4 Produce valid, reliable and accurate results in accordance with relevant policy and procedures
	4.5 Identify unreliable results and complete re-test according to standard protocols
	4.6 Use results to identify specific hearing loss and/or any abnormal functions
	4.7 Record results in accordance with relevant policy and procedures
	4.8 Clean and store equipment in accordance with manufacturers' requirements and infection control procedures
5. Interpret results	5.1 Accurately interpret data from individual test results
	5.2 Integrate and interpret interrelationships between test battery results to establish a comprehensive clinical picture
	5.3 Validate results for consistency across the test battery
6. Review assessment results with client	6.1 Communicate results of assessments clearly and simply to the client
	6.2 Determine and discuss options to support client
	6.3 Negotiate and establish realistic goals for the client
	6.4 Document and file results in accordance with relevant policies and procedures
	6.5 Determine recommendations for further assessment or referral to an appropriate facility or hearing aid fitting
7. Complete report	7.1 Write report using language and format that suits target audience according to organisation standards
	7.2 Include clear, concise and relevant information of tests performed
	7.3 Include summary, recommendations and any further

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	action required
	7.4 Read and edit report for spelling and grammatical correctness

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential *to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTAUD001 Assess hearing

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed established procedures and protocols to independently conduct full hearing assessments for at least 20 different adult clients presenting with different hearing capacity, including males and females of diverse age, cultural and linguistic range, and seniors:
  - selected the hearing tests appropriate to client needs
  - accurately tested and recorded pure tone audiometry (AC/BC masking) speech audiometry (performance intensity (PI) function, speech reception threshold (SRT), masking) and impedance audiometry test results (tympanometry, ipsi and contralateral reflexes, reflex decay)
  - integrated and validated results across the test battery
  - determined type of hearing loss from test results
  - recognised and responded appropriately when a client is not giving true thresholds
- communicated effectively with clients using a client centred approach

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

© Commonwealth of Australia, 2025 HumanAbility

- legal and ethical considerations (national and state/territory) for conduct of hearing assessments:
  - contractual obligations
  - duty of care
  - informed consent
  - privacy, confidentiality and disclosure
  - records management
  - work role boundaries – responsibilities and limitations:
    - boundaries of audiometrist role
    - generalist and specialist functions
    - relationship between audiometry and other health professionals
    - indicators for referral
- Australian and international standards that apply to the conduct of a hearing assessment:
  - maximum ambient noise levels for assessments
  - equipment calibrations
- standard infection control precautions
- anatomy of the ear, including:
  - peripheral and central auditory system
  - potential physical abnormalities
- hearing assessment battery elements:
  - taking case history
  - otoscopy
  - air
  - bone
  - speech discrimination (PI function)
  - SRT
  - masking (pure tone, speech)
  - tympanometry
  - ipsi/contralateral reflexes
  - reflex decay
- causes and types of hearing loss
- contraindications for hearing assessments
- physical environment requirements for audiometric assessments – booths versus quiet rooms
- equipment calibration both annual and biological
- characteristics of hearing tests, including:
  - types
  - purpose of different tests
  - materials that can be used
  - suitability of tests for different clients

© Commonwealth of Australia, 2025 HumanAbility

- reliability/validity of particular tests
- transducers (headphones, insert earphones, bone conductor, free field)
- stimuli (pure tone, warble, pulsed, narrow band noise, broad band noises, speech)

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - equipment that meets requirements of AS/NZ 1269
  - documentation that meets notation standards
- modelling of industry operating conditions, including:
  - integration of problem solving activities
  - time constraints for completion of testing
  - provision of services to general public

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTAUD002 Conduct play audiometry

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to prepare for and conduct play pure tone audiometry tests for school age children without any developmental delay, using standard test protocols.

This unit applies to any person who assesses school aged children's hearing. This may include audiometrists, allied health assistants who support audiologists in health care organisations, nurses and Aboriginal and Torres Strait Islander health workers.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for tests	1.1 Ensure information, including required forms, is accessible and ready for use 1.2 Achieve required ambient noise levels in preparation

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	of testing environment
	1.3 Prepare, calibrate and check equipment and instruments
	1.4 Ensure personal protective equipment is available and used
2. Establish a positive relationship with child and carer	2.1 Explain the test procedure clearly and simply to the child
	2.2 Gain consent from carer where applicable
	2.3 Give child the opportunity to ask questions and discuss concerns
	2.4 Identify and meet special needs of child
	2.5 Maintain confidentiality of client information
3. Conduct otoscopy	3.1 Follow personal hygiene and infection control procedures
	3.2 Conduct otoscopy in a non-threatening manner and produce valid, reliable and accurate results in accordance with relevant policy and procedures
	3.3 Identify and respond to any abnormalities of the ear canal
	3.4 Identify contra-indications for proceeding with further hearing assessments
	3.5 Make referral to appropriate agency for further assessment and treatment if required
4. Complete hearing test	4.1 Follow personal hygiene and infection control procedures
	4.2 Conduct play audiometry following procedures for correct use of equipment
	4.3 Produce valid, reliable and accurate results in accordance with relevant policy and procedures (threshold or pass/fail screening)

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	4.4 Take steps to maximise test accuracy, validity and reliability
	4.5 Identify unreliable results and complete re-test according to standard protocols
	4.6 Conduct screening tympanometry in accordance with required procedures
	4.7 Record results in accordance with relevant policies and procedures
	4.8 Clean and store equipment in accordance with manufacturers' requirements and infection control procedures
5. Review test results with child and their carer	5.1 Examine results and determine outcome from data obtained
	5.2 Communicate outcome of tests clearly and simply to the child and their carer
	5.3 Discuss options for further tests with carer
	5.4 Give child and carer the opportunity to ask questions and discuss areas of concern
	5.5 Document and file test results in accordance with relevant policies and procedures
6. Refer client to appropriate facility	6.1 Make referral to appropriate agency if required
	6.2 Establish contact with referral agency and provide key client information
	6.3 Discuss relevant issues and concerns with relevant personnel at facility
	6.4 Follow up referral to ensure continuity of case management

Assessment Requirements for HLTAUD002 Conduct play audiometry

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed established procedures and protocols to independently conduct pure tone play audiometry tests for at least 10 different children aged 4-6 years, recognising and responding appropriately when a child is not giving true thresholds
- communicated effectively with children and carers using a client centred approach

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations (national and state/territory) for testing children's hearing:
  - children in the workplace
  - duty of care
  - informed consent
  - policy frameworks – Australian Government Office of Hearing Services requirements
  - privacy, confidentiality and disclosure
  - records management
  - reporting requirements

© Commonwealth of Australia, 2025 HumanAbility

    - work role boundaries – responsibilities and limitations:
        - boundaries of audiometrist role, including no role in diagnostics
        - relationship between audiometry and other health professionals
        - role of the family/carer
        - indicators for referral
- stages of normal childhood speech and hearing development:
    - milestones
    - variations from the norm
- key milestones in children's cognitive development and how to assess these to facilitate testing
- anatomy of children's ears and the implications for otoscopy
- play audiometry techniques:
    - conditioning
    - reliability and validity
    - visual cues
    - non-organic hearing loss
- techniques for managing children during testing:
    - focusing attention to task
    - distraction
    - engagement
- factors to consider when working with families during the testing process

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
    - appropriate testing environment
    - age appropriate toys
- modelling of industry operating conditions, including:
    - integration of problem solving activities
    - time constraints for completion of testing
    - provision of services to general public

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTAUD003 Assess and respond to occupational noise risk

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to determine and respond to occupational noise risk, including the testing of individuals at risk and developing strategies for employers.

This unit applies to audiometrists working in an industrial context, who have a responsibility for promoting and managing good hearing health in the workplace.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Assess noise hazard risks	1.1 Review features of the workplace that may impact on hearing loss 1.2 Assess the level of hearing conservation risk based on established indicators and parameters 1.3 Identify and access sources of specialist expertise

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	required to measure for risk in the workplace as required
2. Develop strategies for noise injury management	2.1 Identify strategies to mitigate hearing conservation risks
	2.2 Document strategies with clear recommendations
	2.3 Communicate identified strategies to employers
	2.4 Provide accurate and current information and resources about noise hazard management to organisations
3. Conduct testing	3.1 Prepare for and conduct hearing tests in accordance with the requirements of AS/NZ 1269
	3.2 Take steps to maximise test accuracy, validity and reliability
	3.3 Determine that test results are reliable
	3.4 Conduct re-test, conduct further tests and/or refer client if test results are unreliable
	3.5 Record results in accordance with requirements of AS/NZ 1269
	3.6 Review and interpret results in accordance with the requirements of AS/NZ 1269
	3.7 Communicate outcome of tests clearly and simply to the client
	3.8 Clean and store equipment in accordance with manufacturers' requirements and infection control procedures
4. Identify those at risk of noise induced hearing loss (NIHL)	4.1 Conduct monitoring audiometry in accordance with AS/NZ 1269
	4.2 Assess results against previous reference audiometry
	4.3 Advise client of any risk identified using language the client understands

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	4.4 Advise employer of risks identified for the client
	4.5 Provide information on strategies that assist in mitigating risk for NIHL
	4.6 Make referral to appropriate agency
5. Monitor and review strategies	5.1 Evaluate success of workplace strategies based on results of testing
	5.2 Adjust strategies and recommendations based on evaluation
	5.3 Provide updated information to employers

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential *to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTAUD003 Assess and respond to occupational noise risk

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- assessed the occupational noise risk in at least 1 workplace and developed and communicated strategies to mitigate those risks
- followed the requirements of AS/NZ 1269 to conduct testing on at least 10 different clients in an industrial context

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- contexts for testing for industrial hearing loss
  - types of client
  - work situations that lead to the need for industrial hearing tests
- legal and ethical considerations (national and state/territory) for conduct of hearing assessments:
  - duty of care
  - informed consent
  - privacy, confidentiality and disclosure
  - records management

© Commonwealth of Australia, 2025 HumanAbility

    - work role boundaries, responsibilities and limitations:
        - boundaries of audiometrist role
        - generalist and specialist functions
        - relationship between audiometry and other health professionals
        - role of employers and other organisations
        - hearing conservation (protectors, environment, noise dosing)
        - indicators for referral
- requirements of all sections of AS/NZ 1269
- risk factors for occupational noise and strategies to mitigate those
- sources of information on occupational noise risk
- methods of testing for industrial hearing assessment:
    - monitoring assessment
    - reference assessments
    - manual/automated
    - noise level measurements

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
    - equipment that meets requirements of AS/NZ 1269
    - documentation that meets notation standards
- modelling of industry operating conditions, including:
    - integration of problem solving activities
    - time constraints for completion of testing
    - provision of services to general public

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTAUD004 Develop and implement individual hearing rehabilitation programs

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to assess client communication needs and to develop, implement and evaluate rehabilitation programs. This work is carried out in conjunction with the dispensing of hearing devices.

This unit applies to audiometrists.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Determine scope of client needs	1.1 Evaluate client communication and lifestyle needs 1.2 Select and use an appropriate communicative assessment tool for client

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.3 Recognise and evaluate factors contributing to the communicative breakdown
	1.4 Take account of impact of client's hearing impairment on carers, relatives and significant others
	1.5 Evaluate client motivation and commitment to rehabilitation and integrate into planning
	1.6 Accurately document effects of communication impairment and the communicative needs of the client
	1.7 Identify and liaise with other health professionals and support services as required
2. Formulate hearing program	2.1 Actively involve client in the planning process, providing opportunities for questions and discussion of concerns
	2.2 Determine intervention options to minimise effects of hearing loss from information gathered
	2.3 Select best options through evaluation of available technologies and services
	2.4 Develop and document appropriate goals, realistic expectations and a plan of action with client
	2.5 Clearly explain details of options and cost implications
	2.6 Select evaluation tools best suited to client and type of program
	2.7 Document agreed plan of action and services provided
3. Work collaboratively with client to implement program	3.1 Establish realistic expectations
	3.2 Work with client and their carers/relatives towards achieving the agreed communication goals
	3.3 Provide support for the duration of the rehabilitation program
	3.4 Adapt rehabilitation program to meet changing needs

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
4. Evaluate hearing program	4.1 Monitor client progress against goals using recognised evaluation tools 4.2 Identify remaining communication needs and establish whether these can be met with additional advice, communication strategies or devices

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential *to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTAUD004 Develop and implement individual hearing rehabilitation programs

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- independently developed and implemented hearing programs for at least 20 different individuals (linked to the dispensing of hearing devices)
- engaged professionally with external agencies and health professionals

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations:
  - codes of conduct of registering bodies
  - policy frameworks, Australian Government Office of Hearing Services requirements
  - privacy, confidentiality and disclosure
  - work role boundaries, those roles and responsibilities of different people working with clients experiencing hearing impairment:
    - medical practitioners
    - audiometrists
    - audiologists
    - agencies providing services to people with hearing health needs

© Commonwealth of Australia, 2025 HumanAbility

    - interrelationships between audiometrists and other health professionals
- referral options for complex hearing problems beyond the scope of own practice
- types and features of different assessment tools
- types of existing rehabilitation programs
- types of hearing disorders that affect different groups in the community and factors that contribute to complexity of needs
- social and psychological implications of communication impairment
- evaluation mechanisms and tools for hearing programs

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources including rehabilitation and assessment tools
- modelling of industry operating conditions, including:
    - integration of problem solving activities
    - provision of services to general public

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTAUD005 Dispense hearing devices

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTAU505/507. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to prescribe and fit hearing devices, evaluate device function and undertake minor repairs and maintenance. It also involves providing instruction and follow up services to clients.

This unit applies to audiometrists.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Confirm hearing device requirements	1.1 Interpret outcomes of hearing assessment documentation 1.2 Select style and performance requirements of hearing device(s) based on hearing assessment, client communication and physical needs 1.3 Select appropriate additional device requirements for

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	optimal acoustic performance and client management needs
2. Take ear impressions	2.1 Follow personal hygiene and infection control procedures
	2.2 Recognise and respond to contraindications to taking ear impressions with otoscopy
	2.3 Make referral to other facilities for assessment and treatment
	2.4 Select correct sized otoblocks
	2.5 Prepare mould material in accordance with manufacturer's instructions
	2.6 Follow correct and safe impression taking procedure
	2.7 Examine ear impressions for defects and take new impression if defects found
	2.8 Determine any modifications that may be required to ensure a comfortable insertion and fit
	2.9 Examine ear condition post impression
	2.10 Package ear impressions suitably and send to ear mould manufacturer
	2.11 Adapt ear impression processes in line with emerging technologies
3. Prepare for fitting	3.1 Prepare information and required documentation
	3.2 Prepare the environment for hearing aid fitting
	3.3 Check and calibrate equipment ready for use
	3.4 Check availability of required personal protective equipment as required
4. Fit hearing aids	4.1 Follow manufacturer's recommended fitting procedures and industry best practice including recognised fitting formulae

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	4.2 Assess occlusion effect and make appropriate modifications to minimise its effects
	4.3 Determine acceptable power output and evaluate in consultation with the client
	4.4 Assess hearing device for acoustic feedback and take action to minimise its effects if needed
	4.5 Evaluate objective and subjective performance and comfort factors and make modifications as required
	4.6 Clean and store equipment and attachments in accordance with manufacturers' requirements and infection control procedures
5. Provide advice and resources to the client	5.1 Instruct client/carer clearly on correct use and maintenance arrangements
	5.2 Give client the opportunity to voice concerns in relation to hearing aid fitting and address client's concerns
	5.3 Provide relevant materials to client about their device and services available
	5.4 Make informed judgment from client responses about client ability to manage use of device
	5.5 Make recommendations for further assessment or treatment in accordance with industry standards
6. Complete and manage documentation	6.1 Complete, present and store accurate documentation in accordance with relevant policies and procedures
	6.2 Document expected short and long term outcomes
7. Follow up client	7.1 Organise client follow up in accordance with industry standards
	7.2 Verify and validate success of fitting and modify electroacoustic parameters where appropriate

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
8. Maintain and repair hearing aids	8.1 Check hearing aid and its components manually 8.2 Conduct acoustic listening check of hearing aid 8.3 Complete test box measurements as required or interpret 2cc coupler data 8.4 Complete minor hearing aid repairs in accordance with industry standards 8.5 Arrange major hearing aid repairs when required 8.6 Inform client of the cause of and solution to the device problem and possible ways to overcome this 8.7 Make minor modifications to improve comfort or acoustic performance

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential *to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTAUD005 Dispense hearing devices

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTAU505/507. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed established procedures and protocols to independently dispense a diverse range of hearing devices to at least 20 people:
  - performed real ear measurements including real ear insertion gain (REIG) and speech mapping to accurately analyse acoustic performance against prescriptive targets,
  - analysed noise reduction, directionality, feedback mechanism and feature performance
  - modified acoustic features of ear moulds and tubing to achieve real ear prescription targets and or improve listening comfort
  - varied characteristics of devices to achieve real ear prescription targets or improve listening comfort
  - assessed subjective comfort, sound clarity and quality, occlusion, feedback, loudness comfort, and take into consideration acclimatisation requirements
- used both linear and non-linear prescription techniques

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

© Commonwealth of Australia, 2025 HumanAbility

- legal and ethical considerations (national and state/territory) for hearing aid dispensing:
  - duty of care
  - informed consent
  - privacy, confidentiality and disclosure
  - codes of conduct of registering bodies
  - policy frameworks, Australian Government Office of Hearing Services requirements
  - work role boundaries, criteria for referral
- current range of available hearing devices, their performance features and suitability for different client needs
- linear and non-linear amplification systems and the principles of at least one of the recognised prescription techniques for both linear and non-linear hearing devices
- electronic features of digitally programmable and digital hearing devices and their effect on the amplification provided, including:
  - compression ratio
  - compression threshold/knee point
  - multi-channel compression
  - directional and omni-directional microphones
  - feedback management and cancellation systems
  - noise suppression systems
  - wireless/Bluetooth features and devices
  - other emerging technologies
- ear mould acoustics, including venting and tubing, mould materials and its effect on hearing device prescription
- how electro-acoustic properties and features interact with each other and the human ear
- strategies to resolve problems encountered in hearing device fitting according to industry best practice
- broader context knowledge in reference to other devices, including:
  - cochlear implants
  - bone anchored devices
  - other emerging devices

Assessment Conditions

Skills must be demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - real ear measurement equipment and software
  - programming interfaces
  - manufacturer’s software
  - Noah or equivalent
  - suitable fitting environment

© Commonwealth of Australia, 2025 HumanAbility

    - repair and modification equipment
- modelling of industry operating conditions, including:
    - integration of problem solving activities
    - provision of services to general public

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTAUD006 Remove cerumen

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. New unit.

Application

This unit describes the skills and knowledge required to prepare for the cerumen removal process, conduct an otoscopy, and remove cerumen safely using curetting only.

This unit applies to audiometrists.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for cerumen removal	1.1 Determine client needs through review of client case history and case management plan 1.2 Clearly explain cerumen removal procedure and provide opportunity for client to ask questions 1.3 Gain client consent for extraction procedure 1.4 Set up equipment following standard protocols and infection control guidelines

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
2. Conduct otoscopy	2.1 Follow personal hygiene and infection control procedures
	2.2 Conduct otoscopy in a non-threatening manner and produce valid, reliable and accurate results in accordance with relevant policy and procedures
	2.3 Identify and respond to any abnormalities of the ear canal
	2.4 Identify contra-indications to cerumen removal
	2.5 Identify most appropriate method for cerumen removal taking into account results of findings
	2.6 Follow cerumen softening procedures to dissolve cerumen if impaction present
	2.7 Make referral to appropriate agency for further assessment and treatment
3. Remove cerumen	3.1 Select appropriately sized speculum as required
	3.2 Extract cerumen using a sterilised wax ring and appropriate head light
4. Follow post-cerumen removal procedures	4.1 Complete post-cerumen removal otoscopic inspection to review status of ear canal
	4.2 Address any post removal requirements using established methods
	4.3 Complete accurate treatment documentation following organisational procedures
	4.4 Identify the need for referral and refer client to health profession as required

© Commonwealth of Australia, 2025 HumanAbility

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential *to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Assessment Requirements for HLTAUD006 Remove cerumen

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. New unit.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed established procedures and protocols to independently remove cerumen for at least 30 clients:
  - used cerumenolytic agents to soften cerumen, taking into account any client allergies
  - extracted cerumen by curette
  - stem any bloodflow
  - removed residual blood or debris post-cerumen extraction

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations (national and state/territory) for cerumen removal:
  - duty of care
  - informed consent
  - privacy, confidentiality and disclosure
  - records management
  - work role boundaries, responsibilities and limitations, indicators for referral
- anatomy, physiology and pathophysiology of the outer and middle ear:
  - medical or post-surgical conditions of the outer and middle ear that alter the appearance and/or function of the external ear canal or tympanic membrane

© Commonwealth of Australia, 2025 HumanAbility

  - client positioning for safe and optimal cerumen removal
  - how to adjust headlamp for optimal view
- correct and safe curetting technique

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - sterilisation equipment
  - otoscope
  - cerumenolytic agents
  - means of disposing blood products
  - cerumen extraction equipment
- modelling of industry operating conditions, including:
  - integration of problem solving activities
  - time constraints for completion of activities
  - provision of services to general public

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors

HLTAYV001 Develop Ayurvedic practice

Modification History

Release	Comments
Release 2	This version was released in *HLT Health Training Package release 3.0.* Update to mapping and metadata. Equivalent competency outcome.
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Supersedes HLTAYV414D. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Application

This unit of competency describes the skills and knowledge required to establish the foundations of an Ayurvedic practice, to evaluate what makes a sustainable practice and then to develop an approach to own practice.

This unit applies to any practitioners working within an Ayurvedic framework.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Establish foundations of Ayurvedic practice	1.1 Identify, access and interpret information about the central philosophies, principles and practices of Ayurveda

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.2 Evaluate principles and practices of Ayurveda in relation to other health care systems
	1.3 Draw on Ayurvedic philosophy to interpret health issues and apply to own practice
2. Represent the Ayurvedic framework	2.1 Determine information needs of different individuals and groups
	2.2 Explain the principles and practices of Ayurveda in a way that can be easily understood by those not familiar with the Ayurvedic system
	2.3 Communicate information about Ayurveda at a level of depth appropriate to audience needs
3. Determine requirements for sustainable practice	3.1 Identify key issues that affect the development and sustainability of professional practice
	3.2 Take account of economic, environmental, human and social considerations
	3.3 Research and collate information to support professional practice
4. Develop and maintain own capacity to practise	4.1 Establish and monitor a personal health strategy that reflects the philosophies and principles of Ayurveda
	4.2 Model philosophies and principles of Ayurveda in personal and professional interactions
5. Develop approach to own practice	5.1 Reflect on professional goals and aspirations
	5.2 Identify and assess professional opportunities in Ayurvedic medicine
	5.3 Consider the opportunities and constraints of individual personal circumstances
	5.4 Make decisions about practice direction, based on reflection and research

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.* 5.5 Develop practical strategies that address own practice goals

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTAYV001 Develop Ayurvedic practice

Modification History

Release	Comments
Release 2	This version was released in *HLT Health Training Package release 3.0.* Update to mapping and metadata. Equivalent competency outcome.
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Supersedes HLTAYV414D. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- used critical thinking skills to:
  - review and reflect on information from a range of sources about Ayurveda
  - evaluate and articulate requirements for sustainable Ayurvedic practice
- communicated about the Ayurveda framework to meet the information needs of at least 3 different individuals or groups
- established a personal health strategy that reflects the values and philosophies of Ayurveda
- developed goals for own practice that reflect the values, philosophies and principles of Ayurveda
- developed a set of actions to support professional practice goals

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

© Commonwealth of Australia, 2025 HumanAbility

- philosophies and principles of Ayurveda, what they mean and how they are applied in practice:
  - history of Ayurveda and its development from inception
  - dynamic interchange between the physical, mental, emotional, spiritual, social, environmental and landscape
  - shad darshanas (the six philosophies)
  - pancha mahabhutas (five great elements)
  - trigunnas (the three gunas)
  - prana (primordial life supporting energy)
  - indriyas (sense organs)
  - tridosha - vata, pitta and kapha, the ayurvedic concept of the three principal energies with intelligence found in the living body and throughout nature
  - agni (13 type)
  - ama
  - sapta dhatu
  - malas (bodily wastes)
  - prapaka and vipaka

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must:

- have at least three years current clinical experience working as an Ayurvedic practitioner providing services to the general public
- hold practising membership of an Australian professional body that represents Ayurvedic practitioners
- fulfil the continuing professional development requirements of the professional body to which they belong

HLTAYV002 Make Ayurvedic lifestyle assessments

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. New unit.

Application

This unit describes the skills and knowledge required to assess client needs in the context of an Ayurvedic lifestyle assessment framework. It requires the ability to gather client information and to make an Ayurvedic health assessment.

This unit applies to Ayurvedic practitioners working with clients in a lifestyle or preventative context.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Determine scope of client needs	1.1 Explore and clarify client expectations 1.2 Provide clear information about scope and limits of lifestyle services to be provided 1.3 Recognise needs that are beyond scope of own practice and make appropriate referrals to other health care professionals 1.4 Identify and respond to any barriers to information gathering and assessment 1.5 Seek client information ethically and respectfully

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
2. Seek information and make assessment using Ayurvedic tools	2.1 Collect accurate and relevant health and lifestyle information, and document in a form which can be interpreted readily by other Ayurvedic practitioners 2.2 Follow clinical and practitioner hygiene procedures 2.3 Frame client questions based on Ayurvedic framework trividha pariksha (three fold examination) and ashtvidha pariksha (eight fold examination) 2.4 Determine prakruti, vikruti, ama and gunas using Ayurvedic principles 2.5 Accurately record client's presenting issues, goals and expectations 2.6 Manage information and records in a confidential and secure way
3. Confirm assessment and discuss with client	3.1 Correlate findings from client assessment 3.2 Determine imbalances through review of findings according to Ayurvedic principles 3.3 Discuss assessment and rationale with the client 3.4 Assign and agree priorities and expectations in consultation with the client 3.5 Respond to client enquiries using language the client understands 3.6 Discuss referral and collaborative options with the client according to specific needs

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

© Commonwealth of Australia, 2025 HumanAbility

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTAYV002 Make Ayurvedic lifestyle assessments

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. New unit.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 200 hours of Ayurvedic lifestyle client consultation work
- prepared for and managed at least 25 different Ayurvedic lifestyle assessments. Clients must include males and females from different stages of life
- used the Ayurvedic lifestyle assessment framework and appropriate techniques to assess client's needs, including:
  - questioning according to Ayurvedic principles
  - trividha parikisha (three fold examination)
  - ashtvidha pariksha (eight fold examination)
- interacted effectively with clients:
  - clearly articulated information about services, treatment options and rationale
  - engaged clients in decision making

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations (national and state/territory) for client assessment:
  - codes of conduct
  - duty of care
  - informed consent
  - mandatory reporting

© Commonwealth of Australia, 2025 HumanAbility

    - practitioner/client boundaries
    - privacy, confidentiality and disclosure
    - records management
    - work role boundaries
        - working within scope of practice
        - presenting symptoms that require referral to a medical practitioner
    - work health and safety
- referral options for practitioners :
    - professional health services including complementary health modalities and medical practitioners
    - community resources and support services
    - types and availability of further medical assessment
- factors and barriers that may impact on assessment
    - physical
    - psychological
    - cultural
    - seasonal
    - demographic
    - influence of alcohol, drugs
- stress factors to consider in assessment and how to respond:
    - age - infants, children, young adult, adults, elders
    - demographic
    - gender specific issues
    - physical/mental strength, gunas, vikruti
    - agni
    - dosha
    - vikriti (inherited and congenital)
    - infection
    - odour
    - seasons
    - stress
    - modern radical lifestyle including dependence on fast foods, incompatible foods, addictions
    - alcohol and other mind altering drug addictions
    - atheist, anti social and other contradictory practices detrimental to health according to Ayurvedic framework
    - emergencies
- trividha pariksha (three fold examination) and ashtvidha pariksha (eight fold examination)
- client information required for Ayurvedic assessment and the scope and depth of information needed around:

© Commonwealth of Australia, 2025 HumanAbility

  - client expectations
  - client history and its components
  - client current state of wellness
- protocols for performing Ayurvedic health assessments:
  - Ayurvedic clinic environment
  - equipment
  - client privacy
  - client instructions

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated clinical environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - client information – client assessment forms, case history
  - private consultation area
- modelling of industry operating conditions, including provision of services to the general public
- clinic supervision by a person who meets the assessor requirements outlined below

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must:

- have at least 3 years current clinical experience working as an Ayurvedic practitioner providing services to the general public
- hold practising membership of an Australian professional body that represents Ayurvedic practitioners
- fulfil the continuing professional development requirements of the professional body to which they belong

HLTAYV003 Provide Ayurvedic bodywork therapies

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Minimum clinic hours added. Additional assessor requirement.

Application

This unit describes the skills and knowledge required to gather client information, prepare equipment for treatment, and then provide Ayurvedic therapeutic treatments such as abhyanga, shirodhara and kati basti.

This unit applies to individuals who provide Ayurvedic massage, either as part of their work as a dedicated Ayurvedic practitioner, or in conjunction with other treatment modalities.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Gather client information	1.1 Collect and document information about client general health according to legal requirements and Ayurvedic framework 1.2 Review information to inform massage approach 1.3 Manage information and records in a confidential and secure manner

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
2. Prepare client, self and environment	2.1 Prepare the client for treatment following infection control procedures and with appropriate draping and confirm comfort levels 2.2 Advise client of possible physical or emotional reactions both during and after treatment 2.3 Access and organise appropriate equipment and materials for treatment 2.4 Select and safely prepare Ayurvedic massage oils, pastes and powders according to assessment 2.5 Check room ambience and temperature following Ayurvedic principles 2.6 Maintain own health through use of self care pre treatment routines
3. Select and use Ayurvedic techniques and sequences	3.1 Determine appropriate techniques based on Ayurvedic health assessment 3.2 Follow therapeutic protocols according to Ayurvedic practice 3.3 Recognise reactions to treatment and provide appropriate response
4. Finalise treatment and advise client	4.1 End the treatment using appropriate protocols 4.2 Provide client with information on recommended follow up activities 4.3 Answer client queries with clarity, using appropriate language

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

© Commonwealth of Australia, 2025 HumanAbility

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency

Assessment Requirements for HLTAYV003 Provide Ayurvedic bodywork therapies

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Minimum clinic hours added. Additional assessor requirement.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 200 hours of Ayurvedic client consultation work
- prepared for and managed at least 25 different Ayurvedic bodywork sessions. Clients must include males and females from different stages of life
- provided Ayurvedic therapeutic treatment according to the Ayurvedic framework:
  - obtained required client information prior to treatment
  - evaluated and responded appropriately to any contraindications
  - selected and used herbalised oils appropriate to the client
  - selected and used techniques and sequences according to established Ayurvedice practice, including:
    - abyhanga
    - shirodhara
    - kati basti

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

© Commonwealth of Australia, 2025 HumanAbility

- principles of Ayurvedic framework and therapies
- legal and ethical considerations (national and state/territory) for bodywork therapies:
  - codes of conduct
  - duty of care
  - infection control
  - informed consent
  - mandatory reporting
  - practitioner/client boundaries
  - privacy, confidentiality and disclosure
  - records management
  - work role boundaries
    - working within scope of practice
    - presenting symptoms that require referral to a medical practitioner
  - work health and safety
- client information required prior to relaxation treatment
  - stress
  - allergies
  - current prescription medication/self medication/supplementation
  - vikruti (inherited and congenital)
  - general appetite and sleep patterns
  - aches and pains
  - recent emotional/physical trauma
  - influence of alcohol/drugs
- self care routines and when to use them:
  - chanting mantras
  - prayer
  - meditation
  - music
  - yoga
  - pranayama
- factors to consider in assessment and how to respond:
  - age - infants, children, young adult, adults, elders
  - demographic
  - gender specific issues
  - physical/mental strength, gunas, vikruti
  - agni
  - dosha
  - vikruti (including inherited and congenital)
- features of Ayuredic abhyanga
  - definitions

© Commonwealth of Australia, 2025 HumanAbility

  - history of massage
  - types of massage
  - time, frequency and duration
  - types of touch e.g. heavy, light, friction
  - massage and constitution
  - fomentation, swedana
  - use of oils
  - curing oils
- types of abhyanga/snehana (the application of base or medicated oil, herbal paste, decoction, herbal chooranas, ubtans and lepas to the body)
- protocols for conducting Ayurvedic therapeutic techniques in relation to:
  - environment
  - equipment
  - massage oils and powders
  - protocol
  - client privacy
  - responding to client instructions
- precautions to be taken in Ayurvedic massage
- basic structure and function of systems and regions of the body within Ayurvedic framework:
  - agni, ama, vikruti, srotarodha, saptadhatu, updhatus
  - mental gunas (emotional states in response to stress, trauma and pain)
- possible reactions and contra-indications and when to refer to a medical practitioner:
  - physical, emotional, mental trauma or illness
  - intoxication
  - pain

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated clinical environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - Ayruvedic base, essential and herbal oils, herbal pastes and powders and equipment to process, decant, mix, stir, measure, apply, remove and dispense the same
  - suitable droni, massage table where these therapies may be provided
  - shiridhara and other snehna therapy equipment
  - Ayurvedic reference texts and notes on therapies and products used
- modelling of industry operating conditions, including provision of services to the general public
- clinic supervision by a person who meets the assessor requirements outlined below

© Commonwealth of Australia, 2025 HumanAbility

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors**.**

In addition, assessors must:

- have at least 3 years current clinical experience working as an Ayurvedic practitioner providing services to the general public
- hold practising membership of an Australian professional body that represents Ayurvedic practitioners
- fulfil the continuing professional development requirements of the professional body to which they belong

HLTAYV006 Take cases within Ayurvedic framework

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Some content also in HLTAYV007. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Minimum clinic hours added. Additional assessor requirements.

Application

This unit describes the skills and knowledge required to determine the broad scope of client needs, make a detailed investigation of symptoms and collect other data that informs client diagnosis within an Ayurvedic framework.

This unit applies to Ayurvedic practitioners.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Determine scope of client needs	1.1 Explore and clarify client objectives and expectations 1.2 Provide clear information about scope and limits of services to be provided 1.3 Recognise needs that are beyond scope of own practice and make appropriate referrals to other health care professionals

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.4 Identify and respond to any barriers to information gathering and assessment
2. Investigate client symptoms	2.1 Use Ayurvedic counselling techniques to seek client information in a respectful and sensitive manner
	2.2 Tailor questioning to meet the needs of the individual client
	2.3 Make observations and elicit specific details about physical and psychological symptoms through trividha pariksha (three fold examination)
	2.4 Conduct physical examination of client using ashtvidha pariksha (eight fold examination and dasavidha pariksha (ten fold examinations)
3. Collect and integrate other data	3.1 Review reports from other health professionals and distil information for consideration in the case
	3.2 Correctly interpret results of medical tests and integrate information into the case within scope of own practice
	3.3 Assess the reliability of data obtained and where possible, establish appropriate clinical correlation with the client's complaints
4. Manage case information	4.1 Collect and record accurate, relevant and well organised information according to Ayurvedic protocols
	4.2 Manage information and records in a confidential and secure way

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

© Commonwealth of Australia, 2025 HumanAbility

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency

Minimum clinic hours added. Additional assessor requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 400 hours of Ayurvedic client consultation work
- prepared for and managed at least 40 different case taking sessions. Clients must include males and females from different stages of life with varied presentations
- taken all cases using trividha pariksha (three fold examination), ashtvidha pariksha (eight fold examination and dasavidha pariksha (ten fold examination), including:
  - used comprehensive questioning to elicit all required information
  - made physical examination and assessment
  - identified situations where there is need for further screening or testing
- correctly interpreted medical information and related information appropriately to the Ayurvedic approach within scope of own practice, including:
  - Ayurvedic health assessment
  - medical reports
- interacted effectively with clients:
  - used effective listening and questioning
  - shown sensitivity to individual client needs
  - clearly articulated information about services, treatment options and rationale
  - engaged clients in decision making

© Commonwealth of Australia, 2025 HumanAbility

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations (national and state/territory) for case taking:
  - codes of conduct
  - duty of care
  - informed consent
  - mandatory reporting
  - practitioner/client boundaries
  - privacy, confidentiality and disclosure
  - records management
  - work role boundaries
    - working within scope of practice
    - presenting symptoms that require referral to a medical practitioner
  - work health and safety
- trividha pariksha (three fold examination techniques):
  - darshana (visual observation)
  - sparsha (tactile perception/inference)
  - prashna (questioning/dialogue)
- ashtvidha pariksha (eight fold examination techniques
- dasavidha pariksha (ten fold examination techniques)
- charaka samhita: sutra sthana
- charaka samhita: sharira sthana
- Ayurvedic psychology and counselling techniques, including:
  - dhi
  - dhriti
  - smriti
  - satva, rajas & tamas
  - prakruti
  - vrikruti
  - physical and mental state assessment
  - use of mantra recitation, prayer, meditation, sat karma cleanses, yoga therapies and a variety of specific Ayurvedic therapies to suit vikruti
- client information required for assessment and the scope and depth of information needed around:
  - client objectives and expectations
  - client history and its components
  - client current state of health

HLTAYV007 Diagnose conditions within an Ayurvedic framework

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Some content also in HLTAYV006. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Minimum clinic hours added. Additional assessor requirements.

Application

This unit describes the skills and knowledge required to complete a critical analysis of case information and make the diagnosis according to Ayurvedic principles. It includes the requirement for the practitioner to assess whether the case falls within their scope of practice.

This unit applies to Ayurvedic practitioners working with clients to address specific therapeutic needs.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Analyse case information	1.1 Prioritise different aspects of case information based on vikruti, agni, ama, srotarodha and principles of shat kriyakala 1.2 Analyse signs and symptoms using established Ayurvedic methodology

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.3 Avoid prejudiced or premature conclusions through use of thorough and objective analysis
	1.4 Correlate Ayurvedic physical, mental and emotional health assessment findings with case history
	1.5 Assess clinical disease according to signs and symptoms of condition, and results of investigations
	1.6 Seek further information where analysis indicates need for further information
	1.7 Recognise situations where analysis indicates the case falls outside the practitioner's capability and make appropriate recommendations and referrals
2. Make diagnosis	2.1 Use professional judgment to draw sound conclusions and make a diagnosis and prognosis from the case taken and data collected
	2.2 Determine causative factors of diseases at physical, mental, emotional and spiritual levels
	2.3 Determine the samprapti (pathogenesis in Ayurveda)
	2.4 Determine the different stages of progression of disease
	2.5 Confirm the condition according to Ayurvedic stage and related implications
3. Confirm diagnosis with client	3.1 Discuss assessment and rationale with client
	3.2 Communicate relevant information from medical or diagnostic reports where appropriate
	3.3 Clarify any discrepancies between the practitioner's and client's perception of the condition
	3.4 Assign and agree priorities in consultation with the client
	3.5 Discuss referral options with the client according to individual needs

Assessment Requirements for HLTAYV007 Diagnose conditions within an Ayurvedic framework

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Some content also in HLTAYV006. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Minimum clinic hours added. Additional assessor requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 400 hours of Ayurvedic client consultation work
- prepared for and managed at least 40 client sessions. Clients must include males and females from different stages of life with varied presentations
- analysed all cases following Ayurvedic principle of panch nidan:
  - prioritised information appropriately
  - assessed mental, emotional and physical health and vikruti
  - completed sound critical analysis of cases based on Ayurvedic principles and correct interpretation of medical information
  - developed evidence based diagnosis according to Ayurvedic principles
  - used all 21 health assessments to conclude diagnosis
  - clearly and sensitively communicated diagnosis to the client

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

© Commonwealth of Australia, 2025 HumanAbility

- legal and ethical considerations (national and state/territory) for Ayurvedic assessment/diagnosis:
  - codes of conduct
  - duty of care
  - informed consent
  - mandatory reporting
  - practitioner/client boundaries
  - privacy, confidentiality and disclosure
  - records management
  - work role boundaries
    - working within scope of practice
    - presenting symptoms that require referral to a medical practitioner
  - work health and safety
- scope of Ayurvedic practice:
  - when treatment is not appropriate and needs to be referred
  - when Ayurvedic treatments may be combined with other treatments
  - presenting phase of disease and whether Ayurveda treatment is acceptable by client (with all its cleanses, diets, regimens, medicines, therapies, yoga, meditations)
- established Ayurvedic methodology, including panch nidan
  - nidan (etiology)
  - purva rupa (pre-symptoms)
  - rupa (cardinal symptoms)
  - samprapti (pathogenesis)
  - upashya (therapeutic guidelines and solutions)
- Ayurvedic disease process:
  - sanchaya (accumulation)
  - prakopa (aggravation)
  - prasara (overflow)
  - sthan sanshreya (localisation)
  - vyakti (re-location)
  - bheda (differential diagnosis)
- Ayurvedic anatomy and physiology including:
  - agni
  - ama
  - dhatus (Ayurvedic tissues)
  - prakruti (constitutions)
  - malas
  - srotas
  - prana, ojas, tejas (subtle life force)
  - pancha niahabhutas (the five prime elements)

© Commonwealth of Australia, 2025 HumanAbility

  - tridosha
  - triguna
- srotarodha
- disease states in the channel system:
  - pranavaha - including respiratory but not limited to asthma, cough, hay fever and sinusitis
  - annavaha - including digestive but not limited to anorexia, hyperacidity, indigestion, dyspepsia and vomiting
  - ambuvaha - including fluids but not limited to thirst, oedema and ascites
  - rasavaha - including lymphatic but not limited to fever, fatigue, chronic fatigue syndrome
  - raktavaha - including circulatory but not limited to hypertension, gout, anaemia and piles
  - mamsavaha - including muscular but not limited to myomas, muscle atrophy, emaciation
  - medovaha - including adipose but not limited to obesity and lipomas
  - asthivaha - including skeletal but not limited to scoliosis, rheumatoid arthritis, osteoarthritis and cervical spondylitis
  - majjavaha - including nervous but not limited to attention deficit disorder (ADD)/attention deficit hyperactivity disorder (ADHD), stress, anxiety and depression
  - sukravaha & arthavaha & stanyavaha - reproductive, including but not limited to impotency, menstruation, premenstrual syndrome (PMS), leucorrhoea, lactation but not limited to mastitis, excessive and insufficient lactation
  - mutravaha - including urinary but not limited to polyuria, diabetes and dysuria
  - purushivaha - including excretory/stool but not limited to constipation irritable bowel, dysentery and diarrhoea
  - swedovaha - including integumentary but not limited to psoriasis, eczema and acne
  - manovaha - including mental but not limited to poor concentration, negative thinking and memory loss
- symptomology and pathology according to Ayurvedic practice
- the state and quality of the tridoshas and trigunas
- physical signs and symptoms of disease
- various stages of disease, the clients strength and ability to go through cleansing, remedial and yoga therapies, diet and nutrition supplementation and regular health assessments.
- further testing and assessment options and procedures for different types of condition
- charaka samhita, with particular reference to sutra sthana, nidana sthana, vimana sthana and indriya sthana

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated clinical environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:

© Commonwealth of Australia, 2025 HumanAbility

  - client information – case notes, health record
  - private consultation area
- modelling of industry operating conditions, including provision of services to the general public
- clinic supervision by a person who meets the assessor requirements outlined below

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors**.**

In addition, assessors must:

- have at least 5 years current clinical experience working as an Ayurvedic practitioner providing services to the general public
- hold practising membership of an Australian professional body that represents Ayurvedic practitioners
- fulfil the continuing professional development requirements of the professional body to which they belong

	effectiveness of the treatment
	1.3 Explain clearly how the treatment will be provided and managed
	1.4 Inform the client of possible physical or emotional reactions during and following a session and the appropriate course of action to take
	1.5 Follow established protocols and infection control procedures to physically prepare the client for treatment
	1.6 Confirm client consent for treatment
2. Use Ayurvedic techniques and sequences	2.1 Determine treatment sequence and location according to Ayurvedic health assessment indications
	2.2 Use the condition and response of the client as a continual feedback to the initial assessment
	2.3 Position client to optimise their comfort and support while allowing for optimum application of techniques
	2.4 Maintain therapist postures that ensure a controlled distribution of body weight
	2.5 Maintain client-focused attention throughout the treatment session
	2.6 Recognise reactions to treatment and make prompt appropriate response
3. Provide advice and resources to client	3.1 Educate client in relevant and practical techniques for promotion and maintenance of optimum health
	3.2 Answer client queries with clarity, using appropriate language
	3.3 Use honesty and integrity when explaining treatment plans, schedules and recommendations to the client
	3.4 Promote client independence and responsibility in treatment when appropriate
4. Monitor treatment	4.1 Evaluate progress with the client against objectives of

HLTAYV009 Provide therapeutic Ayurvedic nutritional advice

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTAVY601C/HLTAYV602C/HLTAYV605D/ HLTAYV613D. Some content also in HLTAYV010. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Minimum clinic hours added. Additional assessor requirements.

Application

This unit describes the skills and knowledge required to determine an Ayurvedic nutritional treatment strategy based on an existing diagnosis, provide relevant advice to the client and complete treatment documentation.

This unit applies to Ayurvedic practitioners working with clients to address specific therapeutic needs.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Establish dietary and nutritional plans	1.1 Identify potential dietary modifications or nutritional supplements based on identified vrikruti and virudha ahara (lifestyle) from within the Ayurvedic framework

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.2 Assess inherited, congenital, acquired and seasonal factors that may be affecting nutritional status
	1.3 Consider treatment and advice provided by other health care professionals
	1.4 Determine any contraindications to dietary changes and supplement provisions and adjust plan accordingly
	1.5 Take into consideration cultural factors and other possible client compliance issues
	1.6 Establish timeframe, therapeutic expectations and evaluation mechanisms
	1.7 Clearly document plan and its component parts using language to assist client interpretation
2. Provide advice and resources to the client	2.1 Clearly explain proposed dietary plan to client with rationale and expectations
	2.2 Provide clear instructions, and negotiate if required
	2.3 Explain factors which may interfere with the effectiveness of the treatment
	2.4 Negotiate the management of dietary modifications in relation to other current medicines
	2.5 Request client to monitor responses to the supplements and to contact practitioner as required
	2.6 Clarify and agree responsibilities of practitioner and client within the treatment plan
	2.7 Explain and agree evaluation strategies
3. Complete treatment documentation	3.1 Accurately record details of dietary plans and recommendations in client file
	3.2 Record arrangements for treatment review according to clinic guidelines

© Commonwealth of Australia, 2025 HumanAbility

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency

Assessment Requirements for HLTAYV009 Provide therapeutic Ayurvedic nutritional advice

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTAVY601C/HLTAYV602C/HLTAYV605D/ HLTAYV613D. Some content also in HLTAYV010. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Minimum clinic hours added. Additional assessor requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 400 hours of Ayurvedic client consultation work
- prepared at least 40 different nutritional plans. Clients must include males and females from different stages of life with varied presentations, including:
    - dosha imbalances
    - ama
    - deficiency or excess in the dhatus, agni, malas, doshas and ojas
- followed Ayurvedic principles by determining appropriate strategies based on the diagnosis and evaluation of:
    - nutritional status
    - physical, mental and emotional status
    - available medical data
    - particular client issues, addictions or preferences
    - contraindications

© Commonwealth of Australia, 2025 HumanAbility

- planned strategies to balance rajasic and tamasic gunnas, to reduce ama generation, to eliminate the excessive build up of doshas, to open all srotamsi, to maintain optimum agni, to restore balanace and ojas and to sustain health at all the four levels
- interacted effectively with clients:
  - provided clear advice with rationale, expectations and affecting factors
  - explained and agreed treatment monitoring and evaluation

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations (national and state/territory) for provision of nutritional advice:
  - codes of conduct
  - duty of care
  - informed consent
  - mandatory reporting
  - practitioner/client boundaries
  - privacy, confidentiality and disclosure
  - records management
  - work role boundaries
    - working within scope of practice
    - presenting symptoms that require referral to a medical practitioner
  - work health and safety
- principles of Ayurvedic nutrition and diet:
  - ahara, vihara aushadhi principle
  - prakruti and vikruti specific
  - variations necessary with the changing seasons
  - digestive processes
  - rasa, virya and vipaka, prabhawa and gunnas
  - agnis and their functions
  - shath rasa - the six tastes
  - tridosha theory
  - triguna theory and its relationship to food
  - virudha ahar
- Ayurvedic food classifications, categories, composition and therapeutic uses:
  - fruit
  - vegetables
  - dairy
  - animal foods

© Commonwealth of Australia, 2025 HumanAbility

  - oils
  - sweeteners
  - nuts and seeds
  - grains
  - beans and legumes
  - herbs and spices
  - best utility of ahara
  - gruels
  - virudha ahara
  - pratinidhi ahara
  - ahara to suit various prakruti and vikruti
- types and features of culinary herbs and spices in Ayurveda
- rasayana, vajikarana & chikitsa preparations
- types and features of foods containing macronutrients and micronutrients, vitamins and minerals, carbohydrates, fats and proteins
- function of fibre in the body
- types and features of foods that affect the mind and moods, and the body:
  - food additives
  - preservatives
  - colouring
  - alcohol/drug consumption
  - virudha ahar
  - fast food dependence
  - wrong diet choices for prakruti
- Ayurvedic cooking and food preparation techniques for major food classifications
- features of ama, its causes signs and symptoms (emotional, mental and physical)
- nutritional supplements in the Ayurvedic framework:
  - main Ayurvedic nutritional supplements used for each system/condition/mind state
  - appropriate safe dosage levels for different groups
  - potential adverse effects
  - principles of formulation - including dosage, dosage form, and duration of treatment according to reference texts
- drug-nutrient and nutrient-nutrient interactions
- amino acids (essential and non-essential)
- potential impact of supplementation on the condition or disease state, including preventative action
- types of dietary modifications and their indications for use:
  - exclusions
  - inclusions
  - increased consumption
  - decreased consumption

Assessment Requirements for HLTAYV010 Select and advise on Ayurvedic medicines - dravyaguna

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTAVY601C/HLTAYV602C/HLTAYV605D/ HLTAYV613D. Some content also in HLTAYV009. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Minimum clinic hours added. Additional assessor requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 400 hours of Ayurvedic client consultation work,
- created at least 40 different client prescriptions. Clients must include males and females from different stages of life with varied presentations
- selected medicines based on Ayurvedic principles, determining appropriate medicines based on the diagnosis, including:
  - information about the condition including phase or stage
  - prevalent season and sandhi
  - agni, prapaka, vipaka, malas
  - triguna/state of mind
  - available vikruti/medical data
  - ahara, vihar, aushadhi
  - kaya chikitsa
  - bhaishajya kala
  - available medical data
  - particular client issues or preferences

© Commonwealth of Australia, 2025 HumanAbility

    - contraindications
- planned strategies to balance rajasic and tamasic gunnas, to reduce ama generation, to eliminate the excessive build up of doshas, to open all srotamsi, to maintain optimum agni, to restore balance and ojas and to sustain health at all the four levels
- interacted effectively with clients:
    - provided clear explanations about treatment rationale, expectations and affecting factors
    - provided clear instructions about administration of medicine
    - explained and agreed treatment monitoring and evaluation

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations (national and state/territory) for Ayurvedic medicines:
    - codes of conduct
    - duty of care
    - informed consent
    - mandatory reporting
    - practitioner/client boundaries
    - privacy, confidentiality and disclosure
    - records management
    - Therapeutic Goods Administration (TGA) requirements
    - work role boundaries
        - working within scope of practice
        - presenting symptoms that require referral to a medical practitioner
    - work health and safety
- dravyaguna, including:
    - gunas, rasapanchaka and uses of:
        - minimum of 100 dravya
        - current scheduled or restricted Ayurvedic herbs
        - culinary herbs
    - groups of herbs used in Ayurveda, their contraindications, identification and distinguishing features, interrelationships and incompatibilities
    - Ayurvedic herbs with respect to their use for general symptoms, energetic, psychological and physiological indications
    - active principles of the medicines used for each dosha/condition/system
    - methods of administration for medicines
    - ubtans, lepas, base, essential and herb oils, resins, extracts, clays, balms, washes, lubricants, pastes, decoctions

© Commonwealth of Australia, 2025 HumanAbility

- contraindications to treatments
- ways to address excessive ama/doshas
- principles of chikitsa to achieve the following:
  - shad upkarma
  - vyadhiharam
  - prakrutisthapanam
  - prakrutivighataka
  - nidanparivarjana (ch. vi)
  - dhatushamya chikitsa (ch. su)
  - vishudha chikitsa (ch. ni)
  - svabhava chikitsa (ch. su)
- pharmacodynamics of pharmaceutical and medicines and the theory of drug action, factors modifying drug effect and dosage, drug toxicity and toxicology
- pharmacokinetics of Ayurvedic medicines – drug administration, absorption, distribution, metabolism and excretion
- possible obstacles to cure and responses to treatments
- Supplementary measures in the management of the condition/system:
  - dietary considerations
  - exercise
  - lifestyle
  - stress
- interaction of treatments with foods, other herbs, nutritional supplements and drugs
- principles of formulation (including dosage and duration of treatment) for:
  - avaleha
    - chitrakharitaki
    - drakshavelha
    - erand pak
    - haridrai khanda
    - haritakyadi rasayana
    - kutjavelha
    - musali pak
    - saubhagya shounthi pak
    - shilajatu rasayana
    - supari pak
    - triphala rasayana
  - ghritam - a minimum of 5
  - kashayam - a minimum of 5
  - choorana - a minimum of 10
  - guggulu – a minimum of 7
  - vati - a minimum of 5

© Commonwealth of Australia, 2025 HumanAbility

- lauh mandoor – a minimum of 2
- asava and arishta – a minimum of 10
- bhasmas - a minimum of 5
- arka - a minimm of 2
- shad bindu taila- a minimum of 5
- swarsa
- kalka
- kwatha
- hima
- phanta
- ubtan,
- dravaka
- ghrita
- lavana kshara
- lepa
- mandoora
- pishti
- sattva
- taila
- varti

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated clinical environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - client information – case notes, health record
  - private consultation area
  - Ayurvedic Formulary of India
  - Ayurvedic Pharmacopoeia of India
  - other Ayurvedic reference texts
  - online TGA references regarding labelling
  - information on scheduled herbs
- modelling of industry operating conditions, including provision of services to the general public
- clinic supervision by a person who meets the assessor requirements outlined below

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors**.**

In addition, assessors must:

© Commonwealth of Australia, 2025 HumanAbility

- have at least 5 years current clinical experience working as an Ayurvedic practitioner providing services to the general public
- hold practising membership of an Australian professional body that represents Ayurvedic practitioners
- fulfil the continuing professional development requirements of the professional body to which they belong

HLTAYV011 Prepare and dispense Ayurvedic medicines - dravyaguna

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Minimum clinic hours added. Additional assessor requirements.

Application

This unit describes the skills and knowledge required to obtain and store materials, prepare Ayurvedic medicines as per the *Ayurvedic formulary of India* and the *Ayurvedic pharmacopoeia of India*, and dispense those medicines according to a pre-prepared script or order.

This unit applies to any practitioner who provides Ayurvedic medicines to clients.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Obtain and store materials	1.1 Determine authorised and reputable sources of products certified to be free of insecticides, pesticides, chemicals, preservatives, heavy metals and contaminants 1.2 Source natural raw, semi-processed, processed and

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	manufactured materials as required for scope of practice
	1.3 Determine storage requirements for different types of herbs and materials
	1.4 Maintain integrity of materials through correct handling and storage
	1.5 Maintain stock levels according to clinic requirements
2. Prepare Ayurvedic medicines according to Ayurvedic Formulary of India and Ayurvedic Pharmacopoeia of India	2.1 Check and prepare equipment for operational readiness
	2.2 Select and assemble ingredients according to order
	2.3 Make accurate calculations for quantities and ratios
	2.4 Follow Ayurvedic rituals, mantra recitation and meditations and clear non-sattvic influences
	2.5 prepare medicine according to Ayurvedic medicine methodology
	2.6 Label and store medicines according to legal requirements and Ayurvedic guidelines
3. Dispense Ayurvedic medicines	3.1 Establish form and quantity of required medicines from prescription or order
	3.2 Follow procedures to prevent contamination of or by the medicine
	3.3 Check and prepare dispensing equipment for operational readiness
	3.4 Select and assemble prescribed medicine and dravya
	3.5 Package and label correct quantities into suitable containers with clear and accurate labelling
	3.6 Provide accurate instructions for administration and care of Ayurvedic medicines
	3.7 Complete accurate dispensing documentation according to clinic guidelines and legal requirements

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Minimum clinic hours added. Additional assessor requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- prepared at least 20 Ayurvedic medicines, including all of the following at least twice:
  - avaleha/pravahi
  - kashaya
  - kwatha choorana
  - guggulu
  - ghrita
  - choorana
  - taila
  - vati- gautika
  - lepa/ ubtan
  - swarsa
  - kalka
  - kwatha
  - hima
  - phanta
  - kshirapaka
  - ubtan

© Commonwealth of Australia, 2025 HumanAbility

    - lepa
- dispensed each of the following at least once:
    - arishta
    - arka
    - asava
    - avaleha
    - choorana
    - dravaka
    - ghrita
    - guggulua preparations
    - kashaya
    - lauh
    - lepa/ ubtan
    - talia
    - vati
- followed dispensing processes that meet the *Ayurvedic formulary of India* and the *Ayurvedic pharmacopoeia of India* guidelines and legal requirements:
    - correctly interpreted prescription or order
    - checked materials and equipment
    - made accurate calculations and measurements
    - packed and accurately label dispensed materials
    - completed accurate documentation

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations (national and state/territory) requirements for the preparation and supply of Ayurvedic medicines:
    - Therapeutic Goods Administration (TGA) guidelines
    - labelling
    - principles of manufacturing
    - quality control procedures
    - work health and safety
- format and requirements of the *Ayurvedic formulary of India* and the *Ayurvedic pharmacopoeia of India* guidelines
- sources of Ayurvedic medicines and their raw, semi processed, processed and manufactured ingredients and methods to determine quality
- key features of dravya used for Ayurvedic medicines:
    - plants used

© Commonwealth of Australia, 2025 HumanAbility

  - botanical keys
  - plant anatomy
  - plant classifications and nomenclature
- types of Ayurvedic medicines, what they are, how they are prepared
- preparation techniques for anupanas
- non-medicinal ingredients used in the preparation of Ayurvedic medicines
- chemical and physical incompatibilities
- techniques to prepare medicines from source materials as per Ayurvedic guidelines
- Ayurvedic medicine and allopathic drug interactions, both complementary and contra indicatory
- Ayurvedic medicine dispensing principles and methods
- significance and methods of monitoring control points within the dispensing process
- equipment and instrumentation components, purpose and operation
- work health and safety hazards and controls for Ayurvedic medicines
- waste handling requirements and procedures
- recording requirements and procedures
- environmental conditions required to maintain integrity of medicines before, during and after preparation
- types of instructions that must accompany Ayurvedic medicines
- procedures to prevent contamination of Ayurvedic medicines

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated dispensary environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - kitchen, bench and shelving space
  - cast iron woks, ceramic and steel cookware, stirrers and decanters
  - secure storage areas
  - measuring equipment
  - sterile containers
  - labels
  - natural and manufactured medicinal substances for preparation
  - distilled water
  - medicating alcohol
  - *Ayurvedic formulary of India*
  - *Ayurvedic pharmacopoeia of India*
  - other Ayurvedic reference texts
  - online TGA references regarding labelling
  - information on scheduled herbs

© Commonwealth of Australia, 2025 HumanAbility

    - safety protection equipment, including fire blankets, fire extinguishers, first aid equipment
- modelling of industry operating conditions, including provision of medicines to the general public
- preparation supervision by a person who meets the assessor requirements outlined below

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors In addition, assessors must:

- have 5 years current clinical experience working as an Ayurvedic practitioner providing services to the general public
- hold practising membership of an Australian professional body that represents Ayurvedic practitioners

HLTAYV012 Monitor and evaluate Ayurvedic treatments

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. New unit.

Application

This unit describes the skills and knowledge required to monitor and evaluate Ayurvedic treatments, both from an individual client and whole of practice perspective.

This unit applies to Ayurvedic practitioners.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Evaluate client progress	1.1 Seek client feedback about treatment impacts and compliance with the treatment plan 1.2 Make own observations and assessment of client changes based on Ayurvedic framework 1.3 Evaluate treatment impacts in relation to client's physical, mental, spiritual and emotional wellbeing 1.4 Compare changes and improvements with expectations in the treatment plan, existing research and evidence from own practice 1.5 Seek additional information from clients when progress suggests this is needed

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.6 Accurately document progress in client treatment plan
2. Adjust treatment based on evaluation	2.1 Determine the need for adjustment to treatment plan based on evaluation of client progress
	2.2 Identify and respond to factors that may be inhibiting client progress
	2.3 Adjust treatment plans based on outcomes and sources of research or evidence that support Ayurvedic practice
	2.4 Accurately document any adjustments to treatment plans
3. Develop practice based on evaluation	3.1 Review progress of clients in context of own individual practice
	3.2 Identify areas of own practice for further research or development to support client outcomes
	3.3 Pro-actively seek and respond to professional development opportunities

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency

Assessment Requirements for HLTAYV012 Monitor and evaluate Ayurvedic treatments

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. New unit.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 400 hours of Ayurvedic client consultation work
- managed at least 40 different Ayurveda assessment and treatment sessions - clients must include males and females from different stages of life with varied presentations
- monitored and evaluated treatments provided to at least 10 different clients presenting with at least 2 sessions per client

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations (national and state/territory) for monitoring and evaluation:
  - children in the workplace
  - codes of conduct
  - duty of care
  - informed consent
  - mandatory reporting
  - practitioner/client boundaries
  - privacy, confidentiality and disclosure
  - records management
  - work role boundaries

© Commonwealth of Australia, 2025 HumanAbility

    - working within scope of practice
    - presenting symptoms that require referral to a medical practitioner
  - work health and safety
- types of criteria by which Ayurvedic treatments are evaluated, including regular client follow-ups and feedback
- typical complications associated with different treatments and therapies and how to respond in an ongoing treatment plan
- expectations of treatment for different conditions and client groups, and factors that impact on those expectations:
  - client history
  - contraindications
  - compliance
  - interactions with other treatments
  - timeframes for expected health benefit
- sources of research and evidence that support Ayurvedic practice
- principles underpinning continuation or variation of treatment and the Ayurvedic rationale that underpins these

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated clinical environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - client information – case history, treatment plan
  - private consultation area
- modelling of industry operating conditions, including provision of services to the general public
- clinic supervision by a person who meets the assessor requirements outlined below

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must:

- have at least 5 years current clinical experience working as an Ayurvedic practitioner providing services to the general public
- hold practising membership of an Australian professional body that represents Ayurvedic practitioners
- fulfil the continuing professional development requirements of the professional body to which they belong

HLTCAR001 Perform electrocardiography (ECG)

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTCA401/HLTPAT407. Minimal changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to prepare for and conduct electrocardiography (ECG) procedures, producing traces that are suitable for diagnostic purposes. It does not include interpretation of the ECG.

This unit applies to any health worker conducting ECG procedures. ECGs are performed in medical centres, hospitals and cardiologist rooms.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes of a unit of competency.	*The Performance Criteria specify the level of performance required to demonstrate achievement of the Element.*
1. Prepare electrocardiography machine for use	1.1 Check cleanliness and settings of ECG machine prior to use in accordance with organisation procedures and infection control requirements 1.2 Prepare ECG leads in accordance with the manufacturer’s specifications

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes of a unit of competency.	*The Performance Criteria specify the level of performance required to demonstrate achievement of the Element.*
2. Prepare for ECG procedure	2.1 Greet client courteously and identify self 2.2 Identify client following organisation and regulatory procedure 2.3 Obtain, interpret and accurately record personal and clinical information in accordance with organisation policies and procedures 2.4 Provide complete and accurate information in easily understood language regarding the ECG procedure to client 2.5 Provide client with the opportunity to ask questions and discuss areas of concern 2.6 Obtain consent following ethical and legal requirements
3. Prepare client for ECG procedure	3.1 Maintain client privacy and dignity throughout procedure 3.2 Follow standard infection control procedures 3.3 Position the client correctly and comfortably as recommended by manufacturer or organisation procedure for different client groups 3.4 Prepare client's skin for electrode placement in accordance with organisation procedures and manufacturer instructions 3.5 Attach leads in accordance with procedure required and manufacturer's recommendations, and double check lead placement 3.6 Identify potential client risks and advise supervisor if risk exists
4. Produce an ECG trace	4.1 Produce trace and check trace for diagnostic suitability 4.2 Identify and respond to situations where repeat trace

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes of a unit of competency.	*The Performance Criteria specify the level of performance required to demonstrate achievement of the Element.*
	is required
	4.3 Forward trace to relevant organisation or medical officer for interpretation using required method of transmission according to organisation procedure
	4.4 Record episode details in accordance with organisation procedures
5. Complete ECG process	5.1 Remove ECG leads and electrodes from client maintaining client privacy and ensuring skin integrity
	5.2 Provide client with assistance as required, on completion of procedure
	5.3 Dispose of waste in accordance with waste management procedures
	5.4 Store ECG machine in accordance with manufacturer's specifications

Foundation Skills

The Foundation Skills describe those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTCAR001 Perform electrocardiography (ECG)

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTCA401/HLTPAT407. Minimal changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed established technical, infection control and safety requirements and produced at least 3 different ECG traces satisfactory for diagnostic purpose
- identified and responded appropriately to situations of interference, increased amplitude or wandering baseline

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations for ECGs, and how these are applied in organisations, including:
  - children in the workplace
  - duty of care
  - informed consent
  - mandatory reporting
  - privacy, confidentiality and disclosure
  - records management
  - work role boundaries

© Commonwealth of Australia, 2025 HumanAbility

    - work health and safety
- standard infection control requirements
- key features of AS/NZS 3200.1.2:2005 and AS/NZ 3551:2012 or their successors, in relation to ECG equipment,
- client factors that affect ECG, including:
    - physical limitations
    - respiratory function
- features, function and use of ECG equipment, including:
    - pre-checking and calibration procedures
    - electrical safety requirements
    - common problems and how to respond
    - routine maintenance requirements
- sources of interference, including:
    - client
    - equipment
    - environment
- quality requirements for ECG tracing
- anatomy and physiology of the heart
- normal and abnormal ECG rhythms

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
    - ECG machine and associated leads/electrodes
    - client furniture
    - documented procedures for the candidate to follow
- modelling of industry operating conditions, including:
    - interaction with clients
    - presence of situations requiring problem solving

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTCAR002 Perform holter monitoring

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Removed prerequisite.

Application

This unit describes the skills and knowledge required to attach a holter monitor and produce a diagnostic trace for submission to the requesting medical officer.

This unit applies to any health worker involved in holter monitoring. This work takes place in pathology collection centres, medical centres, hospitals and cardiologist rooms.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare equipment for use	1.1 Check equipment for good working order 1.2 Check materials for availability and supply 1.3 Insert new battery and cassette tape correctly into holter monitor
2. Prepare client for holter	2.1 Greet client courteously and identify self

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
monitor	2.2 Identify client following organisation and regulatory procedure
	2.3 Obtain, interpret and accurately record personal and clinical information in accordance with organisation policies and procedures
	2.4 Provide complete and accurate information in easily understood language regarding the holter monitoring procedure to client
	2.5 Provide the client with the opportunity to ask questions and discuss areas of concern
	2.6 Obtain consent following ethical and legal requirements
3. Prepare for monitor recording	3.1 Maintain client privacy and dignity throughout procedure
	3.2 Follow standard infection control procedures
	3.3 Position the client correctly and comfortably and place electrodes in accordance with organisation and manufacturer procedures, client's needs and current standards
	3.4 Prepare client's skin for electrode placement as required
	3.5 Attach leads correctly and double check lead placement
	3.6 Take a trial trace and check for interference, wandering baseline and amplitude as required
	3.7 Identify potential client risks and advise supervisor if risk exists
	3.8 Provide accurate instruction to client on use of device
4. Process holter monitor trace	4.1 Produce trace and check trace for diagnostic suitability
	4.2 Identify and respond to situations where repeat trace is required

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	4.3 Remove holter monitor leads and electrodes from client
	4.4 Review computer analysis of holter tape in accordance with scope of job role or organise submission of tape to requesting medical officer
5. Complete holter monitor process	5.1 Provide client with assistance as required on completion of procedure
	5.2 Clean holter monitor and leads on completion of procedure in accordance with infection control procedures
	5.3 Dispose of disposable holter monitor electrodes and other materials in accordance with waste management procedures
	5.4 Store holter monitor leads and machine in accordance with manufacturer's specifications and work health and safety (WHS) policy and procedures

Foundation Skills

The Foundation Skills describe those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTCAR002 Perform holter monitoring

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Removed prerequisite.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed established technical, infection control and safety requirements and produced at least 3 different holter monitor traces satisfactory for diagnostic purposes
- identified and responded appropriately to situations of interference, increased amplitude or wandering baseline

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations for holter monitoring, and how these are applied in organisations, including:
  - children in the workplace
  - duty of care
  - informed consent
  - mandatory reporting
  - privacy, confidentiality and disclosure
  - records management
  - work role boundaries
  - work health and safety

© Commonwealth of Australia, 2025 HumanAbility

- standard infection control requirements
- client factors that affect holter monitor testing, including:
  - physical limitations
  - respiratory function
- features, function and use of holter monitor equipment, including:
  - pre-checking procedures
  - electrical safety requirements
  - common problems and how to respond
  - routine maintenance requirements
- sources of interference:
  - client
  - equipment
- quality requirements for a holter monitor trace
- anatomy and physiology relevant for performance of holter monitoring testing and interpretation

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - holter monitor
  - procedures for the candidate to follow
- modelling of industry operating conditions, including:
  - interaction with clients
  - presence of situations requiring problem solving

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors

HLTCAR003 Assist with stress testing

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Removed prerequisite.

Application

This unit describes the skills and knowledge required to prepare clients and equipment and to assist the medical officer during a stress test.

This unit applies to any health worker assisting with stress tests. Stress tests are performed in medical centres, hospitals and cardiologist rooms.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare stress testing equipment	1.1 Check and confirm availability of materials 1.2 Check equipment for good working order in accordance with organisation procedures and manufacturer guidelines

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
2. Prepare client for stress testing	2.1 Greet client courteously and identify self 2.2 Identify client following organisation and regulatory procedure 2.3 Obtain, interpret and accurately record personal and clinical information in accordance with organisation policies and procedures 2.4 Review client medical history and address pre-existing conditions within scope of own job role 2.5 Provide complete and accurate information in easily understood language regarding the stress test procedure to client 2.6 Provide client with the opportunity to ask questions and discuss areas of concern 2.7 Obtain consent following ethical and legal requirements
3. Attach electrodes for stress test	3.1 Maintain client privacy and dignity throughout procedure 3.2 Follow standard infection control procedures 3.3 Prepare client's skin for electrode placement as required 3.4 Position client correctly and comfortably and place electrodes in accordance with client needs and current standards 3.5 Attach blood pressure cuff correctly to the client
4. Assist medical officer during stress test	4.1 Ensure supervising medical officer is present prior to commencement of test 4.2 Follow medical officer instruction during test 4.3 Record blood pressure and 12 lead electrocardiography (ECG) whilst client is supine and standing 4.4 Record and monitor 12 lead ECG and blood pressure during exercise and post exercise in accordance with

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	policies and procedures
	4.5 Identify and report signs of client discomfort, distress or adverse reaction to the medical officer in attendance and check equipment for true reading
	4.6 Suspend or stop the test in response to adverse client reaction
	4.7 Inform and reassure client, as appropriate, throughout the procedure
	4.8 Maintain communication with the client throughout procedure
5. Complete stress test	5.1 Remove stress test leads and electrodes from client following correct procedure
	5.2 Store stress test leads in accordance with manufacturer's guidelines
	5.3 Dispose of disposable stress test electrodes and other materials in accordance with waste management procedures
	5.4 Provide client with assistance as required, on completion of the procedure
	5.5 Complete, print and present report to cardiologist for review

Foundation Skills

The Foundation Skills describe those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTCAR003 Assist with stress testing

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Removed prerequisite.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed medical officer instructions, established procedures, safety requirements and infection control guidelines and produced at least 3 different diagnostic stress test results from 3 different people

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations for stress testing, and how these are applied in organisations, including:
  - children in the workplace
  - duty of care
  - informed consent
  - mandatory reporting
  - privacy, confidentiality and disclosure
  - records management
  - work role boundaries (and limitations)
  - work health and safety

© Commonwealth of Australia, 2025 HumanAbility

- standard infection control requirements
- client factors that affect stress testing, including:
  - physical limitations
  - respiratory function
- features, function and use of holter monitor equipment, including:
  - pre-checking procedures
  - electrical safety requirements
  - common problems and how to respond
  - routine maintenance requirements
- sources of interference:
  - client
  - equipment
- quality requirements for a stress test
- anatomy and physiology relevant for performance of stress testing and interpretation:
  - basic pharmacology related to cardiac function
  - recognition of life threatening cardiac rhythm abnormalities
- complications and contraindications for clients undergoing stress testing

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - stress testing equipment
  - documented procedures for the candidate to follow
- modelling of industry operating conditions, including:
  - interaction with clients
  - presence of situations requiring problem solving

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTDEF001 Participate in a land based deployed health capability

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to prepare for deployment and function effectively at the operational level as part of a deployed health element.

This unit applies to Australian Defence Force (ADF) personnel working under direction in the context of a land based operational environment. Operational environments vary in accordance with Government directives and include war fighting, peacekeeping and humanitarian assistance.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
1. Prepare for deployment	1.1 Check stores and equipment to ensure they are operational and prepared for movement and complete required documentation 1.2 Safely pack and load dedicated stores and equipment

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
	to facilitate anticipated transport outcomes
	1.3 Complete personal preparation for deployment according to requirements
2. Participate in deployment activities	2.1 Use effective communication and teamwork skills
	2.2 Prioritise work in consultation with other members of the team
	2.3 Set up designated work areas, stores and equipment for use
	2.4 Identify equipment and basic facility shortfalls and report to supervisor
3. Operate within a deployed health capability element	3.1 Receive and transfer patients in accordance with operational procedures
	3.2 Adapt to specific deployment requirements in performance of operational duties
4. Participate in re-deployment activities	4.1 Work effectively as part of a team to re-deploy the health element
	4.2 Refurbish stores and equipment for future operations
	4.3 Identify stores and equipment shortfalls and report to supervisor
	4.4 Safely pack and load dedicated stores and equipment for redeployment
	4.5 Participate in debriefing/evaluation activities to improve future deployments and address individual's needs

© Commonwealth of Australia, 2025 HumanAbility

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTDEF001 Participate in a land based deployed health capability

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- completed the following according to the overarching operational mandate and standing orders, policies and instructions for that deployment:
  - participated in core role as an effective member of a deployed health capability over a 36-hour period
  - completed the following individual preparations:
    - inoculations
    - fitness and medical/dental checks
    - personal kitting
    - wills
  - loaded, set-up and operated the following stores and equipment using safe manual handling techniques:
    - tentage
    - medical equipment
    - power systems
    - general field equipment
    - personnel kitting
  - erected deployment shelters
  - adapted to the unique requirements of a specific deployment
- used effective communication and teamwork skills:

© Commonwealth of Australia, 2025 HumanAbility

- active listening
- questioning
- feedback
- information sharing
- collaborative planning

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal, ethical and military requirements for working in land based deployment:
  - codes of practice
  - duty of care
  - infection prevention and control
  - informed consent
  - mandatory reporting
  - privacy, confidentiality and disclosure
  - records management and documentation
  - rights and responsibilities of workers, employers and clients
  - specific military information sources that inform work practice:
    - ADF publications
    - health policy directives
    - land warfare manuals
    - Law of Armed Conflict (LOAC)
    - Geneva conventions
    - maritime and aviation orders
    - operational mandate
    - operational/movement orders and expectations
    - organisation/unit standard operating procedures
    - current operational mandate
  - work role boundaries – responsibilities and limitations
  - work health and safety
- organisation policies and procedures pertinent to own capability
- individual readiness requirements
- manual handling techniques that support safe work practice and safe loading:
  - preparing the load/client
  - preparing the environment
  - using the stronger muscles in the legs where possible, rather than spinal muscles
  - maintaining a neutral spine when lifting and carrying

© Commonwealth of Australia, 2025 HumanAbility

  - using two hands to lift or carry
  - keeping the load close to the body/centre of gravity
  - avoiding lifting objects above shoulder height
  - minimising repetitive movements
  - positions not held for long periods of time
  - avoiding twisting by repositioning feet whilst turning
- equipment and stores operating instructions and maintenance requirements pertaining to designated deployment logistics
- general health element components, organisation of roles and associated support (i.e. Roles 1, 2 & 3**)** logistical supply chain for the deployment
- operational posture requirements (duty systems, weapons, daily routines, shifts and rosters, local defence procedures, movements orders and environmental constraints)
- role of other health care providers and capabilities
- set-up and operation of equipment contained within own health capability
- structure, function and layout of own health capability

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions over a continuous 36 hour period. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - a simulated operations area requiring the establishment of a health element to support the embedded forces
  - multiple mannequins, actors and support staff to establish a working environment for operations and participate in military based scenarios
  - a land based health element
  - catering, shelter, hygiene facilities (personnel barracks/sleeping quarters)
  - transport vehicles
- modelling of industry operating conditions, including presence of, and interaction with, sufficient personnel to support the exercise requirements

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors. In addition, assessors must have at least 3 years' experience as a military officer/senior non-commissioned officer (SNO) with deployment experience for all military components.

Subject matter experts with a minimum of 3 years clinical experience will also be required for any clinical scenarios assessed during the exercise.

HLTDEF002 Provide treatments for common conditions

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to assess and treat a nominated and limited range of common health conditions and injuries.

This unit applies to Australian Defence Force (ADF) health care providers working within a military context in remote and operational contexts.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Perform a basic patient assessment	1.1 Establish and accurately record a basic patient history 1.2 Ascertain the history of the complaint through patient questioning 1.3 Conduct basic clinical assessment and measurements according to established procedures and infection control requirements 1.4 Maintain patient privacy according to guidelines

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
	1.5 Identify and respond to requirement for further referral
	1.6 Liaise with other health care providers as applicable for ongoing assessment
2. Determine treatment plan	2.1 Determine treatment options most suitable to the patient's condition.
	2.2 Liaise with other health care providers in determining treatment options according to client needs
	2.3 Read and correctly interpret medical reports and other data relevant to the condition
	2.4 Provide accurate and current patient advice on assessment and treatment options
	2.5 Develop a treatment plan, in accordance with clinical guidelines and authorised treatment procedures
3. Implement treatment plan	3.1 Gain appropriate consent to proceed with treatment plan
	3.2 Implement proposed plan following clinical guidelines and authorised treatment procedures
	3.3 Use equipment according to manufacturer instructions
	3.4 Organise follow up appointment for treatment evaluation
	3.5 Accurately document treatment provided
4. Manage and review the treatment	4.1 Monitor treatment outcomes against expectations
	4.2 Provide ongoing advice to patient regarding condition
	4.3 Evaluate therapeutic expectations and liaise with other health care professionals regarding ongoing treatment.
	4.4 Amend treatment plan as required

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. 4.5 Organise ongoing referral as required 4.6 Accurately document treatment outcomes and follow up appropriately

Foundation Skills

The Foundation Skills describe those required skills (employability skills, language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

Assessment Requirements for HLTDEF002 Provide treatments for common conditions

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed an accurate clinical assessment in accordance with established procedures at least 4 times, incorporating all of the following:
  - patient history
  - known allergies and medications
  - temperature, pulse and respiration, blood pressure (TPR&BP)
  - oxygen saturation (SaO2)
  - non invasive general physical examination
  - examination of presenting condition
  - assessment outcomes
- developed and applied treatment(s) for the following conditions according to established procedures:
  - acute rhinitis
  - allergic rhinitis
  - bites and stings
  - bowel constipation
  - common cold
  - contact dermatitis
  - diarrhoea
  - fever

© Commonwealth of Australia, 2025 HumanAbility

- fungal and yeast infections of the skin
- headache
- influenza
- lip soreness
- malaria (prickly heat)
- motion sickness
- parasitic infestations of the skin
- pharyngitis
- worms/parasitic infestations
- foreign body in eye
- skin injuries, including blisters, lacerations, punctures, grazing, contusions or minor burns
- soft tissue injuries, including haematoma, sprain, strain or overuse injuries

• used all of the following treatments and approaches:

- application of hot/cold therapy
- basic dressings and bindings
- sports strapping/bandaging
- issue and administration of topical and enteral medication (oral and rectal)
- referring for further clinical assessment and treatment

• used effective communication techniques during the client interview process, including:

- two way questioning
- clinical education
- treatment plan support
- negotiation

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

• legal, ethical and military requirements for treatment provision:

codes of practice

duty of care

infection prevention and control

informed consent

mandatory reporting

privacy, confidentiality and disclosure

records management and documentation

rights and responsibilities of workers, employers and clients

© Commonwealth of Australia, 2025 HumanAbility

specific information sources that inform work practice:
Primary clinical care manual (PCCM)
organisation/unit standard operating procedures
current operational mandate
established clinical procedures
work role boundaries – responsibilities and limitations
work health and safety

- anatomy and physiology, including:
  structure and function of the following human body systems and their interactions:
  cells, tissues and organs
  cardiovascular system
  respiratory system
  musculo-skeletal system
  endocrine system
  digestive system
  urinary system
  reproductive system
  integumentary system
  lymphatic system
  nervous system, including sensory systems – eye and ear
  the special senses – smell, taste, vision, equilibrium and hearing
  immune system
- anatomical and medical terminology:
  when referring to the human body
  when taking measurements in different body systems
- patient assessment requirements and techniques
- normal values and parameters
- aspects of the common conditions listed in the Performance Evidence, including:
  presenting symptoms
  disease process and phases
  treatment modalities and their contraindications
- medical tests and diagnostic procedures and the need for referral
- patient compliance consequences
- principles of clinical assessment, prescribing, and case management
- referral procedure and pathways
- role of other health care providers and support services
-

© Commonwealth of Australia, 2025 HumanAbility

Assessment Conditions

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations have not been provided in the workplace.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - a health centre/clinic/hospital environment with sufficient patient throughput to meet the majority of performance evidence requirements
  - casualties (high fidelity simulation, resuscitation mannequins and/or actors)
  - clinical documentation
  - medical equipment for assessment purposes
  - equipment and consumables for treatment purposes
  - pathology samples/containers requiring labelling
- modelling of industry operating conditions, including:
  - a minimum of 2-3 people for the consultation/treatment
  - a minimum of 1-2 other personnel supporting the scenario/workplace (i.e. for referrals, ongoing advice)

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors. In addition, assessors must have at least 3 years' experience as a clinical health professional in a primary healthcare setting.

HLTDEF003 Perform the duties of a scribe during casualty resuscitation

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to accurately obtain and document casualty information from various sources during a resuscitation.

This unit applies to Australian Defence Force (ADF) personnel working as part of a resuscitation team in an operational context.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
1. Prepare for the role of scribe	1.1 Prepare resuscitation documentation prior to arrival of casualty 1.2 Prepare resuscitation area to receive the casualty in accordance with preliminary clinical data obtained and direction from resuscitation team leader 1.3 Prepare own personal protective equipment in

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
	accordance with organisation policies and procedures
	1.4 Follow guidance from team leader and resuscitation team members in accordance with prescribed role
2. Participate as a scribe in the resuscitation	2.1 Follow personal hygiene and infection control procedures
	2.2 Ascertain casualty identity and history and record accurately
	2.3 Record treatment information and casualty's response to treatment
	2.4 Maintain chronological record of events and procedures of the resuscitation
	2.5 Communicate relevant treatment information to other team members to aid in the continuity of care of the casualty
3. Perform post resuscitation duties	3.1 Accurately complete all relevant documentation
	3.2 Provide documentation to team leader for authorisation
	3.3 Organise ongoing casualty transfer in accordance with procedures
	3.4 Refurbish resuscitation area in preparation for the next resuscitation
	3.5 Participate in post event team debrief as applicable

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this

Assessment Requirements for HLTDEF003 Perform the duties of a scribe during casualty resuscitation

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- completed the following tasks at least 3 times in line with governing regulations, trauma codes of practice and workplace procedures:
  - interpreted clinical data from multiple resources and accurately recorded details chronologically within emergency time constraints
  - recorded the following clinical information in a legible and clear manner:
    - medication
    - observations
    - assessment outcomes
    - interventions
    - referrals
    - pathology specimens
    - consumables (i.e. traceable with serial numbers)
  - operated/interpreted the following basic resuscitation equipment:
    - vital signs monitoring
    - intra-venous lines and fluids
    - monitors
- used effective communication and teamwork skills:
  - active listening
  - questioning

© Commonwealth of Australia, 2025 HumanAbility

  - feedback
  - information sharing
- completed basic arithmetic calculations and recorded numbers

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal, ethical and military requirements for scribe work:
  - codes of practice
  - duty of care
  - infection prevention and control
  - informed consent
  - mandatory reporting
  - privacy, confidentiality and disclosure
  - records management and documentation
  - rights and responsibilities of workers, employers and clients
  - specific information sources that inform work practice:
    - *Primary clinical care manual* (PCCM)
    - organisation/unit standard operating procedures
    - current operational mandate
  - work role boundaries – responsibilities and limitations
  - work health and safety
- documentation used for casualty resuscitation purposes, including associated pathology requirements
- personal protective equipment requirements
- standard resuscitation equipment schedules and operation
- clinical monitoring requirements for resuscitation
- documentation processes relevant to receiving and resuscitating a casualty
- medical terminology
- basic anatomy and physiology of all body systems
- general resuscitation protocols provided by Australian Resuscitation Council (ARC)
- general pathology and investigative requirements pertaining to standard resuscitation processes
- inter-departmental transfer requirements
- role of other resuscitation team members and support services
- storage and security requirement for personal effects (including weapons, explosives and pyrotechnics)

© Commonwealth of Australia, 2025 HumanAbility

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - a resuscitation bay mimicking the work environment
  - casualties (high fidelity simulation, resuscitation mannequins and/or actors)
  - documentation used within the resuscitative environment
  - pathology samples/containers requiring labelling
- modelling of industry operating conditions, including:
  - a minimum of 3 people in the resuscitation team
  - a minimum of 1-2 other personnel supporting the resuscitation

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors. In addition, assessors must have at least 3 years' experience as a health professional in a resuscitative/emergency department setting.

HLTDEF004 Attend to emergency patients being transported by road

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to convey and receive information, safely move and transport patients, and hand patient over to destination facility.

This unit applies to Australian Defence Force (ADF) clinical health care providers.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
1. Convey and receive information relating to the incident	1.1 Identify patient to be transported and ascertain clinical requirements for transport 1.2 Plan client care and equipment requirements within scope of own role 1.3 Determine route and timings for transfer from operational information 1.4 Report clear and comprehensive details to all

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
	personnel involved in the plan
	1.5 Provide patient with clear information on transport procedures as appropriate
2. Move patient safely	2.1 Secure patient and equipment for transport according to safety requirements
	2.2 Conduct loading/unloading smoothly following safe manual handling procedures
	2.3 Prevent unnecessary movement that may exacerbate clinical condition
	2.4 Recognise and respond to patient privacy considerations
3. Transport patient	3.1 Check that patient has been adequately prepared for transport in accordance with directions and plan
	3.2 Identify and respond to any change to original transport plan
	3.3 Maintain continuity of care during transport
	3.4 Use clinical equipment during transport as required
	3.5 Liaise with the vehicle driver to optimise patient care
	3.6 Maintain communication between driver and destination facility to optimise patient care
4. Hand over patient to destination health facility	4.1 Accurately document clinical information regarding transport
	4.2 Follow procedures to maintain confidentiality of information
	4.3 Provide a verbal clinical report to the receiving health professional
	4.4 Convey transport concerns as applicable
	4.5 Continue patient care until responsibility is taken over by staff of the destination facility

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTDEF004 Attend to emergency patients being transported by road

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- developed and documented at least 1 transport/movement plan that includes:
  - logistical requirements, including relevant points of contact
  - clinical requirements
- transported a patient by road in at least 2 different situations in accordance with state/territory regulations and organisation policies and procedures:
  - used safe manual handling techniques
  - used ancillary equipment
- used effective communication during the transport process:
  - used communication equipment and systems
  - communicated with vehicle driver
  - communicated with health professionals using appropriate medical terminology
- adapted approaches to clinical tasks to the emergency transport context

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal, ethical and military requirements for emergency transport:

© Commonwealth of Australia, 2025 HumanAbility

  - codes of practice
  - duty of care
  - infection prevention and control
  - informed consent
  - mandatory reporting
  - privacy, confidentiality and disclosure
  - records management and documentation
  - rights and responsibilities of workers, employers and patients
  - work role boundaries – responsibilities and limitations
  - work health and safety, manual handling safety for self, patients and equipment
- organisation policies and procedures for patient transport
- methods of loading and unloading patients under life-threatening conditions
- types of movement that exacerbate clinical conditions
- patient care and restraint during transportation
- configuration of the road transport vehicle being used for carriage
- operation of communications equipment (radio/2 way)
- features of AS/NZS 4535:1999 ambulance restraint systems that apply to patient transport from an individual worker's perspective

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - a road transport vehicle suitable for patient transport
  - casualties (high fidelity simulation, resuscitation mannequins and/or actors). Note: 1 transport assessment must include an actual person (not a mannequin) and can be conducted in a simulated role
  - documentation used within the emergency environment
  - in service stretchers
- modelling of industry operating conditions, including:
  - a minimum of 2 people in the transport team (1 driver and the designated carer)
  - a minimum of 1-2 other personnel supporting the transport process

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors. In addition, assessors must have at least 3 years' experience as a health professional in an acute care/emergency/pre-hospital department setting.

HLTDEN001 Prepare for and assist with oral health care procedures

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Minimum hours added. Removal of pre-requisites Supersedes HLTDA303D

Application

This unit of competency describes the skills and knowledge required for a dental assistant to assist the operator by preparing the dental surgery including preparing necessary equipment, instruments and materials for oral health care procedures, and to assist the operator during the delivery of these procedures.

This unit applies to dental assisting work.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare the dental surgery for oral health care procedures	1.1 Make accessible in the clean zone of the surgery the patient's necessary charts and records
	1.2 Identify correctly the planned procedure
	1.3 Anticipate and select correctly the equipment, instruments materials and medicaments for the planned procedure, and arrange them in their likely order of use
	1.4 Give personal protective equipment to the patient and members of the dental team
	1.5 Support aseptic techniques to prevent the spread of infection
2. Use dental terminology in communication within the health care setting	2.1 Communicate with other members of the dental team using dental terminology
	2.2 Receive, understand and document written and oral instructions using dental terminology
	2.3 Use and correctly interpret frequently used abbreviations and symbols in dentistry
	2.4 Refer to the Australian Schedule of Dental Services and Glossary for interpreting information used in dental assisting work.
3. Record personal, medical and dental details	3.1 Actively encourage patients to provide complete information without embarrassment or hesitation
	3.2 Make accurate, legible and legal records of the patient's personal, medical and dental information as directed by the operator
	3.3 Verify this information in accordance with operator requirements
	3.4 Maintain confidentiality of patient information

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
4. Select and prepare syringe safely for local anaesthesia	4.1 Select and prepare the correct syringe, cartridge and needle for local anaesthesia as directed by the operator 4.2 Check the expiry dates for the local anaesthetic cartridge prior to use 4.3 Transfer the unused local anaesthetic syringe to the operator in accordance with infection control guidelines for the transfer of sharps between health care workers 4.4 Disassemble syringe, cartridge and dispose of needle and cartridge appropriately
5. Assist the operator during oral health care procedures	5.1 Select and transfer to the operator the instruments, the equipment, materials and medicaments required for oral health care procedures 5.2 Assist the operator to maintain a clear field of vision 5.3 Clear the mouth of oral fluids and debris, and control moisture 5.4 Retract and protect the patient's soft tissues using instruments and materials appropriate to the procedure 5.5 Monitor the patient's well-being and take the necessary actions without delay to support the patient and the operator 5.6 Prepare the correct materials and medicaments using the correct technique and to the correct consistency and quantity required, and within the designated timelines as directed by the operator 5.7 Select additional instruments and materials as required without contaminating sterile stock 5.8 Dispose of waste materials appropriately during the cleaning and change-over using sustainable practices and organisation protocols

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
6. Maintain and store instruments, equipment materials and medicaments	6.1 Check that instrument sharpness conforms to operator specifications and advise of any deficiency 6.2 Maintain instruments and equipment in good working order 6.3 Store instruments, equipment, materials and medicaments correctly, according to manufacturers' instructions 6.4 Monitor storage requirements, shelf life and expiry dates of materials and medicaments 6.5 Report faults in equipment or instruments promptly to the operator 6.6 Ensure tracking and maintenance records are legible and accurate 6.7 Arrange for servicing of instruments and equipment in line with manufacturers' instructions

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No Equivalent Unit

Assessment Requirements for HLTDEN001 Prepare for and assist with oral health care procedures

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Minimum hours added. Removal of pre-requisites Supersedes HLTDA303D

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a minimum period of 50 hours of dental assisting work in a simulated environment using scenarios based on general and specialised dentistry including endodontics and oral surgery
- performed the activities outlined in the performance criteria of this unit during a minimum period of 250 hours of dental assisting work in a dental clinic workplace
- prepared at least 3 patients in the dental clinic workplace for oral health care procedures at the chair-side including:
  - applying standard precautions
  - ensuring instruments used for invasive procedures are sterile at time of use
  - protecting materials, equipment and instruments from contamination until required for use
- provided chair-side support to the operator in the dental clinic workplace on at least 3 occasions during oral health care procedures for general dentistry and specialised dentistry including:
  - selecting and preparing instruments, equipment and materials as directed by the operator
  - dispensing and preparing materials and medicaments according to manufacturers' specifications and operator's request
- stored materials and medicaments in accordance with manufacturers' specifications and operator's requirements in the workplace.

© Commonwealth of Australia, 2025 HumanAbility

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- dental practice and organisation policy and procedures
- dental and medical records and charts including:
  - confidentiality of patient records
  - items that constitute a dental record
  - correct dental terminology and how it is used in hand written dental charting and computer software charting programs
  - the purpose and requirements for maintaining accurate records of examination, treatments, materials used and drugs and medicaments prescribed
  - the purpose of study casts and the materials used in their construction
  - the reasons for taking radiographs and photograph
- fundamental oral anatomy and physiology including:
  - deciduous and permanent dentition and dates of eruption
  - structure and functions of teeth and the periodontal tissues
  - structures of the oral cavity including salivary glands and saliva
  - tooth identification
- fundamental oral pathology including:
  - pathology of dental caries and periodontal disease
  - the main causes of dental caries and periodontal disease
  - the role of bacteria, diet and dental plaque
- fields of dentistry required to assist the operator to carry out procedures for the full range of general oral health care procedures
- normal growth and development of children and the promotion and maintenance of oral health and requirements of children with special needs
- effects of ageing upon the oral tissues and the special needs of elderly dental patients
- dental materials, their properties and correct storage
- fundamental dental pharmacology and anaesthesia including:
  - local anaesthetic techniques
  - local anaesthetic equipment and drugs
  - complications which may arise from the administration of local anaesthesia
- retracting soft tissues and moisture control:
  - methods of retracting and protecting soft tissue
  - methods for providing a clear field of vision
  - methods for controlling moisture

© Commonwealth of Australia, 2025 HumanAbility

- reasons why patients need to follow pre- and post-operative instructions, and the importance of this
- contributing factors to medical and dental emergencies that can occur, and the appropriate response
- aseptic techniques used in oral health care procedures
- additional precautions of maintaining clean surfaces and managing blood and body fluid spills.

Assessment Conditions

Skills must have been demonstrated in the dental clinic workplace or in a simulated environment as specified in the performance evidence.

The requirement in the performance evidence for a minimum of 50 hours in a simulated environment using scenarios must be undertaken before demonstration of skills in the workplace with members of the public.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources including:
  - autoclaves
  - barrier protection materials
  - cleaning equipment
  - curing light
  - dental chair
  - dental unit (suctioning unit, water line, air turbine motors, operator light)
  - operator and assistant protective equipment
  - radiographs
  - waste disposal equipment
  - dental materials (medicaments and impression and restorative materials)
  - dental instruments (including endodontic, surgical and restorative) handpieces and burs
  - Dental Board of Australia guidelines on infection control on which the candidate bases the planning process
- modelling of industry operating conditions, including access to real people for simulations and scenarios in dental assisting work.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must hold a minimum of 5 years clinical experience in dental assisting work.

HLTDEN002 Assist with dental radiography

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites Supersedes HLTDA304D

Application

This unit of competency describes the skills and knowledge required for a dental assistant to prepare patients for dental radiography. It also describes the skills and knowledge to process and mount conventional dental radiographs.

This unit applies to dental assisting work.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for dental radiography	1.1 Position the patient comfortably 1.2 Reassure the patient and explain the procedure in language that is easily understood 1.3 Ask the patient to remove items that may interfere with the radiographic examination, and offer appropriate explanation 1.4 Ensure patient, other members of the dental team and

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
	the public are protected from ionising radiations
	1.5 Assist the operator in the implementation of safe work practices to minimise radiation risks to workers and to patients during procedure
	1.6 Select and prepare the correct radiographic film or image receptors and relevant holders for the radiographic examination, and make it available to the operator
2. Prepare equipment and materials for dental radiography	2.1 Maintain clean and dry working surfaces
	2.2 Clean and maintain processing equipment in good working order
	2.3 Maintain processing solutions at the correct strength and temperature
	2.4 Record accurately the date of preparation of solutions
	2.5 Arrange for servicing of instruments and equipment in line with manufacturers' instructions and Radiation Health Committee national policies, codes and standards
	2.6 File equipment service records in a location within the surgery that can be readily accessed
	2.7 Prepare program to receive image, correctly orientate and label radiograph and enter patient data
3. Process and mount dental radiographs	3.1 Protect processing facility and equipment against accidental intrusion of light
	3.2 Wear personal protective equipment
	3.3 Handle radiographic film packages or image receptors carefully so that their quality is maintained
	3.4 Carry out processing stages in the correct sequence and for the appropriate duration in accordance with manufacturers' specifications
	3.5 Identify common faults caused by incorrect processing and notify operator if these occur
	3.6 Rectify processing faults in accordance with operator's instructions
	3.7 Notify the operator of any processing faults that

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
	cannot be rectified prior to further radiographs being processed
	3.8 Label, date and file the radiograph mounting accurately and legibly
	3.9 Mount and secure radiographs in correct anatomical position for viewing
4. Maintain stock of unexposed radiographic film and chemicals	4.1 Store radiographic film, image receptors and chemicals in accordance with manufacturers' specifications
	4.2 Maintain sufficient stock
	4.3 Rotate film stock so that film is used before its expiry date
5. Assure the quality of dental radiographic processing	5.1 Participate effectively in radiographic quality assurance programs
	5.2 Monitor processing solutions for deterioration
	5.3 Notify the operator when radiographs do not meet the quality criteria of the reference radiograph produced under optimum conditions
	5.4 Collect and record all unacceptable radiographs that do not meet diagnostic standards due to processing error, and identify how processing can be improved
	5.5 Dispose of waste chemicals safely in accordance with manufacturers' specifications and legislative requirements
	5.6 Maintain and clean the imaging plate scanner according to organisation procedures

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

© Commonwealth of Australia, 2025 HumanAbility

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTDEN002 Assist with dental radiography

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites Supersedes HLTDA304D

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- prepared at least 3 patients for dental radiographic imaging procedures
- consistently applied safe work practices for dental radiography work including:
  - using protective equipment to minimise the risk of ionising radiations to self and patient
  - correctly handling, storing and disposing of radiographic films and processing solutions receptors
- correctly processed, mounted and filed radiographic films and digital images on at least 3 occasions, including:
  - applying the correct processing procedure
  - implementing remedies for common processing faults
  - recognising common processing errors
  - handling digital receptors carefully
  - attaching accurate, legible and complete records

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This include knowledge of:

© Commonwealth of Australia, 2025 HumanAbility

- national and State/Territory legal and ethical requirements and considerations for dental assisting work and how these are applied in organisations and in individual practice including:
  - codes of practice and safety guides:
    - radiation protection in dentistry
    - safe use of radiation
  - duty of care
  - informed consent and statutory requirements of consent
  - practice standards – Dental Board of Australia guidelines on infection control
  - privacy, confidentiality and disclosure
  - radiation user licence
  - rights and responsibilities of workers, employers and patients
  - work role boundaries – responsibilities and limitations
  - work health and safety
- equipment and materials used for dental radiography and the correct procedures for use including:
  - equipment for automatic processing
  - equipment for manual processing
  - equipment for digital radiography
  - reasons for rotating film stock and using film before its expiry date
  - reasons for storing films away from ionising radiation
  - safe methods of storage and disposal of processing solutions
  - the nature and purpose of processing solutions
- production and biological effects of ionising radiation:
  - biological risks associated with X-rays
  - hazards associated with X-rays including the mechanisms by which X-rays cause damage to human tissues
  - nature and uses of X-rays
  - production of X-rays
- process for mounting films including:
  - fundamental knowledge of dental anatomy
  - methods of mounting radiographs
- process for processing films including:
  - procedures required for automatic film processing
  - procedures required for manual film processing
  - processing solutions and appropriate methods for their handling, preparation, replenishment, storage and safe disposal
  - reasons for light-tightness and use of safelights
  - requirements for clean working space and adequate ventilation
  - the automatic processing cycle
  - the stages of the manual processing cycle

© Commonwealth of Australia, 2025 HumanAbility

  - procedures required for digitally transferring images
- quality assurance of processing including:
  - criteria for determining whether a radiograph is of an acceptable quality
  - causes of common processing errors and the remedy for correction
- code of practice for radiation protection in dentistry including:
  - methods for monitoring the adequacy of radiation protection
  - procedures for minimising radiation risks to patients, self, the oral healthcare team and the public
  - the organisation's quality assurance policy for processing radiographs to consistent diagnostic quality
  - the purpose of quality assuring dental radiographs and its relationship to radiation protection
- role of radiographs in dentistry including:
  - benefits and risks of dental radiography
  - digital radiography, what it is, how it is used and its advantages and disadvantages over conventional film-based radiography
  - extraoral films and applications
  - intraoral film sizes and applications
  - use of radiographs in diagnosing and monitoring dental disease.

