Qualification Description

This qualification reflects the role of Aboriginal and/or Torres Strait Islander people working at the entry level of primary health care for Aboriginal and/or Torres Strait Islander clients. Certificate III may be regarded by many jurisdictions as the minimum level for Aboriginal and/or Torres Strait Islander health work. In some jurisdictions, however, individuals may start at Certificate II level and, when ready, progress to Certificate III. The qualification structure for Certificate III supports both these options. This qualification is suited to Australian Apprenticeship pathways.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

HLT43015 Certificate IV in Allied Health Assistance

Modification History

Release	Comments
Release 2	Units of competency updated (see mapping at www.cshisc.com.au). Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLT31512/HLT42512. Change in packaging rules. Significant changes to core. Entry requirements removed. Minimum work requirement of 120 hours.

Qualification Description

This qualification reflects the role of workers who provide therapeutic and program related support to allied health professionals. The worker is required to conduct therapeutic and program related activities under the guidance of an allied health professional. Supervision may be direct, indirect or remote and must occur within organisation requirements. The worker is required to identify client circumstances that need additional input from the allied health professional. The worker may be engaged to work in a specialty area or work generically across the organisation in delivery of allied health assistance services. The worker, in conjunction with the allied health professional, may have responsibility for supervising other allied health assistance workers.

To achieve this qualification, the candidate must have completed at least 120 hours of work as detailed in the Assessment Requirements of the units of competency.

No licensing, legislative, regulatory or certification requirements apply to this qualification at the time of publication.

Packaging Rules

Total number of units = 16

- 7 core units
- 9 elective units, consisting of:

© Commonwealth of Australia, 2025 HumanAbility

- at least 6 units from the electives listed below, at least 2 of these units must be coded HLTAHA
- up to 3 units from any endorsed Training Package or accredited course – these units must be relevant to the work outcome

Any combination of electives that meets the rules above can be selected for the award of the *Certificate IV in Allied Health Assistance*. Where appropriate, electives may be packaged to provide a qualification with a specialisation.

Packaging for each specialisation:

- All Group A electives must be selected for award of the *Certificate IV in Allied Health Assistance (Physiotherapy)*

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Change to packaging rules. Significant changes to core units.

Qualification Description

This qualification reflects the role of medical practice assistants whose work includes a broad range of administrative functions combined with tasks to support medical practitioners in the delivery of care to clients. These tasks are completed under the direct or indirect supervision of a medical practitioner.

A medical practice assistant may work under the supervision of a health care professional other than a medical practitioner, but this should only occur where:

- the health care professional is in the same practice as the medical practitioner and
- the medical practitioner has agreed to the other health care professional providing the supervision

A registered nurse must accept or refuse responsibility for supervision of an activity of a medical practice assistant, according to the Nursing and Midwifery Board of Australia (NMBA) *Decision-making framework*. An enrolled nurse cannot provide supervision.

No licensing, legislative, regulatory or certification requirements apply to this qualification at the time of publication.

HLT54115 Diploma of Nursing

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Supersedes HLT51612. Change to packaging rules. Significant change to core units.

Qualification Description

This qualification reflects the role of an enrolled nurse working under supervision of a registered nurse. This qualification covers the application of skills and knowledge required to provide nursing care for people across the health sector. A lifespan approach should underpin this qualification with relevant competencies that relate to the different stages of life identified within the units.

To be eligible to apply for registration as an enrolled nurse and to practice in Australia, you must complete a Diploma of Nursing program accredited by the Australian Nursing and Midwifery Accreditation Council (ANMAC) and approved as 'an approved program of study' by the Nursing and Midwifery Board of Australia (NMBA) in accordance with the Enrolled Nurse Accreditation Standards. Visit https://www.ahpra.gov.au/Accreditation/Approved-Programs-of-Study.aspx?ref=Nurse&Type=General&div=Enrolled%20Nurse%20%28Division%202%29 to confirm your chosen Registered Training Organisation (RTO) holds the necessary accreditation.

Note that the scope of practice for enrolled nurses is determined by state and territory legislative requirements and the policies and procedures of the employing organisation. Users of this qualification must refer to those instruments in the development of training and assessment strategies.

^ From 1 July 2022 the elective units HLTAID003, HLTAID006 must no longer be delivered and will be replaced in the Packaging Rules by the units HLTAID011, HLTAID014 - *for more information see: https://asqa.gov.au/news-events/news/reminder-about-superseded-hlt-first-aid-units*

- managed, in line with ARC guidelines, the unconscious, non-breathing adult, including:
  - performing at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
  - following the prompts of an automated external defibrillator (AED) to deliver at least one shock
  - demonstrating a rotation of single rescuer operators with minimal interruptions to compressions
  - responding appropriately in the event of regurgitation or vomiting
  - handing over to emergency services
  - providing an accurate verbal report of the incident
  - reviewing the incident
- managed, in line with ARC guidelines, the unconscious, non-breathing infant, including:
  - performing at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- guidelines and procedures including:
  - relevant ARC guidelines to managing the unconscious breathing and non-breathing casualty and provision of CPR
  - potential incident hazards and risk minimisation processes when providing first aid

    - infection control procedures, including use of standard precautions and resuscitation barrier devices
    - requirements for currency of skill and knowledge
    - first aid codes of practice
    - appropriate workplace or site procedures relevant to the provision of first aid
- legal, workplace and community considerations, including:
    - duty of care requirements
    - own skills and limitations
    - consent and how it relates to the conscious and unconscious casualty
    - privacy and confidentiality requirements
    - awareness of potential need for stress management techniques and available support for rescuers
- considerations when providing CPR, including:
    - upper airway and effect of positional change
    - appropriate duration and cessation of CPR
    - appropriate use of an AED
    - safety and maintenance procedures for an AED
    - chain of survival
    - how to access emergency services
- techniques for providing CPR to adults, children and infants including:
    - how to recognise that a casualty is unconscious and not breathing normally
    - rate, ratio and depth of compressions and ventilations
    - correct hand positioning for compressions
    - basic anatomy, physiology and the differences between adults, children and infants relating to CPR.

Assessment Conditions

Each candidate to demonstrate skills in an environment that provides realistic in-depth, scenarios and simulations to assess candidates' skills and knowledge.

Due to the nature of this type of training, it is acceptable for the performance evidence to be collected in a simulated environment.

Compression and ventilation skills must be demonstrated on resuscitation manikins following ARC guidelines for the purpose of assessment of CPR procedures.

Assessment must ensure access to:

- adult and infant resuscitation manikins following ARC guidelines for the purpose of assessment of CPR procedures
- AED training devices
- personal protective equipment (PPE).

Simulated assessment environments must simulate real-life situations where these skills and knowledge would be performed, with all the relevant equipment and resources of that workplace or community environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors and must hold this unit or demonstrate equivalent skills and knowledge to that contained within this unit.

HLTAID012 Provide First Aid in an education and care setting

Modification History

Not applicable.

Application

This unit describes the skills and knowledge required to provide a first aid response to infants, children and adults in line with first aid guidelines determined by the Australian Resuscitation Council (ARC) and other Australian national peak clinical bodies.

This unit applies to a range of workers within an education and care setting who are required to respond to a first aid emergency, including asthma and anaphylactic emergencies. This includes early childhood workers and educators who work with school age children in outside school hours care and vacation programs.

This unit of competency may contribute towards approved first aid, asthma and anaphylaxis training under the Education and Care Services National Law, and the Education and Care Services National Regulations (2011).

Specific licensing/regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities

HLTAID013 Provide First Aid in remote or isolated site

Modification History

Not applicable.

