	2.7 Encourage client self- determination by using opportunities which assist clients to identify issues, set personal goals and make informed choices to enhance the safety of the client and their family
	2.8 Encourage clients to recognise decisions and changes needed to assist them to achieve their goals
	2.9 Acknowledge progress and encourage and support

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	self-management of issues
3. Identify future directions	3.1 Identify and document future services and support required by the client and plan their delivery in consultation with client, their family and other appropriate people
	3.2 Jointly identify client information needs and agree and implement actions to satisfy these as appropriate
	3.3 Provide opportunities for client and their family to obtain information and develop skills
	3.4 Use questioning and reflection to assist the client to make positive choices and changes as necessary
	3.5 Maintain records of participation and progress according to organisation standards and procedures
4. Evaluate own communication	4.1 Reflect on and evaluate own communication with clients
	4.2 Recognise the effect of own values and beliefs on communication with clients
	4.3 Identify and respond to the need for development of own skills and knowledge

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for CHCDFV006 Counsel clients affected by domestic and family violence

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Significant changes to knowledge evidence. Supersedes CHCDFV505C

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- counselled and collaboratively developed and documented support plans with at least 3 clients affected by domestic and family violence, using the following interpersonal communication and counselling techniques:
  - attending behaviours – active listening
  - reflection of content, summarising
  - questioning skills – open, closed, simple and compound questions
  - client observation skills
  - noting and reflecting skills
  - providing client feedback
- completed a structured process of self-reflection and evaluation of own communication used during the 3 interactions.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

© Commonwealth of Australia, 2025 HumanAbility

- legal and ethical considerations (national and state/territory) for workers interacting with clients affected by domestic and family violence, and how these are applied in organisations and individual practice:
  - codes of conduct
  - discrimination
  - duty of care
  - human rights
  - mandatory reporting
  - privacy, confidentiality and disclosure and its limitations in domestic and family violence work
  - records management
  - rights and responsibilities of:
    - workers and employers
    - individuals, families, the community and society to minimise or prevent domestic violence
  - work role boundaries – responsibilities and limitations
  - work health and safety
- domestic violence and its context, including:
  - social, historical, political and economic context of domestic violence, including types and nature of domestic violence, power and gender issues, child abuse and associated criminal issues
  - prevalence of myths, unhelpful beliefs, attitudes and practices in the broader society regarding domestic violence and their effects on individuals' rights to safety and autonomy
- domestic violence indicators and procedures for undertaking assessment of needs of client and client's family
- counselling techniques that will explore client issues and encourage client's self determination to enhance client and client's family's safety
- respectful strategies that will assist in client self-determination which enhances client and their family's safety
- organisation procedures, practices and standards for:
  - client assessment
  - allocation of services
  - case management
  - interviewing
  - use of resources
  - programmed intervention
  - referral
- groups represented within the local community (e.g. cultural, religious, language, sexual identity, age and disability) and an understanding of the issues that arise when working with those groups
- referral sources and associated protocols

© Commonwealth of Australia, 2025 HumanAbility

- self-evaluation practices, including:
  - how to recognise own biases
  - impact of own values on the counselling relationship.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - client information
  - organisation policies and procedures
- modelling of industry operating conditions, including:
  - scenarios that involve complex interactions and problem solving with other people.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

CHCDFV007 Work with users of violence to effect change

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Significant changes to knowledge evidence. Supersedes CHCDFV509D

Application

This unit describes the skills and knowledge required to work with and engage users of violence to assist them to take responsibility for their violence, and to work towards changing their behaviour and enhancing the safety of their family.

This unit applies to individuals whose job role involves working with clients on personal and psychological issues associated with domestic and family violence within established policies, procedures and guidelines.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Establish and maintain professional relationship	1.1 Review existing case information as the basis for work 1.2 Use interpersonal skills to develop an open, trusting

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	and professional relationship and to allow accurate and relevant exchange of information
	1.3 Establish and maintain contact with partner and/or family of users of violence to identify and analyse their needs
	1.4 Explain and promote client and worker rights and responsibilities throughout client contact
	1.5 Mutually agree and adhere to appropriate structures, timeframes and protocols
	1.6 Comply with organisation standards and procedures and with legislative and statutory requirements
2. Assess capacity for change	2.1 Assess motivation and commitment of users of violence to change attitudes, beliefs and behaviour and encourage positive elements and aspects
	2.2 Respectfully challenge and constructively address violent behaviour and attitudes condoning violence in an environment that promotes positive client participation
	2.3 Identify and assess related issues and factors that impact directly on the user of violence, their partner and family members
	2.4 Identify own limitations and strengths in addressing and assessing needs, and respond to them within a supervision framework
3. Encourage personal responsibility	3.1 Challenge users of violence and encourage them to identify their violence and its known and potential effect upon partner and family members
	3.2 Encourage users of violence to take responsibility for their actions, to recognise their choices to develop skills and/or knowledge and to develop non-violent and respectful relationships
	3.3 Assist users of violence to use personal exploration to identify and address opportunities and obstacles to change their attitudes, beliefs and behaviour
	3.4 Assist users of violence to establish realistic goals and strategies to enhance the safety of their partner and family members
	3.5 Identify and negotiate the need for specialised services or referral with users of violence and relevant people

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	3.6 Show respect and sensitivity to cultural and family issues and to any individual differences
4. Monitor and review progress	4.1 Monitor progress of the user of violence through self-reflection, partner and family member feedback and critical assessment by the worker and if appropriate, the criminal justice system
	4.2 Identify and challenge lack of progress in taking responsibility and any re-use of violence, and develop modified strategies
	4.3 Encourage users of violence to establish and maintain networks of support to assist in the development of responsible behaviour
	4.4 Identify and allocate additional services and/or support needed according to availability and organisation standards and procedures
	4.5 Complete and maintain documentation according to organisation standards and procedures and legislative and statutory requirements

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

CHCDIS003 Support community participation and social inclusion

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant change to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Significant changes to knowledge evidence.

Application

This unit describes the skills and knowledge required to assist with supporting people with disability in community participation and social inclusion using a person-centred approach. This involves enabling people to make choices to maximise their participation in various community settings, functions and activities to enhance psychosocial well-being and lifestyle in accordance with the person's needs and preferences.

This unit applies to workers in varied disability services contexts. Work performed requires some discretion and judgement and may be carried out under regular direct or indirect supervision.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian / New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify opportunities for community participation and social inclusion	1.1 Assist in identifying interests, abilities, preferences and requirements of the person with disability to engage with a social network 1.2 Provide information on community participation

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	options, networks and services to meet the needs, wants and preferences of the person with disability
	1. 3 Identify and access appropriate community participation resources, programs, agencies, transport services, aids and equipment according to the person's preferences and needs
	1.4 Recognise and accommodate the cultural and religious needs of the person with disability
2. Implement strategies for community participation and inclusion according to the individualised plan	2.1 Assist the person to identify and access community options that will meet needs identified in their individualised plan
	2.2 Support the person to access opportunities to establish connections through shared interests
	2.3 Seek feedback from the person with disability, family and/or carers and/or relevant others and/or colleagues and/or supervisor to ensure that the support continues to meet the current and changing needs and preferences of the person
	2.4 Ensure strategies for community participation and social inclusion are regularly reviewed with the person and supervisor to enable positive outcomes
	2.5 Monitor level of engagement in consultation with supervisor
3. Identify, address and monitor barriers to community participation and social inclusion	3.1 Recognise physical, skill and other barriers to community participation and social inclusion
	3.2 Collaborate with the person with disability to identify solutions to overcome barriers, in consultation with supervisor
	3.3 Support the person to implement strategies to address barriers to community participation according to their individualised plan
	3.4 Monitor the success of strategies to address barriers in consultation with the person and supervisor
	3.5 Recognise own limitations in addressing issues and

Assessment Requirements for CHCDIS003 Support community participation and social inclusion

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant change to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Significant changes to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- supported at least 1 person with disability, by working with them to identify skills and interests and find matching options within the broader community

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- rights and responsibilities of people with disability
- principles of:
  - strengths-based practice
  - person-centred practice
  - community inclusion and best practice examples
- strategies for strengthening options, networks and services for people with disability
- local agencies and services, and resources to obtain community information about sporting, cultural and specific-interest groups
- active citizenship and what this means for people with a disability
- role of carers and/or families and/or relevant others

© Commonwealth of Australia, 2025 HumanAbility

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources:
  - individualised plans and any relevant equipment outlined in the plan
  - access to details of appropriate and local resources, programs, agencies, transport services, aids and equipment

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

CHCDIS006 Develop and promote positive person-centred behaviour supports

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant change to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Significant changes to knowledge evidence.

Application

This unit describes the skills and knowledge required to identify behaviours of concern and to develop and promote positive behaviour supports as part of an individualised behaviour support plan for a person with disability, using a person-centred approach.

This unit applies to workers in varied disability services contexts. Work performed requires a range of well developed, person-centred skills where some discretion and judgement is required and workers will take responsibility for their own outputs.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcome	*Performance criteria describe the performance needed to demonstrate achievement of the element*
1. Identify behaviours of concern that are likely to put the person or others at risk of harm	1.1 Define and document behaviours of concern using objective, observable and measurable terms that all people supporting the person can understand 1.2 Identify the behaviours of concern using a functional or observational behaviour assessment 1.3 Identify and assess the environmental and lifestyle

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcome	*Performance criteria describe the performance needed to demonstrate achievement of the element*
	context of behaviours of concern
	1.4 Identify and assess the personal characteristics, physical and mental health, past experiences, skills and limitations, and interpersonal relationships that might contribute to behaviours of concern
	1.5 Identify the type, frequency and triggers of behaviours of concern
	1.6 Facilitate the ongoing involvement of others in the observation and recording of behaviours of concern and the assessment and planning processes
2. Develop positive behaviour support responses using a person-centred approach	2.1 Ensure that the person's preferences for including their carer and/or family and/or relevant others in the ongoing development of supports are taken into account
	2.2 Demonstrate a strengths and evidence-based, best practice approach that reflects and respects the rights, personal choices, needs, abilities and goals of the person
	2.3 Develop supports that are based on accurate records, observations and consultation with all who will use them, including the person, to accommodate lifestyle preferences
	2.4 Develop interventions and supports that safeguard the person from increased risk of being exploited, abused, or exposed to inappropriate constraints or unlawful treatment
	2.5 Identify proactive and positive supports to promote behavioural change, including changes to the environment and communication strategies
	2.6 Identify the timeframes and goals of the plan, how success will be measured, and how it will be monitored and reviewed
	2.7 Identify changes to work practices that may be implemented to reduce the behaviours of concern
	2.8 Identify interventions for critical or adverse situations and reactive responses to reduce the risk of harm to the person or others in accordance with organisation, legal and ethical requirements

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcome	*Performance criteria describe the performance needed to demonstrate achievement of the element*
	2.9 Identify the appropriate supports for the person and workers after a behaviour of concern has occurred
	2.10 Identify staffing issues and how they will be addressed
	2.11 Ensure the necessary consents and approvals are documented prior to implementation of the plan
3. Monitor and review the person's individual behaviour support plan	3.1 Monitor the person's individual behaviour support plan in consultation with the person and internal and external support providers and/or groups
	3.2 Monitor the implementation of the plan to measure improvements to the person's quality of life and reductions in the risk of harm to the person and others
	3.3 Measure and report on the number of adverse or critical events of behaviours of concern to determine the effectiveness of the behaviour support plan
	3.4 Coordinate informal or formal debriefing process for relevant workers when critical incidents occur in accordance with organisation policies and procedures
	3.5 Implement changes to the behaviour support plan consistent with evidence collected and in consultation with the person, support providers and other relevant professionals
	3.6 Comply with the organisation's reporting and documentation requirements
	3.7 Communicate individualised behaviour support plan revisions with all of the people who are providing support

Foundation Skills

The Foundation Skills describe those required skills (such as language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for CHCDIS006 Develop and promote positive person-centred behaviour supports

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant change to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Significant changes to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- identified behaviours of concern for at least 3 different people with disability and developed, implemented, monitored and reviewed positive behaviour support strategies in response to the behaviours of concern
- developed strategies and interventions that support the person to manage their own behaviour

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- principles of positive, person-centred, strengths-based behavioural support
- the social model of disability
- the impact of social devaluation on an individual's quality of life
- competency and image enhancement as a means of addressing devaluation
- organisation policies and procedures relating to behaviour management, including:
  - critical incidents
  - accident and incident reporting
  - restrictions on the use of aversive procedures
- strategies to assist in developing positive behaviour support
- evidence-based behavioural intervention

© Commonwealth of Australia, 2025 HumanAbility

- principles of effective communication and ways to implement these to minimise behaviours of concern
- indicators that person have unmet needs
- factors that may contribute to behaviour of concern:
  - physical
  - emotional
  - environmental
  - medications
- specialist services and referral options
- legal and ethical considerations for working with people with disability:
  - codes of conduct
  - dignity of risk
  - duty of care
  - human rights, including the *United nations convention on the rights of persons with disabilities* (UNCRPD)
  - informed consent
  - privacy, confidentiality and disclosure
  - restrictive practice
  - imprisonment
  - abuse
  - work health and safety

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- access to tools for functional behaviour assessment
- access to individualised plans and any equipment outlined in the plan
- access to organisation policies and procedures relating to behaviour support

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/ AQTF mandatory competency requirements for assessors.

CHCDIS007 Facilitate the empowerment of people with disability

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Merged CHCDIS302A/CHCDIS301C/CHCDIS220B. Significant change to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Significant changes to knowledge evidence.

Application

This unit describes the skills and knowledge required to facilitate the empowerment of people with disability to deliver rights based services using a person-centred approach. It should be carried out in conjunction with individualised plans.

This unit applies to workers in varied disability contexts.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Demonstrate commitment to empowerment for people with disability	1.1 Identify changes in the legal, political and social frameworks within which the work is undertaken 1.2 Identify ways society can affect the level of impairment experienced by a person with disability 1.3 Reflect on personal values and attitudes regarding disability and acknowledge their potential impact when working in disability contexts

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.4 Develop and adjust own approaches to facilitate empowerment
2. Foster human rights	2.1 Assist the person with disability to understand their rights
	2.2 Deliver services that ensure the rights and needs of the person are upheld in the context of person-centeredness
	2.3 Ensure the cultural needs of the person are identified, accepted and upheld
	2.4 Identify breaches of human rights and respond and report according to organisation procedures
	2.5 Identify indications of possible abuse and/or neglect and report according to organisation procedure
3. Facilitate choice and self-determination	3.1 Using a person-centred approach work in a manner that acknowledges the person with disability as their own expert
	3.2 Facilitate person-centred options for action on relevant issues and discuss with the person and/or family and/or carer and/or relevant other
	3.3 Provide assistance to the person with disability to facilitate communication of their personal goals
	3.4 Provide person-centred support in a manner that encourages and empowers the person with disability to make their own choices
	3.5 Assist with strategies to ensure that the person is comfortable with any decisions that are being made on their behalf
	3.6 Assist with accessing advocacy services and other complaint mechanisms as required

© Commonwealth of Australia, 2025 HumanAbility

Foundation Skills

The Foundation Skills describe those required skills (such as language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for CHCDIS007 Facilitate the empowerment of people with disability

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Merged CHCDIS302A/CHCDIS301C/CHCDIS220B. Significant change to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Significant changes to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- facilitated access to a wide variety of choices that will assist 2 people with disability to reach their personal goals, using:
  - oral communication skills to maintain positive and respectful relationships with the person with disability
  - appropriate non-verbal communication strategies

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively manage tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- history and recent developments in disability
  - social versus medical model of service
  - institutionalised versus person-centred, self-directed model of support
- social constructs of disability and the impact of own attitudes on working with people with disabilities
- how and when to seek support from more experienced and qualified staff
- types of disability, including:
  - acquired brain injury

© Commonwealth of Australia, 2025 HumanAbility

  - autism spectrum disorder
  - cognitive disability
  - developmental delay
  - intellectual disability
  - neurological impairment
  - physical disability
  - sensory disability, including hearing, vision impairment
  - speech/language disability
- support practices for people, including but not limited to, the following conditions:
  - genetic factors
  - physical trauma
  - psychological trauma
  - chronic lifestyle conditions
  - acquired brain injury
- legal and ethical considerations for working with people with disability:
  - codes of conduct
  - discrimination
  - dignity of risk
  - duty of care
  - human rights, including the *United nations convention on the rights of persons with disabilities* (UNCRPD)
  - informed consent
  - mandatory reporting
  - privacy, confidentiality and disclosure
  - work role boundaries – responsibilities and limitations
  - work health and safety
- principles of:
  - empowerment
  - rights-based approaches
  - person-centred practices
  - self-advocacy
  - active support
  - active listening
  - social justice, and the importance of knowing and respecting each person as an individual
  - strengths-based approaches
- strategies that assist people with disabilities to exercise their rights and support independent action and thinking, including use of technology (e.g. laptops or tablets) to facilitate choice
- how to access and use advocacy services and complaint mechanisms

© Commonwealth of Australia, 2025 HumanAbility

- indicators of abuse and/or neglect in relation to people with disabilities

Assessment Conditions

Skills must have been demonstrated in the disabilities workplace with the addition of simulations and scenarios where the full range of contexts and situations have not been provided in the workplace. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe, impractical or threatens the dignity of the person with disability.

The following conditions must be met for this unit:

- access to individualised plans and any equipment outlined in the plan

Overall, assessment must involve real interactions with people with disability, their families/carers/relevant others and the person's individualised plan.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

CHCDIS009 Facilitate ongoing skills development using a person-centred approach

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant change to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Significant changes to knowledge evidence.

Application

This unit describes the skills and knowledge required to plan, implement and review formal and informal ongoing skills development, in collaboration with a person with disability and incorporate into the person's individualised plan.

This unit applies to workers in varied disability contexts. Work performed requires a range of well developed, person-centred skills where some discretion and judgement is required and workers will take responsibility for their own outputs.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify individual skill development needs	1.1 Identify the person with disability's skill development needs using a person-centred approach 1.2 Document development needs in line with organisation program guidelines 1.3 Identify skills development opportunities in

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	collaboration with the person and/or family and/or carer and/or other relevant person for inclusion in the individualised plan
	1.4 Make referrals to other staff or specialist services according to the persons needs
2. Plan person-centred, ongoing skill development	2.1 Use appropriate communication techniques to engage the person in identifying learning goals
	2.2 Identify a range of learning strategies and opportunities to address the person's goals
	2.3 Develop formal ongoing skills development activities using a person-centred approach and, where appropriate, in conjunction with other relevant personnel
	2.4 Document ongoing skills development in the person's individualised plan
3. Implement person-centred, ongoing skills development strategies	3.1 Work with the person to implement ongoing skills development strategies in a manner that is respectful, motivating and empowering
	3.2 Inform and support colleagues and relevant others to implement person-centred ongoing skills development in line with the person's individualised plan
	3.3 Access and utilise equipment and resources as required to facilitate the learning process
	3.4 Document outcomes in the person's individualised plan
4. Evaluate skills development and review plan	4.1 Monitor the person's development and provide feedback to the person and/or carer and/or relevant other regarding progress towards objectives and goals
	4.2 Evaluate effectiveness of ongoing skills development using the person's records and update plan to meet changing needs of the person
	4.3 Identify opportunities for ongoing skill development

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
5. Identify and implement incidental learning opportunities to enhance skills development	5.1 Identify situations that can act as potential informal learning opportunities and encourage learning 5.2 Provide appropriate constructive advice to the person and/or family and/or carer and/or relevant other as soon as possible in appropriate format 5.3 Provide encouragement when the person takes initiative in learning situations 5.4 Withdraw support to an appropriate level in order to encourage experiential learning and development

Foundation Skills

The Foundation Skills describe those required skills (such as language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for CHCDIS009 Facilitate ongoing skills development using a person-centred approach

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant change to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Significant changes to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- developed, implemented and monitored ongoing skills development, using a person-centred approach, for at least 3 people with disability

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively manage tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- key aspects of current practices, philosophies and theories, including:
  - the social model of disability
  - competency and image enhancement as a means of addressing devaluation
  - strengths-based practice
  - active support
  - person-centred practice
  - rightful place in community
  - self-determination
- local community education opportunities and their potential use in capacity building
- assessment processes relating to ongoing skills development
- relevant services and resources available to people with learning needs

CHCDIS010 Provide person-centred services to people with disability with complex needs

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant change to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Significant changes to knowledge evidence.

Application

This unit describes the skills and knowledge required to provide person-centred services to people with disability with complex or special support needs under the supervision of a relevant professional.

This unit applies to workers in varied disability contexts. Work performed requires a range of well developed, person-centred skills where some discretion and judgement is required and workers will take responsibility for their own outputs.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Evaluate and prioritise the needs of a person with complex support issues	1.1 Identify and prioritise the needs of the person, taking into account the possibility of co-existing issues 1.2 Identify specific problems, issues and challenges for the person in line with job role and organisation procedures

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.3 Analyse and interpret data, with assistance from health professionals and other relevant personnel
	1.4 Recognise the impact of complex support issues on the persons family
	1.5 Establish priorities for support with the person and/or family and/or carer and/or relevant other
2. Develop an individualised plan to achieve maximum quality of life	2.1 Utilise best practice guidelines when developing strategies to address complex and/or special needs
	2.2 Liaise with relevant experts and/or health professionals when developing individualised plans
	2.3 Negotiate and establish goals with the person and/or family and/or carer and/or relevant other
	2.4 Access and negotiate resources in order to deliver identified services
	2.5 Access community support agencies to facilitate the achievement of established goals
3. Coordinate the delivery of the individualised plan	3.1 Ensure services and support activities are undertaken by appropriately skilled workers
	3.2 Recognise when a service and/or support worker is no longer able to provide the level of service required
	3.3 Support all stakeholder involved in the service provision to understand the individualised plan and their roles and responsibilities within that plan
4. Coordinate the monitoring, evaluation and review of the individualised plan	4.1 Seek feedback from all stakeholder when evaluating effectiveness of the individualised plan and re-prioritising support needs
	4.2 Seek feedback from the person and/or carer and/or relevant other when evaluating effectiveness of the individualised plan
	4.3 Seek advice and assistance when the person’s goals

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	and needs are not being achieved
	4.4 Make necessary revisions to the individualised plan in line with role, organisation and/or program guidelines and in consultation with the person and/or family and/or carer and/or relevant other

Foundation Skills

The Foundation Skills describe those required skills (such as language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for CHCDIS010 Provide person-centred services to people with disability with complex needs

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant change to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Significant changes to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- evaluated and prioritised the needs of at least 3 people with complex support issues and developed individualised plans to meet their needs
- coordinated the delivery, monitoring, evaluation and review of at least 3 individualised plans

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively manage tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- factors that would lead to someone being classified as having complex needs rather than basic needs
- physiology and psychology as it applies to a range of disability types
- nutrition and dietetics as it applies to a range of disability types
- common issues and challenges facing people with disability
- manifestations and presentation of common health problems as well as behavioural issues associated with different disability types
- formal and informal assessment approaches for assessment of people with complex and/or special needs

© Commonwealth of Australia, 2025 HumanAbility

- organisation policies and procedures related to developing and managing individualised plans including the role of family members and/or carers and/or relevant others and various types of community service providers

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions.

The following condition must be met for this unit:

- access to individualised plan and equipment outlined in the plan

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment Requirements for CHCDIV001 Work with diverse people

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTHIR403C/CHCCS405C. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- undertaken a structured process to reflect on own perspectives on diversity
- recognised and respected the needs of people from diverse social and cultural backgrounds in at least 3 different situations:
  - selected and used appropriate verbal and non verbal communication
  - recognised situations where misunderstandings may arise from diversity and formed appropriate responses

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- concepts of cultural awareness, cultural safety and cultural competence and how these impact different work roles
- concepts and definitions of diversity
- own culture and the community attitudes, language, policies and structures of that culture and how they impact on different people and groups
- features of diversity in Australia and how this impacts different areas of work and life:
  - political
  - social
  - economic

    - cultural
- legal and ethical considerations (international, national, state/territory, local) for working with diversity, how these impact individual workers, and the consequences of breaches:
    - discrimination:
        - age
        - disability
        - racial
        - sex
    - human rights:
        - *Universal declaration of human rights*
        - relationship between human needs and human rights
        - frameworks, approaches and instruments used in the workplace
    - rights and responsibilities of workers, employers and clients, including appropriate action when rights are being infringed or responsibilities not being carried out
- key areas of diversity and their characteristics, including:
    - culture, race, ethnicity
    - disability
    - religious or spiritual beliefs
    - gender, including transgender
    - intersex
    - generational
    - sexual orientation/sexual identity - lesbian, gay, bisexual, heterosexual
- key aspects, and the diversity, of Australia's Aboriginal and/or Torres Strait Islander cultures, including:
    - social, political and economic issues affecting Aboriginal and/or Torres Strait Islander people
    - own culture, western systems and structures and how these impact on Aboriginal and/or Torres Strait Islander people and their engagement with services
- potential needs of marginalised groups, including:
    - protective factors
    - physical, mental and emotional health issues/care needs
    - consideration of impacts of discrimination, trauma, exclusion and negative attitudes
- resources that support individuals and organisations to embrace and respond to diversity
    - language and cultural interpreters
    - imagery
- influences and changing practices in Australia and their impact on the diverse communities that make up Australian society
- impact of diversity practices and experiences on personal behaviour, interpersonal relationships, perception and social expectations of others

© Commonwealth of Australia, 2025 HumanAbility

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as, using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment Requirements for CHCDIV002 Promote Aboriginal and/or Torres Strait Islander cultural safety

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- promoted Aboriginal and/or Torres Strait Islander cultural safety in the context of at least 1 workplace
- researched culture and history, the impact of European settlement, loss of land and culture and the importance of lore and kinship
- evaluated ways to improve communication with Aboriginal and/or Torres Strait Islander peoples who may be clients or colleagues.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- concept of Aboriginal and/or Torres Strait Islander cultural safety in the community services and health context, and its relationship with:
  - cultural awareness
  - cultural competence
- legislative context for Aboriginal and/or Torres Strait Islander cultural safety
- the diversity of Aboriginal and/or Torres Strait Islander cultures
- historical, social, political and economic issues affecting Aboriginal and/or Torres Strait Islander people and their engagement with community services and health systems, including:
  - impact of European settlement

© Commonwealth of Australia, 2025 HumanAbility

    - loss of land and culture
    - racism and discrimination
    - past and present power relations
- own culture, western systems and structures and how these impact on Aboriginal and/or Torres Strait Islander people and their engagement with services
- factors that contribute to Aboriginal and/or Torres Strait Islander ill health and common diseases experienced by these groups of people:
    - impact of trauma on individuals' ability for:
        - decision-making
        - communicating
        - understanding
        - retaining information
- ways to involve Aboriginal and/or Torres Strait Islander people in the planning and delivery of services and programs

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as, using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessment must involve persons approved of by relevant local community elders.

Assessment Requirements for CHCDIV003 Manage and promote diversity

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- researched diversity in at least 1 workplace in terms of current performance and meeting of diversity objectives
- used strategies to foster and promote diversity in work practice:
  - coaching and mentoring
  - communication
  - work planning
- contributed to the development of workplace diversity policies and procedures for at least 1 workplace

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the work role. This includes knowledge of:

- concepts of cultural awareness, cultural safety and cultural competence and how these impact leadership and management practice
- concepts and definitions of diversity
- key areas of diversity and their characteristics, including:
  - culture, race, ethnicity
  - disability
  - religious or spiritual beliefs

© Commonwealth of Australia, 2025 HumanAbility

    - gender, including transgender
    - intersex
    - generational
    - sexual orientation/sexual identity - lesbian, gay, bisexual, heterosexual
- the role of leaders and managers in encouraging diversity in work practices and service delivery
- impact of diversity practices and experiences on personal behaviour, interpersonal relationships, perception and social expectations of self and others
- legal and ethical considerations (international, national, state/territory, local) for diversity practices at a management level:
    - discrimination (direct and indirect):
        - age
        - disability
        - racial
        - sex
    - equal employment opportunity (EEO)
    - human rights
    - rights and responsibilities of workers, employers and clients
- benefits of workplace diversity
- types of direct and indirect discrimination
- ways to ensure effective and equitable activities to diverse clients
- barriers to inclusivity
- cross-cultural communication strategies and how these can be integrated into workplace practices
- principles and practices of inclusivity and the types of planning and work practice that support diversity

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as, using suitable facilities, equipment and resources.

The following condition must be met for this unit:

- presence of situations that allow interaction with other people in a leadership role

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment Requirements for CHCGRP001 Support group activities

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 3.0* and meets the requirements of the 2012 Standards for Training Packages. Merged CHCGROUP201C and CHCGROUP302D. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- participated in, and supported the activities of, at least 3 different groups, where groups comprise at least 5 members
- modelled the following communication skills when participating in groups:
  - active listening
  - questioning
  - rapport-building
  - conflict resolution
  - clarity in communication.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations for group work, and how these are applied in organisations and individual practice:
  - codes of conduct
  - discrimination
  - duty of care

© Commonwealth of Australia, 2025 HumanAbility

    - mandatory reporting
    - privacy, confidentiality and disclosure
    - records management
    - work role boundaries – responsibilities and limitations
    - work health and safety
- policies and procedures
- nature of groups and the way they operate at an overview level, including:
    - dynamics of groups
    - stages of group development
    - stages of change
    - styles of group leadership and decision-making
- communication techniques and how they are used within groups, including:
    - active listening and questioning
    - rapport building
    - conflict resolution
    - non-verbal communication
- nature of resources provided to groups, including:
    - information/referrals
    - facilities
    - equipment/materials
    - administrative support
    - facilitation of meetings
    - worker skills/expertise
- nature of support provided including:
    - resources managed by the organisation
    - advice, information and facilitation
    - individual or group supervision.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
    - organisation policies and procedures
    - group member information
- modelling of industry operating conditions, including:
    - scenarios that involve interactions with groups.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

CHCHCS001 Provide home and community support services

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant change to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Significant changes to knowledge evidence.

Application

This unit describes the skills and knowledge required to work in a home support environment and community settings with individuals, family members, staff, visitors, suppliers and others to meet established work requirements.

This unit applies to workers in a community services context. Work performed requires some discretion and judgement and is carried out under regular direct or indirect supervision.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Determine requirements of individual plan	1.1 Read and interpret individual plan, goals and confirm required equipment, processes and aids 1.2 Confirm purpose and time of visit with the relevant person 1.3 Prepare equipment, resources and/or documents required for the purpose of the visit and contingencies

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
2. Establish relationship in the home	2.1 Follow organisation's procedures to assure the person of your identity before entering the house
	2.2 Communicate with the person to provide information, clarify purpose of visit and confirm the person's consent
	2.3 Provide opportunity for the person to identify and express any issues or concerns in relation to the visit and/or associated matters
	2.4 Engage appropriately with others in the place of residence in accordance with organisation policies
	2.5 Check for hazards to own and others' health and safety and implement controls to manage risk
3. Operate respectfully in the home	3.1 Negotiate how to best implement the individual plan to suit the person within organisation procedures and respecting that the work setting is the person's home and personal space
	3.2 Comply with duty of care requirements of role in relation to the person and any other people
	3.3 Demonstrate respect and sensitivity toward the person and their place of residence
	3.4 Deal with ethical dilemmas, behaviours of concern, possible abuse and/or neglect in accordance with relevant policies and procedures
	3.5 Maintain confidentiality in accordance with legislation and organisation policy and procedures
4. Complete reporting and documentation	4.1 Comply with the organisation's reporting requirements, including reporting observations to supervisor
	4.2 Complete and maintain documentation according to organisation policy and protocols and using technology required in the workplace
	4.3 Ensure any arrangements for follow up visits are recorded and implemented

© Commonwealth of Australia, 2025 HumanAbility

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant change to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Significant changes to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- provided services to individual/s in at least 2 different home or community support settings
- used appropriate inter-personal skills:
  - establishing a positive relationship with the individual
  - seeking clarification of tasks
  - interpreting and following instructions

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations for providing home and community services, including:
  - codes of practice
  - basic home fire safety and associated state/territory smoke alarm legislation
  - dignity of risk
  - duty of care
  - privacy, confidentiality and disclosure
  - practice standards
  - work role boundaries – responsibilities and limitations

© Commonwealth of Australia, 2025 HumanAbility

    - work health and safety
- relevant organisation policies and procedures and how to access them, including risk management practices when the work environment is a person's home
- personal and property security procedures, including personal security protocols and equipment
- relevant policy and programs, including:
    - home and community care (HACC)
    - Department of Veterans' Affairs (DVA)
    - government community care directions
- implications for work in the sector including:
    - person-centred practice
    - consumer-directed care
    - empowerment and disempowerment
- indicators of abuse and/or neglect, including:
    - physical
    - sexual
    - psychological
    - emotional
    - financial

Assessment Conditions

Skills must have been demonstrated in an ageing support workplace with the addition of simulations and scenarios where the full range of contexts and situations have not been provided in the workplace. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe, impractical or threatens the dignity of the person. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
    - individualised plans and any relevant equipment outlined in the plan
    - personal protective equipment
    - relevant organisation policies and procedures

Overall, assessment must involve workplace interactions with people in their home, colleagues, families/carers and working with the person's individualised plan.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

CHCLAH001 Work effectively in the leisure and health industries

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant change to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Significant changes to knowledge evidence.

Application

This unit describes the skills and knowledge required to work in a context within which leisure and health work occurs and to effectively support its role in enhancing well being.

This unit applies to workers in a range of community services and health contexts who provide leisure and health services.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Provide appropriate leisure and health services	1.1 Demonstrate understanding of the value of leisure, recreation and play in enhancing well being 1.2 Identify different work environments, services and work roles within the industry 1.3 Work within the current models of leisure and health practice

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.4 Ensure clients participate in all aspects of service planning and support activities
	1.5 Undertake all work as part of the inter disciplinary team and exhibit an awareness of the role of a conjoint approach to leisure and health programs
	1.6 Identify personal values and attitudes regarding leisure, recreation and play and take them into account when planning and implementing all work activities
2. Operate within the policies and procedures of the leisure and health sector	2.1 Read relevant organisation policies and discuss with colleagues and team
	2.2 Ensure all work is consistent with relevant statutory and legislative provisions
	2.3 Work ethically and within duty of care requirements recognising dignity of risk
	2.4 Seek information for professional development, further training options and identify potential career pathways

Foundation Skills

The Foundation Skills describe those required skills (such as language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for CHCLAH001 Work effectively in the leisure and health industries

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant change to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Significant changes to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- worked effectively as part of an interdisciplinary team, involving at least 3 other people, within the leisure and health framework
- networked with at least 2 professionals in the leisure and health industry and documented the networking process

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively manage tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- different contexts of the leisure and health sector:
  - historical
  - social
  - political
  - economic

© Commonwealth of Australia, 2025 HumanAbility

- current issues which impact on the leisure and health sector and different models of leisure and health
- views of key stakeholders and representatives from relevant target groups about leisure and health
- underpinning values and philosophy of the leisure and health sector
- models of leisure and health practice and how these models can be used in a practical manner within a leisure and health environment
- current issues facing clients and existing services to address their needs and rights
- facts and myths about the value of leisure and recreation in enhancing health and well being
- holistic and person-centred practice
- importance of consumer input, choice and respecting individual recognition
- ways in which a leisure and health professional can ensure clients participate in the planning of the leisure and recreation programs within a service
- advantages of working in an interdisciplinary team
- benefits of leisure activities for clients, including:
  - children
  - young people
  - people with a disability
  - people with an illness
  - people who are ageing
- working with people from culturally, spiritually and linguistically diverse backgrounds, including Indigenous Australian culture
- legal and ethical considerations for leisure and health:
  - dignity of risk
  - duty of care
  - privacy, confidentiality and disclosure
  - work health and safety (WHS)
- principles and practices
  - access and equity
  - client empowerment/disempowerment
  - quality of life
- relevance of the work role and functions to maintaining sustainability of the workplace, including environmental, economic, workforce and social sustainability

Assessment Conditions

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations have not been provided in the workplace.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:

© Commonwealth of Australia, 2025 HumanAbility

- organisation policies and procedures
- information/documentation relevant to leisure and health activities
- scenarios that focus on working within an interdisciplinary team with leisure and health responsibilities

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/ AQTF mandatory competency requirements for assessors.

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	meet needs
	1.4 Select activity focus and type based on client needs, organisation's criteria and resource availability
	1.5 Undertake an activity analysis to match client needs to the characteristics of the activity
	1.6 Undertake an assessment of outing requirements, where appropriate
	1.7 Undertake risk assessment for activities, programs and outings
2. Assist with the preparation of activity plan	2.1 Undertake appropriate planning of activities within team context to ensure client needs are met
	2.2 Incorporate consultation with clients and stakeholders into planning of activities
	2.3 Determine operational arrangements for conducting the activity and assess for feasibility
	2.4 Develop and document goals and outcomes for each activity
	2.5 Include appropriate implementation and evaluation strategies in the activity plan
	2.6 Develop plans to include activity modifications required to meet client needs
	2.7 Document resource adaptations, where appropriate, according to organisation procedures and protocols
	2.8 Ensure planned activities reflect accepted best practice in working with leisure and health clients
	2.9 Document the activity plan according to organisation procedures and protocols
3. Identify and obtain required resources	3.1 Devise and implement strategies to obtain and utilise necessary human, financial and physical resources
	3.2 Make submissions to potential sources, in accordance with relevant guidelines, where required resources are not readily available

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	3.3 Evaluate, select and arrange suitable locations for program implementation
	3.4 Identify a range of leisure and recreation options and experiences suitable to client needs
	3.5 Identify components of an activity relevant to the abilities of the client
	3.6 Modify and adapt activities to meet client needs, where necessary
	3.7 Conduct resource audit
4. Promote activity or program	4.1 Identify potential program users and design and distribute appropriate information to achieve maximum response
	4.2 Evaluate effectiveness of promotional activities and make changes as indicated by response
	4.3 Develop motivational strategies to maximise client participation
	4.4 Evaluate effectiveness of motivational strategies and make amendments as indicated by the response
5. Deliver activity or program	5.1 Implement activities in accordance with program plan, organisation guidelines and legislative requirements
	5.2 Provide participants with access to a range of activities suited to their needs and interests
	5.3 Develop flexible implementation plans to suit a variety of contexts and to cope with contingencies
	5.4 Adapt program to changing needs of participants as required
	5.5 Promptly address problems in delivery of activities
	5.6 Use effective facilitation techniques in the delivery of activities
	5.7 Develop strategies to deal with challenging behaviour
	5.8 Implement strategies to deal with challenging

Assessment Requirements for CHCLAH002 Contribute to leisure and health programming

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal change to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Minimum work hours added. Significant changes to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- contributed to the planning, delivery and evaluation of 3 leisure and health activities for a client or group of clients
- documented 4 activity modifications/adaptations that have been investigated
- visited a suitable outing venue for a chosen client or group of clients
- performed the activities outlined in the performance criteria of this unit during a period of at least 120 hours of work

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- at least 15 activity ideas that could be included in a holistic leisure and health program
- current documentation requirements and expectations within the profession
- aspects of holistic health:
  - emotional
  - social
  - physical

© Commonwealth of Australia, 2025 HumanAbility

  - mental
  - spiritual
- levels of human needs:
  - universal
  - developmental
  - special
- legal and safety requirements as they relate to activities and programs
- risk and outing assessment processes
- relevant funding sources
- provision of support to a diverse range of people and organisations
- cross cultural communication, negotiation and facilitation
- work health and safety (WHS) principles and practices

Assessment Conditions

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations have not been provided in the workplace.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - individualised plans and equipment or resources outlined in the plan
  - information/documentation relevant to leisure and health activities
  - scenarios that focus on working within an interdisciplinary team with leisure and health responsibilities

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/ AQTF mandatory competency requirements for assessors.

CHCLEG001 Work legally and ethically

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency.

Application

This unit describes the skills and knowledge required to identify and work within the legal and ethical frameworks that apply to an individual job role.

This unit applies to community services and health workers who play a proactive role in identifying and meeting their legal and ethical responsibilities.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
1. Identify and respond to legal requirements	1.1 Identify, access and interpret sources of information about the legal requirements that apply to the work role
	1.2 Identify the scope and nature of own legal rights and responsibilities
	1.3 Adhere to legal requirements in work practice according to workplace policies and procedures and scope of role
	1.4 Recognise potential or actual breaches and report according to organisation procedures

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
2. Identify and meet ethical responsibilities	2.1 Identify, access and interpret sources of information about the ethical responsibilities that apply to the work role 2.2 Identify the scope and nature of own ethical responsibilities 2.3 Meet ethical responsibilities according to workplace policies and protocols, and scope of role 2.4 Recognise potential ethical issues and dilemmas, and discuss with an appropriate person 2.5 Recognise own personal values and attitudes and take into account to ensure non-judgemental practice 2.6 Use effective problem solving techniques when exposed to competing value systems 2.7 Recognise unethical conduct and report to an appropriate person 2.8 Recognise potential and actual conflicts of interest and take appropriate action
3. Contribute to workplace improvements	3.1 Identify situations where work practices could be improved to meet legal and ethical responsibilities 3.2 Pro-actively share feedback with colleagues and supervisors 3.3 Identify and take opportunities to contribute to the review and development of policies and protocols

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for CHCLEG001 Work legally and ethically

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- completed workplace activities in accordance with legal and ethical requirements in at least 3 different situations
- developed appropriate responses to at least 3 different legal or ethical issues relevant to the work role
- identified and communicated at least 2 potential work practice improvements designed to enhance workplace responsiveness to legal and ethical requirements

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations (international, national, state/territory, local) for people working in the community services and health context, how they are applied in organisations, how these impact individual workers, and the consequences of breaches:
  - children in the workplace
  - codes of conduct
  - codes of practice
  - complaints management
  - continuing professional education
  - discrimination

© Commonwealth of Australia, 2025 HumanAbility

    - dignity of risk
    - duty of care
    - human rights
        - *Universal declaration of human rights*
        - relationship between human needs and human rights
        - frameworks, approaches and instruments used in the workplace
    - informed consent
    - mandatory reporting
    - practice standards
    - practitioner/client boundaries
    - privacy, confidentiality and disclosure
    - policy frameworks
    - records management
    - rights and responsibilities of workers, employers and clients
    - industrial relations legislation relevant to employment conditions of role
    - specific legislation in the area of work – objectives and key components
    - work role boundaries – responsibilities and limitations
    - work health and safety
- interrelationships, similarities and differences that may exist between legal and ethical frameworks
- legal issues in the context of the work role:
    - type of legal issues that arise
    - ways to respond
- ethical practice in the context of the work role:
    - type of ethical issues that arise
    - ways to respond
- workplace policies, procedures and protocols:
    - how they are/should be developed
    - processes for review, including consultation and mechanisms for input

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
    - current legislation, regulations and codes of practice
    - organisation policies, procedures and protocols
- modelling of industry operating conditions, including presence of problem solving activities

© Commonwealth of Australia, 2025 HumanAbility

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

CHCLEG003 Manage legal and ethical compliance

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to research information about compliance and ethical practice responsibilities, and then develop and monitor policies and procedures to meet those responsibilities.

This unit applies to people working in roles with managerial responsibility for legal and ethical compliance in small to medium sized organisations. There may or may not be a team of workers involved.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
1. Research information required for legal compliance	1.1 Identify sources of information about compliance requirements
	1.2 Evaluate own area of work and determine scope of compliance requirements
	1.3 Access and interpret information relevant to area of work
	1.4 1dentify risks, penalties and consequences of non

Assessment Requirements for CHCLEG003 Manage legal and ethical compliance

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- determined the scope of legal and ethical compliance requirements and responsibilities, and developed policies and procedures for at least 1 workplace or business
- developed a strategic response to at least 3 different situations where legal or ethical requirements have been breached

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role. This includes knowledge of:

- legal responsibilities and liabilities of managers and others in different types of organisation
- legal and ethical frameworks (international, national state/territory, local), how these apply in the workplace, and the responsibilities of managers in the development and monitoring of policies and procedures, including those related to:
  - children in the workplace
  - codes of conduct
  - codes of practice
  - complaints management
  - continuing professional education
  - discrimination

© Commonwealth of Australia, 2025 HumanAbility

- dignity of risk
- duty of care
- human rights:
  - *Universal declaration of human rights*
  - relationship between human needs and human rights
  - frameworks, approaches and instruments used in the workplace
- informed consent
- mandatory reporting
- practice standards
- practitioner/client boundaries
- privacy, confidentiality and disclosure
- policy frameworks
- records management
- rights and responsibilities of workers, employers and clients
- industrial relations legislation and requirements relevant to organisation
- specific requirements in the area of work, including:
  - key practices that are prohibited by law
  - auditing and inspection regimes
  - main consequences of non-compliance
  - need to apply for licences and associated mandatory training and certification requirements
  - statutory reporting requirements
  - business insurances required including public liability and workers compensation
  - accreditation requirements
  - requirements to develop and implement plans, policies, codes of conduct or incorporate certain workplace practices
- work role boundaries – responsibilities and limitations of different people
- work health and safety

- sources of information and advice on compliance including:
  - local, state/territory or commonwealth government departments or regulatory agencies
  - industry associations
  - plain English documentation that explains legislation
- functions and operating procedures of regulatory authorities of particular relevance to the health and community service sectors
- methods of receiving updated information on requirements
- use of policies and procedures in managing compliance and ethical practice in both internal work practice and external service delivery
- formats for policies and procedures and what they should include
- techniques for monitoring compliance

© Commonwealth of Australia, 2025 HumanAbility

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - current legislation and regulations
  - workplace policies and procedures
- modelling of industry operating conditions, including:
  - use of real or simulated organisation for which the candidate develops policies and procedures
  - integration of problem solving activities

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

CHCLLN001 Respond to client language, literacy and numeracy needs

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency.

Application

This unit describes the skills and knowledge required to identify situations where client language, literacy and numeracy (LLN) skills may be impeding access to services, to adjust service delivery, and to refer appropriately to improve client outcomes.

The unit does not provide workers with the skills and knowledge to identify LLN skill levels or to actively intervene in developing a client's LLN skills.

This unit applies to individuals who may be making individual client assessments or managing caseloads as part of their work role.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
Elements define the essential outcomes	*Performance criteria describe the performance required to demonstrate achievement of the element*
1. Establish client's LLN needs	1.1 Identify signs that the client may have LLN needs

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance required to demonstrate achievement of the element*
	1.2 Review the scope of LLN skill requirements needed to effectively access services
	1.3 Identify gaps between the client's LLN skills and those required to effectively access services
	1.4 Determine the degree to which other issues may impact on the client
2. Determine strategies to address LLN needs	2.1 Collaborate with client to agree areas of LLN need and how to respond
	2.2 Determine ways in which service delivery can take account of the client's LLN needs
	2.3 Prioritise areas for immediate or longer-term action based on scope of the client's needs
3. Implement strategies to address LLN needs	3.1 Adjust service delivery approaches that respond to LLN need, including use of appropriate tools and communication strategies
	3.2 Provide the client with accurate and current information about LLN support services
	3.3 Record agreed LLN needs and the strategies used, and report in line with the client and organisation requirements
	3.4 Monitor the client and provide ongoing support and encouragement where appropriate

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

© Commonwealth of Australia, 2025 HumanAbility

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for CHCLLN001 Respond to client language, literacy and numeracy needs

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- responded to the needs of at least 3 different people with LLN needs

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- indicators of LLN needs, and methods for clarifying them with the client
- methods for identifying the impact of other service-related issues on the client's LLN needs
- LLN information and referral or support services for a range of LLN needs and clients
- recording and reporting requirements

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as, using suitable facilities, equipment and resources.

CHCMGT001 Develop, implement and review quality framework

Modification History

Release	Comments
Release 2	This version was released in *CHC Community Services Training Package release 3.0.* Amended modification history and mapping. Equivalent outcome.
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Merged CHCORG423C and CHCORG619D. Significant changes to performance criteria. New evidence requirements for assessment including volume and frequency requirements. Significant changes to knowledge evidence.

Application

This unit describes the skills and knowledge required to develop, implement and monitor a framework for ongoing quality service delivery that supports the rights and interests of clients.

The unit applies to a range of leadership roles in health and community services workplaces.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
Elements define the essential outcomes	*Performance criteria specify the performance needed to demonstrate achievement of the element*
1. Develop a framework for quality service delivery	1.1 Establish quality service standards through consultation with stakeholders and benchmarking against

© Commonwealth of Australia, 2025 HumanAbility

	industry standards or existing quality frameworks 1.2 Develop strategies to ensure procedures deliver high quality services that support good practice standards and the rights and interests of clients 1.3 Identify organisation barriers or issues that impact on delivery of high quality service and develop strategies to address them 1.4 Identify opportunities for continuous improvement and incorporate them into operational plans 1.5 Define and implement continuous improvement processes to monitor and ensure quality client service delivery 1.6 Plan and ensure the involvement of all parties in quality improvement processes
2. Monitor and review service delivery against quality framework	2.1 Use a range of appropriate processes to monitor and review quality of service outcomes for clients and the community 2.2 Monitor and review strategies for addressing barriers and issues relating to quality 2.3 Regularly update service delivery procedures to reflect good practice and to respond to changing legislative requirements and client needs 2.4 Identify need and opportunities for staff to develop the necessary competencies to meet changing service delivery requirements 2.5 Establish and use feedback mechanisms to involve all users of the service and other relevant parties in the review process 2.6 Investigate and document the effects of services on all clients 2.7 Identify differences between stakeholder expectations and service delivery objectives 2.8 Establish mechanisms to provide clients and stakeholders with information about review results
3. Plan and implement revised strategies to improve outcomes	3.1 Use review findings to identify threats to quality 3.2 Respond to and investigate complaints and use as feedback to improve outcomes

© Commonwealth of Australia, 2025 HumanAbility

	3.3 Design and implement a plan with immediate and long term goals to develop and improve the quality of service in consultation with stakeholders
	3.4 Provide information to relevant parties about the plan and the processes to be used
4. Ensure the continuous improvement of service standards	4.1 Ensure that revised service standards incorporate stakeholder expectations and available resources
	4.2 Regularly communicate service standards and good practice to all stakeholders
	4.3 Establish procedures to check that appropriate practice is carried out
	4.4 Regularly promote, model and demonstrate good practice to all workers
	4.5 Regularly discuss issues with workers and incorporate necessary changes into strategies for continuous improvement

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential *to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for CHCMGT001 Develop, implement and review quality framework

Modification History

Release	Comments
Release 2	This version was released in *CHC Community Services Training Package release 3.0*. Amended modification history and mapping. Equivalent outcome.
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Merged CHCORG423C and CHCORG619D. Significant changes to performance criteria. New evidence requirements for assessment including volume and frequency requirements. Significant changes to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has:

- developed and implemented a quality framework for the delivery of at least 1 service or program
- conducted at least 1 review of service delivery that identified barriers to quality and provided recommendations for improvement
- established a continuous improvement plan for at least 1 service or program

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations and how these are applied in organisations, including:
  - discrimination
  - work health and safety
  - privacy, confidentiality and disclosure
  - access and equity

© Commonwealth of Australia, 2025 HumanAbility

  - rights and responsibilities of clients
  - complaints
- service and industry guidelines and standards
- principles of holistic and person-centred support, and where to access good practice information relevant to the industry sector
- benchmarking
- best practice and good practice
- quality assurance processes relevant to service type
- existing state and national quality frameworks relevant to service
- importance of principles and practices to enhance sustainability in the workplace, including environmental, economic, workforce and social sustainability
- vision statements, philosophical statements of organisation
- needs of clients
- impact of own attitudes to client groups on service delivery and strategies to improve own professional practice

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as, using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

CHCMGT003 Lead the work team

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to performance criteria. New evidence requirements for assessment including volume and frequency requirements. Significant changes to knowledge evidence.

Application

This unit describes the skills and knowledge required to undertake supervisory and coordinating activities in work groups in health and community service organisations.

Workers at this level are team leaders or managers responsible for coordinating and monitoring the activities and performance of work teams and other service providers.

This unit applies to a range of leadership roles in health and community services workplaces.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
1. Contribute to and promote effective work practices	1.1 Develop and implement plans to meet the day to day activities of the work group 1.2 Develop and implement strategies in consultation with appropriate people to maximise work performance and outcomes

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	1.3 Identify planning problems, barriers and constraints and develop and implement strategies to address them
2. Develop and implement staffing processes	2.1 Maintain confidentiality in relation to staff processes in accordance with organisation policies and procedures
	2.2 Identify staffing and resourcing needs and develop plans to address them
	2.3 Participate in recruitment processes
	2.4 Implement effective induction and ongoing support for new and existing staff
	2.5 Provide instruction and additional support as required to promote quality worker and client outcomes
	2.6 Encourage and facilitate staff access to training and development to enable the achievement of workplace outcomes and personal goals
	2.7 Collaborate with other service providers as needed to meet service and referral needs
3. Maintain professional approach to leading work team	3.1 Reflect on own practice and pro-actively update knowledge and skills
	3.2 Align own leadership practice with the values, ethical guidelines, policies and procedures of the organisation
	3.3 Take reasonable steps to ensure that personal or social contact does not adversely affect ability to lead the team
4. Promote effective workplace relations	4.1 Implement collaborative processes and practices that promote cooperative work practices and maintain positive relationships with staff and management
	4.2 Model and promote effective communication in the workplace, including open discussion and active listening
	4.3 Identify potential and actual conflict situations and develop and implement appropriate strategies to prevent or address them
	4.4 Throughout conflict resolution processes, ensure access to appropriate support, mediation and debriefing for parties within organisation guidelines
	4.5 Resolve problems or issues which may disrupt work

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	unit activities
5. Evaluate plans	5.1 Meet regularly with those involved to discuss and evaluate the effectiveness of plans and practices in meeting the goals and needs of the organisation 5.2 Identify areas for improvement 5.3 Revise plans and practices to ensure continued improvement 5.4 Document and report work outcomes in accordance with organisational procedures
6. Review individual performance	6.1 Implement and document performance management processes in accordance with role and organisation procedures 6.2 Work collaboratively with the individual to agree on performance improvement and development plans and document in accordance with organisation policies 6.3 Monitor and evaluate performance and provide feedback on a ongoing and regular basis 6.4 Identify poor performance and take necessary actions in accordance with role and organisation procedures 6.5 Monitor and coach individuals to improve performance 6.6 Identify and provide additional support or referral when required, in accordance with role and organisation procedures

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential *to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for CHCMGT003 Lead the work team

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to performance criteria. New evidence requirements for assessment including volume and frequency requirements. Significant changes to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has:

- developed at least 1 plan for a team or group of individuals, including:
  - effective procedures to maximise staff work performance
  - strategies for collaboration and cooperative work practices
  - strategies for work performance and outcomes
  - identification of barriers and constraints and development of strategies to address them
- facilitated at least 2 group meetings or discussions to:
  - delegate work team activities
  - develop and evaluate work goals
- identified at least 1 issue causing disruption to work team activities and:
  - facilitated at least 1 meeting or discussion with those involved
  - developed and implemented strategies to resolve issue
- reviewed the performance of and coached at least 1 individual

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the work role. This includes knowledge of:

- organisation mission, philosophy
- organisation structure and communication protocols
- group facilitation processes, including technique for facilitating group discussions and meetings

© Commonwealth of Australia, 2025 HumanAbility

- leadership styles and their application in supporting the organisation's mission, objectives and values
- coaching principles and techniques
- difference between coaching and mentoring
- performance management sources of information on best practice work techniques relevant to the industry sector
- rostering and timetabling
- sources of conflict and stress and techniques to address and manage them
- referral networks

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as, using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

CHCMGT004 Secure and manage funding

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. New Unit.

Application

This unit describes the skills and knowledge required to secure and manage funding for an organisation, program or project.

Workers may be responsible for determining the amount of funding required, identifying funding sources, developing funding proposals and managing ongoing compliance with funding agreements. This role would typically be undertaken by a senior worker or manager.

This unit applies to a range of health and community service contexts and relates to both government and non-government funding and tenders.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria specify the performance needed to demonstrate achievement of the element*
1. Identify funding requirements and context	1.1 Identify scope and purpose of funding 1.2 Calculate funding requirements, including budget, current funding arrangements and future projections 1.3 Identify potential avenues and sources of funding 1.4 Research and gather information on all potential funding avenues and sources

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria specify the performance needed to demonstrate achievement of the element*
	1.5 Determine if funding requirements are feasible and sustainable
2. Develop a funding submission	2.1 Determine funding source requirements
	2.2 Prepare funding submission in accordance with funding source requirements
	2.3 Determine optimum method of presenting proposal to identified funding sources
	2.4 Seek legal, taxation and regulatory advice when required and ensure submission is checked by appropriate persons to ensure it meets compliance requirements
	2.5 Establish how deliverables and outcomes will be evaluated and measured
3. Present proposal and negotiate with funding sources	3.1 Present proposal to funding sources using appropriate presentation methods and techniques
	3.2 Negotiate with funding source representatives to clarify terms and conditions of funding agreement
	3.3 Evaluate submission to identify strengths and weaknesses to inform subsequent submissions
4.Manage funding agreement	4.1 Finalise funding agreement documentation and circulate to all parties
	4.2 Establish procedures to monitor ongoing compliance and reporting requirements in accordance with funding agreement
	4.3 Maintain ongoing relations with funding source to ensure mutual satisfaction with funding arrangement
5.Evaluate funding agreement	5.1 Evaluate project outcomes against predetermined measures
	5.2 Identify lessons learned and opportunities for continuous improvement
	5.3 Identify opportunities for future funding

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria specify the performance needed to demonstrate achievement of the element*
	arrangements as appropriate

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Assessment Requirements for CHCMGT004 Secure and manage funding

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. New Unit.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has:

- identified at least 3 potential sources of funding
- determined the feasibility and sustainability of 3 sources of funding
- developed 1 funding proposals in accordance with funding source requirements

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the work role. This includes knowledge of:

- funding environment
- organisation funding strategy
- government tender processes
- private and corporate grants and funding
- compliance issues
- appropriate sources and avenues for funding
- types of funding, including:
  - ongoing
  - one-off
  - in kind contributions
  - co-payments
- channels where funding and grant opportunities are publicised
- funding issues and challenges
- relationship between funding and strategic direction or organisation

© Commonwealth of Australia, 2025 HumanAbility

- feasibility and sustainability principles
- budgets and budget pitfalls
- negotiation techniques

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including access to funding information, documentation, technology
- modelling of industry operation conditions

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

CHCMGT005 Facilitate workplace debriefing and support processes

Modification History

Release	Comments
Release 2	This version was released in *CHC Community Services Training Package release 3.0*. Amended modification history and mapping. Equivalent outcome.
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to performance criteria. New evidence requirements for assessment including volume and frequency requirements. Significant changes to knowledge evidence.

Application

This unit describes the skills and knowledge required to monitor and support workers. This includes implementing support processes to manage stress and emotional wellbeing of self or colleagues working in varied health and community service contexts. It also involves facilitating structured debriefing sessions to colleagues following incidents with the potential to impact on health and wellbeing.

This unit applies to leadership or management roles where the individual provides peer to peer support to colleagues and refers to specialised support services in line with organisation guidelines as required.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria specify the performance needed to demonstrate achievement of the element*

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria specify the performance needed to demonstrate achievement of the element*
1. Monitor welfare of colleagues	1.1 Monitor stress and emotional wellbeing of colleagues, and where issues arise, take appropriate action in accordance with *organisation standards* and *procedures*
	1.2 Use practices that acknowledge and accept differences and accurately identify diverse needs of colleagues
	1.3 Identify required professional and *personal performance standards* and use to monitor stress and emotional wellbeing
	1.4 Regularly use self assessment and *reflective behaviour* strategies to monitor performance
	1.5 Regularly seek formal and informal performance feedback and act upon it as appropriate
	1.6 Plan appropriately to identify current and potential areas of need within organisation and develop proposals to support these areas
2. Conduct structured debriefings following an incident	2.1 Plan, prepare and conduct debriefing in line with organisation standards and procedures
	2.2 Schedule debriefing as soon as possible following the incident
	2.3 Conduct debriefing in a safe environment and in a manner that facilitates open discussion
	2.4 Use appropriate *debriefing techniques* to encourage further exploration of emotions and experiences to assist in reflection on issues
	2.5 Use appropriate questioning to encourage colleagues to explore and acknowledge their concerns
	2.6 Identify *indicators of risk* to self or others and respond according to the degree and nature of the risk
	2.7 Document and report outcomes of debriefings in accordance with organisation standards and procedures
	2.8 Identify and promptly respond to colleagues needing additional support and refer in accordance with organisation guidelines

Assessment Requirements for CHCMGT005 Facilitate workplace debriefing and support processes

Modification History

Release	Comments
Release 2	This version was released in *CHC Community Services Training Package release 3.0*. Amended modification history and mapping. Equivalent outcome.
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to performance criteria. New evidence requirements for assessment including volume and frequency requirements. Significant changes to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has:

- provided ongoing support to least 2 different workers to address and monitor stress and emotional wellbeing
- facilitated at least 1 structured debriefing following an incident involving stress and identified colleagues requiring additional support and referred in accordance with organisation guidelines

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the work role. This includes knowledge of:

- organisation policies, procedures and resources relating to debriefing and crisis procedures
- dispute resolution policies and procedures
- legal and ethical considerations
- debriefing techniques:
  - best practice interventions
  - crisis intervention

© Commonwealth of Australia, 2025 HumanAbility

  - structured debriefing
  - internal and external referral sources
- indicators of significant issues being experienced by the worker and ways to respond
- impact of:
  - excessive stress
  - burn out
  - grief and loss
  - violent or threatening behaviour
- stress management
- internal and external support options and employee assistance programs
- specific limitations of work role, responsibility and professional abilities
- professional boundaries

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including workplace policies and procedures
- modelling of industry operating conditions, including group facilitation

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment Requirements for CHCMGT007 Work effectively with the Board of an organisation

Modification History

Release	Modification History
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. New Unit

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has:

- developed a Governance Policy for at least one organisation
- prepared Board Papers that included:
  - progress against the organisation's strategic plan and/or business plan
  - information and recommendations for at least 2 governance issues and 2 management issues
- participated in a Board meeting, including:
  - communicating concerns and recommendations for at least 2 issues
  - obtaining a decision on future directions for at least 2 issues
  - recording minutes

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the work role. This includes knowledge of:

- different types of Boards
- purpose, structure and requirements of business plan and strategic plans
- legal framework under which the organisation operates and the Memorandum and/or Articles of Association of the organisation
- roles and responsibilities of particular functions on the Board
- role policies and procedures play in the effective running of an organisation

© Commonwealth of Australia, 2025 HumanAbility

- separation of the governance (Board) and management (Chief Executive Officer) functions of the organisation and how the management issues are effectively functions of the Board that are delegated to the Chief Executive Officer (CEO)
- human resource management practices as they relate to the development of effective working relationships between paid staff and volunteer and/or paid Boards
- organisation's governance policy guidelines including policies and procedures in:
  - role of Board
  - Board structure
  - role of individual Directors
  - role of Chairperson
  - role of Company Secretary
  - role of Chief Executive Officer (CEO)
  - Board meetings
  - Board meeting agenda
  - Board papers
  - Board minutes
  - the Board calendar
  - delegation of authority
  - monitoring
  - strategy formulation
  - service and advice
  - contacts
  - Chief Executive Officer (CEO) evaluation
  - Director protection
  - Board evaluation
  - Director development
  - Director selection and induction

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as, using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

CHCMHS001 Work with people with mental health issues

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Merged CHCMH301C/CHCMH411A. Significant changes to performance criteria. New evidence requirements for assessment including volume and frequency requirements.

Application

This unit describes the skills and knowledge required to establish relationships, clarify needs, and then work collaboratively with people who are living with mental health issues.

This unit applies to support workers in contexts outside the mental health sector, but who come into contact with people with mental health issues. The services and support provided are not mental health specific.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Establish respectful relationships with people with mental health issues	1.1 Communicate in a way that develops and maintains respect, hope, trust and self-direction 1.2 Work in a way that reflects and prioritises the person's right to self define and direct their own recovery 1.3 Recognise and respect the person's social, cultural and spiritual differences 1.4 Support the person to understand and exercise their

	rights
	1.5 Maintain confidentiality and privacy of the person within organisation policy and protocols
2. Determine the needs of people with mental health issues	2.1 Gather and interpret information about the person's needs from the person and other agreed sources
	2.2 Identify and discuss with the person services and strategies that support empowerment and recovery
	2.3 Support the person to express their own identity and preferences and avoid imposing own values and attitudes
	2.4 Identify duty of care and dignity of risk considerations in collaboration with the person
3. Work with people with mental health issues to meet aspirations and needs	3.1 Provide support that facilitates progress towards the person's goals in collaboration with the person and their care network
	3.2 Work in ways that uphold the person's rights
	3.3 Adapt service delivery within organisation policies and procedures to meet the person's specific needs and requirements
	3.4 Document interactions and services according to organisation policy and procedures
	3.5 Respond promptly and supportively to people experiencing distress or crisis
	3.6 Work within the limits of own knowledge, abilities and work role and make referrals to other services as indicated by the person's needs

Foundation Skills

The Foundation Skills describe those required skills (employability skills, language,

CHCMHS005 Provide services to people with co-existing mental health and alcohol and other drugs issues

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to performance criteria. New evidence requirements for assessment including volume and frequency requirements. Significant changes to knowledge evidence.

Application

This unit describes the skills and knowledge required to assess capacity to support people with co-existing mental health and alcohol and other drugs issues and to work collaboratively to provide support and facilitate links to other services.

This unit applies to work with people with co-existing mental health and alcohol and other drugs (AOD) assessments in a range of community services work contexts.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Assess capacity to provide support to a person with co-existing mental health and AOD issues	1.1 Recognise and respond to signs indicating that a person may have co-existing mental health and AOD issues 1.2 Identify own service provision and possible agency programs or interventions suitable for a person with dual diagnosis

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.3 Assess the impact and nature of co-existing conditions on the person, including their social, financial and legal status
	1.4 Work with the person to understand their readiness, motivation, priorities and goals for recovery in relation to both their mental health and alcohol and other drug issues
	1.5 Research or consult with specialist services, as needed, to gather additional specific information about the relevant AOD substances and their interactions or possible impacts on someone with mental health issues
2. Work collaboratively to provide support services to address co-existing issues	2.1 Build an effective working relationship with the person
	2.2 Discuss with the person their existing services and supports, and their perspective on collaboration or coordination across services
	2.3 Gather and review information on available service options and approaches with the person
	2.4 Support person to make informed decisions about approaches, including resources and services
	2.5 Develop and document a plan with the person that reflects choices made
	2.6 Work collaboratively with the person to facilitate the implementation of appropriate strategies, services and resources
3. Facilitate links to further care	3.1 Identify issues that are outside the scope of the service and/or the scope of the worker
	3.2 Collaboratively identify appropriate service and other support options with the person
	3.3 Support positive decision making to assist the person to make informed choices about recovery options
	3.4 Work collaboratively with the person to determine referral options, and responsibilities and consents required

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	3.5 Make referrals in consultation with the person and in line with organisation protocols
	3.6 Follow up and evaluate referrals to ensure they have been effective
4. Collaborate with the person to minimise risk	4.1 Work collaboratively with the person to proactively identify potential risks to safety of person, workers and others
	4.2 Prevent risks by identifying triggers, strategies to manage risks and contingency options
	4.3 Use evidence based de-escalation techniques, conflict resolution and negotiation skills to manage conflict
	4.4 Identify emergency situations and seek immediate assistance
	4.5 Comply with laws, relevant ethical guidelines and policy requirements that affect duty of care and dignity of risk
5. Review and report on support provided	5.1 Develop and maintain records of services provided, decisions made and follow up actions in collaboration with the person
	5.2 Communicate relevant information to work colleagues and other people working with the person, with the persons consent
	5.3 Reflect on own role in providing support and use learning to enhance future practice
	5.4 Seek advice, supervision and debriefing from workplace supervisor based on identified needs

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- worked collaboratively to identify, plan, implement and monitor family and carer participation in the recovery processes for at least 3 different people
- used effective communication with both the person, their and family/carers
  - reflective listening and responding
  - development of empathy and rapport
  - recognition of non-verbal triggers
  - negotiation and conflict resolution techniques

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations (international, national, state/territory and local) regarding consumer and carer participation in planning and recovery, and how these are applied in organisations and individual practice:
  - codes of practice
  - discrimination
  - dignity of risk

© Commonwealth of Australia, 2025 HumanAbility

- duty of care
- human rights
- informed consent
- mandatory reporting
- practice standards
- privacy, confidentiality and disclosure
- policy frameworks
- records management
- rights and responsibilities of workers, employers and individuals accessing the service
- specific mental health legislation and its impact on individual workers
- work role boundaries – responsibilities and limitations:
  - role of other workers
  - roles of family and carers
- work health and safety

- values and principles of the mental health sector, including:
  - recovery
  - recovery oriented practice
  - health promotion and prevention
  - holistic approach
  - empowerment/disempowerment
  - access and equity
  - early intervention
  - rights
  - social justice and inclusion
  - citizenship
- principles and practices underpinning consumer and carer participation in recovery and service provision
- available consumer and carer services and resources

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as, using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

CHCPOL001 Contribute to the review and development of policies

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Merged CHCPOL402C/CHCPOL301B. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to review existing policies, consult with stakeholders on potential changes and write reports to inform policy development.

This unit applies to workers who interact with clients and external stakeholders and have input to the development of organisation policies and procedures under broad guidance from others.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
1. Review existing policies	1.1 Identify organisation policies and assess them for relevance, currency and effectiveness in current work 1.2 Identify and evaluate the impact of the broader policy context

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	1.3 Establish key stakeholders to be consulted about potential policy changes
2. Consult with others regarding change	2.1 Plan consultation methods relevant to the client group and organisation
	2.2 Develop clear documentation to support the consultation process
	2.3 Explain policy information to clients and other stakeholders, involving translation services according to need
	2.4 Consult with clients and other stakeholders about impact of policy and potential changes
	2.5 Promote informed policy debate enabling exchange of views and information between clients and other stakeholders
3. Contribute to policy advice	3.1 Collate and analyse findings of research and consultation processes
	3.2 Evaluate factors impacting on quality or outcomes of research or consultation and incorporate in reports
	3.3 Draft reports using language and format appropriate to audience, purpose and context
	3.4 Incorporate reasoned argument and substantiated evidence into report
	3.5 Provide draft report to stakeholders and decision makers for consideration
	3.6 Present report in line with organisation standards

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this

Assessment Requirements for CHCPOL001 Contribute to the review and development of policies

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Merged CHCPOL402C/CHCPOL301B. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- contributed to the review and development of policies for at least 1 organisation, taking account of:
  - broader industry or government policy context
  - legislative and regulatory impacts
- engaged in consultation with at least 3 different clients and/or external stakeholders
- prepared at least 1 report documenting findings and recommendations for the development or revision of policies and procedures

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical context (international, national, state/territory, local) for policy review and development in the sector of work:
  - codes of practice
  - duty of care
  - human rights
  - privacy, confidentiality and disclosure
  - policy frameworks

© Commonwealth of Australia, 2025 HumanAbility

  - rights and responsibilities of workers, employers and clients
  - work health and safety
- current industry developments and context for policy development
- individual organisation policies impacting on the worker, the organisation and its target groups
- ways to assess the effectiveness of current policies
- basic research methodologies and tools:
  - desk-based
  - quantitative
  - qualitative
- consultation methodologies and their appropriateness for different audiences:
  - surveys
  - interviews
  - focus groups
- type and features of documentation/information used to support consultation processes
- report formats and structures
- report writing techniques

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including organisation policies, procedures and data
- modelling of industry operating conditions, including:
  - consultation activities with real people
  - interactions with supervisors
  - presence of timelines, budgets and deadlines

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

CHCPOL002 Develop and implement policy

Modification History

Release	Comments
Release 2	This version was released in *CHC Community Services Training Package release 3.0.* Amended modification history and mapping. Correction on number of element 3. Equivalent outcome.
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to research, develop and implement new policy initiatives.

This unit applies to workers who are directly responsible for driving new policy directives across a business unit, team or service.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
1. Research new policy initiatives	1.1 Evaluate existing policies to determine their currency and relevance 1.2 Evaluate current policy trends and their impact on policy development

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
	1.3 Complete research and consultation in accordance with organisation policies and procedures
	1.4 Facilitate open constructive discussion about policy issues and their possible resolution
2. Draft policies	2.1 Select and use policy formats and structures suited to policy users
	2.2 Draft policies that reflect the culture, values and objectives of the organisation
	2.3 Clearly and logically articulate policy requirements and other information that supports policy statements
	2.4 Develop plans for policy resourcing, implementation and review
3. Test draft policies	3.1 Develop and implement consultation mechanisms for draft policies
	3.2 Identify policy implementation issues with key stakeholders
	3.3 Modify draft policies according to outcomes of consultation
	3.4 Give sufficient notice to those affected by policy changes
4. Develop policy proposals	4.1 Prepare policy materials that support implementation and facilitate stakeholder understanding and acceptance of changes
	4.2 Present policy proposals to decision-makers according to organisation requirements
	4.3 Seek and gain formal approval according to organisation requirements
5. Implement and review policies	5.1 Develop policy implementation plan that maximises impact of new and revised policies
	5.2 Develop and use strategies that facilitate wide promotion and dissemination of policy information

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
	5.3 Implement evaluation plan to ensure ongoing review of policies
	5.4 Review policies in accordance with organisation policies and procedures
	5.5 Obtain and respond to stakeholder feedback during marketing, promotion and implementation of policies and use learning to inform further review of policies

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for CHCPOL002 Develop and implement policy

Modification History

Release	Comments
Release 2	This version was released in *CHC Community Services Training Package release 3.0*. Amended modification history and mapping. Correction on number of element 3. Equivalent outcome.
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- researched, drafted, developed and implemented at least 1 policy initiative for at least 1 business unit or organisation
- engaged in consultation with at least 3 different stakeholders, including:
  - individuals
  - groups or organisations

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical context (international, national, state/territory, local) for policy development in the sector of work:
  - codes of practice
  - duty of care
  - human rights

© Commonwealth of Australia, 2025 HumanAbility

    - privacy, confidentiality and disclosure
    - policy frameworks
    - rights and responsibilities of workers, employers and clients
    - work health and safety
- current industry developments and context for policy development, including funding body requirements
- policy trends at global, national, state/territory and local levels
- organisation strategic focus and philosophy within which policies are developed
- key stakeholders at local, state/territory and national level
- principles and practices of policy development and implementation:
    - research - methodologies and tools
    - consultation
        - methodologies and appropriateness for different audiences
        - types and features of documentation/information used to support consultation
        - stakeholder engagement and management
    - approval processes
    - structures and formats for policy documents
    - implementation considerations and processes
    - evaluation and review
- report writing techniques

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
    - organisation policies and procedures
    - organisation data
- modelling of industry operating conditions, including:
    - consultations with organisation stakeholders
    - interactions with management and decision-makers

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

CHCPOL003 Research and apply evidence to practice

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTCOM502/CHCPOL501A. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to establish the information need, gather information and critically analyse the information for relevance to own work.

This unit applies to health and community service workers who need to research existing information to support and improve their work practice. It does not cover primary research.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
1. Plan information gathering activities	1.1 Identify situations where research may be required to support and improve own work practice 1.2 Evaluate current trends in own area of practice 1.3 Establish and define research objectives 1.4 Identify and access credible sources of data and evidence

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
2. Gather information	2.1 Evaluate and select methods of gathering information
	2.2 Gather information using a systematic approach
	2.3 Establish relevance of information according to objectives and work requirements
	2.4 Facilitate analysis by organising information in a way that supports its analysis and future use
3. Analyse information	3.1 Prioritise information based on the information need
	3.2 Compare and contrast different sources of information
	3.3 Assess the strength, relevance, reliability and currency of the information in the context of own work
	3.4 Assess the feasibility, benefits and risks associated with the information
	3.5 Make and document conclusions based on findings
4. Use information in practice	4.1 Assess ways in which different aspects of information may be used
	4.2 Use information and learning from research to identify potential areas for change in current practice
	4.3 Identify issues that require further research and evaluation
	4.4 Develop actions to address outcomes of research

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for CHCPOL003 Research and apply evidence to practice

Modification History

Release	Comments
Release 2	This version was released in *CHC Community Services Training Package release 3.0*. Amended modification history and mapping. Equivalent outcome.
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- completed research activities and developed actions based on research outcomes for at least 2 different issues within own field of practice

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- different reasons for undertaking research:
  - comparison
  - hypothesis testing
  - trend identification
  - own knowledge extension
  - strengthen quality of own practice
- sources of information, including established information sources and current research within own area of practice

© Commonwealth of Australia, 2025 HumanAbility

- principles and models of evidence-based practice, including:
  - rules of evidence
  - duty of care requirements associated with evidence-based practice
  - differences between evidence-based practice, continuous quality improvement and research
- ways to evaluate the validity of information sources
- research processes and how to use them
- cultural and ethical considerations for research
- processes that support analysis of information and how to use them, including:
  - comparing
  - contrasting
  - challenging
  - reflecting
  - distinguishing relevant from irrelevant
  - drawing interdisciplinary connections

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including current research, evidence-based studies and industry intelligence

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

CHCPRP001 Develop and maintain networks and collaborative partnerships

Modification History

Release	Comments
Release 2	This version was released in *CHC Community Services Training Package release 3.0*. Correction of modification history and mapping - CHCNET301D and CHCNET404B removed
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Merged CHCNET402B/ CHCNET501C/ CHCNET503D. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to identify networking and collaboration needs and develop formal and informal partnerships to enhance service delivery and improve professional practice.

This unit applies to work in all industry sectors, and to individuals who take pro-active responsibility for improving collaboration between workers and organisations.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
1. Identify networking and collaboration needs and opportunities	1.1 Evaluate the ways in which individual and organisation performance may be improved through collaboration 1.2 Identify and prioritise organisation and individual needs 1.3 Identify gaps in networks and collaborative practice and identify required action to fill the gap
2. Develop collaboration strategies	2.1 Gather and review information about relevant services, organisations and key people 2.2 Pro-actively initiate relationships with other inter and intra sectoral professionals and organisations 2.3 Share information and resources, where possible, with other organisations to overcome duplication in service delivery 2.4 Maintain currency and accessibility of information 2.5 Define and document the type and level of collaboration, and negotiate with the relevant people
3. Work collaboratively	3.1 Identify opportunities that meet client, personal and organisation goals 3.2 Plan and implement integrated projects and service delivery 3.3 Liaise with staff from relevant organisations on a formal and informal basis
4. Represent the organisation	4.1 Promote a positive image of the organisation at available opportunities 4.2 Communicate issues, policies and practices of the organisation in appropriate formats 4.3 Implement confidentiality measures that protect client, organisation and network
5. Maintain and enhance networks and collaborative	5.1 Maintain networks and other work relationships to provide identifiable benefits for clients and the

CHCPRP002 Collaborate in professional practice

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. New unit.

Application

This unit describes the skills and knowledge required to establish, implement and evaluate collaborative practice.

This unit applies to health and community service practitioners who may collaborate on the delivery of services to individual clients, groups of clients, communities or sub-populations. They may work individually with shared clients, together with individual clients or work on projects or programs that address the needs of groups or sub-populations. Work is self-directed.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
1. Incorporate collaboration into own practice	1.1 Establish and maintain sustainable relationships based on mutual respect and trust 1.2 Cultivate collaborative communities and partnerships based on the potential benefits for clients, self and others 1.3 Reflect on the blocker**s** to effective collaboration and adopt personal philosophies and behaviours in response

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	1.4 Source, review and use information sources that support collaboration
	1.5 Identify and pursue opportunities for collaboration
2. Establish collaborative approaches	2.1 Establish shared understandings of objectives and parameters
	2.2 Agree on ways of working that acknowledge the different contributions of those involved and the need for an holistic approach
	2.3 Acknowledge and integrate ethical approaches to information sharing and privacy
	2.4 Identify and respond to professional and practical considerations including intellectual property issues
	2.5 Organise, allocate and document tasks and activities in a cost-effective and equitable manner with clear, agreed outcomes
3. Implement collaborative approaches	3.1 Promote the confidence and support of others by demonstrating a high standard of personal engagement and professionalism
	3.2 Contribute and share own professional expertise
	3.3 Identify and act on opportunities to extend own expertise and learn from others as work progresses
	3.4 Challenge, test and share ideas in a supportive way
	3.5 Embrace and reflect on challenges and complexities and take responsibility for finding solutions
	3.6 Honour own commitments and take responsibility for outcomes
4. Evaluate collaboration	4.1 Engage in an open process of review and evaluation with others
	4.2 Reflect on own level of participation, relationships with others, and personal behaviour
	4.3 Identify and seek opportunities to refine and expand own expertise

© Commonwealth of Australia, 2025 HumanAbility

Assessment Requirements for CHCPRP002 Collaborate in professional practice

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. New unit.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- established, implemented and evaluated a collaborative approach to at least 3 different projects or service delivery situations, demonstrating skills to address complex and interrelated challenges using:
  - collaborative communication
  - critical thinking
  - problem solving

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations for collaborative practice, including:
  - copyright and intellectual property
  - privacy, confidentiality and disclosure
- types of collaboration and collaborative projects that apply to particular areas of community services and health practice
- different services models and professional philosophies in community services and health practice
- types of behaviours that support effective collaborative relationships
- benefits of collaboration for individuals, organisations and communities, including the value of collaboration as a problem-solving tool

© Commonwealth of Australia, 2025 HumanAbility

- types of tools and documents to support the establishment, implementation and maintenance of collaborative practice
- typical blockers to the collaborative process, particularly in a service delivery context
- different roles played by people in a collaborative process
- typical problems encountered in a collaborative process and how they may be avoided or resolved
- ways of evaluating projects in terms of their success as collaborative undertakings

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources
- modelling of industry operating conditions, including presence of situations that allow interactions with individuals and organisations

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

ELEMENT	PERFORMANCE CRITERIA
	organisations or other relevant sources
2. Enhance own practice	2.1 Determine improvements needed based on own evaluation and feedback from others
	2.2 Identify potential support networks both internal and external to the organisation
	2.3 Seek specialist advice or further training where need is identified
	2.4 Recognise requirements for self-care and identify requirements for additional support
	2.5 Devise, document and implement a self development plan that sets realistic goals and targets
3. Facilitate ongoing professional development	3.1 Access and review information on current and emerging industry developments and use these to improve practice
	3.2 Assess and confirm own practice against ethical and legal requirements and opportunities
	3.3 Identify and engage with opportunities to extend and expand own expertise
	3.4 Regularly participate in review processes as a commitment to upgrading skills and knowledge

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for CHCPRP003 Reflect on and improve own professional practice

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- undertaken a structured process to reflect on and improve own practice and created 1 personal development plan that includes:
  - goals
  - timeframes
  - ways of measuring progress

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations for reviewing and improving own practice, including:
  - codes of practice
  - duty of care
  - rights and responsibilities of workers and employers
  - work role boundaries – responsibilities and limitations
- models and processes of professional reflection
- professional development opportunities, including:
  - industry networking
  - professional associations
  - training requirements and options

© Commonwealth of Australia, 2025 HumanAbility

    - informal and formal ways of learning and developing
- principles and techniques for:
    - creating a personal development plan
    - personal goal setting
    - setting realistic timeframes
    - measuring progress and performance
- types of work methods and practices which can improve performance
- learning styles and how they relate to different individuals

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as, using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

CHCPRP004 Promote and represent the service

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to promote and represent the organisation to the community, including developing responses to negative publicity and perception.