Assessment Conditions

Skills must have been demonstrated in the dental clinic workplace with the addition of simulations and scenarios where the full range of contexts and situations cannot be provided in the workplace. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources including:
  - barrier protection equipment and/or materials
  - dental chair and unit
  - radiographic machine
  - operator and assistant protective equipment
  - radiographs and/or sensors
  - waste disposal equipment suitable for radiographic solutions and films
  - Dental Board of Australia guidelines on infection control on which the candidate bases the planning process
- modelling of industry operating conditions including access to real people for simulations and scenarios in dental assisting work.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must hold a minimum of 5 years clinical experience in dental assisting work.

HLTDEN003 Assist with administration in dental practice

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites Supersedes HLTDA306D

Application

This unit of competency describes the skills and knowledge required for a dental assistant to assist the operator by managing appointments to suit the patient and the organisation, recording and reconciling payments, and maintaining patient records.

This unit applies to dental assistants who assist with administration in dental practice.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Communicate effectively with patients and other persons	1.1 Greet patients and other visitors appropriately. 1.2 Make available an appropriate environment for the patient to complete medical, dental and financial details 1.3 Listen carefully and be sensitive to patient or carer's point of view 1.4 Provide information to patient or carer appropriately and completely, using language that can be easily understood 1.5 Ensure patient or carer understands information provided to them 1.6 Show empathy and respect for patient or carer by being polite and avoiding negative comments
2. Respond appropriately to enquiries from patients and visitors	2.1 Maintain personal dress and presentation 2.2 Operate communication equipment effectively 2.3 Respond to enquiries promptly, politely and ethically 2.4 Determine the purpose of an enquiry and the identity of the person and retrieve relevant records 2.5 Prioritise messages and record them legibly and accurately 2.6 Refer enquiries outside area of responsibility or knowledge to appropriate supervisor 2.7 Comply with organisation protocols for electronic communication with patients or carers 2.8 Maintain confidentiality of information relating to patients, staff and the dental practice or organisation

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
3. Allocate appointments appropriate to patient and organisation requirements	3.1 Identify the patient's appointment requirements 3.2 Seek agreement on an appointment time that meets the patient's preferences and the organisation's requirements 3.3 Apply knowledge of the patient management system to record details accurately and legibly using standard dental notation in the organisation's appointment system 3.4 Provide a copy of appointment details to the patient 3.5 Monitor appointment schedules and notify patients and the oral health care team of any necessary changes within a suitable timeframe
4. Calculate and record basic financial transactions	4.1 Complete petty cash vouchers accurately and account for all monies 4.2 Calculate correct fees 4.3 Apply Goods and Services Tax (GST) where appropriate in line with identified requirements 4.4 Validate cheques and process credit or debit card payments 4.5 Check and record legibly and accurately payments received 4.6 Provide the patient with a receipt

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
5. Handle cash and record financial transactions	5.1 Balance accurately monies received against records of payment in accordance with organisation policies 5.2 Ensure cash is secured in an approved location 5.3 Respond to suspected breaches of security and take the appropriate action with minimum delay in accordance with organisation policies and procedures 5.4 Identify a record of bad debts and take appropriate action in accordance with organisation procedures 5.5 Follow organisation banking procedures correctly
6. Maintain patient records	6.1 Access and prepare the correct patient files and make notation of the appropriate fees and diagnostic records 6.2 Enter information legibly and accurately in accordance with organisation procedures 6.3 Store patient dental records correctly, securely and confidentially 6.4 Maintain up-to-date, accurate, legible and complete records of laboratory work

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
7. Assist with patient recalls	7.1 Apply knowledge of a patient recall system
	7.2 Mark patient records with the relevant recall date as appropriate and as directed by the operator
	7.3 Identify patients who are due for recall and notify them that an appointment is due
	7.4 Follow-up with courtesy those patients who do not respond to a recall appointment request

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Numeracy – in order to correctly calculate basic financial calculations, including addition, multiplication and calculation of percentages.

Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTDEN003 Assist with administration in dental practice

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites Supersedes HLTDA306D

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- assisted with management of an appointment and recall system on 3 occasions including:
  - recording, labelling and filing forms
  - recording patient details and records
  - recording appointments
  - assessing the urgency of calls and prioritising appointments
  - responding to a range of requests for information
- recorded financial transactions in accordance with dental practice or organisation requirements including:
  - calculating fees
  - recording payments
- interacted effectively with at least 3 different patients from a range of different social and cultural backgrounds including:
  - showing empathy
  - dealing with conflict situations
  - asking for clarification from patient
  - using negotiation skills.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete the tasks outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the work role. This includes knowledge of:

- national and State/Territory legal and ethical requirements and considerations, for dental assisting work including:
  - codes of practice
  - discrimination
  - duty of care
  - informed consent and statutory requirements of consent
  - practice standards – Dental Board of Australia guidelines on infection control
  - privacy, confidentiality and disclosure for the recording and storage of patient records
  - records management and health privacy principles and their application to the collection of information by the dental practice or organisation
  - work role boundaries – responsibilities and limitations
  - work health and safety
- Dental Board of Australia guidelines on dental records
- procedures for taking and recording appointments, including:
  - confirming appointments
  - action that must be taken for broken or cancelled appointments
  - dentist's preferred work routine
  - particular needs that patients may have for the timing of appointments
  - relevant details that must be entered into the appointment system, and the written confirmation that must be provided to the patient
  - time constraints imposed by the dental laboratory
  - time requirements of different treatment procedures, and the effect this has on appointment scheduling
  - ways in which scheduling of appointments may cause problems for the practice, and possible methods for remedying this
- methods used by the dental practice or organisation to identify those patients who require either recall examination or follow-up treatment
- methods used for follow-up of patients who do not respond to recall
- fundamental dental terminology including:
  - abbreviations and symbols used when recording dental treatment
  - community periodontal index
  - notation systems in accordance with codes and guidelines such as the Federation Dentaire Internationale (FDI) and charting symbols for tooth surfaces, cavities and other dental problems
- processes for handling and recording financial transactions, including:
  - Health Industry Claims and Payments Service (HICAPS) electronic claims
  - issuing invoices

© Commonwealth of Australia, 2025 HumanAbility

- itemising patient accounts, using the coding system described in the Australian Schedule of Dental Services and Glossary wherever possible
- operating a petty cash system
- organisation policy on banking and secure handling of cash
- recording payments and issuing of receipts
- Department of Veteran's Affairs (DVA) health care program
- the different methods of payment, and the details that need to be recorded and checked for credit card, debit card and cheque payments.

Assessment Conditions

Skills must have been demonstrated in the dental clinic or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies as well as using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must hold a minimum of 5 years clinical experience in dental assisting work.

HLTDEN004 Implement an individualised oral hygiene program

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites Supersedes HLTDA407D

Application

This unit of competency describes the skills and knowledge required to implement an individualised oral hygiene program and promote oral health.

This unit applies to dental assistants and to other health care workers who are actively involved in promoting the general well-being of patients through promotion of healthy eating habits and good oral health.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1.Implement a prescribed oral health education program	1.1 Follow a prescribed oral health education program 1.2 Review patient's current oral hygiene routines 1.3 Provide information on the causes and prevention of oral diseases to patient or carer appropriately and completely using language that can be easily understood 1.4 Provide an appropriate environment for patient or

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
	carer to ask questions and become involved in improving their oral health
	1.5 Actively encourage patient or carer to follow an effective individual oral health program
	1.6 Implement a review strategy to determine the effectiveness of the oral health education program
2. Demonstrate oral hygiene techniques to patient or carer	2.1 Demonstrate the presence of plaque to patient or carer using disclosing solution
	2.2 Demonstrate a variety of relevant oral hygiene techniques specific to patient needs
	2.3 Provide information about the advantages of different oral hygiene techniques and involve patient or carer in the decision-making process
	2.4 Assist patient or carer in implementing relevant oral hygiene techniques
	2.5 Demonstrate how to use appropriate aids specific to patient needs and necessary to achieve and maintain effective oral hygiene
	2.6 Evaluate patient or carer oral hygiene techniques and give further instruction when appropriate
	2.7 Provide information appropriately on the effectiveness and availability of fluoride as directed by the operator
3. Provide appropriate advice on cariogenic food and drinks	3.1 Involve patient or carer in a review of current dietary habits
	3.2 Develop and give patient or carer appropriate information on acids and fermentable carbohydrates in a manner they can understand
	3.3 Actively encourage patient or carer to ask questions or express views
4. Perform a saliva diagnostic test and record the results	4.1 Provide full details of the procedure to patient or carer

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
	4.2 Provide specific instructions to patient or carer before the appointment where a saliva diagnostic test is planned
	4.3 Select and prepare appropriate materials for a saliva diagnostic test
	4.4 Perform a resting or unstimulated saliva test and record the result in accordance with manufacturers' instructions
	4.5 Perform a stimulated saliva test and record the result in accordance with manufacturers' instructions
5. Implement a prescribed prevention program to suit an individual patient	5.1 Provide information appropriately, and as directed by the operator, on lifestyle change to assist with diminished salivary flow
	5.2 Provide appropriate information on materials that can provide additional external protection to the teeth
	5.3 Explain methods to increase salivary stimulation as directed by the operator
	5.4 Assist the patient or carers to implement prescribed oral hygiene programs in response to saliva quality and composition

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTDEN004 Implement an individualised oral hygiene program

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites Supersedes HLTDA407D

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- provided complete and appropriate information to at least 10 different patients including:
  - providing information on the prevention of oral diseases
  - providing advice and demonstrating oral hygiene techniques
  - using learning and motivational skills to inform and motivate behaviour change.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete the tasks outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the work role. This includes knowledge of:

- fundamental oral anatomy including:
  - structures of the oral cavity, hard and soft palate, lateral and posterior borders of the oral cavity, tongue and floor of the mouth
  - teeth form and function
  - dentition – arrangement of the teeth, naming and coding of teeth
- plaque and its differing roles in the development of dental caries and periodontal disease
- saliva and its role in maintenance of oral health including:
  - protecting teeth by neutralising acid
  - acting as a lubricant

© Commonwealth of Australia, 2025 HumanAbility

  - delivering calcium, phosphate and fluoride to the tooth surface
- understanding of the biochemical, pathological or pharmacological influences on diagnostic salivary testing and results
- factors that lead to the development of dental caries including:
  - bacteria in dental plaque
  - diet
  - susceptible tooth surfaces
  - socioeconomic background including dietary intake
  - mental health conditions and awareness of oral health issues
  - age of teeth
- factors that prevent and control dental caries:
  - increasing salivary flow and optimising its composition
  - fluorides
  - plaque control and removal
  - dietary change
  - oral health education
- factors that lead to the development of periodontal disease including:
  - bacteria in dental plaque
  - accumulation of plaque and calculus
  - smoking
  - medications
  - age of teeth
- factors that prevent and control periodontal disease including:
  - oral health education
  - plaque control
- - causes, and prevention, of non caries tooth wear:
  - erosion
  - abrasion
  - attrition
- role of properly constructed and fitted mouthguards in preventing dental injuries
- fundamental knowledge of the impact of smoking on oral soft tissues
- fundamental knowledge of systemic conditions which influence the development of oral disease
- local oral factors which influence the development of oral disease
- modifications to oral health education programs related to special needs due to disability, aged care and children’s needs
- oral appliances and their impact on oral hygiene maintenance
- legislative requirements related to the use of fluoride in dentistry.

© Commonwealth of Australia, 2025 HumanAbility

Assessment Conditions

Skills must have been demonstrated in a dental clinic workplace or in a simulated environment that reflects workplace conditions.

The following conditions must be met for this unit:

- use suitable facilities, equipment and resources including:
  - personal protective equipment
  - cleaning equipment
  - disposable and non-disposable instruments
  - Dental Board of Australia guidelines on infection control
- modelling of industry operating conditions including access to real people for simulations and scenarios in dental assisting work.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must hold a minimum of 5 years clinical experience in dental assisting work.

HLTDEN005 Assist in oral health care procedures during general anaesthesia

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites Supersedes HLTDA408D

Application

This unit of competency describes the skills and knowledge required to assist the dentist or dental specialist in carrying out oral health care procedures on patients under general anaesthesia.

This unit applies to dental assisting work.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare patient for oral health care procedures under general anaesthesia	1.1 Confirm and document arrangements for an escort for patient following the procedure 1.2 Provide an appropriate environment for patient or carer to ask questions 1.3 Make accessible in the clean zone of the surgery the patient’s necessary charts and records

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. 1.4 Maintain confidentiality of patient information in accordance with organisation policy and procedures
2. Prepare for oral health care procedures under general anaesthesia	2.1 Perform surgical hand wash and use aseptic technique in applying personal protective equipment in preparation for procedures under general anaesthesia 2.2 Prepare the equipment, instruments materials and medicaments for the planned procedure 2.3 Ensure instruments for oral health care procedure are ready and usable at the suite or theatre 2.4 Follow suite or theatre organisation policy and procedures 2.5 Select and transfer safely and aseptically the correct dental instruments, equipment, materials and medicaments
3. Assist patient's discharge after undergoing oral health care procedures under general anaesthesia	3.1 Follow organisation policy and procedures while assisting in the provision of post-operative oral health care procedures 3.2 Ensure post-operative written instructions are communicated and provided by authorised person to patient or carer or escort 3.3 Assist in the authorised discharge of patient to the carer or escort

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTDEN005 Assist in oral health care procedures during general anaesthesia

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites Supersedes HLTDA408D

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- prepared equipment and assisted the operator with oral health care procedures for 3 different patients under general anaesthesia, including:
  - assisting in aseptically handling and correctly positioning the equipment during the procedure
  - following procedures to ensure patient safety during general anaesthesia
  - correctly maintained and stored instruments, equipment, materials and medicaments
- supported the dental team in the discharge care of 1 patient recovering from an oral care procedure following general anaesthesia.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- national and State/Territory legal and ethical requirements and considerations for dental assisting work including:
  - codes of practice
  - discrimination
  - duty of care
  - informed consent and statutory requirements of consent

© Commonwealth of Australia, 2025 HumanAbility

  - practice standards – Dental Board of Australia guidelines on infection control
  - privacy, confidentiality and disclosure
  - records management
  - work role boundaries – responsibilities and limitations
  - work health and safety
- practitioners who are authorised to administer general anaesthesia to a patient, and the assessment process required before oral health procedure is carried out
- levels of consciousness
- equipment used to administer a general anaesthetic and equipment used in monitoring patient pre- and post-operatively
- risks associated with general anaesthesia including risks of:
  - chest infection
  - cross-infection from instruments and handpieces
  - deep venous thrombosis (DVT)
  - anaphylaxis – from a reaction to anaesthetic
  - lowered patient's body temperature – they may need extra blankets or warming devices to protect against hypothermia
  - compromised patient comfort – ensure pressure points on skin are monitored
- reasons for keeping accurate records of oral conditions and treatments
- reasons why patients need to follow pre- and post-operative instructions, and the importance of this
- medical emergencies and complications which may arise during and after general anaesthesia and appropriate medical responses and treatment to be given by the dental team.

Assessment Conditions

Skills must have been demonstrated in the dental workplace with the addition of simulations and scenarios where the full range of contexts and situations cannot be provided in the workplace.

The requirement under performance evidence for the candidate to prepare equipment and assist the operator with oral health care procedures for 3 different patients under general anaesthesia must have been demonstrated using simulation prior to demonstration in the workplace and with members of the general public.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources including:
  - sterile dental equipment and instruments
  - surgical personal protective equipment for aseptic technique procedures

© Commonwealth of Australia, 2025 HumanAbility

  - operating trolley
  - suctioning equipment
  - access to defibrillator
  - waste disposal equipment
  - Dental Board of Australia guidelines on infection control
- modelling of industry operating conditions including access to real people for simulations and scenarios in dental assisting work.

Assessment must involve demonstration of tasks under the direction of the dental practitioner.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must hold a minimum of 5 years clinical experience in dental assisting work.

HLTDEN006 Assist in oral health care procedures during conscious sedation

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites Supersedes HLTDA409D

Application

This unit of competency describes the skills and knowledge required to assist the dentist or dental specialist in carrying out oral health care procedures on patients under conscious sedation administered via intravenous, oral and inhalation routes.

This unit applies to dental assisting work.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare the patient for oral health care procedures during conscious sedation	1.1 Confirm and document arrangements for an escort for patient following the procedure 1.2 Provide an appropriate environment for the patient or carer to ask questions 1.3 Make accessible in the clean zone of the surgery the patient’s necessary charts and records

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
	1.4 Maintain confidentiality of patient information in accordance with organisation policy and procedures
2. Select and prepare equipment, instruments, materials and medicaments applicable to the oral health care procedures during conscious sedation	2.1 Prepare the equipment, instruments materials and medicaments for the planned procedure
	2.2 Arrange instruments for oral health care procedure in order of use in accordance with operator requirements
	2.3 Give personal protective equipment to patient and members of the dental team
	2.4 Follow suite or theatre organisation policy and procedures
	2.5 Select and transfer safely the correct dental instruments, equipment, materials and medicaments
3. Assist a patient undergoing oral health care procedures during conscious sedation	3.1 Follow organisation policy and procedures while assisting in providing post-operative oral health care procedures
	3.2 Ensure post-operative written instructions are communicated and provided by authorised person to patient, carer or escort
	3.3. Assist in the authorised discharge of the patient to the carer or escort

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

  - informed consent and statutory requirements of consent
  - practice standards – Dental Board of Australia guidelines on infection control
  - privacy, confidentiality and disclosure
  - records management
  - work role boundaries – responsibilities and limitations
  - work health and safety
- practitioners who are authorised to administer conscious sedation to a patient, and the assessment process required before oral health procedure is carried out
- levels of consciousness
- medications and drugs used in conscious sedation administered via the following routes:
  - intravenous
  - oral
  - inhalation
  - intramuscular injection
- medications used to anaesthetise the site for sedation via intravenous route
- risks associated with conscious sedation including:
  - potential for unintentional loss of consciousness
  - depression of protective reflexes, respirations and cardiovascular system
  - variations in response to drugs across the lifespan of individuals
  - drug interactions
- differing standards of equipment and staffing at the locations where procedures are performed
- equipment used to administer conscious sedation and equipment used in monitoring a patient pre- and post-oral health care procedures
- reasons for keeping accurate records of oral conditions, treatments and the administration of conscious sedation
- reasons why patients need to follow pre- and post-operative instructions, and the importance of this
- discharge instructions post-recovery and observation of patient into the care of a responsible person after authorisation from dental practitioner
- medical emergencies and complications that may arise during and after conscious sedation and appropriate medical response and treatment given by the dental team.

Assessment Conditions

Skills must have been demonstrated in the dental clinic workplace with the addition of simulations and scenarios where the full range of contexts and situations cannot be provided in the workplace. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - barrier protection materials
  - dental chair and unit

© Commonwealth of Australia, 2025 HumanAbility

  - access to defibrillator
  - suctioning and operator lighting
  - waste disposal equipment
  - Dental Board of Australia guidelines on infection control
- modelling of industry operating conditions including access to real people for simulations and scenarios in dental assisting work.

Assessment must involve demonstration of tasks under the direction of the dental practitioner.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must hold a minimum of 5 years clinical experience in dental assisting work.

HLTDEN007 Apply the principles of radiation biology and protection in dental practice

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites Supersedes HLTDA410D

Application

This unit of competency describes the skills and knowledge required to minimise the risk of radiation to the patient, the operator and others during the exposure of a prescribed dental radiographic image. It also describes the quality assurance measures necessary to ensure all radiographs are of consistent diagnostic standard.

This unit applies to dental assisting work.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Apply the principles of radiation biology to protect patient, operator and others from ionising radiation	1.1 Implement safe work practices to minimise risks to operator, patient and others of immediate and long-term effects of radiation 1.2 Identify correctly the main components of the X-ray unit to assist the operator taking a dental radiograph 1.3 Identify correctly and select the exposure variables of dental X-ray generating equipment according to manufacturers' instructions and patient requirements 1.4 Apply the correct units of radiation dose
2. Determine image characteristics of a dental radiographic image to minimise the necessity for re-takes	2.1 Ensure visual qualities of the radiograph are of a diagnostic standard 2.2 Ensure geometric qualities of the radiograph are of a diagnostic standard
3. Minimise radiation by maintaining quality in processing	3.1 Identify the contents of the film package and determine the use of each item 3.2 Maintain quality assurance for processing dental radiographic images 3.3 Follow quality assurance processes for the use of radiographic chemicals in accordance with manufacturers' instructions 3.4 Maintain appropriate conditions for manual and automatic processing in accordance with manufacturers' specifications 3.5 Identify a range of processing errors and implement corrective measures to produce a diagnostic radiograph

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency

© Commonwealth of Australia, 2025 HumanAbility

Assessment Requirements for HLTDEN007 Apply the principles of radiation biology and protection in dental practice

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites Supersedes HLTDA410D

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- applied safe work practices during preparation of 3 patients for dental radiographic imaging procedures.
- demonstrated quality assurance to the production of 3 radiographs to consistent diagnostic standard, and applied techniques to minimise technical inaccuracies and errors.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the work role. This includes knowledge of:

- national and State/Territory legal and ethical requirements and considerations for dental assisting work and how these are applied in organisations/in individual practice including:
  - codes of practice and safety guide:
    - radiation protection in dentistry
    - safe use of radiation
  - duty of care
  - informed consent and statutory requirements of consent
  - practice standards – Dental Board of Australia guidelines on infection control
  - privacy, confidentiality and disclosure

© Commonwealth of Australia, 2025 HumanAbility

  - radiation user licence
  - records management
  - work role boundaries – responsibilities and limitations
  - work health and safety
- the production, properties and interactions of X-rays including:
  - a basic knowledge of the interactions between atoms and X-rays
  - the sequence of events that result in the production of X-rays
  - hazards associated with X-rays including the mechanisms by which X-rays cause damage to human tissues
- biological effects and risks associated with X-rays including:
  - units of radiation measurement
  - immediate or acute effects
  - long term or cumulative effects
- radiographic appearance of anatomic landmarks, normal dentition and associated bony structures
- reasons for processing and technique inaccuracies and methods to minimise errors

Assessment Conditions

Skills must have been demonstrated in the dental clinic workplace with the addition of simulations and scenarios where the full range of contexts and situations cannot be provided in the workplace.

The requirement in the performance evidence to have applied safe work practices during preparation of 3 patients for dental radiographic imaging procedures must have been demonstrated using simulation prior to demonstration in the workplace and with members of the general public.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources including:
  - barrier protection equipment/materials for patient, operator and assistant
  - dental chair and unit
  - radiographs and/or sensors
  - waste disposal equipment
  - Dental Board of Australia guidelines on infection control
- modelling of industry operating conditions including access to real people for simulations and scenarios in dental assisting work.

Assessment must involve demonstration of tasks under the direction of the dental practitioner.

© Commonwealth of Australia, 2025 HumanAbility

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must hold a minimum of 5 years clinical experience in dental assisting work.

HLTDEN008 Prepare to expose a prescribed dental radiographic image

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites Supersedes HLTDA411D

Application

This unit of competency describes the skills and knowledge required to interpret a prescribed request for a dental radiographic image. It also includes the preparation of the patient for dental radiography and the selection of equipment requirements.

This unit applies to dental assisting work.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Interpret the request for the prescribed dental radiographic image	1.1 Interpret the request accurately using appropriate dental terminology 1.2 Assess the request for sufficient information to produce the radiographic image and obtain additional information when insufficient 1.3 Select and use appropriate exposure variables in

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. accordance with manufacturers' instructions and patient requirements
2. Refer to previous dental radiographic imaging	2.1 Review previous dental radiographic images for technical quality 2.2 Clarify technical quality of previous radiographic images using additional information or advice from dental practitioner
3. Assess and determine the procedure prior to exposing a dental radiographic image	3.1 Determine the patient's ability to comply with instructions 3.2 Review modifications to the standard procedure with the operator prior to implementation 3.3 Obtain additional information and advice from the dental practitioner before proceeding with the procedure 3.4 Explain the procedure and necessary requirements clearly to the patient before commencement 3.5 Prepare patient prior to producing a dental radiographic image 3.6 Confirm patient identity and match to the request 3.7 Obtain consent from the patient or carer
4. Select and prepare dental radiographic imaging equipment and accessories appropriate to the procedure	4.1 Select appropriate dental radiographic imaging equipment for the procedure and identify patient requirements 4.2 Select and use correctly appropriate accessories for dental radiographic imaging 4.3 Select appropriate technical variables of the dental radiographic imaging equipment

Assessment Requirements for HLTDEN008 Prepare to expose a prescribed dental radiographic image

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites Supersedes HLTDA411D

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- correctly interpreted 3 different dental radiographic requests and prepared for procedure including:
  - checking patient's identify and consent
  - selecting a range of radiographic imaging equipment using appropriate technical variables for the requested radiographic procedure
  - using procedures to minimise the risk of radiation to the patient, the operator and others.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete the tasks outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the work role. This includes knowledge of:

- features, characteristics and movements of a range of dental radiographic equipment associated with intraoral and extraoral units
- national and State/Territory legal and ethical requirements and considerations for dental assisting work and how these are applied in organisations and in individual practice including:
  - codes of practice and safety guides:
    - radiation protection in dentistry

© Commonwealth of Australia, 2025 HumanAbility

    - safe use of radiation
  - duty of care
  - informed consent and statutory requirements of consent
  - practice standards – dental guidelines on infection control
  - privacy, confidentiality and disclosure
  - radiation user licence
  - records management
  - work role boundaries – responsibilities and limitations
  - work health and safety
- radiographic appearance of anatomic landmarks, normal dentition and associated bony structures for dental radiograph images
- radiographic appearance of dental anomalies and common oral pathological conditions
- range of dental radiographic imaging techniques and the reasons for selection of each technique
- reasons for processing and technique inaccuracies and methods to minimise errors.

Assessment Conditions

Skills must have been demonstrated in the dental clinic workplace with the addition of simulations and scenarios where the full range of contexts and situations cannot be provided in the workplace. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources including:
  - barrier protection materials
  - dental chair and unit
  - X-ray machine and digital X-ray machine
  - operator and assistant protective equipment
  - radiographs and/or sensors
  - waste disposal equipment
  - Dental Board of Australia guidelines on infection control on which the candidate bases the planning process
- modelling of industry operating conditions including access to real people for simulations and scenarios in dental assisting work.

Assessment must involve demonstration of tasks under verbal or written prescription from a dental practitioner.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

© Commonwealth of Australia, 2025 HumanAbility

In addition, assessors must hold a minimum of 5 years clinical experience in dental assisting work.

HLTDEN009 Produce a prescribed dental radiographic image

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites Supersedes HLTDA412D

Application

This unit of competency describes the skills and knowledge required to operate dental radiographic equipment and position the patient correctly to produce an intraoral and extraoral diagnostic radiographic image.

Where work relates to extraoral radiography this includes orthopantomogram and may include lateral cephalograms (for orthodontic radiographic work-ups) and excludes cone beam radiography.

This unit applies to dental assisting work.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Position patient to obtain radiograph	1.1 Implement and maintain radiation safety measures for the patient, operator and others throughout the procedure 1.2 Correctly position patient according to the

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
	radiographic detector unit used
	1.3 Ensure that communication with patient can be maintained after positioning
2. Position dental radiographic detector	2.1 Select the appropriate exposure variables for either an intraoral or extraoral image on the dental radiographic unit according to manufacturers' instructions, procedure and patient requirements
	2.2 Select the appropriate radiographic technique for either an intraoral or extraoral image prescribed by dental practitioner for the oral structure under investigation
	2.3 Position correctly the appropriate film or film plate or sensor and setting for the prescribed request and patient's requirements
	2.4 Select and use locating devices or guides to apply the appropriate horizontal and vertical planes for the radiograph
	2.5 Use accessories when appropriate according to manufacturers' instructions
3. Operate radiographic imaging equipment safely to produce intraoral image	3.1 Operate intraoral radiographic equipment according to manufacturers' instructions and legislative requirements for the safe use of radiation
	3.2 Ensure the patient remains visible throughout the procedure to observe positioning and safety precautions and expose the X-ray
	3.4 Remove the exposed intraoral dental radiographic detector package carefully from the mouth
	3.5 Separate the packaging and barrier sleeve when required from the detector and label image correctly prior to processing

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
4. Operate radiographic imaging equipment safely to produce an extraoral radiograph	4.1 Operate extraoral radiographic equipment according to manufacturers' instructions and legislative requirements for the safe use of radiation
	4.2 Ensure the patient remains visible throughout the procedure to observe positioning and safety precautions, and expose the X-ray
	4.3 Undertake, for wet processing only, removal of the exposed extraoral image from the radiographic unit
	4.4 Ensure digital radiograph is downloaded correctly
	4.5 Label the radiograph with all necessary details for patient identification and time of procedure
5. Process and provide quality assurance for the exposed dental radiograph	5.1 View or process the radiograph correctly
	5.2 Assess visual qualities of the radiograph and refer to dental practitioner
	5.3 Identify and correct processing errors or artefacts
	5.4 Identify and critique errors in imaging technique to optimise exposure times for each individual patient
	5.5 Mount and store radiographs correctly

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTDEN009 Produce a prescribed dental radiographic image

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites Supersedes HLTDA412D

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

• produced 30 acceptable dental radiographic images in a simulated environment including:
  - applying safe work practices for dental radiography work including:
    - following standard and additional precautions
    - operating a radiographic unit correctly
    - safely using radiation in dentistry
• produced and critiqued 20 acceptable dental intraoral radiographic images taken on a minimum of 10 different people demonstrating skills in periapical (PA) and bitewings (BW)
• produced and critiqued 10 acceptable dental extraoral radiographic images taken on a minimum of 10 different people.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete the tasks outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the work role. This includes knowledge of:

• national and State/Territory legal and ethical requirements and considerations for dental assisting work relevant to radiography, and how these are applied in organisations and in individual practice including:

© Commonwealth of Australia, 2025 HumanAbility

  - codes of practice and safety guides:
    - radiation protection in dentistry
    - safe use of radiation
  - duty of care
  - informed consent and statutory requirements of consent
  - practice standards – Dental Board of Australia guidelines on infection control
  - privacy, confidentiality and disclosure
  - radiation user licence
  - records management
  - rights and responsibilities of workers, employers and patients
  - work role boundaries – responsibilities and limitations
  - work health and safety
- dental radiographic imaging techniques and the reasons for selection of each technique
- features, characteristics and range of movements of dental radiographic equipment associated with intraoral and extraoral radiographic images
- radiographic appearance of anatomic landmarks, normal dentition and associated bony structures for intraoral and extra-oral radiographs
- radiographic appearance of dental anomalies and common oral pathological conditions
- sources for processing and technique inaccuracies and methods to minimise errors
- requirements for personal wearable radiation monitoring devices that measures radiation exposure levels including:
  - its significance
  - where on the body the device is to be worn
  - when and where they are required to be worn
  - when they need replacing
- safety requirements of wet film processing
- procedures for labelling and storage of radiographic images in accordance with organisation policies.

Assessment Conditions

Skills must have been demonstrated in the dental clinic workplace with the addition of simulations and scenarios where the full range of contexts and situations has not been provided in the workplace.

The requirement in the performance evidence to produce 30 acceptable dental radiographic images in a simulated environment must have been demonstrated using simulation before demonstration in the workplace or with members of the general public.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources including:

© Commonwealth of Australia, 2025 HumanAbility

  - barrier protection materials
  - dental chair and unit
  - radiographic equipment suitable for taking intraoral and extra-oral radiographs
  - operator, patient and assistant protective equipment
  - processing equipment
  - radiographs and/or sensors
  - waste disposal equipment
  - Dental Board of Australia guidelines on infection control on which the candidate bases the planning process
- modelling of industry operating conditions including access to real people for simulations and scenarios in dental assisting work.

Assessment must involve demonstration of tasks under verbal or written prescription from a dental practitioner.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must hold a minimum of 5 years clinical experience in dental assisting work.

HLTDEN010 Implement an oral hygiene program for older people

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites Supersedes HLTDA413B

Application

This unit of competency describes the skills and knowledge required to promote oral health for older people.

This unit applies to dental assistants and to other health care workers who are actively involved in promoting the general well-being of older patients through the promotion of healthy eating habits and good oral health.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Assess the oral health needs of an older person	1.1 Check medical and dental history with patient or family or carer to confirm up-to-date information 1.2 Actively encourage the patient to discuss oral health problems without embarrassment 1.3 Identify oral health problems for older people and

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
	their relationship to general health problems
	1.4 Identify individualised factors that increase the risk of oral disease for older persons
	1.5 Look in the patient's mouth while cleaning or assisting with oral care
	1.6 Identify patients with natural teeth, those who wear dentures and those who are non-denture wearers
	1.7 Identify problems that require referral to a dentist
2. Provide support for the maintenance of oral hygiene for older persons	2.1 Ensure flexibility of oral hygiene instruction taking into consideration a patient's individual circumstances
	2.2 Demonstrate an understanding of the economic and psychological factors that may affect the oral health of older people
	2.3 Provide an appropriate environment for oral hygiene instruction
	2.4 Develop and give oral hygiene information to patients and carers using language and in a manner they can understand.
3. Implement practical solutions to promote oral health	3.1 Explain actively to patients and carers the importance of regular dental care to maintain quality of life
	3.2 Recommend lifestyle changes to assist the older person's diminished salivary flow in consultation with dental practitioner
	3.3 Provide appropriate information to patients and carers for healthy food habits that support oral health
	3.4 Actively encourage patients or carers to clean teeth or dentures after meals
	3.5 Engage carers with appropriate oral health care promotion programs and resources
4. Maintain oral health of people in residential aged care	4.1 Ensure all removable dentures are visibly marked with the patient's identification

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. 4.2 Record oral health in the patient's personal care plan 4.3 Implement individual oral health programs in consultation with dental professional 4.4 Assist patients with special needs to clean their teeth 4.5 Assist patients or their carers to clean and maintain dentures

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency

Assessment Requirements for HLTDEN010 Implement an oral hygiene program for older people

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites Supersedes HLTDA413B

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has completed the following tasks:

- provided complete and appropriate information to 3 different older people and/or their carers including:
  - information regarding the prevention of oral diseases
  - advice and demonstration of oral hygiene techniques
- selected and prepared special aids for oral hygiene to assist 3 patients with limited dexterity
- implemented 3 prevention programs to suit individual patient’s oral health care needs.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete the tasks outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the work role. This includes knowledge of:

- national and State/Territory legal and ethical requirements and considerations for dental assisting work including:
  - codes of practice
  - discrimination
  - duty of care
  - informed consent and statutory requirements of consent

© Commonwealth of Australia, 2025 HumanAbility

  - practice standards – Dental Board of Australia guidelines on infection control
  - privacy, confidentiality and disclosure
  - records management
  - work role boundaries – responsibilities and limitations
  - work health and safety
- fundamental oral anatomy including:
  - structures of the oral cavity, hard and soft palate, lateral and posterior borders of the oral cavity, tongue and floor of the mouth
  - teeth form and function
  - dentition, arrangement of the teeth, naming and coding of teeth
- plaque and its differing roles in the development of dental caries and periodontal disease
- saliva and its role in the maintenance of oral health including:
  - protecting teeth by neutralising acid
  - acting as a lubricant
  - delivering calcium, phosphate and fluoride to the tooth surface
- factors that lead to the development of dental caries including:
  - bacteria in dental plaque
  - diet
  - susceptible tooth surfaces
  - socioeconomic background including dietary intake
  - mental health conditions and awareness of oral health issues
  - age of teeth
- factors that prevent and control dental caries:
  - increasing salivary flow and optimising its composition
  - fluorides
  - plaque control and removal
  - dietary change
  - oral health education
- factors that lead to the development of periodontal disease including:
  - bacteria in dental plaque
  - accumulation of plaque and calculus
  - smoking
  - medications
  - age of teeth
- factors that prevent and control periodontal disease including:
  - oral health education
  - plaque control
- causes and prevention of non-caries tooth wear including:
  - erosion
  - abrasion

© Commonwealth of Australia, 2025 HumanAbility

  - attrition
- the impact of smoking on oral soft tissues
- systemic conditions and their pharmacology treatments that influence the development of oral disease
- modification to standard toothbrushes and other aids for oral hygiene to meet the needs of patients with reduced dexterity
- modifications to oral health education programs related to special needs due to disability, older age and dementia.

Assessment Conditions

Skills must have been demonstrated in the dental clinic workplace with the addition of simulations and scenarios where the full range of contexts and situations cannot be provided in the workplace. The following conditions must be met for this unit:

- us of suitable facilities, equipment and resources including:
  - personal protective equipment
  - cleaning equipment
  - disposable and non-disposable instruments
  - Dental Board of Australia guidelines on infection control on which the candidate bases the planning process
- modelling of industry operating conditions including access to real people for simulations and scenarios in dental assisting work.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must hold a minimum of 5 years clinical experience in dental assisting work.

HLTDEN011 Implement an oral health promotion program

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Supersedes HLTDA414B

Application

This unit of competency describes the skills and knowledge required to provide an oral health promotion program.

This unit applies to dental assistants and to other health care workers who are actively involved in promoting general well-being through the promotion of healthy eating habits and good oral health.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Deliver an oral health promotion program	1.1 Identify the target group and appropriate teaching and learning styles to effectively communicate an oral health promotion program 1.2 Prioritise the oral health issues for the target group and the potential for effective interventions 1.3 Prepare oral health promotion materials suitable for use across age groups

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
	1.4 Ensure flexibility of delivery of oral health promotion taking into account the target group's location, economic and physical circumstances, language, culture and communication needs
	1.5 Actively involve community groups in health decision-making and in setting oral health promotion priorities
	1.6 Implement a review strategy to determine the effectiveness of the oral health promotion program
2. Develop oral health promotion strategies for a target group	2.1 Provide information on the causes of oral diseases to an identified target group appropriately and completely using language that can be easily understood
	2.2 Provide information on the prevention of oral diseases appropriately and completely using language that can be easily understood
	2.3 Develop and give appropriate information on acids and fermentable carbohydrates in a manner that can be easily understood
	2.4 Involve the target group in a review of current dietary habits and the development of an approach to healthy eating which improves general and oral health
	2.5 Provide information appropriately on a dentally healthy lifestyle and behavioural change
	2.6 Provide an appropriate environment for the target group to ask questions and become involved in oral health
3. Integrate oral health promotion with targeted National Health Priorities	3.1 Work collaboratively with other health care workers in a culturally sensitive and competent manner to address risk factors that oral diseases have in common with other diseases
	3.2 Personalise the delivery of health information so that it is immediately relevant to the individual and clarifies the consequences of behaviour

© Commonwealth of Australia, 2025 HumanAbility

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTDEN011 Implement an oral health promotion program

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Supersedes HLTDA414B

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- developed 1 oral health program for a specific target group within the community, including:
  - identifying the target group and key concerns
  - developing specific promotion strategies and resources to reach the target group
  - integrating promotion with targeted National Health Priorities
- facilitated discussion with 10 people on oral health care including:
  - causes and prevention of oral diseases
  - dietary habits and the impact of healthy eating on oral health
  - behavioural change for improved oral health.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete the tasks outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the work role. This includes knowledge of:

- fundamental oral anatomy:
  - structures of the oral cavity, hard and soft palate, lateral and posterior borders of the oral cavity, tongue and floor of the mouth
  - teeth form and function
  - dentition, arrangement of the teeth, naming and coding of teeth

© Commonwealth of Australia, 2025 HumanAbility

- nutritional requirements for children, adolescents, adults and the elderly, including National Health and Medical Research Council (NHMRC) dietary guidelines
- national, State/Territory or local oral health promotion programs or strategies
- approaches to health promotion delivery and appropriate resources to specific target groups
- plaque and its differing roles in the development of dental caries and periodontal disease
- saliva and its role in the maintenance of oral health including:
  - protecting teeth by neutralising acid
  - acting as a lubricant
  - delivering calcium, phosphate and fluoride to the tooth surface
- factors that lead to the development of dental caries including:
  - bacteria in dental plaque
  - diet
  - susceptible tooth surfaces
- factors that prevent and control dental caries including:
  - increasing salivary flow and optimising its composition
  - fluorides
  - plaque control and removal
  - dietary change
- factors that lead to the development of periodontal disease including:
  - bacteria in dental plaque
  - accumulation of plaque and calculus
  - smoking
- factors that prevent and control periodontal disease including:
  - patient education
  - plaque control
- systemic conditions which influence the development of oral disease
- local oral factors that influence the development of oral disease including modifications to oral health education programs related to special needs due to disability, older age and childhood
- causes and prevention of non caries tooth wear including:
  - erosion
  - abrasion
  - attrition
- the role of properly constructed and fitted mouthguards in preventing dental injuries
- the impact of smoking on oral soft tissues

© Commonwealth of Australia, 2025 HumanAbility

Assessment Conditions

Skills must have been demonstrated in the dental clinic workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as, using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must hold a minimum of 5 years clinical experience in dental assisting work

HLTDEN012 Take an impression for study models

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites Supersedes HLTDA415B

Application

This unit of competency describes the skills and knowledge required to take an accurate impression of the teeth and their supporting structures for the construction of study models as prescribed by the dental practitioner.

This unit applies to dental assisting work.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Assess the patient	1.1 Confirm patient's medical history 1.2 Provide full details of the procedure to the patient or carer 1.3 Obtain and document consent following ethical and legal requirements 1.4 Select the equipment and instruments for the

	impression
	1.5 Prepare personal protective equipment for the patient and members of the dental team
2. Select appropriate impression tray	2.1 Check the position of the dental chair and patient for the procedure
	2.2 Check the tray for size and modify the impression tray to ensure accuracy and comfort
	2.3 Instruct patient on participation during the procedure
3. Prepare impression material	3.1 Select impression material in accordance with desired outcome
	3.2 Mix the impression material to the correct consistency and quantity required according to manufacturers' instructions
4. Perform impression-taking procedure	4.1 Implement standard precautions during impression-taking
	4.2 Use syringe to remove saliva from the occlusal surfaces
	4.3 Load tray with an appropriate amount of impression material and seat the tray from the back using gentle pressure
	4.4 Ensure the impression extends to and surrounds dental hard tissue structures
	4.5 Ensure the impression has adequate extension into the buccal sulcus and vestibule
	4.6 Carry out muscle trimming after seating the impression
	4.7 Monitor and reassure the patient throughout the procedure
	4.8 Remove the impression when set
	4.9 Examine the patient's mouth for injury and impression material debris following removal of the

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has undertaken 10 impression procedures for study models ensuring patient safety.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete the tasks outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the work role. This includes knowledge of:

- national and State/Territory legal and ethical requirements and considerations for dental assisting work including:
  - codes of practice
  - discrimination
  - duty of care
  - informed consent and statutory requirements of consent
  - practice standards – dental guidelines on infection control
  - privacy, confidentiality and disclosure
  - records management
  - work role boundaries – responsibilities and limitations
  - work health and safety
- fundamental oral anatomy:
  - dentition, arrangement of the teeth, naming and coding of teeth

© Commonwealth of Australia, 2025 HumanAbility

  - structures of the oral cavity, hard and soft palate, lateral and posterior borders of the oral cavity, tongue and floor of the mouth
  - teeth form and function
- principles and practices which underpin interpersonal communication
- principles of quality assurance and work effectiveness
- rationale and objectives for the taking of impressions for study models
- impression materials suitable for creating impressions for study models
- appropriate responses to patient's reactions during impression taking procedure.

Assessment Conditions

Skills must have been demonstrated in the dental clinic workplace with the addition of simulations and scenarios where the full range of contexts and situations cannot be provided in the workplace. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources including:
  - dental chair and unit
  - impression material and equipment
  - syringe suitable for saliva removal
  - materials and mixing equipment
  - operator and assistant personal protective equipment
  - waste disposal equipment
  - Dental Board of Australia guidelines on infection control on which the candidate bases the planning process
- modelling of industry operating conditions including access to real people for simulations and scenarios in dental assisting work.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must hold a minimum of 5 years clinical experience in dental assisting work.

HLTDEN013 Allocate treatment appointments according to priority

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites Supersedes HLTDA416C

Application

This unit of competency describes the skills and knowledge required for a dental assistant to provide an effective and efficient triaging service for patients seeking emergency dental care.

This unit applies to dental assisting work.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Obtain and record patient data	1.1 Actively encourage patients to provide complete information without embarrassment or hesitation 1.2 Record relevant information accurately and legibly 1.3 Assist patients or carers to complete data forms as required 1.4 Check accuracy of information with the patient or

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. carer 1.5 Collate charts and records for operator 1.6 Maintain patient confidentiality
2. Establish priority level of care	2.1 Advise operator or an appropriate person immediately if a patient may be at risk 2.2 Identify patients who should be given priority 2.3 Advance the level of priority for patients who require immediate attention in a dental emergency
3. Communicate options available to patients or carers	3.1 Assist with managing patient expectations regarding waiting times for emergency care 3.2 Manage questions in relation to the emergency visit 3.3 Provide guidance to patients who are not in pain and present for non-urgent treatment 3.4 Facilitate alternative non-urgent dental services

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTDEN013 Allocate treatment appointments according to priority

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites Supersedes HLTDA416C

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- managed 3 patient appointments according to priority including:
  - establishing priority level of care for each patient and advancing priority if required
  - managing patients expectations regarding waiting times for both emergency and non-emergency care
- recognised and responded to 1 simulated dental emergency.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete the tasks outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the work role. This includes knowledge of:

- medical complications relevant to the dental triage role including:
  - diabetes
  - compromised airway
  - septicaemia
- dental complications relevant to the dental triage role including:
  - dental and or maxillofacial trauma including avulsed teeth
  - serious dental infections requiring urgent attention
  - significant dental haemorrhage

© Commonwealth of Australia, 2025 HumanAbility

  - systemic progression of dental problems such as compromised airway
- medical problems that may complicate dental management including:
  - patients requiring antibiotic cover
  - patients requiring steroid cover
  - patients who are pregnant
  - patients with significant learning or physical disabilities that may affect their ability to wait for treatment
- the special requirements of children with toothache
- oral anatomy and physiology including fundamental knowledge of:
  - teeth and periodontal tissues
  - structures of the oral cavity
  - tooth identification
- dental and medical records and charts including:
  - correct dental terminology
  - items that constitute a dental record
  - notation systems including FDI and charting symbols for tooth surfaces, cavities and other dental problems in accordance with codes and guidelines
  - confidentiality of patient records
- effects of ageing upon the oral tissues and the special needs of the older dental patient.

Assessment Conditions

Skills must have been demonstrated in the dental clinic workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must hold a minimum of 5 years clinical experience in dental assisting work.

HLTDEN014 Take a clinical photograph

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites Supersedes HLTDA417B

Application

This unit of competency describes the skills and knowledge required to take a clinical dental photograph under conditions that can be reproduced.

This unit applies to dental assisting work.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare patient and interpret the request for photography	1.1 Make accessible in the clean zone of the surgery the patient's necessary charts and records 1.2 Interpret request and provide full details of the procedure to the patient or carer 1.3 Obtain and document consent following ethical and legal requirements 1.4 Prepare accessories for intraoral photography

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
	1.5 Prepare personal protective equipment for the patient and members of the dental team
2. Prepare to take the photograph	2.1 Compose the image so that the most important aspects are in the centre of the photograph
	2.2 Orientate the image so that subsequent photos are reproducible
	2.3 Locate the image source to be photographed appropriately in the depth of field so that the photograph is in complete focus
	2.4 Check the viewfinder to ensure there are no obstructions to the image
3. Take required intraoral views using a standardised approach	3.1 Position the patient so that conditions for photography are reproducible
	3.2 Stand in a stable position for standard intraoral views that are reproducible for all photographs
	3.3 Select the magnification ratio according to the desired frame and focus
	3.4 Frame the image and ensure positioning of retractors and mirrors is correct
	3.5 Use appropriate lighting so that the image is not overexposed
4. Take a portrait and profile photograph	4.1 Explain the purpose of the photograph to the patient
	4.2 Choose the background colour and texture so that a full assessment of the profile can be made
	4.3 Follow guidelines to position the camera and the patient to ensure reproducible results
	4.4 Use a vertical format to completely fill the frame
	4.5 Take standard dental portrait views that ensure images can be reproduced
	4.6 Upload photograph from camera card and store in patient files

© Commonwealth of Australia, 2025 HumanAbility

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTDEN014 Take a clinical photograph

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites Supersedes HLTDA417B

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- taken 50 clinical dental photographs, including intraoral and extraoral images
- stored the resulting image data appropriately.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete the tasks outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the work role. This includes knowledge of:

- national and State/Territory legal and ethical requirements and considerations for dental assisting work including:
  - codes of practice
  - discrimination
  - duty of care
  - informed consent and statutory requirements of consent
  - practice standards – dental guidelines on infection control
  - privacy, confidentiality and disclosure
  - records management
  - work role boundaries – responsibilities and limitations
  - work health and safety

© Commonwealth of Australia, 2025 HumanAbility

- fundamental oral anatomy:
  - dentition, arrangement of the teeth, naming and coding of teeth
  - structures of the oral cavity, hard and soft palate, lateral and posterior borders of the oral cavity, tongue and floor of the mouth
  - teeth, form and function
- fundamentals of photography, including:
  - basic knowledge of camera systems appropriate for dental photography
  - ability to reproduce photographic conditions
  - appropriate reproduction ratio
  - reduction of image contents either through an appropriate scale or through selective focusing
- rationale and objectives for taking clinical photographs under conditions that can be reproduced including the need for:
  - basic views to record a patient's clinical condition during the initial patient visit
  - communication of information to the patient, and between dentists, doctors and laboratories
  - documentation of processes and stages of treatment
  - documentation of the state and changes to the teeth and mucous membranes of the mouth
  - illustration for teaching and research
  - quality control of treatment outcomes
- procedures and actions for dental emergencies

Assessment Conditions

Skills must have been demonstrated in the dental clinic workplace with the addition of simulations and scenarios where the full range of contexts and situations cannot be provided in the workplace. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources including:
  - digital camera and accessories
  - image storage card
  - access to patient records and data systems to record procedure and store images
  - Dental Board of Australia guidelines on infection control on which the candidate bases the planning process
- modelling of industry operating conditions including access to real people for simulations and scenarios in dental assisting work.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

© Commonwealth of Australia, 2025 HumanAbility

In addition, assessors must hold a minimum of 5 years clinical experience in dental assisting work.

HLTDEP001 Identify, select and prepare instruments, equipment and materials

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites. 240 work placement hours. Supersedes HLTDP601D

Application

This unit of competency describes the skills and knowledge required to identify, select and prepare appropriate instruments, equipment, materials and medicaments for specific removable dental prosthetic procedures.

This unit applies to work in dental prosthetics.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare the clinic for the removable dental prosthetic treatment of patients	1.1 Make accessible in the clean zone of the surgery the patient's required laboratory work, necessary charts and records 1.2 Give personal protective equipment to the patient and

	members of the dental team
	1.3 Ensure emergency procedures are in place and ready for use according to organisation policy and procedures
2. Identify and select instruments and equipment for a range of removable dental prosthetic procedures	2.1 Implement infection prevention and control techniques
	2.2 Select the correct equipment, instruments and materials for the planned prosthetic procedure
	2.3 Arrange instruments in order of use for a range of prosthetic procedures
3. Prepare instruments and equipment for the range of removable dental prosthetic procedures	3.1 Prepare instruments and equipment according to manufacturers' instructions
	3.2 Maintain and store instruments and equipment according to manufacturers' instructions and in accordance with infection control guidelines
4. Prepare materials according to manufacturers' instructions for the range of removable dental prosthetic procedures	4.1 Prepare the correct materials and medicaments using the correct techniques, to the correct consistency and quantity required, and within the designated timelines
	4.2 Monitor storage requirements and shelf life of materials and medicaments
	4.3 Check materials for integrity prior to use
	4.4 Monitor expiry dates of materials and medicaments and re-order materials correctly
	4.5 Store materials and medicaments according to manufacturers' instructions
	4.6 Confine materials to clean zone of surgery to minimise contamination by aerosols and splatter
	4.7 Follow workplace health and safety policies and procedures when preparing materials

Assessment Requirements for HLTDEP001 Identify, select and prepare instruments, equipment and materials

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites. 240 work placement hours Supersedes HLTDP601D

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 240 hours of work in a clinical dental workplace environment
- prepared the clinic for at least 4 different dental prosthetic procedures including:
  - locating each patient’s required laboratory work and necessary charts and records
  - selecting and preparing instruments and equipment as required for specific procedures
  - preparing relevant materials and medicaments for treatment
  - maintaining and storing equipment correctly and in good working order
- consistently applied standard and additional precautions during preparation for 4 different prosthetic procedures including:
  - using personal protective equipment
  - using clean and sterile techniques where appropriate
  - maintaining and storing equipment correctly and in good working order.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

© Commonwealth of Australia, 2025 HumanAbility

- Australian/New Zealand Standards, workplace health and safety (WHS) policies, Dental Board of Australia guidelines on infection control, Commonwealth and State/Territory legislation, and organisation policies relating to dental laboratory work including:
  - personal hygiene practices especially washing and drying hands before and after patient contact
  - appropriate reprocessing and storage of reusable instruments
  - aseptic technique
  - safe handling and disposal of sharps and other clinical waste
  - surface cleaning and management of blood and body fluid spills
  - techniques to limit contamination
  - decontamination of completed laboratory work
  - personal protective equipment and their use according to the National Safety and Quality Health Service (NSQHS) Standards
  - dental practice or organisation policy and procedures, including registration standards and guidelines
  - factors influencing medical and dental emergencies and the appropriate response.

Assessment Conditions

Skills must have been demonstrated in the dental workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTDEP002 Gather data, conduct dental prosthetic examination and develop treatment plan

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites. 240 work placement hours Supersedes HLTDP602D

Application

This unit of competency describes the skills and knowledge required to obtain accurate, complete and legal records of the patient's personal, medical and dental information in order to develop a treatment plan prior to removable dental prosthetic treatment.

This unit applies to work in dental prosthetics.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Obtain a complete patient history	1.1 Obtain accurate, complete and legal records of the patient's personal, medical and dental history 1.2 Check accuracy of information with the patient or where appropriate with their carer or guardian 1.3 Verify information with appropriate practitioner,

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. where required by relevant guidelines or legislation
2. Consult medical history of patient	2.1 Consult and use appropriate medical history in determining requirements for removable dental prosthetic treatment 2.2 Consult patient, carer or guardian about medical history to ensure it is accurate and current
3. Obtain and record patient data	3.1 Record relevant information legibly, accurately and completely 3.2 Assist patient, carer or guardian to complete data forms as required 3.3 Obtain and document consent following ethical and legal requirements 3.4 Obtain patient, carer or guardian's signature to signify accuracy of the statement 3.5 Maintain patient confidentiality
4. Assess oral status for removable dental prosthetic procedures	4.1 Assess intra-oral status accurately in accordance with relevant guidelines and legislation 4.2 Modify examination procedures according to the specific needs of the patient 4.3 Where necessary, identify the need to refer patient for examination by a dentist
5. Develop a removable dental prosthetic treatment plan	5.1 Interpret and evaluate the results of removable dental prosthetic examination 5.2 Consider the patient's medical, medication and dental history when developing a treatment plan 5.3 Make prosthetic assessment in accordance with organisation procedures 5.4 Consult dentist or doctor where appropriate and in accordance with legislative guidelines

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. 5.5 Refer patient to dentist or doctor where appropriate 5.6 Observe centric and eccentric mandibular movements
6. Obtain patient, carer or guardian consent	6.1 Involve the patient, carer or guardian in discussions about their treatment using language that is understandable to them 6.2 Provide full details about removable dental prosthetic treatment and alternative options and the risks and benefits of the treatment 6.3 Allow sufficient time to discuss treatment options with patient, carer or guardian 6.4 Help patients understand the effects of treatment or no treatment, and to clarify their preferences 6.5 Ensure flexibility of patient services that consider the patient's special needs 6.6 Obtain and document consent following ethical and legal requirements

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to *performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTDEP002 Gather data, conduct dental prosthetic examination and develop treatment plan

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites. 240 work placement hours Supersedes HLTDP602D

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has completed the following tasks:

- performed the activities outlined in the performance criteria of this unit during a period of at least 240 hours of work in a clinical dental workplace environment
- followed procedures to ensure patient safety during examinations
- performed an intra-oral and an extra-oral examination on at least 4 patients
- communicated effectively, interactively, respectfully and reflectively with patients in a manner that takes into account factors such as their age, intellectual development and social and cultural background
- explained the treatment plan and the limitations of treatment for 4 patients using language that is easily understood by the patient
- maintained legible and accurate maintenance records for 4 different patients.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the work role. This includes knowledge of:

© Commonwealth of Australia, 2025 HumanAbility

- Australian/New Zealand Standards, workplace health and safety (WHS) policies, current Dental Board of Australia infection control guidelines, Commonwealth and State/Territory legislation requirements, and organisation policies and procedures relating to dental laboratory work
- relevance of medical conditions and medications that can impact on oral health or make the provision of dental treatment unsafe national and State/Territory legal and ethical requirements and considerations for dental assisting work including:
  - codes of practice
  - discrimination
  - duty of care
  - informed consent and statutory requirements of consent
  - privacy, confidentiality and disclosure
  - records management
  - work role boundaries – responsibilities and limitations
  - work health and safety
- oral pathology, including:
  - benign lesions of bone
  - dental caries and periodontal disease
  - infectious diseases including bacterial, fungal and viral infections
  - inflammation
  - oral cancer
  - pathology of dental caries and periodontal disease
  - physical injuries to soft tissue including burns and ulceration
  - reactive connective tissue including hyperplasia
  - regeneration and repair
  - signs and symptoms of infectious diseases that affect the oral cavity including oral fungal and bacterial infections
  - the causes of dental caries and periodontal disease
  - the role of bacteria, diet and dental plaque
- considerations when using dental and medical records and charts including:
  - confidentiality of patient records
  - notation systems and charting symbols for tooth surfaces, cavities and other dental problems in accordance with codes and guidelines
  - items that constitute a dental record
  - knowledge of correct dental terminology and how it is used in dental charting
  - the purpose and requirements for maintaining accurate records of examination, treatments, materials used and drugs and medicaments prescribed
  - the reasons for taking radiographs and photograph
- components of intra-oral and extra-oral examination
- retracting soft tissues and moisture control:
  - methods of retracting and protecting soft tissue

© Commonwealth of Australia, 2025 HumanAbility

  - methods for providing a clear field of vision
  - methods for controlling moisture
- normal variance of structure and function of dental prosthetic devices
- procedures and rationale for referral
- specific considerations when dealing with patients who are elderly or aged, including:
  - fundamental knowledge of systemic disease including angina, congestive heart failure, stroke, Parkinson's disease, diabetes, osteoporosis, arthritis, nutritional deficiencies
  - fundamental knowledge of the relationship between nutrition and the efficiency of the dentition
  - psychological changes
  - xerostomia produced by certain medications and its adverse effects on denture retention and comfort
- cultural issues which may affect dental examinations and treatment.

Assessment Conditions

Skills must have been demonstrated in the dental workplace with the addition of simulations and scenarios where the full range of contexts and situations cannot be provided in the workplace. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - dental and medical records and charts
  - personal protective equipment
  - Dental Board of Australia guidelines on infection control on which the candidate bases the planning process
- modelling of industry operating conditions including access to real people for simulations and scenarios of prosthetic procedures.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTDEP003 Take impressions

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites. 240 work placement hours Supersedes HLTDP603C

Application

This unit of competency describes the skills and knowledge required to take a range of impressions for patients who are dentate or edentulous.

This unit applies to work in dental prosthetics.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Assess the patient	1.1 Confirm the patient's medical history
	1.2 Provide full details of the procedure to the patient or where appropriate to their carer
	1.3 Obtain and document consent following ethical and legal requirements
	1.4 Select the equipment and instruments for the impression

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
	1.5 Prepare personal protective equipment for the patient and members of the dental team
	1.6 Adjust the dental clinic set-up to accommodate the patient's needs
2. Select impression tray and modify if required	2.1 Select an appropriate impression tray for the technique and the patient
	2.2 Modify the impression tray where necessary to ensure comfort and accuracy
3. Select and prepare impression materials	3.1 Select impression materials in accordance with desired outcome
	3.2 Consider the patient's comfort and the indications for use of particular materials
	3.3 Prepare the correct materials and medicaments using the correct technique, to the correct consistency and quantity required
	3.4 Modify materials where indicated
4. Perform impression taking procedure	4.1 Position and prepare the patient for the procedure
	4.2 Instruct the patient on participation during the procedure
	4.3 Place impression tray and mixed material in the patient's mouth
	4.4 Carry out muscle trimming
	4.5 Monitor and reassure the patient throughout the procedure and provide first aid support if required
	4.6 Remove the impression when set
	4.7 Examine the patient's mouth for injury and impression material debris following removal of the impression
	4.8 Restore the patient's comfort and appearance
	4.9 Document details of the procedure in accordance with organisation policies and procedures and relevant

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites. 240 work placement hours Supersedes HLTDP603C

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has completed the following tasks:

- performed the activities outlined in the performance criteria of this unit during a period of at least 240 hours of work in a clinical dental workplace environment
- prepared 4 different patients for impression procedures ensuring patient safety, including:
  - patients who are partially dentate
  - patients who are fully edentulous
- taken at least 1 impression for each of the following types of procedures, which may include using of stock and custom trays:
  - relining or rebasing
  - complete dentures
  - partial dentures
  - removable flexible mouthguard used for sporting activities immediate dentures
  - additions or repairs to existing denture.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the work role. This includes knowledge of:

- the effects of disability, medical conditions and medications on the impression taking procedure

© Commonwealth of Australia, 2025 HumanAbility

- physical and chemical properties of dental impression materials
- principles of quality assurance and work effectiveness
- rationale and objectives for the taking of impressions
- rationale, criteria for selection and use of dental impression materials
- ethical principles and legal responsibilities involved in the provision of dental care
- dental practice or organisation policy and procedures, including registration standards and guidelines.

Assessment Conditions

Skills must have been demonstrated in the dental workplace with the addition of simulations and scenarios where the full range of contexts and situations cannot be provided in the workplace. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - gas burner
  - custom made impression tray
  - examination mirrors
  - existing dentures
  - mixing bowl and/or mixing pad
  - spatula
  - stock impression tray
  - storage container for transportation
  - Dental Board of Australia guidelines on infection control on which the candidate bases the planning process
- modelling of industry operating conditions including access to real people for simulations and scenarios of prosthetic procedures.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTDEP004 Establish and record jaw relationships and select artificial teeth

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites. 240 work placement hours Supersedes HLTDP604D

Application

This unit of competency describes the skills and knowledge required to create and outline the form of dentures, record jaw relationships and select artificial teeth for dentate and edentulous patients.

This unit applies to work in dental prosthetics.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare patient for procedure	1.1 Interpret and clarify referred work order if from unfamiliar source 1.2 Provide full details of the procedure to the patient or carer and confirm consent to follow treatment plan 1.3 Prepare personal protective equipment for the patient

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. and members of the dental team
2. Select technique, equipment and materials for recordings	2.1 Select technique, equipment and materials that are appropriate for the procedure 2.2 Prepare and use equipment and materials in accordance with manufacturers' instructions
3. Record jaw relationships and occlusion	3.1 Position the patient comfortably for the procedure 3.2 Instruct the patient on participation during the procedure 3.3 Ensure stability and comfort of registration rims 3.4 Observe centric and eccentric mandibular movements 3.5 Determine and record functional measurements and dimensions 3.6 Consider referral if jaw relationship cannot be determined 3.7 Check recordings by observation and repetition. 3.8 Maintain integrity of the recording during extra-oral transfer 3.9 Ensure the patient's wellbeing before they leave dental workplace
4. Select appropriate artificial teeth	4.1 Ensure adequacy of natural and artificial light for selection of colour and shade 4.2 Consult patient regarding aesthetic and functional requirements 4.3 Consider properties and composition of artificial teeth in relation to wear and aesthetics 4.4 Examine manufacturers' mould and shade guides 4.5 Select artificial teeth that are appropriate in shade, size and shape

© Commonwealth of Australia, 2025 HumanAbility

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to *performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No Equivalent Unit

Assessment Requirements for HLTDEP004 Establish and record jaw relationships and select artificial teeth

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites. 240 work placement hours Supersedes HLTDP604D

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has completed the following tasks:

- performed the activities outlined in the performance criteria of this unit during a period of at least 240 hours of work in a clinical dental workplace environment
- followed procedures to ensure patient safety during procedures
- customised the form of the registration rims prior to recording the jaw relationships and occlusions for at least 4 different patients including:
  - 2 complete maxillary and mandibular dentures
  - and any 4 dentures of the following, 2 of which must be partial dentures:
    - complete maxillary or mandibular denture opposing partial maxillary or mandibular denture
    - opposing partial maxillary and mandibular dentures
    - partial maxillary or mandibular denture opposing natural dentition
- established and recorded jaw relationships and occlusion for 4 different patients
- selected appropriate shade and mould for artificial teeth for 4 different patients.

© Commonwealth of Australia, 2025 HumanAbility

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the work role. This includes knowledge of:

- techniques for establishing and recording jaw relationships and occlusion
- rationale and objectives for establishing and recording of jaw relationships and occlusion
- legal and ethical issues relating to: informed consent, duty of care, confidentiality, disability awareness
- factors which influence selection of tooth shades such as skin tone, age, hair colour, natural teeth, light
- dental practice or organisation policy and procedures, including registration standards and guidelines.

Assessment Conditions

Skills must have been demonstrated in the dental workplace with the addition of simulations and scenarios where the full range of contexts and situations cannot be provided in the workplace. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources including:
  - dental clinic
  - de-identified dental and medical records and charts
  - personal protective equipment
  - Dental Board of Australia guidelines on infection control on which the candidate bases the planning process
- modelling of industry operating conditions including access to real people for simulations and scenarios of prosthetic procedures.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTDEP005 Evaluate a removable dental prosthesis at try-in stage

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites. 240 work placement hours Supersedes HLTDP605D

Application

This unit of competency describes the skills and knowledge required to evaluate and modify the try-in fitting of a removable dental prosthesis prior to its completion for dentate or edentulous patients.

This unit applies to work in dental prosthetics.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare patient for procedure	1.1 Interpret and clarify referred work order if from unfamiliar source 1.2 Prepare personal protective equipment for the patient and members of the dental team 1.3 Position patient correctly for procedure

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
	1.4 Provide full details of the procedure to the patient or carer and confirm consent to follow treatment plan
	1.5 Prepare equipment and materials in accordance with manufacturers' instructions
2. Perform check of try-in prosthesis prior to insertion	2.1 Decontaminate the try-in prosthesis according to infection control guidelines
	2.2 Remove potential injury-causing areas of the prosthesis prior to insertion
	2.3 Check teeth and other components to ensure they will not dislodge during the procedure
3. Fit and evaluate try-in prosthesis	3.1 Position the patient comfortably for the procedure
	3.2 Instruct patient on participation during the procedure
	3.3 Examine the try-in prosthesis for retention and stability
	3.4 Examine the occlusal relationships of the try-in prosthesis for accuracy of centric relation
	3.5 Assess the aesthetic appearance of teeth and gums
	3.6 Assess that speech has not been affected
	3.7 Assess patient comfort
	3.8 Complete documentation as required
4. Alter try-in prosthesis	4.1 Make changes to the prosthesis in accordance with the evaluation at the try-in stage
	4.2 Repeat the evaluation of the try-in prosthesis
	4.3 Ensure functional and aesthetic acceptability of the dentures to the operator
	4.4 Ensure functional and aesthetic acceptability of the dentures to the patient
	4.5 Provide patient with full details for the next stage
	4.6 Complete documentation as required

© Commonwealth of Australia, 2025 HumanAbility

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to *performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTDEP005 Evaluate a removable dental prosthesis at try-in stage

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites. 240 work placement hours Supersedes HLTDP605D

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has completed the following tasks:

- performed the activities outlined in the performance criteria of this unit during a period of at least 240 hours of work in a clinical dental workplace environment
- prepared at least 4 patients for dental prosthesis try-in
- followed procedures to ensure 4 patient's safety during try-in
- assessed functional and aesthetic acceptability of 4 trial sets of dentures, including:
  - 2 complete maxillary and mandibular dentures
  - and any 4 dentures of the following, 2 of which must be partial dentures:
    - complete maxillary or mandibular denture opposing partial maxillary or mandibular denture
    - opposing partial maxillary and mandibular dentures
    - partial maxillary or mandibular denture opposing natural dentition.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the work role. This includes knowledge of:

- rationale and objectives for try-ins

© Commonwealth of Australia, 2025 HumanAbility

- functional and aesthetic acceptability of dentures, for both operators and patients
- ethical principles and legal responsibilities involved in the provision of dental care
- dental practice or organisation policy and procedures, including registration standards and guidelines.
-

Assessment Conditions

Skills must have been demonstrated in the dental workplace with the addition of simulations and scenarios where the full range of contexts and situations cannot be provided in the workplace. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources including:
  - dental clinic
  - de-identified dental and medical records and charts
  - personal protective equipment
  - Dental Board of Australia guidelines on infection control on which the candidate bases the planning process
- modelling of industry operating conditions including access to real people for simulations and scenarios of prosthetic procedures.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTDEP006 Insert and issue a completed removable dental prosthesis

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites. 240 work placement hours Supersedes HLTDP606D

Application

This unit of competency describes the skills and knowledge required to insert, alter and issue a completed removable dental prosthesis for dentate and edentulous patients.

This unit applies to work in dental prosthetics.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare patient for procedure	1.1 Prepare personal protective equipment for the patient and members of the dental team 1.2 Position patient correctly for procedure 1.3 Provide full details of the procedure to the patient or carer and confirm consent to follow treatment plan 1.4 Prepare equipment and materials in accordance with

Assessment Requirements for HLTDEP006 Insert and issue a completed removable dental prosthesis

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites. 240 work placement hours Supersedes HLTDP606D

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has completed the following tasks:

- performed the activities outlined in the performance criteria of this unit during a period of at least 240 hours of work in a clinical dental workplace environment
- followed procedures to ensure the safety of 4 patients during preparation, insertion and removal of completed prosthesis
- assessed the functional and aesthetic acceptability for at least 4 patients including:
  - 2 complete maxillary and mandibular dentures
  - and any 4 dentures of the following, 2 of which must be partial dentures:
    - complete maxillary or mandibular denture opposing partial maxillary or mandibular denture
    - opposing partial maxillary and mandibular dentures
    - partial maxillary or mandibular denture opposing natural dentition
- assessed the functional and aesthetic acceptability for at least 1 patient for one of the following:
  - relines or rebases
  - repairs and/or additions to existing dentures.

© Commonwealth of Australia, 2025 HumanAbility

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the work role. This includes knowledge of:

- Australian/New Zealand Standards, workplace health and safety (WHS) policies, Dental Board of Australia guidelines on infection control, Commonwealth and State/Territory legislation, and organisation policies relating to dental prosthetics work
- rationale and objectives for insertion of completed prostheses
- how to use equipment and materials required to adjust and evaluate the fitting of removable dental prosthesis including aesthetics, phonics and comfort
- ethical principles and legal responsibilities involved in the provision of dental care
- dental practice or organisation policy and procedures, including registration standards and guidelines.

Assessment Conditions

Skills must have been demonstrated in the dental workplace with the addition of simulations and scenarios where the full range of contexts and situations cannot be provided in the workplace. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources including:
  - dental clinic
  - de-identified dental and medical records and charts for scenarios
  - personal protective equipment
  - Dental Board of Australia guidelines on infection control on which the candidate bases the planning process
- modelling of industry operating conditions including access to real people for simulations and scenarios of prosthetic procedures.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTDEP007 Perform maintenance treatment for patient with removable dental prostheses

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites. 240 work placement hours Supersedes HLTDP607D

Application

This unit of competency describes the skills and knowledge required to adjust and maintain new and existing dental prostheses for dentate and edentulous patients.

This unit applies to work in dental prosthetics.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Examine oral cavity and prosthesis to determine treatment need	1.1 Review the patient's medical history 1.2 Decontaminate the removable dental prosthesis according to infection control guidelines 1.3 Assess the patient's adaptation to the prosthesis 1.4 Determine the procedure that will give desired outcome for the patient and the operator 1.5 Involve the patient or carer in discussions about the procedures, and assist patients to clarify their preferences 1.6 Refer patient to other professionals if necessary
2. Prepare for the procedure	2.1 Provide full details to the patient or carer about options and potential risks and benefits 2.2 Obtain and document consent following ethical and legal requirements 2.3 Select appropriate materials and equipment for the procedure
3. Perform procedure	3.1 Position the patient comfortably for the procedure 3.2 Explain participation required from the patient during the procedure using language that is easily understood 3.3 Carry out procedure in accordance with the treatment plan 3.4 Use equipment for the procedure correctly and in accordance with relevant guidelines 3.5 Prepare materials in accordance with manufacturers' instructions 3.6 Complete documentation as required

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
4. Evaluate procedure and instruct patient	4.1 Discuss oral hygiene and maintenance instructions of the removable dental prosthesis with the patient or carer 4.2 Provide clear advice on follow up treatment required to patient or carer 4.3 Reach mutual agreement that all outcomes of the treatment have been fulfilled

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to *performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTDEP007 Perform maintenance treatment for patient with removable dental prostheses

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites. 240 work placement hours Supersedes HLTDP607D

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has completed the following tasks:

- performed the activities outlined in the performance criteria of this unit during a period of at least 240 hours of work in a clinical dental workplace environment
- prepared 4 patients for adjustment and maintenance of a range of new and existing dental prostheses
- followed procedures to ensure 4 patient's safety during adjustment and maintenance
- assessed the functional and aesthetic acceptability of at least 4 different completed prostheses.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the work role. This includes knowledge of:

- conditions of the oral cavity related to ill-fitting removable dentures requiring treatment
- information for patients on available options for treatment of issues arising from ill-fitting removable dentures
- ethical principles and legal responsibilities involved in the provision of dental care
- dental practice or organisation policy and procedures, including registration standards and guidelines.

HLTDEP008 Construct and insert an implant retained overdenture

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites. 240 work placement hours Supersedes HLTDP608C

Application

This unit of competency describes the skills and knowledge required to construct and place an aesthetic, and functional implant retained overdenture.

This unit applies to work in dental prosthetics where the dental prosthetist must enter into a structured professional relationship with a dentist as defined by the Dental Board of Australia before providing such treatment.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan treatment	1.1 Ensure a structured professional relationship with a dentist is established 1.2 Obtain accurate, complete and legal records of the patient’s personal, medical and dental history

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
	1.3 Provide details of the procedure to the patient or carer and obtain and document consent following ethical and legal requirements
	1.4 Make accessible in the clean zone of the surgery the patient's required laboratory work and necessary charts and records
	1.5 Ensure emergency procedures are in place and ready for use according to relevant guidelines
2. Take a primary impression	2.1 Select correctly the equipment, instruments and materials for the primary impression
	2.2 Apply standard precautions to take primary impressions of the maxilla and/or mandible using an impression material in stock edentulous trays
	2.3 Pour impression material in dental stone and trim for custom tray fabrication
3. Prepare to take a final impression	3.1 Fabricate a custom tray with sufficient spacing over impression copings
	3.2 Attach static (non-screw) retained impression copings to the abutments
	3.3 Attach impression copings to the abutments
	3.4 Try-in the custom tray in the mouth and check for comfort and path of insertion with sufficient space between tray and impression coping
4. Take the final impression	4.1 Paint the custom tray with an appropriate adhesive for the impression material to be used
	4.2 Mix the selected impression material according to the manufacturer's instructions and load material into custom tray
	4.3 Seat the impression tray over the impression copings
5. Pour master and/or working models and fabricate occlusal	5.1 Seat replica analogues into impression copings

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
rims	5.2 Pour master and/or working models
	5.3 Fabricate customised occlusal rims
6. Record jaw relationships and occlusion	6.1 Position the patient comfortably for the procedure
	6.2 Instruct the patient on participation during the procedure
	6.3 Ensure stability and comfort of registration rims
	6.4 Observe centric and eccentric mandibular movements
	6.5 Determine and record functional measurements and dimensions
	6.6 Consider referral if jaw relationship cannot be determined
	6.7 Check recordings by observation and repetition
	6.8 Maintain integrity of the recording during extra-oral transfer
	6.9 Ensure the patient's wellbeing before they leave dental workplace
7. Select appropriate artificial teeth	7.1 Ensure adequacy of natural and artificial light for selection of colour and shade
	7.2 Consult patient regarding aesthetic and functional requirements
	7.3 Consider properties and composition of artificial teeth in relation to wear and aesthetics
	7.4 Examine manufacturer's mould and shade guides
	7.5 Select artificial teeth that are appropriate in shade, size and shape
8. Fit and evaluate try-in prosthesis	8.1 Position the patient comfortably for the procedure
	8.2 Instruct the patient on participation during the procedure
	8.3 Examine the try-in prosthesis for retention and stability
	8.4 Examine the occlusal relationships of the try-in prosthesis for accuracy of centric relation
	8.5 Assess the aesthetic appearance of teeth and gums

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
	8.6 Assess that speech has not been affected
	8.7 Assess patient comfort
	8.8 Complete documentation as required
9. Process, evaluate and insert the completed overdenture	9.1 Position the patient comfortably for the procedure
	9.2 Instruct the patient on participation during the procedure
	9.3 Examine the prosthesis for retention and stability
	9.4 Check the fitting surfaces of the appliance and ensure there are no sharp ridges or acrylic pearls
	9.5 Place denture in the mouth and assess that no over-extensions occur along the periphery of the dentures
	9.6 Seat denture onto overdenture abutments
	9.7 Confirm the occlusal relationships are acceptable
	9.8 Assess aesthetics of removable dental prosthesis
	9.9 Assess phonetics of removable dental prosthesis
	9.10 Assess patient comfort of removable dental prosthesis.
	9.11 Provide instructions on the insertion and removal, hygiene and ongoing maintenance of the prosthesis and abutments
	9.12 Ensure the dentist in the structured professional relationship is informed of completed final prosthesis

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to *performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTDEP008 Construct and insert an implant retained overdenture

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites. 240 work placement hours Supersedes HLTDP608C

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 240 hours of work in a clinical dental workplace environment
- prepared 2 patients for insertion of an implant retained overdenture
- followed procedures to ensure patient safety during try-in and insertion
- constructed 2 functional and aesthetic implant retained overdentures.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the work role. This includes knowledge of:

- Australian/New Zealand Standards, workplace health and safety (WHS) policies, Dental Board of Australia guidelines on infection control, Commonwealth and State/Territory legislation and organisation policies relating to dental prosthetics work
- dental practice or organisation policy and procedures, including registration standards and guidelines
- advantages of an implant retained overdenture to the patient including:
  - better aesthetics especially when resorption has decreased the size of the alveolar process in the maxilla

© Commonwealth of Australia, 2025 HumanAbility

  - fewer implants, abutments and prosthetic components
  - less component stress and breakage
  - lower treatment costs compared to fixed prosthetics
  - simplified construction technique
- the specific skills and techniques that are required when processing implant overdentures for a successful outcome
- disadvantages of implant retained overdentures including the wear of attachments with repeated removal and seating of the overdentures
- properties of dental materials used for construction
- implant attachment options for overdentures
- importance for patients to follow pre and post-procedural instructions, including:
  - removal of the overdenture
  - use of a standard soft toothbrush to brush abutments
  - use of dental floss to clean under the bar and around each abutment cylinder
  - use of an interdental brush to clean the under surface of the denture and the overdenture framework
  - instructions on the insertion and removal, hygiene and ongoing maintenance of the prosthesis and abutments.

Assessment Conditions

Skills must have been demonstrated in the dental workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources including:
  - dental clinic/laboratory
  - de-identified dental and medical records and charts for scenarios
  - personal protective equipment
  - Dental Board of Australia guidelines on infection control on which the candidate bases the planning process
- modelling of industry operating conditions including access to real people for simulations and scenarios of prosthetic procedures.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTDET001 Construct models

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites Supersedes HLTDT301D

Application

This unit of competency describes the skills and knowledge required to construct models from impressions of the patient's maxillary or mandibular jaws.

This unit applies to work in dental technology.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Verify integrity of impressions	1.1 Apply standard precautions when receiving, handling and working on dental materials
	1.2 Decontaminate impressions according to infection control guidelines
	1.3 Examine impressions for defects
	1.4 Check impressions to ensure they meet the

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. specifications of the work order 1.5 Handle impressions with care to avoid damage or distortion 1.6 Ensure accompanying models are intact with no defects or adjustments required 1.7 Prepare a range of impressions for pouring
2. Select and prepare model materials	2.1 Select appropriate model materials 2.2 Ensure all equipment used for mixing materials is clean 2.3 Prepare model materials in accordance with desired outcomes 2.4 Maintain and store model materials in accordance with manufacturers' instructions
3. Pour impressions	3.1 Pour model materials into impressions in accordance with accepted techniques 3.2 Allow required setting time
4. Finish model	4.1 Separate intact model from the impression. 4.2 Inspect the model for defects 4.3 Trim the model in accordance with requirements 4.4 Duplicate the master model to create a working model where required by work order

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to *performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit

Assessment Requirements for HLTDET001 Construct models

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites Supersedes HLTDT301D

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- used standard precautions and safe work practices to prepare models, using a range of materials specifically prepared against written instructions and manufacturers' instructions, for at least 4 different types of impressions (must be a combination of maxillary and mandibular arches):
  - dentate
  - partially dentate
  - edentulous
- critically evaluated the 4 different types of models produced to meet technical laboratory and clinician requirements.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- Australian/New Zealand Standards, workplace health and safety (WHS) policies, Dental Board of Australia guidelines on infection control, Commonwealth legislation and State/Territory legislation, and organisation policies relating to dental laboratory work
- requirements and organisation policies relating to dental laboratory work including:

© Commonwealth of Australia, 2025 HumanAbility

  - use of standard precautions to minimise risk
  - use of personal protective equipment (PPE) including disposable gloves, laboratory coat and eye protection
  - decontamination of impressions
  - minimising hazardous manual tasks
  - requirements for storage of model material
  - safe disposal of packaging materials
- fundamental oral anatomy, including:
  - dentition – arrangement of the teeth, naming and coding of teeth
  - structures of the oral cavity – hard and soft palate, lateral and posterior borders of the oral cavity, tongue and floor of the mouth
  - teeth form and function
- properties of elastic impression materials including:
  - alginate impression material
  - polyether impression material
  - polysulphide impression material
  - polyvinyl siloxane impression material
- properties of rigid impression materials including:
  - impression compound
  - zinc oxide-eugenol impression pastes
- desirable properties of model materials including:
  - accurate reproduction of all details of the impression
  - colour contrast with other materials used on them
  - ease of manipulation
  - sufficient strength and hardness
  - suitability for use with all types of impression materials
- significance of study models for:
  - dentate and partially dentate mouths
  - edentulous mouths.

Assessment Conditions

Skills must have been demonstrated in a dental laboratory workplace or in a simulated dental laboratory environment that reflects workplace laboratory conditions. The following conditions must be met for this unit:

  - use of suitable facilities, equipment and resources including
  - access to work order
  - Dental Board of Australia guidelines on infection control on which the candidate bases the planning process
  - impression materials

© Commonwealth of Australia, 2025 HumanAbility

- laboratory safety manuals and procedures in line with relevant Commonwealth and State/Territory legislation
- PPE
- simulation models on which to construct impression models
- WHS policies on which the candidate bases the planning process.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTDET002 Construct custom impression trays

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites Supersedes HLTDT302D

Application

This unit of competency describes the skills and knowledge required to construct special trays to accurately record oral tissues.

This unit applies to work in dental technology.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare model	1.1 Read and interpret the work order 1.2 Block out undesirable undercuts 1.3 Design the custom tray for the patient's dentition and the intended impression material and technique 1.4 Apply spacer material when required
2. Select and prepare	2.1 Select custom tray materials in accordance with the

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
materials	work order
	2.2 Prepare equipment for processing
	2.3 Provide appropriate mixing vessels and templates when required
3. Construct custom impression tray	3.1 Apply appropriate separating medium in accordance with manufacturer's instructions
	3.2 Mix or manipulate materials in accordance with the manufacturers' instructions
	3.3 Adapt tray material to the model to the pre-determined peripheral outline
	3.4 Construct handle and attach according to operator requirements
	3.5 Process custom tray using the correct method for the correct material
	3.6 Separate the tray from the model in a manner that prevents damage and remove spacer material
	3.7 Trim the outline of the tray to shape
4. Finish custom impression tray	4.1 Smooth and refine the peripheries, handle and other surfaces of the tray
	4.2 Decontaminate the custom impression tray according to infection control guidelines
	4.3 Dry the custom tray and place in a sealed container for dispatch

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to *performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTDET002 Construct custom impression trays

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites Supersedes HLTDT302D

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- read and correctly interpreted 4 work orders
- used standard precautions and safe work practices to fabricate custom trays, using a range of materials, for 4 different dentitions with desirable properties and design features including one each of the following (must be a combination of maxillary and mandibular arches):
  - full dention
  - edentulous
  - partial dentition including
    - bounded saddle
    - free end saddle
- critically evaluated the 4 custom impression trays produced to meet technical laboratory and clinician requirements.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

© Commonwealth of Australia, 2025 HumanAbility

- Australian/New Zealand Standards, workplace health and safety (WHS) policies, current Dental Board of Australia guidelines on infection control, Commonwealth and State/Territory legislation requirements and organisation policies relating to dental laboratory work
- Fundamental oral anatomy including:
  - dentition – arrangement of the teeth, naming and coding of teeth
  - structures of the oral cavity – hard and soft palate, lateral and posterior borders of the oral cavity, tongue and floor of the mouth
  - teeth form and function
- properties of custom tray materials including:
  - acrylic resins
  - light-cured composite
- rationale for using space filling materials
- desirable properties and design features of custom impression trays including:
  - a design that holds the impression material in the correct position in the mouth
  - a design that supports the lips and cheeks so that the functional depth and shape of the sulcus is recorded
  - a design that allows for positioning of the handle to avoid the lip during impression taking
  - rigidity, strength, dimensional stability and smoothness
  - spacing to permit the correct thickness of the impression material to be used.

Assessment Conditions

Skills must have been demonstrated in a dental laboratory workplace or in a simulated dental laboratory environment that reflects workplace laboratory conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources including:
  - access to work order
  - Dental Board of Australia guidelines on infection control on which the candidate bases the planning process
  - laboratory safety manuals and procedures in line with relevant Commonwealth and State/Territory legislation
  - WHS policies on which the candidate bases the planning process.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTDET003 Construct registration rims

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites Supersedes HLTDT303D

Application

This unit of competency describes the skills and knowledge required to design and manufacture registration rims for removable prostheses.

This unit applies to work in dental technology.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Select and prepare materials	1.1 Read and interpret the work order 1.2 Select appropriate material for the base 1.3 Select appropriate material for the rim 1.4 Prepare model to enable appropriate application of selected base material

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
2. Construct base	2.1 Apply selected base material to model
	2.2 Process base material according to type of material selected
	2.3 Trim base material to peripheral contours of model and appropriate landmarks
3. Construct registration rim	3.1 Construct rim to industry standard in selected material
	3.2 Trim rim to prescribed dimensions and appropriate landmarks
	3.3 Smooth and polish rim according to material chosen
	3.4 Decontaminate the registration rim according to infection control guidelines
	3.5 Dry the registration rim and place in a sealed container for dispatch

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to *performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTDET003 Construct registration rims

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites Supersedes HLTDT303D

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- read and correctly interpreted 4 work orders
- used standard precautions and safe work practices to fabricate maxillary and mandibular registration rims using a range of flexible and rigid base and rim material for the following dentitions (4 rims in total):
  - partial with a combination of bounded and unbounded saddle areas
  - edentulous
- critically evaluated the 4 registration rims produced to meet technical laboratory and clinician requirements.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- Australian/New Zealand Standards, workplace health and safety (WHS) policies, Dental Board of Australia guidelines on infection control, Commonwealth and State/Territory legislation and organisation policies relating to dental laboratory work

HLTDET004 Articulate models and transfer records

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites Supersedes HLTDT304D

Application

This unit of competency describes the skills and knowledge required to transfer oral records and mount models on an articulator.

This unit applies to work in dental technology.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Select and prepare the articulator	1.1 Apply standard precautions when receiving, handling and working on dental materials 1.2 Decontaminate occlusal registration rims according to infection control guidelines 1.3 Confirm requirements of work order 1.4 Select and adjust articulator in accordance with work order

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
	1.5 Ensure all adjustable settings of the articulator are set to their neutral or zero settings
	1.6 Identify the mounting method to be used
2. Select and prepare materials	2.1 Position models and oral records in articulator for a range of prosthetic appliances
	2.2 Prepare mounting materials and apply to models
	2.3 Establish and secure centric records
	2.4 Remove excess material and smooth to produce a neat finish
	2.5 Clean equipment
3. Transfer oral records to articulator	3.1 Transpose records as provided
	3.2 Record midline
	3.3 Set and record vertical height
	3.4 Set the condylar angles to the work order given

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to *performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTDET004 Articulate models and transfer records

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites Supersedes HLTDT304D

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- used standard precautions and safe work practices to mount at least one of each of the following types of articulators with attached registrations rims:
  - planeline articulator
  - adjustable articulator with face/ear bow
- critically evaluated both types of articulations produced to meet technical laboratory and clinician requirements.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- Australian/New Zealand Standards, workplace health and safety (WHS) policies, Dental Board of Australia guidelines on infection control, Commonwealth and State/Territory legislation and organisation policies relating to dental laboratory work
- fundamental oral anatomy including:
  - structures of the oral cavity such as hard and soft palate, lateral and posterior borders of the oral cavity, tongue and floor of the mouth
  - teeth form and function
  - dentition – arrangement of the teeth, naming and coding of teeth

© Commonwealth of Australia, 2025 HumanAbility

- articulation procedures
- mechanical devices:
  - articulators
  - face-bows
- recording techniques and devices
- relevant material science for carrying out procedures.

Assessment Conditions

Skills must have been demonstrated in a dental laboratory workplace or in a simulated dental laboratory environment that reflects workplace laboratory conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources including
  - access to work order
  - Dental Board of Australia guidelines on infection control on which the candidate bases the planning process
  - laboratory safety manuals and procedures in line with relevant Commonwealth and State/Territory legislation
  - WHS policies on which the candidate bases the planning process.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTDET005 Construct thermoformed bases and appliances

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites Supersedes HLTDT315D

Application

This unit of competency describes the skills and knowledge required to construct thermoformed bases and appliances such as mouthguards, bleaching trays and orthodontic retainers.

This unit applies to work in dental technology.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare model	1.1 Interpret work order 1.2 Mark outline and scribe finishing lines where applicable 1.3 Apply block-out material as required
2. Thermo-form appliance or base from blank	2.1 Select thermo-forming material in accordance with the work order and appliance to be constructed

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
	2.2 Select thermo-forming equipment according to material
	2.3 Apply heat to material to ensure that blank has been uniformly softened
	2.4 Adapt softened material to model ensuring adaptation is uniform with constant thickness as specified by manufacturer's instructions
	2.5 Allow material to cool
	2.6 Verify adaptation
3. Trim, shape and finish appliances or bases	3.1 Remove thermo-formed blank
	3.2 Trim to outline and fit to model
	3.3 Refine outline
	3.4 Smooth and finish appliance or base

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to *performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTDET005 Construct thermoformed bases and appliances

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites Supersedes HLTDT315D

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- read and correctly interpreted work orders and constructed the following 3 appliances:
  - mouthguard
  - bleaching tray
  - splint
- used standard precautions and safe work practices to trim, polish and finish 2 thermo-formed appliances suitable for insertion in the mouth
- critically evaluated the 2 different types of thermo-formed appliances produced to meet technical laboratory and clinician requirements.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- Australian/New Zealand Standards, workplace health and safety (WHS) policies, Dental Board of Australia guidelines on infection control, Commonwealth and State/Territory legislation and organisation policies relating to dental laboratory work
- fundamental oral anatomy including:
  - articulation and occlusion
  - dentition – arrangement of the teeth, naming and coding of teeth

© Commonwealth of Australia, 2025 HumanAbility

  - structures of the oral cavity – hard and soft palate, lateral and posterior borders of the oral cavity, tongue and floor of the mouth
  - teeth form and function
- polymer science
- relevant material science for carrying out procedures
- thermoforming technology.

Assessment Conditions

Skills must have been demonstrated in a dental laboratory workplace or in a simulated dental laboratory environment that reflects workplace laboratory conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - access to work orders
  - Dental Board of Australia guidelines on infection control on which the candidate bases the planning process
  - laboratory safety manuals and procedures in line with relevant Commonwealth and State/Territory legislation
  - WHS policies on which the candidate bases the planning process.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTDET006 Construct immediate dentures

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites Supersedes HLTDT507C

Application

This unit of competency describes the skills and knowledge required to construct complete and partial immediate replacement dentures and surgical templates.

This unit applies to work in dental technology.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Arrange artificial teeth for try-in	1.1 Select artificial teeth in accordance with work order 1.2 Arrange artificial teeth in current edentulous area in accordance with work order
2. Arrange artificial teeth and construct surgical template for finish	2.1 Remove model teeth individually and prepare the ridge in accordance with work order 2.2 Arrange artificial teeth in sequence as each model

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
	tooth is removed
	2.3 Adjust existing artificial teeth if necessary when commencing removal of model teeth
	2.4 Contour wax surfaces
	2.5 Invest/key and boil out
	2.6 Finalise the ridge shape
	2.7 Duplicate and pour model
	2.8 Construct surgical template
3. Process immediate dentures	3.1 Trim and polish immediate dentures
	3.2 Process surgical template
	3.3 Trim and polish surgical template
	3.4 Decontaminate the denture and surgical template according to infection control guidelines
	3.5 Place denture and surgical template in a suitable container that will keep moist in accordance with infection control guidelines

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to *performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTDET006 Construct immediate dentures

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites Supersedes HLTDT507C

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed 1 set of sequenced written instructions and the manufacturers' instructions for preparing materials used in immediate dentures
- used standard precautions and safe work practices to construct an immediate denture from at least one denture suitable for insertion in the mouth including 1 of each of the following:
  - maxillary or mandibular anterior tooth with at least one of the following:
    - flanged denture with bone re-contouring
    - flanged denture without bone re-contouring
    - open-faced denture
  - maxillary or mandibular posterior tooth with at least one of the following:
    - flanged denture with bone re-contouring
    - flanged denture without bone re-contouring
    - open-faced denture
- critically evaluated the 1 immediate denture produced to meet technical laboratory and patient requirements.

© Commonwealth of Australia, 2025 HumanAbility

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- Australian/New Zealand Standards, workplace health and safety (WHS) policies, Dental Board of Australia guidelines on infection control, Commonwealth and State/Territory legislation and organisation policies relating to dental laboratory work
- advantages of immediate dentures for the patient including:
  - accurate positioning of the artificial teeth
  - control of post-extraction haemorrhage
  - correct restoration of the vertical and horizontal relationships between maxilla and mandible
  - maintenance of appearance
- fundamental oral anatomy, including:
  - dentition – arrangement of the teeth, naming and coding of teeth
  - structures of the oral cavity – hard and soft palate, lateral and posterior borders of the oral cavity, tongue and floor of the mouth
  - teeth form and function
- clinical treatment procedures necessary to prepare the patient for immediate denture insertion, including:
  - where there are posterior teeth and no existing partial denture
  - where a partial denture is present
- disadvantages of immediate dentures for the patient including:
  - the implications for the patient where appearance of anterior artificial teeth cannot be approved at try-in
  - the implications of rapid bone resorption following extraction
- types of immediate replacement dentures and their advantages and disadvantages:
  - flanged denture without bone re-contouring
  - flanged denture with bone re-contouring
  - open-faced denture.

Assessment Conditions

Skills must have been demonstrated in a dental laboratory workplace or in a simulated dental laboratory environment that reflects workplace laboratory conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources including:
  - access to work order
  - Dental Board of Australia guidelines on infection control on which the candidate bases the planning process

© Commonwealth of Australia, 2025 HumanAbility

- laboratory safety manuals and procedures in line with relevant Commonwealth and State/Territory legislation
- WHS policies on which the candidate bases the planning process.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTDET007 Construct removable acrylic partial dentures

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites Supersedes HLTDT508C

Application

This unit of competency describes the skills and knowledge required to construct removable acrylic partial dentures.

This unit applies to work in dental technology.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Design acrylic removable partial denture	1.1 Confirm the survey of the model carried out by the operator 1.2 Confirm design and transfer to master model 1.3 Block-out undesirable undercuts 1.4 Scribe food lines 1.5 Duplicate master model to create a working model

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
2. Select and prepare materials	2.1 Select materials according to laboratory work order 2.2 Establish shape and dimension of component parts from design
3. Arrange artificial teeth	3.1 Select teeth and position in wax to establish aesthetics and function 3.2 Contour wax so that denture is suitable for try-in. 3.3 Decontaminate denture according to infection control guidelines and place in a suitable container for dispatch
4. Construct retainer units.	4.1 Construct components as required 4.2 Join components as required 4.3 Secure teeth and components in wax 4.4 Contour facial and lingual aspects 4.5 Secure appliance for processing
5. Select and prepare materials and processing technique	5.1 Identify the appropriate polymer system for case 5.2 Identify the appropriate investment technique 5.3 Identify the appropriate processing cycle 5.4 Select polymeric material to construct the prosthesis 5.5 Prepare system components in accordance with manufacturers' instructions 5.6 Allow materials to reach application stage
6. Process denture or appliance	6.1 Apply appropriate investment techniques 6.2 Apply material to investment mould 6.3 Process the polymeric material for the correct length of time at the correct temperature 6.4 Devest model and remove any processing irregularities and sharp edges before fitting onto master

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
	model
	6.5 Confirm accuracy of retainer units
7. Finish denture or appliance	7.1 Reposition models on the articulator where possible
	7.2 Assess the articulated prosthesis and confirm that articulation is appropriate where possible
	7.3 Make any necessary adjustments to maintain original vertical dimension
	7.4 Polish the non-fitting surface of the prosthesis to create a smooth high shined surface
	7.5 Evaluate the finished prosthesis
	7.6 Decontaminate the finished prosthesis in accordance to infection control procedures
	7.7 Place in a sealed container ready for dispatch

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to *performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTDET007 Construct removable acrylic partial dentures

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites Supersedes HLTDT508C

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- read and correctly interpreted 1 laboratory work order for removable acrylic partial denture
- used standard precautions and safe work practices during the set-up and waxing of partial dentures to produce 1 acrylic partial denture with a combination of bounded and free end saddle areas, suitable for insertion in the mouth
- critically evaluated the 1 acrylic partial denture produced to meet technical laboratory and patient requirements.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- Australian/New Zealand Standards, workplace health and safety (WHS) policies, Dental Board of Australia guidelines on infection control, Commonwealth and State/Territory legislation and organisation policies relating to dental laboratory work
- advantages and disadvantages of partial dentures
- fundamental oral anatomy, including:
  - dentition – arrangement of the teeth, naming and coding of teeth

© Commonwealth of Australia, 2025 HumanAbility

  - structures of the oral cavity – hard and soft palate, lateral and posterior borders of the oral cavity, tongue and floor of the mouth
  - teeth form and function
- fundamentals of dental polymers including:
  - acrylic and modified acrylic prosthetic teeth
  - acrylic plastics as soft liners
  - acrylic plastics for denture bases including composition and properties
  - acrylic-metal combinations
  - acrylics for construction of custom trays
  - modified acrylic denture base plastics including manipulation and processing
  - the polymerisation process including cross-linked polymers, copolymers, modified polymers and vinyl plastics
- principles of partial denture design
- surveying techniques
- stages in the design of partial dentures:
  - classifying, supporting and outlining the saddles
  - connecting the various components together
  - providing additional components where necessary to resist rotation
  - providing reciprocation and bracing
  - providing retention
  - reviewing the design for hygiene, support and retention.