Application

This unit describes the skills and knowledge required to provide a first aid response to a casualty in a remote or isolated site over an extended period of time until medical assistance is provided, or evacuation occurs.

This unit applies to any site where medical assistance is likely to be delayed.

First aid is to be provided in line with guidelines determined by the Australian Resuscitation Council (ARC) and other Australian national peak clinical bodies.

Specific licensing/regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare equipment for first aid response in remote or isolated site.	1.1. Evaluate information about remote or isolated site and identify potential injuries and illnesses requiring extended management. 1.2. Select first aid equipment and resources to manage a range of potential incidents, according to organisational emergency response and first aid procedures. 1.3. Select communication equipment to facilitate emergency response in remote or isolated site. 1.4. Complete pre-departure safety and serviceability checks on equipment.
2. Assess the situation.	2.1. Recognise and assess an emergency situation. 2.2. Ensure safety for self, bystanders and casualty. 2.3. Assess casualty to determine extent of first aid response. 2.4. Identify need for medical assistance and relay initial and

	concise information. 2.5. Triage when multiple casualties are involved.
3. Apply appropriate first aid procedures.	3.1. Perform single-rescuer or two-rescuer cardiopulmonary resuscitation (CPR) in accordance with the ARC guidelines and availability of rescuers. 3.2. Provide first aid in accordance with established first aid principles. 3.3. Display respectful behaviour towards casualty. 3.4. Obtain consent from casualty where possible. 3.5. Use available resources and equipment to make the casualty as comfortable as possible. 3.6. Operate first aid equipment according to manufacturers' instructions. 3.7. Monitor the casualty's condition and respond in accordance with first aid principles. 3.8. Assess need to evacuate casualty, ability to transport to medical assistance or need for external assistance. 3.9. Administer medication as required according to medical instructions.
4. Communicate details of the incident.	4.1. Accurately convey incident details to emergency services. 4.2. Report details of incident in line with appropriate workplace or site procedures. 4.3. Complete applicable workplace or site documentation, including incident report form. 4.4. Maintain privacy and confidentiality of records and information in line with applicable statutory or organisational policies.
5. Coordinate evacuation and first aid activities until assistance arrives.	5.1. Determine need, in consultation with external services, to evacuate casualty. 5.2. Provide accurate information about location of incident, number of casualties, their condition and their position to enable deployment of appropriate resources. 5.3. Continue to provide treatment using available resources until help arrives. 5.4. Prepare site for evacuation of patient. 5.5. On approach, assist emergency services to locate the site of the incident. 5.6. Follow instructions and provide assistance to emergency services personnel during evacuation.
6. Review the incident.	6.1. Recognise the possible psychological impacts on self and other rescuers and seek help when required. 6.2. Contribute to a review of the first aid response as required.

Assessment Requirements for HLTAID013 Provide First Aid in remote or isolated site

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the workplace or community setting.

There must be evidence that the candidate has completed the following tasks in line with State/Territory regulations, first aid codes of practice, first aid guidelines determined by the Australian Resuscitation Council (ARC) guidelines and workplace or site procedures:

- managed, in line with ARC guidelines, the unconscious, breathing casualty including appropriate positioning to reduce the risk of airway compromise
- managed, in line with ARC guidelines, the unconscious, non-breathing adult including:
  - performing at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
  - performing at least 2 minutes of ventilation and at least 2 minutes of compressions during a two-rescuer procedure on an adult resuscitation manikin placed on the floor
  - following the prompts of an automated external defibrillator (AED) to deliver at least one shock
  - responding appropriately in the event of regurgitation or vomiting
  - demonstrating a rotation of operators with minimal interruptions to compressions
- managed, in line with ARC guidelines, the unconscious, non-breathing infant, including:
  - performing at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
- managed casualties, with the following:
  - anaphylaxis
  - asthma
  - non-life-threatening bleeding
  - choking
  - minor wound cleaning and dressing
  - nosebleed
  - shock
  - envenomation, using pressure immobilisation
  - fractures, dislocations, sprains and strains, using appropriate immobilisation techniques for remote situations and appropriate equipment improvisations

  - head, neck and spinal injuries
  - hypothermia and hyperthermia
  - life threatening bleeding requiring use of tourniquets and haemostatic dressings
- responded to at least one simulated first aid incident contextualised to the candidate's workplace or community setting, where the candidate has no knowledge of the casualty's condition prior to starting treatment, including:
  - identifying the casualty's illness or injury through history, signs and symptoms
  - using personal protective equipment (PPE) as required
  - conducting a secondary survey assessment
  - assessing vital signs respirations, pulse, temperature
  - level of consciousness
  - providing appropriate first aid treatment
  - conveying incident details to emergency services or advising casualty on any required post incident action
  - providing an accurate verbal and written report of the incident
  - reviewing the incident
- conducted a basic triage for a multiple casualty incident.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- guidelines and procedures including:
  - ARC guidelines relevant to the provision of first aid
  - first aid guidelines from Australian national peak clinical bodies including those relevant to remote or isolated sites
  - potential incident hazards and risk minimisation processes when providing first aid
  - infection control procedures, including use of standard precautions and resuscitation barrier devices
  - requirements for currency of skill and knowledge
  - first aid codes of practice
  - appropriate workplace or site procedures relevant to the provision of first aid
  - contents of first aid kits
- legal, workplace and community considerations including:
  - duty of care requirements
  - own skills and limitations
  - consent and how it relates to the conscious and unconscious casualty
  - privacy and confidentiality requirements
  - awareness of potential need for stress management techniques and available support for rescuers
- in relation to the administration of medication

  - legal requirements
  - the five rights
  - the responsibilities of the first aider
- considerations when providing CPR, including:
  - upper airway and effect of positional change
  - appropriate duration and cessation of CPR
  - appropriate use of an AED
  - safety and maintenance procedures for an AED
  - chain of survival
  - how to access emergency services
- techniques for providing CPR to adults, children and infants including:
  - how to recognise that a casualty is unconscious and not breathing normally
  - rate, ratio and depth of compressions and ventilations
  - correct hand positioning for compressions
  - basic anatomy, physiology and the differences between adults, children and infants relating to CPR
- signs, symptoms and management of the following conditions or injuries:
  - allergic reaction
  - anaphylaxis
  - asthma
  - non-life-threatening bleeding
  - burns
  - cardiac conditions, including chest pain
  - choking
  - diabetes
  - drowning
  - envenomation - all current treatments
  - eye injuries
  - fractures, dislocations, sprains and strains
  - head, neck and spinal injuries
  - hypothermia

- considerations when providing first aid including:
  - assessment, interpretation and documentation of vital signs, including normal clinical values for respirations, temperature, pulse and level of consciousness
  - how to conduct a secondary assessment of a casualty
  - basic triage processes
  - ongoing care requirements of casualty beyond initial treatment
- remote considerations in the provision of first aid, including:
  - the nature of remote or isolated sites and how this may impact on first aid management
  - key features, functions and limitations of different types of emergency communication equipment used in remote or isolated sites, and factors that affect choice:
    - radio equipment
    - mobile phones
    - satellite phones
    - alerting and tracking devices including personal locator beacons (PLBs)
  - management options relating to transporting casualty, including aero-medical evacuation
  - specific considerations contextualised to alpine, desert, marine, rural or remote settings and tropical environments
  - methods used to assist emergency services to locate incident sites and the key features, functions and limitations of resources used to assist:
    - verbal directions
    - flags
    - flares or smoke
    - fires
  - use of man-made and natural resources to supplement first aid equipment
  - content of remote area first aid kits
  - content of remote area medication boxes
- psychological impacts of first aid incidents on rescuers and how to seek help.