The unit applies to work in all industry sectors, and to individuals who work with significant autonomy, most likely in management roles.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*

© Commonwealth of Australia, 2025 HumanAbility

1. Promote the service to the community	1.1 Identify, access and analyse information that informs promotional activities
	1.2 Identify and target community stakeholders and their particular interests
	1.3 Provide accurate and positive information to the community about the service
	1.4 Facilitate opportunities for the community to view and contribute to the service
	1.5 Target communications to areas where the profile needs raising or clarifying
	1.6 Prepare and use community information materials and resources
	1.7 Develop information campaigns to address particular issues
	1.8 Encourage staff to participate in appropriate forums
2. Represent the service	2.1 Clearly and accurately communicate the philosophy, purpose, policies and procedures of the service within scope of own role
	2.2 Promote the organisation consistently to external bodies that affect service operations, role and funding
	2.3 Identify and use opportunities for promotion constructively
	2.4 Respond to, and follow up questions and concerns about the service
	2.5 Represent the service's need for resources to appropriate forums and organisations
	2.6 Represent the perspective and experience of the service to relevant forums and organisations
3. Respond to negative publicity and perceptions	3.1 Seek advice from stakeholders and supporters in the community
	3.2 Nominate a spokesperson to represent the service
	3.3 Ensure communications used do not exacerbate existing negative perceptions
	3.4 Review organisation policies in light of issues raised
	3.5 Analyse negative publicity and perceptions about the

Assessment Requirements for CHCPRP004 Promote and represent the service

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- represented at least 1 community sector organisation and its philosophies, purpose and policies to the community through a range of methods, including at least 1 of each of the following:
  - written materials, publications or fact sheets
  - forums, workshops or presentations
- developed strategies to address at least 2 examples of negative publicity or perception

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations for service promotion and representation, including:
  - copyright and intellectual property
  - privacy, confidentiality and disclosure
- promotion and representation:
  - similarities and differences
  - when and how each are used
  - key stakeholders involved
- professional networks in the area of work

© Commonwealth of Australia, 2025 HumanAbility

- industry structure and interrelationships between different organisations, both public and private
- current issues, concerns and debates relevant to the area of work
- key aspects of planning for community promotion and engagement:
  - setting objectives
  - profiling the community/stakeholders
  - identifying potential partnerships
  - developing consultation and communication strategies:
    - styles and types of communication and their suitability for different situations
    - different types of media
    - different levels of community involvement
- strategies for representation of the service
- techniques and considerations for developing written information resources
- fundamental principles of public relations and issues management

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including organisation information as basis for activities
- modelling of industry operating conditions, including presence of situations that allow interactions with individuals and organisations

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

CHCPRP005 Engage with health professionals and the health system

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency. Significant change to knowledge evidence

Application

This unit describes the skills and knowledge required to work within the health care system and engage effectively with other health professionals, including writing referral reports.

This unit applies to individuals working in health or community services who work autonomously with clients in the provision of services.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
1. Use health care systems and services	1.1 Identify health care systems and services with links to own practice 1.2 Research and maintain information about other health services to support own practice 1.3 Offer current and accurate information about other health care services 1.4 Provide clear and accurate information to clients

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
	about their financial and eligibility issues
	1.5 Identify and use opportunities to maintain, extend and update knowledge
2. Interact with health professionals	2.1 Establish effective relationships with workers from different sectors and levels of the industry according to work role
	2.2 Use accepted industry language and terminology when sharing information
	2.3 Work collaboratively to both seek and share information
3. Make referrals to health professionals	3.1 Determine need for referral to other professional health services based on client needs and assessment indications
	3.2 Clearly communicate the need for referral to the client and explain rationale
	3.3 Ensure referral occurs with consent of client and within confidentiality standards
	3.4 Write referral report, including clear and accurate information about results of own testing or assessment
	3.5 Structure information logically, using language that will be understood by the report recipient
	3.6 Make recommendations within scope of own practice and expertise

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

CHCPRT001 Identify and respond to children and young people at risk

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *CHC Community Services Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment.

Application

This unit describes the skills and knowledge required to support and protect children and young people who are at risk of harm. This work occurs within legislative and policy frameworks and carries a duty of care responsibility.

This unit applies to workers in a range of job roles providing services to children and young people including in community services and health contexts.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*

© Commonwealth of Australia, 2025 HumanAbility

1. Implement work practices which support the protection of children and young people	1.1 Identify children and young people at risk of abuse or neglect by observing signs and symptoms, asking open and non-leading questions, being aware of protective issues and using child protection procedures where appropriate 1.2 Respond to disclosure, information or signs and symptoms in accordance with state legislative responsibilities and the service policies and procedures 1.3 Routinely employ child-focused work practices to uphold the rights of the child and encourage them to participate in age-appropriate decision-making 1.4 Employ communication and information-gathering techniques with children and young people in accordance with current recognised good practice 1.5 Ensure decisions and actions taken are within own level of responsibility, work role, state legislation and service policies and procedures
2. Report indications of possible risk of harm	2.1 Accurately record relevant specific and general circumstances surrounding risk of harm in accordance with state legislation, service policies and procedures and ethics 2.2 Promptly record and report risk-of-harm indicators, including the circumstances surrounding the risk of harm according to service policies and procedures 2.3 Ensure writing in reports is non-judgemental 2.4 Work collaboratively with relevant agencies to ensure maximum effectiveness of report
3. Apply ethical and nurturing practices in work with children and young people	3.1 Protect the rights of children and young people in the provision of services 3.2 Identify and seek supervision support for issues of ethical concern in practice with children and young people 3.3 Employ ethical and nurturing practices and observe professional boundaries when working with children and young people 3.4 Recognise and report indicators for potential ethical concerns when working with children and young

Assessment Requirements for CHCPRT001 Identify and respond to children and young people at risk

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *CHC Community Services Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has completed the following tasks at least once:

- implemented work practices which support the protection of children and young people, including:
  - complying with regulations, legislations and duty of care responsibilities
  - employing child-focused work practices to uphold the rights of children and young people
  - maintaining confidentiality
  - providing appropriate responses in the protection of children and young people
- read and interpreted the procedures for reporting children at risk in line with organisational expectations and legislative requirements.

© Commonwealth of Australia, 2025 HumanAbility

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the work role. These include knowledge of:

- indicators of the different types and dynamics of abuse as they may apply to age, gender, disability, culture and sexuality
- child protection legislation in the relevant state or territory
- United Nations Convention on the Rights of the Child
- impact of risk of harm
- duty of care responsibilities
- trauma-informed care
- ethical considerations including:
  - approaches that incorporate the conventions on the rights of the child, and human rights
  - obligations as defined by the job specification and employing organisation
  - obligations as stated in relevant codes of practice, licensing, accreditation registration to professional bodies, service agreements
  - principles of ethical decision-making
- overview of legal system and how it pertains to the job role, in particular:
  - child protection system, including reporting protocols, responses to reporting and interagency policies
  - state/territory requirements and processes for notifying suspected abuse and reporting process
  - statutory and policy requirements relating to job role
- organisation standards, policies and procedures.

Assessment Conditions

Skills must be demonstrated in the workplace.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

© Commonwealth of Australia, 2025 HumanAbility

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

CHCPRT002 Support the rights and safety of children and young people

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *CHC Community Services Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment.

Application

This unit describes the skills and knowledge required to address duty of care requirements, working within an ethical framework and applying relevant legislation, codes of conduct, international agreements (such as the Convention on the Rights of the Child), policies and procedures in identifying, responding and supporting children's and young people's rights and safety.

This unit applies to workers involved in delivering services to children and young people in a wide range of community services and work contexts.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 HumanAbility

Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Implement work practices which support the protection of children and young people	1.1 Comply with lawful instructions, regulations, duty of care and boundaries of practice in all work activities 1.2 Routinely employ child-focused work practices to uphold the rights of children and young people to participate in decision-making where it is age appropriate 1.3 Use communication and information-gathering techniques with children and young people in accordance with current recognised good practice 1.4 Ensure decisions, responses and actions taken are appropriate and within own work role, legislative requirements and organisation procedures 1.5 Continually update own knowledge and skills as required to work effectively and participate in practice supervision processes 1.6 Maintain confidentiality as appropriate
2. Identify indicators of abuse and act appropriately	2.1 Identify children and young people at risk of harm by routinely implementing child protection procedures when appropriate 2.2 Respond to disclosure in accordance with accepted standards, techniques and legislative obligations 2.3 Gather and record information about the child's or young person's behaviour and identify uncharacteristic behaviour 2.4 Monitor the circumstances of children who are identified as highly vulnerable to abuse 2.5 Promptly report risk of harm indicators in accordance with statutory and organisation procedures 2.6 Work collaboratively with relevant agencies to ensure maximum effectiveness of report
3. Apply ethical practices and safeguard the rights and interests of children and young people	3.1 Identify and seek supervisor support for issues of ethical concern in practice with children and young people 3.2 Develop ethical practices for implementing professional boundaries consistent with child protection legislation in relevant jurisdiction 3.3 Recognise indicators for potential ethical concerns when working with children and young people

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	3.4 Report unethical behaviour according to organisational procedures and policies

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

- Learning - in order to review and plan updates of own skills

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

CHCPRT003 Work collaboratively to maintain an environment safe for children and young people

Modification History

Release	Comments
Release 4	Correction of mapping and metadata CHCRF301E removed. Equivalent outcome.
Release 3	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 2	Changes to metadata and links. Equivalent outcome.
Release 1	This version was released in *CHC Community Services Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Supersedes CHCPROT429A. Significant changes to elements and performance criteria. New evidence requirements for assessment.

Application

This unit describes the skills and knowledge required to work within an established child protection framework. It also covers standard protocols to maintain a safe environment for children and young people.

This unit applies to a range of child protection work occurring in an interagency framework of practice.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

© Commonwealth of Australia, 2025 HumanAbility

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Implement principles of child protection	1.1 Perform work requirements according to legal, political and community expectations of child protection work 1.2 Demonstrate understanding of the child protection system, roles and responsibilities of key agencies 1.3 Recognise the impacts of child abuse and neglect in the processes of investigation and assessment
2. Apply agreed protocols and guidelines for collaborative practice	2.1 Conduct all work within agreed guidelines of collaborative practice 2.2 Prioritise experiences of child when supporting needs, rights and interests of the child 2.3 Acknowledge and manage challenges of child protection work in a collaborative practice framework 2.4 Apply effective safe work and self-management strategies in child protection duties
3. Work collaboratively with children and families from diverse backgrounds	3.1 Identify risk factors for families and support them to address these risks 3.2 Respond appropriately to children and families with culturally and linguistically diverse backgrounds 3.3 Develop effective working relationships with agencies supporting children and families from diverse backgrounds 3.4 Liaise and consult with other agencies and personnel as appropriate 3.5 Provide referrals to support families

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

- Oral communication – in order to facilitate collaborative discussions with children and

Release 1	This version was released in *CHC Community Services Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Supersedes CHCPROT429A. Significant changes to elements and performance criteria. New evidence requirements for assessment.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has completed the following tasks:

- worked collaboratively with at least two families, including:
  - applying a range of collaborative work practices when working with families, children, young people, colleagues and other agencies
  - adhering to child protection principles and work practices while performing work role
  - applying self-management strategies and safe work principles
  - communicating and responding appropriately to children and families
  - supporting families to ensure that the child or young person is safe
- performed the activities outlined in the performance criteria of this unit during a period of

© Commonwealth of Australia, 2025 HumanAbility

at least 120 hours of work in at child protection service.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

These include knowledge of:

- legal, social and political context of child protection work
- interagency framework and agreed protocols
- roles and responsibilities of key agencies and personnel
- effects of child abuse and neglect and its impact on the process of investigation and assessment
- agreed guidelines of collaboration
- worker safety and self-management principles
- cultural and linguistic differences
- organisation standards, policies and procedures.

Assessment Conditions

Skills must be demonstrated in the workplace

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

CHCSET001 Work with forced migrants

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to performance criteria New evidence requirements for assessment including volume and frequency requirements Significant changes to knowledge evidence

Application

This unit describes the skills and knowledge required to work with, and for, refugees within an ethical, social, political and economic context.

This unit applies to work within an agency, directly or indirectly, involved with the provision of services to forced migrants, people with *Refugee or special humanitarian visas*, those granted refugee status in Australia, business and skilled migrants whose prime motivation for leaving their country was to escape violence and/or persecution, and the immediate family members of anyone from the aforementioned groups.

Workers will have limited responsibilities and work within established guidelines to develop, monitor and provide support and services in a range of areas, including but not limited to, settlement, accommodation, counselling, financial advice, family services, youth work, income support, education, health care and crisis intervention.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
Elements define the essential	*Performance criteria describe the performance needed to*

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	**PERFORMANCE CRITERIA**
outcomes	*demonstrate achievement of the element.*
1. Develop a professional rapport with people who are forced migrants	1.1 Consider cultural sensitivities in communication techniques and adapt style and language to accommodate different cultural values and practices 1.2 Identify how one's own ethnicity, religion, class and gender will affect interactions with clients and modify approach appropriately 1.3 Identify the communication needs of clients who are newly arrived, traumatised and confused and modify approach appropriately 1.4 Identify where an interpreter is needed and work to ensure that appropriate interpreter services are accessed
2. Plan settlement services	2.1 Identify current issues which may impact on own work or organisation 2.2 Collect, discuss and use the views of key stakeholders and representatives from relevant target groups when determining service requirements 2.3 Develop and maintain links with workers with complementary roles in the provision of settlement services 2.4 Evaluate issues in relation to a person's culture, family background and interest and modify plan appropriately 2.5 Identifying specific needs of individuals and determine learning program requirements 2.6 Document and agree plan with client and other relevant service providers or stakeholders
3. Address issues associated with people who are forced migrants	3.1 Provide support to clients using a collaborative approach 3.2 Discuss and provide information regarding the range of services available in Australia and the importance of using these services 3.3 Take into account the culture, religion, gender and experiences of the person in all actions and decisions 3.4 Recognise trauma and refer to appropriate personnel or services

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	3.5 Support clients to deal with loss and grief
	3.6 Support clients to deal with discrimination from both the mainstream community and from other ethnic groups
	3.7 Support client to make appropriate links both within their own community and within the broader Australian community
	3.8 Refer clients to other service providers as required
4. Monitor and review support	4.1 Obtain ongoing feedback from clients in relation to service and support
	4.2 Evaluate progress in relation to service provision plan
	4.3 Monitor stress and emotions of self and colleagues and implement strategies to maintain wellbeing
	4.4 Identify opportunities for improved service provision and modify approach

Foundation Skills

The Foundation Skills describe those required skills employability skills, language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for CHCSET001 Work with forced migrants

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to performance criteria New evidence requirements for assessment including volume and frequency requirements Significant changes to knowledge evidence

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- developed, delivered and monitored the delivery of a settlement plan for 3 groups of forced migrants

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations (national, state/territory, local) relevant to settlement services and how these are applied in organisations and individual practice:
  - privacy, confidentiality and disclosure
  - mandatory reporting
  - conflict of interest and maintaining professional boundaries
  - discrimination
  - access and equity
- drivers and issues associated with migration and forced migration, including:
  - what migration is and what forms it takes
  - causes and impacts of forced migration
  - knowledge of the international protection regime

© Commonwealth of Australia, 2025 HumanAbility

  - Australia's response to forced migration
  - immigration processes, including how and why people selected to come to Australia
  - meaning of various visa subclasses
  - the profile of the current humanitarian program entrants, their experience and the impact of this on their settlement needs
- settlement process, practices and policies in Australia, including:
  - current and historical context of work in this sector
  - social, political and economic context in which the sector operates
  - what is settlement: current theories, phases and indicators
  - practical and emotional settlement needs of new migrants
  - services available to new migrants and how these services can be accessed
  - settlement plans and how they are developed
  - government service principles
- service delivery frameworks
- refugee experience and recognising effects of grief, loss, stress, torture and trauma
- post traumatic stress disorder
- the impact of migration on the family and the impact of change roles within the family
- the importance of identity, including recognising the significance of giving clients a chance to define themselves according to either their ethnicity or their current circumstances
- availability of resources and assistance within, and external to, the organisation, including relevant referral networks and how to access their services
- strategies for the worker to maintain their own well being and to support the well being of colleagues and clients
- international and Australian perspectives on gender, class, culture and religion

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as, using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment Requirements for CHCSOH001 Work with people experiencing or at risk of homelessness

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to performance criteria New evidence requirements for assessment including volume and frequency requirements Significant changes to knowledge evidence Additional assessor requirements

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- worked collaboratively with 3 people (including women and children experiencing family violence) who are experiencing homelessness or are at risk of becoming homeless, to identify and address barriers and issues impacting on their ability to secure housing
- provided advice to 3 people in relation to options for key agencies and services that provide appropriate housing and accommodation services
- identified 1 child at risk of homelessness and followed organisation and legislative requirements for referral and reporting
- advocated on behalf of 1 person and supported the person to advocate on their own behalf to negotiate options, services and pathways to address barriers and issues impacting on their ability to secure or sustain housing

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- context within which the system of housing has developed in Australia
- different levels of government and their role in provision of housing

© Commonwealth of Australia, 2025 HumanAbility

- legal and ethical considerations (national, state/territory) relevant to social housing and how these are applied in organisations and in individual practice:
  - human rights
  - child protection
  - mandatory reporting
  - duty of care requirements and the law of negligence in delivering services to those experiencing homelessness or risk of becoming homeless
  - access and equity
  - privacy, confidentiality
- legal system:
  - courts
  - police powers
  - court reports
  - relevant state/territory residential tenancy tribunals
- principles and practice of:
  - community delivered service provision
  - holistic and client-centred service
  - client empowerment and disempowerment
- underpinning values and philosophies relevant to working with people who are experiencing homelessness or risk of becoming homeless
- cultural issues which impact on housing system for minority groups including newly arrived refugees and for Aboriginal and/or Torres Strait Islander people
- changing social, political and economic context in which homelessness occurs
- current and historical factors which impact on provision of housing
- gender context of homelessness
- range of consumers, consumer groups and stakeholders in relation to the Australian housing system, their demographics, needs, complexity of issues
- primary, secondary and tertiary definitions of homelessness
- structural causes which allow and maintain homelessness
- range of issues impacting on people who are experiencing homelessness or risk of becoming homeless
- specific issues facing individuals and existing services and outreach programs available to address their needs and rights
- risk and contributing factors of homelessness
- indicators of family violence, mental health issues, substance abuse and child protection issues
- the complexity surrounding family violence and legal requirements when dealing with people who are experiencing family violence
- housing options, range of tenures and the pathways of the homelessness service system, including crisis, transitional, community housing, public housing, housing associations, cooperatives
- private rental system
- own work role within the context of delivering services to homeless people

© Commonwealth of Australia, 2025 HumanAbility

- organisation's role within the context of the sector
- access pathways for transient, marginalised individuals
- case management framework

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as, using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must have experience working with homelessness or social housing.

CHCVOL002 Lead volunteer teams

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. New Unit

Application

This unit describes the skills and knowledge required to lead and develop teams of volunteers using a participative approach and in line with organisation standards for volunteer work.

This unit applies to volunteers who are responsible for leading small teams of other volunteers in a range of sectors.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Identify and allocate tasks for team	1.1 Identify team goals with team members 1.2 Identify tasks required to achieve goals 1.3 Identify team and individual safety responsibilities 1.4 Estimate time and resources needed to complete tasks safely 1.5 Collaborate with team members to allocate individual responsibilities within the team 1.6 Ensure designated team goals are met

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
2. Induct and develop others within the team	2.1 Present a positive image of the organisation to other volunteers 2.2 Assist with the induction of new volunteers into the organisation's mission, purpose, procedures, expectations 2.3 Follow up induction processes to ensure adherence to organisation policies and procedures
3. Use a participative approach to leading volunteers	3.1 Participate in team and provide assistance and support to team members as needed to ensure designated team goals are met 3.2 Seek, acknowledge and act on information and feedback provided by other team members in the work group 3.3 In consultation with team, evaluate team performance according to its goals 3.4 Provide ongoing constructive feedback to team 3.5 Give and receive supervisor feedback
4. Reflect on own performance	4.1 Apply principles of reflective practice to evaluate own performance according to team and personal goals and identify opportunities for continued performance improvement 4.2 Identify and access professional development opportunities to improve own leadership performance

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Assessment Requirements for CHCVOL002 Lead volunteer teams

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. New Unit

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has:

- volunteered as a team leader of at least 2 paid and/or unpaid staff for a period of at least 30 hours in an organisation with a structured volunteer program

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the work role. This includes knowledge of:

- relevant policies and procedures to assist other volunteers work in line with organisation policies and procedures
- relationship between paid and unpaid roles and how volunteers fit within the organisation
- *Universal declaration on volunteering* and current national volunteering codes and standards
- effective team work
- leadership styles
- delegation
- management structure and lines of authority

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as, using suitable facilities, equipment and resources.

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
with young people	of their experiences
	1.2 Foster communication exchanges that support the development of trust and rapport
	1.3 Process information about the young person's situation from their perspective
	1.4 Use a range of appropriate communication strategies to engage with young people
	1.5 Consider cultural sensitivities in communication techniques and adapt style and language to accommodate different cultural values and practices
	1.6 Maintain young person's confidentiality in the context that the young person is the primary stakeholder
2. Reflect understanding of youth cultures and subcultures and young person's own development	2.1 Consider youth culture and subcultures of the young person in all actions and decisions
	2.2 Consider the young person's individual development in all actions and decisions
	2.3 Evaluate issues in relation to young person's culture and modify approaches appropriately
	2.4 Select activities and resources to promote awareness, respect the young person and value diversity
	2.5 Establish guidelines that are relevant to the culture and background of the young person
	2.6 Assess the impact of own cultural values, cultural lens and ethnocentrism in youth work
3. Work with the young person as the focus	3.1 Apply youth-centred practices when working with young people
	3.2 Respect the rights, needs and responsibilities of the young person
	3.3 Explain worker rights and responsibilities to the young person as necessary
	3.4 Establish a professional relationship and boundary expectations with the client

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	3.5 Identify and manage power inequities in the professional relationship
	3.6 Apply principles of ethical decision-making in working with young people
4. Reflect on own practice and values	4.1 Identify opportunities to reflect on own interactions and practices with young people
	4.2 Recognise areas where own biases, background and opinions may have impacted on work with the young person
	4.3 Seek opportunities to address any concerns or areas for development

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

- Oral communication – in order to engage and establish collaborative, professional relationships with young people.

The remaining foundation skills essential to performance are explicit in the performance criteria of this unit.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Context for youth work	• centre-based work

© Commonwealth of Australia, 2025 HumanAbility

must include one or more of the following:	• drop-in centres, recreational facilities • housing and residential services • outreach and home visits, street, parks • schools • online youth work, web-based, emails, discussion rooms • telephone contact

Unit Mapping Information

No equivalent unit.

Assessment Requirements for CHCYTH001 Engage respectfully with young people

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *CHC Community Services Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has completed the following tasks at least once:

- applied youth-centred practices when working with young people, including:
  - using interpersonal skills to engage with at least three young people
  - applying engagement skills with young people with diverse range of presenting issues and experiences
  - applying principles of ethical decision-making to ethical dilemmas when the young person is the primary client
  - establishing and maintaining a professional relationship with at least one group of young people.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the

© Commonwealth of Australia, 2025 HumanAbility

task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

These include knowledge of:

- aspects of human behaviour and development related to young people, their personal and social development and relationships
- current issues facing young people and existing services to address their needs and rights
- different world views and the interrelationship of society, culture and the young person
- diversity in all forms – across cultural, sexuality, ability, socioeconomic and geographic spheres, and the experiences of migrants, refugees and asylum seekers
- own cultural values, cultural lens and ethnocentrism
- own work role within the context of the youth sector
- access and equity principles
- principles of ethical decision-making
- statutory frameworks in which the work role functions
- the impact of judgement-making skills in working with young people
- youth-centred practices with focus on the young person as the primary stakeholder
- youth cultures, social, political and economic and professional frameworks.

Assessment Conditions

Skills must be demonstrated in the workplace.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment Requirements for CHCYTH002 Work effectively with young people in the youth work context

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *CHC Community Services Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Changes to elements and performance criteria. New evidence requirements for assessment.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has completed the following tasks:

- followed effective processes for work with at least three young people by:
  - checking and analysing information for assessment of risks, special needs, significant changes, and personal and social developmental levels for young people
  - making decisions based on knowledge of the impact of cultural and personal values on behaviour and expectations
  - providing appropriate support and/or services
- provided supervision and care based on assessed risk and justifiable degree of care and concern
- responded to risks and incidents of varying degrees of severity
- used clear and reassuring communication relevant to the culture of young people.

© Commonwealth of Australia, 2025 HumanAbility

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

These include knowledge of:

- cultural practices which will have an impact on decisions made about what allowances are made and what rights are given and responsibilities expected
- current status of young people in the context of:
  - social and cultural context of youth
  - historical, economic, political and social contexts of young people
  - rights, needs and responsibilities of young people
  - risk-taking and social behaviour in young people
  - young people as primary client
  - changing contexts of young people
- processes for getting advice and assistance when there are ethical or professional issues
- relevance of the work role and functions to maintaining sustainability of the workplace, including environmental, economic, workforce and social sustainability
- impact of popular beliefs on values, attitudes and behaviour
- the organisation's codes of conduct or code of ethics/duty of care
- range of specialist support services and programs available to young people
- social, political, historical and economic contexts of the service response to the needs and interests of young people.

Assessment Conditions

Skills must be demonstrated in the workplace.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

CHCYTH003 Support young people to create opportunities in their lives

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *CHC Community Services Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment.

Application

This unit describes the skills and knowledge required to assist young people to identify the challenges and opportunities in their lives and to work towards their goals on an individual or group level.

This unit applies to work undertaken in all youth work roles where the young person is the primary client.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Create a relationship of trust and respect	1.1 Apply principles of youth work practice to facilitate safe individual or group processes for interaction 1.2 Identify the conditions necessary for young people to change and grow 1.3 Listen to and observe the young person's stories experiences, and behaviour to clarify concerns and needs 1.4 Encourage and support young people to identify relationships between their issues and social structures 1.5 Respect the young person's culture/s and way of interacting
2. Work with young people to identify their needs, rights, strengths, hopes and opportunities	2.1 Use a range of communication skills to identify and explore the young person's challenges, strengths and resources 2.2 Encourage the client to reframe their current circumstances to support their own understanding 2.3 Identify and acknowledge circumstances outside the young person's control 2.4 Support the young person to communicate their issues or problems in a way appropriate to their individual needs, background and culture 2.5 Take appropriate action to address immediate issues or concerns 2.6 Confirm own understanding of issues and opportunities with the young person
3. Identify goals with the young person	3.1 Use creative methods, processes and questions to consider and create possibilities 3.2 Establish with the young person their desired outcomes 3.3 Assist young people to explore future possibilities and ways of being 3.4 Identify barriers that hinder the way young people would like changes to take place

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
4. Develop and implement action plans	4.1 Use a range of youth work interventions to create future opportunities
	4.2 Explore additional resources needed to achieve goals
	4.3 Develop proposals and strategies for action plans
	4.4 Measure and ensure change is noticed
	4.5 Document intervention work as required

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Context for youth work must include one or more of the following:	• centre-based work • drop-in centres, recreational facilities • housing and residential services • outreach and home visits, street, parks • schools • online youth work, web-based, emails, discussion rooms • telephone contact

Assessment Requirements for CHCYTH003 Support young people to create opportunities in their lives

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *CHC Community Services Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has completed the following tasks:

- interacted, encouraged and supported at least two young people in both an individual and a group setting, including:
  - supporting the young people according to their circumstances and the objectives of each individual's desired goals, individual needs, risks and circumstances, including education and employment
  - supporting vulnerable young people and those with special needs and risks to participate in the decision-making and planning of actions and opportunities
  - creating future opportunities for the individuals using a range of youth work interventions and documented measures of change.

© Commonwealth of Australia, 2025 HumanAbility

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

These include knowledge of:

- aspects of human behaviour and development related to young people, their personal and social development and relationships
- statutory requirements and application of the concept of duty of care and child protection
- organisation reporting procedures and practice
- case planning practices and principles
- principles of effective communication and cultural practices, and customs of the community and the young people in the service
- relevant organisation procedures and policies related to program, service and personal support for young people, referral, reporting of young people's issues and experiences
- support services and specialists and their guidelines for access and service provision.

Assessment Conditions

Skills must be demonstrated in the workplace.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment Requirements for CHCYTH004 Respond to critical situations

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *CHC Community Services Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has completed the following tasks at least once:

- established a framework for dealing with potential crisis situations which covers:
  - identifying and assessing risks to client safety and welfare
  - understanding and anticipating possible causes of conflicts
  - identifying and implementing risk-minimisation strategies
  - providing information on possible responses to team members
  - stating when to request assistance of others
  - detailing types of assistance appropriate to various situations
  - identifying equipment available to support response to potential crisis situations
- maintained a safe and healthy environment to minimise the risk of crisis situations
- used effective communication skills and techniques in all communications with client, appropriate to the situation
- documented actions taken according to organisational procedures and policies, clearly and accurately.

© Commonwealth of Australia, 2025 HumanAbility

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

These include knowledge of:

- team roles and responsibilities and reporting requirements
- responsibilities of child protection reporting and duty of care
- understanding how critical incidents and risks arise both generally and in particular situations
- common mental health issues in young people
- principles of effective communication for counselling, risk-assessment, negotiation, mediation and information management
- code of conduct
- organisation's policies, guidelines and procedures and emergency protocols.

Assessment Conditions

Skills must be demonstrated in the workplace.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment Requirements for CHCYTH005 Develop and implement procedures to enable young people to address their needs

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *CHC Community Services Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Changes to elements and performance criteria. New evidence requirements for assessment.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has completed the following tasks:

- assessed specific needs of at least one young person and identified existing programs/services that addressed these needs, as well as consulted relevant personnel and organisations to identify further or alternative support programs that could assist
- developed and implemented procedures to keep young people safe, including:
  - addressing any signs of abuse
  - establishing protocols of behaviours
  - monitoring at-risk behaviour patterns
  - establishing quick response actions to counter aggressive behaviour
- developed and implemented procedures relating to services offered by the organisation, including:
  - support facilities
  - particular types of support and information

© Commonwealth of Australia, 2025 HumanAbility

  - referral advice
- reviewed the relevance and effectiveness of information and service provision to clients, and assessment, support and referral systems, including:
  - holding regular debriefings with associated organisations and service providers
  - debriefing and supporting other youth workers, including identifying training needs
  - producing reports and recording relevant information about clients and programs according to organisation procedures and policies, ensuring accurate and complete information is included.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

These include knowledge of:

- legal and organisational policies relating to advocacy, monitoring and dealing with abuse
- principles of empowerment and enabling processes in advocacy
- short-term counselling strategies
- different forms of abuse and their indicators and response processes
- a broad range of specialist and generic services and agencies
- family support and mediation
- youth-specific consultation and engagement principles for seeking feedback on service provision
- reflective and evaluative processes in youth work practice
- key aspects of human rights declarations and UN Convention on the Rights of the Child
- organisation’s policies, guidelines and procedures.

Assessment Conditions

Skills must be demonstrated in the workplace.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. Assessment Requirements for CHCYTH009 Support youth programs

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *CHC Community Services Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has completed the following tasks at least once:

- collected, analysed and reviewed relevant evidence and a range of programs to determine the need for a specific program
- prepared at least one program plan, including:
  - outlining activities and actions
  - determining operational arrangements for calculating costs, space and resources
  - assessing feasibility
  - developing implementation and evaluation strategies
- supported the implementation of at least one program in a variety of contexts, adapting program to the changing needs of participants and evaluating outcomes, including:
  - using evaluation techniques and reporting outcomes to clients and stakeholders in an accessible format.

© Commonwealth of Australia, 2025 HumanAbility

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

These include knowledge of:

- target groups relevant to the worker and the program
- a range of relevant youth activities and programs
- legal and safety requirements as they relate to activities and programs
- techniques of evaluation
- relevant funding sources
- organisational standards, policies and procedures
- techniques for writing complete and accurate reports.

Assessment Conditions

Skills must be demonstrated in the workplace.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

CHCYTH010 Provide services for young people appropriate to their needs and circumstances

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *CHC Community Services Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment.

Application

This unit describes the skills and knowledge required to provide guidance and role models to young people and their families to maintain positive and supportive relationships, while identifying problems and establishing goals for change based on maintaining support from family and the general community.

This unit applies to community services work in a range of contexts.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Identify and address immediate needs and circumstances of young people	1.1 Identify and respond to immediate needs of young people according to nature and degree of urgency 1.2 Provide young people and their families with information tailored to their capacity of understanding and designed to calm and reassure 1.3 Observe and note any signs of distress, anxiety, aggression and apathy 1.4 Look for and note signs of impairment of functioning in individuals and relationships
2. Explore and clarify issues facing the young person and the nature of support sought	2.1 Offer the young person adequate opportunity to explore and clarify the issues facing her/him 2.2 Negotiate involvement of other parties as required by young person and worker 2.3 Listen actively and positively to young person's issues, needs, views and feelings about their issues and accepting support 2.4 Make renewed attempts through appropriately modified approaches or responses where there are communication difficulties 2.5 Describe and analyse the nature and scope of the issues and check with the young person for completeness and accuracy 2.6 Clearly explain to the young person the role and capacity of the worker to provide assistance and support 2.7 Where appropriate, obtain relevant available information from others about the young person's potential need for support, consistent with the young person's right to access information and to approve or disapprove of the worker's actions
3. Facilitate goal setting and action planning	3.1 Encourage and support the young person to work out their own goals and priorities and to assess feasibility 3.2 Identify and explain in a supportive manner any risks arising from the young person's choices

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	3.3 Offer further options to the young person without imposition or pressure where appropriate
	3.4 Emphasise and negotiate clients' responsibility for determining and achieving their goals
	3.5 Encourage clients to identify and prioritise long- and short-term goals based on individual responsibility and personal choice
	3.6 Support the young person to develop strategies to act on goals set
	3.7 Encourage clients to identify and analyse factors that have contributed to past behaviour and obstacles to achieving individual and family goals
	3.8 Identify unrealistic expectations, challenge negative attitudes and unacceptable objectives and re-negotiate plans when required
4. Provide targeted assistance and referral	4.1 Discuss availability, type and nature of services and resources in a manner appropriate to the young person's right of choices
	4.2 Encourage young person to use services and resources appropriate to their needs in line with legal, statutory and organisational requirements
	4.3 Advise the young person about legal and statutory provisions which might affect their situation and confirm young person's understanding of information provided
	4.4 Establish systems to ensure information and referral sources within organisation are up-to-date, comprehensive, accurate, accessible and relevant to clients
	4.5 Continually monitor effectiveness of service delivery and resolve problems of access, services or resources as appropriate
	4.6 Ensure all documentation and reporting is in accordance with organisation procedures
5. Act as an advocate on	5.1 Where the young person requests the worker to act as an advocate, identify the scope and goals of the possible role and

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
request	outline and negotiate these with the young person
	5.2 When requested and where possible, support the young person and accompany them during first stages of access to services to enable them to gain confidence to go alone
	5.3 Represent the young person's interests clearly and accurately in a manner consistent with the identified agreement between them and the worker
	5.4 Explain to the young person all representations made on their behalf in a manner and language appropriate to their information needs and circumstances and confirm their understanding
	5.5 Ensure decisions and/or actions taken on behalf of the young person are consistent with their expressed or implied preferences and interests

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Context for youth work must include one or more	• centre-based work • drop-in centres, recreational facilities

© Commonwealth of Australia, 2025 HumanAbility

of the following:

- housing and residential services
- outreach and home visits, street, parks
- schools
- online youth work, web-based, emails, discussion rooms
- telephone contact

Unit Mapping Information

No equivalent unit.

Assessment Requirements for CHCYTH010 Provide services for young people appropriate to their needs and circumstances

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *CHC Community Services Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has completed the following tasks:

- identified and responded to the needs of at least two young people, including:
  - providing information to young person and families
  - listening to young person's issues, concerns and feelings
  - setting goals and planning actions to achieve goals with young person
  - discussing, identifying and encouraging young person to access services
  - referring young person to alternative services
- advocated for at least two young people, including:
  - negotiating goals, role and scope of advocacy work with young person
  - accompanying young person during first stages of service access
  - representing young person's interests and keeping young person informed of representation processes
- completed all relevant documentation and reports accurately and completely
- communicated with at young person clearly and accurately.

© Commonwealth of Australia, 2025 HumanAbility

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

These include knowledge of:

- target groups relevant to the worker and the activity or program
- a range of youth activities and programs
- legal and safety requirements as they relate to activities and programs in youth work
- relevant funding sources
- communication strategies, including negotiation and conflict resolution
- organisational standards, policies and procedures.

Assessment Conditions

Skills must be demonstrated in the workplace.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

CHCYTH011 Work effectively with young people and their families

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *CHC Community Services Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment.

Application

This unit describes the skills and knowledge required to cooperate in mutual agreement on the activities, outcomes and processes of young people's family members/nominated carers, for the purpose of achieving goals identified in consultation with the young person to address their concerns and/or risks.

This unit applies to community services work in a range of contexts where the young person is considered the primary client.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 HumanAbility

Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Establish relationship with the young person's nominated carer/family members	1.1 Gather necessary information about the background and circumstances of young person and their family/carers with respect for privacy and confidentiality 1.2 Provide information to young person and their family/carers in a factual, clear and ethical manner to promote positive responses 1.3 Identify issues and changes needed to behaviour and relationships of young people and their families/carers 1.4 Maintain clear, ethical and honest relationships with young person as the primary client, and their family/carers as secondary clients 1.5 Encourage family members to reflect on their relationships, expectations and personal responsibilities 1.6 Identify obstacles to professional relationships with families/carers 1.7 Record concerns according to the code of conduct and ethics
2. Exchange information with family/carers about young person's needs and/or risks	2.1 Use effective communication and model positive behaviour techniques to encourage active participation and appropriate responses 2.2 Monitor and anticipate behaviour and mood of clients and respond appropriately 2.3 Provide clients with clear and relevant information at a suitable language and comprehension level within the parameters of confidentiality and privacy 2.4 Analyse own values for impact on attitudes and interactions and to detect and avoid personalising issues, discrimination or stereotyping
3. Determine a mutual approach to addressing the young person's needs	3.1 Check that objectives, outcomes and processes of young person's responses are consistent with organisation's policies and objectives and service outcomes 3.2 Negotiate with the young person their goals and indicators of achievement and include other persons where nominated by the young person 3.3 Plan a structured sequence of activities and timetable to

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	achieve client objective within available resources
	3.4 Consult team members for feedback on the planned program
	3.5 Identify resources needed for continuing work with clients and allocate according to priorities and availability
4. Respond to families'/nominated carers concerns about young person	4.1 Develop trust and address family members'/carers' concerns, including limitations on confidentiality and power differentials between individuals
	4.2 Identify and prioritise short- and long-term implications of family/ carer concerns
	4.3 Validate family/ carer concerns using a range of checking sources including consultation with the young person as primary client
	4.4 Provide information to family members/ carers on a need-to-know basis with respect for young person's privacy
	4.5 Negotiate conditions and confirm agreement with families/ carers to encourage commitment, cooperation and mutual action
	4.6 Identify indicators of concerns, patterns of behaviour, strengths and barriers to family involvement and consider this information in the approach taken
	4.7 Encourage family members/ carers to take responsibility for agreement on objectives, targets and outcomes
	4.8 Ensure location of client meetings promotes neutrality, individual empowerment, comfort, trust, privacy, energy and focus for all clients
	4.9 Guide clients to maintain positive direction, cooperation, achievements and respect

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Assessment Requirements for CHCYTH011 Work effectively with young people and their families

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *CHC Community Services Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has completed the following tasks:

- used a range of strategies to empower at least two young people and their families/carers to maintain motivation and purpose and achieve agreed outcomes, including:
  - facilitating the young person's individual expression of needs to families/carers and others
  - using varied communication strategies with young people and families/carers to ensure that opportunities for exploring issues are fair, confidential,and appropriate to the needs of individuals
  - advocating for the needs of young people
- assessed at least two clients' background and behaviour to determine family intervention and youth support processes
- planned family intervention-based support strategically to achieve service outcomes and priorities for at least one young person.

© Commonwealth of Australia, 2025 HumanAbility

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

These include knowledge of:

- principles of communication for specified outcomes, including:
  - empathetic listening
  - meaning and impact of body language
  - eye contact
  - interpreting hidden and complex messages
  - feedback
  - use of reflection, review and debriefing
  - facilitation of interaction and participation
- principles of group dynamics and interaction including:
  - differentials in power
  - empathy/identification
  - trust-building
  - challenging
- rights of children and young people
- ethics and codes of conduct where the young person is the primary client
- privacy legislation applied to situations of information exchange between a range of individuals and organisations about a young person as primary client of the service
- understanding of own values and attitudes and their impact on work and relationships.

Assessment Conditions

Skills must be demonstrated in the workplace.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

CHCYTH012 Manage service response to young people in crisis

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *CHC Community Services Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Changes to elements and performance criteria. New evidence requirements for assessment.

Application

This unit describes the skills and knowledge required to develop an agency approach to young people in crisis.

This unit applies to community services work in a range of contexts.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Implement a framework for preventing crisis situations	1.1 Develop a framework to address prevention and response to critical situations, and which reflects consideration of beliefs, rights and needs of client and

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	responsibilities of organisation within a legislative and statutory context
	1.2 Establish appropriate resources and mechanisms to assist workers to deal with crisis situations
	1.3 Define details of organisation's responsiveness to crisis situations and articulate to relevant personnel
	1.4 Store and maintain all information related to crisis situations to maximise accessibility, accuracy, currency and legibility
	1.5 Implement procedures to ensure clients have ready access to information that may help to resolve crisis situations
2. Support staff in responding to a crisis	2.1 Establish appropriate protocols for managing potential and actual crisis situations
	2.2 Draft and regularly update procedures for the management of crises and communicate to staff and other relevant personnel
	2.3 Ensure any crisis management procedures developed are consistent with legal and organisational obligations and constraints
	2.4 Allocate resources for prompt and effective response to crisis situations
	2.5 Provide appropriate crisis response training and update briefings to workers on a regular basis
	2.6 Formulate appropriate advice for upgrade of organisation procedures including those related to workplace health and safety (WHS) and other industrial and legislative requirements
3. Follow-up crisis situations	3.1 Complete all required reporting and ensure it is comprehensive, accurate and consistent with organisation's policies and procedures
	3.2 Define debriefing procedures and implement routinely

Assessment Requirements for CHCYTH012 Manage service response to young people in crisis

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *CHC Community Services Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Changes to elements and performance criteria. New evidence requirements for assessment.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has completed the following tasks at least once:

- implemented a framework to prevent and respond to crisis situations by:
  - defining circumstances contributing to a crisis situation
  - analysing the legal and statutory requirements
  - identifying and obtaining resources to respond to crisis situations
  - providing information to clients and staff about the organisation's policies and procedures for dealing with crisis situation
  - supporting staff in responding to crises by providing training and briefings
- followed-up on crisis situations by:
  - maintaining documentation as required, including effective use of relevant information technology in line with WHS guidelines
  - effectively communicating with staff, including implementing mediation and negotiation, and conflict resolution/management
  - providing feedback to staff members.

© Commonwealth of Australia, 2025 HumanAbility

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

These include knowledge of:

- legal and organisational policies relating to safety within the work environment
- relevant specialist support services and resources
- possible factors which contribute to young people entering crisis situations
- methods of crisis intervention including mediation and negotiation
- characteristics of aggressive and abusive behaviour
- methods of promoting less aggressive/abusive behaviour
- other support agencies and the relevant specialist resources they offer
- possible factors which contribute to young people entering crisis situations
- potential repercussions of inappropriate intervention of worker behaviour.

Assessment Conditions

Skills must be demonstrated in the workplace.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

CPPCCL2001A Use hot water extraction

Modification History

Revised unit

Unit updated and equivalent to PRMCC01A Use hot water extraction

Unit Descriptor

This unit of competency specifies the outcomes required to use hot water extraction to remove dirt and soil from carpet. The water extraction method of cleaning can be applied to domestic or commercial carpets and is considered a restoration style of cleaning.

The unit requires the ability to assess the extent of the cleaning task through understanding client requirements and the characteristics of the carpet, and to apply company policies and procedures in order to perform the task. The selection of appropriate equipment, chemicals and methods is essential for performing the task safely and efficiently.

Note: Hot water covers a range of water temperatures.

Application of the Unit

This unit of competency supports employees without managerial or supervisory responsibilities. The work may be performed in teams or individually. Performance would usually be carried out under routine supervision and within company guidelines.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the Performance criteria describe the performance needed to

© Commonwealth of Australia, 2025 HumanAbility

essential outcomes of a unit of competency.	demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Assess area to be cleaned.	1.1	Area to be cleaned is assessed, ***work order*** is reviewed according to ***company requirements***, and issues are clarified with ***appropriate persons***.
		1.2	***Hazards*** and risks in work site are identified and controlled according to company, ***legislative*** and ***occupational health and safety*** (OHS) ***requirements***.
		1.3	Type, condition and colour-fastness of ***carpet*** are identified by observation and/or ***testing*** according to company requirements.
		1.4	***Soil type*** is identified by observation according to work order and company requirements.
		1.5	***Cleaning techniques*** for the carpets are selected according to work order and company requirements.
		1.6	Size and usage pattern of work site are determined to ensure safety of ***personnel*** and efficient use of ***equipment*** and ***chemicals***.
		1.7	Pre-existing damage is identified and reported to appropriate persons according to company requirements.
2	Select equipment and chemicals.	2.1	***Personal protective equipment*** (PPE) is selected and used according to ***manufacturer specifications***, and OHS and company requirements.
		2.2	Equipment and chemicals are selected for work order according to OHS and company requirements.
		2.3	Operational effectiveness of equipment is checked according to manufacturer specifications and company requirements.
		2.4	Equipment is adjusted to suit operator’s requirements according to manufacturer specifications and OHS

© Commonwealth of Australia, 2025 HumanAbility

			requirements.
		2.5	Chemicals are prepared according to manufacturer specifications, and OHS and company requirements.
3	Prepare work site.	3.1	Hazards in work site are confirmed and risks controlled and reassessed according to legislative, OHS and company requirements.
		3.2	Furniture and fittings that impede cleaning operation are removed according to work order, and OHS and company requirements.
		3.3	***Signage and barriers*** are installed as required to maximise public safety during cleaning operation, according to work order, and OHS and company requirements.
		3.4	***Work restrictions*** affecting completion of work order are identified and appropriate persons are promptly advised.
4	Clean work site using hot water extraction.	4.1	Soil is removed and carpets are cleaned using hot water extraction cleaning techniques, equipment, PPE and chemicals according to manufacturer specifications and legislative, OHS and company requirements.
		4.2	Strategies to ensure proper drying of carpet are assessed according to environmental conditions and carpet type, and then applied.
		4.3	Work is performed according to work order, manufacturer specifications and legislative, OHS and company requirements.
5	Tidy work site.	5.1	Collected soil and ***waste*** are disposed of according to client specifications, work order, manufacturer specifications and legislative, OHS and company ***environmental requirements***.
		5.2	Furniture and fittings are replaced according to client requests, work order and OHS requirements.
		5.3	Chemicals are stored according to manufacturer

© Commonwealth of Australia, 2025 HumanAbility

			specifications, and OHS and company requirements.
		5.4	Signage and barriers are removed according to work order, and OHS and company requirements.
6	Clean, safety check and store equipment and chemicals.	6.1	Equipment and PPE are cleaned according to manufacturer specifications and environmental, OHS and company requirements.
		6.2	Equipment and PPE are safety checked according to manufacturer specifications and OHS requirements, and required maintenance is recorded according to company requirements.
		6.3	Equipment and PPE are stored and maintained to allow ready access according to manufacturer specifications, and OHS and company requirements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- customer service skills to:
  - establish rapport with clients
  - gain clients' trust
- analytical skills to:
  - assess surface suitability for hot water extraction
  - classify fibres, soil and stains
  - select cleaning strategies
- interpersonal skills to relate to people from a range of backgrounds
- language, literacy and numeracy skills to:
  - communicate clearly and concisely verbally and in writing
  - explain carpet-cleaning processes and expected outcomes to clients
  - perform mathematical calculations required for dilution and mixing of chemicals
  - read and interpret directions and safety instructions, including:
    - chemical labels
    - equipment manuals
    - material safety data sheets (MSDS)

© Commonwealth of Australia, 2025 HumanAbility

    - request advice or further information
    - seek and receive feedback
    - source, organise and record information
- problem-solving skills to manage contingencies
- self-management skills to work alone and in a team
- skills to work safely when:
    - drying carpet
    - extraction cleaning
    - handling and disposing of chemicals
    - identifying hazards and controlling risks
    - manual handling

Required knowledge

- carpet characteristics, including:
    - carpet construction
    - features of fibres
- cleaning options for carpet, including:
    - bonnet cleaning method
    - drying methods
    - pre-spotting and stain-removal methods
    - range of cleaning equipment and chemicals, including:
        - low environmental-impact chemicals
        - low-moisture
    - water-efficient methods
- company management structure and procedures, including:
    - biological and viral control
    - emergency response and evacuation procedures
    - environmental protection procedures
    - injury, dangerous occurrence and incident reporting
    - OHS procedures
    - quality systems
- legislation, regulations, codes of practice and industry advisory standards that apply to carpet cleaning
- safe work practices for using:
    - chemicals
    - equipment, including PPE
- testing methods

© Commonwealth of Australia, 2025 HumanAbility

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed by observing practical demonstration of the use of hot water extraction on at least two different types of carpet.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the required skills and knowledge specified in this unit. • In particular the person should demonstrate the ability to: • identify type and characteristics of carpet • select cleaning equipment and chemicals • apply safe and efficient cleaning methods • achieve outcomes in relation to customer work order and company requirements • comply with company and legislative requirements.
Context of and specific resources for assessment	Assessment of essential underpinning knowledge may be conducted in an off-site context and must comply with relevant regulatory or Australian standards' requirements. Resource implications for assessment include access to: • suitable work site or venue with carpet • equipment operating manuals and MSDS • PPE • suitable equipment and chemicals • assessment instruments, including personal planner and assessment record book • work order instructions, work plans and schedules.
Method of assessment	Assessment methods must: • satisfy the endorsed Assessment Guidelines of the Property Services Training Package • include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application • reinforce the integration of employability skills with workplace tasks and job roles • confirm that competency is verified and able to be transferred to other circumstances and environments.
Guidance information for	Reasonable adjustments for people with disabilities must be made to

© Commonwealth of Australia, 2025 HumanAbility

assessment	assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support. Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed. This unit could be assessed on its own or in combination with other units relevant to the job function such as: • CPPCCL2007A Perform basic stain removal.

•
•

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Work order information may include:	• access to work site, including:
	  • access and egress points
	  • timing of access
	• budget allocations
	• completion times and dates
	• human resource requirements to complete the work tasks
	• job requirements and tasks
	• legislative and local government requirements
	• OHS requirements and emergency response procedures
	• requirements for working in isolated and remote locations
	• resource requirements, such as equipment and materials
	• specific client requirements, such as:
	  • dress and presentation requirements
	  • relationships with other activities
	• use of signage and barriers
	• work schedules
	• work site contact persons.

Company requirements may include:	• business and performance plans • client communication procedures • client confidentiality procedures • client service standards • communication channels and reporting procedures

© Commonwealth of Australia, 2025 HumanAbility

	• company goals, objectives, plans, systems and processes
	• company issued identification badge, card or pass
	• company policies and procedures, including:
	  • access and equity policy, principles and practice
	  • OHS policies and procedures, including control procedures
	  • maintenance procedures for equipment and PPE
	  • those relating to own role, responsibility and delegation
	  • work site access security clearance procedures
	• company service standards
	• dress and presentation requirements
	• duty of care, code of conduct, and code of ethics
	• emergency response and evacuation procedures
	• employer and employee rights and responsibilities
	• environmental protection requirements
	• personnel practices and guidelines
	• quality and continuous improvement processes and standards
	• records and information systems and processes
	• training materials (induction, refresher and new skills)
	• use of contractors.

Appropriate persons may include:	• clients • colleagues • managers • persons in control of work site • supervisors.

Hazards may include:	• allergic reactions to chemicals and equipment, including latex allergies
	• biological and animal waste
	• bites and stings
	• blood and blood-stained products
	• confined or restricted spaces
	• contaminated clothing, materials or equipment
	• damaged or inappropriate equipment
	• dust and fibres
	• electrical hazards arising from:
	  • cables
	  • electrical fittings:
	  • switches
	  • lights
	  • untested electrical equipment
	• fatigue
	• fire

© Commonwealth of Australia, 2025 HumanAbility

	• gas
	• heights
	• inadequate lighting and ventilation
	• infectious and zoonotic diseases, such as:
	  • Q fever
	  • scabies
	• mobile equipment and vehicle hazards around plant and vehicles
	• moving or unguarded parts
	• noise
	• occupational violence and bullying
	• poor personal hygiene practices
	• spill, splash and spray
	• release of substances with negative environmental impact
	• synergistic chemical reactions, such as:
	  • hazardous incompatibility
	  • reactivity

	• use of chemicals according to MSDS • use of residual current devices • use, storage and maintenance of equipment according to manufacturer specifications and equipment operating manuals.

Carpet may include carpet, mats and rugs made from:	• mixed blends
	• natural fibres, such as:
	  • organic (plant) fibres, such as cotton and sisal
	  • silk
	  • wool
	• synthetic fibres, such as:
	  • acrylic
	  • nylon
	  • polyester
	  • polypropylene.

Testing may include:	• burn test • chemical test • sink or float test.
Soil types may be wet or dry and include:	• beverages • candle wax • chewing gum • cigarette butts • dust • dye stuffs • food • grease • heavy dirt build-up • hospital waste • hydrocarbons • industrial and chemical waste • lipstick • nail polish • oil • paper • plant stains • rainwater • shoe polish • tar.
Cleaning techniques may include:	• agitation • assisted drying • dwell time • low-water usage

© Commonwealth of Australia, 2025 HumanAbility

	• grooming • neutralisation • pre-treatment chemical application • using extraction tools • vacuuming to prepare work site.
Personnel may include:	• client's staff members • colleagues • general public • venue, facility, building or shopping centre staff and/or management.

Equipment may include:	• carpet-cleaning bonnets and hand bonnets
	• carpet-drying equipment, such as:
	  • air movers
	  • drying bonnets
	• carpet groomers
	• carpet spot-cleaning kits
	• cloths, such as towelling
	• extraction units, such as:
	  • self-contained
	  • vehicle-mounted
	• garbage bins
	• measuring equipment, such as jugs and cups
	• plastic coasters or polystyrene blocks
	• respirators
	• rotary or cylindrical scrubbing machines
	• safety signage
	• scrapers and spatulas
	• selected tools and hand tools
	• sponges
	• spray equipment (pressurised or unpressurised)
	• steam irons
	• trigger sprayers
	• vacuum cleaners, such as:
	  • upright
	  • vehicle-mounted
	• waste recovery tanks.

Chemicals may include:	• acid cleaners • alkaline cleaners • low environmental-impact chemicals • neutral cleaners • solvent cleaners.

© Commonwealth of Australia, 2025 HumanAbility

Personal protective equipment may include:	• ear muffs and plugs • gloves, such as non-permeable • high-visibility vests and clothing • overalls and other protective clothing • respirators • safety glasses or goggles • safety shoes • splash-proof face masks • sun protection • tongs • ultraviolet protection • wet-work clothing.

Manufacturer specifications may include:	• equipment operating manuals
	• instructional guides
	• MSDS
	• other resources supplied by the manufacturer, such as:
	  • laminated cards
	  • notices
	  • wall posters
	• product labels
	• safety instructions pre-printed on equipment.

Signage and barriers may include:	• physical barriers and restraints restricting access to a site
	• signs complying with legislative requirements and Australian standards, warning of danger or adverse conditions, including:
	  • cleaning in progress
	  • hazardous chemicals in use or present in work area.

Work restrictions may include:	• amount of cleaning anticipated • client activity • employee level of literacy and communication skills • faulty or inappropriate equipment • site accessibility • site hazards • skills of work unit or team • staffing resources • time limitations.
Waste may be either solid, liquid or gas and include:	• chemicals past expiry date • dry vacuuming detritus • litter • machine or vehicle exhaust emissions • obsolete equipment • packaging

© Commonwealth of Australia, 2025 HumanAbility

	• soil • used containers • used or contaminated PPE • used or unused chemicals.

Environmental requirements may include:	• clean-up, containment and isolation
	• company policies and guidelines
	• emergency chemical spill control measures
	• environmental protection agency and requirements of government departments, such as:
	  • agriculture
	  • emergency services
	  • national parks and wildlife
	• hazardous materials handling
	• local government regulations and by-laws
	• low-energy carpet-cleaning methods
	• low environmental-impact chemicals
	• low-moisture cleaning methods
	• low water-use equipment and other water-efficient cleaning methods
	• non-chemical carpet-cleaning methods.

CPPCCL2003A Use dry foam shampoo

Modification History

Revised unit

Unit updated and equivalent to PRMCC03A Use dry foam shampoo

Unit Descriptor

This unit of competency specifies the outcomes required to dry foam shampoo a carpet to remove in-ground dirt and soil from the upper layer of the carpet. Dry foam shampooing can be applied to commercial or domestic carpets.

The unit requires the ability to assess the extent of the cleaning task through understanding client requirements and the characteristics of the carpets, and to apply company policies and procedures in order to perform the task. The selection of appropriate equipment, chemicals and methods is essential for performing the task safely and efficiently.

Application of the Unit

This unit of competency supports employees without managerial or supervisory responsibilities. A single person working alone usually cleans a carpet using the dry foam shampooing method, but the work can be done in a team. Performance would usually be carried out under routine supervision and within company guidelines.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the Performance criteria describe the performance needed to

essential outcomes of a unit of competency.	demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Assess area to be cleaned.	1.1	Area to be cleaned is assessed, ***work order*** is reviewed according to ***company requirements***, and issues are clarified with ***appropriate persons*****.**
		1.2	***Hazards*** and risks in work site are identified and controlled according to company, ***legislative*** and ***occupational health and safety*** (OHS) ***requirements***.
		1.3	Type, condition and colour-fastness of ***carpet*** are identified by observation and/or ***testing*** according to company requirements.
		1.4	***Soil type*** is identified by observation according to work order and company requirements.
		1.5	***Cleaning techniques*** for carpet are selected according to work order and company requirements.
		1.6	Size and usage pattern of work site are determined to ensure safety of ***personnel*** and efficient use of ***equipment*** and ***chemicals***.
		1.7	Pre-existing damage is identified and reported to appropriate persons according to company requirements.
2	Select equipment and chemicals	2.1	***Personal protective equipment*** (PPE) is selected and used according to ***manufacturer specifications***, and OHS and company requirements.
		2.2	Equipment and chemicals are selected for work order according to OHS and company requirements.
		2.3	Operational effectiveness of equipment is checked according to manufacturer specifications and company requirements.
		2.4	Equipment is adjusted to suit operator’s requirements according to manufacturer specifications and OHS

© Commonwealth of Australia, 2025 HumanAbility

			requirements.
		2.5	Chemicals are prepared according to manufacturer specifications, and OHS and company requirements.
3	Prepare work site.	3.1	Hazards in the work site are confirmed, and risks controlled and reassessed according to legislative, OHS and company requirements.
		3.2	Furniture and fittings that impede cleaning operation are removed according to work order, and OHS and company requirements.
		3.3	***Signage and barriers*** are installed as required to maximise public safety during cleaning operation according to work order, and OHS and company requirements.
		3.4	***Work restrictions*** affecting completion of work order are identified and appropriate persons are promptly notified.
4	Clean work site using dry foam method.	4.1	Soil is removed and carpet is cleaned using cleaning techniques, equipment, PPE and chemicals according to manufacturer specifications and legislative, OHS and company requirements.
		4.2	Work is performed according to work order, manufacturer specifications and legislative, OHS and company requirements.
5	Tidy work site.	5.1	Collected soil and ***waste*** are disposed of according to client specifications, work order, manufacturer specifications and legislative, OHS and company ***environmental requirements***.
		5.2	Furniture and fittings are replaced according to client requests, work order and OHS requirements.
		5.3	Signage and barriers are removed according to work order, and OHS and company requirements.

© Commonwealth of Australia, 2025 HumanAbility

6	Clean and safety check equipment, and store equipment and chemicals.	6.1	Equipment and PPE are cleaned according to manufacturer specifications and environmental, OHS and company requirements.
		6.2	Equipment and PPE are safety checked according to manufacturer specifications and OHS requirements, and required maintenance is recorded according to company requirements.
		6.3	Equipment and PPE are stored and maintained to allow ready access according to manufacturer specifications, and OHS and company requirements.
		6.4	Chemicals are stored according to manufacturer specifications, and OHS and company requirements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- customer service skills to:
  - establish rapport with clients
  - gain clients' trust
- analytical skills to:
  - assess surface suitability for dry foam shampoo
  - classify fibres, soil and stains
  - select chemicals to suit carpet type
  - select cleaning strategies
- interpersonal skills to relate to people from a range of backgrounds
- language, literacy and numeracy skills to:
  - communicate clearly and concisely verbally and in writing
  - explain carpet-cleaning processes and expected outcomes to clients
  - perform mathematical calculations required for diluting and mixing chemicals
  - read and interpret directions and safety instructions, including:
    - chemical labels
    - equipment manuals
    - material safety data sheets (MSDS)
  - request advice or further information
  - seek and receive feedback

© Commonwealth of Australia, 2025 HumanAbility

    - source, organise and record information
- problem-solving skills to manage contingencies
- self-management skills to work alone and in a team
- skills to work safely when:
    - handling and disposing of chemicals
    - identifying hazards and controlling risks
    - manual handling
    - using extraction cleaning techniques

Required knowledge

- carpet characteristics, including:
    - carpet construction
    - features of fibres
- cleaning options for carpet, including:
    - dry foam method
    - pre-spotting and stain-removal methods
    - range of cleaning equipment and chemicals, including:
        - low environmental-impact chemicals
        - low-moisture
- company management structure and procedures, including:
    - biological and viral control
    - emergency response and evacuation procedures
    - environmental protection procedures
    - injury, dangerous occurrence and incident reporting
    - OHS procedures
    - quality systems
- legislation, regulations, codes of practice and industry advisory standards that apply to carpet cleaning
- safe work practices for using chemicals and equipment, including PPE
- testing methods

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed by observing practical demonstration of the use of dry foam shampoo on at least two different types of carpet.

© Commonwealth of Australia, 2025 HumanAbility

Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the required skills and knowledge specified in this unit. In particular the person should demonstrate the ability to: • identify type and characteristics of carpets • select cleaning equipment and chemicals • apply safe and efficient cleaning methods • achieve outcomes in relation to customer work order and company requirements • comply with company and legislative requirements.
Context of and specific resources for assessment	Assessment of essential underpinning knowledge may be conducted in an off-site context and must comply with relevant regulatory or Australian standards requirements. Resource implications for assessment include access to: • suitable work site or venue with carpet • equipment operating manuals and MSDS • PPE • suitable equipment and chemicals • assessment instruments, including personal planner and assessment record book • work order instructions, work plans and schedules.
Method of assessment	Assessment methods must: • satisfy the endorsed Assessment Guidelines of the Property Services Training Package • include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application • reinforce the integration of employability skills with workplace tasks and job roles • confirm that competency is verified and able to be transferred to other circumstances and environments.
Guidance information for assessment	Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support. Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed. This unit could be assessed on its own or in combination with other units relevant to the job function, such as:

	• CPPCCL2007A Perform basic stain removal.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Work order information may include:	• access to work site, including:
	  • access and egress points
	  • timing of access
	• budget allocations
	• completion times and dates
	• human resource requirements to complete the work tasks
	• job requirements and tasks
	• legislative and local government requirements, including environmental protection requirements
	• OHS requirements and emergency response procedures
	• requirements for working in isolated and remote locations
	• resource requirements, such as equipment and materials
	• specific client requirements, such as:
	  • dress and presentation requirements
	  • relationships with other activities
	• use of signage and barriers
	• work schedules
	• work site contact persons.

Company requirements may include:	• business and performance plans • client communication procedures • client confidentiality procedures • client service standards • communication channels and reporting procedures • company goals, objectives, plans, systems and processes • company issued identification badge, card or pass • company policies and procedures, including:

© Commonwealth of Australia, 2025 HumanAbility

	• access and equity policy, principles and practice • OHS policies and procedures, including control procedures • maintenance procedures for equipment and PPE • those relating to own role, responsibility and delegation • work site access security clearance procedures • company service standards • dress and presentation requirements • duty of care, code of conduct, and code of ethics • emergency response and evacuation procedures • employer and employee rights and responsibilities • environmental protection requirements • personnel practices and guidelines • quality and continuous improvement processes and standards • records and information systems and processes • training materials (induction, refresher and new skills) • use of contractors.
Appropriate persons may include:	• clients • colleagues • managers • persons in control of work sites • supervisors.

Hazards may include:	• allergic reactions to chemicals or equipment, including latex allergies
	• biological and animal waste
	• bites and stings
	• blood and blood-stained products
	• confined and restricted spaces
	• contaminated clothing, materials or equipment
	• damaged or inappropriate equipment
	• dust and fibres
	• electrical hazards arising from:
	  • cables
	  • electrical fittings:
	  • switches
	  • lights
	  • untested electrical equipment
	• fatigue

© Commonwealth of Australia, 2025 HumanAbility

	• fire
	• gas
	• heights
	• inadequate lighting and ventilation
	• infectious and zoonotic diseases, such as:
	  • Q fever
	  • scabies
	• mobile equipment and vehicle hazards around plant and vehicles
	• moving or unguarded parts
	• noise
	• occupational violence and bullying
	• poor personal hygiene practices
	• spill, splash and spray
	• release of substances with negative environmental impact
	• repetitive motion, force and vibration
	• synergistic chemical reactions, such as:
	  • hazardous incompatibility
	  • reactivity
	• syringes or other sharps
	• ultraviolet light
	• unsafe manual-handling techniques, including awkward and repetitive postures
	• unsafe underfoot conditions, such as slippery, uneven and rough surfaces
	• unrestricted people access
	• waste and waste disposal
	• work in extremes of temperature
	• work in unfamiliar, isolated or remote environments.

Legislative requirements may include:	• Australian standards, quality assurance and certification requirements
	• award and enterprise agreements
	• industry advisory standards and codes, such as:
	  • building codes
	  • dangerous goods codes
	• relevant commonwealth, state and territory legislation and local government regulations that affect company operation, including:
	  • anti-discrimination and diversity policies
	  • chemical controls

© Commonwealth of Australia, 2025 HumanAbility

	• chemical registers and manifests • consumer protection legislation • energy conservation • environmental protection • equal employment opportunity • freedom of information • industrial equipment certificates of competency or licences • industrial relations • OHS Acts and regulations • privacy • public health • trade practices • water conservation • workplace consultative arrangements.

Occupational health and safety (also known as workplace health and safety) ***requirements*** may relate to:	• allergic reactions, such as contact dermatitis
	• communication devices for remote and isolated locations, such as:
	  • mobile phone
	  • two-way radio
	• dermatoxicological control and prevention measures
	• emergency procedures for eye and skin contact, inhalation and ingestion of toxic substances
	• hazard identification and risk assessment mechanisms
	• health surveillance and monitoring, such as regular blood testing
	• hierarchy of hazard control procedures
	• injury and dangerous occurrence reporting
	• maintaining clear access
	• national and industry standards and codes of practice
	• OHS control procedures, such as:
	  • health and safety plans
	  • job plans
	  • job safety analyses
	  • risk assessments
	  • safe operating practices and procedures
	  • safe system of work statements
	  • safe work instructions

	• work method statements
	• routes of entry and potential symptoms of exposure to chemicals
	• safe work practices for equipment, PPE and chemical storage, including interpretation of:
	  • MSDS
	  • hazardous substance information, such as long latency periods
	• safety training, induction and refresher training
	• selection and use of PPE and clothing appropriate to the hazard
	• ultraviolet light
	• up-to-date electrical test and tag compliance
	• use of chemicals according to MSDS
	• use of residual current devices
	• use, storage and maintenance of equipment according to manufacturer specifications and equipment operating manuals.

Carpet may include carpet, mats and rugs made from:	• mixed blends
	• natural fibres, such as:
	  • organic (plant) fibres, such as cotton and sisal
	  • silk
	  • wool
	• synthetic fibres, such as:
	  • acrylic
	  • nylon
	  • polyester
	  • polypropylene.

Testing may include:	• burn test • chemical test • sink and float test.
Soil types may be wet or dry and include:	• beverages • candle wax • chewing gum • cigarette butts • dust • dye stuffs • food • grease • heavy dirt build-up • hospital waste

© Commonwealth of Australia, 2025 HumanAbility

	• hydrocarbons • industrial and chemical waste • lipstick • nail polish • oil • paper • plant stains • rainwater • shoe polish • tar.
Cleaning techniques may include:	• agitation • assisted drying • dwell time • grooming • neutralisation • pre-treatment chemical application • removal by absorption • vacuuming to prepare work site.
Personnel may include:	• client's staff members • colleagues • general public • venue, facility, or shopping centre staff and/or management.

Equipment may include:	• carpet-cleaning bonnets and hand bonnets
	• carpet-drying equipment, such as:
	  • air movers
	  • drying bonnets
	• carpet groomers
	• carpet spot-cleaning kits
	• cloths, such as towelling
	• extraction units, such as:
	  • self-contained
	  • vehicle-mounted
	• garbage bins
	• measuring equipment, such as jugs and cups
	• plastic coasters or polystyrene blocks
	• respirators
	• rotary or cylindrical scrubbing machines
	• safety signage
	• scrapers and spatulas
	• selected tools and hand tools

CPPCCL2004A Use dry absorbent compound

Modification History

Revised unit

Unit updated and equivalent to PRMCC04A Use dry absorbent compound

Unit Descriptor

This unit of competency specifies the outcomes required to use the dry absorbent compound method to remove dirt and soil from carpet. The dry absorbent compound cleaning method can be applied to domestic or commercial carpets.

This unit requires the ability to assess the extent of the cleaning task through understanding client requirements and characteristics of the carpeted floor or fabric upholstery, and to apply company policies and procedures in order to perform the task. Selection of appropriate equipment, chemicals and methods is essential for performing the task safely and efficiently.

Application of the Unit

This unit of competency supports employees without managerial or supervisory responsibilities. The work may be performed in teams or individually. Performance would usually be carried out under routine supervision and within company guidelines.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

			requirements.
		2.5	Chemicals are prepared according to manufacturer specifications, and OHS and company requirements.
3	Prepare work site.	3.1	Hazards in work site are confirmed, and risks are controlled and reassessed according to legislative, OHS and company requirements.
		3.2	Furniture and fittings that impede cleaning operation are removed according to work order, and OHS and company requirements.
		3.3	***Signage and barriers*** are installed as required to maximise public safety during cleaning operation according to work order, and OHS and company requirements.
		3.4	***Work restrictions*** affecting completion of the work order are identified and appropriate persons are promptly notified.
4	Clean work site using dry absorbent compound cleaning method.	4.1	Soil is removed and carpet is cleaned using cleaning techniques, equipment, PPE and chemicals according to manufacturer specifications and legislative, OHS and company requirements.
		4.2	Work is performed according to work order, manufacturer specifications and legislative, OHS and company requirements.
5	Tidy work site.	5.1	Collected soil and ***waste*** are disposed of according to client specifications, work order, manufacturer specifications and legislative, OHS and company ***environmental requirements***.
		5.2	Furniture and fittings are replaced according to client requests, work order and OHS requirements.
		5.3	Signage and barriers are removed according to work order, and OHS and company requirements.

© Commonwealth of Australia, 2025 HumanAbility

6	Clean and safety check equipment, and store equipment and chemicals	6.1	Equipment and PPE are cleaned according to manufacturer specifications and environmental, OHS and company requirements.
		6.2	Equipment and PPE are safety checked according to manufacturer specifications and OHS requirements, and required maintenance is recorded according to company requirements.
		6.3	Equipment and PPE are stored and maintained to allow ready access according to manufacturer specifications, and OHS and company requirements.
		6.4	Chemicals are stored according to manufacturer specifications, and OHS and company requirements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- customer service skills to:
  - establish rapport with clients
  - gain clients' trust
- analytical skills to:
  - assess surface suitability for dry absorbent compound
  - classify fibres, soil and stains
  - select chemicals to suit surface type
  - select cleaning strategies
- interpersonal skills to relate to people from a range of backgrounds
- language, literacy and numeracy skills to:
  - communicate clearly and concisely verbally and in writing
  - explain carpet-cleaning processes and expected outcomes to clients
  - perform mathematical calculations required for diluting and mixing chemicals
  - read and interpret directions and safety instructions, including:
    - chemical labels
    - equipment manuals
    - material safety data sheets (MSDS)
  - request advice or further information
  - seek and receive feedback

© Commonwealth of Australia, 2025 HumanAbility

    - source, organise and record information
- problem-solving skills to manage contingencies
- self-management skills to work alone and in a team
- skills to work safely when:
    - handling and disposing of chemicals
    - identifying hazards and controlling risks
    - manual handling
    - using extraction cleaning techniques

Required knowledge

- carpet or upholstery characteristics, including:
    - carpet construction
    - features of fibres
- cleaning options, including:
    - dry absorbent compound method
    - pre-spotting and stain-removal methods
    - range of cleaning equipment and chemicals, including:
        - low environmental-impact chemicals
        - low-moisture
    - water-efficient methods
- company management structure and procedures, including:
    - biological and viral control
    - emergency response and evacuation procedures
    - environmental protection procedures
    - injury, dangerous occurrence and incident reporting
    - OHS procedures
    - quality systems
- legislation, regulations, codes of practice and industry advisory standards that apply to carpet cleaning
- safe work practices for using:
    - chemicals
    - equipment, including PPE
- testing methods

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

© Commonwealth of Australia, 2025 HumanAbility

Overview of assessment	This unit of competency could be assessed by observing a practical demonstration of dry absorbent compound on at least two different types of carpet.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the required skills and knowledge specified in this unit. In particular the person should demonstrate the ability to: • identify type and characteristics of carpets • select cleaning equipment and chemicals • apply safe and efficient cleaning methods • achieve outcomes in relation to customer work order and company requirements • comply with company and legislative requirements.
Context of and specific resources for assessment	Assessment of essential underpinning knowledge may be conducted in an off-site context and must comply with relevant regulatory or Australian standards requirements. Resource implications for assessment include access to: • suitable work site or venue with carpet • equipment operating manuals and MSDS • PPE • suitable equipment and chemicals • assessment instruments, including personal planner and assessment record book • work order instructions, work plans and schedules.
Method of assessment	Assessment methods must: • satisfy the endorsed Assessment Guidelines of the Property Services Training Package • include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application • reinforce the integration of employability skills with workplace tasks and job roles • confirm that competency is verified and able to be transferred to other circumstances and environments.
Guidance information for assessment	Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support. Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of

© Commonwealth of Australia, 2025 HumanAbility

	the candidate in relation to the competency being assessed. This unit could be assessed on its own or in combination with other units relevant to the job function, such as: • CPPCCL2007A Perform basic stain removal.

•
•

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Work order information may include:	• access to work site, including:
	  • access and egress points
	  • timing of access
	• budget allocations
	• completion times and dates
	• human resource requirements to complete the work tasks
	• job requirements and tasks
	• legislative and local government requirements, including environmental protection requirements
	• OHS requirements and emergency response procedures
	• requirements for working in isolated and remote locations
	• resource requirements, such as equipment and materials
	• specific client requirements, such as:
	  • dress and presentation requirements
	  • relationships with other activities
	• use of signage and barriers
	• work schedules
	• work site contact persons.

Company requirements may include:	• business and performance plans • client communication procedures • client confidentiality procedures • client service standards • communication channels and reporting procedures • company goals, objectives, plans, systems and processes • company issued identification badge, card or pass • company policies and procedures, including: • access and equity policy, principles and practice

© Commonwealth of Australia, 2025 HumanAbility

	• OHS policies and procedures, including control procedures • maintenance procedures for equipment and PPE • those relating to own role, responsibility and delegation • work site access security clearance procedures • company service standards • dress and presentation requirements • duty of care, code of conduct, and code of ethics • emergency response and evacuation procedures • employer and employee rights and responsibilities • environmental protection requirements • personnel practices and guidelines • quality and continuous improvement processes and standards • records and information systems and processes • training materials (induction, refresher and new skills) • use of contractors.
Appropriate persons may include:	• clients • colleagues • managers • persons in control of work sites • supervisors.
Hazards may include:	• allergic reactions to chemicals and equipment, including latex allergies • biological and animal waste • bites and stings • blood and blood-stained products • confined and restricted spaces • contaminated clothing, materials and equipment • damaged or inappropriate equipment • dust and fibres • electrical hazards arising from: • cables • electrical fittings: • switches • lights • untested electrical equipment • fatigue • fire • gas • heights • inadequate lighting and ventilation • infectious and zoonotic diseases, such as:

© Commonwealth of Australia, 2025 HumanAbility

	• Q fever • scabies • mobile equipment and vehicle hazards around plant and vehicles • moving or unguarded machinery and parts • noise • occupational violence and bullying • poor personal hygiene practices • spill, splash and spray • release of substances with negative environmental impact • synergistic chemical reactions, such as: • hazardous incompatibility • reactivity • syringes or other sharps • ultraviolet light • unsafe manual-handling techniques, including awkward and repetitive postures • unsafe underfoot conditions, such as slippery, uneven and rough surfaces • unrestricted people access • waste and waste disposal • work in extremes of temperature • work in unfamiliar, isolated or remote environments.
Legislative requirements may include:	• Australian standards, quality assurance and certification requirements • award and enterprise agreements • industry advisory standards and codes, such as: • building codes • dangerous goods codes • relevant commonwealth, state and territory legislation and local government regulations that affect company operation, including: • anti-discrimination and diversity policies • chemical controls • chemical registers and manifests • consumer protection • energy conservation • environmental protection • equal employment opportunity • freedom of information • industrial equipment certificates of competency or licences • industrial relations

© Commonwealth of Australia, 2025 HumanAbility

	• OHS Acts and regulations • privacy • public health • trade practices • water conservation • workplace consultative arrangements.

Occupational health and safety (also known as workplace health and safety) ***requirements*** may relate to:	• allergic reactions, such as contact dermatitis
	• communication devices for remote and isolated locations, such as:
	  • mobile phone
	  • two-way radio
	• dermatoxicological control and prevention measures
	• emergency procedures for eye and skin contact, inhalation and ingestion of toxic substances
	• hazard identification and risk assessment mechanisms
	• health surveillance and monitoring, such as regular blood testing
	• hierarchy of hazard control procedures
	• injury and dangerous occurrence reporting
	• maintaining clear access ways
	• national and industry standards and codes of practice
	• OHS control procedures, such as:
	  • health and safety plans
	  • job plans
	  • job safety analyses
	  • risk assessments
	  • safe operating practices and procedures
	  • safe system of work statements
	  • safe work instructions
	  • work method statements
	• chemical routes of entry
	• potential symptoms of exposure to chemicals
	• safe work practices for equipment, PPE and chemical storage, including interpretation of:
	  • MSDS
	  • hazardous substance information, such as long latency periods
	• safety training, induction and refresher training
	• selection and use of PPE and clothing appropriate to the hazard
	• ultraviolet light
	• up-to-date electrical test and tag compliance
	• use of chemicals according to MSDS

© Commonwealth of Australia, 2025 HumanAbility

	• use of residual current devices • use, storage and maintenance of equipment according to manufacturer specifications and equipment operating manuals.

Carpet may include carpet, mats and rugs made from:	• mixed blends
	• natural fibres, such as:
	  • organic (plant) fibres, such as cotton and sisal
	  • silk
	  • wool
	• synthetic fibres, such as:
	  • acrylic
	  • nylon
	  • polyester
	  • polypropylene.

Testing may include:	• burn test • chemical test • sink and float test.
Soil types may be wet or dry and include:	• beverages • candle wax • chewing gum • cigarette butts • dust • dye stuffs • food • grease • heavy dirt build-up • hospital waste • hydrocarbons • industrial and chemical waste • lipstick • nail polish • oil • paper • plant stains • rainwater • shoe polish • tar.
Cleaning techniques may include:	• agitation • assisted drying • dwell time • grooming • neutralisation

© Commonwealth of Australia, 2025 HumanAbility

	• pre-treatment chemical application • removal by absorption • vacuuming to prepare work site.
Personnel may include:	• client's staff members • colleagues • general public • venue, facility, or shopping centre staff and/or management.

Equipment may include:	• carpet-cleaning bonnets and hand bonnets
	• carpet-drying equipment, such as:
	  • air movers
	  • drying bonnets
	• carpet groomers
	• carpet spot-cleaning kits
	• cloths, such as towelling
	• extraction units, such as:
	  • self-contained
	  • vehicle-mounted
	• garbage bins
	• measuring equipment, such as jugs and cups
	• plastic coasters or polystyrene blocks
	• respirators
	• rotary or cylindrical scrubbing machines
	• safety signage
	• scrapers and spatulas
	• selected tools and hand tools
	• sponges
	• spray equipment (pressurised or unpressurised)
	• steam irons
	• trigger sprayers
	• vacuum cleaners, such as:
	  • upright
	  • vehicle-mounted
	• waste recovery tank.

Chemicals may include:	• acid cleaners • alkaline cleaners • low environmental-impact chemicals • neutral cleaners • solvent cleaners.
Personal protective equipment may include:	• ear muffs and plugs • gloves, such as non-permeable • high-visibility vests and clothing

© Commonwealth of Australia, 2025 HumanAbility

	• overalls and other protective clothing • respirators • safety glasses or goggles • safety shoes • splash-proof face masks • sun protection • tongs • ultraviolet protection • wet-work clothing.

Manufacturer specifications may include:	• equipment operating manuals
	• instructional guides
	• MSDS
	• other resources supplied by the manufacturer, such as:
	  • laminated cards
	  • notices
	  • wall posters
	• product labels
	• safety instructions pre-printed on equipment.

Signage and barriers may include:	• physical barriers and restraints restricting access to a site
	• signs complying with legislative requirements and Australian standards, warning of danger or adverse conditions, including:
	  • cleaning in progress
	  • hazardous chemicals in use or present in work area.

Work restrictions may include:	• amount of cleaning anticipated • client activity • employee level of literacy and communication skills • faulty or inappropriate equipment • site accessibility • site hazards • skills of work unit or team • staffing resources • time limitations.
Waste may be either solid or liquid and include:	• chemicals past expiry date • litter • machine or vehicle exhaust emissions • obsolete equipment • packaging • soil • used containers • used or contaminated PPE • used or unused chemicals.

© Commonwealth of Australia, 2025 HumanAbility

Environmental requirements may include:	• clean-up, containment and isolation
	• company policies and guidelines
	• emergency chemical spill control measures
	• environmental protection agency and requirements of government departments, such as:
	  • agriculture
	  • emergency services
	  • national parks and wildlife
	• hazardous materials handling
	• local government regulations and by-laws
	• low-energy carpet-cleaning methods
	• low environmental-impact chemicals
	• low-moisture cleaning methods
	• low water-use equipment and other water-efficient cleaning methods
	• non-chemical carpet-cleaning methods.