Assessment Conditions

Skills must have been demonstrated in a dental laboratory workplace or in a simulated dental laboratory environment that reflects workplace laboratory conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources including:
  - access to work order
  - Dental Board of Australia guidelines on infection control on which the candidate bases the planning process
  - laboratory safety manuals and procedures in line with relevant Commonwealth and State/Territory legislation
  - WHS policies on which the candidate bases the planning process.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTDET008 Construct cast alloy removable partial denture framework

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites Supersedes HLTDT509D

Application

This unit of competency describes the skills and knowledge required to construct burnout patterns for cast metal framework and to devest, trim, treat, finish and evaluate alloy structures.

This unit applies to work in dental technology.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare master model	1.1 Read and interpret the work order 1.2 Confirm the survey of model that has been carried out by the operator 1.3 Transfer design to master model

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
	1.4 Block out undesirable undercuts
	1.5 Create clasp ledges
	1.6 Scribe food lines
	1.7 Apply tissue relief
	1.8 Apply saddle relief
2. Construct refractory model	2.1 Duplicate master model in refractory material to produce an accurate copy of the model
	2.2 Construct sprue former as necessary
	2.3 Prepare the refractory model appropriately and apply an appropriate hardener or sealant
3. Wax and invest removable partial denture framework	3.1 Transfer design outline correctly to the refractory model
	3.2 Select appropriate wax and pre-formed components
	3.3 Wax up patterns to the refractory cast consistent with the design
	3.4 Sprue the pattern using material of the correct size and in the correct shape and position for the material being cast, and attach it to the investment former
	3.5 Select appropriate investment and technique according to the alloy
	3.6 Prepare investment materials in accordance with manufacturers' instructions
	3.7 Treat the surface of the wax, patterns and sprues
	3.8 Allow for investment setting time in accordance with manufacturer's instructions
4. Burnout and cast removable partial denture framework	4.1 Select appropriate alloy according to work order
	4.2 Select burnout and preheat cycles for appropriate investment and alloy combination
	4.3 Burnout wax from investment mould and hold at recommended temperature for casting

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
	4.4 Melt alloy and cast using appropriate materials, equipment and techniques
5. Devest, trim, finish and evaluate alloy structures for removable partial denture	5.1 Select and apply cooling cycle
	5.2 Remove the cast alloy structure from the investment without damaging the integrity of the structure
	5.3 Remove oxides using an appropriate abrasive or chemical treatment
	5.4 Visually examine the cast alloy structure and correctly identify any casting faults and assess the viability of the casting
	5.5 Remove sprues and trim and shape the alloy structure
	5.6 Treat the surface of the alloy using appropriate materials and equipment, and finish using appropriate abrasives and polishes
	5.7 Position the cast on the master model and check accuracy of major connection and clasps, and adjust any metal occlusal contacts with antagonist
	5.8 Decontaminate the denture framework according to infection control guidelines
	5.9 Dry the denture framework, replace on model and place in a sealed container for dispatch

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to *performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

HLTDET009 Construct crown and bridge structures

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTDT510C/HLTDT516C Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites

Application

This unit of competency describes the skills and knowledge required to construct crown and bridge structures including inlays, veneers and substructures.

This unit applies to work in dental technology.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare crown and bridge model	1.1 Pour or construct model using crown and bridge model system
	1.2 Prepare crown and bridge model to appropriate height and with level occlusal plane in accordance with crown and bridge model system used
	1.3 Section crown and bridge model in accordance with work order requirements

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. 1.4 Prepare die for construction of restoration in accordance with work order
2. Wax and invest fixed partial dentures and structures	2.1 Wax up crown and bridge restorations 2.2 Sprue crown and bridge wax pattern and prepare for processing 2.3 Select appropriate investment material according to the material to be used 2.4 Prepare investment materials according to the manufacturers' instructions 2.5 Invest wax patterns
3. Burnout, process and finish fixed partial dentures and structures	3.1 Select burnout techniques appropriate to the investment material and restoration material 3.2 Process restoration/substructure in appropriate material 3.3 Devest restoration/substructure without damaging it 3.4 Check for defects 3.5 Trim and finish restoration while maintaining all contact areas and margins 3.6 Evaluate the finished restoration 3.7 Decontaminate the restoration according to infection control guidelines 3.8 Dry the casting, replace on model and place in a sealed container for dispatch

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to *performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTDET009 Construct crown and bridge structures

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTDT510C/HLTDT516C Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- used standard precautions and safe work practices to design and construct 1 maxillary or mandibular anterior and posterior crown
- critically evaluated the 1 maxillary or mandibular anterior and posterior crown produced to meet technical laboratory and patient requirements.
-

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- Australian/New Zealand Standards, workplace health and safety (WHS) policies, Dental Board of Australia guidelines on infection control, Commonwealth and State/Territory legislation and organisation policies relating to dental laboratory work
- fundamental oral anatomy including:
  - dentition – arrangement of the teeth, naming and coding of teeth
  - structures of the oral cavity related to crown and bridge structures
  - teeth form and function
  - tooth preparation including basic cementation techniques of restorations
  - articulation and occlusion

© Commonwealth of Australia, 2025 HumanAbility

- casting
- dental metallurgy
- factors responsible for casting defects
- finishing and polishing
- fundamentals of crown and bridge impressions including:
  - properties
  - types
  - techniques
  - compatibility with crown and bridge model materials
- properties of model and die materials including:
  - epoxy and polymer materials
  - gypsum materials
  - manipulation of crown and bridge model materials
- properties of crown and bridge materials:
  - casting and pressing materials
  - computer-aided design (CAD) and computer-aided manufacturing (CAM)
  - ceramic bonding materials
  - other relevant materials
- use of pattern materials including:
  - wax and plastic pattern techniques
  - emerging technology techniques
- investment and burnout including:
  - fundamental knowledge of investment materials
  - investing and expansion of the investment
  - burnout
  - waxing and spruing techniques.

Assessment Conditions

Skills must have been demonstrated in a dental laboratory workplace or in a simulated dental laboratory environment that reflects workplace laboratory conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources including:
  - access to work order
  - Dental Board of Australia guidelines on infection control on which the candidate bases the planning process
  - laboratory safety manuals and procedures in line with relevant Commonwealth and State/Territory legislation
  - WHS policies on which the candidate bases the planning process.

HLTDET010 Join alloy structures

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites Supersedes HLTDT511C

Application

This unit of competency describes the skills and knowledge required to join dental alloys using thermal processes.

This unit applies to work in dental technology.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Solder components	1.1 Identify and position component materials accurately to comply with the design and in a manner that enables the optimum join to be made 1.2 Select appropriate solder and flux according to the component materials 1.3 Select appropriate heating methods

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. 1.4 Apply and control solder 1.5 Evaluate each finished join 1.6 Clean, trim, shape and finish components to produce a smooth surface free of sharp edges and irregularities
2. Weld components	2.1 Identify and position component materials accurately to comply with the design, and in a manner that enables the optimum join to be made 2.2 Select appropriate welding techniques and equipment 2.3 Weld components 2.4 Evaluate each finished weld 2.5 Clean, trim, shape and finish components to produce a smooth surface free of sharp edges and irregularities

Foundation Skills

The Foundation Skills describe those required skills (employability skills, language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTDET010 Join alloy structures

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites Supersedes HLTDT511C

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed 2 sets of sequenced written instructions and manufacturers' instructions for preparation of materials for joining alloy structures
- used standard precautions and safe work practices to produce 2 soldered or welded joints that exhibit bio-compatibility and optimum mechanical properties
- critically evaluated the 2 joined alloy structures produced to meet technical laboratory and patient requirements, including joint:
  - position
  - strength
  - integrity
  - function.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- Australian/New Zealand Standards, workplace health and safety (WHS) policies, Dental Board of Australia guidelines on infection control, Commonwealth and State/Territory legislation and organisation policies relating to dental laboratory work
- fundamental oral anatomy including:

© Commonwealth of Australia, 2025 HumanAbility

  - dentition – arrangement of the teeth, naming and coding of teeth
  - structures of the oral cavity – hard and soft palate, lateral and posterior borders of the oral cavity, tongue and floor of the mouth
  - articulation and occlusion
- dental metallurgy and dental alloys, including noble and non-noble alloys
- finishing methods
- fluxes
- infection control guidelines for the decontamination of completed laboratory work
- orthodontic wires
- soldering and welding techniques including laser welding technology.

Assessment Conditions

Skills must have been demonstrated in a dental laboratory workplace or in a simulated dental laboratory environment that reflects workplace laboratory conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources including:
  - access to work order
  - Dental Board of Australia guidelines on infection control on which the candidate bases the planning process
  - laboratory safety manuals and procedures in line with relevant Commonwealth and State/Territory legislation
  - WHS policies on which the candidate bases the planning process.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTDET011 Construct ceramic and fixed restorations

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTDT512D/HLTDT513C Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites

Application

This unit of competency describes the skills and knowledge required to take a tooth shade and construct ceramic and fixed restorations.

This unit applies to work in dental technology.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Take tooth shade	1.1 Read and interpret work order 1.2 Provide full details of the procedure to the patient or carer where appropriate 1.3 Obtain and document consent following ethical and legal requirements 1.4 Consider the accuracy of natural and artificial light 1.5 Position the patient correctly for the procedure

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
	1.6 Consult patient regarding requirements and aesthetic outcomes
	1.7 View mouth to gain overview of procedure.
	1.8 Select technique and prepare equipment and materials for tooth shade recording
	1.9 Implement standard precautions to prevent the spread of infection
	1.10 Instruct patient on participation during the procedure
	1.11 Select tooth shade and consult patient regarding findings, and gain acceptance
	1.12 Document the tooth shade
	1.13 Discuss any follow-up procedures with the patient
2. Prepare sub-structures	2.1 Read and interpret the work order
	2.2 Design and form substructure
	2.3 Process the substructure
	2.4 Assess substructure for accuracy and appropriateness
	2.5 Prepare the bonding surface of the substructure if required for porcelain build up in accordance with the manufacturer’s instructions
3. Select, apply and process ceramics	3.1 Select appropriate ceramic for substructure or restoration
	3.2 Apply procedures to selected ceramic for substructures or restoration
	3.3 Process the restoration in accordance with the manufacturer’s instructions
4. Trim, shape and finish ceramic restorations	4.1 Trim the ceramic restoration to required anatomical shape
	4.2 Finish the ceramic restoration to meet clinically accepted standards
	4.3 Evaluate the quality of the finished restoration

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. 4.4 Decontaminate the ceramic restoration according to infection control guidelines 4.5 Dry the ceramic restoration, place on model and place in a sealed container for dispatch and record completed work order

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to *performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTDT512D/HLTDT513C Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- read and correctly interpreted work order for the following 4 fixed restorations
- fabricated the following 4 ceramic restorations using standard precautions and safe work practices to a standard that is suitable for insertion in the mouth:
  - 1 maxillary or mandibular anterior crown
  - 1 maxillary or mandibular posterior crown
  - 1 anterior veneer
  - 1 posterior inlay
- critically evaluated the work produced to meet technical laboratory and patient requirements including:
  - shade of the ceramic matches the work order requirements
  - fit of the restoration is accurate
  - restoration is of an appropriate anatomical form, shape and surface finish
  - restoration is free of faults
  - restoration provides the correct occlusion and articulation
  - proximal contact areas are in contact with the contact areas of the adjacent teeth.

© Commonwealth of Australia, 2025 HumanAbility

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- Australian/New Zealand Standards, workplace health and safety (WHS) policies, Dental Board of Australia guidelines on infection control, Commonwealth and State/Territory legislation and organisation policies relating to dental laboratory work
- fundamental oral anatomy including:
  - dentition – arrangement of the teeth, naming and coding of teeth
  - structures of the oral cavity related to crown and bridge structures
  - teeth form and function
  - occlusion
- tooth preparation including basic cementation techniques of restorations
- dental ceramic restorations
- properties of different restoration and substructure materials
- ceramic bonding to substructures
- composition and properties of dental ceramics
- processing ceramic restorations
- causes of common faults during construction
- critical issues and techniques for taking tooth shades including:
  - effects of aging, tooth wear and staining on shade
  - colour
  - rationale and objectives for taking shades
- social, cultural and psychological factors affecting patient perception and acceptance of tooth shade
- factors which influence selection of tooth shades
- physics of light refraction including properties of materials used in aesthetic restoration

Assessment Conditions

Skills must have been demonstrated in a dental laboratory workplace or in a simulated dental laboratory environment that reflects workplace laboratory conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - access to work order
  - Dental Board of Australia guidelines on infection control on which the candidate bases the planning process
  - laboratory safety manuals and procedures in line with relevant Commonwealth and State/Territory legislation
  - WHS policies on which the candidate bases the planning process.

© Commonwealth of Australia, 2025 HumanAbility

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTDET012 Construct orthodontic appliances

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites Supersedes HLTDT514D

Application

This unit of competency describes the skills and knowledge required to construct removable orthodontic appliances.

This unit applies to work in dental technology.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Select and assemble components and materials	1.1 Select materials for removable orthodontic appliances according to design and function specified in work order 1.2 Select the required pre-formed components and confirm they are fit for the purpose 1.3 Construct individual custom-made components according to work order

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
2. Construct orthodontic appliance	2.1 Secure components to model by appropriate means 2.2 Apply appropriate materials to the model to form a baseplate according to manufacturers' instructions and the work order 2.3 Process the appliance using equipment and techniques according to manufacturers' instructions and the work order
3. Finish orthodontic appliances	3.1 Select techniques, materials and equipment for trimming, finishing and polishing appropriate to the type and materials of the appliance 3.2 Trim and finish the baseplate to the thickness and coverage required 3.3 Finish and polish metal components ensuring surfaces that are free of sharp edges and irregularities 3.4 Evaluate the finished appliance 3.5 Decontaminate the appliance according to infection control guidelines 3.6 Place the appliance in a sealed container for dispatch

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to *performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTDET012 Construct orthodontic appliances

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites Supersedes HLTDT514D

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- read and correctly interpreted work order for the design of 1 orthodontic appliance with active and passive components
- used standard precautions and safe work practices to manufacture 1 orthodontic appliance ensuring it is a suitable for insertion in the mouth
- critically evaluated the 1 orthodontic appliance produced to meet technical laboratory and patient requirements, including that it:
  - is free from defects
  - is suitable for insertion in the mouth
  - is effective for the purpose
  - meets the requirements of the planned design
  - complies with the work order.

Knowledge Evidence

The candidate must demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

© Commonwealth of Australia, 2025 HumanAbility

- Australian/New Zealand Standards, workplace health and safety (WHS) policies, Dental Board of Australia guidelines on infection control, Commonwealth and State/Territory legislation and organisation policies relating to dental laboratory work
- fundamental oral anatomy including:
  - dentition – arrangement of the teeth, naming and coding of teeth
  - structures of the oral cavity – hard and soft palate, lateral and posterior borders of the oral cavity, tongue and floor of the mouth
  - teeth form and function
  - articulation and occlusion
- aims and objectives of orthodontic treatment using removable appliances
- how to select and fabricate components for removable orthodontic appliances:
  - dental metallurgy
  - wrought wire fabrication techniques.

Assessment Conditions

Skills must have been demonstrated in a dental laboratory workplace or in a simulated dental laboratory environment that reflects workplace laboratory conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources including:
  - access to work order
  - Dental Board of Australia guidelines on infection control on which the candidate bases the planning process
  - laboratory safety manuals and procedures in line with relevant Commonwealth and State/Territory legislation
  - WHS policies on which the candidate bases the planning process.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTDET013 Construct oral splints

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites Supersedes HLTDT517D

Application

This unit of competency describes the skills and knowledge required to construct oral splints.

This unit applies to work in dental technology.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Construct splint	1.1 Select materials for the construction of splint in accordance with work order 1.2 Construct splint in accordance with work order 1.3 Process splint in accordance with manufacturer’s instructions
2. Trim, shape and finish splint	2.1 Trim splint according to material selection 2.2 Shape splint according to work order and recheck on

Assessment Requirements for HLTDET013 Construct oral splints

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites Supersedes HLTDT517D

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed 1 set of sequenced written instructions and manufacturers' instructions for the construction of 1 oral splint
- used standard precautions and safe work practices to design and manufacture 1 oral splint for a range of jaw relations and malocclusions
- finished at least 1 oral splint suitable for insertion in the mouth
- critically evaluated the 1 oral splint produced to meet technical laboratory and patient requirements, including confirming that the splint:
  - is suitable for insertion in the mouth
  - is free from defects
  - is effective for the purpose
  - meets the requirements of the planned design
  - complies with the work order.

Knowledge Evidence

The candidate must demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

© Commonwealth of Australia, 2025 HumanAbility

- Australian/New Zealand Standards, workplace health and safety (WHS) policies, Dental Board of Australia guidelines on infection control, Commonwealth and State/Territory legislation and organisation policies relating to dental laboratory work
- fundamental oral anatomy including:
  - dentition – arrangement of the teeth, naming and coding of teeth
  - structures of the oral cavity – hard and soft palate, lateral and posterior borders of the oral cavity, tongue and floor of the mouth
  - teeth form and function
  - articulation and occlusion
- dental metallurgy
- processing of wax patterns in acrylic resin
- relevant material science for carrying out procedures
- signs and symptoms of temporomandibular joint disorder (TMJ), including process for referrals
- use of surveying equipment
- use of vacuum forming procedures
- properties of materials used in the construction of oral splints, including:
  - acrylic resins (heat activated, chemically activated, thermoformed)
  - other relevant materials.

Assessment Conditions

Skills must have been demonstrated in a dental laboratory workplace or in a simulated dental laboratory environment that reflects workplace laboratory conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources including:
  - access to work order
  - Dental Board of Australia guidelines on infection control on which the candidate bases the planning process
  - laboratory safety manuals and standard operating procedures in line with relevant Commonwealth and State/Territory legislation
  - WHS policies on which the candidate bases the planning process.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTDET014 Repair and modify dentures and appliances

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites Supersedes HLTDT518D

Application

This unit of competency describes the skills and knowledge required to reline, rebase, repair and modify removable prostheses.

This unit applies to work in dental technology.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare case	1.1 Apply standard precautions when receiving, handling and working on dentures and appliances 1.2 Decontaminate dentures and appliances according to infection control guidelines 1.3 Read and correctly interpret work order 1.4 Examine fractured components for defects 1.5 Realign, position and secure fractured components in

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
	their correct relationship
2. Prepare model	2.1 Construct model according to the work order.
	2.2 Construct articulation key
3. Repair denture or appliance	3.1 Prepare and shape denture surfaces to allow for bonding with the new material
	3.2 Relocate components
	3.3 Select and prepare materials and processing equipment
	3.4 Apply repair materials using the correct technique to the required shape and thickness
	3.5 Process materials according to manufacturers' instructions
4. Modify denture or appliance where required	4.1 Decontaminate impressions according to infection control guidelines
	4.2 Pour the model material into the impression in accordance with accepted techniques
	4.3 Articulate case and transfer records, or construct articulation key as required
	4.4 Prepare denture or appliance surfaces appropriately for the modification to be made
	4.5 Reline, re-base or modify the denture in accordance with work order
5. Trim, shape and finish denture or appliance	5.1 Trim denture or appliance to relevant anatomical outline or required extension of the base
	5.2 Examine the tissue fitting surface and remove any processing anomalies and sharp surfaces
	5.3 Refine and polish surfaces and produce required contours
	5.4 Evaluate the finished prosthesis

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. 5.5 Decontaminate the appliance according to infection control guidelines 5.6 Place the appliance in a sealed container for dispatch

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to *performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTDET014 Repair and modify dentures and appliances

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites Supersedes HLTDT518D

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- read and correctly interpreted 1 work order and manufacturers' instructions for repair and modification of removable prostheses, and used standard precautions and safe work practices for constructing repairs and modification for a maxillary or mandibular denture with a combination of the following:
  - replace, add or modify new or existing artificial teeth
  - replace, add or modifying new or existing metallic components
  - modify the denture base
- critically evaluated the 1 repaired or modified denture produced to meet technical laboratory and patient requirements, including confirming that the repaired or modified denture:
  - is compliant with the work order
  - is free from defects
  - is functionally effective in line with the design
  - is suitable for insertion in the mouth.

Knowledge Evidence

The candidate must demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

© Commonwealth of Australia, 2025 HumanAbility

- Australian/New Zealand Standards, workplace health and safety (WHS) policies, Dental Board of Australia guidelines on infection control, Commonwealth and State/Territory legislation and organisation policies relating to dental laboratory work
- fundamental oral anatomy including:
  - dentition – arrangement of the teeth, naming and coding of teeth
  - structures of the oral cavity – hard and soft palate, lateral and posterior borders of the oral cavity, tongue and floor of the mouth
  - teeth form and function
- constructional faults that cause fractures of denture base including:
  - absence of balanced occlusion
  - inadequate polymerisation times and temperatures
  - incorrect dough consistency when packing
  - incorrect positioning of maxillary posterior teeth
  - insufficient thickness of acrylic resin in the anterior palatal region of the denture
  - rapid cooling after processing
- constructional faults that cause broken teeth
- denture base materials
- denture decontamination procedures when modifying acrylic
- methods for modifying, repairing and maintaining removable prostheses.

Assessment Conditions

Skills must have been demonstrated in a dental laboratory workplace or in a simulated dental laboratory environment that reflects workplace laboratory conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources including:
  - access to work order
  - Dental Board of Australia guidelines on infection control on which the candidate bases the planning process
  - laboratory safety manuals and standard operating procedures in line with relevant Commonwealth and State/Territory legislation
  - WHS policies on which the candidate bases the planning process.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTDET015 Construct complete removable acrylic dentures and appliances

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites Supersedes HLTDT519C

Application

This unit of competency describes the skills and knowledge required to construct a trial prosthesis suitable for insertion in the mouth, convert it to clinically acceptable materials and finish according to laboratory standards.

This unit applies to work in dental technology.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Articulate by means of face-bow	1.1 Receive face-bow with completed bite registration. 1.2 Read and interpret work order 1.3 Articulate on an industry specific articulator in accordance with clinician requirements

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
2. Prepare case for setting of teeth	2.1 Select artificial teeth in accordance with work order 2.2 Modify bases and rims as required for positioning teeth
3. Arrange artificial teeth	3.1 Follow work order to position and attach the prescribed artificial teeth 3.2 Shape and contour the supportive wax and contour to gingival outline
4. Wax up denture for try-in	4.1 Contour facial and lingual aspects 4.2 Locate and relieve muscle attachments 4.3 Smooth and round peripheral extensions 4.4 Confirm distal extensions 4.5 Decontaminate the trial prosthesis according to infection control guidelines 4.6 Dry the trial prosthesis and place in a sealed container for dispatch
5. Check and modify the returned trial prosthesis	5.1 Decontaminate the returned prosthesis and identify any modifications that are required 5.2 Check the returned trial prosthesis for loosening or movement of teeth and make necessary adjustments 5.3 Fit the returned trial prosthesis to the model if it needs to be modified, articulate and make necessary modifications
6. Wax case for finish consistent with work order	6.1 Evaluate the work order, models and denture design and decide whether or not to use a duplicate model for processing the final prosthesis 6.2 Apply wax as required by work order 6.3 Contour facial and lingual aspects

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
7. Select and prepare materials and processing technique	7.1 Identify the appropriate polymer system for case 7.2 Identify the appropriate investment technique 7.3 Identify the appropriate processing cycle 7.4 Select polymeric material to construct the prosthesis 7.5 Prepare system components in accordance with manufacturers' instructions 7.6 Allow materials to reach application stage
8. Process denture	8.1 Apply appropriate investment techniques 8.2 Apply material to mould 8.3 Process the polymeric material for the correct length of time at the correct temperature 8.4 Devest model and remove the processed prosthesis without causing damage to it 8.5 Trim excess material and remount on articulator
9. Finish denture	9.1 Select methods, materials and equipment for trimming, finishing and polishing the prosthesis appropriate to the appliance and the materials used in its construction 9.2 Reposition models on the articulator where possible 9.3 Assess the articulated prosthesis and confirm that articulation is appropriate to the work order 9.4 Make any necessary adjustments to maintain original vertical dimension 9.5 Remove any processing irregularities and sharp edges 9.6 Polish the non-fitting surfaces of the prosthesis to create smooth, polished surfaces 9.7 Evaluate the finished prosthesis 9.8 Decontaminate the dentures according to infection

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. control guidelines 9.9 Place in a sealed container for dispatch

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to *performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTDET015 Construct complete removable acrylic dentures and appliances

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites Supersedes HLTDT519C

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- read and correctly interpreted 2 work orders, arranged artificial teeth, and used standard precautions and safe work practices to wax, process and finish 1 maxillary and 1 mandibular complete acrylic prosthesis to a standard suitable for insertion in the mouth
- critically evaluated the 2 complete acrylic prostheses produced to meet technical laboratory and patient requirements, including confirming that each acrylic prosthesis:
  - is compliant with the work order
  - is free from defects
  - is functionally effective in line with the design and occlusion and is suitable for insertion in the mouth.

Knowledge Evidence

The candidate must demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- Australian/New Zealand Standards, workplace health and safety (WHS) policies, Dental Board of Australia guidelines on infection control, Commonwealth and State/Territory legislation and organisation policies relating to dental laboratory work
- fundamental oral anatomy including:
  - dentition – arrangement of the teeth, naming and coding of teeth

© Commonwealth of Australia, 2025 HumanAbility

  - structures of the oral cavity – hard and soft palate, lateral and posterior borders of the oral cavity, tongue and floor of the mouth
  - teeth form and function
- articulation procedures
- properties of a range of dental materials used in the construction of removable acrylic prostheses including:
  - atomic structure
  - chemical bonding and reactions
  - classification of materials
  - classification of matter
  - properties of materials
- knowledge of dental polymers including:
  - acrylic and modified acrylic prosthetic teeth
  - acrylic plastics as soft liners
  - acrylic plastics for denture bases including composition and properties
  - acrylic-metal combinations
  - acrylics for construction of custom trays
  - modified acrylic denture base plastics including manipulation and processing
  - the polymerisation process including cross-linked polymers, copolymers, modified polymers and vinyl plastics
- mechanical devices:
  - articulators
  - face-bows
- recording techniques and devices
- relevant material science for carrying out procedures.

Assessment Conditions

Skills must have been demonstrated in a dental laboratory workplace or in a simulated dental laboratory environment that reflects workplace laboratory conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources including:
  - access to work order
  - Dental Board of Australia guidelines on infection control on which the candidate bases the planning process
  - laboratory safety manuals and standard operating procedures in line with relevant Commonwealth and State/Territory legislation
  - WHS policies on which the candidate bases the planning process.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTENN001 Practise nursing within the Australian health care system

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Merged with HLTEN401B and HLTEN516B. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to practise as a nursing professional within the Australian health care system, providing health care across the lifespan of people in a range of health and community care services or environments.

This unit applies to enrolled nursing work carried out in consultation and collaboration with registered nurses, and under supervisory arrangements aligned to the Nursing and Midwifery Board of Australia regulatory authority legislative requirements.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Apply principles and knowledge of nursing practice to work in a health care system.	1.1 Apply principles of primary health care and the wellness principles to own work role. 1.2 Identify and access appropriate agencies to facilitate positive health outcomes.

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	1.3 Take into account socio-cultural and social influences and factors that impact health and illness.
	1.4 Apply knowledge of political and economic impacts on health care delivery.
	1.5 Apply knowledge of non-western approaches to health care, and their place in contemporary nursing practice.
	1.6 Apply strategies within own work role to maintain standards of care within the contemporary health care system.
	1.7 Maintain knowledge of current health issues impacting clinical practice and health policy development.
2. Identify and discuss funding sources for health care in Australia.	2.1 Access and interpret information to increase own awareness of appropriate sources of funding for health care services.
	2.2 Discuss information on health care service funding sources and health-related insurances with the person, family or carer.
3. Identify and respond to factors and issues affecting health in Australia.	3.1 Identify factors that may affect health for a range of people and groups.
	3.2 Recognise risk factors and social circumstances applying to the health of people, and refer the person to appropriate health professionals.
	3.3 Identify existing health services that support current health issues facing people in Australia.
	3.4 Identify and evaluate the effectiveness of available community health promotional strategies.
	3.5 Promote understanding of the person’s emotional and social wellbeing.
4. Work in the context of professional nursing practice.	4.1 Describe the historical development and current perspectives of the nursing profession.
	4.2 Maintain current knowledge of nursing theorists, and incorporate theoretical concepts related to nursing care into nursing practice.

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	4.3 Describe the role of relevant professional nursing bodies.
	4.4 Work within the principles and parameters of nursing practice.
	4.5 Follow organisation procedures that comply with audit and accreditation processes.
	4.6 Apply jurisdictional requirements relating to Scope of Practice Framework.
	4.7 Adapt to different requirements of the role of the enrolled nurse within health care environments.
5. Contribute to professional work team.	5.1 Establish collaborative relationships in the delivery of health care in accordance with the role of the enrolled nurse, working with the registered nurse and other health care professionals.
	5.2 Examine and document reflective nursing practice.
	5.3 Contribute to achieving effective team work and supportive group dynamics when working in interdisciplinary team.

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Merged with HLTEN401B and HLTEN516B. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- undertaken nursing work in accordance with Nursing and Midwifery Board of Australia professional practice standards, codes and guidelines
- during at least 1 clinical work placement, worked effectively in the context of professional nursing practice including:
  - performing 5 different professional interactions to demonstrate adaptation to nursing role and application of knowledge of nursing practice
  - reflecting on the 5 professional interactions and identifying how nursing practice contributed to the person’s health outcome.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- health and illness issues facing people who have come from countries other than Australia
- health insurance-related organisations and their roles in the Australian health care system
- health issues and impacts for health care delivery for Aboriginal and Torres Strait Islander people
- historical and current perspectives of the nursing profession

© Commonwealth of Australia, 2025 HumanAbility

- development and historical context of the Australian health care system, current health service models and State/Territory standards of care
- range of health care environments and the roles of the interdisciplinary health care team and personnel associated with health service delivery
- themes that impact health and illness for people from Australia and other countries, including environment, cultural barriers and community acceptance
- social, political and economic impacts on health care delivery including funding sources and constraints on services and resource allocation
- overall structure, strengths and weakness of the Australian health care system, with emphasis on the local area
- current issues which impact health policy development
- how health and illness factors impact a person
- principles and philosophical framework of primary health care
- principles of wellness and illness, and models of care and non-western approaches to health care
- roles of regulatory authorities, industrial and professional bodies:
  - Nursing and Midwifery Board of Australia, including knowledge of the enrolled nurse competency standards for practice, and professional practice standards, codes and guidelines
  - Australian Nursing and Midwifery Federation.

Assessment Conditions

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations cannot be provided in the workplace. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources in line with the Australian Nursing and Midwifery Accreditation Council's Standards
- modelling of industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must hold current registration as a registered nurse with Nursing and Midwifery Board of Australia.

HLTENN002 Apply communication skills in nursing practice

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minimal change to knowledge evidence. Supersedes HLTEN502B

Application

This unit describes the skills and knowledge required to apply effective communication skills with a person, family or carer and with other healthcare professionals in a variety of health care settings.

Communication skills in nursing practice require using information technology as well as interpersonal skills applied therapeutically in nursing care and small group discussions.

This unit applies to enrolled nursing work carried out in consultation and collaboration with registered nurses, and under supervisory arrangements aligned to the Nursing and Midwifery Board of Australia regulatory authority legislative requirements.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Use effective communication skills in complex situations.	1.1 Apply principles of effective communication to facilitate, not inhibit, communication with the person.

© Commonwealth of Australia, 2025 HumanAbility

	1.2 Maximise opportunities to involve the person and family or carer in their care and treatment. 1.3 Clarify roles and responsibilities of the interdisciplinary health care team involved in communicating in complex situations, including clarifying own role as an enrolled nurse. 1.4 Demonstrate politeness, respect and empathy in all interactions with the person, family or carer. 1.5 Use health terminology correctly in written and verbal communication with the person, family or carer and with colleagues.
2. Identify and address actual and potential constraints to communication.	2.1 Identify early signs of potentially complex communication situations with a person, including with people who have hearing or vision impairments and require assistance. 2.2 Implement strategies to address complex communication situations in accordance with relevant policies and procedures, and within scope of role. 2.3 Demonstrate advocacy for a person in the health or community care setting.
3. Use information technology to support communication in nursing practice.	3.1 Use computers and related information technology to access, develop and adhere to reporting requirements according to organisation policy and procedures. 3.2 Comply with organisation policy and procedures for electronic communication with the person, family or carer. 3.3 Use information technology including the internet to access data appropriate to own role and organisation policy and procedures. 3.4 Apply ethical principles and follow regulatory responsibilities when using social media and interacting online in nursing role. 3.5 Maintain accurate documentation and adhere to reporting requirements to support safe practice according to organisation policy and procedures.
4. Lead small group discussions.	4.1 Monitor and respond appropriately to changing group dynamics.

© Commonwealth of Australia, 2025 HumanAbility

	4.2 Clarify the purpose of group meetings and manage discussion to achieve identified objectives. 4.3 Implement meeting procedures appropriate to the meeting's purpose. 4.4 Clarify participants' roles and use communication strategies to support their effective contribution to discussion.
5. Give and receive feedback for performance improvement.	5.1 Identify effective communication strategies for giving and receiving feedback on own performance. 5.2 Apply strategies that deliver constructive outcomes in giving and receiving feedback. 5.3 Use appropriate language and a respectful manner in giving and receiving feedback.
6. Evaluate effectiveness of communication in complex situations.	6.1 Participate in debriefing sessions following communication for complex situations. 6.2 Document, consider and report outcomes of communication strategies used to address complex situations.

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTENN002 Apply communication skills in nursing practice

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minimal change to knowledge evidence. Supersedes HLTEN502B

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- undertaken nursing work in accordance with Nursing and Midwifery Board of Australia professional practice standards, codes and guidelines
- communicated effectively within the context of the enrolled nurse role in 4 different complex communication situations, with at least 1 of the situations involving a person, family or carer, and at least 1 of the situations involving work colleagues.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- characteristics of effective partnerships in nursing including:
  - confidentiality
  - trust
  - self-reflection
  - social conversation
  - creating a therapeutic environment
- resources for the Core Standards for nurses who support people with a disability (NSW Family and Community Services)

© Commonwealth of Australia, 2025 HumanAbility

    - Communication and Behaviour Support for Nurses Practice Package
    - Communication and Behaviour Support for Nurses Appraisal
- documentation related to clinical handover
- elements and skills of communication processes:
    - interviewing techniques
    - active listening
    - conflict resolution
    - interpersonal skills
    - negotiating solutions
    - group dynamics
    - access and use of interpreters
- factors that may facilitate and inhibit communication
- information technology used in communication, and email etiquette and policies for use
- principles underpinning nursing documentation including legal obligations
- principles, processes and practices of open disclosure in line with Australian Open Disclosure Framework
- medical terminology used in clinical situations and enrolled nurse practice
- sensory losses and appropriate nursing responses
- social media policies for nurses.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources in line with the Australian Nursing and Midwifery Accreditation Council's Standards
- modelling of industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must hold current registration as a registered nurse with Nursing and Midwifery Board of Australia.

HLTENN003 Perform clinical assessment and contribute to planning nursing care

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minimal change to knowledge evidence. Supersedes HLTEN503B

Application

This unit of competency describes the skills and knowledge required, within the scope of practice, to perform preliminary and ongoing physical health assessments of all body systems, gathering data that contributes to a person's individualised health care plan.

This unit applies to enrolled nursing work carried out in consultation and collaboration with registered nurses, and under supervisory arrangements aligned to the Nursing and Midwifery Board of Australia regulatory authority legislative requirements.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Collect and interpret health data.	1.1 Introduce self and explain processes before commencing nursing assessment activities. 1.2 Gather information from the person, or their family or carer if the person is unable to communicate, using culturally

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	appropriate strategies. 1.3 Document the person's gender, age and cultural, religious or spiritual data when undertaking the preliminary health assessment. 1.4 Measure the person's vital signs using appropriate biomedical equipment according to the acuity of care and the person's physical characteristics. 1.5 Perform clinical measurements and assessments when undertaking the clinical nursing assessment, identifying the person's developmental state. 1.6 Record objectively the person's lifestyle patterns, health history, current health practices, coping mechanisms, issues and needs. 1.7 Clarify the emotional and physical needs of the family or carer in supporting the person. 1.8 Use critical thinking to interpret objective and subjective data from the assessment, and determine if the data is or is not within normal range. 1.9 Communicate immediately all deterioration concerns about the person to registered nurse.
2. Undertake admission and discharge procedures for a person.	2.1 Collect data from the person for admission and discharge planning as required by organisation policy and procedures. 2.2 Contribute to nursing assessment by documenting the person's values and attitudes regarding health care, and any issues they may be experiencing that may impact on a timely discharge. 2.3 Identify community support services and resources to assist in planning for discharge. 2.4 Ensure the person has all discharge planning requirements including General Practitioner appointment and any medications and referrals.
3. Contribute to planning the nursing care of a person.	3.1 Analyse a person's health history and clinical assessment to identify risks and likely impacts on activities of daily living, and the health care that is required. 3.2 Outline a plan of care using a problem-solving approach and ensuring strategic care planning appropriate to the person's

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	needs. 3.3 Clarify and reflect the person's interests and physical, emotional and psychosocial needs in care planning and documentation.
4. Contribute to ongoing development of individual nursing care plans.	4.1 Analyse, using critical thinking, the rationale for specific decisions and the course of action taken in the person's nursing care plan. 4.2 Confirm with the person, family or carer that planned nursing care provided reflects the person's needs including their uniqueness, culture, religious beliefs and management of stress. 4.3 Ensure nursing care plan is based on principles of best practice and risk assessment. 4.4 Raise with the registered nurse or interdisciplinary health care team any conflicts between the nursing care plan and an already prescribed plan of care for the person.

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTENN003 Perform clinical assessment and contribute to planning nursing care

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minimal change to knowledge evidence. Supersedes HLTEN503B

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- undertaken nursing work in accordance with Nursing and Midwifery Board of Australia professional practice standards, codes and guidelines
- performed nursing admission and discharge procedures for 2 different people in the workplace as per organisation policy and procedures
- conducted holistic clinical health assessment on 2 different people in the workplace or in a simulated environment including:
  - blood glucose monitoring
  - oxygen saturation level
  - body mass index (BMI) or waist hip ratio
  - integumentary assessment
  - urinalysis
  - neurological observations including reflexes
  - neurovascular observations and assessment of peripheral circulation
  - pain assessment (including chest pain)
- developed at least 1 nursing care plan in the workplace or in a simulated environment based on holistic health assessment undertaken with a real person.

© Commonwealth of Australia, 2025 HumanAbility

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- admission and discharge planning processes and documentation required
- developmental stages of childhood:
  - physical growth and psychosocial, cognitive and motor development of the toddler and the pre-school and school aged child
  - physical growth and cognitive and motor development of infants 0-12 months
  - role of play in a child's development
  - impact of hospitalisation on child and family
- developmental stages of adolescence and common health issues for adolescents
- developmental stages of adulthood and major activities related to each stage
- impact of infertility on people
- approaches to understanding human growth and development
- influences of genetics and environment on development
- family health care needs
- gender-specific health care needs
- how to use equipment for health assessment and data collection
- how to assist a person in activities of daily living including identified aids to assist these activities
- how to perform clinical measurements and/or assessments for:
  - blood glucose level
  - blood pressure
  - body mass index or waist hip ratio
  - height and weight
  - level of consciousness
  - pupil reaction
  - neurological reflexes
  - peripheral circulation
  - sensory perception and identified personal aids and devices required for hearing or sight
  - skin colour, integrity and turgor
  - temperature, pulse, respirations
  - urinalysis
- human growth and development
- interpretation and analysis of a person's health-related information
- principles of health assessment
- problem solving strategies and techniques for conducting health assessment
- how to recognise a deteriorating patient and determine levels of consciousness
- how and when to raise issues of concern about a person's deterioration

© Commonwealth of Australia, 2025 HumanAbility

- resources for the Core Standards for nurses who support people with a disability (NSW Family and Community Services)
  - Person Centred Health Care Assessments and the Development of Health Care Plans Core Standard for Practitioners
  - Mealtime Management for Nurses Practice Package
- wellness approach to health, including physiology and psychosocial aspects
- variations in health needs and activities of daily living across the person's lifespan.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment as specified in the performance evidence. The following conditions must be met for this unit:

- using suitable facilities, equipment and resources in line with the Australian Nursing and Midwifery Accreditation Council's Standards including:
  - appropriate biomedical equipment to undertake measurement or monitoring of vital signs and BMI
  - neurological assessment tools
  - urinalysis test strips
  - oximeter
  - blood glucose monitoring device and test strips
  - scenario based nursing care plans, charts and progress notes used for simulation
  - data collection instruments
  - organisation policy and procedures on which the candidate bases the planning process
- modelling of industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must hold current registration as a registered nurse with Nursing and Midwifery Board of Australia.

HLTENN004 Implement, monitor and evaluate nursing care plans

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minimal change to knowledge evidence. Supersedes HLTEN504C

Application

This unit describes the skills and knowledge required to implement nursing care as outlined in a person's plan of care, evaluate outcomes of care provided, record and report progress, and respond to an emergency situation.

This unit applies to enrolled nursing work carried out in consultation and collaboration with registered nurses, and under supervisory arrangements aligned to the Nursing and Midwifery Board of Australia regulatory authority legislative requirements.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare a person for care procedures.	1.1 Explain the procedures, preparation required and timeframe involved and gain the person's consent. 1.2 Maintain the person's privacy and dignity and use a culturally appropriate approach during preparation and

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	procedures.
2. Implement care procedures to meet identified needs.	2.1 Assist the person to address their personal and oral hygiene and their dressing and grooming needs in achieving health outcomes. 2.2 Identify contributing factors and implement appropriate strategies to prevent and manage skin breakdown. 2.3 Confirm the person's nutritional and elimination needs and apply strategies to meet identified needs. 2.4 Assist the person's respiratory function by demonstrating and promoting deep breathing and coughing exercises. 2.5 Use appropriate measures to promote the person's comfort, rest and sleep. 2.6 Actively encourage the person to contribute to their own independence and mobility through active and passive exercises. 2.7 Identify and respond appropriately to signs and symptoms of an emergency situation or condition. 2.8 Use emergency codes correctly and initiate basic life support according to organisation policy and procedures.
3. Monitor a person's identified care needs.	3.1 Maintain ongoing assessment of the person through observation and by using monitoring equipment and devices. 3.2 Prioritise work activities to address the person's urgent needs, maintaining a balanced approach to own workload. 3.3 Record and report concerns in the person's condition or behaviour to the registered nurse, and report situations of risk according to organisation policy and procedures.
4. Evaluate outcomes of care provided.	4.1 Consult and collaborate with interdisciplinary team to identify and evaluate own contributions to the person's care. 4.2 Evaluate the person's progress towards planned

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	outcomes as documented in the care plan.
	4.3 Make required changes to nursing care plan in line with best practice in nursing.
	4.4 Record and report all aspects of the evaluation of nursing care provided.

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTENN004 Implement, monitor and evaluate nursing care plans

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minimal change to knowledge evidence. Supersedes HLTEN504C

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- undertaken work in in accordance with Nursing and Midwifery Board of Australia professional standards of practice, codes and guidelines
- implemented and monitored at least 2 different nursing care plans in the workplace
- evaluated at least 1 nursing care plan in the workplace or in a simulated environment
- used emergency codes and performed basic life support in a simulated environment on an adult, child and infant manikin according to organisation policy and procedures.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- activities of daily living
- factors that promote and impede comfort, sleep and rest
- purpose of hygiene and grooming
- actual and potential nursing care including:
  - hygiene and toileting
  - elimination needs, including procedures used to assist with elimination
  - incontinence management, including aids or devices

© Commonwealth of Australia, 2025 HumanAbility

  - physical comfort
  - sleep disturbances
  - oral hygiene including:
    - teeth brushing
    - care of dentures
    - using alcohol-free mouthwash
    - interdental cleaning
  - immobility
  - respiration and circulation
  - fluid and nutritional deficits
  - pain
  - underlying medical condition
  - sensory deficits, including use of personal aids and devices
  - cognitive deficits
- basic life support including:
  - how to perform cardiopulmonary resuscitation (CPR)
  - use of and response to emergency codes
  - considerations when providing basic life support including
  - airway obstruction due to body position
  - appropriate duration and cessation of CPR
  - appropriate use of an Automatic External Defibrillator (AED)
- risk identification related to episodic care:
  - age
  - anaesthesia and surgery
  - cognitive status
  - deep vein thrombosis, venous thromboembolism, pulmonary embolism
  - immobility
  - length of stay
  - mental health condition
  - non-compliance
  - nutritional status
  - pain
  - presence of morbidity
- risk prevention strategies including:
  - maintaining a safe environment
  - preventing falls and falls assessment
  - promoting active and passive exercises
  - promoting deep breathing and coughing exercises
  - maintaining skin integrity and pressure area care

© Commonwealth of Australia, 2025 HumanAbility

- recording and reporting requirements for comprehensive clinical handovers and case meetings.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment as specified in the performance evidence. The requirement of the performance evidence to implement and monitor at least 2 different nursing care plans in the workplace must have been demonstrated in simulation before being demonstrated in the workplace and with members of the public. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources in line with the Australian Nursing and Midwifery Accreditation Council's Standards, including:
  - simulation manikins for adult, child and infant suitable for demonstration of life support skills
  - defibrillator or AED
  - lifting equipment used to manage risks involved in moving and positioning a person
  - equipment used in deep breathing and coughing exercises
  - equipment used in active and passive exercises
  - risk prevention documentation, nursing care plans and progress notes used in the planning of nursing care
- modelling of industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must hold current registration as a registered nurse with Nursing and Midwifery Board of Australia.

HLTENN005 Contribute to nursing care of a person with complex needs

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria New evidence requirements for assessment, including volume and frequency requirements Significant change to knowledge evidence Supersedes HLTEN505C

Application

This unit of competency describes the skills and knowledge required to provide clinical nursing skills for a person with complex needs and to contribute to complex nursing interventions using critical thinking and problem-solving.

This unit applies to enrolled nursing work carried out in consultation and collaboration with registered nurses, and under supervisory arrangements aligned to the Nursing and Midwifery Board of Australia regulatory authority legislative requirements.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Perform nursing interventions to assist a person with complex	1.1 Perform nursing interventions based on the person's predetermined plan of care.

© Commonwealth of Australia, 2025 HumanAbility

needs.	1.2 Undertake nursing interventions demonstrating respect for the person's dignity and cultural diversity. 1.3 Encourage the person to assist by undertaking aspects of their own care during care interventions. 1.4 Consider the person's physical, emotional and psychosocial needs when performing nursing interventions.
2. Contribute to the nursing care of people with common disorders and conditions	2.1 Provide nursing care to the person appropriate to the management of complex conditions. 2.2 Observe, report and document the person's reactions and responses to the provided care management and medication. 2.3 Refer promptly to the registered nurse any reactions, responses or variations from the normal or unexpected outcomes, including concern for the deteriorating person.
3. Use critical thinking to improve care quality.	3.1 Monitor own thinking constantly in relation to own clarity, precision, accuracy, consistency, logic and significance of care, in order to correct oneself when appropriate in the context of caring for a person. 3.2 Identify possible nursing interventions for a person with complex needs, based on health information and clinical presentation. 3.3 Raise the issue with the registered nurse where the nursing interventions are at odds with an already prescribed course of action by multidisciplinary team. 3.4 Explain clearly the reasoning behind specific decisions and actions being taken in the context of the health care of the person. 3.5 Identify areas for quality improvement including to organisation processes in the care of a person with complex needs.

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

© Commonwealth of Australia, 2025 HumanAbility

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Assessment Requirements for HLTENN005 Contribute to nursing care of a person with complex needs

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria New evidence requirements for assessment, including volume and frequency requirements Significant change to knowledge evidence Supersedes HLTEN505C

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- undertaken nursing work in accordance with Nursing and Midwifery Board of Australia professional standards of practice, codes and guidelines
- analysed, planned and evaluated the health care of 3 people using health information and clinical presentation to determine possible nursing interventions, in consultation with a registered nurse in the workplace
- performed interventions in the workplace or in a simulated environment, specific to care of a person with complex needs including:
  - monitoring of neurological observations to recognise a deteriorating person
  - recording of 12 lead electrocardiogram (ECG)
  - removal of indwelling catheter
- emptied and changed 1 urinary drainage bag in the workplace.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

© Commonwealth of Australia, 2025 HumanAbility

- common disorders and conditions, and the correct terminology for:
  - musculoskeletal disorders and conditions
  - skin disorders and conditions
  - cardiovascular disorders and conditions
  - respiratory system disorders and conditions
  - gastrointestinal disorders and conditions
  - ear disorders and conditions
  - eye disorders and conditions
  - nervous system disorder
  - endocrine disorders and conditions
  - urinary system disorders and conditions
  - reproductive system disorders and conditions
- diagnostic tests for diagnosis of common conditions and disorders of body systems including:
  - incentive spirometry and peak flow
  - recording a 12 lead electrocardiogram (ECG)
  - monitoring oxygen saturation levels
- collecting specimens other than blood
- how to perform the following nursing interventions:
  - assisting a person to don anti-embolic stockings
  - caring for drainage tube systems associated with tubes and drains inserted into the body
  - emptying and changing ostomy bag
  - emptying and changing a urinary drainage bag
  - providing care of suprapubic catheter
  - inserting and removing indwelling catheters (IDC) including insertion for male and female genitourinary anatomy
  - applying isolation nursing practices
  - inserting and removing nasogastric tubes (NG)
  - feeding through nasogastric tubes (NG) and percutaneous feeding tube
- mediation, negotiation and conflict resolution as associated with nursing intervention principles for recognising a deteriorating person
- referral options and resources available in community and health care settings
- critical thinking, including its characteristics and the differences between critical thinking, creative thinking and problem-solving
- resources for the Core Standards for nurses who support people with a disability (NSW Family and Community Services)
  - Working with People with Chronic and Complex Health Care Needs
- nursing interventions associated with reproductive and urinary system disorders and conditions including conditions which require a bladder washout.

© Commonwealth of Australia, 2025 HumanAbility

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment as specified in the performance evidence. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources in line with the Australian Nursing and Midwifery Accreditation Council's Standards including:
  - 12 lead ECG monitoring device
  - neurological assessment equipment
  - organisation policy and procedures on which the candidate bases the planning
- modelling of industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must hold current registration as a registered nurse with Nursing and Midwifery Board of Australia.

HLTENN006 Apply principles of wound management in the clinical environment

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minimal change to knowledge evidence. Supersedes HLTEN506B

Application

This unit describes the skills and knowledge required to apply contemporary wound management principles to the care of various types of wounds. It involves working with the interdisciplinary health care team to contribute to assessment, treatment and ongoing management of a person's wounds.

This unit applies to enrolled nursing work carried out in consultation and collaboration with registered nurses, and under supervisory arrangements aligned to the Nursing and Midwifery Board of Australia regulatory authority legislative requirements.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Apply protocols for wound assessment.	1.1 Use appropriate medical terminology when assessing, reporting and recording data on wounds. 1.2 Use strategies to minimise cross-infection during

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	assessment and implementation of wound management strategies. 1.3 Observe orders and instructions relating to non-disturbance of dressings.
2. Assess impact of wound on a person, family or carer.	2.1 Assist in performing holistic assessment of the person with a wound. 2.2 Apply knowledge of the physiological and biochemical processes associated with normal wound healing when assessing the person's wound. 2.3 Consider factors that impact on wound healing, including psychosocial impact of a wound on the person's daily living activities. 2.4 Consider common problems and complications of wounds when assessing the person's wound. 2.5 Discuss modes of transmission of infection and infection development with the person, family or carer.
3. Contribute to planning care for a person with a wound.	3.1 Consider primary health care principles and holistic approaches when planning care for the person with a wound. 3.2 Access wound care experts to assist in decision-making for wound care management. 3.3 Maintain current knowledge and use an evidence-based and problem-solving approach in contributing to analysis and planning of appropriate wound care management strategies. 3.4 Contribute to an individual wound management plan for the person in consultation and collaboration with the person, registered nurse and the interdisciplinary health care team. 3.5 Discuss preventative wound care strategies with the person, family or carer. 3.6 Identify the person's comfort needs such as pain relief in consultation with registered nurse before undertaking wound care.
4. Undertake clinical nursing	4.1 Use contemporary assessment tools accurately.

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
care in implementing wound care strategies.	4.2 Implement wound care strategies, taking into account legislation and organisation policy and procedures. 4.3 In consultation and collaboration with the interdisciplinary health care team, identify wound management products and techniques appropriate to the identified phase of wound healing, and collect all resources required for the procedure. 4.4 Collect specimens required for microbiology and cytology according to organisation policy and procedures. 4.5 Dispose of all articles including hazardous waste appropriately according to organisation policy and procedures. 4.6 Make the person comfortable, and complete required documentation.
5. Apply contemporary wound management strategies to complex or challenging wounds.	5.1 Apply knowledge of wound complexity and the pathological processes of wound healing for complex or challenging wounds 5.2 Identify common problems and complications of complex and challenging wounds. 5.3 Follow aseptic technique for a clean surgical wound and use infection prevention techniques appropriate to the type of wound. 5.4 Remove sutures, clips and drains from a person and replace wound drainage bag as directed by a registered nurse. 5.5 Implement appropriate contemporary wound management strategies to manage the person’s complex or challenging wounds. 5.6 Participate with the interdisciplinary health care team in making an assessment of the person with a complex or challenging wound within an holistic framework. 5.7 Create and review individualised plans of care for the person with a complex or challenging wound.
6. Assist in evaluating outcomes of nursing actions.	6.1 Ensure involvement of the person in the evaluation process. 6.2 Monitor the person’s response to wound management strategies, and their progress towards planned wound

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	management goals.
	6.3 Evaluate, document and communicate progress of wound healing and wound care strategy outcomes to the appropriate members of the interdisciplinary health care team using contemporary terminology.
	6.4 Assist in assessing effectiveness of the person's wound management strategies and products used.
	6.5 Modify wound management strategies, procedures and goals for the individual person.
	6.6 Work within a cost effective framework.
	6.7 Identify and plan health education and promotion strategies for the person in consultation and collaboration with the registered nurse.

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTENN006 Apply principles of wound management in the clinical environment

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minimal change to knowledge evidence. Supersedes HLTEN506B

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- undertaken nursing work in accordance with Nursing and Midwifery Board of Australia professional practice standards, codes and guidelines
- performed wound care management, including wound assessment, health education and evaluation of the person's wound care in the workplace on 3 wounds, of which at least 1 must involve a simple wound dressing and at least 1 must involve a complex wound dressing.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- National Safety and Quality Health Service (NSQHS) Standards
- chain of infection
  - infection transmission
  - defences
  - immunity and host factors
  - compliance with current infection control practices and guidelines

© Commonwealth of Australia, 2025 HumanAbility

- community and educational resources and professional organisations associated with wound management
- historical development of contemporary wound management strategies
- pain management and medication administration timeframes appropriate to wound care
- causes of wounds:
  - micro-organisms
  - common fungal infections
  - common viral infections
- organisation policy and procedures for wound care
- wound management terminology
- wound management techniques including:
  - wound debridement
  - wound drains and wound drainage systems
  - wound specimen collection
  - interpreting laboratory results in consultation with registered nurse or interdisciplinary team
  - doppler assessment
  - compression therapy
  - wound cleansing techniques
  - wound measurement
  - clinical photography
  - wound tracing
- acute and chronic wounds including:
  - surgical wounds
  - pressure ulcers
  - venous ulcers
  - arterial ulcers
  - mixed ulcers
  - discharging wounds
  - malignant wounds
  - neuropathic ulceration wounds
  - infected wounds
  - burns
  - fistulas and sinuses
  - skin grafts
  - visceral wounds
- wound management strategies including:
  - wound management principles
  - moist wound healing
  - holistic assessment

  - individualised wound management plan of care
  - problem solving framework
  - skin assessment
  - risk assessment
  - pressure support and relieving devices
  - prevention programs
  - wound characteristics
  - visceral wound management
- selection of wound products including:
  - primary dressing
  - secondary dressing
  - wound cleansing
- comfort needs of people with wounds such as the need for pain management and relief.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment as specified in the performance evidence. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources in line with the Australian Nursing and Midwifery Accreditation Council's Standards including:
  - wound care manikins
  - wound care products
  - dressing packs
  - standard precautions and personal protective equipment (PPE)
  - information and documentation such as wound care plans on which the candidate bases the planning process
- modelling of industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must hold current registration as a registered nurse with Nursing and Midwifery Board of Australia.

HLTENN007 Administer and monitor medicines and intravenous therapy

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Merged with HLTEN507C and HLTEN519C. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to administer and monitor medications and intravenous (IV) therapy including calculating dosage requirements, interpreting written instructions from an authorised prescriber, assessing the person for medication effectiveness and side effects, and responding to an allergic pharmacological reaction.

This unit applies to enrolled nursing work carried out in consultation and collaboration with registered nurses and under supervisory arrangements aligned to the Nursing and Midwifery Board of Australia regulatory authority legislative requirements.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Minimise potential risk to ensure safe administration of	1.1 Refer to drugs and poisons schedules and classifications as determined by law.

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
medications.	1.2 Identify the purpose and function of prescribed medicine and intravenous (IV) therapy. 1.3 Identify pharmacology and substance incompatibilities in relation to specific situations involving medication administration, blood and blood products.
2. Prepare for medication administration and infusion of IV fluids.	2.1 Explain the process of medication administration or IV fluid infusion to the person, and ensure their readiness and understanding. 2.2 Identify correct administration route or site for each medication or IV fluid to be administered, and position the person appropriately. 2.3 Consider the effect of commonly used medications and IV fluids on the body before medication administration and IV infusion. 2.4 Calculate accurate dosages and IV infusion rates for administration of drugs. 2.5 Prepare medications in accordance with legislative and jurisdictional requirements and organisation policy and procedures. 2.6 Identify medication administration techniques and precautions specific to the person’s situation and as per medication orders. 2.7 Prepare blood and blood products for blood transfusions according to organisation policy and procedures.
3. Administer and store medication.	3.1 Administer medication or IV fluid to the person applying the ‘Rights of Medication’ concept and in accordance with the jurisdictional and legislative requirements and organisation policy and procedures. 3.2 Secure medications in a safe manner during medication administration. 3.3 Apply quality practices in management and use of medications, and undertake risk assessment practices that

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	relate to medication administration.
	3.4 Report to the registered nurse a person's refusal of medication or IV therapy or suspected incomplete medication ingestion.
	3.5 Ensure medication and blood and blood products are stored, handled and disposed of according to organisation policy and procedures and manufacturers' instructions.
4. Monitor and evaluate a person's response to administered medication, IV fluids and blood and blood products.	4.1 Document and monitor observations of the person's response and whether intended outcome of administered medications, IV fluids and blood and blood products is achieved.
	4.2 Recognise, record and report acute and delayed adverse reactions of the person to medications, and implement emergency actions within own role responsibility.
	4.3 Record, report and evaluate fluid and electrolyte imbalances, and monitor the effect on the person of medicines commonly administered with IV fluids.
	4.4 Remove IV cannula according to organisation policy and procedures
	4.5 Provide educative information to the person, their family or carer concerning the administration of medicines including possible side effects.
5. Assess effectiveness of pain-relieving therapy.	5.1 Observe and question the person to identify signs of pain or discomfort.
	5.2 Clarify the location and nature of pain or discomfort, taking into account factors that may influence the person's perception of pain.
	5.3 Ensure consistency in interpreting observations and evaluating the person's pain using the pain assessment scale.
	5.4 Identify a range of prescribed medications and complementary strategies that may assist in alleviating pain and discomfort.

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	5.5 Assess and manage effectiveness of pain-relieving medication and non-medication therapies for the person experiencing pain.
	5.6 Record observations of the person and own evaluation the effectiveness of pain management strategies.

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTENN007 Administer and monitor medicines and intravenous therapy

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Merged with HLTEN507C and HLTEN519C. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- undertaken nursing work in accordance with Nursing and Midwifery Board of Australia professional practice standards, codes and guidelines
- calculated medications with 100% accuracy and used the ‘Rights of Medication’ to administer medication to at least 2 people in simulation and at least 3 people in the workplace, and which must include the following routes:
  - oral
  - sub-cutaneous injection
- calculated medications with 100% accuracy and used the ‘Rights of Medication’ to administer medication in the workplace or in a simulation environment to at least 2 people, and which must include the following routes:
  - intramuscular injections
  - peripheral IV injection
- safely prepared equipment for IV therapy and blood and blood products administration, and monitored IV therapy and blood and blood products administration in the workplace or in simulated environment to at least 2 people including assessing cannula site.

© Commonwealth of Australia, 2025 HumanAbility

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal requirements for practice parameters of enrolled nurse in relation to the administration and documentation of medications, including legal requirements for each route of administration
- legal and regulatory framework including
  - health (drugs and poisons) regulations
  - State/Territory drugs and poisons Acts
  - State/Territory nurse regulatory authority codes and guidelines
  - National Safety and Quality Health Standard (NSQHS) 'Preventing and Controlling Health Care Associated Infections'
  - Visual Infusion Phlebitis Score (VIPS)
  - scheduled medications and interpretation of scheduling of medications - Schedule 2, Schedule 3, Schedule 4, Schedule 8
- forms of medication and how they are handled, calculated, administered and stored, including:
  - capsules
  - drops
  - inhalants
  - liquid
  - lotions and creams
  - ointments
  - patches
  - powders
  - tablets
  - wafers
  - suppositories
- pharmacology of medications, including:
  - pharmacodynamics
  - pharmacokinetics
  - pharmacotherapeutics
  - toxicology
  - anaphylactic reactions
  - adverse reactions
  - contraindications
  - precautions
  - side effects
- potential complications of blood transfusion including:

  - pain at IV site and arm
  - loin pain
  - urticaria (hives)
  - nausea and vomiting
  - headache
  - flushing, chills or fever
  - anxiety
  - tachycardia
  - wheezing, progressing to cyanosis
  - haematuria
  - anaphylactic reaction or shock
  - cardiac arrest
  - death
- how to transport, store, handle, check and dispose blood and blood products safely
- 'Rights of medication' - the right medication (drug, medication, medicines), right dose, right prescription (documentation), right route, right time, right person, right expiration date, right to refuse
- how medication is administered via the following routes or methods:
  - oral
  - sublingual, buccal
  - dry powder inhalers
  - metered dose, spacer inhalers
  - nebulisers
  - oxygen therapy
  - subcutaneous injection
  - intramuscular injections
  - IV injections
  - Z-track injections
  - peripheral IV infusion, cannulation fluid
  - enteral administration - Percutaneous Gastrostomy (PEG) as well as nasogastric tubes
  - intranasal, including nebulised medications
  - ocular
  - rectal
  - subcutaneous, intramuscular routes
  - sub-cutaneous injection using pre-loaded syringes or pens
  - topical, including transdermal
  - vaginal
  - ventrogluteal injection technique
- IV medication administration methods including:
  - bolus

© Commonwealth of Australia, 2025 HumanAbility

- gravity
- electronic pump infusion
- via burette
- IV piggyback, tandem
- syringe driver
- sub-cut lines

- pathophysiology related to medicine groups including but not limited to:

Anaesthetics Analgesia Antacids Antianginals antianxiety Antiarrhythmics Antibiotics Anticholinergics Anticoagulants	Anticonvulsants Antidepressants Antidiarrhoeals Antiemetics Antifungals Antihistamines Antihypertentives Anti-inflammatory
Antineoplastics Antiparkinsonion Antipruritic Antipsychotics Antiseptics Antiulcer Antivirals Anxiolytics	Hormones Hypnotics, sedatives Hypoglycaemics Insulin
Beta-blockers Bronchodilators	Electrolyte solutions
Laxatives/aperients	Ophthalmic, otic nasal medications
Contraceptives Corticosteroids	Diuretics
Narcotic analgesia Neuroleptics	Vitamins

© Commonwealth of Australia, 2025 HumanAbility

- factors to consider when calculating medication dosages including:
  - calculation formulae
  - calculation of dosages of injectable drugs including liquid, solid unit dosages
  - flow rate drops per minute
  - flow rate millilitres per hour
  - paediatric dosage calculations - considering body weight, surface area and age-related dose reduction
  - geriatric dosage calculations - considering body weight, surface area and age
  - dose administration aids (DAAs) where dose is already calculated
- organisation policy and procedure for addressing medication errors
- drugs commonly used for fluid and electrolyte imbalance:
  - acidifiers, alkalisers
  - diuretics
  - electrolytes
  - replacement solutions.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment as specified in the performance evidence. The requirement of the performance evidence to calculate medication with 100% accuracy and used the ‘Rights of Medication’ to administer medication must be demonstrated using simulation before being demonstrated in the workplace and with members of the public. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources in line with the Australian Nursing and Midwifery Accreditation Council’s Standards including:
  - simulation manikins appropriate for the administration of medications via various routes including IV
  - equipment for medication administration via various routes, including:
    - pill cutter and pill crusher
    - nebuliser
    - Monthly Index of Medical Specialties (MIMS)
  - samples of medications, including:
    - tablets
    - capsules
    - drops
    - enema
    - inhalants
    - liquid (ampoules, bottles, capsules)
    - lotion and cream

© Commonwealth of Australia, 2025 HumanAbility

    - ointments
    - patches
    - powders
    - wafers
    - suppositories
    - pre-loaded sub-cutaneous injections
  - pharmacology resources for medication interactions
  - equipment for IV therapy, including:
    - variety of IV line sets for gravity infusion, blood and blood products, IV injections and electronic pump infusions
    - syringe pump
  - information and documentation such as medication charts on which the candidate bases the planning
  - organisation policy and procedures on which the candidate bases the planning
- modelling of industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must hold current registration as a registered nurse with Nursing and Midwifery Board of Australia.

HLTENN008 Apply legal and ethical parameters to nursing practice

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Supersedes HLTEN509B

Application

This unit describes the skills and knowledge required to within work legal and ethical parameters in professional nursing practice, including supporting rights and meeting duty of care requirements.

This unit applies to enrolled nursing work carried out in consultation and collaboration with registered nurses, and under supervisory arrangements aligned to the Nursing and Midwifery Board of Australia regulatory authority legislative requirements.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Perform within scope of professional nursing practice.	1.1 Identify legal and regulatory requirements including Acts and guidelines, and explain how these requirements impact own nursing practice. 1.2 Comply with requirements of current legislation

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	related to nursing practice and identify implications of non-compliance.
	1.3 Apply codes of ethics, codes of conduct and the content of enrolled nurse competency standards for practice in own nursing practice.
	1.4 Function within the scope of jurisdictional requirements for enrolled nurse practice.
	1.5 Respond to each person in accordance with organisation policy and procedures, including responding appropriately and sensitively to complaints.
	1.6 Refer outside requests for a person's information to a registered nurse.
	1.7 Complete all documentation in accordance with State/Territory legislation and organisation policy and procedures.
	1.8 Monitor own compliance with legal obligations and requirements.
2. Apply knowledge of the legal framework to nursing practice.	2.1 Demonstrate knowledge of relevant law, including legal processes, principles and penalties in own nursing practice.
	2.2 Accurately apply concepts of negligence, duty of care and vicarious liability to professional practice as an enrolled nurse.
	2.3 Obtain required consent to treatment from each person before undertaking treatment or processes.
	2.4 Apply principles of restraint appropriately, demonstrating the correct intent and application of restraint.
	2.5 Use correct common legal terms associated with nursing practice, and correctly interpret their meaning and implications for nursing practice.
	2.6 Apply legal requirements and organisation expectations and requirements in writing reports in own nursing practice.
	2.7 Apply mandatory reporting processes in line with

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	jurisdictional requirements.
	2.8 Observe the person's privacy and confidentiality requirements in accordance with legislative requirements and organisation policy and procedures.
	2.9 Interpret referrals or requests for tests on receipt, ensuring the nature and requirements of tests are correctly identified, and seek clarification where required.
3. Apply ethical concepts to clinical practice.	3.1 Identify and describe the concept of ethics and its place in nursing practice.
	3.2 Demonstrate ethical practice in own interactions with the person and their family or carers and colleagues.
	3.3 Maintain own awareness of contemporary ethical issues and potential conflicts of interest that may impact nursing practice.
	3.4 Identify, document and report potential ethical issues in accordance with organisation policies and procedures.
	3.5 Develop and implement strategies to resolve ethical issues within own nursing practice in accordance with role parameters.
4. Support the rights, interests and needs of the person and their family.	4.1 Comply with legal responsibilities and duty of care requirements in all care activities and other interactions with the person, their family and carer.
	4.2 Support the person's rights, interests and decisions.
	4.3 Encourage the person to exercise their right to make informed decisions about their care.
	4.4 Demonstrate respect and support for the dignity of the person and their family members.
	4.5 Advocate for the person, their family or carer in accordance with jurisdictional enrolled nurse scope of practice.
5. Apply open disclosure processes.	5.1 Research and reflect on the practice of open disclosure and how it applies to own role as an enrolled

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	nurse.
	5.2 Apply the principles and processes of open disclosure in own work in a health care environment.
	5.3 Identify the roles of other health care workers in relation to open disclosure.

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTENN008 Apply legal and ethical parameters to nursing practice

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Supersedes HLTEN509B

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- undertaken nursing work in accordance with Nursing and Midwifery Board of Australia professional practice standards, codes and guidelines
- demonstrated, through involvement in 2 specific documented situations in the workplace, the ability to work within the legal and ethical parameters that apply to professional nursing practice.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations (national, State/Territory, local) relevant to the nursing profession, and how these are applied in nursing practice:
  - children in the workplace
  - 'Code of ethics for nurses in Australia' and the 'Code of professional conduct for nurses' (Nursing and Midwifery Board of Australia)
  - codes of practice
  - continuing professional education opportunities
  - discrimination - direct and indirect - and its implications

- duty of care
- equal employment opportunity (EEO)
- human rights including access to healthcare
- informed consent
- insurance requirements including professional indemnity insurance arrangements for enrolled nurses
- life and death issues:
  - power of Attorney
  - living wills and advanced directives
  - guardianship
- mandatory reporting
- Nursing and Midwifery Board of Australia nursing practice guidelines, standards and fact sheets:
  - enrolled nurse competency standards for practice
  - professional boundaries
  - professional practice guidelines
  - decision-making framework (DMF) including the nursing flowchart
  - re-entry to practice
  - registration guidelines
  - recency of practice fact sheet
- privacy, confidentiality and disclosure
- policy frameworks for nursing practice
- social media policy and the potential implications this has on ethics, professionalism and nursing in the health care environment
- specific Commonwealth and State/Territory legislation and legal provisions that affect the development of nursing programs and provision of services and procedures, including but not limited to:
  - *Health Practitioner Regulation National Law Act* (the National Law) enacted in each State/Territory
  - National Safety and Quality Health Service (NSQHS) Standards
  - health (drugs and poisons) legislation
  - mental health legislation
  - *Privacy Act 1988* (Cwlth)
  - *Health Records Act 2012* (Cwlth)
  - *Aged Care Act 1997* (Cwlth)
  - carers recognition legislation
  - *Criminal Code Act 1985* (Cwlth)
  - *Disability Discrimination Act 1992* (Cwlth) and other anti-discrimination legislation
  - children and young people legislation enacted in each State/Territory
  - working with children legislation as enforced in each State/Territory

© Commonwealth of Australia, 2025 HumanAbility

    - workplace health and safety (WHS) legislation
  - role of the Nursing and Midwifery Board of Australia in regulating the nursing profession
  - ethical decision making models
  - contemporary ethical concepts and principles in nursing:
    - autonomy
    - beneficence and non-maleficence
    - confidentiality
    - justice
    - rights
    - veracity
- application of ethical principles to enrolled nurse practice, including:
  - definitions of ethics, bioethics and nursing ethics
  - theoretical concepts informing ethical conduct
  - ethical issues, for example in relation to:
    - abortion
    - tissue transplantation
    - reproductive technology
    - organ donation
    - euthanasia and assisted suicide
    - restraint
    - open disclosure
    - mandatory reporting
    - quality of life
    - conscientious objection
    - abuse
    - consent
    - artificially prolonging life
    - refusal and withdrawal of treatment
    - stem cell research
    - ‘not for resuscitation’ orders
    - cultural and religious matters
- application of the law to enrolled nurse practice including:
  - Law - civil, common and statute law, the court system, precedents, sources
  - Law of torts - negligence, trespass, assault and battery, types of consent, valid consent, legal and intellectual, capacity, clinical incapacity, false imprisonment and defamation
  - Common legal terms - vicarious liability, defendant, plaintiff, harassment, expert witness, coronial inquests, functions of the coroner, giving evidence to the coroner.

© Commonwealth of Australia, 2025 HumanAbility

Assessment Conditions

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations cannot be provided in the workplace. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources in accordance with the Australian Nursing and Midwifery Accreditation Council's Standards including:
  - access to information system where a person's health information is stored and recorded
  - access to health legislation, regulations and plain English information on the legal and ethical parameters applied to nursing practice and on which the candidate's planning is based
- modelling of industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must hold current registration as a registered nurse with Nursing and Midwifery Board of Australia.

HLTENN009 Implement and monitor care for a person with mental health conditions

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minimal change to knowledge evidence. Supersedes HLTEN510B

Application

This unit describes the skills and knowledge required to contribute to the nursing care and management of a person with a mental health condition.

This unit applies to enrolled nursing work carried out in consultation and collaboration with registered nurses, and under supervisory arrangements aligned to the Nursing and Midwifery Board of Australia regulatory authority legislative requirements.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify and address State/Territory mental health legislation requirements.	1.1 Identify and correctly interpret the key features of mental health legislation as they apply to own work practices and the health care setting. 1.2 Describe the values and philosophies that apply to mental health care.

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.3 Support the rights of the person with a mental health condition.
	1.4 Work in a manner that reflects the underpinning values and philosophies of mental health care and is consistent with legal obligations.
2. Respond appropriately to signs of mental illness.	2.1 Identify conditions relating to the mental state and behaviour of the person correctly, using broad classifications of mental illness and terms associated with mental health conditions.
	2.2 Recognise the signs and symptoms of mental health conditions and respond within the role of an enrolled nurse.
	2.3 Recognise biopsychosocial effects of mental health conditions.
	2.4 Recognise the impacts that discrimination, negative stereotyping and stigma can have on a person with mental illness, and ensure own interactions with the person are positive.
	2.5 Use negotiation skills as required with the person who has a mental health condition.
3. Contribute to care planning and conduct initial clinical observations for a person with a mental health condition.	3.1 Undertake a risk assessment of the person, using recognised risk assessment methodology and under supervision of a registered nurse.
	3.2 Participate in the interdisciplinary health care team and, within enrolled nurse role, assist to develop the plan of care for the person.
	3.3 Observe and document the person’s behaviour, and identify signs and symptoms of reduced physical health and changes to behaviour.
	3.4 Provide health promotion and educational strategies in accordance with organisation procedures when the person exhibits signs and symptoms of reduced physical health.
	3.5 Participate in interdisciplinary team meetings and liaise with service providers within enrolled nurse role to

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	ensure resources and approaches used in care planning meet individual or group needs.
	3.6 Apply recovery principles to nursing care with support from interdisciplinary team to maximise health outcomes for individuals and groups.
4. Contribute to the recovery of a person with a mental health condition.	4.1 Plan, prioritise and implement nursing interventions in collaboration with the person, registered nurse interdisciplinary health care team, and where appropriate, with the person's family or carer.
	4.2 Work in a manner that reflects respect for the person's dignity and uniqueness, and use strategies to empower the person to contribute to their own plan of care.
	4.3 Assist the person, their family or carer to participate in appropriate therapeutic interventions.
	4.4 Confirm that the person understands the use, administration methods and possible effects of medications to be used including known specific adverse effects.
	4.5 Advise the person, or their family or carer, on relevant community resources and opportunities, adapting the advice to individuals as required.
	4.6 Support the person, as a valued member of the community to build on their own strengths and to take as much responsibility as possible for decisions that affect their lives.
	4.7 Identify and apply principles of contemporary, evidenced-based nursing practice that reflect recovery-oriented care for a person who has a mental health condition.

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

© Commonwealth of Australia, 2025 HumanAbility

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTENN009 Implement and monitor care for a person with mental health conditions

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minimal change to knowledge evidence. Supersedes HLTEN510B

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- undertaken nursing work in accordance with Nursing and Midwifery Board of Australia professional practice standards, codes and guidelines
- analysed, planned and evaluated the health care of 2 people with a mental health condition, using health information and clinical presentation to reach a conclusion of possible nursing interventions appropriate to their mental health condition, and in consultation with a registered nurse in the workplace.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- application of nursing theory to a mental health context
- social, psychological, cognitive and physical factors associated with mental health conditions
- consumer and carer perspectives on mental health care
- impact of stigma, discrimination, culture and belief systems on a person with a mental health condition
- common mental health conditions by classification or disorder, and their treatment and management including:

© Commonwealth of Australia, 2025 HumanAbility

  - mood disorders
  - personality disorders
  - anxiety disorders
  - psychoses
  - organic disorders
  - panic disorder
  - social phobia and specific phobias
  - obsessive-compulsive disorder
  - post-traumatic stress disorder
  - depression
  - bipolar disorder
  - eating disorders
  - borderline personality disorder
  - schizophrenia
  - dementia
  - delirium
  - anxiety disorder
- appropriate response to a person in distress or crisis including:
  - applying appropriate communication skills with the person
  - identifying possible causal factors and addressing where possible
  - enlisting support and assistance from colleagues
- common behaviours associated with a range of mental health conditions, and the effect of behaviours on the person and others
- how to manage challenging behaviours including recognising triggers and deflecting them, using active listening and observation skills, ensuring effective communication and seeking expert assistance
- the principles of recovery in the mental health context
- national framework for recovery-orientated mental health services (Australian Government):
  - principles of recovery-oriented practice
  - evidence-based practice in the context of recovery
- key features of the mental health legislation including:
  - objectives
  - involuntary admission
  - consumer rights
  - involuntary review processes
  - seclusion and restraint
  - admission procedures
  - community treatment orders
  - role of the mental health practitioner
  - consent

© Commonwealth of Australia, 2025 HumanAbility

  - confidentiality
- definition of key terms associated with mental illness
- strategies for managing oral health issues and possible causes such as the side effects of medication, poor nutrition and reduced motivation for self-care.

Assessment Conditions

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations cannot be provided in the workplace. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources in line with the Australian Nursing and Midwifery Accreditation Council's Standards including
  - risk assessment tools appropriate to professional nursing practice
  - organisation policy and procedures on which the candidate bases the planning
- modelling of industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must hold current registration as a registered nurse with Nursing and Midwifery Board of Australia.

HLTENN010 Apply a palliative approach in nursing practice

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minimal change to knowledge evidence. Supersedes HLTEN511B

Application

This unit describes the skills and knowledge required to provide nursing care using a palliative approach in care environments such as hospitals, home and community care, hospices and long-term care facilities.

This unit applies to enrolled nursing work carried out in consultation and collaboration with registered nurses, and under supervisory arrangements aligned to the Nursing and Midwifery Board of Australia regulatory authority legislative requirements.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes of a unit of competency.	*The Performance Criteria specify the level of performance required to demonstrate achievement of the Element.*
1. Recognise the special needs of a person requiring a palliative approach to care.	1.1 Apply principles of palliative care and the palliative approach in undertaking holistic assessment of the person. 1.2 Apply knowledge of pathophysiological changes associated with a life-limiting illness and the needs of the

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes of a unit of competency.	*The Performance Criteria specify the level of performance required to demonstrate achievement of the Element.*
	person.
	1.3 Assess a person's pain management, and implement strategies to address pain and any medication-induced constipation in consultation with registered nurse.
	1.4 Identify and respect the person's needs in relation to their lifestyle, social context and emotional and spiritual choices, and document these in accordance with care plan.
	1.5 Identify and work within roles and responsibilities of the inter-disciplinary team when planning palliative care for the person.
	1.6 Apply in own practice an awareness of the psychosocial impact of palliative care on the person's family or carer.
2. Support person, family or carers using the palliative approach.	2.1 Provide the person, family or carer with opportunities to discuss spiritual and cultural issues in an open and non-judgmental manner.
	2.2 Use effective communication techniques and access relevant support services to provide a supportive environment for the person, family or carer.
	2.3 Monitor the person's condition and provide accurate and timely information on stages of dying to the person, family or carer, ensuring that information-provision respects their wishes.
	2.4 Identify and address legal and ethical implications of implementing advance care planning (ACP) and advance care directives (ACD).
3. Identify and respond to signs of deterioration and the stages of dying.	3.1 Apply knowledge of the physiology of dying in supporting the person, family or carer as they experience the person's dying process.
	3.2 Identify signs of respiratory and swallowing difficulties and implement management strategies in accordance with ACP or ACD.
	3.3 Address malignant wound management in accordance

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes of a unit of competency.	*The Performance Criteria specify the level of performance required to demonstrate achievement of the Element.*
	with the unique needs of non-healing wounds of a deteriorating person.
	3.4 Identify and report signs of the person's deterioration or imminent death in accordance with ACP or ACD.
	3.5 Support the dignity of the person when undertaking all care activities in their end-of-life stages as well as after their death.
	3.6 Identify and reflect on any ethical issues or concerns about the person, and discuss with an appropriate person according to organisation procedures.
4. Care for the person's body after death and provide support for the family and others.	4.1 Apply knowledge of legislation to own role and responsibilities when a person dies.
	4.2 Provide care of a person's body after death using standard precautions and in accordance with organisation policy and procedures.
	4.3 Ensure care of the person's body is carried out with dignity and respect, and that the person's individual customs, culture, religion, spiritual practices and choices are taken into account.
	4.4 Discuss support needs and resources including the accessibility and availability of resources with the family, carer or others requiring bereavement care.
	4.5 Provide emotional support to the person, family or carer in relation to grief, loss and bereavement.
5. Provide for own self-care in palliative care role.	5.1 Identify own need for self-care and support and implement effective ways to sustain own social and emotional wellbeing.
	5.2 Encourage self and colleagues to access support and, where indicated, participate in professional debriefing.

Assessment Requirements for HLTENN010 Apply a palliative approach in nursing practice

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minimal change to knowledge evidence. Supersedes HLTEN511B

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- undertaken nursing work in accordance with Nursing and Midwifery Board of Australia professional practice standards, codes and guidelines
- analysed health information and clinical presentation of 1 person to reach an accurate conclusion of possible palliative care planning and nursing interventions in consultation with a registered nurse
- provide nursing care using a palliative approach to 1 person in the workplace including performing nursing interventions with the person through the end-of-life stages and professional interactions with the family or carer.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- how to identify needs of the person, family or carers during the palliative approach to health care
- State/Territory legislation on advance care planning, advance care directives and notification of a death
- diverse cultural, religious and spiritual factors underpinning the persons choices at end-of-life

© Commonwealth of Australia, 2025 HumanAbility

- ethical and legal issues related to a palliative care approach including:
  - decisions regarding advance care directives
  - conflicts that may occur in relation to personal values and decisions made by or for the person
  - organ donation
  - request for autopsy
- hydration and nutrition requirements during palliative care and at end-of-life
- pain management including:
  - medication administered using a syringe driver or intima sub-cut lines
  - common non-pharmaceutical and complementary care
- indications and contraindications for use of syringe drivers in administration of pain medication
- indications for intima sub cut lines for pain relief, anti-nausea and steroid injections
- impact of loss and grief on person, family or carers and staff members
- own role and responsibilities, and those of other team members involved in palliative care
- relevant organisation policies, procedures, protocols and practices in relation to palliative care
- relevant resources available to those requiring grief and bereavement support.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources in line with the Australian Nursing and Midwifery Accreditation Council's Standards including:
  - advance care directives
  - organisation policies and procedures on which the candidate bases the planning
- modelling of industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must hold current registration as a Registered Nurse with Nursing and Midwifery Board of Australia.

HLTENN011 Implement and monitor care for a person with acute health problems

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Supersedes HLTEN512B

Application

This unit describes the skills and knowledge required to contribute to the care of the person with an acute health problem by performing clinical nursing skills and interventions that support the person's health care needs and assist them to regain optimal function and lifestyle.

This unit applies to enrolled nursing work carried out in consultation and collaboration with registered nurses, and under supervisory arrangements aligned to the Nursing and Midwifery Board of Australia regulatory authority legislative requirements.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify impact of acute health problems on a person, family or carer.	1.1 Identify actual and potential health issues of the person presenting with an acute health problem using information from a preliminary health assessment and in discussion with relevant interdisciplinary health care

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	team members. 1.2 Explain to the person, family or carer the potential physical and psychological impacts of acute health problems on daily living activities. 1.3 Identify the pathophysiology of the person's underlying or presenting condition, and confirm with the person, family or carer.
2. Contribute to planning care for a person with acute health problems.	2.1 Contribute effectively to discussions about the care of the person with registered nurse and other members of the health team. 2.2 Gather information and accurately document and report changes in the person's condition to appropriate interdisciplinary health care team members.
3. Perform nursing interventions to support health care of a person with acute health problems.	3.1 Assist in providing care for the person with a compromised airway including clearing of airways and interpreting health status using monitoring devices. 3.2 Provide care to the person requiring nutrition administered through a feeding tube or intravenous line. 3.3 Use critical thinking and problem-solving approaches in prioritising and modifying nursing interventions to reflect changes in the person's condition. 3.4 Contribute to the person's understanding of health care provided to assist them to regain optimal function through nursing interventions and health education. 3.5 Observe the person to identify any psychological support and care required due to the impact of acute health problems. 3.6 Ensure nursing interventions for pre- and post-procedure care for the person are in accordance with organisation policy and procedures.
4. Contribute to pre- and post-operative nursing care of a person.	4.1 Contribute to pre-operative nursing management of the person for specific surgical procedures. 4.2 Ensure pre-operative care takes into account the

	relationship between pre-operative care and post-operative complications.
	4.3 Contribute to post-anaesthetic observation of the person following surgery including identifying deterioration when the person is not regaining consciousness.
	4.4 Assist the person recovering from a range of anaesthesia to regain optimal health status, and take appropriate actions to reduce risks associated with immobility.
	4.5 Promote the person's post-operative comfort using pain management strategies and nursing care actions.
5. Contribute to an emergency response in the acute care environment.	5.1 Identify and confirm the roles and responsibilities of members of the emergency response team.
	5.2 Prepare and check emergency equipment.
	5.3 Identify emergency situations and respond to first aid requests from emergency response team, including accessing and preparing drugs used during advanced cardiopulmonary resuscitation.

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

HLTENN012 Implement and monitor care for a person with chronic health problems

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Supersedes HLTEN513B

Application

This unit describes the skills and knowledge required to contribute to the care of a person with chronic health problems by performing nursing interventions that support the person's needs and assist them in maintaining an optimal lifestyle.

This unit applies to enrolled nursing work carried out in consultation and collaboration with registered nurses, and under supervisory arrangements aligned to the Nursing and Midwifery Board of Australia regulatory authority legislative requirements.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify impact of chronic health problems on a person, family or carer.	1.1 Identify the person's chronic health problem and research possible impact of the condition on body systems and a person's ability to perform daily living activities.

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.2 Seek information from the person, and as appropriate, with family or carer to confirm their understandings of the condition and its impact.
	1.3 Identify current treatments and determine available resources and support services by seeking information from interdisciplinary health team or the person.
	1.4 Identify community based care services that are available for the person with a need for restorative or rehabilitation care.
	1.5 Actively involve the person in the development of strategies to self-manage their condition.
2. Contribute to a coordinated service approach.	2.1 Identify current contribution of other agencies and professionals in supporting the person.
	2.2 Identify the level and type of contribution and support made by family or carer.
	2.3 Identify and meet own role and responsibilities in communicating and reporting the person's response to nursing interventions.
	2.4 Respond to variations in the person's needs in the context of a coordinated service approach.
	2.5 Contribute to health education and evaluate the person's understanding of their chronic health problems in consultation with interdisciplinary health team.

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

- undertaken nursing work in accordance with Nursing and Midwifery Board of Australia professional practice standards, codes and guidelines
- analysed health information and the clinical presentation of 1 person in the workplace or simulated environment to reach an accurate conclusion on possible nursing interventions related to their chronic health problems, in consultation with a registered nurse
- performed nursing interventions in the workplace to contribute to the support of 2 people who have chronic health problems.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- broad context for chronic disease:
  - World Health Organisation (WHO) and other models of chronic disease
  - national health priorities for chronic disease
  - continuum of chronic disease
  - life variables that have an impact on health and well-being
  - impacts of chronic disease:

    - social
    - emotional
    - physical
    - psychological
    - financial
- rehabilitation strategies, techniques and equipment used for chronic health conditions including:
    - physiotherapy
    - occupational therapy
    - hydrotherapy
    - Pilates
    - massage
    - art and music therapy
    - use of wheelchairs, scooters and walking aids
    - use of prosthetics
- clinical manifestations of chronic disease or chronic health conditions including:
    - common sites for cancer development
    - chronic asthma
    - chronic obstructive pulmonary disease
    - chronic pain including back pain
    - chronic renal failure
    - congestive heart failure
    - diabetes
    - eczema
    - incontinence
    - motor neurone disease
    - neurological injury
    - long-term unconsciousness
    - osteoarthritis
    - permanent and temporary tracheostomies
    - Parkinson’s disease
    - rheumatoid arthritis
    - stroke
    - systemic lupus erythematosus (SLE)
- strategies to address and manage chronic disease in the relevant work context:
    - prevention
    - use of various treatments
    - principles of and practices for person-focused nursing practice
    - maintenance of positive life roles
    - enabling change of a person’s behaviour over time

© Commonwealth of Australia, 2025 HumanAbility

  - stages of change, to establish readiness for attitudinal and behavioural change
  - palliative care
- resources for the Core Standards for nurses who support people with a disability (NSW Family and Community Services)
  - Working with People with Chronic and Complex Health Care Needs Core Standard for Nurses
  - Person Centred Health Care Assessments and the Development of Health Care Plans Core standard for Practitioners.

Assessment Conditions

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations cannot be provided in the workplace. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources in accordance with the Australian Nursing and Midwifery Accreditation Council's Standards including:
  - assessment data
  - progressive notes of a de-identified person's medical history
  - organisation policy and procedures on which the candidate bases the planning
- modelling of industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must hold current registration as a Registered Nurse with the Nursing and Midwifery Board of Australia.

HLTENN013 Implement and monitor care of the older person

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minimal change to knowledge evidence. Supersedes HLTEN515B

Application

This unit describes the skills and knowledge required to perform nursing interventions to support the social and emotional wellbeing and nursing care needs of the older person in both acute care settings and residential care environments.

This unit applies to enrolled nursing work carried out in consultation and collaboration with registered nurses, and under supervisory arrangements aligned to the Nursing and Midwifery Board of Australia regulatory authority legislative requirements.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Respond to the health requirements of an older person.	1.1 Apply knowledge in own practice of age-related physical changes and transitions and the psychosocial needs of the person and their family or carer. 1.2 Identify possible age-related effects of drugs and medications on the person and make adjustments as

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	required in consultation with registered nurse.
	1.3 Identify age-related pathophysiological disorders and how they may affect the person and their family or carer.
	1.4 Communicate effectively and appropriately with the person, including making adjustments for people who have sensory impairments.
	1.5 Perform preventive health assessment of the person to identify their needs in providing preventive care, in consultation and collaboration with a registered nurse.
	1.6 Adapt work practices to reflect knowledge of theories of ageing and apply best practice care guidelines for older people.
	1.7 Develop and implement strategies to ensure companionship and social inclusion in consultation with the person.
	1.8 Recognise signs that indicate the person has, or may develop, an oral health problem.
	1.9 Identify and respond to signs of distress or behaviours of concern, especially in a person unable to communicate their symptoms or concerns.
2. Contribute to the care plan for an older person.	2.1 Assess the person's health status in consultation and collaboration with registered nurse and using assessment tools specific to the aged care environment.
	2.2 Document and report health findings according to organisation procedures.
	2.3 Assist the person to identify their abilities and limitations in capacity for self-care.
	2.4 Contribute to development of the person's nursing care plan within the context of the health care setting and organisation policy and procedures.
	2.5 Ensure the person, and the family or carer as appropriate, understand the implications of the person's admission into the health care facility.
	2.6 Discuss with the person, family or carer possible impacts of age-related pathophysiological disorders

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	including impact on the person's capacity to perform daily living activities.
	2.7 Document responses to nursing interventions, and report changes and concerns to a registered nurse.
3. Apply nursing practice in the aged care environment.	3.1 Identify external factors and common stereotypes associated with ageing and how these can adversely impact the older person.
	3.2 Consider in own practice the impact of complex issues involved in aged care, including impacts on family or carer.
	3.3 Consider own values, attitudes and beliefs towards ageing and the older person, and monitor own performance to ensure all interventions are conducted appropriately and within scope of practice of the enrolled nurse.
	3.4 Promote health maintenance with the older person and provide relevant information on available community services for the person, family or carer.
4. Identify requirements and address issues in aged care nursing practice.	4.1 Identify legal requirements and possible ethical issues and other issues of concern in aged care practice, including possible signs of elder abuse.
	4.2 Ensure own work practice accords with legal requirements, is ethical and supports the rights and dignity of the older person and their family or carer.
	4.3 Advocate for the person, their family or carer as required within own role parameters and organisation policies and procedures.
	4.4 Observe and respond appropriately to physical, emotional and mental signs of stress in the person.
	4.5 Provide care for the deceased person using standard precautions and in accordance with organisation policy and procedures.
	4.6 Provide support and comfort for grieving family or carer within own role parameters.

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
5. Use strategies that relate to the progressive and variable nature of dementia.	5.1 Identify the nature of dementia and use appropriate treatments and nursing interventions when working with the person with dementia. 5.2 Provide activities appropriate to the gender, culture and age of the person with dementia, reflecting their individual likes and dislikes. 5.3 Use a range of strategies, such as validation strategies, instructed activities and reorientating therapy to relieve distress and agitation in the person with dementia.
6. Develop and implement strategies to minimise impact of challenging behaviours.	6.1 Observe the person and document their behaviours and relevant environmental factors to assist in determining triggers contributing to challenging behaviour. 6.2 Consider potential impact the behaviours may have on the person and others in determining an appropriate response. 6.3 Implement best practice strategies that minimise the impact of behaviours, in consultation with the registered nurse and in accordance with organisation policies and procedures.

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTENN013 Implement and monitor care of the older person

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minimal change to knowledge evidence. Supersedes HLTEN515B

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- undertaken nursing work in accordance with Nursing and Midwifery Board of Australia professional practice standards, codes and guidelines
- analysed health information and the clinical presentation of 2 older people to reach an accurate conclusion on possible nursing interventions related to their care, in consultation with a registered nurse
- performed nursing interventions and monitored nursing care for 1 older person with dementia and 1 older person with a physical disability.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- the potential impacts of dual or multiple diagnoses on identification and prioritisation of the older person’s needs
- chronic age-related health problems
- continence care
- how to care for a deceased person
- oral hygiene for a partial or fully edentulous person including:
  - care of dental prosthetics

© Commonwealth of Australia, 2025 HumanAbility

  - screening for oral health conditions
  - soft tissue care
- counselling and support services and resources in the aged care environment and wider community
- difference between end-of-life care and palliative care
- functional assessment tools for assessing older people
- limitations and legal ramifications of physical, chemical and psychological restraint
- legal and ethical issues and considerations, and assessment tools relevant to the older person, including but not limited to:
  - advance care directives
  - *Aged Care Act 1997* (Cwlth)
  - Aged Care Funding Instrument (ACFI)
  - carers recognition legislation
  - aged care risk classification system
  - Code of ethics for nurses in Australia and the Code of professional conduct for nurses (Nursing and Midwifery Board of Australia)
  - Residential *Care Quality Assessment* (ResCareQA)
- nature of dementia as a progressive neurological condition, and strategies and nursing interventions that can be used with people with dementia
- primary health care and services for the older person
- stereotypes and influences on ageing
- strategies to respond to challenging behaviour including:
  - distraction such as reminiscing, walking and listening to music
  - behaviour modification
- physical triggers for behaviour including pain and not wearing the prescribed hearing aids or alternative listening devices
- complementary therapies
- the importance of a safe, physical, social and emotional environment for all older people, and particularly for people with dementia
- theories of ageing including:
  - biological theories
  - psychosocial theory
  - disengagement theory
  - social exchange theory
  - wear and tear theory
  - activity theory
- physiology of the ageing process as it relates to disease processes including in relation to:
  - sensory function
  - cardiac function
  - respiratory function
  - neurological function

© Commonwealth of Australia, 2025 HumanAbility

- musculoskeletal function
- genitourinary function
- endocrine function
- renal function
- sensory function
- oncological disorders
- skin integrity.

Assessment Conditions

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations cannot be provided in the workplace. The following conditions must be met for this unit

- use of suitable facilities, equipment and resources in accordance with the Australian Nursing and Midwifery Accreditation Council's Standards including:
  - dentures and dental prosthetics
  - organisation policy and procedures on which the candidate bases the planning
- modelling of industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must hold a current registration as a Registered Nurse with Nursing and Midwifery Board of Australia.

HLTENN014 Contribute to maternal and infant health care

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Supersedes HLTEN520B

Application

This unit describes the skills and knowledge required to provide care to mother and newborn infant in a range of health care settings such as postnatal, neonatal, child and family health care and paediatric settings.

This unit applies to enrolled nursing work carried out in consultation and collaboration with registered nurses and registered midwives and under supervisory arrangements aligned to the Nursing and Midwifery Board of Australia regulatory authority legislative requirements.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Work as part of the interdisciplinary health care team caring for a mother and her newborn infant	1.1 Assist the registered midwife by performing delegated aspects of postnatal care for the mother and newborn infant 1.2 Use correct terminology associated with pregnancy, labour and antenatal care when providing care

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.3 Contribute to the mother's education about lactation and assist in latching the newborn infant to the breast correctly and in line with current breastfeeding research
	1.4 Assist the mother to adopt safe practices in caring for the newborn infant
	1.5 Document and discuss observations and progress of the mother and newborn infant to assist in care planning in collaboration and consultation with the registered midwife
	1.6 Record observations of the mother and newborn infant, and report any abnormal observations to the registered nurse or midwife
	1.7 Provide holistic care for the mother and newborn infant to support maternal and infant health
2. Support mother and newborn infant towards identified goals	2.1 Identify and document goals in care plan, and evaluate progress of the mother and newborn infant towards the care goals
	2.2 Review and discuss with the registered nurse or midwife care goals that have not been achieved by the mother or newborn infant and update care planning
	2.3 Support the mother by demonstrating appropriate interactions with their newborn infant to assist in progress towards care goals
	2.4 Provide education to the mother on relevant aspects of maternal and infant health, and give information about support services in consultation and collaboration with the registered nurse or midwife

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTENN014 Contribute to maternal and infant health care

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Supersedes HLTEN520B

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- undertaken nursing work in accordance with Nursing and Midwifery Board of Australia professional practice standards, codes and guidelines
- provided holistic maternity care for 2 mothers and their newborn infants in the workplace, in collaboration and consultation with the registered nurse or midwife and interdisciplinary health care team including:
  - umbilical cord care
  - preparation of feeding formulas
  - dressing newborn infant and changing newborn infant nappies
  - safe practice for bathing, holding, settling and positing the newborn infant for sleeping
  - care of the mother’s nipples.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- role of the midwife in antenatal and postpartum care
- anatomy and physiology and associated terminology related to pregnancy, birth, postnatal period, lactation and care of the newborn infant

© Commonwealth of Australia, 2025 HumanAbility

- breastfeeding support
- primary health care approaches to care planning
- community support services for maternal and infant care
- common abnormalities of newborn infant
- common obstetric emergencies
- correct use of artificial formula:
  - preparation volumes to be consumed according to age
  - methods for sterilisation of equipment
- process of grief associated with infant death and appropriate care of the mother and family
- impact of cultural practices and beliefs in relation to birthing
- appropriate interactions with newborn infant including:
  - individual differences in newborn infant's need for rest and their sleep and rest patterns
  - signs of stress, distress or pain in newborn infant
  - practices that are safe and unsafe for use with newborn infants
  - diverse practices and routines used by various families and their underlying cultural or personal rationale
  - emotional, physical and language development of newborn infant
  - attachment theory
  - Sudden Infant Death Syndrome (SIDS) and safe sleeping techniques
  - brain development in newborn infant
- newborn screening
- principles for recognising a deteriorating mother or baby and the importance of immediately raising issues of concern
- World Health Organisation (WHO) code for breastfeeding and the development and establishment of breastfeeding and benefits of breast milk and breastfeeding
- umbilical cord care.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment as specified in the performance evidence. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources in line with the Australian Nursing and Midwifery Accreditation Council's Standards including:
  - newborn screening procedures
  - equipment suitable for bathing and changing a newborn infant
  - equipment suitable for positing a newborn infant for sleep
  - equipment suitable for umbilical cord care
  - bottles and formula
  - progressive notes of a de-identified person's medical history
  - organisation policy and procedures on which the candidate bases the planning.