Assessment Conditions

Each candidate to demonstrate skills in an environment that provides realistic in-depth, scenarios and simulations to assess candidates' skills and knowledge.

Scenarios must concentrate on the significance of remote or isolated site circumstances.

Due to the nature of this type of training, it is acceptable for the performance evidence to be collected in a simulated environment.

Compression and ventilation skills must be demonstrated on resuscitation manikins following ARC guidelines for the purpose of assessment of CPR procedures.

Assessment must ensure access to:

- adult and infant resuscitation manikin following ARC guidelines for the purpose of assessment of CPR procedures
- adrenaline auto-injector training device
- AED training devices
- placebo bronchodilator and spacer device
- haemostatic dressings
- haemostatic wound packing trainer
- thermometers
- tourniquets
- tourniquet trainer
- different types of wound dressings and bandages
- blankets and items to manage a casualty for shock
- personal protective equipment (PPE)
- workplace injury, trauma or illness record, or other appropriate workplace or site incident report form, which includes space for recording vital signs of casualties
- remote first aid kits
- immobilisation devices.

Simulated assessment environments must simulate real-life situations where these skills and knowledge would be performed, with all the relevant equipment and resources of that workplace or community environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors and must hold this unit or demonstrate equivalent skills and knowledge to that contained within this unit.

HLTAID014 Provide Advanced First Aid

Modification History

Not applicable.

Application

This unit describes the skills and knowledge required to provide an advanced first aid response to a casualty in line with first aid guidelines determined by the Australian Resuscitation Council (ARC) and other Australian national peak clinical bodies.

The unit applies to all persons who may be required to provide an advanced first aid response in a range of situations, including community and workplace settings.

Specific licensing/regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1.Respond to an emergency situation.	1.1. Recognise and assess an emergency situation. 1.2. Ensure safety for self, bystanders and casualty. 1.3. Assess the casualty and recognise the need for first aid response. 1.4. Deploy resources to appropriate locations as required in line with appropriate workplace or site procedures. 1.5. Seek assistance from emergency services.
2. Apply appropriate first aid procedures.	2.1. Perform single-rescuer or two-rescuer cardiopulmonary resuscitation (CPR) in accordance with the ARC guidelines and availability of rescuers. 2.2. Provide first aid in accordance with established first aid principles. 2.3. Display respectful behaviour towards casualty. 2.4. Obtain consent from casualty where possible. 2.5. Use available resources and equipment to make the casualty as comfortable as possible. 2.6. Operate first aid and ancillary equipment according to manufacturers' instructions.

	2.7. Monitor the casualty's condition and respond in accordance with first aid principles.
3. Coordinate first aid activities until arrival of medical assistance.	3.1. Identify available resources required and establish communication links with appropriate personnel, emergency services or medical assistance as appropriate. 3.2. Deploy required resources to appropriate locations in an efficient and effective manner to ensure timely treatment of casualties. 3.3. Monitor the condition of casualties in accordance with first aid principles and workplace or site procedures. 3.4. Coordinate evacuation of casualties according to relevant evacuation procedures.
4. Communicate details of the incident.	4.1. Accurately convey incident details to emergency services. 4.2. Report details of incident in line with appropriate workplace or site procedures. 4.3. Complete applicable workplace or site documentation, including incident report form. 4.4. Maintain privacy and confidentiality of information in line with statutory or organisational policies.
5. Review the incident.	5.1. Recognise the possible psychological impacts on self and other rescuers and seek help when required. 5.2. Arrange support services for personnel involved in the incident in accordance with relevant procedures. 5.3. Contribute to a review of the first aid response as required.

  - performing at least 2 minutes of bag-valve-mask (with oxygen) ventilation and at least 2 minutes of compression during a two-rescuer procedure on an adult resuscitation manikin placed on the floor
  - selecting and inserting an appropriate basic airway adjunct
  - responding appropriately using positioning and suctioning in the event of regurgitation or vomiting
  - demonstrating a rotation of operators with minimal interruptions to compressions
  - following the prompts of an Automated External Defibrillator (AED) to deliver at least one shock
  - managing oxygen equipment appropriately
  - handing over to emergency services
- managed, in line with ARC guidelines, the unconscious, non-breathing infant, including:
  - performing at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
- managed a casualty with life-threatening bleeding requiring use of tourniquets and haemostatic dressings
- used personal protective equipment (PPE) as required
- managed a conscious casualty who requires supplemental oxygen, including:
  - assessing vital signs respirations, pulse, oxygen saturation
  - level of consciousness

Modification History

Not applicable.

Application

This unit describes the skills and knowledge required to establish, maintain and facilitate the provision of appropriate first aid in the workplace.

The unit applies to workers in nominated occupational first aid or management roles.

Specific licensing/regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.

Elements and Performance Criteria

ELEMENTS	**PERFORMANCE CRITERIA**
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Determine workplace first aid requirements.	1.1. Identify workplace hazards and assess associated risks as a basis for determining first aid resource requirements. 1.2. Identify first aid equipment, resources and personnel required to address workplace requirements. 1.3. Develop first aid action plans in consultation with relevant parties. 1.4. Provide information to minimise risk and enable access to first aid facilities.
2. Establish and maintain workplace first aid facilities.	2.1. Monitor and maintain availability of first aid equipment and personnel to support workplace first aid response. 2.2. Conduct inspections of first aid stock and equipment to ensure currency and operational readiness in line with workplace requirements. 2.3. Ensure equipment is recovered and reprocessed and that waste is disposed of safely according to legislative and workplace procedures. 2.4. Ensure equipment and resources are stored and maintained in line with relevant legislation and manufacturers' or suppliers' instructions. 2.5. Deploy appropriate equipment and personnel to ensure

	timely and effective first aid response in line with workplace requirements.
3. Maintain workplace first aid records.	3.1. Ensure documentation is completed in line with legislation and workplace procedures. 3.2. Maintain first aid records in line with legislative requirements and workplace security practices. 3.3. Send relevant documents to appropriate bodies in line with workplace and legislative requirements. 3.4. Maintain privacy and confidentiality of records and information in line with privacy legislation and organisational policies.
4. Review the provision of first aid in the workplace.	4.1. Participate in incident debriefing or evaluation to improve future operations and address individual needs. 4.2. Evaluate management of workplace first aid incidents in relation to required equipment, personnel, current organisational procedures and individual first aid action plans. 4.3. Contribute to the review of workplace policies and procedures in accordance with risk assessment and evaluation of first aid provision.

Assessment Requirements for HLTAID016 Manage first aid services and resources

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role.

There must be evidence that the candidate has completed the following tasks in line with State or Territory regulations, first aid codes of practice, Australian Resuscitation Council (ARC) guidelines and workplace procedures:

- conducted a workplace risk assessment and evaluation of first aid provisions
- developed a first aid action plan including strategies for management of incidents and individuals needs in accordance with workplace policies and procedures
- used a first aid checklist to service a workplace first aid kit for supplies' replacement and equipment maintenance
- maintained first aid equipment and resources according to manufacturers' instructions
- used and maintained documentation required by the workplace and regulatory authorities.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- state/territory regulations, first aid codes of practice and workplace procedures including:
  - workplace requirements for first aid provision in line with the relevant state/territory Work Health and Safety requirements
  - duty of care in relation to first aid provision
  - safe work practices to deal with risks and potential hazards including manual handling, hazardous substances, dangerous goods and chemicals
  - infection control principles and procedures, including use of standard precautions based on incident
  - requirements for currency of skill and knowledge
- legal, workplace or community issues relating to the provision of first aid including:
  - awareness of potential need for stress-management techniques and available support following an emergency situation
  - consent
  - capabilities of emergency management services
  - privacy and confidentiality requirements

© Commonwealth of Australia, 2025 HumanAbility

- importance of debriefing.