Unit Sector(s)

Carpet cleaning

Custom Content Section

CPPCCL2005A Use wet foam shampoo

Modification History

Revised unit

Unit updated and equivalent to PRMCC05A Use wet foam shampoo

Unit Descriptor

This unit of competency specifies the outcomes required to wet foam shampoo a carpet to remove in-ground dirt and soil from the upper layer of the carpet. Wet foam shampooing can be applied to commercial or domestic carpets.

This unit requires the ability to assess the extent of the cleaning task through understanding client requirements and characteristics of the carpet, and to apply company policies and procedures in order to perform the task. The selection of appropriate equipment, chemicals and methods is essential for performing the task safely and efficiently.

Application of the Unit

This unit of competency supports employees without managerial or supervisory responsibilities. A single person working alone usually cleans a carpet using the wet foam shampooing method, but the work can be done in a team. Performance would usually be carried out under routine supervision and within company guidelines.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the Performance criteria describe the performance needed to

© Commonwealth of Australia, 2025 HumanAbility

essential outcomes of a unit of competency.	demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Assess area to be cleaned.	1.1	Area to be cleaned is assessed, ***work order*** is reviewed according to ***company requirements***, and issues are clarified with ***appropriate persons***.
		1.2	***Hazards*** and risks in work site are identified and controlled according to company, ***legislative*** and ***occupational health and safety*** (OHS) ***requirements***.
		1.3	Type, condition and colour-fastness of ***carpet*** are identified by observation and/or ***testing*** according to company requirements.
		1.4	***Soil type*** is identified by observation according to work order and company requirements.
		1.5	***Cleaning techniques*** for carpet are selected according to work order and company requirements.
		1.6	Size and usage pattern of work site are determined to ensure safety of ***personnel*** and efficient use of ***equipment*** and ***chemicals***.
		1.7	Pre-existing damage is identified and reported to appropriate persons according to company requirements.
2	Select equipment and chemicals.	2.1	***Personal protective equipment*** (PPE) is selected and used according to ***manufacturer specifications***, and OHS and company requirements.
		2.2	Equipment and chemicals are selected for work order according to OHS and company requirements.
		2.3	Operational effectiveness of equipment is checked according to manufacturer specifications and company requirements.
		2.4	Equipment is adjusted to suit operator’s requirements according to manufacturer specifications and OHS

© Commonwealth of Australia, 2025 HumanAbility

			requirements.
		2.5	Chemicals are prepared according to manufacturer specifications, and OHS and company requirements.
3	Prepare work site.	3.1	Hazards in work site are confirmed, and risks are controlled and reassessed according to legislative, OHS and company requirements.
		3.2	Furniture and fittings that impede cleaning operation are removed according to work order, and OHS and company requirements.
		3.3	***Signage and barriers*** are installed as required to maximise public safety during cleaning operation according to work order, and OHS and company requirements.
		3.4	***Work restrictions*** affecting completion of work order are identified and appropriate persons are promptly notified.
4	Clean work site using wet foam method.	4.1	Soil is removed and carpet is cleaned using cleaning techniques, equipment, PPE and chemicals according to manufacturer specifications and legislative, OHS and company requirements.
		4.2	Work is performed according to work order, manufacturer specifications and legislative, OHS and company requirements.
5	Tidy work site.	5.1	Collected soil and ***waste*** are disposed of according to client specifications, work order, manufacturer specifications and legislative, OHS and company ***environmental requirements***.
		5.2	Furniture and fittings are replaced according to client requests, work order and OHS requirements.
		5.3	Signage and barriers are removed according to work order, and OHS and company requirements.

© Commonwealth of Australia, 2025 HumanAbility

6	Clean and safety check equipment, and store equipment and chemicals.	6.1	Equipment and PPE are cleaned according to manufacturer specifications and environmental, OHS and company requirements.
		6.2	Equipment and PPE are safety checked according to manufacturer specifications and OHS requirements, and required maintenance is recorded according to company requirements.
		6.3	Equipment and PPE are stored and maintained to allow ready access according to manufacturer specifications, and OHS and company requirements.
		6.4	Chemicals are stored according to manufacturer specifications, and OHS and company requirements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- customer service skills to:
  - establish rapport with clients
  - gain clients' trust
- analytical skills to:
  - assess carpet suitability for wet foam shampoo
  - classify carpet type, soil and stains
  - select chemicals to suit carpet type
  - select cleaning strategies
- interpersonal skills to relate to people from a range of backgrounds
- language, literacy and numeracy skills to:
  - communicate clearly and concisely verbally and in writing
  - explain carpet-cleaning processes and expected outcomes to clients
  - perform mathematical calculations required for diluting and mixing chemicals
  - read and interpret directions and safety instructions, including:
    - chemical labels
    - equipment manuals
    - material safety data sheets (MSDS)
  - request advice or further information
  - seek and receive feedback

© Commonwealth of Australia, 2025 HumanAbility

    - source, organise and record information
- problem-solving skills to manage contingencies
- self-management skills to work alone and in a team
- skills to work safely when:
    - handling and disposing of chemicals
    - identifying hazards and controlling risks
    - manual handling
    - using extraction cleaning techniques

Required knowledge

- carpet characteristics, including:
    - carpet construction
    - features of fibres
- cleaning options for carpet, including:
    - wet foam method
    - pre-spotting and stain-removal methods
    - range of cleaning equipment and chemicals, including:
        - low environmental-impact chemicals
        - low-moisture
    - water-efficient methods
- company management structure and procedures, including:
    - biological and viral control
    - emergency response and evacuation procedures
    - environmental protection procedures
    - injury, dangerous occurrence and incident reporting
    - OHS procedures
    - quality systems
- legislation, regulations, codes of practice and industry advisory standards that apply to carpet cleaning
- safe work practices for using chemicals and equipment, including PPE
- testing methods

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed by observing practical demonstration of the use of wet foam shampoo on at least two

	units relevant to the job function, such as: • CPPCCL2007A Perform basic stain removal.

•
•

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Work order information may include:	• access to work site, including:
	  • access and egress points
	  • timing of access
	• budget allocations
	• completion times and dates
	• human resource requirements to complete work tasks
	• job requirements and tasks
	• legislative and local government requirements, including environmental protection requirements
	• OHS requirements and emergency response procedures
	• requirements for working in isolated and remote locations
	• resource requirements, such as equipment and materials
	• specific client requirements, such as:
	  • dress and presentation requirements
	  • relationships with other activities
	• use of signage and barriers
	• work schedules
	• work site contact persons.

Company requirements may include:	• business and performance plans
	• client communication procedures
	• client confidentiality procedures
	• client service standards
	• communication channels and reporting procedures
	• company goals, objectives, plans, systems and processes
	• company issued identification badge, card or pass
	• company policies and procedures, including:
	  • access and equity policy, principles and practice
	  • OHS policies and procedures, including control procedures
	  • maintenance procedures for equipment and PPE

© Commonwealth of Australia, 2025 HumanAbility

CPPCCL2007A Perform basic stain removal

Modification History

Revised unit

Unit updated and equivalent to PRMCC07A Perform basic stain removal

Unit Descriptor

This unit of competency specifies the outcomes required to remove stains and spots from carpet using basic stain removal techniques.

The unit requires the ability to assess the extent of the cleaning task through understanding client requirements and characteristics of the carpet, and apply company policies and procedures in order to perform the task.

Removing stains and spots may occur as a single task or more likely in conjunction with other cleaning methods, such as vacuuming, extraction, patrolling and general cleaning. The selection of appropriate equipment, chemicals and methods is essential for performing the task safely and efficiently.

A spot is defined as foreign material on a fibre that changes the texture of the fibre. A stain is defined as foreign material in a fibre that changes the appearance of the fibre but not the texture.

Application of the Unit

This unit of competency supports employees without managerial or supervisory responsibilities. Performance would usually be carried out under routine supervision and within company guidelines.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

© Commonwealth of Australia, 2025 HumanAbility

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Assess area to be spot cleaned.	1.1	Area is assessed and **work order** is reviewed according to **company requirements,** and issues are clarified with **appropriate persons.**
		1.2	***Hazards*** in work site are identified and risks controlled according to company, ***legislative*** **and** ***occupational health and safety*** (OHS) ***requirements***.
		1.3	Type, condition and colour-fastness of ***carpet*** are identified by observation and/or ***testing*** according to work order and company requirements.
		1.4	***Soil type*** causing spot or stain is identified through observation and according to work order and company requirements.
		1.5	***Cleaning techniques*** are selected according to work order and company requirements.
		1.6	Size and usage pattern of work site are determined to ensure safety of ***personnel*** and efficient use of ***equipment*** and ***chemicals***.
		1.7	Pre-existing damage is identified and reported to appropriate persons according to company requirements.
2	Select equipment and chemicals.	2.1	***Personal protective equipment*** (PPE) is selected and used according to ***manufacturer specifications***, and OHS and company requirements.
		2.2	Equipment and chemicals are selected for work order according to OHS and company requirements.
		2.3	Operational effectiveness of equipment is checked according to manufacturer specifications and company

© Commonwealth of Australia, 2025 HumanAbility

			requirements.
		2.4	Equipment is adjusted to suit operator's requirements according to manufacturer specifications and OHS requirements.
		2.5	Chemicals are prepared according to manufacturer specifications, and OHS and company requirements.
3	Prepare work site.	3.1	Hazards in work site are confirmed and risks controlled and reassessed according to legislative, OHS and company requirements.
		3.2	Furniture and fittings that impede cleaning operation are removed according to work order, and OHS and company requirements.
		3.3	***Signage and barriers*** are installed as required to maximise public safety during cleaning operation according to work order, and OHS and company requirements.
		3.4	***Work restrictions*** affecting completion of work order are identified and appropriate persons are promptly notified.
4	Clean work site.	4.1	Soil is removed and carpet is cleaned using cleaning techniques, equipment, PPE and chemicals according to manufacturer specifications and legislative, OHS and company requirements.
		4.2	Treated area is compared with surrounding surface to determine need for further action according to work order and company requirements.
		4.3	Results are reported to appropriate persons according to company requirements.
		4.4	Work is performed according to work order, manufacturer specifications and legislative, OHS and company requirements.
5	Tidy work site.	5.1	Collected soil and ***waste*** are disposed of according to client specifications, work order, manufacturer

© Commonwealth of Australia, 2025 HumanAbility

			specifications and legislative, OHS and company ***environmental requirements***.
		5.2	Furniture and fittings are replaced according to client requests, work order and OHS requirements.
		5.3	Signage and barriers are removed according to work order, and OHS and company requirements.
6	Clean and safety check equipment, and store equipment and chemicals.	6.1	Equipment and PPE are cleaned according to manufacturer specifications and environmental, OHS and company requirements.
		6.2	Equipment and PPE are safety checked according to manufacturer specifications and OHS requirements, and required maintenance is recorded according to company requirements.
		6.3	Equipment and PPE are stored and maintained to allow ready access according to manufacturer specifications, and OHS and company requirements.
		6.4	Chemicals are stored according to manufacturer specifications, and OHS and company requirements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- customer service skills to:
  - establish rapport with clients
  - gain clients' trust
- analytical skills to:
  - assess surface suitability for stain removal
  - classify fibres, soil and stains
  - select cleaning strategies and chemicals to suit carpet and stains
- interpersonal skills to relate to people from a range of backgrounds
- language, literacy and numeracy skills to:
  - communicate clearly and concisely verbally and in writing
  - explain carpet-cleaning processes and expected outcomes to the client

© Commonwealth of Australia, 2025 HumanAbility

    - perform mathematical calculations required for diluting and mixing chemicals
    - read and interpret directions and safety instructions, including:
        - chemical labels
        - equipment manuals
        - material safety data sheets (MSDS)
    - request advice or further information
    - seek and receive feedback
    - source, organise and record information
- problem-solving skills to manage contingencies
- self-management skills to work alone and in a team
- skills to work safely when:
    - handling and disposing of chemicals
    - identifying hazards and controlling risks
    - manual handling

Required knowledge

- carpet characteristics, including:
    - carpet construction
    - features of fibres
- characteristics of soil causing spots and stains
- cleaning equipment and chemicals, including:
    - encapsulation
    - low environmental-impact chemicals
    - low–moisture use equipment
- cleaning options for carpet, including:
    - pre-spotting and stain-removal methods
    - water-efficient methods
- company management structure and procedures, including:
    - biological and viral control
    - emergency response and evacuation procedures
    - environmental protection procedures
    - injury, dangerous occurrence and incident reporting
    - OHS procedures
    - quality systems
- correct techniques for:
    - extraction cleaning
    - spot cleaning
- legislation, regulations, codes of practice and industry advisory standards that apply to carpet cleaning and environmental protection
- safe work practices for using:

© Commonwealth of Australia, 2025 HumanAbility

  - chemicals
  - equipment, including PPE
- testing methods

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed by observing practical demonstration of basic stain removal on at least two different types of carpet.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the required skills and knowledge specified in this unit. In particular the person should demonstrate the ability to: • identify type and characteristics of the carpet • identify type of stain or spot • comply with company and legislative requirements • select cleaning equipment and chemicals • achieve outcomes in relation to customer work order and company requirements • apply safe and efficient cleaning methods.
Context of and specific resources for assessment	Assessment of essential underpinning knowledge may be conducted in an off-site context and must comply with relevant regulatory or Australian standards requirements. Resource implications for assessment include access to: • suitable work site or venue with carpet • equipment operating manuals and MSDS • PPE • suitable equipment and chemicals • assessment instruments, including personal planner and assessment record book • work order instructions, work plans and schedules.
Method of assessment	Assessment methods must: • satisfy the endorsed Assessment Guidelines of the Property Services Training Package • include direct observation of tasks in real or simulated work

© Commonwealth of Australia, 2025 HumanAbility

	conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application • reinforce the integration of employability skills with workplace tasks and job roles • confirm that competency is verified and able to be transferred to other circumstances and environments.
Guidance information for assessment	Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support. Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed. This unit could be assessed on its own or in combination with other units relevant to the job function, such as: • CPPCCL2001A Use hot water extraction • CPPCCL2002A Use bonnet cleaning • CPPCCL2003A Use dry foam shampoo • CPPCCL2004A Use dry absorbent compound • CPPCCL2005A Use wet foam shampoo.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Work order information may include:	• access to work site, including:
	  • access and egress points
	  • timing of access
	• budget allocations
	• completion times and dates
	• human resource requirements to complete the work tasks
	• job requirements and tasks
	• legislative and local government requirements, including environmental protection requirements
	• OHS requirements and emergency response procedures
	• requirements for working in isolated and remote locations

© Commonwealth of Australia, 2025 HumanAbility

	• resource requirements, such as equipment and materials
	• specific client requirements, such as:
	  • dress and presentation requirements
	  • relationships with other activities
	• use of signage and barriers
	• work schedules
	• work site contact persons.

Company requirements may include:	• business and performance plans
	• client communication procedures
	• client confidentiality procedures
	• client service standards
	• communication channels and reporting procedures
	• company goals, objectives, plans, systems and processes
	• company issued identification badge, card or pass
	• company policies and procedures, including:
	  • access and equity policy, principles and practice
	  • OHS policies and procedures, including control procedures
	  • maintenance procedures for equipment and PPE
	  • those relating to own role, responsibility and delegation
	  • work site access security clearance procedures
	• company service standards
	• dress and presentation requirements
	• duty of care, code of conduct and code of ethics
	• emergency response and evacuation procedures
	• employer and employee rights and responsibilities
	• environmental protection requirements
	• personnel practices and guidelines
	• quality and continuous improvement processes and standards
	• records and information systems and processes
	• training materials (induction, refresher and new skills)
	• use of contractors.

Appropriate persons may include:	• clients • colleagues • managers • persons in control of work sites • supervisors.
Hazards may include:	• allergic reactions to chemicals and equipment, including latex allergies • biological and animal waste • bites and stings • blood and blood-stained products

© Commonwealth of Australia, 2025 HumanAbility

	• confined and restricted spaces
	• contaminated clothing, materials and equipment
	• damaged or inappropriate equipment
	• dust and fibres
	• electrical hazards arising from:
	  • cables
	  • electrical fittings:
	  • switches
	  • lights
	  • untested electrical equipment
	• fatigue
	• fire
	• gas
	• heights
	• inadequate lighting and ventilation
	• infectious and zoonotic diseases, such as:
	  • Q fever
	  • scabies
	• mobile equipment and vehicle hazards around plant and vehicles
	• moving or unguarded machinery and parts
	• noise
	• occupational violence and bullying
	• poor personal hygiene practices
	• spill, splash and spray
	• release of substances with negative environmental impact
	• synergistic chemical reactions, such as:
	  • hazardous incompatibility
	  • reactivity
	• syringes or other sharps
	• ultraviolet light
	• unsafe manual-handling techniques, including awkward and repetitive postures
	• unsafe underfoot conditions, such as slippery, uneven and rough surfaces
	• unrestricted people access
	• waste and waste disposal
	• work in extremes of temperature
	• work in unfamiliar, isolated or remote environments.

Legislative requirements may include:	• Australian standards, quality assurance and certification requirements • award and enterprise agreements

© Commonwealth of Australia, 2025 HumanAbility

	• industry advisory standards and codes, such as:
	  • building codes
	  • dangerous goods codes
	• relevant commonwealth, state and territory legislation and local government regulations that affect company operation, including:
	  • anti-discrimination and diversity policies
	  • chemical controls
	  • chemical registers and manifests
	  • consumer protection legislation
	  • energy conservation
	  • environmental protection
	  • equal employment opportunity
	  • freedom of information
	  • industrial equipment certificates of competency or licences
	  • industrial relations
	  • OHS Acts and regulations
	  • privacy
	  • public health
	  • trade practices
	  • water conservation
	  • workplace consultative arrangements.

Occupational health and safety (also known as workplace health and safety) ***requirements*** may relate to:	• allergic reactions, such as contact dermatitis
	• communication devices for remote and isolated locations, such as:
	  • mobile phone
	  • two-way radio
	• dermatoxicological control and prevention measures
	• emergency procedures for eye and skin contact, inhalation and ingestion of toxic substances
	• hazard identification and risk assessment mechanisms
	• health surveillance and monitoring, such as regular blood testing
	• hierarchy of hazard control procedures
	• injury and dangerous reporting
	• maintaining clear access ways
	• national and industry standards and codes of practice
	• OHS control procedures, such as:
	  • health and safety plans
	  • job plans
	  • job safety analyses
	  • risk assessments

© Commonwealth of Australia, 2025 HumanAbility

	• safe operating practices and procedures • safe system of work statements • safe work instructions • work method statements • chemical routes of entry • potential symptoms of exposure to chemicals • safe work practices for equipment, PPE and chemical storage, including interpretation of: • MSDS • hazardous substance information, such as long latency periods • safety, induction and refresher training • selection and use of PPE and clothing appropriate to the hazard • ultraviolet light • up-to-date electrical test and tag compliance • use of chemicals according to MSDS • use of residual current devices • use, storage and maintenance of equipment according to manufacturer specifications and equipment operating manuals.
Carpet may include carpet, mats and rugs made from:	• mixed blends • natural fibres, such as: • organic (plant) fibres, such as cotton and sisal • silk • wool • synthetic fibres, such as: • acrylic • nylon • polyester • polypropylene.
Testing may include:	• burn test • chemical test • sink and float test.
Soil types may be wet or dry and include:	• beverages • candle wax • chewing gum • cigarette butts • dust • dye stuffs • food • grease • heavy dirt build-up

© Commonwealth of Australia, 2025 HumanAbility

	• hospital waste • hydrocarbons • industrial and chemical waste • lipstick • nail polish • oil • paper • plant stains • rainwater • shoe polish • tar.
Cleaning techniques may include:	• agitation • assisted drying • dwell time • grooming • low-water usage • neutralisation • pre-treatment chemical application • removal by absorption • vacuuming to prepare work site.
Personnel may include:	• client's staff members • colleagues • general public • venue, facility, or shopping centre staff and/or management.

Equipment may include:	• carpet-cleaning bonnets and hand bonnets
	• carpet-drying equipment, such as:
	  • air movers
	  • drying bonnets
	• carpet groomers
	• carpet spot-cleaning kits
	• cloths, such as towelling
	• extraction units, such as:
	  • self-contained
	  • vehicle-mounted
	• garbage bins
	• measuring equipment, such as jugs and cups
	• plastic coasters or polystyrene blocks
	• respirators
	• rotary or cylindrical scrubbing machines
	• safety signage
	• scrapers and spatulas

© Commonwealth of Australia, 2025 HumanAbility

	• selected tools and hand tools
	• sponges
	• spray equipment (pressurised or unpressurised)
	• steam irons
	• trigger sprayers
	• vacuum cleaners, such as:
	  • upright
	  • vehicle-mounted
	• waste recovery tank.

Chemicals may include:	• acid cleaners • alkaline cleaners • low environmental-impact chemicals • neutral cleaners • solvent cleaners.
Personal protective equipment may include:	• ear muffs and plugs • gloves, such as non-permeable • high-visibility vests and clothing • overalls and other protective clothing • respirators • safety glasses or goggles • safety shoes • splash-proof face masks • sun protection • tongs • ultraviolet protection • wet-work clothing.

Manufacturer specifications may include:	• equipment operating manuals
	• instructional guides
	• MSDS
	• other resources supplied by the manufacturer, such as:
	  • laminated cards
	  • notices
	  • wall posters
	• product labels
	• safety instructions pre-printed on equipment.

Signage and barriers may include:	• physical barriers and restraints erected to restrict access to a site
	• signs complying with legislative requirements and Australian standards, warning of danger or adverse conditions, including:
	  • cleaning in progress
	  • hazardous chemicals in use or present in work area.

Work restrictions may	• amount of cleaning anticipated

© Commonwealth of Australia, 2025 HumanAbility

include:	• client activity • employee level of literacy and communication skills • faulty or inappropriate equipment • site accessibility • site hazards • skills of the work unit or team • staffing resources • time limitations.
Waste may be either solid or liquid and include:	• chemicals past expiry date • litter • machine or vehicle exhaust emissions • obsolete equipment • packaging • soil • used containers • used or contaminated PPE • used or unused chemicals.

Environmental requirements may include:	• clean-up, containment and isolation
	• company policies and guidelines
	• emergency chemical spill control measures
	• environmental protection agency and requirements of government departments, such as:
	  • agriculture
	  • emergency services
	  • national parks and wildlife
	• hazardous materials handling
	• local government regulations and by-laws
	• low environmental-impact chemicals
	• low-energy carpet-cleaning methods
	• low-moisture carpet-cleaning methods
	• low water-use equipment and other water-efficient cleaning methods
	• non-chemical carpet-cleaning methods.

CPPCLO2001A Maintain hard floor surfaces

Modification History

Revised unit

Unit updated and equivalent to PRMCL01B Maintain a hard floor surface

Unit Descriptor

This unit of competency specifies the outcomes required to clean hard floor surfaces. The unit applies to both manual and mechanical methods of cleaning hard floor surfaces. It requires the ability to assess the extent of a cleaning task through understanding client requirements and applying company policies and procedures. Selecting the appropriate equipment, chemicals and methods is essential to performing the task safely and efficiently.

Application of the Unit

This unit of competency supports employees without managerial or supervisory responsibilities. Performance would usually be carried out under routine supervision and within company guidelines.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of

© Commonwealth of Australia, 2025 HumanAbility

performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Assess area to be cleaned.	1.1	Area to be cleaned is assessed, ***work order*** is reviewed according to ***company requirements*** and issues are clarified with ***appropriate persons*****.**
		1.2	***Hazards*** in work area are identified and associated risks assessed according to ***legislative***, ***occupational health and safety*** (OHS) and company ***requirements***.
		1.3	Type and condition of surface on ***hard floor*** are identified by observation according to work order and company requirements.
		1.4	***Soil type*** is identified by observation according to work order and company requirements.
		1.5	***Cleaning techniques*** for surface of hard floor are selected according to work order and company requirements.
		1.6	Size and usage pattern of work site are determined to ensure safety of ***personnel*** and efficient use of ***equipment*** and ***chemicals***.
		1.7	Pre-existing damage is identified and reported to appropriate persons according to company requirements.
2	Select equipment and chemicals.	2.1	Suitable ***personal protective equipment*** (PPE) is selected and used according to ***manufacturer specifications***, and OHS and company requirements.
		2.2	Equipment and chemicals are selected for work order according to OHS and company requirements.
		2.3	Operational effectiveness of equipment is checked according to manufacturer specifications and company requirements.
		2.4	Equipment is adjusted to suit operator’s requirements according to manufacturer specifications and OHS requirements.

© Commonwealth of Australia, 2025 HumanAbility

		2.5	Chemicals are prepared according to manufacturer specifications, and OHS and company requirements.
3	Prepare work site.	3.1	Hazards in work site are confirmed and risks are controlled and reassessed according to legislative, OHS and company requirements.
		3.2	Furniture and fittings that impede cleaning operation are removed according to work order, and OHS and company requirements.
		3.3	***Signage and barriers*** are installed as required to maximise public safety during cleaning operation according to work order, and OHS and company requirements.
		3.4	***Work restrictions*** affecting completion of work order are identified and appropriate persons are promptly notified.
4	Clean work site.	4.1	Hard floor is cleaned using equipment, PPE, chemicals and cleaning techniques according to manufacturer specifications and legislative, OHS and company requirements.
		4.2	Work is performed according to work order, manufacturer specifications and legislative, OHS and company requirements.
5	Tidy work site.	5.1	Collected soil and ***waste*** are disposed of according to client specifications, work order, manufacturer specifications and legislative, OHS, company and ***environmental requirements***.
		5.2	Furniture and fittings are replaced according to client requests, work order and OHS requirements.
		5.3	Signage and barriers are removed according to work order, and OHS and company requirements.
6	Clean and safety check equipment	6.1	Equipment and PPE are cleaned according to manufacturer specifications and environmental, OHS

© Commonwealth of Australia, 2025 HumanAbility

		and company requirements.
and store equipment and chemicals.	6.2	Equipment and PPE are safety checked according to manufacturer specifications and OHS requirements, and required maintenance is recorded according to company requirements.
	6.3	Equipment and PPE are stored and maintained to allow ready access according to manufacturer specifications, and OHS and company requirements.
	6.4	Chemicals are stored according to manufacturer specifications, and OHS and company requirements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- customer service skills to:
  - establish rapport with clients
  - gain clients' trust
  - identify client expectations

interpersonal skills to relate to people from a range of backgrounds

- language, literacy and numeracy skills to:
  - communicate clearly and concisely verbally and in writing
  - perform mathematical calculations required for:
    - diluting and mixing chemicals as specified on product labels
    - measuring area
  - read and interpret directions and safety instructions, including:
    - chemical labels
    - equipment manuals
    - material safety data sheets (MSDS)
  - request advice or further information
  - seek and receive feedback
  - source, organise and record information
- planning and organising skills to:
  - manage time
  - sequence tasks
- problem-solving skills to manage contingencies

© Commonwealth of Australia, 2025 HumanAbility

- skills to work safely when:
  - buffing, mopping, scrubbing and sweeping
  - handling and disposing of chemicals
  - handling and disposing of contaminated and toxic waste
  - identifying hazards and controlling risks
  - manual handling
- self-management skills to work alone and in a team

Required knowledge

- cleaning chemicals and equipment and their applications for hard floor surfaces
- company management structure and procedures, including:
  - biological and viral control
  - emergency response and evacuation procedures
  - environmental protection procedures
  - injury, dangerous occurrence and incident reporting
  - OHS procedures
  - quality systems
- legislation, regulations, codes of practice and industry advisory standards that apply to maintaining hard floor surfaces, including OHS legislation
- routes of entry and potential symptoms of exposure to chemicals
- safe work practices for using:
  - chemicals
  - equipment, including PPE
- types of hard floor surfaces, including:
  - characteristic of surfaces
  - relevant cleaning methods

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed by observing practical demonstrations of maintaining hard floor surfaces involving at least two different surfaces and two different work site environments.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the required skills and knowledge specified in this unit.

© Commonwealth of Australia, 2025 HumanAbility

	In particular the person should demonstrate the ability to: • identify type and condition of hard floor surface • select cleaning equipment and chemicals • comply with company, legislative and regulatory requirements • use safe and efficient cleaning methods • achieve outcomes in relation to customer work order and company requirements.
Context of and specific resources for assessment	Assessment of essential underpinning knowledge may be conducted in an off-site context. It is to comply with relevant regulatory or Australian standards' requirements access to. Resource implications for assessment include: • suitable work site or venue • suitable equipment and chemicals • PPE • equipment operating manuals and MSDS • work order instructions, work plans and schedules • assessment instruments, including personal planner and assessment record book.
Method of assessment	Assessment methods must: • satisfy the endorsed Assessment Guidelines of the Property Services Training Package • include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application • reinforce the integration of employability skills with workplace tasks and job roles • confirm that competency is verified and able to be transferred to other circumstances and environments.
Guidance information for assessment	Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support. Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed. This unit could be assessed on its own or in combination with other units relevant to the job function, such as: • CPPCLO3002A Restore hard floor surfaces.

© Commonwealth of Australia, 2025 HumanAbility

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Work order information may include:	• access to work site, including:
	  • access and egress points
	  • timing of access
	• budget allocations
	• completion times and dates
	• human resource requirements to complete the work tasks
	• job requirements and tasks
	• legislative and local government requirements
	• OHS requirements and emergency response procedures
	• requirements for working in isolated and remote locations
	• resource requirements, such as equipment and materials
	• specific client requirements, such as:
	  • dress and presentation requirements
	  • relationships with other activities
	• use of signage and barriers
	• work schedules
	• work site contact persons
	• work site requirements for specific industries, such as:
	  • hospitals and medical centres
	  • nursing homes
	  • retail food courts
	  • schools
	  • tourism and hospitality.

Company requirements may include:	• business and performance plans
	• client communication procedures
	• client confidentiality procedures
	• client service standards
	• communication channels and reporting procedures
	• company goals, objectives, plans, systems and processes
	• company issued identification badge, card or pass
	• company policies and procedures, including:
	  • access and equity policy, principles and practice
	  • OHS policies and procedures, including control procedures
	  • maintenance procedures for equipment and PPE

© Commonwealth of Australia, 2025 HumanAbility

	• policies and procedures relating to own role, responsibility and delegation • work site access security clearance procedures • company service standards • dress and presentation requirements • duty of care, code of conduct, and code of ethics • emergency response and evacuation procedures • employer and employee rights and responsibilities • environmental protection requirements • personnel practices and guidelines • quality and continuous improvement processes and standards • records and information systems and processes • training materials (induction, refresher and new skills) • use of contractors.
Appropriate persons may include:	• clients • colleagues • managers • persons in control of work sites • supervisors.
Hazards may include:	• allergic reactions to chemicals or equipment, including latex allergies • biological and animal waste • bites and stings • blood and blood-stained products • confined or restricted spaces • contaminated clothing, materials or equipment • damaged or inappropriate equipment • dust and fibres • electrical hazards arising from: • cables • electrical fittings: • switches • lights • untested electrical equipment • fatigue • fire • gas • heights • inadequate lighting and ventilation • infectious and zoonotic diseases, such as: • Q fever

© Commonwealth of Australia, 2025 HumanAbility

	• scabies
	• mobile equipment and vehicle hazards around plant and vehicles
	• moving or unguarded parts
	• noise
	• occupational violence and bullying
	• poor personal hygiene practices
	• spill, splash and spray
	• release of substances with negative environmental impact
	• synergistic chemical reactions, such as:
	  • hazardous incompatibility
	  • reactivity
	• syringes or other sharps
	• temperature extremes
	• ultraviolet light
	• unsafe manual-handling techniques, including awkward and repetitive postures
	• unsafe underfoot conditions, such as slippery, uneven and rough surfaces
	• work in unfamiliar isolated or remote environments.

Legislative requirements may include:	• Australian standards, quality assurance and certification requirements
	• award and enterprise agreements
	• industry advisory standards and codes, such as:
	  • building codes
	  • dangerous goods codes
	• relevant commonwealth, state and territory legislation and local government regulations affecting company operation, including:
	  • anti-discrimination and diversity policies
	  • chemical controls
	  • chemical registers and manifests
	  • consumer protection
	  • energy conservation
	  • environmental protection
	  • equal employment opportunity
	  • freedom of information
	  • industrial equipment certificates of competency or licences
	  • industrial relations
	  • OHS Acts and regulations
	  • privacy

© Commonwealth of Australia, 2025 HumanAbility

	• public health • trade practices • water conservation • workplace consultative arrangements.

Occupational health and safety (also known as workplace health and safety) ***requirements*** may relate to:	• allergic reactions, such as contact dermatitis
	• communication devices for remote and isolated locations, such as:
	  • mobile phone
	  • two-way radio
	• dermatoxicological control and prevention measures
	• emergency procedures for eye and skin contact, and inhalation and ingestion of toxic substances
	• hazard identification and risk assessment mechanisms
	• health surveillance and monitoring, such as regular blood testing
	• hierarchy of hazard control procedures
	• maintaining clear access
	• national and industry standards and codes of practice
	• OHS control procedures, such as:
	  • health and safety plans
	  • job plans
	  • job safety analyses
	  • risk assessments
	  • safe operating practices and procedures
	  • safe system of work statements
	  • safe work instructions
	  • work method statements
	• reporting injury and dangerous occurrences
	• routes of entry and potential symptoms of exposure to chemicals
	• safe work practices for equipment, PPE and chemical storage, including interpretation of:
	  • MSDS
	  • hazardous substance information, such as long latency periods
	• safety training, induction and refresher training
	• selection and use of PPE and clothing appropriate to the hazard
	• ultraviolet light
	• up-to-date electrical test and tag compliance
	• use of chemicals according to MSDS
	• use of residual current devices

	• use, storage and maintenance of equipment according to manufacturer specifications and equipment operating manuals.
Hard floors may include:	• brick • ceramic tiles • concrete • cork • marble • parquetry • pavers • polished wood • proprietary flooring encompassing new technologies • quarry tiles • rubber • slate • terrazzo • vinyl • wood.
Soil types may be wet or dry and include:	• beverages • cigarette butts • dust • food • gravel • heavy dirt build-up • hospital waste • industrial and chemical • liquids • oil • paint • paper • rainwater • stones • syringes • tar.
Cleaning techniques may include:	• air blowing • automatic floor scrubbing • dry buffing • dust mopping and sweeping • low-water cleaning methods, such as using microfibre cleaning products • scrubbing • spray buffing • wet mopping.

© Commonwealth of Australia, 2025 HumanAbility

Personnel may include:	• client's staff members • colleagues • general public • venue, facility, building, shopping centre staff and management.

Equipment may include:	• air blowers
	• brooms, such as:
	  • bassine
	  • banister set
	  • deck fibre
	  • household
	  • millet
	  • nylon
	  • PVC
	  • union fibre
	  • yard
	• cleaning trolleys
	• cloths
	• damp mops, such as:
	  • ragged or fixed shape
	  • cotton or polycotton
	• doodle bag holder
	• dust mops, such as:
	  • straight or scissored
	  • anti-static or cotton
	• dust pans and brushes
	• floor squeegees
	• hospital mops
	• mechanical sweepers
	• microfibre products
	• mop buckets, including ergonomic and split systems
	• mopping system
	• scouring pads
	• split mops
	• water hoses.

Chemicals may include:	• acid cleaners • alkaline cleaners • low environmental-impact chemicals • neutral cleaners • solvent cleaners.

© Commonwealth of Australia, 2025 HumanAbility

Personal protective equipment may include:	• ear muffs and plugs • gloves, such as non-permeable • goggles • high-visibility vests and clothing • overalls and other protective clothing • respirators • safety glasses • safety shoes • splash-proof face masks • sun protection • tongs • ultraviolet protection • wet-work clothing.

Manufacturer specifications may include:	• equipment operating manuals
	• instructional guides
	• MSDS
	• other resources supplied by the manufacturer, such as:
	  • laminated cards
	  • notices
	  • wall posters
	• product labels
	• safety instructions pre-printed on equipment.

Signage and barriers may include:	• physical barriers and restraints erected to restrict access to a site
	• signs complying with legislative requirements and Australian standards warning of danger or adverse conditions, including:
	  • cleaning in progress
	  • hazardous chemicals in use or present in work area.

Work restrictions may include:	• amount of cleaning anticipated • client activity • employee level of literacy and communication skills • faulty or inappropriate equipment • site accessibility • site hazards • skills of work unit or team • staffing resources • time limitations.
Waste may be either solid or liquid and include:	• chemicals past expiry date • litter • obsolete equipment • packaging • soil

© Commonwealth of Australia, 2025 HumanAbility

	• sweeping detritus • used containers • used or contaminated PPE • used or unused chemicals.

Environmental requirements may include:	• clean-up, containment and isolation
	• company policies and guidelines
	• emergency chemical spill control measures
	• environmental protection agency and requirements of government departments, such as:
	  • agriculture
	  • emergency services
	• hazardous materials handling
	• local government regulations and by-laws
	• low-energy cleaning methods
	• low environmental-impact chemicals
	• low-moisture cleaning methods
	• low water-use equipment and water-efficient cleaning methods
	• non-chemical cleaning methods.

CPPCLO2004A Maintain carpeted floors

Modification History

Revised unit

Unit updated and equivalent to PRMCL04B Maintain a carpeted floor

Unit Descriptor

This unit of competency specifies the outcomes required to maintain carpeted floors. The unit applies to both manual and mechanical methods of maintaining carpeted floors. It requires the ability to assess the extent of the cleaning task through understanding client requirements and applying company policies and procedures. Selecting the appropriate equipment, chemicals and methods is essential to performing the task safely and efficiently.

Application of the Unit

This unit of competency supports employees without managerial or supervisory responsibilities. Performance would usually be carried out under routine supervision and within company guidelines.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of

© Commonwealth of Australia, 2025 HumanAbility

performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Assess area to be cleaned.	1.1	Area to be cleaned is assessed, ***work order*** is reviewed according to ***company requirements***, and issues are clarified with ***appropriate persons*****.**
		1.2	Work site ***hazards*** are identified and risks are controlled according to company, ***legislative***, and ***occupational health and safety*** (OHS) ***requirements***.
		1.3	Type and condition of ***carpeted floor*** are identified by observation according to work order and company requirements.
		1.4	***Soil type*** is identified by observation according to work order and company requirements.
		1.5	***Cleaning techniques*** for the carpeted floor are selected according to work order and company requirements.
		1.6	Size and usage pattern of work site are determined to ensure safety of ***personnel*** and efficient use of ***equipment*** and ***chemicals***.
		1.7	Pre-existing damage is identified and reported to appropriate persons according to company requirements.
2	Select equipment and chemicals.	2.1	Suitable ***personal protective equipment*** (PPE) is selected and used according to ***manufacturer specifications***, and OHS and company requirements.
		2.2	Equipment and chemicals are selected for work order according to OHS and company requirements.
		2.3	Operational effectiveness of equipment is checked according to manufacturer specifications and company requirements.
		2.4	Equipment is adjusted to suit operator’s requirements according to manufacturer specifications and OHS requirements.
		2.5	Chemicals are prepared according to manufacturer

© Commonwealth of Australia, 2025 HumanAbility

			specifications, and OHS and company requirements.
3	Prepare work site.	3.1	Hazards in work site are confirmed and risks are controlled and reassessed according to legislative, OHS and company requirements.
		3.2	Furniture and fittings that impede cleaning operations are removed according to work order, and OHS and company requirements.
		3.3	***Signage and barriers*** are installed as required to maximise public safety during cleaning operations according to work order, and OHS and company requirements.
		3.4	***Work restrictions*** affecting the completion of work order are identified and appropriate persons are promptly notified.
4	Clean work site	4.1	Carpeted floor is cleaned using equipment, PPE, chemicals and cleaning techniques according to work order, manufacturer specifications and OHS and company requirements.
		4.2	Follow-up action for spot and stain removal is identified according to work order and company requirements.
		4.3	Work is performed according to work order, manufacturer specifications and legislative, OHS and company requirements.
5	Tidy work site.	5.1	Collected soil and ***waste*** are disposed of according to client specifications, work order, manufacturer specifications and legislative, OHS, company and ***environmental requirements***.
		5.2	Furniture and fittings are replaced according to client requests, work order and OHS requirements.
		5.3	Signage and barriers are removed according to work order, and OHS and company requirements.

© Commonwealth of Australia, 2025 HumanAbility

6	Clean and safety check equipment, and store equipment and chemicals.	6.1	Equipment and PPE are cleaned according to manufacturer specifications and environmental, OHS and company requirements.
		6.2	Equipment and PPE are safety checked according to manufacturer specifications and OHS requirements, and required maintenance is recorded according to company requirements.
		6.3	Equipment and PPE are stored and maintained to allow ready access according to manufacturer specifications, and OHS and company requirements.
		6.4	Chemicals are stored according to manufacturer specifications, and OHS and company requirements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- customer service skills to:
  - establish rapport with clients
  - gain clients' trust
  - identify client expectations
- interpersonal skills to relate to people from a range of backgrounds
- language, literacy and numeracy skills to:
  - communicate clearly and concisely verbally and in writing
  - perform mathematical calculations required for:
    - diluting and mixing chemicals as specified on product labels
    - measuring area
  - read and interpret directions and safety instructions, including:
    - chemical labels
    - equipment manuals
    - material safety data sheets (MSDS)
  - request advice or further information
  - seek and receive feedback
  - source, organise and record information
- planning and organising skills to:
  - manage time

© Commonwealth of Australia, 2025 HumanAbility

    - sequence tasks
- problem-solving skills to manage contingencies
- skills to work safely when:
    - handling and disposing of chemicals
    - handling and disposing of contaminated and toxic waste
    - identifying hazards and controlling risks
    - manual handling
    - using equipment for:
        - raking
        - sweeping
        - vacuuming
- self-management skills to work alone and in a team

Required knowledge

- cleaning chemicals and equipment and their applications for carpet
- company management structure and procedures, including:
    - biological and viral control
    - emergency response and evacuation procedures
    - environmental protection procedures
    - injury, dangerous occurrence and incident reporting
    - OHS procedures
    - quality systems
- legislation, regulations, codes of practice and industry advisory standards that apply to maintaining a carpeted floor, including OHS legislation
- routes of entry and potential symptoms of exposure to chemicals
- safe work practices for using:
    - chemicals
    - equipment, including PPE
- types of carpeted floors, including:
    - characteristic of carpets
    - relevant cleaning methods

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed by observing practical demonstrations of maintaining carpeted floor surfaces involving at

© Commonwealth of Australia, 2025 HumanAbility

	least two different surfaces and two different work site environments.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the required skills and knowledge specified in this unit. In particular the person should demonstrate the ability to: • identify type and characteristics of carpeted floor • comply with company and legislative requirements • use safe and efficient cleaning methods • select cleaning equipment and chemicals • achieve outcomes in relation to customer work order and company requirements.
Context of and specific resources for assessment	Assessment of essential underpinning knowledge may be conducted in an off-site context. It is to comply with relevant regulatory or Australian standards' requirements. Resource implications for assessment include access to: • suitable work site or venue with carpeted floors • suitable equipment and chemicals • PPE • equipment operating manuals and MSDS • work order instructions and work plans • assessment instruments, including personal planner and assessment record book.
Method of assessment	Assessment methods must: • satisfy the endorsed Assessment Guidelines of the Property Services Training Package • include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application • reinforce the integration of employability skills with workplace tasks and job roles • confirm that competency is verified and able to be transferred to other circumstances and environments.
Guidance information for assessment	Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support. Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

© Commonwealth of Australia, 2025 HumanAbility

	This unit could be assessed on its own or in combination with other units relevant to the job function, such as: • CPPCCL2002A Use bonnet cleaning • CPPCCL2007A Perform basic stain removal.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Work order information may include:	• access to work site, including:
	  • access and egress points
	  • timing of access
	• budget allocations
	• completion times and dates
	• human resource requirements to complete the work tasks
	• job requirements and tasks
	• legislative and local government requirements
	• OHS requirements and emergency response procedures
	• requirements for working in isolated and remote locations
	• resource requirements, such as equipment and materials
	• specific client requirements, such as:
	  • dress and presentation requirements
	  • relationships with other activities
	• use of signage and barriers
	• work schedules
	• work site contact persons
	• work site requirements for specific industries, such as:
	  • hospitals and medical centres
	  • nursing homes
	  • retail food courts
	  • schools
	  • tourism and hospitality.

Company requirements may include:	• business and performance plans • client communication procedures • client confidentiality procedures • client service standards

© Commonwealth of Australia, 2025 HumanAbility

	• communication channels and reporting procedures
	• company goals, objectives, plans, systems and processes
	• company issued identification badges, cards or passes
	• company policies and procedures, including:
	  • access and equity policy, principles and practice
	  • OHS policies and procedures, including control procedures
	  • maintenance procedures for equipment and PPE
	  • those relating to own role, responsibility and delegation
	  • work site access security clearance procedures
	• company service standards
	• dress and presentation requirements
	• duty of care, code of conduct, and code of ethics
	• emergency response and evacuation procedures
	• employer and employee rights and responsibilities
	• environmental protection procedures
	• personnel practices and guidelines
	• quality and continuous improvement processes and standards
	• records and information systems and processes
	• training materials (induction, refresher and new skills)
	• using contractors.

Appropriate persons may include:	• clients • colleagues • managers • persons in control of work sites • supervisors.

Hazards may include:	• allergic reactions to chemicals or equipment, including latex allergies
	• biological and animal waste
	• bites and stings
	• blood and blood-stained products
	• confined or restricted spaces
	• contaminated clothing, materials or equipment
	• damaged or inappropriate equipment
	• dust and fibres
	• electrical hazards arising from:
	  • cables
	  • electrical fittings:
	  • switches
	  • lights
	  • untested electrical equipment
	• fatigue

© Commonwealth of Australia, 2025 HumanAbility

	• fire
	• gas
	• heights
	• inadequate lighting and ventilation
	• infectious and zoonotic diseases, such as:
	  • Q fever
	  • scabies
	• mobile equipment and vehicle hazards around plant and vehicles
	• moving or unguarded parts
	• noise
	• occupational violence and bullying
	• poor personal hygiene practices
	• spill, splash and spray
	• release of substances with negative environmental impact
	• synergistic chemical reactions, such as:
	  • hazardous incompatibility
	  • reactivity
	• syringes or other sharps
	• temperature extremes
	• ultraviolet light
	• unsafe manual-handling techniques, including awkward and repetitive postures
	• unsafe underfoot conditions, such as slippery, uneven and rough surfaces
	• work in unfamiliar isolated or remote environments.

Legislative requirements may include:	• Australian standards, quality assurance and certification requirements
	• award and enterprise agreements
	• industry advisory standards and codes, such as:
	  • building codes
	  • dangerous goods codes
	• relevant commonwealth, state and territory legislation and local government regulations affecting company operation, including:
	  • anti-discrimination and diversity policies
	  • chemical controls
	  • chemical registers and manifests
	  • consumer protection
	  • energy conservation
	  • environmental protection
	  • equal employment opportunity
	  • freedom of information

© Commonwealth of Australia, 2025 HumanAbility

	• industrial equipment certificates of competency or licences • industrial relations • OHS Acts and regulations • privacy • public health • trade practices • water conservation • workplace consultative arrangements.

Occupational health and safety (also known as workplace health and safety) ***requirements*** may relate to:	• allergic reactions, such as contact dermatitis
	• communication devices for remote and isolated locations, such as:
	  • mobile phone
	  • two-way radio
	• dermatoxicological control and prevention measures
	• emergency procedures for eye and skin contact, and inhalation and ingestion of toxic substances
	• hazard identification and risk assessment mechanisms
	• health surveillance and monitoring, such as regular blood testing
	• hierarchy of hazard control procedures
	• maintaining clear access
	• national and industry standards and codes of practice
	• OHS control procedures, such as:
	  • health and safety plans
	  • job plans
	  • job safety analyses
	  • risk assessments
	  • safe operating practices and procedures
	  • safe system of work statements
	  • safe work instructions
	  • work method statements
	• reporting injury and dangerous occurrences
	• routes of entry and potential symptoms of exposure to chemicals
	• safe work practices for equipment, PPE and chemical storage, including interpretation of:
	  • MSDS
	  • hazardous substance information, such as long latency periods
	• safety training, induction and refresher training
	• selection and use of PPE and clothing appropriate to the hazard
	• ultraviolet light
	• up-to-date electrical test and tag compliance

© Commonwealth of Australia, 2025 HumanAbility

	• use of chemicals according to MSDS • use of residual current devices • use, storage and maintenance of equipment according to manufacturer specifications and equipment operating manuals.

Carpeted floors may include:	• carpet:
	  • mixed blends
	  • natural fibres, such as:
	  • organic (plant) fibres, such as cotton and sisal
	  • silk
	  • wool
	  • synthetic fibres, such as:
	  • acrylic
	  • nylon
	  • polypropylene
	• coir matting
	• fibres encompassing new technologies
	• mats and rugs
	• synthetic grass.

Soil types can be wet or dry and may include:	• beverages • blood • candle wax • chewing gum • food • glue • grease and oil • human and animal waste • lipstick • medicine • mud and dirt • nail polish • paint • shoe polish.
Cleaning techniques may include:	• hand collection of waste • raking • sweeping • using a dust-pan and brush • using low-water cleaning methods • vacuuming.
Personnel may include:	• client's staff members • colleagues • general public

© Commonwealth of Australia, 2025 HumanAbility

	• venue, facility, shopping centre staff and management.

Equipment may include:	• accumulation (vacuum dust) bags
	• brooms (stiff bristle), such as deck fibre or millet
	• carpet rakes
	• dustpans, scoops and brushes
	• hoses and filters
	• microfibre products
	• vacuum machines, including:
	  • back-mounted units
	  • ducted systems
	  • floor-based mobile systems
	  • mechanical push sweepers
	  • wet and dry systems
	• vacuum tools, including:
	  • brushes
	  • crevice tools
	  • floor heads
	  • power heads
	  • upholstery heads
	  • variable pile height and adjustable heads.

Chemicals may include:	• acid cleaners • alkaline cleaners • low environmental-impact chemicals • neutral cleaners • solvent cleaners.
Personal protective equipment may include:	• ear muffs and plugs • gloves, such as non-permeable • goggles • high-visibility vests and clothing • overalls and other protective clothing • respirators • safety glasses • safety shoes • splash-proof face masks • sun protection • tongs • ultraviolet protection • wet-work clothing.
Manufacturer specifications may	• equipment operating manuals • instructional guides

© Commonwealth of Australia, 2025 HumanAbility

include:	• MSDS
	• other resources supplied by the manufacturer, such as:
	  • laminated cards
	  • notices
	  • wall posters
	• product labels
	• safety instructions pre-printed on equipment.

Signage and barriers may include:	• physical barriers and restraints erected to restrict access to a site
	• signs complying with legislative requirements and Australian standards warning of danger or adverse conditions, including:
	  • cleaning in progress
	  • hazardous chemicals in use or present in work area.

Work restrictions may include:	• amount of cleaning anticipated • client activity • employee level of literacy and communication skills • faulty or inappropriate equipment • site accessibility • site hazards • skills of work unit or team • staffing resources • time limitations.
Waste may be either solid or liquid and include:	• chemicals past expiry date • disposable vacuum liner bags • litter • obsolete equipment • packaging • soil • used containers • used or contaminated PPE • used or unused chemicals.

Environmental requirements may include:	• clean-up, containment and isolation
	• company policies and guidelines
	• emergency chemical spill control measures
	• environmental protection agency and requirements of government departments, such as:
	  • agriculture
	  • emergency services
	• hazardous materials handling
	• local government regulations and by-laws
	• low-energy cleaning methods
	• low environmental-impact chemicals

© Commonwealth of Australia, 2025 HumanAbility

	• low-moisture cleaning methods • low water-use equipment and water-efficient cleaning methods • non-chemical cleaning methods.

CPPCLO2009A Clean glass surfaces

Modification History

Revised unit

Unit updated and equivalent to PRMCL09B Clean glass surfaces

Unit Descriptor

This unit of competency specifies the outcomes required to clean glass surfaces, including windows, in both internal and external situations. It requires the ability to assess the extent of the cleaning task through understanding client requirements and characteristics of the glass surface, and applying company policies and procedures. Selecting the appropriate equipment, chemicals and methods is essential to performing the task safely and efficiently.

Application of the Unit

This unit of competency supports employees without managerial or supervisory responsibilities. The work may be performed in teams or individually. Performance would usually be carried out under routine supervision and within company guidelines.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of

© Commonwealth of Australia, 2025 HumanAbility

performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Assess area to be cleaned.	1.1	***Glass surfaces*** to be cleaned are assessed, ***work order*** is reviewed according to ***company requirements***, and issues are clarified with ***appropriate persons.***
		1.2	***Hazards*** are identified and risks controlled in work site according to ***legislative***, ***occupational health and safety*** (OHS) and company ***requirements***.
		1.3	Type of glass surface and ***soil*** is identified by observation according to work order and company requirements.
		1.4	Work site access requirements are identified according to the work order and company requirements.
		1.5	***Cleaning techniques*** are confirmed according to work order and company requirements.
		1.6	Size and usage pattern of the work site are determined to ensure safety of ***personnel*** and efficient use of ***equipment*** and ***chemicals***.
		1.7	Glass surface is inspected for defects according to company requirements.
		1.8	Pre-existing damage is identified and reported to appropriate persons according to company requirements.
2	Select equipment and chemicals.	2.1	***Personal protective equipment*** (PPE) is selected and used according to ***manufacturer specifications***, and OHS and company requirements.
		2.2	Equipment and chemicals are selected for work order according to OHS and company requirements.
		2.3	Operational effectiveness of equipment is checked according to manufacturer specifications and company requirements.
		2.4	Equipment is adjusted to suit operator's requirements according to manufacturer specifications and OHS

© Commonwealth of Australia, 2025 HumanAbility

			requirements.
		2.5	Chemicals are prepared according to manufacturer specifications, and OHS and company requirements.
3	Prepare work site.	3.1	Hazards in work site are confirmed and risks are controlled and reassessed according to legislative, OHS and company requirements.
		3.2	***Signage and barriers*** are installed as required to maximise public safety during cleaning operation according to work order, and OHS and company requirements.
		3.3	***Window coverings and fittings*** are removed to permit access and prevent damage according to work order and company requirements.
		3.4	***Work restrictions*** affecting completion of work order are identified and appropriate persons are promptly notified.
4	Clean work site.	4.1	Soil is scraped from glass surface according to work order, and OHS and company requirements.
		4.2	Spot cleaning techniques are used according to work order and company requirements.
		4.3	Glass surface is washed and squeegeed according to work order and company requirements.
		4.4	Window edges and sills are wiped to remove soil and ***waste*** according to work order and company requirements.
		4.5	Work is performed according to work order, manufacturer specifications and legislative, OHS and company requirements.
5	Tidy work site.	5.1	Collected soil and waste are disposed of according to client specifications, work order, manufacturer specifications and legislative, OHS, company and ***environmental requirements***.

© Commonwealth of Australia, 2025 HumanAbility

		5.2	Window coverings and fittings are replaced according to client requests and work order.
		5.3	Signage and barriers are removed according to work order, and OHS and company requirements.
6	Clean and safety check equipment, and store equipment and chemicals.	6.1	Equipment and PPE are cleaned according to manufacturer specifications and environmental, OHS and company requirements.
		6.2	Equipment and PPE are safety checked according to manufacturer specifications and OHS requirements, and required maintenance is recorded according to company requirements.
		6.3	Equipment and PPE are stored and maintained to allow ready access according to manufacturer specifications, and OHS and company requirements.
		6.4	Chemicals are stored according to manufacturer specifications, and OHS and company requirements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- customer service skills to:
  - establish rapport with clients
  - gain clients' trust
  - identify client expectations
- interpersonal skills to relate to people from a range of backgrounds
- language, literacy and numeracy skills to:
  - communicate clearly and concisely verbally and in writing
  - perform mathematical calculations required for:
    - diluting and mixing chemicals as specified on product labels
    - measuring area
  - read and interpret directions and safety instructions, including:
    - chemical labels
    - equipment manuals

© Commonwealth of Australia, 2025 HumanAbility

    - material safety data sheets (MSDS)
  - request advice or further information
  - seek and receive feedback
  - source, organise and record information
- planning and organising skills to:
  - manage time
  - sequence tasks
- problem-solving skills to manage contingencies
- skills to work safely when:
  - handling and disposing of chemicals
  - handling and disposing of contaminated and toxic waste
  - identifying hazards and controlling risks
  - manual handling
  - using equipment for cleaning glass
- self-management skills to work alone and in a team

Required knowledge

- cleaning chemicals and equipment and their applications for glass surfaces
- company management structure and procedures, including:
  - biological and viral control
  - emergency response and evacuation procedures
  - environmental protection procedures
  - injury, dangerous occurrence and incident reporting
  - OHS procedures
  - quality systems
- legislation, regulations, codes of practice and industry advisory standards that apply to cleaning glass surfaces, including OHS legislation
- routes of entry and potential symptoms of exposure to chemicals
- safe work practices for using:
  - chemicals
  - equipment, including PPE
- types of glass surfaces, their characteristics and appropriate cleaning methods

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed by observing practical

© Commonwealth of Australia, 2025 HumanAbility

	demonstration of cleaning glass surfaces involving at least two different surfaces and two different work site environments.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the required skills and knowledge specified in this unit. In particular the person should demonstrate the ability to: • identify type and characteristics of glass surface • select cleaning equipment and chemicals • use safe and efficient cleaning methods • comply with company and legislative requirements • achieve outcomes in relation to customer work order and company requirements.
Context of and specific resources for assessment	Assessment of essential underpinning knowledge may be conducted in an off-site context. It is to comply with relevant regulatory or Australian standards' requirements. Resource implications for assessment include access to: • suitable venue with a number of types of glass surfaces • suitable equipment and chemicals • PPE • equipment operating manuals and MSDS • work order instructions, work plans and schedules • assessment instruments, including personal planner and assessment record book.
Method of assessment	Assessment methods must: • satisfy the endorsed Assessment Guidelines of the Property Services Training Package • include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application • reinforce the integration of employability skills with workplace tasks and job roles • confirm that competency is verified and able to be transferred to other circumstances and environments.
Guidance information for assessment	Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support. Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

	This unit could be assessed on its own or in combination with other units relevant to the job function, such as: • CPPCLO2015A Maintain furniture, fittings and room dressing • CPPCLO2037A Clean external surfaces.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Glass surfaces may include:	• coated glass • frosted glass • laminated glass • ordinary window glass • textured glass • tinted glass.

Work order information may include:	• access to work site, including:
	  • access and egress points
	  • timing of access
	• budget allocations
	• completion times and dates
	• human resource requirements to complete the work tasks
	• job requirements and tasks
	• legislative and local government requirements
	• OHS requirements and emergency response procedures
	• requirements for working in isolated and remote locations
	• resource requirements, such as equipment and materials
	• specific client requirements, such as:
	  • dress and presentation requirements
	  • relationships with other activities
	• use of signage and barriers
	• work schedules
	• work site contact persons
	• work site requirements for specific industries, such as:
	  • hospitals and medical centres
	  • nursing homes
	  • retail food courts

© Commonwealth of Australia, 2025 HumanAbility

	• schools • tourism and hospitality.

Company requirements may include:	• business and performance plans
	• client communication procedures
	• client confidentiality procedures
	• client service standards
	• communication channels and reporting procedures
	• company goals, objectives, plans, systems and processes
	• company issued identification badges, cards or passes
	• company policies and procedures, including:
	  • access and equity policy, principles and practice
	  • OHS policies and procedures, including control procedures
	  • maintenance procedures for equipment and PPE
	  • those relating to own role, responsibility and delegation
	  • work site access security clearance procedures
	• company service standards
	• dress and presentation requirements
	• duty of care, code of conduct, and code of ethics
	• emergency response and evacuation procedures
	• employer and employee rights and responsibilities
	• environmental protection procedures
	• personnel practices and guidelines
	• quality and continuous improvement processes and standards
	• records and information systems and processes
	• training materials (induction, refresher and new skills)
	• use of contractors.

Appropriate persons may include:	• clients • colleagues • managers • persons in control of work sites • supervisors.
Hazards may include:	• allergic reactions to chemicals or equipment, including latex allergies • biological and animal waste • bites and stings • blood and blood-stained products • confined or restricted spaces • contaminated clothing, materials or equipment • damaged or inappropriate equipment • dust and fibres • electrical hazards arising from:

© Commonwealth of Australia, 2025 HumanAbility

	• cables
	• electrical fittings:
	  • switches
	  • lights
	• untested electrical equipment
	• fatigue
	• fire
	• gas
	• heights
	• inadequate lighting and ventilation
	• infectious and zoonotic diseases, such as:
	  • Q fever
	  • scabies
	• mobile equipment and vehicle hazards around plant and vehicles
	• moving or unguarded parts
	• noise
	• occupational violence and bullying
	• poor personal hygiene practices
	• spill, splash and spray
	• release of substances with negative environmental impact
	• synergistic chemical reactions, such as:
	  • hazardous incompatibility
	  • reactivity
	• syringes or other sharps
	• temperature extremes
	• ultraviolet light
	• unsafe manual-handling techniques, including awkward and repetitive postures
	• unsafe underfoot conditions, such as slippery, uneven and rough surfaces
	• work in unfamiliar isolated or remote environments.

Legislative requirements may include:	• Australian standards, quality assurance and certification requirements
	• award and enterprise agreements
	• industry advisory standards and codes, such as:
	  • building codes
	  • dangerous goods codes
	• relevant commonwealth, state and territory legislation and local government regulations affecting company operation, including:
	  • anti-discrimination and diversity policies
	  • chemical controls

© Commonwealth of Australia, 2025 HumanAbility

	• chemical registers and manifests • consumer protection • energy conservation • environmental protection • equal employment opportunity • freedom of information • industrial equipment certificates of competency or licences • industrial relations • OHS Acts and regulations • privacy • public health • trade practices • water conservation • workplace consultative arrangements.

Occupational health and safety (also known as workplace health and safety) ***requirements*** may relate to:	• allergic reactions, such as contact dermatitis
	• communication devices for remote and isolated locations, such as:
	  • mobile phone
	  • two-way radio
	• dermatoxicological control and prevention measures
	• emergency procedures for eye and skin contact, and inhalation and ingestion of toxic substances
	• hazard identification and risk assessment mechanisms
	• health surveillance and monitoring, such as regular blood testing
	• hierarchy of hazard control procedures
	• maintaining clear access
	• national and industry standards and codes of practice
	• OHS control procedures, such as:
	  • health and safety plans
	  • job plans
	  • job safety analyses
	  • risk assessments
	  • safe operating practices and procedures
	  • safe system of work statements
	  • safe work instructions
	  • work method statements
	• reporting injury and dangerous occurrences
	• routes of entry and potential symptoms of exposure to chemicals
	• safe work practices for equipment, PPE and chemical storage, including interpretation of:

© Commonwealth of Australia, 2025 HumanAbility

	• MSDS • hazardous substance information, such as long latency periods • safety training, induction and refresher training • selection and use of PPE and clothing appropriate to the hazard • ultraviolet light • up-to-date electrical test and tag compliance • use of chemicals according to MSDS • use of residual current devices • use, storage and maintenance of equipment according to manufacturer specifications and equipment operating manuals.
Soil types can be wet or dry and may include:	• adhesives • concrete • dried encrustations • exhaust pollution • gum • heavy dirt build-up • hospital residue • office chemicals, such as whiteout • oil and grease • paint • pen marks • smog.
Cleaning techniques may include:	• fanning • low-water cleaning methods, such as using microfibre cleaning products • pre-spraying • scraping • spot cleaning • squeegeeing.
Personnel may include:	• client's staff members • colleagues • general public • venue, facility, shopping centre staff and management.
Equipment may include:	• access equipment, such as ladders • buckets • chamois • extension poles • glass scrapers of various sizes • hoses • lint-free cloths

© Commonwealth of Australia, 2025 HumanAbility

	• microfibre products • squeegees of various sizes • window wash applicators • window washers, such as lamb's wool.
Chemicals may include:	• acid cleaners • low environmental-impact chemicals • alkaline cleaners • neutral cleaners • solvent cleaners.
Personal protective equipment may include:	• ear muffs and plugs • gloves, such as non-permeable • goggles • high-visibility vests and clothing • overalls and other protective clothing • respirators • safety glasses • safety harness • safety shoes • splash-proof face masks • sun protection • tongs • ultraviolet protection • wet-work clothing.

Manufacturer specifications may include:	• equipment operating manuals
	• instructional guides
	• MSDS
	• other resources supplied by the manufacturer, such as:
	  • laminated cards
	  • notices
	  • wall posters
	• product labels
	• safety instructions pre-printed on equipment.

Signage and barriers may include:	• physical barriers and restraints erected to restrict access to a site
	• signs complying with legislative requirements and Australian standards warning of danger or adverse conditions, including:
	  • cleaning in progress
	  • hazardous chemicals in use or present in work area.

Window coverings and fittings may include:	• blinds • curtains • sunshades.
Work restrictions may	• amount of cleaning anticipated

© Commonwealth of Australia, 2025 HumanAbility

include:	• client activity • employee level of literacy and communication skills • faulty or inappropriate equipment • site accessibility • site hazards • skills of work unit or team • staffing resources • time limitations.
Waste may be either solid or liquid and include:	• chemicals past expiry date • obsolete equipment • packaging • used containers • used or contaminated PPE • used or unused chemicals.

Environmental requirements may include:	• clean-up, containment and isolation
	• company policies and guidelines
	• emergency chemical spill control measures
	• environmental protection agency and requirements of government departments, such as:
	  • agriculture
	  • emergency services
	• hazardous materials handling
	• local government regulations and by-laws
	• low-energy cleaning methods
	• low environmental-impact chemicals
	• low-moisture cleaning methods
	• low water-use equipment and water-efficient cleaning methods
	• non-chemical cleaning methods.

Unit Sector(s)

Cleaning operations

Custom Content Section

Not applicable.

CPPCLO2010A Clean ceiling surfaces and fittings

Modification History

Revised unit

Unit updated and equivalent to PRMCL10B Clean ceiling surfaces and fittings

Unit Descriptor

This unit of competency specifies the outcomes required to clean ceiling surfaces and fittings. The unit requires the ability to assess the extent of the cleaning task through knowledge of characteristics of the ceiling surface and fittings and the type of soiling. It requires an understanding of client requirements and the ability to apply company policies and procedures.

Selecting the appropriate equipment, chemicals and cleaning methods is essential to performing the task safely and efficiently. Where ladders are being used, the work is usually done in pairs.

Application of the Unit

This unit applies to ceiling surfaces less than three metres high, as use of specialised equipment, cleaning methods and safety procedures are required above this height.

This unit of competency supports employees without managerial or supervisory responsibilities. The work may be performed in teams or individually. Performance would usually be carried out under routine supervision and within company guidelines.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Assess area to be cleaned.	1.1	Area to be cleaned is assessed, ***work order*** is reviewed according to ***company requirements***, and issues are clarified with ***appropriate persons*****.**
		1.2	***Hazards*** are identified and risks controlled in work site according to company, ***legislative***, and ***occupational health and safety*** (OHS) ***requirements***.
		1.3	Type of ***ceiling surface*** and ***fittings*** is identified by observation according to work order and company requirements.
		1.4	***Soil types*** on ceiling surfaces and fittings are identified by observation according to work order and company requirements.
		1.5	Work site access arrangements are confirmed according to work order, and OHS and company requirements.
		1.6	***Cleaning techniques*** are selected according to work order and company requirements.
		1.7	Size and usage pattern of work site are determined to ensure safety of ***personnel*** and efficient use of ***equipment*** and ***chemicals***.
		1.8	Pre-existing damage is identified and reported to appropriate persons according to company requirements.
2	Select equipment and chemicals.	2.1	***Personal protective equipment*** (PPE) is selected and used according to ***manufacturer specifications***, and OHS and company requirements.
		2.2	Equipment and chemicals are selected for work order

© Commonwealth of Australia, 2025 HumanAbility

			according to OHS and company requirements.
		2.3	Operational effectiveness of equipment is checked according to manufacturer specifications and company requirements.
		2.4	Equipment is adjusted to suit operator's requirements according to manufacturer specifications and OHS requirements.
		2.5	Chemicals are prepared according to manufacturer specifications, and OHS and company requirements.
3	Prepare work site.	3.1	Hazards in work site are confirmed and risks are controlled and reassessed according to legislative, OHS and company requirements.
		3.2	***Signage and barriers*** are installed as required to maximise public safety during cleaning operation according to work order, and OHS and company requirements.
		3.3	Floor, furniture and equipment are covered with drop sheets according to work order and company requirements.
		3.4	***Work restrictions*** affecting the completion of work order are identified and appropriate persons are promptly notified.
4	Clean work site.	4.1	Cobwebs and dry dust are removed according to work order, and OHS and company requirements.
		4.2	Difficult to reach areas are vacuumed according to work order, and OHS and company requirements.
		4.3	Fittings are wiped according to work order and company requirements.
		4.4	Chemical solution is rinsed from all surfaces according to work order and company requirements.
		4.5	Work is performed according to work order, manufacturer specifications and legislative, OHS and company requirements.

© Commonwealth of Australia, 2025 HumanAbility

5	Tidy work site.	5.1	Collected soil and ***waste*** are disposed of according to client specifications, work order, manufacturer specifications and legislative, OHS, company and ***environmental requirements***.
		5.2	Furniture and fittings are replaced according to client requests, work order and OHS requirements.
		5.3	Signage and barriers are removed according to work order, and OHS and company requirements.
6	Clean and safety check equipment, and store equipment and chemicals.	6.1	Equipment and PPE are cleaned according to manufacturer specifications and environmental, OHS and company requirements.
		6.2	Equipment and PPE are safety checked according to manufacturer specifications and OHS requirements, and required maintenance is recorded according to company requirements.
		6.3	Equipment and PPE are stored and maintained to allow ready access according to manufacturer specifications, and OHS and company requirements.
		6.4	Chemicals are stored according to manufacturer specifications, and OHS and company requirements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- correct cleaning techniques for:
  - various surface types
  - various types and textures of fittings
- customer service skills to:
  - establish rapport with clients
  - gain clients' trust
  - identify client expectations

© Commonwealth of Australia, 2025 HumanAbility

interpersonal skills to relate to people from a range of backgrounds

- language, literacy and numeracy skills to:
  - communicate clearly and concisely verbally and in writing
  - perform mathematical calculations required for:
    - diluting and mixing chemicals as specified on product labels
    - measuring area
  - read and interpret directions and safety instructions, including:
    - chemical labels
    - equipment manuals
    - material safety data sheets (MSDS)
  - request advice or further information
  - seek and receive feedback
  - source, organise and record information
- planning and organising skills to:
  - manage time
  - sequence tasks
- problem-solving skills to manage contingencies
- skills to work safely when:
  - handling and disposing of chemicals
  - handling and disposing of contaminated and toxic waste
  - identifying hazards and controlling risks
  - manual handling
- self-management skills to work alone and in a team

Required knowledge

- cleaning chemicals and equipment and their application for surfaces of ceilings and fittings
- company management structure and procedures, including:
  - biological and viral control
  - emergency response and evacuation procedures
  - environmental protection procedures
  - injury, dangerous occurrence and incident reporting
  - OHS procedures
  - quality systems
- legislation, regulations, codes of practice and industry advisory standards that apply to clean ceiling surfaces and fittings, including OHS legislation
- routes of entry and potential symptoms of exposure to chemicals
- safe work practices for using:
  - chemicals
  - equipment, including PPE
- types of ceiling and fitting surfaces, their characteristics and appropriate cleaning methods

© Commonwealth of Australia, 2025 HumanAbility

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed by observing practical demonstrations of cleaning ceiling surfaces and fittings involving at least two different surfaces and two different work site environments.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the required skills and knowledge specified in this unit. In particular the person should demonstrate the ability to: • identify type and characteristics of ceiling surface and fittings • select cleaning equipment and chemicals • use safe and efficient cleaning methods • comply with company and legislative requirements • achieve outcomes in relation to customer work order and company requirements.
Context of and specific resources for assessment	Assessment of essential underpinning knowledge may be conducted in an off-site context. It is to comply with relevant regulatory or Australian standards' requirements. Resource implications for assessment include access to: • suitable work site or venue with ceiling surfaces and fittings • suitable equipment and chemicals • PPE • equipment operating manuals and MSDS • work order instructions, work plans and schedules • assessment instruments, including personal planner and assessment record book.
Method of assessment	Assessment methods must: • satisfy the endorsed Assessment Guidelines of the Property Services Training Package • include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application • reinforce the integration of employability skills with workplace

© Commonwealth of Australia, 2025 HumanAbility

	tasks and job roles • confirm that competency is verified and able to be transferred to other circumstances and environments.
Guidance information for assessment	Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support. Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed. This unit could be assessed on its own or in combination with other units relevant to the job function, such as: • CPPCLO2015A Maintain furniture, fittings and room dressing.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Work order information may include:	• access to work site, including:
	  • access and egress points
	  • timing of access
	• budget allocations
	• completion times and dates
	• human resource requirements to complete the work tasks
	• job requirements and tasks
	• legislative and local government requirements
	• OHS requirements and emergency response procedures
	• requirements for working in isolated and remote locations
	• resource requirements, such as equipment and materials
	• specific client requirements, such as:
	  • dress and presentation requirements
	  • relationships with other activities
	• use of signage and barriers
	• work schedules
	• work site contact persons
	• work site requirements for specific industries, such as:
	  • hospitals and medical centres

© Commonwealth of Australia, 2025 HumanAbility

	• nursing homes • retail food courts • schools • tourism and hospitality.
Company requirements may include:	• access and equity policy, principles and practice • business and performance plans • client communication procedures • client confidentiality procedures • client service standards • communication channels and reporting procedures • company goals, objectives, plans, systems and processes • company issued identification badges, cards or passes • company policies and procedures • company service standards • dress and presentation requirements • duty of care, code of conduct, and code of ethics • emergency response and evacuation procedures • employer and employee rights and responsibilities • environmental protection procedures • maintenance procedures for equipment and PPE • OHS control • OHS policies and procedures • personnel practices and guidelines • policies and procedures relating to own role, responsibility and delegation • quality and continuous improvement processes and standards • records and information systems and processes • training materials (induction, refresher and new skills) • using contractors • work site access security clearance procedures.
Appropriate persons may include:	• clients • colleagues • managers • persons in control of work sites • supervisors.
Hazards may include:	• allergic reactions to chemicals or equipment, including latex allergies • biological and animal waste • bites and stings • blood and blood-stained products • confined or restricted spaces

© Commonwealth of Australia, 2025 HumanAbility

	• contaminated clothing, materials or equipment
	• damaged or inappropriate equipment
	• dust and fibres
	• electrical hazards arising from:
	  • cables
	  • electrical fittings:
	  • switches
	  • lights
	  • untested electrical equipment
	• fatigue
	• fire
	• gas
	• heights
	• inadequate lighting and ventilation
	• infectious and zoonotic diseases, such as:
	  • Q fever
	  • scabies
	• mobile equipment and vehicle hazards around plant and vehicles
	• moving or unguarded parts
	• noise
	• occupational violence and bullying
	• poor personal hygiene practices
	• spill, splash and spray
	• release of substances with negative environmental impact
	• synergistic chemical reactions, such as:
	  • hazardous incompatibility
	  • reactivity
	• syringes or other sharps
	• temperature extremes
	• ultraviolet light
	• unsafe manual-handling techniques, including awkward and repetitive postures
	• unsafe underfoot conditions, such as slippery, uneven and rough surfaces
	• work in unfamiliar isolated or remote environments.

Legislative requirements may include:	• Australian standards, quality assurance and certification requirements
	• award and enterprise agreements
	• industry advisory standards and codes, such as:
	  • building codes
	  • dangerous goods codes

© Commonwealth of Australia, 2025 HumanAbility

	• relevant commonwealth, state and territory legislation and local government regulations affecting company operation, including:
	  • anti-discrimination and diversity policies
	  • chemical controls
	  • chemical registers and manifests
	  • consumer protection
	  • energy conservation
	  • environmental protection
	  • equal employment opportunity
	  • freedom of information
	  • industrial equipment certificates of competency or licences
	  • industrial relations
	  • OHS Acts and regulations
	  • privacy
	  • public health
	  • trade practices
	  • water conservation
	  • workplace consultative arrangements.

Occupational health and safety (also known as workplace health and safety) ***requirements*** may relate to:	• allergic reactions, such as contact dermatitis
	• communication devices for remote and isolated locations, such as:
	  • mobile phone
	  • two-way radio
	• dermatoxicological control and prevention measures
	• emergency procedures for eye and skin contact, and inhalation and ingestion of toxic substances
	• hazard identification and risk assessment mechanisms
	• health surveillance and monitoring, such as regular blood testing
	• hierarchy of hazard control procedures
	• maintaining clear access
	• national and industry standards and codes of practice
	• OHS control procedures, such as:
	  • health and safety plans
	  • job plans
	  • job safety analyses
	  • risk assessments
	  • safe operating practices and procedures
	  • safe system of work statements
	  • safe work instructions
	  • work method statements

© Commonwealth of Australia, 2025 HumanAbility

	• reporting injury and dangerous occurrences
	• routes of entry and potential symptoms of exposure to chemicals
	• safe work practices for equipment, PPE and chemical storage, including interpretation of:
	  • MSDS
	  • hazardous substance information, such as long latency periods
	• safety training, induction and refresher training
	• selection and use of PPE and clothing appropriate to the hazard
	• ultraviolet light
	• up-to-date electrical test and tag compliance
	• use of chemicals according to MSDS
	• use of residual current devices
	• use, storage and maintenance of equipment according to manufacturer specifications and equipment operating manuals.

Ceiling surfaces may:	• be flat, suspended or raked • be made of hard or absorbent materials • encompass new technologies.
Fittings may include:	• cameras • ceiling fans • ornamental hanging lights • projecting lights • recessed lights • skylights • smoke detectors • speakers • sprinkler systems • televisions • vents and grilles.
Soil types may include:	• adhered soil • cobwebs • dust.
Cleaning techniques may include:	• cobwebbing • detailing • dusting, including high dusting • fully washing the ceilings and fittings • low-water cleaning methods, such as using microfibre cleaning products • rinsing • spot cleaning • wiping.

© Commonwealth of Australia, 2025 HumanAbility

Personnel may include:	• client's staff members • colleagues • general public • venue, facility, shopping centre staff and management.

Equipment may include:	• access equipment, such as ladders, including A frame ladders
	• cleaning equipment, including:
	  • anti-static dusters
	  • buckets
	  • cleaning cloths
	  • cobwebbers and extensions
	  • drop sheets
	  • fringe dusters
	  • glass cleaning equipment
	  • lamb's wool applicators
	  • scourers
	  • sponges
	  • microfibre products
	  • vacuum cleaners
	  • wall mates
	  • wheeled cleaner's trolleys.

Chemicals may include:	• acid cleaners • alkaline cleaners • low environmental-impact chemicals • neutral cleaners • solvent cleaners.
Personal protective equipment may include:	• ear muffs and plugs • gloves, such as non-permeable • goggles • high-visibility vests and clothing • overalls and other protective clothing • respirators • safety glasses • safety shoes • splash-proof face masks • sun protection • tongs • ultraviolet protection • wet-work clothing.
Manufacturer specifications may	• equipment operating manuals • instructional guides

CPPCLO2015A Maintain furniture, fittings and room dressing

Modification History

Revised unit

Unit updated and equivalent to PRMCL15B Maintain furniture and fittings and room dressing

Unit Descriptor

This unit of competency specifies the outcomes required to maintain furniture and fittings and to dress an area. Dressing is the placement and location of furniture, fittings and loose items in an orderly manner. This unit also covers the cleaning of office equipment, including computers.

The unit requires the ability to assess the extent of the cleaning task through understanding client requirements and characteristics and surfaces of the furniture and fittings, and to apply company policies and procedures in order to perform the task. Selecting the appropriate equipment, chemicals and methods is essential to performing the task safely and efficiently.

Application of the Unit

This unit of competency supports employees without managerial or supervisory responsibilities. The work may be performed in teams or individually. Performance would usually be carried out under routine supervision and within company guidelines.

Licensing/Regulatory Information

essential outcomes of a unit of competency.	demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Assess area and items to be cleaned.	1.1	Area to be cleaned is assessed, ***work order*** is reviewed according to ***company requirements***, and issues are clarified with ***appropriate persons*****.**
		1.2	***Hazards*** are identified and risks controlled in work site according to company, ***legislative***, and ***occupational health and safety*** (OHS) ***requirements***.
		1.3	Type and condition of ***furniture, fittings and loose items*** are identified by observation according to work order and company requirements.
		1.4	***Soil type*** is identified by observation according to work order and company requirements.
		1.5	***Cleaning techniques*** for ***surfaces*** of the furniture, fittings and loose items are selected according to work order and company requirements.
		1.6	Size and usage pattern of work site are determined to ensure safety of ***personnel***, continued operation of office equipment, and efficient use of cleaning ***equipment*** and ***chemicals***.
		1.7	Pre-existing damage is identified and reported to appropriate persons according to company requirements.
2	Select equipment and chemicals.	2.1	***Personal protective equipment*** (PPE) is selected and used according to ***manufacturer specifications***, and OHS and company requirements.
		2.2	Equipment and chemicals are selected for work order according to OHS and company requirements.
		2.3	Operational effectiveness of equipment is checked according to manufacturer specifications and company requirements.

© Commonwealth of Australia, 2025 HumanAbility

		2.4	Equipment is adjusted to suit operator's requirements according to manufacturer specifications and OHS requirements.
		2.5	Chemicals are prepared according to manufacturer specifications, and OHS and company requirements.
3	Prepare work site.	3.1	Hazards in work site are confirmed and risks are controlled and reassessed according to legislative, OHS and company requirements.
		3.2	***Signage and barriers*** are installed as required to maximise public safety during cleaning operation according to work order, and OHS and company requirements.
		3.3	Furniture and fittings that impede cleaning operation are removed according to work order, and OHS and company requirements.
		3.4	***Work restrictions*** affecting completion of work order are identified and appropriate persons are promptly notified.
4	Clean work site.	4.1	Soil is removed and furniture and fittings are cleaned using equipment, PPE, chemicals and cleaning techniques.
		4.2	***Dressing of the room or work area*** is performed according to work order, client requests and company requirements.
		4.3	Work is performed according to work order, manufacturer specifications and legislative, OHS and company requirements.
5	Tidy work site.	5.1	Collected soil and ***waste*** are disposed of according to client specifications, work order, manufacturer specifications and legislative, OHS, company and ***environmental requirements***.
		5.2	Furniture and fittings are replaced according to client requests, work order and OHS requirements.