© Commonwealth of Australia, 2025 HumanAbility

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must hold current registration as a Registered Nurse with Nursing and Midwifery Board of Australia, and for assessments related to postnatal care of the mother and neonatal care of the newborn infant, assessors must hold registration as a Registered Midwife with Nursing and Midwifery Board of Australia.

HLTENN015 Apply nursing practice in the primary health care setting

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Supersedes HLTEN608B

Application

This unit describes the nursing skills and knowledge required to work in a primary health care environment including community-based, educational, occupational and informal settings, and in general practice.

Primary health care involves a person-centred and holistic approach to health care. It is made accessible to people by being located as close as possible to where they live, and supporting their full participation in a spirit of self-reliance and self-determination.

This unit applies to enrolled nursing work carried out in consultation and collaboration with registered nurses and under supervisory arrangements aligned to the Nursing and Midwifery Board of Australia regulatory authority legislative requirements.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance Criteria specify the level of performance required to demonstrate achievement of the Element.*

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
1. Work as part of an interdisciplinary health care team in a primary health care environment	1.1 Apply principles of primary health care and work within the philosophical framework supporting primary health care system 1.2 Identify the primary health care service model and the roles and professional expertise of various members of the interdisciplinary health care team 1.3 Undertake effective decision-making and initiate action based on results of clinical assessment and in collaboration with various members of the interdisciplinary health care team
2. Recognise impact of a health problem on a person in the primary health care environment	2.1 Define health issues for the community or target group of the primary health care service, and reflect this knowledge in own work 2.2 Recognise clinical manifestations of health conditions affecting the health status of the person requiring primary health care 2.3 Review the person's records to determine priorities and potential areas of risk for implementation of primary health care 2.4 Discuss information gained from assessment of the person with appropriate members of the interdisciplinary health care team 2.5 Discuss the physical, psychological and social impacts of a health problem on daily living activities with the person and, with the person's consent, with family or carer 2.6 Identify actual or potential environmental health issues impacting the person requiring primary health care in consultation and collaboration with the registered nurse
3. Provide health education and health promotion for illness prevention	3.1 Identify health literacy issues that potentially inhibit the person's capacity to access, understand, evaluate and communicate information to maintain and improve their health 3.2 Adopt strategies to support the person's capacity to gain and understand information 3.3 Support the person to engage in illness prevention through health promotion programs to meet the person's needs

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	3.4 Contribute to health policy in the primary health care environment and participate in health education programs for the person and community groups
4. Perform nursing interventions that support a person's health care needs	4.1 Ensure nursing interventions reflect the person's needs and individuality including considering cultural, religious, age and gender issues and the person's physical, psychological and social needs
	4.2 Implement nursing interventions using respectful practices that also support the person's dignity and privacy
	4.3 Encourage the person, family or carer to assist with the person's self-care care as appropriate
	4.4 Plan and adjust nursing interventions to assist the person to meet their daily living activities
	4.5 Identify and prioritise nursing interventions according to the person's needs
	4.6 Initiate appropriate first aid and other emergency treatment according to organisation policy and procedure
5. Evaluate outcomes of planned primary health care and promote suitable resources	5.1 Monitor, evaluate and document the person's response to nursing interventions and their progress toward primary health goals, and report findings to relevant interdisciplinary health care team
	5.2 Identify community and other resources to match the person's needs, and provide the person, family or carer with information on available resources and how to access them

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTENN015 Apply nursing practice in the primary health care setting

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Supersedes HLTEN608B

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- undertaken nursing work in accordance with Nursing and Midwifery Board of Australia professional practice standards, codes and guidelines
- analysed health information and the clinical presentation of 1 person in the workplace to reach a substantiated conclusion about possible nursing interventions related to their primary health care needs, in consultation with a registered nurse
- reviewed and updated a plan of care for 1 person to address their specific primary health care needs.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- health challenges facing Australian communities
- environmental health issues facing Australian communities
- philosophy underpinning primary health care
- care of a confused person
- care of a person with dementia
- emergency and first aid management of conditions and injuries
- age specific health issues for infants, children, adolescents, adults and older people

© Commonwealth of Australia, 2025 HumanAbility

- community and in-hospital resources and services available for medical conditions
- critical thinking and problem-solving strategies
- evidence-based practice
- health, including the illness continuum
- literature and professional bodies associated with primary health care management
- variety of forms of service delivery models including preventative, curative and rehabilitative.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment as specified in the performance evidence. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources in line with the Australian Nursing and Midwifery Accreditation Council's Standards including:
  - clinic room for the purpose of assessment
  - progressive notes of a person's medical history, de-identified for simulation
  - organisation policy and procedures on which the candidate bases the planning
- modelling of industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, hold current registration as a Registered Nurse with Nursing and Midwifery Board of Australia.

HLTENN016 Apply nursing practice in the emergency care setting

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minimal change to knowledge evidence. Supersedes HLTEN620B

Application

This unit describes the skills and knowledge required to work as part of the emergency care team in an emergency care environment such as a hospital emergency department, primary health care service or mobile hospital service.

Enrolled nurses working in emergency care need to hold and apply specialised in-depth knowledge, effectively integrate theory and practice, and make reliable clinical assessments and judgements.

This unit applies to enrolled nurses, registered with the Nursing and Midwifery Board of Australia, seeking specialisation in enrolled nurse work that is carried out in consultation and collaboration with registered nurses and under direct or indirect supervisory arrangements aligned to the Nursing and Midwifery Board of Australia regulatory authority legislative requirements.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 HumanAbility

Elements define the essential outcomes	*Performance Criteria specify the level of performance required to demonstrate achievement of the Element.*
1. Work as part of emergency health care team	1.1 Identify own role in providing emergency care and the contributions made by emergency services personnel, referring agencies, the hospital and others in the emergency care team
	1.2 Provide nursing care to the person in response to trauma and under emergency care conditions, supporting the emergency care team
	1.3 Work effectively in the emergency health care team to foster positive group dynamics with other health care professionals
	1.4 Identify and clarify emergency care needs of the person and discuss problems and complications with the person and their family or carer, as appropriate and within scope of practice
	1.5 Undertake appropriate pre-, intra- and post-diagnostic procedures in line with organisation policy and procedures and within scope of practice
	1.6 Assist in preparing the person for transport to another health care facility to meet their needs for further medical treatment or services
	1.7 Recognise potential and actual emergency situations and take action in accordance with organisation policies and procedures and scope of practice
	1.8 Record treatment provided to the person and their response to provided emergency care
2. Contribute to quality and safety of emergency nursing care.	2.1 Re-prioritise emergency care activities rapidly when in changing or changed circumstances as directed by the registered nurse
	2.2 Identify potential or actual risks when providing emergency care and participate in organisation risk assessment identification and risk management processes
	2.3 Use critical thinking and problem-solving approaches to propose actions and implement nursing interventions, in consultation with registered nurse
	2.4 Identify when the acuity of a person is beyond own skills and knowledge and promptly consult with registered nurse and relevant interdisciplinary health care team

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance Criteria specify the level of performance required to demonstrate achievement of the Element.*
3. Actively promote improvement and advancement of emergency nursing	3.1 Document outcomes of care and communicate findings to other members of the emergency care team in accordance with organisation policy
	3.2 Evaluate nursing interventions provided and consider identified outcomes against evidence-based best practice in emergency care nursing
	3.3 Seek out opportunities and participate in professional development, acquiring knowledge to guide own practice and acting as a resource for colleagues
	3.4 Recognise symptoms of stress and professional burnout in self, peers and colleagues, and refer to appropriate services within organisation policies and procedures and scope of practice

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTENN016 Apply nursing practice in the emergency care setting

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minimal change to knowledge evidence. Supersedes HLTEN620B

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- undertaken nursing work in accordance with Nursing and Midwifery Board of Australia professional practice standards, codes and guidelines
- worked as part of the emergency health care team in the workplace providing emergency nursing interventions for each of the following conditions:
  - bleeding from multiple injury sites
  - respiratory distress
  - unstable musculoskeletal injury
  - head, neck or spinal injuries
  - person with diabetes who has hypoglycaemia or hyperglycaemia
  - uncontrolled vomiting, diarrhoea and dehydration
  - confusion and aggressive behaviour
- provided advanced resuscitation on a simulation manikin and administered emergency medications according to organisation policy and procedures in a simulated environment
- conducted 2 specific activities in the workplace or simulated environment to support quality and promote safe innovations in emergency nursing to an emergency team based on knowledge acquired through own professional development and learning

© Commonwealth of Australia, 2025 HumanAbility

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- role of members participating in an emergency care team
- emergency care and first aid principles
- the following - sufficiently in-depth and specialised to make considered judgements and to make a professional contribution to the emergency care team:
  - anatomy, physiology and pathophysiology of musculoskeletal injuries and head, neck and spinal injuries
  - hypovolemic shock
  - poisonings and substance misuse
  - febrile convulsions and epilepsy
  - abusive and behaviour issues from injury or substance misuse
  - respiratory distress
  - emergency medical conditions
- interpretation of the following pathology and diagnostic tests:
  - blood tests commonly taken in emergency situations
  - skeletal X-rays
  - Computerised Tomography (CT) scans
  - Magnetic Resonance Imaging (MRI) scans
  - Positron Emission Tomography (PET) scans
  - Electrocardiogram (ECG).

Assessment Conditions

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations cannot be provided in the workplace. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources in line with the Australian Nursing and Midwifery Accreditation Council’s Standards including:
  - airway management equipment
  - dressing packs and wound dressings
  - oxygen therapy equipment, oxygen cylinder, masks and tubing
  - splints
  - cervical collar
  - progressive notes of a de-identified person’s medical history
  - organisation policy and procedures on which the candidate bases the planning
- modelling of industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

© Commonwealth of Australia, 2025 HumanAbility

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must hold current registration as a Registered Nurse with Nursing and Midwifery Board of Australia.

HLTENN017 Apply nursing practice in the orthopaedic care setting

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minimal change to knowledge evidence. Supersedes HLTEN601B

Application

This unit describes the skills and knowledge required to assist people with an orthopaedic conditions to regain optimal function and lifestyle.

Enrolled nurses providing orthopaedic nursing care need to hold and apply specialised in-depth knowledge, effectively integrate theory and practice, and make reliable clinical assessments and judgements.

This unit applies to enrolled nurses, registered with the Nursing and Midwifery Board of Australia, seeking specialisation in enrolled nurse work that is carried out in consultation and collaboration with registered nurses, and under direct or indirect supervisory arrangements aligned to the Nursing and Midwifery Board of Australia regulatory authority legislative requirements.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential	*Performance criteria describe the performance needed to*

© Commonwealth of Australia, 2025 HumanAbility

outcomes	*demonstrate achievement of the element.*
1. Work in interdisciplinary health care team caring for a person with an orthopaedic condition	1.1 Provide nursing care that supports the interdisciplinary health care team in caring for the person with an orthopaedic condition 1.2 Work effectively in the interdisciplinary health care team to foster positive group dynamics with other health care professionals 1.3 Identify when the acuity of a person is beyond own skills and knowledge and promptly consult with registered nurse and relevant interdisciplinary health care team 1.4 Use critical thinking and problem-solving approaches to propose actions and implement nursing interventions, in consultation with registered nurse and relevant interdisciplinary health care team
2. Clarify the impact of the orthopaedic condition on the person, family and carer	2.1 Maintain current knowledge of orthopaedic conditions and associated pathophysiology as they apply to each clinical manifestation 2.2 Identify the psychosocial impact and potential complications for the person and clarify their needs 2.3 Discuss impacts and complications of the person's condition with the person, and their family or carer, as appropriate within scope of practice 2.4 Contribute to long-term management and planning of the recovery phase of care required for the person with an orthopaedic condition
3. Actively promote improvement and advancement of orthopaedic nursing	3.1 Monitor and evaluate own nursing care provided to the person to assist with organisation continuous improvement 3.2 Evaluate nursing interventions provided and consider outcomes against evidence-based best practice in orthopaedic nursing 3.3 Seek out opportunities and participate in professional development, acquiring knowledge to guide own practice and acting as a resource for colleagues

Assessment Requirements for HLTENN017 Apply nursing practice in the orthopaedic care setting

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minimal change to knowledge evidence. Supersedes HLTEN601B

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- undertaken work in accordance with Nursing and Midwifery Board of Australia professional practice standards, codes and guidelines
- worked as part of the interdisciplinary health care team in the workplace providing orthopaedic nursing interventions for each of the following conditions:
  - fracture with external fixation
  - fracture with internal fixation
  - fracture requiring non-surgical management
  - musculoskeletal injury where the person requires continuous passive motion therapy (CPM)
  - amputation where the person requires assistance with a prosthetic aid or device
- conducted 2 specific activities in the workplace or simulated environment to support quality and promote safe innovations in orthopaedic nursing for an interdisciplinary team based on knowledge acquired through own professional development and learning.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

© Commonwealth of Australia, 2025 HumanAbility

- the impact orthopaedic conditions may have on the person, including:
  - limitations in ability to perform daily living activities
  - loss or limitation of physical function
  - reduction in musculoskeletal function
  - accompanying trauma, injuries or impact of secondary disease processes
  - impact on sexuality, relationships, self-image, body image
  - grief and loss
  - need for support with personal coping mechanisms and community support mechanisms
  - need for support with maintenance, improvement of quality of life
- anatomy, physiology and pathophysiology of clinical manifestations of orthopaedic conditions, with sufficiently in-depth knowledge to make considered judgements and to contribute professionally to the orthopaedic care team
  - musculoskeletal conditions, such as:
    - gout
    - systemic lupus erythematosus
    - osteomyelitis
    - bursitis
    - epicondylitis
    - hallux valgus
    - avascular necrosis
    - compartment syndrome
    - thromboembolism
    - disseminated intravascular coagulation
    - delayed union
    - fat embolism
    - contractures
  - congenital musculoskeletal conditions, such as:
    - torticollis
    - spina bifida
- traumatic musculoskeletal conditions, such as:
    - dislocations
    - sprains
    - fractures
    - traumatic amputations
- degenerative musculoskeletal conditions, such as:
    - arthritis
    - back pain
    - muscle spasm
    - disc prolapse

© Commonwealth of Australia, 2025 HumanAbility

    - osteoarthritis
    - osteitis deformans
    - osteomalacia
- surgical interventions for musculoskeletal conditions, such as:
    - internal and external fixtures for fractures, applications of surgical braces
    - removal of bunions
    - elective surgical procedures (joint replacement surgery)
    - laminectomy
    - surgical amputation
- bone tumours, such as:
    - metastatic bone carcinoma
    - multiple myeloma
    - bone tuberculosis
    - osteosarcoma
    - chondrosarcoma
- specialised in-depth knowledge of orthopaedic equipment and devices used on the person including:
    - traction devices
    - castings
- community and in-hospital rehabilitation services available for the person with orthopaedic conditions
- diagnostic tests associated with orthopaedics and their meanings including:
    - X-rays
    - Computerised Tomography (CT) scans
    - Magnetic Resonance Imaging (MRI) scans
    - ultrasounds
    - bone scans
    - biopsies
- specialised medical and surgical nursing management of the person with orthopaedic condition including emergency management of complications
- phases of recovery and how these impact nursing care for the person with orthopaedic condition
- reflective practice and evidence-based practice in line with current literature and work of professional bodies associated with medical conditions.

Assessment Conditions

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations cannot be provided in the workplace. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources in line with the Australian Nursing and Midwifery Accreditation Council’s Standards including:

© Commonwealth of Australia, 2025 HumanAbility

  - splints
  - bandages for casting
  - prosthetics
  - progressive notes of a de-identified person's medical history
  - organisation policy and procedures on which the candidate bases the planning
- modelling of industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must hold current registration as a Registered Nurse with Nursing and Midwifery Board of Australia.

HLTENN018 Apply nursing practice in the rehabilitation care setting

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTEN602B and HLTEN604B. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to assist people with disability or chronic illness who require rehabilitation to attain and maintain optimum function and lifestyle.

Enrolled nurses working in rehabilitation environments need to hold and apply specialised in-depth knowledge, effectively integrate theory and practice, and make reliable clinical assessments and judgements.

This unit applies to enrolled nurses, registered with the Nursing and Midwifery Board of Australia, seeking specialisation in enrolled nurse work that is carried out in consultation and collaboration with registered nurses, and under direct or indirect supervisory arrangements aligned to the Nursing and Midwifery Board of Australia regulatory authority legislative requirements.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Work in interdisciplinary health care team caring for a person requiring rehabilitation	1.1 Apply the specialised knowledge and clinical skills necessary to provide nursing care for the person with physical disability and chronic illness
	1.2 Provide nursing care that supports the interdisciplinary health care team to achieve cost effective health care outcomes
	1.3 Work effectively in the rehabilitation care team to foster positive group dynamics with other health care professionals
	1.4 Contribute to long-term management and planning for the person requiring rehabilitative care to maintain their optimum function and lifestyle
	1.5 Identify opportunities for the person to self-manage own rehabilitative care needs
2.Contribute to a person's rehabilitation	2.1 Contribute to a safe and therapeutic environment and support activities that promote the person's return of function
	2.2 Apply knowledge of the various manifestations of the person's areas of dysfunction and the associated pathophysiology of each clinical manifestation
	2.3 Use critical thinking and problem-solving approaches to propose actions and implement nursing interventions to reflect changes in the person's level of dysfunction, in consultation with registered nurse
	2.4 Discuss with the person, family or carer the psychosocial impact of the person's dysfunction on daily living activities
	2.5 Communicate effectively with person, family or carer and interdisciplinary health team members
	2.6 Identify and apply strategies to prevent complications or chronic illness in consultation with the registered nurse
	2.7 Clarify the care needs of the person with a dysfunction across the phases of care required

HLTENN019 Apply nursing practice in sexual and reproductive health care

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minimal change to knowledge evidence. Supersedes HLTEN603B

Application

This unit describes the skills and knowledge required to provide nursing interventions for people with sexual and reproductive health care needs.

Enrolled nurses providing nursing care in the area of sexual and reproductive health need to hold and apply specialised in-depth knowledge, effectively integrate theory and practice and make reliable clinical assessments and judgements.

This unit applies to enrolled nurses, registered with the Nursing and Midwifery Board of Australia, seeking specialisation in enrolled nurse work that is carried out in consultation and collaboration with registered nurses, and under direct or indirect supervisory arrangements aligned to the Nursing and Midwifery Board of Australia regulatory authority legislative requirements.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 HumanAbility

Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify and discuss sexual and reproductive health problems	1.1 Support the person in accessing relevant screening programs and in using contemporary assessment tools to identify health issues 1.2 Interpret observations and pathology results indicating variations from normal sexual and reproductive health status 1.3 Provide information at a primary health care level on the risk factors, indicators and interventions for sexually transmissible infections (STIs) and blood-borne infections (BBIs) 1.4 Use a safe place for discussing with the person contact tracing, disclosure of information and requirements in reporting notifiable STIs or BBIs, in consultation with registered nurse 1.5 Use appropriate health information and resources to the level of the person's own understanding of their sexual development and health condition 1.6 Make appropriate referrals in consultation with an interdisciplinary team to promote healthy sexual and lifestyle practices
2. Clarify the impact of sexual and reproductive health condition on the person, family or carer	2.1 Maintain current knowledge of sexual and reproductive health conditions and associated pathophysiology and apply this knowledge to female and male clinical manifestations 2.2 Identify the psychosocial impact and potential complications for the person and clarify their needs 2.3 Discuss impacts and complications of the person's condition with the person, and their family or carer as appropriate, within scope of practice
3. Contribute to team planning and nursing interventions for sexual or reproductive health care	3.1 Identify specific effects of culture, ageing, disability and illness on sexuality and sexual behaviour for the person 3.2 Identify nursing interventions to incorporate contemporary sexual and reproductive health strategies into practice 3.3 Provide advice related to maintaining sexual and

HLTENN020 Conduct clinical assessments

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Supersedes HLTEN606B

Application

This unit describes the skills and knowledge required to recongise the need for assessment, perform physical examinations and make clinical judgments using critical analysis and specialised knowledge of pathophysiology and clinical assessment processes.

This unit applies to enrolled nurses, registered with the Nursing and Midwifery Board of Australia, seeking specialisation in enrolled nurse work that is carried out in consultation and collaboration with registered nurses and under direct or indirect supervisory arrangements aligned to the Nursing and Midwifery Board of Australia regulatory authority legislative requirements.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Recognise the need for clinical assessment	1.1 Apply specialised knowledge of pathophysiology of body systems to make informed judgement on a person's actual and potential health problems 1.2 Source and interpret a person's presenting clinical

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	health data to identify homeostasis imbalance indicating abnormal functioning of body systems
	1.3 Use interviewing and active listening skills to identify, clarify and confirm health information with the person or carer prior to assessment
2. Perform physical examinations	2.1 Prepare the person for examination according to the procedure being performed and obtain consent to proceed
	2.2 Perform a systematic head-to-toe physical body examination using established assessment tools and techniques
	2.3 Respect client dignity and potential sensitivities and seek feedback on comfort levels
	2.4 Use ongoing questioning to gain further information from the person as examination proceeds
	2.5 Recognise a person's alteration in condition and potential for deterioration and immediately communicate concerns to registered nurse
3. Make clinical judgements	3.1 Use a process of critical questioning and diagnostic reasoning to make links between the person's clinical presentation and possible health condition or illness or injury
	3.2 Recognise the need for specific clinical interventions based on information from examination
	3.3 Establish priorities of care, based on assessment outcomes and judgements made
	3.4 Document assessment outcomes according to organisation procedures and provide information to those involved in ongoing care of the person
4. Communicate assessment outcomes	4.1 Use language and terminology that the person will understand when providing results of clinical assessment
	4.2 Use questioning techniques to confirm with the person that the health information has been understood

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA

	and address any unresolved issues with person
	4.3 Assess the impact of information on the person and take action accordingly
	4.4 Communicate outcomes and proposed actions to the registered nurse and use a collaborative approach for follow up with interdisciplinary team

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTENN020 Conduct clinical assessments

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Supersedes HLTEN606B

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- undertaken nursing work in accordance with Nursing and Midwifery Board of Australia professional practice standards, codes and guidelines
- demonstrated the capacity to analyse changes in a person's health status, perform physical examinations and make sound clinical judgements for at least 3 different people presenting with a complex condition, illness or injury
- assessed health status using the following clinical assessment tools and techniques:
  - neurological examination, including sensory function and motor responses, reflexes
  - peripheral vascular system examination
  - respiratory auscultation and percussion
  - chest auscultation and percussion
  - abdomen auscultation and palpation
  - heart sounds check
- interpreted the person's blood test results for abnormal findings indicating changes in health status.

© Commonwealth of Australia, 2025 HumanAbility

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- communication strategies that underpin assessment and communication with the person and other health professionals, including:
  - appropriate modes of communication for the information being provided
  - range of interviewing skills
  - information technology and health technologies to capture clinical data for responsive coordination and dissemination to relevant members of the interdisciplinary health care team
  - factors for consideration when communicating with people with:
    - communication-related disabilities
    - mental health conditions
    - pharmacological and alcohol addiction or misuse
    - adverse behavioural responses to unfamiliar environments
    - person under stress due to situations to themselves or others such as trauma, death and life threatening situations
- advanced concepts underpinning human maintenance systems including immunity and homeostasis imbalance causing physical changes associated with:
  - acidosis/alkalosis
  - diabetes (hypoglycaemia, hyperglycaemia)
  - nutirition and hydration/dehydration
  - cancer treatment
  - thermostasis (thermoregulation)
  - infections
  - poisoning
  - sepsis
- clinical assessment techniques and tools used in a head-to-toe physical body examination:
  - inspection – uses of the sense of sight to identify specific characteristics of the individual
  - palpation – utilises use of the sense of touch to determine physical signs.
  - percussion – use of tapping on an individual's body to evaluate location and density of underlying structures.
  - auscultation – listening to sounds created by the body using stethoscope
- processes for the neurological examination of the sensory function and motor responses including:
  - cranial nerves
  - inspection, looking for subtle weakness e.g. tremors, pronator drift
  - gait abnormalities including scissors, spastic, stoppage and waddling
  - stance including posture, lordosis, kyphosis and scoliosis

© Commonwealth of Australia, 2025 HumanAbility

    - muscular response and muscle strength
    - dermatomes and related spinal nerves
    - peripheral neuropathies
    - sensory function testing: light touch, pain sensation, temperature, proprioception and tactile localisation
    - stereognosis and graphaesthesia
    - Romberg test
    - deep tendon reflexes including how to position a person and use of reflex hammer and comparing left and right side responses
    - superficial reflexes such as abdominal and cremasteric reflexes
- processes for respiratory system examination including
    - respirations – breathing effort, chest pain associated with breathing, movement of the rib cage for symmetrical or diaphragmatic breathing pattern
    - auscultation – systematic approach to determine if underlying lung tissue is filled with fluid, air or solid material checking lung fields for bilateral adventitious noises
    - percussion sounds including:
        - resonant: heard over the lung fields - air filled spaces - very hollow sound
        - tympany: heard over the gut area - duller sound - like tapping on a watermelon
        - dull: heard over bony areas - little transmission of sound
- processes for checking heart sounds including:
    - aortic, pulmonic, Erbs Point, tricuspid and mitral heart sounds
    - Sound1 represents closure of the atrioventricular (mitral and tricuspid) valves during the beginning of systole
    - Sound 2 represents closure of the semilunar valves (aortic and pulmonic) valves during the end of systole and beginning of diastole
- processes for chest and abdomen examination including:
    - inspection – described by location (quadrant) visible abdominal masses, and the movement of the chest and abdominal wall
    - auscultation (for abdomen auscultation is before palpation and percussion) – detection of normal and altered bowel sounds in abdomen, bubbling; rubbing; grating; crackling or vascular bruits
    - palpation and percussion – depth of palpation (superficial or deep) using the fingertip or flat of the hand for examination of the abdomen for crepitus of the abdominal wall, for any abdominal tenderness, rebound tenderness or for abdominal masses
- processes for peripheral vascular system examination including:
    - inspection – colour of limbs (including when legs are hanging over the edge of the bed), hair loss, ulcers, scars and muscle wasting, lateral side foot and in-between toes
    - upper limb pulse – subclavaian, carotid, brachial, radial, ulnar and capillary refill time
    - lower limb pulse – aorta, femoral, popliteal, posterior tibial, doralis pedis and anterior tibial
    - palpation of the amplitude of arterial pulses bounding, brisk diminished, absent or unable to palpate

© Commonwealth of Australia, 2025 HumanAbility

  - checking peripheral pulse and apical pulse for consistency
  - Allens test to determine patency of the radial and ulnar arteries
- processes for skin, hair and nails examination including:
  - colour, texture, turgor, warmth, moisture distribution, the presence of any lesions or scars
  - clubbing of the nail beds can be indicative of pulmonary disease
  - reduced hair distribution on the lower legs can be indicative of cardiovascular disease (check with individual if they use hair removal treatments)
- effects of intrinsic factors (such as age, health) and extrinsic factors (such as environment, medications) on person's condition
- how to interpret common blood test results and their meanings as indicators of a health condition or illness including:
  - Albumin
  - Arterial Blood Gas (ABG)
  - Blood Sugar Level (BSL), haemoglobin A1C
  - Blood Urea Nitrogen (BUN)
  - Calcium
  - Cardiac Enzymes (CE)
  - Cholesterol
  - Coagulation Studies (Coags)
  - Erythrocyte Sedimentation Rate (ESR)
  - Electrolytes (EUC) (Sodium/Potassium/Chloride Urea/Creatinine)
  - Full Blood Count (FBC)
  - High-Density Lipoprotein (HDL)
  - Iron
  - Low-Density Lipo-protein (LDL)
  - Magnesium
  - Phosphorus
  - Triglycerides
  - Thryoid Stimulating Hormone (TSH)
  - Uric acid
- how to recognise subtle changes in a person's condition through knowledge of a person's patterns of responses and comparing responses over periods of time
- principles for recognising a deteriorating patient and raising issues of concern about a person's deterioration
- socio-economic, physiological, emotional and physical variables related to clinical presentation of a person.

© Commonwealth of Australia, 2025 HumanAbility

Assessment Conditions

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations cannot be provided in the workplace. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources in line with the Australian Nursing and Midwifery Accreditation Council's Standards including:
- organisation policy and procedures on which the candidate bases the assessment process.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must hold current registration as a Registered Nurse with Nursing and Midwifery Board of Australia.

HLTENN021 Apply nursing practice in the critical care setting

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minimal change to knowledge evidence. Supersedes HLTEN607B

Application

This unit describes the skills and knowledge required to practise within the critical care environment.

Enrolled nurses working in critical care nursing need to hold and apply in-depth knowledge, effectively integrate theory and practice, and make reliable clinical assessments and judgements.

This unit applies to enrolled nurses, registered with the Nursing and Midwifery Board of Australia, seeking specialisation in enrolled nurse work that is carried out in consultation and collaboration with registered nurses, and under direct or indirect supervisory arrangements aligned to the Nursing and Midwifery Board of Australia regulatory authority legislative requirements.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes of a unit of competency.	*The Performance Criteria specify the level of performance required to demonstrate achievement of the Element.*

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes of a unit of competency.	*The Performance Criteria specify the level of performance required to demonstrate achievement of the Element.*
1. Apply theoretical concepts and principles in providing critical care nursing	1.1 Identify the person's current health status and limitations and their medications and therapeutic regimes in the critical care setting with the person, family or carer 1.2 Identify factors impacting the person's health status and report to the registered nurse significant alterations in the person's health status 1.3 Identify and respond to the psychosocial needs of the person in the critical care environment 1.4 Identify and apply a systems approach to nursing care
2. Contribute to interdisciplinary health care team in caring for a person in the critical care environment	2.1 Identify role of specialist nursing and medical services in care of the person in the critical care environment and work effectively with others 2.2 Collaborate with interdisciplinary health care team in partnership with the person, family or carer to maintain continuity of nursing care planning 2.3 Identify factors relevant to the person's situation, giving consideration to physical, psychological, social and economic impacts 2.4 Review care plan and data collected, and communicate to relevant members of the interdisciplinary health care team 2.5 Recognise the person's choices and any advance care planning, and advocate for the rights and responsibilities of the person in critical care
3. Perform complex nursing interventions to assist a person in critical care to attain and maintain optimal health	3.1 Manage nursing workload according to a person's needs and re-prioritise care activities for the person rapidly when circumstances change 3.2 Undertake appropriate pre-, intra- and post-diagnostic procedures in line with scope of practice and organisation policy and procedures, and in collaboration with the registered nurse 3.3 Respond rapidly to adverse and emergency events applying knowledge of pathophysiology and using

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes of a unit of competency.	*The Performance Criteria specify the level of performance required to demonstrate achievement of the Element.*
	problem-solving approaches in line with organisation policy and procedures and within scope of practice
	3.4 Identify when the acuity of a person's critical care needs is beyond own skill and knowledge, and refer promptly to registered nurse and relevant interdisciplinary health care team members
4. Develop own practice in the critical care nursing environment	4.1 Make appropriate proposals for nursing interventions in consultation with registered nurse to promote improved outcomes for the person and their condition
	4.2 Evaluate nursing interventions provided and evaluate the outcomes against evidence-based best practice in critical care nursing
	4.3 Recognise symptoms of stress and professional burnout in self, peers and colleagues, and refer to appropriate services within organisation policies and procedures and scope of practice
	4.4 Seek out opportunities and participate in professional development, acquiring knowledge to guide own practice and acting as a resource for colleagues

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTENN021 Apply nursing practice in the critical care setting

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minimal change to knowledge evidence. Supersedes HLTEN607B

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- undertaken nursing work in accordance with Nursing and Midwifery Board of Australia professional practice standards, codes and guidelines
- performed the following nursing care interventions on no fewer than 3 people in a critical care setting in the workplace:
  - care of an arterial line
  - care of central venous line
  - assessment of chest pain
  - monitoring of electrocardiograph readings for abnormalities
  - administration of (non-invasive) continuous positive airway pressure (CPAP) and bilevel positive airway pressure (BiPAP)
  - care of permanent and temporary mechanical ventilation including suctioning and bagging
  - peripherally inserted central catheter (PICC)/midline management
  - under water seal drain management
- in undertaking the above, use advanced communication skills and medical terminology to communicate effectively with the person, family or carer, and the registered nurse and other health professionals to record or report the person’s outcomes.

© Commonwealth of Australia, 2025 HumanAbility

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- advanced life support including advanced cardiopulmonary resuscitation
- complex nursing procedures relevant to care of a person in a critical care environment including infusion pumps and patient controlled analgesia pumps and syringe drivers
- specialised knowledge of anatomy, physiology and pathophysiology related to critical care issues
- specialised knowledge and skill relating to prioritising care in an emergency situation of a person in the critical care environment
- actual and potential problems in critical care including:
  - respiratory failure
  - increased intracranial pressure
  - deteriorating person and levels of consciousness
  - haemorrhage
  - hypercapnia
  - inability to clear secretions
  - inability to cough
  - aspiration
  - shortness of breath
  - electrolyte imbalance
  - fluid overload
  - hypoxia and hypoxaemia
  - chest pain
  - stroke
  - vessel occlusion
  - pneumothorax
  - pacemaker lead displacement
  - arrhythmia
  - allergic reaction.

Assessment Conditions

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations cannot be provided in the workplace. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources in line with the Australian Nursing and Midwifery Accreditation Council's Standards including:
  - simulation models or manikins suitable for advanced cardiopulmonary resuscitation and clinical skills

© Commonwealth of Australia, 2025 HumanAbility

- arterial lines
- CPAP and BiPAP machines
- PICC lines
- underwater seal drains and tubes
- ventilation equipment
- progressive notes of a de-identified person's medical history
- infusion pumps, patient controlled analgesia pumps and syringe drivers
- organisation policy and procedures on which the candidate bases the planning

- modelling of industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must hold current registration as a Registered Nurse with Nursing and Midwifery Board of Australia.

HLTENN022 Contribute to the registration, eligibility and assessment of donors

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTEN521B and HLTEN522C. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Removed pre-requisites. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to register and assess blood donors for whole blood, red cells, platelets, plasma and other blood components donated as whole blood or through the process of apheresis. It does not include haemoglobin testing.

This unit applies to enrolled nursing work carried out in consultation and collaboration with registered nurses, and under supervisory arrangements aligned to the Nursing and Midwifery Board of Australia regulatory authority legislative requirements.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Register a donor giving blood and blood components	1.1 Identify whether the donor is a new, lapsed or regular donor and use appropriate documentation according to information gained 1.2 Use eligibility assessment tools in an appropriate manner and at a level and pace that elicits informative

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	responses
	1.3 Check donor records against responses, and identify and record discrepancies, inconsistencies, omissions and ambiguities in information, and report to designated personnel
	1.4 Respond to the donor's questions and, before seeking their consent, seek feedback from the donor to confirm that they understand the nature and purpose of procedures
	1.5 Record donor information clearly and accurately into the donor record, including the donor decision and signed consent
	1.6 Refer accurate information to the appropriate person in line with organisation policies and procedures, where donor information indicates unsuitability to donate
	1.7 Maintain confidentiality of the donor
2. Assess suitability for blood and blood component donation	2.1 Check the donor against selection criteria requirements for blood and blood component donations
	2.2 Provide accurate information about the nature and sequence of session activities appropriate to the donor's needs and concerns
	2.3 Explain clearly and sensitively to the donor where information obtained indicates they may not be able to donate, outlining the reasons for seeking further guidance
	2.4 Interpret haematological results to identify variation from normal health status and refer to registered nurse
	2.5 Determine that ante-cubital veins are easily accessible in both arms and, if not, refer to registered nurse
3. Observe a person's behaviour before and after donation and report any physical irregularity	3.1 Observe donor behaviour for any physical observations that may indicate a potential situation such as anxiety or fainting
	3.2 Alert supervising registered nurse and take action in

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	line with organisation policies and procedures to ensure donor safety
	3.3 Document and report incident to designated person in line with organisation policies and procedures

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTENN022 Contribute to the registration, eligibility and assessment of donors

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTEN521B and HLTEN522C. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Removed pre-requisites. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- undertaken work in adherence with Nursing and Midwifery Board of Australia professional practice standards, codes and guidelines
- registered and assessed 3 people as donors for blood or blood products.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- apheresis – the process of 'skimming off' the stem cells from blood to be used for transplant or stored in frozen form until needed
- organisation policy and procedures, including standard operating procedures (SOPs)
- documentation and components of donor declaration form
- importance and potential impact of the quality of the donation, and the reasons for careful selection of donors of blood or blood components including:
  - infectious diseases and their incubation periods
  - age, height and weight
  - health of donor including recent surgery, invasive procedures, immunisations, injury or illness
  - family health history

© Commonwealth of Australia, 2025 HumanAbility

  - frequency of donation
  - geographical locations prior to donation which require special consideration
  - lifestyle
  - medications
  - occupational activities that are considered hazardous
  - recreational activities that are considered hazardous
  - workers compensation
  - safety of blood supply
  - safety of recipients
  - safety of service provided to customers
  - safety of staff
  - production of a quality product
- types of donations including:
  - plasma
  - platelet
  - red blood cell plasma
- purpose and use of apheresis donations including timeframe requirements
- purpose and use of blood and blood products, including types and functions of infusion and transfusion
- safe disposal, and minimisation of waste of resources resulting from collection of unsuitable donations
- World Health Organisation guidelines including:
  - selection of blood donors
  - international travel and health vaccination requirements
- Australian code of good manufacturing practice for human blood and blood components, human tissues and human cellular therapy products
- Australian Red Cross service – for blood and blood products donations
- monthly index of therapeutic agents (MIMS)
- National Blood Transfusion Committee – safe transfusion practice.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources in line with the Australian Nursing and Midwifery Accreditation Council's Standards
- modelling of industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors

© Commonwealth of Australia, 2025 HumanAbility

In addition, assessors must hold current registration as a Registered Nurse with Nursing and Midwifery Board of Australia.

HLTENN023 Apply nursing practice in the respiratory care setting

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minimal change to knowledge evidence. Supersedes HLTEN609B

Application

This unit describes the skills and knowledge required to provide nursing care to a person with respiratory impairment in settings such as hospitals, community settings, hospices and long term care facilities.

Enrolled nurses providing respiratory nursing care need to hold and apply specialised in-depth knowledge, effectively integrate theory and practice, and make reliable clinical assessments and judgements.

This unit applies to enrolled nurses, registered with the Nursing and Midwifery Board of Australia, seeking specialisation in enrolled nurse work that is carried out in consultation and collaboration with registered nurses, and under direct or indirect supervisory arrangements aligned to the Nursing and Midwifery Board of Australia regulatory authority legislative requirements.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 HumanAbility

Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Contribute to the interdisciplinary health care team in caring a person with respiratory impairment	1.1 Work with the health care team, consulting with the registered nurse and team members in providing nursing care to the person with respiratory impairment 1.2 Evaluate, interpret and communicate person's respiratory function to relevant members of the health care team 1.3 Identify physical, psychological, social and economic factors relevant to the person's health care status, and the outcomes of planned care
2. Assist a person in maintaining optimal respiratory health	2.1 Identify factors impacting a person's respiratory status and re-prioritise care activities for the person rapidly when circumstances change 2.2 Participate in risk assessment identification and risk management processes for the person with complex respiratory impairment 2.3 Support the person, and family or carer as required, during pre-, intra- and post-diagnostic procedures, providing accurate information on the procedures 2.4 Identify responses of the person, family or carer to nursing interventions and their understanding of how to manage the respiratory impairment after discharge 2.5 Provide the person, family or carer with information about available community resources, and how to access them 2.6 Identify when the acuity of a person is beyond own skills and knowledge and promptly consult with registered nurse and relevant interdisciplinary health care team
3. Actively promote improvement and advancement of respiratory nursing care	3.1 Make appropriate proposals for nursing interventions in consultation with registered nurse to promote improved outcomes for the person and their condition 3.2 Evaluate nursing interventions provided and consider identified outcomes against evidence-based best practice in respiratory care nursing 3.3 Evaluate responses of the person, family or carer to health promotion and education resources, and

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	continuously improve promotions and resources based on feedback
	3.4 Seek out opportunities and participate in professional development, acquiring knowledge to guide own practice and acting as a resource for colleagues

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTENN023 Apply nursing practice in the respiratory care setting

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minimal change to knowledge evidence. Supersedes HLTEN609B

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- undertaken nursing work in accordance with Nursing and Midwifery Board of Australia professional practice standards, codes and guidelines
- performed the following nursing care interventions on no fewer than 3 people in a respiratory care setting in the workplace:
  - care of an arterial line
  - positive airway pressure (CPAP) and bilevel positive airway pressure (BiPAP)
  - care of permanent and temporary mechanical ventilation including suctioning and bagging
  - tracheal suction via an endotracheal tube (ETT)
  - assisted with the insertion or removal of pleural and intercostal drains
  - administered oxygen based on interpretation of oximetry readings or blood gas analysis in consultation with registered nurse
- in undertaking the above, use advanced communication skills and medical terminology to communicate effectively with the person, family or carer, and the registered nurse and other health professionals to record or report the person's outcomes.

© Commonwealth of Australia, 2025 HumanAbility

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- respiratory anatomy, physiology and pathology, sufficiently in-depth and specialised to make considered judgements and to make a professional contribution to respiratory nursing care
- respiratory conditions including:
  - acute respiratory distress syndrome
  - asthma
  - bronchitis, bronchiolitis, bronchiectasis (acute and chronic)
  - chronic obstructive airway disease
  - cystic fibrosis
  - emphysema
  - heamothorax
  - lung cancer
  - pulmonary oedema
  - pneumonia
  - pulmonary Embolism (PE)
  - pnuemothorax
  - sleep Apnoea
  - tuberculosis (TB)
- actual and potential problems from respiratory conditions including:
  - aspiration
  - hypoxia
  - hypercapnia
  - inability to clear secretions
  - inability to cough
  - inability to protect airway
  - respiratory failure
  - shortness of breath
- potential nursing interventions related to respiratory conditions including:
  - administration of non-invasive ventilation, CPAP and BiPAP
  - assisting with insertion and removal of pleural drains
  - care of an arterial line and interpretation of blood gas analysis
  - care of a person with a tracheostomy
    - tracheostomy dressing
    - tracheal suction via an endotracheal tube (ETT) or tracheostomy
  - interpreting the results of oximetry readings
  - respiratory assessment:

© Commonwealth of Australia, 2025 HumanAbility

    - chest auscultation
    - inspection
    - pulse oximetry
    - respiratory rate
    - pulse rate
    - blood pressure
    - sedation score
    - past medical history
    - accessory muscles in use when breathing
    - degree of shortness of breath (SOB)
  - interpreting results of spirometry testing
  - surgical procedures for respiratory conditions.

Assessment Conditions

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations cannot be provided in the workplace. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources in line with the Australian Nursing and Midwifery Accreditation Council's Standards including:
  - simulated learning environment with simulation manikins suitable for advanced clinical nursing skills
  - arterial lines
  - CPAP and BiPAP (non-invasive) devices
  - oxygen therapy equipment
  - pleural drains
  - suctioning equipment
  - vital sign monitoring equipment
  - progressive notes of a de-identified person's medical history
  - organisation policy and procedures on which the candidate bases the planning
- modelling of industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must hold current registration as a Registered Nurse with Nursing and Midwifery Board of Australia.

HLTENN024 Apply nursing practice in the cardiovascular care setting

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minimal change to knowledge evidence. Supersedes HLTEN610B

Application

This unit describes the skills and knowledge required to apply the principles of cardiovascular nursing care to provide holistic nursing care and maintain a person's optimal cardiovascular health.

Enrolled nurses working in cardiovascular nursing need to hold and apply specialised in-depth knowledge, effectively integrate theory and practice, and make reliable clinical assessments and judgements.

This unit applies to enrolled nurses, registered with the Nursing and Midwifery Board of Australia, seeking specialisation in enrolled nurse work that is carried out in consultation and collaboration with registered nurses, and under direct or indirect supervisory arrangements aligned to the Nursing and Midwifery Board of Australia regulatory authority legislative requirements.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential	*Performance criteria describe the performance needed to*

© Commonwealth of Australia, 2025 HumanAbility

outcomes	*demonstrate achievement of the element.*
1. Contribute to the interdisciplinary health care team in caring for a person with cardiovascular condition	1.1 Contribute information to nursing care plan that reflects the person's nursing needs, and include nursing actions to maximise cardiovascular function and minimise potential complications 1.2 Identify the role of specialist nursing and medical services in the care of the person with cardiovascular condition, and work within that context 1.3 Collaborate with community service agencies in partnership with the person, family or carer to maintain continuity of care 1.4 Identify factors relevant to the person's situation, including physical, psychological, social and economic impacts 1.5 Monitor and review data collected about the person and communicate to relevant interdisciplinary health care team members
2. Perform complex nursing interventions in the cardiovascular healthcare setting	2.1 Prioritise nursing interventions according to the person's needs and in consultation with registered nurse 2.2 Undertake appropriate pre-, intra- and post-diagnostic procedures in line with scope of practice and organisation policy and procedures, and in collaboration with the registered nurse 2.3 Participate in risk assessment identification and risk management processes for the person with cardiovascular condition 2.4 Apply complex decision-making processes to modify nursing interventions and use problem-solving approaches in response to changes in the person's condition 2.5 Identify when the acuity of a person's cardiovascular health is beyond own skill and knowledge, and refer promptly to registered nurse and relevant interdisciplinary health care team 2.6 Administer prescribed emergency medication based on sound knowledge of principles of drug actions and in accordance with organisation policies and procedures 2.7 Make appropriate proposals for nursing interventions in consultation with registered nurse to promote improved outcomes for the person and their condition

© Commonwealth of Australia, 2025 HumanAbility

3. Evaluate effectiveness of nursing interventions and planned care, and support continuing self-care	3.1 Evaluate nursing interventions provided and consider identified outcomes against evidence-based best practice in cardiovascular nursing care 3.2 Identify responses of the person, family or carer to nursing interventions and their understanding of ongoing management of the cardiovascular impairment 3.3 Identify opportunities where indicated, to provide the person, family or carer with information on available community resources and how to access them 3.4 Assess, prior to discharge, the person's understanding of their cardiovascular condition, medications and therapeutic regimes

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTENN024 Apply nursing practice in the cardiovascular care setting

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minimal change to knowledge evidence. Supersedes HLTEN610B

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- undertaken nursing work in accordance with Nursing and Midwifery Board of Australia professional practice standards, codes and guidelines
- performed the following nursing care interventions on no fewer than 3 people with a cardiovascular condition in the workplace:
  - administration of (non-invasive) continuous positive airway pressure (CPAP) and bilevel positive airway pressure (BiPAP)
  - peripherally inserted central catheter (PICC)/midline management
  - monitoring of electrocardiograph readings for abnormalities
  - under water seal drain management
- in undertaking the above, used advanced communication skills and medical terminology to communicate effectively with the person, family or carer, and the registered nurse and other health professionals to record or report the person’s outcomes.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

© Commonwealth of Australia, 2025 HumanAbility

- the following issues and manifestation, sufficiently in-depth and specialised to make considered judgements and to make professional contributions to cardiovascular nursing care:
  - physiology and pathophysiology related to cardiovascular issues
  - emergency care of cardiovascular issues (knowledge and execution)
  - clinical manifestations of chronic disease states
- cardiovascular conditions including:
  - congestive heart failure
  - acute pulmonary oedema
  - pulmonary embolism
  - arrhythmia:
    - ventricular tachycardia
    - ventricular fibrillation
    - asystole
    - symptomatic brady and tachycardia
    - atrial fibrillation
  - congenital heart defects:
    - accessory pathways
    - septal defects
    - tetralogy of Fallot
    - dextracardia
  - ischaemic heart disease - angina and myocardial infarction
  - heart valve dysfunction
  - sub-acute bacterial endocarditis
  - pericarditis
  - acute chest pain
  - cardiomyopathy
  - carotid stenosis
  - abdominal aortic aneurysm
  - peripheral vascular disease
  - deep vein thrombosis
  - actual and potential problems relating to cardiovascular conditions including:
    - electrolyte imbalance
    - fluid overload
    - hypoxia, hypoxaemia
    - chest pain
    - structural heart damage
    - sepsis
    - haemorrhage
    - neurovascular damage including cerebral vascular accident

© Commonwealth of Australia, 2025 HumanAbility

    - vessel occlusion
    - pneumothorax
    - pacemaker lead displacement
    - arrhythmia
    - exercise intolerance
  - cardiovascular procedures including:
    - cardiac stents
    - percutaneous transluminal coronary angioplasty **(**PTCA) with or without stent
    - pacemaker (temporary or permanent)
    - cardiac access vascular graft (CAVG)
    - mitral valvotomy
    - electrophysiology studies, with or without ablation
    - implantable cardioverter defibrillator (ICD)
    - cardioversion
    - echocardiogram
    - exercise stress test
    - nuclear medicine scans
    - transoesophageal echocardiogram (TOE)
    - hyper and hypo tension
    - pericardiocentesis
    - abdominal aortic aneurysm (AAA) repair
    - varicose veins
    - amputations
- actions designed to maximise cardiovascular function and minimise potential complications
- reflective practice and evidence-based best practice for cardiovascular nursing.

Assessment Conditions

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations cannot be provided in the workplace. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources in line with the Australian Nursing and Midwifery Accreditation Council's Standards including:
  - simulated learning environment with simulation manikins suitable for advanced clinical nursing skills
  - CPAP and BiPAP (non-invasive) devices
  - PICC lines and CVC lines
  - underwater seal drains
  - suctioning equipment
  - vital sign monitoring equipment

© Commonwealth of Australia, 2025 HumanAbility

  - progressive notes of a de-identified person's medical history
  - organisation policy and procedures on which the candidate bases the planning
- modelling of industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must hold a current registration as a registered nurse with Nursing and Midwifery Board of Australia.

HLTENN025 Implement and monitor care for a person with diabetes

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minimal change to knowledge evidence. Supersedes HLTEN611B

Application

This unit describes the skills and knowledge required to provide nursing care to a person with diabetes including assessing needs, planning and implementing complex nursing interventions, evaluating outcomes, and educating the person on his/her condition and available resources.

This unit applies to enrolled nursing work carried out in consultation and collaboration with registered nurses, and under supervisory arrangements aligned to the Nursing and Midwifery Board of Australia regulatory authority legislative requirements.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify diabetes care services in the Australian health care environment	1.1 Provide current accurate information on diabetes care and sources of funding for related services to the person, the family or carer, and to colleagues

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.2 Identify specialist services and complementary roles of organisations and individuals involved in supporting and delivering diabetes care
	1.3 Liaise with referring agencies and community organisations when providing diabetes care
2. Assess the needs of a person with diabetes	2.1 Apply knowledge of the pathophysiology of diabetes
	2.2 Perform holistic nursing assessment using a range of contemporary assessment tools, resources and strategies and incorporating review of the person's history, current situation and treatment regimes
	2.3 Determine the person's current understanding of their condition, self-management strategies and medications
	2.4 Identify possible factors impacting the person's health or significant alterations in the person's condition, based on own current knowledge of diabetes
	2.5 Identify the family or carer's understanding of and involvement in the person's diabetes care, and how this might impact the person's care planning and provision
3. Perform complex nursing interventions to assist a person to achieve and maintain optimal diabetes health	3.1 Manage nursing workload according to a person's needs and re-prioritise care activities for the person when circumstances change in consultation with registered nurse
	3.2 Prepare the person's care plan to ensure it reflects the complex care needs of a person with diabetes
	3.3 Identify responses of the person, family or carer to nursing interventions and their understanding of ongoing management of the person's condition, including strategies for self-management
	3.4 Administer prescribed emergency medication based on sound knowledge of principles of drug actions and in accordance with organisation policies and procedures
	3.5 Evaluate and interpret the person's blood and urine test results related to their diabetic condition, and communicate findings to the interdisciplinary health care

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	team
	3.6 Liaise with registered nurses about alterations in the person's condition while providing ongoing support of the person
4. Evaluate the care plan for a person with diabetes, and support a person's self-management	4.1 Critically review the care plan and modify according to the person's progress toward planned outcomes in consultation and collaboration with interdisciplinary health care team
	4.2 Evaluate nursing interventions provided and consider identified outcomes against evidence-based best practice in diabetes nursing care
	4.3 Identify opportunities where indicated to provide the person, family or carer with information on available community resources and how to access them
	4.4 Evaluate the person's understanding of their diabetes condition, medications, therapeutic regimes and self-management
	4.5 Promote the person's self-management of their condition and assist them to provide accurate information to their family or carer on their diabetes care needs
	4.6 Document uptake by the person of specific health promotion initiatives to support their self-management

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Assessment Requirements for HLTENN025 Implement and monitor care for a person with diabetes

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minimal change to knowledge evidence. Supersedes HLTEN611B

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- undertaken nursing work in accordance with Nursing and Midwifery Board of Australia professional practice standards, codes and guidelines
- provided nursing care and management of 2 people with diabetes in the workplace including:
  - a person who has become hypoglycaemic
  - a person who has become hyperglycaemic
- provided nursing care and management of 1 person with diabetes in the workplace or a simulated environment including:
  - a person who is demonstrating signs of ketoacidosis.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- anatomy, physiology and pathophysiology related to diabetes and diabetic conditions including:
  - Type 1 Diabetes
  - Type 2 Diabetes

© Commonwealth of Australia, 2025 HumanAbility

    - gestational diabetes mellitus
- potential problems related to care of a person with diabetes and the following conditions – with the knowledge sufficiently in-depth and specialised to make considered judgements:
    - hypoglycaemia
    - hyperglycaemia
    - ketoacidosis
    - hyper osmolar non-ketonic coma
    - retinopathy
    - infection
    - psychosocial issues
    - microvascular and macrovascular disease
- health promotion goals and their expected outcomes including:
    - exercise
    - diabetic diet
    - weight loss (body mass index or waist to hip ratio)
    - smoking cessation
    - foot and eye care
- factors influencing self esteem of the person with diabetes
- issues related to diabetes care delivery and diabetes-related services
- underlying environmental and social factors contributing to diabetes in the Australian general population, including the factors involved with higher rates experienced by Aboriginal and/or Torres Strait Islander people.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment as specified in the performance evidence. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources in line with the Australian Nursing and Midwifery Accreditation Council's Standards including:
    - glucometer
    - progressive notes of a de-identified person's medical history
    - organisation policy and procedures on which the candidate bases the planning
- modelling of industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must hold current registration as a Registered Nurse with Nursing and Midwifery Board of Australia.

HLTENN026 Apply nursing practice in the perioperative setting

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minimal change to knowledge evidence. Supersedes HLTEN612B

Application

This unit describes the skills and knowledge required to provide person-centred care for a person during anaesthesia, surgery and recovery in the perioperative nursing environment in operating theatres, post-anaesthesia care units and day surgery centres.

Enrolled nurses working in perioperative nursing need to hold and apply specialised in-depth knowledge, effectively integrate theory and practice, and make reliable clinical assessments and judgements.

This unit applies to enrolled nurses, registered with the Nursing and Midwifery Board of Australia, seeking specialisation in enrolled nurse work that is carried out in consultation and collaboration with registered nurses, and under direct or indirect supervisory arrangements aligned to the Nursing and Midwifery Board of Australia regulatory authority legislative requirements.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*

© Commonwealth of Australia, 2025 HumanAbility

1. Work as part of an interdisciplinary health care team in the perioperative environment	1.1 Work within scope of practice to support the interdisciplinary health care team in managing the care needs of the person in the perioperative environment 1.2 Contribute to effective team work and positive group dynamics of the interdisciplinary health care team 1.3 Maintain professional communication with all members of the perioperative team 1.4 Reflect the philosophical framework for managing perioperative care in own nursing practice
2. Contribute to preparation of a person for surgical intervention	2.1 Provide holistic person-centred care taking into account the person's physical, emotional, spiritual and cultural needs 2.2 Use contemporary perioperative assessment tools accurately and document any physiological and psychological variables in assessment and report to registered nurse and interdisciplinary team
3. Perform clinical nursing actions appropriate to care of a perioperative person	3.1 Use critical thinking and problem-solving approaches to prioritise and adapt nursing interventions to reflect changes in the person's condition, in consultation with registered nurse 3.2 Perform nursing interventions to assist the surgical team during surgical procedure 3.3 Recognise actual and potential manual handling and environmental hazards and take a pro-active approach in reducing risk and promoting safety 3.4 Check equipment according to manufacturers' instructions and ensure proper functioning, taking corrective action and reporting when faulty equipment or environmental hazards are detected 3.5 Apply principles of infection control to all activities and at all times in the perioperative environment in line with applicable standards and organisation policies and procedures 3.6 Identify when the acuity of a person is beyond own skills and knowledge and promptly consult with registered nurse and relevant interdisciplinary health car team members

© Commonwealth of Australia, 2025 HumanAbility

4. Actively promote improvement and advancement of perioperative nursing care	4.1 Evaluate nursing interventions provided and consider identified outcomes against evidence-based best practice in perioperative nursing 4.2 Seek out opportunities and participate in professional development, acquiring knowledge to guide own practice and acting as a resource for colleagues

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Assessment Requirements for HLTENN026 Apply nursing practice in the perioperative setting

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minimal change to knowledge evidence. Supersedes HLTEN612B

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- undertaken nursing work in accordance with Nursing and Midwifery Board of Australia professional practice standards, codes and guidelines
- applied specialised clinical nursing skills for 3 people during anaesthesia, surgery and recovery in perioperative nursing environment, including:
  - preparing and positioning the person for a surgical procedure
  - performing intra-operative observations and supporting scrub nurse with monitoring materials
  - maintaining the person’s airway before and after surgery
  - using oral suctioning techniques intra-operatively
  - collecting specimens for pathology.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- Australian College of Operating Room Nurses (ACORN) Standards for Perioperative Nursing

© Commonwealth of Australia, 2025 HumanAbility

- Australian Standards relating to hazards in the perioperative environment including electrical hazards, radiation hazards and sharps disposal
- complications of surgical procedures and their management, including how to provide emergency and first aid treatment
- complications associated with anaesthesia, including emergency treatment, infection control practices and organisation policies and procedures specific to perioperative environment
- legal and ethical considerations (national, State/Territory, local) relevant to the nursing profession and how these are applied in nursing practice
- policy statements, literature and guidelines from professional bodies associated with perioperative care and management, including ACORN
- medical terminology associated with perioperative care
- risk of falls post-surgery
- philosophical framework for perioperative nursing
- anaesthetic pharmacology
- positioning of a person for specific surgical procedures, including potential for post-operative pressure injury from incorrect position during surgery
- use of complex technologies including:
  - anaesthetic machines
  - lasers
  - cavitron ultrasonic surgical aspirator (CUSA)
  - endoscopic equipment
- actual and potential problems relating to perioperative care including:
  - electrolyte imbalance
  - fluid overload
  - reduced carbon dioxide
  - hypoxia/hypoxaemia
  - sepsis
  - haemorrhage
  - neurovascular damage
  - cerebral vascular accident
  - arrhythmia.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources in line with the Australian Nursing and Midwifery Accreditation Council's Standards
- modelling of industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

© Commonwealth of Australia, 2025 HumanAbility

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must hold current registration as a registered nurse with Nursing and Midwifery Board of Australia.

HLTENN027 Apply nursing practice in the hyperbaric environment

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minimal change to knowledge evidence. Supersedes HLTEN613B

Application

This unit describes the skills and knowledge required to provide nursing care to a person undergoing hyperbaric treatment in a hospital or specialised facility with a hyperbaric chamber or unit.

Enrolled nurses working in hyperbaric nursing need to hold and apply specialised in-depth knowledge, effectively integrate theory and practice, and make reliable clinical assessments and judgements

This unit applies to enrolled nurses, registered with the Nursing and Midwifery Board of Australia, seeking specialisation in enrolled nurse work that is carried out in consultation and collaboration with registered nurses, and under direct or indirect supervisory arrangements aligned to the Nursing and Midwifery Board of Australia regulatory authority legislative requirements.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 HumanAbility

Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Work in the hyperbaric environment	1.1 Identify roles and responsibilities of members of the interdisciplinary health care team in the hyperbaric environment
	1.2 Identify potential and actual hazards involved with working in the hyperbaric environment and observe workplace health and safety requirements in own practice
	1.3 Identify rationale for pre-hyperbaric treatment safety checklists and participate pre-hyperbaric treatment safety processes
	1.4 Identify potential causes of emergencies associated with the hyperbaric chamber and hyperbaric treatment and use appropriate methods to prevent emergencies
	1.5 Apply knowledge of the hyperbaric chamber and locate main oxygen valve for situations or emergencies where the valve will need to be shut off
	1.6 Set up the specific hyperbaric chamber equipment for treatments correctly and use problem-solving skills during hyperbaric treatments.
	1.7 Identify actual and potential contraindications to hyperbaric therapy both for the person undergoing hyperbaric treatment and for the health care team members
	1.8 Undertake annual hyperbaric medical and promote this requirement with colleagues
2. Contribute to holistic and specific assessment for hyperbaric treatment	2.1 Perform holistic assessment of the person in conjunction with the interdisciplinary health care team using resources and tools specific to the hyperbaric unit in line with organisation policies and procedures
	2.2 Identify possible psychological and physical complications of hyperbaric treatment for the person including contraindications, based on findings of the person’s assessment
	2.3 Discuss physical, psychological and social impacts of hyperbaric treatment with the person, family or carer to ensure their knowledge is sufficient for them to make informed consent
	2.4 Identify when the acuity of a person is beyond own skills and knowledge and promptly consult with

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	registered nurse and relevant interdisciplinary health care team members
3. Perform nursing interventions in the hyperbaric environment	3.1 Apply strategies for managing a person's anxiety during hyperbaric therapy
	3.2 Monitor and manage a person's drainage tubes including any interventions that relate to the use of suction in the hyperbaric chamber at depth and at surface
	3.3 Apply principles related to hyperbaric oxygen therapy when setting up and managing a range of breathing system in the hyperbaric chamber
	3.4 Perform wound management and record wound response to hyperbaric therapy and report to the interdisciplinary health care team
	3.5 Respond appropriately to hyperbaric emergencies or toxicity in line with organisation policies and procedures
	3.6 Use critical thinking and problem-solving approaches to propose and implement nursing interventions to reflect changes in the person's condition, in consultation with registered nurse
	3.7 Evaluate nursing interventions provided and consider identified outcomes against evidence-based best practice in hyperbaric nursing care

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTENN027 Apply nursing practice in the hyperbaric environment

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minimal change to knowledge evidence. Supersedes HLTEN613B

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- undertaken nursing work in accordance with Nursing and Midwifery Board of Australia professional practice standards, codes and guidelines
- performed nursing interventions for 3 different people undergoing a session of hyperbaric therapy in the workplace.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- applicable Australian Standards for work in compressed air and hyperbaric oxygen facilities
- basic structure and internal layout of a hyperbaric chamber
- common dive tables for hyperbaric treatment and their indications
- common treatment profiles for hyperbaric therapy and their indications
- conditions indicated and contraindicated for hyperbaric therapy treatment and the mechanisms of therapeutic benefit for each
- educational resources and professional organisations associated with hyperbaric therapy
- emergencies associated with the hyperbaric chamber and treatment including:
  - fire inside the chamber

© Commonwealth of Australia, 2025 HumanAbility

  - fire outside the chamber
  - emergency decompression
  - explosive decompression
  - uncontrolled compression
  - power failure
  - communication failure
  - chamber atmospheric contamination
  - isolation emergency including actual or potential violence
  - pneumothorax
  - cardiac arrest and airway management
  - hypoglycaemia
  - oxygen toxicity (central nervous system and pulmonary)
- hyperbaric chamber treatment including:
  - the chamber and sequence of events that occur during a treatment
  - how to observe air equalisation techniques
  - strategies for managing an anxious patient during hyperbaric treatment
  - prohibited items in the chamber
  - appropriate clothing for treatments
  - potential complications
  - location of main oxygen valve and how to shut it off when required
  - how to maintain hyperbaric chamber cleanliness
  - emergency procedures for fire and medical emergencies
- symptoms of hyperbaric CNS toxicity and appropriate actions in response to the symptoms
- indications for hyperbaric therapy including:
  - decompression sickness
  - carbon monoxide poisoning
  - smoke inhalation
  - osteoradionecrosis
  - selected wound healing
  - mixed non aerobic and aerobicinfections
  - air or gas embolism
  - osteomyelitis (refractory)
  - gas gangrene (clostridial myonecrosis)
  - soft tissue radionecrosis
  - crush injuries/compartment syndromes
  - compromised skin grafts/flaps
  - thermal burns
  - blood loss
  - some spider bites

© Commonwealth of Australia, 2025 HumanAbility

- legislative requirements for practice
- potential complications of hyperbaric therapy including:
  - cardiac arrest and airway management
  - hypoglycaemia
  - oxygen toxicity (central nervous system and pulmonary)
  - isolation emergency including actual or potential violence
  - pneumothorax
  - claustrophobia
  - sinus or dental barotrauma
  - lung barotrauma
- physiological effects of increased atmospheric pressure on the human body and of breathing 100 per cent oxygen (hyper oxygenation), helium or mixed gases under hyperbaric conditions
- rationale for annual staff hyperbaric medicals
- contraindications for hyperbaric therapy including:
  - pulmonary function tests
  - tissue perfusion tests
  - excessive alcohol intake
  - dehydration
  - asthma
  - anxiety states or claustrophobia
  - dental work in the previous 24 hours
  - strenuous exercise before (and after) therapy
  - flying within 24 hours of treatment (staff and water divers only)
- anatomy, physiology and pathophysiology related to hyperbaric issues, sufficiently in-depth and specialised to make considered judgements and to make professional contributions to hyperbaric nursing care
- specific procedures for identifying people with diabetes and others who have a pre-procedure blood sugar outside normal range
- special considerations for children, infants and babies
- theories of physics as they relate to hyperbaric treatments including:
  - Boyle’s law
  - Charles’s law
  - Henry’s law
  - Dalton’s law.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

© Commonwealth of Australia, 2025 HumanAbility

- use of suitable facilities, equipment and resources in line with the Australian Nursing and Midwifery Accreditation Council's Standards
- modelling of industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must hold current registration as a Registered Nurse with Nursing and Midwifery Board of Australia.

HLTENN028 Apply nursing practice in the paediatric care setting

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minimal change to knowledge evidence. Supersedes HLTEN614B

Application

This unit describes the skills and knowledge to provide care for babies, children and adolescents in primary health care, hospitals, hospices, homecare and community and long-term care facilities.

Paediatric or child health nurses working in the paediatric nursing environment need to hold and apply specialised in-depth knowledge, effectively integrate theory and practice, and make reliable clinical assessments and judgements.

This unit applies to enrolled nurses, registered with the Nursing and Midwifery Board of Australia, seeking specialisation in enrolled nurse work that is carried out in consultation and collaboration with registered nurses, and under direct or indirect supervisory arrangements aligned to the Nursing and Midwifery Board of Australia regulatory authority legislative requirements.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 HumanAbility

Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Contribute to interdisciplinary health care team in the paediatric setting	1.1 Identify roles and responsibilities of members of the health care team in the paediatric environment and support the team in managing the care needs of the paediatric person 1.2 Work effectively in the interdisciplinary health care team to foster positive group dynamics with other health care professionals 1.3 Provide care and advocate for the rights of the paediatric person, and their family or carer 1.4 Provide information to the person, family or carer on available community resources and how to access them 1.5 Maintain current knowledge of paediatric conditions and associated pathophysiology and apply to each clinical manifestation 1.6 Identify when the acuity of a paediatric person is beyond own skills and knowledge and promptly consult with registered nurse and relevant interdisciplinary health care team members
2. Clarify the impact of the paediatric condition on the person, family and carer	2.1 Perform holistic assessment of the person to identify the pathophysiology of the presenting or underlying condition and related issues for the paediatric person 2.2 Collect accurate health information from the person, family or carer to identify their understanding of the person's health condition and to identify self-management strategies and current treatment regime 2.3 Provide holistic person-centred nursing care to address the specific health condition and nursing interventions required for the person 2.4 Discuss impacts and complications of the person's condition with the person, or their family or carer, as appropriate within scope of practice 2.5 Manage nursing workload according to a person's needs and re-prioritise care activities for the person rapidly in changed circumstances 2.6 Support the person, and their family or carer as appropriate, during pre-, intra- and post-diagnostic procedures, also implementing health education strategies in relation to the procedures

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
3. Promote improvement of paediatric nursing care	3.1 Make appropriate proposals for nursing interventions in consultation with the registered nurse to promote improved outcomes for the paediatric person and their condition 3.2 Evaluate nursing interventions provided and evaluate the outcomes against evidence-based best practice in paediatric nursing 3.3 Evaluate responses of person, family or carer to health promotion and educational resources, and participate in organisation continuous improvement processes of these resources 3.4 Seek out opportunities and participate in professional development, acquiring knowledge to guide own practice and acting as a resource for colleagues

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTENN028 Apply nursing practice in the paediatric care setting

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minimal change to knowledge evidence. Supersedes HLTEN614B

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- undertaken nursing work in accordance with Nursing and Midwifery Board of Australia professional practice standards, codes and guidelines
- analysed health information and the clinical presentation of 3 people in the paediatric workplace environment to reach a substantiated conclusion about possible health care planning and nursing interventions related to their health condition, in consultation with a registered nurse
- performed the following nursing interventions on a paediatric person in the workplace or in a simulated environment:
  - collected a urine specimen from a person between the age of 0-12 months
  - inserted an indwelling catheter on a female
  - inserted an indwelling catheter on a male
  - inserted a nasogastric (NG) tube.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- complementary therapies used in holistic practice

© Commonwealth of Australia, 2025 HumanAbility

- childhood perceptions of health status
- progression through milestones and factors influencing growth and development
- cognitive and psychosocial development from birth to adolescence
- factors influencing self-esteem
- factors influencing learning needs
- factors influencing appropriate or inappropriate interactions of the parent, family or carer with the paediatric person
- how to participate positively as a member of an interdisciplinary health care team
- skills that support interpersonal and therapeutic relationships
- anatomy and physiology and pathophysiology of the paediatric person, sufficiently in-depth and specialised to make considered judgements and to make professional contributions to paediatric nursing care
- specialised knowledge of clinical manifestations of common paediatric conditions, including but not limited to:
  - allergies
  - asthma
  - cancer
  - cerebral palsy
  - epilepsy
  - infectious disease
  - injury
  - mental health condition
  - paediatric dermatology
  - Type 1 and Type 2 diabetes
- special health requirements related to paediatric conditions and issues, including but not limited to:
  - sleep disorders
  - nutritional disorders
  - feeding alternatives
  - health perceptions of the person
  - separation from parents, family or carer
  - congenital conditions
  - psychomotor dysfunction
  - alcohol-and other drug-induced disorders or injuries
  - physical and psychological abuse
  - near drowning
  - bed wetting.

© Commonwealth of Australia, 2025 HumanAbility

Assessment Conditions

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations cannot be provided in the workplace. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources in line with the Australian Nursing and Midwifery Accreditation Council's Standards including:
  - child and infant manikins appropriate for clinical skills simulation
  - indwelling catheters
  - vital signs equipment
  - assessment tools relevant to developmental milestones of an infant and child
  - progressive notes of a de-identified person's medical history
  - organisation policy and procedures on which the candidate bases the planning
- modelling of industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must hold current registration as a Registered Nurse with Nursing and Midwifery Board of Australia.

HLTENN029 Apply nursing practice in the contemporary aged care setting

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minimal change to knowledge evidence. Supersedes HLTEN615B

Application

This unit describes the skills and knowledge required to work effectively in the contemporary aged care environment providing specialised health care to support the continued independence of older people. It applies to care provided for older people in their own home, in community or day care centres, in acute or sub-acute hospital settings, and in residential high care or low care settings in aged care environments.

Enrolled nurses working in aged care nursing need to hold and apply specialised in-depth knowledge, effectively integrate theory and practice, and make reliable clinical assessments and judgements.

This unit applies to enrolled nurses, registered with the Nursing and Midwifery Board of Australia, seeking specialisation in enrolled nurse work that is carried out in consultation and collaboration with registered nurses, and under direct or indirect supervisory arrangements aligned to the Nursing and Midwifery Board of Australia regulatory authority legislative requirements.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

© Commonwealth of Australia, 2025 HumanAbility

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Address the health care needs of an older person in contemporary aged care settings	1.1 Identify physical and psychological effects of ageing on the human body and apply insights when providing information and support to the older person
	1.2 Recognise the significance of physical and psychosocial assessment when evaluating health of older people and maintain currency of own related knowledge
	1.3 Identify funding arrangements and associated documentation requirements that impact aged care provision, and ensure funding and documentation requirements are met as applicable
	1.4 Recognise crisis situations involving the older person and implement emergency management as required
	1.5 Adjust communication strategies appropriately when communicating with an older person who has sensory loss
2. Manage an older person's care using a person-centred approach to support continued independence	2.1 Use critical thinking and problem-solving approaches to prioritise and adapt nursing interventions to reflect changes in the person's condition
	2.2 Manage nursing workload according to a person's needs and re-prioritise care activities for the person rapidly when circumstances change
	2.3 Monitor own nursing interventions to ensure they support independence and person-centred care in collaboration with interdisciplinary health care team and the person
	2.4 Undertake appropriate pre-, intra- and post-diagnostic procedures for the person in line with organisation policy and procedures
	2.5 Identify and interpret rehabilitation principles that underpin appropriate nursing interventions for the older person and apply to nursing care as required
	2.6 Identify the person's understanding of their condition and current therapies and review their ability for self-management
	2.7 Confirm the person's condition, therapies and

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	capacity for self-management with the family or carer where appropriate
	2.8 Identify when the acuity of the older person is beyond own skills and knowledge and promptly consult with registered nurse and relevant interdisciplinary health care team members
3. Assess and respond to the needs of a person experiencing loss and grief	3.1 Identify the effects that experiencing grief and loss can have on a person's physical, emotional, cognitive, behavioural, social and spiritual domains
	3.2 Identify factors impacting or potentially impacting the person, family or carer's experience of grief and loss
	3.3 Encourage the person, family or carer experiencing loss or a complex grief reaction to verbalise their feelings, and provide support to them in that process
	3.4 Facilitate and assist the interdisciplinary health care team to appropriately communicate adverse news to an older person, family or carer in line with organisation policies and procedures
4. Actively promote improvement and advancement of aged care nursing	4.1 Communicate outcomes and proposed actions to the registered nurse and use a collaborative approach for follow up with interdisciplinary team
	4.2 Evaluate nursing interventions provided and consider identified outcomes against evidence-based best practice in aged care nursing
	4.3 Recognise and monitor the symptoms of stress and professional carer burnout in self, peers and colleagues, and refer to appropriate services within organisation policies and procedures and scope of practice
	4.4 Seek out opportunities and participate in professional development, acquiring knowledge to guide own practice and acting as a resource for colleagues

Assessment Requirements for HLTENN029 Apply nursing practice in the contemporary aged care setting

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minimal change to knowledge evidence. Supersedes HLTEN615B

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- undertaken nursing work in accordance with Nursing and Midwifery Board of Australia professional practice standards, codes and guidelines
- analysed health information and the clinical presentation of 2 older people in the workplace, to reach a substantiated conclusion about possible nursing interventions to support continued independence and specialised health care in consultation with a registered nurse, including:
  - monitoring and providing effective symptom management of pain, hydration and nutritional needs, oral health issues and elimination needs
  - applying person-centred care and principles of rehabilitation in nursing interventions
  - supporting self-management strategies including use of appropriate devices or aids.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- aged care system in Australia
- protocols for admission and transfer of older person to acute care environments
- aged care assessment and funding arrangements and associated documentation
- age-related adjustments and transitions for the older person

© Commonwealth of Australia, 2025 HumanAbility

- evidence-based practice in aged care environment
- health illness continuum model
- philosophy of loss and grief, and how to deal with others experiencing loss or complex grief reactions
- philosophy underpinning aged care and extended care management
- legal and ethical issues and considerations, and assessment tools relevant to the older person, including but not limited to:
  - advance care directives
  - *Aged Care Act 1997* (Cwlth)
  - Aged Care Funding Instrument (ACFI)
  - carers recognition legislation
  - aged care risk classification system
  - Code of ethics for nurses in Australia' and the 'Code of professional conduct for nurses' (Nursing and Midwifery Board of Australia)
  - Residential *Care Quality Assessment* (ResCareQA)
  - legal requirements associated with abuse of the older person.

Assessment Conditions

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations cannot be provided in the workplace. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources in line with the Australian Nursing and Midwifery Accreditation Council's Standards including
  - progressive notes of a de-identified person's medical history
  - advance care directives
  - organisation policy and procedures on which the candidate bases the planning
- modelling of industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must hold current registration as a Registered Nurse with Nursing and Midwifery Board of Australia.

HLTENN030 Implement and monitor care for a person with a stoma

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minimal change to knowledge evidence. Supersedes HLTEN616B

Application

This unit describes the skills and knowledge required to plan, implement and evaluate holistic care for the person with a stoma, applying the principles of contemporary stoma management.

Enrolled nurses working in stoma care nursing need to hold and apply specialised in-depth knowledge, effectively integrate theory and practice, and make reliable clinical assessments and judgements.

This unit applies to enrolled nurses, registered with the Nursing and Midwifery Board of Australia, seeking specialisation in enrolled nurse work that is carried out in consultation/collaboration with registered nurses and under direct or indirect supervisory arrangements aligned to the Nursing and Midwifery Board of Australia regulatory authority legislative requirements.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 HumanAbility

Elements define the essential outcomes of a unit of competency.	*The Performance Criteria specify the level of performance required to demonstrate achievement of the Element.*
1. Contribute to interdisciplinary health care team in caring for the person with a stoma	1.1 Work within scope of practice to support the interdisciplinary health care team in managing the person's stoma care needs and the needs of their family or carer 1.2 Identify specialist nursing and medical services and community agencies that support and deliver stoma care, and their possible role in long-term management of the person's stoma condition 1.3 Discuss nursing care management plan regularly with the registered nurse and other members of the interdisciplinary health care team 1.4 Work in partnership with the person and appropriate service providers and agencies to maintain continuity of care
2. Assess health care needs of a person with a stoma	2.1 Perform holistic health assessment of the person using a range of assessment tools relevant to person's care requirements 2.2 Collect accurate information in accordance with organisation policy and procedures 2.3 Identify physiological, pathological and congenital conditions leading to the person's stoma creation 2.4 Determine the person's own knowledge of their condition, therapies and self-management requirements, and how this might impact their care planning and provision 2.5 Identify family or carer's knowledge of and involvement in the person's stoma care condition, management and therapies 2.6 Identify possible psychological factors impacting the person with a stoma and their family or carer
3. Perform complex nursing interventions to assist a person with a stoma	3.1 Prepare the person's nursing care plan to ensure it reflects the care needs specific to stoma care requirements 3.2 Prioritise nursing interventions for the person according to their identified needs, including emergency

ELEMENT	**PERFORMANCE CRITERIA**
Elements define the essential outcomes of a unit of competency.	*The Performance Criteria specify the level of performance required to demonstrate achievement of the Element.*
	care of stoma
	3.3 Identify principles of contemporary stoma management and apply these within organisation policy and procedures when providing nursing care for the person
	3.4 Identify opportunities to provide health education to the person, and promote health and self-management of the stoma
	3.5 Provide the person with education to promote health and self-management of the stoma
	3.6 Identify responses of the person, family or carer to nursing interventions and their understanding of ongoing management of the person's condition, including strategies for self-management
	3.7 Communicate outcomes and proposed actions to the registered nurse and use a collaborative approach for follow up with interdisciplinary team
	3.8 Identify when the acuity of a person is beyond own skills and knowledge and promptly consult with registered nurse and relevant interdisciplinary health care team members
4. Evaluate progress toward expected outcomes of care	4.1 Critically review the nursing care plan and modify according to the person's progress toward planned outcomes, in consultation and collaboration with the registered nurse and health care team
	4.2 Evaluate the person's understanding of their stoma condition, medications, therapeutic regimes and self-management, and document their uptake of health promotion initiatives
	4.3 Evaluate nursing interventions provided and consider identified outcomes against evidence-based best practice in stoma nursing care
	4.4 Document outcomes of care and communicate findings to other members of the interdisciplinary health care team in accordance with organisation policy

Assessment Requirements for HLTENN030 Implement and monitor care for a person with a stoma

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minimal change to knowledge evidence. Supersedes HLTEN616B

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- undertaken nursing work in accordance with Nursing and Midwifery Board of Australia professional practice standards, codes and guidelines
- undertaken holistic assessment of at least 3 people using a range of assessment tools to identify the physiological, pathological or congenital conditions leading to stoma creation
- provided nursing care applying the principles of stoma management to 2 people with a stoma in the workplace including:
  - replacing a stoma drainage bag
  - assessing the stoma for signs of obstruction, prolapse, necrosis and impaired integrity.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- principles of contemporary stoma management
- health promotion activities appropriate for the person with a stoma and associated issues
- medical terminology associated with stoma management, including:
  - ostomy
  - colostomy

© Commonwealth of Australia, 2025 HumanAbility

    - ileostomy
    - urostomy
    - stricture
    - obstruction
    - prolapse
    - retraction
    - parastomal hernia
- nursing management of the person with a stoma who is undergoing surgery
- anatomy, physiology and pathophysiology related to stoma issues, sufficiently in-depth and specialised to make considered judgements and to make a professional contribution to the health care team
- processes for the emergency care of stomas and stoma management including:
    - pre-operative and pre-procedure bowel preparation
    - wound care specific to stoma operation perineal wounds:
        - jejunostomy
        - gastrotomy
        - caecostomy
        - gastrointestinal and genito-urinary fistula
- supporting bridge site care
- appliance and product selection and management
- how to manage skin and peristomal skin conditions
- how to manage feeding and drainage tubes
- how to manage urinary incontinence
- faecal incontinence – its types, causes, assessment and management
- skin care and products to assist in managing incontinence
- how to make long bags
- how to manage constipation, diarrhoea, constipation and flatus
- care of high output stomas
- odour control
- community services and resources for stoma care
- issues relating to stoma care including:
    - altered fluid and electrolyte states
    - nutrition, hydration
    - body image and sexuality
    - psychological and psycho-social considerations
    - stomal obstruction
    - peritonitis
    - necrosis
    - impaired stomal integrity
    - prolapse.

© Commonwealth of Australia, 2025 HumanAbility

Assessment Conditions

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations cannot be provided in the workplace. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources in line with the Australian Nursing and Midwifery Accreditation Council's Standards including:
  - progressive notes of a de-identified person's medical history
  - adult simulation manikin with stoma
  - stoma drainage bags
  - organisation policy and procedures on which the candidate bases the planning
- modelling of industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must hold current registration as a registered nurse with Nursing and Midwifery Board of Australia.

HLTENN031 Apply nursing practice in the contemporary mental health care setting

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Removed pre-requisites. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Supersedes HLTEN617C

Application

This unit describes the skills and knowledge required to work as part of the interdisciplinary health care team providing care for people requiring mental health services.

Enrolled nurses working in the mental health care need to hold and apply specialised in-depth knowledge, effectively integrate theory and practice, and make reliable clinical assessments and judgements.

This unit applies to enrolled nurses, registered with the Nursing and Midwifery Board of Australia, seeking specialisation in enrolled nurse work that is carried out in consultation and collaboration with registered nurses, and under direct or indirect supervisory arrangements aligned to the Nursing and Midwifery Board of Australia regulatory authority legislative requirements.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 HumanAbility

Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Work as part of an interdisciplinary health care team in mental health care	1.1 Contribute appropriately to support the interdisciplinary health care team in managing care of the person requiring mental health care 1.2 Contribute to achieving effective team work and supportive positive group dynamics when working with health care colleagues 1.3 Implement into own nursing practice the philosophical and policy frameworks for managing care for the person requiring mental health services 1.4 Identify the contributions of emergency services, referring agencies, hospital and community team staff and community support groups to the care needs of the person with a mental health condition 1.5 Participate safely as part of team in interventions involving chemical or physical restraint, and document in accordance with organisation policy and procedures 1.6 Identify when the acuity of a person is beyond own skills and knowledge and promptly consult with registered nurse and relevant interdisciplinary health care team members
2. Clarify the impact of mental health treatment and rehabilitation on the person, family or carer	2.1 Perform holistic assessment including mental health assessment of the person in consultation and collaboration with the registered nurse 2.2 Identify the impact of a mental health condition on the person and family or carer where appropriate 2.3 Identify opportunities where indicated, to provide the person, family or carer with information on availability and access to recovery-orientated health services and community resources 2.4 Provide the person with education to promote their well-being and self-management of their mental health condition
3. Relate therapeutically to a person with a mental health condition	3.1 Respond to the person's behaviour in a therapeutic manner, recognising antecedents for behaviour as appropriate 3.2 Acknowledge the person's individual experiences in a

	non-judgemental manner
	3.3 Demonstrate knowledge of the stages and philosophy of therapeutic relationships
	3.4 Prioritise care issues for the person in accordance with their presentation and behaviour
	3.5 Maintain professional boundaries with the person, and set appropriate limits for therapeutic interventions
	3.6 Recognise own verbal and non-verbal cues that may impact the person and others, and amend own communication practices as required
	3.7 Seek out opportunities and participate in professional development, acquiring knowledge to guide own practice
4. Evaluate the care plan for a person with mental health condition, and support a person's self-management	4.1 Critically review the care plan and propose changes or modifications according to the person's progress toward planned outcomes in consultation and collaboration with interdisciplinary health care team
	4.2 Evaluate nursing interventions provided and consider identified outcomes against evidence-based best practice in mental health nursing care
	4.3 Promote the person's self-management of their condition and assist them to provide accurate information to their family or carer on their mental health care needs
	4.4 Document uptake by the person of specific health promotion initiatives to support their self-management

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTENN031 Apply nursing practice in the contemporary mental health care setting

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Removed pre-requisites. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Supersedes HLTEN617C

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- undertaken nursing work in accordance with Nursing and Midwifery Board of Australia professional practice standards, codes and guidelines
- provided nursing care and management for 3 people with a mental health condition and documented progress towards planned nursing outcomes in the workplace, including the following complex issues:
  - non-compliance with medication
  - adverse effects of pharmacology used to treat mental health condition
  - risk of self-harm and requirements for physical restraint
  - alcohol and other drug misuse
  - coping skills
  - changes to sleep and concentration patterns.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- broad classifications of mental health conditions
- application of nursing theory to a mental health context

© Commonwealth of Australia, 2025 HumanAbility

- mental health pharmacology including therapeutic and adverse effects
- diagnostic tests used in mental health assessment and their significance
- ethical issues associated with use of antipsychotic medications
- concept of the national framework for recovery-oriented mental health services
- research related to mental health care and evidence based nursing practice
- legal and ethical considerations (national, State/Territory and local) regarding participation of the person and carer in planning and recovery, and how these are applied in organisations and individual practice, including:
  - codes of practice
  - discrimination
  - dignity of risk
  - duty of care
  - human rights
  - informed consent
  - mandatory reporting
  - practice standards
  - privacy, confidentiality and disclosure
  - policy frameworks
  - records management
  - rights and responsibilities of workers, employers and individuals accessing the service
  - specific mental health legislation and its impact on individual workers
  - work role boundaries, including responsibilities and limitations:
    - role of other workers
    - roles of family and carers
  - work health and safety
- national framework for recovery-orientated mental health services (Australian Government):
  - principles of recovery-oriented practice
  - evidence-based practice in the context of recovery
- culturally appropriate health promotion activities for persons with mental health conditions
- factors influencing self-esteem
- medical terminology associated with contemporary mental health care
- philosophy underpinning mental health care
- principles of mental health assessment and risk assessment
- specialised knowledge in the antecedents and clinical manifestations of mental health conditions
- appropriate of interventions involving chemical or physical restraint
- classification systems for mental health conditions, including:
  - Diagnostic and Statistical Manual of Mental Disorders (DSM-5)
  - Classification of Mental and Behavioural Disorders ICD-10.

© Commonwealth of Australia, 2025 HumanAbility

Assessment Conditions

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations cannot be provided in the workplace. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources in line with the Australian Nursing and Midwifery Accreditation Council's Standards including
  - progressive notes of a de-identified person's medical history
  - organisation policy and procedures on which to base the planning
- modelling of industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must hold a current registration as a registered nurse with Nursing and Midwifery Board of Australia.

HLTENN032 Apply nursing practice in the rural and remote setting

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Removed pre-requisites. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Supersedes HLTEN618C

Application

This unit describes the skills and knowledge required to adapt nursing practice in response to the unique working conditions in rural and remote environments that are impacted by isolation and distance with restricted access to specialist health practitioners and services.

Enrolled nurses work as part of a multidisciplinary health care team across a wide range of care levels and settings and emergency care services.

This unit applies to enrolled nurses, registered with the Nursing and Midwifery Board of Australia, seeking specialisation in enrolled nurse work that is carried out in consultation and collaboration with registered nurses and under direct or indirect supervisory arrangements aligned to the Nursing and Midwifery Board of Australia regulatory authority legislative requirements.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 HumanAbility

Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Establish the impact of rural and remote context on nursing practice	1.1 Establish the systemic impacts of location on healthcare services as a context for work. 1.2 Recognise individual situations where time, distance and environmental issues may affect a person's care 1.3 Gather and critically review information to identify gaps, benefits and limitations of health care service options and capacity for effective response 1.4 Engage with the community healthcare network to determine the interrelationships and opportunities for collaborative work practice
2. Adjust assessment and care practices to the rural and remote context	2.1 Prioritise and coordinate work team responsibilities in the context of location being beyond the timely reach of specialist medical assistance in consultation and collaboration with registered nurse 2.2 Adjust assessment tools and techniques within the constraints of environmental impacts on care and availability of resources in accordance with organisation policies and procedures 2.3 Address concerns with registered nurse related to stabilisation and transport of a person and requirements for further assessment and management 2.4 Evaluate options for transporting a person or waiting for medical assistance in relation to environmental issues, risks, transport availability and the person's condition 2.5 Re-prioritise nursing care activities rapidly when in changing or changed circumstances in collaboration with registered nurse 2.6 Use emerging health technologies to provide specialist healthcare services 2.7 Apply collaborative nursing practice models, which are sufficiently efficient, sustainable, flexible and responsive to rapidly changing needs of healthcare required
3. Contribute to improved outcomes in rural and remote communities	3.1 Review own practice and professional isolation in the work environment and identify opportunities for professional development

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	3.2 Use professional and community collaboration and networking to inform practice improvements
	3.3 Act as a resource for colleagues and other health professionals providing mentoring and coaching within authorised scope of practice
	3.4 Participate in organisation processes for continuous improvement of health care service delivery using own practice experience to inform contributions
	3.5 Seek and use community feedback on practice and service delivery in collaboration with registered nurse
	3.6 Identify and take opportunities to empower community members to seek healthcare, and participate in health promotion and illness prevention initiatives
	3.7 Provide community health education that targets specific areas of risk and concern in the community initiatives to address chronic disease risk factors and illness prevention using culturally appropriate modes of communication
	3.8 Recognise symptoms of stress and professional burnout in self, peers and colleagues, and refer to appropriate services within organisation policies and procedures and authorised scope of practice

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTENN032 Apply nursing practice in the rural and remote setting

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Removed pre-requisites. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Supersedes HLTEN618C

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- undertaken work in accordance with Nursing and Midwifery Board of Australia professional practice standards, codes and guidelines
- worked as part of the multidisciplinary health care team within scope of practice in the Australian rural and remote workplace setting for at least 3 of each of the following situations:
  - emergency situations involving stabilisation and transport
  - non-emergency situations
- responded to the required clinical interventions for 3 people to treat and manage the person’s condition, illness or injury as authorised by medical practitioner via communication modes such as phone, video or radio
- conducted 1 activity in workplace with the multidisciplinary health care team that supports improved outcomes of nursing practice in rural and remote contexts
- conducted 1 health education session to engage the community in development and ownership of health programs that meet locally specific health needs.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

© Commonwealth of Australia, 2025 HumanAbility

- changing demands for services in rural and remote communities in Australia and National E-Health Strategy
- current economic, political and socio-economic factors impacting rural and remote health care including:
  - funding arrangements including federal, State/ Territories and local government that impact availability of health services and health programs
  - expansion of scope of practice for nurses
  - shortage in health workforce
  - ageing population
  - prevalence of chronic disease
  - social disadvantage
- organisations in rural and remote areas and models of healthcare provided including:
  - Consumer Directed Care (CDC)
  - mobile health service
  - Person-Centred Care (PCC)
  - Primary Health Care (PHC)
  - tertiary level care (community or regional hospital)
- nursing practice models used in rural and remote contexts:
  - team nursing or 'shared care' approach
  - total patient care or patient focused care
  - quality-caring model (used in acute care)
  - process engagement or community health nursing (used in chronic disease management)
- assessment tools, techniques, procedures and nursing guidelines used in rural and remote contexts
- remote considerations in the provision of nursing care including:
  - how and when to access emergency response services
  - communication systems, equipment and methods available in remote situations
- emergency situations and the ways in which the care approach may be adjusted in the rural and remote context
- non-emergency situations and the ways in which the care approach may be adjusted in the rural and remote context
- emerging health technologies, their features and how they are used and accessed:
  - Telehealth services
  - mobile health services with specialised diagnostic equipment
  - hospital in the home services
- types of participants in a rural and remote multidisciplinary health care team and their roles:
  - Aboriginal health practitioner
  - community care worker
  - health care assistants

© Commonwealth of Australia, 2025 HumanAbility

  - medical practitioners
  - nurse practitioners
  - pharmacists
  - physiotherapists and occupational therapist
  - registered nurses and registered midwives
  - social workers
- options for transport may include emergency services using road, air or water
- sources of information on best practice nursing in rural and remote settings
- organisational processes and how they may be adapted and used in rural and remote context such as:
  - risk identification
  - and risk management processes
- community-based health services, public health services, social health care programs and health promotion programs
- community health education – health promotion activities, social media content and interactions, health information literature
- local and community culture including culturally appropriate health promotion activities.

Assessment Conditions

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations cannot be provided in the workplace. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources in line with the Australian Nursing and Midwifery Accreditation Council's Standards including:
  - progressive notes of a de-identified person's medical history
  - risk assessment tools or protocols for rural and remote health environment
  - nursing guidelines and organisation policies and procedures on which the candidate bases the care planning
- modelling of industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must hold a current registration as a registered nurse with Nursing and Midwifery Board of Australia.

HLTENN033 Research and report on nursing trends and practice

Modification History

Release	Comments
Release 1	New unit. This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages.

Application

This unit describes the skills and knowledge required to identify research needs, source and analyse emerging trends and best practice in nursing and report on the outcomes of research to inform continuous improvement at a systemic or organisational level.

This unit applies to enrolled nurses, registered with the Nursing and Midwifery Board of Australia, who work in collaboration with registered nurses, and under direct or indirect supervisory arrangements aligned to the Nursing and Midwifery Board of Australia regulatory authority legislative requirements.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify research needs	1.1 Identify opportunities for research through reflection on experience and outcomes of own nursing practice 1.2 Work with professional colleagues in relation to systemic change and areas for collaborative research 1.3 Identify and analyse internal and external factors that impact on the research process and the application of potential research outcomes 1.4 Select a focus for research and develop objectives

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	with clear links to workplace needs
2. Research nursing trends and best practice	2.1 Develop and document a research plan that includes clear information about objectives and methodologies
	2.2 Assess and select research strategies suited to areas of focus
	2.3 Access and explore information about current, emerging and innovative ideas and trends in nursing practice
	2.4 Source and collate evidence-based information about nursing best practice
3. Analyse researched information	3.1 Compare best practice evidence to current nursing practice and determine potential for development and change in own workplace
	3.2 Assess the strength, relevance, reliability and currency of information gathered by research in the context of the organisation's current nursing practice
	3.3 Identify and analyse specific ways in which researched information may be used or adapted for workplace improvement
	3.4 Assess the feasibility, benefits and risks associated with researched information and its potential use
	3.5 Develop substantiated positions and ideas from research and analysis
4. Report on research	4.1 Test and discuss positions developed from research through collaboration with colleagues
	4.2 Develop reports for relevant personnel using language and format appropriate to audience, purpose and context
	4.3 Incorporate reasoned argument and substantiated evidence into reporting
	4.4 Present research findings according to organisation standards and review processes

© Commonwealth of Australia, 2025 HumanAbility

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTENN033 Research and report on nursing trends and practice

Modification History

Release	Comments
Release 1	New unit. This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- planned, conducted and used at least 2 research projects to contribute to the continuous improvement of nursing practice at a systemic or organisational level in at least 1 workplace.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- ways in which own practice informs research
- processes for engaging others in the identification of research needs
- internal and external factors that potentially impact research and its application:
  - approval frameworks
  - organisation policies and procedures
  - resource constraints
  - health policy frameworks
  - national health priorities
- features and formats of research plans
- research strategies, how they are implemented and their application for different research objectives:
  - qualitative
  - quantitative
- evidence-based information – what it is, what it isn’t and how it is developed and used in healthcare

© Commonwealth of Australia, 2025 HumanAbility

- information sources for research in nursing practice, including:
  - existing research and literature
  - public and private health organisations
  - organisations in other industries
  - professional bodies
  - nurse practitioners
  - clinical nurse specialists
- processes that support analysis of information and how to use them, including:
  - comparing
  - contrasting
  - challenging
  - reflecting
  - distinguishing relevant from irrelevant
  - drawing interdisciplinary connections
  - making links between information and its application to the workplace
- report writing, including:
  - key inclusions in a research report
  - how to match report format, structure and content to audience and context
  - techniques for developing and substantiating positions and arguments in writing
  - use of referencing, and understanding of copyright and plagiarism.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must hold current registration as a Registered Nurse with Nursing and Midwifery Board of Australia.

HLTENN034 Contribute to the improvement of clinical practice

Modification History

Release	Comments
Release 1	New unit. This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages.

Application

This unit describes the skills and knowledge required to model high standards of performance, reflect on clinical work practices and contribute to organisation processes for systemic improvement.