Assessment Conditions

Skills must be demonstrated in an environment that provides realistic in-depth, scenarios and simulations to assess candidates' skills and knowledge.

Assessment must ensure access to:

- first aid kit and contents checklist
- workplace injury, trauma and/or illness record, or other applicable workplace or site incident report form
- relevant State or Territory Work Health and Safety First Aid Code of Practice.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment, including workplace resources required by the relevant state/territory Work Health and Safety Regulatory Authority.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

HLTINFCOV001 Comply with infection prevention and control policies and procedures

Modification History

Not applicable.

Application

This unit describes the skills and knowledge required to follow organisational infection prevention and control procedures, including implementing standard and transmission-based precautions and responding to infection risks.

This unit applies to individuals working in health and direct client care contexts.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
1. Follow standard and additional precautions for infection prevention and control	1.1 Follow hand hygiene practices in accordance with organisations policies and procedures
	1.2 Implement hand care procedures and cover cuts and abrasions
	1.3 Follow organisation procedures for choice and use of personal protection equipment
	1.4 Follow procedures for respiratory hygiene and cough etiquette
	1.5 Follow procedures for environmental cleaning
	1.6 Follow procedures for handling, transporting and processing of linen in a manner that controls the spread of infection
	1.7 Follow procedures for disposal of contaminated waste
	1.8 Follow procedures for handling and cleaning client equipment that prevents skin and mucous membrane

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
	exposures, contamination of clothing, and transfer of pathogens
	1.9 Identify and respond to situations where additional precautions may be required to prevent transmission of infection
2. Identify infection hazards and assess risks	2.1 Identify infection hazards associated with own role and work environment
	2.2 Identify own areas of responsibility in relation to infection prevention and control
	2.3 Assess risk by determining the likelihood and severity of harm from identified hazards.
	2.4 Document and report activities and tasks that put self, clients, visitors and/or other workers at risk
	2.5 Identify appropriate control measures to minimise risk in accordance with organisations procedures
3. Follow procedures for managing risks associated with specific hazards	3.1 Follow protocols for care after exposure to blood or other body fluids as required
	3.2 Place appropriate signs when and where appropriate
	3.3 Remove spills in accordance with the policies and procedures of the organisation
	3.4 Minimise contamination of materials, equipment and instruments by aerosols and splatter
	3.5 Identify, separate and maintain clean and contaminated zones
	3.6 Confine records, materials and medicaments to a well-designated clean zone
	3.7 Confine contaminated instruments and equipment to a well-designated contaminated zone

Assessment Requirements for HLTINFCOV001 Comply with infection prevention and control policies and procedures

Modification History

Not applicable.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed established organisation infection prevention and control procedures on at least 3 separate occasions
- followed established organisation infection prevention and control procedures at least once for each of the following:
  - hand hygiene and care of hand
  - use of personal protective equipment
  - handling of waste
  - enforcing clean and contaminated zones
  - limitation of contamination
  - surface cleaning

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- established guidelines for the prevention and control of infection, including those for:
  - personal and hand hygiene:
    - how to hand wash
    - how to hand rub
    - pre-surgical hand preparation
    - clinical moments when hand hygiene should be performed with soap and water rather than alcohol-based hand rub
    - non-clinical moments for hand hygiene hand care, including guidelines on maintaining intact skin, fingernails and jewellery/watches
  - use and scope of personal protective equipment guidelines for:
    - glove use
    - wearing gowns and waterproof aprons
    - wearing masks

© Commonwealth of Australia, 2025 HumanAbility

        - wearing protective glasses
    - surface cleaning:
        - cleaning procedures and their specified times
        - routine surface cleaning
    - managing a blood or body fluid spill
    - sharps handling and disposal techniques
    - reprocessing procedures for equipment
- types of additional precautions and their relevance to particular areas of work or client groups
- types of hazards in the work environment and associated risks and control measures
- chain of infection:
    - source of infectious agent
    - mode of transmission
    - susceptible host
- basis of infection, including:
    - bacteria and bacterial spores
    - difference between harmless microorganisms and pathogens
    - difference between colonisation, infection and disease
    - fungi
    - viruses
- key modes of disease transmission – contact, airborne and droplet:
    - paths of transmission including direct contact, aerosols and penetrating injuries
    - risk of acquisition
    - sources of infecting microorganisms including persons who are carriers, in the incubation phase of the disease or those who are acutely ill
- factors that increase the susceptibility to infection:
    - immune status
    - wounds or devices
    - medications and comorbidities
    - age

Assessment Conditions

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations have not been provided in the workplace or may occur only rarely.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
    - organisational infection prevention and control guidelines
    - personal protective equipment
    - hand hygiene facilities and equipment

© Commonwealth of Australia, 2025 HumanAbility

  - medical or client care equipment relevant to the workplace
  - clinical and other waste and waste disposal equipment
  - areas for cleaning
  - equipment for cleaning, including sterilised sharps if relevant to role
- modelling of industry operating conditions, including integration of problem solving activities to which the candidate responds

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify project processes and outcomes	1.1. Scope of report and target audience is identified in contract, program guidelines, agency procedures, and group committee decisions. 1.2. Background to project is researched from available records. 1.3. Information is collated from project records, monitoring records, and information provided by group and other stakeholders.
2. Prepare report	2.1. Framework of report is prepared to required scope, target audience and guidelines. 2.2. Project report is prepared from researched information to contract, agency and group requirements. 2.3. Conclusions are prepared in consultation with informed personnel. 2.4. Draft report is circulated to identify stakeholders for comment according to group requirements and agency procedures.
3. Revise report for distribution	3.1. Draft report is revised to address comments from consultation. 3.2. Any unresolved issues are submitted to group committee for decisions. 3.3. Approval is obtained for revised report in accordance with contract, group and agency requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE This section describes the skills and knowledge required for this unit.
Required skills
• research through records and oral reports • collate qualitative and quantitative information • develop report framework to suit requirements • implement consultation processes to obtain information and obtain consensus on report • use word processing and spreadsheet packages • use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks • use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views • use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data • use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.
Required knowledge
• program objectives and guidelines • group procedures and recording, including group management and committee procedures • monitoring approaches • project background, processes and outcomes • agency procedures • knowledge of capability of word processing packages.

ELEMENT	PERFORMANCE CRITERIA
1. Check application and personal protective equipment	1.1. Carry out pre-operational checks of application equipment in accordance with manufacturer's specification and OHS requirements. 1.2. Prepare application equipment for use in accordance with manufacturer's specification and directions. 1.3. Identify and replace any damaged or worn components. 1.4. Check personal protective equipment in accordance with manufacturer's specification and OHS requirements.
2. Prepare application equipment	2.1. Apply label information regarding precautions for the chemical mix/substance being used. 2.2. Select and use appropriate personal protective and mixing equipment in accordance with MSDSs and chemical label. 2.3. Measure, mix and load chemical mix or substances in accordance with directions on chemical label. 2.4. Follow legislative and regulatory requirements regarding chemical use including OHS. 2.5. Confirm instructions from chemical MSDSs in the event of a spill. 2.6. Check that output of application equipment is correct and in accordance with application/spray plan.