© Commonwealth of Australia, 2025 HumanAbility

		5.3	Signage and barriers are removed according to work order, and OHS and company requirements.
6	Clean and safety check equipment, and store equipment and chemicals.	6.1	Equipment and PPE are cleaned according to manufacturer specifications and environmental, OHS and company requirements.
		6.2	Equipment and PPE are safety checked according to manufacturer specifications and OHS requirements, and required maintenance is recorded according to company requirements.
		6.3	Equipment and PPE are stored and maintained to allow ready access according to manufacturer specifications, and OHS and company requirements.
		6.4	Chemicals are stored according to manufacturer specifications, and OHS and company requirements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- customer service skills to:
  - establish rapport with clients
  - gain clients' trust
  - identify client expectations
- interpersonal skills to relate to people from a range of backgrounds
- language, literacy and numeracy skills to:
  - communicate clearly and concisely verbally and in writing
  - perform mathematical calculations required for diluting and mixing chemicals as specified on product labels
  - read and interpret directions and safety instructions, including:
    - chemical labels
    - equipment manuals
    - material safety data sheets (MSDS)
  - request advice or further information
  - seek and receive feedback

© Commonwealth of Australia, 2025 HumanAbility

  - source, organise and record information
- observation skills to:
  - identify soil and stains
  - identify surface types to determine cleaning method
- problem-solving skills to manage contingencies
- skills to work safely when:
  - handling and disposing of chemicals
  - handling and disposing of contaminated and toxic waste
  - identifying hazards and controlling risks
  - manual handling
  - using equipment for cleaning
- self-management skills to work alone and in a team

Required knowledge

- cleaning chemicals and equipment for cleaning furniture and fittings
- cleaning methods, including:
  - methods for various types of furniture and fittings
  - pre-spotting and stain removal
- company management structure and procedures, including:
  - biological and viral control
  - emergency response and evacuation procedures
  - environmental protection procedures
  - injury, dangerous occurrence and incident reporting
  - OHS procedures
  - quality systems
- legislation, regulations, codes of practice and industry advisory standards that apply to maintain furniture, fittings and room dressing, including OHS legislation
- routes of entry and potential symptoms of exposure to chemicals
- safe work practices for using:
  - chemicals
  - equipment, including PPE

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed by observing at least two different practical demonstrations of maintaining furniture,

© Commonwealth of Australia, 2025 HumanAbility

	fittings and room dressing.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the required skills and knowledge specified in this unit. In particular the person should demonstrate the ability to: • identify type and characteristics of furniture, fittings and loose items and their surfaces • select cleaning equipment and chemicals • use safe and efficient cleaning methods • comply with company and legislative requirements • achieve outcomes in relation to customer work order and company requirements.
Context of and specific resources for assessment	Assessment of essential underpinning knowledge may be conducted in an off-site context. It is to comply with relevant regulatory or Australian standards' requirements. Resource implications for assessment include access to: • suitable work site or venue with a range of furniture and fittings • suitable equipment and chemicals • PPE • equipment operating manuals and MSDS • work order instructions, work plans and schedules • assessment instruments, including personal planner and assessment record book.
Method of assessment	Assessment methods must: • satisfy the endorsed Assessment Guidelines of the Property Services Training Package • include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application • reinforce the integration of employability skills with workplace tasks and job roles • confirm that competency is verified and able to be transferred to other circumstances and environments.
Guidance information for assessment	Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support. Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

© Commonwealth of Australia, 2025 HumanAbility

	This unit could be assessed on its own or in combination with other units relevant to the job function, such as: • CPPCLO3016A Wash furniture and fittings.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Work order information may include:	• access to work site, including:
	  • access and egress points
	  • timing of access
	• budget allocations
	• completion times and dates
	• human resource requirements to complete the work tasks
	• job requirements and tasks
	• legislative and local government requirements
	• OHS requirements and emergency response procedures
	• requirements for working in isolated and remote locations
	• resource requirements, such as equipment and materials
	• specific client requirements, such as:
	  • dress and presentation requirements
	  • relationships with other activities
	• use of signage and barriers
	• work schedules
	• work site contact persons
	• work site requirements for specific industries, such as:
	  • hospitals and medical centres
	  • nursing homes
	  • retail food courts
	  • schools
	  • tourism and hospitality.

Company requirements may include:	• business and performance plans • client communication procedures • client confidentiality procedures • client service standards • communication channels and reporting procedures

© Commonwealth of Australia, 2025 HumanAbility

	• company goals, objectives, plans, systems and processes
	• company issued identification badges, cards or passes
	• company policies and procedures, including:
	  • access and equity policy, principles and practice
	  • OHS policies and procedures, including control procedures
	  • maintenance procedures for equipment and PPE
	  • those relating to own role, responsibility and delegation
	  • work site access security clearance procedures
	• company service standards
	• dress and presentation requirements
	• duty of care, code of conduct, and code of ethics
	• emergency response and evacuation procedures
	• employer and employee rights and responsibilities
	• environmental protection procedures
	• personnel practices and guidelines
	• quality and continuous improvement processes and standards
	• records and information systems and processes
	• training materials (induction, refresher and new skills)
	• use of contractors.

Appropriate persons may include:	• clients • colleagues • managers • persons in control of work sites • supervisors.

Hazards may include:	• allergic reactions to chemicals or equipment, including latex allergies
	• biological and animal waste
	• bites and stings
	• blood and blood-stained products
	• confined or restricted spaces
	• contaminated clothing, materials or equipment
	• damaged or inappropriate equipment
	• dust and fibres
	• electrical hazards arising from:
	  • cables
	  • electrical fittings:
	  • switches
	  • lights
	  • untested electrical equipment
	• fatigue
	• fire

© Commonwealth of Australia, 2025 HumanAbility

	• gas
	• heights
	• inadequate lighting and ventilation
	• infectious and zoonotic diseases, such as:
	  • Q fever
	  • scabies
	• mobile equipment and vehicle hazards around plant and vehicles
	• moving or unguarded parts
	• noise
	• occupational violence and bullying
	• poor personal hygiene practices
	• spill, splash and spray
	• release of substances with negative environmental impact
	• synergistic chemical reactions, such as:
	  • hazardous incompatibility
	  • reactivity
	• syringes or other sharps
	• temperature extremes
	• ultraviolet light
	• unsafe manual-handling techniques, including awkward and repetitive postures
	• unsafe underfoot conditions, such as slippery, uneven and rough surfaces
	• work in unfamiliar isolated or remote environments.

Legislative requirements may include:	• Australian standards, quality assurance and certification requirements
	• award and enterprise agreements
	• industry advisory standards and codes, such as:
	  • building codes
	  • dangerous goods codes
	• relevant commonwealth, state and territory legislation and local government regulations affecting company operation, including:
	  • anti-discrimination and diversity policies
	  • chemical controls
	  • chemical registers and manifests
	  • consumer protection
	  • energy conservation
	  • environmental protection
	  • equal employment opportunity
	  • freedom of information
	  • industrial equipment certificates of competency or licences

	• industrial relations • OHS Acts and regulations • privacy • public health • trade practices • water conservation • workplace consultative arrangements.

Occupational health and safety (also known as workplace health and safety) ***requirements*** may relate to:	• allergic reactions, such as contact dermatitis
	• communication devices for remote and isolated locations, such as:
	  • mobile phone
	  • two-way radio
	• dermatoxicological control and prevention measures
	• emergency procedures for eye and skin contact, and inhalation and ingestion of toxic substances
	• hazard identification and risk assessment mechanisms
	• health surveillance and monitoring, such as regular blood testing
	• hierarchy of hazard control procedures
	• maintaining clear access
	• national and industry standards and codes of practice
	• OHS control procedures, such as:
	  • health and safety plans
	  • job plans
	  • job safety analyses
	  • risk assessments
	  • safe operating practices and procedures
	  • safe system of work statements
	  • safe work instructions
	  • work method statements
	• reporting injury and dangerous occurrences
	• routes of entry and potential symptoms of exposure to chemicals
	• safe work practices for equipment, PPE and chemical storage, including interpretation of:
	  • MSDS
	  • hazardous substance information, such as long latency periods
	• safety training, induction and refresher training
	• selection and use of PPE and clothing appropriate to the hazard
	• ultraviolet light
	• up-to-date electrical test and tag compliance
	• use of chemicals according to MSDS

© Commonwealth of Australia, 2025 HumanAbility

	• use of residual current devices • use, storage and maintenance of equipment according to manufacturer specifications and equipment operating manuals.

Furniture, fittings and loose items may include:	• furniture and fittings, such as:
	  • air conditioning vents
	  • bars
	  • beds
	  • bedside cupboards
	  • benches
	  • blinds
	  • ceiling fans
	  • chairs
	  • clocks
	  • compactus
	  • computers and associated equipment
	  • curtains
	  • desks
	  • displays
	  • door handles
	  • doors
	  • electrical items, including jugs and microwaves
	  • filing cabinets
	  • grilles
	  • lamps
	  • light fittings
	  • light switches
	  • ornaments
	  • picture frames
	  • railings
	  • refrigerators
	  • shelves
	  • skirting
	  • stoves
	  • tables
	  • telephone handsets
	  • vents
	  • walls
	  • window sills
	  • work stations
	• loose items, such as:

© Commonwealth of Australia, 2025 HumanAbility

	• ashtrays • bins • books and magazines • calculators • cups and saucers • desk calendars • electrical leads • food and drink containers • kitchen implements • mats • mugs • personal photos • phone indexes • radios • recognition awards • tissue boxes • wall charts.
Soil types can be wet or dry and may include:	• beverages • blood • blue tack • candle wax • chewing gum • cobwebs • dust • food • glue • grease • human and animal waste • lipstick • medicine • mud and dirt • nail polish • paint • shoe polish.
Cleaning techniques may include:	• dry wiping • dusting • low-water cleaning methods, such as using microfibre cleaning products • polishing • spot cleaning • vacuuming

© Commonwealth of Australia, 2025 HumanAbility

	• wet wiping.
Surfaces may include:	• fabric upholstery • glass • laminate • leather • metal • paint • plastic • polyresin • tiles • timber • vinyl.
Personnel may include:	• client's staff members • colleagues • general public • venue, facility, shopping centre staff and management.
Equipment may include:	• access equipment, such as ladders • alcohol wipes • buckets • damp cloths • dust extraction tools, such as wall mates and fridge dusters • lint-free dusters, such as lamb's wool and feather dusters • lint-free polishing cloths, such as cotton and colour-fast cloths • microfibre products • mini mops • oil impregnated cloths • polishing cloths • scourers.
Chemicals may include:	• acid cleaners • alkaline cleaners • low environmental-impact chemicals • neutral cleaners • solvent cleaners.
Personal protective equipment may include:	• ear muffs and plugs • gloves, such as non-permeable • goggles • high-visibility vests and clothing • overalls and other protective clothing • respirators • safety glasses • safety shoes

© Commonwealth of Australia, 2025 HumanAbility

	• splash-proof face masks • sun protection • tongs • ultraviolet protection • wet-work clothing.

Manufacturer specifications may include:	• equipment operating manuals
	• instructional guides
	• MSDS
	• other resources supplied by the manufacturer, such as:
	  • laminated cards
	  • notices
	  • wall posters
	• product labels
	• safety instructions pre-printed on equipment.

Signage and barriers may include:	• physical barriers and restraints erected to restrict access to a site
	• signs complying with legislative requirements and Australian standards warning of danger or adverse conditions, including:
	  • cleaning in progress
	  • hazardous chemicals in use or present in work area.

Work restrictions may include:	• amount of cleaning anticipated • client activity • employee level of literacy and communication skills • faulty or inappropriate equipment • site accessibility • site hazards • skills of work unit or team • staffing resources • time limitations.
Dressing of the room or work area is usually performed in:	• boardrooms • food courts • function rooms • hospital wards • hotels • lounges • merchandising areas • motels • offices • public areas.
Waste may be either solid or liquid and include:	• chemicals past expiry date • dry waste, such as fluff and lint • liquid waste

© Commonwealth of Australia, 2025 HumanAbility

	• litter • obsolete equipment • packaging • soil • used cleaning cloths • used containers • used or contaminated PPE • used or unused chemicals.

Environmental requirements may include:	• clean-up, containment and isolation
	• company policies and guidelines
	• emergency chemical spill control measures
	• environmental protection agency and requirements of government departments, such as:
	  • agriculture
	  • emergency services
	• hazardous materials handling
	• local government regulations and by-laws
	• low-energy cleaning methods
	• low environmental-impact chemicals
	• low-moisture cleaning methods
	• low water-use equipment and water-efficient cleaning methods
	• non-chemical cleaning methods.

CPPCLO2017A Clean wet areas

Modification History

Revised unit

Unit updated and equivalent to PRMCL17B Clean a wet area

Unit Descriptor

This unit of competency specifies the outcomes required to clean a wet area so that it is free from soil, odour and hazards. It requires the ability to assess the extent of the cleaning task through understanding client requirements and special characteristics of wet areas, and to apply company policies and procedures in order to perform the task. Selecting the appropriate equipment, chemicals and methods is essential to performing the task safely and efficiently, as is recognising the importance of paying careful attention to health and safety issues.

Application of the Unit

This unit of competency supports employees without managerial or supervisory responsibilities. Wet areas include bathrooms, toilets and changing rooms. Areas such as swimming pools, kitchens, laundries and clinics generally require specialised cleaning methods. Performance would usually be carried out under routine supervision and within company guidelines.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised

unit of competency.	text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Assess area to be cleaned.	1.1	***Hazards*** are identified and risks controlled in work site according to company, ***legislative***, and ***occupational health and safety*** (OHS) ***requirements***.
		1.2	Operation and condition of fixtures and fittings are checked and pre-existing damage at work site is reported to appropriate persons according to work order and company requirements.
		1.3	***Soil*** is identified by observation according to work order and company requirements.
		1.4	Areas that require special attention, including graffiti, are identified according to work order and company requirements.
		1.5	Size and usage pattern of work site are determined to ensure safety of, and minimal disruption to, personnel and efficient use of cleaning equipment and chemicals.
		1.6	Cleaning techniques for wet areas are selected according to work order and company requirements.
2	Select equipment and chemicals.	2.1	Suitable ***personal protective equipment*** (PPE) is selected and used according to ***manufacturer specifications***, and OHS and company requirements.
		2.2	Equipment and chemicals are selected for work order according to OHS and company requirements.
		2.3	Operational effectiveness of equipment is checked according to manufacturer specifications and company requirements.
		2.4	Equipment is adjusted to suit operator’s requirements according to manufacturer specifications and OHS requirements.

© Commonwealth of Australia, 2025 HumanAbility

		2.5	Chemicals are prepared according to manufacturer specifications, and OHS and company requirements.
3	Prepare work site	3.1	Hazards in work site are confirmed and risks are controlled and reassessed according to legislative, OHS and company requirements.
		3.2	Signage and barriers are installed as required to maximise public safety during cleaning operation according to work order, and OHS and company requirements.
		3.3	Work restrictions affecting completion of work order are identified and appropriate persons are notified.
4	Clean work site.	4.1	Loose soil is removed prior to commencing ***surface*** cleaning according to work order, and OHS and company requirements.
		4.2	Fixtures, fittings and surfaces are cleaned using equipment, chemicals and cleaning techniques according to work order, and OHS and company requirements.
		4.3	Remaining heavy soil, graffiti and stained surfaces are treated or reported to appropriate persons for follow-up action according to work order and company requirements.
		4.4	Soiled items are laundered according to work order and company requirements.
		4.5	Work is performed according to work order, manufacturer specifications, and legislative, OHS and company requirements.
5	Replenish consumables and tidy work site.	5.1	***Consumable items*** are replenished according to client requests, work order and company requirements.
		5.2	Collected soil and ***waste*** are disposed of according to client specifications, work order, manufacturer specifications and legislative, OHS, company and ***environmental requirements***.

© Commonwealth of Australia, 2025 HumanAbility

		5.3	Signage and barriers are removed according to work order, and OHS and company requirements.
6	Clean and safety check equipment, and store equipment and chemicals.	6.1	Equipment and PPE are cleaned according to manufacturer specifications and environmental, OHS and company requirements.
		6.2	Equipment and PPE are safety checked according to manufacturer specifications and OHS requirements, and required maintenance is recorded according to company requirements.
		6.3	Equipment and PPE are stored and maintained to allow ready access according to manufacturer specifications, and OHS and company requirements.
		6.4	Chemicals are stored according to manufacturer specifications, and OHS and company requirements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- customer service skills to:
  - establish rapport with clients
  - gain clients' trust
  - identify client expectations
- interpersonal skills to relate to people from a range of backgrounds
- language, literacy and numeracy skills to:
  - communicate clearly and concisely verbally and in writing
  - perform mathematical calculations required for:
    - diluting and mixing chemicals as specified on product labels
    - measuring area
  - read and interpret directions and safety instructions, including:
    - chemical labels
    - equipment manuals
    - material safety data sheets (MSDS)
  - request advice or further information

© Commonwealth of Australia, 2025 HumanAbility

    - seek and receive feedback
    - source, organise and record information
- observation skills to:
    - identify soil and stains
    - identify surface types to determine cleaning method
- organisational skills to plan and organise work
- problem-solving skills to manage contingencies
- skills to work safely when:
    - handling and disposing of chemicals
    - handling and disposing of contaminated and toxic waste
    - identifying hazards and controlling risks
    - manual handling
    - using equipment for:
        - cleaning glass
        - damp wiping
        - hosing
        - mopping
        - squeegeeing
        - sweeping
        - washing
- self-management skills to work alone and in a team

Required knowledge

- cleaning chemicals and equipment for wet areas
- cleaning methods for:
    - wet areas
    - sterilising
- company management structure and procedures, including:
    - biological and viral control
    - emergency response and evacuation procedures
    - environmental protection procedures
    - injury, dangerous occurrence and incident reporting
    - OHS procedures
    - quality systems
- legislation, regulations, codes of practice and industry advisory standards that apply to cleaning a wet area, including OHS legislation
- routes of entry and potential symptoms of exposure to chemicals
- safe work practices for using:
    - chemicals
    - equipment, including PPE

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed by observing practical demonstrations of cleaning a wet area involving at least two different work site environments.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the required skills and knowledge specified in this unit. In particular the person should demonstrate the ability to: • identify hazards and risks associated with wet areas • identify fittings, surfaces and soil types found in wet areas • select cleaning equipment and chemicals • use safe and efficient cleaning methods • achieve outcomes in relation to customer work order and company requirements • comply with company and legislative requirements.
Context of and specific resources for assessment	Assessment of essential underpinning knowledge may be conducted in an off-site context. It is to comply with relevant regulatory or Australian standards' requirements. Resource implications for assessment include access to: • suitable wet area venue • suitable equipment and chemicals • PPE • equipment operating manuals and MSDS • work order instructions, work plans and schedules • assessment instruments, including personal planner and assessment record book.
Method of assessment	Assessment methods must: • satisfy the endorsed Assessment Guidelines of the Property Services Training Package • include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application • reinforce the integration of employability skills with workplace

© Commonwealth of Australia, 2025 HumanAbility

	tasks and job roles • confirm that competency is verified and able to be transferred to other circumstances and environments.
Guidance information for assessment	Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support. Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed. This unit could be assessed on its own or in combination with other units relevant to the job function, such as: • CPPCLO2001A Maintain hard floor surfaces • CPPCLO2015A Maintain furniture, fittings and room dressing • CPPCLO3002A Restore hard floor surfaces.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Hazards may include:	• allergic reactions to chemicals or equipment, including latex allergies
	• biological and animal waste
	• bites and stings
	• blood and blood-stained products
	• confined or restricted spaces
	• contaminated clothing, materials or equipment
	• damaged or inappropriate equipment
	• dust and fibres
	• electrical hazards arising from:
	  • cables
	  • electrical fittings:
	  • switches
	  • lights
	  • untested electrical equipment
	• fatigue
	• fire

	• employer and employee rights and responsibilities • environmental protection procedures • personnel practices and guidelines • quality and continuous improvement processes and standards • records and information systems and processes • training materials (induction, refresher and new skills) • use of contractors.

Legislative requirements may include:	• Australian standards, quality assurance and certification requirements
	• award and enterprise agreements
	• industry advisory standards and codes, such as:
	  • building codes
	  • dangerous goods codes
	• relevant commonwealth, state and territory legislation and local government regulations affecting company operation, including:
	  • anti-discrimination and diversity policies
	  • chemical controls
	  • chemical registers and manifests
	  • consumer protection
	  • energy conservation
	  • environmental protection
	  • equal employment opportunity
	  • freedom of information
	  • industrial equipment certificates of competency or licences
	  • industrial relations
	  • OHS Acts and regulations
	  • privacy
	  • public health
	  • trade practices
	  • water conservation
	  • workplace consultative arrangements.

Occupational health and safety (also known as workplace health and safety) ***requirements*** may relate to:	• allergic reactions, such as contact dermatitis
	• communication devices for remote and isolated locations, such as:
	  • mobile phone
	  • two-way radio
	• dermatoxicological control and prevention measures
	• emergency procedures for eye and skin contact, and inhalation and ingestion of toxic substances
	• hazard identification and risk assessment mechanisms
	• health surveillance and monitoring, such as regular blood testing

© Commonwealth of Australia, 2025 HumanAbility

	• hierarchy of hazard control procedures
	• maintaining clear access
	• national and industry standards and codes of practice
	• OHS control procedures, such as:
	  • health and safety plans
	  • job plans
	  • job safety analyses
	  • risk assessments
	  • safe operating practices and procedures
	  • safe system of work statements
	  • safe work instructions
	  • work method statements
	• reporting injury and dangerous occurrences
	• routes of entry and potential symptoms of exposure to chemicals
	• safe work practices for equipment, PPE and chemical storage, including interpretation of:
	  • MSDS
	  • hazardous substance information, such as long latency periods
	• safety training, induction and refresher training
	• selection and use of PPE and clothing appropriate to the hazard
	• ultraviolet light
	• up-to-date electrical test and tag compliance
	• use of chemicals according to MSDS
	• use of residual current devices
	• use, storage and maintenance of equipment according to manufacturer specifications and equipment operating manuals.

Fixtures and fittings may include:	• baths • bidets • cleaner's sluices • hand basins • hand dryers • mirrors • paper dispensers • personal item product dispensers • racks • rubbish receptacles • showers • sinks • soap dispensers • spas

© Commonwealth of Australia, 2025 HumanAbility

	• taps • toilet bowls, seats and cisterns • troughs • urinal trough and wall • vanity units.
Appropriate persons may include:	• clients • colleagues • managers • persons in control of work sites • supervisors.

Work order information may include:	• access to work site, including:
	  • access and egress points
	  • timing of access
	• budget allocations
	• completion times and dates
	• human resource requirements to complete the work tasks
	• job requirements and tasks
	• legislative and local government requirements
	• OHS requirements and emergency response procedures
	• requirements for working in isolated and remote locations
	• resource requirements, such as equipment and materials
	• specific client requirements, such as:
	  • dress and presentation requirements
	  • relationships with other activities
	• use of signage and barriers
	• work schedules
	• work site contact persons
	• work site requirements for specific industries, such as:
	  • hospitals and medical centres
	  • nursing homes
	  • retail food courts
	  • schools
	  • tourism and hospitality.

Soil types can be wet or dry and may include:	• blood • cobwebs • dust • food, food scraps and residue • grease • human and animal waste • litter • mould and algae

CPPCLO2019A Sort and remove waste and recyclable materials

Modification History

Revised unit

Element structure and performance criteria expanded to reflect workplace requirements

Skills and knowledge requirements and the range statement updated

New unit title

Unit based on PRMCL19B Remove waste

Unit Descriptor

This unit of competency specifies the outcomes required to remove waste from an area that is being cleaned and transfer it to a waste disposal point, usually specified by the client. Waste collection is usually conducted on a daily basis as part of a regular cleaning routine.

The unit requires the ability to assess the extent and types of waste through understanding client requirements and applying company policies and procedures. Selecting the appropriate equipment, chemicals and methods is essential to performing the task safely and efficiently. It is very important to pay careful attention to health and safety issues affecting both the cleaner and the general public.

Application of the Unit

This unit of competency supports employees without managerial or supervisory responsibilities. Performance would usually be carried out under routine supervision and within company guidelines.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

© Commonwealth of Australia, 2025 HumanAbility

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Assess waste to be removed.	1.1	Waste and recyclable materials are assessed, **work order** is reviewed according to **company requirements,** and issues are clarified with **appropriate persons.**
		1.2	***Hazards*** are identified and risks controlled in work site according to company, ***legislative***, and ***occupational health and safety*** (OHS) ***requirements***.
		1.3	Waste and recyclable types to be collected are identified by observation according to work order and company requirements.
2	Select equipment and chemicals.	2.1	***Personal protective equipment*** (PPE) is selected and used according to ***manufacturer specifications***, and OHS and company requirements.
		2.2	***Equipment*** and ***chemicals*** are selected for work order according to OHS and company requirements.
		2.3	Operational effectiveness of equipment is checked according to manufacturer specifications and company requirements.
		2.4	Equipment is adjusted to suit operator's requirements according to manufacturer specifications and OHS requirements.
		2.5	Chemicals are prepared according to manufacturer specifications, and OHS and company requirements.
3	Transfer waste to waste carrier.	3.1	Waste is transferred to ***waste carrier*** according to work order, and OHS and company requirements.

© Commonwealth of Australia, 2025 HumanAbility

		3.2	***Rubbish bins*** and surrounds are spot cleaned according to work order and company requirements.
		3.3	Soiled rubbish bin liners are replaced according to work order, and OHS and company requirements.
		3.4	***Work restrictions*** affecting the completion of work order are identified and appropriate persons are promptly notified.
4	Deliver waste to disposal unit.	4.1	Waste is promptly removed from site according to work order, and OHS and company requirements.
		4.2	Waste is transported to ***disposal unit*** by shortest practical and safest route according to work order, and OHS and company requirements.
5	Sort and deliver recyclable materials.	5.1	Recyclable materials are identified, separated and sorted according to work order, and OHS and company requirements.
		5.2	Recyclable materials are moved safely and according to work orders to recycling collection units used for each type of material.
		5.3	Recycling containers and surrounds are spot cleaned according to work order, and OHS and company requirements.
		5.4	Recycling containers are checked and replaced in designated locations, with signage indicating use.
		5.5	Records of recyclable materials that have been sorted and transferred are made according to work orders.
6	Clean and safety check equipment, and store equipment and chemicals.	6.1	***Cleaning techniques*** are used to clean equipment and PPE according to manufacturer specifications and OHS, company and ***environmental requirements***.
		6.2	Equipment and PPE are safety checked according to manufacturer specifications and OHS requirements, and required maintenance is recorded according to company requirements.

© Commonwealth of Australia, 2025 HumanAbility

6.3 Equipment and PPE are stored and maintained to allow ready access according to manufacturer specifications, and OHS and company requirements.

6.4 Chemicals are stored according to manufacturer specifications, and OHS and company requirements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- customer service skills to:
  - establish rapport with clients
  - gain clients' trust
  - identify client expectations
- interpersonal skills to relate to people from a range of backgrounds
- language, literacy and numeracy skills to:
  - communicate clearly and concisely verbally and in writing
  - perform mathematical calculations required for diluting and mixing chemicals as specified on product labels
  - read and interpret directions and safety instructions, including:
    - chemical labels
    - equipment manuals
    - material safety data sheets (MSDS)
    - work orders
  - request advice or further information
  - seek and receive feedback
  - source, organise and record information
- observation skills to:
  - identify waste types
  - identify hazards
- planning and organising skills to sort and deliver recyclable materials
- problem-solving skills to manage contingencies
- skills to work safely when:
  - controlling risks
  - damp wiping and spot cleaning
  - handling and disposing of contaminated and toxic waste

© Commonwealth of Australia, 2025 HumanAbility

  - selecting, handling and disposing of chemicals
- self-management skills to work alone and in a team

Required knowledge

- cleaning chemicals and equipment for required cleaning
- company management structure and procedures, including:
  - biological and viral control
  - emergency response and evacuation procedures
  - environmental protection procedures
  - first aid procedures
  - injury, dangerous occurrence and incident reporting
  - OHS procedures
  - quality systems
- legislation, regulations, codes of practice and industry advisory standards that apply to sorting and removing waste and recyclable materials, including OHS legislation
- routes of entry and potential symptoms of exposure to chemicals
- safe work practices for using:
  - chemicals
  - equipment, including PPE
- waste transfer procedures, including:
  - location of disposal units
  - location of waste pick-up equipment
  - types of waste handling equipment
  - types of waste storage receptacles and the selection and use of liners

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed by observing practical demonstrations of removing waste involving at least two different work site environments.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the required skills and knowledge specified in this unit. In particular the person should demonstrate the ability to: • identify hazards and risks associated with handling waste • identify waste types

© Commonwealth of Australia, 2025 HumanAbility

	• comply with company and legislative requirements • use safe and efficient cleaning methods • use safe and efficient waste removal methods • select cleaning equipment and chemicals • achieve outcomes in relation to client work order and company requirements.
Context of and specific resources for assessment	Assessment of essential underpinning knowledge may be conducted in an off-site context. It is to comply with relevant regulatory or Australian standards' requirements. Resource implications for assessment include access to: • suitable venue • suitable equipment and chemicals • PPE • equipment operating manuals and MSDS • work order instructions, work plans and schedules • assessment instruments, including personal planner and assessment record book.
Method of assessment	Assessment methods must: • satisfy the endorsed Assessment Guidelines of the Property Services Training Package • include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application • reinforce the integration of employability skills with workplace tasks and job roles • confirm that competency is verified and able to be transferred to other circumstances and environments.
Guidance information for assessment	Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support. Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed. This unit could be assessed on its own or in combination with other units relevant to the job function, such as: • CPPCLO2001A Maintain hard floor surfaces • CPPCLO2004A Maintain carpeted floors • CPPCLO2015A Maintain furniture, fittings and room dressing • CPPCLO2017A Clean wet areas.

© Commonwealth of Australia, 2025 HumanAbility

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Waste may be either solid or liquid and include:	• chemical and metal, such as:
	  • computing consumables
	  • photocopying consumables
	  • printing consumables
	• contaminated and hazardous biological, such as:
	  • blood and other human waste
	  • cytotoxic waste
	  • soiled and disposable linen
	  • syringes and needles
	• general waste, such as:
	  • drinks
	  • foodstuffs.

Recyclable materials will be determined by company policy and client requirements and may include:	• packaging materials • paper • cardboard • food stuffs • plastics • glass • metals, such as aluminium • other items that are designated for re-use, such as toner cartridges.

Work order information may include:	• access to work site, including:
	  • access and egress points
	  • timing of access
	• budget allocations
	• completion times and dates
	• human resource requirements to complete the work tasks
	• job requirements and tasks
	• legislative and local government requirements
	• OHS requirements and emergency response procedures
	• requirements for working in isolated and remote locations
	• resource requirements, such as equipment and materials

© Commonwealth of Australia, 2025 HumanAbility

	• specific client requirements, such as:
	  • dress and presentation requirements
	  • relationships with other activities
	• use of signage and barriers
	• work schedules
	• work site contact persons
	• work site requirements for specific industries, such as:
	  • hospitals and medical centres
	  • nursing homes
	  • retail food courts
	  • schools
	  • tourism and hospitality.

Company requirements may include:	• business and performance plans
	• client communication procedures
	• client confidentiality procedures
	• client service standards
	• communication channels and reporting procedures
	• company goals, objectives, plans, systems and processes
	• company issued identification badges, cards or passes
	• company policies and procedures, including:
	  • access and equity policy, principles and practice
	  • OHS policies and procedures, including control procedures
	  • maintenance procedures for equipment and PPE
	  • those relating to own role, responsibility and delegation
	  • work site access security clearance procedures
	• company service standards
	• dress and presentation requirements
	• duty of care, code of conduct, and code of ethics
	• emergency response and evacuation procedures
	• employer and employee rights and responsibilities
	• environmental protection procedures
	• personnel practices and guidelines
	• quality and continuous improvement processes and standards
	• records and information systems and processes
	• training materials (induction, refresher and new skills)
	• using contractors.

Appropriate persons may include:	• clients • colleagues • managers • persons in control of work sites • supervisors.

© Commonwealth of Australia, 2025 HumanAbility

Hazards may include:	• allergic reactions to chemicals or equipment, including latex allergies
	• biological and animal waste
	• bites and stings
	• blood and blood-stained products
	• confined or restricted spaces
	• contaminated clothing, materials or equipment
	• damaged or inappropriate equipment
	• dust and fibres
	• electrical hazards arising from:
	  • cables
	  • electrical fittings:
	  • switches
	  • lights
	  • untested electrical equipment
	• fatigue
	• fire
	• gas
	• heights
	• inadequate lighting and ventilation
	• infectious and zoonotic diseases, such as:
	  • Q fever
	  • scabies
	• mobile equipment and vehicle hazards around plant and vehicles
	• moving or unguarded parts of any equipment used in the removal, transfer and transport of waste and recyclable materials
	• noise
	• occupational violence and bullying
	• poor personal hygiene practices
	• spill, splash and spray
	• release of substances with negative environmental impact
	• synergistic chemical reactions, such as:
	  • hazardous incompatibility
	  • reactivity
	• syringes or other sharps
	• temperature extremes
	• ultraviolet light
	• unsafe manual-handling techniques, including awkward and repetitive postures
	• unsafe underfoot conditions, such as slippery, uneven and rough surfaces
	• work in unfamiliar isolated or remote environments.

© Commonwealth of Australia, 2025 HumanAbility

Legislative requirements may include:	• Australian standards, quality assurance and certification requirements
	• award and enterprise agreements
	• industry advisory standards and codes, such as:
	  • building codes
	  • dangerous goods codes
	• relevant commonwealth, state and territory legislation and local government regulations affecting company operation, including:
	  • anti-discrimination and diversity policies
	  • chemical controls
	  • chemical registers and manifests
	  • consumer protection
	  • energy conservation
	  • environmental protection
	  • equal employment opportunity
	  • freedom of information
	  • industrial equipment certificates of competency or licences
	  • industrial relations
	  • OHS Acts and regulations
	  • privacy
	  • public health
	  • trade practices
	  • water conservation
	  • workplace consultative arrangements.

Occupational health and safety (also known as workplace health and safety) ***requirements*** may relate to:	• allergic reactions, such as contact dermatitis
	• communication devices for remote and isolated locations, such as:
	  • mobile phone
	  • two-way radio
	• dermatoxicological control and prevention measures
	• emergency procedures for eye and skin contact, and inhalation and ingestion of toxic substances
	• hazard identification and risk assessment mechanisms
	• health surveillance and monitoring, such as regular blood testing
	• hierarchy of hazard control procedures
	• maintaining clear access
	• national and industry standards and codes of practice
	• OHS control procedures, such as:
	  • health and safety plans
	  • job plans

© Commonwealth of Australia, 2025 HumanAbility

	• job safety analyses • risk assessments • safe operating practices and procedures • safe system of work statements • safe work instructions • work method statements • reporting injury and dangerous occurrences • routes of entry and potential symptoms of exposure to chemicals • safe work practices for equipment, PPE and chemical storage, including interpretation of: • MSDS • hazardous substance information, such as long latency periods • safety training, induction and refresher training • selection and use of PPE and clothing appropriate to the hazard • ultraviolet light • up-to-date electrical test and tag compliance • use of chemicals according to MSDS • use of residual current devices • use, storage and maintenance of equipment according to manufacturer specifications and equipment operating manuals.
Personal protective equipment may include:	• ear muffs and plugs • gloves, such as non-permeable • goggles • high-visibility vests and clothing • overalls and other protective clothing • respirators • safety glasses • safety shoes • splash-proof face masks • sun protection • tongs • ultraviolet protection • wet-work clothing.
Manufacturer specifications may include:	• equipment operating manuals • instructional guides • MSDS • other resources supplied by the manufacturer, such as: • laminated cards • notices • wall posters

© Commonwealth of Australia, 2025 HumanAbility

	• product labels • safety instructions pre-printed on equipment.
Equipment may include:	• bin liners • cleaning cloths • damp wiping kits • long-handled dustpans and brooms • nylon pads • pick-up trolleys • scrubbing brushes • spray bottles • wheelie bins (mobile garbage bins).
Chemicals may include:	• acid cleaners • alkaline cleaners • low environmental-impact chemicals • neutral cleaners • solvent cleaners.
Waste carriers may include:	• garbage bags • sharps containers • trolleys • wheelie bins.
Rubbish bins may include:	• bio-hazard bags and bins • contaminated waste bins • general purpose bins • needle hazard disposal units • radioactive waste bins • recycle bins • rest room bins • wet rubbish bins.
Work restrictions may include:	• amount of cleaning anticipated • client activity • employee level of literacy and communication skills • faulty or inappropriate equipment • site accessibility • site hazards • skills of work unit or team • staffing resources • time limitations.
Disposal units may include:	• compactors • dumpmasters • large waste bins • open trucks

© Commonwealth of Australia, 2025 HumanAbility

	• wheelie bins.
Cleaning techniques may include:	• external cleaning, such as waste disposal units • full cleaning • spot cleaning • sweeping.

Environmental requirements may include:	• clean-up, containment and isolation
	• company policies and guidelines
	• emergency chemical spill control measures
	• environmental protection agency and requirements of government departments, such as:
	  • agriculture
	  • emergency services
	• hazardous materials handling
	• local government regulations and by-laws
	• low-energy cleaning methods
	• low environmental-impact chemicals
	• low-moisture cleaning methods
	• low water-use equipment and water-efficient cleaning methods
	• non-chemical cleaning methods.

CPPCLO2033A Plan for safe and efficient cleaning activities

Modification History

Revised unit

Unit updated and equivalent to PRMCL33B Plan for safe and efficient cleaning activities

Unit Descriptor

This unit of competency specifies the outcomes required to plan for safe and efficient cleaning activities. The unit covers general issues that need to be addressed in each work site for each cleaning activity to ensure maximum safety and efficiency.

The unit requires the ability to assess cleaning tasks, associated hazards and security issues on the work site, maintain personal safety, and select safe and efficient cleaning methods. These work functions are performed each time a cleaner enters a work site and are carried out within company guidelines.

Application of the Unit

This unit of competency supports employees without managerial or supervisory responsibilities.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills..

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills

© Commonwealth of Australia, 2025 HumanAbility

and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Assess cleaning situation.	1.1	***Work order*** is reviewed according to ***company requirements***.
		1.2	***Work site assessment*** is made according to company, ***environmental, legislative*** and ***occupational health and safety*** (OHS) ***requirements.***
		1.3	Work order is checked to determine staffing and time allocation for cleaning operation according to company requirements.
		1.4	Access to ***equipment, chemicals, consumables*** and ***personal protective equipment*** (PPE) suitable for implementing work order is determined according to environmental, legislative, OHS and company requirements.
		1.5	Issues are clarified with ***appropriate persons*** according to company requirements.
		1.6	Work schedules are amended to reflect changed situations according to company requirements.
		1.7	Pre-existing damage is identified and reported to appropriate persons according to work order and company requirements.
2	Assess hazards.	2.1	***Hazards*** in work site are identified according to legislative, OHS and company requirements.
		2.2	Risks arising from hazards in work site are controlled according to legislative, OHS and company requirements.
		2.3	Hazards remaining in work site area are reported to appropriate persons according to legislative, OHS and company requirements.

© Commonwealth of Australia, 2025 HumanAbility

3	Assess work site security risks.	3.1	Security arrangements on work site are identified and implemented according to work order, and OHS and company requirements.
		3.2	Emergency response and evacuation procedures are reviewed according to OHS and company requirements.
		3.3	Security alarm systems are operated according to client specifications, work order, ***manufacturer specifications*** and OHS and company requirements.
4	Select suitable work methods.	4.1	Cleaning methods are selected according to work order and environmental, legislative, OHS and company requirements.
		4.2	***Signage and barriers*** are installed as required to maximise public safety during cleaning operation according to work order, and OHS and company requirements.
		4.3	Cleaning activity is arranged to minimise disruption to ***personnel*** according to work order and company requirements.
		4.4	Equipment is used according to manufacturer specifications and legislative, OHS and company requirements.
		4.5	Chemicals are prepared according to manufacturer specifications and legislative, OHS and company requirements.
		4.6	***Work restrictions*** affecting completion of work order are identified and appropriate persons are notified according to OHS and company requirements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

interpersonal skills to relate to people from a range of backgrounds

© Commonwealth of Australia, 2025 HumanAbility

- language, literacy and numeracy skills to:
  - communicate clearly and concisely verbally and in writing
  - perform mathematical calculations required for estimating time
  - read and interpret directions and safety instructions, including:
    - chemical labels
    - equipment manuals
    - material safety data sheets (MSDS)
    - work orders
  - request advice or further information
  - seek and receive feedback
  - source, organise and record information
- planning and organising skills to:
  - manage time
  - prioritise work
  - schedule efficiently
- problem-solving skills to manage contingencies
- skills to work safely when:
  - handling and disposing of chemicals
  - handling and disposing of contaminated and toxic waste
  - identifying hazards and controlling risks
  - manual handling
- self-management skills to work alone and in a team
- teamwork skills to lead teams

Required knowledge

- company management structure and procedures, including:
  - biological and viral control
  - emergency response and evacuation procedures
  - environmental protection procedures
  - first aid procedures
  - injury, dangerous occurrence and incident reporting
  - OHS procedures
  - quality systems
- legislation, regulations, codes of practice and industry advisory standards that apply to planning for safe and efficient cleaning activities, including OHS legislation
- product knowledge, including manufacturer specifications for products being used
- routes of entry and potential symptoms of exposure to chemicals
- safe work practices for using:
  - chemicals
  - equipment, including PPE

© Commonwealth of Australia, 2025 HumanAbility

- types of surfaces, their characteristics and appropriate cleaning methods

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed by observing practical demonstrations of planning for safe and efficient cleaning activities involving at least two different work site environments.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the required skills and knowledge specified in this unit. In particular the person should demonstrate the ability to: • assess cleaning task • assess hazards on work site • assess effectiveness of work site security arrangements within scope of task and work order • select suitable cleaning methods • comply with company, legislative and regulatory requirements • use biological and viral control procedures • apply knowledge of routes of entry and potential symptoms of exposure to chemicals.
Context of and specific resources for assessment	Assessment of essential underpinning knowledge may be conducted in an off-site context. It is to comply with relevant regulatory or Australian standards' requirements. Resource implications for assessment include access to: • suitable work site or venue • suitable equipment and chemicals • PPE • work order instructions, work plans and schedules • assessment instruments, including personal planner and assessment record book.
Method of assessment	Assessment methods must: • satisfy the endorsed Assessment Guidelines of the Property Services Training Package • include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning

© Commonwealth of Australia, 2025 HumanAbility

	knowledge required for practical application • reinforce the integration of employability skills with workplace tasks and job roles • confirm that competency is verified and able to be transferred to other circumstances and environments.
Guidance information for assessment	Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support. Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed. This unit could be assessed on its own or in combination with other units relevant to the job function, such as: • CPPCLO2035A Maintain cleaning storage areas • CPPCMN2002A Participate in workplace safety arrangements.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Work order information may include:	• access to work site, including:
	  • access and egress points
	  • timing of access
	• budget allocations
	• completion times and dates
	• human resource requirements to complete the work tasks
	• job requirements and tasks
	• legislative and local government requirements
	• OHS requirements and emergency response procedures
	• requirements for working in isolated and remote locations
	• resource requirements, such as equipment and materials
	• specific client requirements, such as:
	  • dress and presentation requirements
	  • relationships with other activities
	• use of signage and barriers
	• work schedules

	• local government regulations and by-laws
	• low-energy cleaning methods
	• low environmental-impact chemicals
	• low-moisture cleaning methods
	• low water-use equipment and water-efficient cleaning methods
	• non-chemical cleaning methods.

Legislative requirements may include:	• Australian standards, quality assurance and certification requirements
	• award and enterprise agreements
	• industry advisory standards and codes, such as:
	  • building codes
	  • dangerous goods codes
	• relevant commonwealth, state and territory legislation and local government regulations affecting company operation, including:
	  • anti-discrimination and diversity policies
	  • chemical controls
	  • chemical registers and manifests
	  • consumer protection
	  • energy conservation
	  • environmental protection
	  • equal employment opportunity
	  • freedom of information
	  • industrial equipment certificates of competency or licences
	  • industrial relations
	  • OHS Acts and regulations
	  • privacy
	  • public health
	  • trade practices
	  • water conservation
	  • workplace consultative arrangements.

Occupational health and safety (also known as workplace health and safety) ***requirements*** may relate to:	• allergic reactions, such as contact dermatitis • communication devices for remote and isolated locations, such as: • mobile phone

© Commonwealth of Australia, 2025 HumanAbility

	• two-way radio
	• dermatoxicological control and prevention measures
	• emergency procedures for eye and skin contact, and inhalation and ingestion of toxic substances
	• hazard identification and risk assessment mechanisms
	• health surveillance and monitoring, such as regular blood testing
	• hierarchy of hazard control procedures
	• maintaining clear access
	• national and industry standards and codes of practice
	• OHS control procedures, such as:
	  • health and safety plans
	  • job plans
	  • job safety analyses
	  • risk assessments
	  • safe operating practices and procedures
	  • safe system of work statements
	  • safe work instructions
	  • work method statements
	• reporting injury and dangerous occurrences
	• routes of entry and potential symptoms of exposure to chemicals
	• safe work practices for equipment, PPE and chemical storage, including interpretation of:
	  • MSDS
	  • hazardous substance information, such as long latency periods
	• safety training, induction and refresher training
	• selection and use of PPE and clothing appropriate to the hazard
	• ultraviolet light
	• up-to-date electrical test and tag compliance
	• use of chemicals according to MSDS
	• use of residual current devices
	• use, storage and maintenance of equipment according to manufacturer specifications and equipment operating manuals.

Equipment may include:	• access equipment • bins • brooms • buckets • buffers • cleaning trolleys • cloths • cobwebbers

© Commonwealth of Australia, 2025 HumanAbility

	• doodle bag holders • drop sheets • drying equipment • dust pans and brushes • dusters • extension poles • extraction units, wands and hand tools • hoses • ladders • microfibre products • mops • polishers • pressure-washing equipment and attachments • scouring pads • scrapers • scrubbers • sponges • spray bottles • squeegees • steam cleaners • sweepers • vacuum cleaners and attachments • window cleaning equipment • work site communication devices.
Chemicals may include:	• acid cleaners • alkaline cleaners • low environmental-impact chemicals • neutral cleaners • solvent cleaners.
Consumables may include:	• air fresheners • hand towels • liner bags • soap • toilet paper.
Personal protective equipment may include:	• ear muffs and plugs • gloves, such as non-permeable • goggles • high-visibility vests and clothing • overalls and other protective clothing • respirators • safety glasses

© Commonwealth of Australia, 2025 HumanAbility

	• safety shoes • splash-proof face masks • sun protection • tongs • ultraviolet protection • wet-work clothing.
Appropriate persons may include:	• managers • persons in control of work sites • supervisors.

Hazards may include:	• allergic reactions to chemicals or equipment, including latex allergies
	• biological and animal waste
	• bites and stings
	• blood and blood-stained products
	• confined or restricted spaces
	• contaminated clothing, materials or equipment
	• damaged or inappropriate equipment
	• dust and fibres
	• electrical hazards arising from:
	  • cables
	  • electrical fittings:
	  • switches
	  • lights
	  • untested electrical equipment
	• fatigue
	• fire
	• gas
	• heights
	• inadequate lighting and ventilation
	• infectious and zoonotic diseases, such as:
	  • Q fever
	  • scabies
	• mobile equipment and vehicle hazards around plant and vehicles
	• moving or unguarded parts
	• noise
	• occupational violence and bullying
	• poor personal hygiene practices
	• spill, splash and spray
	• release of substances with negative environmental impact
	• synergistic chemical reactions, such as:
	  • hazardous incompatibility

© Commonwealth of Australia, 2025 HumanAbility

	• reactivity • syringes or other sharps • temperature extremes • ultraviolet light • unsafe manual-handling techniques, including awkward and repetitive postures • unsafe underfoot conditions, such as slippery, uneven and rough surfaces • work in unfamiliar isolated or remote environments.

Manufacturer specifications may include:	• equipment operating manuals
	• instructional guides
	• MSDS
	• other resources supplied by the manufacturer, such as:
	  • laminated cards
	  • notices
	  • wall posters
	• product labels
	• safety instructions pre-printed on equipment.

Signage and barriers may include:	• physical barriers and restraints erected to restrict access to a site
	• signs complying with legislative requirements and Australian standards warning of danger or adverse conditions, including:
	  • cleaning in progress
	  • hazardous chemicals in use or present in work area.

Personnel may include:	• client's staff members • colleagues • general public • venue, facility, shopping centre staff and management.
Work restrictions may include:	• amount of cleaning anticipated • client activity • employee level of literacy and communication skills • faulty or inappropriate equipment • site accessibility • site hazards • skills of work unit or team • staffing resources • time limitations.

CPPCLO2035A Maintain cleaning storage areas

Modification History

Revised unit

Unit updated and equivalent to PRMCL35B Maintain a cleaning storage area

Unit Descriptor

This unit of competency specifies the outcomes required to maintain cleaning equipment and consumable storage areas, which may be a vehicle or premises. The movement and control of equipment, chemicals and consumables used in the provision of cleaning services are also addressed.

The unit requires the ability to maintain and operate a safe and efficient cleaning storage area according to legislative requirements. Maintaining the storage area requires the ability to follow established procedures, understand issues associated with storing and using chemicals, and adhere to legislative and public health and safety requirements.

Application of the Unit

This unit of competency supports employees without managerial or supervisory responsibilities. The unit applies to persons whose major function is cleaning, not storekeeping.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the Performance criteria describe the performance needed to

essential outcomes of a unit of competency.	demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Maintain storage area	1.1	***Storage area*** is secured from unauthorised access according to ***legislative***, ***occupational health and safety*** (OHS) and ***company requirements***.
		1.2	***Hazards*** are identified and risks are controlled in storage area according to legislative, OHS and company requirements.
		1.3	***Safety warnings*** are prominently displayed and ***safety information*** is made accessible according to legislative, OHS and company requirements.
		1.4	***Equipment*** is stored, maintained and checked to enable ready access and re-use according to ***manufacturer specifications*** and legislative, OHS and company requirements.
		1.5	***Chemicals*** and ***consumables*** are stored according to manufacturer specifications and legislative, OHS and company requirements.
		1.6	***Personal protective equipment*** (PPE) is cleaned, safety-checked and stored, and maintenance requirements are recorded according to manufacturer specifications, and OHS and company requirements.
		1.7	***Work site communication devices*** and documents are reviewed and responded to according to company requirements.
		1.8	Collected ***waste*** is disposed of according to ***work order***, manufacturer specifications and legislative, OHS, company and ***environmental requirements***.
		1.9	Storage area is made accessible and free of obstacles according to practical restrictions of site or vehicle, and according to OHS and company requirements.

© Commonwealth of Australia, 2025 HumanAbility

2	Control and maintain stocks of equipment and chemicals	2.1	Inventory system of equipment, PPE, chemicals and consumables with maximum and minimum holding levels is operated and maintained according to legislative and company requirements.
		2.2	Usage patterns are monitored and chemicals and consumables are re-ordered to maintain required levels according to company requirements.
		2.3	Labelling system of containers is maintained according to manufacturer specifications and legislative, OHS and company requirements.
		2.4	Chemicals and consumables are issued on a first-in first-out basis according to company requirements.
		2.5	Chemicals are prepared according to manufacturer specifications and legislative, OHS and company requirements.
		2.6	Obsolete equipment, chemicals and waste are collected and disposed of according to manufacturer specifications and environmental, legislative, OHS and company requirements.
3	Respond to emergency situations	3.1	Spillages and emergency situations are responded to with ***emergency response procedures*** according to environmental, legislative, OHS and company requirements.
		3.2	***Regulatory and company documentation*** is prepared according to environmental, legislative, OHS and company requirements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills
interpersonal skills to relate to people from a range of backgrounds • language, literacy and numeracy skills to:

© Commonwealth of Australia, 2025 HumanAbility

- communicate clearly and concisely verbally and in writing
- perform mathematical calculations required for diluting and mixing chemicals as specified on product labels
- read and interpret directions and safety instructions, including:
  - chemical labels
  - equipment manuals
  - material safety data sheets (MSDS)
- request advice or further information
- seek and receive feedback
- source, organise and record information

- planning and organising skills to:
  - control stock
  - sequence tasks
- problem-solving skills to manage contingencies
- skills to work safely when:
  - handling and disposing of chemicals
  - handling and disposing of contaminated and toxic waste
  - identifying hazards and controlling risks
  - manual handling
- self-management skills to work alone and in a team

Required knowledge

- company management structure and procedures, including:
  - biological and viral control
  - emergency response and evacuation procedures
  - environmental protection procedures
  - injury, dangerous occurrence and incident reporting
  - OHS procedures
  - quality systems
- documentation requirements
- hazards and risks of storing, preparing, using and disposing of chemicals
- legislation, regulations, codes of practice and industry advisory standards that apply to maintaining cleaning storage areas, including OHS legislation
- product knowledge, including manufacturer specifications for equipment and chemicals being used
- routes of entry and potential symptoms of exposure to chemicals
- safe work practices for using:
  - chemicals
  - equipment, including PPE

© Commonwealth of Australia, 2025 HumanAbility

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed by observing at least two practical demonstrations of maintaining cleaning storage areas.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the required skills and knowledge specified in this unit. In particular the person should demonstrate the ability to: • comply with company, legislative and regulatory requirements • maintain a secure and accessible storage area • use emergency response procedures • use good storage and housekeeping practices, particularly those relating to labelling and security of chemicals • use systematic stock control records.
Context of and specific resources for assessment	Assessment of essential underpinning knowledge may be conducted in an off-site context. It is to comply with relevant regulatory or Australian standards' requirements. Resource implications for assessment include access to: • suitable venue, including stores and store records • suitable equipment and chemicals • PPE • equipment operating manuals and MSDS • work order instructions, work plans and schedules • assessment instruments, including personal planner and assessment record book.
Method of assessment	Assessment methods must: • satisfy the endorsed Assessment Guidelines of the Property Services Training Package • include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application • reinforce the integration of employability skills with workplace tasks and job roles • confirm that competency is verified and able to be transferred to other circumstances and environments.
Guidance information for	Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to

© Commonwealth of Australia, 2025 HumanAbility

assessment	modified equipment and other physical resources, and the provision of appropriate assessment support. Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed. This unit could be assessed on its own or in combination with other units relevant to the job function, such as: • CPPCLO2033A Plan for safe and efficient cleaning activities • CPPCMN2002A Participate in workplace safety arrangements.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Storage area may be a vehicle, room, storage cupboard or other secure area separate from normal client functions and may include:	• chemical cupboards • clothes racks • desks • equipment storage bays • in-built vehicular storage arrangement to keep consumables and equipment secure during transport • slop sinks.

Legislative requirements may include:	• Australian standards, quality assurance and certification requirements
	• award and enterprise agreements
	• industry advisory standards and codes, such as:
	  • building codes
	  • dangerous goods codes
	• relevant commonwealth, state and territory legislation and local government regulations affecting company operation, including:
	  • anti-discrimination and diversity policies
	  • chemical controls
	  • chemical registers and manifests
	  • consumer protection
	  • energy conservation
	  • environmental protection
	  • equal employment opportunity
	  • freedom of information

© Commonwealth of Australia, 2025 HumanAbility

	• industrial equipment certificates of competency or licences • industrial relations • OHS Acts and regulations • privacy • public health • trade practices • water conservation • workplace consultative arrangements.

Occupational health and safety **(also known as workplace health and safety)** ***requirements*** may relate to:	• allergic reactions, such as contact dermatitis
	• communication devices for remote and isolated locations, such as:
	  • mobile phone
	  • two-way radio
	• dermatoxicological control and prevention measures
	• emergency procedures for eye and skin contact, and inhalation and ingestion of toxic substances
	• hazard identification and risk assessment mechanisms
	• health surveillance and monitoring, such as regular blood testing
	• hierarchy of hazard control procedures
	• maintaining clear access
	• national and industry standards and codes of practice
	• OHS control procedures, such as:
	  • health and safety plans
	  • job plans
	  • job safety analyses
	  • risk assessments
	  • safe operating practices and procedures
	  • safe system of work statements
	  • safe work instructions
	  • work method statements
	• reporting injury and dangerous occurrences
	• routes of entry and potential symptoms of exposure to chemicals
	• safe work practices for equipment, PPE and chemical storage, including interpretation of:
	  • MSDS
	  • hazardous substance information, such as long latency periods
	• safety training, induction and refresher training
	• selection and use of PPE and clothing appropriate to the hazard
	• ultraviolet light
	• up-to-date electrical test and tag compliance

© Commonwealth of Australia, 2025 HumanAbility

	• use of chemicals according to MSDS • use of residual current devices • use, storage and maintenance of equipment according to manufacturer specifications and equipment operating manuals.

Company requirements may include:	• business and performance plans
	• client communication procedures
	• client confidentiality procedures
	• client service standards
	• communication channels and reporting procedures
	• company goals, objectives, plans, systems and processes
	• company issued identification badges, cards or passes
	• company policies and procedures, including:
	  • access and equity policy, principles and practice
	  • OHS policies and procedures, including control procedures
	  • maintenance procedures for equipment and PPE
	  • those relating to own role, responsibility and delegation
	  • work site access security clearance procedures
	• company service standards
	• dress and presentation requirements
	• duty of care, code of conduct, and code of ethics
	• emergency response and evacuation procedures
	• employer and employee rights and responsibilities
	• environmental protection procedures
	• personnel practices and guidelines
	• quality and continuous improvement processes and standards
	• records and information systems and processes
	• training materials (induction, refresher and new skills)
	• using contractors.

Hazards may include:	• allergic reactions to chemicals or equipment, including latex allergies
	• biological and animal waste
	• bites and stings
	• blood and blood-stained products
	• confined or restricted spaces
	• contaminated clothing, materials or equipment
	• damaged or inappropriate equipment
	• dust and fibres
	• electrical hazards arising from:
	  • cables
	  • electrical fittings:
	  • switches

© Commonwealth of Australia, 2025 HumanAbility

	• lights • untested electrical equipment • fatigue • fire • gas • heights • inadequate lighting and ventilation • infectious and zoonotic diseases, such as: • Q fever • scabies • mobile equipment and vehicle hazards around plant and vehicles • moving or unguarded parts • noise • occupational violence and bullying • poor personal hygiene practices • spill, splash and spray • release of substances with negative environmental impact • synergistic chemical reactions, such as: • hazardous incompatibility • reactivity • syringes or other sharps • temperature extremes • ultraviolet light • unsafe manual-handling techniques, including awkward and repetitive postures • unsafe underfoot conditions, such as slippery, uneven and rough surfaces • work in unfamiliar isolated or remote environments.
Safety warnings may include:	• charts and posters • instructions • labels • signs and placards • symbols.
Safety information may include:	• chemical co-location, separation and segregation arrangements • chemical manifests • chemical registers • colour codes • company policies and procedures • labels • manufacturer specifications • manufacturer instructions

© Commonwealth of Australia, 2025 HumanAbility

	• MSDS • OHS information • operation manuals.
Equipment may include:	• access equipment, such as ladders • bins • brooms • buckets • buffers • cleaning trolleys • cloths • cobwebbers • doodle bag holders • drop sheets • drying equipment • dust pans and brushes • dusters • extension poles • extraction units, wands and hand tools • hoses • microfibre products • mops • polishers • pressure-washing equipment and attachments • scouring pads • scrapers • scrubbers • sponges • spray bottles • squeegees • steam cleaners • sweepers • vacuum cleaners and attachments • window cleaning equipment • work site communication devices.

Manufacturer specifications may include:	• equipment operating manuals
	• instructional guides
	• MSDS
	• other resources supplied by the manufacturer, such as:
	  • laminated cards
	  • notices
	  • wall posters

© Commonwealth of Australia, 2025 HumanAbility

	• product labels • safety instructions pre-printed on equipment.
Chemicals may include:	• acid cleaners • alkaline cleaners • low environmental-impact chemicals • neutral cleaners • solvent cleaners.
Consumables may include:	• air fresheners • hand towels • liner bags • soap • toilet paper.
Personal protective equipment may include:	• ear muffs and plugs • gloves, such as non-permeable • goggles • high-visibility vests and clothing • overalls and other protective clothing • respirators • safety glasses • safety harnesses • safety shoes • splash-proof face masks • sun protection • tongs • ultraviolet protection • wet-work clothing.
Work site communication devices may include:	• communication books • noticeboards • telephones and two-way radios • whiteboards.
Waste may be either solid or liquid and include:	• chemicals past expiry date • obsolete equipment • machine or vehicle exhaust emissions • packaging • used containers • used or contaminated PPE • used or unused chemicals.

Work order **information** may include:	• access to work site, including:
	  • access and egress points
	  • timing of access
	• budget allocations

© Commonwealth of Australia, 2025 HumanAbility

	• completion times and dates
	• human resource requirements to complete the work tasks
	• job requirements and tasks
	• legislative and local government requirements
	• OHS requirements and emergency response procedures
	• requirements for working in isolated and remote locations
	• resource requirements, such as equipment and materials
	• specific client requirements, such as:
	  • dress and presentation requirements
	  • relationships with other activities
	• use of signage and barriers
	• work schedules
	• work site contact persons
	• work site requirements for specific industries, such as:
	  • hospitals and medical centres
	  • nursing homes
	  • retail food courts
	  • schools
	  • tourism and hospitality.

Environmental requirements may include:	• clean-up, containment and isolation
	• company policies and guidelines
	• emergency chemical spill control measures
	• environmental protection agency and requirements of government departments, such as:
	  • agriculture
	  • emergency services
	• hazardous materials handling
	• local government regulations and by-laws
	• low-energy cleaning methods
	• low environmental-impact chemicals
	• low-moisture cleaning methods
	• low water-use equipment and water-efficient cleaning methods
	• non-chemical cleaning methods.

Emergency response procedures include:	• applying first aid • clean-up, containment and isolation • decontamination • documenting emergency response and evacuation procedures • evacuating work site or workplace • notifying authorities • using firefighting appliances • using PPE.

Regulatory and company documentation may include:	• accident and incident reports • certificates and notices • customer files and databases • invoices • job sheets • OHS control procedures, forms and documentation • risk assessments.

Unit Sector(s)

Cleaning operations

Custom Content Section

Not applicable.

© Commonwealth of Australia, 2025 HumanAbility

CPPCLO2037A Clean external surfaces

Modification History

Revised unit

Unit updated and equivalent to PRMCL37A Clean external surfaces

Unit Descriptor

This unit of competency specifies the outcomes required to clean external surfaces. The unit covers the planned cleaning of external surfaces as well as spot cleaning of these surfaces in situations where only a part of the surface is soiled and requires immediate attention, such as graffiti markings.

Some external surfaces, such as sandstone and heritage buildings, may be sensitive and require the use of specialised cleaning methods.

The unit requires the ability to assess the extent of the cleaning task through knowledge of characteristics of the external surface and type of surface soiling, and to apply an understanding of client requirements and company policies and procedures in order to perform the task. Selecting the appropriate equipment, chemicals and methods is essential to performing the task safely and efficiently.

Application of the Unit

This unit applies to external surfaces less than two metres high. Surfaces requiring cleaning that are above this height require the use of specialised equipment, cleaning techniques and safety procedures.

The unit of competency supports employees without managerial or supervisory responsibilities. The work may be performed in teams or individually and would be carried out under direct supervision within company guidelines.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Assess area to be cleaned.	1.1	Area to be cleaned is assessed, ***work order*** is reviewed according to ***company requirements***, and issues are clarified with ***appropriate persons*****.**
		1.2	***Hazards*** in work site are identified and risks controlled according to company, ***legislative***, and ***occupational health and safety*** (OHS) ***requirements***.
		1.3	Type and condition of ***external surface*** are identified by observation according to work order and company requirements.
		1.4	***Soil type*** is identified by observation according to work order and company requirements.
		1.5	Work site access arrangements are identified according to work order, and OHS and company requirements.
		1.6	***Cleaning techniques*** are confirmed according to work order and company requirements.
		1.7	Size and usage pattern of work site are determined to ensure safety of ***personnel*** and efficient use of ***equipment*** and ***chemicals***.
		1.8	Pre-existing damage is identified and reported to appropriate persons according to company requirements.
2	Select equipment	2.1	***Personal protective equipment*** (PPE) is selected and used according to ***manufacturer specifications***, and

© Commonwealth of Australia, 2025 HumanAbility

	and chemicals.		OHS and company requirements.
		2.2	Equipment and chemicals are selected for work order according to OHS and company requirements.
		2.3	Operational effectiveness of equipment is checked according to manufacturer specifications and company requirements.
		2.4	Equipment is adjusted to suit operator's requirements according to manufacturer specifications and OHS requirements.
		2.5	Chemicals are prepared according to manufacturer specifications, and OHS and company requirements.
3	Prepare work site	3.1	Hazards in work site are confirmed and risks are controlled and reassessed according to legislative, OHS and company requirements.
		3.2	***Signage and barriers*** are installed as required to maximise public safety during cleaning operation according to work order, and OHS and company requirements.
		3.3	***Work restrictions*** affecting completion of work order are identified and appropriate persons are notified.
4	Clean and tidy work site.	4.1	External surface is cleaned using equipment, PPE, chemicals and cleaning techniques.
		4.2	Work is performed according to work order, manufacturer specifications and legislative, OHS and company requirements.
		4.3	Collected soil and ***waste*** are disposed of according to client specifications, work order, manufacturer specifications and legislative, OHS, company and ***environmental requirements***.
		4.4	Signage and barriers are removed according to work order, and OHS and company requirements.
5	Clean, safety	5.1	Equipment and PPE are cleaned according to

© Commonwealth of Australia, 2025 HumanAbility

check and store equipment.		manufacturer specifications and environmental, OHS and company requirements.
	5.2	Equipment and PPE are safety checked according to manufacturer specifications and OHS requirements, and required maintenance is recorded according to company requirements.
	5.3	Equipment and PPE are stored and maintained to allow ready access according to manufacturer specifications, and OHS and company requirements.
	5.4	Chemicals are stored according to manufacturer specifications, and OHS and company requirements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- customer service skills to:
  - establish rapport with clients
  - gain clients' trust
  - identify client expectations
- interpersonal skills to relate to people from a range of backgrounds
- language, literacy and numeracy skills to:
  - communicate clearly and concisely verbally and in writing
  - perform mathematical calculations required for diluting and mixing chemicals as specified on product labels
  - read and interpret directions and safety instructions, including:
    - chemical labels
    - equipment manuals
    - material safety data sheets (MSDS)
  - request advice or further information
  - seek and receive feedback
  - source, organise and record information
- organisational skills to plan and organise work
- problem-solving skills to manage contingencies
- skills to work safely when:
  - handling and disposing of chemicals

© Commonwealth of Australia, 2025 HumanAbility

  - handling and disposing of waste
  - identifying hazards and controlling risks
  - manual handling
- self-management skills to work alone and in a team

Required knowledge

- cleaning chemicals and equipment for external surfaces
- cleaning techniques for various surface types
- company management structure and procedures, including:
  - biological and viral control
  - emergency response and evacuation procedures
  - environmental protection procedures
  - injury, dangerous occurrence and incident reporting
  - OHS procedures
  - quality systems
- legislation, regulations, codes of practice and industry advisory standards that apply to cleaning external surfaces, including OHS legislation
- routes of entry and potential symptoms of exposure to chemicals
- safe work practices for using:
  - chemicals
  - equipment, including PPE
- types of surfaces, their characteristics and appropriate cleaning methods

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed by observing practical demonstrations of cleaning external surfaces involving at least two different surfaces and two different work site environments.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the required skills and knowledge specified in this unit. In particular the person should demonstrate the ability to: • identify type and characteristics of external surfaces and types of soil • comply with company and legislative requirements • use safe and efficient cleaning methods

© Commonwealth of Australia, 2025 HumanAbility

	• select cleaning equipment and chemicals • achieve outcomes in relation to customer work order and company requirements.
Context of and specific resources for assessment	Assessment of essential underpinning knowledge may be conducted in an off-site context. It is to comply with relevant regulatory or Australian standards' requirements. Resource implications for assessment include access to: • suitable work site or venue with a variety of external surface types and soil types • suitable equipment and chemicals • PPE • equipment operating manuals and MSDS • work order instructions, work plans and schedules • assessment instruments, including personal planner and assessment record book.
Method of assessment	Assessment methods must: • satisfy the endorsed Assessment Guidelines of the Property Services Training Package • include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application • reinforce the integration of employability skills with workplace tasks and job roles • confirm that competency is verified and able to be transferred to other circumstances and environments.
Guidance information for assessment	Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support. Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed. This unit could be assessed on its own or in combination with other units relevant to the job function.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work

workplace health and safety) ***requirements*** may relate to:	as: • mobile phone • two-way radio • dermatoxicological control and prevention measures • emergency procedures for eye and skin contact, and inhalation and ingestion of toxic substances • hazard identification and risk assessment mechanisms • health surveillance and monitoring, such as regular blood testing • hierarchy of hazard control procedures • maintaining clear access • national and industry standards and codes of practice • OHS control procedures, such as: • health and safety plans • job plans • job safety analyses • risk assessments • safe operating practices and procedures • safe system of work statements • safe work instructions • work method statements • reporting injury and dangerous occurrences • routes of entry and potential symptoms of exposure to chemicals • safe work practices for equipment, PPE and chemical storage, including interpretation of: • MSDS • hazardous substance information, such as long latency periods • safety training, induction and refresher training • selection and use of PPE and clothing appropriate to the hazard • ultraviolet light • up-to-date electrical test and tag compliance • use of chemicals according to MSDS • use of residual current devices • use, storage and maintenance of equipment according to manufacturer specifications and equipment operating manuals.
External surfaces may include:	• aluminium • brick • ceramic • concrete • marble • metal

© Commonwealth of Australia, 2025 HumanAbility

	• polymer resin • rendered surfaces • new technologies • terrazzo • wood. Note: External surfaces in some situations, such as heritage sites, are only cleaned by specialists.
Soil types may include:	• food and beverage stains • food grime • graffiti made with ink, texta and paint • human and animal waste • mould and mildew • mud and soil • scuff marks.
Cleaning techniques may include:	• hand washing • low-water cleaning methods, such as using microfibre cleaning products • pre-spraying • rinsing • scraping • spot cleaning • squeegeeing.
Personnel may include:	• client's staff members • colleagues • general public • venue, facility, shopping centre staff and management.

Equipment may include:	• access equipment, such as:
	  • A framed ladders
	  • wet area electrical safety connections
	• cleaning equipment, such as:
	  • buckets
	  • cloths
	  • extraction units for contaminated waste
	  • garbage bins
	  • microfibre products
	  • nylon scourer pads
	  • scrapers
	  • scrubbing brushes
	  • soft bristle brooms
	  • spray bottles

© Commonwealth of Australia, 2025 HumanAbility

	• squeegees • water-fed brooms.
Chemicals may include:	• acid cleaners • alkaline cleaners • low environmental-impact chemicals • neutral cleaners • solvent cleaners.
Personal protective equipment may include:	• ear muffs or plugs • gloves, such as non-permeable • goggles • high-visibility vests and clothing • overalls and other protective clothing • respirators • safety glasses • safety shoes • splash-proof face masks • sun protection • ultraviolet protection • wet-work clothing.

Manufacturer specifications may include:	• equipment operating manuals
	• instructional guides
	• MSDS
	• other resources supplied by the manufacturer, such as:
	  • laminated cards
	  • notices
	  • wall posters
	• product labels
	• safety instructions pre-printed on equipment.

Signage and barriers may include:	• physical barriers and restraints erected to restrict access to a site
	• signs complying with legislative requirements and Australian standards warning of danger or adverse conditions, including:
	  • cleaning in progress
	  • hazardous chemicals in use or present in work area.

Work restrictions may include:	• amount of cleaning anticipated • client activity • employee level of literacy and communication skills • faulty or inappropriate equipment • site accessibility • site hazards • skills of work unit or team • staffing resources

CPPCLO3002A Restore hard floor surfaces

Modification History

Revised unit

Unit updated and equivalent to PRMCLO2B Restore a hard floor surface

Unit Descriptor

This unit of competency specifies the outcomes required to restore hard floor surfaces. The unit applies to both manual and mechanical methods of hard floor surface restoration. It requires the ability to assess the extent of the restoration task through understanding client requirements and applying company policies and procedures. Selecting the appropriate equipment, chemicals and methods is essential to performing the task safely and efficiently.

Application of the Unit

This unit of competency supports employees without managerial or supervisory responsibilities. Performance would usually be carried out under routine supervision and within company guidelines.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of

© Commonwealth of Australia, 2025 HumanAbility

performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Assess area to be cleaned.	1.1	Area to be cleaned is assessed, ***work order*** is reviewed according to ***company requirements***, and issues are clarified with ***appropriate persons*****.**
		1.2	***Hazards*** in work area are identified and associated risks assessed according to company, ***legislative***, and ***occupational health and safety*** (OHS) ***requirements***.
		1.3	Surface type of ***hard floor*** is identified by observation according to work order and company requirements.
		1.4	***Surface texture*** is identified by observation according to work order and company requirements.
		1.5	***Embedded soil*** is identified by observation according to company requirements.
		1.6	Size and usage pattern of work site are determined to ensure safety of ***personnel*** and efficient use of ***equipment*** and ***chemicals***.
		1.7	***Restoration cleaning techniques*** for surface of hard floor are selected according to work order and company requirements.
		1.8	Pre-existing damage is identified and reported to appropriate persons according to company requirements.
2	Select equipment and chemicals.	2.1	Suitable ***personal protective equipment*** (PPE) is selected and used according to ***manufacturer specifications***, and OHS and company requirements.
		2.2	Equipment and chemicals are selected for work order according to OHS and company requirements.
		2.3	Operational effectiveness of equipment is checked according to manufacturer specifications and company requirements.
		2.4	Equipment is adjusted to suit operator’s requirements according to manufacturer specifications and OHS

© Commonwealth of Australia, 2025 HumanAbility

			requirements.
		2.5	Chemicals are prepared according to manufacturer specifications, and OHS and company requirements.
3	Prepare work site.	3.1	Hazards in work site are confirmed and risks are controlled and reassessed according to legislative, OHS and company requirements.
		3.2	Furniture and fittings that impede cleaning operation are removed according to work order, and OHS and company requirements.
		3.3	***Signage and barriers*** are installed as required during cleaning operation according to work order, and OHS and company requirements.
		3.4	***Work restrictions*** affecting the completion of work order are identified and appropriate persons are promptly notified.
4	Restore hard floor surface.	4.1	Hard floor surface is restored using equipment, PPE, chemicals and restoration cleaning techniques according to work order, manufacturer specifications, and OHS and company requirements.
5	Tidy work site.	5.1	Collected soil and ***waste*** are disposed of according to client specifications, work order, manufacturer specifications and legislative, OHS, company and ***environmental requirements***.
		5.2	Furniture and fittings are replaced according to client requests, work order and OHS requirements.
		5.3	Signage and barriers are removed according to work order, and OHS and company requirements.
6	Clean and safety check equipment, and store equipment and	6.1	Equipment and PPE are cleaned according to manufacturer specifications and environmental, OHS and company requirements.
		6.2	Equipment and PPE are safety checked according to

© Commonwealth of Australia, 2025 HumanAbility

chemicals.		manufacturer specifications and OHS requirements, and required maintenance is recorded according to company requirements.
	6.3	Equipment and PPE are stored and maintained to allow ready access according to manufacturer specifications, and OHS and company requirements.
	6.4	Chemicals are stored according to manufacturer specifications, and OHS and company requirements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- correct working skills for:
  - applying sealer finish
  - buffing and spray buffing
  - machine scrubbing or scrubbing with deck scrubber
  - mopping
- customer service skills to:
  - establish rapport with clients
  - gain clients' trust
  - identify client expectations
- interpersonal skills to relate to people from a range of backgrounds
- language, literacy and numeracy skills to:
  - communicate clearly and concisely verbally and in writing
  - perform mathematical calculations required for:
    - diluting and mixing chemicals as specified on product labels
    - measuring area
  - read and interpret directions and safety instructions, including:
    - chemical labels
    - equipment manuals
    - material safety data sheets (MSDS)
  - request advice or further information
  - seek and receive feedback
  - source, organise and record information
- planning and organising skills to:

© Commonwealth of Australia, 2025 HumanAbility

- manage time
- sequence tasks
- problem-solving skills to manage contingencies
- skills to work safely when:
  - handling and disposing of chemicals
  - handling and disposing of contaminated and toxic waste
  - identifying hazards and controlling risks
  - manual handling
- self-management skills to work alone and in a team

Required knowledge

- cleaning chemicals and equipment and their applications for hard floor surfaces
- company management structure and procedures, including:
  - biological and viral control
  - emergency response and evacuation procedures
  - environmental protection procedures
  - injury, dangerous occurrence and incident reporting
  - OHS procedures
  - quality systems
- legislation, regulations, codes of practice and industry advisory standards that apply to restoring hard floor surfaces, including OHS legislation
- routes of entry and potential symptoms of exposure to chemicals
- safe work practices for using chemicals and equipment, including PPE
- types of hard floor surfaces, including:
  - characteristic of surfaces
  - restoration methods, such as applying surface finishes

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed by observing practical demonstrations of restoring hard floor surfaces involving at least two different surfaces and two different work site environments.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the required skills and knowledge specified in this unit.

© Commonwealth of Australia, 2025 HumanAbility

	In particular the person should demonstrate the ability to: • identify type and condition of hard floor surface and soil type • use safe and efficient restoration methods • select cleaning equipment • comply with company, legislative and regulatory requirements • achieve outcomes in relation to customer work order and company requirements.
Context of and specific resources for assessment	Assessment of essential underpinning knowledge may be conducted in an off-site context. It is to comply with relevant regulatory or Australian standards' requirements. Resource implications for assessment include access to: • suitable work site or venue • suitable equipment and chemicals • PPE • equipment operating manuals and MSDS • work order instructions, work plans and schedules • assessment instruments, including personal planner and assessment record book.
Method of assessment	Assessment methods must: • satisfy the endorsed Assessment Guidelines of the Property Services Training Package • include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application • reinforce the integration of employability skills with workplace tasks and job roles • confirm that competency is verified and able to be transferred to other circumstances and environments.
Guidance information for assessment	Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support. Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed. This unit could be assessed on its own or in combination with other units relevant to the job function, such as: • CPPCLO2001A Maintain hard floor surfaces.

© Commonwealth of Australia, 2025 HumanAbility

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Work order information may include:	• access to work site, including:
	  • access and egress points
	  • timing of access
	• budget allocations
	• completion times and dates
	• human resource requirements to complete the work tasks
	• job requirements and tasks
	• legislative and local government requirements
	• OHS requirements and emergency response procedures
	• requirements for working in isolated and remote locations
	• resource requirements, such as equipment and materials
	• specific client requirements, such as:
	  • dress and presentation requirements
	  • relationships with other activities
	• use of signage and barriers
	• work schedules
	• work site contact persons
	• work site requirements for specific industries, such as:
	  • hospitals and medical centres
	  • nursing homes
	  • retail food courts
	  • schools
	  • tourism and hospitality.

Company requirements may include:	• business and performance plans
	• client communication procedures
	• client confidentiality procedures
	• client service standards
	• communication channels and reporting procedures
	• company goals, objectives, plans, systems and processes
	• company issued identification badges, cards or passes
	• company policies and procedures, including:
	  • access and equity policy, principles and practice
	  • OHS policies and procedures, including control procedures
	  • maintenance procedures for equipment and PPE

© Commonwealth of Australia, 2025 HumanAbility

	• those relating to own role, responsibility and delegation • work site access security clearance procedures • company service standards • dress and presentation requirements • duty of care, code of conduct, and code of ethics • emergency response and evacuation procedures • employer and employee rights and responsibilities • environmental protection procedures • personnel practices and guidelines • quality and continuous improvement processes and standards • records and information systems and processes • training materials (induction, refresher and new skills) • using contractors.
Appropriate persons may include:	• clients • colleagues • managers • persons in control of work sites • supervisors.
Hazards may include:	• allergic reactions to chemicals or equipment, including latex allergies • biological and animal waste • bites and stings • blood and blood-stained products • confined or restricted spaces • contaminated clothing, materials or equipment • damaged or inappropriate equipment • dust and fibres • electrical hazards arising from: • cables • electrical fittings: • switches • lights • untested electrical equipment • fatigue • fire • gas • heights • inadequate lighting and ventilation • infectious and zoonotic diseases, such as: • Q fever • scabies

© Commonwealth of Australia, 2025 HumanAbility

	• mobile equipment and vehicle hazards around plant and vehicles
	• moving or unguarded parts
	• noise
	• occupational violence and bullying
	• poor personal hygiene practices
	• spill, splash and spray
	• release of substances with negative environmental impact
	• synergistic chemical reactions, such as:
	  • hazardous incompatibility
	  • reactivity
	• syringes or other sharps
	• temperature extremes
	• ultraviolet light
	• unsafe manual-handling techniques, including awkward and repetitive postures
	• unsafe underfoot conditions, such as slippery, uneven and rough surfaces
	• work in unfamiliar isolated or remote environments.

Legislative requirements may include:	• Australian standards, quality assurance and certification requirements
	• award and enterprise agreements
	• industry advisory standards and codes, such as:
	  • building codes
	  • dangerous goods codes
	• relevant commonwealth, state and territory legislation and local government regulations affecting company operation, including:
	  • anti-discrimination and diversity policies
	  • chemical controls
	  • chemical registers and manifests
	  • consumer protection
	  • energy conservation
	  • environmental protection
	  • equal employment opportunity
	  • freedom of information
	  • industrial equipment certificates of competency or licences
	  • industrial relations
	  • OHS Acts and regulations
	  • privacy
	  • public health
	  • trade practices
	  • water conservation

© Commonwealth of Australia, 2025 HumanAbility

	• workplace consultative arrangements.

Occupational health and safety (also known as workplace health and safety) ***requirements*** may relate to:	• allergic reactions, such as contact dermatitis
	• communication devices for remote and isolated locations, such as:
	  • mobile phone
	  • two-way radio
	• dermatoxicological control and prevention measures
	• emergency procedures for eye and skin contact, and inhalation and ingestion of toxic substances
	• hazard identification and risk assessment mechanisms
	• health surveillance and monitoring, such as regular blood testing
	• hierarchy of hazard control procedures
	• maintaining clear access
	• national and industry standards and codes of practice
	• OHS control procedures, such as:
	  • health and safety plans
	  • job plans
	  • job safety analyses
	  • risk assessments
	  • safe operating practices and procedures
	  • safe system of work statements
	  • safe work instructions
	  • work method statements
	• reporting injury and dangerous occurrences
	• routes of entry and potential symptoms of exposure to chemicals
	• safe work practices for equipment, PPE and chemical storage, including interpretation of:
	  • MSDS
	  • hazardous substance information, such as long latency periods
	• safety training, induction and refresher training
	• selection and use of PPE and clothing appropriate to the hazard
	• ultraviolet light
	• up-to-date electrical test and tag compliance
	• use of chemicals according to MSDS
	• use of residual current devices
	• use, storage and maintenance of equipment according to manufacturer specifications and equipment operating manuals.

Hard floors may include:	• brick • ceramic tiles • concrete

© Commonwealth of Australia, 2025 HumanAbility

	• cork • marble • parquetry • pavers • polished wood • proprietary flooring encompassing new technologies • quarry tiles • rubber • slate • terrazzo • vinyl • wood.
Surface texture may include:	• non-slip surface • porous or non-porous • sealed or non-sealed • smooth or textured.
Embedded soil types can be wet or dry and may include:	• chemical • food and beverages • gravel • grease • heavy dirt build-up • industrial • liquid • oil • paint • tar.
Personnel may include:	• client's staff members • colleagues • general public • venue, facility, building or shopping centre staff and management.