This unit applies to enrolled nurses, registered with the Nursing and Midwifery Board of Australia, who work in collaboration with registered nurses, and under direct or indirect supervisory arrangements aligned to the Nursing and Midwifery Board of Australia regulatory authority legislative requirements.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Model high standards of performance	1.1 Make own clinical performance consistent with the organisation's vision and objectives
	1.2 Identify and use opportunities to provide support to colleagues
	1.3 Model respectful and positive communication
	1.4 Support collaboration and continuous improvement by sharing information, knowledge and experiences with others

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
2. Reflect on clinical work practices and potential improvements	2.1 Observe and reflect on the effectiveness of work practices in meeting desired outcomes 2.2 Identify opportunities for systemic improvements in own area of nursing practice 2.3 Discuss and explore challenges and ideas with registered nurse and interdisciplinary health care team members 2.4 Test ideas with registered nurse and interdisciplinary health care team in a positive and collaborative way 2.5 Gather and use information and feedback relevant to ideas from within and outside the interdisciplinary health care team
3. Participate in processes for systemic improvement	3.1 Recognise and take opportunities to provide input to organisation process for systemic improvements to clinical guidelines for nursing practice 3.2 Represent and reflect the perspectives and experience of self and colleagues in organisation forums 3.3 Engage with other health professionals about systemic aspects of clinical practice using accepted terminology 3.4 Present and argue informed and substantiated positions on ideas 3.5 Identify and articulate issues and practical processes for implementing change 3.6 Respond to questions about ideas expressed with confidence and relevant information 3.7 Provide timely feedback to the work team about outcomes

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

© Commonwealth of Australia, 2025 HumanAbility

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTENN034 Contribute to the improvement of clinical practice

Modification History

Release	Comments
Release 1	New unit. This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- contributed to the improvement of at least 1 clinical work practice through participation in organisational processes for systemic improvement.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- links between enrolled nursing practice and organisational vision and objectives and how they are demonstrated in clinical practice:
  - reproducibility and reliability
  - clinical flexibility to local circumstances
  - validity of health gains and costs predicted
  - health outcome is at an acceptable cost
- ways of supporting colleagues as an enrolled nurse:
  - informal mentoring and coaching
  - providing feedback on performance
- features of collaboration:
  - types of behaviours that support effective collaborative relationships
  - benefits of collaboration, including the value of collaboration as a problem-solving tool
  - different roles played by people in a collaborative process
  - problems encountered in a collaborative process and how they may be avoided or resolved

© Commonwealth of Australia, 2025 HumanAbility

    - participation in education of self, as well as individuals and groups in the work context
- types of clinical work practices where the enrolled nurse may be involved in continuous improvement, and the structures and processes that support the improvement process in relation to:
    - clinical governance
    - quality assurance and improvement
    - risk identification and management
    - recording of health information
    - clinical standards and guidelines
    - assessment tools
- sources of information that inform improvements in clinical practice and how these may be used:
    - organisational policies and procedures
    - vision statements
    - practice in other organisations
    - clinical research and literature reviews
    - evidence based nursing practice guidelines
- types of opportunities in health organisations to contribute at systemic level, how they are structured and key stakeholders involved:
    - relevant peak nursing bodies
    - committees
    - expert reference groups
    - conferences
    - nurse executives
    - nurse practitioners
    - risk management and quality assurance
    - forums
- strategies required for effective participation in organisational forums:
    - how to gather and prepare relevant information
    - techniques for structuring the presentation of information or ideas
    - processes and techniques to substantiate positions or ideas.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

© Commonwealth of Australia, 2025 HumanAbility

In addition, assessors must hold current registration as a Registered Nurse with Nursing and Midwifery Board of Australia.

HLTFSE001 Follow basic food safety practices

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Supersedes HLTFS207C

Application

This unit describes the skills and knowledge required to comply with personal hygiene, maintain food safety, contribute to cleanliness of food handling areas and dispose of food.

This unit applies to food services workers who work under supervision and within defined guidelines.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Comply with personal hygiene standards as required by the food safety program	1.1 Follow personal hygiene procedures 1.2 Report health conditions and/or illness and follow organisation procedures for continuing participation in food services

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	1.3 Follow organisation requirements for wearing bandages and dressings
	1.4 Wear appropriate clothing, personal protective clothing and footwear and maintain cleanliness to avoid contamination
	1.5 Follow hand washing procedures and use required facilities
2. Contribute to the cleanliness of food handling areas according to the food safety program	2.1 Maintain the workplace in a clean and tidy order to meet workplace requirements
	2.2 Comply with workplace measures to prevent pests entering food premises
	2.3 Identify and report indicators of pest presence
3. Follow food safety program	3.1 Handle and store food according to the food safety program
	3.2 Store, use and dispose of single use items appropriately to avoid damage and contamination
	3.3 Keep food for disposal separate and follow procedures for food disposal
	3.4 Identify and report processes and practices which are not consistent with the food safety program
	3.5 Take corrective action within level of responsibility
	3.6 Report any corrective action to supervisor and according to legislative and organisation documentation requirements

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTFSE001 Follow basic food safety practices

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Supersedes HLTFS207C

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- identified at least 4 appropriate times for hand washing and followed correct hand washing procedures
- cleaned and tidied work areas at least 2 times to avoid contamination and pests
- identified at least 2 food items for disposal and followed food disposal procedures
- identified, corrected and reported at least 2 processes or practices that were not consistent with food safety program.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- food safety program and procedures and consequences of not following these procedures
- current national, state or territory food safety laws, standards and codes, including:
  - meaning of contaminant, contamination and potentially hazardous foods as defined by the current code
  - hygiene actions that must be adhered to by businesses to avoid food-borne illnesses

© Commonwealth of Australia, 2025 HumanAbility

  - employee responsibility to participate in hygienic practices
  - reasons for food safety programs and what they must contain
  - role of local government regulators
  - basic aspects of hazard analysis and critical control points (HACCP) method of controlling food safety
- food hazards and major causes of food contamination and food-borne illnesses, including:
  - airborne dust
  - colleagues without appropriate training or understanding of good hygiene practices, policies and procedures
  - contaminated food
  - contaminated garbage
  - dirty equipment and utensils
  - equipment not working correctly, including fridge and temperature probes
  - items, including linen, tea towels and towels that may be contaminated with human waste, including blood and body secretions
  - not following organisation procedures
  - vermin
- sources and effects of microbiological contamination of food
- personal hygiene requirements, including:
  - appropriate bandages and dressings to be used when undertaking food handling
  - clothing and footwear requirements for working in and/or moving between food handling areas
  - reporting of illness
  - restrictions on wearing of jewellery and other adornments, such as nail polish
  - personal clothing maintenance, laundering and storage requirements
- workplace hygiene hazards when handling food and food contact surfaces, including:
  - pest containment requirements
  - responsibilities for maintaining the work area in a clean and tidy state
  - suitable standard for materials, equipment and utensils used in the food handling area
  - use and storage of cleaning equipment
  - food disposal requirements
  - waste collection, recycling and handling procedures
- minimum hand washing occasions:
  - before commencing or recommencing work with food
  - immediately after handling raw food, smoking, coughing, sneezing, blowing the nose, eating, drinking, touching the hair, scalp or any wound, and using the toilet.

Assessment Conditions

Skills must have been demonstrated in a workplace or a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

© Commonwealth of Australia, 2025 HumanAbility

- use of suitable facilities equipment and resources, including:
  - food service and food safety program policies and procedures
  - food service facilities, equipment and utensils for handling, storing and disposing of food and beverages
  - appropriate clothing and footwear
  - personal protective clothing and wound dressings
  - food and beverages
  - cleaning equipment
  - hand washing facilities and equipment
- modelling of industry operating conditions.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTFSE002 Provide ward or unit based food preparation and distribution services

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. MERGED HLTFS204D/HLTFS201D. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Removed prerequisite. Supersedes HLTFS204C

Application

This unit describes the skills and knowledge required to distribute and collect menus, prepare minor meals and refreshments, plate meals, distribute meals and provide general housekeeping functions.

This unit applies to workers who may have multi-functional or multi-skilled roles with duties which include food service work combined with a range of other duties (e.g. cleaning, portering, wardsperson, personal care, linen distribution and client transport).

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Distribute and collect menus	1.1 Distribute menus to clients receiving diet therapy or

Assessment Requirements for HLTFSE002 Provide ward or unit based food preparation and distribution services

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. MERGED HLTFS204D/HLTFS201D. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Removed prerequisite. Supersedes HLTFS204C

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has:

- followed established food safety, manual handling and other food services procedures when preparing food and distributing it to clients receiving diet therapy or nutritional support, including:
  - distributing and collecting menus from at least 2 clients
  - soliciting feedback from 2 clients and forwarded to appropriate person
  - plating, rethermalising or heating and distributing at least 3 main meals and beverages to clients
  - following appropriate procedures for at least 2 clients requiring assistance to sit
  - reporting the sufficiency or insufficiency of food intake of 2 clients to appropriate person and using organisational documentation and reporting technologies.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

© Commonwealth of Australia, 2025 HumanAbility

- food safety principles
- hazard analysis and critical control points (HACCP) principles
- legislative requirements of food service role
- causes of food contamination and cross-contamination
- factors that place client at nutritional risk
- customer service principles and techniques for encouraging meal choice and consumption
- microbiological basis for food deterioration and food poisoning
- role and need for special diets and nutritional support, including common types of special diets and nutritional supplements
- client special needs, including:
  - disabilities
  - eating difficulties
  - intellectual difficulties
  - frail and aged
  - confusion and dementia
  - nutrition risk factors
  - metabolic disorders
  - different cultural requirements
  - require diet supplements
- organisational procedures relating to food services, including:
  - food safety program
  - menu ordering and processing system
  - meals distribution equipment and operational procedures
  - manual handling and infection control
  - procedures for delivery of meals to potentially infectious clients
  - rethermalise and reheating procedures
  - reporting and documentation requirements, including client satisfaction and consumption
- ordering, documentation and reporting technologies.

Assessment Conditions

Skills must have been demonstrated in a workplace or a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities equipment and resources, including:
  - food service and food safety program policies and procedures
  - food service facilities, equipment and utensils for handling, preparing, storing, heating, transporting and disposing of food and beverages
  - ordering, documentation and reporting technologies
  - menus, recipes and associated ingredients
  - appropriate clothing and footwear

© Commonwealth of Australia, 2025 HumanAbility

  - personal protective clothing and wound dressings
  - food and beverages
  - cleaning equipment
  - hand washing facilities and equipment
- modelling of industry operating conditions.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTFSE003 Perform kitchenware washing

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Removed prerequisite. Supersedes HLTFS205D

Application

This unit describes the skills and knowledge required to stack, wash, dry and store dishes, kitchenware and associated implements.

This unit applies to food services staff who work under supervision. Work is usually performed within a prescribed range of functions involving known routines and procedures.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Wash kitchenware and associated items in a dishwasher	1.1 Sort and stack kitchenware and items safely 1.2 Load dishwasher safely and correctly 1.3 Measure and use correct amount of dishwashing detergent

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	1.4 Set the correct cycle of the dishwasher
	1.5 Dispose of waste hygienically
2. Hand wash and dry kitchenware	2.1 Wash dishes and other items safely and at the correct temperature
	2.2 Use correct washing implements
	2.3 Remove stains from pots and pans in the washing process
	2.4 Follow temperature standards according to food regulations
	2.5 Wash and disinfect dishes
	2.6 Use correct drying method
1. Store kitchenware	3.1 Take dry kitchenware and other items to storage area and stack safely
	3.2 Dispose of cracked, chipped or broken kitchenware appropriately

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTFSE003 Perform kitchenware washing

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Removed prerequisite. Supersedes HLTFS205D

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has :

- operated dishwasher safely and in accordance with manufacturer's recommendations at least 2 times, including:
  - stacking kitchenware
  - using correct chemicals
  - unstacking and storing kitchenware
- hand washed and dried at least 2 items using the correct water temperature, chemicals and personal protective clothing
- identified and disposed of at least 2 cracked, chipped or broken kitchenware items.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in the elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role. This includes knowledge of:

- legal and organisational requirements regarding:
  - infection control
  - manual handling

© Commonwealth of Australia, 2025 HumanAbility

- temperature requirements for hand and machine washing, rinsing and drying
- personal protective clothing.

Assessment Conditions

Skills must have been demonstrated in a workplace or a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities equipment and resources, including:
  - commercial dishwasher and hand dishwashing facilities, detergents and equipment
  - personal protective clothing
  - kitchenware
  - kitchenware storage facilities
- modelling of industry operating conditions.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTFSE004 Serve cafeteria customers

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Removed prerequisite. Supersedes HLTFS206D

Application

This unit describes the skills and knowledge required to take and process food and beverage orders, handle financial transactions and maintain product displays in a cafeteria environment.

This unit applies to cafeteria workers in a range of settings. Workers at this level work under supervision with limited responsibility.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Carry out cash control procedures	1.1 Receive and check cash for float and report errors to supervisor 1.2 Carry out reconciliation of takings and report errors to supervisor

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
2. Prepare *product* displays	2.1 Display products using manufacturer and organisation recommended display techniques
	2.2 Group products logically for displays
	2.3 Display products in accordance with temperature controls and organisation policy and procedure
3. Take and process orders	3.1 Greet customers promptly and politely
	3.2 Give customers advice on product selection
	3.3 Promote house specials and create and utilise sales opportunities
	3.4 Process payments and issue receipts according to standard organisation procedure

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTFSE004 Serve cafeteria customers

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Removed prerequisite. Supersedes HLTFS206D

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- processed at least 3 orders efficiently and correctly
- accurately managed 3 cash transactions
- displayed both refrigerated and non-refrigerated food products appropriately
- advised at least 2 clients on products.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- range of products and services
- legal considerations, including:
  - food safety
  - workplace health and safety (WHS), including manual handling
  - basic Australian consumer law
  - pricing, including goods and services tax (GST)

© Commonwealth of Australia, 2025 HumanAbility

- cafeteria policies and procedures in relation to:
  - customer service
  - exchanges and returns
  - bag checking
  - product display
  - handling, packing and wrapping goods or merchandise
  - stock availability
  - cleaning and waste disposal
  - open and close procedures
- cash and non-cash handling procedures, including:
  - balancing point-of-sale equipment
  - calculating non-cash documents
  - change required, denominations of change and tendering change
  - counting cash
  - maintenance of cash float
  - opening and closing point-of-sale terminal
  - recording and transferring takings
  - security of cash and non-cash transactions
- functions and operation of point-of-sale equipment
- key features of a calculator
- food products characteristics and their effects on preparation and handling requirements for display.

Assessment Conditions

Skills must have been demonstrated in a workplace or a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities equipment and resources, including:
  - cash register or other point-of-sale equipment
  - heating and refrigeration equipment
  - cafeteria policies and procedures
  - food and beverages
- modelling of industry operating conditions, including:
  - customer interaction
  - cash handling.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTFSE005 Apply and monitor food safety requirements

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Removed prerequisite. Supersedes HLTFS310C

Application

This unit of competency describes the skills and knowledge required to control and monitor food safety and respond to non-conformance as required by the food safety program.

This unit applies to food services workers who implement the requirements of the food safety plan. Work is performed under supervision and within defined guidelines.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Implement and monitor the food safety program	1.1 Identify food safety hazards and respond to unsafe food and complaints 1.2 Monitor and control food safety hazards in accordance with food safety program requirements

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	1.3 Follow procedures to identify and separate product which is or may be non-conforming and/or implement other necessary corrective action
	1.4 Promptly report non-conformance where food safety control requirements are not met
	1.5 Record results of monitoring and maintain records in accordance with food safety program requirements
2. Assist in the identification of breaches of food safety procedures	2.1 Assist in identifying potential and actual unmet food safety requirements
	2.2 Identify practices or processes in own work that could result in unsafe food
	2.3 Participate in investigating and reporting on unsafe food as identified by internal monitoring and/or customer complaints

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTFSE005 Apply and monitor food safety requirements

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Removed prerequisite. Supersedes HLTFS310C

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- monitored the implementation of the food safety program, including:
  - using 2 monitoring methods
  - identifying 2 unsafe food items
  - implementing corrective action for addressing 2 unsafe food items and reported to supervisor
- identified 2 potential or actual food safety hazards through monitoring or client complaint and investigated processes that contributed to the breach and recommended corrective action.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- food safety program requirements for:
  - monitoring
  - hazard analysis and critical control points (HACCP)

© Commonwealth of Australia, 2025 HumanAbility

    - methods of control, especially time and temperature controls used in the receiving, storing, preparing, processing, displaying, serving, packaging, transporting and disposing of food
    - corrective action
    - food separation and recall procedures for unsafe food
    - reporting and documenting
- food safety hazards, the conditions under which they occur, and the possible consequences for:
    - biological agents in food
    - chemical agents in food
    - physical agents in food
    - condition of food
- monitoring methods, including organisational procedures, taking temperature and pH measurements, collecting samples and visual inspection
- high risk individuals, including:
    - children or babies
    - pregnant women
    - aged persons
    - people with immune deficiencies or allergies
    - chronically unwell.

Assessment Conditions

Skills must have been demonstrated in a workplace or a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities equipment and resources, including:
    - food service and food safety program policies and procedures
    - food service facilities, equipment and utensils for handling, preparing, storing, heating, transporting and disposing of food and beverages
    - monitoring equipment
    - appropriate clothing and footwear
    - personal protective clothing and wound dressings
    - food and beverages
    - cleaning equipment
    - hand washing facilities and equipment
- modelling of industry operating conditions.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTFSE006 Prepare foods suitable for a range of client groups

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Removed prerequisite. Supersedes HLTFS302D

Application

This unit describes the skills and knowledge required to prepare and present meals in a manner that meets the nutritional requirements of client groups in a range of health and community services and food service settings.

This unit applies to food services staff with well developed skills where some discretion and judgement is required. Individuals will take responsibility for their own outputs and may have limited responsibility for the output of others.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Identify the *client groups* in a range of settings	1.1 Identify client groups 1.2 Identify and confirm the nutritional needs of the client groups in accordance with organisation procedures,

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	dietition and medical staff
	1.3 Identify a range of *foods* that meet the nutritional needs of the client groups in accordance with organisational guidelines
2. Select appropriate foods for specific client groups	2.1 Select appropriate foods for menu items to meet the nutritional needs of specific client groups and to promote healthy eating
	2.2 Select appropriate standard recipes
3. Prepare, cook and serve *meals* suitable for specific client group	3.1 Prepare food by accurately following standard recipes to ensure product consistency, nutritional integrity and to minimise wastage
	3.2 Modify food texture to meet the needs of client groups and organisation standards
	3.3 Use portion control equipment to plate meals in accordance with organisation requirements
	3.4 Serve meals in an appeasing and attractive manner
4. Follow procedures for safe food preparation	4.1 Monitor workplace safety and take action to identify and prevent hazards
	4.2 Promptly rectify faults to equipment or refer promptly for remedial action
	4.3 Use suitable food preparation and cookery methods to maximise nutritional value of foods prepared and maintain food safety
	4.4 Use infection control and hygiene procedures according to legislative and organisation guidelines
	4.5 Discard out-of-date food and ingredients
	4.6 Comply with cleaning, sanitation and waste storage and disposal practices
	4.7 Receive, store, prepare, cook, transport, serve and handle food to prevent deterioration, contamination and the growth of microorganisms
	4.8 Store leftover food safely and hygienically and use within a safe period of time or discard according to organisation procedures

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
5. Evaluate meals and work performance	5.1 Seek feedback from clients to determine levels of satisfaction
	5.2 Evaluate meals against organisation standards and client satisfaction
	5.3 Seek advice and feedback from colleagues and supervisor regarding client feedback and work performance
	5.4 Use advice and feedback to identify areas for development and opportunities for continuous improvement of work standard

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTFSE006 Prepare foods suitable for a range of client groups

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Removed prerequisite. Supersedes HLTFS302D

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- selected appropriate recipes and prepared a different main meal suitable for each of the following clients:
  - client with a specific cultural requirement
  - client with an allergy
  - client with restricted diet due to drug-food interactions
  - client with swallowing issues requiring food texture modification.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- food safety principles and regulations
- food safety hazards and risks
- food safety program requirements
- basic cookery methods, including the principles of bulk cooking

© Commonwealth of Australia, 2025 HumanAbility

- client conditions and associated needs and requirements
- specific dietary requirements, including:
  - coeliac
  - diabetes
  - food allergies
  - food intolerances
  - swallowing problems requiring food texture modification
  - malnutrition
- current Australian Standards for texture modified food and fluids
- food and fluid texture modification techniques
- different cultural requirements relevant to client group and individuals, including:
  - halal
  - Hindu
  - kosher
  - vegetarian
  - vegan
- foods that promote good health and principles of nutrition, including food selection and cookery methods that comply with the current *Dietary Guidelines for Australians* for the general population, including adults, children and adolescents
- additional dietary guidelines for specific populations, including older people and unwell people
- key health and legal consequences of failing to address special requirements:
  - drug-food interactions
  - allergic reactions
  - anaphylaxis
  - food sensitivity or intolerance reactions
  - choking.

Assessment Conditions

Skills must have been demonstrated in a workplace or a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities equipment and resources, including:
  - food service and food safety program policies and procedures
  - food service facilities, equipment and utensils for handling, preparing, storing, heating, transporting and disposing of food and beverages
  - menus, recipes and associated ingredients
  - appropriate clothing and footwear
  - personal protective clothing and wound dressings
  - food and beverages
  - cleaning equipment

© Commonwealth of Australia, 2025 HumanAbility

  - hand washing facilities and equipment
  - manufactures' manuals for kitchen equipment
  - food packaging and storage requirements
- modelling of industry operating conditions.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
program	1.2 Support people in the food area to meet food safety requirements
	1.3 Instruct food handlers on food safety program and legal requirements for completing food safety records
2. Control food safety in the workplace	2.1 Identify processes and procedures that have or could result in a food safety breach
	2.2 Implement procedures and controls for responding to and preventing food safety breaches
	2.3 Investigate actual and potential non-conformance and complaints from clients relating to food safety
	2.4 Respond to non-conformance and follow procedures to identify, separate and/or recall non-conforming food
	2.5 Develop or revise procedures to support food safety control and prevent further breaches
	2.6 Communicate all additional and/or revised processes and procedures to food handlers

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTFSE007 Oversee the day-to-day implementation of food safety in the workplace

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Supersedes HLTFS309C

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- supervised workplace food safety program by:
  - communicating food safety requirements to at least 2 colleagues
  - identifying and revising at least 2 policies or procedures that may result in a food safety breach and communicating changes to colleagues
  - investigating at least 2 breaches or complaints and implemented appropriate corrective action and controls.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal obligations for food safety:
  - personal and company liability
  - relevant national, state/territory and industry-specific legislation and regulations
  - client requirements
- principles of a systematic approach to managing food safety, which includes:
  - identification of hazards that are likely to occur

© Commonwealth of Australia, 2025 HumanAbility

  - establishing appropriate methods of control
  - monitoring controls
  - describing corrective action to be taken if control conditions are not met
  - recording information
- procedures for:
  - identifying, separating and recalling non-conforming product
  - handling, preparation, processing, display, packaging and storage requirements of materials and products used in the food handling area
  - reporting and record keeping
  - maintaining the food handling area:
    - cleaning and sanitation
    - pest control
    - waste management and food disposal
    - equipment calibration
    - temperature measuring devices.

Assessment Conditions

Skills must have been demonstrated in a workplace or a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities equipment and resources, including:
  - food service and food safety program policies and procedures
  - food service facilities, equipment and utensils for handling, storing and disposing of food and beverages
  - appropriate clothing and footwear
  - personal protective clothing and wound dressings
  - food and beverages
  - cleaning equipment
  - hand washing facilities and equipment
- modelling of industry operating conditions.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTFSE008 Conduct internal food safety audits

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Removed prerequisite. Supersedes HLTFS312D

Application

This unit describes the skills and knowledge required to plan and conduct a food safety audit and to report and follow up audit outcomes.

This unit applies to any worker involved in internal auditing against the current food safety standards. At this level, workers would be required to exercise judgement within clearly defined guidelines.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Plan a *food safety audit*	1.1 Identify and locate information and resources required to conduct the audit 1.2 Develop and negotiate an audit plan with the food

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	business to meet audit scope
2. Conduct a food safety audit	2.1 Collect information that is adequate, representative and meets audit requirements
	2.2 Analyse information to assess adequacy of the food safety program
	2.3 Review records to assess compliance with the food safety program
	2.4 Assess compliance with the food safety program in the food business
	2.5 Inspect premises and transport vehicles, as required, to confirm that they meet the design and construction requirements set out by food safety legislation
	2.6 Identify areas requiring corrective action
3. Report and follow up audit outcomes	3.1 Report situations presenting an imminent and serious risk to the safety of food in accordance with legislative requirements
	3.2 Prepare audit reports to address audit scope requirements
	3.3 Communicate the results of the audit to the food business and to enforcement agencies as required by legislation
	3.4 Confirm areas requiring corrective action with the food business
	3.5 Develop a corrective action plan
	3.6 Confirm implementation of corrective action as set out in the corrective action plan
	3.7 Review corrective action and implement follow-up requirements

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

© Commonwealth of Australia, 2025 HumanAbility

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTFSE008 Conduct internal food safety audits

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Removed prerequisite. Supersedes HLTFS312D

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- planned, conducted and documented at least 2 food safety audits to meet audit scope, legal and organisational requirements of food business.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- relevant sections of the food standards codes, legislation, industry guidelines and food processes relevant to health and community services sectors and necessary to verify food safety compliance
- purpose, scope and stages of the internal food safety audit
- legal and organisational requirements and processes for:
  - internal and external second or third-party audits
  - internal and external audit roles, responsibilities and legal liabilities
  - prescribed fees, levies and charges
  - appropriate ethical conduct of auditors
  - certification and/or registration of auditors and authorised officers

© Commonwealth of Australia, 2025 HumanAbility

    - food safety and the purpose and intent of current legislation
    - reporting findings of the audit, conflict of interest, confidentiality, rights of appeal and giving evidence in court
    - reporting non-conformities that present an imminent and serious risk to the safety of food
    - business classification and scope and frequency of audit
    - training and assessment requirements for food safety workers and supervisors
    - minimum standards of design and construction required of food premises, fixtures, fittings, equipment and transport vehicles as required by food safety legislation and relevant Australian Standards
- audit procedures and techniques:
    - recording and reporting requirements
    - business systems and related reference documents and appropriate application of these in an audit
    - data analysis methods
    - techniques for collecting information, including choice of appropriate methods to ensure data is adequate and representative
- food safety program procedures and requirements
- food safety hazards and associated risks
- where food business control methods or limits vary from industry standards or where there are no industry standards, technical knowledge required to assess data used by the business to validate acceptable limits
- hazard analysis and critical control points (HACCP) procedures, including:
    - techniques for identifying hazards that may be reasonably expected to occur
    - determining appropriate control methods
    - monitoring and record keeping
    - validating and corrective action requirements.

Assessment Conditions

Skills must have been demonstrated in a workplace or a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities equipment and resources, including a real food business within the health or community services sectors where food safety hazards are identified and controlled by a food safety program
- modelling of industry operating conditions.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

- In addition, the person assessing this unit of competency must be a competent and approved food safety auditor, as defined by food safety legislation.

HLTFSE009 Apply cook-freeze and reheating processes

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Removed prerequisite. Supersedes HLTFS203D

Application

This unit describes the skills and knowledge required to freeze, thaw and reheat food to ensure microbiological safety and palatability.

This unit applies to food services staff who work under supervision.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Receive and store goods in accordance with appropriate food hygiene and health standards	1.1 Check delivered goods to ensure correct quantities, appropriate use-by dates and temperature 1.2 Record temperature check results 1.3 Move stock to freezer storage 1.4 Check and record freezer temperatures according to

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	requirements
	1.5 Report departure from established standards concerning the receipt of goods, temperature checks and stock quality
	1.6 Follow stock rotation procedures
	1.7 Discard expired stock
2. Prepare frozen food for reheating	2.1 Remove required items from freezer and place in chiller according to established procedures of the food service
	2.2 Space trays to permit air circulation
	2.3 Relax product to 0-4 degrees Celsius within 24 hours
	2.4 Safely transport to point of service while maintaining correct temperatures
3. Reheat food product	3.1 Pre-heat oven to meet temperature standards
	3.2 Prepare product for reheating
	3.3 Space trays to allow air flow
	3.4 Use reheating times according to manufacturer's recommendations, oven type, loading procedures and other established procedures for the food service
	3.5 Check and record product temperature
	3.6 Clean thermometers between checking each item
	3.7 Undertake reheating of non-relaxed food in emergencies according to established procedures of the food service
4. Serve reheated food	4.1 Transfer reheated food to heated bain-marie
	4.2 Maintain temperature at 70 degrees Celsius
	4.3 Minimise warm holdings
	4.4 Maintain portion control
	4.5 Serve or deliver the meal at a temperature that complies with food safety standards and policy of the food service

Assessment Requirements for HLTFSE009 Apply cook-freeze and reheating processes

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Removed prerequisite. Supersedes HLTFS203D

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has:

- applied the correct procedures to handle 3 delivered food items, including:
  - receiving and storing goods
  - freezing and storing frozen food
  - relaxing frozen food
  - reheating food products
- reheated 2 items of non-relaxed food to meet a supply emergency in accordance with established procedures.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- food storage and packing requirements
- hazard analysis and critical control points (HACCP)
- workplace health and safety (WHS), infection control and hygiene regulations

© Commonwealth of Australia, 2025 HumanAbility

- temperature specifications for the maintenance of food safety and quality
- essential cook-freeze and reheating equipment and purposes
- characteristics and uses of different pre-cooked food types subject to chilling and freezing:
  - culinary terms and trade names
  - bulk foods
  - plated meals
  - sous-vide products
  - meals-on-wheels
  - takeaway meals
- contents of stock date codes and rotation labels
- stock rotation principles, including first in first out
- indicators of spoilage and contamination of chilled and frozen food items in storage
- food safety procedures and methods for handling and serving a variety of uncooked and pre-cooked food:
  - thawing
  - transferring
  - rethermalising
  - maintaining reheated food items
- quality indicators for rethermalised food items:
  - appearance
  - colour
  - consistency
  - moisture content
  - shape
  - size
  - taste
  - texture.

Assessment Conditions

Skills must have been demonstrated in a workplace or a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities equipment and resources, including:
  - food service and food safety program policies and procedures
  - food service facilities, equipment and utensils for handling, storing, freezing and reheating food
  - appropriate clothing and footwear
  - personal protective clothing and wound dressings
  - hand washing facilities and equipment
- modelling of industry operating conditions.

HLTHPS001 Take clinical measurements

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTMAMP401C and CHCAC410B. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Removed prerequisite.

Application

This unit describes the skills and knowledge required to prepare for, obtain and record simple clinical measurements.

This unit applies to individuals who work under the direct or indirect supervision of a health professional.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
1. Prepare for clinical measurement	1.1 Determine clinical measurement requirements and own role limitations from review of client information
	1.2 Assess environment for suitability to conduct a clinical measurement
	1.3 Follow standard procedures for infection control

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
	1.4 Gather, prepare and check readiness of equipment and consumables prior to use
	1.5 Identify client following organisation and regulatory procedures
	1.6 Clearly communicate measurement procedures and purpose to client
	1.7 Collect and accurately document client information as required
	1.8 Give client the opportunity to ask questions and discuss any concerns
	1.9 Obtain agreement from the client in accordance with clinical guidelines, organisation policies and procedures
2. Obtain clinical measurements	2.1 Follow personal hygiene and infection control procedures
	2.2 Use equipment according to its purpose and operating instructions
	2.3 Use appropriate manual techniques and adapt to suit specific client needs and issues that arise
	2.4 Obtain valid, reliable and accurate results by following standard sequences and procedures
	2.5 Read and document numerical and other measurement data
	2.6 Identify non valid results and repeat procedures as required
	2.7 Accurately record and report results in accordance with clinical guidelines, organisation policies and procedures and confidentiality requirements
	2.8 Communicate outcome of measurements clearly and simply to client if appropriate to do so
3. Finalise clinical measurement process	3.1 Assist, advise and instruct client in accordance with needs of specific test procedures
	3.2 Clean, sterilise and/or dispose of equipment and

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
	consumables in accordance with manufacturers' requirements and infection control procedures
	3.3 Clean work area and dispose of waste in line with organisation protocols and infection control procedures
	3.4 Store equipment and consumables in accordance with clinical guidelines, organisation policies and procedures

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential *to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTHPS001 Take clinical measurements

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTMAMP401C and CHCAC410B. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Removed prerequisite.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed established protocols, infection control and safety requirements to produce accurate, valid and reliable clinical measurements from at least 3 different clients
- taken different types of clinical measurements including at least 3 of each of the following:
  - vital signs (blood pressure (BP), pulse, respirations, temperature)
  - body height, weight and circumference measurement (including body mass index (BMI) calculation)
  - blood glucose measurement
  - chemical reagent strip urinalysis
  - colour blindness testing
  - distance visual acuity testing
  - screening audiometry
  - spirometry

© Commonwealth of Australia, 2025 HumanAbility

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations for taking clinical measurements (national, state/territory, local), including:
  - children in the workplace
  - duty of care
  - informed consent, what it means, and the limitations of obtaining consent by workers who are not health professionals
  - mandatory reporting
  - records management
  - privacy, confidentiality and disclosure
  - industry standards
  - rights and responsibilities of workers, employers and clients
  - work role boundaries – responsibilities and limitations
- standard infection control requirements for clinical measurements:
  - hand washing
  - use of personal protective equipment (PPE)
  - avoiding contact with bodily fluids
  - sharps injury considerations
  - waste disposal
- types of clinical measurements that may be taken by those supporting medical practitioners:
  - vital signs
  - body height, weight and circumference measurement (including BMI calculation)
  - colour blindness testing
  - distance visual acuity testing
  - screening audiometry
  - spirometry
- clinical measurement procedures including:
  - terminology
  - sequencing for measurement
  - type of data produced, its recording and use
- features and correct use of medical testing equipment:
  - sphygmomanometer
  - stethoscope
  - timing device
  - thermometer
  - peak flow meter and disposable mouth pieces

© Commonwealth of Australia, 2025 HumanAbility

  - penlight
  - percussion (reflex) hammer
  - measuring tape
  - equipment for measuring height and weight
  - goose-neck lamp or other light source
- types of information included in client medical records and rationale for these:
  - test details – name, date, time
  - name of supplies used including batch and lot number and expiry date, if applicable
  - results
  - adverse effects or incidents
  - advice or instructions given
  - information collected regarding client's current health status, physical and social function
  - signature requirements
- cultural and religious factors that impact on the approach to taking clinical measurements
- anatomy and physiology to enable performance of clinical measurement to be accurate and of minimum risk to clients

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - sphygmomanometer
  - stethoscope
  - timing device
  - thermometer
  - peak flow meter and disposable mouth pieces
  - spirometer and disposable mouth pieces
  - penlight
  - measuring tape
  - equipment for measuring height and weight
  - colour blindness test plates (eg Ishihara)
  - visual acuity chart
  - audiometer and quiet room
  - goose-neck lamp or other light source
  - hand washing facilities
  - disposable gloves
- modelling of industry operating conditions, including:
  - interaction with clients
  - integration of situations requiring problem solving

© Commonwealth of Australia, 2025 HumanAbility

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTHPS002 Support health professional in the delivery of care

Modification History

Release	Comments
Release 2	This version was released in *HLT Health Training Package release 3.0.* Update to mapping and metadata. Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Supersedes HLTMAMP402C. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Removed prerequisite.

Application

This unit describes the skills and knowledge required to complete preparation, general assistance and follow up tasks that support health professionals in the delivery of care to clients.

This unit applies to health care workers who work under the direct or indirect supervision of a health professional in medical practices and other care facilities.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
1. Prepare environment and equipment	1.1 Obtain and clarify instructions from health professional or according to organisation procedures
	1.2 Follow standard procedures for infection control
	1.3 Assess environment for suitability
	1.4 Gather, prepare and check readiness of equipment and consumables prior to use
	1.5 Confirm readiness and availability of emergency equipment, medications and supplies as appropriate for procedure
2. Prepare client	2.1 Read client information and confirm client identity in accordance with organisation procedures
	2.2 Clearly communicate information to client and confirm their understanding
	2.3 Give client the opportunity to ask questions and discuss any concerns
	2.4 Obtain agreement from the client in accordance with clinical guidelines, organisation policies and procedures
	2.5 Check for contraindications to procedure according to direction and confirm client's status within scope of own job role
	2.6 Assist with positioning client for procedure ensuring client comfort and accessibility according to safe manual task procedures and health professional's instructions
	2.7 Recognise and respond appropriately to client needs for reassurance
3. Follow health professional directions	3.1 Respond to requests for assistance according to workplace protocols and within the scope of own job role
	3.2 Monitor client's condition as directed and within scope of own job role
	3.3 Report abnormal observations or client reactions to health professional immediately, in line with directions from the health professional

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
	3.4 Deal with adverse incidents as per workplace protocols and directions from health professional
	3.5 Accurately document procedure in client's medical record under supervision of the health professional in line with protocols and confidentiality requirements
4. Complete follow up tasks	4.1 Assist, advise and instruct client in accordance with practitioner instructions
	4.2 Monitor client for signs of adverse reaction for appropriate time period as directed and within scope of own job role
	4.3 Advise and instruct client as per organisation protocol and in line with health professional's instructions
	4.4 Clean and dispose of equipment and consumables in accordance with manufacturers' requirements and infection control procedures
	4.5 Clean work area and dispose of waste in line with practice protocols and infection control procedures
	4.6 Store equipment and consumables in accordance with clinical guidelines, organisation policies and procedures

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential *to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTHPS002 Support health professional in the delivery of care

Modification History

Release	Comments
Release 2	This version was released in *HLT Health Training Package release 3.0.* Update to mapping and metadata. Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Supersedes HLTMAMP402C. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Removed prerequisite.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed established protocols, procedures and infection control and safety requirements to provide assistance in delivery of care under the direction of a health professional for the following 5 procedures:
  - dressing of wounds not involving scheduled medication wound care
  - suture and staple removal
  - removal of plasters
  - application of bandaging, splints and slings
  - set up and monitoring of nebulisation without medication
- followed established protocols, procedures, infection control and safety requirements to provide assistance to a health professional who is undertaking:
  - pap tests
  - plastering
  - physical examination

© Commonwealth of Australia, 2025 HumanAbility

- minor operations

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations for supporting the health professional in the delivery of care, including:
  - duty of care
  - informed consent, what it means, and the limitations of obtaining consent by workers who are not health professionals
  - records management
  - privacy, confidentiality and disclosure
  - industry standards
  - work role boundaries – responsibilities and limitations
  - risk management considerations
  - work health and safety
    - manual task safety procedures
- standard infection control requirements for clinical procedures:
  - hand washing
  - use of personal protective equipment (PPE)
  - avoiding contact with bodily fluids
  - needle stick injury considerations
  - waste disposal
  - how to assist with the maintenance of surgical asepsis and the reasons for maintaining a sterile field
- how to assist with the maintenance of surgical asepsis and the reasons for maintaining a sterile field
- procedures, equipment and terminology used for commonly occurring care procedures undertaken by health professionals, including:
  - dressing of wounds not involving scheduled medication wound care
  - suture and staple removal
  - pap tests
  - plastering/removal of plasters
  - physical examination
  - application of bandaging, splints and slings
  - set up and monitoring of nebulisation without medication
  - minor operations
- types of information included in client medical records and rationale for these, including:
  - procedures detail – name, date, time

© Commonwealth of Australia, 2025 HumanAbility

- name of supplies used including batch and lot number and expiry date, if applicable
- details of procedure
- site of procedure
- results of procedure
- any adverse effects or incidents
- advice or instructions given
- information collected regarding client's current health status, physical and social function
- medical assistant's signature or initials

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - client information and medical records
  - disposable gloves
  - hand hygiene facilities
  - equipment and consumables needed for specific procedures, including:
    - bandage scissors
    - cleaning agents
    - dressing packs – basic, for skin lesion
    - dressings, swabs and bandages
    - examination couch with sheets or disposable covers
    - flow meter for oxygen cylinder
    - moisture proof sheets (blueys)
    - nebulisation mask and bowl (adult and child sizes)
    - oxygen tubing
    - pap testing equipment
    - patient gown
    - plaster of paris and padding
    - plaster saw
    - sharps container
    - simulated wound with removable sutures and staples
    - skin cleansing solution
    - splinting material
    - stainless steel dressing trolley
    - staple remover, stitch cutting blade, stitch removal scissors
    - suture material
- modelling of industry operating conditions, including:

© Commonwealth of Australia, 2025 HumanAbility

- interaction with clients
- integration of situations requiring problem solving

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTHPS003 Maintain medication stocks

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to order, store and monitor medication stock levels and complete associated documentation to meet regulatory requirements.

This unit applies to individuals working under the direct or indirect supervision of a health professional.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
1. Monitor medication stock levels	1.1 Conduct an inventory of medications against required stock levels according to instructions from health professional and established procedures 1.2 Take action to ensure medications beyond expiry date are not used, in line with organisation guidelines 1.3 Correctly interpret information about cold chain

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
	requirements and monitor and maintain cold chain according to medication needs
	1.4 Monitor and update medication stock in the health practitioner's bag according to instructions from health professional
2. Order stock	2.1 Identify potential shortfalls in stock levels and take action to ensure stock is replenished in a timely manner under direction from health professionals
	2.2 Accurately complete stock orders according to procedures as required
3. Handle and store medication stocks	3.1 Handle medications according to scope of own role and in accordance with manufacturer's instructions
	3.2 Unpack medication orders and check items and quantities against order for accuracy
	3.3 Store medications according to manufacturer's recommendations
	3.4 Dispose of medications in accordance with regulatory requirements and health professional instructions
4. Maintain medication documentation	4.1 Maintain accurate log books of medications in accordance with legislative requirements
	4.2 Maintain accurate documentation of cold chain management

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential *to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this

Assessment Requirements for HLTHPS003 Maintain medication stocks

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed regulatory and organisation procedures to maintain the medication stocks for at least 1 health workplace under the direct or indirect supervision of a health professional

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- basic pharmacology, including the major medication categories and the types of conditions they treat
- storage requirements for different types of medication
- purpose and features of consumer medicine information (CMI)
- how to organise dosage administration aids
- legal and ethical considerations (national, state/territory and local) for medication storage, handling and checking, including:
  - codes of practice
    - Australian Psychology Accreditation Council (APAC) *Guiding principles to achieve continuity in medication management*

© Commonwealth of Australia, 2025 HumanAbility

    - Royal Australian College of General Practitioners (RACGP) *Standards for general practices*
    - *Standard for the uniform scheduling of medicines and poisons*
- specific legislation, including:
    - health acts and regulations
    - legislation and regulations pertaining to Schedule 8 (S8) controlled drugs
    - drugs and poisons
    - controlled substances

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
    - temperature controlled storage
    - secure storage
    - dosage administration aids
    - medication stocks
    - medication documentation
    - regulatory requirements for medications
    - MIMS or similar reference guide
    - procedures for the candidate to follow
- modelling of industry operating conditions, including integration of situations requiring problem solving

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTHPS004 Measure spirometry

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to prepare a client for spirometry, complete the spirometry test and to provide a report as an aid to the diagnosis and management of ventilatory impairment.

This unit applies to any health worker who takes spirometry measurements. Spirometry measurement is commonly conducted in hospitals, respiratory physicians rooms, general practitioner (GP) rooms, pharmacies and pathology collection centres.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
1. Prepare spirometer and materials for use	1.1 Check cleanliness and functionality of spirometer and other materials 1.2 Validate or calibrate spirometer in accordance with manufacturer specifications

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
2. Prepare client for procedure	2.1 Greet client courteously and identify self
	2.2 Identify client following organisation and regulatory procedures
	2.3 Obtain, read, and accurately record client information, in accordance with organisation policies and procedures
	2.4 Identify and responds to contraindications for performing spirometry within scope of own job role
	2.5 Obtain clarifications from requesting health professional when necessary
	2.6 Take accurate client measurements, consider other inputs and calculate reference values from established value sets
	2.7 Seat client correctly for procedure
3. Perform spirometry	3.1 Initialise equipment to commence recording and record additional information
	3.2 Coach client through procedure with the provision of continuous instruction, encouragement and reassurance
	3.3 Observe client throughout the procedure for ability to continue
	3.4 Identify recording as technically correct
	3.5 Provide client with feedback on performance
	3.6 Repeat spirometry as necessary to comply with current standards for repeatability
	3.7 Make technically acceptable measurements according to current standards
	3.8 Select indices for report in accordance with current standards
	3.9 Identify the need for administration of a bronchodilator in accordance with current standards and medical officer request
	3.10 Allow sufficient time for peak effect from

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
	bronchodilator and repeat spirometry
	3.11 Identify and respond to clinical emergencies in accordance with organisation emergency procedures
4. Complete spirometry measurement	4.1 Assist client as required on completion of procedure
	4.2 Review follow up arrangements with client
	4.3 Respond appropriately to client's questions
	4.4 Dispose of or clean materials in accordance with organisation policies and procedures, and infection control guidelines
	4.5 Clean, restock and store equipment according to manufacturer's guidelines
	4.6 Complete report to technically acceptable standards, provide a provisional interpretation of results and forward to physician for final interpretation
	4.7 Forward report and interpretation to requesting medical officer
	4.8 Enter details of client and test completed on to database and/or hospital information system

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential *to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTHPS004 Measure spirometry

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed established technical, infection control and safety procedures to produce spirometry measurements for at least 3 different clients that accurately reflect the maximal expiratory ventilatory capacity:
  - recognised and responded appropriately to errors due to both client performance and technical faults
  - provided provisional interpretation against established reference values

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- purpose, principles and protocols of spirometry
- legal and ethical considerations for spirometry, including:
  - duty of care
  - informed consent
  - records management
  - privacy, confidentiality and disclosure
  - industry standards

© Commonwealth of Australia, 2025 HumanAbility

    - work role boundaries – responsibilities and limitations
- basic pharmacology related to respiratory function relevant for spirometry measurement
- anatomy and physiology relevant for understanding and conducting spirometry
- set up, operation and routine maintenance of spirometry equipment
- patterns of normal/abnormal results related to both respiratory disease and technical factors relevant for spirometry measurement
- features of technically correct recordings, including:
    - no hesitation at start
    - evidence of maximal effort
    - no cough within first second
    - end of test criteria met
    - reproducibility
- mathematical and statistical information relevant for spirometry measurement
- reference values required for spirometry measurement and the factors that contribute to calculation of client reference values and how to incorporate these, including:
    - weight
    - height
    - age
    - gender
    - race
- how to convert volumes from atmospheric temperature and pressure (ATP) to body temperature and pressure saturated (BTPS)
- common causes of client non compliance in spirometry and the appropriate remedies
- complications and contraindications for clients undergoing spirometry measurement, and how to respond
- emergency procedures specific to spirometry instrument quality control procedures, including:
    - calibration
    - biological control measures
- relevance of environmental factors in spirometry, including temperature and humidity
- features and functions of respiratory therapy products

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
    - spirometer
    - client information
    - procedures for candidate to follow
- modelling of industry operating conditions, including integration of situations requiring problem solving

© Commonwealth of Australia, 2025 HumanAbility

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTHPS005 Handle medical specimens

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to handle specimens including organising off-site testing and performing certain on-site tests.

This unit applies to any health worker handling medical specimens. The scope of this unit does not include any specimen collection.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
1. Follow standard procedures for handling specimens	1.1 Apply standard precautions and codes of practice when handling medical specimens 1.2 Select and use equipment and instruments suited to the specimen being handled 1.3 Transfer specimen into appropriate container and seal properly, ensuring correct method of preservation has

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
	been used
	1.4 Label containers accurately and store specimens in specified conditions
	1.5 Follow established procedures in case of adverse incident
2. Organise off-site testing of specimens	2.1 Prepare specimens for transport according to specifications for packaging and transport
	2.2 Check that specimen is accompanied by required accurately completed documentation
	2.3 Arrange pick-up of specimen, if required, ensuring specimens are in correct location for pick-up
3. Conduct on-site testing of specimens	3.1 Use and maintain equipment in accordance with manufacturer's instructions
	3.2 Conduct tests following practice protocols, standard precautions and industry standards
	3.3 Accurately document results and report to appropriate personnel
	3.4 Read and recognise significantly abnormal results and report appropriately and in a timely fashion

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential *to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTHPS005 Handle medical specimens

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed established technical, infection control and safety procedures when handling at least 4 different specimen types

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations for specimen handling (national, state/territory, local):
  - codes of practice
  - records management and labelling
  - privacy, confidentiality and disclosure
  - work role boundaries – responsibilities and limitations
  - work health and safety
- standard infection control requirements:
  - hand hygiene
  - use of personal protective equipment (PPE)
  - avoiding contact with bodily fluids

© Commonwealth of Australia, 2025 HumanAbility

  - needle stick injury considerations
  - waste disposal
- different types of medical specimens and associated handling procedures, including those for:
  - urine
  - blood
  - oral fluids
  - skin scrapings
- storage conditions for different types of specimen
- transport requirements for different types of specimen
- types of on-site tests and how they are conducted, including:
  - uriscreen
  - pregnancy tests
  - blood glucose level measurement
- how to deal appropriately with adverse incidents

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - real specimens
  - packaging
  - storage facilities
  - documented procedures for the candidate to follow
- modelling of industry operating conditions, including integration of situations requiring problem solving

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTHPS006 Assist clients with medication

Modification History

Release	Comments
Release 2	This version was released in *HLT Health Training Package release 3.0.* Wording changes to performance criteria 2.2 and 3.2. Equivalent competency outcome.
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to prepare for and provide medication assistance, and complete medication documentation. It also involves supporting a client to self-administer medication.

This unit applies to community services and health workers with authority in their state or territory to assist with the administration of medication.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
1. Prepare to assist with medication	1.1 Establish scope of own ability to provide assistance with medication according to organisation guidelines and jurisdictional regulatory requirements 1.2 Identify lines of authority to delegate the task, accountability and actions to be taken to handle contingencies 1.3 Confirm that equipment and all forms of medication to be administered are complete, ready for distribution and up to date 1.4 Confirm with supervisor the authority to proceed with assisting in the processes used in delivery of medication to clients 1.5 Follow infection prevention and control procedures
2. Prepare the client for assistance with administration of medication	2.1 Clarify specific assistance required to address personal needs of each client 2.2 Identify level and type of supervision required by client for assistance with medications within organisation policies and work role responsibilities 2.3 Correctly identify and greet each client, explain administration procedures and prepare them for medication 2.4 Check individual client medications according to organisation procedures 2.5 Prior assisting client with their medication, check for presence of any client physical or behavioural changes and report to supervisor or health professional 2.6 Recognise circumstances in which medication administration should not proceed and seek advice of supervisor or health professional
3. Support clients with administration of medication	3.1 Prompt client to take medication at correct time 3.2 Prepare medications and support clients with administration of medication according to legislation, organisation policies, medication requirements and

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
	individual care plans
	3.3 Make checks to ensure the right medication is given at the right time, to the right person, in the right amount, via the right route
	3.4 Oversee and observe clients when taking medication and confirm with them their ingestion or completion
	3.5 Implement documented procedures for medication not being administered or absorbed
	3.6 Complete medication administration records according to organisation procedures and regulatory requirements
	3.7 Observe client for changes in condition and report to supervisor or health professional as required by organisation procedures
4. Handle medication contingencies	4.1 Report any concerns with the administration of medication to supervisor and/or health professional according to organisation procedures and protocols
	4.2 Identify, report, record and address individual's reactions to medication according to organisation guidelines and health professional's instructions
	4.3 Clearly identify contaminated or out of date medication and implement organisation's procedures for safe and appropriate disposal
	4.4 Identify, report and record changes in individual's condition, within essential timeframes where relevant, according to organisation guidelines
	4.5 Identify procedures to address/respond to changes in the client's condition or needs according to the organisation's guidelines
	4.6 Promptly report any inconsistencies observed with the medication or client to the supervisor or health professional and take action according to their direction
	4.7 Document and address all inconsistencies according to organisation guidelines and procedures

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
5. Complete medication distribution and documentation	5.1 Discard waste products according to organisation procedures and manufacturer's instructions
	5.2 Collect used equipment, discarded medications/applicators and rubbish and place in appropriate/designated receptacle according to instructions
	5.3 Clean and store unused and used medication containers and administration aids in accordance with infection control guidelines
	5.4 Follow the organisation's arrangements and procedures to replenish dose administration aids and supplies of medications
	5.5 Store medication charts, care plans or treatment sheets according to organisation procedures
	5.6 Complete medication storage procedures in compliance with legislation and own role responsibility

Foundation Skills

The Foundation Skills describe those required skills (such as language, literacy, numeracy and employment skills) that are essential to performance.

Numeracy –to calculate and check correct dosage of medication, expiry dates and client information. This includes basic calculations of ratios and volume.

Reading –to correctly check and interpret client information and dosage instructions.

The remaining foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Assessment Requirements for HLTHPS006 Assist clients with medication

Modification History

Release	Comments
Release 2	This version was released in *HLT Health Training Package release 3.0.* Wording changes to performance criteria 2.2 and 3.2. Equivalent competency outcome.
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- provided assistance with medication:
  - to at least 5 different clients according to their care plans
  - with at least 5 different types of medications
  - used at least 3 different modes of administration
- consistently adhered to procedures and regulatory requirements for assisting with medication, including:
  - checked the care plan and confirming details
  - checked medication, including expiry dates and dosage instructions
  - confirmed client identity
  - calculated correct dosage
  - conducted pre and post administration client checks
  - cleaned equipment and disposed and stored medications according to organisation procedures completed accurate documentation

© Commonwealth of Australia, 2025 HumanAbility

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the work role. This includes knowledge of:

- legislation, regulations, codes of practice and workplace policies, including:
  - commonwealth and state/territory legislation regarding the administration of medication including the Drugs and Poisons Act
  - Disability Services Acts (commonwealth and state)
  - Aged Care Act
  - duty of care
  - work health and safety
  - standard and additional infection control precautions
- roles and responsibilities of those involved in medication administration and limitations of own role in only providing assistance
- basic medication terminology
- forms of medication, and how they are handled, administered and stored, including:
  - capsules
  - drops
  - inhalants
  - liquids
  - lotions and creams
  - ointments
  - patches
  - powders
  - tablets
  - wafers
  - pessay
  - suppository
- characteristics of at least 10 commonly used medications in the area of work, including prescribed and over the counter medications, including:
  - purpose
  - expected effects and potential reactions
  - contraindications for use
  - consequences of incorrect use
  - storage requirements
  - disposal requirements
- documentation requirements for the administration of medication, including:
  - purpose
  - potential impacts of errors and reasons for error medication charts, their role and procedures for use

© Commonwealth of Australia, 2025 HumanAbility

Assessment Conditions

Skills must have be demonstrated in the workplace unless state or territory legislation prevents this occurring with the addition of simulations and scenarios where the full range of contexts and situations have not been provided in the workplace. The following aspects of the performance evidence must have been demonstrated using simulation prior to demonstration in the workplace/with members of the general public

- consistently adhered to procedures and regulatory requirements for assisting with medication, including:
  - checked the care plan and confirming details
  - checked medication, including expiry dates and dosage instructions
  - confirmed client identity
  - calculated correct dosage
  - conducted pre and post administration client checks
  - cleaned equipment and disposed and stored medications according to organisation procedures
  - completed accurate documentation

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - placebo medication, administration equipment, charts and documentation
  - individualised plan
  - workplace policies and procedures

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must be a registered nurse or registered enrolled nurse or registered Aboriginal and/or Torres Strait Islander health practitioner.

HLTHPS008 Provide clinical mentoring in the work environment

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements.

Application

This unit describes the skills and knowledge required to provide mentoring of another person delivering clinical care to client's in the work environment. Clinical mentors act as a support person for direct care workers providing emotional and professional support.

This unit applies to workers supervising direct client care workers and offers a potential pathway into workplace training roles.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria specify the level of performance needed to demonstrate achievement of the element*
1. Establish a mentoring relationship with mentee's during clinical supervision	1.1 Identify scope of learning outcomes, realistic expectations and boundaries of the mentoring relationship according to workplace policies and organisation procedures 1.2 Develop mutual trust, confidence, rapport and teamwork in the mentoring relationship

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria specify the level of performance needed to demonstrate achievement of the element*
	1.3 Develop an agreed plan on how the mentoring relationship will be conducted
2. Facilitate and mentor the delivery of appropriate client care	2.1 Encourage opportunities for mentees to self-audit their provision of clinical care and identify workplace opportunities for further training needs
	2.2 Facilitate clinical reasoning discussions about client clinical care needs and outcomes
	2.3 Provide appropriate clinical care mentoring advice and/or support to individuals or groups using a variety of methods and technology
3. Oversee the welfare of mentee's who perform clinical skills in the workplace	3.1 Discuss and clarify the risks associated with clinical procedures and the mentee's readiness for provision of clinical care
	3.2 Take adequate measures to protect the physical and psychological wellbeing of mentee and their clients when undertaking clinical care procedures
4. Evaluate the mentoring process	3.3 Ensure appropriate workplace opportunity for practice in delivery of the required clinical skill competencies
	3.4 Ensure adequate educational follow-up is made available to support the future delivery of the required competencies
	3.5 Engage mentee's personal growth through professional development opportunities
	4.1 Communicate and document feedback and closure of the mentoring relationship with mentee and relevant management structures
	4.2 Evaluate mentoring plans and processes against agreed outcomes and reporting processes and procedures
	4.3 Document improvement opportunities for future clinical mentoring programs

© Commonwealth of Australia, 2025 HumanAbility

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are *essential to performance*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTHPS008 Provide clinical mentoring in the work environment

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must evidence that the candidate has:

- provided clinical mentoring/supervision to at least 1 mentee in the workplace including:
  - fostered mentees learning through their clinical expertise
  - set timeframes to achieve learning outcomes
  - evaluated and reported on clinical skills and care provided by mentee

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- relevant organisation policies and procedures
- knowledge of clinical skills relevant to the workplace and exceeding that of supervised mentee
- mentoring and coaching techniques and strategies
- how to set the boundaries, timeframe and scope for learning outcomes.
- how to facilitate, monitor and evaluate clinical skills mentoring

© Commonwealth of Australia, 2025 HumanAbility

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as, using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTHPS009 Perform peripheral intravenous cannulation

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements.

Application

This unit describes the skills and knowledge required to perform peripheral intravenous cannulation on clients.

This unit applies to registered enrolled nurses, registered Aboriginal and/or Torres Strait Islander health practitioners and emergency workers for whom peripheral intravenous cannulation is part of the job role. They may be working in hospitals, primary health care in rural remote locations, pathology services, out-of-hospital settings or in other allied health care environments.

The extent of the practitioner's role for peripheral intravenous cannulation may be subject to state/territory legislation and organisation policy, and competency should be demonstrated within the context of applicable legislation and organisation practice.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*

© Commonwealth of Australia, 2025 HumanAbility

1. Prepare for peripheral intravenous cannulation	1.1 Correctly identify client and authorised request/s for peripheral intravenous cannulation
	1.2 Explain procedure to client and obtain consent and check for allergies
	1.3 Identify any additional specific requests/tests relevant to the procedure before proceeding
	1.4 Ensure client is correctly and comfortably positioned to access the veins
	1.5 Work with multidisciplinary team to coordinate activities to ensure they do not impact on peripheral vascular cannulation
	1.6 Discuss with parent/carer/staff member appropriate holding and/or distraction technique for a client during cannulation
	1.7 Assemble and prepare peripheral intravenous cannulation equipment using standard precautions
	1.8 Apply tourniquet/blood pressure cuff to limb, palpate for identification of suitable vein and then release tourniquet/blood pressure cuff
	1.9 Prepare and clean insertion site for cannulation
2. Perform peripheral intravenous cannulation	2.1 Identify own work health and safety (WHS) risks associated with poor posture during procedure and adjust client's position
	2.2 Use aseptic technique to insert peripheral intravenous cannula in accordance with manufacturer's instructions and organisation policies and procedures
	2.3 Respond to complications in accordance with organisation policy and procedures and refer client to supervisor
	2.4 Dress the site with visibility of cannula entry and secure cannula to limb.
	2.5 Date the cannula in-situ dressing site, ensure client is left comfortable and is provided with relevant information and instructions
	2.6 Dispose of wastes, taking into account opportunities to address waste minimisation, environmental responsibility and sustainable practice issues
	2.7 Document in client's health information the site of

© Commonwealth of Australia, 2025 HumanAbility

	peripheral intravenous cannulation and number of attempts
3. Monitor peripheral intravenous cannula in-situ	3.1 Assess site and cannula patency regularly in accordance with organisation procedures 3.2 Refer to supervisor or authorised personnel observed indications for cannula removal 3.3 Upon authorised request, remove intravenous cannula, cover insertion site and check bleeding has stopped

Foundation Skills

The Foundation Skills describe those required skills (such as, language, literacy, numeracy and employment skills) that are essential to performance

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTHPS009 Perform peripheral intravenous cannulation

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- prepared equipment and performed peripheral intravenous cannulation for 3 different clients according to manufacturer's instructions and organisation procedures
- monitored 1 in-situ peripheral intravenous cannula, documenting assessment of the patency of the cannula and condition of the site
- safely removed 1 peripheral intravenous cannula from a client in accordance with organisation procedures

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- basic anatomy and physiology of the circulatory system and first aid relevant to bleeding from peripheral vascular system
- factors necessitating a client to need a peripheral intravenous cannula to be in-situ:
  - venous blood samples
  - intravenous fluids
  - medication

© Commonwealth of Australia, 2025 HumanAbility

- identification of suitable veins in the upper and lower limbs for peripheral intravenous cannulation including:
  - size and condition of clients vein
  - use of non-dominant limb if possible
  - avoid the cephalic vein in clients with chronic renal failure
  - expected duration of the in-situ intravenous cannula
- identification of veins to avoid using for peripheral intravenous cannulation:
  - areas of flexion e.g. antecubital fossa or bony prominences
  - vein just below the previous cannulation site
  - bruised or phlebitis areas
  - areas of poor venous return
  - limb with arteriovenous fistulae or shunt
  - infected limb e.g. cellulitis
  - arm on the same side as a previous lymph node dissection, mastectomy or affected by a cerebrovascular accident
  - limb with an implanted venous access device
  - if surgical procedure is required on limb
- basic medical terminology used in peripheral vascular cannulation and pathology laboratory requests
- factors which may affect the chemical analysis of blood collected from an in-situ peripheral intravenous cannula:
  - appropriate times to collect
  - impact of drugs
  - timing of last dose
  - required fasting times
  - protecting the integrity of the specimen
- how to position client for comfort and adjust chair or bed to reduce practitioners WHS risk factors associated with poor posture during repetitive tasks
- clinical applications for sizes (gauge) of cannula required, selection should take into account:
  - previous cannulation sites
  - age of patient e.g. neonates, children and the older person
  - purpose of peripheral intravenous cannula:
    - rapid transfusion
    - intravenous fluids
    - long term medication
- care and maintenance of peripheral intravenous cannula in- situ
- complications associated with peripheral intravenous cannulation:
  - occlusion
  - infection
  - phlebitis

© Commonwealth of Australia, 2025 HumanAbility

  - rupture
  - migration
  - extravasation
  - unsuccessful cannulation attempt, client discomfort or distress
- how to safely use equipment associated with peripheral intravenous cannulation:
  - tourniquet and/or blood pressure cuff
  - chlorhexidine and alcohol swabs
  - peripheral intravenous cannula
  - local anaesthetic cream and dressings
  - extension set and/or three-way tap device & bung associated with intravenous therapy
  - flushing in-situ cannula with syringe
- pre-collection criteria when peripheral intravenous cannulation is for the purpose of collecting blood including:
  - fasting and/or dietary restrictions
  - drug therapies administered to client
  - physical health status of client
  - referral of client to an appropriate health professional if pre-criteria is not met prior to cannulation

Assessment Conditions

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations has not been provided in the workplace. The following aspects of the performance evidence must have been demonstrated using simulation prior to demonstration in the workplace or with members of the general public and where state/territory legislation prevents this occurring:

- prepared equipment and performed peripheral intravenous cannulation for 3 different clients according to manufacturer’s instructions and organisation procedures
- monitored 1 in-situ peripheral intravenous cannula, documenting assessment of the patency of the cannula and condition of the site
- safely removed 1 peripheral intravenous cannula from a client in accordance with organisation procedures

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - simulation learning equipment e.g. simulation limb suitable for peripheral intravenous cannulation
  - dressing pack for aseptic technique
  - solution for cleaning cannulation site
  - tape for securing cannula
  - suitable dressing to cover and allow visibility of entry site of cannula

© Commonwealth of Australia, 2025 HumanAbility

- peripheral intravenous cannulation equipment
- personal protective equipment
- clinical waste disposal equipment
- tourniquet/blood pressure cuff
- organisation procedure used in the planning of the procedure

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTHPS010 Interpret and use information about nutrition and diet

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. New unit.

Application

This unit describes the skills and knowledge required to interpret and use basic information about nutritional principles and healthy diet. It does not include the provision of therapeutic nutritional or dietary advice to individual clients or the recommendation of 'practitioner only' nutritional products.

This unit applies to individuals working with clients within the limits of the *Australian dietary guidelines*. They make referrals to other health professionals or accredited practising dietitians when those limits are exceeded.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australia/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
1. Access nutritional and dietary information	1.1 Establish credible sources of information about nutrition and diet
	1.2 Access and interpret current dietary guidelines for healthy Australians and nutritional information that support self-care

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
	1.3 Extract and distil information relevant to own practice
2. Use information about diet and nutrition	2.1 Determine situations where nutrition and diet may play a role for individual clients
	2.2 Integrate knowledge of basic nutrition and diet into service provision
	2.3 Promote healthy diet and nutrition to others based on the *Australian dietary guidelines*
	2.4 Provide information on lifestyle, self-care practices and specialist services related to diet and nutrition
	2.5 Identify situations where referral to a health care professional is required and take action accordingly
3. Maintain own knowledge of nutrition	3.1 Identify and use opportunities to update nutritional knowledge
	3.2 Monitor current issues and trends in nutrition and diet
	3.3 Evaluate potential changes in own work based on updated knowledge

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTHPS010 Interpret and use information about nutrition and diet

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. New unit.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- used critical thinking skills to review and distil information about nutrition and diet
- used information about nutrition and diet within the scope of own job role in the provision of services to at least 3 different people

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical requirements in relation to the provision of nutritional and diet information to clients:
  - roles, responsibilities and limitations of different people
  - conflicts of interest and ethical considerations
- source of information about nutrition and diet and ways to assess their credibility
- established evidence-based sources of information about nutrition and diet
- anatomy and physiology relating to diet, including:
  - structure of the digestive system
  - role of metabolism
  - digestive processes and activities, including:
    - ingestion
    - mechanical digestion

© Commonwealth of Australia, 2025 HumanAbility

    - propulsion
    - chemical digestion
    - absorption
    - defecation
- primary components of *Australian dietary guidelines,* including those for older Australians, children and adolescents.
- foods and their key features as described in the *Australian dietary guidelines*, including diet related aspects of chronic disease:
    - diabetes
    - cardiovascular
    - obesity/eating disorders
- basic principles and practices of nutrition and healthy diet, including nutrients, their function, recommended dietary intake (RDI), toxicity and their food sources
- benefits of antioxidants, and food groups that provide good sources
- influences on food choices for individuals
- food labelling and interpretation
- role and implications of using food additives and preservatives
- health implications of food choices
- role of good nutrition in avoiding dietary diseases
- effects of various processing and cooking methods and food storage on nutrients
- commonly encountered food intolerances
- main types and characteristics of special diets that are part of contemporary Australian society:
    - diabetic
    - coeliac/gluten free/low gluten
    - low cholesterol
    - low fat
    - sugar free
    - vegetarian
    - vegan
    - diets specific to different cultures and religions
- the meaning of:
    - drug–food interactions
    - food allergy
    - food intolerance
    - alkaline and acidity charts
- indicators of need for referral to specialist advice

© Commonwealth of Australia, 2025 HumanAbility

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTHSS001 Operate an incinerator

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Supersedes HLTGM206D

Application

This unit describes the skills and knowledge required to correctly and safely operate an incinerator.

This unit applies to workers with a range of well-developed skills where some discretion and judgement is required. Workers will take responsibility for their own outputs under predetermined guidelines and may participate in supervised work teams.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare incinerator for operation	1.1 Undertake incinerator maintenance according to manufacturer instructions
	1.2 Check the components of the incinerator for correct

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	functioning
	1.3 Determine potential environmental risks associated with incinerator operations
2. Prepare waste for incineration	2.1 Identify waste for incineration
	2.2 Use personal protective equipment according to organisational requirements
	2.3 Check waste for products that should not be placed into an incinerator and remove
	2.4 Load waste into incinerator according to organisation policy and procedure and manufacturer instructions
3. Operate incinerator	3.1 Activate incinerator according to manufacturer instructions
	3.2 Identify and rectify problems with waste incineration
	3.3 Complete documentation according to organisation policy and procedure
	3.4 Shut down the incinerator according to manufacturer instructions
	3.5 Take and document environmental measurements according to *state/territory and local government regulations*
	3.6 Notify the appropriate person of any breaches of environmental measures or operating policy
	3.7 Dispose of waste from the incinerator according to state/territory and local regulations

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTHSS001 Operate an incinerator

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Supersedes HLTGM206D

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- operated an incinerator on 3 occasions, including:
  - preparing the incinerator and waste for incineration and disposing of incinerator waste
  - shutting down the incinerator, taking environmental measurements and completing documentation requirements.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- manufacturer instructions for incinerator operation and maintenance
- waste handling policies and procedures for incinerator operation, including workplace health and safety (WHS), infection control, waste storage and disposal
- types, purpose and use of personal protective equipment
- waste appropriate for incineration
- relevant state/territory and local environmental legislation and regulation, including:
  - environmental protection agency guidelines

© Commonwealth of Australia, 2025 HumanAbility

- council regulations
- pollution regulations
- incinerator license conditions
- emission standards
- temperature standards
- waste storage regulations.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - incinerator
  - WHS and infection control policy in relation to operating an incinerator
  - relevant state/territory and local environmental legislation and regulations
  - manufacturer instructions for operation and maintenance
  - tools and materials relevant to incinerator maintenance process
  - suitable work area appropriate to incinerator maintenance process
  - personal protective equipment
- modelling of industry operating conditions.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTHSS002 Perform general maintenance and provide assistance to tradespersons

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. MERGED HLTGM202D/HLTGM203D/HLTGM204. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to

safely and appropriately perform minor non-trade maintenance tasks and to assist tradespersons with specialised tasks. It also describes the skills and knowledge required to select and use the appropriate materials and equipment, including hand and power tools.

This unit applies to individuals who take responsibility for their own outputs within defined procedures and known routines and may participate in supervised work teams. Work performed requires a range of well-developed skills where some discretion and judgement is required to deal with problems and unscheduled tasks.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Identify and plan for	1.1 Receive maintenance request and assess requirements

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
maintenance task	for assistance, access, timeframes, costs, equipment, materials and tools
	1.2 Assess disruption to normal operations and inform those affected
	1.3 Isolate area in accordance with organisation requirements to maintain safety of others
	1.4 Identify workplace health and safety (WHS) requirements and use *personal protective equipment in accordance with legislative and organisation requirements*
	1.5 Read operation maintenance schedules and drawings to plan work
2. Perform maintenance	2.1 Select and use appropriate tools, materials and equipment in accordance with manufacturer guidelines and WHS requirements
	2.2 Check tools for serviceability and safe use
	2.3 Assemble tools, equipment and materials and prepare the work area
	2.4 Locate and hold in place material needed for both hand and power tool application
	2.5 Use both hand and power tools safely and effectively
	2.6 Safely locate both hand and power tools when not in immediate use
	2.7 Perform maintenance task according to organisation maintenance policy and procedure
	2.8 Identify problems or tasks requiring specialised assistance or tradesperson and report to supervisor
3. Assist tradesperson with construction and/or maintenance tasks	3.1 Follow instructions of the tradesperson and clarify type and details of assistance required
	3.2 Read relevant plans, drawings, operational maintenance manuals and scheduled maintenance plans to assist with task
	3.3 Provide information and assistance to tradesperson
	3.4 Report accurate information and updates between tradespersons and supervisor

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
4. Clean up work area	4.1 Clear the work area and remove waste according to organisation waste disposal requirements
	4.2 Store materials for re-use or disposal
	4.3 Clean, maintain and store tools, equipment and power leads
5. Complete documentation	5.1 Inform supervisor of task completion and any faults or problems identified
	5.2 Record the completion of the maintenance task according to organisation policy and procedure
	5.3 File or forward documentation according to organisation requirements

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTHSS002 Perform general maintenance and provide assistance to tradespersons

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. MERGED HLTGM202D/HLTGM203D/HLTGM204. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed correct procedures to complete at least 2 maintenance requests, including finalising documentation requirements
- performed a variety of general maintenance tasks that included the following:
  - use of at least 3 hand tools
  - use of at least 2 tools powered by electricity or compressed air
- responded to at least 2 requests to assist a tradesperson in a maintenance or construction task.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- organisation maintenance and reporting policies and procedures
- purpose and use of personal protective equipment, including:
  - overalls
  - boots
  - hard hats

© Commonwealth of Australia, 2025 HumanAbility

  - safety glasses and goggles
  - gloves
  - ear plugs and muffs
  - face mask and respirators
  - sunscreen
- operation maintenance schedules and drawings
- environmental issues impacting on maintenance work
- principles of planned and preventative maintenance
- purpose and use of hand and power tools, including:
  - brooms
  - bars (crow and pinch)
  - bolt cutters
  - brooms
  - chisels
  - hacksaws and handsaws
  - hammers
  - measuring tapes
  - nips
  - picks and mattocks
  - pliers
  - sealant gun
  - shovel or spades
  - sledge hammers
  - spanners and wrenches
  - spirit level
  - straight edge
  - string lines
  - trowels and float
  - wire cutters
  - paint brushes and rollers
  - spatula or putty knives
  - screwdrivers
  - drills
  - nail guns
  - staplers
  - sanders
  - angle grinders
  - pneumatic wrenches
  - circular saw
  - jig saws

© Commonwealth of Australia, 2025 HumanAbility

    - planers
    - routers
    - jackhammer
- workplace health and safety (WHS) policies and procedures
- organisation's buildings, structures, building services, plant, equipment and machinery to be maintained
- facility, plant, equipment and machinery faults and problems which will require referral to a tradesperson
- construction sequencing and the role of individual trade groups
- activities of individual trades sufficient to enable effective assistance to be given
- purpose and use of common maintenance materials, including:
    - paint
    - thinners
    - timber
    - adhesives
    - lubricants
    - sealant
    - nails, screws, bolts, rivets and nuts
    - laminates.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
    - WHS procedures
    - personal protective equipment
    - organisation and manufacture guidelines and procedures
    - maintenance requests
    - suitable work area, equipment and materials
    - hand and power tools appropriate to the maintenance tasks
- modelling of industry operating conditions.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTHSS003 Perform general cleaning tasks in a clinical setting

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTMS206D/HLTMS208D. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to perform general cleaning duties to maintain a clinical area in a clean, tidy and fit for use condition.

This unit applies to a variety of workers in the community services and health industry. Tasks may be performed under limited supervision and under predetermined guidelines as part of a broader health or community services role or as part of a specialised cleaning role.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Prepare to clean safely	1.1 Use personal protective equipment in accordance with workplace requirements 1.2 Check and set up cleaning equipment in accordance with manufacturer guidelines and organisation procedures

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	1.3 Select suitable cleaning agents and measure and prepare in accordance with manufacturer safety guidelines and organisation procedures
	1.4 Barricade work site and install appropriate signs to isolate area being cleaned
2. Clean and maintain surfaces in clinical areas	2.1 Identify surface type and texture and select suitable cleaning equipment, agent and method/s
	2.2 Remove dirt, soil, stains and spillages from surfaces and clean and dry in accordance with organisation procedures
3. Ensure maintenance of cleaning standards	3.1 Maintain wet areas in an odour, soil and hazard free condition
	3.2 Clean unit or location to achieve a low bacteria condition as required by organisation
	3.3 Ensure surfaces and areas are regularly cleaned in accordance with the organisation established cleaning schedules and routines
	3.4 Follow all infection control procedures to minimise cross-contamination
4. Manage waste	4.1 Assess all waste for health and safety risks and handle in accordance with relevant organisation and workplace health and safety (WHS) requirements
	4.2 Remove waste promptly according to established procedures to maintain a clean and tidy area and avoid build-up of unpleasant odours
	4.3 Spot clean waste receptacles and surrounds and replace soiled liners to minimise build-up of odour and to maintain a soiled-free appearance
5. Store equipment and cleaning agents safely	5.1 Clean and dry equipment before storage
	5.2 Store cleaning agents in accordance with manufacturer instructions and organisation policy

Assessment Requirements for HLTHSS003 Perform general cleaning tasks in a clinical setting

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTMS206D/HLTMS208D. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed organisation procedures, including selecting correct equipment and agents, to undertake cleaning of a clinical setting with the following hazards:
  - clinical waste
  - body fluid spill
  - sharps.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- organisation procedures relating to cleaning, including:
  - schedules and routines
  - use of cleaning agents
  - surface type requirements
  - sharps handling
  - manual handling

© Commonwealth of Australia, 2025 HumanAbility

  - infection control
  - gross tissue samples
- surface types and textures and suitable cleaning equipment, agents and methods
- manufacturers' guidelines for cleaning equipment and agents
- range and extent of cleaning responsibilities in relation to other aspects of the worker's role
- cleaning hazards, including:
  - clinical waste, body fluids and tissue
  - slippery surfaces
  - loose electrical fittings
  - broken glass
  - high bacteria growths
  - needle stick injuries
  - sharp surfaces
  - fumes from cleaning agents
  - allergic reactions
  - client's cleaning chemical mixtures
  - unlabelled cleaning chemical containers
- types of cleaning agents, including:
  - chemical mixed on the job or pre-mixed
  - neutral PH detergents
  - acidic cleaners
  - graffiti remover.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - cleaning schedules and routines
  - clinical setting and items to be cleaned
  - personal protective equipment
  - cleaning agents and equipment
- modelling of industry operating conditions.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTHSS004 Handle and move equipment, goods and mail

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Supersedes HLTMS204D

Application

This unit describes the skills and knowledge required to deal with the safe collection, handling, sorting, movement, portage and delivery of items to internal and external customers.

This unit applies to workers providing portering, courier or similar services in a health or community services setting. Work is typically performed under supervision, with predetermined guidelines and generally within a team environment. Individuals are accountable for their own results.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Prepare to move *equipment, goods and mail*	1.1 Sort equipment, goods and mail for collection and internal and external delivery

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	1.2 Maintain a clean and tidy sorting area
	1.3 Determine requirements for manual handling assistance to lift and move equipment or goods safely
	1.4 Plan appropriate routes and transportation requirements
2. Collect and deliver equipment, goods and mail	2.1 Disconnect and clean equipment in accordance with organisation requirements
	2.2 Lift and move equipment and goods safely in accordance with organisation procedures
	2.3 Secure equipment, goods and mail for transportation
	2.4 Collect items for internal and external delivery
	2.5 Deliver equipment, goods and mail according to instructions and schedules
	2.6 Place delivered equipment, goods and mail in required location
	2.7 Position and reconnect equipment according to organisation requirements
3. Finalise collections and deliveries	3.1 Follow organisation procedures for equipment and goods requiring repair
	3.2 Return repaired equipment to required location
	3.3 Complete required documentation

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTHSS004 Handle and move equipment, goods and mail

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Supersedes HLTMS204D

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed the correct procedures to deliver equipment, goods and mail both internally and externally on at least 2 separate occasions, including reading instructions and completing documentation requirements.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- relevant organisation procedures relating to:
  - manual handling
  - infection control
  - personal protective equipment
  - privacy and confidentiality
  - security
  - delivery points, routes and schedules

© Commonwealth of Australia, 2025 HumanAbility

- precautions for adverse weather conditions
- handling, moving or transporting:
  - electronic, computer and mechanical equipment
  - beds and furniture
  - parcels, mail and boxes
  - fragile and perishable items
  - confidential items
  - pathology specimens
  - hazardous substances.

Assessment Conditions

Skills must have been demonstrated in a workplace or a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities equipment and resources including:
  - transport equipment
  - sorting equipment for mail
  - organisation policies and procedures manuals
- modelling of industry operating conditions.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTHSS005 Undertake routine stock maintenance

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Supersedes HLTMS203D

Application

This unit describes the skills and knowledge required to maintain predetermined stock levels of supplies, consumables, equipment and other store items at ward, unit, sub-store or departmental level.

This unit applies to a variety of health or community service roles involving stock maintenance. At this level workers perform under supervision and generally within a team environment within predetermined guidelines.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Maintain and monitor stock levels	1.1 Monitor quality of *stock* and storage conditions, including temperature, light, humidity, pest control and stock organisation

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	1.2 Determine store requirements against specified stock levels
	1.3 Replenish stores and stationery items
	1.4 Rotate perishable stock according to use-by dates
	1.5 Report deviations to supervisor according to organisation procedures
2. Prepare order lists and forward stock	2.1 Complete accurate inventory list of stock requirements
	2.2 Record stock requirements and order number in ordering system and prepare order
	2.3 Obtain authorisation for order from supervisor and forward to appropriate department
	2.4 Update inventory list based on stock usage and inventory change
3. Receive and store goods	3.1 Receive and check stock against order and record received stock in the order book
	3.2 Notify supervisor if received order is inaccurate or incomplete
	3.3 Unpack stock and store in the designated *location*

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

HLTHSS006 Collect and manage linen stock at user-location

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Supersedes HLTMS201D

Application

This unit describes the skills and knowledge required to collect soiled linen from user-locations, deliver soiled linen to a designated holding area, distribute clean linen and maintain economic linen stock levels at user-locations.

This unit applies to health or community service roles involving laundry service. At this level workers perform under supervision and generally within a team environment within predetermined guidelines.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Collect and transport soiled linen	1.1 Collect soiled linen according to organisational procedures and work health safety requirements for infection control and personal protective equipment

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	1.2 Transport soiled linen from user locations to designated holding area using appropriate equipment and manual handling techniques
	1.3 Replace soiled linen bags according to organisation procedures
	1.4 Identify and report hazards to supervisor
	1.5 Follow workplace procedures for dealing with accidents
2. Distribute clean linen	2.1 Transport clean linen to user locations using appropriate equipment and safe manual handling techniques
	2.2 Re-stock linen at user locations to ensure adequate supply
	2.3 Rotate linen stock and return old stock for reprocessing
3. Maintain optimum linen stock levels	3.1 Count stock and requisition linen to meet pre-determined quantity levels
	3.2 Maintain storage and security of linen according to organisation requirements
	3.3 Maintain linen stock records according to organisation requirements
	3.4 Consult with others where necessary about linen supplies
	3.5 Participate in stock takes

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTHSS006 Collect and manage linen stock at user-location

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Supersedes HLTMS201D

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed organisation procedures to:
  - collect soiled linen from at least 3 user-locations and transport to designated holding location
  - respond to at least 1 accident relating to handling soiled linen that involved a sharp injury
  - distribute clean linen to at least 3 user-locations including maintaining stock levels.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- types of linen and individual uses
- delivery and collection timetables
- organisation policies and procedures relating to linen
- relevant workplace health and safety (WHS) legislation and requirements of role, including:

© Commonwealth of Australia, 2025 HumanAbility

  - manual handling
  - infection control
  - sharps handling
  - personal protective equipment
  - incident and accident reporting
- hazards associated with linen handling, including:
  - exposure to heat
  - sharp objects
  - potentially infectious linen
  - sharps
  - foreign objects.

Assessment Conditions

Skills must have been demonstrated in a workplace or a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities equipment and resources, including:
  - linen stock, user-locations and storage facilities
  - linen equipment, including trolleys, bags, baskets and bins
  - personal protective equipment
  - collection and distribution procedures, including WHS
  - inventory management procedures and documentation
- modelling of industry operating conditions.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTHSS007 Handle medical gases safely

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Supersedes HLTMS207D

Application

This unit describes the skills and knowledge required to handle medical gas equipment in a safe manner within the health care environment.

This unit applies to a variety of health or community service roles involving handling medical gases. At this level workers perform under supervision and generally within a team environment within predetermined guidelines.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Follow workplace requirements and relevant legislation to prepare for handling and storage of medical	1.1 Read work sheets to determine medical gas handling requirements 1.2 Select equipment required for medical gas handling

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
gas and equipment	appropriate for the size of cylinder and work tasks
	1.3 Organise and set up work areas to ensure safe, effective and efficient handling of medical gas equipment
	1.4 Inspect *medical gas equipment* to ensure cleanliness of all components, including yoke, manifold or regulator
	1.5 Identify potential medical gas *hazards* to work and manage associated risks according to job requirements
	1.6 Report and document identified hazards and risks
	1.7 Select emergency and *personal protective equipment* and fit in accordance with manufacturer specifications
	1.8 Fit and test bottles and regulators
2. Follow workplace procedures and legislative requirements to handle medical gas equipment	2.1 Use personal protective equipment and recommended precautions when handling medical gas equipment
	2.2 Confirm only trained and authorised personnel are involved in handling medical gas equipment
	2.3 Handle medical gas cylinders and related equipment with care and position according to manufacturer recommendations
	2.4 Select appropriate trolley size and type for the movement of cylinders
	2.5 Restrain cylinders for transport
	2.6 Select appropriate regulators for use with cylinder
	2.7 Close valves prior to transport
	2.8 Close cylinder valves and release regulator pressure after use
	2.9 Monitor gas pipeline and manifold systems
	2.10 Replace empty bottles and banks as soon as exhausted
	2.11 Open cylinder valves on manifold banks in accordance with manufacturer guidelines and organisation requirements and whether they are manual or automatic

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
3. Follow workplace procedures and legislative requirements for storing medical gas cylinders and equipment	3.1 Store all cylinders and equipment in appropriate storage locations in accordance with manufacturer recommendations 3.2 Store cylinders away from combustible material 3.3 Use cylinder stock on a rotational system and keep full and empty cylinders separate 3.4 Protect cylinders from cold and heat 3.5 Close and secure storage area 3.6 Display clearly visible signage outside medical gas storage area

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

HLTHSS008 Perform routine servicing of plant, equipment and machinery

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Supersedes HLTGM201D

Application

This unit describes the skills and knowledge required to regularly service plant, equipment and machinery in accordance with maintenance schedules.

This unit applies to workers with well-developed skills where some discretion and judgement is required. Individuals will take responsibility for their own outputs within clearly defined guidelines and may participate in supervised work teams.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Carry out routine assessment of plant, equipment and	1.1 Identify service requirements of plant, equipment and machinery according to organisation requirements and

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
machinery	manufacturers' guidelines
	1.2 Identify potential repair and replacement requirements of plant, equipment and machinery according to organisation requirements and manufacturer guidelines
2. Prepare for routine servicing and/or minor repairs	2.1 Identify and use required personal protective equipment
	2.2 Prepare tools, equipment, parts and materials required to undertake the task
	2.3 Read maintenance manuals and documented servicing routines to determine requirements
	2.4 Prepare the area required to undertake the task
3. Perform routine servicing and minor repairs	3.1 Service and/or repair plant, equipment and machinery according to maintenance manuals, manufacturer guidelines, enterprise procedures and workplace health and safety (WHS) practices
	3.2 Inform *appropriate person/s* upon completion of the task and complete the maintenance record
	3.3 Advise appropriate person/s of faults and major repair and replacement requirements

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTHSS008 Perform routine servicing of plant, equipment and machinery

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Supersedes HLTGM201D

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed correct procedures when performing routing servicing and minor repairs of at least 3 different examples of plant, equipment or machinery, including:
  - identifying and addressing faults
  - selecting and using correct tools and equipment
  - following workplace health and safety (WHS) procedures
  - selecting and using correct personal protective equipment.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- organisation plant, equipment and machinery to be serviced and repaired
- organisation maintenance and reporting procedures
- amount of time required to complete routine servicing of plant, equipment and machinery
- WHS policies and procedures

© Commonwealth of Australia, 2025 HumanAbility

- identification of plant, equipment and machinery faults and problems that will require reference to a tradesperson
- purpose and procedure of common routine servicing tasks, including:
  - cleaning or changing filters
  - adjustments and calibrations
  - checking for wear
  - lubrication
  - checking fluid levels and adding fluids
  - cleaning .

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities equipment and resources, including:
  - personal protective equipment
  - maintenance manuals and procedures
  - manufacturer instructions for plant, equipment and machinery being maintained
  - suitable work area that includes examples of plant, equipment and machinery
  - hand and power tools appropriate to the maintenance tasks in the organisation and to the worker's role
- modelling of industry operating conditions.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTINF001 Comply with infection prevention and control policies and procedures

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to follow organisational infection prevention and control procedures, including implementing standard and transmission-based precautions and responding to infection risks.

This unit applies to individuals working in health and direct client care contexts.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
1. Follow standard and additional precautions for infection prevention and control	1.1 Follow hand hygiene practices in accordance with organisations policies and procedures 1.2 Implement hand care procedures and cover cuts and abrasions 1.3 Follow organisation procedures for choice and use of personal protection equipment

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
	1.4 Follow procedures for respiratory hygiene and cough etiquette
	1.5 Follow procedures for environmental cleaning
	1.6 Follow procedures for handling, transporting and processing of linen in a manner that controls the spread of infection
	1.7 Follow procedures for disposal of contaminated waste
	1.8 Follow procedures for handling and cleaning client equipment that prevents skin and mucous membrane exposures, contamination of clothing, and transfer of pathogens
	1.9 Identify and respond to situations where additional precautions may be required to prevent transmission of infection
2. Identify infection hazards and assess risks	2.1 Identify infection hazards associated with own role and work environment
	2.2 Identify own areas of responsibility in relation to infection prevention and control
	2.3 Assess risk by determining the likelihood and severity of harm from identified hazards.
	2.4 Document and report activities and tasks that put self, clients, visitors and/or other workers at risk
	2.5 Identify appropriate control measures to minimise risk in accordance with organisations procedures
3. Follow procedures for managing risks associated with specific hazards	3.1 Follow protocols for care after exposure to blood or other body fluids as required
	3.2 Place appropriate signs when and where appropriate
	3.3 Remove spills in accordance with the policies and procedures of the organisation
	3.4 Minimise contamination of materials, equipment and instruments by aerosols and splatter
	3.5 Identify, separate and maintain clean and

Assessment Requirements for HLTINF001 Comply with infection prevention and control policies and procedures

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed established organisation infection prevention and control procedures on at least 3 separate occasions
- followed established organisation infection prevention and control procedures at least once for each of the following:
  - hand hygiene and care of hand
  - use of personal protective equipment
  - handling of waste
  - enforcing clean and contaminated zones
  - limitation of contamination
  - surface cleaning

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- established guidelines for the prevention and control of infection, including those for:
  - personal and hand hygiene:
    - how to hand wash
    - how to hand rub

© Commonwealth of Australia, 2025 HumanAbility

        - pre-surgical hand preparation
        - clinical moments when hand hygiene should be performed with soap and water rather than alcohol-based hand rub
        - non-clinical moments for hand hygiene hand care, including guidelines on maintaining intact skin, fingernails and jewellery/watches
    - use and scope of personal protective equipment guidelines for:
        - glove use
        - wearing gowns and waterproof aprons
        - wearing masks
        - wearing protective glasses
    - surface cleaning:
        - cleaning procedures and their specified times
        - routine surface cleaning
    - managing a blood or body fluid spill
    - sharps handling and disposal techniques
    - reprocessing procedures for equipment
- types of additional precautions and their relevance to particular areas of work or client groups
- types of hazards in the work environment and associated risks and control measures
- chain of infection:
    - source of infectious agent
    - mode of transmission
    - susceptible host
- basis of infection, including:
    - bacteria and bacterial spores
    - difference between harmless microorganisms and pathogens
    - difference between colonisation, infection and disease
    - fungi
    - viruses
- key modes of disease transmission – contact, airborne and droplet:
    - paths of transmission including direct contact, aerosols and penetrating injuries
    - risk of acquisition
    - sources of infecting microorganisms including persons who are carriers, in the incubation phase of the disease or those who are acutely ill
- factors that increase the susceptibility to infection:
    - immune status
    - wounds or devices
    - medications and comorbidities
    - age

© Commonwealth of Australia, 2025 HumanAbility

Assessment Conditions

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations have not been provided in the workplace or may occur only rarely.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - organisational infection prevention and control guidelines
  - personal protective equipment
  - hand hygiene facilities and equipment
  - medical or client care equipment relevant to the workplace
  - clinical and other waste and waste disposal equipment
  - areas for cleaning
  - equipment for cleaning, including sterilised sharps if relevant to role
- modelling of industry operating conditions, including integration of problem solving activities to which the candidate responds

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTINF002 Process reusable medical devices and equipment

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Removed prerequisite.

Application

This unit describes the skills and knowledge required to clean, sterilise and package reusable medical devices and equipment.

This unit applies to workers in office based health practice settings such as general practitioner (GP) surgeries, dental practices and other environments where a limited range of sterilisation equipment may be available. They follow established procedures and work under general supervision.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
1. Prepare to clean used items	1.1 Follow safe work practices and infection prevention and control in accordance with legislative and workplace guidelines 1.2 Sort reusable medical devices and safely dispose of single use devices 1.3 Segregate and dispose of waste according to

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
	organisation and legislative requirements
	1.4 Disassemble reusable medical devices and equipment for cleaning and disinfection according to manufacturer's instructions
2. Clean and dry used items	2.1 Maintain work flow protocols in reprocessing area
	2.2 Interpret safety data sheet (SDS) and select required cleaning products
	2.3 Select cleaning processes based on manufacturer's recommendations and evaluation of reusable medical devices construction and composition
	2.4 Use cleaning methods that avoid the generation of aerosols
	2.5 Make accurate calculations for the preparation of cleaning chemicals
	2.6 Dry and inspect reusable medical devices for cleanliness and damage
3. Prepare and pack items for sterilisation	3.1 Open and unlock reusable medical devices with hinges or ratchets
	3.2 Prepare instrument trays in accordance with workplace protocols
	3.3 Package or wrap reusable medical devices in a manner that prevents damage to delicate items
	3.4 Use chemical indicator according to standards
	3.5 Pack, secure and label sterile barrier systems (SBS) to comply with aseptic removal principles
4. Sterilise loads	4.1 Interpret and apply manufacturer recommendations for cleaning and checking of steriliser and accessory equipment.
	4.2 Correctly use the numerical and other features of the steriliser and operate in accordance with manufacturer

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
	instructions
	4.3 Assign cycle and batch control number and complete documentation.
	4.4 Load steriliser to ensure sterilant contact and according to standards
	4.5 Remove sterilised load immediately on completion of cycle
	4.6 Follow criteria for release of processed items considering manual task risk factors
5. Comply with quality management requirements	5.1 Interpret and adhere to operational monitoring and testing, performance qualification and maintenance of sterilisers and associated equipment
	5.2 Comply with documentation requirements for sterilisation cycles, batch control and load release
	5.3 Report and document all steriliser faults, malfunction and load non-conformance
	5.4 Store documentation in accordance with organisation procedures

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) *that are essential to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTINF002 Process reusable medical devices and equipment

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Removed prerequisite.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed organisation procedures, work processes, safe manual handling requirements and national standards for the reprocessing of reusable medical devices on at least 3 occasions
- operated and monitored reprocessing equipment on at least 1 occasion
- identified and responded to routine process and maintenance problems and variations

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- roles and responsibilities of those involved in reprocessing in different health contexts
- safe work practices, standard precautions and organisation protocols for the reprocessing and storage of reusable medical devices
- risk factors associated with manual tasks and safe manual handling techniques
- key aspects of Spauldings classification
- safe work practices and standard precautions when handling and disposing of sharps
- manual instrument cleaning techniques
- procedures for use of:
  - steam sterilisers
  - thermal washer-disinfector

© Commonwealth of Australia, 2025 HumanAbility

- water and air pressure guns
- automated lubrication device
- drying cabinet
- hermetic heat sealers

Assessment Conditions

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations have not been provided in the workplace or may occur only rarely.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - infection control policies and procedures
  - soiled re-usable medical devices
  - operational cleaning and sterilising equipment
  - safety data sheets
  - manufacturer instructions
- modelling of industry operating conditions, including:
  - presence of time constraints for activities
  - presence of situations requiring problem solving

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTINF003 Implement and monitor infection prevention and control policies and procedures

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant changes to knowledge evidence. Removed prerequisite.

Application

This unit describes the skills and knowledge required to provide information about infection prevention and control procedures, integrate those procedures into work practices and monitor workplace performance.

This unit applies to individuals working in health or direct client care contexts, who have a coordination, team leading or supervisory responsibility in relation to infection prevention and control.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
1. Provide information about infection prevention and control policies and procedures	1.1 Explain correct and current infection prevention and control information clearly to the work group 1.2 Regularly provide information about identified hazards and the outcomes of infection risk assessments 1.3 Provide opportunities for the work group to seek

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
	further information on workplace infection prevention and control issues and practices
	1.4 Adapt communication to the needs of different workers
2. Integrate infection prevention and control policy and procedure into work practices	2.1 Implement infection prevention and control policy and procedures with members of the work group
	2.2 Maintain liaison with person responsible for organisation-wide infection prevention and control
	2.3 Provide coaching and support as required to ensure that individuals or teams are able to implement infection prevention and control practices
	2.4 Adopt work procedures to reflect appropriate infection prevention and control practice
	2.5 Promptly resolve issues raised through consultation or refer to the appropriate personnel
	2.6 Implement workplace procedures for dealing with infection prevention and control risks and hazardous events
	2.7 Encourage colleagues to report infection risks and to improve infection prevention and control procedures
3. Monitor infection prevention and control procedures performance and implement improvements in practices	3.1 Promptly investigate infectious hazardous events to identify their cause in accordance with organisation policy and procedure
	3.2 Monitor work procedures to control infection risks
	3.3 Regularly review and adjust work procedures to improve infection prevention and control practice
	3.4 Provide feedback to colleagues on compliance issues, changes in work procedures and infection prevention and control outcomes
	3.5 Identify and respond to inadequacies in work procedures and infection prevention and control measures or report to designated personnel
	3.6 Maintain accurate records of infection prevention and

Assessment Requirements for HLTINF003 Implement and monitor infection prevention and control policies and procedures

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant changes to knowledge evidence. Removed prerequisite.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- implemented and monitored infection prevention and control policy and procedures for at least 1 work area and at least 1 team of workers, incorporating:
  - hand hygiene and hand care
  - use of personal protective equipment
  - surface cleaning
  - waste management
  - handling of potentially infectious material
  - hazard identification and risk assessment and management

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- key features of infection prevention and control regulation and guidelines:
  - Australian standards
  - government guidelines
  - manufacturer documentation
- management and work processes used to control infection:
  - assessment

© Commonwealth of Australia, 2025 HumanAbility

  - monitoring
  - reporting processes and hierarchies
  - training requirements
- standard and additional infection prevention and control precautions, including:
  - personal hygiene
  - use of personal protective equipment
  - surface cleaning
  - handling of potentially infectious material
- key aspects of communicable disease transmission and their relationship to different work processes
- infection risks and control measures specific to work area and related work processes
- hierarchy of risk control measures from most to least preferred:
  - elimination
  - engineering controls
  - administrative control
  - personal protective equipment

Assessment Conditions

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations have not been provided in the workplace or may occur only rarely.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - organisational infection prevention and control policies and procedures
  - personal protective equipment
  - hand washing facilities and equipment
  - medical or client care equipment relevant to the workplace
  - clinical and other waste
  - areas for cleaning
- modelling of industry operating conditions, including:
  - interaction with a team
  - presence of real or simulated risks, hazards and infection prevention and control problems to which the candidate responds

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTINF004 Manage the prevention and control of infection

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Removed prerequisite.

Application

This unit describes the skills and knowledge required to develop, implement and monitor infection prevention and control systems and procedures in work contexts where health and personal care services are provided.

This unit applies to people working in roles with managerial responsibilities for infection prevention and control in small to medium sized organisations. There may or may not be a team of workers involved.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
1. Establish framework for infection prevention and control	1.1 Access and interpret legislation, regulations and codes of practice for infection prevention and control
	1.2 Collate and evaluate information on workplace requirements for infection prevention and control
	1.3 Evaluate current policies, systems and procedures for compliance and quality

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
	1.4 Consult with relevant colleagues on infection prevention and control issues and requirements
	1.5 Develop and document infection prevention and control systems and procedures, including record keeping and reporting systems
	1.6 Define and allocate infection prevention and control responsibilities
2. Establish procedures for hazard identification and risk control	2.1 Establish hazard identification and risk assessment tools
	2.2 Develop workplace processes for risk control
	2.3 Ensure risk controls and hazard specific procedures are consistent with the hierarchy of control
	2.4 Put in place incident reporting and investigation procedures
	2.5 Document hazard identification and risk assessment systems and procedures
3. Implement and monitor infection prevention and control practices	3.1 Communicate infection prevention and control systems, procedures and responsibilities to relevant colleagues
	3.2 Support implementation by facilitating resources and training
	3.3 Monitor day to day effectiveness of infection prevention and control procedures and address issues of concern
4. Evaluate infection prevention and control performance	4.1 Assess infection prevention and control systems against compliance requirements
	4.2 Review incidents as key sources of information
	4.3 Seek feedback on systems and procedures from relevant colleagues
	4.4 Identify and action improvements to systems and

Assessment Requirements for HLTINF004 Manage the prevention and control of infection

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Removed prerequisite.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- developed compliant infection prevention and control systems and procedures for at least 1 work environment:
  - accessed and analysed compliance and workplace information
  - developed and documented systems and procedures for:
    - hazard identification and risk control
    - personal hygiene
    - use of personal protective equipment
    - handling and transport of potentially infectious material
    - limitation of contamination
    - cleaning and maintenance
  - communicated responsibilities to relevant people
- monitored infection prevention and control systems and procedures for at least 1 work environment and responded to problems

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

© Commonwealth of Australia, 2025 HumanAbility

- key features of infection prevention and control regulation and guidelines and compliance requirements:
  - Australian standards
  - government guidelines
  - manufacturer documentation
- principles and processes of planning
- systems and procedures needed to meet compliance and quality requirements for infection prevention and control:
  - work processes and precautions
  - hazard identification and risk control
  - monitoring and evaluation
  - reporting processes and hierarchies
  - training requirements
- links between infection prevention and control systems and other management systems:
  - work health and safety
  - work organisation
  - human resource management
- for the specific work environment:
  - ways the infections are spread
  - types of hazards and risks
  - control methods
- sustainability considerations for development of infection prevention and control systems and procedures

Assessment Conditions

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations have not been provided in the workplace or may occur only rarely.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - facilities and equipment used in the candidate’s place or intended place of work
  - current infection prevention and control regulations and standards
- modelling of industry operating conditions, including presence of real or simulated risks and hazards to which the candidate responds

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTINF005 Maintain infection prevention for skin penetration treatments

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Supersedes HLTIN402C. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Application

This unit describes the performance outcomes, skills and knowledge required to maintain infection prevention during skin penetration treatments and to review clinic compliance with the applicable state or territory and local council requirements.