ELEMENT	PERFORMANCE CRITERIA
3. Apply chemicals	3.1. Assess and record meteorological conditions and forecasts prior to and during application. 3.2. Select and use appropriate personal protective equipment in accordance with MSDSs and chemical label. 3.3. Apply chemical in accordance with the application/spray plan and/or instructions. 3.4. Assess and minimise risks to others, product integrity and the environment prior to and during application.
4. Finalise work	4.1. Clean and store Personal Protective Equipment (PPE) and application equipment in accordance with manufacturer's specification and OHS requirements. 4.2. Dispose of excess chemicals and use triple rinse drums in accordance with label and MSDSs requirements. 4.3. Complete incident reports as required in accordance with legislative and/or regulatory requirements. 4.4. Complete application records. 4.5. Store unused chemical/products in accordance with label requirements and MSDSs. 4.6. Adhere to all re-entry and withholding periods.
5. Transport and handle chemical	5.1. Confirm precautions for the transport and handling of chemicals. 5.2. Transport and handle chemicals in accordance with legislative and/or regulatory requirements.

ELEMENT	**PERFORMANCE CRITERIA**
1. Determine the need for chemical use	1.1. Nature and level of the pest, weed infestation or disease is identified. 1.2. Need for control is assessed. 1.3. The requirement for chemical use as an option within an integrated pest management strategy is assessed. 1.4. Hazard and risk analysis of different chemical options is undertaken. 1.5. Requirement for chemical application is identified and confirmed.
2. Prepare application/spray plan	2.1. Mixing rates for chemical is defined and calculated. 2.2. Application equipment type and set up requirements are determined for intended application. 2.3. The quantity of mix required is determined. 2.4. Meteorological conditions and forecasts prior to and during application are accessed. 2.5. An application/spray plan is completed. 2.6. Notify neighbours as required in accordance with industry practice or regulatory requirements

3. Prepare chemical mixes	3.1. Requirements from chemical labels and Material Safety Data Sheets (MSDSs) are interpreted and applied. 3.2. Appropriate first aid supplies are at hand. 3.3. Appropriate personal protective and mixing equipment is selected and used in accordance with MSDSs and chemical label. 3.4. A suitable location for mixing and loading is selected. 3.5. Chemicals are prepared in accordance with registered use. 3.6. MSDSs are followed in the event of a spill.
4. Calibrate application equipment	4.1. Pre-operational checks of application equipment are carried out. 4.2. Equipment is calibrated in accordance with manufacturer specifications and application/spray plan. 4.3. Calibration is checked for conformity to the requirements of the application/spray plan. 4.4. Chemical is loaded wearing appropriate Personal Protective Equipment (PPE) and controlling risks to human health and the environment.
5. Apply chemicals	5.1. Appropriate personnel protective equipment is selected and used in accordance with MSDSs and chemical label. 5.2. Chemical is applied in accordance with the application/spray plan and/or instructions and legislative and/or regulatory requirements. 5.3. Risks to others, product integrity and the environment are assessed and minimised.
6. Clean up equipment and complete records	6.1. Excess chemical is disposed of in accordance with label and MSDSs requirements. 6.2. Application equipment is cleaned and decontaminated. 6.3. Requirements for the disposal of unused chemical, containers spilled materials are determined and implemented 6.4. PPE and mixing equipment is cleaned and stored. 6.5. Incidents are reported as required in accordance with legislative and/or regulatory requirements. 6.6. All records, e.g. calibration, application, DG/hazard

Unit Descriptor

Unit descriptor	This unit covers the process of carrying out routine maintenance activities for drainage systems and defines the standard required to: carry out cleaning and maintenance of drainage systems; inspect and maintain simple drainage system components; monitor and control weeds and silt build up; inspect components for wear and record and report damage, blockages and leakages.

Application of the Unit

Application of the unit	This unit applies to workers in all industry sectors maintaining drainage systems usually working under supervision in a support role as directed.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Inspect drainage systems	1.1. Occupational Health and Safety (OHS) hazards are identified and safety concerns reported to the supervisor. 1.2. Personal Protective Equipment (PPE) is used and maintained according to procedures. 1.3. Drainage system is visually inspected for blockages, leaks and operating faults.
2. Maintain system components	2.1. Components are inspected for wear or blockage. 2.2. Mechanical equipment is serviced as directed. 2.3. Simple components are replaced as directed.
3. Remove silt and weed growth	3.1. Silt is cleaned from channels, drains, sumps and crossings. 3.2. Weed growth is removed as directed. 3.3. Drainage system is flushed. 3.4. Unobstructed water flow is observed through channels and from outlets.
4. Record and report maintenance activities	4.1. Blockage or leakage is recorded by type and location of the section of the system affected. 4.2. Damaged or faulty equipment is recorded and reported. 4.3. All routine maintenance activities are recorded and reported. 4.4. Drainage system is checked regularly according to directions.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE This section describes the skills and knowledge required for this unit.
Required skills
• identify hazards • follow safe work practices relating to drainage system maintenance • read and follow operational procedures for drainage system maintenance • record and report maintenance observations and activities • use hand or powered equipment • use a range of weed control methods • use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor • use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.
Required knowledge
• basic types of drainage systems • drainage system cleaning procedures • OHS procedures relating to drainage system maintenance • manual, mechanical and chemical weed control methods • equipment used to clean and maintain drainage systems • legislation regarding the use of chemicals near waterways • disposal procedures for chemical containers and residues, oils/grease and used parts • environmental impacts of drainage system maintenance.

EVIDENCE GUIDE	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following: • carry out cleaning and maintenance of drainage systems • inspect and maintain simple drainage system components • monitor and control weeds and silt build up • inspect components for wear • record and report damage, blockages and leakages.
Context of and specific resources for assessment	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole.	
Drainage systems may include:	• drainage pipes and channels • surface drains, culverts, mole drains, sand slit, sub surface traps, reed beds • pumps for recycling • baffles.
Operation systems may include:	• manual operation with monitoring • fully automated with computer control and monitoring.

Unit Descriptor

Unit descriptor	This unit covers the process of undertaking operational maintenance of machinery and defines the standard required to: select and prepare tools and equipment; carry out lubrication and basic servicing; conduct basic diagnostic tests; report simple faults or report and tag more serious faults; collect, remove and recycle or dispose of wastes; maintain records of machinery maintenance.

Application of the Unit

Application of the unit	This unit applies to workers in the agriculture, horticulture and land management sectors who use non-specialist skills to perform basic servicing and repairs on a range of machinery according to scheduled maintenance programs. The operational maintenance of machinery will usually follow set routines, methods and procedures.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Prepare for maintenance	1.1. Maintenance plans are accessed and understood prior to undertaking maintenance work. 1.2. Tools and supplies are selected appropriate to job requirements and confirmed against maintenance plan. 1.3. Tools are inspected for serviceability and prepared for use according to manufacturer's specifications and enterprise requirements. 1.4. Occupational Health and Safety (OHS) hazards are identified and safety concerns reported to the supervisor.
2. Perform scheduled maintenance	2.1. OHS hazards are identified and safety concerns reported to the supervisor. 2.2. Greasing, lubrication and other basic servicing of machinery are carried out according to manufacturer's specifications and enterprise requirements. 2.3. Equipment is adjusted according to manufacturer's specifications and enterprise requirements. 2.4. Basic diagnostic techniques are applied and

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare machinery and equipment for use	1.1. Machine and equipment is selected appropriate to job requirements and confirmed against a work plan. 1.2. Routine pre-operational checks of machinery and equipment are carried out to manufacturer's specifications and enterprise requirements. 1.3. Equipment is securely attached and calibrated for operation to manufacturer's specifications. 1.4. Faulty machinery and equipment is identified, safety tagged, and reported to supervisor according to enterprise requirements. 1.5. Occupational Health and Safety (OHS) hazards are identified, risks assessed and risk controls are implemented.
2. Operate machinery and equipment	2.1. Machinery and equipment is operated in a safe and controlled manner, and monitored for performance and efficiency. 2.2. Risk to self, others and the environment are recognised and minimised according to enterprise and OHS requirements. 2.3. Personal Protective Equipment (PPE) is selected, used and maintained according to procedures. 2.4. Environmental implications associated with machinery operation are identified, assessed and taken into account.