Equipment may include:	• bassine brushes
	• bristle scrubbing brooms, such as:
	  • deck scrubber
	  • stiff nylon
	  • tynex for concrete
	• buckets, including ergonomic and split systems
	• cleaning trolleys
	• cloths
	• cotton and anti-static mops
	• cotton and polycotton mops

© Commonwealth of Australia, 2025 HumanAbility

	• doodle bag holders • dust control mops • insta-lock pad holders • mechanical scrubbers • microfibre products • range of floor pads for scrubbing and buffing • rotary brushes • scouring pads, scrapers and steel wool • vertical drum scrubbers and cylindrical brushes.
Chemicals may include:	• acid cleaners • alkaline cleaners • low environmental-impact chemicals • neutral cleaners • sealer finish • solvent cleaners.
Restoration cleaning techniques may include:	• applying floor sealer finishes • dry buffing • dust mopping • low-water techniques, such as using microfibre cleaning products • scrubbing • spray buffing • sweeping • wet mopping.
Personal protective equipment may include:	• ear muffs or plugs • gloves, such as non-permeable • goggles • high-visibility vests and clothing • overalls and other protective clothing • respirators • safety glasses • safety shoes • splash-proof face masks • sun protection • tongs • ultraviolet protection • wet-work clothing.
Manufacturer specifications may include:	• equipment operating manuals • instructional guides • MSDS • other resources supplied by the manufacturer, such as:

© Commonwealth of Australia, 2025 HumanAbility

	• laminated cards • notices • wall posters • product labels • safety instructions pre-printed on equipment.
Signage and barriers may include:	• physical barriers and restraints erected to restrict access to a site • signs complying with legislative requirements and Australian standards warning of danger or adverse conditions, including: • cleaning in progress • hazardous chemicals in use or present in work area.
Work restrictions may include:	• amount of cleaning anticipated • client activity • employee level of literacy and communication skills • faulty or inappropriate equipment • site accessibility • site hazards • skills of work unit or team • staffing resources • time limitations.
Waste may be either solid or liquid and include:	• chemicals past expiry date • obsolete equipment • packaging • sweeping detritus • used containers • used or contaminated PPE • used or unused chemicals.
Environmental requirements may include:	• clean-up, containment and isolation • company policies and guidelines • emergency chemical spill control measures • environmental protection agency and requirements of government departments, such as: • agriculture • emergency services • hazardous materials handling • local government regulations and by-laws • low-energy cleaning methods • low environmental-impact chemicals • low-moisture cleaning methods • low water-use equipment and water-efficient cleaning methods • non-chemical cleaning methods.

CPPCLO3003A Replace a hard floor finish

Modification History

Revised unit

Unit updated and equivalent to PRMCLO3B Replace a hard floor finish

Unit Descriptor

This unit of competency specifies the outcomes required to replace a hard floor finish. The unit covers the processes involved in removing the old floor sealant and replacing it with a new protective coating. This process is commonly known within the industry as ‘strip and seal’.

The unit requires the ability to assess the extent of the removal and replacement needed through understanding client requirements and applying organisational policies and procedures. Selecting the appropriate equipment, chemicals and methods is essential to performing the task safely and efficiently.

Application of the Unit

This unit of competency supports employees without managerial or supervisory responsibilities. Performance would usually be carried out under routine supervision and within company guidelines.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the Performance criteria describe the performance needed to

essential outcomes of a unit of competency.	demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Assess area to be stripped and sealed.	1.1	Area requiring ***strip and seal*** is assessed, ***work order*** is reviewed according to ***company requirements***, and issues are clarified with ***appropriate persons.***
		1.2	***Hazards*** are identified and risks controlled in work site according to ***legislative***, ***occupational health and safety*** (OHS) and company ***requirements***.
		1.3	Type of ***sealant or finisher*** on ***hard floor*** is identified by observation according to work order and company requirements.
		1.4	Type and condition of surface sealant or finisher are identified by observation and testing according to work order and company requirements.
		1.5	Compatible sealant or finisher is selected to replace existing sealant according to work order and company requirements.
		1.6	Size and usage pattern of work site are determined to ensure safety of ***personnel*** and efficient use of ***equipment*** and ***chemicals***.
		1.7	Extent of required strip and seal is assessed and ***replacement method*** is selected according to work order and company requirements.
		1.8	Timing and availability of work site for strip and seal are confirmed according to work order and company requirements.
		1.9	Pre-existing floor damage is identified and reported to appropriate persons according to company requirements.
2	Select equipment	2.1	***Personal protective equipment*** (PPE) is selected and used according to ***manufacturer specifications***, and

© Commonwealth of Australia, 2025 HumanAbility

	and chemicals.		OHS and company requirements.
		2.2	Equipment and chemicals are selected for work order according to OHS and company requirements.
		2.3	Operational effectiveness of equipment is checked according to manufacturer specifications and company requirements.
		2.4	Equipment is adjusted to suit operator's requirements according to manufacturer specifications and OHS requirements.
		2.5	Chemicals are prepared according to manufacturer specifications, and OHS and company requirements.
3	Prepare work site.	3.1	Hazards in work site are confirmed and risks are controlled and reassessed according to legislative, OHS and company requirements.
		3.2	Furniture and fittings that impede cleaning operation are removed according to work order, and OHS and company requirements.
		3.3	***Signage and barriers*** are installed as required during cleaning operation according to work order, and OHS and company requirements.
		3.4	Floor surface is cleaned to remove ***soil*** according to company requirements.
		3.5	***Work restrictions*** affecting completion of work order are identified and appropriate persons are promptly notified.
4	Remove and replace hard floor surface.	4.1	Equipment and chemicals are used to strip existing sealant or finisher off hard floor according to work order, manufacturer specifications and company requirements.
		4.2	Equipment and chemicals are used to seal hard floor surface by applying sealant/finish according to work order, manufacturer specifications and company requirements.
		4.3	Work is performed according to work order,

© Commonwealth of Australia, 2025 HumanAbility

			manufacturer specifications and legislative, OHS and company requirements.
5	Tidy work site.	5.1	Collected soil and ***waste*** are disposed of according to client specifications, work order, manufacturer specifications and legislative, OHS, company and ***environmental requirements***.
		5.2	Furniture and fittings are replaced according to client requests, work order and OHS requirements.
		5.3	Signage and barriers are removed according to work order, and OHS and company requirements.
6	Clean and safety check equipment, and store equipment and chemicals.	6.1	Equipment and PPE are cleaned according to manufacturer specifications and environmental, OHS and company requirements.
		6.2	Equipment and PPE are safety checked according to manufacturer specifications and OHS requirements and required maintenance is recorded according to company requirements.
		6.3	Equipment and PPE are stored and maintained to allow ready access according to manufacturer specifications, and OHS and company requirements.
		6.4	Chemicals are stored according to manufacturer specifications, and OHS and company requirements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- correct working skills for:
  - applying sealants or finishers
  - buffing and spray buffing
  - machine scrubbing
  - mopping

© Commonwealth of Australia, 2025 HumanAbility

    - sweeping
- customer service skills to:
    - establish rapport with clients
    - gain clients' trust
    - identify client expectations
- interpersonal skills to relate to people from a range of backgrounds
- language, literacy and numeracy skills to:
    - communicate clearly and concisely verbally and in writing
    - perform mathematical calculations required for:
        - preparing chemicals as specified on product labels
        - measuring area
    - read and interpret directions and safety instructions, including:
        - chemical labels
        - equipment manuals
        - material safety data sheets (MSDS)
    - request advice or further information
    - seek and receive feedback
    - source, organise and record information
- planning and organising skills to:
    - manage time
    - sequence tasks
- problem-solving skills to manage contingencies
- skills to work safely when:
    - handling and disposing of chemicals
    - handling and disposing of contaminated and toxic waste
    - identifying hazards and controlling risks
    - manual handling
- self-management skills to work alone and in a team
- teamwork skills to lead teams

Required knowledge

- chemicals, including:
    - routes of entry and potential symptoms of exposure to chemicals
    - sealants or finishers and equipment and their application requirements for hard floor surfaces
- company management structure and procedures, including:
    - biological and viral control
    - emergency response and evacuation procedures
    - environmental protection procedures
    - injury, dangerous occurrence and incident reporting

© Commonwealth of Australia, 2025 HumanAbility

  - OHS procedures
  - quality systems
- legislation, regulations, codes of practice and industry advisory standards that apply to replacing a hard floor finish, including OHS legislation
- routes of entry and potential symptoms of exposure to chemicals
- safe work practices for using:
  - chemicals
  - equipment, including PPE
- types of hard floor surfaces, including:
  - characteristic of surface finishes
  - relevant replacement methods

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed by observing practical demonstrations of replacing a hard floor finish involving at least two different surfaces and two different work areas.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the required skills and knowledge specified in this unit. In particular the person should demonstrate the ability to: • identify types of hard floor surfaces and sealants or finishers • comply with company and legislative requirements • use safe and efficient replacement methods • select cleaning equipment and chemicals, including sealants or finishers • achieve outcome in relation to customer work order and company requirements.
Context of and specific resources for assessment	Assessment of essential underpinning knowledge may be conducted in an off-site context. It is to comply with relevant regulatory or Australian standards' requirements. Resource implications for assessment include access to: • suitable work site or venue • suitable equipment and chemicals, including sealants or finishers • PPE

© Commonwealth of Australia, 2025 HumanAbility

	• equipment operating manuals and MSDS • work order instructions, work plans and schedules, and policy documents • assessment instruments, including personal planner and assessment record book.
Method of assessment	Assessment methods must: • satisfy the endorsed Assessment Guidelines of the Property Services Training Package • include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application • reinforce the integration of employability skills with workplace tasks and job roles • confirm that competency is verified and able to be transferred to other circumstances and environments.
Guidance information for assessment	Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support. Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed. This unit could be assessed on its own or in combination with other units relevant to the job function, such as: • CPPCLO2001A Maintain hard floor surfaces • CPPCLO3002A Restore hard floor surfaces.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Strip and seal involve:	• reducing existing sealant to solution using approved stripper • removing slurry of sealant and stripper from floor using manual or machine methods • applying approved sealant/finisher to hard floor surface using manual or machine methods.

© Commonwealth of Australia, 2025 HumanAbility

Work order information may include:	• access to work site, including:
	  • access and egress points
	  • timing of access
	• budget allocations
	• completion times and dates
	• human resource requirements to complete the work tasks
	• job requirements and tasks
	• legislative and local government requirements
	• OHS requirements and emergency response procedures
	• requirements for working in isolated and remote locations
	• resource requirements, such as equipment and materials
	• specific client requirements, such as:
	  • dress and presentation requirements
	  • relationships with other activities
	• use of signage and barriers
	• work schedules
	• work site contact persons
	• work site requirements for specific industries, such as:
	  • hospitals and medical centres
	  • nursing homes
	  • retail food courts
	  • schools
	  • tourism and hospitality.

Company requirements may include:	• business and performance plans
	• client communication procedures
	• client confidentiality procedures
	• client service standards
	• communication channels and reporting procedures
	• company goals, objectives, plans, systems and processes
	• company issued identification badges, cards or passes
	• company policies and procedures, including:
	  • access and equity policy, principles and practice
	  • OHS policies and procedures, including control procedures
	  • maintenance procedures for equipment and PPE
	  • those relating to own role, responsibility and delegation
	  • work site access security clearance procedures
	• company service standards
	• defined resource parameters
	• dress and presentation requirements
	• duty of care, code of conduct, and code of ethics
	• emergency response and evacuation procedures

© Commonwealth of Australia, 2025 HumanAbility

	• employer and employee rights and responsibilities • environmental protection procedures • personnel practices and guidelines • quality and continuous improvement processes and standards • records and information systems and processes • training materials (induction, refresher and new skills) • use of contractors.
Appropriate persons may include:	• clients • colleagues • managers • persons in control of work sites • supervisors.

Hazards may include:	• allergic reactions to chemicals or equipment, including latex allergies
	• biological and animal waste
	• bites and stings
	• blood and blood-stained products
	• confined or restricted spaces
	• contaminated clothing, materials or equipment
	• damaged or inappropriate equipment
	• dust and fibres
	• electrical hazards arising from:
	  • cables
	  • electrical fittings:
	  • switches
	  • lights
	  • untested electrical equipment
	• fatigue
	• fire
	• gas
	• heights
	• inadequate lighting and ventilation
	• infectious and zoonotic diseases, such as:
	  • Q fever
	  • scabies
	• mobile equipment and vehicle hazards around plant and vehicles
	• moving or unguarded parts
	• noise
	• occupational violence and bullying
	• poor personal hygiene practices
	• spill, splash and spray

© Commonwealth of Australia, 2025 HumanAbility

	• release of substances with negative environmental impact
	• synergistic chemical reactions, such as:
	  • hazardous incompatibility
	  • reactivity
	• syringes or other sharps
	• temperature extremes
	• ultraviolet light
	• unsafe manual-handling techniques, including awkward and repetitive postures
	• unsafe underfoot conditions, such as slippery, uneven and rough surfaces
	• work in unfamiliar isolated or remote environments.

Legislative requirements may include:	• Australian standards, quality assurance and certification requirements
	• industry advisory standards and codes, such as:
	  • building codes
	  • dangerous goods codes
	• relevant commonwealth, state and territory legislation and local government regulations affecting company operation, including:
	  • anti-discrimination and diversity policies
	  • chemical controls
	  • chemical registers and manifests
	  • consumer protection
	  • energy conservation
	  • environmental protection
	  • equal employment opportunity
	  • freedom of information
	  • industrial equipment certificates of competency or licences
	  • industrial relations
	  • OHS Acts and regulations
	  • privacy
	  • public health
	  • trade practices
	  • water conservation
	  • workplace consultative arrangements.

Occupational health and safety (also known as workplace health and safety) ***requirements*** may relate to:	• allergic reactions, such as contact dermatitis
	• communication devices for remote and isolated locations, such as:
	  • mobile phone
	  • two-way radio
	• dermatoxicological control and prevention measures

© Commonwealth of Australia, 2025 HumanAbility

	• emergency procedures for eye and skin contact, and inhalation and ingestion of toxic substances
	• hazard identification and risk assessment mechanisms
	• health surveillance and monitoring, such as regular blood testing
	• hierarchy of hazard control procedures
	• maintaining clear access
	• national and industry standards and codes of practice
	• OHS control procedures, such as:
	  • health and safety plans
	  • job plans
	  • job safety analyses
	  • risk assessments
	  • safe operating practices and procedures
	  • safe system of work statements
	  • safe work instructions
	  • work method statements
	• reporting injury and dangerous occurrences
	• routes of entry and potential symptoms of exposure to chemicals
	• safe work practices for equipment, PPE and chemical storage, including interpretation of:
	  • MSDS
	  • hazardous substance information, such as long latency periods
	• safety training, induction and refresher training
	• selection and use of PPE and clothing appropriate to the hazard
	• ultraviolet light
	• up-to-date electrical test and tag compliance
	• use of chemicals according to MSDS
	• use of residual current devices
	• use, storage and maintenance of equipment according to manufacturer specifications and equipment operating manuals.

Sealant or finisher may include:	• solvent-based wax finishes
	• water-based sealants, such as:
	  • acrylic co-polymers
	  • water-based urethanes.

Hard floors may include:	• bricks • ceramic tiles • concrete • cork • marble • parquetry

© Commonwealth of Australia, 2025 HumanAbility

	• pavers • polished wood • proprietary flooring encompassing new technologies • quarry tiles • rubber • slate • terrazzo • vinyl • wood.
Personnel may include:	• client's staff members • colleagues • general public • venue, facility, shopping centre staff and management.

Equipment may include:	• abrasive pads
	• automatic scrubbers
	• bassine brushes
	• cleaning trolleys
	• cloths
	• dry vacuum cleaners
	• floor pads of various sizes for stripping old sealant and buffing
	• floor scrapers
	• floor squeegees
	• hand doodle bug holders
	• insta-lock pad holders
	• long-handled dustpans and brushes
	• low and high-speed buffers
	• microfibre products
	• mops (polycotton or cotton)
	• nylon pads
	• sealant applicators, such as:
	  • fringe mops
	  • lamb's wool applicators
	  • weighted acrylic covered applicators
	  • wringer mops
	• scrubbers, usually mechanical
	• steel wool
	• wet vacuum cleaners.

Chemicals may include:	• acid cleaners • alkaline cleaners • finishes • low environmental-impact chemicals

© Commonwealth of Australia, 2025 HumanAbility

	• neutral cleaners • sealants • solvent cleaners • stripping agents.
Replacement methods may include:	• light strip and seal • total strip and seal.
Personal protective equipment may include:	• ear muffs and plugs • gloves, such as non-permeable • goggles • high-visibility vests and clothing • overalls and other protective clothing • respirators • safety glasses • safety shoes • splash-proof face masks • sun protection • tongs • ultraviolet protection • wet-work clothing.

Manufacturer specifications may include:	• equipment operating manuals
	• instructional guides
	• MSDS
	• other resources supplied by the manufacturer, such as:
	  • laminated cards
	  • notices
	  • wall posters
	• product labels
	• safety instructions pre-printed on equipment.

Signage and barriers may include:	• physical barriers and restraints erected to restrict access to a site
	• signs complying with legislative requirements and Australian standards warning of danger or adverse conditions, including:
	  • cleaning in progress
	  • hazardous chemicals in use or present in work area.

Soil types can be wet or dry and include:	• beverages • chemical • cigarette butts • dust • food • gravel • heavy dirt build-up

© Commonwealth of Australia, 2025 HumanAbility

	• hospital waste • industrial • liquids • oil • paper • rainwater • stones • syringes • tar.
Work restrictions may include:	• amount of cleaning anticipated • client activity • employee level of literacy and communication skills • faulty or inappropriate equipment • site accessibility • site hazards • skills of work unit or team • staffing resources • time limitations.
Waste may be either solid or liquid and include:	• chemicals past expiry date • litter • obsolete equipment • packaging • sealer and stripper detritus • soil • used containers • used or contaminated PPE • used or unused chemicals.

Environmental requirements may include:	• clean-up, containment and isolation
	• company policies and guidelines
	• emergency chemical spill control measures
	• environmental protection agency and requirements of government departments, such as:
	  • agriculture
	  • emergency services
	• hazardous materials handling
	• local government regulations and by-laws
	• low-energy cleaning methods
	• low environmental-impact chemicals
	• low-moisture cleaning methods
	• low water-use equipment and water-efficient cleaning methods
	• non-chemical cleaning methods.

CPPCLO3013A Clean window coverings

Modification History

Revised unit

Unit updated and equivalent to PRMCL13B Clean window coverings

Unit Descriptor

This unit of competency specifies the outcomes required to clean a range of window coverings to remove dirt and grime. The unit requires the ability to assess the extent of the cleaning task through understanding client requirements and the type of window coverings and fixtures, and applying company policies and procedures. Selecting the appropriate equipment, chemicals and methods is essential to performing the task safely and efficiently.

Application of the Unit

This unit of competency supports employees without managerial or supervisory responsibilities. Performance would usually be carried out under routine supervision and within company guidelines. Where ladders are being used, the work is usually done in pairs.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of

© Commonwealth of Australia, 2025 HumanAbility

performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Assess items to be cleaned.	1.1	**Window coverings and fixtures** to be cleaned are assessed, **work order** is reviewed according to **company requirements**, and issues are clarified with **appropriate persons.**
		1.2	***Hazards*** are identified and risks controlled in work site according to ***legislative***, ***occupational health and safety*** (OHS) and company ***requirements***.
		1.3	Type of window coverings and fixture method are identified by observation according to work order and company requirements.
		1.4	***Soil type*** is identified by observation according to work order and company requirements.
		1.5	Size and usage pattern of work site are determined to ensure safety of ***personnel*** and efficient use of ***equipment*** and ***chemicals***.
		1.6	Pre-existing damage is identified and reported to appropriate persons according to company requirements.
2	Select equipment and chemicals.	2.1	***Personal protective equipment*** (PPE) is selected and used according to ***manufacturer specifications***, and OHS and company requirements.
		2.2	Equipment and chemicals are selected for work order according to OHS and company requirements.
		2.3	Operational effectiveness of equipment is checked according to manufacturer specifications and company requirements.
		2.4	Equipment is adjusted to suit operator’s requirements according to manufacturer specifications and OHS requirements.
		2.5	Chemicals are prepared according to manufacturer specifications, and OHS and company requirements.

© Commonwealth of Australia, 2025 HumanAbility

3	Prepare for cleaning.	3.1	Hazards in work site are confirmed and risks controlled and reassessed according to legislative, OHS and company requirements.
		3.2	Locations of washing and drying sites are selected according to work order and legislative, OHS and company requirements.
		3.3	***Signage and barriers*** are installed as required according to work order, and OHS and company requirements.
		3.4	Window coverings and fixtures are removed according to work order, and OHS and company requirements.
		3.5	Window coverings and loose fittings are tagged to ensure correct refit according to work order and company requirements.
		3.6	***Work restrictions*** affecting the completion of work order are identified and appropriate persons are notified.
4	Clean and refit window coverings.	4.1	Window coverings are sorted according to washing method, work order and company requirements.
		4.2	Window coverings are washed and rinsed, and excess water is removed using equipment, PPE, chemicals and ***cleaning techniques*** and according to OHS requirements.
		4.3	Window coverings are dried according to work order and company requirements.
		4.4	Window coverings are checked and spot cleaned if necessary according to work order and company requirements.
		4.5	Window coverings are refitted and checked to be in working order according to work order, manufacturer specifications and OHS and company requirements.
		4.6	Work is performed according to work order, manufacturer specifications and legislative, OHS and company requirements.

© Commonwealth of Australia, 2025 HumanAbility

5	Tidy work site.	5.1	Wash area is cleaned according to work order and company requirements.
		5.2	Signage and barriers are removed according to work order, and OHS and company requirements.
		5.3	Collected soil and ***waste*** are disposed of according to client specifications, work order, manufacturer specifications and legislative, OHS, company and ***environmental requirements***.
6	Clean and safety check equipment, and store equipment and chemicals.	6.1	Equipment and PPE are cleaned according to manufacturer specifications and environmental, OHS and company requirements.
		6.2	Equipment and PPE are safety checked according to manufacturer specifications and OHS requirements and required maintenance is recorded according to company requirements.
		6.3	Equipment and PPE are stored and maintained to allow ready access according to manufacturer specifications, and OHS and company requirements.
		6.4	Chemicals are stored according to manufacturer specifications, and OHS and company requirements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- correct working skills for:
  - identifying surface types and their suitability for either wet or dry cleaning
  - performing basic wash-down and full immersion wash
  - spot cleaning
- customer service skills to:
  - establish rapport with clients
  - gain clients' trust
  - identify client expectations
- interpersonal skills to relate to people from a range of backgrounds

© Commonwealth of Australia, 2025 HumanAbility

- language, literacy and numeracy skills to:
  - communicate clearly and concisely verbally and in writing
  - perform mathematical calculations required for diluting and mixing chemicals as specified on product labels
  - read and interpret directions and safety instructions, including:
    - chemical labels
    - equipment manuals
    - material safety data sheets (MSDS)
  - request advice or further information
  - seek and receive feedback
  - source, organise and record information
- planning and organising skills to:
  - manage time
  - sequence tasks
- problem-solving skills to manage contingencies
- skills to work safely when:
  - handling and disposing of chemicals
  - handling and disposing of contaminated and toxic waste
  - identifying hazards and controlling risks
  - manual handling
- self-management skills to work alone and in a team

Required knowledge

- cleaning chemicals and equipment and their application for surfaces of window coverings
- cleaning methods for window coverings
- company management structure and procedures, including:
  - biological and viral control
  - emergency response and evacuation procedures
  - environmental protection procedures
  - injury, dangerous occurrence and incident reporting
  - OHS procedures
  - quality systems
- legislation, regulations, codes of practice and industry advisory standards that apply to cleaning window coverings, including OHS legislation
- routes of entry and potential symptoms of exposure to chemicals
- safe work practices for using:
  - chemicals
  - equipment, including PPE
- types of window coverings and fixtures, their characteristics and methods of operation

© Commonwealth of Australia, 2025 HumanAbility

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed by observing practical demonstrations of cleaning window coverings involving at least two different surfaces and two different work site environments.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the required skills and knowledge specified in this unit. In particular the person should demonstrate the ability to: • identify type and characteristics of window coverings and fixtures • select cleaning equipment and chemicals • select safe and efficient cleaning methods • remove, clean and refit window coverings according to customer work order, and company and legislative requirements • achieve outcomes in relation to customer work order and company requirements.
Context of and specific resources for assessment	Assessment of essential underpinning knowledge may be conducted in an off-site context. It is to comply with relevant regulatory or Australian standards' requirements. Resource implications for assessment include access to: • suitable work site or venue with a range of window covering types • suitable equipment and chemicals • PPE • equipment operating manuals and MSDS • work order instructions, work plans and schedules, and policy documents • assessment instruments, including personal planner and assessment record book.
Method of assessment	Assessment methods must: • satisfy the endorsed Assessment Guidelines of the Property Services Training Package • include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application • reinforce the integration of employability skills with workplace

© Commonwealth of Australia, 2025 HumanAbility

	tasks and job roles • confirm that competency is verified and able to be transferred to other circumstances and environments.
Guidance information for assessment	Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support. Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed. This unit could be assessed on its own or in combination with other units relevant to the job function.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Window coverings and fixtures can be made from cloth, metal, plastic, textile, vinyl or wood and include:	• awnings • coverings encompassing new technologies • fixed pelmet systems • flywire • Holland blinds • lined curtains • Roman blinds • security screens • shutter systems • unlined curtains • Venetian blinds • vertical blinds.

Work order information may include:	• access to work site, including:
	  • access and egress points
	  • timing of access
	• budget allocations
	• completion times and dates
	• human resource requirements to complete the work tasks
	• job requirements and tasks

© Commonwealth of Australia, 2025 HumanAbility

	• legislative and local government requirements
	• OHS requirements and emergency response procedures
	• requirements for working in isolated and remote locations
	• resource requirements, such as equipment and materials
	• specific client requirements, such as:
	  • dress and presentation requirements
	  • relationships with other activities
	• use of signage and barriers
	• work schedules
	• work site contact persons
	• work site requirements for specific industries, such as:
	  • hospitals and medical centres
	  • nursing homes
	  • retail food courts
	  • schools
	  • tourism and hospitality.

Company requirements may include:	• business and performance plans
	• client communication procedures
	• client confidentiality procedures
	• client service standards
	• communication channels and reporting procedures
	• company goals, objectives, plans, systems and processes
	• company issued identification badges, cards or passes
	• company policies and procedures, including:
	  • access and equity policy, principles and practice
	  • OHS policies and procedures, including control procedures
	  • maintenance procedures for equipment and PPE
	  • those relating to own role, responsibility and delegation
	  • work site access security clearance procedures
	• company service standards
	• dress and presentation requirements
	• duty of care, code of conduct, and code of ethics
	• emergency response and evacuation procedures
	• employer and employee rights and responsibilities
	• environmental protection procedures
	• personnel practices and guidelines
	• quality and continuous improvement processes and standards
	• records and information systems and processes
	• training materials (induction, refresher and new skills)
	• using contractors.

Appropriate persons may	• clients

© Commonwealth of Australia, 2025 HumanAbility

include:	• colleagues • managers • persons in control of work sites • supervisors.

Hazards may include:	• allergic reactions to chemicals or equipment, including latex allergies
	• biological and animal waste
	• bites and stings
	• blood and blood-stained products
	• confined or restricted spaces
	• contaminated clothing, materials or equipment
	• damaged or inappropriate equipment
	• dust and fibres
	• electrical hazards arising from:
	  • cables
	  • electrical fittings:
	  • switches
	  • lights
	  • untested electrical equipment
	• fatigue
	• fire
	• gas
	• heights
	• inadequate lighting and ventilation
	• infectious and zoonotic diseases, such as:
	  • Q fever
	  • scabies
	• mobile equipment and vehicle hazards around plant
	• moving or unguarded parts
	• noise
	• occupational violence and bullying
	• poor personal hygiene practices
	• spill, splash and spray
	• release of substances with negative environmental impact
	• synergistic chemical reactions, such as:
	  • hazardous incompatibility
	  • reactivity
	• syringes or other sharps
	• temperature extremes
	• ultraviolet light
	• unsafe manual-handling techniques, including awkward and

© Commonwealth of Australia, 2025 HumanAbility

	repetitive postures • unsafe underfoot conditions, such as slippery, uneven and rough surfaces • work in unfamiliar isolated or remote environments.

Legislative requirements may include:	• Australian standards, quality assurance and certification requirements
	• award and enterprise agreements
	• industry advisory standards and codes, such as:
	  • building codes
	  • dangerous goods codes
	• relevant commonwealth, state and territory legislation and local government regulations affecting company operation, including:
	  • anti-discrimination and diversity policies
	  • chemical controls
	  • chemical registers and manifests
	  • consumer protection
	  • energy conservation
	  • environmental protection
	  • equal employment opportunity
	  • freedom of information
	  • industrial equipment certificates of competency or licences
	  • industrial relations
	  • OHS Acts and regulations
	  • privacy
	  • public health
	  • trade practices
	  • water conservation
	  • workplace consultative arrangements.

Occupational health and safety (also known as workplace health and safety) ***requirements*** may relate to:	• allergic reactions, such as contact dermatitis
	• communication devices for remote and isolated locations, such as:
	  • mobile phone
	  • two-way radio
	• dermatoxicological control and prevention measures
	• emergency procedures for eye and skin contact, and inhalation and ingestion of toxic substances
	• hazard identification and risk assessment mechanisms
	• health surveillance and monitoring, such as regular blood testing
	• hierarchy of hazard control procedures
	• maintaining clear access
	• national and industry standards and codes of practice

© Commonwealth of Australia, 2025 HumanAbility

	• OHS control procedures, such as:
	  • health and safety plans
	  • job plans
	  • job safety analyses
	  • risk assessments
	  • safe operating practices and procedures
	  • safe system of work statements
	  • safe work instructions
	  • work method statements
	• reporting injury and dangerous occurrences
	• routes of entry and potential symptoms of exposure to chemicals
	• safe work practices for equipment, PPE and chemical storage, including interpretation of:
	  • MSDS
	  • hazardous substance information, such as long latency periods
	• safety training, induction and refresher training
	• selection and use of PPE and clothing appropriate to the hazard
	• ultraviolet light
	• up-to-date electrical test and tag compliance
	• use of chemicals according to MSDS
	• use of residual current devices
	• use, storage and maintenance of equipment according to manufacturer specifications and equipment operating manuals.

Soil types may include:	• adhered soil • cobwebs • dust • mould and mildew • nicotine stains • oil • paint • road grime.
Personnel may include:	• client's staff members • colleagues • general public • venue, facility, shopping centre staff and management.

Equipment may include:	• access equipment, including:
	  • A frame ladders
	  • extension ladders
	  • screwdrivers
	• cleaning equipment, including:

© Commonwealth of Australia, 2025 HumanAbility

	• brushes • chamois • cleaning cloths • garbage bins • hoses • hot air dryers • microfibre products • pressure-washing equipment • scourers • soft brooms • water extraction machines.
Chemicals may include:	• acid cleaners • alkaline cleaners • low environmental-impact chemicals • neutral cleaners • solvent cleaners.
Personal protective equipment may include:	• ear muffs and plugs • gloves, such as non-permeable • goggles • high-visibility vests and clothing • overalls and other protective clothing • respirators • safety glasses • safety shoes • splash-proof face masks • sun protection • tongs • ultraviolet protection • wet-work clothing.

Manufacturer specifications may include:	• equipment operating manuals
	• instructional guides
	• MSDS
	• other resources supplied by the manufacturer, such as:
	  • laminated cards
	  • notices
	  • wall posters
	• product labels
	• safety instructions pre-printed on equipment.

Signage and barriers may include:	• physical barriers and restraints erected to restrict access to a site • signs complying with legislative requirements and Australian

© Commonwealth of Australia, 2025 HumanAbility

	standards warning of danger or adverse conditions, including: • cleaning in progress • hazardous chemicals in use or present in work area.
Work restrictions may include:	• amount of cleaning anticipated • client activity • employee level of literacy and communication skills • faulty or inappropriate equipment • site accessibility • site hazards • skills of work unit or team • staffing resources • time limitations.
Cleaning techniques may include:	• air blowing • dusting • low-water cleaning methods, such as using microfibre cleaning products • pressure washing • rinsing • scrubbing • spot cleaning • water extraction • wiping.
Waste may be either solid or liquid and include:	• chemicals past expiry date • obsolete equipment • packaging • used containers • used or contaminated PPE • used or unused chemicals.

Environmental requirements may include:	• clean-up, containment and isolation
	• company policies and guidelines
	• emergency chemical spill control measures
	• environmental protection agency and requirements of government departments, such as:
	  • agriculture
	  • emergency services
	• hazardous materials handling
	• local government regulations and by-laws
	• low-energy cleaning methods
	• low environmental-impact chemicals

CPPCLO3014A Maintain 'clean room' environments

Modification History

Revised unit

Unit updated and equivalent to PRMCL14B Maintain a ‘clean room’ environment

Unit Descriptor

This unit of competency specifies the outcomes required to maintain ‘clean room’ environments. Cleaning in a ‘clean room’ environment is a specialised field of cleaning. The unit is an introduction to this type of cleaning and focuses on the need to exercise caution when selecting cleaning methods to ensure safety of personnel and equipment.

The unit requires the ability to assess the extent of the cleaning task through knowledge of the characteristics of a ‘clean room’ environment and by applying and understanding client requirements and company policies and procedures in order to perform the task. Selecting the appropriate equipment, chemicals and methods is essential to performing the task safely and efficiently.

Application of the Unit

This unit of competency supports employees without managerial or supervisory responsibilities. Performance would usually be carried out under routine supervision and within company guidelines.

Clean rooms are specialist facilities where dust presents a hazard to the safe and efficient operation of electronic and other sensitive equipment. Some clean rooms may be pressurised to reduce the amount of dust entering the room. Clean rooms may be used for specialised computer installations, computer equipment repairs, PABX units, manufacturing electronic components, laboratories and sterile rooms for food manufacturing.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

© Commonwealth of Australia, 2025 HumanAbility

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Assess area to be cleaned.	1.1	Area to be cleaned is assessed, ***work order*** is reviewed according to ***company requirements***, and issues are clarified with ***appropriate persons*****.**
		1.2	***Hazards*** are identified and risks controlled in work site according to ***legislative***, ***occupational health and safety*** (OHS) and company ***requirements***.
		1.3	Types of ***clean room surfaces*** to be cleaned are identified by observation, and potential for ***damage to clean room equipment*** is assessed according to ***manufacturer specifications***, work order and company requirements.
		1.4	***Soil types*** are identified on surfaces by observation according to work order and company requirements.
		1.5	Size and usage pattern of work site are determined to ensure safety of ***personnel*** and efficient use of ***equipment*** and ***chemicals***.
		1.6	Pre-existing damage is identified and reported to appropriate persons according to company requirements.
2	Select equipment and chemicals.	2.1	***Personal protective equipment*** (PPE) is selected and used according to manufacturer specifications, and OHS and company requirements.
		2.2	Equipment and chemicals are selected for work order according to OHS and company requirements.

© Commonwealth of Australia, 2025 HumanAbility

		2.3	Operational effectiveness of equipment is checked according to manufacturer specifications and company requirements.
		2.4	Equipment is adjusted to suit operator's requirements according to manufacturer specifications and OHS requirements.
		2.5	Chemicals are prepared according to manufacturer specifications, and OHS and company requirements.
3	Prepare work site.	3.1	Hazards in work site are confirmed and risks are controlled and reassessed according to legislative, OHS and company requirements.
		3.2	***Signage and barriers*** are installed as required according to work order, and OHS and company requirements.
		3.3	Furniture and fittings that impede the cleaning operation are removed according to work order and company requirements.
		3.4	Cleaning procedures are planned and move from highest to lowest point in work site according to work order, and OHS and company requirements.
		3.5	Client-approved power outlets for electrical cleaning equipment are located prior to use according to work order and company requirements.
		3.6	***Work restrictions*** affecting completion of work order are identified and appropriate persons are notified.
4	Clean work site.	4.1	Soil is removed and surfaces are cleaned using equipment, PPE, chemicals and ***cleaning techniques*** according to work order, manufacturer specifications and OHS and company requirements.
		4.2	Work is performed according to work order, manufacturer specifications and legislative, OHS and company requirements.
5	Tidy work site.	5.1	Signage and barriers are removed according to work

© Commonwealth of Australia, 2025 HumanAbility

			order, and OHS and company requirements.
		5.2	Collected soil and ***waste*** are disposed of according to client specifications, work order, manufacturer specifications and legislative, OHS, company and ***environmental requirements***.
6	Clean and safety check equipment, and store equipment and chemicals.	6.1	Equipment and PPE are cleaned according to manufacturer specifications and environmental, OHS and company requirements.
		6.2	Equipment and PPE are safety checked according to manufacturer specifications and OHS requirements and required maintenance is recorded according to company requirements.
		6.3	Equipment and PPE are stored and maintained to allow ready access according to manufacturer specifications, and OHS and company requirements.
		6.4	Chemicals are stored according to manufacturer specifications, and OHS and company requirements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- correct working skills to:
  - clean glass
  - maintain ceiling surfaces and fittings
  - maintain hard floor surfaces
  - maintain soft floor surfaces
  - use spot cleaning
- customer service skills to:
  - establish rapport with clients
  - gain clients' trust
  - identify client expectations
- interpersonal skills to relate to people from a range of backgrounds
- language, literacy and numeracy skills to:

© Commonwealth of Australia, 2025 HumanAbility

    - communicate clearly and concisely verbally and in writing
    - perform mathematical calculations required for diluting and mixing chemicals as specified on product labels
    - read and interpret directions and safety instructions, including:
        - chemical labels
        - equipment manuals
        - material safety data sheets (MSDS)
    - request advice or further information
    - seek and receive feedback
    - source, organise and record information
- organisational skills to plan and organise work
- problem-solving skills to manage contingencies
- skills to work safely when:
    - handling and disposing of chemicals
    - handling and disposing of contaminated and toxic waste
    - identifying hazards and controlling risks
    - manual handling
    - using equipment for cleaning
- self-management skills to work alone and in a team

Required knowledge

- cleaning chemicals and equipment suitable for using with sensitive equipment
- cleaning methods for ‘clean room’ environments, including:
    - low-water cleaning
    - use of microfibre techniques
    - vacuuming hard to access spaces
- company management structure and procedures, including:
    - biological and viral control
    - emergency response and evacuation procedures
    - environmental protection procedures
    - injury, dangerous occurrence and incident reporting
    - OHS procedures
    - quality systems
- impact of dust, moisture, electrical current and magnetic fields on sensitive electronic equipment
- legislation, regulations, codes of practice and industry advisory standards that apply to maintaining a ‘clean room’ environment, including OHS legislation
- routes of entry and potential symptoms of exposure to chemicals
- safe work practices for using:
    - chemicals
    - equipment, including PPE

© Commonwealth of Australia, 2025 HumanAbility

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed by observing practical demonstrations of maintaining a 'clean room' environment involving at least two different work site environments. It is also recognised that gaining access to a clean room for both the candidate and assessor can be, given the nature of clean rooms, problematic. A properly constructed simulation of the cleaning process is therefore an appropriate assessment strategy.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the required skills and knowledge specified in this unit. In particular the person should demonstrate the ability to: • identify types of surfaces and fittings • use safe and efficient cleaning methods • select cleaning equipment and chemicals • comply with company and legislative requirements • achieve outcomes in relation to customer work order and company requirements.
Context of and specific resources for assessment	Assessment of essential underpinning knowledge may be conducted in an off-site context. It is to comply with relevant regulatory or Australian standards' requirements. Resource implications for assessment include access to: • suitable work site venue • suitable equipment and chemicals • PPE • equipment operating manuals and MSDS • work order instructions, work plans and schedules, and policy documents • assessment instruments, including personal planner and assessment record book.
Method of assessment	Assessment methods must: • satisfy the endorsed Assessment Guidelines of the Property Services Training Package • include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently

© Commonwealth of Australia, 2025 HumanAbility

	identify and correctly interpret the essential underpinning knowledge required for practical application • reinforce the integration of employability skills with workplace tasks and job roles • confirm that competency is verified and able to be transferred to other circumstances and environments.
Guidance information for assessment	Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support. Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed. This unit could be assessed on its own or in combination with other units relevant to the job function.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Work order information may include:	• access to work site, including:
	  • access and egress points
	  • timing of access
	• budget allocations
	• completion times and dates
	• human resource requirements to complete the work tasks
	• job requirements and tasks
	• legislative and local government requirements
	• OHS requirements and emergency response procedures
	• requirements for working in isolated and remote locations
	• resource requirements, such as equipment and materials
	• specific client requirements, such as:
	  • dress and presentation requirements
	  • relationships with other activities
	• use of signage and barriers
	• work schedules

© Commonwealth of Australia, 2025 HumanAbility

	• work site contact persons
	• work site requirements for specific industries, such as:
	  • hospitals
	  • electronic manufacturing
	  • laboratories.

Company requirements may include:	• business and performance plans
	• client communication procedures
	• client confidentiality procedures
	• client service standards
	• communication channels and reporting procedures
	• company goals, objectives, plans, systems and processes
	• company issued identification badges, cards or passes
	• company policies and procedures, including:
	  • access and equity policy, principles and practice
	  • OHS policies and procedures, including control procedures
	  • maintenance procedures for equipment and PPE
	  • those relating to own role, responsibility and delegation
	  • work site access security clearance procedures
	• company service standards
	• dress and presentation requirements
	• duty of care, code of conduct, and code of ethics
	• emergency response and evacuation procedures
	• employer and employee rights and responsibilities
	• environmental protection procedures
	• personnel practices and guidelines
	• quality and continuous improvement processes and standards
	• records and information systems and processes
	• training materials (induction, refresher and new skills)
	• use of contractors.

Appropriate persons may include:	• clients • colleagues • managers • persons in control of work sites • supervisors.
Hazards may include:	• allergic reactions to chemicals or equipment, including latex allergies • biological and animal waste • bites and stings • blood and blood-stained products • confined or restricted spaces • contaminated clothing, materials or equipment

© Commonwealth of Australia, 2025 HumanAbility

	• damaged or inappropriate equipment
	• dust and fibres
	• electrical hazards arising from:
	  • cables
	  • electrical fittings:
	  • switches
	  • lights
	  • untested electrical equipment
	• fatigue
	• fire
	• gas
	• heights
	• inadequate lighting and ventilation
	• infectious and zoonotic diseases, such as:
	  • Q fever
	  • scabies
	• mobile equipment and vehicle hazards around plant and vehicles
	• moving or unguarded parts
	• noise
	• occupational violence and bullying
	• poor personal hygiene practices
	• spill, splash and spray
	• release of substances with negative environmental impact
	• synergistic chemical reactions, such as:
	  • hazardous incompatibility
	  • reactivity
	• syringes or other sharps
	• temperature extremes
	• ultraviolet light
	• unsafe manual-handling techniques, including awkward and repetitive postures
	• unsafe underfoot conditions, such as slippery, uneven and rough surfaces
	• work in unfamiliar isolated or remote environments.

Legislative requirements may include:	• Australian standards, quality assurance and certification requirements
	• award and enterprise agreements
	• industry advisory standards and codes, such as:
	  • building codes
	  • dangerous goods codes
	• relevant commonwealth, state and territory legislation and local

© Commonwealth of Australia, 2025 HumanAbility

	government regulations affecting company operation, including: • anti-discrimination and diversity policies • chemical controls • chemical registers and manifests • consumer protection • energy conservation • environmental protection • equal employment opportunity • freedom of information • industrial equipment certificates of competency or licences • industrial relations • OHS Acts and regulations • privacy • public health • trade practices • water conservation • workplace consultative arrangements.

Occupational health and safety (also known as workplace health and safety) ***requirements*** may relate to:	• allergic reactions, such as contact dermatitis
	• communication devices for remote and isolated locations, such as:
	  • mobile phone
	  • two-way radio
	• dermatoxicological control and prevention measures
	• emergency procedures for eye and skin contact, and inhalation and ingestion of toxic substances
	• hazard identification and risk assessment mechanisms
	• health surveillance and monitoring, such as regular blood testing
	• hierarchy of hazard control procedures
	• maintaining clear access
	• national and industry standards and codes of practice
	• OHS control procedures, such as:
	  • health and safety plans
	  • job plans
	  • job safety analyses
	  • risk assessments
	  • safe operating practices and procedures
	  • safe system of work statements
	  • safe work instructions
	  • work method statements
	• reporting injury and dangerous occurrences

© Commonwealth of Australia, 2025 HumanAbility

	• routes of entry and potential symptoms of exposure to chemicals
	• safe work practices for equipment, PPE and chemical storage, including interpretation of:
	  • MSDS
	  • hazardous substance information, such as long latency periods
	• safety training, induction and refresher training
	• selection and use of PPE and clothing appropriate to the hazard
	• ultraviolet light
	• up-to-date electrical test and tag compliance
	• use of chemicals according to MSDS
	• use of residual current devices
	• use, storage and maintenance of equipment according to manufacturer specifications and equipment operating manuals.

Clean room is a specialised facility that may accommodate:	• electronic manufacturing environment • laboratories • PABX equipment • specialised computer installation • sterile food manufacturing environments.

Surfaces may include:	• benchtops and work stations
	• equipment casings
	• cabling
	• ceilings
	• fittings, such as:
	  • cameras
	  • lights
	  • monitors
	  • skylights
	  • smoke detectors
	  • sprinkler systems
	• furniture
	• glass
	• hard floor surfaces
	• soft floor surfaces, such as special dust-catching carpets
	• surfaces encompassing new technologies
	• vents and grilles.

Damage to clean room equipment may include:	• damage caused by liquids entering or moisture accumulating in:
	  • electrical and other cabling
	  • equipment casings
	• electrostatic or electromagnetic contamination
	• falling or airborne dust

© Commonwealth of Australia, 2025 HumanAbility

	• loosening of cables or wiring.

Manufacturer specifications may include:	• equipment operating manuals
	• instructional guides
	• MSDS
	• other resources supplied by the manufacturer, such as:
	  • laminated cards
	  • notices
	  • wall posters
	• product labels
	• safety instructions pre-printed on equipment.

Soil types may include:	• dust • litter.
Personnel may include:	• client's staff members • colleagues • general public • venue, facility, shopping centre staff and management.

Equipment may include:	• access equipment, such as:
	  • A frame ladders
	  • extension poles
	• cleaning equipment, such as:
	  • brooms
	  • buckets
	  • buffing machines with brushes and pads
	  • damp mops
	  • dust mops
	  • dust pans
	  • garbage bins
	  • glass cleaning equipment
	  • lint-free and anti-static cleaning cloths
	  • microfibre products
	  • scourers
	  • vacuum cleaners fitted with micron filters and bags
	  • vacuum crevice tools
	  • wheeled cleaning trolleys.

Chemicals may include:	• acid cleaners • alkaline cleaners • low environmental-impact chemicals • neutral cleaners • solvent cleaners.

© Commonwealth of Australia, 2025 HumanAbility

Personal protective equipment may include:	• ear muffs and plugs • gloves, such as non-permeable • goggles • high-visibility vests and clothing • overalls and other protective clothing • respirators • safety glasses • safety shoes • splash-proof face masks • sun protection • tongs • ultraviolet protection • wet-work clothing.

Signage and barriers may include:	• physical barriers and restraints erected to restrict access to a site
	• signs complying with legislative requirements and Australian standards warning of danger or adverse conditions, including:
	  • cleaning in progress
	  • hazardous chemicals in use or present in work area.

Work restrictions may include:	• amount of cleaning anticipated • client activity • employee level of literacy and communication skills • faulty or inappropriate equipment • site accessibility • site hazards • skills of work unit or team • staffing resources • time limitations.
Cleaning techniques may include:	• buffing • damp mopping • dust mopping • spot cleaning • steam cleaning • surface wiping with lint-free or anti-static cloths • low-water cleaning methods, such as using microfibre cleaning products • vacuum cleaning • vacuuming with crevice tool on hard to access surfaces.
Waste may be either solid or liquid and include:	• chemicals past expiry date • obsolete equipment • packaging • used cleaning cloths

© Commonwealth of Australia, 2025 HumanAbility

	• used containers • used or contaminated PPE • used or unused chemicals.

Environmental requirements may include:	• clean-up, containment and isolation
	• company policies and guidelines
	• emergency chemical spill control measures
	• environmental protection agency and requirements of government departments, such as:
	  • agriculture
	  • emergency services
	• hazardous materials handling
	• local government regulations and by-laws
	• low-energy cleaning methods
	• low environmental-impact chemicals
	• low-moisture cleaning methods
	• low water-use equipment and water-efficient cleaning methods
	• non-chemical cleaning methods.

Elements and Performance Criteria

1	Assess furniture and fittings to be cleaned.	1.1	***Furniture and fittings*** are assessed, ***work order*** is reviewed according to ***company requirements***, and issues are clarified with ***appropriate persons*.**
		1.2	***Hazards*** are identified and risks controlled in work site according to ***legislative***, ***occupational health and safety*** (OHS) and company ***requirements***.
		1.3	Type and condition of furniture and fittings are identified by observation according to work order and company requirements.
		1.4	***Soil type*** is identified by observation according to work order and company requirements.
		1.5	***Cleaning techniques*** are selected according to work order and company requirements.
		1.6	Size and usage pattern of work site are determined to ensure safety of ***personnel*** and efficient use of ***equipment*** and ***chemicals***.
		1.7	Pre-existing damage is identified and reported to appropriate persons according to company requirements.
2	Select equipment and chemicals.	2.1	***Personal protective equipment*** (PPE) is selected and used according to ***manufacturer specifications***, and OHS and company requirements.
		2.2	Equipment and chemicals are selected for work order according to OHS and company requirements.
		2.3	Operational effectiveness of equipment is checked according to manufacturer specifications and company requirements.
		2.4	Equipment is adjusted to suit operator's requirements according to manufacturer specifications and OHS requirements.
		2.5	Chemicals are prepared according to manufacturer specifications, and OHS and company requirements.

© Commonwealth of Australia, 2025 HumanAbility

3	Prepare work site.	3.1	Hazards in work site are confirmed and risks are controlled and reassessed according to legislative, OHS and company requirements.
		3.2	***Signage and barriers*** are installed as required to maximise public safety during cleaning operation according to **work order, and OHS and company requirements**.
		3.3	Furniture and fittings that impede cleaning operation are moved according to work order, and OHS and company requirements.
		3.4	Floor, furniture and fittings are covered by drop sheets as necessary according to work order and company requirements.
		3.5	***Work restrictions*** affecting completion of work order are identified and appropriate persons are notified.
4	Clean furniture and fittings.	4.1	Soil is removed from ***surfaces***, and furniture and fittings are washed using equipment, PPE, chemicals and cleaning techniques.
		4.2	Work area is restored according to work order and company requirements.
		4.3	Work is performed according to work order, manufacturer specifications and legislative, OHS and company requirements.
5	Tidy work site.	5.1	Collected soil and ***waste*** are disposed of according to client specifications, work order, manufacturer specifications and legislative, OHS, company and ***environmental requirements***.
		5.2	Furniture and fittings are replaced according to client requests, work order and OHS requirements.
		5.3	Signage and barriers are removed according to work order, and OHS and company requirements.
6	Clean and safety check equipment,	6.1	Equipment and PPE are cleaned according to manufacturer specifications and environmental, OHS

© Commonwealth of Australia, 2025 HumanAbility

		and company requirements.
and store equipment and chemicals.	6.2	Equipment and PPE are safety checked according to manufacturer specifications and OHS requirements and required maintenance is recorded according to company requirements.
	6.3	Equipment and PPE are stored and maintained to allow ready access according to manufacturer specifications, and OHS and company requirements.
	6.4	Chemicals are stored according to manufacturer specifications, and OHS and company requirements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- analytical skills to:
  - identify soil and stains
  - identify surface types
- customer service skills to:
  - establish rapport with clients
  - gain clients' trust
  - identify client expectations
- interpersonal skills to relate to people from a range of backgrounds
- language, literacy and numeracy skills to:
  - communicate clearly and concisely verbally and in writing
  - perform mathematical calculations required for diluting and mixing chemicals as specified on product labels
  - read and interpret directions and safety instructions, including:
    - chemical labels
    - equipment manuals
    - material safety data sheets (MSDS)
  - request advice or further information
  - seek and receive feedback
  - source, organise and record information
- planning and organising skills to:
  - manage time

© Commonwealth of Australia, 2025 HumanAbility

  - sequence tasks
- problem-solving skills to manage contingencies
- skills to work safely when:
  - handling and disposing of chemicals
  - handling and disposing of contaminated and toxic waste
  - identifying hazards and controlling risks
  - manual handling
- self-management skills to work alone and in a team

Required knowledge

- cleaning chemicals and equipment and their application for surfaces of furniture and fittings
- cleaning methods for furniture and fittings, including:
  - pre-spotting and stain removal
  - low-water
- company management structure and procedures, including:
  - biological and viral control
  - emergency response and evacuation procedures
  - environmental protection procedures
  - injury, dangerous occurrence and incident reporting
  - OHS procedures
  - quality systems
- legislation, regulations, codes of practice and industry advisory standards that apply to washing furniture and fittings, including OHS legislation
- routes of entry and potential symptoms of exposure to chemicals
- safe work practices for using:
  - chemicals
  - equipment, including PPE

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed by observing practical demonstrations of washing furniture and fittings involving at least two different work site environments.
Critical aspects for assessment and evidence required to demonstrate	A person who demonstrates competency in this unit must be able to provide evidence of the required skills and knowledge specified in this unit.

© Commonwealth of Australia, 2025 HumanAbility

competency in this unit	In particular the person should demonstrate the ability to: • identify type and characteristics of furniture and fittings and their surfaces • use safe and efficient cleaning methods • select cleaning equipment and chemicals • comply with company and legislative requirements • achieve outcomes in relation to customer work order and company requirements.
Context of and specific resources for assessment	Assessment of essential underpinning knowledge may be conducted in an off-site context. It is to comply with relevant regulatory or Australian standards' requirements. Resource implications for assessment include access to: • suitable venue with a range of furniture and fittings • suitable equipment and chemicals • PPE • equipment operating manuals and MSDS • work order instructions, work plans and schedules, and policy documents • assessment instruments, including personal planner and assessment record book.
Method of assessment	Assessment methods must: • satisfy the endorsed Assessment Guidelines of the Property Services Training Package • include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application • reinforce the integration of employability skills with workplace tasks and job roles • confirm that competency is verified and able to be transferred to other circumstances and environments.
Guidance information for assessment	Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support. Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed. This unit could be assessed on its own or in combination with other units relevant to the job function, such as: • CPPCLO2015A Maintain furniture, fittings and room dressing.

© Commonwealth of Australia, 2025 HumanAbility

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Furniture and fittings may include:	• air conditioning vents • bars • beds • bedside cupboards • benches • blinds • ceiling fans • chairs • clocks • compactus • computers and associated equipment • curtains • desks • displays • door handles • doors • electrical items, including kettles and microwaves • filing cabinets • grilles • lamps • light fittings • light switches • ornaments • ovens • picture frames • railings • refrigerators • shelves • skirting • stoves • tables • telephone hand sets • vents

© Commonwealth of Australia, 2025 HumanAbility

	• walls • work stations • window sills.

Work order information may include:	• access to work site, including:
	  • access and egress points
	  • timing of access
	• budget allocations
	• completion times and dates
	• human resource requirements to complete the work tasks
	• job requirements and tasks
	• legislative and local government requirements
	• OHS requirements and emergency response procedures
	• requirements for working in isolated and remote locations
	• resource requirements, such as equipment and materials
	• specific client requirements, such as:
	  • dress and presentation requirements
	  • relationships with other activities
	• use of signage and barriers
	• work schedules
	• work site contact persons
	• work site requirements for specific industries, such as:
	  • hospitals and medical centres
	  • nursing homes
	  • retail food courts
	  • schools
	  • tourism and hospitality.

Company requirements may include:	• business and performance plans
	• client communication procedures
	• client confidentiality procedures
	• client service standards
	• communication channels and reporting procedures
	• company goals, objectives, plans, systems and processes
	• company issued identification badges, cards or passes
	• company policies and procedures, including:
	  • access and equity policy, principles and practice
	  • OHS policies and procedures, including control procedures
	  • maintenance procedures for equipment and PPE
	  • those relating to own role, responsibility and delegation
	  • work site access security clearance procedures
	• company service standards

© Commonwealth of Australia, 2025 HumanAbility

	• dress and presentation requirements • duty of care, code of conduct, and code of ethics • emergency response and evacuation procedures • employer and employee rights and responsibilities • environmental protection procedures • personnel practices and guidelines • quality and continuous improvement processes and standards • records and information systems and processes • training materials (induction, refresher and new skills) • use of contractors.
Appropriate persons may include:	• clients • colleagues • managers • persons in control of work sites • supervisors.

Hazards may include:	• allergic reactions to chemicals or equipment, including latex allergies
	• biological and animal waste
	• bites and stings
	• blood and blood-stained products
	• confined or restricted spaces
	• contaminated clothing, materials or equipment
	• damaged or inappropriate equipment
	• dust and fibres
	• electrical hazards arising from:
	  • cables
	  • electrical fittings:
	  • switches
	  • lights
	  • untested electrical equipment
	• fatigue
	• fire
	• gas
	• heights

CPPCLO3020A Clean using pressure washing

Modification History

Revised unit

Unit updated and equivalent to PRMCL20B Clean using pressure washing

Unit Descriptor

This unit of competency specifies the outcomes required to use pressure washing to clean surfaces. Pressure washing produces a variable stream of either water or cleaning chemical and is used as a replacement for hand scrubbing in large areas or where surfaces are very soiled.

Some surfaces, such as cracked, painted or other sealed surfaces, may be sensitive to pressure washing.

The unit requires the ability to assess the extent of the cleaning task through knowledge of the characteristics of the surface and the type of surface soiling. It is also necessary to apply understanding of client requirements and company policies and procedures in order to perform the task. Selecting the appropriate equipment, chemicals and cleaning methods is essential to performing the task safely and efficiently.

In this unit work is conducted from ground level. CPPCLO3036A Clean at high levels describes work conducted over two metres above ground level.

Application of the Unit

This unit of competency supports employees without managerial or supervisory responsibilities. The work may be performed in teams or individually. Performance would usually be carried out under routine supervision and within company guidelines.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

© Commonwealth of Australia, 2025 HumanAbility

Employability Skills Information

his unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Assess area for suitability for pressure washing.	1.1	Area to be pressure washed is assessed, ***work order*** is reviewed according to ***company requirements***, and issues are clarified with ***appropriate persons*****.**
		1.2	***Hazards*** and risks in work site are identified and controlled according to company, ***legislative*** and ***occupational health and safety*** (OHS) ***requirements***.
		1.3	Type and condition of ***surface*** are identified by observation according to work order and company requirements.
		1.4	***Soil type*** is identified by observation according to work order and company requirements.
		1.5	Work site access requirements are identified according to work order and company requirements.
		1.6	Size and usage pattern of work site are determined to ensure safety of ***personnel*** and efficient use of ***equipment*** and ***chemicals***.
		1.7	Effectiveness and suitability of a pressure wash is assessed according to work order and legislative, OHS, company and ***environmental requirements***.
		1.8	***Cleaning techniques*** are selected according to work order, ***manufacturer specifications*** and environmental, legislative, OHS and company requirements.
		1.9	Pre-existing damage is identified and reported to appropriate persons according to company requirements.

© Commonwealth of Australia, 2025 HumanAbility

2	Select equipment and chemicals.	2.1	***Personal protective equipment*** (PPE) is selected and used according to manufacturer specifications, and OHS and company requirements.
		2.2	Equipment and chemicals are selected for work order according to OHS and company requirements.
		2.3	Operational effectiveness of equipment is checked according to manufacturer specifications and company requirements.
		2.4	Equipment is adjusted to suit operator's requirements according to manufacturer specifications and OHS requirements.
		2.5	Chemicals are prepared according to manufacturer specifications, and OHS and company requirements.
3	Prepare work site.	3.1	Hazards in work site are confirmed and risks are controlled and reassessed according to legislative, OHS and company requirements.
		3.2	***Signage and barriers*** are installed as required to maximise public safety during the cleaning operation according to work order, and OHS and company requirements.
		3.3	Items requiring protection from pressure spray are covered and secured according to work order and company requirements.
		3.4	***Work restrictions*** affecting completion of work order are identified and appropriate persons are notified.
4	Clean work site.	4.1	Heavily soiled areas are prepared using cleaning techniques according to manufacturer specifications and company requirements.
		4.2	Pressure washing is conducted using equipment, PPE and chemicals and according to manufacturer specifications and company requirements.
		4.3	Work is performed according to work order, manufacturer specifications and legislative, OHS and

© Commonwealth of Australia, 2025 HumanAbility

			company requirements.
5	Tidy work site.	5.1	Collected soil and ***waste*** are disposed of according to client specifications, work order, manufacturer specifications and legislative, OHS, company and environmental requirements.
		5.2	Signage and barriers are removed according to work order, and OHS and company requirements.
6	Clean and safety check equipment, and store equipment and chemicals.	6.1	Equipment and PPE are cleaned according to manufacturer specifications and environmental, OHS and company requirements.
		6.2	Equipment and PPE are safety checked according to manufacturer specifications and OHS requirements and required maintenance is recorded according to company requirements.
		6.3	Equipment and PPE are stored and maintained to allow ready access according to manufacturer specifications, and OHS and company requirements.
		6.4	Chemicals are stored according to manufacturer specifications, and OHS and company requirements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- customer service skills to:
  - establish rapport with clients
  - gain clients' trust
  - identify client expectations
- interpersonal skills to relate to people from a range of backgrounds
- language, literacy and numeracy skills to:
  - communicate clearly and concisely verbally and in writing
  - perform mathematical calculations required for diluting and mixing chemicals as

© Commonwealth of Australia, 2025 HumanAbility

specified on product labels
    - read and interpret directions and safety instructions, including:
        - chemical labels
        - equipment manuals
        - material safety data sheets (MSDS)
    - request advice or further information
    - seek and receive feedback
    - source, organise and record information
- planning and organising skills to schedule and roster work
- problem-solving skills to manage contingencies
- skills to work safely when:
    - handling and disposing of chemicals
    - handling and disposing of waste
    - identifying hazards and controlling risks
    - manual handling
    - selecting equipment and chemicals
    - working at heights
- self-management skills to work alone and in a team
- teamwork skills to lead teams

Required knowledge

- company management structure and procedures, including:
    - biological and viral control
    - emergency response and evacuation procedures
    - environmental protection procedures
    - injury, dangerous occurrence and incident reporting
    - OHS procedures
    - quality systems
- legislation, regulations, codes of practice and industry advisory standards that apply to cleaning using pressure washing, including OHS legislation
- routes of entry and potential symptoms of exposure to chemicals
- safe work practices for using:
    - chemicals
    - equipment, including PPE
- pressure washing, including:
    - equipment and its functions
    - pressure washing methods, including:
        - cleaning methods for surfaces where there are restrictions or limitations on pressure washing
        - preparation requirements of areas for pressure washing
    - types of surfaces, their characteristics and suitability for pressure washing

© Commonwealth of Australia, 2025 HumanAbility

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed by observing practical demonstrations of cleaning using pressure washing involving at least two different surfaces and two different work site environments.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the required skills and knowledge specified in this unit. In particular the person should demonstrate the ability to: • identify hazards associated with pressure washing • identify surface and soil types • use safe and efficient pressure cleaning methods • select cleaning equipment and chemicals • comply with company and legislative requirements • achieve outcomes in relation to customer work order and company requirements.
Context of and specific resources for assessment	Assessment of essential underpinning knowledge may be conducted in an off-site context. It is to comply with relevant regulatory or Australian standards' requirements. Resource implications for assessment include access to: • suitable work site or venues with a variety of surface and soil types suitable for pressure washing • suitable equipment and chemicals • PPE • equipment operating manuals and MSDS • work order instructions, work plans and schedules, and policy documents • assessment instruments, including personal planner and assessment record book.
Method of assessment	Assessment methods must: • satisfy the endorsed Assessment Guidelines of the Property Services Training Package • include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning

© Commonwealth of Australia, 2025 HumanAbility

	knowledge required for practical application • reinforce the integration of employability skills with workplace tasks and job roles • confirm that competency is verified and able to be transferred to other circumstances and environments.
Guidance information for assessment	Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support. Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed. This unit could be assessed on its own or in combination with other units relevant to the job function, such as: • CPPCLO2037A Clean external surfaces • CPPCLO3021A Clean industrial machinery.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Work order information may include:	• access to work site, including:
	  • access and egress points
	  • timing of access
	• budget allocations
	• completion times and dates
	• human resource requirements to complete the work tasks
	• job requirements and tasks
	• legislative and local government requirements
	• OHS requirements and emergency response procedures
	• requirements for working in isolated and remote locations
	• resource requirements, such as equipment and materials
	• specific client requirements, such as:
	  • dress and presentation requirements
	  • relationships with other activities
	• use of signage and barriers
	• work schedules

© Commonwealth of Australia, 2025 HumanAbility

	• work site contact persons
	• work site requirements for specific industries, such as:
	  • hospitals and medical centres
	  • nursing homes
	  • retail food courts
	  • schools
	  • tourism and hospitality.

Company requirements may include:	• business and performance plans
	• client communication procedures
	• client confidentiality procedures
	• client service standards
	• communication channels and reporting procedures
	• company goals, objectives, plans, systems and processes
	• company issued identification badges, cards or passes
	• company policies and procedures, including:
	  • access and equity policy, principles and practice
	  • OHS policies and procedures, including control procedures
	  • maintenance procedures for equipment and PPE
	  • those relating to own role, responsibility and delegation
	  • work site access security clearance procedures
	• company service standards
	• dress and presentation requirements
	• duty of care, code of conduct, and code of ethics
	• emergency response and evacuation procedures
	• employer and employee rights and responsibilities
	• environmental protection procedures
	• personnel practices and guidelines
	• quality and continuous improvement processes and standards
	• records and information systems and processes
	• training materials (induction, refresher and new skills)
	• using contractors.

Appropriate persons may include:	• clients • colleagues • managers • persons in control of work sites • supervisors.
Hazards may include:	• allergic reactions to chemicals or equipment, including latex allergies • biological and animal waste • bites and stings • blood and blood-stained products

© Commonwealth of Australia, 2025 HumanAbility

	• confined or restricted spaces
	• contaminated clothing, materials or equipment
	• damaged or inappropriate equipment
	• dust and fibres
	• electrical hazards arising from:
	  • cables
	  • electrical fittings:
	  • switches
	  • lights
	  • untested electrical equipment
	• fatigue
	• fire
	• gas
	• heights
	• inadequate lighting and ventilation
	• infectious and zoonotic diseases, such as:
	  • Q fever
	  • scabies
	• mobile equipment and vehicle hazards around plant and vehicles
	• moving or unguarded parts
	• noise
	• occupational violence and bullying
	• poor personal hygiene practices
	• spill, splash and spray
	• release of substances with negative environmental impact
	• synergistic chemical reactions, such as:
	  • hazardous incompatibility
	  • reactivity
	• syringes or other sharps
	• temperature extremes
	• ultraviolet light
	• unsafe manual-handling techniques, including awkward and repetitive postures
	• unsafe underfoot conditions, such as slippery, uneven and rough surfaces
	• work in unfamiliar isolated or remote environments.

Legislative requirements may include:	• Australian standards, quality assurance and certification requirements • award and enterprise agreements • industry advisory standards and codes, such as: • building codes

© Commonwealth of Australia, 2025 HumanAbility

	• dangerous goods codes • relevant commonwealth, state and territory legislation and local government regulations affecting company operation, including: • anti-discrimination and diversity policies • chemical controls • chemical registers and manifests • consumer protection • energy conservation • environmental protection • equal employment opportunity • freedom of information • industrial equipment certificates of competency or licences • industrial relations • OHS Acts and regulations • privacy • public health • trade practices • water conservation • workplace consultative arrangements.
Occupational health and safety (also known as workplace health and safety) ***requirements*** may relate to:	• allergic reactions, such as contact dermatitis • communication devices for remote and isolated locations, such as: • mobile phone • two-way radio • dermatoxicological control and prevention measures • emergency procedures for eye and skin contact, and inhalation and ingestion of toxic substances • hazard identification and risk assessment mechanisms • health surveillance and monitoring, such as regular blood testing • hierarchy of hazard control procedures • maintaining clear access • national and industry standards and codes of practice • OHS control procedures, such as: • health and safety plans • job plans • job safety analyses • risk assessments • safe operating practices and procedures • safe system of work statements • safe work instructions

© Commonwealth of Australia, 2025 HumanAbility

	• work method statements
	• reporting injury and dangerous occurrences
	• routes of entry and potential symptoms of exposure to chemicals
	• safe work practices for equipment, PPE and chemical storage, including interpretation of:
	  • MSDS
	  • hazardous substance information, such as long latency periods
	• safety training, induction and refresher training
	• selection and use of PPE and clothing appropriate to the hazard
	• ultraviolet light
	• up-to-date electrical test and tag compliance
	• use of chemicals according to MSDS
	• use of residual current devices
	• use, storage and maintenance of equipment according to manufacturer specifications and equipment operating manuals.

Surface may be:	• brick • car parking areas • concrete • concrete driveways • entertainment seating • external walls, gutters and fascia boards • factory floors • fronts of buildings, such as awnings and facades • garages • industrial kitchens • machinery and equipment • painted surfaces • polyresin • surfaces encompassing new technologies • stairwells • steps • wood.

Soil types may include:	• algae and moss
	• graffiti made with ink, texta and paint
	• grease and oil
	• pollution marks and soil on structures, including:
	  • bridges
	  • buildings
	  • outdoor furniture
	  • statues.

© Commonwealth of Australia, 2025 HumanAbility

Personnel may include:	• client's staff members • colleagues • general public • venue, facility, shopping centre staff and management.
Equipment may include:	• brooms • cloths • hoses • lances • microfibre products • pressure washers (electric or diesel) • squeegees • wet area electrical safety connections.
Chemicals may include:	• acid cleaners • alkaline cleaners • low environmental-impact chemicals • neutral cleaners • solvent cleaners.

Environmental requirements may include:	• clean-up, containment and isolation
	• company policies and guidelines
	• emergency chemical spill control measures
	• environmental protection agency and requirements of government departments, such as:
	  • agriculture
	  • emergency services
	• hazardous materials handling
	• local government regulations and by-laws
	• low-energy cleaning methods
	• low environmental-impact chemicals
	• low-moisture cleaning methods
	• low water-use equipment and water-efficient cleaning methods
	• non-chemical cleaning methods.

Cleaning techniques may include:	• low-water cleaning methods • detailing • hand washing • pre-spraying • pressure water blasting • rinsing.
Manufacturer specifications may include:	• equipment operating manuals • instructional guides • MSDS • other resources supplied by the manufacturer, such as:

© Commonwealth of Australia, 2025 HumanAbility

	• laminated cards • notices • wall posters • product labels • safety instructions pre-printed on equipment.
Personal protective equipment may include:	• ear muffs and plugs • gloves, such as non-permeable • goggles • high-visibility vests and clothing • overalls and other protective clothing • respirators • safety glasses • safety shoes • splash-proof face masks • sun protection • tongs • ultraviolet protection • wet-work clothing.
Signage and barriers may include:	• physical barriers and restraints erected to restrict access to a site • signs complying with legislative requirements and Australian standards warning of danger or adverse conditions, including: • cleaning in progress • hazardous chemicals in use or present in work area.
Work restrictions may include:	• amount of cleaning anticipated • client activity • employee level of literacy and communication skills • faulty or inappropriate equipment • site accessibility • site hazards • skills of work unit or team • staffing resources • time limitations.
Waste may be either solid or liquid and include:	• chemicals past expiry date • obsolete equipment • packaging • removed soil • used cleaning cloths • used containers • used or unused chemicals • used or contaminated PPE • used or unused chemicals.

Not applicable.

© Commonwealth of Australia, 2025 HumanAbility

CPPCLO4022A Organise and monitor cleaning operations

Modification History

Revised unit

Unit updated and equivalent to PRMCL22B Organise and monitor cleaning operations

Unit Descriptor

This unit of competency specifies the outcomes required to organise and monitor work to maximise effectiveness of resource use in the cleaning industry.

The unit requires the ability to identify requirements of the work order based on extensive understanding of the range of cleaning methods available and the associated use of equipment and chemicals. It also requires understanding of the client's expectations and needs, and organising the resources needed for the cleaning operation. Organising resources and monitoring performance are essential to performing a cleaning operation efficiently.

Application of the Unit

This unit of competency supports employees who work with limited supervision or who work with, and provide support to, a small team.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills

© Commonwealth of Australia, 2025 HumanAbility

and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Identify work requirements.	1.1	***Work order*** is reviewed and site is assessed according to ***company requirements*** to determine work implications, and issues are clarified with ***appropriate persons*****.**
		1.2	Client needs, expectations and preferences are clarified using ***interpersonal skills and communication techniques*** according to company requirements.
		1.3	Special requirements arising from site characteristics or client requests are identified according to company and ***occupational health and safety*** (OHS) ***requirements***.
2	Analyse resource implications and provide resources.	2.1	Work order resource requirements and available resources are analysed according to company requirements.
		2.2	Work schedules are developed and available personnel with recognised competencies are assigned according to OHS and company requirements.
		2.3	Type and quantity of ***equipment***, ***personal protective equipment*** (PPE), ***chemicals*** and ***consumables*** required to fulfil work order are assessed according to company requirements.
		2.4	Suitable equipment, PPE, chemicals and consumables for the cleaning operation are supplied according to work order, ***manufacturer specifications***, and OHS and company requirements.
3	Communicate and monitor work requirements.	3.1	Work team members are advised of work schedules and responsibilities using ***communication methods*** according to company requirements.
		3.2	Work team members' understanding of their tasks and responsibilities is confirmed by using interpersonal skills and communication techniques according to company

© Commonwealth of Australia, 2025 HumanAbility

requirements.

3.3 Work performance is monitored according to company requirements to ensure compliance with customer needs, expectations and preferences and work order.

3.4 **Work restrictions** affecting completion of work order and changed customer needs, expectations and preferences are identified and work schedules are adjusted according to company requirements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- customer service skills to:
  - establish rapport with clients
  - gain clients' trust
  - identify client expectations
- interpersonal skills to relate to people from a range of backgrounds
- language, literacy and numeracy skills to:
  - communicate clearly and concisely verbally and in writing
  - perform mathematical calculations required for:
    - allocating work
    - estimating time to complete work
  - read and comprehend work orders
  - request advice or further information
  - seek and receive feedback
  - source, organise and record information
- planning and organising skills to:
  - manage time
  - monitor work orders and outcomes
  - prioritise work
  - schedule efficiently
- problem-solving skills to manage contingencies
- self-management skills to work alone and in a team
- teamwork skills to lead small teams

Required knowledge

© Commonwealth of Australia, 2025 HumanAbility

- company management structure and procedures, including:
  - biological and viral control
  - emergency response and evacuation procedures
  - environmental protection procedures
  - identifying hazards and controlling risks
  - injury, dangerous occurrence and incident reporting
  - OHS procedures
  - quality systems
- legislation, regulations, codes of practice and industry advisory standards that apply to cleaning operations and ensure compliance in the workplace and work order requirements
- mathematical methods for estimating resources
- product knowledge, including:
  - chemicals and their uses
  - cleaning equipment and its uses
  - surfaces and effective and compatible cleaning methods
- routes of entry and potential symptoms of exposure to chemicals
- safe work practices for using:
- chemicals
- equipment, including PPE
- work order specifications

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed by observing practical demonstrations of organising and monitoring cleaning operations involving at least two different work site environments.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the required skills and knowledge specified in this unit. In particular the person should demonstrate the ability to: • determine resource implications of particular cleaning methods being used in work order • assess resource requirements of work order • confirm that client expectations are realistic • comply with company and legislative requirements • develop and adhere to work schedules

© Commonwealth of Australia, 2025 HumanAbility

	• implement effective monitoring system • identify and supply equipment, PPE, chemicals and consumables • provide feedback and communicate with colleagues and customers • achieve outcomes in relation to customer work order and company requirements.
Context of and specific resources for assessment	Assessment of essential underpinning knowledge may be conducted in an off-site context. It is to comply with relevant regulatory or Australian standards' requirements. Resource implications for assessment include access to: • work order and client specifications • relevant information and work sites • suitable equipment and resources • PPE • equipment operating manuals and MSDS • relevant procedures • work order instructions, work plans and schedules, and policy documents • assessment instruments, including personal planner and assessment record book.
Method of assessment	Assessment methods must: • satisfy the endorsed Assessment Guidelines of the Property Services Training Package • include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application • reinforce the integration of employability skills with workplace tasks and job roles • confirm that competency is verified and able to be transferred to other circumstances and environments.
Guidance information for assessment	Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support. Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed. This unit could be assessed on its own or in combination with other units relevant to the job function, such as: • CPPCLO4024A Control the supply of resources to the work site.

	• legislative and local government requirements
	• OHS requirements and emergency response procedures
	• requirements for working in isolated and remote locations
	• resource requirements, such as equipment and materials
	• specific client requirements, such as:
	  • dress and presentation requirements
	  • relationships with other activities
	• use of signage and barriers
	• work schedules
	• work site contact persons
	• work site requirements for specific industries, such as:
	  • hospitals and medical centres
	  • nursing homes
	  • retail food courts
	  • schools
	  • tourism and hospitality.

Company requirements may include:	• business and performance plans • client communication procedures • client confidentiality procedures • client service standards • communication channels and reporting procedures • company goals, objectives, plans, systems and processes • company issued identification badges, cards or passes • company policies and procedures, including:

© Commonwealth of Australia, 2025 HumanAbility

	• access and equity policy, principles and practice • OHS policies and procedures, including control procedures • maintenance procedures for equipment and PPE • those relating to own role, responsibility and delegation • work site access security clearance procedures • company service standards • dress and presentation requirements • duty of care, code of conduct, and code of ethics • emergency response and evacuation procedures • employer and employee rights and responsibilities • environmental protection procedures • personnel practices and guidelines • quality and continuous improvement processes and standards • records and information systems and processes • training materials (induction, refresher and new skills) • using contractors.
Appropriate persons may include:	• clients • colleagues • managers • persons in control of work sites • supervisors.

Interpersonal skills and communication techniques may include:	• active listening
	• constructive feedback
	• control of voice and body language
	• flexibility and willingness to negotiate
	• non-verbal communication, such as:
	  • body language
	  • personal presentation
	• presenting options and consequences
	• providing opportunity for client to confirm their request
	• questioning techniques to clarify and confirm client's needs and understanding
	• summarising and paraphrasing to check understanding of client's message
	• use of effective presentation aids, such as:
	  • audiovisual slides
	  • diagrams
	  • photos
	  • pictures
	• using language sensitively, showing awareness of cultural and social differences.

© Commonwealth of Australia, 2025 HumanAbility

Occupational health and safety (also known as workplace health and safety) ***requirements*** may relate to:	• allergic reactions, such as contact dermatitis
	• communication devices for remote and isolated locations, such as:
	  • mobile phone
	  • two-way radio
	• dermatoxicological control and prevention measures
	• emergency procedures for eye and skin contact, and inhalation and ingestion of toxic substances
	• hazard identification and risk assessment mechanisms
	• health surveillance and monitoring, such as regular blood testing
	• hierarchy of hazard control procedures
	• maintaining clear access
	• national and industry standards and codes of practice
	• OHS control procedures, such as:
	  • health and safety plans
	  • job plans
	  • job safety analyses
	  • risk assessments
	  • safe operating practices and procedures
	  • safe system of work statements
	  • safe work instructions
	  • work method statements
	• reporting injury and dangerous occurrences
	• routes of entry and potential symptoms of exposure to chemicals
	• safe work practices for equipment, PPE and chemical storage, including interpretation of:
	  • material safety data sheets (MSDS)
	  • hazardous substance information, such as long latency periods
	• safety training, induction and refresher training
	• selection and use of PPE and clothing appropriate to the hazard
	• ultraviolet light
	• up-to-date electrical test and tag compliance
	• use of chemicals according to MSDS
	• use of residual current devices
	• use, storage and maintenance of equipment according to manufacturer specifications and equipment operating manuals.

Equipment may include:	• access equipment, such as ladders • bins • brooms • buckets

© Commonwealth of Australia, 2025 HumanAbility

	• buffers • cleaning trolleys • cloths • cobwebbers • doodle bag holders • drop sheets • drying equipment • dust pans and brushes • dusters • extension poles • extraction units, wands and hand tools • hoses • microfibre products • mops • polishers • pressure-washing equipment and attachments • scouring pads • scrapers • scrubbers • site communication devices • sponges • spray bottles • squeegees • steam cleaners • sweepers • vacuum cleaners and attachments • window cleaning equipment.
Personal protective equipment may include:	• ear muffs and plugs • gloves, such as non-permeable • goggles • high-visibility vests and clothing • overalls and other protective clothing • respirators • safety glasses • safety shoes • splash-proof face masks • sun protection • tongs • ultraviolet protection • wet-work clothing.
Chemicals may include:	• acid cleaners • alkaline cleaners

CPPCMN3001B Participate in environmentally sustainable work practices

Modification History

Not Applicable

Unit Descriptor

Unit descriptor

This unit of competency specifies the outcomes required to participate in environmentally sustainable work practices. The unit requires the ability to identify current resource usage in the workplace and contribute to ensuring compliance with legislative requirements. It also requires the capacity to contribute to improvements in sustainable work practices. It is essential that the organisation's approach to ensuring environmentally sustainable work practices, and the benefits that they bring, are understood.

The unit must be applied strictly according to relevant state or territory legislative and industry requirements.

Application of the Unit

Application of the unit

This unit of competency supports individuals working as team members, who operate within the scope of their defined roles and responsibilities.

Licensing/Regulatory Information

Not Applicable

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Identify current resource use**.	1.1 Workplace's ***environment and resource efficiency issues*** are identified. 1.2 Resources used in own work role are identified. 1.3 Current use of resources is measured and documented using ***appropriate techniques***. 1.4 Workplace environmental hazards are identified and reported to appropriate personnel.
2. **Comply with environmental regulations**.	2.1 Procedures are followed to ensure ***compliance***. 2.2 Breaches or potential breaches are reported to appropriate personnel.
3. **Contribute to improvement of resource efficiency**.	3.1 Organisational ***plans*** to improve environmental practices and resource efficiency are followed. 3.2 ***Suggestions*** are made for improvements to workplace practices in own work area.
4. **Understand resource efficiency issues and practices**.	4.1 Organisation's policies and procedures regarding environment and resource efficiency issues are understood and communicated succinctly. 4.2 Opportunities for improved and sustainable use of resources are identified and communicated as appropriate to customer or workplace supervisor. 4.3 ***Benefits*** provided by organisation's approach to sustainable resource use and impact on work being performed are identified and communicated clearly and

ELEMENT	PERFORMANCE CRITERIA
	succinctly.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- interpersonal skills to relate to people from diverse backgrounds
- language, literacy and numeracy skills for:
  - clarifying work requirements
  - communicating information about benefits and types of sustainability practices clearly and concisely verbally and in writing
  - documenting and reporting resource use
  - following instructions and procedures
  - interpreting workplace information
  - measuring resource use

Required knowledge

- basic understanding of sustainability
- environmental and resource hazards and risks, and inefficiencies associated with own workplace
- legislation and regulations that apply to environmentally sustainable practices in own workplace
- relevant environmental and resource efficiency systems and procedures for own work area
- reporting procedures

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

© Commonwealth of Australia, 2025 HumanAbility

Overview of assessment

This unit of competency could be assessed by observing at least two instances of following workplace procedures according to instructions and participating in improvement of environmental and resource efficient work practices at own level of responsibility.