It requires the ability to identify, manage and control infection risks to clients, self and work colleagues.

This unit applies to individuals who make independent treatment decisions.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Comply with infection control regulations and guidelines and related legal obligations.	1.1 Identify federal, state or territory, and local standards, regulations and guidelines that apply to beauty treatments and skin penetration procedures 1.2 Review organisational infection control policy and

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	procedures for compliance
	1.3 Identify infection control risks for skin penetration treatments
	1.4 Monitor workplace for potential infection control risks
2. Monitor hygiene of premises.	2.1 Observe workplace to ensure surfaces and equipment are cleaned and disinfected
	2.2 Clean and disinfect non-penetrating instruments and articles
	2.3 Monitor removal and disposal of contaminated material
	2.4 Monitor handling and disposal of sharps and the cleaning of blood or body fluid spills
	2.5 Check dilution rates, use and storage of cleaning products
	2.6 Monitor storage of cleaning and treatment equipment
	2.7 Provide clean linen or single use, disposable coverings for each treatment
	2.8 Place soiled linen and protective clothing in a suitable receptacle.
	2.9 Clean and disinfect work area after treatment
3. Maintain infection control for skin penetration treatments.	3.1 Maintain personal protection using standard and additional precautions for client contact as required
	3.2 Provide single use, disposable and clean instruments where possible for each treatment
	3.3 Ensure instruments, equipment or other items intended to penetrate the skin or be used on mucous membranes are sterile at time of use
	3.4 Follow skin preparation procedures to minimise risk of transmission
	3.5 Immediately dispose of single-use items and waste in appropriate containers

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	3.6 Separate, remove, clean and sterilise potentially contaminated items according to organisation infection control policy and procedure
4. Sterilise equipment and maintain steriliser.	4.1 Ensure work flows from dirty zone to clean zone
	4.2 Clean and dry items to be sterilised
	4.3 Load steriliser and set steriliser cycle according to manufacturer instructions and Australian standard.
	4.4 Unload packages, inspect for sterilising, validate and record details according to manufacturer instructions and Australian standards
	4.5 Store sterile items correctly to prevent contamination
	4.6 Monitor the sterilising process
	4.7 Inspect and clean steriliser and steriliser trays according to manufacturer guidelines and Australian standard
5. Maintain awareness of clinic design for control of infection risks.	5.1 Identify aspects of the design of premises, surfaces, fixtures and fittings that minimise risk of transmission of infection
	5.2 Arrange cleaning area to ensure the separation of dirty and clean items and work flow is from dirty to clean to sterile.
	5.3 Clean cleaning and sterilising area according to organisational policy and procedures.

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTINF005 Maintain infection prevention for skin penetration treatments

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Supersedes HLTIN402C. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- integrated the maintenance of infection control with skin penetration technical skills that individually or in combination demonstrate:
  - identification of potential cross contamination risks, protecting self and client from infection risks
  - choosing and using appropriate cleaning, disinfection and sterilising procedures for instruments, equipment and equipment attachments and work surfaces
  - use of correct steriliser operation procedures:
    - packaging of items
    - loading
    - monitoring
    - validation
    - calibration
    - documentation requirements
    - disposing of waste and sharps
- provided a written review of workplace compliance with relevant state or territory and local council laws, regulations and requirements for skin penetration treatments.

© Commonwealth of Australia, 2025 HumanAbility

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- Australian standards AS/NZS4815 and 4187 relating to infection control in office based health care facilities
- relevant state or territory legislation and guidelines relating to infection control procedures for skin penetration treatments
- local council requirements for businesses offering skin penetration treatments
- organisational policy and procedures relating to infection control
- legal responsibilities in relation to infection control, sterilising, registration or business licensing, conduct of occupation, and maintenance of premises relevant to role
- standard and additional precautions as defined by the National Health and Medical Research Council (NHMRC)
- industry codes of practice
- aetiology of infection
- sources of infection and means of transmission
- risk management in relation to infection control
- procedures and practices that support infection control measures and prevent infection transmission
- cleaning, disinfection and sterilising procedures
- procedures for responding to spills
- needle stick or sharps injury procedures for notification and response
- impact of premises layout and workflow on infection control risks
- manufacturer instructions in relation to cleaning, disinfecting and sterilising equipment and products
- risk management process for identifying treatment infection control risks
- workplace infection control risks.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - clinical and other waste and waste disposal equipment
  - equipment for cleaning, including sterilised sharps if relevant to role
  - hand hygiene facilities and equipment
  - medical or client care equipment relevant to the workplace
  - organisational infection prevention and control policies and procedures
  - personal protective equipment
  - WHS procedures

© Commonwealth of Australia, 2025 HumanAbility

- modelling of industry operating conditions, including integration of problem solving activities to which the candidate responds

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTKIN001 Develop kinesiology practice

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to establish the foundations of kinesiology practice, evaluate what makes a sustainable practice and then to develop an approach to own practice.

This unit applies to kinesiologists and other practitioners who may use kinesiology as an adjunct to another complementary or allied health modality.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Establish foundations of kinesiology practice	1.1 Identify, access and interpret information about the central philosophies of kinesiology practice 1.2 Evaluate the kinesiology system of healing in relation to its application to current health issues 1.3 Compare and contrast kinesiology, other complementary health modalities and broader health

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	practice
2. Represent the kinesiology framework	2.1 Determine information needs of different individuals and groups
	2.2 Identify key messages that represent the philosophy and practice of kinesiology
	2.3 Communicate information about kinesiology at a level of depth appropriate to audience needs
3. Determine requirements for sustainable kinesiology practice	3.1 Identify key issues that affect the development and sustainability of professional practice
	3.2 Identify economic, environmental, human and social considerations and their impact on professional practice
	3.3 Establish a personal health strategy that supports kinesiology practice
	3.4 Access, interpret and collate current information that supports kinesiology best practice
4. Develop approach to own practice	4.1 Reflect on professional goals and aspirations
	4.2 Identify and assess professional opportunities in kinesiology
	4.3 Consider the opportunities and constraints of individual personal circumstances
	4.4 Make decisions about practice direction, based on reflection and research
	4.5 Develop practical strategies that address own practice goals

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

© Commonwealth of Australia, 2025 HumanAbility

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTKIN001 Develop kinesiology practice

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- used critical thinking skills to:
  - review and reflect on information from a range of sources about kinesiology practice
  - evaluate and articulate requirements for sustainable kinesiology practice
- communicated key messages about kinesiology to meet the information needs of at least 3 different individuals or groups
- developed goals for own practice that reflect the values and philosophies of kinesiology

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- philosophies and principles of kinesiology:
  - historical development of kinesiology – its origin and the different modalities upon which kinesiology is based
  - central philosophies and principles, including the model of self responsibility
  - the kinesiology approach to client assessment
  - balancing techniques used in kinesiology
  - the role of muscle monitoring in providing neurological feedback from the client

© Commonwealth of Australia, 2025 HumanAbility

    - concept of energetic balance
- types of imbalance commonly addressed through kinesiology:
    - muscle imbalances
    - physical pain
    - stress – physical, mental, emotional
    - structural deviations
    - energetic/vibrational imbalances
    - learning challenges
    - nutritional/biochemical imbalances
    - sensitivities
    - performance below desired levels
- key features of complementary therapies used in conjunction with kinesiology
    - naturopathy
    - reflexology
    - Traditional Chinese Medicine
    - remedial massage
- key features of allied health services and their relationship to kinesiology, including:
    - physiotherapy
    - chiropractic
    - osteopathy
    - counselling
- place of kinesiology practice in the broader health care system
- features and differences of allopathic and natural medicine approaches to health
- professional kinesiology networks and industry bodies
- different models of professional kinesiology practice and their key features:
    - sole practitioners
    - employment opportunities in multi-modality centres
- components of sustainable practice:
    - economic – opportunities and viability
    - environmental
    - human – personal health and professional development
    - social responsibility
- factors for consideration in maintaining personal health for kinesiology practice, including:
    - the need to maintain own energetic awareness and balance
    - techniques for working with own breathing
- legal and ethical considerations (national and state/territory) and how these are applied in individual practice:
    - children in the workplace
    - codes of conduct

© Commonwealth of Australia, 2025 HumanAbility

- continuing professional education
- discrimination
- dignity of risk
- duty of care
- human rights
- informed consent
- insurance requirements
- mandatory reporting
- practitioner/client boundaries
- privacy, confidentiality and disclosure
- records management
- work role boundaries – responsibilities and limitations
- work health and safety

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must:

- have current clinical experience working as a kinesiologist providing services to the general public
- hold practising membership of an Australian professional body that represents kinesiologists
- fulfil the continuing professional development requirements of the professional body to which they belong

HLTKIN002 Conduct indicator muscle monitoring

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. New unit

Application

This unit describes the skills and knowledge required to monitor neurological feedback from the body using manual muscle monitoring. It requires the ability to prepare self and client, gain consent, establish indicator muscles, make pre-checks and to integrate both client and practitioner perspectives in indicator muscle monitoring to determine imbalances. This skill is the fundamental tool used in kinesiology. The use of self-testing, where the practitioner tests themselves on behalf of the client, falls outside of the scope of this unit.

This unit applies to complementary and allied health practitioners who use muscle monitoring within their practice. The practitioner may or may not be a kinesiologist.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare self and client for muscle monitoring	1.1 Provide accurate information to client about scope of muscle monitoring and the relationship between tester and the person being tested 1.2 Establish client willingness from indicator muscle response, plus written and verbal consent 1.3 Complete checks on own readiness according to modality procedure

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
2. Establish indicator muscle	2.1 Place chosen indicator muscle into correct starting position and apply stabilisation that supports both client and practitioner 2.2 Demonstrate to client the direction in which pressure will be applied and the muscle's range of motion 2.3 Use clear verbal cues to ensure the client is ready for monitoring 2.4 Apply gentle progressive pressure appropriate to the muscle being monitored and the client's ability to respond 2.5 Use techniques that avoid muscle fatigue when specific muscle is subject to ongoing monitoring 2.6 Recognise muscle facilitation and inhibition and the relationship to different aspects of the prime mover 2.7 Use a level of pressure that allows for the indicator muscle response to be recognised, making judgments about rate and speed based on client responses and own experience 2.8 Request and observe feedback from the client regarding level of comfort 2.9 Modify monitoring method in light of client's feedback.
3. Apply muscle monitoring pre-checks	3.1 Identify and balance the muscle's ability to lock and unlock according to modality procedure 3.2 Identify and balance neurological disorganisation according to modality procedure 3.3 Check and balance energy function of central meridian for normal flow according to modality procedure 3.4 Check and balance hydration according to modality procedure 3.5 Check and balance ionisation according to modality procedure 3.6 Select and follow procedures for other modality

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	specific pre-checks

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTKIN002 Conduct indicator muscle monitoring

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. New unit

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- conducted indicator muscle monitoring on at least 60 different people, including men, women, young people and elders, including:
  - demonstrated lock and unlock on indicator muscles
  - corrected muscle response when test produces unlock response
  - used indicator muscle monitoring for physical, emotional or biochemical challenges
  - used all limbs on both left and right side of the body with client in supine and prone positions
  - integrated information from practitioner and client perspectives, evidenced by:
    - use of appropriate level of pressure
    - nature of own posture
    - enhanced communication and connection with client
    - pace of monitoring
- had own muscles monitored by at least 10 different people

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- relationship between client and self:
  - as one circuit
  - importance of neutrality of tester

© Commonwealth of Australia, 2025 HumanAbility

- terminology of muscle monitoring in kinesiology:
  - indicator/indicator change or lock/unlock not weak/strong
  - hold not resist
  - firm monitoring not strength testing
- factors that affect establishment of the indicator muscle response, including:
  - circuit locating
  - switching/overload
  - central and governing meridians
  - hydration
- neurological perspectives on the roles of conscious and subconscious aspects of muscle monitoring
- information from the practitioner's perspective that informs muscle monitoring, including:
  - mechanics of muscles:
    - prime movers
    - synergist, antagonists and fixator muscles
  - neurological circuits controlling muscle function - spinal reflexes
  - control of muscle proprioception - muscle spindle cells
  - golgi tendon apparatus
  - emotional/mental connectivity of muscles
  - biochemical connectivity of muscles
  - muscle recruitment of synergist or other muscles
- information from the client's perspective that informs muscle monitoring:
  - sensing of change between lock, unlock and vice versa
  - role of mental/emotional resource created by thoughts and feelings
  - importance of own experience of muscle monitoring to inform practice and the role experience plays in achieving consistent results
- differences between information from the practitioner and client perspectives
- ways to educate clients for awareness of indicator muscle responses
- kinesiology techniques to clear inhibited and over-facilitated muscles

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated clinical environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable, facilities, equipment and resources, including hand sanitiser and/ or hot running water for washing hands

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must:

© Commonwealth of Australia, 2025 HumanAbility

- have at least 2 years current clinical experience working as a kinesiologist providing services to the general public
- hold practising membership of an Australian professional body that represents kinesiologists
- fulfil the continuing professional development requirements of the professional body to which they belong

HLTKIN003 Perform kinesiology assessments

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTKIN402B/HLTKIN403B/HLTKIN404B/ HLTKIN506B/ HLTKIN507B/HLTKIN508B. Some content in HLTKIN002. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Minimum clinic hours added. Additional assessor requirements.

Application

This unit describes the skills and knowledge required to obtain client information, conduct kinesiology tests and correlate client and practitioner perspectives to make an assessment about healing needs. Kinesiologists are not expected to diagnose conditions but must be able to recognise the indications and contraindications of conditions.

This unit applies to kinesiologists.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Determine scope of client needs	1.1 Explore and clarify client expectations 1.2 Provide clear information about scope and limits of services to be provided

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.3 Recognise needs that are beyond scope of own practice and make referrals to other health care professionals
	1.4 Seek client information respectfully and sensitively, using purposeful, systematic and diplomatic questions
	1.5 Identify and respond to any barriers to information gathering and assessment
	1.6 Collect accurate, relevant and organised health record and document in a form which can be interpreted readily by other professionals
	1.7 Manage information in a confidential and secure way according to records management legislative requirements
2. Use indicator muscle monitoring for assessment	2.1 Provide clear and accurate information about the muscle monitoring process and factors impacting effectiveness
	2.2 Obtain client consent to proceed with assessment
	2.3 Follow standard infection control procedures
	2.4 Follow established modality protocols to physically prepare the client for muscle monitoring
	2.5 Seek client feedback on comfort levels and maintain client dignity at all times
	2.6 Use muscle monitoring to investigate physical, mental, emotional, nutritional, energetic, lifestyle and other appropriate contexts
	2.7 Investigate causes of indicator muscle stress responses in a deliberate, logical and compassionate manner
	2.8 Use questioning with client to gain further required information
	2.9 Accurately record findings of muscle monitoring
3. Develop treatment plans	3.1 Correlate outcomes of muscle monitoring, other

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	information gathered and case history
	3.2 Read, interpret and integrate information and reports from other health professionals
	3.3 Identify and respond to pre-requisites or contraindications to balancing.
	3.4 Evaluate and respond to the physical, mental, emotional and lifestyle factors that contribute to successful treatment outcomes
	3.5 Identify frequency, duration and possible sequencing of balances to address client needs
	3.6 Accurately document proposed treatment plan
4. Confirm treatment plan with client	4.1 Communicate with the client correlations between client history, current client presentation and kinesiology principles
	4.2 Discuss with the client possible approaches to treatment based on assessment findings
	4.3 Agree priorities and expectations in consultation with the client
	4.4 Respond to client enquiries using language the client understands
	4.5 Discuss referral and collaborative options with the client according to individual needs

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency

Assessment Requirements for HLTKIN003 Perform kinesiology assessments

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTKIN402B/HLTKIN403B/HLTKIN404B/ HLTKIN506B/ HLTKIN507B/HLTKIN508B. Some content in HLTKIN002. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Minimum clinic hours added. Additional assessor requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 200 hours of kinesiology client consultation work
- prepared for and managed kinesiology sessions for at least 40 different people, 10 of whom must be seen at least 3 times. Clients must include males and females from different stages of life with varied presentations
- selected and used kinesiology assessment procedures according to modality
- collected and recorded information from the client’s perspective during consultations relating to:
  - client history:
    - medical
    - surgical
    - family
    - personal
    - cultural
    - lifestyle
    - nutrition

© Commonwealth of Australia, 2025 HumanAbility

  - goals
  - expectations
  - presenting issues, chief complaints and symptoms:
    - location
    - quality
    - quantity and severity
    - timing
    - onset
    - frequency
    - duration
    - setting in which they occur
    - aggravating or relieving factors
  - stress factors
  - base line for comparison measurements - pain, energy levels, flexibility, postural stress
- collected and recorded information from the practitioner's perspective during consultations via all of the following:
  - muscle monitoring
  - static and dynamic postural observation
  - verbal and non-verbal communication congruency
  - weight, skin tone, hair lustre and other detected imbalances of the client and according to modality
  - lifestyle assessment
- interacted effectively with clients:
  - clearly articulated information about services, treatment options and rationale
  - engaged clients in decision making

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- scope and limitations of kinesiology
- legal and ethical considerations (national and state/territory) for client assessment and treatment planning:
  - codes of conduct
  - duty of care
  - informed consent
  - mandatory reporting
  - practitioner/client boundaries
  - privacy, confidentiality and disclosure
  - records management

© Commonwealth of Australia, 2025 HumanAbility

    - work role boundaries:
        - working within scope of practice
        - presenting symptoms that require referral to a medical practitioner
    - work health and safety
- anatomy & physiology - structure and physiological function of all anatomical systems and regions of the body
- factors and barriers that may impact on assessment, including:
    - physical
    - emotional
    - cognitive
    - cultural
- factors that affect individual health status, including:
    - age
    - gender
    - constitution
    - lifestyle
    - diet
    - medications
    - alcohol and drugs
    - allergies
    - personal and medical history
    - values and attitudes
    - balance of rest and activity
    - physical environment
    - social environment
- client information required for assessment and the scope and depth of information needed around:
    - presenting condition - signs and symptoms
    - past health history - medical, surgical, family, personal and social
    - nutritional factors
    - whether other health professionals have been consulted for same presenting condition or other conditions and their remarks
- different ways that signs and symptoms of conditions present, including:
    - physical
    - emotional
    - cognitive
    - social
- kinesiology assessment techniques and considerations and how they are used, including:
    - muscle monitoring
    - techniques for assessment of:

© Commonwealth of Australia, 2025 HumanAbility

    - gait
    - posture
    - motion
    - gross motor skills
    - comprehension
    - hydration
  - regional/specific assessments
- contraindications to kinesiology balancing and how to respond, including:
  - unwillingness to accept self-responsibility model
  - client expectation of testing for medically determined pathology parameters
  - presence of infectious diseases suggested by fever, nausea and lethargy without receipt of diagnosis from medical practitioner
- referral options for practitioners:
  - professional health services including complementary health modalities
  - community resources and support services
- indicators for referral, including:
  - client expectation of treatment for named medical disease or condition
  - undiagnosed pain
  - infection or infectious diseases
  - undiagnosed lumps and tissue changes
  - unexplained inflammation
  - unexplained thirst
  - oedema
  - mood swings
  - bleeding and bruising
  - nausea, vomiting or diarrhoea
  - fever
  - sudden loss of weight
- factors that may impact on muscle monitoring and assessment, including:
  - age
  - allergies
  - constitution
  - diet
  - energy capacity
  - environment – physical, social
  - gender
  - fragility
  - medications
  - nutritional status
  - fitness levels

© Commonwealth of Australia, 2025 HumanAbility

  - lifestyle
  - personal and medical history
  - muscle monitoring pre-checks
  - use of alcohol or recreational drugs
  - values and attitudes
- the role and limitations of information and reports from other health professionals and how to establish whether the information can be used
- factors for consideration in developing a treatment plan:
  - knowledge of the effect kinesiology has or can have on a person
  - constitutional make up
  - interactions with other treatments
  - relevance of other medical information
  - pain levels
  - improvements from both client and practitioner perspectives
  - presenting issue status
- protocols for treatment plans that support reliable evidence in a consistent, sequential, measured and detailed manner

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated clinical environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - health assessment consultation forms
  - private consultation area
  - massage table/table and chair
  - reference manual
  - hand sanitiser and/or hot running water for washing hands
- modelling of industry operating conditions, including provision of services to the general public
- clinic supervision by a person who meets the assessor requirements outlined below for at least 50 of the 200 hours of client consultations. The remaining 150 hours may be completed under the guidance of a mentor. The mentor must either meet the assessor requirements outlined below or be registered with an Australian professional body that represents kinesiologists as a mentor.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must:

- have at least 2 years current clinical experience working as a kinesiologist providing services to the general public

© Commonwealth of Australia, 2025 HumanAbility

- hold practising membership of an Australian professional body that represents kinesiologists
- fulfil the continuing professional development requirements of the professional body to which they belong

HLTKIN004 Provide kinesiology balances

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Minimum clinic hours added. Additional assessor requirements.

Application

This unit describes the skills and knowledge required to obtain client information, conduct kinesiology tests and correlate client and practitioner perspectives to make an assessment about healing needs. Kinesiologists are not expected to diagnose conditions but must be able to recognise the indications and contraindications of conditions.

This unit applies to kinesiologists.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare the client for kinesiology balance	1.1 Provide clear information about muscle monitoring and balancing and confirm understanding 1.2 Explain factors which may interfere with the effectiveness of the balance 1.3 Inform the client of potential reactions during and

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	following a session and the appropriate course of action to take
	1.4 Explain to the client how the balancing process supports innate healing capacities and the role of the kinesiologist as the facilitator for that process
2. Identify priority issue through kinesiological enquiry	2.1 Identify priority issue based on client's expectations, review of data from assessment and the client treatment plan
	2.2 Respond to client enquiries using language the client understands
	2.3 Muscle monitor to confirm client's willingness and capacity for healing on the priority issue
	2.4 Identify and record imbalances according to modality procedures and the client treatment plan
	2.5 Identify and evaluate need for singular or multiple sessions based on outcomes of enquiry and client feedback
3. Apply balancing techniques through muscle monitoring	3.1 Identify balancing options and select relevant muscles using established modality protocols based on kinesiology enquiry and assessment indications
	3.2 Use the condition and response of the client as a continual feedback to the initial assessment
	3.3 Maintain client-focused attention throughout the session
	3.4 Use appropriate correction techniques as indicated by muscle monitoring responses
	3.5 Explain corrections and/or activities performed during the session to the client
4. Monitor and record progress of balancing	4.1 Monitor and evaluate effectiveness of all corrections
	4.2 Recognise reactions to treatment and respond

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	promptly if necessary
	4.3 Continue applying corrections until the muscle monitoring process indicates that the balance is complete for this session or the agreed amount of time has passed/elapsed
	4.4 Record client awareness relevant to issue on assessment record
	4.5Compare baseline assessment and evaluate effectiveness of balance
5. Finalise the session	5.1 Educate client in relevant and practical techniques that support the balance
	5.2 Answer client queries with clarity using appropriate language
	5.3 Use honesty and integrity when explaining recommendations to the client
	5.4 Request client to monitor reactions and to contact practitioner as required
	5.5 Promote client independence and self-responsibility in treatment when appropriate
	5.6 Accurately document details of information provided to client
	5.7 Determine need for ongoing sessions in consultation with client

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTKIN004 Provide kinesiology balances

Modification History

Release	Comments
Release 2	Corrections to typographical errors in the Performance Evidence and Knowledge Evidence. Equivalent outcome.
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Minimum clinic hours added. Additional assessor requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 200 hours of kinesiology client consultation work
- prepared for and managed full contextual balances according to modality procedures for at least 40 different people, 10 of whom must be seen at least 3 times. Clients must include males and females from different stages of life with varied presentations
- demonstrated accurate muscle monitoring including the starting point, range of test, and the testing direction of at least 70 muscles, either individually or as part of a group, on at least 2 occasions per muscle or group. Muscles of the neck, shoulder, arm, trunk, hip and upper leg, lower leg and foot must be included
- used surrogate muscle balancing on at least 3 different muscles from 3 different regions of the body
- performed each of the following balancing techniques on at least 2 occasions:
  - general kinesiology techniques, including:
    - pre-checks for balancing: hydration, central and governing meridians, switching/overload

© Commonwealth of Australia, 2025 HumanAbility

    - stress statements, goals and affirmations, including reactive stress process
    - use of scan lists
    - age recession using muscle monitoring
    - balancing via a surrogate
    - polarity
- specific muscle balancing techniques, including:
    - proprioception: spindle cell mechanism and golgi tendon apparatus
    - reflexes including:
        - spinal
        - neurolymphatic
        - neurovascular
    - surrogate muscle balancing
    - balancing unmonitorable muscles, tendons and ligaments
    - muscle stretch
    - repeated/sustained muscle imbalance
    - reactive muscle patterns
- structural balancing techniques, including:
    - posture analysis balancing
    - balancing regions of the physical body including the neck, lower back, upper back, pelvis, neck and jaw
    - joints, including the knee, hip, shoulder and temporomandibular joints (TMJ)
    - gait reflexes
    - righting reflexes or cloacals
    - cranial imbalances
    - structural deviations
- neurological balancing techniques, including:
    - central and governing meridian circuit
    - neurological disorganisation
    - cross crawl integration
    - fight/flight survival responses
    - neurological integration
- emotional balancing techniques, including:
    - emotional stress release
    - emotional defusion techniques
    - using lists of emotions
    - visualisations/imagery
    - psychological reversals
    - addressing fears and phobias
- vibrational balancing techniques, including:
    - use of vibrational essences

© Commonwealth of Australia, 2025 HumanAbility

  - use of colour and sound in balancing
  - balancing the human subtle energy systems including the acupuncture meridian system, chakras, figure 8 energy flows and the aura
  - balancing meridians and acupressure points including the use of the law of 5 elements
- nutritional balancing techniques, including:
  - food sensitivity monitoring
  - food sensitivity/intolerance balancing
  - balancing biochemical factors including hydration, dysglycemic, absorption of nutrients, and bioavailability of nutrients
  - toxin elimination balancing
  - balancing to support detoxification
  - use of Riddler's and nutritional points in balancing
  - nutritional support and digestive disturbance balancing

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations (national and state/territory) for client balancing:
  - codes of conduct
  - duty of care
  - informed consent
  - mandatory reporting
  - practitioner/client boundaries
  - privacy, confidentiality and disclosure
  - records management
  - work role boundaries
  - working within scope of practice
  - presenting symptoms that require referral to a medical practitioner
  - work health and safety
- the innate healing capacities of the body
- factors that may interfere with balancing:
  - over-facilitation
  - energy capacity and availability
  - energy blockage
  - suppression
  - willingness to change
- potential dangers for balancing, including dangers of placing food in the mouth during sensitivity testing
- potential reactions during balancing and how to respond:

© Commonwealth of Australia, 2025 HumanAbility

    - discomfort
    - emotional reactions
    - feedback - verbal, tactile, visual
    - deep relaxation
    - changes in body temperature
    - healing crisis
- methods of monitoring treatment progress, including:
    - client feedback
    - challenge correction/more mode
    - re-assessment of original issues
- types of reinforcement suggestions and resources that can be provided to clients for their use outside the clinical environment
- ways to respond to barriers to progress within a kinesiology framework
- muscle monitoring position and direction for at least 70 muscles, including:
    - muscle origin
    - insertion
    - action
    - contraction
    - extension
    - range and direction of test
- general kinesiology techniques, why and how they are used:
    - pre-checks for balancing: hydration, central and governing meridians, switching/overload
    - stress statements, goals and affirmations, including reactive stress process
    - use of scan lists
    - age recession using muscle monitoring
    - balancing via a surrogate
    - polarity
- specific muscle balancing techniques, why and how they are used:
    - proprioception: spindle cell mechanism and golgi tendon apparatus
    - reflexes including:
        - spinal
        - neurolymphatic
        - neurovascular
    - surrogate muscle balancing
    - balancing unmonitorable muscles, tendons and ligaments
    - muscle stretch
    - repeated/sustained muscle imbalance
    - reactive muscle patterns
- structural balancing techniques , why and how they are used, including:

© Commonwealth of Australia, 2025 HumanAbility

  - posture analysis balancing,
  - balancing regions of the physical body including the neck, lower back, upper back, pelvis, neck and jaw
  - joints, including the knee, hip, shoulder and TMJ
  - gait reflexes
  - righting reflexes or cloacals
  - cranial imbalances
  - structural deviations
- neurological balancing techniques, why and how they are used, including:
  - central and governing meridian circuit
  - neurological disorganisation
  - cross crawl integration
  - fight/flight survival responses
  - neurological integration
- emotional balancing techniques, why and how they are used, including:
  - emotional stress release
  - emotional defusion techniques
  - using lists of emotions
  - visualisations/imagery
  - psychological reversals
  - addressing fears and phobias
  - emotional impact on physical structure
- vibrational balancing techniques, why and how they are used, including:
  - vibrational essences
  - colour and sound in balancing
  - balancing the human subtle energy systems including the acupuncture meridian system, chakras, figure 8 energy flows and the aura
  - balancing meridians and acupressure points including the use of the law of 5 elements
- nutritional balancing techniques, why and how they are used, including:
  - food sensitivity monitoring
  - food sensitivity/intolerance balancing
  - balancing biochemical factors including hydration, dysglycemic, absorption of nutrients, and bioavailability of nutrients
  - toxin elimination balancing
  - balancing to support detoxification
  - use of Riddler's and nutritional points in balancing
  - nutritional support and digestive disturbance balancing
- cautious considerations of current supplementation
- boundaries of a kinesiologist’s role in relation to nutrition
- need for referral to dietician, herbalist, naturopath, or homeopath

© Commonwealth of Australia, 2025 HumanAbility

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated clinical environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - client information – case history, treatment plan
  - private consultation area
  - massage/table and chair
  - reference manual
  - hand sanitiser and/or hot running water for washing hands
- modelling of industry operating conditions, including provision of services to the general public
- clinic supervision by a person who meets the assessor requirements outlined below for at least 50 of the 200 hours of client consultations. The remaining 150 hours may be completed under the guidance of a mentor. The mentor must either meet the assessor requirements outlined below or be registered with an Australian professional body that represents kinesiologists as a mentor.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must:

- have at least 2 years current clinical experience working as a kinesiologist providing services to the general public
- hold practising membership of an Australian professional body that represents kinesiologists
- fulfil the continuing professional development requirements of the professional body to which they belong

HLTKIN005 Monitor and evaluate client progress

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Minimum clinic hours added. Additional assessor requirements.

Application

This unit describes the skills and knowledge required to rechallenge previous assessments and balances and adapt treatment plans accordingly. It also includes using individual client evaluation to inform overall practice.

This unit applies to kinesiologists.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Evaluate client progress	1.1 Seek client feedback about impacts of balances and compliance with the treatment plan 1.2 Identify improvements or changes in client condition and compare with expectations in the treatment plan 1.3 Identify and respond to factors that may be inhibiting client progress

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.4 Seek additional client information when progress suggests the need for further investigation
	1.5 Identify unresolved issues or further areas for support as required
	1.6 Accurately document findings in client records
2. Adjust treatment based on evaluation	2.1 Determine the need for adjustment to treatment plan based on evaluation findings, muscle monitoring and analysis of other information
	2.2 Adjust treatment plans based on outcomes and review of research or evidence that support kinesiology practice
	2.3 Accurately document any adjustments to treatment plan
	2.4 Re-evaluate and determine whether to terminate case or to plan for further improvement on a different issue if required
3. Develop practice from client evaluation	3.1 Review progress of client in context of own individual practice
	3.2 Identify areas of own practice for further research or development to support client outcomes
	3.3 Pro-actively seek and respond to professional development opportunities

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2025 HumanAbility

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTKIN005 Monitor and evaluate client progress

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Minimum clinic hours added. Additional assessor requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 200 hours of kinesiology client consultation work
- prepared for and managed kinesiology sessions for at least 40 different people, 10 of whom must be seen at least 3 times. Clients must include males and females from different stages of life with varied presentations
- measured outcomes through client feedback and own assessment using baseline measurements and indicators of change

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations (national and state/territory) for client monitoring:
  - codes of conduct
  - duty of care
  - informed consent
  - mandatory reporting

© Commonwealth of Australia, 2025 HumanAbility

    - practitioner/client boundaries
    - privacy, confidentiality and disclosure
    - records management
    - work role boundaries
        - working within scope of practice
        - presenting symptoms that require referral to a medical practitioner
    - work health and safety
- expectations of treatments for different conditions and client groups, and factors that impact on those expectations:
    - client history
    - contraindications
    - compliance
    - interactions with other treatments
    - yellow and red flags
    - client general health
    - presenting condition
    - impact of reinforcement for the client
- base line for comparison measurements according to modality procedure, including for:
    - pain
    - energy levels
    - flexibility
    - postural stress
- sources of research and evidence that support kinesiology practice
- principles underpinning continuation or variation of treatment
- impact indicators including:
    - changes in awareness, knowledge and skills
    - changes in intended behaviour
    - changes in individual capacity, i.e. confidence, self esteem, social skills, problem solving skills, increased help-seeking behaviour, coping skills and self management
    - changes in relationships
- client satisfaction indicators:
    - whether clients feels heard, understood, educated about the issue
    - achievement of goal/contextual issue
- outcome indicators of improved:
    - mental wellbeing
    - physical wellbeing
    - emotional wellbeing
    - energetic wellbeing

HLTMSG001 Develop massage practice

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to establish the foundations of massage practice, evaluate what makes a sustainable practice and then to develop an approach to own practice.

This unit applies to massage therapists.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Establish foundations of massage practice	1.1 Identify, access and interpret information on the central philosophies of massage practice
	1.2 Evaluate the massage system of treatment and its application to current health issues
	1.3 Compare and contrast massage, other complementary health modalities and broader health practice

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
2. Represent the massage framework	2.1 Determine information needs of different individuals and groups 2.2 Identify key messages that represent the philosophy and practice of massage 2.3 Communicate information about massage at level of depth appropriate to audience needs
3. Determine requirements for sustainable massage practice	3.1 Identify key issues that affect the development and sustainability of professional practice 3.2 Identify economic, environmental, human and social considerations, and their impact on professional practice 3.3 Establish a personal health strategy that supports massage practice 3.4 Access, interpret and collate current information that supports professional practice
4. Develop approach to own practice	4.1 Reflect on professional goals and aspirations 4.2 Identify and assess professional opportunities in massage 4.3 Reflect on the opportunities and constraints of individual personal circumstances 4.4 Make decisions about practice direction, based on reflection and research 4.5 Develop practical strategies that address own practice goals

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

© Commonwealth of Australia, 2025 HumanAbility

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTMSG001 Develop massage practice

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- used critical thinking skills to:
  - review and reflect on information from a range of sources about massage practice
  - evaluate and articulate requirements for sustainable massage practice
- communicated key messages about massage therapy to meet the information needs of at least 3 different individuals or groups
- developed goals for own practice that reflect the values and philosophies of massage therapy

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- historical development of massage
- different types of massage treatments and their key features and purpose, including the difference between relaxation and remedial massage
- key features of complementary therapies used in conjunction with massage, including:
  - aromatherapy
  - reflexology

© Commonwealth of Australia, 2025 HumanAbility

- key features of allied health services and their relationship to massage, including:
  - physiotherapy
  - osteopathy
  - chiropractic
  - exercise physiology
  - dietetics
  - naturopathy
- place of massage practice in the broader health care system
- professional massage networks and industry bodies
- different models of professional massage practice and their employment opportunities
- components of sustainable practice:
  - economic – opportunities and viability
  - environmental
  - human – personal health, professional development
  - social responsibility
- legal and ethical considerations (national and state/territory) and how these are applied in individual practice:
  - children in the workplace
  - codes of conduct
  - continuing professional education
  - discrimination
  - dignity of risk
  - duty of care
  - human rights
  - informed consent
  - insurance requirements
  - mandatory reporting
  - practitioner/client boundaries
  - privacy, confidentiality and disclosure
  - records management
  - work role boundaries – responsibilities and limitations
  - work health and safety

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources
- modelling of industry operating conditions and contingencies

© Commonwealth of Australia, 2025 HumanAbility

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTMSG002 Assess client massage needs

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTREM407C/HLTREM408C/HLTREM409C. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Minimum clinic hours added. Additional assessor requirements.

Application

This unit describes the skills and knowledge required to gather client information, make a physical assessment of the body and determine massage treatment options.

This unit applies to massage therapists providing general health maintenance treatments. It does not include remedial massage assessment techniques.

This unit applies to massage therapists.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Determine scope of client needs	1.1 Clarify client expectations 1.2 Provide clear information about scope and limits of services to be provided 1.3 Collect accurate, relevant and organised health record

© Commonwealth of Australia, 2025 HumanAbility

	and document in a form which can be interpreted readily by other professionals
	1.4 Recognise needs that are beyond scope of own practice, and make referrals to other health care professionals as required
	1.5 Identify and respond to any barriers to information gathering and assessment
	1.6 Seek client information respectfully and sensitively, using purposeful, systematic and diplomatic questions
	1.7 Manage information in a confidential and secure way
2. Make a physical assessment	2.1 Advise client about the physical assessment process and obtain client consent to proceed
	2.2 Follow clinical and practitioner hygiene protocols
	2.3 Respect client dignity and anticipate potential sensitivities
	2.4 Seek client feedback on comfort levels throughout assessment process
	2.5 Assess client through palpation, observation and range of motion (ROM) testing
	2.6 Identify and respond to contra-indications to massage treatment
	2.7 Accurately document assessment findings
3. Determine and communicate treatment approach	3.1 Determine treatment needs by integrating findings from physical assessment, observation and communication
	3.2 Discuss assessment and rationale for treatment with the client
	3.3 Respond to client enquiries using language the client understands
	3.4 Discuss referral and collaborative options with the client as required

© Commonwealth of Australia, 2025 HumanAbility

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTMSG002 Assess client massage needs

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTREM407C/HLTREM408C/HLTREM409C. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Minimum clinic hours added. Additional assessor requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 80 hours of massage client consultation work
- prepared for and managed at least 40 massage assessments - clients must include males and females from different stages of life with varied presentations
- completed physical assessments using palpation, observation and active, passive and resisted ROM testing
- interacted effectively with clients:
  - clearly articulated information about services, treatment options and rationale
  - engaged clients in decision making

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations (national and state/territory) for client assessment:
  - codes of conduct
  - duty of care
  - informed consent

© Commonwealth of Australia, 2025 HumanAbility

    - mandatory reporting
    - practitioner/client boundaries
    - privacy, confidentiality and disclosure
    - records management
    - working role boundaries
        - working within scope of practice
        - presenting symptoms that require referral to a medical practitioner
    - work health and safety
- referral options for massage practitioners, including:
    - professional health services including complementary health modalities
    - community resources and support services
- factors and barriers that may impact on massage assessment:
    - physical
    - psychological
    - cultural
- factors that affect individual health status:
    - age
    - gender
    - constitution
    - lifestyle
    - diet
    - personal and medical history
    - values and attitudes
    - balance of rest and activity
    - physical environment
    - social environment
- client information required prior to physical assessment, including:
    - case history
    - client expectations
- considerations for performing physical massage assessments:
    - environment
    - equipment
    - client privacy
    - client instructions
- physical assessment techniques, how and when they are used, including:
    - postural assessment
    - range of motion (active, passive and resisted)
    - palpation
- contraindications to treatment and possible indications for referral, including:
    - protracted pain or pain which is non re-producible or neural in origin

© Commonwealth of Australia, 2025 HumanAbility

  - fatigue
  - circulatory disorders
  - inflammation
  - lumps and tissue changes
  - rashes and changes in the skin
  - oedema
  - mood alterations
  - infection
  - changes in habits such as appetite elimination or sleep
  - bleeding and bruising
  - nausea, vomiting or diarrhoea
  - temperature-hot or cold
- major muscle anatomy, including:
  - surface anatomy
  - origin and insertion
  - palpable bony landmarks
  - reciprocal inhibition, antagonist/agonist, synergists
  - actions including individual actions, planes and synergistic groups of the following muscles:
    - temporalis
    - masseter
    - frontalis
    - sternocleidomastoid
    - trapezius
    - levator scapulae
    - latissimus dorsi
    - supraspinatus
    - infraspinatus
    - teres major
    - teres minor
    - subscapularis
    - rhomboids
    - pectoralis major
    - pectoralis minor
    - rectus abdominis
    - quadratus lumborum
    - psoas
    - erector spinae
    - gluteus maximus
    - gluteus medius

© Commonwealth of Australia, 2025 HumanAbility

        - piriformis
        - quadriceps
        - tibialis anterior
        - peroneals
        - hamstrings
        - adductor magnus
        - adductor longus
        - gastrocnemius
        - soleus
        - deltoid
        - biceps brachii
        - triceps brachii
        - flexor carpi radialus
        - flexor carpi ulnaris
        - palmaris longus
        - pronator teres
        - brachioradialis
        - extensor carpi radialis
        - supinator
    - skeleton:
        - bones of the body
        - major bony landmarks
        - surface anatomy and palpable bony landmarks
        - bone growth and remodelling
    - joints:
        - joint classifications – fibrous, cartilaginous, synovial (glide, plane, ball/socket, saddle, hinge, condyloid, pivot)
        - joint actions
- physiology:
    - soft tissue:

- pain types
- tendinopathy

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated clinical environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - client information – case history
  - private consultation area
  - adjustable height massage table
  - towels/sheets for draping
  - oils/balms
  - hot/cold packs
  - bolsters
- modelling of industry operating conditions, including provision of services to the general public
- clinic supervision by a person who meets the assessor requirements outlined below for at least 60 of the 80 hours of client consultation work

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors**.**

In addition, assessors must:

- have current clinical experience working as a massage therapist providing services to the general public
- hold practising membership of an Australian professional body that represents massage therapists
- fulfil the continuing professional development requirements of the professional body to which they belong

HLTMSG003 Perform remedial massage musculoskeletal assessments

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTREM503C/HLTREM504C/HLTREM505C. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Minimum clinic hours added. Additional assessor requirements.

Application

This unit describes the skills and knowledge required to assess the needs of clients presenting with soft tissue dysfunction, musculoskeletal imbalance or restrictions in range of motion (ROM). It requires the ability to gather client information, conduct specific tests and bring information together to develop a remedial massage treatment plan. There is a strong focus on functional anatomy.

This unit applies to remedial massage therapists.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Determine scope of client needs	1.1 Explore and clarify client expectations 1.2 Provide clear information about scope and limits of

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	services to be provided
	1.3 Collect an accurate, relevant and organised health record, and document in a form which can be interpreted readily by other professionals
	1.4 Recognise needs that are beyond scope of own practice and make referrals to other health care professionals as required
	1.5 Identify and respond to any barriers to information gathering and assessment
	1.6 Seek client information respectfully and sensitively, using purposeful, systematic and diplomatic questions
	1.7 Manage information in a confidential and secure way
2. Make a physical assessment	2.1 Provide information about the physical assessment process and obtain client consent to proceed
	2.2 Follow clinical and practitioner hygiene procedures
	2.3 Respect client dignity and anticipate sensitivities
	2.4 Seek client feedback on comfort levels
	2.5 Assess client through palpation, observation and ROM testing
	2.6 Identify variations from normal posture or structural function in relation to presenting symptoms
	2.7 Analyse static and dynamic variables of posture through use of functional and special testing indicated by presenting condition
	2.8 Use ongoing questioning with client to gain further information as required
	2.9 Accurately document information from the physical assessment
3. Develop treatment plan	3.1 Correlate results of physical assessment with case history
	3.2 Consider available medical information and

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	incorporate into analysis within scope of own practice
	3.3 Identify condition according to stage and related implications
	3.4 Identify and respond to indications or contraindications for remedial massage
	3.5 Determine optimum type, duration and frequency of treatments
	3.6 Use professional judgement to draw substantiated conclusions about treatment needs
	3.7 Establish expected treatment outcomes based on the remedial massage framework and evidence
	3.8 Accurately document proposed treatment plan
4. Confirm assessment and treatment plan with client	4.1 Discuss assessment, its implications and rationale for treatment with the client
	4.2 Assign and agree treatment priorities and expectations in consultation with the client
	4.3 Schedule times and session lengths suited to the required techniques and sequences
	4.4 Respond to client enquiries using language the client understands
	4.5 Discuss referral and collaborative options with the client as required

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTMSG003 Perform remedial massage musculoskeletal assessments

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTREM503C/HLTREM504C/HLTREM505C. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Minimum clinic hours added. Additional assessor requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 200 hours of massage client consultation work
- prepared for and managed at least 60 remedial massage musculoskeletal assessments - clients must include males and females from different stages of life with varied presentations
- used remedial massage assessment techniques appropriately, including:
  - discussion
  - muscle strength and length tests
  - observation, including variations of posture
  - orthopaedic tests
  - palpation of prominent bones/structure and phasic and postural muscles
  - ROM tests
  - temperature
- interacted effectively with clients:
  - clearly articulated information about services, treatment options and rationale
  - engaged clients in decision making

© Commonwealth of Australia, 2025 HumanAbility

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations (national and state/territory) for client assessment:
  - codes of conduct
  - duty of care
  - informed consent
  - mandatory reporting
  - practitioner/client boundaries
  - privacy, confidentiality and disclosure
  - records management
  - work role boundaries:
    - working within scope of practice
    - presenting symptoms that require referral to a medical practitioner
  - work health and safety
- referral options for practitioners:
  - professional health services including complementary health modalities
  - community resources and support services
  - types and availability of further medical testing
- factors and barriers that may impact on assessment, including:
  - physical
  - psychological
  - cultural
- factors that affect individual health status, including:
  - age
  - gender
  - constitution
  - lifestyle
  - diet
  - personal and medical history
  - values and attitudes
  - balance of rest and activity
  - physical environment
  - social environment
- client information required for remedial massage assessment and the scope and depth of information needed around:
  - client expectations
  - client history and its components
  - client current state of health

© Commonwealth of Australia, 2025 HumanAbility

    - signs and symptoms
        - onset
        - duration
        - location
        - quality and severity
        - non-verbal
- protocols for performing physical massage assessments:
    - environment
    - equipment
    - client privacy
    - client instructions
- remedial massage diagnostic techniques, how and when they are used:
    - discussion
    - muscle strength and length tests
    - observation, including variations of posture
    - orthopaedic tests
    - palpation of prominent bones/structure and phasic and postural muscles
    - ROM tests
    - temperature
- contraindications to treatment and possible indications for referral:
    - weak bone/joint instability
    - neurological dysfunction
    - vascular disorders
    - lack of working diagnosis
    - pain of excessive nature or abnormal responses to treatment
    - patient non-compliance
- anatomy:
    - body systems relevant to massage assessment
        - muscular physiology
        - nervous system, including myotomes, peripheral nerves, nerve impingements (both root and peripheral)
        - integumentary
        - skeletal
    - muscles – major muscle actions including individual actions, planes and synergistic groups:
        - temporalis
        - masseter
        - frontalis
        - pterygoids
        - longus colli

HLTMSG004 Provide massage treatments

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Minimum clinic hours added. Additional assessor requirements.

Application

This unit describes the skills and knowledge required to prepare for and provide massage treatments using a defined range of techniques and sequences.

This unit applies to massage therapists providing general health maintenance treatments. It does not include remedial massage techniques.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare client for treatment	1.1 Clearly outline how the treatment will be provided and managed based on assessment and agreed treatment approach 1.2 Explain factors which may interfere with the effectiveness of the treatment 1.3 Inform the client of possible physical or emotional

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	reactions during and following a session, and the appropriate course of action to take
	1.4 Follow established protocols to physically prepare the client for treatment
	1.5 Confirm client consent for treatment
2. Use massage techniques and sequences	2.1 Determine treatment sequence, location and degree of pressure according to assessment indications and scope of practice
	2.2 Position client to optimise comfort and support while allowing for effective application of techniques
	2.3 Maintain client dignity through use of draping
	2.4 Maintain therapist postures that ensure a controlled distribution of body weight
	2.5 Maintain client-focused attention throughout session
	2.6 Adjust treatment techniques and pressure based on client feedback
3. Monitor treatment	3.1 Use the condition and response of the client during treatment as feedback to the initial assessment
	3.2 Use established massage assessment frameworks
	3.3 Recognise reactions to treatment and respond promptly if necessary
	3.4 Seek feedback during and after treatment, and evaluate need for ongoing or additional treatment, including referral to other health services
4. Provide advice and resources to the client	4.1 Provide client education in relation to self care
	4.2 Answer client queries with clarity, using appropriate language
	4.3 Provide accurate details of treatment plans, schedules and recommendations to the client
	4.4 Clearly document treatment details and

Assessment Requirements for HLTMSG004 Provide massage treatments

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Minimum clinic hours added. Additional assessor requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 80 hours of massage client consultation work
- prepared for and managed at least 40 massage treatment sessions - clients must include males and females from different stages of life with varied presentations
- used all of the following massage techniques:
  - effleurage
  - frictions
  - kneading
  - longitudinal gliding strokes
  - petrissage
  - compressions
  - tapotement
  - vibrations

© Commonwealth of Australia, 2025 HumanAbility

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- massage techniques and how to apply them, for the following:
  - effleurage (kneading)
  - longitudinal gliding strokes
  - compressions
  - tapotement
  - heat pack application
- endangerment sites, where they are and the limitations of touching these depending on scope of practice:
  - anterior triangle of the neck
  - posterior triangle of the neck
  - axillary area
  - medial epicondyle
  - lateral epicondyle
  - sternal notch and anterior throat
  - umbilicus area
  - twelfth rib dorsal body
  - sciatic notch
  - inguinal triangle
  - popliteal fossa
- potential reactions during treatment and how to respond:
  - discomfort
  - emotional reactions
  - feedback - verbal, tactile, visual
  - muscle spasms
  - body temperature discomfort
  - deep relaxation
- potential reactions following treatment and appropriate client advice to provide
- methods of monitoring treatment progress:
  - reassessment
  - client feedback
- types of advice and resources that can be provided to clients for their use outside the clinical environment
- documentation requirements for recording treatment details

© Commonwealth of Australia, 2025 HumanAbility

Assessment Requirements for HLTMSG005 Provide remedial massage treatments

Modification History

Release	Comments
Release 2	Corrections to typographical errors in Performance Evidence. Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Minimum clinic hours added. Additional assessor requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 200 hours of massage client consultation work
- prepared for and managed at least 60 remedial massage treatment sessions - clients must include males and females from different stages of life with varied presentations
- applied techniques in each of the following positions during client consultation sessions according to client needs:
  - prone
  - supine
  - seated
  - side-lying recumbent
- used all of the following techniques appropriately:
  - frictions
  - passive joint movement
  - passive soft tissue movement
  - deep tissue massage

© Commonwealth of Australia, 2025 HumanAbility

- muscle energy
- neuromuscular
- press and release
- myofascial (without skin penetration)
- trigger point therapy (without skin penetration)
- lymphatic drainage
- temperature therapy
- proprioceptive neuromuscular facilitation (PNF)
- stretching
- mobilisation and movement at major joints (without adjustments or high velocity manipulations)

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations (national and state/territory) for client assessment:
  - codes of conduct
  - duty of care
  - informed consent
  - mandatory reporting
  - practitioner/client boundaries
  - privacy, confidentiality and disclosure
  - records management
  - work role boundaries:
    - working within scope of practice
    - presenting symptoms that require referral to a medical practitioner
  - work health and safety
- remedial massage techniques and how to apply them:
  - friction techniques
  - compressive techniques
  - passive joint movement techniques
  - passive soft tissue movement
  - deep tissue massage
  - muscle energy techniques
  - myofascial techniques (without skin penetration)
  - trigger point therapy (without skin penetration)
  - lymphatic drainage
  - temperature therapy

© Commonwealth of Australia, 2025 HumanAbility

  - topical applications
  - PNF
  - stretching techniques
  - mobilisation and movement at major joints (without adjustments or high velocity manipulations)
- remedial massage techniques to address the following conditions:
  - sciatica
  - arthritis
  - headache
  - plantar fasciiti
  - shoulder impingement
  - TMJ dysfunction
  - repetitive strain injuries
  - medial and lateral epicondylitis
  - carpal tunnel syndrome
  - postural imbalances
- endangerment sites - where they are and how to use palpatory skills in these areas according to scope of practice, including:
  - anterior triangle of the neck
  - posterior triangle of the neck
  - femoral triangle
  - cubital fossa
  - axillary area
  - medial epicondyle
  - lateral epicondyle
  - sternal notch and anterior throat
  - umbilicus
  - twelfth rib dorsal body
  - sciatic notch
  - inguinal triangle
  - popliteal fossa
- potential reactions during treatment and how to respond:
  - discomfort
  - emotional reactions
  - feedback - verbal, tactile, visual
  - muscle spasms
  - body temperature discomfort
  - deep relaxation
- potential reactions following treatment and appropriate client advice to provide

© Commonwealth of Australia, 2025 HumanAbility

- types of advice and resources that can be provided to clients for their use outside the clinical environment
- documentation requirements for recording treatment details

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated clinical environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - client information – case history, treatment plan
  - private consultation area
  - adjustable height massage table
  - towels/sheets for draping
  - oils/balms
  - hot/cold packs
  - bolsters
- modelling of industry operating conditions, including provision of services to the general public
- clinic supervision by a person who meets the assessor requirements outlined below for at least 150 of the 200 hours of client consultation work

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must:

- have current clinical experience working as a remedial massage therapist providing services to the general public
- hold practising membership of an Australian professional body that represents remedial massage therapists
- fulfil the continuing professional development requirements of the professional body to which they belong

Release 2	Corrections to typographical errors in Performance Evidence. Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTREM510B/HLTREM511B. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Minimum clinic hours added. Additional assessor requirements. Removed prerequisites.

Application

This unit describes the skills and knowledge required to adapt remedial massage assessment and treatment strategies to meet the needs of clients of different genders and at different stages of life. It also includes the requirement to be able to identify and respond to other specific needs with which the practitioner may be unfamiliar.

This unit applies to remedial massage therapists.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Adapt assessment and treatment strategies to stages of life	1.1 Anticipate and take account of client sensitivities to ensure client dignity is maintained 1.2 Tailor approaches that take account of different cognitive abilities of clients at different stages of life 1.3 Adjust physical processes to take account of client capabilities and physical body features 1.4 Recognise norms and deviations associated with age and gender 1.5 Obtain consents from others when appropriate
2. Respond to unfamiliar presentations	2.1 Recognise situations where presenting cases or aspects of presenting cases fall outside current knowledge base or expertise 2.2 Refer client to other practitioners when case is not appropriate to own scope of practice 2.3 Identify, access and interpret sources of additional information and advice when appropriate to continue with the case 2.4 Enhance own capacity to deal with the case by conducting case specific research 2.5 Integrate findings into client treatment plans and record details
3. Extend and expand own knowledge base	3.1 Pro-actively identify and respond to professional development opportunities 3.2 Develop and adjust work practices as part of ongoing practice development

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

© Commonwealth of Australia, 2025 HumanAbility

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTMSG006 Adapt remedial massage treatments to meet specific needs

Modification History

Release	Comments
Release 2	Corrections to typographical errors in Performance Evidence. Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTREM510B/HLTREM511B. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Minimum clinic hours added. Additional assessor requirements. Removed prerequisites.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 200 hours of massage client consultation work
- managed at least 60 remedial massage assessment and treatment sessions - clients must include males and females from different stages of life with varied presentations
- effectively adapted communication, assessment and treatment strategies to meet client needs
- conducted case specific research for at least 3 cases, where key aspects of the condition are not known to the candidate

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

© Commonwealth of Australia, 2025 HumanAbility

- legal and ethical considerations (national and state/territory) for working with specific groups:
  - children in the workplace
  - codes of conduct
  - discrimination:
    - age
    - disability
    - racial
    - sex
  - duty of care
  - informed consent
  - mandatory reporting
  - practitioner/client boundaries
  - privacy, confidentiality and disclosure
  - records management
  - work role boundaries:
    - working within scope of practice
    - presenting symptoms that require referral to a medical practitioner
  - work health and safety
- treatment management factors that must be considered for clients of different genders and at different stages of life:
  - case taking
  - variations in approach to physical examination
  - home recommendations
- major developmental milestones for different stages of life
- features of common health conditions that affect the following groups and how those conditions are assessed and treated in the remedial massage framework:
  - children
  - adolescents
  - adult females at different stages of life
  - adult males at different stages of life
- factors for consideration when providing any form of palliative care
- professional responsibilities when presenting cases fall outside of practitioner's current scope, including:
  - when referral is appropriate or required
  - information and advice sources
  - case research techniques

© Commonwealth of Australia, 2025 HumanAbility

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated clinical environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - client information – health assessment consultation forms, case history, treatment plan
  - private consultation area
  - adjustable height massage table
  - towels/sheets for draping
  - oils/balms
  - hot/cold packs
  - supports
- modelling of industry operating conditions, including:
  - provision of services to the general public
- clinic supervision by a person who meets the assessor requirements outlined below for at least 150 of the 200 hours of client consultation work

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must:

- have current clinical experience working as a remedial massage therapist providing services to the general public
- hold practising membership of an Australian professional body that represents remedial massage therapists
- fulfil the continuing professional development requirements of the professional body to which they belong

HLTMSG007 Adapt remedial massage practice for athletes

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Minimum clinic hours added. Additional assessor requirements.

Application

This unit describes the skills and knowledge required to determine the remedial massage needs of athletes and to adjust assessment and treatment to develop preventative and injury related treatment strategies for athletes and other sport active people.

This unit applies to remedial massage therapists.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Determine scope of massage services required	1.1 Obtain information from athlete about their potential service needs 1.2 Collate and evaluate information from others involved in the health management of the athlete 1.3 Determine where and how massage fits within the overall athlete health management program

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.4 Confirm own role and responsibilities with athlete and other health management professionals
2. Adapt remedial massage assessment and treatment strategies to athlete needs	2.1 Incorporate pre and post event massage based on demands and impacts of the sporting activity and individual profile
	2.2 Identify musculoskeletal sports injuries and their potential for treatment with massage within scope of own practice
	2.3 Tailor sports injury management strategies that incorporate the concept of stages of recovery
	2.4 Recommend sport injury specific therapies and exercises that support massage treatment
	2.5 Provide athlete education in relation to self-massage techniques as required
	2.6 Provide recommendations for ongoing support packages to aid recovery from injury
	2.7 Integrate sport related information and research evidence into treatment plan and clearly document treatment details
3. Monitor and evaluate athlete treatment strategies	3.1 Review effectiveness of treatment plans based on client response to preventative and injury related treatments
	3.2 Evaluate impact of ongoing treatment in relation to client’s physical, mental and emotional condition relative to their sport
	3.3 Seek feedback from others involved in the health management of the athlete and ensure that advice provided is in line with advice of other health professionals
	3.4 Adjust plans based on evaluations in consultation with client and colleagues
	3.5 Accurately document recommendations and changes to treatment plans

© Commonwealth of Australia, 2025 HumanAbility

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTMSG007 Adapt remedial massage practice for athletes

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Minimum clinic hours added. Additional assessor requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 200 hours of massage client consultation work
- managed at least 60 remedial massage assessment and treatment sessions - clients must include males and females from different stages of life with varied presentations
- assessed and treated at least 3 different sporting injuries to recovery stage

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- roles and responsibilities of different people associated with the health management of the athlete, including:
  - sports coaches
  - sports psychologists
  - exercise physiologists
  - medical practitioners
  - physiotherapists

© Commonwealth of Australia, 2025 HumanAbility

    - chiropractors
    - osteopaths
    - exercise therapists
    - dieticians/nutritionists
- legal and ethical considerations (national and state/territory) for client assessment and treatment:
    - codes of conduct
    - duty of care
    - informed consent
    - mandatory reporting
    - practitioner/client boundaries
    - privacy, confidentiality and disclosure
    - records management
    - work role boundaries:
        - working within scope of practice
        - presenting symptoms that require referral to a medical practitioner
    - work health and safety
- relevant principles of human movement and sport biomechanics:
    - muscle strength testing
    - length testing
    - isometric, concentric and eccentric contractions
- pre-event and post-event massage techniques and their application, including:
    - physiological warm-up
    - psychological preparation including stress release and motivation
    - maintenance massage, including muscle facilitation and stimulation, plus muscle relaxation and neural calming
    - self-management and self-massage programs
    - full range of movement of the joints and muscles without aggressive proprioceptive neuromuscular facilitation (PNF) type stretching:
        - active assisted range of motion (ROM)
        - muscle energy techniques
- features of acute, chronic and overuse musculoskeletal injuries in sport, including referral potential, rate of recovery and how massage can assist the following:
    - bone injuries:
        - fracture
        - periosteal contusion
        - stress fracture
        - 'bone strain', 'stress reaction'
        - osteitis/periostitis
        - apophysitis

© Commonwealth of Australia, 2025 HumanAbility

- articular cartilage injuries:
  - osteochondral/chondral fractures
  - minor osteochondral injury
  - chondropathy - softening, fibrillation, fissuring, chondromalacia
- joint injuries:
  - dislocation
  - subluxation
  - synovitis
  - osteoarthritis
- ligament injuries - sprain/tear (grades I - III)
- muscle injuries:
  - strain/tear (grades I - III)
  - contusion
  - cramp
  - acute compartment syndrome
  - chronic compartment syndrome
  - delayed onset muscle soreness
  - focal tissue thickening/fibrosis
  - myositis ossificans
- tendon injuries:
  - tear (complete or partial)
  - tendinitis
  - paratendinitis/tenosynovitis
  - tendinosis
- bursa injuries:
  - traumatic bursitis
  - bursitis
- nerve injuries:
  - neuropraxia
  - minor nerve injury/irritation
  - entrapment
  - increased neural tension
- skin injuries and how massage therapists need to work in areas subject to:
  - burns
  - laceration
  - abrasion
  - puncture wound
- types of cryotherapy or thermotherapy used for recovery from injury and techniques used to apply them, including:
  - conduction - cold packs, ice massage and immersion baths

© Commonwealth of Australia, 2025 HumanAbility

  - convection - cooling devices
  - radiation
  - friction
  - topical application
- indications, contraindications and considerations for use of cryotherapy:
  - adverse reactions to topical application
  - adequate time to achieve cryotherapy goals without causing adverse reactions
- indications, contraindications and considerations for use of thermotherapy:
  - myofascial hypertonicity
  - fascial adherence
  - potential for scalding
- uses and indications for taping and splinting that are within scope of massage practice

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated clinical environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - client information – health assessment consultation forms, case history
  - consultation area
  - adjustable height massage table
  - towels/sheets for draping
  - oils/balms
  - hot/cold packs
  - supports
  - tape
- modelling of industry operating conditions, including provision of services to athletes or sports active people
- clinic supervision by a person who meets the assessor requirements outlined below for at least 150 of the 200 hours of client consultation work

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must:

- have current clinical experience working as a remedial massage therapist providing services to the general public
- hold practising membership of an Australian professional body that represents remedial massage therapists
- fulfil the continuing professional development requirements of the professional body to which they belong

HLTMSG008 Monitor and evaluate remedial massage treatments

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. New unit.

Application

This unit describes the skills and knowledge required to monitor and evaluate remedial massage treatments, both from an individual client and whole of practice perspective.

This unit applies to remedial massage therapists.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Evaluate client progress	1.1 Seek client feedback about treatment impacts and compliance with the treatment plan 1.2 Make own observations and assessment of client changes based on massage framework 1.3 Evaluate treatment impacts in relation to client's physical, mental, spiritual and emotional wellbeing 1.4 Compare changes and improvements with expectations in the treatment plan, existing research and evidence from own practice 1.5 Seek additional information from clients when

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	progress suggests this is needed
	1.6 Accurately document progress in client treatment plan
2. Adjust treatment based on evaluation	2.1 Determine the need for adjustment to treatment plan based on evaluation of client progress
	2.2 Identify and respond to factors that may be inhibiting client progress
	2.3 Adjust treatment plans based on outcomes and sources of research or evidence that support massage practice
	2.4 Accurately document any adjustments to treatment plans
3. Develop practice from client evaluation	3.1 Review progress of clients in context of own individual practice
	3.2 Identify areas of own practice for further research or development to support client outcomes
	3.3 Pro-actively seek and respond to professional development opportunities

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTMSG008 Monitor and evaluate remedial massage treatments

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. New unit.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 200 hours of massage client consultation work
- managed at least 60 remedial massage assessments and treatment sessions - clients must include males and females from different stages of life with varied presentations
- monitored and evaluated treatments provided to at least 5 different clients with at least 3 treatments per client

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations (national and state/territory) for monitoring and evaluation:
  - children in the workplace
  - codes of conduct
  - duty of care
  - informed consent
  - mandatory reporting
  - practitioner / client boundaries
  - privacy, confidentiality and disclosure
  - records management

© Commonwealth of Australia, 2025 HumanAbility

    - work role boundaries
        - working within scope of practice
        - presenting symptoms that require referral to a medical practitioner
    - work health and safety
- types of criteria by which remedial massage treatments are evaluated
- expectations of treatment for different conditions and client groups, and factors that impact on those expectations:
    - client history
    - contraindications
    - compliance
    - interactions with other treatments
    - client general health
    - presenting condition
- methods of monitoring treatment progress:
    - re-assessment
    - client feedback
- barriers to therapeutic progress and ways to respond within a massage framework
- sources of research and evidence that support massage practice
- principles underpinning continuation or variation of treatment
- professional development opportunities in remedial massage

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated clinical environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
    - client information – case history, treatment plan
    - private consultation area
    - adjustable height massage table
    - towels/sheets for draping
    - oils/balms
    - hot/cold packs
    - supports
- modelling of industry operating conditions, including provision of services to the general public
- clinic supervision by a person who meets the assessor requirements outlined below for at least 150 of the 200 hours of client consultation work

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must:

© Commonwealth of Australia, 2025 HumanAbility

- have current clinical experience working as a remedial massage therapist providing services to the general public
- hold practising membership of an Australian professional body that represents remedial massage therapists
- fulfil the continuing professional development requirements of the professional body to which they belong

HLTOHC001 Recognise and respond to oral health issues

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements.

Application

This unit describes the skills and knowledge required to identify variations and recognise oral health issues through a visual check, observation of patient behaviour and habits, signs and symptoms and physical condition of patients. This enables the candidate to respond appropriately to the clinical findings to initiate follow up oral health care.

This unit applies to workers in a range of health and community services environments where their work role requires them to recognise and respond to oral health issues.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards for maintaining infection control, and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element*
1. Identify variations in patient behaviour and habits	1.1 Identify opportunities to observe patient behaviour, physical functions, capabilities and habits that may indicate oral health issues or associated pain or discomfort 1.2 Observe, listen for self-reports and question patient

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element*
	and family/or carer to determine whether the patient is experiencing pain or discomfort that may be associated with oral health issues
	1.3 Access relevant information on contributing factors that may produce variation from normal behaviour
2. Undertake basic visual oral check and questioning	2.1 Obtain consent from the patient to conduct basic visual oral check and questioning from patient and/or family/carer
	2.2 Ensure comfort of patient by developing trust and rapport, adapting environment and optimal time based on patient needs
	2.3 Provide support for patient's head or chin if necessary to enhance visual access without creating discomfort for the patient
	2.4 Seek assistance from patient to open their own mouth to limit hand contact inside the mouth
	2.5 Prepare and perform basic visual oral checks in line with own work role and use of standard precautions
	2.6 Identify signs and symptoms of oral health issues that may indicate variation from normal and actively listen to and be aware of self-reports
3. Follow up and promote ongoing oral health care	3.1 Complete documentation and reporting processes, using information from patient, and/or family/carer or other relevant people as well as own observations in relation to oral health issues
	3.2 Discuss oral health issues with patient and/or carer in line with organisation policies and procedures and respecting patient priorities and choices
	3.3 Take appropriate action within work role, including liaising with supervisor in consultation with patient to ensure appropriate referral occurs
	3.4 Use appropriate communication strategies to provide information relevant to promoting and maintaining good oral health

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element*
	3.5 Provide instruction to support patients to take a self-care approach to oral health in line with individual needs where possible
	3.6 Identify and address key barriers to management or self-management of oral health
	3.7 Review and monitor oral health issues

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTOHC001 Recognise and respond to oral health issues

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed a visual oral health check on 5 patients, including:
  - identified any signs and symptoms related to oral health care issues
  - gathered relevant information from visual check and questioning to initiate appropriate follow up oral health care
  - used appropriate manual handling techniques when working with patients with special care needs or mental health condition

Knowledge Evidence

The candidate must demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- basic anatomy and physiology underpinning oral health, including what is considered healthy and unhealthy
- patient behaviour and habits which contribute to oral health issues
- causes and prevention of tooth decay, gum disease and tooth wear, including erosion, abrasion and attrition.
- effective self-care practices for oral health including cause, control and prevention of dental plaque

© Commonwealth of Australia, 2025 HumanAbility

- state/territory and national government policy and programs and reporting processes for oral health
- accessibility to services, including availability of private and public oral health services, including eligibility for services
- role of oral health professionals
- factors that impact on oral health, including:
  - abuse (neglect of oral health needs)
  - access to dental and health services
  - alcohol, licit and illicit drugs and substances, over the counter and herbal treatments
  - correct infant feeding practices
  - damage from habitual grinding of teeth
  - diet and nutrition, including fluids and excessive intake of sugar
  - fluoride
  - general health and wellbeing
  - immunosuppressant conditions, HIV, chemotherapy and radiation
  - injury to mouth, such as from a seizure
  - medical history
  - oral piercings
  - patient oral health information
  - presence of plaque and calculus
  - psychological issues, such as fear of being seen without dentures or persisting with ill-fitting dentures for satisfaction of others
  - salivary function
  - smoking
  - social and cultural determinants of health
  - susceptible tooth surfaces
  - transmission of bacteria particularly from family/carer to child
  - teeth misalignment causing trauma to teeth
  - trauma to mouth as a result of an accident
- healthy eating recommendations as identified in the *National health and medical research council's (NHMRC) Australian dietary guidelines*

Assessment Conditions

Skills and knowledge must be demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely.

The following aspect of the performance evidence must have been demonstrated using 10 simulation scenarios prior to demonstration in the workplace or with members of the general public:

© Commonwealth of Australia, 2025 HumanAbility

- performing a visual oral health check

The following conditions must be met for this unit

- use of suitable equipment and resources, including:
  - appropriate personal protective equipment (PPE)
  - *Dental board of Australia – dental guidelines* on infection control on which the candidate bases the planning process
- modelling of industry operating conditions, including access to people for the simulated scenarios

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTOHC002 Inform and support patients and groups about oral health

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Merged CHCOHC402A/CHCOHC401A. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements.

Application

This unit describes the skills and knowledge required to provide practical information and instruction to patients and groups to promote and support good oral health care practices. The skills and knowledge will enable the candidate to provide health promotion and practical demonstration and instruction of oral hygiene practices and techniques.

This unit applies to workers in a range of health and community services environments whose work roles provide them with an opportunity to promote and support good oral health care.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards for maintaining infection control, and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element*
1. Develop and maintain understanding of oral health	1.1 Build on understanding of what constitutes good oral health

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element*
information and issues	1.2 Maintain current knowledge on the risk factors and outcomes associated with poor oral health and hygiene practices 1.3 Identify oral health hygiene techniques used to address specific patient needs and preferences 1.4 Demonstrate own commitment to oral health through awareness and application of effective self-care oral health practices 1.5 Recognise social and cultural determinants of health as well as varying individual motivations and capacity to carry out good oral health care practices
2. Provide information related to oral health using a person-centred approach	2.1 Address agreed outcomes in planning for oral health care needs by explaining the link between oral health and general health 2.2 Prepare information so that it is relevant to the target audience and use a person-centred approach to identify and respond effectively to individual needs 2.3 Engage and respond to concerns of patient by providing oral health care information, including issues associated with poor oral health and hygiene 2.4 Negotiate with patient a flexible approach to delivery of oral health information 2.5 Explain relevant information on the importance of regular oral checks with an oral health practitioner
3. Provide specific information and instruction on oral hygiene self-care techniques and appropriate aids	3.1 Collect data specific to patient by questioning, observing and accessing available information from patient and/or carer 3.2 Instruct and explain tooth brushing and soft tissue techniques and use of appropriate aids, explain their advantages in terms of achieving and maintaining effective oral health 3.3 Demonstrate and provide instruction on the care of partial and full dentures 3.4 Identify opportunities for participants to demonstrate

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element*
	learned skills
	3.5 Encourage and support patients, including people with special needs to follow effective self-care techniques for oral hygiene practices to make knowledge, attitude and behavioural changes where possible
4. Evaluate effectiveness of oral health information session	4.1 Obtain feedback from the patient and/or group to determine whether the information is correctly received and understood
	4.2 Implement changes to information or delivery processes based on feedback

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTOHC002 Inform and support patients and groups about oral health

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Merged CHCOHC402A/CHCOHC401A. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has:

- communicated effectively to 5 patients to provide information that addresses their oral health care needs, including:
  - impact of oral health on general health and wellbeing
  - causes and prevention of dental plaque, dental caries, dental erosion and periodontal disease, dental trauma
  - diet and nutrition
  - denture care on patients with dentures
  - evaluating how well target audience has understood the oral health and self-care practice information provided
  - reflecting on and improving own level and application of skills and knowledge to motivate target audience and achieve key oral health outcomes

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

© Commonwealth of Australia, 2025 HumanAbility

- basic anatomy and physiology underpinning oral health, including what is considered healthy and unhealthy
- patient behaviour and habits which contribute to oral health issues
- causes and prevention of tooth decay, gum disease and tooth wear including erosion, abrasion and attrition
- good oral health refers to a person's mouth that has:
  - breath without offensive odour
  - inflammation and lesion-free soft tissue
  - intact and stable teeth without cavities
  - moist lips without chapping
  - no build-up of food, calculus or plaque
  - no oral pain
  - pink, moist, uncoated tongue
  - watery plentiful saliva
  - well-fitting dentures
- accessibility to services, including availability of private and public oral health services and eligibility for services
- effective self-care practices for oral health including cause, control and prevention of dental plaque
- factors that impact on oral health, including:
  - abuse (neglect of oral health needs)
  - access to dental and health services
  - alcohol, licit and illicit drugs and substances, over the counter and herbal treatments
  - bacteria in dental plaque
  - correct infant feeding practices
  - damage from habitual grinding of teeth
  - diet and nutrition, including fluids and excessive intake of sugar
  - fluoride
  - general health and wellbeing
  - immunosuppressant conditions, HIV, chemotherapy and radiation
  - injury to mouth, such as from a seizure
  - medical history
  - oral piercings
  - patient oral health information
  - presence of plaque and calculus
  - psychological issues, such as fear of being seen without dentures or persisting with ill-fitting dentures for satisfaction of others
  - salivary function
  - smoking
  - social and cultural determinants of health
  - susceptible tooth surfaces

© Commonwealth of Australia, 2025 HumanAbility

- transmission of bacteria particularly from family/carer to child
- teeth misalignment causing trauma to teeth
- trauma to the mouth as a result of an accident

- healthy eating and drinking recommendations as identified in *National health and medical research council's (NHMRC) Australian dietary guidelines*

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as, using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTOHC003 Apply and manage use of basic oral health products

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria - Removed pre-requisite. New evidence requirements for assessment including volume and frequency requirements.

Application

This unit describes the skills and knowledge required to apply and manage use of basic oral health products and provide assistance to patients in the use of those products as identified in an individualised oral health care plan.

This unit applies to workers whose work roles specifically include the application of identified oral health products in line with product guidelines and in compliance with all regulations related to the supply and use of regulated products (excluding fluoride varnish).

T*he skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards for maintaining infection control and the policies and procedures of the oral health practice or organisation*

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element*
1. Prepare for and participate in the application of basic oral health care products	1.1 Identify and comply with manufacturers' guidelines relating to each product and its application 1.2 Identify high risk products and comply with specific guidelines relating to their application 1.3 Explain product application process and purpose to patient and/or carer in line with product guidelines, oral

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element*
	health care benefits and any risks
	1.4 Obtain feedback from patient to determine that procedure is understood and obtain consent from patient and/or carer to undertake process
	1.5 Confirm patient is comfortably positioned according to their individual needs
	1.6 Prepare products and equipment as required and check the expiry date on product
2. Apply basic oral health care products	2.1 Determine volume and strength to apply of product in a safe and effective manner in line with oral health care plan and product guidelines
	2.2 Supervise and support patient to apply own product where able
	2.3 Where assistance is required position self to suit patient or situation
	2.4 Ensure application is undertaken using correct size/type applicator at correct location
	2.5 Adapt techniques or arrangements outlined in the oral health care plan in case of patient refusal or inability to comply
3. Support oral health and oral hygiene of patients with special care needs	3.1 Support patient with special care needs in line with oral health care plan
	3.2 Be aware of common oral health problems associated with patients with palliative care needs and take appropriate action in line with their needs
	3.3 Understand oral health problems associated with nil by mouth instructions and take appropriate action in line with patient needs
	3.4 Access relevant information on common difficulties associated with dementia that may result in oral health problems and take appropriate action in line with patient needs
	3.5 Update knowledge of common side effects of

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element*
	medication on oral health and initiate follow up care with health practitioner on identified patient needs
	3.6 Ensure identified preventive measures are implemented in line with oral health care plan
4. Complete reporting and documentation and evaluate outcomes	4.1 Document and record processes undertaken and report any concerns arising during oral health practices
	4.2 Maintain and file documentation using relevant technology
	4.3 Evaluate the feedback and outcomes of the processes undertaken in collaboration with health care team to adjust oral health care plan

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Assessment Requirements for HLTOHC003 Apply and manage use of basic oral health products

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria - Removed pre-requisite. New evidence requirements for assessment including volume and frequency requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- applied identified oral health products to 3 patients that require special care needs in line with product guidelines and oral health care benefits in compliance with all regulations related to the supply and use of regulated products (excluding fluoride varnish)
- identified and responded at least 1 time to risks associated with applying oral health products including:
  - allergic reaction or sensitivity to product/s
  - injury to soft tissue from product/s

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- relevant state/territory and national government policy and programs and reporting processes for oral health and regulations related to the supply and use of regulated products
- accessibility to services including availability of private and public oral health services, including eligibility for services
- basic anatomy and physiology underpinning oral health, including what is considered healthy and unhealthy
- benefits and risks associated with basic oral health products

© Commonwealth of Australia, 2025 HumanAbility

- common equipment and aids utilised in the application of oral hygiene products e.g. mouth props
- factors that impact on oral health, including:
  - abuse (neglect of oral health needs)
  - access to dental and health services
  - accumulation of plaque and calculus
  - alcohol, licit and illicit drugs and substances, over the counter and herbal treatments
  - alcohol misuse
  - bacteria in dental plaque
  - correct infant feeding practices
  - damage from habitual grinding of teeth
  - diet and nutrition, including fluids
  - fluoride
  - general health and wellbeing
  - immunosuppressant conditions, HIV, chemotherapy and radiation
  - injury to mouth, such as from a seizure
  - medical history
  - oral piercings
  - patient oral health information
  - psychological issues, such as fear of being seen without dentures or persisting with ill-fitting dentures for satisfaction of others
  - salivary function
  - smoking
  - social and cultural determinants of health
  - susceptible tooth surfaces
  - transmission of bacteria particularly from family/carer to child
  - trauma to the mouth as a result of an accident
- healthy eating recommendations as identified in the *National health and medical research council's (NHMRC) Australian dietary guidelines*
- individualised oral health care support plans, including terminology
- work health and safety (WHS) issues and procedures, including those related to manual handling and infection control
- oral disease and broad treatment options available
- oral health issues for identified high risk sub-populations
- oral side effects of medications, such as metallic taste in the mouth, dry mouth syndrome and ulcers
- dry mouth syndrome (xerostomia) related to conditions such as diabetes, ageing
- own work role and responsibilities in oral health care
- personal safety and security risks associated with provision of oral hygiene care support
- practical use of oral health products

© Commonwealth of Australia, 2025 HumanAbility

- principles and practices in undertaking technical skills associated with the application of oral health products
- principles and practices of confidentiality, privacy, respect and consent
- processes and strategies to support people with oral hygiene care needs
- role of carers in relation to oral health care needs of patients
- saliva and its role in the maintenance of oral health:
  - acting as a lubricant
  - delivering calcium, phosphate and fluoride to the tooth surface
  - protecting teeth by neutralising acid
- significance of service setting, including specific contexts, such as providing oral hygiene in a patient care setting or in a patient's private home
- signs and symptoms of an allergic reaction to an oral health product
- specialist oral care and support for patients in circumstances, such as those who:
  - are aged
  - are on nil by mouth instructions
  - are receiving palliative care
  - are undergoing chemotherapy
  - who have enteral feeding, such as via a nasogastric tube or a percutaneous endoscopic gastrostomy (PEG) tube
  - have dementia
  - have epilepsy
  - have intellectual or physical disability
  - have loss of tooth through extraction
  - have loss of tooth through injury
  - have medical or psychiatric conditions
  - have post-surgery or trauma needs
- strategies to minimise personal safety and security risks associated with provision of oral hygiene care support
- symptoms and signs that suggest a need for further assessment and/or treatment
- the interaction between oral health and general health
- basic oral health care products, including:
  - products specified in the patient's individualised oral health care plan, such as:
    - alcohol-free mouthwash
    - antibacterial products
    - lip moisturiser
    - non-medically prescribed therapeutic agents and topical analgesic
    - remineralisation products
    - saliva substitutes/stimulants:
      - chewing gum
      - gels
      - liquids

© Commonwealth of Australia, 2025 HumanAbility

    - lozenges
    - sprays
- common oral health problems associated with patients with palliative care needs may include but are not limited to:
    - angular cheilitis
    - candida (thrush)
    - debris
    - dental caries
    - dry mouth and/or lips
    - excessive saliva
    - hairy leukoplakia
    - herpes simplex
    - kaposi sarcoma (HIV patients only)
    - sensitive mouth
    - ulcers, including viral and traumatic

Assessment Conditions

Skills and knowledge must be demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations cannot be provided in the workplace.

The following aspect of the performance evidence must have been demonstrated using 10 simulation scenarios prior to demonstration in the workplace or with members of the general public:

- applying identified oral health products safely and effectively

The following conditions must be met for this unit

- use of suitable equipment and resources, including:
    - age related oral health care resources
    - appropriate personal protective equipment (PPE)
    - *Dental board of Australia – dental guidelines* on infection control on which the candidate bases the planning process
    - oral hygiene self-care aids and technique
    - specialised equipment, placebo or simulated oral health products utilised in provision of oral hygiene
- modelling of industry operating conditions, including access to people for the simulated scenarios

© Commonwealth of Australia, 2025 HumanAbility

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTOHC004 Provide or assist with oral hygiene

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements.

Application

This unit describes the skills and knowledge required to provide or assist a patient with their oral hygiene where the patient is unable to perform all or part of these tasks by themselves. The oral hygiene tasks for the patient are carried out within the framework of an individualised care support plan and within the workers designated role and responsibilities.

This unit applies to workers who provide direct patient care in a range of health and community services environments.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards for maintaining infection control *and industry codes of practice.*

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
Elements define the essential outcomes	*Performance criteria specify the level of performance needed to demonstrate achievement of the element*
1. Identify patient's oral hygiene requirements to ensure good oral health	1.1 Liaise with supervisor to confirm individualised care plan supports requirements to address patient's oral hygiene needs using a person-centred approach 1.2 Work effectively with patients from a diverse range of backgrounds to meet individual preferences in relation to

© Commonwealth of Australia, 2025 HumanAbility

	provision of support or assistance with oral hygiene
	1.3 Discuss and confirm the patient's level of participation in meeting their own oral hygiene preferences and provide information to the patient and/or carer as required
	1.4 Confirm oral hygiene requirements are within scope of own knowledge, skills and work role and seek appropriate assistance where patient requirements are outside scope
	1.5 Take into account and address impacts that provision of oral hygiene may have on the patient and address any situations of risk associated with the provision of support and confirm actions with supervisor
	1.6 Update knowledge to identify appropriate oral hygiene products, processes and aids for providing assistance and promoting independence in line with the patient's individualised care support plan
2. Assist and support patients in an appropriate manner	2.1 Provide oral hygiene support or assistance in an appropriate environment
	2.2 Use effective communication, appropriate body language and a caring attitude to facilitate patient understanding of, and comfort with, oral hygiene processes taking place
	2.3 Clarify and address difficulties in providing support, including patient behavioural responses with patient and supervisor within organisation protocols
	2.4 Adapt techniques or arrangements in case of patient refusal or inability to comply as recommended in the individualised care support plan
	2.5 Recognise signs that indicate an oral health problem, including distress or behaviours of concern, especially in patients unable to articulate their symptoms or concerns
	2.6 Develop trust, rapport and respect with the patient and work in an appropriate environment to maintain dignity at an optimal time.
	2.7 Ensure patient is in a position which provides visual access to the mouth seeking their assistance to open their own mouth to minimise contact with the mouth and use appropriate infection control procedures
	2.8 Provide support for patient's head or chin to enhance visual access without creating discomfort for the patient
3. Assist and support patients in	3.1 Prepare oral hygiene products and aids for use with

© Commonwealth of Australia, 2025 HumanAbility

their identified oral hygiene needs	teeth and soft tissue or dentures in an appropriate, safe and patient preferred manner 3.2 Inform patient and/or carer of oral hygiene processes to take place and incorporate toothbrush care 3.3 Provide and record individualised care support or assistance with oral hygiene tasks with consideration of identified patient preferences or risks 3.4 Where appropriate encourage patient to wear, insert and remove own dentures in line with care plan and support and assist patients with care of dentures 3.5 Update knowledge of techniques to improve oral hygiene practices and modified oral hygiene methods and aids
4. Recognise and report changes in patient oral hygiene requirements	4.1 Regularly review and document oral hygiene techniques being used to ensure oral health is maintained according to the oral health care plan 4.2 Identify variations in oral hygiene support requirements and report to supervisor any concerns to arise during patient contact 4.3 Consult with patient and supervisor to identify required changes to procedures and oral health products and aids 4.4 Maintain and file documentation using relevant technology

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTOHC004 Provide or assist with oral hygiene

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed effective oral hygiene practices on 3 different patients in the workplace
- used processes, aids and equipment appropriately in provision of oral hygiene, including performing the following tasks at least 1 time:
  - tooth brushing
  - soft tissue cleaning
  - use of mouthwash
  - care of dentures
  - care of crown or bridge or implant or braces

Knowledge Evidence

The candidate must demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- awareness that good oral health refers to a person’s mouth that has:
  - breath without offensive odour
  - inflammation and lesion-free soft tissue
  - intact and stable teeth without cavities
  - moist lips without chapping
  - no build-up of food, calculus or plaque
  - no oral pain

© Commonwealth of Australia, 2025 HumanAbility

  - pink, moist, uncoated tongue
  - watery plentiful saliva
  - well-fitting dentures
- relevant state/territory and national government policy and programs and reporting processes for oral health
- accessibility to services, including availability of private and public oral health services and eligibility for services
- basic anatomy and physiology underpinning oral health and hygiene, including what is considered healthy and unhealthy
- basics of oral health and hygiene and variations in oral hygiene care support requirements
- common and specialised equipment, products and aids utilised in provision of oral hygiene care support
- factors that impact on oral health, including:
  - abuse (neglect of oral health needs)
  - access to dental and health services
  - alcohol, licit and illicit drugs and substances, over the counter and herbal treatments
  - bacteria in dental plaque
  - correct infant feeding practices
  - damage from habitual grinding of teeth
  - diet and nutrition, including fluids and excessive intake of sugar
  - fluoride
  - general health and wellbeing
  - immunosuppressant conditions, HIV, chemotherapy and radiation
  - injury to mouth, such as from a seizure
  - medical history
  - oral piercings
  - patient oral health information
  - psychological issues, such as fear of being seen without dentures or persisting with ill-fitting dentures for satisfaction of others
  - salivary function
  - smoking
  - social and cultural determinants of health
  - susceptible tooth surfaces
  - transmission of bacteria particularly from family/carer to child
  - teeth misalignment causing trauma to teeth
  - trauma to the mouth as a result of an accident
- individualised care support plans, including terminology
- mobility and dexterity issues exhibited by patients and the impact this may have on oral hygiene
- oral side effects of medications, such as metallic taste in the mouth and ulcers
- dry mouth syndrome (xerostomia) related to conditions such as diabetes and ageing

© Commonwealth of Australia, 2025 HumanAbility

- organisation requirements for documentation and report writing
- own work role and responsibilities in provision of oral hygiene
- personal safety and security risks associated with provision of oral hygiene care support and strategies to minimise risks
- principles and practices in undertaking technical skills associated with supporting or assisting people to meet oral hygiene care needs
- principles and practices of confidentiality, privacy, respect and dignity
- processes and strategies to support people with, and provide, oral hygiene care needs
- role of carers and substitute decision makers in relation to oral hygiene decisions and support
- roles of oral health practitioners
- significance of service setting, including specific contexts of supporting oral hygiene care needs in a patient care setting and in a patient's private home
- signs and symptoms of an allergic reaction
- the interaction between oral health and general health
- oral hygiene products and aids for teeth and soft tissue may include:
  - alcohol-free mouthwash directed by an oral health practitioner as part of an oral health care plan
  - fluoride toothpaste
  - interdental brushes
  - manual and electric toothbrushes
  - modified toothbrushes
  - mouth props (if trained in their use)
  - saliva substitutes
  - soft toothbrush suitable for bending
  - specialised aids
  - sprays
  - sugar-free gums
  - tongue scraper
  - tooth remineralising agent
- oral hygiene products and aids for dentures may include:
  - denture adhesive
  - denture brush
  - denture disinfection product
  - denture labelling kit
  - denture soaking products
  - denture-friendly cleaner
  - named denture storage container (disposable or non-disposable)
- techniques to improve oral hygiene practices may include:
  - bridging:

© Commonwealth of Australia, 2025 HumanAbility

    - engages patients senses of sight, sound and touch by mimicking brushing of own teeth to provide physical prompt
    - place brightly coloured toothbrush in patient's preferred hand to mirror behaviour
  - chaining:
    - bring patients hand and toothbrush to their mouth, describing activity and encouraging the patient to continue unaided
  - hand over hand:
    - using a hand over patient's hand to start brushing patient's teeth in unison
  - distraction:
    - use of a familiar item, such as towel, cushion or activity board, in patient's hand while brushing their teeth
  - rescuing:
    - attempts at oral hygiene are not successful and assistance is required
- modified oral hygiene methods and aids, may include:
  - appropriate alcohol-free mouthwash and gel
  - backward bent toothbrush, or similar implement to retract cheek while brushing with another toothbrush
  - bite block
  - end tufted brush
  - flossers
  - hand grip on toothbrush for patients with reduced grip strength
  - high fluoride toothpaste applied onto teeth instead of brushing as a short term alternative only
  - mouth props for patients who clench or bite or who have difficulty opening mouth (specific training required)
  - mouth spray
  - mouth swabs
  - saliva substitute
  - suction swabs
  - tongue scraper and/or brush

Assessment Conditions

Skills and knowledge must be demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely.

The following aspect of the performance evidence for the provision of oral hygiene must have been demonstrated using 10 simulations scenarios covering a range of different people and complexities prior to demonstration in the workplace or with members of the general public:

- performed effective oral hygiene practices

© Commonwealth of Australia, 2025 HumanAbility

The following conditions must be met for this unit

- use of suitable equipment and resources, including:
  - age related oral health care resources
  - appropriate personal protective equipment (PPE)
  - *Dental board of Australia – dental guidelines* on infection control, on which the planning process is based
  - oral hygiene placebo products and aids for teeth and soft tissue
  - oral hygiene products and aids for dentures or oral hygiene self-care aids
- modelling of industry operating conditions, including access to people for the simulated scenarios

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTOHC005 Use basic oral health screening tools

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements.

Application

This unit describes the skills and knowledge required to prepare for and conduct authorised oral health screening tests within scope of work role to identify the need for referral to an oral health practitioner or for additional education or instruction in oral health care.

This unit applies to workers in a range of health and community service environments where authorised basic oral health screening is carried out.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards for maintaining infection control, and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria specify the level of performance needed to demonstrate achievement of the element*
1. Prepare for and participate in basic routine oral health screening services	1.1 Explain screening procedure and rationale to patient/s, check understanding and obtain consent from patient and/or carer to conduct screening 1.2 Prepare screening materials, instruments and tools 1.3 Take into account patient's ability to self-report and

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria specify the level of performance needed to demonstrate achievement of the element*
	select most suitable tools and approach
	1.4 Comply with directions of screening tool instructions, guidelines and/or training approved by the oral health sector
	1.5 Use screening tool to question patients about their oral health and take into account specific individual issues
	1.6 Demonstrate an understanding of existing health conditions and impacts on oral health
2. Follow screening tool questioning, observation and recording requirements	2.1 Record and document observations about patient's oral health in appropriate format according to tool and organisation guidelines
	2.2 Consult with other health personnel where necessary to confirm or clarify screening results, and record processes and outcomes
	2.3 Interpret findings based on screening results and report results to health practitioner or oral health team
	2.4 Document reporting processes, use information from patient and/or carer and own observations
3. Review screening process and referral outcomes	3.1 Address identified needs for oral health education and/or assessment in consultation with others and refer where necessary
	3.2 Where appropriate, discuss with patients and other relevant stakeholders any issues or obstacles relating to referrals made
	3.3 Where screening was unsuccessful report and follow up appropriately
	3.4 Clarify screening effectiveness by obtaining feedback from patients and other relevant stakeholders and identify any issues in own use of screening tool/s

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has completed the following tasks at least once:

- communicated effectively with 5 patients to establish a relationship of trust to provide oral health information, including gaining patient's understanding of how the oral health screening tools are used
- used relevant endorsed oral health screening tool/s and techniques on 5 different patients, including:
  - interpreting and reporting results
  - documentation of findings
  - referral of patients as required

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- how to use the relevant endorsed oral health screening tool/s and techniques including:
  - preparation of screening tools
  - communication strategies to aid in screening instrument questioning
  - evaluation of tool effectiveness

© Commonwealth of Australia, 2025 HumanAbility

  - follow-up on unsuccessful screening
- oral health screening instruments and ways to respond to the results, including:
  - referral pathways and processes
  - screening tools, procedures and associated rationale for use
  - workplace policies, procedures and programs for screening
- relevant state/territory and national government policy, programs and reporting processes for oral health

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as, using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTOHC006 Apply fluoride varnish

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. Removed pre-requisite. New evidence requirements for assessment including volume and frequency requirements.

Application

This unit describes the skills and knowledge required by practitioners working specifically in rural, remote and isolated areas and/or facilities that have knowledge and experience in oral health care, to apply fluoride varnish in line with prescribed treatment as outlined in an individualised oral health care plan and in accordance with relevant jurisdictional, legislative and regulatory requirements.

The unit applies to registered Aboriginal and/or Torres Strait Islander health practitioners, registered nurses and registered enrolled nurses in primary health care settings in rural, remote and isolated areas where the work roles may require the application of fluoride varnish.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards for maintaining infection control, and industry codes of practice.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
Elements define the essential outcomes	*Performance criteria specify the level of performance needed to demonstrate achievement of the element*
1. Prepare for the application of fluoride varnish	1.1 Check scope of own work role to ensure it includes application of fluoride varnish as advised by an authorised oral health practitioner in an individualised

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria specify the level of performance needed to demonstrate achievement of the element*
	oral health care plan
	1.2 Confirm the patient's oral health care plan, developed by an oral health practitioner, specifically includes the application of fluoride varnish and that there are no contraindications to this procedure
	1.3 Confirm consent
	1.4 Explain fluoride varnish application procedure to patient and/or family/carer and check their understanding of the benefits of fluoride varnish, need for regular applications, and the risks associated with fluoride varnish
	1.5 Explain the advantages and disadvantages of fluoride varnish over other procedures
	1.6 Prepare fluoride varnish kit and personal protective equipment (PPE) as required
2. Apply fluoride varnish to teeth	2.1 Position the patient for safety and comfort
	2.2 Use PPE in accordance with infection control policies and procedures throughout procedure
	2.3 Prepare teeth for fluoride varnish application in accordance with product instructions and application protocols
	2.4 Dispense appropriate amount of fluoride varnish
	2.5 Apply fluoride varnish in correct manner with applicator to teeth as recommended in the oral health care plan
3. Provide information to patient and/or family/carer about post-application advice and follow up requirements	3.1 Advise patient and/or family/carer of the importance of following instructions and recommended guidelines for eating, drinking fluids and brushing/cleaning teeth following fluoride varnish application
	3.2 Inform patient and/or family/carer of any expected short term changes in tooth appearance or sensation, including colour, feel or taste
	3.3 Provide post-application information to patient and/or family/carer in both verbal and written or picture formats

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria specify the level of performance needed to demonstrate achievement of the element*
	as appropriate to their individual needs or preferences
	3.4 Ensure patient and/or family/carer understand oral health practitioner's recommended schedule for ongoing application in line with their individualised oral health care plan
4. Record and document information about the application	4.1 Record and document details of the application undertaken, information provided and any concerns arising during contact with patient and/or family/carer
	4.2 Use relevant technology to complete documentation according to organisation's policies and procedures

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTOHC006 Apply fluoride varnish

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. Removed pre-requisite. New evidence requirements for assessment including volume and frequency requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- applied fluoride varnish safely and effectively to 5 people in line with product guidelines, jurisdictional legislation and regulation relating to fluoride schedule, supply, authorisation and disposal, including:
  - prepared self and the client using personal protective equipment against risks associated with the use of fluoride varnish
  - identified and responded to risks associated with applying fluoride varnish
  - evaluated own capabilities in the application of fluoride varnish skills

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- fluoride varnish refers to:
  - a highly concentrated form of fluoride which is applied to tooth's surface as a type of topical fluoride therapy. may be applied to enamel, dentine or cementum of tooth and can be used to help prevent decay, remineralise tooth surface and treat dentine hypersensitivity
  - not permanent varnish but due to adherent nature will stay in contact with tooth surface for several hours

© Commonwealth of Australia, 2025 HumanAbility

- accessibility to services, including availability of private and public oral health services and eligibility for services
- awareness of relevant jurisdictional legislation and regulation relating to fluoride, including schedule, supply, authorisation and disposal
- application of fluoride varnish in the correct manner refers to:
  - keeping client mouth open
  - maintaining moisture control
  - retracting lip and cheek, wiping and applying a thin layer of varnish to the teeth as prescribed in the oral health care plan
  - ensuring varnish is applied without contact with other tissues
  - never dispensing product in excess to that stated in the oral health care plan
- how to reflect on own level of knowledge to achieve desirable outcomes and maintain own capabilities
- awareness of risks associated with fluoride varnish
- basic anatomy and physiology underpinning oral health and hygiene
- causes and prevention of common dental diseases especially dental caries
- common equipment utilised in the application of fluoride
- effective self-care practices for oral health, including cause, control and prevention of dental plaque
- emergency procedures that may be required during the application of fluoride varnish
- factors that impact on oral health, including:
  - abuse (neglect of oral health needs)
  - access to dental and health services
  - alcohol, licit and illicit drugs and substances over the counter and herbal treatments
  - bacteria in dental plaque
  - correct infant feeding practices
  - damage from habitual grinding of teeth
  - diet and nutrition, including fluids and excessive intake of sugar
  - fluoride
  - general health and wellbeing
  - immunosuppressant conditions, HIV, chemotherapy and radiation
  - injury to mouth, such as from a seizure
  - medical history
  - oral piercings
  - patient oral health information
  - presence of plaque and calculus
  - psychological issues, such as fear of being seen without dentures or persisting with ill-fitting dentures for satisfaction of others
  - salivary function
  - smoking
  - social and cultural determinants of health

© Commonwealth of Australia, 2025 HumanAbility

  - susceptible tooth surfaces
  - transmission of bacteria particularly from family/carer to child
  - teeth misalignment causing trauma to teeth
  - trauma to the mouth as a result of an accident
- work health and safety (WHS) issues and procedures, including those related to manual handling of fluoride varnish and personal safety and security risks associated with provision of fluoride varnish application
- own work role and responsibilities in the application of fluoride varnish
- principles and practices of confidentiality, privacy and consent of fluoride treatment
- evaluation criteria for monitoring effectiveness of fluoride varnish application program
- role of significant others in supporting patient's oral health care needs
- safe application of fluoride varnish
- safe storage of products
- relationship between oral health and general health

Assessment Conditions

Skills and knowledge must be demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely.