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- identify hazards and implement safe operating procedures
- complete pre-operational checks
- recognise and report defects
- operate machinery and equipment to industry standards
- demonstrate safe and environmentally responsible workplace practices
- read and interpret manufacturer's specifications, work and maintenance plans, and Material Safety Data Sheets (MSDSs)
- interpret and apply instructions, communicate with work team and supervisor, record and report equipment faults, workplace hazards, and accidents
- measure and calculate volumes, consumption and servicing requirements
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

Required knowledge

- manufacturers specifications for servicing of machinery and equipment
- operating principles and operating methods for machinery and equipment
- principles of weight distribution with regard to load shifting and machinery movement
- procedures for cleaning, securing and storing machinery, equipment and materials
- potential risks and hazards associated with the operation of machinery and

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for propagation activities	1.1. Workplace information is interpreted and tasks organised to achieve daily work routine within time constraints. 1.2. Tools, equipment and machinery are selected according to propagation method and enterprise work procedures. 1.3. Growing environment is prepared to suit species and propagation method. 1.4. Hygiene practices are implemented according to enterprise guidelines. 1.5. Occupational Health and Safety (OHS) hazards are identified, risks assessed, controls implemented and reported to the supervisor.
2. Select propagation material	2.1. Parent plant is identified and selected according to health, vigour and desired characteristics. 2.2. Propagation material is selected and collected according to the propagation method, and species. 2.3. Conditioning and storage requirements are selected to ensure maximum viability of propagating material.
3. Prepare propagating media	3.1. Media components are selected according to manufacturer directions, enterprise guidelines, propagation method and plant needs. 3.2. Propagation media is tested to ensure the product complies with media specifications.

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	3.3. Media and components are handled according to OHS requirements. 3.4. Storage requirements for the unused propagation media are selected.
4. Propagate plants	4.1. Propagation material is prepared according to the propagation method and species. 4.2. Propagation techniques are performed according to plant species and documented guidelines. 4.3. Plants are handled in a way that minimises damage. 4.4. Aftercare is applied to suit the media conditions, plant requirements and propagation techniques employed.
5. Complete propagation operations	5.1. Ensure work site is cleaned according to hygiene requirements. 5.2. Waste is collected and disposed of or recycled to minimise damage to the external environment in accordance with enterprise guidelines. 5.3. Records are completed accurately and at the required time according to documented guidelines.

- minimise environmental disturbance
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

Required knowledge

- principles of pruning
- effects of pruning on plant growth and habit
- plant health principles (e.g. CODIT) relevant to pruning
- AS 4373 Pruning of amenity trees
- plant names and growth habits
- basic botany and physiology
- correct and safe use and care of tools and equipment
- understanding of work procedures
- the effect of outdoor climatic conditions on pruning programs and tool selection
- awareness of potential public nature of pruning work
- use of hygienic practices.

EVIDENCE GUIDE	
Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following: • confirm the pruning method • prepare tools and equipment • prune shrubs and trees to AS 4373-2007 Pruning of amenity trees, as required.
Context of and specific resources for assessment	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole.	
Small trees may include:	• trees less than three metres in height.
Pruning may include:	• modifying the shape, form, vigour, correction or control of growth • prevention of disease or damage • promotion of health • modifying the canopy and fruit and flower production • providing ornamental effects or aesthetic appeal • providing clearance for services, access or cultural practices.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to treat weeds	1.1. Weeds which impact on commercial crops, gardens and turf, and natural areas are recognised by common name. 1.2. Details of the weed occurrence are recorded and reported to the supervisor. 1.3. Treatment methods are selected in consultation with the supervisor. 1.4. Equipment is selected and prepared for use according to enterprise guidelines and manufacturers specifications. 1.5. Occupational Health and Safety (OHS) hazards are identified and safety concerns reported to the supervisor.
2. Treat weeds	2.1. Personal Protective Equipment (PPE) is used and maintained according to procedures. 2.2. Treatments are prepared according to supervisor's instructions and manufacturer's guidelines. 2.3. Treatments are applied in such a way that non-target damage is minimised. 2.4. Treatments are applied according to OHS and environmental regulatory requirements.
3. Carry out post treatment operation	3.1. Equipment is shut down and cleaned with full consideration of environmental impacts and OHS requirements. 3.2. Treatment waste is disposed of causing minimal environmental damage.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- identify hazards and implement safe work practices
- read and interpret chemical labels, Material Safety Data Sheets (MSDSs), manufacturer's specifications for setting up equipment
- use and maintain PPE
- prepare to treat weeds
- apply weed treatments
- carry out post treatment operations
- maintain spray records
- recognise caution or hazard signs and symbols
- interpret tasks or information from labels, manuals or written instructions
- record information accurately or verbally report information
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

Required knowledge

- recognition of common weeds for a particular enterprise/situation
- weed growth characteristics
- different types of control measures, treatments and their principles
- modes of action of different chemicals
- equipment capability and limitations
- legislation relation to the use of chemicals for weed control
- OHS responsibilities of employers and employees
- OHS legislative requirements and associated hazardous substances regulations and Codes of Practice
- correct wearing/fit of personal protective equipment
- environmental considerations when using chemicals for weed control.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assess weed infestation	1.1. Identify the scope and size of the weed infestation that adversely impacts on the landscape. 1.2. Identify weeds and record details of the weeds and beneficial organisms. 1.3. Identify tolerable levels of infestation according to client, market, environmental and IPM requirements. 1.4. Determine if plant health or growth requirements are compromised by level of infestation. 1.5. Seek professional advice if required in the assessment of the weed infestation.
2. Plan control measures	2.1. Determine suitable control options according to Integrated Pest Management principles and industry practice. 2.2. Identify the hazards, assess and control risks to others and the environment. 2.3. Identify appropriate tools, equipment and machinery for the planned control measure. 2.4. Select appropriate Personal Protective Equipment (PPE) in accordance with Occupational Health and Safety (OHS) requirements. 2.5. Prepare a control plan for the control measure/strategy.
3. Implement control	3.1. Implement control measures in accordance with IPM

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- identify a range of weeds and beneficial organisms
- identify threshold level of weeds for treatment
- conduct a site hazard identification and risk control assessment
- prepare a control plan
- use appropriate cultural, biological or chemical controls
- minimise damage to non-target species
- complete records of control treatments
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

Required knowledge

- economic, aesthetic and environmental threshold for a range of weeds
- IPM principles and strategies
- lifecycle and biology of weeds
- hazard identification and risk assessment methodologies

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assess pests and disease infestation	1.1. Scope and size of the infestation is assessed. 1.2. Plants pests, diseases and disorders and beneficial organisms are identified and reported or recorded in field notes. 1.3. Levels of pest infestations tolerated by the client, market or environment are identified from the IPM strategy.
2. Plan the implementation of control measures	2.1. Control measures suitable for the infestation are selected from IPM strategy. 2.2. Tools, equipment and machinery are selected for each work activity according to enterprise work procedures. 2.3. Occupational Health and Safety (OHS) hazards are identified, risks assessed and risk controls are implemented. 2.4. Personal Protective Equipment (PPE) is selected, used and maintained according to procedures. 2.5. Control measures selected need to be in full consideration of OHS and environmental implications.
3. Implement control measures	3.1. Enterprise work team, contractors and IPM product suppliers are coordinated in a sequential, timely and effective manner in consultation with the supervisor. 3.2. Control measures are implemented according to the

AHCTRF303A Implement a grassed area maintenance program

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit of competency covers the process of implementing a grassed area maintenance program and defines the standard required to: determine the maintenance requirements for a turfed area; conduct a risk assessment for work in a turfed area; safely adjust and use turf maintenance machinery and equipment; write a report on the maintenance program activities.