Evidence must be strictly relevant to the particular workplace role.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the required skills and knowledge specified in this unit.

In particular the person should demonstrate the ability to:

- apply improved resource efficiency approaches to own work area and demonstrate outcomes
- communicate with customers and other stakeholders
- list environmental hazards and risks, and inefficiencies and opportunities for improvements identified in the workplace
- measure and report current resource use
- contribute advice and suggestions for improvements.

Context of and specific resources for assessment

Assessment of essential underpinning knowledge may be conducted in an off-site context. It is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include access to:

- workplace documentation and personnel
- relevant legislation, standards and guidelines
- reports from other parties involved in the process of identifying and implementing improvements.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Property Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments

This unit could be assessed on its own or in combination with other units relevant to the job function.

Guidance information for assessment

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access

© Commonwealth of Australia, 2025 HumanAbility

to modified equipment and other physical resources, and the provision of appropriate assessment support.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Environmental and resource efficiency issues may include:	• application of industry codes and standards, including ecoCLEAN
	• measurements made under different conditions
	• minimisation of environmental risks and maximisation of opportunities to improve business environmental performance and to promote more efficient production and consumption of natural resources, for example by:
	  • efficient energy use
	  • efficient water use
	  • minimising use of chemicals
	  • minimising waste, through implementation of waste management hierarchy
	  • seeking alternative sources of energy.

Appropriate techniques may include:	• examination of invoices from suppliers • examination of relevant information and data • measurements made under different conditions.
Compliance includes:	• meeting relevant federal, state and local government laws, by-laws and regulations, including application of energy rating/conservation systems, such as the Green Star environmental rating system.
Organisational plans may include work plans to:	• increase efficiency of water use • minimise waste.
Suggestions may include	• improve energy efficiency

© Commonwealth of Australia, 2025 HumanAbility

ideas that help to:	• increase use of renewable, recyclable, re-usable and recoverable resources • prevent and minimise risks and maximise opportunities, such as use of solar or other alternative forms of energy where appropriate • reduce emissions of greenhouse gases • reduce use of non-renewable resources.

Benefits of efficient and sustainable use of resources to the customer will depend on the nature of the work being performed and will vary across industry sectors, but may include:	• compliance with legislative and industry standards
	• improved environmental outcomes for the customers, or residents of the premises
	• reduced price due to:
	  • lower cost for disposal of less toxic chemicals and other materials
	  • lower input costs for consumables
	• sense of wellbeing by contributing to improved environmental outcomes.

CPPCMN4002B Implement and monitor environmentally sustainable work practices

Modification History

Revised unit

Unit updated and equivalent to CPPCMN4002A Implement and monitor environmentally sustainable work practices

Unit Descriptor

This unit of competency specifies the outcomes required to analyse the workplace effectively in relation to environmentally sustainable work practices, and to then implement improvements and monitor their effectiveness.

Application of the Unit

This unit of competency supports individuals responsible for a specific area of work or who lead a work group or team in a range of property services sectors and organisations. They operate within the scope of their defined roles and responsibilities.

The unit must be applied strictly according to relevant state or territory legislative and industry requirements.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement..

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills

© Commonwealth of Australia, 2025 HumanAbility

and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Investigate current practices in relation to resource use.	1.1	Environmental regulations applying to organisation, work conducted on clients' sites, and to the community at large, are identified.
		1.2	Procedures for assessing ***compliance*** with environmental regulations are evaluated.
		1.3	Information on environmental and resource efficiency systems and procedures is collected and provided to work group according to organisational policies and procedures.
		1.4	Current resource use is measured and documented according to organisational policies and procedures.
		1.5	Current ***purchasing strategies*** are analysed and documented.
		1.6	Current work processes are analysed to access information and data and assist in identifying areas for improvement.
2	Set targets for improvements.	2.1	Input is sought from ***stakeholders, key personnel and specialists***.
		2.2	External sources of information and data are accessed as required.
		2.3	Alternative solutions to workplace environmental issues are evaluated.
		2.4	Efficiency targets are set.
3	Implement performance improvement strategies.	3.1	***Techniques and tools*** are sourced to assist in achieving targets.
		3.2	Continuous improvement strategies are applied to own area of responsibility, and ideas and possible solutions

© Commonwealth of Australia, 2025 HumanAbility

			are communicated to work group and management.
		3.3	***Environmental and resource efficiency improvement plans*** for own work group are integrated into other operational activities and implemented.
		3.4	***Suggestions*** and ideas about environment and resource efficiency management are sought from stakeholders and acted upon according to organisational policies and procedures.
		3.5	Costing strategies are implemented to fully value environmental assets.
4	Monitor performance	4.1	Outcomes are documented and reports on targets are communicated to key personnel and stakeholders.
		4.2	Strategies and benchmark indicators are evaluated.
		4.3	New targets are set and new tools and strategies investigated and applied.
		4.4	Compliance with relevant legislative standards or codes is monitored and reported in accordance with formal requirements.
		4.5	Successful strategies are promoted and, where possible, participants rewarded.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- change management skills to implement improved environmental and resource efficiency plans
- interpersonal skills to relate to people from diverse backgrounds
- language, literacy and numeracy skills for:
  - communicating clearly and concisely verbally and in writing
  - comparing benchmarks
  - consulting with work group
  - reading and interpreting documentation, including:
    - environment and energy efficiency requirements

© Commonwealth of Australia, 2025 HumanAbility

    - resource use
  - requesting information
  - seeking and receiving feedback
  - sourcing, organising and recording information
  - using costing strategies
- problem-solving skills to analyse problems, devise solutions and reflect on approaches
- self-management skills to recognise and implement environment and energy efficiency management policies and procedures
- technology skills, including the ability to operate and shut down equipment

Required knowledge

- environment and energy efficiency systems and procedures, including:
  - environment management systems
  - supply chains
- environment and resource efficiency issues specific to industry practices
- industry benchmarks, including:
  - best practice approaches
  - quality assurance systems
- legislation, regulations, codes of practice and industry advisory standards that apply to environmental sustainability
- strategies for:
  - continuous improvement
  - effecting outcomes
  - maximising opportunities
  - minimising impacts

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed by observing at least two instances of implementation and monitoring of integrated environment and resource efficiency management policies and procedures in an organisation.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the required skills and knowledge specified in this unit.

© Commonwealth of Australia, 2025 HumanAbility

	In particular the person should demonstrate the ability to: • analyse external benchmarks • apply improved approaches to resource use in own work area • effect outcomes from environmental and resource efficiency improvement plans • explain reasons for the choice of particular benchmarks.
Context of and specific resources for assessment	Assessment of essential underpinning knowledge may be conducted in an off-site context. It is to comply with relevant regulatory or Australian standards' requirements. Resource implications for assessment include access to: • relevant legislation, standards and guidelines • workplace documentation and personnel • reports from other parties involved in the process of identifying and implementing improvements.
Method of assessment	Assessment methods must: • satisfy the endorsed Assessment Guidelines of the Property Services Training Package • include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application • reinforce the integration of employability skills with workplace tasks and job roles • confirm that competency is verified and able to be transferred to other circumstances and environments This unit could be assessed on its own or in combination with other units relevant to the job function.
Guidance information for assessment	Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support. Assessment processes and techniques should as far

© Commonwealth of Australia, 2025 HumanAbility

	as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Compliance includes:	• meeting relevant federal, state or territory, and local government laws, by-laws, regulations and codes of practice.
Purchasing strategies may include:	• influencing suppliers to take up environmental sustainability.

Stakeholders, key personnel and specialists may include:	• individuals and groups both inside and outside the organisation who have direct interest in organisation's conduct, actions, products and services, including:
	  • customers
	  • employees at all levels of organisation
	  • key personnel in organisation, and specialists outside it, who may have particular technical expertise
	  • suppliers.

Techniques and tools may include:	• applying industry policies, standards and protocols, including the ecoCLEAN system • examining relevant information and data, such as invoices from suppliers • measurements made under varying conditions • others appropriate to the specific industry context.
Environmental and resource efficiency improvement plans may include:	• addressing environmental and resource sustainability initiatives, action plans, surveys and audits • applying waste management hierarchy in the workplace • determining organisation's most appropriate waste treatment, including waste to landfill, recycling, re-use and wastewater treatment • initiating and maintaining appropriate organisational procedures for operational energy consumption, including stationary and non-stationary (transport) energy • reference to standards, guidelines and approaches, such as: • ecological footprinting

© Commonwealth of Australia, 2025 HumanAbility

	• global reporting initiative • Green Star environmental rating system • ISO 14001 Environment Management Systems • life cycle analyses • product stewardship • triple bottom line reporting.
Suggestions may include ideas that help to:	• eliminate use of hazardous and toxic materials • express purchasing power through selection of suppliers with improved environmental performance, such as purchase of renewable energy • identify strategies to offset or mitigate environmental impacts, such as purchasing carbon credits • make more efficient use of energy • maximise opportunities to re-use and recycle materials • prevent and minimise risks and maximise opportunities, such as use of solar or other alternative forms of energy where appropriate • reduce emissions of greenhouse gases • reduce use of non-renewable resources.

Unit Sector(s)

This unit of competency supports individuals responsible for a specific area of work or who lead a work group or team in a range of property services sectors and organisations. They operate within the scope of their defined roles and responsibilities.

CUFWRT301A Write content for a range of media

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to write content for a range of media. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	The person applying the skills and knowledge outlined in this unit could be expected to write both original and re-purposed non-narrative content for a range of media. The content could include such things as information for websites; community, news and promotional announcements for radio stations; organisation newsletters and audio or visual presentations. In larger organisations or in the development of e-learning resources, the person would usually be re-purposing material written by other writers or content experts. This work is usually undertaken with some supervision and guidance. The writing of narrative content is covered in: • CUFWRT302A Write simple stories.

© Commonwealth of Australia, 2025 HumanAbility

	More complex skills associated with writing can be found in: • CUFWRT401A Edit texts • CUFWRT403A Write narration and current affairs material.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication, teamwork and literacy skills sufficient to:
  - interpret and clarify written or verbal instructions
  - write content in a style appropriate to target users and audience
  - communicate information to specific audiences
  - structure text-based content effectively for target audiences and delivery format
  - work collaboratively in a team environment - both independently on assignment and under direction
  - respond positively to constructive feedback
- conceptual skills sufficient to generate a range of text-based content ideas in response to a brief
- technical skills sufficient to:
  - proficiently use word processing tools
  - check and proofread written content using manual and automated systems
- self-management and planning skills sufficient to:
  - prioritise work tasks
  - source information and reference material in a timely fashion
  - meet deadlines
  - seek expert assistance when problems arise

Required knowledge

- industry knowledge, including:
  - roles and responsibilities of project team members
  - issues and challenges that arise when writing content
- understanding the way readers scan and read written material
- writing and communication principles for the relevant medium
- writing and presentation techniques for the relevant medium
- sound knowledge of grammar and punctuation
- media laws sufficient to identify defamation and obscenity and seek expert advice on issues that could lead to legal action
- copyright clearance procedures
- OHS as it relates to working for periods of time on computers

© Commonwealth of Australia, 2025 HumanAbility

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • application of the principles of writing and communication to content written for a range of purposes • content written in a way that engages the target audience • sound knowledge of grammar and punctuation • collaborative approach to work • ability to work under pressure and meet deadlines.

Context of and specific resources for assessment	Assessment must ensure:
	• practical demonstration of skills by writing a range of content within timeframes typical in an industry context
	• access to:
	  • word processing software
	  • variety of information sources
	• access to appropriate learning and assessment support when required
	• use of culturally appropriate processes and techniques appropriate to the language and literacy capacity of learners and the work being performed.

Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance • evaluation of content written by the candidate in response to a range of briefs • written or oral questioning to test knowledge as listed in the required skills and knowledge section of this unit.
Guidance information for	Holistic assessment with other units relevant to the

© Commonwealth of Australia, 2025 HumanAbility

EVIDENCE GUIDE	
assessment	industry sector, workplace and job role is recommended, for example: • CUFPPM301A Plan and prepare programs • CUFRES201A Collect and organise content for broadcast or publication • CUFWRT302A Write simple stories.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Production requirements may include:	• availability of staff • budget • confidentiality • contractual • copyright • deadlines • duration of items for on-air presentation • editing process • intellectual property • location • number of content items • schedule • specified number of words • station procedures.
Content may include:	• community service announcements • copy for interactive media products • copy for newsletters or other print media • intros, outros and back announcements • items for wikis • news and current affairs items for community broadcasting • on-air presentation material

© Commonwealth of Australia, 2025 HumanAbility

RANGE STATEMENT	

	• sponsorship announcements
	• surveys:
	  • online
	  • print
	  • telephone polling.

Relevant personnel may include:	• asset creators • authors • broadcasters • clients • content experts • directors • editors • graphic designers • information architects • other writers • producers • program managers • programmers • volunteers' coordinators • other technical/specialist staff.

Purposes may include:	• audio and visual presentations
	• educational
	• informational
	• marketing
	• networking:
	  • social
	  • corporate
	• promotional.

Factors may include:	• delivery platform for interactive media content, including:
	  • internet
	  • CD
	  • DVD
	  • games console
	  • kiosk
	  • mobile telephone
	  • personal digital assistant (PDA)
	• target audience characteristics
	• type of program or product:

© Commonwealth of Australia, 2025 HumanAbility

RANGE STATEMENT	
	• lifestyle • chat and interview • talkback • news • current affairs • music • interactive game • website.
Text-based content may include:	• actual events • articles • documents • dramatic material • education and training texts • interviews • manuals • news sources • press releases • publications.

Sources may include:	• actual events
	• colleagues
	• commercial enterprises
	• federal, state and local government departments
	• fiction
	• imagination
	• industry associations and organisations
	• industry practitioners and technical experts
	• internet
	• life experience
	• media outlets
	• organisational policies and procedures
	• personal observations and experience
	• publications:
	  • reference books
	  • newsletters and magazines
	  • specialist technical journals
	  • bulletins, press releases and letters
	  • manufacturer handbooks, manuals and promotional material.

© Commonwealth of Australia, 2025 HumanAbility

RANGE STATEMENT	
User data may include:	• audience research compiled by external bodies, such as the Australian Bureau of Statistics • focus groups • personas • profiles • site feedback • site metrics • surveys.
Writing styles may include:	• conversational • dialogue • dramatic • formal • humorous • journalistic • plain English • whimsical.
Writing principles may include:	• clear and meaningful • concise • consistent style • correct grammar, punctuation and spelling • factually accurate • logical order.
Communication principles may include:	• communicates the message • conveys meaning • encourages feedback and interaction • meets audience requirements • promotes two-way conversation.
Writing techniques may include:	• applying the inverted pyramid • avoiding clichÃ©s, jargon and slang • choosing appropriate words • crafting paragraphs • crafting sentences • creating relevant hyperlinks by using accessible wording to link internal and external content • cutting verbiage • employing active voice • using plain English • using the 5 Ws: who, what, when, where and why

© Commonwealth of Australia, 2025 HumanAbility

RANGE STATEMENT	
	• writing visually for an auditory medium.
Media assets may include:	• 2D animations • 3D animations • audio • graphics • photos • video.
Presentation techniques may include:	• abstracts • blurbs • bullet and numbered lists • captions • formatting • headings and subheadings • hyperlinks • typography.
Readability tests include:	• Flesch-Kinnaid index • Gunning Fog index • W3C Accessibility standards as they apply to text-based content for interactive media.

CUFWRT403A Write narration and current affairs material

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to write narration and material for current affairs programs. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	Journalists and production assistants in radio, television and media production companies apply the skills and knowledge described in this unit. Under the direction of an editor or producer, they source and prepare scripts for on-air programs or resources such as corporate videos and e-learning resources. Scripts could be read directly on air by presenters, recorded as voiceover commentaries or repurposed for online news and current affairs services. People are usually working on productions where the target audience and program style have already been defined. Even though a producer or director typically supervises program preparation, journalists and production assistants are expected to work autonomously on assignments. Skills associated with undertaking background research are covered in: • CUFRES401A Conduct research.

© Commonwealth of Australia, 2025 HumanAbility

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
Clarify writing requirements	1. In consultation with ***relevant personnel***, identify ***relevant sources*** for current affairs stories or narration 2. Ensure that scripts can be prepared within ***production*** deadlines 3. Identify narrative, ***auditory and visual elements*** that may be appropriate for each type of script 4. Identify potential ***target audience*** to ensure that scripts

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	meet their expectations 5. Focus on perspective of target audience when deciding on ***format*** of script 6. Identify scheduling and program issues that affect writing assignments
Prepare to write scripts	7. Verify and review source material and select information or angles that meet target audience requirements 8. ***Summarise information*** to meet ***production requirements*** 9. Identify material that could result in a breach of ***laws and regulations*** and resolve issues in consultation with relevant personnel 10. Develop a structure for current affairs or narration that creates an auditory and visual narrative for target audiences 11. Ensure that preparation is completed so that production deadlines can be met
Write current affairs and narration	12. Incorporate accepted ***elements of language*** to ensure that scripts are easy to present on air or online 13. Apply ***conventions of writing broadcast and online copy*** to scripts 14. Write in a way that minimises the need for editing 15. Refine and redraft scripts until they meet creative, technical and production requirements 16. Read scripts aloud to test ease of on-air presentation and mark up copy for presenters as required 17. Submit copy to relevant personnel for consideration and review 18. Document and implement required changes to copy in an efficient manner and within production deadlines
Obtain sign-off on scripts	19. Present final scripts to relevant personnel for validation 20. Discuss and agree upon final changes with relevant personnel 21. Make necessary final adjustments, confirming scripts meet requirements and are ready on time for production

© Commonwealth of Australia, 2025 HumanAbility

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication, literacy and teamwork skills sufficient to:
  - clarify production requirements
  - interpret and summarise information and research findings
  - work as member of a production team, both independently and under direction
  - respond positively to constructive feedback on draft scripts
  - use correct grammar, spelling and punctuation when writing current affairs and narration
  - use information networks
  - check the accuracy of source material and information
  - apply appropriate listening, questioning and non-verbal communication cues
- organisational and self-management skills sufficient to:
  - prepare written materials within tight timeframes
  - prioritise work tasks
  - seek expert advice as required
- aural and visual narrative skills to determine imagery appropriate to current affairs or narration
- learning skills sufficient to improve performance and product through self-reflection and redrafting after feedback

Required knowledge

- roles and responsibilities of production team members
- principles and conventions of writing for broadcast and online
- news and current affairs research and sourcing techniques
- media laws sufficient to identify and seek expert advice on issues that could lead to legal action
- copyright clearance procedures and privacy protection procedures
- OHS standards as they relate to working for periods of time on computers

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment

© Commonwealth of Australia, 2025 HumanAbility

EVIDENCE GUIDE	
Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • current affairs and narration written for broadcast or online that meet target audience and production requirements • ability to source and use information relevant to content and purpose of scripts • collaborative approach to work • ability to write scripts within production deadlines.
Context of and specific resources for assessment	Assessment must ensure: • access to production situations that require the preparation of current affairs and narration • access to audio and video playback equipment or internet website to enable evaluation of material written by the candidate • access to current information about, and persons able to advise on, laws and regulations that apply to broadcasting and online newscasting • access to appropriate learning and assessment support when required • use of culturally appropriate processes and techniques appropriate to the language and literacy capacity of learners and the work being performed.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance • portfolios of evidence that demonstrate the processes used in obtaining information for scripts • evaluation of written material and summarising techniques to determine whether production requirements have been met and appropriate procedures followed • written or oral questioning to test sourcing of information and knowledge as listed in the required skills and knowledge section of this unit.
Guidance information for	Holistic assessment with other units relevant to the

© Commonwealth of Australia, 2025 HumanAbility

EVIDENCE GUIDE	
assessment	industry sector, workplace and job role is recommended, for example: • BSBCRT402A Collaborate in a creative process • CUFPPM301A Plan and prepare programs • CUFPPM401A Produce programs and program segments • CUFRES401A Conduct research.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Relevant personnel may include:	• broadcasters • clients • directors • performers • producers • program managers • script editors • scriptwriters • website designers and developers • other technical/specialist staff.
Relevant sources may include:	• actual events • blog sites • existing dramatic material • internet current affairs sites • media releases • newspapers • online news services • television news and current affairs.
Productions may include:	• information and education resources or programs available on a range of platforms: • CD

© Commonwealth of Australia, 2025 HumanAbility

RANGE STATEMENT	

	• DVD
	• internet
	• mobile telephones
	• online:
	  • internet news service
	  • community current affairs site
	• television and radio programs:
	  • news
	  • current affairs
	  • documentary and informational style programs
	• live coverage of events.

Auditory and visual elements may include:	• adding script to pictures • music • sound effects • tone of voice • using typefaces, colour and graphics in online • voices - speaking and choral • writing effective captions online • writing in pictures.

Target audiences may include:	• personnel in corporations or businesses
	• radio listeners of any age or cultural background
	• readers and audiences with specific interests, e.g.:
	  • music
	  • films
	  • theatre
	  • sport
	  • travel
	  • history
	• students
	• teachers and trainers
	• television viewers of any age or cultural background
	• users of internet news services.

Format may include:	• copy • headlines • level of language used to present information

© Commonwealth of Australia, 2025 HumanAbility

RANGE STATEMENT	

	• mix of content in terms of:
	  • story angles
	  • emotional appeal of content
	  • objective or subjective presentation of information
	  • opinions aired by presenters, guests and interviewees
	  • music
	  • talk
	  • personalities
	• narration
	• packaging of information, i.e. in manageable 'chunks'
	• tone of presentation
	• voice reports.

Techniques for ***summarising information*** may include:	• assessing what is essential and what to leave out • clarifying differences between facts, comment and opinion • presenting arguments fairly and clearly • telling story coherently.
Production requirements may include:	• attributions • audience • budget • confidentiality • content • contractual • copyright • cultural protocols • deadlines • direct quotes • duration • ethical standards • intellectual property • interviews • location • organisational policy • privacy issues • purpose • schedule

© Commonwealth of Australia, 2025 HumanAbility

RANGE STATEMENT	
	• style.
Laws and regulations may include:	• broadcasting codes of practice • contempt of court • copyright • defamation • obscenity • privacy legislation • racial vilification.
Elements of language may include:	• avoidance of clichÃ©s or jargon • characterisation • conversational tone • grammar • plain English • punctuation • readable style • spacing • spelling • wide and appropriate vocabulary.

Conventions of writing broadcast and online copy may include those for:	• auditory and visual media, e.g.:
	  • conversational style
	  • use first and second person
	  • contracted verb forms, e.g. didn't, you've
	  • active voice
	  • repetition and summary of key message
	  • active visual writing
	  • short sentences
	  • avoid duplication between intro cue and script
	• online media, e.g.:
	  • link appropriate typefaces, colour and graphics to online story
	  • write for different formats and positions on website
	  • use heads and subheads
	  • use captions for online stories
	• visual media, e.g.:
	  • use script to complement vision and aid storytelling
	  • avoid repeating in words what viewers see

© Commonwealth of Australia, 2025 HumanAbility

RANGE STATEMENT	
	• pace, including silence to allow pictures to tell the story.

FDFOP2016A Work in a food handling area for non-food handlers

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competency covers the skills and knowledge required to conduct work in a food handling area where the work does not involve direct food contact.

Application of the Unit

Application of the unit	Typical applications for this unit include stores/warehousing, cleaning and maintenance workers. This unit is not appropriate for a person who has direct contact with food and/or raw materials or ingredients. Where this is a requirement, refer to relevant core food safety units. This unit is based on and equivalent to the guideline food safety unit GFSWFHAA Carry out work in a food handling area.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		

© Commonwealth of Australia, 2025 HumanAbility

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Maintain food safety while working in a food handling area	1.1. Food safety requirements related to work tasks are identified and followed 1.2. Work responsibilities are carried out so that the safety of food is maintained 1.3. Procedures or practices which are not consistent with workplace food safety program are identified and reported
2. Maintain food handling area in clean and orderly state	2.1. Equipment and the food handling area meet the cleaning and sanitation requirements of workplace food safety program 2.2. Work is conducted in accordance with workplace environmental guidelines 2.3. Waste is collected and disposed of according to workplace procedures

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

© Commonwealth of Australia, 2025 HumanAbility

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access and apply workplace information on food safety policies and procedures relating to own work
- fit and use appropriate personal protective clothing and equipment as required by work tasks to meet food business requirements
- maintain personal conduct consistent with workplace requirements
- check own work area to identify food safety hazards
- carry out work responsibilities to ensure that food safety is not compromised
- take necessary precautions when moving between or around the workplace and/or from one task to another to minimise the risk of contamination
- recognise and report situations or procedures that could compromise food safety according to workplace procedure, including following procedures in own work and related work area to report to the appropriate personnel, in required detail and in a timely manner
- take corrective or preventative action within level of responsibility
- report health conditions and illness as required by workplace food safety procedures
- sort and dispose of waste as required by work responsibility according to workplace procedure
- maintain housekeeping standards in work area
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- food safety requirements related to own work as determined by the workplace
- sources of advice on food safety issues and responsibilities in the workplace
- personal hygiene practices and clothing and footwear requirements associated with working in and moving in and between food handling areas and moving between food handling and non food-handling areas
- suitable standard for materials and equipment used in the food handling area, including materials that are unsuitable for use, such as breakable or dirty equipment/materials
- methods and procedures to be followed when carrying out work responsibilities in a food handling area to ensure that food safety is not compromised (this will depend on the nature of work responsibilities and food safety requirements as

© Commonwealth of Australia, 2025 HumanAbility

REQUIRED SKILLS AND KNOWLEDGE
specified by the workplace) • the types of contamination that can occur as a result of work activities, and procedures used to prevent these types of contamination from occurring • cleaning and sanitation requirements and responsibilities, including cleaning methods appropriate to a food handling environment and those used in the specific food handling area • waste collection, recycling and handling procedures • housekeeping standards to be maintained in the work area

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: • identify food handling procedures and food safety issues for work • apply food safety procedures when handling food products • identify and act on non-conformances • ensure cleaning standards are met • follow environmental and waste management procedures.
Context of and specific resources for assessment	Assessment must occur in a real or simulated workplace where the assessee has access to: • food safety policies and procedures relevant to work function • work procedures, including procedures for entering and exiting food handling areas • work process and related services/resources • work area and related equipment to undertake work function

© Commonwealth of Australia, 2025 HumanAbility

EVIDENCE GUIDE	
	• waste collection, treatment, recycling and/or disposal methods • monitoring and reporting system.
Method of assessment	This unit should be assessed together with core units and other units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Policies and procedures	Work is carried out in accordance with company policies and procedures, regulatory and licensing requirements, legislative requirements, site licences and industrial awards and agreements
Workplace information	Workplace information may include: • standard operating procedures (SOPs) • advice on food safety requirements related to work function • standard forms • written or verbal instructions
Food handling area	Food handling area can refer to any work area where receiving, handling and inspecting, preparing, processing, packaging, storing and/or despatching occur
Examples of contamination that	Examples of contamination that can result from

© Commonwealth of Australia, 2025 HumanAbility

RANGE STATEMENT	
can result from work activities	work activities include: • chemical contamination which could be caused by lubricants, resins and cleaning and sanitation chemicals • physical contamination which could be caused by metal, glass, plastic and cloths
Personal hygiene, clothing and footwear and requirements	Personal hygiene, clothing and footwear and requirements to report health conditions or illness must meet workplace requirements and procedures. At a minimum such procedures must ensure that any person in a food premises does not contaminate food, does not have unnecessary contact with ready-to-eat food and does not spit, smoke or use tobacco or similar in a food handling area. Refer to Food Safety Standard 3.2.2, Clause 17:3 and relevant state and territory regulations/legislation

FNSACC301 Process financial transactions and extract interim reports

Modification History

Release	Comments
Release 1	This version first released with FNS Financial Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to prepare and process routine financial documents, prepare journal entries, post journals to ledgers, prepare banking and reconcile financial receipts, and extract a trial balance and interim reports.

It applies to individuals who use specialised knowledge and follow agreed processes to carefully check and process detailed financial information to ensure standards are maintained.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the FNS Implementation Guide Companion Volume or the relevant regulator for specific guidance on requirements.

Unit Sector

Accounting

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Check and verify supporting documentation	1.1 Identify, check and record information from documents 1.2 Examine supporting documentation to establish accuracy and completeness and to ensure authorisation by appropriate personnel
2. Prepare and process banking and petty cash	2.1 Enter accurately and balance deposits and withdrawals according to organisational procedures

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
documents	2.2 Check cheques and card vouchers for validity before processing 2.3 Reconcile banking documentation with organisation's financial records 2.4 Check, process and record petty cash claims and vouchers, and balance petty cash book according to organisational procedures
3. Prepare and process invoices for payment to creditors and for debtors	3.1 Prepare invoices in accordance with organisational procedures 3.2 Check invoices against source documents for accuracy and correct any errors 3.3 File all invoices and related documents for auditing purposes
4. Prepare and post journals and batch monetary items	4.1 Prepare journals accurately and completely, and batch items within organisational timelines 4.2 Match batch items precisely to initial receipt records 4.3 Ensure journals are authorised by appropriate person and process in accordance with organisational policy and procedures
5. Post journals to ledger	5.1 Post journals accurately to ledger in accordance with organisational input standards, with transactions correctly allocated to system and accounts
6. Enter data into system	6.1 Enter data accurately into system in accordance with organisational input standards and correctly allocate transactions to system and accounts 6.2 Update related systems to maintain integrity of relationships between financial systems
7. Prepare deposit facility and lodge flows	7.1 Select deposit facility appropriate to banking method to be used 7.2 Balance batch with deposit facility without error 7.3 Take security and safety precautions appropriate to method of banking, in accordance with organisational policy and industry and legislative requirements 7.4 Obtain and file proof of lodgement so that it is easily accessible and traceable
8. Extract trial balance and interim reports	8.1 Process accurately any special transactions 8.2 Complete cash and credit journals and post to general ledger 8.3 Extract and check trial balance and prepare other required reports

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	8.4 Find and correct any errors

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 2.2, 2.4, 3.2, 4.2, 8.4	• Analyses, matches and interprets information, paying attention to detail to identify errors
Writing	1.1, 2.1, 2.4, 5.1, 8.2, 8.3	• Records information accurately using correct spelling, grammar and terminology
Oral Communication	4.3	• Uses questioning and active listening to convey and clarify information and instructions
Numeracy	1.1, 2.1-2.4, 3.1, 3.2, 4.1, 7.2, 8.1, 8.2	• Performs mathematical calculations to check accuracy and completeness and reconcile numerical and financial data
Navigate the world of work	2.1, 2.4, 3.1, 4.3, 5.1, 7.3	• Follows legislative requirements, and organisational protocols, policy and procedures relevant to own role
Interact with others	1.2, 4.3	• Uses correct communication practices and protocols to gain processing authorisations from relevant personnel
Get the work done	1.1, 2.1-2.4, 3.1-3.3, 4.1-4.3, 5.1, 6.1, 6.2, 7.1-7.4, 8.1-8.4	• Plans, organises and implements tasks according to organisational and legislative requirements • Responds to predictable routine problems by implementing standard or logical solutions • Uses the main features and functions of digital tools to complete work tasks and to access information

Assessment Requirements for FNSACC301 Process financial transactions and extract interim reports

Modification History

Release	Comments
Release 1	This version first released with FNS Financial Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- accurately enter and balance deposits and withdrawals
- process and balance petty cash transactions
- check and verify supporting documentation
- apply relevant security measures for preparing and banking receipts
- batch monetary items and prepare deposit facilities
- accurately enter data into accounting systems and process journal entries according to organisational policy and procedures and legislative requirements
- prepare and authorise journals and check journal processing reports
- extract, check and correct a trial balance
- file documentation to meet all organisational and regulatory requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify a range of accounting conventions, processes and procedures
- describe banking procedures and guidelines
- outline typical errors that can be made in processing financial transactions
- describe forms of ‘proof of lodgement’
- describe types of ‘special transactions’
- identify and describe the key features of:
  - industry codes of practice
  - legislative and regulatory requirements relevant to the work
  - organisational policy and procedures

© Commonwealth of Australia, 2025 HumanAbility

- explain the security procedures for handling cheques, vouchers and cash
- describe the key features of a range of reports.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the accounting field of work and include access to:

- common office equipment, technology, software and consumables.

Assessors must satisfy NVR/AQTF assessor requirements.

FSKDIG03 Use digital technology for routine workplace tasks

Modification History

Release	Comments
Release 1	This streamlined version first released with *FSK Foundation Skills Training Package version 1.0*.

Application

This unit describes the skills and knowledge required to use digital technology to undertake routine workplace tasks.

The unit applies to individuals at Australian Core Skills Framework (ACSF) level 3 who need to undertake a vocational training pathway or workplace tasks.

This unit is designed for integration and contextualisation with vocational units to support achievement of vocational competency.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Digital Technology

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to use digital technology	1.1 Identify routine workplace tasks 1.2 Identify appropriate digital technology for the task 1.3 Interpret routine workplace information and terminology
2. Complete routine	2.1 Interpret routine information from a range of sources to access

© Commonwealth of Australia, 2025 HumanAbility

Element	Performance Criteria
workplace task	and use digital technology 2.2 Follow workplace procedures to perform a task using technology 2.3 Review performance

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning		• Takes responsibility for organising digital technology for the task
Oral Communication		• Discusses tasks with supervisor, manager or mentor

Mapping Information

Assessment Requirements for FSKDIG03 Use digital technology for routine workplace tasks

Modification History

Release	Comments
Release 1	This streamlined version first released with *FSK Foundation Skills Training Package version 1.0*.

Performance Evidence

Evidence of the ability to:

- identify and use digital technology appropriate to the task
- complete routine workplace tasks.

Evidence must be collected using tasks typically found in the workplace.

Note: Where a specific volume and/or frequency is not specified, evidence must be provided at least once.

Knowledge Evidence

Evidence of the following knowledge must be demonstrated:

- procedures for accessing and using digital technology.

Assessment Conditions

Assessment texts and tasks reflect those typically found in the workplace.

Individuals can access own familiar support resources.

Culturally appropriate processes and techniques suited to the language, literacy and numeracy capacity of individuals and the work being performed must be used.

© Commonwealth of Australia, 2025 HumanAbility

Reasonable adjustments can be made to ensure equity in assessment for people with disabilities.

Assessors must satisfy NVR/AQTF assessor requirements, have sound knowledge of the ACSF and have demonstrable expertise in the vocational contextualisation and assessment of digital technology.

HLTAAP001 Recognise healthy body systems

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency.

Application

This unit describes the skills and knowledge required to work with basic information about the human body and to recognise and promote ways to maintain healthy functioning of the body.

This unit applies to any worker who needs to use and interpret information that includes references to client anatomy and physiology.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
1. Work with information about the human body	1.1 Correctly use and interpret health terminology that describes the normal structure, function and location of the major body systems 1.2 Correctly use and interpret information that relates to the interrelationships between major components of each body system and other structures

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
2. Recognise and promote ways to support healthy functioning of the body	2.1 Review factors that contribute to maintenance of a healthy body 2.2 Evaluate how the relationships between different body systems affect and support healthy functioning 2.3 Enhance quality of work activities by using and sharing information about healthy functioning of the body

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) *that are essential to performance*.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTAAP001 Recognise healthy body systems

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- worked effectively with information about the human body and its healthy functioning in at least 3 different situations

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- basic structure and functions of the body systems and associated components, including:
  - cells, tissues and organs
  - cardiovascular system
  - respiratory system
  - musculo-skeletal system
  - endocrine system
  - digestive system
  - urinary system
  - reproductive system
  - integumentary system
  - lymphatic system
  - nervous system, including sensory systems – eye and ear
  - the special senses – smell, taste, vision, equilibrium and hearing

© Commonwealth of Australia, 2025 HumanAbility

    - immune system
- processes, conditions and resources required by the body to support healthy functioning
    - body regulation including:
        - maintenance of body temperature
        - fluid and electrolyte (including PH) balance
        - elimination of wastes from the body
        - maintenance of blood pressure
    - protection from infection
    - physical activity – active and passive

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including client health information
- modelling of industry operating conditions, including integration of problem solving activities

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors

HLTAAP002 Confirm physical health status

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency.

Application

This unit describes the skills and knowledge required to obtain and interpret information about client health status and to check a client's physical health. It requires a detailed knowledge of anatomy and physiology.

This unit applies to individuals working directly with clients and who assist in the provision of health care services. Some disciplines may be subject to state/territory regulatory determination regarding delegation and supervision.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
1. Obtain information about physical health status	1.1 Obtain accurate information about physical health status through observation, questioning or review of documentation 1.2 Interpret information based on understanding of the structure and functioning of body systems 1.3 Use information to identify any actual or potential

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
	problems regarding health status
	1.4 Take into account factors that may have impacted on an identified physical condition
2. Check physical health status	2.1 Make checks of client health status prior to delivery of health intervention using knowledge of body systems
	2.2 Clarify significance of physical health status in relation to a particular intervention in line with job role and organisation requirements
	2.3 Clarify implications and significance of physical health status with appropriate people in the case of uncertainty or limits on own capability or authority
3. Identify variations from normal physical health status	3.1 Identify variations from normal health status using standard methods and protocols
	3.2 Identify potential factors responsible for significant variations from normal health status
	3.3 Identify potential risk factors associated with variations from normal health status
	3.4 Recognise and refer potentially serious issues in line with organisation requirements

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2025 HumanAbility

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTAAP002 Confirm physical health status

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- obtained, correctly interpreted and used anatomical and physiological client information to check the physical health status of at least 3 different people presenting with different conditions

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- role responsibilities and limitations for different members of the care team in relation to checking client health status
- concepts underpinning human anatomy and physiology, including:
  - levels of structural organisation of body systems
  - human life processes
  - homeostasis and the relationship between homeostatic imbalance and disease
- structure and function of human body systems and their interactions:
  - cells, tissues and organs
  - cardiovascular system
  - respiratory system
  - musculo-skeletal system
  - endocrine system

© Commonwealth of Australia, 2025 HumanAbility

  - digestive system
  - urinary system
  - reproductive system
  - integumentary system
  - lymphatic system
  - nervous system, including sensory systems – eye and ear
  - the special senses – smell, taste, vision, equilibrium and hearing
  - immune system
- anatomical and medical terminology:
  - when referring to the human body
  - when taking measurements in different body systems
- common disorders, problems and complaints and their signs and symptoms, associated with each body system and its components relevant to the area of work
- basic pharmacology in relation to cautions and contraindications for relevant health procedures
- causes of disease – physical, mental and emotional, and key features of each cause:
  - pathogens
  - inherited genetic conditions
  - trauma, toxins and other environmental hazards
  - nutritional factors
  - impacts caused by health interventions (iatrogenic)
  - degenerative changes in vital organ systems
  - the loss of normal control mechanisms such as the uncontrolled growth of cancer cells
- major types of cellular adaptation
- processes of metabolism, nutrition, body temperature regulation, biological maturation, inheritance and ageing
- Oral health disease of the mouth and teeth including edentulous (no-natural teeth) and dentate (having natural teeth)
- variations from normal functioning and appropriate responses in terms of:
  - referral to an appropriate medical, dental, nursing or allied health professional
  - provision of appropriate health/dental care services

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including client health information
- modelling of industry operating conditions, including:
  - analysis of health information of real people
  - integration of problem solving activities

© Commonwealth of Australia, 2025 HumanAbility

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTAAP003 Analyse and respond to client health information

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency. Removed prerequisite. Significant change to knowledge evidence.

Application

This unit of competency describes the skills and knowledge required to analyse client health information and then to plan appropriate health services within scope of own role. It requires an in-depth knowledge of anatomy and physiology.

This unit applies to individuals who plan and provide services with some level of autonomy. Some disciplines will require a state/territory regulatory determination regarding delegation and supervision.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
1. Assess client health status	1.1 Analyse client health information in relation to planning services and in line with organisation requirements 1.2 Recognise normal readings on the findings of available tests, observations and physical assessments that assist in determining health status

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
	1.3 Identify pathophysiologies, or changing pathologies, through observation, physical assessment and analysis of other available information
	1.4 Identify the likely impact of specific interventions
2. Plan action to address identified health status	2.1 Apply detailed understanding of anatomy, physiology and pathophysiology of disease to a problem solving approach to service planning.
	2.2 Consider and note implications of any contra-indications in relation to health assessment findings.
	2.3 Document action plan in accordance with organisation policies and procedures.

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) *that are essential to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTAAP003 Analyse and respond to client health information

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency. Removed prerequisite. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- analysed the health information and planned services for least 6 different clients presenting with different conditions
- assessed client health status based on:
  - observations
  - physical assessments
  - interpretation of client tests

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- role responsibilities and limitations for different members of the care team in relation to analysing health information and providing services
- concepts underpinning human anatomy and physiology, including:
  - levels of structural organisation of body systems
  - human life processes
  - homeostasis and the relationship between homeostatic imbalance and disease
- variations and abnormal findings of the structure and function of human body systems and their interactions:

  - cells, tissues and organs
  - cardiovascular system
  - respiratory system
  - musculo-skeletal system
  - endocrine system
  - digestive system
  - urinary system
  - reproductive system
  - integumentary system
  - lymphatic system
  - nervous system, including sensory systems – eye and ear
  - the special senses – smell, taste, vision, equilibrium and hearing
  - immune system
- anatomical and medical terminology:
  - when referring to the human body
  - when taking measurements in different body systems
- common disorders, problems and complaints associated with each body system and its components relevant to the services being provided
- analysis of abnormal findings from diagnostic procedures and physical assessment
- pathophysiology of diseases associated with each body system and the impact of disease on each body system and their related structures, especially in relation to potential impact of specific health procedures provided
- recognition of the signs and symptoms of common clinical conditions and the (provisional) diagnosis of same
- pharmacological processes and drug actions, indications and contraindications
- effects of biological maturation and ageing processes on body systems and their components and in relation to specific health procedures provided
- the impact of:
  - common environmental emergencies (diving, altitude, temperature)
  - overdose and poisoning
  - surgical insult
  - trauma (penetrating, blunt)
- basic chemistry (molecules and compounds; chemical reaction, energy; acids and bases) and as related to metabolism, respiration, pH (respiratory and renal acidosis/alkalosis)
- structure and function of cells, including:
  - basic understanding of cellular respiration/carbohydrate metabolism
  - cell/tissue requirements for survival
  - major types of cellular adaptation
- transport systems:
  - active (primary) and passive (diffusion – simple, facilitated)
  - forces (hydrostatic and osmotic)

© Commonwealth of Australia, 2025 HumanAbility

- osmosis

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including client health information
- modelling of industry operating conditions, including:
  - analysis of health information of real people
  - integration of problem solving activities

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTADM001 Administer and coordinate Telehealth services

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This new unit was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages.

Application

This unit describes the skills and knowledge required to administer, support and monitor Telehealth services in a healthcare organisation in collaboration with health professionals and other service providers. The unit covers only additional administration skills that are specific to Telehealth.

It applies to individuals in small to medium sized organisations who play a role in coordinating Telehealth activities in line with policies, procedures and protocols and legal and ethical requirements surrounding clinical risk management and governance.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*

© Commonwealth of Australia, 2025 HumanAbility

1. Develop and maintain Telehealth networks	1.1 Establish and maintain Telehealth networks using communication skills to develop trust and confidence with diverse people and groups 1.2 Use, update and share Telehealth service provider information with health professionals and other colleagues 1.3 Develop and refine approaches to Telehealth service provision by pro-actively identifying and using opportunities to update and expand own knowledge
2. Maintain compliance with ethical and legal requirements	2.1 Determine risks associated with the sharing of information on Telehealth platforms 2.2 Ensure collection, use and disclosure of patient information is consistent with information privacy principles and fulfilling duty of confidentiality in line with workplace policy 2.3 Recognise and respect patient rights, care and safety in line with organisation policy and duty of care regarding all aspects of the Telehealth service 2.4 Perform all work within the boundaries of responsibility and refer problems to supervisor and/or other appropriate health professional
3. Support Telehealth service provision	3.1 Ensure referral or request is received and reason for referral and/or clinical requirements are clear and are correctly identified 3.2 Contact service providers and organise care according to doctor's request in line with organisation protocol 3.3 Coordinate information and information flow to meet consultation requirements 3.4 Identify and respond promptly to routine administrative Telehealth service problems 3.5 Pro-actively support colleagues with Telehealth services, share information and provide accurate information in response to queries

© Commonwealth of Australia, 2025 HumanAbility

4. Complete Telehealth administration	4.1 Manage appointments, recall and reminder systems for Telehealth as per doctor's instructions 4.2 Complete Telehealth financial administration tasks according to billing systems and specific Telehealth requirements 4.3 Maintain client documentation according to organisational and compliance requirements
5. Contribute to evaluation of Telehealth services	5.1 Measure and benchmark performance using agreed methods and tools 5.2 Monitor and evaluate systems and promote risk reduction strategies in line with legal and ethical standards 5.3 Promote compliance with accreditation requirements related to Telehealth 5.4 Implement and evaluate change in conjunction with colleagues to ensure goals are achieved

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

No equivalent unit

Assessment Requirements for HLTADM001 Administer and coordinate Telehealth services

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This new unit was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- provided administrative support for at least three Telehealth consultation sessions:
  - managed client information appropriately
  - managed the information flow between service providers
  - completed financial administration tasks
- responded appropriately to Telehealth administrative problems
- evaluated and reported on the provision of Telehealth services in at least one organisation
- identified and used Telehealth networks to inform practice

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- key considerations in the provision of Telehealth services:
  - clinical
  - technical
  - business

© Commonwealth of Australia, 2025 HumanAbility

    - client-centred approach
- industry Telehealth standards, guidelines and accreditation requirements
- legal requirements for the provision of Telehealth services
- risk management considerations and approaches for Telehealth
    - sharing of digital information – who can share what with whom and how
    - ownership of digital information
    - confidentiality
    - consent
- role of different individuals in provision of Telehealth services and scope and limitations of own role
- Telehealth networks and ways to use them
- context for current provision of Telehealth services, including government incentives
- key aspects of practice administration systems and how they may be used or adapted to support Telehealth services:
    - sources of information about MBS items
    - funding and support mechanisms for different client groups

Assessment Conditions

Skills must be demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
    - operational administration system capable of supporting provision of Telehealth services
    - organisation policies and procedures for Telehealth
    - industry Telehealth standards
- modelling of industry operating conditions, including:
    - interactions with clients and colleagues
    - integration of typical operational problems to which the candidate responds

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTADM002 Manage Telehealth technology

Modification History

Release	Comments
Release 3	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 2	Minor changes to formatting to improve readability. Equivalent outcome.
Release 1	This new unit was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages.

Application

This unit describes the skills and knowledge required to select, use and maintain Telehealth technology according to organisation needs. It requires the ability to protect the security of data, particularly in relation to client confidentiality and privacy.

It applies to individuals in small to medium sized organisations who play a role in coordinating Telehealth activities in line with policies, procedures and protocols and legal and ethical requirements surrounding clinical risk management and governance.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*

© Commonwealth of Australia, 2025 HumanAbility

1. Determine technology requirements	1.1 Seek information on organisation technology requirements based on consultation with appropriate colleagues and client population needs 1.2 Investigate and document options for Telehealth platforms and select hardware and software options that best meet organisation needs 1.3 Make recommendations to relevant colleagues within scope of own job role 1.4 Obtain and evaluate costings for chosen hardware and software options 1.5 Liaise with Telehealth and video consultation vendors to organise purchase and set up in line with scope of own job role, standards and organisation requirements
2. Set up consultation sessions	2.1 Prepare Telehealth video conferencing equipment for consultations according to organisation policy, procedures and protocols 2.2 Verify all equipment meets requirements of organisation guidelines for Telehealth video conferencing 2.3 Ensure the Telehealth consultation environment and facilities are conducive to patient care ensuring confidentiality and privacy 2.4 Support and coach colleagues with use of Telehealth technology
3. Maintain telehealth equipment	3.1 Complete routine maintenance of Telehealth technologies, supporting equipment and facilities according to manufacturer instructions 3.2 Make regular checks to confirm that technologies meet health, safety, industry and task specific legislation and requirements 3.3 Use troubleshooting techniques to resolve minor technology problems 3.4 Identify situations where expert assistance is required and organise technical support 3.5 Provide information about privacy and confidentiality

© Commonwealth of Australia, 2025 HumanAbility

	obligations technical support personnel
	3.6 Complete accurate maintenance documentation
4. Protect security of Telehealth information system	4.1 Determine information security risks associated with provision of Telehealth services
	4.2 Obtain Telehealth access and equity requirements and clearance levels in accordance with organisational requirements
	4.3 Test security of information system with daily data back-up, periodic testing and restoration of back-ups
	4.4 Ensure accurate records of user account and security access details are provided to Telehealth clients in line with system integrity, privacy and risk management
	4.5 Communicate privacy, confidentiality and security obligations to all Telehealth personnel
	4.6 Complete data security documentation according to organisation and legal requirements

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

- Numeracy skills to work with technology costings, numerical features of computer software programs and client data

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

No equivalent unit

Assessment Requirements for HLTADM002 Manage Telehealth technology

Modification History

Release	Comments
Release 3	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 2	Minor changes to formatting to improve readability. Equivalent outcome.
Release 1	This new unit was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- managed the selection, set up and maintenance of at least one Telehealth system:
  - evaluated organisation technology needs through consultation and research
  - selected and costed options and made appropriate recommendations
  - organised technology set up
  - followed procedures to protect security of the information system and client data
  - completed routine technical maintenance and troubleshooting:
    - performed and tested back-ups
    - performed data cleaning
    - interpreted technical manuals
    - used techniques to solve minor technical problems
- completed the technical set up for at least 3 Telehealth consultation sessions

© Commonwealth of Australia, 2025 HumanAbility

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- different contexts for Telehealth service provision, and the impacts on services provision and technology requirements:
  - physical environment limitations
  - location of technology within the organisation
  - need for privacy
- risk management considerations and approaches for Telehealth
  - sharing of digital information – who can share what with whom and how
  - ownership of digital information
  - confidentiality
  - consent
- features of computer hardware and software:
  - general differences between different computer platforms and their respective operating systems
  - requirements to support Telehealth services
- features of medical software and operating systems used by the organisationto support Telehealth services, including software copyright responsibilities
- key features of industry standards for:
  - provision of Telehealth services
  - computer and Information security
  - encryption of video data
- data security procedures:
  - back ups
  - data labelling and storage
  - password policy
  - system security settings
  - documentation requirements
- routine technology maintenance procedures:
  - functions and features of diagnostic tools
  - documentation requirements
- legislation and industry standards related to the confidentiality, privacy and security of client information
- work health and safety requirements in relation to set up and use of computer systems

Assessment Conditions

Skills must be demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

© Commonwealth of Australia, 2025 HumanAbility

- use of suitable facilities, equipment and resources, including:
  - computerised system (both hardware and software) capable of supporting provision of Telehealth services
  - a populated database
  - organisation policies and procedures
  - Industry Telehealth standards
- modelling of industry operating conditions, including:
  - integration of typical technical problems to which the candidate responds

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTADM003 Facilitate a coordinated approach to client care

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency.

Application

This unit describes the skills and knowledge required to provide instructions and information to clients, pro-actively follow up clients and liaise with other service providers to support a coordinated care approach.

This unit applies to individuals who assist and work under the delegation of health professionals.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
1. Provide instruction and information to clients	1.1 Adhere to scope of own role in providing medical information according to regulatory requirements 1.2 Read information and check its currency and accuracy prior to provision of information to clients 1.3 Instruct and inform clients as per health professional request, ensuring consistency of message

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
2. Follow up clients	2.1 Recall clients as per practice protocols and health professional instructions 2.2 Interpret and manage the medical practice reminder system according to procedures 2.3 Monitor ‘did not attend’ clients and follow up appropriately 2.4 Identify critical client appointments and follow up according to protocols if clients fails to attend 2.5 Accurately record communication with, and in regard to, clients
3. Exchange information among providers	3.1 Ensure information exchange, including methods, adheres to legislative requirements and industry standards 3.2 Facilitate participation in programs designed to support information exchange 3.3 Pro-actively identify and follow up missing information
4. Facilitate multi-disciplinary approach to client care	4.1 Gather information about local service providers and health care programs and maintain its currency 4.2 Make service provider and health care program information readily available to colleagues 4.3 Liaise with other service providers and organise required care as per health professional request 4.4 Coordinate case discussions amongst providers, when required 4.5 Complete required paperwork or documentation for referral as per health professional request 4.6 Provide complete and correct information to clients

© Commonwealth of Australia, 2025 HumanAbility

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential *to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Assessment Requirements for HLTADM003 Facilitate a coordinated approach to client care

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- identified at least 3 different clients for whom follow up is required in the case of appointment non-attendance
- provided accurate information or instruction to at least 3 clients with different medical needs.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations for information exchange and provision (national, state/territory, local):
  - duty of care
  - informed consent
  - records management
  - privacy, confidentiality and disclosure
  - industry standards
  - work role boundaries – responsibilities and limitations, including limitations around types of information to be provided by non-professionals
- types of information provision that may be delegated by health professionals:

© Commonwealth of Australia, 2025 HumanAbility

  - provision of educational material – preventative, promotional, self-management
  - instructions for use of medical equipment or supplies
  - information about procedures
  - preparation procedures for diagnostic testing
  - where to go for certain tests or treatment
  - key requirements of systems and procedures for effective management of reminder systems
- scope and availability of other health services and programs, including:
  - eligibility
  - access and referral requirements
  - costs and funding mechanisms
    - home and community care (HACC)
    - Medical Benefits Schedule (MBS)
    - Pharmaceutical Benefits Scheme (PBS)
    - typical private health insurance provisions
    - Department of Veterans Affairs, (DVA)
    - WorkCover
  - key features of how they operate
- methods to ensure currency of information
- ways in which information is exchanged and services are organised between different health providers:
  - key information
  - documentation requirements

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable resources including:
  - online or hard copy provider directories
  - client information materials
  - client record keeping systems
- modelling of industry operating conditions, including:
  - interaction with clients
  - integration of situations requiring problem solving

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTADM004 Manage health billing and accounting system

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency.

Application

This unit describes the skills and knowledge required to implement and monitor a billing and accounting system in a health practice, with consideration of client accessibility, practice viability and regulatory and legislative requirements.

This unit applies to health practice administrators working in a coordination or management role.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Implement and monitor billing system	1.1 Integrate regulatory and legislative requirements into billing systems 1.2 Evaluate payment options and equipment requirements to optimise ease of payment and client accessibility 1.3 Identify possible payment barriers that may prevent client access to practice services and develop billing

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
	strategies to best address barriers
	1.4 Identify payment requirements to meet the viability and cash flow needs of the practice
	1.5 Identify and respond to the accountability and reporting requirements for supported and special payment schemes
	1.6 Evaluate, select and implement systems and procedures that will support the billing and payment system
2. Develop and implement client debt recovery strategy	2.1 Determine debt tolerance of the practice based on evaluation of business information
	2.2 Evaluate strategies to reduce likelihood of client debt load given client population
	2.3 Select and develop ethical debt recovery strategies
	2.4 Monitor debt and adjust debt recovery policy and practices accordingly
3. Manage information and data required to maintain subsidy payments	3.1 Interpret and evaluate the information and data requirements to maintain subsidy payments
	3.2 Develop systems to collect data with minimal interruption to practice functions
	3.3 Manage information and data requirements to meet quality and timeframe requirements
	3.4 Develop necessary reports and data in the prescribed manner

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential *to performance.*

© Commonwealth of Australia, 2025 HumanAbility

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTADM004 Manage health billing and accounting system

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- managed a billing and accounting system that meets regulatory requirements for a least 1 health practice

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations for health practice billing, including:
  - codes of practice
  - policy frameworks
  - privacy, confidentiality and disclosure
  - records management, including:
    - reporting (for supported and special payment schemes)
    - information and data requirements for subsidy payments
- types of billing options available to health practices and the requirements to implement these:
  - bulk billing
  - direct debit of health insurance components
  - cash payment

© Commonwealth of Australia, 2025 HumanAbility

    - credit card payment
- features of products, systems and initiatives that support health billing systems:
    - software
    - staff training and support
    - systems support
- client payment issues and considerations for health practices:
    - barriers to prompt or complete payment
    - barriers that may prevent access to health services
    - strategies to reduce likelihood of client debt load
    - payment options for clients and suppliers
- debt recovery systems and practices
- cash flow needs of the practice and associated payment requirements to ensure viability of the practice

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
    - computerised billing system
    - client records
- regulatory requirements
- modelling of industry operating conditions

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTADM005 Produce coded clinical data

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency.

Application

This unit describes the skills and knowledge required to extract the correct clinical data from simple medical records. A simple medical record is defined as a medical record generated by an episode of care involving day stay, day surgery, planned surgery or simple medical problems with an average length of stay.

This unit applies to clinical coders.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify and evaluate clinical data from simple medical records	1.1 Identify the principal diagnosis and principal procedure for an admission when coding from a simple medical record 1.2 Identify additional diagnosis and procedures when coding from a simple medical record with specialties 1.3 Refer any issues concerning clarity and accuracy of the clinical data to the appropriate person

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
	1.4 Evaluate the relevance of other health conditions and factors affecting the patient to establish the principal diagnosis
	1.5. Establish the appropriate level of detail of clinical data to meet standards
	1.6 Record, enter, edit and maintain a client information system of coded data (disease index)
	1.7 Identify the correct clinical data within appropriate timeframes
2. Assign codes to clinical data	2.1 Assign complete and accurate *International statistical classification of diseases and related health problems* (ICD-10-AM), disease and procedures codes abstracted from simple medical records
	2.2 Apply *Australian coding standards* (ACS) where appropriate, to ensure the correct assignment of codes when coding simple medical records for specialities
	2.3 Establish and record the correct sequence and order of codes related to a single episode in accordance with standards
	2.4 Record data clearly, accurately and completely
	2.5 Enter the coded data accurately into the client system appropriate
	2.6 Complete the process of assigning the correct codes from clinical data within appropriate timeframes
	2.7 Maintain confidentiality of medical records and client information at all times

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential *to performance.*

© Commonwealth of Australia, 2025 HumanAbility

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Assessment Requirements for HLTADM005 Produce coded clinical data

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- used current coding manuals and standards to produce accurate and complete coded clinical data from simple medical records for at least 10 different types of patients , including those with:
  - differing length of stay
  - both acute and chronic forms of a disease or condition
  - different service category types
  - with disease or condition in different contexts (co-existing with multiple comorbidities and complications)

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- the broad health industry context for clinical coding
- coding factors influencing health status
- definition of a clinical coder and clinical coding, and the purpose of coded data
- current codes of practice and guidelines in relation to clinical coding, including professional ethics
- Australian and relevant state/territory clinical coding standards and protocols
- the way rules and conventions are applied to clinical data to achieve correct clinical codes

© Commonwealth of Australia, 2025 HumanAbility

- sequencing protocols for clinical coding, including those for principle and additional diagnoses
- timescales within which clinical coding must take place
- classifications and nomenclature used to achieve accurate clinical coding
- clinical data indexing, storage and mapping from clinical terms of classifications
- comprehensive knowledge of medical terminology and body systems
- coding classifications relating to:
  - congenital malformations and deformations
  - endocrine, nutrition and metabolic diseases
  - injuries and external causes of injuries
  - neoplasms
  - infectious diseases
  - blood disorders
  - poisoning and external causes of poisoning
  - symptoms, signs and abnormal clinical findings
- coding classifications for diseases of:
  - circulatory system
  - digestive and hepatobiliary system
  - ear and mastoid process
  - eye and adnexa
  - nose and mouth
  - genitourinary system
  - musculoskeletal system
  - nervous system
  - respiratory system
  - skin and subcutaneous tissue
- coding conditions:
  - relating to drugs, alcohol and mental health
  - in pregnancy, childbirth and the puerperium
  - originating in the perinatal period

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - real medical records, either electronic or paper based
  - ICD-10-AM, *Australian classification of health interventions* (ACHI) and ACS coding manuals
- modelling of industry operating conditions, including:
  - presence of time constraints for coding activities

© Commonwealth of Australia, 2025 HumanAbility

- integration of situations requiring problem solving

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTADM006 Undertake complex clinical coding

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency. Removed prerequisite.

Application

This unit describes the skills and knowledge required to undertake coding of moderately complex discharge summaries, medical reports and medical records, including the selection of the primary diagnosis and sequencing of other diagnoses for coding.

This unit applies to clinical coders.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Abstract clinical data from moderately complex medical records	1.1 Interpret and apply the *Australian coding standards* (ACS) to identify clinical data from moderately complex medical records
	1.2 Select appropriate conditions/diseases and procedures for coding from moderately complex medical records
	1.3 Identify the principal diagnosis and principal procedure for an admission when coding from moderately complex medical records

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.4 Identify additional diagnoses and procedures
	1.5 Establish the correct sequencing of diagnoses and procedures
2. Assign codes relating to moderately complex medical records	2.1 Apply ACS where appropriate, to ensure the correct assignment of codes when coding from moderately complex medical records for a range of specialties
	2.2 Assign complete and accurate *International statistical classification of diseases and related health problems* (ICD-10-AM), disease codes and Australian Classification of Health Interventions (ACHI) procedure codes
	2.3 Utilise resources where appropriate to assist in making coding decisions
	2.4 Recognise problems relating to privacy and confidentiality of client information
	2.5 Maintain confidentiality of medical records and client information at all times
	2.6 Complete the process of assigning the correct codes from moderately complex medical records within appropriate timeframes
	2.7 Meet work health and safety duty of care requirements
3. Maintain clinical coding records	3.1 Record, enter, edit and maintain a client information system of coded data (disease index)
	3.2 Address changes to data collection and coding requirements, according to relevant standards, protocols and legislation
	3.3 Make amendments to data collection and coding activities in line with organisation requirements
	3.4 Maintain and update own knowledge and skills to ensure that amendments are addressed as required

© Commonwealth of Australia, 2025 HumanAbility

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential *to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

HLTADM007 Complete highly complex clinical coding

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency. Removed prerequisite.

Application

This unit describes the skills and knowledge required to complete coding of highly complex medical records with an advanced understanding of coding conventions, standards and practices in an extensive casemix.

This unit applies to clinical coders who take responsibility for their own outputs, as well as mentoring other clinical coders as required.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Abstract clinical data from highly complex medical records	1.1 Abstract appropriate conditions/diseases and procedures from highly complex medical records from a range of specialties 1.2 Interpret and apply the *Australian coding standards* (ACS) to ensure correct assignment of codes from a varied and highly complex casemix 1.3 Identify the principal diagnosis and principal procedure for an admission when coding a varied and

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	highly complex casemix
	1.4 Identify additional diagnoses and procedures when coding a varied and highly complex casemix
2. Assign codes relating to highly complex medical records	2.1 Perform clinical coding on a broad casemix, utilising knowledge of medical science and applying *International statistical classification of diseases and related health problems* (ICD-10-AM), *Australian classification of health interventions* (ACHI) and ACS new edition changes
	2.2 Apply ACS where appropriate, to ensure the correct assignment of codes when coding from highly complex medical records for a range of specialties
	2.3 Assign complete and accurate ICD-10-AM disease and ACHI procedure codes abstracted from a varied and highly complex casemix
	2.4 Utilise appropriate resources to make informed coding decisions relating to highly complex medical records
	2.5 Ensure coding reflects the correct sequencing of diagnoses and procedures
	2.6 Identify coding issues and determine appropriate solutions
	2.7 Complete the process of assigning the correct codes from highly complex medical records within appropriate timeframes
	2.8 Maintain confidentiality of medical records and client information at all times
	2.9 Meet occupational health and safety duty of care requirements
3. Provide clinical coding expertise in the workplace	3.1 Add value to discussions regarding clinical coding within the coding unit
	3.2 Provide mentoring support for entry level clinical coders

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	3.3 Supervise an entry level clinical coder and select appropriate medical records for them
	3.4 Follow up with clinicians regarding ambiguities in documentation, where required
	3.5 Conduct research using appropriate materials/ resources and or clinical input to generate solutions to address clinical coding issues
4. Maintain currency of data collection and coding	4.1 Record, enter, edit and maintain a client information system of coded data (disease index)
	4.2 Secure and interpret changes to data collection and coding requirements, according to relevant standards, protocols and legislation
	4.3 Identify necessary amendments to data collection and coding activities
	4.4 Provide necessary information and training to ensure that amendments are implemented with maximum ease
	4.5 Ensure computer software is updated to meet any adjustment needs
	4.6 Monitor the implementation of amendments

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential *to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTADM007 Complete highly complex clinical coding

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency. Removed prerequisite.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- used current coding manuals and standards to produce accurate and complete coded clinical data from a varied and highly complex casemix for at least 10 patients:
  - identified coding issues and conducted research using appropriate materials/resources and or clinical input to generate solutions
  - identified sequencing requirements
  - identified, interpreted and applied necessary amendments to data collection and coding activities
  - used appropriate resources to assist with highly complex clinical coding requirements
  - used manual or an interfaced computerised coding system to submit data or disease index

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- the broad health industry context for clinical coding
- coding factors influencing health status
- definition of a clinical coder and clinical coding, and the purpose of coded data
- current codes of practice and guidelines in relation to clinical coding, including professional ethics
- Australian and relevant state/territory clinical coding standards and protocols

HLTAHA001 Assist with an allied health program

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Minimum work hours added. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to provide basic assistance to an allied health professional.

This unit applies to allied health assistants working in a health or community context. Depending on the setting, work may include following treatment plans for therapeutic interventions and/or conducting programs under the regular (direct, indirect or remote) supervision of an allied health professional.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Provide relevant information to clients	1.1 Adhere to confidentiality policies at all times 1.2 Provide basic accurate information to clients regarding allied health services

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
2. Prepare for therapy session	2.1 Confirm and discuss therapy and treatment plans and programs with supervising allied health professional 2.2 Obtain information from relevant sources according to organisation policies and supervising allied health professional 2.3 Check resources and equipment required for therapy program to ensure suitability and working order 2.4 Recognise and minimise environmental hazards in accordance with organisation requirements 2.5 Prepare the client for therapy under direction of supervising allied health professional
3. Provide assistance with therapy session	3.1 Assist with therapy tasks according to instructions of allied health professional 3.2 Maintain general therapy precautions 3.3 Seek clarification and feedback 3.4 Take appropriate actions to ensure comfort, safety and privacy of the client 3.5 Reinforce, clarify and explain therapy goals to clients under supervision of allied health professional 3.6 Support and coach clients to achieve identified therapy goals under supervision of allied health professional 3.7 Deal with accidents and incidents appropriately and report to the supervising allied health professional
4. Use therapy equipment correctly and safely	4.1 Use equipment according to manufacturer and instructions set by supervising allied health professional 4.2 Follow work health and safety (WHS) guidelines for particular pieces of equipment
5. Feedback appropriate therapy information to supervising	5.1 Pass on significant information to appropriate supervising allied health professional

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
allied health professional	5.2 Document information according to organisation policy and procedures
6. Assist in the design and construction of simple therapy materials and equipment	6.1 Assist the allied health professional to identify gaps in therapy material resources and develop solutions 6.2 Update therapy materials on a regular basis as instructed 6.3 Construct aids and adaptations in accordance with allied health professional's instructions
7. Complete required administrative duties	7.1 Maintain statistics in accordance with organisation policies and procedures 7.2 Maintain stock levels in accordance with organisation policies and procedures 7.3 Book in clients for appointments in accordance with organisation policies and procedures
8. Work with a primary health care approach	8.1 Support and facilitate the involvement of the client and the community in the planning and provision of services according to instruction of supervising allied health professional 8.2 Promote good health and a preventive approach to maintaining health as part of own work role 8.3 Demonstrate recognition of and support for the importance of access and equity in provision of health services in line with own work role 8.4 Reflect evidence based practice in own provision of health care services

Foundation Skills

The Foundation Skills describe those required skills (such as language, literacy, numeracy and employment skills) that are essential to performance.

© Commonwealth of Australia, 2025 HumanAbility

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTAHA001 Assist with an allied health program

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Minimum work hours added. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- assisted with 3 allied health programs, 1 in a simulated environment and 2 in the workplace
- performed the activities outlined in the performance criteria of this unit during a period of at least 80 hours of work

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- client individualised plans, goals and limitations of therapy
- roles, responsibilities and limitations of self and other allied health team members including nursing, medical and other personnel
- therapy tasks and programs associated with particular client population
- how to assess client readiness for therapy and whether there are changes that might affect the appropriateness of the prescribed therapy
- allied health resources available for client population
- appropriate use of allied health equipment and resources
- organisation policy and procedures in relation to:
  - infection control
  - work health and safety:

© Commonwealth of Australia, 2025 HumanAbility

    - manual handling, including identification and control of manual task risk factors
  - other specific organisation procedures, including supervisory and reporting protocols
- differences between occupational therapy, physiotherapy and speech pathology and related therapy techniques
- basic human behaviour and social and interpersonal behaviour
- concepts of holistic health as wellbeing, rather than focusing on disease or its absence
- determinants of health, including:
  - housing
  - education
  - nutrition
  - communication

Assessment Conditions

All aspects of the performance evidence must have been demonstrated using simulation prior to being demonstrated in a therapeutic workplace under the direction and supervision (direct, indirect, remote) as determined by the allied health professional.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - individualised plans and any relevant equipment outlined in the plan
  - relevant organisation policies and procedures

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTAHA002 Assist with the application and removal of casts

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Minimum work hours added.

Application

This unit describes the skills and knowledge required to assist in the preparation, application and removal of casting.

This unit applies to allied health assistants and should be performed under the direction and supervision (direct, indirect or remote) of an allied health professional.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to apply cast	1.1 Confirm requirements for applying casting with relevant personnel
	1.2 Assemble equipment for applying cast and check to ensure it is in working order
	1.3 Explain procedures to client and answer any questions
	1.4 Take appropriate action to ensure client comfort and safety
	1.5 Follow infection control guidelines throughout the

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	procedure
2. Apply and remove cast	2.1 Assist with the application and removal of cast according to instructions and organisation policies and procedures
	2.2 Use safe work practices, and personal protective equipment (PPE) when required, to apply or remove cast
	2.3 Seek clarification/feedback from supervisor
	2.4 Take appropriate action to ensure client comfort and safety is maintained
3. Undertake post-application procedures	3.1 Provide advice and information to client regarding care of cast
	3.2 Clean client according to organisation policies and procedures
	3.3 Arrange appropriate support for client at completion of procedures
4. Comply with supervisory requirements	4.1 Identify and manage client adherence issues, including subjective and objective reporting of client response to the program, and report to the allied health professional in a timely manner
	4.2 Report any client misunderstanding or confusion to the allied health professional in a timely manner
	4.3 Seek assistance when client presents with needs or signs outside limits of own authority, skills and/or knowledge
	4.4 Report client difficulties to the supervising allied health professional
	4.5 Participate in supervision processes with the treating allied health professional in accordance with organisation protocol

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
5. Clean and store equipment relevant to role and therapy program	5.1 Clean equipment and work surfaces according to manufacturer's recommendations, infection control requirements and organisation protocols as directed by the allied health professional 5.2 Store equipment according to manufacturer's recommendations and the organisation's protocols 5.3 Check and maintain equipment according to organisation protocols and allied health professionals guidelines 5.4 Label or tag equipment faults, where possible remove from use if unsafe or not working and inform staff in line with organisation procedures 5.5 Dispose of waste according to relevant guidelines
6. Report and document information	6.1 Provide feedback on client progress to the treating allied health professional 6.2 Report client difficulties and concerns to the treating allied health professional in a timely manner 6.3 Document client information according to the organisation's protocols 6.4 Use appropriate terminology to document client response, outcomes and any identified problems

Foundation Skills

The Foundation Skills describe those required skills (such as language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Assessment Requirements for HLTAHA002 Assist with the application and removal of casts

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Minimum work hours added.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- assisted with the application and removal of casts safely and according to organisation and infection control policies and procedures on 3 different clients, 1 in a simulated environment and 2 in the workplace
- performed the activities outlined in the performance criteria of this unit during a period of at least 120 hours of work

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes relevant knowledge of:

- basic anatomy and physiology of the musculoskeletal, neurological and cardiorespiratory systems relevant to physiotherapy practice
- organisation policy and procedures in relation to:
  - infection control
  - work health and safety:
    - manual handling, including identification and control of manual task risk factors
  - other specific organisation policies or procedures
- interpreting documentation relevant to application of plaster

© Commonwealth of Australia, 2025 HumanAbility

Assessment Conditions

All aspects of the performance evidence must have been demonstrated using simulation prior to being demonstrated in a therapeutic workplace under the direction and supervision (direct, indirect, remote) as determined by the allied health professional.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including casting and other relevant equipment
- modelling of industry operating conditions and contingencies, including provision of services to real people

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015 /AQTF mandatory competency requirements for assessors.

HLTAHA003 Deliver and monitor a client-specific physiotherapy program

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTAH401/HLTAH402C. Significant changes to elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Minimum work hours added. Removal of pre-requisite. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to deliver and monitor a therapeutic program that has been developed by a physiotherapist to address the requirements of individual clients.

This unit applies to allied health assistants and should be performed under the direction and supervision (direct, indirect or remote) of an allied health professional.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for delivery of a client-specific physiotherapy program	1.1 Obtain information from the physiotherapist about the client-specific program 1.2 Determine client availability according to organisation protocols 1.3 Gather the equipment to deliver the client-specific

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	program, in line with client needs and specifications of the physiotherapist
2. Deliver physiotherapy program based on treatment plan	2.1 Confirm client's understanding of program based on treatment plan prepared by the physiotherapist
	2.2 Obtain consent from the client before commencing the program
	2.3 Follow the instructions of the physiotherapist when assisting with the positioning of client and equipment where treatment involves machines
	2.4 Guide the client to complete the program as directed by physiotherapist
	2.5 Recognise when client becomes distressed, in pain or communicates their desire to slow down, and change activity or stop and follow stepping down procedures outlined in treatment plan or notify physiotherapist
	2.6 Provide feedback to the client to reinforce client understanding and correct application of the program
	2.7 Work with client to plan any follow up sessions and dates
3. Assist with programs for clients with varying abilities to participate	3.1 Monitor 24-hour posture management and identify any adjustment requirements according to directives form the physiotherapist
	3.2 Assist physiotherapist to complete active and passive movement requirements
	3.3 Monitor respiratory care requirements and conduct necessary action within the prescribed treatment plan and scope of role and responsibilities as defined by the organisation
	3.4 Monitor limb oedema management, conduct necessary actions within prescribed treatment plan and scope of role and responsibilities as defined by the organisation, and report any recommendations to the physiotherapist in a timely manner
	3.5 Correctly position client according to client's

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	condition, modesty and treatment or program activities and according to the directive of the physiotherapist
	3.6 Talk to client about treatment or program activities and where possible seek feedback about comfort and understanding during the session
	3.7 Create a treatment or program environment that encourages clients to ask questions about progress and activities
	3.8 Take appropriate and prompt action in response to any indicators of adverse reaction to the program or treatment and report to physiotherapist
4. Comply with supervisory requirements	4.1 Provide client progress feedback to the treating physiotherapist
	4.2 Report client difficulties and concerns to the treating physiotherapist before proceeding with treatment
	4.3 Implement variations to the program according to the advice of the physiotherapist
	4.4 Identify and manage client adherence issues, including subjective and objective reporting of client response to the program, and report to the physiotherapist in a timely manner
	4.5 Report any client misunderstanding or confusion to the physiotherapist in a timely manner
	4.6 Identify and note any difficulties the client experiences with the program, including biomechanical and musculo-skeletal issues, and report to physiotherapist in a timely manner
	4.7 Seek assistance when client presents with needs or signs outside limits of own authority, skills and/or knowledge
5. Clean and store equipment	5.1 Clean equipment according to manufacturer's recommendations, infection control requirements and organisation protocols
	5.2 Store equipment according to manufacturer's

HLTAHA004 Support client independence and community participation

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTCR402C/HLTCR403C. Significant changes to elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Minimum work hours added. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to work with clients in their home and community to facilitate rehabilitation goals through supporting independence in daily living and optimising community access and participation in the context of a rehabilitation plan.

This unit applies to workers in the community and should be performed under the direction and supervision (direct, indirect or remote) of a health professional.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Clarify the relevance of independence and community participation to rehabilitation goals	1.1 Clarify rehabilitation plan details with the supervising health professional 1.2 Work with the supervising health professional to identify client access support requirements and daily living activities that need to be addressed as part of the

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	rehabilitation plan
	1.3 Work with the supervising health professional to identify the function of community rehabilitation in supporting client access and daily living activities that could enhance progress against rehabilitation goals
	1.4 Participate in rehabilitation planning, involving the supervising health professional and client, to provide adequate and appropriate resources to promote independence
	1.5 Clarify with the supervising health professional concerns about client safety in relation to community access and daily living activities
2. Promote client independence and community participation	2.1 Identify all support and/or services provided to the client in conjunction with the health team
	2.2 Assist client to determine strategies which supports progression towards identified rehabilitation goals
	2.3 Promote benefits of daily living activities and community participation in the terms of the client's rehabilitation goals
	2.4 Discuss with supervising health professional opportunities for daily living activities and community participation that will support rehabilitation goals, including those that maybe outside the rehabilitation plan
	2.5 Work with the client and other community workers and services to identify and overcome concerns through provision of coordinated and consistent supports to the client
3. Assist with client independence and community participation	3.1 Recognise client concerns about participating in daily living activities and community access
	3.2 Work with the client to develop strategies to overcome client concerns, under the supervision of the health professional
	3.3 Identify any aides, appliances, modifications or other services and/or supports that might be required to

	facilitate client and discuss with supervising health professional
	3.4 Provide information and support to facilitate interest and desire to use any aides, appliances and modifications in a safe and effective way
4. Monitor impact of increased client independence and community participation on rehabilitation goals	4.1 Monitor outcomes that indicate involvement in daily living activity and community participation is supporting the rehabilitation goals
	4.2 Identify any negative impacts and report to supervising health professional
	4.3 Recognise medical issues and risk factors related to activities of daily living
	4.4 Recognise wellness and medical issues prior to providing support
	4.5 Apply strategies to involve the client in the monitoring and evaluation process
	4.6 Provide client with regular feedback of progress
	4.7 Work with the client to self monitor progress
5. Document client information	5.1 Use accepted protocols to document information relating to the rehabilitation program in line with organisation requirements
	5.2 Provide regular feedback to the client's care team, including positive impact on the client
	5.3 Use appropriate terminology and format to document the client's progress, including any barriers or challenges to the rehabilitation plan

Foundation Skills

The Foundation Skills describe those required skills (such as language, literacy, numeracy and employment skills) that are essential to performance.

© Commonwealth of Australia, 2025 HumanAbility

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTAHA004 Support client independence and community participation

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTCR402C/HLTCR403C. Significant changes to elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Minimum work hours added. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- facilitated 3 different clients, 1 in a simulated environment and 2 in the workplace, to access and participate in the community within the context of rehabilitation plans
- assisted with facilitation of 3 different clients, 1 in a simulated environment and 2 in the workplace, involvement and participation in daily living activities within the context of rehabilitation plans
- performed the activities outlined in the performance criteria of this unit during a period of at least 120 hours of work

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- cross cultural issues in a community rehabilitation context
- community care service providers
- work health and safety (WHS) issues and requirements, risk assessment and risk management associated with working in client homes and the community
- philosophy and values of community rehabilitation
- psychological impact of illness and/or injury, especially in relation to client participation in daily living activities and routines

© Commonwealth of Australia, 2025 HumanAbility

- range of aides, appliances, modifications and services that could promote client participation in daily living activities and facilitate community access
- relevant national and/or state-based community services and programs and local community care service providers
- importance of community access and participation to client well being
- motivational strategies to promote client interest in accessing and participating in the community
- the importance and meaning of home and belongings to clients and the nature and significance of working in the client's home and community settings
- principles and practices of self management

Assessment Conditions

All aspects of the performance evidence must have been demonstrated using simulation prior to being demonstrated in the workplace under the direction and supervision (direct, indirect, remote) as determined by the health professional.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including rehabilitation plans and any relevant equipment outlined in the plan
- modelling of industry operating conditions and contingencies, including provision of services to real people

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

- legal and ethical considerations relevant to allied health, including:
  - privacy, confidentiality and disclosure
  - duty of care
  - work role boundaries – responsibilities and limitations of own role and other allied health team members and nursing, medical and other personnel
  - work health and safety (WHS):
    - especially how it relates to implementing physiotherapy mobility and movement programs
    - manual handling including identification and control of manual task risk factors
- organisation policy and procedures in relation to:
  - infection control as it relates to the allied health assistant's role in implementing physiotherapy mobility and movement programs
  - other specific organisation policies or procedures, including supervisory and reporting protocols
- factors that facilitate an effective and collaborative working relationship
- record keeping practices and procedures in relation to diagnostic and therapeutic programs/treatments

Assessment Conditions

All aspects of the performance evidence must have been demonstrated using simulation prior to being demonstrated in a therapeutic workplace under the direction and supervision (direct, indirect, remote) as determined by the physiotherapist and/or occupational therapist.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including individualised plans and any relevant equipment outlined in the plan
- modelling of industry operating conditions and contingencies, including provision of services to real people

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTAHA006 Assist with basic foot hygiene

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Minimum work hours added. Removal of pre-requisite. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to assist with basic foot hygiene under the direction of a podiatrist, including skin and nail care and applying dressings, padding and cushioning.