The following aspect of the performance evidence must have been demonstrated using simulation prior to demonstration in the workplace or with members of the general public

- apply fluoride varnish safely and effectively

Note: Where state/territory legislation prevents practice in the workplace, simulated assessment environments may only be used in place of workplace assessment.

The following conditions must be met for this unit

- use of suitable equipment and resources, including:
  - appropriate personal protective equipment (PPE)
  - oral hygiene self-care aids and technique
  - placebo fluoride varnish
  - specialised equipment utilised in the application of fluoride varnish
  - modelling of industry operating conditions, including access to people for the simulated scenarios

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTOPD001 Provide advice on optical appliances

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Unit split to create new HLTOPD002. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to determine client optical needs from prescriptions, and provide detailed technical advice on appliances.

This unit applies to optical dispensers who work according to prescriptions provided by optometrists or ophthalmologists.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Determine client optical needs	1.1 Access and correctly interpret prescription or customer record 1.2 Determine style and performance requirements in

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	consultation with the client
	1.3 Take and record accurate client measurements
	1.4 Identify particular challenges or special needs of the client in relation to product options
	1.5 Identify opportunities to suggest new or innovative products
	1.6 Select products that meet client optical needs
2. Provide appliance information to client	2.1 Provide accurate and current style and performance details about available appliance options
	2.2 Explain how the optical appliance will meet visual, functional and cosmetic needs
	2.3 Provide accurate details of product costs
	2.4 Involve the client in the decision making process and provide opportunities to ask questions and discuss concerns
	2.5 Record advice provided according to organisation requirements

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential *to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTOPD001 Provide advice on optical appliances

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Unit split to create new HLTOPD002. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 100 hours of direct client contact work
- provided advice on optical appliances to at least 5 different clients
- provided advice on both spectacles and contact lenses
- provided sound technical advice on options to clients taking account of:
  - weight
  - lens thickness
  - centration
  - curvature

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- industry context for provision of advice on optical appliances, including:
  - industry structure and profile
  - interrelationships between different parts of the industry

© Commonwealth of Australia, 2025 HumanAbility

    - modes of optical practice
    - how dispensaries and laboratories operate
- terminology used to describe optical appliances, their features and use
- legal and ethical considerations for providing optical advice to clients:
    - duty of care
    - informed consent
    - privacy, confidentiality and disclosure
    - records management
    - work role boundaries – responsibilities and limitations of different industry roles
    - work health and safety
- needs of different client groups
    - children and youth
    - adults of both genders
    - older people
- measuring techniques and requirements
- ways to assist clients select the most appropriate optical appliance, including:
    - how to assess the clients needs and interpret the requirements of different types of prescription
    - the principles of cosmetics and fashion to spectacle selection
    - the important parameters of lifestyle and image in the selection of spectacles
    - how to select suitable frames for clients and their prescription
    - how to select a suitable lens and lens treatment for the client
    - the inter-pupillary distance and multifocal fitting heights
    - basic facial fitting and adjustment of spectacle frames and mounts
- concepts and principles behind the design of spectacle lenses including:
    - different categories of lenses and frames
    - examples of current lens designs
    - how lens aberrations can be corrected or reduced
    - how to determine and specify appropriate lens design
    - the design and performance of spectacle lenses
    - the function of aspheric lens designs
    - the six main types of aberrations which are encountered in specific lenses
- types of spectacle frames and their performance characteristics

Assessment Conditions

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations have not been provided in the workplace. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
    - back vertex distance (BVD) gauge or rule

© Commonwealth of Australia, 2025 HumanAbility

  - frame adjusting tools
  - opticians lens measure
  - parallel rule or equivalent
  - pupillary distance (PD) rule
  - pupillometer
  - spectacle frames
  - spectacle lenses
- modelling of industry operating conditions, including provision of services to the general public

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTOPD002 Dispense optical appliances

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. New unit - incorporates content from HLTOPD403C.

Application

This unit describes the skills and knowledge required to use specialised optical knowledge to confirm and check appliance selection, fit appliances and follow procedures to complete the dispensing process.

This unit applies to optical dispensers who work according to prescriptions provided by optometrists or ophthalmologists.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Confirm appliance selection	1.1 Check appliance selection against prescription details or customer record 1.2 Confirm selection with client 1.3 Gain consent from client for fitting where applicable

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
2. Fit optical appliances	2.1 Organise required fitting equipment and materials
	2.2 Correctly interpret technical aspects of customer requirements from records
	2.3 Follow standard fitting procedures and take account of special client needs
	2.4 Adjust frames to client to optimise visual performance
	2.5 Ensure optical appliances meet hygiene standards
	2.6 Give the client the opportunity to voice concerns in relation to optical appliance and make appropriate response
3. Instruct client on wear and care	3.1 Provide client with details about how to wear the appliance
	3.2 Offer information about appliance care routines
4. Finalise dispensing process	4.1 Complete financial transactions in accordance with relevant policies and procedures
	4.2 Follow correct procedures for client rebates
	4.3 Complete and store records in accordance with relevant policies, procedures and confidentiality requirements
	4.4 Offer follow up services in accordance with organisation procedures

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential *to performance.*

© Commonwealth of Australia, 2025 HumanAbility

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTOPD002 Dispense optical appliances

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. New unit - incorporates content from HLTOPD403C.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 100 hours of direct client contact work
- dispensed optical appliances to at least 5 different clients

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations for dispensing optical advice to clients:
  - duty of care
  - informed consent
  - privacy, confidentiality and disclosure
  - records management
  - work role boundaries – responsibilities and limitations
  - work health and safety
- how to interpret and transpose an optical prescription
- anatomy and physiology of the eyes, including:
  - common disorders of the eye
  - structure of the human eye and its physiological functioning

© Commonwealth of Australia, 2025 HumanAbility

  - the procedures involved in cataract extraction with intra-ocular lenses, including multifocal and toric IOL and factors that may influence the dispensing process
  - implant and refractive surgery
- basic theory of light, including:
  - basic calculation of angles of incidence, refraction, deviation and critical angles
  - how light is propagated and how commonly observed effects may occur
  - various light-induced phenomena
- ophthalmic prism, including:
  - effects of ophthalmic prism upon the eyes, and the need for ophthalmic prism in prescriptions
  - solving by both calculation and graphical methods, a variety of prism problems
  - the relationship between lens power, decentration and prism
  - the use of a tangent scale to measure ophthalmic prism
  - effect produced by varying the index, diameter, prismatic specifications, or form of a lens
  - the processes and assessment of vision, colour vision and perception
  - optical calculations and measurements, including measurements to determine the inter-pupillary distance and fitting heights for all lenses
  - effects produced by varying the index, diameter, prismatic specifications and form of a lens
- features of spherical lenses and their suitability for different customers, including:
  - concepts of vergence and their use in optical calculations
  - how to construct diagrams to illustrate image formation using simple ray-tracing techniques
  - refractive effects of a lens as the sum of its 2 surface powers
  - refractive properties of spherical lens surfaces
- features of astigmatic lenses and their suitability for different customers, including:
  - how to perform calculations related to the application of astigmatic lenses in optical prescriptions
  - formulae required to calculate the centre and edge thickness of spherical and astigmatic lenses
  - nature of astigmatism
  - the difference between cylindrical and sphero-cylindrical for astigmatic conditions
  - various forms of astigmatic lenses
- features of contact lenses and their suitability for different customers, including:
  - acceptable hygiene standards
  - examples of causes of wearing problems and lens hygiene and the correct procedures for lens maintenance
  - relevant Quality Assurance Standards
  - the correct methods of contact lens handling, insertion and removal
  - the parameters of contact lenses from prescription data supplied

© Commonwealth of Australia, 2025 HumanAbility

  - how lenses are manufactured
  - features and options for multifocal and progressive lenses
- commonly occurring problems and potential solutions in a dispensing situation
- requirements of dispensing spectacles to clients with special or complex needs, including:
  - commonly occurring problems in a dispensing situation and possible solutions
  - the appropriate action to be taken according to prescription requirements and the special needs of the client
  - visual screening
- how to determine criteria influencing dispensing procedures necessary for aspheric lenses
- referral protocol and procedures
- health fund and rebate requirements

Assessment Conditions

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations have not been provided in the workplace. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - back vertex distance (BVD) gauge or rule
  - frame adjusting tools
  - opticians lens measure
  - thickness callipers
  - parallel rule or equivalent
  - millimetre rule or pupillary distance (PD) rule
  - pupillometer
  - spectacle frames
  - spectacle lenses
- modelling of industry operating conditions, including provision of services to the general public

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTOPD003 Dispense atypical prescriptions

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Removed prerequisites.

Application

This unit describes the skills and knowledge required to evaluate client needs, take measurements and make calculations to facilitate effective dispensing for atypical prescriptions, including for low vision clients. Low vision occurs when, after accurate refraction and the provision of spectacles or contact lenses to correct the refractive error, good visual acuity is not achievable.

This unit applies to optical dispensers who work according to prescriptions provided by optometrists or ophthalmologists.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Evaluate client needs	1.1 Interpret the parameters of atypical prescriptions and transpose as required 1.2 Analyse the prescription and identify areas of

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	freedom and constraints
	1.3 Assess the individual needs and requirements of the client
	1.4 Select possible frame, lens and treatment combinations to suit individual requirements based on principles of low vision aid selection, depending on client's needs
2. Determine specifications for atypical prescriptions	2.1 Take accurate measurements and make calculations necessary to accurately dispense atypical prescriptions
	2.2 Select option that best meets cosmetic, optical and functional needs
	2.3 Determine the correct working distance for low vision aids
3. Fit frames and lenses for atypical prescriptions	3.1 Organise required fitting equipment and materials
	3.2 Select and specify appropriate bevelling and edging requirements to enhance the cosmetics and quality of the spectacles
	3.3 Select appropriate lens treatments or additional requirements to maximise the visual performance and enhance the quality of the finished spectacles
	3.4 Measure and specify the most appropriate lens fitting criteria
	3.5 Ensure the quality of the finished spectacles
	3.6 Fit and adjust the spectacles to client needs
4. Instruct client on wear and care	4.1 Provide client with details about how to wear the appliance
	4.2 Offer information about appliance care routines
	4.3 Reinforce and support advice provided by low vision practitioner on correct use of low-vision aids

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
5. Finalise dispensing process	5.1 Complete financial transactions in accordance with relevant policies and procedures 5.2 Follow correct procedures for client rebates 5.3 Complete and store records in accordance with relevant policies, procedures and confidentiality requirements 5.4 Offer follow up services in accordance with organisation procedures

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential *to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTOPD003 Dispense atypical prescriptions

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Removed prerequisites.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- dispensed optical appliances in response to at least 5 different atypical prescription needs
- determined the criteria for atypical dispensing, including making accurate calculations for the following:
  - change in vertex distance
  - compensated power (Fc)
  - effective power (Fe)
  - effectivity
  - prescriptions requiring compensations
- calculated differential prismatic effect and compensation using different sized segments, Fresnel prisms, or slab off bifocals
- calculated field of view and determine ways to improve the field of view
- calculated spectacle magnification and determine ways to reduce the effects of aniseikonia
- compounded and resolved prism

© Commonwealth of Australia, 2025 HumanAbility

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations for dispensing optical advice to clients:
  - duty of care
  - informed consent
  - privacy, confidentiality and disclosure
  - records management
  - work role boundaries – responsibilities and limitations
  - work health and safety
- requirements of dispensing spectacles to clients with special or complex needs, including:
  - low vision, what it is, and how various aids may be used to assist such clients
- types of atypical prescriptions, how to interpret and transpose them, including:
  - anisometropia
  - aphakia
  - high ametropia
  - prism
- features and capabilities of aphakic lenses including:
  - aspheric lens design
  - centering
  - compensating for vertex distance change
  - edging/bevelling profile
  - full field lens design
  - general problems associated with dispensing aphakic lenses including jack-in-the-box effect and ring scotoma
  - lenticular designs
- field of view and its impact on atypical dispensing, including:
  - apparent versus real
  - aspheric lenses
  - calculations
  - high minus corrections
  - high plus corrections
- features of high ametropia including:
  - back vertex power (F’v) front vertex power (Fv)
  - compensated surface power
  - corrections
  - prescription requirements and constraints
  - thick lens power
  - types

© Commonwealth of Australia, 2025 HumanAbility

- high minus lenses and negative lenticulars and how they are used, including:
  - centering
  - compensating for vertex distance change
  - dispensing high index materials
  - edging/bevelling profile
  - high index materials
  - lenticular types and designs
  - surface reflections and the need for anti-reflection and multi-coatings
- high prismatic corrections and how they are achieved, including:
  - edging/bevelling profile
  - fresnels and their use
  - high horizontal prism
  - high vertical prism
- ways to respond to aniso and antimetropia including:
  - base curve selection
  - correcting vertical imbalance problems
  - effects of lens form (shape)
  - effects of thickness
  - prism differential
- features of spectacle magnification including:
  - effects on visual acuity
  - positive compared to negative lenses
  - retinal image size

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - vertex distance calculator (disc or table/chart)
  - vertex distance rule
  - vertex distance calliper (distometer type)
  - lens measure
  - pupillary distance (PD) rule
  - pupillometer
  - thickness callipers
- modelling of industry operating conditions, including integration of problem solving activities

© Commonwealth of Australia, 2025 HumanAbility

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTOPD004 Edge and fit ophthalmic appliances

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to perform edging and fitting of spectacle lenses and to apply techniques, treatments and processes to finish or repair spectacle frames and lenses.

This unit applies to optical dispensers who work according to prescriptions provided by optometrists or ophthalmologists.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for edging and fitting	1.1 Access and correctly interpret required information and prescriptions 1.2 Prepare and check equipment and instruments for operational readiness 1.3 Select and prepare personal protective equipment as

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	required
2. Perform edging and fitting	2.1 Edge lenses following the tolerances allowed by Australian standards
	2.2 Produce accurate formers
	2.3 Use special hand-edging techniques to modify lenses for change-overs and centring corrections
	2.4 Edge, drill, groove and mount spectacle lenses to frames
	2.5 Edge, drill and mount spectacle lenses to rimless frames
3. Adjust and repair frames and lenses	3.1 Repair and modify spectacle frames to meet client needs
	3.2 Complete standard alignment of frames to required standards
	3.3 Produce tinted lenses to required standards
4. Utilise computer technology	4.1 Select appropriate technology and software applications to achieve the requirements of the task
	4.2 Adjust workspace, furniture and equipment to suit the ergonomic requirements of the user
	4.3 Use technology according to organisation requirements and in a way which promotes a safe work environment
	4.4 Carry out or arrange routine maintenance in order to ensure that equipment is maintained in accordance with manufacturer’s instructions and organisation requirements
	4.5 Identify equipment faults and take action in accordance with manufacturer’s instructions or by reporting fault to designated person
5. Conduct final checking procedures against Australian	5.1 Determine any axis or centring error and apply Australian standards tolerances.

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
standards	5.2 Verify powers, axes and centration by checking the spectacles on the focimeter
	5.3 Check lens surface for scratching and aberrations
	5.4 Adjust the frame to standard alignment
	5.5 Check metal framed spectacles for strain and reduce as required
	5.6 Clean spectacles using appropriate cleaners
	5.7 Clean, maintain and store equipment in accordance with manufacturers requirements and infection control procedures
	5.8 Accurately document procedures undertaken according to organisation procedure

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential *to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTOPD004 Edge and fit ophthalmic appliances

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- edged and fitted at least 10 pairs of spectacles to Australian standards, demonstrating the appropriate handling of the following types of frames and materials:
  - nylon (nyl-tag) rimless
  - metal full rim
  - plastic full rim
- automatically edged lenses using:
  - former cutting
  - blocking/chucking systems
  - machine operation
  - drilling
  - grooving
- hand edged lenses using:
  - hand bevelling techniques
  - safety chamfering
  - changeovers
- addressed common lens problems:
  - rectifying off-axis lenses

© Commonwealth of Australia, 2025 HumanAbility

    - reducing unwanted vertical and/or horizontal prism
- repaired and modified spectacle frames, including:
    - alignment
    - refitting nylon
    - re-pinning and riveting joints
    - sink joints
    - soldering metal frames
    - undertaking frame part replacements
    - undertake digital fame tracing
- used the features of a manual focimeter for the following tasks:
    - correct neutralisation
    - determination of additions
    - determination of axes
    - determination of centration
    - determination of powers
    - determination of prism
- accurately calculated minimum size uncut (MSU) using centration chart and by calculation to allow for papillary distance (PD) and decentration for prism
- made templates and eliminated errors using:
    - hand techniques
    - machine techniques
- tinted lenses to match tint samples
- mounted lenses

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- Australian standards tolerances
- transmission and absorption data and its role in edging and fitting
- properties of lenses, including:
    - refractive index
    - abbe value
    - specific gravity
    - impact resistance
    - transmission and absorption
- features and use of impact resistant safety lenses including:
    - advantages and disadvantages
    - Australian standards for both general purpose and industrial use

© Commonwealth of Australia, 2025 HumanAbility

  - evaluation of materials including glass, CR-39 (allyl diglycol carbonate), trivex, higher index plastics, polycarbonate and laminates
  - impact resistance
  - impact testing requirements, conditions and procedures
  - principles and processing of chemical toughening
  - problems and special lens requirements
- filter and tinted lens processes including:
  - Australian standards requirements
  - plastic lens tinting including dyes and tint types, equipment, preparation, problems and solutions
  - transmission testing including equipment and instrumentation, equipment limitations and Australian standards
- vacuum coatings and their use, including:
  - absorptive (tinted) coatings
  - handling, cleaning and care of coatings
  - manufacturing processes
  - multiple layer antireflection (AR) coatings
  - single AR coating
- the effects of surface reflections and ghost images on lenses
- edging and fitting glazing techniques
- frame measurement systems including boxing and datum
- features of different frames and rims and how to work with them:
  - different frame materials and their scope of use
  - techniques for working with frames and rims heating, manipulation, adjusting, handling and repair
  - rimless types
  - drilled rimless frames
  - standard nylon rims
- nasal cut and nasal add techniques
- features and functions of edging and fitting equipment:
  - automatic edgers
  - calibration and checking tools
  - focimeters (lensmeters)
  - frame alignment tools
  - hand edging equipment
  - marking/centration devices
  - edging wheel designs and characteristics
  - machine designs
- current and emerging software applications used in the optical dispensing environment

© Commonwealth of Australia, 2025 HumanAbility

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - automatic edgers
  - hand edgers
  - blockers
  - markers
  - focimeters (lensmeters)
  - nylon groover
  - drill
  - clavulus
  - parallel rules
  - millimetre (PD) rules
  - frame tools
  - frames
  - lenses
  - adhesive and protection pads/films
  - formers
  - frame heater
  - soldering unit
  - tint bath
  - dyes
- modelling of industry operating conditions, including:
  - integration of time constraints
  - integration of problem solving activities

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTOPD005 Process and manage optical appliance orders

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Removed prerequisite.

Application

This unit describes the skills and knowledge required to use specialised optical knowledge to place, check and service orders for spectacle frames and lenses.

This unit applies to optical dispensers who work according to prescriptions provided by optometrists or ophthalmologists.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
1. Place optical appliance orders	1.1 Interpret and transpose optical prescriptions 1.2 Identify and follow up on discrepancies 1.3 Complete ordering procedures using correct optical terminology and documentation 1.4 Respond to technical queries about optical appliance

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
	orders
2. Check optical appliance orders	2.1 Verify details of order received against client record
	2.2 Organise required equipment and materials
	2.3 Check the spectacles on the focimeter to identify and verify powers, axes and centration
	2.4 Determine any axis or centring error and apply Australian standards tolerances
	2.5 Check lens surface for scratching and aberrations
	2.6 Adjust frames to standard alignment and check for strain as appropriate
	2.7 Clean spectacles using cleaning agents suited to the material
	2.8 Fit appliances from checked orders to client
3. Service optical appliance orders	3.1 Identify maintenance and adjustment requirements for optical appliances
	3.2 Make minor repairs and identify when work needs to be referred to specialist frame repairer
	3.3 Make standard frame adjustments to optical appliances
	3.4 Fit and edge lenses according to scope of own job role and organisation requirements
4. Maintain equipment	4.1 Clean equipment and attachments in accordance with manufacturer's recommendations and infection control procedures
	4.2 Complete routine maintenance procedures on equipment in accordance with manufacturer's requirements
	4.3 Store equipment and attachments in accordance with manufacturer's recommendations and organisation policies and procedures

Assessment Requirements for HLTOPD005 Process and manage optical appliance orders

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Removed prerequisite.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- transposed at least 10 different prescriptions
- placed orders for all of the following processes and materials and frames
  - spectacle lens edging
  - plastic frames
  - metal frames
  - nylon (nyl-tag) rimless
  - tinted lenses
- checked at least 10 different orders using focimeter, other equipment and standard checking processes, including:
  - calculated minimum size uncut (MSU) using centration chart and by calculation to allow for PD and decentration for prism
  - identified completed spectacle lens thickness
  - used problem solving techniques in reducing unwanted vertical and/or horizontal prism and rectifying off-axis lenses
  - interpreted transmission and absorption data including manufacturer’s transmission curves
  - corrected neutralisation
  - determined:

© Commonwealth of Australia, 2025 HumanAbility

    - additions
    - axes
    - centration
    - powers
    - prism
- edged and fitted lenses, including:
    - single vision
    - bifocal and/or progressive
- completed all of the following minor repairs, adjustments and frame part replacements:
    - repaired and serviced nylon rims
    - lens insertion
    - fitted frame
    - soldered metal frames
    - replaced:
        - temples
        - fronts
        - pads
        - screws

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- manufacturer transmission curves and how to interpret them
- transmission and absorption data and how to interpret
- nature of vacuum coatings on lenses, including:
    - absorptive (tinted) coatings
    - handling, cleaning and care of coatings
    - manufacturing processes
    - multiple layer anti-reflection (AR) coatings
    - single AR coating
    - surface reflections and ghost images
- filter and tinted lens processes including:
    - Australian standards
    - transmission testing including equipment and instrumentation, equipment limitations and Australian standards
- properties of lenses:
    - curve selection and thickness considerations
    - Australian standards requirements
- frame measurement systems, including boxing and datum

© Commonwealth of Australia, 2025 HumanAbility

- drilled rimless frames including mounts and rimless types and equipment needed
- scope of metal and plastic frame material including:
  - heating
  - manipulation
  - adjusting
  - handling
  - repair
- standard nylon rims including the equipment needed
- impact resistant safety lenses including:
  - advantages and disadvantages
  - Australian standards for both general purpose and industrial use
  - evaluation of materials including glass, CR-39 (allyl diglycol carbonate), trivex, higher index plastics, polycarbonate and laminates
  - impact resistance
- lens glazing and grooving techniques
- automatic edging processes including:
  - machine designs
  - machine operation
- edging and fitting techniques for single vision and bifocal/progressive lenses
- scope of routine maintenance for optical equipment
- workplace processes for equipment maintenance:
  - routine checking of equipment
  - preparation of a maintenance program
  - encouraging feedback from work colleagues
  - regular back-ups of data
  - keeping a log book of detected faults
  - regular occupational health and safety inspections
  - checking that repairs have been carried out
- current and emerging technology used in optical work

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - automatic edgers
  - hand edgers
  - blockers
  - markers
  - focimeters (lensmeters)
  - nylon groover

© Commonwealth of Australia, 2025 HumanAbility

  - drill
  - parallel rules
  - papillary distance (PD) or millimetre rules
  - frame tools
  - frames
  - lenses
  - adhesive and protection pads/films
  - formers
  - frame heater
  - soldering unit
- modelling of industry operating conditions, including:
  - integration of time constraints
  - integration of problem solving activities

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTPAT001 Identify and respond to clinical risks in pathology collection

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to recognise client risk factors, identify emergency situations and provide emergency or first aid response to client reactions associated with pathology specimen collection.

This unit applies to any individual for whom pathology collection is part of the job role. They may be working in collection centres, in hospitals or in other health care environments.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Recognise and assess potential risk	1.1 Identify potential clinical risks of performing collection procedure from review of client information in accordance with organisation procedures
	1.2 Assess client against pre-test criteria and determine

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	risk in accordance with organisation procedures
	1.3 Identify and refer potential risk situations beyond scope of own role to appropriate person
2. Identify situations requiring emergency or first aid response	2.1 Observe clients for reactions during and after collection procedure
	2.2 Promptly recognise signs of adverse reaction or complication
3. Respond to client reactions and complications	3.1 Follow documented procedures for any reactions and complications
	3.2 Follow first aid protocols in accordance with organisation policies and procedures
	3.3 Provide clear information to client and obtain consent from client where possible
	3.4 Complete accurate record of incidents in accordance with organisation policies and procedures

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential *to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTPAT001 Identify and respond to clinical risks in pathology collection

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- assessed and recognised potential clinical risks from review of information from at least 3 different clients
- recognised adverse reactions and complications and followed required procedures in response to at least 3 different adverse events
- recognised adverse reactions and complications requiring first aid response and provided first aid according to procedures for all of the following:
  - fainting
  - fitting
  - arterial puncture
  - nerve damage
  - bruising
  - excessive or prolonged bleeding
  - diabetic emergency
  - falls
  - grazes
  - scarring and burns
  - vomiting

© Commonwealth of Australia, 2025 HumanAbility

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations (national and state/territory) for emergency response, and how these are applied in organisations:
  - duty of care
  - informed consent
  - privacy, confidentiality and disclosure
  - records management
  - work role boundaries:
    - scope and limitations of own role in assessing clinical risk
    - points of referral for risk situations beyond scope of own role
  - work health and safety
- standard infection control requirements for clinical procedures:
  - hand hygiene
  - use of personal protective equipment (PPE)
  - avoiding contact with bodily fluids
  - sharps injury prevention and treatment if sustained
  - waste disposal
- client information that may inform assessment of risk:
  - clinical history
  - allergies
  - current and recent medications
  - recent illnesses
  - reactions/complications to previous collection procedures
- anatomy and physiology relevant to pathology collections:
  - vascular and nervous systems, particularly the close association of blood vessels and nerves of the limbs relevant to pathology collection
  - arteries, veins and capillaries
  - heart function – significant structures, greater blood vessels that enter and exit the heart
  - direction of flow of oxygenated and deoxygenated blood through the heart and lungs
  - features of collection sites
- types and features of clinical risks commonly associated with pathology collection:
  - reactions and complications to procedure
  - infection
  - hemoconcentration
  - haemolysis
  - blood components

© Commonwealth of Australia, 2025 HumanAbility

  - sharps injury
  - excessive bleeding
  - damage to nervous system
  - vascular damage
  - location of venous access
  - concurrent treatments and therapy
  - intravenous (IV) therapy
- emergency procedures for client reactions and complications
- first aid and care protocols for:
  - fainting
  - fitting
  - arterial puncture
  - nerve damage
  - bruising
  - excessive bleeding
  - diabetic emergency
  - falls
  - grazes
  - scarring and burns

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including documented emergency and first aid procedures for the candidate to follow
- modelling of industry operating conditions, including presence of situations requiring problem solving

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTPAT002 Perform venous blood collections

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Some content also in HLTPAT003. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Minimum work hours added.

Application

This unit describes the skills and knowledge required to confirm collection requirements, prepare client and equipment, and perform routine blood collections using venous blood collection.

This unit applies to any individual for whom blood collection is part of the job role. They may be working in collection centres, in hospitals or in other health care environments.

This unit relates to collections from adults of varied ages and genders, adolescents and children over 5 years of age. It does not include collections from babies, neonates, arterial collections or collections made via artificial access devices such as central lines, peripherally inserted central catheter (PICC) lines, or intra venous (IV) catheter.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Greet client and confirm pre-test criteria	1.1 Greet client courteously and identify self
	1.2 Identify client following organisation and regulatory procedures
	1.3 Confirm that client meets pre-testing criteria for required collection
	1.4 Obtain, interpret and accurately record personal and clinical information in accordance with organisation policies and procedures
	1.5 Correctly explain collection procedure to client
	1.6 Obtain consent for collection procedure from client
2. Prepare for venous blood collection procedure	2.1 Select appropriate collection site based on client evaluation
	2.2 Assemble equipment appropriate to test requested site selected
	2.3 Position client to ensure comfort and safety of both client and collector
	2.4 Identify when assistance may be needed and seek help if required
3. Draw blood	3.1 Adopt standard and additional infection control guidelines and precautions according to organisation documented procedure
	3.2 Clean site with approved cleansing agent and allow to air dry prior to collection
	3.3 Apply and remove/loosen tourniquet according to requirements of equipment being used
	3.4 Confirm suitable vein through palpation of site and clean skin according to organisation documented procedure
	3.5 Anchor vein below the site according to documented procedure
	3.6 Insert needle at approved angle of 30 degrees or less

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	3.7 Collect correct volume of blood in appropriate collection tubes in the approved order of draw, as recommended by the manufacturer
	3.8 Once correct amount collected, withdraw needle and apply direct pressure to site using dry cotton swab for minimum of 2 minutes and until bleeding has visibly stopped
	3.9 Dispose of needle immediately and safely using approved sharps disposal device
	3.10 Invert collection tubes within timeframe required as recommended by manufacturer
	3.11 Observe client before, during and after collection for potential adverse effects and respond according to procedure
4. Follow post-blood collection procedures	4.1 Accurately label blood collection tubes in front of client with time and date of collection, client details and other required information following regulatory and organisational guidelines
	4.2 Dispose of waste in accordance with infection control protocols and organisation policies and procedures
	4.3 Confirm tube labelling information accuracy with client
	4.4 Confirm that site has visibly stopped bleeding after appropriate time lapse and apply dressing
	4.5 Complete other collection documentation in accordance with organisation procedures
	4.6 Provide client with correct post venepuncture care instructions
	4.7 Prepare collected samples for transit or store according to test and organisation requirements

© Commonwealth of Australia, 2025 HumanAbility

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential *to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTPAT002 Perform venous blood collections

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Some content also in HLTPAT003. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Minimum work hours added.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 35 hours of pathology collection work under the supervision of a person currently working in a phlebotomist role for at least 18 hours per fortnight
- followed established technical, infection control and safety procedures and collected blood suitable for testing using venous blood collection with a maximum of two attempts from at least 20 different people comprising adults of varied ages
- used the following methods of collection:
  - evacuated system (at least 10 times)
  - winged infusion sets and/or needle and syringe as per organisation policy and procedure

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations for blood collection, and how these are applied in organisations:

© Commonwealth of Australia, 2025 HumanAbility

- children in the workplace
  - duty of care
  - informed consent
  - mandatory reporting
  - privacy, confidentiality and disclosure
  - records management
  - supportive holding for procedures (limitations)
  - work role boundaries
    - blood collection role in different contexts
    - sources of blood sample requests
  - work health and safety
- standard infection control requirements for clinical procedures:
  - hand hygiene
  - use of personal protective equipment (PPE)
  - avoiding contact with bodily fluids
  - sharps injury prevention and treatment if sustained
  - waste disposal
- industry terminology used in blood collection:
  - equipment
  - procedures
  - abbreviations
  - blood test names
  - appropriate venepuncture sites
  - clinical history and medication details
- key aspects of human anatomy and physiology in relation to the vascular, arterial and nervous system and relevant to the variety of blood collection procedures and collection sites
- components of blood in relation to quality blood samples and pre-analytical error:
  - serum plasma
  - red cells
  - white cells
  - platelets
- clinical risks of blood collection procedures and procedures designed to minimise those risks
- collection procedure factors which contribute to a quality sample collection and impact on laboratory testing
- pre-analytical factors which may affect the chemical analysis of blood and impact on collection:
  - appropriate times to collect
  - impact of drugs
  - timing of last dose

© Commonwealth of Australia, 2025 HumanAbility

  - required fasting times
  - protecting the integrity of the specimen
- features, functions and use of venepuncture equipment:
  - evacuated systems – multi-sample needles and winged infusion sets
  - needles and syringes
  - tourniquets
  - cleansing solutions and swabs
  - collection tubes
- blood sample handling, processing, transit and storage methods
- requirements for selection and collection into tubes with variable additives:
  - ethylenediaminetetraacetic acid (EDTA)
  - sodium citrate
  - lithium/sodium heparin
  - fluoride oxalate
  - separation gel
  - blood culture bottles

Assessment Conditions

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations have not been provided in the workplace. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - tourniquets
  - collection tubes
  - syringes and needles and/or winged infusion set (butterfly)
  - multi-sample needle and holder
  - evacuated blood collection equipment
  - sharps containers
  - alcohol wipes
  - dressings
  - PPE
  - hand hygiene facilities
  - documented collection procedures for the candidate to follow
- modelling of industry operating conditions, including:
  - interactions with clients from general public
  - presence of situations requiring problem solving in non-routine situations
- supervision of candidate's work activities by a person currently working in a phlebotomist role for at least 18 hours per fortnight
- at least 5 of the 20 collections must be directly observed in workplace by the assessor

© Commonwealth of Australia, 2025 HumanAbility

The following aspects of the performance evidence must have been demonstrated using simulation prior to demonstration in the workplace or with members of the general public:

- venous blood collection technique using the following equipment
  - evacuated system
  - winged infusion sets
  - needle and syringe

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTPAT003 Perform capillary blood collections

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. New unit.

Application

This unit describes the skills and knowledge required to confirm collection requirements, prepare client and equipment, and collect capillary blood using specific collection criteria, techniques and equipment.

This unit applies to any individual for whom capillary blood collection is part of the job role. They may be working in collection centres, in hospitals or in other health care environments.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian /New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Confirm collection requirements	1.1 Greet client courteously and identify self 1.2 Identify client following organisation and regulatory procedures 1.3 Confirm that client meets pre-testing criteria for required collection 1.4 Obtain, interpret and accurately record personal and clinical information in accordance with organisation policies and procedures

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.5 Explain collection procedure to client
	1.6 Obtain consent for collection procedure from client
2. Prepare for skin puncture blood collection	2.1 Confirm method and site of collection based on correct interpretation of clinical request and age of client
	2.2 Select equipment to ensure the collection meets test and organisational requirements
	2.3 Provide clear advice about the procedure to client or carer
	2.4 Use appropriate warming device to safely prepare site as required in accordance with documented organisation procedure
	2.5 Position client to ensure comfort and safety of both client and collector, using supportive holding techniques
	2.6 Identify when assistance may be needed and seek help if required
	2.7 Determine minimum volumes of blood required according to testing organisation's requirements and volume limits based on client age and weight
3. Draw blood	3.1 Adopt standard and additional infection control guidelines and precautions according to organisation documented procedure
	3.2 Clean site with approved cleansing agent and allow to air dry prior to collection
	3.3 Puncture the skin in the appropriate location, using an approved lancet appropriate to site selected and client age
	3.4 Collect capillary blood sample into appropriate collection containers devices to ensure sample integrity and correct order of draw in accordance with manufacturer's guidelines
	3.5 Mix sample by gentle inversion, maintaining sample integrity as required
	3.6 Following collection, apply pressure to puncture site

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	until site has stopped bleeding
	3.7 Observe client before, during and after collection for potential adverse effects and respond according to procedure
4. Follow post-blood collection procedures	4.1 Accurately label blood collection tubes in front of client with time and date of collection, client details and other required information following regulatory and organisational guidelines
	4.2 Dispose of waste in accordance with infection control protocols and organisation policies and procedures
	4.3 Confirm information accuracy with client or carer
	4.4 Confirm that site has stopped bleeding after appropriate time lapse and apply wound dressing
	4.5 Complete other collection documentation in accordance with organisation procedures
	4.6 Prepare collected samples for transit or store according to test requirements

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential *to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTPAT003 Perform capillary blood collections

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. New unit.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed established technical, infection control and safety procedures and collected blood using skin puncture from at least 3 different people of varying ages

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations for capillary blood collection, and how these are applied in organisations:
  - children in the workplace
  - duty of care
  - informed consent
  - mandatory reporting
  - privacy, confidentiality and disclosure
  - records management
  - supportive holding for procedures (limitations)
  - work role boundaries
    - boundaries of responsibilities
    - capillary blood collection role in different contexts, and situations where skin puncture is the most appropriate collection technique

© Commonwealth of Australia, 2025 HumanAbility

        - sources of blood sample requests
    - work health and safety
- standard infection control requirements for clinical procedures:
    - hand hygiene
    - use of personal protective equipment (PPE)
    - avoiding contact with bodily fluids
    - needle stick injury considerations
    - waste disposal
- industry terminology used in skin puncture blood collection:
    - equipment
    - procedures
    - abbreviations
    - skin puncture sites
    - clinical history and medication details
- key aspects of human anatomy and physiology in relation to the skin, vascular, arterial and nervous system relevant to capillary collections
- clinical risks of capillary blood collection procedures and procedures designed to minimise those risks
- factors which may affect the chemical analysis of blood and impact on collection:
    - appropriate times to collect
    - impact of drugs
    - timing of last dose
    - required fasting times
    - protecting the integrity of the specimen
- techniques for blood collection through skin puncture
- features, functions and use of skin puncture blood collection equipment:
    - approved lancets
    - cleansing solutions and swabs
    - collection tubes (microtainers)
    - dressings
- blood sample handling, processing, transit and storage methods
- requirements for selection and collection into tubes with variable additives:
    - ethylenediaminetetraacetic acid (EDTA)
    - lithium/sodium heparin
    - fluoride oxalate
    - separation gel

Assessment Conditions

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations have not been provided in the workplace. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - sharps containers
  - bio waste bins
  - alcohol wipes
  - dressings
  - PPE
  - hand hygiene facilities
  - documented collection procedures for the candidate to follow
- modelling of industry operating conditions, including:
  - interactions with clients and carers from general public
  - presence of situations requiring problem solving in non-routine situations
- supervision of candidate's work activities by a person currently working in a phlebotomist role for at least 18 hours in a fortnight time period

The following aspect of the performance evidence must have been demonstrated using simulation prior to demonstration in the workplace or with members of the general public:

- capillary blood collection technique

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTPAT004 Collect pathology specimens other than blood

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTPAT304/410. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Removed prerequisite.

Application

This unit describes the skills and knowledge required to confirm collection requirements, prepare client and equipment and make routine pathology specimen collections.

This unit applies to any individual for whom specimen collection is part of the job role. They may be working in collection centres, in hospitals or in other health care environments.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australia /New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Confirm collection requirements	1.1 Greet client courteously and identify self 1.2 Identify client following organisation and regulatory procedures 1.3 Confirm that client meets pre-testing criteria for required collection

Assessment Requirements for HLTPAT004 Collect pathology specimens other than blood

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTPAT304/410. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Removed prerequisite.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed established technical, infection control and safety procedures for a minimum of 5 different specimen types selected from the following:
  - aspirates
  - breath
  - DNA swabs
  - nail clippings and/or scrapings
  - saliva
  - semen
  - skin scrapings
  - sputum
  - stool
  - swabs – bacterial, viral and PCR
  - urine

© Commonwealth of Australia, 2025 HumanAbility

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations for pathology collection, and how these are applied in organisations:
  - children in the workplace
  - duty of care
  - informed consent
  - mandatory reporting
  - privacy, confidentiality and disclosure
  - records management
  - work role boundaries
    - boundaries of responsibilities
    - sources of non blood sample requests and interactions with other health services
  - work health and safety
- standard infection control requirements for clinical procedures:
  - hand hygiene
  - use of personal protective equipment (PPE)
  - avoiding contact with bodily fluids
  - sharps injury prevention and treatment if sustained
  - waste disposal
- industry terminology used in specimen collection:
  - equipment
  - procedures
  - abbreviations
  - medical terminology
- key aspects of anatomy and physiology sufficient to make safe specimen collection
- clinical risk factors in specimen collection and procedures designed to minimise those risks for different specimen types
- factors which may affect the chemical analysis of specimens and the impact on collection:
  - appropriate times to collect
  - timing of last dose
  - required fasting times
  - protecting the integrity of the specimen
- features, functions and use of the following specimen collection equipment:
  - sterile jars
  - 24hr urine containers with and without additives
  - swabs - viral, bacterial, polymerase chain reaction (PCR), deoxyribonucleic acid (DNA)

© Commonwealth of Australia, 2025 HumanAbility

  - paediatric urine collection bag
  - breath balloons
  - skin scraping equipment
  - nail clipping and scraping equipment
- handling and storage methods for different specimen types

Assessment Conditions

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations have not been provided in the workplace. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - steri-wipes or alcohol wipes
  - paediatric urine bags
  - swabs
  - scalpels
  - sterile containers
  - breath balloons
  - collection devices for skin and nail scrapings
  - packaging equipment consistent with regulatory and organisational transport requirements
  - documented collection procedures for the candidate to follow
- modelling of industry operating conditions, including:
  - interactions with clients from the general public
  - presence of situations requiring problem solving
- supervision of candidate's work activities by a person currently working in a collection role for at least 18 hours in a fortnight time period

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTPAT005 Collect specimens for drugs of abuse testing

Modification History

Release	Comments
Release 2	This version was released in *HLT Health Training Package release 3.0.* Changes to performance evidence. Equivalent competency outcome.
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. New unit.

Application

This unit describes the skills and knowledge required to confirm collection requirements, prepare client and equipment and collect specimens via urine and/or oral and breath testing following the special procedures that apply for drugs of abuse testing.

This unit applies to individuals working in collection centres, in hospitals, in other health care environments and workplaces where drugs of abuse testing takes place.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Confirm collection requirements	1.1 Greet client courteously and identify self 1.2 Identify client following organisation and regulatory

	procedures
	1.3 Confirm that client meets pre-testing criteria for required collection
	1.4 Obtain, interpret and accurately record personal and clinical information in accordance with organisation policies and procedures
	1.5 Explain collection procedure to client
	1.6 Obtain consent for collection procedure from client
2. Prepare for collection procedure	2.1 Ensure collection environment is prepared according to requirements of standards
	2.2 Confirm method of collection based on correct interpretation of clinical request
	2.3 Select equipment and ask client to select collection kit according to organisation procedures if applicable to standard
	2.4 Prepare client for procedure by removing excess clothing and other possessions, and store these securely if applicable to standard
	2.5 Provide accurate advice to client about procedure
3. Collect specimen	3.1 Follow procedures for sample collection according to standard and organisational procedure
	3.2 Adopt standard and additional infection control guidelines and precautions according to organisation documented procedure
	3.3 Observe client during and after collection for potential tampering and respond according to organisation procedures
	3.4 Assure sample integrity by testing and securing sample immediately following collection and for duration of time that sample is responsibility of the collector

© Commonwealth of Australia, 2025 HumanAbility

Assessment Requirements for HLTPAT005 Collect specimens for drugs of abuse testing

Modification History

Release	Comments
Release 2	This version was released in *HLT Health Training Package release 3.0.* Changes to performance evidence. Equivalent competency outcome.
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. New unit.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed established technical, infection control and safety procedures plus those required by the relevant standard, during collections from at least 3 different clients
- selected, prepared and used compliant equipment and collection kits
- collected urine, oral fluid or breath specimens for drugs of abuse testing

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- context for drugs of abuse testing including industry, social services, prisons, medical and legal purposes
- legal and ethical considerations (national and state/territory), including the requirements of AS/NZS 4308:2008 or AS 4760-2006 and any revisions thereof, and how these are applied in organisations:
  - duty of care

© Commonwealth of Australia, 2025 HumanAbility

  - informed consent
  - mandatory reporting
  - privacy, confidentiality and disclosure
  - records management
  - work role boundaries
  - work health and safety
- pre-collection, during and post-collection procedures required to meet chain of custody requirements, including:
  - suitable environment to collect sample
  - client privacy
  - staff safety
  - specific environmental and specimen requirements to eliminate tampering
- collection procedures required to meet chain of custody requirements, including:
  - client supervision and seclusion
  - collection procedures that eliminates the opportunity to tamper with specimen
  - documentation requirements
  - integrity testing of samples as required by standard
- storage and transportation procedures required to meet chain of custody requirements, including:
  - chain of custody process
  - security satchels and labels
  - storage
  - courier requirements
- drugs of abuse, including:
  - types of drugs included
  - chemistry
  - effect on body
  - types of collection
  - methods of analysis

Assessment Conditions

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations have not been provided in the workplace. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, required by the relevant standard:
- modelling of industry operating conditions, including:
  - interaction with non-compliant clients
  - presence of situations requiring problem solving
- supervision of candidate's work activities by a person currently working in a collection role for at least 18 hours in a fortnight time period

© Commonwealth of Australia, 2025 HumanAbility

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTPAT006 Receive, prepare and dispatch pathology specimens

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to receive specimens, complete the administrative process to prepare samples for pathology testing, and dispatch specimens. This unit does not cover the dispatch of dangerous goods or the transport of specimens to external facilities.

This unit applies to individuals working in specimen reception roles in laboratories and pathology collectors and assistants in collection centres.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Receive specimens	1.1 Receive and process specimens and requests in accordance with organisation policies and procedures 1.2 Check pathology request forms and specimens documentation for adequate labelling in accordance with organisation and regulatory requirements 1.3 Ensure suitability of specimens for requested tests

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	consulting laboratory directories or manuals
	1.4 Reject specimens if necessary and complete documentation in accordance with organisation policies and procedures
	1.5 Notify or consult with senior staff members as required
	1.6 Follow infection control and workplace safety protocols relating to the safe handling of specimens
2. Complete administrative processing of specimens	2.1 Label specimens and request forms with unique laboratory number or bar code label in accordance with organisation policies and procedures
	2.2 Register request forms, specimen and patient information into laboratory information systems in accordance with organisation policies and procedures
	2.3 Complete administrative documentation in accordance with organisation policies and procedures
3. Prepare specimens	3.1 Confirm requirements for specimen processing in accordance with organisation procedures
	3.2 Perform separation of sample by centrifugation in accordance with test requirements and organisation procedures
	3.3 Prepare and label tubes for aliquotting in accordance with organisation procedures
	3.4 Transfer sample by aliquotting into appropriate tubes in accordance with organisation policies and procedures
	3.5 Sort samples according to appropriate laboratory department for testing in accordance with organisation policies and procedures
	3.6 Store samples in accordance with test requirements and organisation procedures

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
4. Dispatch specimens	4.1 Ensure specimens for dispatch are packaged and labelled in accordance with organisation and regulatory requirements
	4.2 Complete appropriate dispatch documentation in accordance with organisation policies and procedures
	4.3 Dispatch specimens in accordance with organisation procedures and regulatory requirements

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential *to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTPAT006 Receive, prepare and dispatch pathology specimens

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed established procedures, safety requirements and infection control guidelines in the receipt, registration, sorting, storage and dispatch of at least 5 different pathology specimens

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations for pathology specimen reception and preparation work, and how these are applied in organisations:
  - codes of practice, impact on national laboratory standards on role
  - privacy, confidentiality and disclosure
  - records management
  - work role boundaries
- types of hazardous substances that may be received and how to respond:
  - bio-hazardous substances
  - formalin
  - hydrochloric acids

© Commonwealth of Australia, 2025 HumanAbility

  - additives and fixatives
- criteria for rejection of specimens at reception stage
- pre-test processing requirements and procedures:
  - coding
  - sorting
  - aliquotting
- medical terminology and chemical abbreviations used in the pathology specimen handling process

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - pipettes
  - aliquot pots
  - personal protective equipment (PPE)
  - contaminated waste disposal
  - fridge
  - dryer
  - temperature controls
- modelling of industry operating conditions, including presence of situations requiring problem solving

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTPAT007 Collect arterial blood samples

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Minimum work hours added

Application

This unit describes the skills and knowledge required to confirm collection requirements, prepare client and equipment and follow policy and procedures for collection of arterial blood samples from clients for pathology testing.

This unit applies to experienced pathology collectors, medical technicians and health professionals. Individuals may be working in collection centres, hospitals or other health care environments.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Confirm collection requirements	1.1 Greet client courteously and identify self 1.2 Identify client following organisation and regulatory procedures 1.3 Confirm that client meets pre-testing criteria for the arterial collection and seek assistance from medical staff if

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	required
	1.4 Obtain, interpret and accurately record personal and clinical information in accordance with organisation policies and procedures
	1.5 Explain collection procedure to client
	1.6 Obtain consent for collection procedure from client
2. Prepare for arterial collection	2.1 Select and prepare equipment, transport containers and disposables suited to arterial collection
	2.2 Position client to ensure comfort and safety of both client and collector
	2.3 Confirm blood volume required according to laboratory requirements
	2.4 Locate radial and ulnar arteries and check the integrity of arterial circulation of the hand using the Allen’s test
	2.5 Proceed with test when all criteria are met
3. Draw arterial blood	3.1 Adopt standard and additional infection control guidelines and precautions according to organisation documented procedure
	3.2 Prepare skin at collection site according to organisation policies and procedures
	3.3 Locate radial artery, insert needle at correct angle 90 degrees, and collect sufficient sample volume for requested test
	3.4 Following sample collection, apply sustained pressure to site immediately following collection according to organisation policies and procedures
	3.5 Dispose of needle safely using the approved sharps disposal device in accordance with organisational policy
	3.6 Fit stopper to syringe immediately after removal of needle
	3.7 Mix sample thoroughly, label and prepare for transport in accordance with organisation policies and procedures

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	3.8 Ensure documentation is accurately and fully completed and confirm information accuracy with client
	3.9 After appropriate length of time check puncture site to ensure bleeding has stopped and cover site with appropriate dressing
4. Perform post collection procedures	4.1 Dispose of waste in accordance with infection control protocols and organisation policies and procedures
	4.2 Confirm client comfort and provide accurate post collection information and instructions
	4.3 Notify appropriate staff so that the client's condition can be monitored
	4.4 Organise prompt transport of sample to testing location according to organisation requirements

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential *to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTPAT007 Collect arterial blood samples

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Minimum work hours added

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 400 hours of work as a health professional, medical technician or pathology collector
- followed established technical, infection control and safety procedures for the collection of arterial blood from at least 3 different clients

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations (national and state/territory) for collection of arterial blood samples collection, and how these are applied in organisations:
  - duty of care
  - informed consent
  - mandatory reporting
  - privacy, confidentiality and disclosure
  - records management
  - work role boundaries
    - boundaries of responsibilities

© Commonwealth of Australia, 2025 HumanAbility

        - sources of blood sample requests and the nature of interactions with other health services
    - work health and safety
- standard infection control requirements for clinical procedures:
    - hand hygiene
    - use of personal protective equipment (PPE)
    - avoiding contact with bodily fluids
    - sharps injury prevention and treatment if sustained
    - waste disposal
- industry terminology used in arterial blood collection:
    - equipment
    - procedures
    - abbreviations
    - medical terminology
- clinical risks of arterial blood collection and how to avoid or minimise
- pre-test procedures:
    - oxygen therapy
    - room air
    - medication
- appropriate collection sites for arterial blood and techniques for collection
- features, functions and use of arterial blood collection equipment
- anatomy and physiology of the circulatory system relevant to arterial blood collection, including the importance of surrounding structures and purpose of performing circulation assessment (Allen's test)
- management of post collection complications, including bleeding
- arterial blood sample handling, transport and storage requirements
- quality sample requirements
- basic analysis process for arterial blood samples

Assessment Conditions

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations have not been provided in the workplace. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
    - arterial blood gas syringe
    - temperature controlled containers
    - needles
    - sharps containers
    - alcohol wipes
    - dressings

© Commonwealth of Australia, 2025 HumanAbility

  - ice packs
  - documented collection procedures for the candidate to follow
- modelling of industry operating conditions, including:
  - interactions with clients from general public
  - presence of situations requiring problem solving

All aspects of the performance evidence must have been demonstrated using simulation prior to being demonstrated in the workplace/with members of the public.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTPHA001 Maintain pharmaceutical imprest stock

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency. Significant changes to knowledge evidence.

Application

This unit describes the skills and knowledge required to monitor and respond to imprest stock requirements, including selection, dispatch and documentation activities.

This unit applies to pharmacy assistants and technicians working under the supervision of a pharmacist.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
1. Monitor imprest stock against requirements	1.1 Establish needs to replenish stock and determine quantity from specified minimum and maximum levels 1.2 Use appropriate technology to complete stock checks and generate picking lists of requisition items 1.3 Check that requisition lists comply with operating

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
	procedures and department requirements
	1.4 Identify and report deviations to an authorised person according to scope of own job role
2. Select and dispatch stock	2.1 Obtain clearance for orders from authorised person
	2.2 Select requisitioned products and place into appropriate delivery containers
	2.3 Interpret information in pharmacy management systems, complete accurate transactions and generate packing slip
	2.4 Store and pack completed requisitions within the pharmacy prior to delivery
	2.5 Deliver stock to designated areas
	2.6 Check and confirm accuracy of stock placement
	2.7 Store stock according to manufacturers' recommended storage conditions
	2.8 Ensure an authorised person verifies, checks and signs for medicines on receipt where required
3. Complete documentation process	3.1 Complete and file documentation according to required procedures
	3.2 Collate medicines usage information and record statistics for authorised person
	3.3 Update imprest lists, based on stock usage and medicines inventory changes in liaison with relevant staff
	3.4 Report changes to stock usage that may impact on stock control to an authorised person

Assessment Requirements for HLTPHA001 Maintain pharmaceutical imprest stock

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency. Significant changes to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- monitored imprest stock according to workplace procedures on at least 10 occasions and completed associated selection, dispatch and documentation requirements
- identified issues outside scope of own practice and referred to the authorised person

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical requirements (national, state/territory) for imprest stock monitoring, and how these are applied in organisations, including:
  - codes of conduct
  - duty of care (and implications of negligence)
  - privacy, confidentiality and disclosure
  - records management
  - rights and responsibilities of workers, employers and clients
  - specific legislation:
    - medicines and their use

© Commonwealth of Australia, 2025 HumanAbility

    - the practice of pharmacy
    - different schedules of medicines and pharmaceutical products
  - work role boundaries – responsibilities and limitations
  - work health and safety
- key information in standard pharmaceutical references and their use by pharmacy assistants, including:
  - *Australian pharmaceutical formulary and handbook* (APF)
  - MIMs
  - *Australian medicines handbook* (AMH)
  - Micromedex
- proprietary and generic names of pharmaceutical products and the differences between them
- principles and procedures for imprest stock control
- features of pharmaceutical data management systems
- purpose of batch numbering and expiry dates on pharmaceutical products

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - pharmaceutical stock management procedures
  - pharmacy imprest system
  - pharmaceutical products
- modelling of industry operating conditions, including presence of time constraints for activities

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTPHA002 Pack pharmaceutical products

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency. Significant changes to knowledge evidence.

Application

This unit describes the skills and knowledge required to package or pre-package pharmaceutical products, including the repackaging of medicines according to Pharmacy Board of Australia's *Guidelines on specialised supply* arrangements, national guidelines and legislation on the filling of dose administration containers.

This unit applies to pharmacy assistants and technicians working under the supervision of a pharmacist.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
1. Prepare for packaging	1.1 Comply with dress code, safety requirements and personal hygiene procedures prior to entering the packaging area 1.2 Obtain packaging documentation, work sheet and interpret instructions from authorised person and according to packaging specifications

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
	1.3 Clean and prepare work area according to pre-determined work sheet or equivalent
	1.4 Identify, clean, prepare and set packaging equipment
	1.5 Identify and report discrepancies in equipment functioning and take corrective action according to the instructions of an authorised person
	1.6 Obtain appropriate and sufficient packaging materials according to stock issuing procedures
	1.7 Obtain approved medicine
	1.8 Prepare and check labels according to work sheet and legal requirements
	1.9 Submit work sheet and labels to pharmacist for approval
2. Pack products	2.1 Operate packaging equipment to pack products
	2.2 Label container/units according to labelling specifications on the work sheet
	2.3 Apply in-process controls and record results accurately
	2.4 Report deviations to authorised person and take corrective action according to instructions from an authorised person
3. Conduct quality control	3.1 Obtain approval from authorised person at designated points in the packaging process according to work sheet
	3.2 Obtain relevant quality control documentation and check product specifications according to work sheet
	3.3 Reconcile and verify packaging materials under supervision of an authorised person
	3.4 Submit sample
4. Complete packaging process	4.1 Reconcile number of labels printed with number used and report discrepancies to the pharmacist

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
	4.2 Alert authorised person of excess materials
	4.3 Complete batch documentation and forward according to standard operating procedures
	4.4 Obtain final approval from the pharmacist before releasing packed medicines/product to storage areas
	4.5 Clean equipment according to manufacturer instructions

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential *to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTPHA002 Pack pharmaceutical products

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency. Significant changes to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed workplace procedures and safe packaging practices for at least 10 different product batches, including at least 5 dose administration aids (DAAs)/dose administration containers for an individual client
- identified issues outside scope of own practice and referred to the authorised person

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical requirements (national, state/territory) for pharmacy work, and how these are applied in organisations, including:
  - codes of conduct
  - duty of care (and implications of negligence)
  - privacy, confidentiality and disclosure
  - records management
  - rights and responsibilities of workers, employers and clients
  - specific legislation:
    - medicines and their use
    - the practice of pharmacy

© Commonwealth of Australia, 2025 HumanAbility

    - different schedules of medicines and pharmaceutical products
  - work role boundaries – responsibilities and limitations
  - work health and safety
- legal requirements and principles of pharmaceutical product labelling (product name, batch numbering and expiry date):
  - Pharmacy Board of Australia's *Guidelines on specialised supply arrangements*, national guidelines and legislation on the filling of dose administration containers
  - specific labelling requirements for filling DAAs and other containers
  - key information for inclusion:
    - date on which the container was filled
    - directions for use of each medicine according to work sheet
    - inclusion of ancillary labels, where required
    - name, strength, form and quantity of all medicines supplied in the container
    - pharmacy details
- Pharmacy Board of Australia *Guidelines for dispensing medicines*, that apply to individual workers
- key information in standard pharmaceutical references and their use by pharmacy assistants, including:
  - *Australian pharmaceutical formulary and handbook* (APF)
  - MIMs
  - *Australian medicines handbook* (AMH)
  - Micromedex
- infection control principles and their relevance to pharmaceutical packaging
- features of packaging equipment including their operation, cleaning and maintenance, including:
  - counting trays
  - irons
  - heat sealing equipment
  - measures
  - scales
  - tweezers
- packaging principles and processes, including:
  - calculations, weights and measures
  - properties of container types and selection for use
  - various pack sizes and selection for use
  - types of packaging materials
- environmental conditions required for pharmaceutical packaging related to:
  - humidity, light
  - security
  - temperature
  - ventilation

© Commonwealth of Australia, 2025 HumanAbility

- product identification and handling, including those for:
  - formulary medicines and non-formulary medicines
  - products with the required integrity as well as those whose integrity has been compromised
  - routine handling of products and products requiring special handling

Assessment Conditions

Skills must be demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - weighing and measuring equipment
  - packaging equipment and materials, including DAAs and containers
  - pharmaceutical stock management procedures
- modelling of industry operating conditions, including time constraints for completing packaging activities

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTPHA003 Assist with dispensing of prescriptions and medication orders

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency. Significant changes to knowledge evidence.

Application

This unit describes the skills and knowledge required to accept and check the validity of prescriptions and medication orders, and assist the pharmacist by preparing labels, assembling products and completing documentation.

This unit applies to pharmacy assistants and technicians working under the supervision of a pharmacist.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
1. Accept order for dispensing	1.1 Receive prescription or medication order and complete and confirm client details 1.2 Identify the prescriber and initiating source for the purpose of costing and data entry 1.3 Read documentation to confirm the legality, validity

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
	and completeness of the prescription or medication order
	1.4 Identify if client is eligible to access the medicine through the Pharmaceutical Benefits Scheme (PBS)
	1.5 Identify and report discrepancies to pharmacist
	1.6 Provide information to client about dispensing expectations in terms of time and cost as required
2. Ensure clinical evaluation by pharmacist	2.1 Refer prescription or medication order to pharmacist for clinical evaluation
	2.2 Confirm pharmacist has completed a clinical evaluation before filling the order
	2.3 Complete required documentation prior to dispensing
3. Prepare for labelling of medicines	3.1 Enter dispensing data into the pharmacy system and check accuracy against documentation
	3.2 Generate label, and cautionary and advisory labels to meet legal and regulatory requirements
	3.3 Follow procedures to deal with contraventions of law
	3.4 Check information on labels for accuracy and clarity against dispensing requirements
	3.5 Alert the pharmacist to any relevant warnings from the pharmacy system
4. Assemble items	4.1 Interpret prescription or medication order requirements and refer to pharmacist where details or quantities are unclear
	4.2 Select prescribed products in the correct quantities of each item, according to prescription or medication order, ensuring expiry date is appropriate
	4.3 Use barcode scanning technology during the dispensing process according to Pharmacy Board of Australia *Guidelines for dispensing medicines*
	4.4 Package and label correct quantities into a suitable

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
	container with correct and clear labelling
	4.5 Check packed item for accuracy and visibility of expiry date
	4.6 Mark order with the quantity supplied, signature and date
	4.7 Self check work to ensure accuracy of assembled items
	4.8 Assemble items for an easy and complete check by the pharmacist
5. Finalise dispensing of medicine	5.1 Verify that prescription or medication order is checked and signed by the pharmacist
	5.2 Complete accurate final documentation
	5.3 Record relevant information and statistics according to workplace requirements

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential *to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

HLTPHA004 Order, maintain and distribute pharmaceutical stock

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTPH312/313/315. Minimal changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency. Significant changes to knowledge evidence

Application

This unit describes the skills and knowledge required to maintain a pharmaceutical stock control system and distribute pharmaceutical products.

This unit applies to pharmacy assistants and technicians working under the supervision of a pharmacist.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
1. Procure stock	1.1 Identify items and quantity required for order, according to predetermined minimum and maximum stock levels 1.2 Obtain requisition requirements from authorised personnel

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
	1.3 Source supplier according to organisation procedures and contractual obligations
	1.4 Interpret information to identify availability and cost of item and provide information to pharmacist
	1.5 Generate and place order following approval by delegated staff member
2. Process new stock	2.1 Accept delivery of stock and match delivery documentation with stock delivered
	2.2 Check condition of stock and expiry date and report deviations to the appropriate person
	2.3 Reconcile stock with order or control lists and report discrepancies to the appropriate person
	2.4 Inform pharmacist of medicines with specific recording requirements according to legal requirements and local policy
	2.5 Maintain batch traceability
	2.6 Accurately complete data capture requirements, including reconciliation of statements and invoices
	2.7 Comply with organisation procedures to return stock to supplier
3. Handle and maintain stock	3.1 Store stock according to stock storage and rotation requirements
	3.2 Maintain conditions to minimise risk of contamination
	3.3 Monitor stock on a regular basis, including minimum and maximum stock levels, and report deviations to the appropriate person
	3.4 Monitor and maintain correct storage requirements and report deviations to the appropriate person
	3.5 Maintain accurate location maps
	3.6 Check security compliance and report irregularities to the appropriate person

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	**PERFORMANCE CRITERIA**
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
4. Select and pack item order	4.1 Select and pack items according to order requirements 4.2 Complete data entry requirements associated with processing orders 4.3 Check labelling, specific handling instructions and delivery information for accuracy in line with identified requirements 4.4 Check packaging is completed according to specific instructions
5. Dispatch orders	5.1 Check delivery documentation for accuracy and follow requirements 5.2 Implement packaging and handling procedures to ensure the security, integrity, cold chain maintenance and breakage avoidance of delivered goods 5.3 Complete medicine registers and other documentation accurately, as required
6. Process returned stock	6.1 Inspect returned products for their expiry date and integrity, and place in designated area 6.2 Place reusable returned stock in appropriate designated area 6.3 Dispose of unusable returned items according to organisation procedure 6.4 Complete inspection documentation accurately and forward for authorisation 6.5 Maintain accurate records and complete credit process in a timely manner
7. Assist in stocktaking procedures	7.1 Check stock lists of all items for stocktaking 7.2 Reconcile actual stock against stock lists

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
	7.3 Count stock and check expiry dates
	7.4 Identify stock discrepancies and report to the appropriate person
	7.5 Determine minimum and maximum stock levels and report to the appropriate person
	7.6 Complete and maintain accurate stocktake documentation

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential *to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTPHA004 Order, maintain and distribute pharmaceutical stock

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTPH312/313/315. Minimal changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency. Significant changes to knowledge evidence

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed procurement procedures and accurately completed the task for at least 10 orders
- followed stock control and maintenance procedures for pharmaceutical stock
- followed workplace distribution procedures for at least 5 batches of pharmaceutical stock
- identified issues outside scope of own practice and referred to the authorised person

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical requirements (national, state/territory) for pharmaceutical stock management, and how these are applied in organisations, including:
  - codes of conduct
  - duty of care (and implications of negligence)
  - privacy, confidentiality and disclosure
  - records management
  - rights and responsibilities of workers, employers and clients
  - specific legislation:
    - medicines and their use

© Commonwealth of Australia, 2025 HumanAbility

    - the practice of pharmacy
    - different schedules of medicines and pharmaceutical products
  - work role boundaries – responsibilities and limitations
  - work health and safety
- key information in standard pharmaceutical references and their use by pharmacy assistants, including:
  - *Australian pharmaceutical formulary and hand book* (APF)
  - MIMs
  - *Australian medicines handbook* (AMH)
  - Micromedex
- product identification and handling, including those for:
  - formulary medicines and non-formulary medicines
  - products with the required integrity as well as those whose integrity has been compromised
  - routine of handling products and products requiring special handling
  - packaging and transport specifications
- principles of procurement of pharmaceutical products including:
  - central supply systems and tender processes
  - purpose and process of purchasing contracts
  - sources of stock, including non-formulary items and Special Access Scheme (SAS) items
  - sources to determine legitimate receivers of stock
  - stock ordering processes and systems
- storage requirements for different types of stock:
  - environmental conditions
  - rotation requirements
- principles and procedures of stock control and maintenance including:
  - input and access of data relevant to stock control
  - financial implications of stock level control
  - maintaining security of pharmaceutical products
  - purpose of batch numbering and expiry dates on pharmaceutical items
  - procedures for dealing with alerts and company recalls
  - different methods of disposal of unwanted pharmaceutical products and outdated stock
  - procedures for dealing with returned stock
- infection control principles and their relevance to pharmaceutical stock control

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:

© Commonwealth of Australia, 2025 HumanAbility

  - stock reporting and data systems
  - prescriptions and medication orders
  - pharmaceutical references
- modelling of industry operating conditions, including time constraints for stock control activities

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTPHA005 Conduct small scale compounding and labelling of pharmaceutical products

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency. Significant changes to knowledge evidence.

Application

This unit describes the skills and knowledge required to complete small scale compounding of non-sterile pharmaceutical products from predetermined formulae, including extemporaneous dispensing.

This unit applies to pharmacy assistants and technicians working under the supervision of a pharmacist.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
1. Source information on formula	1.1 Select appropriate formula and master batch sheet for product, based on correct interpretation of the medication order or prescription 1.2 Confirm suitability of chosen master work sheet and availability of resources

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
	1.3 Obtain authority of pharmacist to proceed
2. Prepare for production process	2.1 Comply with dress code, safety and personal hygiene procedures prior to entering the work area
	2.2 Clean work area and equipment correctly
	2.3 Confirm inventory levels of raw materials and disposable equipment
	2.4 Prepare a work sheet referenced from a master work sheet
	2.5 Verify that batch/work sheets are clearly written in logical order with clear directions and contains all the required information
	2.6 Assign product batch number
	2.7 Generate the product labels referenced from the master label detailed on the master work sheet
	2.8 Check and note the number of labels generated
	2.9 Submit work sheet and labels to pharmacist for approval
	2.10 Check and set up compounding requirements and equipment
3. Obtain equipment and supplies	3.1 Acquire materials listed on the work sheet according to stock levels and stock requisitioning procedures
	3.2 Check raw materials to ensure they have been released from quarantine for use by authorised persons
	3.3 Verify raw materials against batch work sheet and record raw material batch numbers and expiry dates
	3.4 Weigh or measure raw materials in designated area
	3.5 Obtain required authorisation or checks at designated points according to work sheet
4. Compound products	4.1 Allocate approved raw materials to equipment

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
	according to batch work sheet
	4.2 Compound product according to method on work sheet
	4.3 Monitor and adjust compounding to comply with work sheet specifications
	4.4 Perform verification procedures, inspect finished product for deviations and report to authorised person
	4.5 Pack compounded product as specified on the work sheet, and following approval from an authorised person
	4.6 Label containers/units according to labelling specifications on the work sheet
	4.7 Obtain required authorisation or checks at designated points
5. Complete production process	5.1 Reconcile number of labels printed with number used and report discrepancies to the pharmacist
	5.2 Place product in quarantine area under appropriate storage conditions
	5.3 Clean machinery and manufacturing area and dispose of disposable equipment safely
	5.4 Complete all required documentation and forward to an authorised person
	5.5 Report all discrepancies to an authorised person
	5.6 Obtain final approval from the pharmacist before releasing packed medicines to storage areas
6. Participate in quality control	6.1 Pack and label a retention sample and/or quality control sample if specified on the work sheet
	6.2 Submit product sample and relevant documentation to quality control, where specified
	6.3 Record and file product quality control assay results
7. Store and transport released	7.1 Store products according to work sheet

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
product	documentation
	7.2 Obtain released product(s) from quarantine store
	7.3 Pack released product(s) into delivery containers which will maintain the required ambient conditions for the product
	7.4 Deliver product to destination
	7.5 Advise receipting area personnel of specific storage requirements
	7.6 Complete and file records and/or work sheets

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential *to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTPHA005 Conduct small scale compounding and labelling of pharmaceutical products

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency. Significant changes to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed workplace procedures and industry codes to correctly and safely compound and label at least 5 different batches of pharmaceutical products listed in the *Australian pharmaceutical formulary and handbook* (APF)
- identified issues outside scope of own practice and referred to the authorised person

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical requirements (national, state/territory) for pharmacy work, and how these are applied in organisations, including:
  - codes of conduct
  - duty of care (and implications of negligence)
  - privacy, confidentiality and disclosure
  - records management
  - rights and responsibilities of workers, employers and clients
  - specific legislation:
    - medicines and their use
    - the practice of pharmacy

© Commonwealth of Australia, 2025 HumanAbility

        - different schedules of medicines and pharmaceutical products
    - work role boundaries – responsibilities and limitations in manufacturing products
    - work health and safety
- key information in standard pharmaceutical references and their use in manufacturing, including:
    - APF
    - MIMs
    - *Australian medicines handbook* (AMH)
    - Micromedex
- rationale for, and key features of:
    - The Society of Hospital Pharmacists (SHPA) *Guidelines for medicines prepared in Australian hospital pharmacy departments*
    - Pharmaceutical Inspection Convention and Pharmaceutical Inspection Co-operation Scheme (PIC/S) *Guide to good practices for the preparation of medicinal products in healthcare establishments*
- product identification and handling, including those for:
    - formulary medicines and non-formulary medicines
    - products with the required integrity as well as those whose integrity has been compromised
    - routine of handling products and products requiring special handling
- nature and use of different dosage forms including:
    - oral
    - parenteral products
    - topical
- infection control requirements for small scale compounding of pharmaceutical products, including:
    - correct disposal of sharps and residues
    - cleaning and disinfection processes
    - personal hygiene
    - sources and types of contamination and required responses (microbial, cross-chemical, physical, environmental; and corrective strategies)
- manufacturing processes relating to small scale compounding, including:
    - nature and use of oral and topical dosage forms
    - chemical and physical properties of raw materials in relation to formulation and compounding
    - types of equipment, their key features and use
    - compounding of a product according to a work sheet
    - principles and procedures of formulae calculations, weights and measures
    - processes for dilution, suspension, incorporation and reconstitution
- risk considerations and procedures for pharmaceutical manufacturing:
    - product security

© Commonwealth of Australia, 2025 HumanAbility

  - handling and storage of hazardous materials
  - quarantine periods
- requirements for formulated manufacturing documentation
  - different documentation types, their scope and purpose
  - worksheet processes
  - information quality requirements including clarity, logic and completeness
- labelling requirements for compounded products, including:
  - adherence to legislative requirements
  - name, form and strength of product
  - ancillary labels as part of label details
  - hazard warnings
  - spacing for entry of batch numbers and expiry dates
- packaging methods, container materials and principles for selection
- storage and transport requirements and rationale for different types of product including:
  - hazardous materials
  - special storage considerations:
    - humidity
    - isolation
    - light
    - temperature
    - ventilation
- features and use of pharmacy systems used for small scale compounding

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - weighing and measuring equipment
  - utensils
  - raw materials
  - pharmaceutical references
- modelling of industry operating conditions, including presence of time constraints for activities

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTPHA006 Provide assistance in dispensary administration

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency. Significant changes to knowledge evidence.

Application

This unit describes the skills and knowledge required to use dispensary administration systems to maintain dispensary information, process Pharmaceutical Benefits Scheme (PBS) claims and complete other specialised administration tasks.

This unit applies to pharmacy assistants and technicians working under the supervision of a pharmacist.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
1. Perform dispensing administration tasks	1.1 Use technical and numerical features of dispensary administrative systems correctly 1.2 Issue and update pharmaceutical entitlement and benefit documents to and for clients within scope of own job role

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
2. Maintain dispensary information	2.1 Update dispensary system with accurate information as required
	2.2 Back up dispensary system information to ensure secure data
	2.3 Identify and respond to information discrepancies
	2.4 Identify and extract correct clinical and financial data required for reporting and claiming systems
	2.5 Inform relevant pharmacist of changes to data stored in the dispensary information system
	2.6 Maintain confidentiality of dispensary information
3. Process pharmaceutical benefit claims	3.1 Collate prescriptions eligible for PBS claims and confirm details
	3.2 Interpret and use financial information related to claims
	3.3 Submit pharmaceutical claims to relevant authority
	3.4 Maintain accurate records for claims submission

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential *to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTPHA006 Provide assistance in dispensary administration

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency. Significant changes to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- prepared at least 2 batches of PBS or Section 100 claims using pharmacy systems to complete administrative tasks, including:
  - sourced, extracted, recorded and disseminated both clinical and financial dispensary information
  - identified and resolved issues to enable claims to be submitted
  - provided accurate information to clients and pharmacist
- identified issues outside scope of own practice and referred to the authorised person

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical requirements (national, state/territory) for dispensary administration, and how these are applied in organisations, including:
  - codes of conduct
  - duty of care (and implications of negligence)
  - privacy, confidentiality and disclosure
  - records management
  - rights and responsibilities of workers, employers and clients

    - specific legislation:
        - medicines and their use
        - the practice of pharmacy
        - different schedules of medicines and pharmaceutical products
    - work role boundaries – responsibilities and limitations
    - work health and safety
- key information in standard pharmaceutical references and their use by pharmacy assistants, including:
    - *Australian pharmaceutical formulary and handbook* (APF)
    - MIMs
    - *Australian medicines handbook* (AMH)
    - Micromedex
- types of hardware and software used in pharmacy administration, and features of their use
- features of the PBS:
    - schedule of PBS
    - process for Pharmaceutical Benefit Authority items including streamline authority, phone authority and written authority.
    - process for highly specialised drugs
- dispensary information management requirements, including:
    - accounting
    - stock control
    - compliance documentation
    - patient information
- requirements for client entitlement
- types of pharmaceutical benefit documents and their use

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
    - electronic records of prescriptions and medication orders
    - web based claiming systems
- modelling of industry operating conditions, including:
    - time constraints for data entry and claims processing
    - presence of situations requiring problem solving

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTPHA007 Conduct small-scale compounding and labelling of aseptic pharmaceutical products

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency. Significant changes to knowledge evidence.

Application

This unit describes the skills and knowledge required to complete small scale compounding of sterile pharmaceutical products from pre-determined formulae, including extemporaneous dispensing. This includes cytotoxic and total parental nutrition (TPN) products.

This unit applies to pharmacy assistants and technicians working under the supervision of a pharmacist.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
1. Source information on formula	1.1 Select appropriate formula and master work sheet for the product, based on correct interpretation of the prescription or medication order 1.2 Confirm suitability of chosen master work sheet and availability of resources

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
	1.3 Obtain authority of pharmacist to proceed
2. Prepare for production process	2.1 Confirm the availability of the appropriate laminar flow hood/clean room or cytotoxic drug safety cabinet/cytotoxic suite or room or isolator required to compound the product according to the work sheet
	2.2 Comply with dress code, safety and personal hygiene procedures prior to entering the work area
	2.3 Clean work area and equipment correctly
	2.4 Maintain inventory levels of materials and disposable equipment
	2.5 Prepare a work sheet referenced from a master work sheet
	2.6 Assign product batch number
	2.7 Verify that the work sheets are clearly written in logical order with clear directions and contain all the required information
	2.8 Generate the product labels referenced from the master label detailed on the master work sheet
	2.9 Check and note the number of labels generated
	2.10 Submit work sheet and labels to pharmacist for approval
	2.11 Check and set up compounding requirements and disposable equipment
3. Obtain equipment and supplies	3.1 Assemble materials used in aseptic compounding as listed in the work sheet, according to stock levels and stock requisitioning procedures
	3.2 Check materials to ensure they have been released from quarantine for use by authorised persons
	3.3 Verify materials against manufacturing work sheet and record material batch numbers and expiry dates
	3.4 Select appropriate types, size and features of containers and packaging listed in the work sheet

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
	3.5 Weigh or measure materials in designated area
	3.6 Obtain required authorisation or checks at designated points according to the work sheet
4. Prepare for sterile manufacturing	4.1 Transfer raw materials, disposable equipment, required containers or packaging and covered work sheet to pre-production area
	4.2 Follow hand washing, gowning and gloving procedures
	4.3 Disinfect and transfer materials, disposable equipment and work sheet to sterile production area
5. Prepare for cytotoxic production	5.1 Check that cytotoxic spill cleaning kits are available in all production areas
	5.2 Select and use appropriate sterile personal protective equipment for safe handling and preparation of cytotoxic drugs as required
	5.3 Follow specific procedures to minimise risk of exposure to cytotoxic drugs
6. Compound products using aseptic techniques	6.1 Allocate approved bulk materials, intermediary products and containers to appropriate equipment
	6.2 Incorporate materials according to work sheet using appropriate manipulation technique
	6.3 Compound product according to method on manufacturing work sheet
	6.4 Prepare cytotoxic products using procedures for safe handling of cytotoxic drugs
	6.5 Operate specialist equipment and use specialist supplies in sterile production preparation
	6.6 Perform verification procedures and inspect finished product for deviations and report to authorised person
	6.7 Pack compounded product into appropriate container

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
	as specified on the work sheet, and following approval from an authorised person
	6.8 Label containers according to labelling specifications on the work sheet
	6.9 Obtain required authorisation or checks at designated points
7. Complete production process	7.1 Reconcile the number of labels printed with number used and report discrepancies to the pharmacist
	7.2 Place product in quarantine area under appropriate storage conditions
	7.3 Clean machinery and manufacturing area and dispose of disposable equipment safely
	7.4 Follow procedures for cleaning cytotoxic spills, and exposure to cytotoxic drugs
	7.5 Complete required documentation and forward to an authorised person
	7.6 Report discrepancies to an authorised person
	7.7 Obtain final approval from pharmacist before releasing compounded medicines to storage areas
	7.8 Discard waste materials appropriately
8. Participate in quality control	8.1 Pack and label a retention sample and/or quality control sample if specified on the work sheet
	8.2 Perform environmental monitoring and report abnormal readings to an authorised person
	8.3 Submit product sample and relevant documentation to quality control
	8.4 Record and file product quality control assay results and manufacturing area environmental monitoring results
9. Store and transport released product	9.1 Store products according to the work sheet

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
	9.2 Obtain released product(s) from quarantine store
	9.3 Pack released product(s) into delivery containers which will maintain the required ambient conditions for the product
	9.4 Deliver product to destination ensuring safe transport of cytotoxic products
	9.5 Advise receipting area personnel of storage requirements
	9.6 Complete and file records and/or work sheets

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are *essential to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTPHA007 Conduct small-scale compounding and labelling of aseptic pharmaceutical products

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency. Significant changes to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed established procedures and industry codes to accurately and safely produce 10 aseptic products:
  - worked within the requirements of sterile areas, air locks, laminar flow hoods and cytotoxic drug safety cabinet/isolators
- identified issues outside scope of practice and referred these to the authorised person

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical requirements (national, state/territory) for pharmacy work, and how these are applied in organisations, including:
  - codes of conduct
  - duty of care (and implications of negligence)
  - privacy, confidentiality and disclosure
  - records management
  - rights and responsibilities of workers, employers and clients
  - specific legislation:
    - medicines and their use

© Commonwealth of Australia, 2025 HumanAbility

    - the practice of pharmacy
    - different schedules of medicines and pharmaceutical products
  - work role boundaries – responsibilities and limitations in manufacturing products
  - work health and safety
- key information in standard pharmaceutical references and their use in manufacturing, including:
  - *Australian pharmaceutical formulary and handbook* (APF)
  - MIMs
  - *Australian medicines handbook* (AMH)
  - Micromedex
- rationale and key features of:
  - The Society of Hospital Pharmacists (SHPA) *Standards of practice for the safe handling of cytotoxic drugs in pharmacy departments*
  - Pharmaceutical Inspection Convention/Pharmaceutical Inspection Co-operation Scheme (PIC/S) *Guide to good practices for the preparation of medicinal products in healthcare establishments* (PE010-3)
- product identification and handling, including those for:
  - formulary medicines and non-formulary medicines
  - products with the required integrity as well as those whose integrity has been compromised
  - routine of handling products and products requiring special handling
- nature and use of different dosage forms, including:
  - oral
  - parenteral products
  - topical
- infection control requirements for small scale compounding of aseptic pharmaceutical products, including:
  - aseptic technique
  - correct disposal of sharps and residues
  - cleaning and disinfection processes plus sterilisation of pharmaceuticals
  - personal hygiene and clothing standards
  - sources and types of contamination and required responses – microbial, cross-chemical, physical, environmental and corrective strategies
- processes relating to aseptic, including:
  - calculations for all sterile admixtures
  - chemical and physical properties of materials in relation to formulation and compounding
  - principles and procedures of formulae calculations, weights and measures
  - principles of aseptic technique, including cytotoxic manufacturing
  - processes for dilution, suspension, incorporation and reconstitution
  - use of terminal filtration

© Commonwealth of Australia, 2025 HumanAbility

- risk considerations and procedures for pharmaceutical manufacturing:
  - product security
  - handling and storage of hazardous materials
  - quarantine periods
  - management of cytotoxic spills
  - specific hazards related to cytotoxic manufacture
  - transport of cytotoxic medications
- requirements for formulated manufacturing documentation, including:
  - different documentation types, their scope and purpose
  - worksheet processes
  - information quality requirements (including clarity, logic and completeness)
- specific labelling requirements for compounded products, including:
  - adherence to legislative requirements
  - name, form and strength of product
  - ancillary labels as part of label details
  - hazard warnings
  - spacing for entry of batch numbers and expiry dates
- packaging methods, container materials and principles for selection
- storage and transport requirements and rationale for different types of product including:
  - hazardous materials
  - special storage considerations:
    - humidity
    - isolation
    - light
    - temperature
    - ventilation
- features and use of pharmacy systems used for aseptic compounding
- circumstances that require compounding of the product within a laminar flow hood/clean room or cytotoxic drug safety cabinet/cytotoxic suite or room or isolator

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - simulated facilities with physically separate areas for preparation/checking of product, hand washing and manipulation of produce
  - gowns, gloves and hand washing facilities
  - weighing and measuring equipment
  - materials (including simulation medicine substitutes such as coloured water) and disposable equipment

© Commonwealth of Australia, 2025 HumanAbility

- note that a clean room environment is not required for simulated assessment
- modelling of industry operating conditions, including time constraints for completing activity

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTPHA008 Support pharmacist communication with clients and other health professionals

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency. Significant changes to knowledge evidence.

Application

This unit describes the skills and knowledge required to identify and respond to pharmacy client information needs in relation to medicines and pharmacy services. Information recipients may be end user clients or other health professionals supporting the client.

This unit applies to pharmacy assistants and technicians working under the supervision of a pharmacist.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
1. Identify client information needs	1.1 Review client documentation to identify the medicines the client is taking 1.2 Clarify client information needs with pharmacist 1.3 Identify and plan to meet client special needs which may impact on the effectiveness of communication

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
	1.4 Use standard assessment tools to identify a client's ability to manage their medications
	1.5 Discuss information needs with the client and /or carer and refer needs outside of scope of role to the pharmacist
2. Gather and prepare information to meet client needs	2.1 Access reference material to gather information
	2.2 Ensure information is in a suitable format for the client to understand
	2.3 Select appropriate modes of communication to suit the purpose and context of the information being provided
3. Provide specific or prepared information to clients	3.1 Provide prepared information to clients when requested by the pharmacist
	3.2 Present relevant information to the client clearly and in sufficient detail to meet the needs of the client
	3.3 Reinforce the key messages provided to clients by the pharmacist or through consumer medicine information (CMI) and refer needs outside of scope of role to the pharmacist
	3.4 Exercise appropriate discretion and confidentiality and explain boundaries of confidentiality to client
	3.5 Seek advice and assistance from the pharmacist for unresolved concerns or issues
	3.6 Negotiate appointments with client and staff for the provision of information to the client
4. Collect information and provide to other health professionals	4.1 Detect new client admission and notify pharmacist
	4.2 Record client's medication brought into hospital
	4.3 Communicate medicines supply information to internal medical, nursing staff and community providers
	4.4 Obtain discharge planning information from relevant

Assessment Requirements for HLTPHA008 Support pharmacist communication with clients and other health professionals

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency. Significant changes to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- complied with legislative and professional practice standards in the collection and provision of a medicines list for at least 10 clients, using effective communication techniques to elicit and provide information in one-to-one communication, including:
  - listened actively
  - used techniques to establish rapport
  - used techniques to clarify meaning
  - provided clear, concise and correct information both verbally and in writing
  - recognised and addressed issues of concern
- identified issues outside scope of practice and referred them to the pharmacist

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical requirements (national, state/territory) for pharmacy work, and how these are applied in organisations, including:
  - codes of conduct
  - duty of care (and implications of negligence)
  - informed consent

© Commonwealth of Australia, 2025 HumanAbility

- privacy, confidentiality and disclosure
- records management
- rights and responsibilities of workers, employers and clients
- specific legislation:
  - medicines and their use
  - the practice of pharmacy
  - different schedules of medicines and pharmaceutical products
- work role boundaries – responsibilities and limitations, including limitations of own work role and type of information able to be provided:
  - CMI
  - confirmation of appointment date and time
  - information about the use of respiratory devices
  - information about the use of dose administration aids (DAAs)
  - standardised (workplace approved) information for clients
- work health and safety

- purpose and scope of client education to aid compliance with administration of medicines
- procedures for client identification and confirmation of identification
- CMI:
  - purpose and layout
  - sources of pharmacy computer system, National Prescribing Services online CMI search
- documentation:
  - assessment of client's ability to manage medications
  - list of medications brought into hospital
  - that CMI or other medication-related information has been issued to client/carer
- purpose and features of DAAs and limitations and problems with these devices
- principles of effective communication, including recognition of communication and language difficulties and how to overcome these
- features of current medication lists, purpose and layout
- sources and method of preparation of electronic and hard copy information
- purpose of, and methods for, standardised assessment of client's ability to manage medications
- factors that affect clients' ability to manage medications, including special needs related to:
  - communication environment and context
  - cognitive ability
  - cultural or language barriers
- respiratory devices:
  - care of respiratory devices
  - demonstration of respiratory devices

© Commonwealth of Australia, 2025 HumanAbility

    - knowledge, purpose and selection criteria for respiratory devices (including: dry powder inhalers, metered dose inhaler, spacers)
- structure and functions of the body systems and associated components, including:
    - cardiovascular system
    - cells, tissues and organs
    - digestive system
    - endocrine system
    - integumentary system
    - lymphatic system
    - musculo-skeletal system
    - nervous system
    - reproductive system
    - respiratory system
    - the special senses – smell, taste, vision, equilibrium and hearing
    - urinary system
- purposes of different medicine groups, including:
    - analgesics and anti-inflammatory agents
    - anti-coagulants
    - anti-depressants
    - anti-diabetic agents
    - anti-epileptics
    - anti-gout agents
    - anti-histamines
    - anti-hypertensives
    - anxiolytics and hypnotics
    - asthma treating agents
    - cholesterol and lipid lowering agents
    - corticosteroids
    - cytotoxics
    - diuretics
    - gastro-intestinal agents
    - heart medicines
    - hormonal medicines
    - osteoporosis medicines
    - viral and anti-bacterial agents, anti-fungals or antibiotics
- factors affecting medicine groups:
    - blood pressure
    - breast feeding
    - geriatric
    - paediatric

© Commonwealth of Australia, 2025 HumanAbility

  - pregnancy
- issues that affect the use of medicine in an individual:
  - bioavailability
  - bioequivalence
  - medicines absorption
  - medicines distribution
  - medicines elimination
  - medicines half-life
  - medicines metabolism
- concept of medicines:
  - medicines interactions
  - medicines food interactions and incompatibilities

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including CMI
- modelling of industry operating conditions, including communication with clients and health professionals

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTPHA009 Support pharmacists in the collection and presentation of workplace data and information

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency. Significant changes to knowledge evidence.

Application

This unit describes the skills and knowledge required to identify pharmacy data and information collection requirements and to collect and present the information.

It applies to pharmacy assistants and technicians working under the supervision of a pharmacist.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
1. Identify and address requirements for data and information collection	1.1 Obtain and clarify instructions from pharmacist to ensure correct understanding 1.2 Identify purpose and audience of the data and information to be collected 1.3 Determine appropriate data and information sources 1.4 Establish timeframe for data and information

© Commonwealth of Australia, 2025 HumanAbility

	collection 1.5 Collect data and information to address identified requirements
2. Prepare data and information for use	2.1 Check data and information for completeness and accuracy and respond to discrepancies 2.2 Analyse data and information to address identified purpose and audience 2.3 Collate data and information in a logical manner and prepare for presentation
3. Present workplace data and information	3.1 Select appropriate modes of communication to suit the purpose and context of the information being provided 3.2 Explain data and information to others as required to support its application to workplace operations 3.3 Answer questions about the data and information collected and clarify appropriately within scope of practice 3.4 Record and store data and information according to workplace procedures

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential *to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTPHA009 Support pharmacists in the collection and presentation of workplace data and information

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency. Significant changes to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- complied with legal, organisational and Society of Hospital Pharmacists (SHPA) *Standards of practice for clinical pharmacy services* for collection and presentation of accurate data and information:
  - screened at least 30 laboratory tests for abnormal results and notified the pharmacist
  - sourced and gathered at least one set of data or information for the following:
    - preparatory information required for reporting adverse drug reactions and other medication incidents
    - drug utilisation evaluation /audit information requested by the pharmacist
    - specific client data
  - arranged information and presented it in a form appropriate for the purpose of organisation's work practices

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical requirements (national, state/territory) for pharmacy work, and how these are applied in organisations, including:

© Commonwealth of Australia, 2025 HumanAbility

- codes of conduct
- duty of care (and implications of negligence)
- informed consent
- privacy, confidentiality and disclosure
- records management
- rights and responsibilities of workers, employers and clients
- specific legislation:
  - medicines and their use
  - the practice of pharmacy
  - different schedules of medicines and pharmaceutical products
- work role boundaries – responsibilities and limitations
- work health and safety

- key information in standard pharmaceutical references and their use:
  - *Australian pharmaceutical formulary and handbook* (APF)
  - MIMs
  - *Australian medicines handbook* (AMH)
  - Micromedex
- the role of, and how to utilise pharmacists with specific responsibilities:
  - medicines information
  - quality use of medicines
  - drug utilisation evaluation
  - clinical trials and clinical pharmacists
  - pharmacy managers
- order of referencing in presentation of information i.e. primary, secondary, tertiary references
- concept of drug utilisation evaluation and the data recorded
- concept of key performance indicators and data reported
- pharmacy or health facility management systems and procedures related to the collection and presentation of workplace data and information
- types of data and information collected and presented in the pharmacy context:
  - adverse drug reactions (ADR) and other medication incidents:
    - data required for reporting
    - meaning of ADR
    - process for reporting
    - purpose of reporting
  - biochemical, haematological and microbiology tests:
    - purpose of tests
    - understanding, of the abbreviations used
    - understanding of the concept of reference range
  - clinical trials:

© Commonwealth of Australia, 2025 HumanAbility

    - purpose of collection of information and the data required
    - understanding of the importance of maintaining confidentiality/blinding
  - meaning and purpose of medication reconciliation and the potential sources of data used to identify a client's medication history and medication list
- therapeutic drug monitoring:
  - medicines that require monitoring
  - purpose of monitoring
  - understanding of the concept of therapeutic range
- client data interrogation and presentation:
  - client unit record number
  - how to ensure client data retrieved is for the correct client
  - concept of key performance indicators and data reported
  - how to identify and access client data
  - concept of reference range
- different medicine groups and their roles, including:
  - analgesics and anti-inflammatory agents
  - anti-coagulants
  - anti-depressants
  - anti-diabetic agents
  - anti-epileptics
  - anti-gout agents
  - anti-histamines
  - anti-hypertensives
  - anxiolytics and hypnotics
  - asthma treating agents
  - cholesterol and lip lowering agents
  - corticosteroids
  - diuretics
  - gastro-intestinal agents
  - heart medicines
  - hormonal medicines
  - osteoporosis medicines
  - viral and anti-bacterial agents, anti-fungals or antibiotics
- factors affecting action of medicine groups:
  - blood pressure
  - breast feeding
  - geriatric
  - hepatic impairment
  - paediatric
  - pregnancy

© Commonwealth of Australia, 2025 HumanAbility

    - renal impairment
- issues that affect the use of medicine in an individual:
    - bioavailability
    - bioequivalence
    - medicines absorption
    - medicines distribution
    - medicines elimination
    - medicines half-life
    - medicines metabolism
- concept of medicines
    - medicines interactions
    - medicines food interactions and incompatibilities

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
    - computerised pharmacy administration system that allows Pharmaceutical Benefits Scheme (PBS) dispensing and online claiming
    - computerised access to client information
- modelling of industry operating conditions, including time constraints for completing activities

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTPOP001 Provide basic repairs and maintenance to health hardware and fixtures

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTPOP213C/HLTPOP214D. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to perform basic repairs and maintenance to health hardware and fixtures in the home and community.

This unit applies to work in a public health context and workers at this level will work under supervision within established guidelines.

Plumbing work must only be performed by a person authorised by registration or licence granted by the relevant State or Territory regulatory authority under legislation.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Plan repairs and maintenance work	1.1 Identify potential health risks or problems in health hardware and fixtures

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	1.2 Develop a work plan, that includes a timetable and priorities, to address repairs and maintenance requirements for the identified health risks in consultation with supervisor
	1.3 Determine the job requirements and the location in which repairs and maintenance are to be carried out
	1.4 Notify and coordinate with householders, community members and other community workers regarding the proposed timetable and work plan and obtain necessary approvals
	1.5 Identify materials, tools and equipment necessary to complete the work in accordance with established procedures and check against job requirements
	1.6 Identify faults and urgent repairs that are within own area of responsibility or expertise
	1.7 Report problems that are outside area of responsibility or expertise in accordance with organisation policy and procedure
	1.8 Make referrals to other key people or outside agencies in accordance with established procedures
2. Carry out repairs and maintenance	2.1 Follow workplace health and safety (WHS) policies and procedures for carrying out repairs and maintenance and the use of tools, materials and equipment
	2.2 Carry out repairs and maintenance in accordance with work plan
	2.3 Respond to unplanned events or conditions in accordance with organisation policy and procedure
	2.4 Refer problems and gaps identified outside area of responsibility to relevant others in accordance with organisation policy and procedure
	2.5 Obtain approval in accordance with established procedures from relevant person to address contingencies
	2.6 Store tools and equipment in accordance with organisation policy and procedure upon the completion of work tasks or daily activities

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
3. Inspect and notify completion of work	3.1 Undertake final inspections to ensure that repairs and maintenance conform to requirements 3.2 Notify and/or document work completion in accordance with organisation policy and procedure

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTPOP001 Provide basic repairs and maintenance to health hardware and fixtures

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTPOP213C/HLTPOP214D. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- identified at least 2 potential health risks or problems associated with health hardware and fixtures:
  - developing and implementing a work plan that includes strategies to deal with each issue
  - identifying and communicating with stakeholders throughout the process
- carried out at least 2 repair and/or maintenance tasks on health hardware and/or fixtures

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and organisation requirements relating to repair and maintenance work, including:
  - organisation standards, policies and procedures, including:
    - infection control
    - manual handling
    - personal protective equipment
    - immunisation requirements and/or recommendations

© Commonwealth of Australia, 2025 HumanAbility

  - scope of own role and responsibilities
  - approvals required and process of obtaining approvals
  - referral agencies and their roles and responsibilities
- common faults, risks and problems associated with health hardware and fixtures and how to identify
- correct selection and use of tools, equipment and materials to be used for repairs and other tasks required

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - WHS procedures
  - personal protective equipment
  - organisation and manufacture guidelines and procedures
  - maintenance requests
  - suitable work area, equipment and materials
  - hand and power tools appropriate to the maintenance tasks
- modelling of industry operating conditions

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTPOP004 Monitor and maintain rubbish collection and disposal systems

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minor changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minor changes to knowledge evidence. Supersedes HLTPOP220C

Application

This unit describes the skills and knowledge required to identify community processes for rubbish collection and disposal, and the strategies needed to monitor and maintain rubbish collection and disposal systems in the community.

This unit applies to work in a public health context and workers at this level will work under the guidance of a supervisor.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Monitor rubbish collection and disposal systems in the community	1.1 Identify potential problems that can occur with rubbish collection and disposal systems used in the community

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	1.2 Identify community processes for rubbish collection and disposal
2. Maintain the rubbish collection and disposal system in the community	2.1 Identify strategies within own role and responsibilities to prevent the transmission of diseases through rubbish collection and disposal
	2.2 Develop and implement a work plan in conjunction with supervisor
	2.3 Report any difficulties or problems to supervisor in accordance with organisation policies and procedures
	2.4 Refer any problems or difficulties that are outside own area of responsibility or expertise to relevant people or agencies

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTPOP004 Monitor and maintain rubbish collection and disposal systems

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minor changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minor changes to knowledge evidence. Supersedes HLTPOP220C

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- identified at least 2 potential health risks or problems associated with rubbish collection and disposal systems and developed and implemented a work plan that includes strategies to deal with each issue.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and organisation requirements relating to rubbish collection and disposal work, including:
  - organisation standards, policies and procedures, including:
    - infection control
    - manual handling
    - personal protective equipment
    - immunisation requirements and/or recommendations
  - scope of own role and responsibilities

© Commonwealth of Australia, 2025 HumanAbility

  - approvals required and process of obtaining approvals
  - referral agencies and procedures
- diseases transmitted through rubbish collection and disposal and strategies to prevent transmission
- community processes in relation to rubbish collection and disposal
- definitions and sources of rubbish
- rubbish tip designs and environmental health considerations in terms of appropriate location of tip sites
- tip disposal methods and organisation of tip site
- bin designs and sizes
- recycling and re-using options.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - workplace health and safety (WHS) procedures
  - personal protective equipment
  - organisation guidelines and procedures
  - suitable work area, equipment and materials
- modelling of industry operating conditions.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTPOP005 Work in a population health context

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Title change. Minor changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minor changes to knowledge evidence. Supersedes HLTPOP301C

Application

This unit describes the skills and knowledge required to apply current context, philosophy and key principles of population health to work in the sector.