Application of the Unit

Application of the unit	This unit applies to the maintenance and repair of turfed surfaces. This unit involves working under limited supervision, with checking only related to overall progress. It requires the application of horticultural knowledge and a broad range of grassed area maintenance skills. The work is usually done within routines, methods and procedures where some discretion and judgement is required in the selection of equipment, work organisation, services, actions and achieving outcomes within time constraints.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Prepare for grassed area maintenance work	1.1. Requirements of the maintenance program are clarified with supervisor and enterprise guidelines. 1.2. Equipment and material resource requirements are identified according to the scope of the co-ordination work and supervisor's instructions. 1.3. The priorities for maintenance activities and time allocation is identified, documented and presented to the supervisor for verification. 1.4. The environmental implications of the proposed maintenance work are identified, and the likely outcomes assessed and reported to the supervisor. 1.5. Occupational Health and Safety (OHS) hazards are identified, risks assessed and reported to the supervisor. 1.6. Personal Protective Equipment (PPE) is selected, used, maintained and stored according to the type of work site activities to be undertaken.
2. Maintain and repair grassed areas	2.1. Grassed areas are maintained and repaired as authorised by the supervisor and according to enterprise guidelines and work place priorities.

ELEMENT	PERFORMANCE CRITERIA
	2.2. Materials to assist in maintenance works are purchased, stored and/or used as required. 2.3. Delivery of materials to site is organised according to workplace priorities. 2.4. Machinery and equipment is organised to be on site in good order when they are required. 2.5. Grassed areas requiring specialist attention and work are identified and organised.
3. Coordinate and report on grassed area maintenance activities	3.1. Resources are coordinated and timed to suit the maintenance activities and priority of work. 3.2. Machinery operators are informed of appropriate use and their responsibilities in respect to operational maintenance requirements of machinery and equipment. 3.3. Personnel, activities, timelines and materials usage are monitored and documented according to enterprise guidelines. 3.4. Contingency situations are recognised and reported to the supervisor, and corrective actions taken according to enterprise guidelines. 3.5. A simple report is written to inform management of maintenance activities undertaken and completed.

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- choose equipment and resources required for tasks
- operate equipment according to manufacturer or organisational requirements
- report faults according to organisational requirements
- maintain equipment and records according to instructions.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the functions of available business equipment
- list the key points in operating the available business equipment safely and correctly
- identify common equipment faults
- describe how to maintain and store equipment and resources.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the general administration field of work and include access to:

- operational and maintenance manuals
- organisational procedures related to operation and maintenance of equipment
- records relating to resources
- case studies and, where possible, real situations.

Assessment Requirements for BSBATSIM416 Oversee organisational planning

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop and document plans consistent with community needs, cultural requirements and organisational directions
- identify and access information relevant to planning activity
- identify and document risk management and sustainability strategies.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain board processes for decision-making
- explain concept of community control of organisations and how it may impact organisational planning
- describe cultural context in which Aboriginal and Torres Strait Islander boards operate, including their role in upholding traditional and cultural values and how that could impact organisational planning
- identify geographic, social, economic and political contexts in which particular organisations operate and how these may impact organisational planning
- outline methods for community consultation and engagement
- list methods for setting vision, goals and objectives
- explain organisation review processes
- identify potential funding sources to support organisational goals and objectives
- describe principles of risk management relevant to organisational planning
- list relevant provisions of federal, state or territory legislation and funding body requirements that influence decision-making and may impact organisational planning
- describe relevant organisational planning concepts

© Commonwealth of Australia, 2025 HumanAbility

- outline relevant principles of sustainability
- identify relevant protocols and cultural responsibilities with respect to planning
- explain roles and responsibilities of the board and management in organisational planning.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the regulation, licensing and risk – ATSI governance field of work and include access to:

- an actual or simulated board
- organisational plans.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBAUD402 Participate in a quality audit

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to prepare for and participate in a quality audit as a member of a quality audit team. The types of audits may include external or internal systems audits or process or product/service audits.

The process includes reviewing designated documentation; identifying and developing checklists and audit related documentation; preparing audit schedules; gathering, analysing and evaluating information; and reporting findings to the lead auditor.

It applies to individuals with a broad knowledge of the quality auditing environment who analyse and evaluate information from a variety of sources to provide solutions to auditing issues, including unpredictable quality auditing problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for BSBINN601 Lead and manage organisational change

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- analyse and interpret information about the organisation's internal and external environment and consult with stakeholders to identify requirements and opportunities for changes that support organisational objectives
- prioritise opportunities for changes with input from managers
- develop a change management project plan for the priority changes incorporating resource requirements, risk management and timelines
- develop strategies to communicate or educate the changes and embed them
- obtain approvals and agree reporting protocols with relevant managers and implement the plan including addressing barriers to change
- review and evaluate the change management project plan and modify as needed to achieve objectives.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the change management process or cycle and strategies for communicating and embedding change
- explain how organisational behaviour and the external environment can impact on change strategies
- describe the components of a change management project plan
- list potential barriers to change and explain possible strategies to address barriers.

© Commonwealth of Australia, 2025 HumanAbility

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the creativity and innovation and include access to:

- workplace documentation and resources
- office equipment, materials and software packages
- case studies or, where available, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

Application

This unit describes the skills and knowledge required to start up and use a range of basic functions on a personal computer or business computer terminal.

It applies to individuals who perform a range of routine computer tasks in the various sectors of the business services industry and generally work under direct supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Information and Communications Technology – IT Use

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Start computer, system information and features	1.1 Adjust workspace, furniture and equipment to suit user ergonomic requirements 1.2 Ensure work meets organisational and work health and safety (WHS) requirements for computer operation 1.3 Start computer or log on according to user procedures 1.4 Identify basic functions and features using system information 1.5 Customise desktop configuration, if necessary, with assistance from appropriate persons

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	1.6 Use help functions as required
2 Navigate and manipulate desktop environment	2.1 Open, close and access features by selecting correct desktop icons 2.2 Open, resize and close desktop windows by using correct window functions 2.3 Create shortcuts onto the desktop, if necessary, with assistance from appropriate persons
3 Organise files using basic directory and folder structures	3.1 Create folders/subfolders with suitable names 3.2 Save files with suitable names in appropriate folders 3.3 Rename and move folders/subfolders and files as required 3.4 Identify folder/subfolder and file attributes 3.5 Move folders/subfolders and files using cut and paste, and drag and drop techniques 3.6 Save folders/subfolders and files to appropriate media where necessary 3.7 Search for folders/subfolders and files using appropriate software tools 3.8 Restore deleted folder/subfolders and files as necessary
4 Print information	4.1 Print information from installed printer 4.2 View progress of print jobs and delete as required 4.3 Change default printer, if installed
5 Shut down computer	5.1 Close all open applications 5.2 Shut down computer according to user procedures