This unit applies to allied health assistants and should be performed under the direction and supervision (direct, indirect or remote) of an allied health professional.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for basic foot hygiene	1.1 Interpret and respond to client podiatry care plan and occasion of care requirements as prescribed by supervising podiatrist 1.2 Determine client availability according to organisation protocols 1.3 Gather necessary equipment

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.4 Undertake steps to meet infection control requirements
	1.5 Prepare for basic foot hygiene to comply with legislation, regulatory and organisation/practice requirements
2. Perform basic foot hygiene	2.1 Explain to the client the purpose, rationale and requirements of the foot hygiene session
	2.2 Determine the client's understanding of the purpose, rationale and requirements of each part of the foot hygiene session
	2.3 Identify any condition indicating the client is at high risk that requires podiatrist attention
	2.4 Assist client in and out of any shoes, socks and/or hosiery
	2.5 Position the client prior to foot hygiene session to reduce risk to provider and client
	2.6 Implement necessary infection control measures
	2.7 Perform basic foot hygiene according to the directions of the podiatrist and using appropriate infection control precautions, especially in relation to air borne particles
	2.8 Apply appropriate dressings to any skin breaks which might result from treatment
	2.9 Provide feedback that reinforces the podiatrist's advice
	2.10 Identify and manage client compliance issues
	2.11 Work with client to determine and plan any follow up requirements and dates
	2.12 Seek assistance when client presents with needs or signs outside limits of own authority
	2.13 Report client difficulties to the supervising podiatrist
3. Apply padding and	3.1 Explain to the client the purpose and rationale of the

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
cushioning as prescribed by the supervising podiatrist	dressing, padding or cushioning
	3.2 Determine the client's understanding of the purpose and rationale of the dressing, padding or cushioning
	3.3 Correctly position the client
	3.4 Implement necessary infection control measures, including disposal of used padding and cushioning according to infection control protocols
	3.5 Apply padding and cushioning according to directions of podiatrist
	3.6 Provide feedback that reinforces the podiatrist's advice
	3.7 Identify and manage client compliance issues
	3.8 Work with client to determine and plan any follow up requirements and dates
	3.9 Seek assistance when client presents with needs or signs outside limits of own authority
	3.10 Report client difficulties to the supervising podiatrist
4. Comply with supervisory requirements	4.1 Provide podiatry assistance according to the instruction of treating podiatrist
	4.2 Provide client progress feedback to the treating podiatrist
	4.3 Report client difficulties and concerns to the treating podiatrist
	4.4 Implement variations to the podiatry care according to the advice of the treating podiatrist
5. Clean and store equipment	5.1 Collect, handle, manage and dispose of biological waste material according to organisation guidelines and infection control requirements
	5.2 Prepare equipment for sterilisation according to manufacturer and organisation requirements
	5.3 Store equipment according to manufacturers requirements and organisation protocols

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	5.4 Report equipment faults to appropriate person
6. Document client information	6.1 Document occasion of basic foot hygiene according to organisation requirements
	6.2 Document referral to supervising podiatrist
	6.3 Use appropriate terminology to document symptomatic expression of identified problems

Foundation Skills

The Foundation Skills describe those required skills (such as language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTAHA006 Assist with basic foot hygiene

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Minimum work hours added. Removal of pre-requisite. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- assisted with basic foot hygiene to at least 3 clients, 1 in a simulated environment and 2 in the workplace, including:
  - cutting and filing nails
  - identifying pathological nail and skin conditions
  - applying simple wound dressings to at least 3 different conditions
  - applying padding and cushioning to at least 3 different conditions
  - applying medicaments, including:
    - emollients
    - astringents
    - moisturisers
    - antiseptics
- applied a wound dressing for an iatrogenic wound
- safely and effectively used podiatry instruments and electrical equipment, including an electric drill
- performed the activities outlined in the performance criteria of this unit during a period of at least 120 hours of work

© Commonwealth of Australia, 2025 HumanAbility

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- client treatment plans or foot care plan
- goals and limitations of podiatry intervention and variations in podiatry conditions
- basic anatomy and physiology of the foot, including medical terminology, structure and functioning of the skin and integuments, and basic understanding of foot pathology
- the function of medicaments:
  - emollients
  - astringents
  - moisturisers
  - antiseptics
- principles and protocols of:
  - aseptic technique
  - foot hygiene
- organisation policy and procedures in relation to:
  - infection control
  - record keeping and reporting
  - other specific organisation procedures, including supervisory and reporting protocols
- legal and ethical considerations relevant to allied health:
  - privacy, confidentiality and disclosure
  - duty of care
  - work role boundaries – responsibilities and limitations of self and other allied health team members and nursing, medical and other personnel
  - work health and safety (WHS):
    - manual handling, including identification and control of manual task risk factors

Assessment Conditions

All aspects of the performance evidence must have been demonstrated using simulation prior to being demonstrated in a therapeutic workplace under the direction and supervision (direct, indirect, remote) as determined by the podiatrist.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - individualised plans and any relevant equipment outlined in the plan
  - podiatry instruments and electrical equipment including:
    - wound dressings
    - padding and cushioning

HLTAHA007 Assist with podiatric procedures

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Minimum work hours added. Removal of pre-requisite. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to assist with procedures performed by the podiatrist. Procedures may include surgical procedures of the skin and nails; preparation, modification and repair of orthotic devices and footwear.

This unit applies to allied health assistants and should be performed under the direction and supervision (direct, indirect or remote) of an allied health professional.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for the surgical podiatry procedure	1.1 Obtain information from the podiatrist and the client's record, including the podiatry care plan relevant to the procedure to be undertaken 1.2 Determine client availability according to organisation protocols 1.3 Conform to all infection control guidelines and requirements specified by the National Infection Control

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	Guidelines for Podiatrists and the protocols of the organisation
	1.4 Ensure the environment in which the procedure is to be performed conforms to work health safety (WHS) standards and protocols
	1.5 Gather necessary equipment, instruments and materials
	1.6 Prepare the environment for surgery, including cleansing and disinfecting of surfaces, equipment and materials
	1.7 Ensure all instruments, dressings and related materials have undergone sterilisation according to the guidelines and protocols
	1.8 Ensure work flow and set up for work flow by additional persons in the environment comply with the guidelines and protocols
2. Assist with the surgical podiatry procedure	2.1 Determine procedural requirements from the client's record and the treating podiatrist
	2.2 Provide the physical environment required to meet procedural requirements in a manner that is safe for the client as directed by the podiatrist
	2.3 Follow the directions of the podiatrist to provide assistance during the procedure
	2.4 Follow all infection control and WHS protocols to ensure the procedure conforms to organisation, state, national and legislated requirements
	2.5 Assist with care and supervision of the patient during procedure
	2.6 Follow directions for instrument handling, equipment handling material handling and any additional assistance required from the podiatrist
	2.7 Safely and correctly use equipment and instrumentation to collect assessment information
	2.8 Follow organisation guidelines and protocols for the safe and appropriate handling and disposal of hazardous

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	and sharps materials
	2.9 Provide documentation assistance and support as directed by the podiatrist
3. Assist with templating for manufacture of orthotic devices	3.1 Determine requirements from the client's record and treating podiatrist
	3.2 Gather equipment and materials required for templating and foot measurement
	3.3 Provide the physical environment required to meet procedural requirements in a manner that is safe for the client and operator
	3.4 Assist with templating and foot measurement according to podiatrist's instruction
	3.5 Work with podiatrist and client, within organisation guidelines, to determine appropriate follow up and further appointments
4. Assist with modification to orthoses and footwear	4.1 Determine procedural requirements from the client's record and the treating podiatrist
	4.2 Seek assistance or clarification to procedural directions
	4.3 Provide the physical environment required to meet procedural requirements in a manner that is safe
	4.4 Assist with modifications according to the treatment plan and prescriptions from supervising podiatrist
	4.5 Present modified orthoses or footwear to podiatrist for assessment
	4.6 Interpret and respond to instructions from podiatrist regarding further procedural or modification requirements
	4.7 Provide instructions and assistance to client as directed by the podiatrist
	4.8 Work with podiatrist and client, within organisation guidelines, to determine appropriate follow up and further appointments

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	4.9 Use machinery and equipment for modifications in accordance with manufacturer's guidelines, WHS requirements and organisation protocols
5. Assist with support and advice to clients in the selection of footwear	5.1 Under the guidance of podiatrist use appropriate devices and procedures to measure for fit
	5.2 Confirm measurements with supervising podiatrist
	5.3 Under the guidance of supervising podiatrist support and educate client in the selection of footwear and fit
	5.4 Seek assistance or clarification to procedural directions
	5.5 Work with podiatrist and client, within organisation guidelines, to determine appropriate follow up and further appointments
6. Comply with supervisory requirements	6.1 Provide podiatry assistance according to the instruction of treating podiatrist
	6.2 Provide client progress feedback to the treating podiatrist
	6.3 Seek assistance when client presents with needs or signs outside limits of own authority or competence
	6.4 Report client difficulties and concerns to the treating podiatrist
	6.5 Implement variations to the podiatry care according to the advice of the treating podiatrist
7. Clean, sterilise and store equipment	7.1 Clean equipment according to manufacturers and organisation requirements
	7.2 Prepare equipment and instruments for sterilisation according to organisation protocols
	7.3 Store equipment according to manufacturers requirements and organisation protocols
	7.4 Report equipment faults to appropriate person

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	7.5 Ensure consultation environment is maintained according to guidelines and organisation protocols
8. Document client information	8.1 Use accepted protocols to document information in line with organisation requirements
	8.2 Use appropriate terminology to document client information

Foundation Skills

The Foundation Skills describe those required skills (such as language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTAHA007 Assist with podiatric procedures

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Minimum work hours added. Removal of pre-requisite. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- assisted with a minimum of 7 different procedures, including:
  - surgical assistance
  - basic assessment
  - orthotic/footwear preparation and modification
- worked safely and effectively with electrical equipment and machinery and potentially hazardous materials
- safely and appropriately used materials, including:
  - animal derived leathers
  - synthetics
  - solvents
  - adhesives
- performed the activities outlined in the performance criteria of this unit during a period of at least 120 hours of work

© Commonwealth of Australia, 2025 HumanAbility

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- podiatry procedures, including:
  - orthotic manufacture/modification
  - assessment
  - podiatric surgery
- conditions treated by a podiatrist
- basic anatomy and physiology of the skin and nails relevant for the role
- structure and function of the skin and integuments
- common pathological conditions of the skin and nails
- disease processes relevant to the client group/s
- identification and purpose of podiatry surgical instruments
- basic biomechanics of the lower limb
- principles and guidelines of orthotic devices
- principles of footwear selection and fitting
- organisation policy and procedures in relation to:
  - infection control protocols
  - supervisory and reporting protocols
  - record keeping requirements
- client treatment plans, foot care or podiatry plans
- goals and limitations of podiatry intervention
- medical terminology in relation to podiatric procedures
- legal and ethical considerations relevant to allied health:
  - privacy, confidentiality and disclosure
  - duty of care
  - work role boundaries – responsibilities and limitations of self and other allied health team members and nursing, medical and other personnel
  - WHS:
    - manual handling including identification and control of manual task risk factors

Assessment Conditions

Skills must have been demonstrated in in a therapeutic workplace under the direction and supervision (direct, indirect, remote) as determined by the podiatrist with the addition of simulations and scenarios where the full range of contexts and situations have not been provided in the workplace. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including individualised plans and any relevant equipment outlined in the plan

© Commonwealth of Australia, 2025 HumanAbility

- modelling of industry operating conditions and contingencies, including provision of services to real people

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015 /AQTF mandatory competency requirements for assessors.

Assessment Requirements for HLTAHA008 Assist with podiatry assessment and exercise

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Minimum work hours added. Removal of pre-requisite.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- assisted with 3 different clients, 1 in a simulated environment and 2 in the workplace, in relation to specific podiatry foot assessment and exercise sessions
- assisted with 3 balance and fall monitoring sessions, 1 in a simulated environment and 2 in the workplace
- performed the activities outlined in the performance criteria of this unit during a period of at least 120 hours of work

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- structure and function of the skin and integuments
- basic biomechanics of the lower limb and gait cycle
- basic anatomy and physiology of the foot
- podiatry exercise and rehabilitation principles
- safe and effective use of instrumentation used in podiatry assessment procedures and equipment used in podiatry exercise and rehabilitation programs
- client treatment plans, goals and limitations of podiatry intervention

© Commonwealth of Australia, 2025 HumanAbility

- concepts and procedures for stepping down treatment or intervention when client becomes distressed, in pain or wishes to stop
- medical terminology relevant to podiatry assessment and exercise
- organisation policy and procedures in relation to:
  - infection control as it relates to the allied health assistant's role in assisting with podiatry assessment and exercise
  - other specific organisation policies or procedures, including supervisory and reporting protocols
- legal and ethical considerations relevant to allied health:
  - privacy, confidentiality and disclosure
  - duty of care
  - work role boundaries – responsibilities and limitation of self and other allied health team members and nursing, medical and other personnel
  - work health and safety (WHS):
    - manual handling including identification and control of manual task risk factors

Assessment Conditions

All aspects of the performance evidence must have been demonstrated using simulation prior to being demonstrated in a therapeutic workplace under the direction and supervision (direct, indirect, remote) as determined by the podiatrist.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including individualised plans and any relevant equipment outlined in the plan
- modelling of industry operating conditions and contingencies, including provision of services to real people

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTAHA009 Assist in the rehabilitation of clients

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Minimum work hours added. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to receive and respond to rehabilitation programs developed by allied health professionals.

This unit applies to allied health assistants and should be performed under the direction and supervision (direct, indirect or remote) of an allied health professional.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan to deliver a rehabilitation program	1.1 Obtain information about the rehabilitation program from an allied health professional and rehabilitation plan 1.2 Consult allied professional about the rehabilitation plan requirements and desired client outcomes 1.3 Identify program requirements outside scope of role and responsibilities as defined by the organisation and discuss with allied health professional 1.4 Identify and confirm impact of therapeutic program's

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	contribution to the overall rehabilitation outcome for the client
	1.5 Obtain information about medical and psychosocial conditions that may impact on rehabilitation outcomes for client
	1.6 Determine client availability according to organisation protocols
	1.7 Identify and plan for any risk and safety issues that may impact on the client's ability to participate in program
	1.8 Prepare suitable equipment and environment for rehabilitation program
2. Assist with the development of a rehabilitation program	2.1 Assist allied health professional to work with client to identify current skills and abilities and how these can be built upon to manage their lives and environment more effectively
	2.2 Assist allied health professional to work with client to develop their goals and priorities in terms of specific skills required to manage their lives in the short and medium term
	2.3 Identify skills that need to be developed that are outside scope of role and responsibilities as defined by the organisation and refer to the allied health professional
	2.4 Support the client to identify methods that will build upon their strengths when developing, regaining or retaining skills and abilities
	2.5 Follow specific directions from the allied health professional for the fabrication and adaptation of therapeutic aids and equipment
	2.6 Maintain and update resources for therapy and recreational programs
	2.7 Work with professional and client to determine methods of evaluating the effectiveness of activities and methods

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
3. Assist with the delivery of a rehabilitation plan	3.1 Gather the equipment and materials to deliver the rehabilitation program, in line with client needs, specifications of the allied health professional and legislative and organisation guidelines 3.2 Check safety and efficiency of any equipment and material and seek advice where safety issues arise 3.3 Support client to carry out rehabilitation activities in ways that promote safety, involvement and confidence, and adhere to the cultural and spiritual beliefs and preference of the client 3.4 Provide constructive and timely feedback to client about involvement in rehabilitation activities 3.5 Recognise when client becomes distressed, in pain or communicates their desire to slow down, change activity or stop and follow stepping down procedures outlined in treatment plan or organisational guidelines and report to the treating physiotherapist
4. Assist with the evaluation of a rehabilitation plan	4.1 Assist the allied health professional to work with client to review progress 4.2 Monitor use of adaptive equipment as directed by the therapist
5. Comply with supervisory requirements	5.1 Identify and note any difficulties the client experiences completing the therapy programs and interventions and report to allied health professional in a timely manner 5.2 Identify and manage client adherence issues, including subjective and objective reporting of client response to the program, and report to the allied health professional in a timely manner 5.3 Report any client misunderstanding or confusion to the allied health professional in a timely manner 5.4 Seek assistance when client presents with needs or signs outside limits of own authority, skills and/or knowledge

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	5.5 Report client difficulties to the supervising allied health professional for advice before continuing the program
	5.6 Participate in supervision processes with the treating allied health professional in accordance with organisation protocol
6. Clean and store equipment and materials	6.1 Clean equipment and materials according to manufacturers requirements
	6.2 Store equipment and materials according to manufacturers requirements and organisation protocols
	6.3 Report equipment faults to appropriate person
7. Document client information	7.1 Use accepted protocols to document information relating to the rehabilitation program in line with organisation requirements
	7.2 Provide regular feedback to the client's care team
	7.3 Use appropriate terminology to document symptomatic expression of identified problems related to the rehabilitation program

Foundation Skills

The Foundation Skills describe those required skills (such as language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTAHA009 Assist in the rehabilitation of clients

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Minimum work hours added. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- worked collaboratively with 3 clients, 1 in a simulated environment and 2 in the workplace, in the pursuit of rehabilitation outcomes in line with established rehabilitation principles and practices
- performed the activities outlined in the performance criteria of this unit during a period of at least 120 hours of work

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- the principles and practices of rehabilitation
- the impact of illness on the client's functional performance
- where to access resources, aids and information for rehabilitation programs
- strategies to support, motivate and encourage clients in a rehabilitation program
- concepts and procedures for stepping down treatment or intervention when client becomes distressed, in pain or wishes to stop
- organisation policy and procedures in relation to:
  - infection control as it relates to the allied health assistant's role in assisting with client rehabilitation
  - record keeping in relation to rehabilitation programs

© Commonwealth of Australia, 2025 HumanAbility

  - quality assurance, best practice and accreditation standards
  - other specific organisation policies or procedures, including supervisory and reporting protocols
- legal and ethical considerations relevant to allied health:
  - codes of practice for work in occupational therapy or other relevant allied health areas
  - privacy, confidentiality and disclosure
  - duty of care
  - work role boundaries – responsibilities and limitations including when and how to provide feedback about client
  - work health and safety (WHS):
    - manual handling including identification and control of manual task risk factors

Assessment Conditions

All aspects of the performance evidence must have been demonstrated using simulation prior to being demonstrated in a therapeutic workplace under the direction and supervision (direct, indirect, remote) as determined by the allied health professional.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including individualised plans and any relevant equipment outlined in the plan
- modelling of industry operating conditions and contingencies, including provision of services to real people

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTAHA010 Assist with the development and maintenance of client functional status

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Minimum work hours added. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to support clients to participate in developmental activities that will enhance or maintain functional status.

This unit applies to allied health assistants and should be performed under the direction and supervision (direct, indirect or remote) of an allied health professional.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan to deliver a daily living skills program based on identified goals	1.1 Obtain information about the daily living skills program from an allied health professional 1.2 Consult allied health professional about the daily living skills program requirements and desired client outcomes 1.3 Use screening and data collection tools to gather information on functional status and performance to

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	feedback to allied health professional in line with role
	1.4 Identify program requirements outside scope of role and responsibilities as defined by the organisation and discuss with allied health professional
	1.5 Identify and confirm impact of the program's contribution to the client's overall care plan
	1.6 Determine client availability according to organisation protocols
	1.7 Identify cultural and spiritual issues that might have an impact on client's maintenance of daily living function
	1.8 Identify and plan for any risk and safety issues that may impact on the client's ability to participate in program
2. Assist with developing daily living skill and maintenance program based on identified goals	2.1 Assist professional to work with client and carers to identify current skills and abilities and how these can be built upon to participate more meaningfully in the client's environment(s)
	2.2 Assist professional to work with client and carers to identify their needs and priorities in terms of specific skill development and maintenance
	2.3 Identify skills that need to be developed that are outside scope of role and responsibilities as defined by the organisation and refer to the allied health professional
	2.4 Assist allied health professional to work with the client and carers to develop goals that will enable work at the client's own pace to acquire and retain skills for daily living
	2.5 Support the client and carers to identify methods that will build upon their strengths when developing, and retaining daily living skills
3. Deliver daily living skill development and maintenance program	3.1 Gather the equipment and materials to deliver the daily living program, in line with client needs, specifications of the allied health professional and legislative and organisation guidelines

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	3.2 Check safety and efficiency of any equipment and materials
	3.3 Support client to carry out activities in ways that promote safety, involvement and confidence, and adhere to the cultural and spiritual beliefs and preference of the client
	3.4 Provide support according to principles and practices of active support, in a manner that is respectful of the client and provides encouragement and motivation to optimise client interest and involvement
	3.5 Set up the environment to optimise client interest, participation and involvement
	3.6 Identify and respond appropriately to any risk to clients or others and report accordingly
	3.7 Provide reinforcement and constructive feedback to client and carers about involvement in activities
	3.8 Recognise when client becomes distressed, in pain or communicates their desire to slow down, change activity or stop and follow stepping down procedures outlined in treatment plan or organisational guidelines
	3.9 Seek advice if safety issues arise
4. Assist with evaluating daily living skill development and maintenance program	4.1 Assist allied health professional to work with client to review progress
	4.2 Work with professional and client to determine methods of evaluating the effectiveness of activities and methods
	4.3 Under direction of an occupational therapist, adapt the environment and activity to maximise functional independence
5. Comply with supervisory requirements	5.1 Seek assistance when client presents with needs or signs outside limits of own authority, skills and/or knowledge
	5.2 Report client difficulties to the supervising allied health professional for advice before continuing the

Assessment Requirements for HLTAHA010 Assist with the development and maintenance of client functional status

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Minimum work hours added. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- assisted in the development and implementation of active support strategies for 3 clients, 1 in a simulated environment and 2 in the workplace
- worked collaboratively with 3 clients and carers, 1 in a simulated environment and 2 in the workplace, in the pursuit of daily living skill development outcomes
- performed the activities outlined in the performance criteria of this unit during a period of at least 120 hours of work

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete the tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- principles and practices of active support and the promotion of individual's rights, choices and well being when supporting participation in developmental activities
- variability and complexities of workplace settings and how they affect service delivery
- quality assurance, best practice and accreditation standards
- the impact of disability and ageing on daily living and working skills of clients, carers and others
- strategies to support, motivate and encourage clients and carers
- concepts and procedures for stepping down treatment or intervention when client becomes distressed, in pain or wishes to stop

© Commonwealth of Australia, 2025 HumanAbility

- organisation policy and procedures in relation to:
  - record keeping
  - other specific organisation policies or procedures, including supervisory and reporting protocols
- record keeping practices and procedures in relation to diagnostic and therapeutic programs/treatments
- legal and ethical considerations relevant to allied health:
  - codes of practice for work in occupational therapy
  - privacy, confidentiality and disclosure
  - duty of care
  - discrimination
  - human rights
  - work role boundaries – responsibilities and limitations including when and how to provide feedback about client
  - work health and safety (WHS):
    - manual handling including identification and control of manual task risk factors

Assessment Conditions

All aspects of the performance evidence must have been demonstrated using simulation prior to being demonstrated in a therapeutic workplace under the direction and supervision (direct, indirect, remote) as determined by a physiotherapist and/or occupational therapist.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - daily living equipment
  - individualised plans and any relevant equipment outlined in the plan
  - screening and data collection tools
- modelling of industry operating conditions and contingencies, including provision of services to real people

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTAHA011 Conduct group sessions for individual client outcomes

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Minimum work hours added.

Application

This unit describes the skills and knowledge required to plan, prepare and implement group activities to meet individual client outcomes.

This unit applies to allied health assistants and should be performed under the direction and supervision (direct, indirect or remote) of an allied health professional.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan for group sessions	1.1 Obtain information about the purpose of the group sessions from an allied health professional and the desired individual client outcomes 1.2 Identify requirements outside scope of role and responsibilities as defined by the organisation and discuss with allied health professional 1.3 Identify and confirm impact of the program's contribution to the clients' overall care plan

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.4 Determine client availability according to organisation protocols
	1.5 Determine client appropriateness according to client profile
2. Assist with the development of group sessions	2.1 Plan group activities that are consistent with client needs and recognise physical abilities and limitations of each client
	2.2 Plan group activities that are consistent with the interests, preferences and beliefs of the clients
	2.3 Plan group activities with consideration of the clients' pace and timing requirements
	2.4 Plan group activities according to the size and composition of the group
	2.5 Plan group session to maximize the involvement of all group members
	2.6 Establish a balance between tasks to be accomplished and the group process
	2.7 Identify possible risk to successful group activities and adjust plan to minimise risk
	2.8 Confirm group session plan with allied health professional
	2.9 Gather and/or prepare materials and equipment required for the group session and check for safety and suitability
3. Conduct group activity	3.1 Arrange the environment to encourage full participation by all group members
	3.2 Seek agreement on the purpose, process and intended outcomes of the group activity with the group
	3.3 Discuss the group activity with the group to encourage as much participation as possible
	3.4 Work with the group to establish ground rules
	3.5 Provide each group member with the necessary

Assessment Requirements for HLTAHA012 Support the development of speech and communication skills

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Minimum work hours added. Removal of pre-requisite.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- worked with 3 different clients, 1 in a simulated environment and 2 in the workplace, for speech/language therapeutic outcomes following an established speech pathology program
- performed the activities outlined in the performance criteria of this unit during a period of at least 120 hours of work

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- normal speech and language processes across the lifespan
- the range of communication disorders affecting areas of:
  - speech (articulation, phonology)
  - expressive and receptive language
  - reading and writing
  - pragmatics
  - fluency
  - voice
  - cognitive skills (memory, attention, new learning, problem solving)

© Commonwealth of Australia, 2025 HumanAbility

- communication disorders that may arise from:
  - congenital abnormalities
  - developmental delay
  - acquired injury and disease
  - degenerative disease
- the anatomy and physiology of the body systems pertaining to structures and systems affecting communication
- legal and ethical considerations relevant to allied health:
  - duty of care
  - discrimination
  - informed consent
  - work health and safety (WHS):
    - manual handling including identification and control of manual task risk factors

Assessment Conditions

All aspects of the performance evidence must have been demonstrated using simulation prior to being demonstrated in a therapeutic workplace under the direction and supervision (direct, indirect, remote) as determined by the speech pathologist.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including individualised plans and any relevant equipment outlined in the plan
- modelling of industry operating conditions and contingencies, including provision of services to real people

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTAHA013 Provide support in dysphagia management

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Minimum work hours added. Removal of pre-requisite. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to assist a speech pathologist to support clients participating in therapy programs to improve swallowing and/or to maintain independence in the management of dysphagia.

This unit applies to allied health assistants and should be performed under the direction and supervision (direct, indirect or remote) of an allied health professional.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian / New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for support of treatment and monitoring programs to promote safe swallowing and eating	1.1 Obtain information about requirements from the speech pathologist 1.2 Determine need for interpreter where required 1.3 Confer with speech pathologist about any ambiguities or requirements outside scope of role and responsibilities as defined by the organisation

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
2. Deliver therapeutic program under supervision of speech pathologist	2.1 Obtain consent from the individual client, or a third party where the individual is not in a position to provide this consent independently, before commencing the program 2.2 Confirm client/carer's understanding of requirements of the therapeutic program 2.3 Provide mealtime assistance to client, under instruction of speech pathologist, including the reinforcement of positioning and strategies to support safe swallowing and maximum level of independence of eating and drinking 2.4 Prepare texture modified foods and fluids as determined by the speech pathologist and in accordance with the food safety program of the organisation 2.5 Provide the client with relevant information and advice, as instructed by the speech pathologist, at a level and pace appropriate to the client's level of understanding, culture and background, preferred way of communication and need 2.6 Refer questions outside scope of role and responsibilities as defined by the organisation to speech pathologist and/or relevant member of health care team 2.7 Provide client with sufficient time, opportunity and encouragement to practise existing and newly developed skills 2.8 Provide set up and support of the client during assessment of swallowing, performed by speech pathologist 2.9 Carry out supplementary treatment programs as instructed by the speech pathologist 2.10 Identify adverse reactions/events associated with dysphagia and respond according to the detailed risk management framework
3. Monitor client's management	3.1 Work with the speech pathologist, care team and the

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Minimum work hours added. Removal of pre-requisite. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- delivered therapeutic support and skill development for 3 clients with dysphagia, 1 in a simulated environment and 2 in the workplace
- performed the activities outlined in the performance criteria of this unit during a period of at least 120 hours of work

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manages tasks and manage contingencies in the context of the work role. This includes knowledge of:

- secondary complications of dysphagia and an awareness of risk management protocols in response to adverse reactions/events
- basic anatomy and physiology of body systems pertaining to structures affecting eating and swallowing
- normal processes of eating and swallowing and changes to swallowing that occur over the lifespan
- organisation food safety program and procedures
- postures and positioning for safe swallowing
- techniques used in assessment of eating and swallowing, including:
  - bedside assessment

© Commonwealth of Australia, 2025 HumanAbility

    - video fluoroscopy
- disorders of eating and swallowing that may arise from:
    - acquired injury and disease
    - congenital abnormalities
    - degenerative disease
    - developmental delay
- legal and ethical considerations relevant to allied health:
    - duty of care
    - informed consent
    - work health and safety (WHS):
        - manual handling including identification and control of manual task risk factors

Assessment Conditions

All aspects of the performance evidence must have been demonstrated using simulation prior to being demonstrated in a therapeutic workplace under the direction and supervision (direct, indirect, remote) as determined by the speech pathologist.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including individualised plans and any relevant equipment outlined in the plan
- modelling of industry operating conditions and contingencies, including provision of services to real people

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTAHA014 Assist and support the use of augmentative and alternative communication systems

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Minimum work hours added. Removal of pre-requisite.

Application

This unit describes the skills and knowledge required to support clients who use total communication systems, including the preparation of resources.

This unit applies to allied health assistants and should be performed under the direction and supervision (direct, indirect or remote) of an allied health professional.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for the development of augmentative and alternative communication systems	1.1 Obtain information about requirements from the speech pathologist 1.2 Confirm the communication goals with the speech pathologist 1.3 Determine need for interpreter 1.4 Confer with allied health professional about any ambiguities or requirements outside scope of role and

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	responsibilities as defined by the organisation
2. Assist in the development of augmentative and alternative communication systems	2.1 Confirm the nature of the communication system and implications for resource requirements with speech pathologist
	2.2 Confirm client's previous and current abilities with the speech pathologist to inform choice and presentation of resources
	2.3 Select resources following speech pathologist's directions
	2.4 Consult with speech pathologist to ensure that resources are appropriate to the individual and their communication system, the type of therapy and the specified communication goals
	2.5 Identify existing resources, adapt them and use them in an imaginative and flexible manner within the directions of the speech pathologist
	2.6 Make resources as directed by speech pathologist
	2.7 Ensure resources are not hazardous to the individual or others, and satisfy health and safety requirements
3. Support the use of augmentative and alternative communication systems	3.1 Identify the type of communication system used by a client prior to making contact
	3.2 Make appropriate power supply available
	3.3 Prepare appropriate resources and equipment to facilitate communication via the communication system
	3.4 Set out equipment and furniture for client comfort and optimum access to the communication system, in line with health and safety procedures and guidelines and according to the directions of the speech pathologist
	3.5 Liaise with the speech pathologist and other relevant health professionals to assist the client to access the system in regard to physical comfort and any specific positioning and mobility requirements
	3.6 Use appropriate mode of communication in

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	communicating with the client
4. Comply with supervisory requirements	4.1 Seek assistance when client presents with needs or signs outside limits of own authority, skills and/or knowledge
	4.2 Report client difficulties to the supervising allied health professional for advice before continuing the program
	4.3 Participate in supervision processes with the treating allied health professional in accordance with organisational protocol
5. Clean and store equipment	5.1 Clean any material and equipment according to manufacturers requirements
	5.2 Store material and equipment according to manufacturers requirements and organisation protocols
	5.3 Report equipment faults to appropriate person
6. Document client information	6.1 Use accepted protocols to document information relating to the program to assist with the use of a communication system in line with organisation requirements
	6.2 Use appropriate terminology in reporting

Foundation Skills

The Foundation Skills describe those required skills (such as language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTAHA014 Assist and support the use of augmentative and alternative communication systems

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Minimum work hours added. Removal of pre-requisite.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- provided therapeutic guidance for 3 clients in the use of communication systems under the direction of a speech pathologist, 1 in a simulated environment and 2 in the workplace, including:
  - positioning the client and managing the environment for optimum use of a communication system
  - designing and making communication systems to meet individual needs
- performed the activities outlined in the performance criteria of this unit during a period of at least 120 hours of work

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- communication needs of clients with congenital, developmental, acquired and progressive disabilities
- augmentative and alternative communication (AAC) systems and strategies available
- criteria used in the selection and application of AAC devices for people with complex communication needs
- work health and safety (WHS) policies and procedures that relate to the allied health assistant's role in implementing speech therapy programs

© Commonwealth of Australia, 2025 HumanAbility

Assessment Conditions

All aspects of the performance evidence must have been demonstrated using simulation prior to being demonstrated in a therapeutic workplace under the direction and supervision (direct, indirect, remote) as determined by the speech pathologist and/or occupational therapist.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including individualised plans and any relevant equipment outlined in the plan
- modelling of industry operating conditions and contingencies, including provision of services to real people

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTAHA015 Deliver and monitor a hydrotherapy program

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Minimum work hours added. Removal of pre-requisite.

Application

This unit describes the skills and knowledge required to support individuals and groups participating in hydrotherapy programs designed to restore optimum movement and functional independence.

This unit applies to allied health assistants and should be performed under the direction and supervision (direct, indirect or remote) of an allied health professional.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for hydrotherapy program	1.1 Confirm program requirements against the prescribed information provided by the allied health professional 1.2 Confer with allied health professional if requirements outlined in the program are not clear, do not take into account client needs and abilities or are beyond scope of role and responsibilities as defined by the organisation 1.3 Determine the clients' availability, according to the

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	organisation's protocols
	1.4 Gather necessary equipment for the program
	1.5 Prepare the setting for the program
	1.6 Ensure adequate staff are present to meet organisation's staff: client ratio requirements
	1.7 Obtain consent from the clients before commencing the program
2. Conduct the hydrotherapy program	2.1 Assist with program according to the instruction of treating allied health professional
	2.2 Explain the purpose, rationale and requirements of each part of the program to the clients
	2.3 Assist clients in and out of the pool safely and efficiently according to organisation manual handling policy and treatment goals
	2.4 Guide the clients to complete the program according to prescribed treatment plan
	2.5 Demonstrate components of hydrotherapy to client
	2.6 Provide the clients with sufficient time, opportunity and encouragement to practice existing and newly developed skills
	2.7 Observe client movement through water and provide feedback to reinforce understanding and the correct application of the program
	2.8 Monitor the clients during and after the program according to the prescribed treatment plan
	2.9 Identify and manage client adherence issues
	2.10 Identify the need for adjustment to the program and report to the treating physiotherapist in a timely manner
	2.11 Recognise when client becomes distressed, in pain or communicates their desire to slow down, change activity or stop by following stepping down procedures outlined in treatment plan or organisational guidelines
	2.12 Take appropriate and prompt action in response to any indicators of adverse reaction to the hydrotherapy

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	according to relevant protocols and guidelines
3. Respond to an aquatic emergency	3.1 Support the person(s) in difficulty as quickly as possible
	3.2 Remove any other individuals from danger
	3.3 Assess the factors involved in a water rescue, the type of rescue required and any equipment needs
	3.4 Identify hazards and take appropriate action to prevent further injury/harm to the casualty
	3.5 Perform water rescue
	3.6 Observe and describe the condition of the casualty to first aid provider
	3.7 Where necessary contact emergency services as soon as possible
	3.8 Record and report the incident according to, legislative, regulatory and organisation requirements
4. Assist client after hydrotherapy session	4.1 Identify support needs of client following a hydrotherapy session
	4.2 Provide support with mobility, showering and dressing
5. Comply with supervisory requirements	5.1 Provide client progress feedback to the treating allied health professional
	5.2 Report client difficulties and concerns to the treating allied health professional
	5.3 Implement variations to the program according to the advice of the treating allied health professional
6. Clean and store equipment	6.1 Clean equipment according to manufacturer's recommendations
	6.2 Store equipment according to manufacturer's

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	recommendations and the organisation's protocols
	6.3 Check and maintain equipment according to organisation protocols
	6.4 Report equipment faults to the appropriate person
7. Report and document information	7.1 Report suggested adjustments to hydrotherapy program, together with rationale, to the responsible allied health professional
	7.2 Provide client progress feedback to the treating allied health professional
	7.3 Report client difficulties and concerns to the treating allied health professional
	7.4 Implement variations to the program according to the advice of the treating allied health professional
	7.5 Document information about the program according to the organisation's protocols
	7.6 Use appropriate terminology to document symptomatic expression of identified problems related to the therapeutic program

Foundation Skills

The Foundation Skills describe those required skills (such as language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTAHA015 Deliver and monitor a hydrotherapy program

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Minimum work hours added. Removal of pre-requisite.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has:

- conducted 3 hydrotherapy programs, 1 in a simulated environment and 2 in the workplace
- responded to 2 different aquatic emergencies in a simulated environment
- performed the activities outlined in the performance criteria of this unit during a period of at least 120 hours of work

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- the physiological effects and benefits of active functional exercise
- principles of biomechanics, including:
  - mass
  - force
  - speed
  - acceleration
  - work
  - energy
  - power
  - strength

    - momentum
    - force arm
    - resistance arm
    - axis of rotation
    - cam
    - pulley
- basic musculo-skeletal anatomy, including:
    - joint types and function
    - major bones
    - major muscles
    - major joints
- anatomical terminology, including:
    - flexion
    - extension
    - rotation
    - abduction
    - adduction
    - circumduction
    - inversion
    - eversion
    - pronation
    - supination
    - horizontal flexion
    - horizontal extension
- therapeutic exercise principles
- principles of exercise program design, including:
    - FITT formula – frequency, intensity, time, type
    - program phases – preparation, conditioning, recovery, adaptation
    - program types – sets and reps, circuit, single set to failure, matrix
- principles and effects of movement in water as related to hydrotherapy
- the psychological effects of disability due to injury or disease and strategies used to cope with this
- the signs of adverse reaction to different programs and treatment
- relevant guidelines and reporting requirements, including Australian Physiotherapy Association (APA) Guidelines
- factors that facilitate an effective and collaborative working relationship
- policy and procedures in relation to:
    - infection control as it relates to the allied health assistant's role in assisting with hydrotherapy programs
    - other specific organisation policies or procedures, including supervisory and reporting protocols

© Commonwealth of Australia, 2025 HumanAbility

- legal and ethical considerations relevant to allied health:
  - duty of care
  - informed consent
  - privacy, confidentiality and disclosure
  - work role boundaries – responsibilities and limitations including other allied health team members and nursing, medical and other personnel
  - work health and safety (WHS):
    - manual handling including identification and control of manual task risk factors

Assessment Conditions

The following aspects of the performance evidence must have been demonstrated using simulation prior to being demonstrated in the workplace under direction and supervision (direct, indirect, remote) as determined by the physiotherapist and/or occupational therapist:

- conducted 1 hydrotherapy program

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - hydrotherapy venue and equipment
  - emergency procedures
- modelling of industry operating conditions and contingencies, including:
  - provision of services to real people
  - scenarios for evacuation and other emergency situations that might occur

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTAHA016 Support the fitting of assistive equipment

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Minimum work hours added. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to work with clients, their carers and other members of a multi-disciplinary team where appropriate, to assist with fitting assistive equipment to meet individual client needs.

This unit applies to allied health assistants and should be performed under the direction and supervision (direct, indirect or remote) of an allied health professional.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian / New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for fitting of assistive equipment	1.1 Confirm assistive equipment details and fitting requirements against the prescribed information provided by the allied health professional 1.2 Confirm with allied health professional specific client needs and abilities 1.3 Confer with allied health professional if fitting requirements are outside scope of role and

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	responsibilities as defined by the organisation
	1.4 Determine the clients' availability, according to the organisation's protocols
	1.5 Gather assistive equipment and any equipment required for fitting
	1.6 Prepare the setting for the fitting and instruction for use
	1.7 Obtain consent from the clients before commencing the fitting
2. Fit assistive equipment	2.1 Provide client with the assistive equipment
	2.2 Confirm the suitability of fit, size and that operation of equipment meets expected performance parameters and prescription and conforms to the manufacturer's guidelines
	2.3 Confirm the assistive equipment is in safe working order within the user environment
	2.4 Obtain relevant measurements and data where adjustments are required
	2.5 Restrict equipment functions for initial or trial periods to enable familiarity and ensure safety
	2.6 Document and report the process and outcomes of fitting ensuring that arrangements for further action are implemented
	2.7 Document maintenance periods and requirements for the assistive equipment
	2.8 Identify any faults and complete necessary documentation
	2.9 Confirm that client (and carer) have relevant documentation and understand any further action that needs to be taken
3. Support client to use assistive equipment	3.1 Explain and reinforce information about the use of the assistive equipment, in a manner, and at the level and

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	pace, appropriate for the client
	3.2 Confirm client understanding and answer any questions
	3.3 Confirm that the assistive equipment is clean and in good working order for the client's requirements before use
	3.4 Label, remove from use and report defective assistive equipment to the appropriate person, and ensure an alternative is supplied as promptly as possible
	3.5 Remove and minimise potential hazards in the immediate environment
	3.6 Educate client and carers in the safe use, transportation and maintenance of the assistive equipment within the context of the users' indoor and outdoor environments
	3.7 Offer appropriate constructive feedback, encouragement and reinforcement
	3.8 Provide safe physical support to enable the client to use the assistive equipment
	3.9 Identify incorrect use and give verbal feedback and physical guidance
	3.10 Monitor the effectiveness of the assistive equipment and report any problems to the appropriate person with minimum delay
	3.11 Report any adverse effect, and major progress to the appropriate member of the care team
	3.12 Recognise when client becomes distressed, in pain or communicates their desire to slow down, change activity or stop and follow stepping down procedures outlined in treatment plan or organisational guidelines
	3.13 Agree relevant trial period and review periods to co-ordinate with client treatment plan
4. Complete basic assistive equipment construction and modification	4.1 Obtain equipment construction or modification specifications from allied health professional
	4.2 Confirm requirements with allied health professional

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	4.3 Procure materials required for basic equipment construction and modifications
	4.4 Complete construction and modifications according to specifications
	4.5 Seek support from allied health professional if difficulty arises meeting the specifications
	4.6 Check completed construction and modifications with allied health professional
	4.7 Complete and file any required documentation, according to organisation protocols
5. Comply with supervisory requirements	5.1 Seek assistance when client presents with needs or signs outside limits of own authority, skills and/or knowledge
	5.2 Report client difficulties to the supervising allied health professional for advice before continuing the program
	5.3 Participate in supervision processes with the treating allied health professional in accordance with organisational protocol
6. Clean and store assistive equipment after use	6.1 Clean assistive equipment according to manufacturer's recommendations, infection control requirements and organisation protocols
	6.2 Store assistive equipment according to manufacturer's recommendations and the organisation's protocols
	6.3 Report faults to the appropriate person and complete necessary documentation
7. Report and document information	7.1 Report suggested adjustments to assistive equipment, together with rationale, to the supervising allied health professional
	7.2 Provide client progress feedback to the supervising

Assessment Requirements for HLTAHA016 Support the fitting of assistive equipment

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Minimum work hours added. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- fitted, tested and adjusted assistive equipment to 3 clients with different conditions and equipment requirements, 1 in a simulated environment and 2 in the workplace
- educated 3 clients, 1 in a simulated environment and 2 in the workplace, in the use of a range of assistive equipment
- performed the activities outlined in the performance criteria of this unit during a period of at least 120 hours of work

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- how to evaluate the user environment and the importance and methods of making the environment safe for use of the assistive equipment
- principles associated with fitting and using specific equipment, or where to access information relating to the range of assistive equipment, associated systems and purpose
- how to fit, test and adjust assistive equipment to meet individual needs, including the range of measurements required to prepare a specification for modification or adjustment to the original prescription
- the principles of movement, mobility, posture management and special seating, including an understanding of balance and gait

© Commonwealth of Australia, 2025 HumanAbility

- the range, associated systems and purpose of assistive equipment
- the psychological effects of disability due to injury or disease and strategies used to cope with this
- the signs of adverse reaction to different programs and treatment
- factors that facilitate an effective and collaborative working relationship
- organisation policy and procedures in relation to:
  - infection control as it relates to the allied health assistant's role in assisting with fitting assistive equipment
  - other specific organisation policies or procedures, including supervisory and reporting protocols
- legal and ethical considerations relevant to allied health:
  - duty of care
  - informed consent
  - privacy, confidentiality and disclosure
  - work role boundaries – responsibilities and limitations including other allied health team members and nursing, medical and other personnel
  - work health and safety (WHS):
    - manual handling including identification and control of manual task risk factors

Assessment Conditions

All aspects of the performance evidence must have been demonstrated using simulation prior to being demonstrated in a therapeutic workplace under direction and supervision (direct, indirect, remote) as determined by the allied health professional qualified to fit specific equipment (physiotherapist, audiologist, occupational therapist).

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including individualised plans and a range of assistive equipment
- modelling of industry operating conditions and contingencies, including provision of services to real people

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTAHA017 Assist with social work

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. New unit.

Application

This unit describes the skills and knowledge required by a social work assistant in undertaking support tasks delegated by a social worker.

This unit applies to social work assistants working in a health or community context. Depending on the setting, work will be under the regular (direct, indirect or remote) supervision of a social worker.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Provide assistance to clients	1.1 Assist clients, carers and families to access organisation services 1.2 Provide accurate information to clients regarding available services 1.3 Assist clients, carers and families with completion of paperwork 1.4 Assist clients to access emergency assistance, including financial assistance where required

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
2. Provide assistance to social workers	2.1 Provide a range of screening assessments as directed by the supervising social worker 2.2 Contact external providers of care services, as well as community and government agencies, in order to provide access and information for clients 2.3 Collect and collate information regarding available services, keep up to date and provide to clients 2.4 Provide information and education to clients as determined by the supervising social worker 2.5 Provide assistance to social workers in case management activities 2.6 Assist social workers with activities relating to patient discharge and flow
3. Assist a multidisciplinary team	3.1 Work with social workers, other health professionals, and other team members to ensure high quality client outcomes 3.2 Attend and participate effectively in case conferences, team meetings and quality improvement activities 3.3 Work within the scope of own role, with regard to professional boundaries and organisation policies and procedures
4. Complete required administrative activities	4.1 Collect and accurately record information provided by clients 4.2 Follow confidentiality and privacy requirements in relation to client information 4.3 Complete client records, databases and other documentation within legal and organisation requirements 4.4 Maintain statistics in accordance with organisation policies and procedures

© Commonwealth of Australia, 2025 HumanAbility

Foundation Skills

The Foundation Skills describe those required skills (such as language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTAHA017 Assist with social work

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. New unit.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- assisted with 3 social work clients, 1 in a simulated environment and 2 in the workplace
- performed the activities outlined in the performance criteria of this unit during a period of at least 120 hours of work

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- policy and procedures in relation to infection control
- services available for referral, both within the organisation and in the community, including:
  - Centrelink, Medicare and other government agencies, and the services they provide
  - community based organisations with a focus on particular client groups
- word processing programs, spreadsheets and databases commonly used in an organisation and correct use to accurately complete tasks
- concepts of cultural awareness, cultural safety and cultural competence and how these can impact work
- commonly used screening assessment tools, their purposes and application
- legal and ethical considerations relevant to allied health:
  - privacy, confidentiality and disclosure
  - work role boundaries – responsibilities and limitations of self and other team members including nursing, medical and other personnel and their scope of practice

© Commonwealth of Australia, 2025 HumanAbility

- work health and safety

Assessment Conditions

All aspects of the performance evidence must have been demonstrated using simulation prior to being demonstrated in a therapeutic workplace under direction and supervision (direct, indirect, remote) as determined by the social worker.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including screening assessments
- modelling of industry operating conditions and contingencies, including provision of services to real people

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTAHA018 Assist with planning and evaluating meals and menus to meet recommended dietary guidelines

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTNA302D/HLTNA304D. Significant changes to elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Minimum work hours added. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to assist with the planning and evaluating appropriate meals and menus based on the Australian Dietary Guidelines, and other dietary guidelines, in consultation with a dietitian to meet the nutritional needs of individuals within client groups. It involves the selection and planning of balanced meals, general menu planning principles and the development and evaluation of menus.

This unit applies to allied health assistants and should be performed under the direction and supervision (direct, indirect or remote) of a dietitian. Individuals will take responsibility for their own outputs and may participate in work teams. A range of well developed skills and some discretion and judgement is required of workers.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*The Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify the nutrients and food group serves	1.1 Categorise foods according to food groups, identifying key nutrients by each food group and

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*The Performance criteria describe the performance needed to demonstrate achievement of the element.*
recommended for good health for client groups	individual foods within that group 1.2 Identify recommended serves of various food groups for client group, in consultation with a dietitian
2. Plan and develop menus in accordance with relevant dietary guidelines	2.1 Plan menus according to menu planning principles 2.2 Select food preparation and cooking methods in consultation with food production personnel to maintain maximum nutritional value of foods 2.3 Plan meals and menus to minimise nutrient imbalance, incorporating relevant dietary guidelines 2.4 Plan meals and food group serves to meet the nutritional needs of individuals within client groups 2.5 Discuss and confirm menu plans with the dietitian
3. Identify food-related cultural and religious needs of client groups	3.1 Identify client group, use correct terminology and observe cultural customs 3.2 Consider cultural groups and general characteristics of their cuisine 3.3 Identify dietary regimes and factors associated with cultural and religious groups that may influence food choices 3.4 Plan and modify meals and menus to meet specific cultural and religious needs of client group in line with organisational guidelines
4. Evaluate meals and menus	4.1 Follow processes defined by dietitian to evaluate meals and menus to ensure they meet nutritional requirements of client groups 4.2 Follow processes defined by dietitian to evaluate meals and menus to ensure they meet cultural and religious needs of the clients 4.3 Follow processes defined by dietitian to evaluate meals and menus to ensure client satisfaction

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*The Performance criteria describe the performance needed to demonstrate achievement of the element.*
	4.4 Evaluate meals and menus to ensure feasibility of production in relation to equipment, time and skills as well as budgetary constraints
	4.5 Make adjustments to menu according to findings and the dietitian's directions

Foundation Skills

The Foundation Skills describe those required skills (such as language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTAHA018 Assist with planning and evaluating meals and menus to meet recommended dietary guidelines

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTNA302D/HLTNA304D. Significant changes to elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Minimum work hours added. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has (under the direction of a dietitian):

- planned, developed and evaluated menus for 3 client groups, 1 in a simulated environment and 2 in the workplace, based on organisational food, nutrition and special diet guidelines or the *Australian dietary guidelines* for provision of appropriate food for client groups(s)
- planned and modified meals and menus for at least 2 clients with specific cultural and/or religious food-related requirements in a simulated environment
- performed the activities outlined in the performance criteria of this unit during a period of at least 120 hours of work

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. this include knowledge of:

- relevant organisational food, nutrition and special diet guidelines
- *Australian dietary guidelines*
- cooking methods and equipment
- food preparation and food service systems
- principles of nutrition, diet therapy, nutrition supplements and factors that place clients at risk of malnutrition and inadequate hydration

© Commonwealth of Australia, 2025
HumanAbility

- common fluid and food restrictions
- costing procedures
- how to recognise malnutrition
- policy and procedures in relation to:
  - infection control and food safety program as they relate to assisting with meals, menus and dietary guidelines
  - other specific organisation policies or procedures, including supervisory and reporting protocols
- range of menus and menu items
- standardised recipes
- various cultural and religious requirements in relation to food, relevant to the profile of the community served by the organisation including:
  - halal
  - types of vegetarianism (ovo-lacto, lacto or vegan)
  - kosher
- legal and ethical considerations relevant to allied health:
  - privacy, confidentiality and disclosure
  - work health and safety (WHS)

Assessment Conditions

The following aspects of the performance evidence must have been demonstrated using simulation prior to being demonstrated in a therapeutic workplace under direction and supervision (direct, indirect, remote) as determined by the dietitian:

- plan, develop and evaluate one menu based on organisation food, nutrition and special diet guidelines or the *Australian dietary guidelines* for provision of appropriate food for client

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - food safety standards and procedures
  - manufacturers' manuals and recommendations for equipment
  - food packaging and storage requirements
  - work plan
  - menu planning tools
  - individualised plans and any relevant equipment in the plan

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTAHA019 Assist with the monitoring and modification of meals and menus according to individualised plans

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Minimum work hours added. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to modify meals and menus to meet the nutrition requirements of specific client groups and monitor this against the individualised plans.

This unit applies to allied health assistants and should be performed under the direction and supervision (direct, indirect or remote) of a dietitian. Individuals will take responsibility for their own outputs and may participate in work teams. A range of well developed skills and some discretion and judgement is required of workers.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*The Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify conditions and specific needs of client groups	1.1 Identify the conditions commonly encountered by the client group requiring an individualised plan or dietary modification 1.2 Identify groups at risk of nutritional deficiencies and nutrient imbalance contributing to common lifestyle

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*The Performance criteria describe the performance needed to demonstrate achievement of the element.*
	diseases and disorders
	1.3 Identify dietary factors associated with common lifestyle diseases and/or diet related chronic diseases and other nutrition-related conditions, food intolerances, allergies
	1.4 Identify special nutritional and dietary needs for conditions encountered by the client group
	1.5 Report dietary and nutrition issues and needs to the dietitian
2. Modify meals and menus according to individualised plan	2.1 Consult with dietitian to address the identified risks and needs of client groups
	2.2 Modify meals and menus to meet the nutritional and dietary needs of the client group using relevant guidelines
	2.3 Assess meals and menus for their suitability for texture modification to meet special nutritional and dietary needs, using relevant guidelines
	2.4 Incorporate sufficient choices of dishes and drinks in to menus for special needs, using relevant guidelines
	2.5 Provide information regarding individualised plan to client when appropriate and as directed by dietitian or relevant health professional
3. Monitor and report on client status and acceptance of individualised plan	3.1 Provide feedback about changes to, needs, food preferences and individualised plan to food services and to dietitians
	3.2 Report the acceptability, tolerance and consumption of meals by the client to the dietitian or relevant health professional
	3.3 Identify problems which may affect the client's ability to eat or drink to the dietitian and/or other relevant health professional, according to organisation policies and procedures
	3.4 Provide feedback on consistently poor client meal choices to the dietitian

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*The Performance criteria describe the performance needed to demonstrate achievement of the element.*
	3.5 Follow systems designed by a dietitian to monitor, document on client nutritional status
	3.6 Monitor the nutrition status of clients using standard and validated tools and nutritional indicators
	3.7 Report the progress of client nutritional status to the dietitian, and/or other health professional according to organisational protocols and timeframes

Foundation Skills

The Foundation Skills describe those required skills (such as language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

HLTAHA020 Support food services in menu and meal order processing

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTNA305D/HLTNA301D. Significant changes to elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Minimum work hours added. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to implement meal order systems, distribute and process general and therapeutic menus and meal orders, distribute food and monitor client satisfaction.

This unit applies to allied health assistants and should be performed under the direction and supervision (direct, indirect or remote) of a dietitian. Individuals will take responsibility for their own outputs and may participate in work teams. A range of well developed skills and some discretion and judgement is required of workers.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*The Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Distribute and collect general menus and/or meal orders for clients	1.1 Distribute menus to clients, or use meal order systems, according to established routines and procedures 1.2 Provide guidance to client, to ensure that meal

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*The Performance criteria describe the performance needed to demonstrate achievement of the element.*
	choices are consistent with the individualised plan
	1.3 Provide assistance to client with specific cultural and/or religious requirements in accordance with organisation guidelines and report any problems meeting these needs to supervisor immediately
	1.4 Collect menus and/or meal orders and assist clients with placing orders and marking menus as appropriate in line with role
	1.5 Distribute and collect menus for clients receiving diet or nutrition care according to established routines and procedures
	1.6 Record and provide feedback regarding food preferences and consistently poor menu and/or meal choices to the appropriate person
2. Implement nutrition support services	2.1 Collate menus and meal orders, including orders for clients receiving diet therapy or nutrition support
	2.2 Provide information to support the delivery of menu items chosen by the client, according to established routines and procedures
	2.3 Check meal orders for accuracy against the individualised plan developed by a dietitian, or other health professional
	2.4 Tally, collate and report menu items
3. Prepare and deliver nutrition supplements	3.1 Prepare, supply and deliver nutrition supplements according to organisation procedures and dietitian's instructions
	3.2 Discard out of date nutrition support items and information
	3.3 Report any significant wastage to the appropriate personnel in accordance with role and organisation requirements
	3.4 Maintain the workplace in a clean and tidy order to meet workplace standards

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*The Performance criteria describe the performance needed to demonstrate achievement of the element.*
4. Comply with personal hygiene standards and food safety program	4.1 Prepare nutrition supplements and provide support services according to the food safety program 4.2 Identify and report processes and practices that are not consistent with the food safety program 4.3 Take corrective action according to the food safety program and within level of responsibility 4.4 Comply with personal hygiene requirements of the food safety program 4.5 Report health conditions and/or illness according to the food safety program 4.6 Wear clothing and footwear appropriate for food handling tasks and according to the food safety plan
5. Communicate changes in meal order, including meals for clients receiving diet therapy or nutrition support	5.1 Maintain knowledge of client admissions, transfers and discharges 5.2 Process meal orders for food services 5.3 Provide information to support the delivery of chosen menu items to the food service within the required time frame
6. Monitor client satisfaction with food services	6.1 Collect client satisfaction, using standard and validated tools 6.2 Regularly monitor overall levels and changes in client satisfaction 6.3 Provide feedback regarding overall levels and changes in levels of satisfaction to the appropriate person 6.4 Use relevant feedback from clients to revise menus

Assessment Requirements for HLTAHA020 Support food services in menu and meal order processing

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Merged HLTNA305D/HLTNA301D. Significant changes to elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Minimum work hours added. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has (under the direction of a dietitian):

- distributed menus or used other systems with clients to collect meal orders, processed therapeutic meal orders and delivered food orders to at least 3 clients, 1 in a simulated environment and 2 in the workplace
- prepared different nutritional supplements for at least 3 clients, 1 in a simulated environment and 2 in the workplace
- performed the activities outlined in the performance criteria of this unit during a period of at least 120 hours of work

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the work role. This includes knowledge of:

- *Australian dietary guidelines*
- organisation policy and procedures in relation to:
  - infection control as it relates to the allied health assistant's role in assisting with food services and menu and meal planning
  - food, nutrition and special food guidelines

© Commonwealth of Australia, 2025 HumanAbility

    - other specific organisation policies or procedures, including supervisory and reporting protocols
- safe food handling

inter-relationships between food services and nutrition services, dietary departments concerning menu and meal order processing procedures, food production and delivery schedules

- range of menus, and menu items and different types of menu management systems
- various cultural requirements in relation to food, relevant to the profile of the community served by the organisation
- feedback processes or systems used within the organisation
- legal and ethical considerations relevant to allied health:
    - privacy, confidentiality and disclosure
    - work health and safety:
        - manual handling including identification and control of manual task risk factors

Assessment Conditions

All aspects of the performance evidence must have been demonstrated using simulation prior to being demonstrated in the workplace under direction and supervision (direct, indirect, remote) as determined by the dietitian.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
    - food safety and standards and procedures
    - manufacturers' manuals and recommendations for equipment
    - relevant clothing and footwear
    - individualised plans and any relevant equipment outlined in the plan

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTAHA021 Assist with screening and implementation of therapeutic diets

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Minimum work hours added. Removal of pre-requisite. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to assess nutritional requirements of clients and participate in the implementation of therapeutic diets.

This unit applies to allied health assistants and should be performed under the direction and supervision (direct, indirect or remote) of a dietitian. Individuals will take responsibility for their own outputs and may participate in work teams. A range of well developed skills and some discretion and judgement is required of workers.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Assist with basic nutrition risk screening	1.1 Confirm the client group for screening with a dietitian 1.2 Use the organisation's established screening documentation to gather client information 1.3 Consult with other appropriate staff before conducting the screening

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.4 Explain the screening purpose and process to the client and seek feedback to determine their understanding
	1.5 Conduct the screening using language appropriate to the client's needs
	1.6 Seek appropriate assistance if client participation issues arise
2. Use screening results to determine nutritional risk according to organisation protocol	2.1 Use screening results to determine level of risk for clients
	2.2 Inform dietitian of at risk clients in a timely manner and according to organisation protocols
	2.3 Implement re-screening
	2.4 Complete screening forms and organise screening information
3. Provide nutrition support services for at risk clients under supervision of a dietitian and organisation protocol	3.1 Select appropriate nutrition support item or services
	3.2 Implement nutrition intervention and communicate with food services
	3.3 Prepare nutrition support item
4. Comply with supervisory requirements	4.1 Provide all assistance according to the instruction of dietitian and the individualised plan
	4.2 Provide feedback to the dietitian regarding client progress
	4.3 Seek client feedback about the tolerance of the nutrition support intervention and feedback to dietitian
	4.4 Seek assistance when client presents with needs or signs outside limits of own authority or competence
	4.5 Report client difficulties and concerns to the dietitian
	4.6 Implement variations to the individualised plan under the direction of the dietitian

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
5. Clean and store materials and equipment	5.1 Use and clean any equipment according to manufacturer's requirements 5.2 Store materials and equipment according to manufacturer's requirements and organisation protocols 5.3 Report equipment problems or faults to appropriate person
6. Document client information	6.1 Use accepted protocols to report information in line with organisation requirements 6.2 Use appropriate terminology to document client response to screening 6.3 Maintain client records, according to organisation requirements

Foundation Skills

The Foundation Skills describe those required skills (such as language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTAHA021 Assist with screening and implementation of therapeutic diets

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Minimum work hours added. Removal of pre-requisite. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has (under the direction of a dietitian):

- assisted with nutrition screening of 3 clients, 1 in a simulated environment and 2 in the workplace
- prepared and/or provided nutrition support services, including preparing dietary supplements, to 3 clients, 1 in a simulated environment and 2 in the workplace
- performed the activities outlined in the performance criteria of this unit during a period of at least 120 hours of work

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- principles of:
  - the impact of diet on health
  - fluid intake
  - rehabilitation
  - an individualised plan
- significance of nutritional risk indicators, including
  - weight loss
  - weight gain

© Commonwealth of Australia, 2025 HumanAbility

  - appetite
  - bowel function
  - biochemical indicators
  - allergies and intolerances
  - swallowing issues
- organisation policies and procedures in relation to:
  - screening and assessment
  - other specific organisation policies or procedures, including supervisory and reporting protocols
- supplements, including supplement equivalents, and their use
- special diets and their importance to a client's health, including:
  - texture modified diets (TMDs) and national standards for TMD
  - high energy
  - high protein
  - modified salt, protein or potassium
  - diets for food intolerances including gluten free, fructose malabsorption, and lactose free
- workings and protocols of the food service system
- legal and ethical considerations relevant to allied health:
  - privacy, confidentiality and disclosure
  - work health and safety:
    - manual handling including identification and control of manual task risk factors

Assessment Conditions

All aspects of the performance evidence must have been demonstrated using simulation prior to being demonstrated in the workplace under direction and supervision (direct, indirect, remote) as determined by the dietitian.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - food safety and standards and procedure
  - manufacturers' manuals and recommendations for equipment
  - food packaging and storage requirements
  - screening forms
  - nutrition supplements
  - individualised plans and any relevant equipment outlined in the plan

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTAHA022 Prepare infant formulas

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Minimum work hours added. Removal of pre-requisite. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to make up infant formulas and educate parents and/or carers in preparation requirements.

This unit applies to allied health assistants and work will be performed under the direction and supervision (direct, indirect or remote) of a dietitian. Individuals will take responsibility for their own outputs and may participate in work teams. A range of well developed skills and some discretion and judgement is required of workers.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare infant formulas	1.1 Identify appropriate recipe to meet infant requirements 1.2 Seek clarification from dietitian or referral source 1.3 Check measuring equipment for accuracy 1.4 Make up formula strictly according to the precise measurement requirements of the recipe

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.5 Comply with infection control requirements according to organisation protocols
	1.6 Deliver the formula to the appropriate location
2. Clean and store work area, materials and equipment	2.1 Clean all surfaces and equipment with appropriate products as per food safety program, and according to organisation protocols and manufacturers requirements
	2.2 Demonstrate work health and safety procedures for chemicals
	2.3 Check all equipment for proper operation and report any faults or conditions to the appropriate person
	2.4 Maintain the imprest stock system required in the formula area
	2.5 Store equipment and formulas according to food safety program, manufacturer's requirements and organisation protocols
3. Educate client and/or carer in the preparation, use and storage of nutrition formulas	3.1 Determine a time for the education of parent and/or carer
	3.2 Gather all materials and products required for education and discharge
	3.3 Prepare recipe instructions and details in a manner and style that will be practical for the home and understood by the parent and/or carer
	3.4 Guide parent and/or carer through the preparation, use and storage of infant formulas
	3.5 Check to ensure that the parent and/or carer understands the requirements
	3.6 Organise any necessary follow up arrangements or feedback to the referrer
4. Comply with supervisory requirements	4.1 Seek parent and/or carer feedback about the infant formula

© Commonwealth of Australia, 2025 HumanAbility

	4.2 Provide parent and/or carer feedback to the dietitian
	4.3 Implement variations under the direction of the dietitian
5. Document client information	5.1 Use accepted protocols to report information in line with organisation requirements
	5.2 Use appropriate terminology to document information
	5.3 Maintain client records according to organisation requirements

Foundation Skills

The Foundation Skills describe those required skills (such as language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTAHA022 Prepare infant formulas

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Minimum work hours added. Removal of pre-requisite. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has (under the direction of a dietitian):

- made up 3 infant formulas according to prescribed recipe and using precise measurement as per referral, 1 in a simulated environment and 2 in the workplace
- performed the activities outlined in the performance criteria of this unit during a period of at least 120 hours of work

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- the importance of:
  - accurate formula preparation and need for the correct formula
  - aseptic conditions
- different infant formulas and their use, including but not limited to:
  - elemental
  - semi-elemental
  - polymericspecialist
- organisation policy and procedures in relation to:
  - infection control and food safety program as they relate to assisting with meals, menus and dietary guidelines

© Commonwealth of Australia, 2025 HumanAbility

    - other specific organisation policies or procedures, including supervisory and reporting protocols
- legal and ethical considerations relevant to allied health:
    - privacy, confidentiality and disclosure
    - work health and safety:
        - manual handling including identification and control of manual task risk factors

Assessment Conditions

All aspects of the performance evidence must have been demonstrated using simulation prior to being demonstrated in the workplace under direction and supervision (direct, indirect, remote) as determined by the dietitian.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
    - recipes and equipment for the preparation of infant formulas
    - food safety standards and procedures
    - manufacturers' manuals and recommendations for equipment
    - food safety program

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTAHA023 Support the provision of basic nutrition advice and education

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Minimum work hours added. Removal of pre-requisite. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to support the provision of basic nutrition education to clients receiving diet therapy from a dietitian.

This unit applies to allied health assistants and work will be performed under the direction and supervision (direct, indirect or remote) of a dietitian. Individuals will take responsibility for their own outputs and may participate in work teams. A range of well developed skills and some discretion and judgement is required of workers.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Organise appropriate resources for dietary education	1.1 Obtain client education requirements from the dietitian 1.2 Check with the dietitian for details of the education process, timing of the process and monitoring and

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	evaluation requirements
	1.3 Check with the dietitian for details about possible client indicators that may need to be considered
	1.4 Gather basic educational materials and products according to the directions of the dietitian
	1.5 Develop or modify resources under the direction of the dietitian
	1.6 Check with the dietitian that materials and products are appropriate for the client's setting
	1.7 Determine client availability
2. Assist with the provision of basic and scripted dietary and nutrition information and/or education to the client	2.1 Confirm the purpose of the information or education, based on the individualised plan with the client
	2.2 Guide the client to ensure that meal choices are consistent with the individualised plan designed by the dietitian
	2.3 Provide practical dietary education to support meal and food choices consistent with individualised plan
	2.4 Use appropriate nutrition and dietetic resources and equipment
	2.5 Seek feedback on the client's understanding
3. Monitor client response to the information and/or education	3.1 Use appropriate strategies to monitor client according to individualised plan
	3.2 Identify client deviations from the individualised plan and report to dietitian
	3.3 Identify other indicators requiring dietary intervention in line with organisation procedures and protocols
	3.4 Report identified indicators for dietary intervention to the dietitian
	3.5 Seek client feedback on satisfaction with the dietetic service

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
4. Comply with supervisory requirements	4.1 Provide all assistance according to the instruction of dietitian 4.2 Provide feedback to the dietitian regarding client progress 4.3 Seek assistance when client presents with needs or signs outside limits of own authority or competence 4.4 Report client difficulties and concerns to the dietitian 4.5 Implement variations to the education program and material under the direction of the dietitian
5. Clean and store materials and equipment	5.1 Use and clean any equipment according to manufacturers requirements 5.2 Store educational materials and any equipment according to manufacturers requirements and organisation protocols 5.3 Report equipment faults to appropriate person 5.4 Report educational material requirements such as need to re-stock according to organisation protocols
6. Document client information	6.1 Use accepted protocols to report information in line with organisation requirements 6.2 Use appropriate terminology to document client response to the information and/or education

Foundation Skills

The Foundation Skills describe those required skills (such as language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTAHA023 Support the provision of basic nutrition advice and education

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Minimum work hours added. Removal of pre-requisite. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has (under the direction of a dietitian):

- used appropriate materials and equipment and followed procedures to provide nutrition information and/or education to 3 different clients, 1 in a simulated environment and 2 in the workplace
- communicated effectively while providing nutritional information and education
- performed the activities outlined in the performance criteria of this unit during a period of at least 120 hours of work

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- anatomy and body systems
- nutrition principles
- cultural diets and restriction
- human behaviour and social/interpersonal behaviour
- the nutritional composition of food
- food safety
- organisation policy and procedures in relation to:

© Commonwealth of Australia, 2025 HumanAbility

  - infection control and food safety as they relate to assisting with nutritional advice and education
  - other specific organisation policies or procedures, including supervisory and reporting protocols
- client individualised plans, goals and limitations of diet therapy
- contra-indications of diet therapy
- appropriate use of equipment, materials and resources
- legal and ethical considerations relevant to allied health:
  - privacy, confidentiality and disclosure
  - work role boundaries – responsibilities and limitations of self and other allied health team members
  - work health and safety (WHS):
    - manual handling including identification and control of manual task risk factors

Assessment Conditions

All aspects of the performance evidence must have been demonstrated using simulation prior to being demonstrated in the workplace under direction and supervision (direct, indirect, remote) as determined by the dietitian.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including individualised plans and any relevant equipment outlined in the plan

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTAHA024 Work within a community rehabilitation environment

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Minimum work hours added. Significant change to knowledge evidence.

Application

This unit describes the skills and knowledge required to work with clients to support rehabilitation within the community according to a rehabilitation plan.

This unit applies to workers in the community and should be performed under the direction and supervision (direct, indirect or remote) of a health professional.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Work within a multidisciplinary team	1.1 Identify the roles of health professionals within the multidisciplinary team 1.2 Identify the range of support inputs required for the client's rehabilitation, relevant to own role and responsibilities

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.3 Identify the range of supervisory requirements associated with supporting the implementation of a client's rehabilitation plan, in collaboration with the supervising health professional
	1.4 Clarify the nature of supervisory relationships with all professional workers
	1.5 Clarify additional people to be included in communication regarding the implementation of a client's rehabilitation plan
	1.6 Provide feedback to relevant others according to the rehabilitation plan, including observation of client status and progress and feedback provided by the client and/or significant others
2. Provide holistic support to clients within the context of the rehabilitation plan	2.1 Identify the range of service inputs required to support a client's rehabilitation plan
	2.2 Identify the interrelationship between a range of service inputs and other supports
	2.3 Identify additional client requirements outside the rehabilitation plan and discuss with the supervising health professional
	2.4 Provide client with information to meet educational needs, according to the rehabilitation plan
	2.5 Engage professional interpreters when required to support cultural and linguistic diversity
3. Address risk identification, hygiene and infection control issues in home care and community settings	3.1 Identify risks associated with working with the client in their home and community in accordance with local safety protocols
	3.2 Develop and implement risk management plan in consultation with the supervising health professional and in conjunction with the client and in accordance with local protocols and procedures
	3.3 Maintain personal hygiene and dress standard according to infection control and organisation requirements

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	3.4 Wear personal protective equipment (PPE) correctly according to organisation requirements
	3.5 Report or initiate action within own area of responsibility, to redress any potential workplace hazards
4. Document client information	4.1 Use accepted protocols to document information relating to the rehabilitation program in line with organisation requirements
	4.2 Provide regular feedback to the client's care team
	4.3 Use appropriate terminology and format to document the client's progress, including any barriers or challenges to the rehabilitation plan

Foundation Skills

The Foundation Skills describe those required skills (such as language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTAHA024 Work within a community rehabilitation environment

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Minimum work hours added. Significant change to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- facilitated involvement and participation of 3 clients, 1 in a simulated environment and 2 in the workplace, in the rehabilitation process within the context of rehabilitation plans
- performed the activities outlined in the performance criteria of this unit during a period of at least 120 hours of work

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- the importance and meaning of home and belongings to clients and the nature and significance of working in the client's home and community settings
- the importance and practice of participation, social justice and equity
- values and philosophies of community rehabilitation in practice
- different frameworks, approaches and models of community rehabilitation
- cross cultural issues in a community rehabilitation context
- community advocacy groups
- importance of principles and practices to enhance sustainability in the workplace, including environmental, economic, workforce and social sustainability
- international classification of functioning, disability and health
- organisation policy and procedures in relation to:

© Commonwealth of Australia, 2025 HumanAbility

  - infection control
  - PPE
  - risk assessment and risk management associated with working in client homes and the community
- legal and ethical considerations relevant to allied health:
  - duty of care
  - human rights
  - privacy, confidentiality and disclosure
  - work role boundaries – responsibilities and limitations
  - work health and safety
- relevant national and/or state-based community services and programs and local community care services
- medico-legal and legal implications of working outside the plans, specifically treatment style plan

Assessment Conditions

All aspects of the performance evidence must have been demonstrated using simulation prior to being demonstrated in a therapeutic workplace under direction and supervision (direct, indirect, remote) as determined by the health professional.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including rehabilitation plans and any relevant equipment outlined in the plan
- modelling of industry operating conditions and contingencies, including provision of services to real people

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTAHA025 Contribute to client flow and client information management in medical imaging

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements.

Application

This unit describes the skills and knowledge required to support the efficient and timely flow of clients through a medical imaging unit.

This unit applies to workers assisting a medical imaging professional in a hospital or community based setting. It does not equip a worker to perform medical imaging. All work should be performed under direction and supervision as determined by a medical imaging professional.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Monitor procedure list to ensure best flow of clients	1.1 Input client data and information using the facility information management system following instructions from a medical imaging professional 1.2 Communicate with relevant stakeholders about client appointment times and availability according to

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	instructions from a medical imaging professional
	1.3 Answer questions about scheduling and specified client preparation requirements, referring all questions outside specified areas to relevant medical imaging professional
	1.4 Liaise with office staff about client bookings, cancellations and rescheduling according to instructions from a medical imaging professional
	1.5 Liaise with relevant parties about client transport requirements according to instructions from a medical imaging professional
	1.6 Liaise with the relevant medical imaging professional about client flow requirements
	1.7 Identify referral sources and client information requirements for the medical imaging process
	1.8 Gather and process demographic client information prior to the medical imaging procedure
	1.9 Process and dispatch medical imaging results accurately, according to a series of checking mechanisms to ensure the correct result is assigned to the correct client
2. Contribute to preparations for medical imaging procedure	2.1 Check accuracy of client identification and information according to organisation protocols and report any issues of concern appropriately
	2.2. Complete a client preliminary interview according to instructions from a medical imaging professional
	2.3 Identify special needs of clients and respond to and report according to organisation protocols and instructions from a medical imaging professional
	2.4 Assist clients to change into gowns and/or scrubs according to client's needs
	2.5 Escort clients to and from examination rooms
	2.6 Assist with additional preparations, as required within scope of responsibility and under the direction of a medical imaging professional

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	2.7 Obtain and collate results of previous relevant imaging and pathology according to organisation policy and guidelines
3. Respond to client needs and reactions	3.1 Provide assurance and support to anxious clients within scope of responsibility and report to the medical imaging professional 3.2 Respond to and report challenging client behaviour according to organisation protocols 3.3 Report any other observations of concern regarding client status according to organisation protocols
4. Work safely in a medical radiation environment	4.1 Use individual work practices in a manner consistent with radiation protection principles 4.2 Comply with organisation's radiation management plan 4.3 Use required personal protective equipment (PPE) and personal monitoring in the medical imaging environment 4.4 Comply with all safety signs in the medical imaging environment 4.5 Report any concerns about radiation safety according to organisation protocols
5. Handle client information in a responsible manner	5.1 Scan medical imaging requests and input client data into the client data system 5.2 Input client demographics into digital imaging system 5.3 Print films and produce CDs, where necessary 5.4 Send imaging requests as required 5.5 Reconcile client information with other systems in line with organisation protocols 5.6 Input examination completion statistics according to

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	instructions from a medical imaging professional
	5.7 Use language specific to medical imaging when dealing with client data and information
6. Maintain information in a responsible manner	6.1 File client information according to organisation protocols
	6.2 Organise client imaging data for clinical meetings
	6.3 Contribute to the maintenance of accurate copies of other relevant documents, such as telephone lists, according to organisation requirements
	6.4 Maintain client data and information in a manner that ensures confidentiality and is consistent with quality requirements

Foundation Skills

The Foundation Skills describe those required skills (such as language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTAHA025 Contribute to client flow and client information management in medical imaging

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- supported the flow of 3 different clients, 1 in a simulated environment and 2 in the workplace, through a medical imaging unit
- assisted 3 different clients, 1 in a simulated environment and 2 in the workplace, to follow required radiation and safety procedures

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- awareness and understanding of requirements for those dispensing ionising radiation to hold a Use License with the appropriate authority in that state/territory
- client issues that might affect the imaging process and how to respond within the organisation policies and protocols, including:
  - anxiety
  - confusion
  - hoist requirement
  - behaviours of concern
  - interpreter requirements
  - clothing requirements for imaging

© Commonwealth of Australia, 2025 HumanAbility

- client manual handling requirements for lifting and transferring in the medical imaging environment
- infection control requirements in the medical imaging environment
- information technology (IT) terms and meanings in relation to imaging file transfer and risks and ramifications of renaming files
- a range of medical imaging processes, what they are used for, the procedure and length of time to undertake the procedure and the images produced by each procedure, including:
  - general radiography
  - mammography
  - fluoroscopy
  - computed tomography (CT) scanning
  - magnetic resonance imaging (MRI) scanning
  - ultrasound
  - angiography
  - bone densitometry
- legal and ethical considerations relevant to medical imaging:
  - privacy, confidentiality and disclosure
  - work health and safety (WHS) requirements within the medical imaging environment, including personal safety requirements in an MRI environment and hierarchy of MRI field control measures
- personal radiation safety requirements in the medical imaging environment, including:
  - radiation protection principles
  - hierarchy of control measures
  - responsibilities of employees and employers under relevant regulations and codes of practice
  - emergency procedures
  - use and care of personal protective equipment and monitoring equipment
  - safety signs and their meaning
- principles and practices of effective client flow and list management
- quality requirements associated with the flow of clients in the medical imaging environment
- organisation policies and protocols in relation to client flow in medical imaging and work role
  - electronic and paper appointment management systems
  - processes for acquiring and processing previous client information
  - systems for filing client data and other information
  - protocols for the dispatch of client reports
- sterile technique requirements in the medical imaging environment
- sources of client data and information, including:
  - picture archiving and communication system (PACS)
  - radiology information system (RIS)

© Commonwealth of Australia, 2025 HumanAbility

- hospital information system (HIS)

Assessment Conditions

All aspects of the performance evidence must have been demonstrated using simulation prior to being demonstrated in a therapeutic workplace under direction and supervision (direct, indirect, remote) as determined by the medical imaging professional.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - medical imaging equipment and guidelines
  - radiation management plan
  - personal protective equipment
- modelling of industry operating conditions and contingencies, including provision of services to real people

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTAHA026 Support the medical imaging professional

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements.

Application

This unit describes the skills and knowledge required to conduct activities essential for the functioning of a medical imaging environment, including, specialist cleaning, stock maintenance and set-up requirements.

This unit applies to workers assisting a medical imaging professional in a hospital or community based setting. It does not equip a worker to perform medical imaging. All work should be performed under direction and supervision as determined by a medical imaging professional.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Contribute to set-up for medical imaging	1.1 Assist with examination room preparation and tidiness 1.2 Refill medical imaging paper printer and film printer 1.3 Assist with the maintenance of hard copy film processor 1.4 Safely transport mobile X-ray and ultrasound

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	equipment
	1.5 Identify and report perceived equipment issues to the appropriate person
2. Clean medical imaging equipment and environment within scope of responsibility	2.1 Clean medical imaging equipment using appropriate materials and according to manufacturer's requirements according to instructions from a medical imaging professional
	2.2 Clean examination rooms as required
	2.3 Contribute to the maintenance of a tidy and clean medical imaging environment
	2.4 Conduct cleaning according to infection control requirements
	2.5 Document cleaning processes according to organisation protocols
	2.6 Use and dispose of cleaning materials and other waste according to manufacturer and organisation guidelines
3. Maintain medical imaging stock	3.1 Maintain levels of disposable stock according to organisation protocols
	3.2 Monitor medical imaging supplies and order where required
	3.3 Maintain adequate stocks of clean linen
	3.4 Monitor oxygen cylinders and order when required
4. Provide client support for the imaging process	4.1 Assist the medical imaging professional with client transfers and movement in a manner consistent with safety requirements, medical imaging requirements, relevant lifting policies and infection control requirements according to instructions from a medical imaging professional
	4.2 Assist with client and process needs during the medical imaging process under the direction of the

Assessment Requirements for HLTAHA026 Support the medical imaging professional

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- supported the functioning of a medical imaging environment by conducting set up, equipment cleaning and stock control, in 1 simulated environment and then in 1 workplace

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- awareness and understanding of requirements for those dispensing ionising radiation to hold a Use License with the appropriate authority in that state/territory
- different medical imaging processes, what they are used for, the procedure and length of time to undertake the procedure and the images produced by each procedure, including:
  - general radiography
  - mammography
  - fluoroscopy
  - computed tomography (CT) scanning
  - magnetic resonance imaging (MRI) scanning
  - ultrasound
  - angiography
  - bone densitometry

© Commonwealth of Australia, 2025 HumanAbility

- personal radiation safety requirements in the medical imaging environment, including:
  - radiation protection principles
  - awareness of the hierarchy of control measures
  - responsibilities of employees and employers under relevant regulations and codes
  - emergency procedures
  - use and care of personal protective equipment (PPE) and monitoring equipment safety signs and their meaning
- legal and ethical considerations relevant to medical imaging:
  - privacy, confidentiality and disclosure
  - work health and safety (WHS) requirements within the medical imaging environment, including personal safety requirements in an MRI environment and hierarchy of MRI field control measures
- quality requirements associated with the maintenance of a medical imaging environment
- organisation policies and protocols in relation to aspects of medical imaging in own work role, including:
  - stock maintenance
  - specialist cleaning
  - set-up
  - infection control requirements for specialist cleaning

Assessment Conditions

All aspects of the performance evidence must have been demonstrated using simulation prior to being demonstrated in a therapeutic workplace under direction and supervision (direct, indirect, remote) as determined by the medical imaging professional.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - medical imaging equipment and guidelines
  - radiation management plan
  - PPE
- modelling of industry operating conditions and contingencies, including provision of services to real people

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTAHW001 Work with Aboriginal and/or Torres Strait Islander clients and communities

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements

Application

This unit describes the knowledge and skills required by a worker new to primary health care to work effectively with Aboriginal or Torres Strait Islander clients and their communities.

It enables the individual worker to understand the cultural and historical context surrounding issues facing Aboriginal and/or Torres Strait Islander clients and communities in order to support the delivery of primary health care.