This unit applies to work in a public health context and workers at this level will work under supervision within established guidelines.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Plan for work in population health	1.1 Research current and historic concepts of health and its determinants 1.2 Identify key principles to a population health approach and use to assess current work approach

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
2. Gather information on the organisations that support population health work	2.1 Identify relevant local, State/Territory and national organisations supporting population health work 2.2 Clarify each organisation's contribution to population health work
3. Work within the context of the population health approach	3.1 Incorporate consideration of the historical, social, political and economic context into own work 3.2 Apply key principles of population health approach to own work 3.3 Check all work to ensure it complies with relevant legislative and regulatory frameworks

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTPOP005 Work in a population health context

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Title change. Minor changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minor changes to knowledge evidence. Supersedes HLTPOP301C

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- identified at least 3 organisations that support population health work and their contributions
- identified and researched context and key principles of population health approach relevant to work with at least 1 community or project and identified how work will incorporate context and key principles.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- recent public health strategies and relevant local codes of practice, legislation and regulatory frameworks
- health determinants, including:
  - political
  - biological and genetic factors
  - physical environment

© Commonwealth of Australia, 2025 HumanAbility

    - socio-economic factors, including:
        - social gradient
        - stress
        - social exclusion
        - work
        - unemployment
        - social support
        - addiction
        - food
        - transport
        - housing
    - behavioural
    - cultural
    - quality of health services
- historic concepts of health
- concepts and models of health, including:
    - medical model
    - salutogenic model
    - social view of health
    - academic and professional
- historical, social, political and economic context of population health work and how it relates to and affects environmental health and the subsequent impact on individual and community needs
- principles of health promotion
- principles of population health, including those focused on working with Aboriginal and/or Torres Strait Islander communities
- equity issues in population health
- national, State/Territory and local health initiatives and priorities
- the major organisations involved in population health in Australia and their contributions
- different models of work in the population health sector, including:
    - early intervention and/or disease prevention
    - community development and education
    - health promotion
    - working with individuals
    - working with families and the community
    - original and/or Torres Strait Islander environmental health worker (community funded and/or government funded)
- multi-sectoral and multi-strategic approach to population health.

© Commonwealth of Australia, 2025 HumanAbility

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies as well as using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTPOP006 Contribute to working with the community to identify health needs

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minor changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minor changes to knowledge evidence. Supersedes HLTPOP302C

Application

This unit describes the skills and knowledge required to work with a particular community in the assessment of their health needs.

This unit applies to work in a public health context and workers at this level will work under supervision and within defined guidelines.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Assist in conducting a literature review	1.1 Identify aims of literature review and source relevant organisation reports and key documents with a focus on health needs 1.2 Consult key stakeholders from the community and

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	other relevant bodies for sources of information relevant to health needs
	1.3 Identify and source information and data at local, State/Territory or regional level that may assist in defining and assessing the health needs of the community
	1.4 Provide feedback to the work team or team leader on sources of information and assist with reviewing literature
2. Participate in a consultation process with the community	2.1 Contribute to discussions with key stakeholders regarding the health problem, its causes and appropriate interventions and solutions
	2.2 Provide briefing materials throughout the consultation process to identify and clarify issues of interest and concern to stakeholders and own organisation
	2.3 Provide feedback to the team leader or work team on the results of the consultation process
3. Contribute to activities that assist the community to identify their health needs	3.1 Contribute to activities that assist community to understand the factors contributing to the health issue or problem
	3.2 Collect further information and data when needed for input into the analysis and presentation of results arising from the literature review and consultation processes
	3.3 Collaborate with team and supervisor to recommend activities to stakeholders that would build the ongoing capacity of the community to understand and identify their health needs

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTPOP006 Contribute to working with the community to identify health needs

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minor changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minor changes to knowledge evidence. Supersedes HLTPOP302C

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- assisted at least 1 community to identify their health needs, including:
  - participating in at least 2 consultation processes with a range of stakeholders
  - assisting in the review of literature from a range of sources
  - providing at least 2 recommendations to support the ongoing capacity of community to identify health needs.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal, ethical and organisation requirements relating to identifying community health needs, including:
  - relevant international charters and declarations and documents
  - national, State/Territory and local health policies, goals, targets and priorities relevant to the community
  - scope of own role and responsibilities

© Commonwealth of Australia, 2025 HumanAbility

    - equity issues in population health
    - evidence-based practice
    - quality assurance
    - social change and advocacy processes
    - privacy and confidentiality
    - responsibility to help a community respond to needs they identify which might not necessarily coincide with stated priority health needs
- principles of capacity building
- community health needs: state, conditions or factors in the community which, if absent, prevent people from achieving the optimum of physical, mental and social wellbeing
- types of need:
    - normative need (based on expert opinion)
    - expressed need (based on inferences made from observation of use of health services)
    - comparative need (derived from examining the services provided in a similar population)
    - felt need (based on what members of the community say they need)
- activities that develop an understanding of the factors contributing to the health issue or problem of the community
- overview of the stages in population health project planning
- theory and practice of population health, including health promotion, and health protection and prevention of communicable and non-communicable diseases
- consultation and participation principles and techniques, including:
    - interviews
    - nominal group process
    - questionnaires
    - Delphi Method
    - focus groups
    - forums
    - meetings
- conflict resolution, mediation and problem solving techniques
- literature review processes and sources of information
- difference between and examples of qualitative and quantitative data
- communities and types of data relevant to the community, including:
    - demographic characteristics
    - patterns of behaviour
    - lifestyle.

HLTPOP007 Contribute to population health project planning

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTPOP303/HLTPOP304C. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to make a contribution to planning a population health project.

The contribution focuses on working from an existing project plan to develop the detail, such as a timetable for implementing strategies, evaluation and budget.

This unit applies to work in a public health context and workers at this level will work under supervision and within defined guidelines.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Plan implementation of strategies	1.1 Identify existing plan and related goals and objectives 1.2 Identify project strategies from project plan

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	1.3 Identify tasks to be undertaken to implement strategies in consultation with relevant personnel
	1.4 Timetable tasks to be undertaken to implement strategies in consultation with relevant personnel
	1.5 Source resources required to implement strategy
	1.6 Calculate cost of tasks to be undertaken
2. Plan implementation of evaluation tasks	2.1 Identify project evaluation measures from the project plan
	2.2 Identify, in consultation with relevant personnel, tasks to be undertaken to collect data using the identified evaluation measures
	2.3 Timetable, in consultation with relevant personnel, tasks to be undertaken to collect data using the identified evaluation measures
	2.4 Source resources required to collect data using measures identified
	2.5 Calculate cost of evaluation tasks to be undertaken
3. Present planning information	3.1 Select appropriate methods of presenting planning information on the basis of planner needs
	3.2 Present information logically and include references to relevant data and sources to support assertions

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTPOP007 Contribute to population health project planning

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTPOP303/HLTPOP304C. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- consulted with relevant personnel to assist with determining the project plan activities and requirements of at least 2 existing population health project plans, including:
  - timetabling project and evaluation tasks
  - sourcing project and evaluation resources
  - calculating project and evaluation costs
- presented outcomes to the project planner.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and organisation requirements relating to identifying community health needs, including:
  - relevant international charters and declarations and documents
  - national, State/Territory and local health policies, goals, targets and priorities relevant to identifying health needs
  - social change and advocacy processes

© Commonwealth of Australia, 2025 HumanAbility

  - scope of own role and responsibilities
  - equity issues in population health
  - evidence-based practice
- theory and practice of population health, including health promotion, and health protection and prevention of communicable and non-communicable diseases
- overview of the stages in population health project planning
- planning models
- sources of information, including:
  - literature from population health and related disciplines, such as published books, peer-reviewed papers and reports
  - literature outlining marketing and behaviour change strategies specific to the community
  - demographic data and information
  - socio-economic data and information
  - data and information from health research and health studies
  - expert informants
  - key representatives of the community
  - national, State/Territory and local health policy documents and implementation guidelines
- overview of the stages in population health project planning and a broad understanding of project management techniques, including time and cost tracking methods.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including population health project plans
- modelling of standard industry operating conditions and contingencies.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTPOP008 Develop and implement disease prevention and control measures

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Title change. Minor changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minor changes to knowledge evidence. Supersedes HLTPOP306C

Application

This unit describes the skills and knowledge required to make a basic determination of the relevant diseases in the community, the mode of disease transmission and the possible means of transmission control.

This unit applies to work in a public health context and workers at this level will work under supervision and within defined guidelines.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Determine diseases affecting the community	1.1 Search for basic signs, symptoms and causes of diseases

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	1.2 Determine the diseases affecting the community and confirm with supervisor
2. Work with basic environmental health strategies to limit the transmission of disease	2.1 Develop appropriate control measures to limit the transmission of disease
	2.2 Discuss and confirm environmental health strategies selected with supervisor
3. Implement environmental health strategies to limit the transmission of disease	3.1 Identify own roles and responsibilities
	3.2 Clarify roles and responsibilities of other key people or agencies
	3.3 Identify points of contact in relation to job role
	3.4 Implement and monitor control measures

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

HLTPOP009 Provide information and support on environmental health issues

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minor changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minor changes to knowledge evidence. Supersedes HLTPOP307C

Application

This unit describes the skills and knowledge required to provide information and support to community and householders on environmental health issues or hazards that may be of concern.

This unit applies to work in a public health context and workers at this level will work under supervision and within defined guidelines.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Address information needs of the community and householders	1.1 Monitor and observe potential environmental health hazards or risks in the community and households as part of own work role

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	1.2 Identify and discuss any issues of concern with community and householders to determine information needs and level of support required
	1.3 Discuss any difficulties or obstacles that may exist which have prevented the community and householders from being able to address issues of concern
2. Provide information and support	2.1 Provide information and support about environmental health to community and householders
	2.2 Report any problems, difficulties or obstacles that are outside of area of responsibility or expertise in accordance with organisation policy and procedure

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTPOP009 Provide information and support on environmental health issues

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minor changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minor changes to knowledge evidence. Supersedes HLTPOP307C

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- identified and provided information and support to at least 2 householders about environmental health issues.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- policies and procedures for providing culturally appropriate information
- alternative ways of providing information when cultural relationships prevent interaction
- germ theory and disease transmission
- environmental health hazards and risks
- strategies for disease prevention
- scope of own role and responsibilities
- methods for determining information needs, including identifying how much community members and householders already know and what information still needs to be provided to assist them in making informed choices or decisions
- procedures for reporting difficulties or obstacles to disease prevention, including:

© Commonwealth of Australia, 2025 HumanAbility

- non-durable health hardware already installed in houses that constantly break
- houses that have been poorly constructed or designed, and as a result are contributing to a range of health problems
- large numbers of family visiting the household at any one time
- lack of ongoing repairs and maintenance to health hardware
- issues in relation to ‘shame’, including community members and householders not being able to afford to buy health hardware items, or inability to read labels and direction of use
- cultural issues, including sleeping with dogs because they are a very important part of a person's culture and life
- not having access to fridges and freezers to store food
- not having access to washing machines to wash clothes.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies as well as using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTPOP010 Monitor and maintain dog health in the community

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minor changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minor changes to knowledge evidence. Supersedes HLTPOP310C

Application

This unit describes the skills and knowledge required to monitor dog health and dog population in the community and develop the necessary strategies and plans to address issues of concern.

This unit applies to work in a public health context and workers at this level will work under supervision and within defined guidelines.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Monitor dog health and dog population in the community	1.1 Discuss the need to monitor dog health and population with dog owners and community members to gain support 1.2 Consult with dog owners and community members to gather information on the health, population and

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	condition of dogs
	1.3 Record all findings in accordance with organisation guidelines and procedures
	1.4 Report nature and extent of problem in accordance with organisation guidelines and procedures
2. Contribute to a dog health and/or dog population control plan	2.1 Discuss possible strategies for dog health and population control with other staff, community and relevant others
	2.2 Analyse preferred strategies to determine feasibility and appropriateness to the community
	2.3 Negotiate options with dog owners and/or community members
	2.4 Establish a plan of action with other staff, community and relevant others
	2.5 Identify role and responsibilities of self, other staff, community and other key people
	2.6 Contribute to the coordination of the plan in accordance with job role
3. Implement plan	3.1 Apply safe work practices and procedures in performing own role in accordance with the plan
	3.2 Assist community, organisation and relevant key people with implementation of their roles in accordance with the plan
	3.3 Maintain and access effective networks which contribute to the achievement of the plan
	3.4 Record results in relation to the implementation of the plan in accordance with organisation policy and procedure
	3.5 Implement follow-up measures

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

© Commonwealth of Australia, 2025 HumanAbility

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTPOP010 Monitor and maintain dog health in the community

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minor changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minor changes to knowledge evidence. Supersedes HLTPOP310C

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- collaborated with at least 1 community to gain support and approval to develop and implement dog health and dog population monitoring strategies and control plans, including consulting with at least 2 dog owners and other key stakeholders.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and organisation requirements relating to dog health and population needs, including:
  - national, State/Territory and local health policies, goals, targets and priorities relevant to identifying health needs
  - scope of own role and responsibilities
  - key people or agency responsibilities
  - points of contact to assist with the implementation of strategies which are outside own area of responsibility
- common dog diseases, including:

© Commonwealth of Australia, 2025 HumanAbility

  - flea infestation
  - tick infestation
  - worm infestation
  - infected sores or wounds
  - mange
  - eye and ear infections
  - ringworm infection
  - hydatid tapeworm infection
  - hookworm infection
- factors that can lead or contribute to dogs becoming unhealthy, including:
  - hungry dogs
  - too many dogs
  - dogs whose nutritional requirements are not met
  - dogs that are not properly groomed and checked regularly for conditions such as fleas, ticks, ringworms, sores and wounds
  - dogs that are not treated for conditions that may cause infection and affect their health
  - dogs without access to clean and/or dry shelter
  - dogs that are not wormed and immunised
- potential health issues in relation to dogs and population health, including:
  - secondary injury as a result of bites from aggressive dogs
  - potential disease risks and infections from dog bites, including tetanus
  - community members giving food to dogs and going without themselves
  - dogs as vectors or carriers of disease, including when dog plays in sewage waste and then play or lick children
  - allergies due to dog mange causing or contributing to skin disease
  - gastrointestinal infections
  - roundworm and hookworm larval migration
- the roles and responsibilities of community, dog owner, organisations and other key people or specialists in the implementation of the plan
- strategies to monitor dog health and dog population in the community and to develop the necessary plans to address issues of concern, including:
  - dog owners and community education about various strategies in relation to caring for dogs, nutritional food sources, the provision of clean and dry shelter, checking dogs for fleas, ticks, wounds, sores, mange, eye and ear infections, immunising and worming dogs, washing dogs, and seeking help and support for sick dogs
  - reducing the number of internal and external parasites
  - dog sterilisation and contraception
  - euthanasia
- cultural issues which may impact on strategies
- culturally appropriate information provision
- traditional and non-traditional responsibilities and benefits of owning a dog.

HLTPOP011 Facilitate provision of functional, durable health hardware items in home and community

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Title change. Minor changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minor changes to knowledge evidence. Supersedes HLTPOP315C

Application

This unit describes the skills and knowledge required to ensure that repairs and maintenance are undertaken for functional and durable health hardware.

This unit applies to work in a public health context and workers at this level will work under supervision and within defined guidelines.

Plumbing work must only be performed by a person authorised by registration or licence granted by the relevant state or territory regulatory authority under legislation.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Gather information on the provision of functional and durable health hardware in the household and community	1.1 Obtain information on the methods used to monitor and assess repairs and maintenance of community and household health hardware
	1.2 Obtain information on the health hardware items purchased and used to repair, replace and maintain their housing stock
	1.3 Consult community members and householders to determine the success of the methods being used in relation to the ongoing provision of functional and durable health hardware
	1.4 Identify gaps that exist in relation to the provision of ongoing, functional and durable health hardware in the community
	1.5 Report to supervisor feedback from community members and identified gaps
2. Address issues in accordance with job role	2.1 Develop a work plan in conjunction with supervisor to address identified gaps and repairs
	2.2 Seek advice and/or support from key people and outside agencies
	2.3 Implement follow-up procedures to ensure identified repairs are being adequately addressed
	2.4 Report follow-up procedures to supervisor as required in accordance with established procedures

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTPOP011 Facilitate provision of functional, durable health hardware items in home and community

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Title change. Minor changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minor changes to knowledge evidence. Supersedes HLTPOP315C

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has

- obtained information on at least 2 separate households to identify gaps that may exist in relation to the provision of ongoing, functional and durable health hardware in the community
- developed and implemented work plans to address the identified risks to health hardware.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and organisation considerations relating to provision of functional, durable health hardware items in home and community, including:
  - national, State/Territory and local health policies, goals, targets and priorities relevant to identifying health needs
  - community reporting processes for repairs and maintenance requirements
  - community processes for funding repairs and maintenance

HLTPOP012 Contribute to testing of results of community water supply

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Title change. Minor changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minor changes to knowledge evidence. Supersedes HLTPOP319C

Application

This unit describes the skills and knowledge required to assess the quality of the water supply source in the community and implement measures to address issues of concern, if necessary.

This unit applies to work in a public health context and workers at this level will work under supervision and within defined guidelines.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Determine processes used to monitor water quality in the community	1.1 Identify the responsibilities of key people and outside agencies for monitoring the quality and safety of water supply to the community

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	1.2 Discuss and confirm processes used by key people and outside agencies to sample and treat water supply in the community and/or outstations
	1.3 Discuss and confirm own role and responsibilities in relation to the processes used with supervisor, key people and outside agencies
2. Monitor and maintain water quality in the community	2.1 Assist relevant others with monitoring and maintaining the quality and safety of water supply to the community and identifying potential nearby contaminants
	2.2 Report findings to supervisor in accordance with organisation policy and procedure
	2.3 Discuss follow-up measures with supervisor, key people and outside agencies to determine the most appropriate options to address any issues of concern
3. Implement follow-up procedures	3.1 Implement follow-up measures in accordance with established procedures and job role
	3.2 Monitor and evaluate follow-up measures to determine the success of methods being used
4. Provide feedback and advice	4.1 Document evaluation of follow-up measures in accordance with organisation policy and procedure
	4.2 Provide feedback to supervisor, key people and outside agencies
	4.3 Provide advice on alternative or additional strategies to maintain water quality

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTPOP012 Contribute to testing of results of community water supply

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Title change. Minor changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minor changes to knowledge evidence. Supersedes HLTPOP319C

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- provided assistance in testing the quality of 2 water supply samples, including:
  - following workplace health and safety (WHS) and personal protective equipment requirements
  - reporting and following up findings
- identified at least 2 potential water supply contaminants and followed correct procedures to address and follow up concern.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and organisation requirements relating to monitoring the quality and safety of water supply to the community, including:
  - national, State/Territory and local health policies, goals, targets and priorities
  - processes used by key people and outside agencies to sample and treat water supply in the community and/or outstations

© Commonwealth of Australia, 2025 HumanAbility

    - organisation standards, policies and procedures, including WHS and requirements for personal protective equipment
    - roles and responsibilities of self, key people and agencies
    - points of contact to assist with the implementation of strategies which are outside own area of responsibility
- sources of water in the community and how the community accesses its water supply
- environmental health issues in relation to water supply
- water uses and quality guidelines
- water sampling techniques and treatment and disinfection processes
- how to interpret water testing results
- the signs and indicators of possible contaminants
- strategies to maintain water quality.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
    - WHS procedures
    - personal protective equipment
    - organisation guidelines and procedures
    - sampling and testing work area, equipment and materials
    - water supply samples
- modelling of industry operating conditions.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTPOP013 Contribute to the implementation of a disaster plan

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Title change. Minor changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minor changes to knowledge evidence. Supersedes HLTPOP322C

Application

This unit describes the skills and knowledge required to respond to a disaster as identified in an organisational disaster plan.

This unit applies to work in a public health context and workers at this level will work under supervision and within defined guidelines.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Identify existing local disaster planning strategies	1.1 Identify local community organisations providing emergency services 1.2 Clarify disaster plan and/or strategies and disaster planning exercises for the community

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
2. Identify roles in the delivery of the disaster plan	2.1 Identify local disaster planning processes 2.2 Identify roles and responsibilities of the disaster planning coordinator and other persons and determine own role 2.3 Identify relevant State/Territory and local lead agency representatives and contacts as appropriate 2.4 Put in place appropriate joint planning
3. Promote role of community organisations in the delivery of the disaster plan	3.1 Identify and explain roles and responsibilities of community organisation 3.2 Undertake assessment of skills and possible training of community organisation representatives 3.3 Implement disaster plan in line with community and organisation requirements
4. Provide feedback on disaster plan	4.1 Assess the effectiveness of the disaster plan in consultation with stakeholders 4.2 Identify and document ways to improve the disaster plan 4.3 Provide supervisor or manager and disaster planning coordinator with information on the effectiveness of the disaster plan and suggested ways to improve

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Title change. Minor changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minor changes to knowledge evidence. Supersedes HLTPOP322C

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- implemented an existing disaster plan to respond to at least 2 different types of disasters, including collaborating with colleagues and other stakeholders to access effectiveness of implementation and identify and document improvements to the plan.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- types of disasters, including:
  - floods
  - cyclones
  - nuclear
  - fires
  - riots
  - earthquakes

© Commonwealth of Australia, 2025 HumanAbility

- disaster plans and planning strategies and processes
- legal and organisational requirements relating to implementing a disaster plan, including:
  - local, state and territory agencies relevant to the implementation disaster plan
  - roles and responsibilities of key people
  - points of contact to assist with the implementation of disaster plan which are outside own area of responsibility
  - scope of own role and responsibilities
  - lines of communication and authority relevant to own role
- group facilitation, negotiation and problem solving techniques
- local networks and community organisations, including:
  - state or territory health departments
  - police and other emergency services
  - social security
  - local government
  - non-government organisations
  - service providers
  - community groups
- why community participation and control in decision-making is essential to all aspects of health work, and the role of the health worker in supporting the community in this process.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including disaster plans and equipment outlined in the plan
- modelling of standard industry operating conditions and contingencies.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTPOP014 Assess readiness for and effect behaviour change

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minor changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minor changes to knowledge evidence. Supersedes HLTPOP402C

Application

This unit describes the skills and knowledge required to analyse behaviour that impacts health and ways in which to reinforce or change them to promote health.

This unit applies to work in a public health context and workers at this level will demonstrate judgement and limited responsibility within defined guidelines.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*The Performance Criteria specify the level of performance needed to demonstrate achievement of the Element.*
1. Identify behaviour that impacts negatively on health and assess readiness for change	1.1 Identify social determinants of health and specific influences on individual's behaviour 1.2 Identify environmental factors that restrain change 1.3 Identify behavioural health determinants

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*The Performance Criteria specify the level of performance needed to demonstrate achievement of the Element.*
	1.4 Assess motivation, commitment and confidence levels to change attitudes, beliefs and behaviour in collaboration with other team members and/or stakeholders
	1.5 Reinforce positive beliefs and behaviour
	1.6 Consider unintended consequences of desired behaviour and incorporate into the plan
2. Develop and implement plan for behaviour change	2.1 Identify pro-active strategies to support behavioural change based on behaviour change models, research available and consultations with individual, experts and/or stakeholders
	2.2 Identify stakeholders or organisations for collaborative partnerships to support facilitating individual behaviour change
	2.3 Develop a plan in collaboration with individual and document in accordance with organisation policy and procedure
	2.4 Confirm individual's agreement, understanding and participation in relation to the plan
	2.5 Develop and agree on an evaluation process to monitor progress with the individual
3. Monitor and review progress	3.1 Identify the most appropriate methods of data collection for recording behaviour
	3.2 Collect, summarise and review data related to individual behaviour
	3.3 Assess changes in behaviour in collaboration with the individual involved and other experts and stakeholders in accordance with confidentiality requirements
	3.4 Review effectiveness of plan in collaboration with individual other experts and/or stakeholders
	3.5 Report results of behaviour change strategies in accordance with organisation policy and procedure

© Commonwealth of Australia, 2025 HumanAbility

Assessment Requirements for HLTPOP014 Assess readiness for and effect behaviour change

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minor changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minor changes to knowledge evidence. Supersedes HLTPOP402C

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- developed, implemented and reviewed a behaviour change plan for at least 2 individuals, including:
  - consulting and collaborating with each individual, team members and other stakeholders to determine, agree and implement strategies and to monitor and review progress.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and organisation requirements relating to developing and implementing behaviour change plans, including:
  - national, State/Territory and local health policies, goals, targets and priorities
  - organisation standards, policies and procedures, including scope of own role and responsibilities
  - stakeholders or organisations for collaborative partnerships to support facilitating individual behaviour change

© Commonwealth of Australia, 2025 HumanAbility

    - points of contact to assist with the implementation of strategies which are outside own area of responsibility
- equity issues in population health
- evidence-based practice
- social determinants of health
- environmental factors that restrain change
- behavioural health determinants
- the relationship between attitudes, knowledge and lifestyle factors and behaviour
- the relationship between individual behaviour and health outcomes
- behaviour change models and support strategies
- assessment techniques
- collaborative behaviour change planning processes.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including behaviour change plans and equipment or resources outlined in the plan
- modelling of standard industry operating conditions and contingencies.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTPOP015 Provide information on smoking and smoking cessation

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minor changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minor changes to knowledge evidence. Supersedes HLTPOP403C

Application

This unit describes the skills and knowledge required to provide information to individuals and groups on the impact of smoking and nicotine dependence and available smoking cessation resources and programs. It does not include providing smoking cessations interventions.

This unit applies to work in a public health context and workers at this level will demonstrate judgement and limited responsibility within defined guidelines.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*The Performance Criteria specify the level of performance needed to demonstrate achievement of the Element.*
1. Screen clients for smoking	1.1 Discuss the client's tobacco use

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*The Performance Criteria specify the level of performance needed to demonstrate achievement of the Element.*
	1.2 Assess client's nicotine dependence using a validated method
	1.3 Record client results according to organisation policy and procedure
	1.4 Maintain client records professionally and accurately
	1.5 Observe and maintain client confidentiality in all interactions
2. Provide information on smoking and its effects	2.1 Provide client with information about smoking and its effects relevant to client's individual circumstances and background
	2.2 Promote health benefits to the client of quitting smoking relevant to client's specific individual circumstances and background
3. Provide information on smoking cessation treatments and their outcomes	3.1 Identify and promote national and international best practice strategies for smoking cessation
	3.2 Take into account needs of special groups in promoting smoking cessation programs
	3.3 Provide clients with self-help materials
	3.4 Provide referral to telephone counselling and other support services
	3.5 Provide follow-up information as requested by the client

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTPOP015 Provide information on smoking and smoking cessation

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minor changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minor changes to knowledge evidence. Supersedes HLTPOP403C

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has:

- provided at least 3 clients or groups assessed as nicotine dependent with information about smoking and smoking cessation, including promoting benefits of quitting, strategies for smoking cessation and referral services.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- the social, political and economic context of tobacco use in Australian society
- prevalence of smoking in the Australian population, including gender, age and cultural distribution
- cultural and gender factors associated with tobacco use in Australia, including variations in smoking methods and prevalence between culturally and linguistically diverse (CALD) groups and particular demographic groups
- particular problems and needs associated with smoking among special groups, including pregnant and lactating women, adolescents, Aboriginal and Torres Strait Islander people, people with smoking related diseases and people with a mental illness

© Commonwealth of Australia, 2025 HumanAbility

- behavioural and pharmacological determinants of smoking behaviour
- barriers to quitting smoking
- basic human anatomy and physiology, particularly the brain, the lungs and the circulatory system as it relates to smoking and its effects
- broad characteristics of the chemical constituents in tobacco smoke
- common behavioural triggers associated with smoking
- common symptoms of nicotine withdrawal and their relationship to physical recovery
- evidence-based key strategies for smoking cessation
- interaction of nicotine with various medications
- internationally accepted definitions of nicotine dependence
- physiological links between mental illness and nicotine dependence
- process of neuro-adaptation to nicotine
- processes of titration of nicotine dose and smoker compensation practices
- short and long-term known health effects of active and passive smoking
- validated nicotine dependence screening methods
- smoking cessation self-help and support material and referral agencies.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies as well as using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTPOP016 Provide interventions to clients who are nicotine dependent

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minor changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minor changes to knowledge evidence. Supersedes HLTPOP404C

Application

This unit describes the skills and knowledge required to treat and manage nicotine dependence, including (singly or in combination) behavioural and pharmacological interventions, such as brief advice and counselling; intensive support and provision of advice on use of appropriate non-prescription and prescription pharmacotherapy.

This unit applies to work in a public health context and workers at this level will demonstrate judgement and sensitivity within defined organisational guidelines for the implementation of smoking cessation strategies.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*The Performance Criteria specify the level of performance needed to demonstrate achievement of the Element.*
1. Assess needs of clients who	1.1 Obtain client history to determine smoking habits in

are nicotine dependent	accordance with organisation policy and procedure
	1.2 Assess nicotine dependence using a validated method
	1.3 Determine smoking cessation treatment based on assessment of client's level of nicotine dependence, stage of change, client history and personal circumstances and background
	1.4 Maintain client records professionally and accurately
	1.5 Maintain client confidentiality in all interactions
2. Implement interventions	2.1 Match intervention to client's personal circumstances and preferences, including relevant health issues, level of dependence and behavioural triggers
	2.2 Conduct brief intervention with client according to client needs
	2.3 Use motivational interviewing techniques to increase client's motivation to quit
	2.4 Provide intensive counselling according to client's individual needs, circumstances and background
	2.5 Identify clients requiring referral to other health professional or agency and action
3. Assist clients in accessing pharmacotherapies for smoking cessation	3.1 Provide client with information about pharmacotherapies, their benefits and contraindications
	3.2 Determine suitability of pharmacotherapies for client
	3.3 Provide referral to a medical practitioner for pharmacotherapies
	3.4 Determine options for optimal combination of smoking cessation therapies with client
4. Monitor client's progress	4.1 Arrange and conduct client follow-up
	4.2 Assess client's progress against goals set and interventions conducted and then provide feedback

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*The Performance Criteria specify the level of performance needed to demonstrate achievement of the Element.*
	4.3 Assess risk of relapse
	4.4 Provide behavioural interventions and/or pharmacological advice
	4.5 Identify clients requiring referral to other health professional or agency and action
5. Ensure high standards of professionalism and continuing professional development	5.1 Maintain knowledge of smoking cessation therapies
	5.2 Undertake assessment of work to identify opportunities for improvement and/or development
	5.3 Research developments in smoking cessation practices and apply to improve own practice
	5.4 Maintain ongoing personal professional development and training in smoking cessation

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTPOP016 Provide interventions to clients who are nicotine dependent

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minor changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minor changes to knowledge evidence. Supersedes HLTPOP404C

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has:

- followed correct procedures to provide a range of interventions to at least 3 clients who are nicotine dependent including:
  - assessing clients nicotine dependence
  - identifying appropriate intervention for each client
  - monitoring client progress and providing additional support or referrals.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- smoking cessation interventions
- principles and techniques of brief intervention
- contraindications associated with use of nicotine replacement therapies (NRT), including recent cardiac events, unstable angina and pregnancy
- evidence-based key strategies for smoking cessation
- evidence-based aspects of dosage and duration of use of NRT
- intensive counselling techniques suitable for smoking cessation interventions

© Commonwealth of Australia, 2025 HumanAbility

- interaction of nicotine with various medications
- interaction of NRT with medications and other drugs, including caffeine, alcohol and insulin
- internationally accepted definitions of nicotine dependence
- validated nicotine dependence screening methods
- motivational interviewing techniques
- physiological links between mental illness and nicotine dependence
- process of neuro-adaptation to nicotine
- processes of titration of nicotine dose and smoker compensation practices
- types and use of non-prescription (including NRT) and prescription-only pharmacotherapies
- organisation standards, policies and procedures.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies as well as using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTPOP017 Identify pest control strategies

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minor changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minor changes to knowledge evidence. Supersedes HLTPOP409C

Application

This unit describes the skills and knowledge required to monitor pest problems in the community that could potentially affect the health of householders and community members and identify appropriate methods of control.

This unit applies to work in a public health context and workers at this level will demonstrate judgement and limited responsibility within defined guidelines.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
Elements define the essential outcomes.	*The Performance Criteria specify the level of performance needed to demonstrate achievement of the Element.*
1. Identify potential pest problems in the community	1.1 Monitor signs of pest problems in the household and community that could potentially pose a risk to people's health 1.2 Identify environmental conditions contributing to

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*The Performance Criteria specify the level of performance needed to demonstrate achievement of the Element.*
	problems
	1.3 Discuss potential problems with householders and community members to ascertain the nature and extent of problems
	1.4 Identify type of pest, activity level and location of harbourages
	1.5 Estimate density of infestation from available evidence of pest activity
	1.6 Report findings in accordance with organisation policy and procedure
2. Identify strategies to assist with the control of pests in the community	2.1 Seek information on strategies and methods to control different pests in the community
	2.2 Obtain information on advantages and disadvantages and any obstacles that may exist in relation to various methods
	2.3 Seek additional advice from key people and outside agencies
3. Determine the best form of pest eradication or control methods for the community	3.1 Discuss potential strategies with the organisation, community and relevant others to determine the best course of action
	3.2 Assess options to determine the most effective solutions for the identified problem
	3.3 Develop and implement a work plan in relation to the identified strategies in conjunction with supervisor
	3.4 Identify and action issues requiring referrals to key people and outside agencies

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Assessment Requirements for HLTPOP017 Identify pest control strategies

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minor changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minor changes to knowledge evidence. Supersedes HLTPOP409C

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has:

- identified at least 2 pest problems in the community that could potentially affect the health of householders and community members and developed and implemented a work plan that includes appropriate strategies and methods of control.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and organisation requirements relating to pest control and community needs, including:
  - national, State/Territory and local health policies, goals, targets and priorities relevant to identifying health needs
  - scope of own role and responsibilities
  - other key people or agency responsibilities
  - points of contact to assist with the implementation of strategies which are outside own area of responsibility

© Commonwealth of Australia, 2025 HumanAbility

- common pests and rodents found in the area, including mosquitoes, ants, cockroaches and rodents, and the different stages of their lifecycle
- how to set traps
- the links between pests, including rodents and disease transmission
- understanding of the living and breeding places of different pests and the environmental conditions which encourage them to live and breed
- signs of pest and rodent problems
- environmental conditions contributing to pest problems, including:
  - pools of water lying under leaking taps
  - rubbish lying around the yard or community that could potentially become a breeding ground for pests
  - houses with broken or non-existent fly wire screens and doors
  - toilet vents that are not fly proofed
  - bins without tight fitting lids
  - septic tanks that are not sealed, or lids broken
  - toilets that are blocked or broken
  - grass and reeds growing around and in sewage lagoons
  - overflowing drains
  - dead animals and faeces lying around
  - dirty kitchen and food preparation surfaces
  - dirty cupboards
  - household rubbish that is not properly disposed of
  - cracks or crevices in walls or ceilings
- environmental, chemical, biological prevention and control strategies and the advantages and disadvantages of each.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies as well as using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTPOP018 Develop a plan of action to address land care issues in the community

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTPOP311C/HLTPOP412C. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to develop a plan of action to address land care issues that could potentially impact on the health status of individuals and community members.

This unit applies to work in a public health context and workers at this level will demonstrate judgement and limited responsibility within defined guidelines.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance Criteria specify the level of performance needed to demonstrate achievement of the Element.*
1. Develop a plan of action to address issues in relation to land care	1.1 Identify strategies to address land care issues that could potentially impact on the health status of individuals and community members 1.2 Identify and discuss potential strategies with the

Assessment Requirements for HLTPOP018 Develop a plan of action to address land care issues in the community

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTPOP311C/HLTPOP412C. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has:

- identified at least 2 potential land care issues in the community and developed and implemented a plan of action that includes strategies to deal with each issue, including identifying and communicating with stakeholders through the process.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and organisation requirements relating to land care issues, including:
  - organisation standards, policies and procedures, including:
    - manual handling
    - personal protective equipment
    - use of tools and equipment
  - scope of own role and responsibilities
  - approvals required and process of obtaining approvals
  - referral agencies and procedures
- environmental health strategies and priorities

© Commonwealth of Australia, 2025 HumanAbility

- the relationship between land care issues and health
- land care issues and strategies to target the issues that relate, either directly or indirectly, to the possibility of disease transmission and/or health related complaints
- strategies to address specific land care issues, including:
  - necessary requirements to be adhered to when planting tall growing trees close to any power lines
  - ensuring that excessive vegetation growth around sewerage lagoons and in other areas of the community is controlled and maintained
  - planting and maintaining fruit and shade trees in the house yard and community and fruit and shade trees appropriate for the region
  - erecting shelters for shade in places where groups of people tend to gather for meetings or ceremonies
  - obtaining, planting and maintaining bush medicine in the community
  - planting and maintaining trees and shrubs to act as wind breaks against dust in the house yard, general community and outlying areas
  - developing the yard area to reduce the impact of overcrowding and problems with wind-blown dust
  - planting and maintaining appropriate trees around septic tanks to prevent cars from driving over them and collapsing drains or breaking lids.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies as well as using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTPOP019 Apply a population health framework

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minor changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minor changes to knowledge evidence. Supersedes HLTPOP501C

Application

This unit describes the skills and knowledge to support workers to understand and apply the underlying principles and philosophy that must be reflected in all areas of population health work.

This unit applies to work in a public health context and workers at this level will demonstrate judgement and autonomy within broad guidelines.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance Criteria specify the level of performance needed to demonstrate achievement of the Element.*
1. Apply the principles of the population health approach to relevant work	1.1 Identify current and historic concepts of health and its determinants 1.2 Identify key principles involved in a population health approach

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance Criteria specify the level of performance needed to demonstrate achievement of the Element.*
	1.3 Modify work approach to apply key principles of population health
2. Select from a range of change action frameworks that underpin population health work	2.1 Identify relevant population health change action frameworks
	2.2 Match appropriate change action frameworks to population health tasks on the basis of theory and/or past evidence
	2.3 Apply a multi-disciplinary and multi-strategic approach in population health work
3. Collaborate with others	3.1 Identify and assess relevant local, state/territory and national organisations, networks, policies and initiatives supporting population health
	3.2 Identify and examine priority population health issues at the local, State/Territory, national and international levels
	3.3 Determine limitations on actions resulting from legislation and discuss with superiors, peers and other team members
	3.4 Collaborate with colleagues and clarify own role as part of a strategic approach to population health

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTPOP019 Apply a population health framework

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minor changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minor changes to knowledge evidence. Supersedes HLTPOP501C

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has:

- identified and researched at least 2 priority population health issues relating to a community and identified relevant population health change action frameworks that could be applied, including identifying and modifying at least 2 potential work practices to support strategies and address limitations.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- evidence-based practice
- national, State/Territory and local health policies, goals, targets and priorities and legislative frameworks relevant to the context of the work role
- a broad range of population health issues and priority areas in Australia
- key principles of population health, including:
  - population focus
  - preventive focus with stress on building individual and/or community's capacity to control health determinants for a better quality of life

© Commonwealth of Australia, 2025 HumanAbility

  - sensitivity to access and equity issues and health inequalities
  - sensitivity to cultural differences
  - health as a resource for everyday living
  - health as a result of complex interaction among determinants
  - health as a context for power relations with society
  - shared responsibility of health
  - educational-ecological approach
  - evidence-based approach
  - principles of equity and non-discriminatory practice
- models of health, including:
  - medical model
  - salutogenic model
  - social view of health
  - academic and professional
- change action frameworks of population health, including:
  - upstream investment (investment directed at root causes to maximise potential benefits)
  - increased accountability for health outcomes
  - re-orienting health sector
  - capacity building
  - working in partnerships (joint ventures, collaboration, alliances and coalitions)
  - employment of mechanisms to promote community participation
  - public policy development (legislation and regulation, resource allocation and incentives)
  - creation of supportive natural and built environments
  - addressing health inequalities and health inequalities approach
  - personal and social development through provision of information and education for health and enhancement of life skills
- range of population health strategies and application of best practice in population health
- relevant international charters and declarations and documents
- health determinants, including:
  - political factors
  - biological and genetic factors
  - physical environment
  - social factors (social gradient, stress, early life, social exclusion, work, unemployment, social support, addiction, food, transport and housing)
  - behavioural
  - cultural
  - quality of and access to health services
- theory and practice of population health, including health promotion, and health protection and prevention of communicable and non-communicable diseases

© Commonwealth of Australia, 2025 HumanAbility

- types of organisations involved in population health in Australia
- organisation standards, policies and procedures.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies as well as using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTPOP020 Work with the community to identify health needs

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minor changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minor changes to knowledge evidence. Supersedes HLTPOP502C

Application

This unit describes the skills and knowledge required to enable particular communities to define and assess their own health needs.

This unit applies to work in a public health context and workers at this level will demonstrate judgement, sensitivity and autonomy within defined guidelines.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance Criteria specify the level of performance needed to demonstrate achievement of the Element.*
1. Review literature	1.1 Clearly identify health problem and community being addressed 1.2 Identify and access relevant sources of literature and data 1.3 Review the literature and data to reveal the

	established causes of the health problem, intervention programs and general information about the community
	1.4 Critically appraise information accessed through literature review in terms of reliability and applicability
2. Collect other relevant data to further define community	2.1 Identify relevant types of data required to further define community
	2.2 Collect required data that cannot be obtained through a literature search according to organisation procedures and ethical considerations
	2.3 Document description of community in a manner that would provide sufficient information for purposes of evaluation and for examination of those considering duplicating interventions
3. Investigate the health problem as it occurs and is perceived within the community	3.1 Identify appropriate means of consulting with community regarding the health problem, its causes and appropriate interventions and solutions
	3.2 Implement consultation with community and experts using allocated resources and according to organisation procedures and ethical considerations
	3.3 Document results of consultation in a manner that supports planning, evaluating and duplicating interventions and according to organisation procedures and ethical considerations
4. Work with the community to define and prioritise their health needs	4.1 Clearly identify factors contributing to the health problem on the basis of findings from the literature review and other data collected and discuss with the community
	4.2 Sort out, in a logical manner, factors that identify causal pathways defining health needs and discuss with the community
	4.3 Recommend activities that would build the ongoing capacity of the community to identify their health needs to relevant stakeholders

Assessment Requirements for HLTPOP020 Work with the community to identify health needs

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minor changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minor changes to knowledge evidence. Supersedes HLTPOP502C

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has:

- facilitated at least 2 communities to identify, define and prioritise their own health needs including:
  - facilitating consultation between community and experts to identify and review literature and data to determine and understand causes and potential interventions
  - recommending at least 2 activities that would build the ongoing capacity of the community to identify their health needs.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and organisation requirements relating to identifying and assessing the health needs of a community, including:
  - ethical considerations
  - duty of care
  - equity issues in population health
  - evidence-based practice

© Commonwealth of Australia, 2025 HumanAbility

  - relevant international charters/declarations and documents
  - national, State/Territory and local health policies, goals, targets and priorities
  - organisation standards, policies and procedures, including scope of own role and responsibilities
  - stakeholders or organisations for collaborative partnerships
- strategies and activities that build the ongoing capacity of the community to identify their health needs
- theory and practice of population health, including health promotion, and health protection and prevention of communicable and non-communicable diseases relating to identifying health needs
- principles and techniques of consultation and participation
- social change and advocacy processes
- difference between and examples of qualitative and quantitative data
- stages of health needs assessment
- types of needs, including:
  - normative need (based on expert opinion)
  - expressed need (based on inferences made from observation of use of health services)
  - comparative need (base on examining the services provided in a similar communities)
  - felt need (based on what members of the community say they need)
- sources of information and processes for critical appraisal of literature
- common health problems of a community and causal pathways, including the following components:
  - risk markers (identify the target group, outlines the characteristics associated with occurrence of problem but do not necessarily directly contribute to it)
  - risk factors (directly account for why the problem is occurring)
  - contributing factors (contribute to or account for the risk factors and could be sorted out into predisposing factors, enabling factors and reinforcing factors).

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies as well as using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTPOP021 Plan a population health project

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minor changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minor changes to knowledge evidence. Supersedes HLTPOP503C

Application

This unit describes the skills and knowledge required to plan the specifics of a population health project.

Work covers the processes of selecting an appropriate health issue, selecting specific intervention strategies, tailoring strategies to appropriate communities, developing goals and objectives, defining ways of measuring these, identifying required and available resources, identifying appropriate stakeholders and communicating with them to plan the project.

This unit applies to work in a public health context and workers at this level will demonstrate judgement and autonomy within defined guidelines. Workers may be responsible for overseeing the outputs of others.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance Criteria specify the level of performance needed to demonstrate achievement of the Element.*

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance Criteria specify the level of performance needed to demonstrate achievement of the Element.*
1. Determine scope of project	1.1 Identify the health issue and burden of illness for the project's focus in consultation with key stakeholders
	1.2 Review relevant policies and guidelines to determine scope of the project to address the identified issue
	1.3 Identify current related activities in relation to the issue
2. Develop a process for overseeing plan development	2.1 Establish an advisory group representing stakeholders
	2.2 Timetable advisory group feedback on each stage of the planning process
	2.3 Incorporate feedback where appropriate
3. Select appropriate strategies to achieve identified goals and/or objectives	3.1 Identify project goals and objectives
	3.2 Identify strategies most likely to fulfil project goals and objectives on the basis of available literature and suitability, effectiveness, reach and acceptability to stakeholders and community
	3.3 Sequence activities to be consistent with timeframes and resources available
4. Plan evaluation	4.1 Select an evaluation design that is appropriate to the goals and objectives and resources available
	4.2 Establish measures to collect data on achievement of project goals and objectives
	4.3 Determine methods of monitoring and recording aspects of project implementation
	4.4 Outline proposed evaluation report purpose, format and content on the basis of consultation with stakeholders
5. Plan project budget	5.1 Assess and access sources of project funding
	5.2 Identify, cost and match personnel to meet human resource requirements based on skills and knowledge requirements
	5.3 Identify and cost non-human resources, including meeting rooms, information resources and training materials
	5.4 Calculate total cost of implementing project plan

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance Criteria specify the level of performance needed to demonstrate achievement of the Element.*
6. Ensure resources required are prepared and/or ready for use	6.1 Develop and/or source resources for project and test to ensure acceptability and suitability to the needs of the community
	6.2 Brief staff or individuals involved in the project on program rationale, procedures and roles
	6.3 Support staff or individuals to develop the skills required for the fulfilment of project outcomes
	6.4 Develop a plan for documenting and disseminating results to relevant stakeholders
7. Finalise project plan	7.1 Document project plan in accordance with organisation requirements
	7.2 Disseminate plan to relevant parties for feedback
	7.3 Make adjustments to plan based on feedback
	7.4 Finalise plan and obtain relevant approvals

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTPOP021 Plan a population health project

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minor changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minor changes to knowledge evidence. Supersedes HLTPOP503C

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has:

- developed and documented at least 2 population health project plans that each address a different health issue including the determination of:
  - scope, goals, objectives and strategies
  - resources, timeframes and budgetary requirements
  - evaluation scope, purpose, method and measures
  - process for disseminating and obtaining approvals.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and organisation requirements relating to planning a population health project, including:
  - equity issues in population health
  - evidence-based practice
  - social change and advocacy processes

© Commonwealth of Australia, 2025 HumanAbility

  - relevant international charters and/or declarations and documents
  - national, State/Territory and local health policies, goals, targets and priorities
  - organisation standards, policies and procedures, including scope of own role and responsibilities
- project planning principals and models
- stages in population health project planning
- aspects of population health project planning, including communication strategies, quality assurance and budgeting
- theory and fields of population health, including:
  - health promotion
  - environmental health
  - communicable diseases
  - health risk management and assessment
- methods of monitoring and recording aspects of project implementation, including reach and/or exposure, acceptability and/or satisfaction and quality of materials
- consultation and participation techniques.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies as well as using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTPOP022 Evaluate a population health project

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minor changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minor changes to knowledge evidence. Supersedes HLTPOP504C

Application

This unit describes the skills and knowledge required to evaluate a population health project against an existing project plan.

This unit applies to work in a public health context and workers at this level will demonstrate judgement and autonomy within defined guidelines. Workers may be responsible for overseeing the outputs of others.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	Performance Criteria specify the level of performance needed to demonstrate achievement of the Element.
1. Monitor the performance of a population health project	1.1 Monitor project activities to ensure they are being delivered in accordance with project plan 1.2 Regularly review results of monitoring to allow any problems and opportunities to be addressed

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	Performance Criteria specify the level of performance needed to demonstrate achievement of the Element.
2. Evaluate a population health project	2.1 Collect data to measure achievement of project goals and objectives as outlined in the project evaluation plan
	2.2 Interpret data to identify findings in relation to project outcomes
3. Report on the outcome of a population health project	3.1 Identify evaluation report purpose, content and format requirements from the project evaluation plan
	3.2 Prepare report on the findings of the evaluation process
	3.3 Disseminate report to stakeholders in accordance with the project plan

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTPOP022 Evaluate a population health project

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minor changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minor changes to knowledge evidence. Supersedes HLTPOP504C

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has:

- conducted an evaluation of at least 2 population health projects against existing project plans, including documenting and disseminating an evaluation report in accordance with project plan.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and organisation requirements relating to evaluating a population health project, including:
  - equity issues in population health
  - evidence-based practice
  - social change and advocacy processes
  - relevant international charters and/or declarations and documents
  - national, State/Territory and local health policies, goals, targets and priorities
  - organisation standards, policies and procedures, including scope of own role and responsibilities

- project management aspects, including:
  - overview of the stages in population health project planning and evaluation
  - evaluation measures and design
  - quality assurance
  - appropriate reporting formats
- different levels of evaluation, including:
  - process evaluation
  - impact evaluation
  - outcome evaluation.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including project plan and project evaluation plan
- modelling of standard industry operating conditions and contingencies.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTPOP023 Build capacity to promote health

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minor changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minor changes to knowledge evidence. Supersedes HLTPOP505C

Application

This unit describes the skills and knowledge required to build capacity to promote health among individuals, communities, organisations and coalitions. Work focuses on the ability to develop infrastructure, enhance sustainability and foster problem solving capabilities at an individual, team or organisation level.

This unit applies to work in a public health context and workers at this level will demonstrate judgement and autonomy within defined guidelines. Workers may be responsible for overseeing the outputs of others.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance Criteria specify the level of performance needed to demonstrate achievement of the Element.*
1. Assess existing capacity for change	1.1 Examine the context within which the program sits and identify pre-existing capacities to support change

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance Criteria specify the level of performance needed to demonstrate achievement of the Element.*
	1.2 Assess own ability to influence and achieve change
2. Clarify intended outcome	2.1 Identify the key action areas of capacity building that are to be addressed
	2.2 Set goals and objectives that are specific, measurable and achievable and in line with principles of effective capacity building
3. Select and implement appropriate capacity building strategy	3.1 Identify and select strategies in consultation with relevant stakeholders and community
	3.2 Implement strategies according to relevant legislation, organisation policy or procedure and ethical considerations
4. Evaluate effectiveness of selected strategy	4.1 Monitor and document results of implementation of capacity building strategies
	4.2 Evaluate success of capacity building strategies against goals using existing tools

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTPOP023 Build capacity to promote health

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Services Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minor changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minor changes to knowledge evidence. Supersedes HLTPOP505C

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has:

- developed, implemented, monitored and evaluated at least 3 separate strategies to build the capacity to promote health at each of the following levels:
  - individual
  - team
  - organisation.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- roles and responsibilities of relevant agencies, legal and organisational considerations relating to developed, implemented, monitored and evaluated strategies, including:
  - equity issues in population health
  - evidence-based practice
  - social change and advocacy processes
  - relevant international charters and/or declarations and documents

© Commonwealth of Australia, 2025 HumanAbility

  - national, State/Territory and local health policies, goals, targets and priorities
  - organisation standards, policies and procedures, including scope of own role and responsibilities
- theory of capacity building and examples of current strategies
- dimensions of capacity building:
  - development of infrastructure
  - enhancement of program sustainability
  - fostering problem solving capabilities
- principles of effective capacity building practice, including:
  - respecting and valuing pre-existing capacities
  - developing mutual trust
  - being responsive to context within which capacity building program sits
  - avoiding pre-packaged ideas and strategies
- key action areas of capacity building, including:
  - organisational development
  - workforce development
  - resource allocation
  - partnerships
  - leadership
- examples of pre-existing capacities, including:
  - skills
  - structures
  - partnerships
  - resources.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies as well as using suitable facilities, equipment and resources.

HLTPOP024 Develop a disaster plan

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minor changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minor changes to knowledge evidence. Supersedes HLTPOP523C

Application

This unit describes the skills and knowledge required to develop a plan which sets out the roles and responsibilities of workers and others in the community, for responding to a disaster. This plan will be developed in consultation with other relevant agencies and key people.

This unit applies to work in a public health context and workers at this level are required to apply judgement within broad guidelines and take responsibility for their own outputs. Workers may be responsible for overseeing the outputs of others.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance Criteria specify the level of performance needed to demonstrate achievement of the Element.*
1. Determine framework for creating a disaster plan	1.1 Identify and review existing disaster plans of the organisation 1.2 Identify and document government policies which

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance Criteria specify the level of performance needed to demonstrate achievement of the Element.*
	affect the organisation's response to a disaster
	1.3 Identify legislative and statutory requirements impacting on the disaster plan
	1.4 Consult with local, State/Territory and federal government agencies as required to identify and determine roles and responsibilities in the disaster plan
2. Identify and liaise with appropriate community organisations	2.1 Identify community organisations to be involved in a disaster plan and develop an information database
	2.2 Establish contact through a variety of communication strategies
	2.3 Identify restrictions to effective liaison and develop processes to promote communication with other agencies
	2.4 Consult with identified community organisations to identify and determine roles and responsibilities in the disaster plan
3. Incorporate local requirements for disaster planning and relief into a plan	3.1 Collect information on local requirements and resources from key people and organisations
	3.2 Identify and determine availability of resourcing requirements for a disaster plan response
	3.3 Develop plan in accordance with organisation policy and relevant legislation requirements
	3.4 Establish parameters for reviewing and evaluating plan
	3.5 Develop a communications strategy to promote the disaster plan to local community, government and other agencies
	3.6 Implement the communications strategy
4. Identify and train volunteers	4.1 Determine roles within the disaster plan performed by volunteers and clarify responsibilities involved
	4.2 Invite individuals and organisations to take up roles as part of the disaster plan
	4.3 Establish training requirements for volunteers to understand the disaster plan and perform their role
	4.4 Develop a training program and schedule

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance Criteria specify the level of performance needed to demonstrate achievement of the Element.*
	4.5 Deliver training to volunteers
	4.6 Evaluate and adjust training in accordance with disaster plan modifications

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTPOP024 Develop a disaster plan

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minor changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minor changes to knowledge evidence. Supersedes HLTPOP523C

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has:

- developed at least 1 disaster plan in consultation with key stakeholders to respond to at least 3 different types of disasters
- identified and delivered training requirements for volunteers involved in the implementation of the plan.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- types of disasters including:
  - floods
  - cyclones
  - nuclear
  - fires
  - riots
  - earthquakes

HLTREF001 Develop reflexology practice

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to establish the foundations of reflexology practice, evaluate what makes a sustainable practice and then to develop an approach to own practice.

This unit applies to any reflexologists.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Establish foundations of reflexology practice	1.1 Identify, access and interpret information about the central philosophies and history of reflexology and zone therapy 1.2 Evaluate the reflexology system of treatment and its application to current health issues 1.3 Investigate different reflexology styles and their application

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.4 Compare and contrast reflexology, other areas of complementary health modalities and broader health practice
2. Represent the reflexology framework	2.1 Determine information needs of different individuals and groups
	2.2 Identify key messages that represent the philosophy and practice of reflexology
	2.3 Communicate information about reflexology at level of depth appropriate to audience needs
3. Determine requirements for sustainable practice	3.1 Identify key issues that affect the development and sustainability of professional practice
	3.2 Identify economic, environmental, human and social considerations, and their impact on professional practice
	3.3 Access, interpret and collate current information that supports professional practice
4. Develop approach to own practice	4.1 Reflect on professional goals and aspirations
	4.2 Identify and assess professional opportunities in reflexology
	4.3 Reflect on the opportunities and constraints of individual personal circumstances
	4.4 Make decisions about overall practice direction, based on reflection and research
	4.5 Develop practical strategies to address own practice goals

© Commonwealth of Australia, 2025 HumanAbility

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTREF001 Develop reflexology practice

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- used critical thinking skills to:
  - review and reflect on information from a range of sources about reflexology practice
  - evaluate and articulate requirements for sustainable reflexology practice
- communicated key messages about reflexology to meet the information needs of at least 3 different individuals or groups
- developed goals for own practice that reflect the values and philosophies of reflexology

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- philosophies and principles of reflexology and zone therapy:
  - historical development of reflexology
  - philosophical tradition of western and eastern body therapies
  - foot and hand system of treatment
  - different types of reflexology treatments and their key features and purpose
- key features of complementary therapies used in conjunction with reflexology, including:
  - acupuncture/acupressure

HLTREF002 Provide reflexology for relaxation

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. New unit.

Application

This unit describes the skills and knowledge required to gather client information, prepare equipment for reflexology, make observations of the feet and then select and use basic reflexology techniques and sequences based on information and observations.

This unit applies to individuals who provide reflexology relaxation sessions either as part of their work as a dedicated reflexologist or in conjunction with other treatment modalities. It does not include reflexology for therapeutic purposes.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for treatment	1.1 Collect pertinent information regarding client's general health and foot observations 1.2 Review information and use to inform treatment 1.3 Manage information in a confidential and secure manner 1.4 Access and organise appropriate equipment and

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	materials for treatment
	1.5 Prepare the client for treatment with appropriate draping, and confirm comfort levels
	1.6 Clearly explain the process of a reflexology treatment to the client
	1.7 Advise client of possible physical or emotional reactions both during and after treatment
2. Make feet and hand observations	2.1 Assess and accurately record physical details of feet
	2.2 Relate physical condition of feet to client information collected and incorporate into treatment approach
	2.3 Observe and record precautions/contra-indications to reflexology and incorporate into treatment approach
3. Select and use reflexology techniques and sequences	3.1 Hold and support feet adequately during treatment
	3.2 Use thumb and finger techniques suited to client health status, age, tissue condition and sensitivity
	3.3 Apply leverage and pressure as required by selected techniques
	3.4 Follow sequences to work all reflexes on both feet and relate to hands, depending on client needs
	3.5 Recognise reactions to treatment and provide appropriate response
4. Finalise treatment and advise client	4.1 End the treatment using appropriate protocols
	4.2 Provide client with information on recommended follow up activities
	4.3 Recognise situations where medical advice is required and advise clients to seek that advice

Assessment Requirements for HLTREF002 Provide reflexology for relaxation

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. New unit.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- provided relaxation reflexology to at least 4 different people, selecting reflexology techniques based on sound assessment of the feet:
  - evaluated and responded appropriately to skin and structural abnormalities
  - used techniques and sequences within scope of reflexology thumb and finger practice

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- principles of reflexology and zone therapy:
  - historical development of reflexology
  - foot and hand system of treatment
- legal and ethical considerations (national and state/territory) for providing relaxation reflexology:
  - codes of conduct
  - duty of care
  - informed consent
  - mandatory reporting
  - practitioner/client boundaries
  - privacy, confidentiality and disclosure
  - records management

© Commonwealth of Australia, 2025 HumanAbility

    - work role boundaries:
        - working within scope of practice
        - presenting symptoms that require referral to a medical practitioner
    - work health and safety
- client information required prior to relaxation treatment
- protocols for conducting reflexology sessions in relation to:
    - environment
    - equipment
    - client privacy
    - responding to client instructions
    - rituals
- key features of the reflexology map of hands and feet
- factors to consider in foot observation and how to respond:
    - overall appearance
    - signs of bacterial or viral infection
    - signs of keratosis, swelling, colour changes and other skin anomalies
    - signs of structural abnormalities
- precautions to be taken in reflexology for relaxation
- signs of structural abnormalities, conditions on which to work lightly, often or for a short time
- reflexology relaxation techniques and how to apply them:
    - diaphragm relaxer
    - spinal twist
    - toe rotation
    - metatarsal kneading
    - back and forth
    - ankle loosening
- reflexology techniques and sequences and how to apply them:
    - thumb and finger walking
    - microrotation with thumbs and fingers
    - hook in and back up
    - palpating
- use of leverage in reflexology and its appropriate use
- holding and supporting techniques
- factors that affect the level of pressure applied
- basic structure and function of systems and regions of the body and their respective reflexes, including:
    - cardiovascular system
    - immune/lymphatic system
    - endocrine system

© Commonwealth of Australia, 2025 HumanAbility

- nervous system
- reproductive system
- respiratory system
- muscular system
- articular system
- skeletal system
- digestive system
- urinary systems

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - client and practitioner's seating
  - talc/cream/lotion
  - draping material
  - cleaning equipment
- modelling of industry operating conditions, including provision of services to the general public

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors

HLTREF003 Perform reflexology health assessments

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Minimum clinic hours added. Additional assessor requirements.

Application

This unit describes the skills and knowledge required to assess the therapeutic needs of clients through the lens of a reflexology diagnostic framework. It requires the ability to gather client information, perform a physical assessment and bring information together to develop a reflexology treatment plan.

This unit applies to reflexologists.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Determine scope of client needs	1.1 Explore and clarify client expectations 1.2 Provide clear information about scope and limits of services to be provided 1.3 Collect an accurate, relevant and organised health record and document in a form which can be interpreted

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	readily by other professionals
	1.4 Recognise needs that are beyond scope of own practice and make referrals to other health care professionals as required
	1.5 Identify and respond to any barriers to information gathering and assessment
	1.6 Seek client information respectfully and sensitively, using purposeful, systematic and diplomatic questions
	1.7 Manage information in a confidential and secure way
2. Make a physical assessment of the feet	2.1 Provide information about the physical assessment and obtain client consent to proceed
	2.2 Follow clinical and practitioner hygiene procedures
	2.3 Seek client feedback on comfort levels
	2.4 Assess client through both visual and tactile observation of the feet
	2.5 Identify and assess skin conditions for incorporation into the treatment plan
	2.6 Accurately record physical observations of the feet
3. Develop treatment plan	3.1 Correlate results of physical assessment and structural abnormalities of the feet with case history
	3.2 Frame the analysis of information through the integration of western and eastern medical models and reflexology philosophy
	3.3 Identify pre-requisites or contraindications to treatment
	3.4 Select methodologies and treatments considering frequency, length and number of treatments based on outcomes of health assessment
	3.5 Use professional judgement to draw substantiated conclusions about treatment needs
	3.6 Establish expected treatment outcomes based on the

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	reflexology framework and evidence
	3.7 Accurately document proposed treatment plan
4. Confirm assessment and treatment plan with client	4.1 Discuss assessment, its implications and rationale for treatment with the client
	4.2 Assign and agree treatment priorities and expectations in consultation with the client
	4.3 Schedule times and session lengths suited to the required techniques and sequences
	4.4 Respond to client questions using language the client understands
	4.5 Discuss referral and collaborative options with the client as required

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTREF003 Perform reflexology health assessments

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Minimum clinic hours added. Additional assessor requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 120 hours of reflexology client consultation work
- prepared for and managed at least 60 reflexology assessments - clients must include males and females from different stages of life with varied presentations
- interpreted health and wellness using the reflexology framework and the following assessment techniques
  - touch
  - visual observation
  - listening skills
- interacted effectively with clients:
  - clearly articulated information about services, treatment options and rationale
  - engaged clients in decision making

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

© Commonwealth of Australia, 2025 HumanAbility

- legal and ethical considerations (national and state/territory) for client assessment and treatment planning:
  - codes of conduct
  - duty of care
  - informed consent
  - mandatory reporting
  - practitioner/client boundaries
  - privacy, confidentiality and disclosure
  - records management
  - working role boundaries:
    - working within scope of practice
    - presenting symptoms that require referral to a medical practitioner
  - work health and safety
- referral options for practitioners:
  - professional health services including complementary health modalities
  - community resources and support services
  - types and availability of further medical testing
- factors and barriers that may impact on assessment, including:
  - physical
  - psychological
  - cultural
- factors that affect individual health status, including:
  - age
  - constitution
  - lifestyle
  - diet
  - personal and medical history
  - values and attitudes
  - balance of rest and activity
  - physical environment
  - social environment
- client information required for assessment and the scope and depth of information needed around:
  - client objectives and expectations
  - client history and its components
  - client current state of health
  - signs and symptoms:
    - onset
    - duration
    - location

© Commonwealth of Australia, 2025 HumanAbility

    - quality and severity
    - non-verbal
- different ways that signs and symptoms of conditions present:
    - physical
    - psychological
    - social
    - spiritual
- features of signs and symptoms, including:
    - normal tissue texture, flexibility and colour
    - anatomical structure of the feet and hands
    - biomechanical abnormalities
    - common ailments of feet and hands
    - meridian pathways and related ailments
- principles and philosophy of reflexology assessment framework:
    - tender reflexes
    - numbness
    - swelling
    - tension
    - pressure variation suitable to the client
    - work lightly, often and for a short time when client is very ill, young or elderly
    - work less rather than more initially
    - non-verbal feedback – facial expressions and body movements in response to touch
    - verbal feedback
- reflexology diagnostic techniques and considerations:
    - pain sensitivity
    - client tolerance to technique and length of session
    - palpation
    - pressure application
- possible reactions, contra-indications to treatment and/or limitations for assessment:
    - broken bones, severe bruising or sprains in feet and/or hands
    - undiagnosed skin conditions
    - tinea or other infectious conditions
- links between presenting ailments, regions and systems of the body and the condition of the associated reflexes
- common disease states of each body system
- treatment planning techniques and considerations

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated clinical environment that reflects workplace conditions. The following conditions must be met for this unit:

© Commonwealth of Australia, 2025 HumanAbility

- use of suitable facilities, equipment and resources, including:
  - health assessment/client consultation forms
  - client and practitioners seating
  - talc/cream/lotion
  - draping material
  - cleaning equipment
- modelling of industry operating conditions, including provision of services to the general public
- clinic supervision by a person who meets the assessor requirements outlined below for at least 40 of the 120 hours of client consultation work

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must:

- have at least 3 years current clinical experience working as a reflexologist providing services to the general public
- hold practising membership of an Australian professional body that represents reflexologists

HLTREF004 Provide therapeutic reflexology treatments

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Minimum clinic hours added. Additional assessor requirements.

Application

This unit describes the skills and knowledge required to prepare for and provide therapeutic reflexology treatments based on the outcomes of an existing health assessment and treatment plan.

This unit applies to reflexologists.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare client for treatment	1.1 Interpret treatment plan and clearly outline how the treatment will be provided and managed 1.2 Explain factors which may interfere with the effectiveness of the treatment 1.3 Inform and advise client about possible physical or emotional reactions during and following a session

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.4 Follow established protocols to physically prepare the client for treatment
	1.5 Confirm client consent for treatment
2. Apply therapeutic reflexology and relaxation techniques	2.1 Select and use relaxation techniques that best prepare the client for treatment
	2.2 Use reflexology techniques targeted to required body systems and the relevant reflex areas
	2.3 Use and adjust leverage and pressure based on assessment indications and client tolerance
	2.4 Use and adjust holding and supporting techniques during treatment to achieve optimum effect
	2.5 Follow and complete sequences that target areas of therapeutic need
	2.6 Consider general health of the client, tissue condition, age, health and sensitivity
	2.7 Maintain client-focussed attention during treatment
	2.8 Recognise reactions to treatment and respond promptly as required
3. Provide advice and resources to the client	3.1 Educate client in relevant and practical techniques that support the treatment plan
	3.2 Answer client queries with clarity and using language that the client understands
	3.3 Provide clear information on techniques being used, their therapeutic benefits and the underpinning philosophy
	3.4 Use honesty and integrity when explaining treatment plans, schedules and recommendations to client
	3.5 Promote client independence and responsibility in treatment and encourage reflexology self treatment when appropriate
	3.6 Discuss and agree on evaluation strategies
	3.7 Accurately document treatment provided and details

HLTREF005 Adapt reflexology treatments to meet specific needs

Modification History

Release	Comments
Release 2	Corrections to typographical errors in Performance Evidence. Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. New unit.

Application

This unit describes the skills and knowledge required to adapt assessment and treatment strategies to meet the needs of clients of different genders and at different stages of life. It also includes the requirement to be able to identify and respond to other specific needs with which the practitioner may be unfamiliar.

This unit applies to reflexologists.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Adapt assessment and treatment strategies to stages of life	1.1 Anticipate and take account of varying potential client sensitivities to ensure client dignity is maintained 1.2 Tailor assessment and treatment approaches that take account of different cognitive abilities of clients at different stages of life 1.3 Use reflexology techniques and pressure application

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	that take account of client needs at different stages of life
	1.4 Recognise norms and deviations associated with age and gender
	1.5 Obtain appropriate consents from others when appropriate
2. Respond to unfamiliar presentations	2.1 Recognise situations where presenting cases or aspects of presenting cases fall outside current knowledge base or expertise
	2.2 Refer client to other practitioners when case is not appropriate to own scope of practice
	2.3 When appropriate to continue with the case, identify, access and interpret sources of additional information and advice
	2.4 Enhance own capacity to deal with unfamiliar cases by conducting case specific research
	2.5 Integrate findings into client treatment plans and record details
3. Extend and expand own knowledge base	3.1 Pro-actively identify and respond to professional development opportunities
	3.2 Develop and adjust work practices as part of ongoing practice development

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Minimum clinic hours added. Additional assessor requirements.

Application

This unit describes the skills and knowledge required to monitor and evaluate therapeutic reflexology treatments, both from an individual client and whole of practice perspective.

This unit applies to reflexologists.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Evaluate client progress	1.1 Seek client feedback about treatment impacts and compliance with the treatment plan 1.2 Make own observations and assessment of client changes based on reflexology framework 1.3 Evaluate treatment impacts in relation to client's physical, mental, spiritual and emotional wellbeing

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.4 Compare changes and improvements with expectations in the treatment plan, existing research and evidence from own practice
	1.5 Seek additional information from clients when progress suggests this is needed
	1.6 Accurately document progress in client treatment plan
2. Adjust treatment based on evaluation	2.1 Determine the need for adjustment to treatment plan based on evaluation of client progress
	2.2 Identify and respond to factors that may be inhibiting client progress
	2.3 Adjust treatment plans based on outcomes and sources of research or evidence that support reflexology practice
	2.4 Accurately document any adjustments to treatment plans
3. Develop practice from client evaluation	3.1 Review progress of clients in context of own individual practice
	3.2 Identify areas of own practice for further research or development to support client outcomes
	3.3 Pro-actively seek and respond to professional development opportunities

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTREF006 Monitor and evaluate reflexology treatments

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Minimum clinic hours added. Additional assessor requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 120 hours of client consultation work
- managed at least 60 therapeutic reflexology assessment and treatment sessions - clients must include males and females from different stages of life with varied presentations
- monitored and evaluated reflexology treatments provided to at least 5 different clients with at least 3 treatments per client

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations (national and state/territory) for monitoring and evaluation:
  - children in the workplace
  - codes of conduct
  - duty of care
  - informed consent

© Commonwealth of Australia, 2025 HumanAbility

    - mandatory reporting
    - practitioner / client boundaries
    - privacy, confidentiality and disclosure
    - records management
    - work role boundaries
        - working within scope of practice
        - presenting symptoms that require referral to a medical practitioner
    - work health and safety
- types of criteria by which reflexology treatments are evaluated
- methods of monitoring treatment progress
    - re-assessment
    - client feedback
- barriers to therapeutic progress and ways to respond within a reflexology framework
- expectations of treatment for different conditions and client groups, and factors that impact on those expectations:
    - client history
    - contraindications
    - compliance
    - interactions with other treatments
    - client general health
    - presenting condition
- sources of research and evidence that support reflexology practice
- principles underpinning continuation or variation of treatment
- professional development opportunities in reflexology

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated clinical environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
    - client information – case history, treatment plan
    - client and practitioner's seating
    - talc/cream/lotion
    - draping material
    - cleaning equipment
- modelling of industry operating conditions, including provision of services to the general public
- clinic supervision by a person who meets the assessor requirements outlined below for at least 40 of the 120 hours of client consultation work

© Commonwealth of Australia, 2025 HumanAbility

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must:

- have at least 3 years current clinical experience working as a reflexologist providing services to the general public
- hold practising membership of an Australian professional body that represents reflexologists
- fulfil the continuing professional development requirements of the professional body to which they belong

HLTRNL001 Support a person with chronic kidney disease

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Removed pre-requisites. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minimal change to knowledge evidence. Supersedes HLTRNL601C

Application

This unit describes the skills and knowledge required to provide supportive care of a person with chronic kidney disease including advance care planning.

This unit applies to enrolled nursing work carried out in consultation and collaboration with registered nurse, and under supervisory arrangements aligned to the Nursing and Midwifery Board of Australia regulatory authority legislative requirements; and to Aboriginal and/or Torres Strait Islander health work carried out under direct or indirect supervisory arrangements of a registered nurse or medical practitioner.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Assess impact of chronic kidney disease (CKD) on the person and their educational needs	1.1 Maintain current knowledge of CKD and associated pathophysiology and apply to each clinical manifestation 1.2 Identify common problems and complications associated with CKD and focus on the person's specific

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	contributing factors when assessing impact on that person
	1.3 Discuss with the person the psychosocial impact of CKD on their activities of daily living
	1.4 Ascertain and respect person person's needs related to their lifestyle, social context and emotional and spiritual choices
	1.5 Communicate effectively with the person, family or carer and members of the interdisciplinary health care team
	1.6 Clarify the educational needs of the person in terms of stages of the disease, required care and self-management strategies
	1.7 Provide support to the person, family or carer in an open and non-judgemental way and within scope of own work role and responsibilities, to ensure they have the freedom to discuss spiritual and cultural issues related to the impacts of CKD
2. Contribute to providing education to the person with CKD	2.1 Provide information and resources to the person, family or carer on the aetiology and pathophysiology of the stages of CKD, within scope of work role and responsibilities
	2.2 Update own knowledge and provide the person with relevant information to assist in maintaining their health status and slowing disease progression
	2.3 Provide information and support to the person to assist them to establish and maintain an appropriate diet
	2.4 Provide the person with access to appropriate health education resources on CKD and renal replacement therapy
	2.5 Support the person to access information about treatment options in different stages of the disease, so that they can make informed treatment choices
	2.6 Communicate effectively with the person, family or carer to clarify the person's needs related to care, including end-of-life discussion, and refer the person to appropriate members of the interdisciplinary health care

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	team
	2.7 Contribute to advance care planning or directives in consultation with the interdisciplinary health care team to identify and meet the changing needs of the person, and changes in advance care planning or directives
3. Contribute to determining the health status of the person with CKD	3.1 Perform holistic primary health care assessment of the person in consultation and collaboration with the registered nurse
	3.2 Monitor health status of the person to identify disease progression and report changes, referring the person to others where appropriate within scope of work role and organisation policy and procedures
	3.3 Identify possible psychosocial impacts of CKD in discussions with the person and, if required and within scope of work role and organisation policy and procedures, refer the person, family or carer for counselling or assistance
	3.4 Assess the psychosocial impact of palliative care on the person’s family or carer
	3.5 Consult with the interdisciplinary health care team to contribute to effective care planning for the person with CKD
4. Assist the person to develop self-management strategies	4.1 Identify opportunities for the person to self-manage various clinical manifestations and common problems and complications associated with CKD
	4.2 Assist the person to adhere to care management strategies and their medical management regime for CKD to maintain optimal health

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

© Commonwealth of Australia, 2025 HumanAbility

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTRNL001 Support a person with chronic kidney disease

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Removed pre-requisites. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minimal change to knowledge evidence. Supersedes HLTRNL601C

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- implemented nursing care plans for 3 people with chronic kidney disease (CKD) in consultation and collaboration with interdisciplinary team in the workplace
- provided follow-up care or 3 people with CKD, evaluating their health status and providing relevant health information to meet individual needs in consultation and collaboration with interdisciplinary team in the workplace or in a simulated environment.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- applied anatomy and physiology of the renal system and clinical manifestations and associated pathophysiology of acute kidney injury (AKI) and Stages 1 to 5 of CKD
- underlying environmental and social factors contributing to CKD in the general population in Australia and to the higher rates experienced within Aboriginal and/or Torres Strait Islander communities
- CKD conditions including risk factors:
  - diabetic nephropathy
  - glomerulonephritis
  - hypertensive nephropathy

© Commonwealth of Australia, 2025 HumanAbility

  - polycystic kidney disease
  - reflux nephropathy
  - kidney stones
- clinical manifestations of CKD including:
  - hypertension
  - anaemia
  - bone disease
  - cardiovascular disease
  - impaired immunity
  - electrolyte imbalance
  - fluid imbalance
- complications and impact of CKD including:
  - uraemic breath
  - unusual or metallic taste
  - anorexia
  - nausea and vomiting
  - lethargy
  - change in urination
  - confusion
  - pain
  - increase in depression
  - stages in grief and loss
  - sexual dysfunction
  - general malaise
  - cardiovascular events
  - infections
  - uraemic frost
  - pruritus
  - restless leg syndrome
- screening and prevention of CKD
- immunity and the importance of vaccinations
- changing educational needs of the person as CKD progresses
- assessment of renal function and diagnostic procedures including:
  - common pathology tests to diagnose and monitor CKD and their interpretation
  - interventional and investigational procedures used in the diagnosis and the management of CKD
- management of CKD including:
  - factors that can slow the progression and changes across the continuum of CKD
  - management principles for various clinical manifestations of CKD and associated co-morbidities

© Commonwealth of Australia, 2025 HumanAbility

  - meaning and interpretation of health check results for a person with CKD
  - medicines in common use in health management of a person with CKD including basic mechanism of action, precautions, contraindications and side effects
  - nutritional considerations for a person with CKD
- treatment options (including theory, terminology, procedures, risks and benefits) for a person with CKD including renal replacement therapies such as peritoneal dialysis (PD) and haemodialysis (HD)
- psychosocial impacts
- social needs:
  - disability support
  - family support
  - transport to appointments
  - accommodation
- relevant organisations associated with palliative care and advance care planning
- self-management strategies for a person with CKD, including knowledge the person requires and ways to foster a lifelong commitment to:
  - healthy life style
  - exercise
  - renal diet
  - fluid requirements
  - medication regime
  - care of dialysis access
  - recognising progressive symptoms of CKD
  - vaccination regime
  - diabetes care
  - cardiovascular disease care
  - dental care
  - optometry and ophthalmic care
  - skin care.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as, using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

© Commonwealth of Australia, 2025 HumanAbility

In addition, assessors must hold current registration as a registered nurse with Nursing and Midwifery Board of Australia.

HLTRNL002 Provide care and support to a person undergoing renal replacement therapy

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training* Package *release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Merged with HLTRNL602C/HLTRNL603C/HLTRNL604C. Removed pre-requisites. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to provide care and support to a person in a health or community setting undergoing renal replacement therapy including peritoneal dialysis and haemodialysis.

This unit applies to enrolled nursing work carried out in consultation and collaboration with registered nurse, and under supervisory arrangements aligned to the Nursing and Midwifery Board of Australia regulatory authority legislative requirements; and to Aboriginal and/or Torres Strait Islander health work carried out under direct or indirect supervisory arrangements of a registered nurse or medical practitioner.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Establish therapeutic relationship with the person to support self-management of	1.1 Perform an assessment of the person to establish their cognitive ability to support self-management of renal replacement therapy

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
renal replacement therapy	1.2 Provide the person, family or carer with the opportunity to ask questions and discuss areas of concern 1.3 Ask the person questions clearly in an appropriate manner, level and pace, and in a way that encourages the person to provide full answers 1.4 Assist and empower the person to self-manage their renal replacement therapy, and provide feedback and education as required 1.5 Recognise and respond appropriately within scope of work role to identified actual and potential problems of the person's proposed renal replacement therapy, and report outcomes to interdisciplinary health care team 1.6 Incorporate referral to community services into advance care planning strategies in consultation and collaboration with interdisciplinary health care team
2. Assess physical health status of a person undergoing dialysis	2.1 Perform a pre-dialysis assessment of the person and report outcomes to interdisciplinary health care team in accordance with scope of work role and organisation policies and procedures 2.2 Examine the person's vascular access for haemodialysis or catheter and exit site for peritoneal dialysis to identify actual and potential problems 2.3 Obtain specimen swab from the person's vascular access site or catheter site if necessary, according to organisation policies and procedures, and send specimen for microbiological analysis 2.4 Identify any significant physical health issues for the person in relation to dialysis prescription and any requirement for adjustments, and report to other members of the interdisciplinary health care team 2.5 Recognise and refer actual and potential problems related to variations from the person's normal health status to interdisciplinary health care team
3. Assist the person in self-care management of peritoneal	3.1 Review the person's understanding of the procedure in accordance with legal requirements and organisation

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
dialysis treatment	policies and procedures 3.2 Assess the person's self-care strategies 3.3 Appraise the person's technique for dressing exit site and provide effective education as required 3.4 Assist the person as necessary with their peritoneal dialysis exchange technique in accordance with organisation policies and procedures and infection control guidelines 3.5 Monitor the person during treatment within scope of work role and within organisation policies and procedures 3.7 Recognise and respond appropriately to actual and potential problems of peritoneal dialysis treatment 3.8 Obtain an effluent specimen if necessary, according to organisation policy and procedures, and send specimen for microbiological analysis 3.9 Assess the person's response to treatment, and document and report outcomes to interdisciplinary health care team 3.10 Assist the person to self-manage peritoneal dialysis consumables using waste minimisation and sustainable practice
4. Perform peritoneal dialysis exchange for the person unable to undertake procedure	4.1 Examine the peritoneal dialysis catheter exit site and perform exit site dressing as required 4.2 Prepare peritoneal dialysis additives for dialysis bag in line with delegation, and consider and identify causes of peritoneal fluid failure to drain 4.3 Perform peritoneal exchange according to prescribed treatment order, organisation policy and procedures 4.4 Monitor person during treatment within scope of work role and within organisation policy and procedures and refer to interdisciplinary health care team 4.5 Identify clinical features suggestive of dialysis-related peritonitis and promptly refer a person to interdisciplinary health care team 4.6 Assess the person's response to dialysis additives and

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	treatment as administered within scope of work role
	4.7 Recognise acute and delayed adverse reactions to dialysis additives and respond within scope of work role
	4.8 Obtain an effluent specimen if necessary, according to organisation policy and procedures, and send specimen for microbiological analysis
	4.9 Document and report treatment outcomes to interdisciplinary health care team
5. Prepare equipment and the person for haemodialysis treatment	5.1 Explain procedure and prepare the person for treatment and make comfortable
	5.2 Prepare machine according to organisation policy and procedures
	5.3 Determine dialysis settings according to the person's dialysis prescription within scope of work role and organisation policies and procedures
	5.4 Prepare other interventions, including medications, under the direct supervision of, and as delegated by interdisciplinary health care team within scope of work role and organisation policies and procedures
	5.5 Prepare consumables for cannulation of the person and connection to machine
	5.6 Wash hands and use personal protective equipment in accordance with infection prevention and control guidelines
	5.7 Prepare the person's access for cannulation according to organisation policies and procedures
	5.8 Identify appropriate site for cannulation, and check for signs suggesting fistula stenosis or infection and consult with interdisciplinary health care team.
	5.9 Perform cannulation according to organisation policies and procedures
6. Perform haemodialysis	6.1 Connect the person to haemodialysis machine according to organisation policies and procedures and infection control guidelines

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	6.2 Monitor the person and refer variations in health status to the interdisciplinary health care team according to organisation policies and procedures
	6.3 Recognise and respond appropriately to machine alarms and actual and potential problems of haemodialysis
	6.4 Assess the person's response to treatment and other interventions as administered within scope of work role and consult with interdisciplinary health care team
	6.5 Recognise acute and delayed adverse reactions to other interventions and respond within scope of work role
	6.7 Disconnect the person from haemodialysis machine in accordance with organisation policy and procedures
	6.8 Clean and dry and store equipment in accordance with infection control and manufacturers' instructions
	6.9 Examine vascular access site to identify any actual or potential problems and refer to interdisciplinary health care team
7. Evaluate health status of the person at completion of dialysis	7.1 Complete the post-dialysis assessment of the person and document and report outcomes
	7.2 Evaluate the person's response to treatment and report to interdisciplinary health care team as required within scope of work role and organisation policy and procedures
	7.3 Provide feedback to the person on physical health assessment in order to maintain optimal health status
	7.4 Identify opportunities to encourage the person to voice concerns, and respond appropriately

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

© Commonwealth of Australia, 2025 HumanAbility

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTRNL002 Provide care and support to a person undergoing renal replacement therapy

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training* Package *release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Merged with HLTRNL602C/HLTRNL603C/HLTRNL604C. Removed pre-requisites. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed renal replacement therapy on 3 different people, at least 1 of which must be using peritoneal dialysis and at least 1 of which must be using haemodialysis, including:
  - identifying signs of uraemia and electrolyte imbalance
  - identifying signs of fluid overload
  - identifying signs of dehydration
  - checking peritoneal dialysis exit site
  - assessing patency of vascular access including:
    - palpating fistula for thrill
    - auscultating fistula for bruit
    - checking for signs of infection
    - checking last needle sites.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- infection control strategies for management of a person undergoing renal replacement therapies including:

© Commonwealth of Australia, 2025 HumanAbility

  - stressing the importance of good hygiene and adequate nutrition in prevention of infection
  - maintaining cleanliness of exit site or fistula arm
  - monitoring and maintaining integrity of skin to prevent infection
  - using no touch technique
- pathophysiology of Stage 5 CKD and common pathology tests to diagnose and monitor CKD and their interpretation
- reportable limits for a person's vital signs and biochemical and haematological results for a person undergoing renal replacement therapy
- immunity and the importance of vaccinations
- management principles for different types of renal replacement therapy including:
- haemodialysis
- peritoneal dialysis
- medicines in common use in management of a person with Stage 5 CKD including basic mechanism of action, precautions and side effects
- organisation policy and procedures relating to renal replacement therapy
- potential impact of Stage 5 CKD and renal replacement therapy has on quality of life and self-esteem including issues related to:
  - fluid balance management
  - nutritional management
  - prevention of infection
  - care of dialysis access
  - care of transplanted kidney
  - administration of medications and identification of their side effects
- signs and symptoms of actual and potential problems of renal replacement therapy and the appropriate response including:
  - hypertension, hypotension
  - hyperglycaemia, hypoglycaemia
  - cardiovascular abnormalities
  - fluid and electrolyte imbalance due to rapid or excess fluid or electrolyte removal
  - malnutrition
  - haemodialysis problems
  - haemolysis
  - vascular access problems
  - clotted or stenosed vascular access
  - prolonged bleeding
  - peritoneal dialysis problems
  - peritonitis
  - exit site infection signs and symptoms including:
    - leakage from site, extravasation or bag
    - blocked catheter due to constipation, catheter movement, fibrin plug

© Commonwealth of Australia, 2025 HumanAbility

    - cracking, splitting and discolouration of the catheter
    - cuff extrusion
    - mobile catheter
    - tension of catheter
    - extravasation to surrounding tissue or along inguinal canal to scrotum or labia
    - contamination of catheter or 'Y' line on bag during exchange process
    - blocked or split Tenckhoff catheter
  - accidental break in sterile pathway
  - hernia
  - obesity
  - psychosocial issues
  - dietary management
- potential vascular access site problems including:
  - decreased thrill
  - high pitched bruit
  - difficulty in needling fistula
  - abnormal arterial and venous pressure readings
  - pain, swelling, redness or trauma
  - false aneurysms
  - blood leak from cannulation site
- own role and responsibilities and those of other health care team members in the delivery of care to a person with CKD.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as, using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must hold current registration as a registered nurse with Nursing and Midwifery Board of Australia.

HLTSHU001 Work within a framework of traditional oriental medicine

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. New unit.

Application

This unit describes the skills and knowledge required to establish the foundations of traditional oriental medicine and then to integrate its philosophies and principles into practice.

This unit applies to any complementary health practitioner whose practice is based on the oriental medicine framework.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Establish foundations of traditional oriental medicine	1.1 Identify, access and interpret information on the central philosophies of traditional oriental medicine 1.2 Evaluate the traditional oriental medicine system of treatment and its application to current health issues 1.3 Assess and determine how traditional oriental medicine is used within different complementary health modalities and within broader health practice

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
2. Integrate philosophy of traditional oriental medicine into practice	2.1 Evaluate the ways in which the traditional oriental medicine framework can enhance own practice 2.2 Investigate detailed aspects of client assessment and treatment approach in traditional oriental medicine 2.3 Develop and adjust own practice approaches to reflect traditional oriental medicine framework
3. Extend and expand own skills and knowledge in traditional oriental medicine	3.1 Pro-actively identify and respond to opportunities to expand own knowledge of traditional oriental medicine 3.2 Pro-actively engage and collaborate with peers

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTSHU001 Work within a framework of traditional oriental medicine

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. New unit.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- used critical thinking skills to evaluate how the oriental medicine framework is applied in practice
- integrated the traditional oriental medicine framework into the delivery of services for at least 10 different clients:
  - in assessment and diagnosis
  - in treatment provision

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- principles and philosophy of oriental therapies framework:
  - yin and yang,
  - five elements theory
  - five vital substances
  - jing luo
  - zang fu
  - extraordinary organs
  - four methods of diagnosis
  - eight principle patterns

© Commonwealth of Australia, 2025 HumanAbility

  - six pathogenic influences
  - pattern differentiation and aetiology
  - seven emotions
- how the traditional oriental medicine framework is used and adapted in different modalities:
  - Shiatsu
  - qu gong
  - corrective exercises
  - gua sha
  - dietetics
  - moxa bustion
  - cupping
  - acupressure
- how the traditional oriental medicine framework is used at different stages of the treatment process
- philosophical tradition of western and eastern body therapies:
  - rationalistic, analytical approach to an understanding of disease
  - vitalistic, empirical approach to health
  - key features of qualitative, quantitative, cultural and traditional lines of evidence used in traditional oriental medicine
  - nature of the dynamic interchange between the physical, mental, social, environmental and spiritual landscape

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated clinical environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - client information, case history, treatment plan
  - futon
  - linen
- modelling of industry operating conditions, including provision of services to the general public
- clinic supervision by a person who meets the assessor requirements outlined below

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must:

- have at least 5 years current clinical experience working as a Shiatsu therapist providing services to the general public

© Commonwealth of Australia, 2025 HumanAbility

- hold practising membership of an Australian professional body that represents Shiatsu therapists
- fulfil the continuing professional development requirements of the professional body to which they belong

HLTSHU002 Develop Shiatsu practice

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to establish the foundations of Shiatsu practice, evaluate what makes a sustainable practice and then to develop an approach to own practice. It also includes the ability to communicate key information about Shiatsu to others.

This unit applies to Shiatsu therapists.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Establish foundations of Shiatsu practice	1.1 Identify, access and interpret information on the central philosophies of Shiatsu 1.2 Evaluate the Shiatsu system of treatment and its application to current health issues 1.3 Compare and contrast Shiatsu, other complementary health modalities and broader health practice

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
2. Represent the Shiatsu framework	2.1 Determine information needs of different individuals and groups 2.2 Identify key messages that represent the philosophy and practice of Shiatsu therapy 2.3 Communicate information about Shiatsu therapy at level of depth appropriate to audience needs
3. Determine requirements for sustainable Shiatsu practice	3.1 Identify key issues that affect the development and sustainability of professional practice 3.2 Identify economic, environmental, human and social considerations, and their impact on professional practice 3.3 Access, interpret and collate current information that supports professional practice
4. Develop approach to own practice	4.1 Reflect on professional goals and aspirations 4.2 Identify and assess professional opportunities in Shiatsu 4.3 Reflect on opportunities and constraints of individual personal circumstances 4.4 Make decisions about practice direction, based on reflection and research 4.5 Develop practical strategies that address own practice goals

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTSHU002 Develop Shiatsu practice

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- used critical thinking skills to:
  - review and reflect on information from a range of sources about Shiatsu practice
  - evaluate and articulate requirements for sustainable Shiatsu practice
- communicated key messages about Shiatsu therapy to meet the information needs of at least 3 different individuals or groups
- developed goals for own practice that reflect the values and philosophies of Shiatsu

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- philosophies and principles of Shiatsu:
  - historical development of Shiatsu
  - central philosophies:
    - meridians and meridian therapy
    - yin and yang
    - ki, kyo and jitsu
    - hara

© Commonwealth of Australia, 2025 HumanAbility

        - importance of personal health strategy
    - philosophical tradition of western and eastern body therapies:
        - rationalistic, analytical approach to an understanding of disease
        - vitalistic, empirical approach to health
        - key features of qualitative, quantitative, cultural and traditional lines of evidence used in Shiatsu
        - nature of the dynamic interchange between the physical, mental, social, environmental and spiritual landscape
    - Shiatsu system of treatment and effects of Shiatsu application to the body surface
    - different styles of Shiatsu treatments and their key features and purpose:
        - stretching, posture and exercise techniques
        - elbows, feet, knees, ball of thumb, hand pressure techniques for whole body treatment
        - meridian stretching techniques
        - hara diagnosis, tonification/dispersion
        - lifestyle and dietary advice
        - relaxation and breathing techniques

Assessment Requirements for HLTSHU004 Perform Shiatsu therapy health assessments

Modification History

Release	Comments
Release 2	This version was released in *HLT Health Training Package release 3.0.* Update to mapping and metadata. Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTSHU504/HLTSHU510/HLTSHU511. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Minimum clinic hours added. Additional assessor requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 200 hours of client consultation work
- prepared for and managed at least 60 Shiatsu health assessments - clients must include males and females from different stages of life with varied presentations
- used the Shiatsu framework to assess therapeutic needs of clients, including:
  - hara palpation
  - observation
  - sensory information gathering techniques
  - use differential diagnostic techniques
- interacted effectively with clients:
  - clearly articulated information about services, treatment options and rationale
  - engaged clients in decision making

© Commonwealth of Australia, 2025 HumanAbility

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations (national and state/territory) for client assessment and treatment planning:
  - codes of conduct
  - duty of care
  - informed consent
  - mandatory reporting
  - practitioner/client boundaries
  - privacy, confidentiality and disclosure
  - records management
  - work role boundaries:
    - working within scope of practice
    - presenting symptoms that require referral to a medical practitioner
  - work health and safety
- referral options for practitioners:
  - professional health services including complementary health modalities
  - community resources and support services
  - types and availability of further medical testing
- factors and barriers that may impact on assessment, including:
  - physical
  - psychological
  - cultural
- factors that affect individual health status, including:
  - constitution
  - lifestyle
  - diet
  - personal and medical history
  - values and attitudes
  - balance of rest and activity
  - physical environment
  - social environment
- factors for consideration for different genders and ages
- client information required for assessment and the scope and depth of information needed around:
  - client objectives and expectations
  - client history and its components
  - client current state of health

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated clinical environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - health assessment, client consultation forms
  - private consultation area
  - futon
  - linen
- modelling of industry operating conditions, including provision of services to the general public
- clinic supervision by a person who meets the assessor requirements outlined below for at least 120 of the 200 hours of client consultation work

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must:

- have at least 3 years current clinical experience working as a Shiatsu therapist providing services to the general public
- hold practising membership of an Australian professional body that represents Shiatsu therapists
- fulfil the continuing professional development requirements of the professional body to which they belong

Assessment Conditions

Skills must have been demonstrated in the workplace or in a clinical environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - health assessment, client consultation forms
  - futon
  - linen
- modelling of industry operating conditions, including provision of services to the general public
- clinic supervision by a person who meets the assessor requirements outlined below for at least 120 of the 200 hours of client consultation work

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must:

- have at least 3 years current clinical experience working as a Shiatsu therapist providing services to the general public
- hold practising membership of an Australian professional body that represents Shiatsu therapists
- fulfil the continuing professional development requirements of the professional body to which they belong

HLTSHU006 Provide Shiatsu therapy treatments

Modification History

Release	Comments
Release 2	This version was released in *HLT Health Training Package release 3.0.* Update to mapping and metadata. Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Supersedes HLTSHU507C. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Minimum clinic hours added. Additional assessor requirements.

Application

This unit describes the skills and knowledge required to prepare for and provide therapeutic Shiatsu treatments based on the outcomes of an existing health assessment and treatment plan.

This unit applies to Shiatsu therapists.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare client for treatment	1.1 Interpret treatment plans and clearly outline how the treatment will be provided and managed 1.2 Explain factors which may interfere with the effectiveness of the treatment

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.3 Inform and advise client about possible physical or emotional reactions during and following a session
	1.4 Follow established protocols to physically prepare the client for treatment
	1.5 Confirm client consent for treatment
2. Build fundamental Shiatsu principles into treatment	2.1 Ensure sensitivity to ki palpation
	2.2 Explore and recognise connection to hara
	2.3 Explore and develop energetic relationship between therapist and client
	2.4 Maintain client-focused attention throughout the treatment session
3. Use Shiatsu techniques	3.1 Regulate the circulation of ki
	3.2 Apply manual perpendicular pressure directed from the hara to the body
	3.3 Use appropriate levels of pressure
	3.4 Maintain therapist postures that ensure a controlled distribution of body weight
4. Follow Shiatsu sequences	4.1 Determine treatment sequence, location and degree of pressure according to assessment indications
	4.2 Select and adhere to specific Shiatsu sequences according to the Shiatsu style being used
5. Work with client during treatment	5.1 Use the condition and response of the client as a continual feedback to the initial assessment
	5.2 Incorporate contact with all major body regions within a reasonable time frame
	5.3 Position client to optimise their comfort and support while allowing for optimum application of techniques

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	5.4 Recognise reactions to treatment and respond promptly according to clients needs
6. Provide advice and resources to the client	6.1 Educate client in relevant and practical techniques that support the treatment plan
	6.2 Answer client queries with clarity, using language the client understands
	6.3 Use honesty and integrity when explaining treatment plans, schedules and recommendations to the client
	6.4 Promote client independence and responsibility in treatment
	6.5 Discuss and agree on evaluation strategies
	6.6 Accurately document treatment provided and details of client communications

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTSHU006 Provide Shiatsu therapy treatments

Modification History

Release	Comments
Release 2	This version was released in *HLT Health Training Package release 3.0.* Update to mapping and metadata. Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Supersedes HLTSHU507C. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Minimum clinic hours added. Additional assessor requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 200 hours of Shiatsu client consultation work
- prepared for and managed at least 60 Shiatsu treatment sessions - clients must include males and females from different stages of life with varied presentations
- used each of the following sequences during client consultation sessions according to client needs:
  - back sequence
  - upper back and arm sequence
  - side sequence
  - head and neck sequence
  - leg sequence in supine
  - back diagnosis zones for treatment
  - back shu/front mu diagnosis areas for treatment
  - abdominal palpation
  - face sequence

© Commonwealth of Australia, 2025 HumanAbility

  - feet sequence
  - hip sequence
  - chest sequence
  - arm sequences
  - leg sequence
  - a range of different styles including namikoshi, ohashi zen and barefoot Shiatsu sequences and specific techniques
  - hara palpation and diagnosis
  - tonification and dispersion methods
- used the following pressure and tsubo techniques during client consultation sessions according to client needs:
  - perpendicular pressure
  - non perpendicular pressure
  - moving and stationary pressure
  - sustained/continuous and intermittent/moving pressure
  - deep and superficial pressure
  - strong and gentle pressure
  - use of elbows, feet, knees, ball of thumb and hand pressure techniques
- used the following stretching and opening techniques during client consultation sessions according to client needs:
  - stretching exercises
  - stretching across and along the fibres
  - stretching to open channels/meridians, points and joints
- used the following manual techniques during client consultation sessions according to client needs:
  - percussion
  - pinching
  - rolling
  - rubbing
  - vibrating
  - qi projection on and above the body surface
  - muscular contraction and resistance
  - mobilisations of joints
  - use of mother hand
  - palpation of ki along meridians and tsubos
  - tonification and dispersing techniques
- provided other advice to support optimum health
  - lifestyle
  - dietary
  - yoga

© Commonwealth of Australia, 2025 HumanAbility

- relaxation
- meditation

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations (national and state/territory) for client assessment:
  - codes of conduct
  - duty of care
  - informed consent
  - mandatory reporting
  - practitioner/client boundaries
  - privacy, confidentiality and disclosure
  - records management
  - working role boundaries:
    - working within scope of practice
    - presenting symptoms that require referral to a medical practitioner
  - work health and safety
- principles of Shiatsu that are integrated in all treatments
- different Shiatsu styles and sequences, and their indications for use
- Shiatsu treatment techniques, how to apply them, what each technique does, what effects it might have, and what the contraindications are, for the following:
  - Shiatsu sequences
  - Shiatsu pressure and tsubo techniques
  - stretching and opening techniques
- potential reactions during treatment and how to respond:
  - discomfort
  - emotional reactions
  - feedback - verbal, tactile, visual
  - muscular spasms
  - body temperature discomfort
  - deep relaxation
- potential reactions following treatment and appropriate client advice
- types of advice and resources that can be provided to clients for their use outside the clinical environment