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.3, 1.5, 1.6, 3.1-3.8, 4.1-4.3, 5.1, 5.2	• Recognises textual information within internal procedures and technical documents to determine and complete work requirements

© Commonwealth of Australia, 2025 HumanAbility

Writing	1.3, 3.1-3.3, 3.7	• Inputs information using familiar text types and records numerical and textual information for file naming conventions
Oral Communication	1.5, 2.3	• Asks simple questions and comprehends answers that contain short and explicit information
Navigate the world of work	1.1-1.3, 5.2	• Recognises and follows organisational procedures and legislative responsibilities, with particular reference to health and safety
Interact with others	1.5, 2.3	• Uses appropriate communication practices to seek guidance from more experienced work colleagues
Get the work done	1.3-1.6, 2.1-2.3, 3.1-3.8, 4.1-4.3, 5.1, 5.2	• With guidance, is beginning to understand and use the specific functions and features of digital systems and tools

Performance Evidence

Evidence of the ability to:

- adjust equipment, furniture and workspace to suit individual ergonomic requirements
- follow organisational and WHS requirements when operating a computer
- follow user procedures and system information when using the basic functions on a computer, seeking assistance when necessary
- use desktop icons and create shortcuts
- create and manipulate folders and subfolders
- check and delete print jobs and change default printer
- correctly shut down software applications and the computer.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the main work health and safety requirements for working with a computer
- list the main points to consider when setting up an ergonomic work environment
- list the main components of the computer system, and briefly explain what each one does
- briefly explain the functions of the operating system
- outline the organisation’s conventions for naming files

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the information and communications technology – IT use field of work and include access to:

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Create a simple database	1.1 Design a simple database, with at least two tables, using a database application, basic design principles, software functions and simple formulae 1.2 Develop a table with fields and attributes according to database usage, as well as data considerations and user requirements 1.3 Create a primary key for each table 1.4 Modify table layout and field attributes as required

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	1.5 Create a relationship between the two tables 1.6 Check and amend data entered, in accordance with organisational and task requirements
2. Create reports and queries	2.1 Determine information output, database tables to be used and report layout to meet task requirements 2.2 Determine data groupings, search and sort criteria to meet task requirements 2.3 Run reports and queries to check results and formulae provide the required data 2.4 Modify reports to include or exclude additional requirements
3. Use database	3.1 Ensure data input meets designated timelines and organisational requirements for speed and accuracy 3.2 Use manuals, user documentation and online help to overcome problems with database design and production 3.3 Preview, adjust and print database reports or forms in accordance with organisational and task requirements 3.4 Name and store databases, in accordance with organisational requirements, and exit application without data loss or damage 3.5 Prepare and distribute reports to appropriate person in a suitable format

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.6, 2.1-2.4, 3.1-3.5	• Recognises and interprets textual and numerical information to determine and confirm tasks are completed as per requirements
Writing	1.1-1.6, 2.1-2.4, 3.1-3.4	• Inputs numerical and key reporting information when creating and querying databases, and uses standard naming conventions and format to organise data
Numeracy	1.1, 1.2, 1.6, 2.1-2.4	• Uses mathematical equations to create simple database queries and formulae

© Commonwealth of Australia, 2025 HumanAbility

Navigate the world of work	1.2, 1.4, 1.6, 2.1-2.3, 3.1, 3.3, 3.4	• Recognises and follows explicit and implicit protocols and meets expectations associated with own role
Get the work done	1.1-1.6, 2.1-2.4, 3.1-3.5	• Plans, organises and competes tasks to meet organisational requirements • Utilises a broad range of features within applications in performing routine and complex tasks

BSBLED806 Plan and implement a coaching strategy

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to plan and develop a coaching strategy and to monitor implementation of the coaching program within an organisational context. A coaching strategy may be:

- an internal program forming part of the professional development activities of an educational organisation (such as a Registered Training Organisation) or an enterprise whose core business is not education
- developed for an external client, for example as part of the range of learning services offered or conducted in a collaborative partnership with more than one organisation.

It applies to individuals working to ensure learning advances individual and organisational capabilities. Leaders in learning are typically required to develop and implement coaching strategies in a systematic manner, and to monitor, review and improve strategies to optimise learning outcomes for individuals and the organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

BSBMED401 Manage patient recordkeeping system

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to manage a patient recordkeeping system within a medical environment and to supervise others. It covers clarifying roles and responsibilities, managing the operation of a patient recordkeeping system, and reviewing and improving the system. The unit does not cover the design of a new system but does cover reviews and improvements to an existing system.

It applies to individuals managing an existing recordkeeping system (and sub-systems within the overall system) in a medical context. It may involve supervising the work of other personnel who implement the system and maintain patient records day-to-day. It also involves working with users of the system such as the health practitioners in the enterprise.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Assessment Requirements for BSBMED401 Manage patient recordkeeping system

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- manage a patient recordkeeping system and supervise its use
- document how records have been accessed and archived by staff or self in accordance with organisational and legislative requirements
- provide activities to others that support correct use of a patient record system.

Note: if a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline relevant legislation, regulations, standards and codes of practice for maintaining records in a medical environment
- explain enterprise policies and procedures related to:
  - patient recordkeeping including archiving and records transfer
  - privacy and confidentiality
  - access to records
- describe filing systems and record management processes
- explain how medical coding is used to help access and maintain patient records.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the medical services administration field of work and include access to:

- office equipment and resources

Application

This unit describes the skills and knowledge required to manage the performance of staff who report to them directly. Development of key result areas and key performance indicators and standards, coupled with regular and timely coaching and feedback, provide the basis for performance management.

It applies to individuals who manage people. It covers work allocation and the methods to review performance, reward excellence and provide feedback where there is a need for improvement.

The unit makes the link between performance management and performance development, and reinforces both functions as a key requirement for effective managers.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

BSBMKG608 Develop organisational marketing objectives

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to conduct a strategic analysis to develop organisational marketing objectives. This involves reviewing the organisation's internal and external environments, evaluating past and current marketing performance, and exploring and evaluating new marketing opportunities.

It applies to senior marketing professionals who are responsible for providing strategic direction to the marketing function of an organisation. Their responsibilities include analysing information on internal and external business and marketing environment; examining current marketing performance; identifying new marketing opportunities arising from emerging trends; and devising strategies to achieve overall business objectives.

Individuals operating at this level generally conduct these activities using information gathered by people working under their direct and indirect supervision at lower levels of the organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- review the status of records against set criteria
- prepare and distribute new appraisal reports
- document new implementation process and outcomes
- document the implications of changes to the disposal status of records in the organisation's recordkeeping systems.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the general principles and processes of records management and records management systems, such as:
  - systems of control
  - records continuum theory
  - mandate and ownership of business process
- define issues that relate to a review of records
- explain the organisational policies, strategies and procedures that relate to records access and security.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the knowledge management – recordkeeping field of work and include access to:

© Commonwealth of Australia, 2025 HumanAbility

- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

Skills must have been demonstrated in an ageing support workplace with the addition of simulations and scenarios where the full range of contexts and situations have not been provided in the workplace. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe, impractical or threatens the dignity of the person. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
    - individualised plans and any relevant equipment outlined in the plan
    - personal protective equipment
    - relevant organisation policies and procedures

Overall, assessment must involve workplace interactions with people in their home, colleagues, families/carers and working with the person's individualised plan.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.