This unit applies to all staff providing support to the delivery of primary health care. All work tasks are to be performed under supervision.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

© Commonwealth of Australia, 2025 HumanAbility

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Work in the context of Aboriginal and/or Torres Strait Islander history	1.1 Consider and respect local and national historical factors when working with Aboriginal and/or Torres Strait Islander people and their communities 1.2 Consider the impact of social, political, economic and environmental factors on Aboriginal and/or Torres Strait Islander people and their health
2.Work in a culturally safe manner	2.1 Deliver services as directed in a culturally sensitive and safe manner and in line with organisation policies, regulatory requirements and community protocols 2.2 Maintain confidentiality of client information regardless of personal, family and community pressures or status 2.3 Consider and respect local community values, beliefs and gender roles when providing health care to Aboriginal and/or Torres Strait Islander people

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Reading:	• in order to interpret key information from policy and regulatory documentation
Oral communication:	• in order to communicate in a culturally acceptable manner with community members
Learning	• in order to locate, access and retrieve information on the impact of social, political, economic and environmental factors on Aboriginal and/or Torres Strait Islander people and in particular their health

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Assessment Requirements for HLTAHW001 Work with Aboriginal and/or Torres Strait Islander clients and communities

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- worked effectively with at least three Aboriginal and/or Torres Strait Islander clients by:
  - using culturally safe and appropriate communication, including verbal and body language and gestures, with clients
  - treating information obtained about a client with respect and confidentiality
  - performing own work role in providing services with respect and consideration for Aboriginal and/or Torres Strait Islander people, their histories, cultures and current issues.

© Commonwealth of Australia, 2025 HumanAbility

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task, under supervision, outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- Aboriginal and/or Torres Strait Islander health issues and community beliefs, values, protocols and views on health needs
- Aboriginal and/or Torres Strait Islander history, including:
  - history, social structures, beliefs and values of traditional and contemporary Aboriginal and/or Torres Strait Islander communities in Australia
  - effects of colonisation as experienced by Aboriginal and/or Torres Strait Islander people
  - historical dilemmas faced by Aboriginal and/or Torres Strait Islander people
- history of primary health care and community-controlled health
- basic principles of primary health care
- impacts of government policies and legislation on Aboriginal and/or Torres Strait Islander communities
- rights and responsibilities of clients and workers including code of conduct and duty of care
- issues and challenges for local Aboriginal and/or Torres Strait Islander communities which may impact on work role and delivery of services.

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre
- under supervision, as part of a primary health care team
- with Aboriginal and/or Torres Strait Islander clients and communities.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or impractical.

Simulated assessment environments must simulate a real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

© Commonwealth of Australia, 2025 HumanAbility

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment must be undertaken by a workplace assessor who has expertise in this unit of competency and who is:

- an Aboriginal and/or Torres Strait Islander Health Worker

or:

- accompanied by an Aboriginal and/or Torres Strait Islander person who is a recognised member of the community with experience in primary health care.

HLTAHW002 Support clients to obtain access to health services

Modification History

Release	Comments
Release 3	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 2	Corrections to metadata and mapping. Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements

Application

This unit describes the knowledge and skills required by a new worker in primary health care to provide basic support to assist Aboriginal and/or Torres Strait Islander clients and community to gain access to available health services. The unit involves the communication of basic health information about health services. It does not involve the worker performing a health check or specific details of health issues.

This unit applies to all staff providing support to the delivery of primary health care. All work tasks are to be performed under supervision.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 HumanAbility

Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Support clients to communicate with service providers	1.1 Explain services offered by specific health service providers to clients and/or significant others 1.2 Support clients to use their preferred language when communicating with service providers 1.3 Use appropriate visual aids and other resources to support client's understanding 1.4 Show respectful and culturally appropriate behaviour and communication to the client and/or significant others
2. Assist service providers to understand client and community needs	2.1 Communicate client needs and concerns to service providers to support access to services 2.2 Communicate local community values, beliefs and gender roles to service providers as required 2.3 Explain the role of traditional healers in the community to service providers as required
3. Give practical support to clients when accessing health services	3.1 Book client appointments as required 3.2 Inform client and/or significant other person of appointments 3.3 Organise and/or provide transport to enable clients and significant other person/s to travel to and from health service provider 3.4 Contact clients as required to ensure appointments are kept 3.5 Follow-up with client and/or significant other person after appointments as required

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Numeracy	• in order to interpret and communicate temporal data, including minutes, hours, days and weeks

© Commonwealth of Australia, 2025 HumanAbility

Writing	• in order to schedule client appointments • in order to record client details when making bookings

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTAHW002 Support clients to obtain access to health services

Modification History

Release	Comments
Release 3	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 2	Corrections to metadata and mapping. Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- under supervision, supported at least three individual Aboriginal and/or Torres Strait Islander clients to access health services by:
  - encouraging each client to use their preferred language, visual aids and other resources to support understanding
  - explaining and clarifying basic health information and services to the client
  - ensuring the client has understood the services available
  - ensuring service providers understand client and community health needs, values and beliefs

© Commonwealth of Australia, 2025 HumanAbility

- arranging the time, attendance and follow up for the client to attend health services and appointments, including organising travel arrangements.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- language or languages, as spoken within the community and the workplace (verbal skills essential, written not essential)
- interpreter and/or translation services available to assist clients and the service provider
- terminology relevant to specific aspects of care provided and the workplace
- the culture of the client, caregiver and health service provider
- the communication style of the client, caregiver or health service provider
- organisation policies, guidelines and procedures, including reporting procedures appropriate to the role.
-

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre
- under supervision, as part of a primary health care team
- with Aboriginal and/or Torres Strait Islander clients and communities.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

© Commonwealth of Australia, 2025 HumanAbility

Assessment must be undertaken by a workplace assessor who has expertise in this unit of competency and who is:

- an Aboriginal and/or Torres Strait Islander Health Worker

or:

- accompanied by an Aboriginal and/or Torres Strait Islander person who is a recognised member of the community with experience in primary health care.
-

HLTAHW003 Provide basic health information to clients

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Application

This unit describes the skills and knowledge required by a new worker in primary health care to deliver clear instructions and basic healthy lifestyle information to Aboriginal and/or Torres Strait Islander clients. The unit includes basic information on nutrition and environmental health and basic information to support implementation of a client's health care plan.

This unit applies to all staff providing support to the delivery of primary health care. All work tasks are to be performed under supervision.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 HumanAbility

Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Clarify client needs for health information	1.1 Use communication skills appropriate to individual clients and/or significant others to gain information about the client's specific basic health issues and needs 1.2 Consider cultural practices and beliefs when clarifying information needs of the client 1.3 Use principles of confidentiality to communicate findings about client information needs to appropriate staff 1.4 Gain information from health service providers to pass on to the client and/or significant other and clarify as required 1.5 Accurately record all information about the client as required by organisational standards
2. Provide basic health information to client	2.1 Use effective communication skills to deliver relevant health information to the client in line with client, community, organisation and legislative requirements 2.2 Provide basic information about healthy lifestyle, including nutrition and environmental health factors 2.3 Provide basic information to support individual health care plan 2.4 Provide information to support a self-care approach
3. Assist in the evaluation of health information provision	3.1 Consult client and/or community about effectiveness of health information 3.2 Seek feedback to determine how well health information has been understood 3.3 Provide feedback to supervisor and appropriate personnel

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- provided basic health information to at least three Aboriginal and/or Torres Strait Islander clients by:
  - gaining and clarifying each client's health information requirements in a culturally sensitive manner
  - providing basic health information specific to the needs of each client, including information on:
    - nutrition and environmental health
    - individual health care planning
    - self-care and management approaches
  - getting feedback from each client on the services received
  - providing feedback to relevant personnel regarding the effectiveness of health information.

© Commonwealth of Australia, 2025 HumanAbility

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role under supervision.

This includes basic knowledge of:

- major body systems, organs and their functions, including:
  - cardiovascular system (including heart, arteries and veins)
  - respiratory system (including lungs, nose, mouth, throat)
  - senses (including sight, hearing, smell, touch, taste and equilibrium)
  - skin and integumentary system (including skin layers, hair and nails)
  - digestive and gastrointestinal system (including stomach, intestines, bowel)
  - nervous system (including brain and nerves)
  - circulatory system (including arteries and veins)
  - genitourinary system (including male and female genital and reproductive systems)
  - endocrine system (including glands and hormones)
  - musculoskeletal system (skull, skeleton, muscles, body tissue)
- factors contributing to healthy lifestyles including:
  - nutrition
  - exercise and activity
  - alcohol consumption
  - smoking
  - use and abuse of prescribed and illicit drugs
  - healthy weight range
  - environmental factors
  - mental, social and emotional health and wellbeing
- processes to prevent infection and chronic diseases
- community health issues
- health care plans
- organisational standards, policies and procedures.

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre

© Commonwealth of Australia, 2025 HumanAbility

- under supervision, as part of a primary health care team
- with Aboriginal and/or Torres Strait Islander clients and communities.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment must be undertaken by a workplace assessor who has expertise in this unit of competency and who is:

- an Aboriginal and/or Torres Strait Islander Health Worker

or:

- accompanied by an Aboriginal and/or Torres Strait Islander person who is a recognised member of the community with experience in primary health care.

HLTAHW004 Perform work role in Aboriginal and/or Torres Strait Islander primary health care context

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages.

Application

This unit describes the knowledge and skills required by a worker in primary health care to work effectively and appropriately with Aboriginal and/or Torres Strait Islander clients and community. The unit includes the worker researching, understanding and performing their role in the broader primary health care context, as well as planning to further improve their work practices.

This unit applies to all staff providing support to the delivery of primary health care and can be adapted for a range of entry-level roles within the context of primary health care for the Aboriginal and/or Torres Strait Islander community. All work tasks are to be performed under supervision.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 HumanAbility

Elements define the essential outcomes.	*The Performance Criteria specify the level of performance needed to demonstrate achievement of the Element.*
1. Inform own role	1.1 Identify individual personnel in the organisation and their role 1.2 Identify and apply work policies and procedures 1.3 Consider how own role contributes to the organisation's work to provide primary health care in the Aboriginal and/or Torres Strait Islander community
2. Perform work tasks	2.1 Use time management skills to organise and perform work tasks during required hours 2.2 Locate and use required workplace forms, processes and systems to complete work tasks 2.3 Identify and wear appropriate clothing and/or personal protective equipment as required 2.4 Seek clarification and direction about work tasks as required 2.5 Complete all designated work tasks on time and to required organisational standards
3. Communicate effectively within work role	3.1 Use respectful and effective oral communication methods with staff, clients and community members 3.2 Respect privacy and confidentiality when handling all client information 3.3 Complete all relevant documents accurately and on time and seek guidance as required
4. Identify future pathways	4.1 Reflect on work performances including own strengths and areas for improvement 4.2 Seek feedback on work performance 4.3 Discuss options for skill and knowledge development with supervisor and/or colleagues 4.4 Identify opportunities for learning to improve own skills and further career opportunities in primary health care

© Commonwealth of Australia, 2025 HumanAbility

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Numeracy	• in order to manage time and organise work tasks
Reading	• in order to interpret key information in workplace forms and procedures relevant to job role
Oral communication	• in order to listen to information and/or instructions from staff, clients and community members • in order to comprehend own role in the workplace in relation to the role of colleagues and team members
Learning	

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTAHW004 Perform work role in Aboriginal and/or Torres Strait Islander primary health care context

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- effectively performed at least three different work tasks within their work role. This includes:
  - attending at the workplace at all required times
  - communicating with and seeking clarification/guidance from relevant personnel as required
  - organising own time to perform work tasks according to deadlines
  - using appropriate and/or required clothing and equipment and personal protective equipment
  - completing all documentation accurately and on time as required by work task
  - gaining feedback for each work task from relevant staff in the workplace
  - following all relevant workplace processes, and organisational procedures and policies

© Commonwealth of Australia, 2025 HumanAbility

- dressing to show respect to staff, clients and community
- communicating respectfully and effectively with staff, clients and community
- respecting the confidentiality of all client information received as part of the role

- identified development within own role in discussions with manager or senior staff on at least one occasion by:
  - defining how own role contributes to Aboriginal and/or Torres Strait Islander primary health care
  - identifying at least one area for skill improvement to perform work tasks and/or at least one area of own interest to pursue within the primary health care context
  - seeking opportunities for further development.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the work role. This includes knowledge of:

- a basic understanding of the purpose of primary health care and in particular its role within the context of Aboriginal and Torres Strait Islander clients and communities
- services typically provided by a primary health care service, including health promotion, illness prevention, treatment of chronic diseases, care of the sick, advocacy and community development
- staff and teams typically involved in a primary health care service and their specific roles
- scope of own work role
- organisation standards, policies and procedures relevant to performance of own role
- organisation structure, staff and their roles.

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre
- under supervision, as part of a primary health care team
- with Aboriginal and/or Torres Strait Islander clients and communities.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

© Commonwealth of Australia, 2025 HumanAbility

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment must be undertaken by a workplace assessor who has expertise in this unit of competency and who is:

- an Aboriginal and/or Torres Strait Islander Health Worker

or:

- accompanied by an Aboriginal and/or Torres Strait Islander person who is a recognised member of the community with experience in primary health care.

HLTAHW005 Work in an Aboriginal and/or Torres Strait Islander primary health care context

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Application

This unit describes the knowledge and skills required to deliver primary health care services within the context of Aboriginal and/or Torres Strait Islander health. It provides an understanding of historical, political and other significant factors impacting on the current health of Aboriginal and/or Torres Strait Islander communities.

This unit applies to Aboriginal and/or Torres Strait Islander Health Workers working as part, and under the supervision, of a multidisciplinary primary health care team to provide a range of primary health care services to Aboriginal and/or Torres Strait Islander clients and communities.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 HumanAbility

Elements define the essential outcomes.	Performance criteria specify the level of performance needed to demonstrate achievement of the element.
1. Identify factors impacting on Aboriginal and/or Torres Strait Islander health and the delivery of primary health care services	1.1 Consider the national and local history of Aboriginal and/or Torres Strait Islander people as a factor in primary health care work 1.2 Consider the impact of social, political, spiritual, economic and environmental factors on the health of Aboriginal and/or Torres Strait Islander people
2. Apply primary health care principles	2.1 Ensure primary health care principles underpin service provision and work practices 2.2 Deliver services that support self-determination and empowerment in Aboriginal and/or Torres Strait Islander people and communities 2.3 Demonstrate commitment to achieving access and equity in health services for Aboriginal and/or Torres Strait Islander people 2.4 Establish and maintain networks with health care agencies and associated services to support Aboriginal and/or Torres Strait Islander health care
3. Work in a culturally appropriate and safe manner	3.1 Consider and respect local community values, beliefs and gender roles when providing health care to Aboriginal and/or Torres Strait Islander people 3.2 Deliver health services safely in line with organisation policies, regulatory requirements and community protocols 3.3 Apply cultural safety protocols in the implementation of government policies, research and data collection, and the delivery of services to Aboriginal and/or Torres Strait Islander people 3.4 Identify any cultural factors that produce stress, impact personal wellbeing or have a potential to impact on own work practices, and report as appropriate
4. Apply Aboriginal and/or Torres Strait Islander health policies and resources	4.1 Identify relevant aspects of Aboriginal and/or Torres Strait Islander health strategies, policies, bodies and resources

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	Performance criteria specify the level of performance needed to demonstrate achievement of the element. 4.2 Ensure policies and resources are applied in line with identified needs of Aboriginal and/or Torres Strait Islander people and communities 4.3 Identify barriers to access and equity in relation to Aboriginal and/or Torres Strait Islander health 4.4 Take available opportunities to advocate on behalf of Aboriginal and/or Torres Strait Islander people and/or communities 4.5 Reflect on work practices in Aboriginal and/or Torres Strait Islander community-controlled organisations and on current strategies, programs and models that address Aboriginal and/or Torres Strait Islander primary health care issues 4.6 Maintain confidentiality of client information

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Learning	• in order to locate, access and interpret information on factors impacting on Aboriginal and/or Torres Strait Islander health and the delivery of primary health care services • in order to apply primary health care principles in familiar and some less familiar contexts
Reading	• in order to interpret key information in organisational policies and regulations, health strategies and relevant resources

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- worked with at least three Aboriginal and/or Torres Strait Islander clients in the primary health care context by:
  - interacting and communicating in a culturally safe manner with and on behalf of Aboriginal and/or Torres Strait Islander clients in line with identified community needs and workplace requirements-
  - working within the scope of their job role to apply the principles of primary health care in the delivery of health care services to each client, considering their individual needs

© Commonwealth of Australia, 2025 HumanAbility

- working with an understanding of the impact of historical, social, political, spiritual and environmental factors on the health of Aboriginal and/or Torres Strait Islander people
- identifying and applying relevant aspects of Aboriginal and/or Torres Strait Islander policies, strategies and resources in line with the scope of their role.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- Aboriginal and/or Torres Strait Islander history, including:
  - social structures, beliefs and values of traditional and contemporary Aboriginal and/or Torres Strait Islander communities in Australia
  - impact of colonisation as experienced by Aboriginal and/or Torres Strait Islander people
  - historical dilemmas faced by Aboriginal and/or Torres Strait Islander people (e.g. to acknowledge or deny Aboriginality)
  - impact of government policies and legislation on Aboriginal and/or Torres Strait Islander communities, families and individuals
- specific health concerns and issues for Aboriginal and/or Torres Strait Islander clients and community, including:
  - community perceptions of major health issues affecting them and underlying causes
  - key health statistics (national, state and/or local) for Aboriginal and/or Torres Strait Islander people compared to those of non-Aboriginal and/or Torres Strait Islander population (such as life expectancy at birth, infant mortality rate and age-standardised mortality ratios for selected health conditions)
  - chronic illnesses impacting on the Aboriginal and/or Torres Strait Islander community, including cardiovascular disease, kidney disease, respiratory disease, diabetes, cancer, obesity and asthma
- social, cultural and environmental factors impacting on Aboriginal and/or Torres Strait Islander health status, including:
  - traditional Aboriginal and/or Torres Strait Islander cultural practices and lifestyle
  - importance of land, tradition and cultural practices to Aboriginal and/or Torres Strait Islander people's health
  - socio-economic and political factors
  - perpetuation of disadvantage
  - importance of personal achievement, education and supportive family/social networks

© Commonwealth of Australia, 2025 HumanAbility

  - strategies for Aboriginal and/or Torres Strait Islander families to maintain strong culture and supportive social networks, and maximise educational, employment and social opportunities for their children
  - environmental factors such as overcrowding and housing and infrastructure conditions
- relevant definitions of 'health' (including those of the World Health Organisation and the National Aboriginal Community Controlled Health Organisation)
- principles of primary health care, including health promotion, illness prevention, treatment of chronic diseases, care of the sick, advocacy and community development
- relevant aspects of health care system, including:
  - relevant agencies such as Medicare, Centrelink, and Aboriginal and/or Torres Strait Islander health organisations
  - access to various benefits, including Medicare, pharmaceutical and related social benefits
  - federal and state legislation and regulations impacting on delivery of primary health care
- principles and organisation procedures and policies relating to confidentiality and privacy.

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre
- as part of, and under the supervision of, a multidisciplinary primary health care team
- with Aboriginal and/or Torres Strait Islander clients and communities.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment must be undertaken by a workplace assessor who has expertise in this unit of competency and who is:

- an Aboriginal and/or Torres Strait Islander Health Worker

or:

© Commonwealth of Australia, 2025 HumanAbility

- accompanied by an Aboriginal and/or Torres Strait Islander person who is a recognised member of the community with experience in primary health care.

HLTAHW006 Facilitate and advocate for the rights and needs of clients and community members

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Application

This unit describes the required knowledge and skills for primary health care workers to assist Aboriginal and/or Torres Strait Islander clients and communities to understand their rights and communicate their needs within a self-determination framework. This includes the use of interpreter and translation services to liaise with service providers to enable clients to access a range of health services. This unit does not assume the individual worker has interpretation and/or translation qualifications to provide these services themselves.

This unit applies to Aboriginal and/or Torres Strait Islander Health Workers working as part, and under the supervision, of a multidisciplinary primary health care team to provide a range of primary health care services to Aboriginal and/or Torres Strait Islander clients and communities.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

© Commonwealth of Australia, 2025 HumanAbility

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Identify the rights, needs and options available to the client	1.1 Use culturally appropriate and safe communication to assist the client to identify their needs in relation to health issues and services 1.2 Support client to identify needs that are not being met by existing services or supports 1.3 Provide client with information about their rights and options for meeting their needs 1.4 Assist client to identify their preferred option and negotiate other options, as required
2. Assist the client to present their own needs	2.1 Assist client to make contact with relevant persons and agencies 2.2 Provide client with information and support them to present their rights and needs 2.3 Encourage client to communicate in their preferred language, and provide support as required 2.4 Assist client to put their views to relevant persons and agencies to meet their needs as required 2.5 Follow organisational procedures to arrange for interpreting and translation services as requested or required by clients
3. Advocate for the client when self-advocacy is not possible	3.1 Identify relevant individuals or agencies and contact them about the specific issue 3.2 Clearly represent the client's point of view to those involved 3.3 Use clear, appropriate and accessible language that values and respects each individual 3.4 Discuss progress and outcomes with client 3.5 Use translation and interpretation services to ensure the client's understanding and involvement in the process, as required 3.6 Maintain client confidentiality at all times when

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	communicating client information
4. Liaise with health service providers to meet client and community needs	4.1 Inform multidisciplinary health service teams of ongoing and/or changing individual and community needs and issues that may impact on service provision
	4.2 Communicate local community values, beliefs and gender roles to service providers, as required
	4.3 Explain to service providers, as required, the role of traditional healers in the community
	4.4 Consult health service providers about the organisation and delivery of health services in the community
	4.5 Undertake consultation to provide clients with reasonable and timely access to general and specialist health services required outside their own community
5. Promote the rights, needs and interests of the client	5.1 Regularly discuss rights and needs of clients with other workers and supervisor
	5.2 Make suggestions to other workers and supervisor about ways to improve services to clients
	5.3 Implement changes as required

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Reading	• in order to interpret and synthesise information and provide to client

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Assessment Requirements for HLTAHW006 Facilitate and advocate for the rights and needs of clients and community members

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- supported Aboriginal and/or Torres Strait Islander clients and/or groups to identify, clarify and present their rights and needs on at least three occasions by:
  - using culturally safe and appropriate communication skills to work effectively with Aboriginal and/or Torres Strait Islander clients
  - identifying avenues for addressing each client's issues and/or concerns and/or improving services provided
  - supporting individual clients to express themselves in culturally appropriate and safe ways to service providers to access services
  - supporting individual clients to use their preferred language to communicate

© Commonwealth of Australia, 2025 HumanAbility

- advocating on behalf of clients and/or community groups where they were unable to express individual or collective concerns.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- organisational policies, guidelines and procedures and legislation or regulations relating to:
  - client confidentiality
  - referral, including various levels of urgency, and follow-up of client
  - mandatory reporting
  - notifiable communicable diseases
  - limits of own ability and authority
  - reporting procedures
  - documentation
- a basic understanding of:
  - Charter of Human Rights of the Child
  - Child Protection Legislation
  - Domestic Violence Legislation
  - Anti-discrimination Legislation
  - Centrelink and Veteran Affairs Guidelines
- referral options and resources available to community members
- existing program policy
- interpreter and/or translation services available within local and regional areas
- language or languages, written and/or spoken, as required within the community and workplace
- medical terminology relevant to the workplace
- communication style and culture of the client, caregiver and health service provider.

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre
- as part of, and under the supervision of, a multidisciplinary primary health care team

Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Application

This unit describes the knowledge and skills required to undertake a range of basic health assessments of Aboriginal and/or Torres Strait Islander clients, including infants, children and adults.

This unit applies to Aboriginal and/or Torres Strait Islander Health Workers working as part, and under the supervision, of a multidisciplinary primary health care team to provide a range of primary health care services to Aboriginal and/or Torres Strait Islander clients and communities.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 HumanAbility

Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Obtain client information	1.1 Establish a relationship of trust with the client by demonstrating and respecting confidentiality 1.2 Use effective, culturally appropriate and safe communication to gain information from the client and/or significant others about general health, chronic conditions and specific presenting problems including any medications being taken 1.3 Access available documentation and written sources of information in relation to client's health 1.4 Consult relevant allied health professionals about client's health 1.5 Accurately record client information on client file according to organisation procedures and policies
2. Perform basic physical examination	2.1 Explain the purpose and procedures involved in the examination to the client using culturally appropriate and safe communication skills 2.2 Confirm client understanding and gain client consent to the examination 2.3 Consider and respect Aboriginal and/or Torres Strait Islander community values, beliefs and gender roles when undertaking examination 2.4 Conduct examination according to organisation procedures and policies, standard infection control and workplace health and safety requirements 2.5 Accurately record measurements and findings and identify any significant variation from normal ranges according to organisational procedures 2.6 Identify non-clinical factors potentially responsible for significant variations identified and repeat assessments as required 2.7 Use, maintain and regularly clean medical equipment according to organisational procedures, standard infection control and workplace health and safety requirements
3. Summarise and present	3.1 Accurately document client history and

Assessment Requirements for HLTAHW007 Undertake basic health assessments

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- worked with at least five Aboriginal and/or Torres Strait Islander clients, including infants, adults and children to:
  - conduct a health assessment of each client by:
    - using a structured approach to assessment
    - taking and recording relevant details of client's history and current state, including body language
    - observing and assessing client's health in line with guidance
    - using correct procedures and protocols to examine common client presentations
    - using medical equipment correctly
    - taking standard precautions for infection control

© Commonwealth of Australia, 2025 HumanAbility

    - summarising and reporting findings in line with organisation procedures and protocols
  - interpret the outcomes of the assessment of each client by:
    - identifying any significant variations from normal range of assessment outcomes for each client
    - identifying and acting upon situations requiring urgent action according to organisation procedures
    - recognising common uncomplicated health conditions from clinical features of each client
  - used effective and culturally appropriate and safe communication and interaction with each client and/or significant others, including:
    - eliciting relevant information from client or documents
    - clearly explaining examination procedures and protocols to client
    - making appropriate referrals
  - recorded all findings in accordance with organisational procedures and policies with adherence to client confidentiality.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- organisational policies and procedures and legislation or regulations relating to:
  - client confidentiality
  - referral, including various levels of urgency
  - mandatory reporting
  - notifiable communicable diseases
  - limits of own ability and authority
- infection control and workplace health and safety procedures
- knowledge of anatomy and physiology to identify major body systems, relevant organs and their functions, including:
  - cardiovascular system (including heart, arteries and veins)
  - respiratory system (including lungs, nose, mouth, throat)
  - senses (including sight, hearing, smell, touch, taste and equilibrium)
  - skin and integumentary system (including skin layers, hair and nails)
  - digestive and gastrointestinal system (including stomach, intestines, bowel)
  - nervous system (including brain and nerves)
  - circulatory system (including arteries, veins)
  - genitourinary system (including male and female genital and reproductive systems)
  - endocrine system (including glands and hormones)

© Commonwealth of Australia, 2025 HumanAbility

- musculoskeletal system (skull, skeleton, muscles, body tissue)

- common conditions and presenting problems associated with major body systems and relevant organs, including chronic conditions
- acute chronic conditions impacting on Aboriginal and/or Torres Strait Islander clients and communities, including:
  - cardiovascular disease
  - diabetes
  - cancer
  - chronic respiratory disease
  - chronic kidney disease
  - asthma
  - arthritis
- features of chronic illness, including:
  - complex causality
  - multiple risk factors
  - long latency periods
  - a prolonged course of illness
  - functional impairment or disability
- determinants of chronic conditions, including:
  - smoking
  - physical inactivity
  - nutrition
  - alcohol intake
  - use of illicit drugs
  - obesity
- purpose, procedures and equipment involved in the following examinations, including:
  - clinical hand wash
  - external physical observations
  - adult and paediatric methods for measuring:
    - temperature
    - pulse and respiration
    - blood pressure
    - blood glucose level
    - haemoglobin
    - weight and height
    - length
    - head and waist circumference
    - visual acuity and ear examination
    - peak expiratory flow rate (peak flow meter)
    - INR (a test for blood clotting)

© Commonwealth of Australia, 2025 HumanAbility

    - glycohaemoglobin
    - spirometry (measuring lung function)
    - ECG (to detect cardiac abnormalities)
- 'normal' range of outcomes of physical assessments
- non-clinical reasons for significant variation from 'normal' range of outcomes
- common over-the-counter and prescribed medicines used within the community and their general purposes
- basic knowledge relating to pregnancy and birthing, including:
  - basic mechanics of pregnancy and birthing
  - impact of smoking and alcohol in pregnancy
  - impact of chronic conditions on pregnancy and birthing.

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre
- as part of, and under the supervision of, a multidisciplinary primary health care team
- with Aboriginal and/or Torres Strait Islander clients and communities.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment must be undertaken by a workplace assessor who has expertise in this unit of competency and who is:

- an Aboriginal and/or Torres Strait Islander Health Worker

or:

- accompanied by an Aboriginal and/or Torres Strait Islander person who is a recognised member of the community with experience in primary health care.

HLTAHW008 Assist in planning and implementation of basic health care

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Application

This unit describes the required knowledge and skills to assist in the planning and implementation of a health care plan to address findings from clinical assessments. Actions as part of the plan may include delivering information, supporting healthy lifestyle practices, and explaining and supporting medication use and specific medical procedures.

This unit applies to Aboriginal and/or Torres Strait Islander Health Workers working as part, and under the supervision, of a multidisciplinary primary health care team to provide a range of primary health care services to Aboriginal and/or Torres Strait Islander clients and communities.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

© Commonwealth of Australia, 2025 HumanAbility

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Assist in planning a care response to a health assessment	1.1 Show consideration of Aboriginal or Torres Strait Islander community values, beliefs and gender roles when assisting in developing a health care plan 1.2 Provide assistance to develop care plan, including delivering health care services with the primary health care team and other health care providers 1.3 Take immediate action in line with standard treatment protocols to address life-threatening conditions, injuries or events appropriate to own role and authority 1.4 Document care plan in line with standard protocols for health management and organisation procedures 1.5 Ensure care plan supports clients in taking a self-care approach to health, in line with individual needs and organisation requirements
2. Communicate the need for a health care plan	2.1 Use culturally appropriate and safe communication with client and/or significant others to discuss health assessment findings and the need for a health care plan 2.2 Explain the purpose and impact of a primary health care plan to the client and/or significant others 2.3 Encourage the client to ask questions about the health care plan to support understanding and agreement 2.4 Seek support from primary health care team members to support the client's understanding of the need and scope of the health care plan as required
3. Implement treatment under health care plan	3.1 Use visual aids and other resources to explain each aspect of the treatment to the client and/or significant others and check their understanding

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	and agreement
	3.2 Initiate treatment as part of health care plan following organisational procedures
	3.3 Deliver health care services with reference to the primary health care team and other providers
	3.4 Report serious or potentially serious health problems as determined in organisational protocols
	3.5 Follow all organisational procedures supporting infection control and workplace health and safety
	3.6 Implement basic life-support and clinical treatments in line with organisational guidelines and limits of own ability and authority
	3.7 Assist clients requiring referral to gain access to appropriate service providers
4. Monitor effectiveness of care	4.1 Monitor health, chronic conditions, symptoms and potential acute presentations of the client in accordance with care plan and as negotiated with the client and/or significant others
	4.2 Communicate with client and/or significant others about the progress of or concerns about the care plan
	4.3 Review and evaluate effectiveness of care against care plan and adjust as required in consultation with primary health care team, other health professionals and organisational procedures
	4.4 Undertake effective networking and liaison with external health care and other service providers to facilitate client access to services
	4.5 Document client progress in the client's file in accordance with organisational policies and procedures

© Commonwealth of Australia, 2025 HumanAbility

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Numeracy

- in order to use and record data from medical equipment, including thermometers, blood glucose testing units and peak expiratory flow rate meters
- in order to measure vital signs, including temperature, pulse, blood pressure andture, pulse, blood pressure,temperature, pulse, blood pressure, respiratory rate and blood sugar level, blood pressure testing respiratory rate

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTAHW008 Assist in planning and implementation of basic health care

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- assisted in the planning and implementation of basic health care for at least five Aboriginal and/or Torres Strait Islander clients by:
  - communicating in culturally safe and appropriate ways with each client and/or significant others to effectively:
    - gather information to assess health status
    - communicate care plan options
    - check the client and/or significant other's understanding of information provided
    - supporting clients to implement self-management strategies
  - documenting the health care plan according to organisation procedures and policies
  - using relevant medical equipment safely and correctly to implement health care plan

© Commonwealth of Australia, 2025 HumanAbility

- recognising situations requiring immediate or urgent action and acting appropriately
- making appropriate referrals, and providing accurate and relevant details to clients and referral agencies
- assisting clients to access relevant benefits associated with the health care system, including, Medicare, pharmaceutical and other related benefits
- recognising appropriate progress in relation to identified criteria for client care plan
- determining further actions in the context of monitoring and evaluating outcomes with colleagues
- maintaining client confidentiality according to organisational procedures and policies.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- organisational policies and procedures and legislation or regulations relating to:
- client confidentiality
- referral, including various levels of urgency, and follow-up of client
- mandatory reporting
- notifiable communicable diseases
- limits of own ability and authority
- reporting procedures
- documentation
- infection control and workplace health and safety procedures
- knowledge of anatomy and physiology to identify major body systems, relevant organs and their functions, including:
    - cardiovascular system (including heart, arteries and veins)
    - respiratory system (including lungs, nose, mouth, throat)
    - senses (including sight, hearing, smell, touch, taste and equilibrium)
    - skin and integumentary system (including skin layers, hair and nails)
    - digestive and gastrointestinal system (including stomach, intestines, bowel)
    - nervous system (including brain and nerves)
    - circulatory system (including arteries, veins)
    - genitourinary system (including male and female genital and reproductive systems)
    - endocrine system (including glands and hormones)
    - musculoskeletal system (skull, skeleton, muscles, body tissue)
- common conditions and presenting problems associated with major body systems and relevant organs, including general impact of chronic conditions

© Commonwealth of Australia, 2025 HumanAbility

- acute chronic conditions impacting on Aboriginal and/or Torres Strait Islander clients and communities, including:
    - cardiovascular disease
    - diabetes
    - cancer
    - chronic respiratory disease
    - chronic kidney disease
    - asthma
    - arthritis
- features of chronic illness, including:
    - complex causality
    - multiple risk factors
    - long latency periods
    - a prolonged course of illness
    - functional impairment or disability
    - determinants of chronic conditions, including:
    - smoking
    - physical inactivity
    - nutrition
    - alcohol intake
    - use of illicit drugs

- purpose, procedures and equipment involved in the following examinations, including:
    - temperature
    - pulse and respiration
    - blood pressure
    - blood glucose level
    - haemoglobin
    - weight and height
    - length
    - head and waist circumference
    - visual acuity and ear examination
    - peak expiratory flow rate
- ‘normal’ range of outcomes of physical assessments
- non-clinical reasons for significant variation from ‘normal’ range of outcomes
- common over-the-counter and prescribed medicines used within the community and their general purposes
- basic knowledge relating to pregnancy and birthing, including:
    - basic mechanics of pregnancy and birthing
    - impact of smoking and alcohol in pregnancy

© Commonwealth of Australia, 2025 HumanAbility

  - impact of chronic conditions on pregnancy and birthing
  - basic newborn and infant care, including:
  - promotion of breast feeding
  - growth assessment
  - correct use of infant formula
- principles of:
  - aseptic technique
  - effective bandaging
  - infection control and limiting cross infection
- basic pharmacological principles relevant to specific treatments to be initiated
- criteria and methods for evaluating effectiveness of care/treatments
- strategies, methods and tools available for self-management of chronic conditions and to address barriers to self-management
- environmental factors contributing to poor health which can impact on the effectiveness of health care plans such as:
  - lack of access to clean water
  - faulty housing equipment including toilets, taps, drainage, pipes, washing machines and hot water
  - poor housing or building design contributing to health problems
  - overcrowding
  - littering and lack of facilities to dispose of rubbish
  - personal hygiene and community interactions
  - unsafe food handling, preparation, storage and disposal.

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre
- as part of, and under the supervision of, a multidisciplinary primary health care team
- with Aboriginal and/or Torres Strait Islander clients and communities.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

© Commonwealth of Australia, 2025 HumanAbility

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment must be undertaken by a workplace assessor who has expertise in this unit of competency and who is:

- an Aboriginal and/or Torres Strait Islander Health Worker

or:

- accompanied by an Aboriginal and/or Torres Strait Islander person who is a recognised member of the community with experience in primary health care.

HLTAHW009 Provide information about social and emotional support

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Application

This unit describes the skills and knowledge required to communicate with clients requiring social and emotional support and provide information about available referral options. It provides basic skills and knowledge in social and emotional support required by those involved in face-to-face delivery of primary health care services.

This unit applies to Aboriginal and/or Torres Strait Islander Health Workers working as part, and under the supervision, of a multidisciplinary primary health care team to provide a range of primary health care services to Aboriginal and/or Torres Strait Islander clients and communities.

This unit equips Aboriginal and/or Torres Strait Islander Health Workers to provide support related to social and emotional wellbeing and does not infer that they are qualified counsellors.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

© Commonwealth of Australia, 2025 HumanAbility

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Identify social and emotional needs of clients	1.1 Use effective and culturally appropriate and safe communication skills to gain an understanding of the client's concerns
	1.2 Maintain client confidentiality at all times according to organisation procedures
	1.3 Record findings according to organisation procedures
2. Provide information about available social and emotional support services	2.1 Provide accurate information about counselling options, which are targeted to identified individual and community needs
	2.2 Adapt delivery of information as required to facilitate understanding and address need
	2.3 Obtain further information as required to address identified needs
	2.4 Support clients in taking a self-care approach to health, in line with individual needs and organisation and community requirements
3. Assist clients to receive support for social and emotional wellbeing	3.1 Consult other health professionals to clarify required care and support services, including referral to other service providers or allied health professionals
	3.2 Provide immediate support to clients in crisis, in consultation with the health team and supervisor and in line with organisation procedures
	3.3 Provide clients with details of social and/or emotional support service providers in line with identified needs
	3.4 Offer immediate help to bereaved family members

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
4. Follow up clients after accessing social and emotional supports	4.1 Consult individual and/or community about effectiveness of support services and associated support provided
	4.2 Investigate and provide additional referrals as required
5. Apply self-care strategies	5.1 Acknowledge limits of own personal ability, authority and role
	5.2 Seek debriefing as required
	5.3 Use ongoing self-care and stress management practices to manage work-related stress

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) *that are essential to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTAHW009 Provide information about social and emotional support

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- provided three Aboriginal and/or Torres Strait Islander clients with information about social and emotional support by:
  - communicating effectively with client to identify specific social and emotional needs
  - providing information about available support options and referring client as appropriate in consultation with client and other health professionals
  - maintaining records as required
  - following up counselling and/or other referred support effectiveness with client
  - managing own work-related stress and applied self-care strategies, including using debriefing services

© Commonwealth of Australia, 2025 HumanAbility

- demonstrating culturally appropriate and safe communication skills when interacting with clients and/or significant others at all times.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- organisation policies and procedures and legislation or regulations relating to:
  - client confidentiality
  - referral, including various levels of urgency, and follow-up of client
  - mandatory reporting
  - notifiable communicable diseases
  - limits of own ability and authority
  - reporting procedures
  - documentation
  - basic knowledge of distinctions between counselling, social and emotional, and mental health support and how each relates to Aboriginal and/or Torres Strait Islander communities
- scope of own role in providing social and emotional support
- available counselling, social and emotional support services and associated referral processes
- organisation policies on counselling
- basic information on human psychology and mental health care
- basic counselling principles
- culture and spirituality issues
- impacts of trans-generational trauma on individuals, families and communities around:
  - identity
  - loss of land
  - culture
  - language
  - ceremony
- legislative and confidentiality requirements
- community views on counselling needs
- self-care strategies for Aboriginal and/or Torres Strait Islander Health Worker, including debriefing, own counselling and employee assistance programs
- identifying and referring grief, dying and bereavement issues, such as:
  - Aboriginal and/or Torres Strait Islander views on death, dying, grief and bereavement as contrasted with views in non-Aboriginal communities
  - stages of grief

© Commonwealth of Australia, 2025 HumanAbility

- methods of coping with grief, dying and bereavement
- ways in which Aboriginal and/or Torres Strait Islander families may be assisted (e.g. in making funeral arrangements).

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre
- as part of, and under the supervision of, a multidisciplinary primary health care team
- with Aboriginal and/or Torres Strait Islander clients and communities.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment must be undertaken by a workplace assessor who has expertise in this unit of competency and who is:

- an Aboriginal and/or Torres Strait Islander Health Worker

or:

- accompanied by an Aboriginal and/or Torres Strait Islander person who is a recognised member of the community with experience in primary health care.

HLTAHW010 Identify community health issues, needs and strategies

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Application

This unit describes the skills and knowledge required to gather, interpret and act upon information about the community's health. It covers the collection of information for a specific purpose, such as developing a program or project, or for the purpose of maintaining a community health profile to identify and address issues impacting on community health.

This unit applies to Aboriginal and/or Torres Strait Islander Health Workers working as part, and under the supervision, of a multidisciplinary primary health care team to provide a range of primary health care services to Aboriginal and/or Torres Strait Islander clients and communities.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

© Commonwealth of Australia, 2025 HumanAbility

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Gather information on community health	1.1 Show respect for cultural values, beliefs and gender roles when planning to gather information on community health
	1.2 Consult with the primary health team to identify specific health issues and ways to gather community information on these issues
	1.3 Meet with community representatives to discuss health priorities and gain agreement to gather information from community members
	1.4 Identify community members as sources of information
	1.5 Explain purpose and method of gathering information to community members to support individual consent
	1.6 Use culturally appropriate and safe communication skills to effectively gather information (verbally or in writing) from individual community members
	1.7 Confidentially record information according to community, organisation and ethical requirements
2. Compile, interpret and report on information gathered	2.1 Compile information in format agreed with the primary health care team
	2.2 Provide assistance to document findings into written reports
	2.3 Provide assistance to identify and document community impact of emerging trends and issues
3. Provide feedback to organisation and community	3.1 Present information to organisation to contribute to planning health service provision
	3.2 Use information gathered to clarify effectiveness of existing health promotion, education, services and programs and plan for future actions
	3.3 Assist in advising the community of the outcomes

Assessment Requirements for HLTAHW010 Identify community health issues, needs and strategies

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- contributed to identifying community health issues, needs and strategies by:
  - consulting community members to obtain information on community health issues and to establish agreement on health priorities
  - using culturally appropriate and safe communication to effectively gather information
  - recording all information received confidentially and according to organisation procedures
- assisted in preparing written reports by interpreting health information gathered to aid in planning health promotion, services and programs for the community
- helped to provide feedback to the organisation about the outcomes of the research
- assisted to provide feedback to the community about the outcomes of the research.

© Commonwealth of Australia, 2025 HumanAbility

Each performance evidence task must be demonstrated at least once.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- organisation policies and procedures and legislation or regulations including:
  - client confidentiality
  - referral, including various levels of urgency, and follow-up of client
  - mandatory reporting
  - notifiable communicable diseases
  - limits of own ability and authority
  - reporting procedures
  - documentation
- relevant policies, protocols and procedures of the governments and other organisations
- relevant equipment, technology and local resources for collecting community information
- sources of information and ways to access it
- formats and systems for compiling information
- community development principles
- respect for community ownership of data

- environmental factors contributing to poor health, including:
  - lack of access to clean water
  - faulty housing equipment including toilets, taps, drainage, pipes, washing machines and hot water
  - poor housing or building design contributing to health problems
  - overcrowding
  - littering and lack of facilities to dispose of rubbish
  - personal hygiene and community interactions
  - unsafe food handling, preparation, storage and disposal.

Assessment Conditions

Skills must be demonstrated working:

Assessment Requirements for HLTAHW012 Assist with prevention and minimisation of substance misuse

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- provided accurate and accessible information about substance misuse to the community on at least three occasions by:
  - consulting with the primary health care team to determine the information to provide
  - communicating the information to members of the community in culturally appropriate and safe ways
  - using different mediums to support access to information
- worked with the primary health care team to support at least three individual clients by:
  - analysing client history and records to assess possible substance misuse for each client
  - planning follow-up action consultation with relevant community and/or health professionals

© Commonwealth of Australia, 2025 HumanAbility

- implementing and monitoring follow-up plans.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- physical, social and psychological effects of misuse of substances identified in this unit
- treatment options relating to specific substance misuse
- community issues and legislation relating to substance misuse
- patterns of drug and alcohol consumption relevant to the community and region
- service providers and associated referral processes
- understanding of blood-borne viruses in relation to injecting drug use, and associated high rates of HIV and hepatitis C in this Aboriginal population group
- indirect impacts of substance misuse, including:
  - foetal alcohol syndrome
  - environmental tobacco smoke
- principles of harm minimisation (as Australia's national policy), including:
  - harm reduction
  - supply reduction
  - demand reduction
- impact of substance misuse on the healthy functioning of major body organs and systems
- likely interactions between chronic illness and substance misuse
- impact of substance abuse on pregnancy, birth and unborn children.

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre
- as part of, and under the supervision of, a multidisciplinary primary health care team
- with Aboriginal and/or Torres Strait Islander clients and communities.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

© Commonwealth of Australia, 2025 HumanAbility

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment must be undertaken by a workplace assessor who has expertise in this unit of competency and who is:

- an Aboriginal and/or Torres Strait Islander Health Worker

or:

- accompanied by an Aboriginal and/or Torres Strait Islander person who is a recognised member of the community with experience in primary health care.

HLTAHW013 Respond to emergencies

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Application

This unit describes the required skills and knowledge to contribute to a response to emergencies that affect the community, in accordance with a prepared plan of action. It may involve dealing with emergencies of a medical or non-medical nature.

This unit applies to Aboriginal and/or Torres Strait Islander Health Workers working as part, and under the supervision, of a multidisciplinary primary health care team to provide a range of primary health care services to Aboriginal and/or Torres Strait Islander clients and communities.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT **PERFORMANCE CRITERIA**

Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Assess the emergency	1.1 Identify factors which determine the event is an emergency 1.2 Seek information about the emergency from key people and the community, as time permits 1.3 Determine needs of the community and/or community members, in consultation with key people and the community, as time permits
2. Identify existing relevant emergency action plans	2.1 Locate organisational protocols, procedures and plans for responding to emergencies 2.2 Identify strategies for responding to emergencies with the primary health care team
3. Identify own and others' roles in implementing the emergency action plan	3.1 Identify own roles and responsibilities and how it supports the roles of others in the primary health care team or externally 3.2 Identify and contact the emergency action plan coordinator as required 3.3 Identify and contact other workers with responsibilities for responding to the emergency as required
4. Implement the emergency action plan	4.1 Undertake work according to the strategy for responding to the emergency in line with organisation, community and legislative requirements 4.2 Provide key people and the community with progress reports, as time and client confidentiality permits 4.3 Maintain client and community confidentiality
5. Follow-up emergency	5.1 Monitor and review the emergency, in consultation with key people 5.2 Identify follow-up services and provide in line with community needs and workers' responsibilities

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
6. Provide feedback on the emergency action plan	6.1 Provide feedback about the effectiveness of the emergency action plan to key people 6.2 Suggest ways to improve the emergency action plan, if appropriate 6.3 Identify and use opportunities for debriefing following emergencies as required

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTAHW013 Respond to emergencies

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- participated in workplace practice drills for each of the following emergency situations:
  - fire
  - bomb threat
- contributed to the planning of at least one emergency response as a member of a primary health care team by:
  - identifying conditions and factors contributing to an emergency situation
  - accessing existing emergency plans, procedures and protocols relevant to different emergency situations
  - identifying scope of own role in contributing to an emergency response
  - identifying possible actions for particular emergencies

© Commonwealth of Australia, 2025 HumanAbility

- determining appropriate means of communication in the event of an emergency and alternatives if required
- identifying relevant personnel and authorities to contact in the event of an emergency
- identifying follow-up measures once emergency situation has been handled.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- organisation policies and procedures and legislation or regulations relating to:
- client confidentiality
- referral, including various levels of urgency, and follow-up of client
- mandatory reporting
- notifiable communicable diseases
- limits of own ability and authority
- reporting procedures
- documentation
- relevant organisation policies, protocols and procedures relating to emergencies, including definition of emergency situations
- organisational and community meeting points for emergency situations
- potential emergency situations including:
    - violence from individuals or groups
    - hazardous environmental incidents
    - car and other vehicle accidents
    - plane crashes
    - mining accidents
    - epidemic diseases
    - fire, floods, extreme weather, earthquakes and other natural disasters
    - bomb threats
    - any other situations which require an urgent response
- local disaster planning processes
- immediate actions to deal with the emergency, including:
    - evacuation from affected area
    - sheltering in a safe location
    - medical treatment
    - raising awareness (both within and externally) of the emergency faced by the community
    - securing a particular area within an organisation or community

© Commonwealth of Australia, 2025 HumanAbility

  - removal of individuals or groups from an area
- strategies to deal with ongoing impact of the emergency, including:
- counselling
- community trauma responses
- provision of resources and services
- debriefing
- community ceremonies
- implementing actions requested by the community council
- employee assistance programs
- roles and responsibilities as defined by the emergency action plan
- emergency response agencies at local, state, territory or federal level
- community views, considerations and directions on responding to emergencies
- cultural and community specific information
- locations and facilities of suitable and/or alternative venues to provide emergency responses
- communication means during emergency procedures and contingency back-ups.

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre
- as part of, and under the supervision of, a multidisciplinary primary health care team
- with Aboriginal and/or Torres Strait Islander clients and communities.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment must be undertaken by a workplace assessor who has expertise in this unit of competency and who is:

© Commonwealth of Australia, 2025 HumanAbility

- an Aboriginal and/or Torres Strait Islander Health Worker

or:

- accompanied by an Aboriginal and/or Torres Strait Islander person who is a recognised member of the community with experience in primary health care.

HLTAHW014 Work with Elders in Aboriginal and/or Torres Strait Islander communities

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages.

Application

This unit describes the required skills and knowledge required by Aboriginal and/or Torres Strait Islander Health Workers to support the health of Elders in Aboriginal and/or Torres Strait Islander communities. Support may be provided to Elders living at home, in residential aged-care facilities, or in community organisations providing health care specifically for the Aboriginal and/or Torres Strait Islander community.

This unit applies to Aboriginal and/or Torres Strait Islander Health Workers working as part, and under the supervision, of a multidisciplinary primary health care team to provide a range of primary health care services to Aboriginal and/or Torres Strait Islander clients and communities.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 HumanAbility

Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Promote healthy lifestyle practices for Elders	1.1 Identify strategies that support Elders to adopt healthy lifestyle practices 1.2 Promote social, cultural and spiritual wellbeing of Elders in the community 1.3 Respect, recognise and accommodate Elders' interests and life activities when delivering services 1.4 Assist Elders to maintain social, cultural and spiritual connectedness with their community
2. Provide information to Elders on changes associated with ageing	2.1 Identify common problems associated with ageing and in particular for people of Aboriginal and/or Torres Strait Islander background 2.2 Provide information on physical changes associated with ageing 2.3 Assist Elders to recognise impact that changes associated with ageing may have on daily activities 2.4 Communicate situations of risk or potential risk associated with ageing
3. Support the rights and interests of Elders	3.1 Encourage and support the Elder and/or their advocate(s) to be aware of their rights and responsibilities 3.2 Conduct work in a way that demonstrates a commitment to access and equity principles 3.3 Adopt strategies to empower the Elder and/or their advocate(s) in regard to their service requirements 3.4 Provide information to the Elder and/or their advocate(s) to facilitate choice in their decision-making 3.5 Recognise and report to appropriate person when an Elder's rights are not being upheld 3.6 Provide information to the Elder and/or their advocate(s) regarding mechanisms for lodging complaints 3.7 Identify indicators of Elder abuse and respond appropriately in line with organisation policies and procedures

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
4. Support Elders who are experiencing loss and grief	4.1 Recognise signs that the Elder is experiencing grief and report to appropriate person 4.2 Use culturally appropriate and safe communication strategies when an Elder is expressing their fears and other emotions associated with loss and grief 4.3 Provide the Elder and/or their support network with information regarding relevant support services as required 4.4 Provide ongoing support and follow-up for the Elder 4.5 Recognise and seek appropriate assistance when debriefing services are required

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Reading	• in order to interpret relevant information in a range of health resources and policy documents

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTAHW014 Work with Elders in Aboriginal and/or Torres Strait Islander communities

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- worked effectively with at least three Elders in Aboriginal and/or Torres Strait Islander communities by:
  - communicating in a culturally appropriate and safe manner with Elders at all times
  - supporting healthy lifestyle practices to promote an individual Elder's social, cultural and spiritual wellbeing
  - supporting the Elder to undertake own interests and life activities
  - delivering services to each Elder with a focus on quality and commitment to promoting individual rights to maintain social, cultural and spiritual connectedness with community
  - providing information on the impact of ageing on physical and mental activity
  - advocating individual rights when receiving services
- provided appropriate information and support, and taken appropriate action for Elders who:

© Commonwealth of Australia, 2025 HumanAbility

- have experienced abuse and/or
- are suffering grief and loss.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- organisation policies and procedures and legislation or regulations relating to:
- client confidentiality
- referral, including various levels of urgency, and follow-up of client
- mandatory reporting
- notifiable communicable diseases
- limits of own ability and authority
- reporting procedures
- documentation
- key issues facing Elders and their carer(s) in Aboriginal and/or Torres Strait Islander communities
- available supports at local, state, territory and federal level specifically for Elders in the Aboriginal and/or Torres Strait Islander community
- current philosophies of service delivery in aged care
- impact of ageing demographics on funding and service delivery models
- current legislation, policy and programs, including The Commonwealth Home and Community Care program (HACC), Department of Veterans' Affairs and Government community care directions
- regulations and legislation relevant to work in the aged care and home and community care sector, including issues such as:
    - Elder abuse
    - drug administration
    - access and equity
    - duty of care implementation in home and community settings and worker roles
    - basic home fire safety including high-risk groups, behaviour that contributes to fire injury and fatalities, and smoke alarm placement, installation and maintenance
- principles of 'Ageing in place' and 'Positive ageing', including:
    - managing ageist attitudes
    - impact of changing expectations of clients, families and wider community
    - understanding individuality of ageing

© Commonwealth of Australia, 2025 HumanAbility

- key aspects of quality frameworks and how they link together
- quality monitoring activities, including:
  - audits
  - collection of data
  - visits by external bodies
- key aspects of regulatory/ accreditation quality standards in relation to delivery of services in aged care and home and community care
- foundation aspects of common physiological, chronic and age-related conditions, including:
  - arthritis and other musculoskeletal problems
  - depression and neurological disorders
  - diabetes
  - frailty and deconditioning
  - heart, lung and vascular disease
  - incontinence
  - skin disorders, including skin cancers
  - stroke
  - dementia
  - osteoporosis
- rights and responsibilities of Elders and workers in aged care and home and community care sector
- stages of loss and grief
- strategies for managing complaints
- recognising limits of own ability and authority
- organisation polices, guidelines and procedures.

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre
- as part of, and under the supervision of, a multidisciplinary primary health care team
- with Elders from Aboriginal and/or Torres Strait Islander communities.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

© Commonwealth of Australia, 2025 HumanAbility

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment must be undertaken by a workplace assessor who has expertise in this unit of competency and who is:

- an Aboriginal and/or Torres Strait Islander Health Worker

or:

- accompanied by an Aboriginal and/or Torres Strait Islander person who is a recognised member of the community with experience in primary health care.
-

HLTAHW015 Work under instructions to support the safe use of medication

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages.

Application

This unit describes the knowledge and skills required by Aboriginal and/or Torres Strait Islander Health Workers to support clients to use medication safely and under instruction.

The unit addresses the provision of physical assistance to take or receive medication. It may involve assisting or supporting the client with prescribed and/or over-the-counter medications, traditional and bush medicines, and complementary medicines.

This unit does not allow the individual worker to determine or calculate dosage of medication.

This unit applies to Aboriginal and/or Torres Strait Islander Health Workers working as part, and under the supervision, of a multidisciplinary primary health care team to provide a range of primary health care services to Aboriginal and/or Torres Strait Islander clients and communities.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

© Commonwealth of Australia, 2025 HumanAbility

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Confirm scope of own role in relation to medication	1.1 Confirm own role within a primary health care team to support the safe use of medication
	1.2 Identify lines of supervision and authority for reporting and clarifying issues within job role
	1.3 Identify legal and ethical boundaries and responsibilities relating to own job role
	1.4 Discuss and confirm contingency procedures for emergencies from performance of the job role
	1.5 Clarify any concerns or queries relating to scope of job role with relevant supervisor and/or member of primary health care team
2. Obtain instructions about medication	2.1 Gather all relevant information about client's medication requirements
	2.2 Discuss gathered information with appropriate member/s of primary health care team to confirm medication requirements
	2.3 Confirm instructions for medication with primary health care team
	2.4 Clarify any aspect of instructions as required
3. Communicate with the client about medication requirements	3.1 Communicate in a culturally appropriate and safe manner with the client and/or significant others at all times
	3.2 Explain the purpose of medication to the client
	3.3 Encourage the client and/or significant others to ask questions to promote understanding of the medication's purpose
	3.4 Confirm the client's understanding of the medication required to obtain informed consent
	3.5 Seek clarification and assistance from primary health care team as required

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	3.6 Document client's informed consent in client records according to organisational procedures and policies
4. Follow instructions to support safe use of medication	4.1 Explain the medication dosage to the client
	4.2 Assist client to measure out dosage required according to instructions
	4.3 Assist the client to use medication in correct way according to instructions
	4.4 Confirm the client has taken the medication
	4.5 Observe the client for any immediate abnormal physical reaction and advise primary health care team as required
	4.6 Document the medication taken in client records according to organisational procedures and policies
5. Support client's storage and transport of medication	5.1 Explain to client how the medication must be stored and the purpose of correct storage
	5.2 Confirm the client's understanding of storage requirements
	5.3 Confirm the client has an appropriate place for storing medication
	5.4 Explain to the client how to transport medication if medication must be moved
	5.5 Document all information given to the client about storage and transport of medication

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

© Commonwealth of Australia, 2025 HumanAbility

Numeracy	• in order to explain the medication dosage to the client and record the medication taken

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTAHW015 Work under instructions to support the safe use of medication

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- supported at least five clients in the safe use of medication by:
  - clarifying own role in relation to supporting clients to use over-the-counter and prescribed medication safely
  - gaining instructions for each client's use of medication and clarifying any concerns with primary health care team
  - using culturally appropriate and safe communication skills to support each client's understanding of the medication's purpose and instructions for safe use
  - supporting each client to safely use medication by following instructions
  - confirming all actions with appropriately authorised practitioner
  - correctly documenting each stage of the process according to organisational procedures and policies.

© Commonwealth of Australia, 2025 HumanAbility

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the work role. These include knowledge of:

- organisational policies and procedures and legislation or regulations relating to:
- client confidentiality
- referral, including various levels of urgency, and follow-up of client
- mandatory reporting
- notifiable diseases
- limits of own ability and authority
- reporting procedures
- documentation
- organisational procedures, and legal and ethical requirements impacting on own role in supporting medication usage
- appropriate handling and storage of medications, including the importance of cold chain storage
- basic knowledge of commonly used medicines/drugs, including prescribed and over-the-counter medications
- basic knowledge of common terms and abbreviations used in relation to medication
- use of equipment to support medication administration
- required infection control procedures
- expected effects of medications being used, the consequences of incorrect use of medication and of main reasons for errors in medication administration
- understanding of duty of care in assisting clients to safely use medication within scope of own work role
- basic knowledge of how medications can impact on the anatomy and physiology of major body systems, relevant organs and their functions, including:
    - cardio-vascular system (including heart, arteries and veins)
    - respiratory system (including lungs, nose, mouth, throat)
    - senses (including sight, hearing, smell, touch, taste and equilibrium)
    - skin and integumentary system (including skin layers, hair and nails)
    - digestive and gastro-intestinal system (including stomach, intestines, bowel)
    - nervous system (including brain and nerves)
    - circulatory system (including arteries, veins)
    - genitourinary system (including male and female genital and reproductive systems)
    - endocrine system (including glands and hormones)
    - musculoskeletal system (skull, skeleton, muscles, body tissue)
- common conditions and presenting problems associated with major body systems and relevant organs.

© Commonwealth of Australia, 2025 HumanAbility

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre
- as part of, and under the supervision of, a multidisciplinary primary health care team
- with Aboriginal and/or Torres Strait Islander clients and communities.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment, including medication dispensing devices and support tools.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment must be undertaken by a workplace assessor who has expertise in this unit of competency and who is:

- an Aboriginal and/or Torres Strait Islander Health Worker

or:

- accompanied by an Aboriginal and/or Torres Strait Islander person who is a recognised member of the community with experience in primary health care.

HLTAHW016 Assess client's physical wellbeing

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements

Application

This unit describes the skills and knowledge required to initiate, undertake and interpret findings from a range of clinical assessments, tests and procedures to determine the physical wellbeing of a client. Findings of these assessments will be used as the basis of a health care plan – the skills and knowledge to plan, implement and monitor a health care plan are detailed in HLTAHW018 Plan, implement and monitor health care plan in a primary health care context.

This unit applies to those Aboriginal and/or Torres Strait Islander Health Workers providing a range of primary health care services to Aboriginal and/or Torres Strait Islander clients and communities.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 HumanAbility

Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Initiate health assessment	1.1 Seek to establish trust with the client, through active promotion of and strict adherence to confidentiality 1.2 Obtain client's history using effective, culturally appropriate and safe communication skills 1.3 Seek additional health-related information from the client's family and/or carer(s) and relevant community members with the client's consent 1.4 Consult relevant allied professionals and available documentation in relation to the health of the client 1.5 Document all information about the client in accordance with organisational procedures and policies
2. Assess client's physical health	2.1 Explain the process and rationale of each examination and test to the client 2.2 Perform physical and clinical assessments in line with organisational policies and procedures and with respect for community values, beliefs and gender roles 2.3 Measure vital signs and identify significant variation from normal ranges and refer to senior staff member as required 2.4 Use correct procedures and take precautions to collect and send specimens for pathology testing 2.5 Accurately record all outcomes of assessments in accordance with organisational procedures and policies 2.6 Identify non-clinical factors potentially responsible for significant variations from normal ranges and make repeat assessments
3. Interpret and confirm health assessment findings	3.1 Accurately identify a range of signs and symptoms of health conditions 3.2 Recognise signs and symptoms of potentially serious underlying conditions and refer to senior health staff for advice 3.3 Interpret the significance of health assessment findings in the context of the holistic health of the client 3.4Identify any significant variations from normal range

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	on the basis of health assessment data
	3.5 Consult other team members to confirm interpretations and clarify implications and significance of findings
	3.6 Seek assistance when findings are unclear or outside limits of own authority
	3.7 Report notifiable diseases identified to supervisor and/or an appropriate authority, in line with jurisdictional requirements
	3.8 Initiate action in relation to any issues requiring mandatory reporting according to procedural and legislative requirements
	3.9 Accurately document client history and examination findings in client's file
4. Summarise and present findings	4.1 Provide client with information about findings of physical examination
	4.2 Check client understanding of information through appropriate questioning
	4.3 Provide client with information relevant to promoting and maintaining their health in a way they readily understand
	4.4 Support client to take a self-care approach to health in line with individual needs and organisational and community requirements
	4.5 Document and refer as necessary all discussions with client and/or significant others in client file according to organisational procedures and policies

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Numeracy	• in order to use and interpret readings of medical equipment including haemoglobinometer, tape measure, sphygmomanometer, scales,

© Commonwealth of Australia, 2025 HumanAbility

	thermometers, glucometer, peak expiratory flow rate meters • in order to measure vital signs, including temperature, pulse, blood pressure and respiratory rate
Reading	• to interpret various pieces of written information regarding the client's health, including referrals, test outcomes and reports

Other foundation skills essential to performance are explicit in the performance criteria of the unit.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTAHW016 Assess client's physical wellbeing

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- assessed and monitored the physical wellbeing of at least five Aboriginal and/or Torres Strait Islander adults and children by:
  - establishing a relationship of trust with clients and significant others
  - taking a detailed history of the client
  - explaining assessment methods and procedures to client and/or significant others
  - observing and assessing client’s health, using appropriate tests and medical instrumentation
  - recording observations
  - questioning, assessing and monitoring client’s health status, issues and needs

© Commonwealth of Australia, 2025 HumanAbility

- reviewing effectiveness of health care strategies and making appropriate revisions, taking prior history into consideration
- summarising and presenting findings in line with client needs and workplace requirements
- maintaining client records and upholding client confidentiality
- communicating with client’s family and/or significant others as required
- gaining informed consent to conduct assessment
- taking, considering and recording relevant details of client’s history (including body language)
- complying with and enforcing infection control guidelines
- using a structured approach to assessment
- interpreting common pathology tests
- taking full responsibility for assessment findings.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- organisational policies and procedures and legislation or regulations relating to:
  - client confidentiality
  - referral, including various levels of urgency, and follow-up of client
  - mandatory reporting
  - notifiable communicable diseases
  - limits of own ability and authority
  - reporting procedures
  - documentation
- key elements of comprehensive and accurate physical, social/emotional and mental health assessment
- anatomy/physiology and associated microbiology, pathophysiology (disease processes) and pharmacology including:
  - respiratory system
  - circulatory system
  - integumentary system
  - digestive system
  - genitourinary system
  - endocrine system
  - musculoskeletal system
  - nervous system

© Commonwealth of Australia, 2025 HumanAbility

- reproductive systems
- pathophysiology associated with these systems, including:
  - acute chronic condition and conditions associated with a specific body system
  - injuries
  - wounds
  - arthritis
  - inflammation
  - impact of alcohol and drugs
- pharmacology to address pathophysiology, including:
  - medications and forms of administration
  - antibiotics
  - analgesics
  - contraindications
  - complications
  - psychiatric medications
  - oral hypoglycaemics
  - insulin
- procedures for health tests and 'normal' range of test outcomes, including:
  - blood pressure (for adults and children)
  - temperature
  - pulse rate
  - respiratory and peak flow rates
  - height and weight
  - components of urine
  - near vision and pinhole visual acuity testing
- visual examination of eye and ear
- blood glucose (sugar) and haemoglobin levels
- in relation to cardiovascular diseases:
  - the concept of 'cardiovascular risk factors', the significance of an individual having multiple risk factors and the concept of 'high absolute risk'
  - the importance of reduction of saturated fats and sugar-sweetened soft drinks, increased physical activity and smoking cessation in reducing the risk of heart and kidney disease in Aboriginal and/or Torres Strait Islander populations
- in relation to diabetes mellitus:
  - basic pathophysiology of type II contrasted with type I diabetes mellitus
  - complications of diabetes (including heart disease and stroke; renal failure; retinal damage and blindness; nerve damage and infection resulting in amputation; impotence)
  - the main elements of the 'diabetes check up'
  - the procedure for taking retinal photographs
  - basic anatomical features and abnormalities on a retinal photograph

© Commonwealth of Australia, 2025 HumanAbility

  - the content of client education for diabetes covering diet, physical activity, foot-care, and use of diabetes medicines
- in relation to chronic renal disease:
  - basic pathophysiology of chronic renal failure (causes, body systems affected, natural history)
  - factors which may worsen or accelerate renal failure (including: high blood pressure, anti-inflammatory drugs, poor diabetes control, dehydration, high protein diet)
  - clinical features of advanced renal failure
  - the importance of early detection of renal disease in efforts to defer or prevent end-stage renal failure
  - options for treatment of end-stage renal failure (haemodialysis, chronic ambulatory peritoneal dialysis, transplant).
- familiarity with a range of other common chronic conditions in Aboriginal and/or Torres Strait Islander populations:
  - chronic liver disease – causes, clinical features and principles of management (including hepatitis B, hepatitis C, alcoholic liver disease and cirrhosis)
  - chronic obstructive lung disease, relationship to smoking and principles of management
- basic nature, management and associated risk factors for common diseases
- commonly (including complete blood tests and urine analysis) and specifically requested pathology tests and the correct methods of collection, storage and transport of specimens
- the clinical significance of abnormal findings on pathology tests with particular reference to use of medicines
- knowledge of care planning and self-management support tools
- relevant criteria for evaluation of effectiveness of care plan
- features of chronic illness, including:
  - complex causality
  - multiple risk factors
  - long latency periods
  - a prolonged course of illness
  - functional impairment or disability
- specific chronic conditions affecting Aboriginal and/or Torres Strait Islander clients and communities, including:
  - cardiovascular disease
  - diabetes
  - cancer
  - chronic respiratory disease
  - chronic kidney disease
  - asthma
  - arthritis
  - oral disease
- determinants of chronic conditions, including:
  - smoking

© Commonwealth of Australia, 2025 HumanAbility

  - physical activity
  - nutrition
  - alcohol intake
  - use of illicit drugs
  - obesity, weight and waist circumference
  - unsafe sexual practices
  - genetic factors
- linkages between conditions such as diabetes and eye health, nutrition and hearing, etc.

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre
- as part of a multidisciplinary primary health care team
- with Aboriginal and/or Torres Strait Islander clients and communities.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

This may include medical equipment including but not limited to haemoglobin meter, tape measure, sphygmomanometer, scales, thermometers, glucometer, peak expiratory flow rate meters.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment must be undertaken by a workplace assessor who has expertise in this unit of competency and who is:

- an Aboriginal and/or Torres Strait Islander Health Worker

or:

- accompanied by an Aboriginal and/or Torres Strait Islander person who is a recognised member of the community with experience in primary health care.

HLTAHW017 Assess and support client's social and emotional wellbeing

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Application

This unit deals with the required skills and knowledge to assess clients in relation to their social and emotional wellbeing, and provide appropriate support and referral as a member of a multidisciplinary team working with Aboriginal and/or Torres Strait Islander communities.

The unit applies to those Aboriginal and/or Torres Strait Islander Health Workers providing a range of primary health care services to Aboriginal and/or Torres Strait Islander clients and communities.

This unit equips Aboriginal and/or Torres Strait Islander Health Workers to provide support related to social and emotional wellbeing and does not infer that they are qualified counsellors.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

© Commonwealth of Australia, 2025 HumanAbility

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Obtain client history and information for social and emotional wellbeing assessment	1.1 Establish a relationship of trust with the client by demonstrating and respecting confidentiality of communications 1.2 Use effective and culturally appropriate and safe communication skills to obtain a personal history from the client 1.3 Seek information about relevant critical incidents with due sensitivity and respect for the physical, emotional and cultural safety and security of those affected 1.4 Observe client closely to identify any signs of emotional disturbance 1.5 Seek additional related information through consultation with family and/or significant others as required and with consent of the client 1.6 Consult relevant allied professionals and available documentation in relation to the health of the client 1.7 Record all information obtained according to principles of confidentiality and organisational procedures and policies
2. Assess and determine client wellbeing	2.1 Analyse information obtained to recognise signs and symptoms of mental disturbance and significant underlying emotional reactions to loss, grief and trauma 2.2 Recognise issues that may relate to transgenerational trauma and grief for the individual, family and community 2.3 Identify disturbances in behaviour that may suggest a psychiatric disability 2.4 Promptly discuss with experienced staff any indicators of depression or suicide risk, and refer client to appropriate supports as required 2.5 Identify issues requiring mandatory notification and report to supervisor and/or an appropriate authority 2.6 Identify client’s self-management capacity and

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	barriers
	2.7 Discuss findings with colleagues to determine appropriate course of action to support client's wellbeing with reference to any existing health care plan
	2.8 Document all findings and determined actions according to policy, procedures confidentiality principles
3. Provide support to client	3.1 Invite client and, with their consent, their family to discuss issues of concern in a supportive and confidential context
	3.2 Provide client with information to enable decision-making about their social and emotional wellbeing
	3.3 Support client to identify key self-management needs and goals and to determine appropriate self-care strategies
	3.4 Refer client as required and follow-up on referrals
	3.5 Refer serious or potentially serious issues to senior health staff for advice
	3.6 Assist and refer family to address own wellbeing and safety, as required
	3.7 Maintain current, complete, accurate and relevant records from each client interaction

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Reading	• in order to interpret relevant policy and regulatory information

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Assessment Requirements for HLTAHW017 Assess and support client's social and emotional wellbeing

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- assessed the social and emotional wellbeing of at least five clients by:
  - observing, noting and recognising unusual physical, behavioural and body language indicators
  - communicating effectively with client (and significant others) in a culturally safe manner on all occasions
  - discussing with each client their socio-emotional health status, issues and needs
  - maintaining client records and upholding client confidentiality
  - recording accurate, sufficiently comprehensive and relevant client health history and assessment findings for each client
  - distinguishing between effects of transgenerational trauma and grief and psychiatric illnesses
  - consulting team members regarding assessment findings and as otherwise required to support client wellbeing

© Commonwealth of Australia, 2025 HumanAbility

- supported the social and emotional wellbeing of at least five clients by:
  - initiating timely and appropriate referrals, providing accurate and relevant details to clients, their families and referral agencies
  - explaining/demonstrating/instructing client to use appropriate stress reducing techniques/activities
- Organised and participated in at least one debriefing session following critical incidents or stressful interactions.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- organisational policies and procedures and legislation or regulations relating to:
- client confidentiality
- referral, including various levels of urgency, and follow-up of client
- mandatory reporting
- notifiable communicable diseases
- limits of own ability and authority
- reporting procedures
- documentation
- key elements of history-taking in the context of social and emotional health and their significance
- significant problems presented and appropriate avenues of further assessment or action
- common signs/indicators of:
  - mental or psychiatric illness
  - depression
  - alcohol and other drug misuse
  - suicide risk
  - child abuse/sexual assault
- advanced communication techniques to develop trust and elicit sensitive information
- appropriate stress-reducing techniques/activities
- availability of and, referral criteria and processes for social and emotional, alcohol and other drugs and mental health support services
- awareness of culturally secure assessment tools for Aboriginal and Torres Strait Islander peoples
- principles of crisis intervention
- limits of own ability and authority.

HLTAHW018 Plan, implement and monitor health care in a primary health care context

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements

Application

This unit deals with the required skills and knowledge to plan, implement and monitor a range of health care services as a member of a multidisciplinary team working with Aboriginal and/or Torres Strait Islander communities.

Care plans are developed to address findings of clinical assessments, tests and procedures. Treatments as part of care plans include making referrals and development, implementation and evaluation of plans in line with legislative requirements and organisational protocols.

This unit applies to those Aboriginal and/or Torres Strait Islander Health Workers providing a range of primary health care services to Aboriginal and/or Torres Strait Islander clients and communities.

This unit does not cover the skills and knowledge to assess physical wellbeing – these are detailed in HLTAHW016 Assess client's physical wellbeing.

© Commonwealth of Australia, 2025 HumanAbility

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes of a unit of competency.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Propose care plan	1.1 Access health assessment outcomes according to organisational procedures and policies 1.2 Identify specific aspects of health assessment to address in health care plan 1.3 Propose treatment as part of the care plan in accordance with policies and procedures 1.4 Develop the plan with primary health care team, using relevant standing orders and written care protocols 1.5 Clearly establish responsibilities for implementing the care plan 1.6 Document proposed health care plan in client's file in line with organisational policies and procedures
2. Communicate proposed health care plan to client	2.1 Use effective and culturally appropriate and safe communication skills to discuss the proposed care plan with clients and explain how it relates to their health assessment results 2.2 Provide client with information about each aspect of the proposed care plan and the rationale for its inclusion 2.3 Encourage the client to ask questions about the proposed care plan to support understanding and cooperation, and agreement 2.4 Explain self-management aspects of the proposed care plan 2.5 Consult with the primary health care team about any client-suggested changes to the proposed plan and adjust plan as appropriate 2.6 Document finalised plan according to organisational procedures and policies

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes of a unit of competency.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
3. Implement care plan	3.1 Refer clients as required to relevant health professionals in line with community, organisational and regulatory requirements 3.2 Conduct treatment in accordance with the care plan 3.3 Support client to take a self-care approach to implementation in line with individual, organisational and community requirements 3.4 Maintain current, complete, accurate and relevant records for each client contact
4. Provide information on healthy nutrition and lifestyle choices as part of the care plan	4.1 Provide accurate information regarding nutrition and lifestyle choices, and the impact of poor nutrition and lifestyle choices, including alcohol and smoking 4.2 Discuss risk factors relating to specific nutrition and lifestyle choices for the individual client in the context of their family, culture and local community 4.3 Provide information on early intervention and prevention practices to avoid disease caused by poor nutrition and lifestyle choices 4.4 Assist client to select an appropriate and varied diet in line with dietary guidelines and client needs 4.5 Develop strategies to assist individuals who have not exercised for some time to become more active 4.6 Offer brief interventions for smoking cessation 4.7 Establish patterns of alcohol consumption and offer brief interventions 4.8 Make appropriate referrals where required
5. Provide care and support for clients with chronic condition as part of the care plan	5.1 Provide information about the nature, incidence and potential impacts of chronic conditions in specific relation to the client's own health 5.2 Provide information on practices to manage chronic

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes of a unit of competency.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	conditions to address identified individual needs
	5.3 Provide practical advice relating to maintaining good health in relation to prevalent chronic conditions and in line with community needs and organisational guidelines
	5.4 Explain and/or demonstrate practices for early detection of specific chronic conditions in line with organisational guidelines
	5.5 Support clients to take a self-care approach to maintaining health
	5.6 Make appropriate referrals for clients with chronic conditions in line with organisational guidelines
6. Monitor health care	6.1 Encourage clients and family/carer to maintain health by being actively involved in the care plan
	6.2 Monitor client health in line with individual schedule and criteria incorporated in care plan
	6.3 Reassess and review care plan as required where client fails to progress, in accordance with expectation
	6.4 Ensure standing order/written care protocols underpin health assessment and management actions
	6.5 Conduct health monitoring in accordance with organisational policies and procedures and occupational health and safety requirements
	6.6 Organise follow-up care for clients with chronic conditions using computer and/or paper-based registers
	6.7 Identify when clients are overdue for health care checks and employ active-recall strategies
7. Review effectiveness of health care	7.1 Gain feedback from the client and/or family or carer/s about their level of comfort and compliance with the health management regime
	7.2 Determine degree of improvement of client's condition and compare with expectations outlined in health care plan

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes of a unit of competency.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	7.3 Provide client and/or family/carers with clear information about their level of improvement in relation to the health care plan and their level of compliance
	7.4 Evaluate impact of ongoing health management in relation to the client's physical, mental and emotional condition and behaviour, in consultation with the primary health care team

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Numeracy	• in order to measure and administer medication • in order to use medical equipment, including peak flow meter, glucometer, scales and sphygmomanometer • in order to carry out care plan treatments, including immunisations, CPR and nebuliser administration

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

Assessment Requirements for HLTAHW018 Plan, implement and monitor health care in a primary health care context

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- developed a care plan for at least five clients, including:
  - using standing orders/written care protocols to underpin health care plans
  - consulting clients about proposed care plan
  - proposing and negotiating treatment with client, their family and/or community
  - establishing responsibilities for care plan implementation
  - documenting health care plan in client's file
  - referring clients as required and according to organisational procedures and polices
- communicated health information in plain language to at least five clients, including:
  - nutrition, lifestyle choices and chronic condition information
  - details on prevention practices

© Commonwealth of Australia, 2025 HumanAbility

- explained and demonstrated early detection practices for specific chronic conditions on at least five separate occasions
- developed strategies and offered brief interventions to assist at least five clients
- implemented treatment according to care plans for at least five clients, including:
  - undertaking treatments within scope of own authority
  - using and maintaining medical equipment correctly
  - maintaining current, complete and accurate client records
  - supporting clients to take a self-care approach to implementing care plan
- monitored at least five clients with chronic conditions and organised follow-up care
- evaluated on at least five occasions:
  - outcomes of client's prescribed treatment/care plan
  - client's understanding of prescribed treatment/care plan
  - holistic impact of treatment on client's physical, mental and emotional condition and behaviour
  - overall effectiveness of the care plan.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- "Australian Guide to Healthy Eating" and the nutrients associated with each food group
- nutritional needs of people at different stages in the lifecycle, including pregnant and/or lactating women
- common nutrition-related diseases
- statistical incidence of diabetes, heart disease and kidney failure in Aboriginal and/or Torres Strait Islander populations compared to non-Aboriginal and/or Torres Strait Islander populations
- agencies able to provide support and assistance to Aboriginal and/or Torres Strait Islander people with chronic disabilities
- treatment and management of chronic conditions, including:
  - working in collaboration with clients, family and significant others to promote self-management as far as possible
  - medication
  - surgery
  - regular exercise
  - good nutrition
  - cessation of smoking

© Commonwealth of Australia, 2025 HumanAbility

  - cessation or moderation of alcohol use
  - cessation of illicit drug use
- regular screenings for changes in disease presentation and detection of other diseases
- how to contact and access available health and support services in the region
- strategies that can assist Aboriginal and/or Torres Strait Islander people with disabilities to live fulfilling and productive life in the community
- methods of organising the care of clients with chronic conditions including:
  - disease registers
  - care plan schedules in medical files
  - tagging files
  - computerised client information
  - recall systems
- the value of the opportunistic approach to chronic condition surveillance (comprehensive check-ups as people come to the clinic)
- organisational polices, guidelines and procedures.

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre
- as part of a multidisciplinary primary health care team
- with Aboriginal and/or Torres Strait Islander clients and communities.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment must be undertaken by a workplace assessor who has expertise in this unit of competency and who is:

- an Aboriginal and/or Torres Strait Islander Health Worker

or:

© Commonwealth of Australia, 2025 HumanAbility

- accompanied by an Aboriginal and/or Torres Strait Islander person who is a recognised member of the community with experience in primary health care.

HLTAHW019 Deliver primary health care programs for Aboriginal and/or Torres Strait Islander communities

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Application

This unit describes the required skills and knowledge to deliver health care programs to address identified needs in Aboriginal and/or Torres Strait Islander communities.

The unit applies to those Aboriginal and/or Torres Strait Islander Health Workers providing a range of primary health care services to Aboriginal and/or Torres Strait Islander clients and communities.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 HumanAbility

Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Undertake health checks to inform health programs	1.1 Use effective and culturally appropriate and safe communication skills to provide information to clients and obtain consent to conduct health checks 1.2 Show respect for community values, beliefs, gender roles and taboos in conducting health checks and screening 1.3 Use appropriate screening protocols to target disease patterns for particular age, sex, ethnicity, regional and other societal groups 1.4 Investigate significant variations detected through screening and other health checks and interpret in line with clinical protocols 1.5 Explain outcomes of health checks to clients and/or significant others 1.6 Provide health checks and associated health information opportunistically on client presentation to a health service 1.7 Accurately and promptly record all health assessment outcomes according to organisational procedures and policies
2. Provide health care programs to address identified common problems	2.1 Take a team approach to primary health care, including appropriate referral to specialist care providers, and other agencies 2.2 Identify, treat and/or refer common health problems, as part of the program 2.3 Support clients and families in accessing health care services and associated benefits as required 2.4 Provide guidance, support and assistance to individuals and families coping with social and emotional issues according to identified needs and cultural protocols 2.5 Explain health lifestyle practices to clients and check their understanding 2.6 Ensure health care programs support clients to take a self-care approach to health in line with individual needs and organisational and community requirements

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
3. Manage the delivery of health programs	3.1 Provide health care programs to the community in ways consistent with community values and beliefs 3.2 Integrate promotion of health screening, surveillance and education activities with provision of therapeutic care 3.3 Organise follow-up care for clients with identified health problems using computer- and/or paper-based registers 3.4 Produce lists of clients with significantly overdue health care checks and employ active recall strategies 3.5 Identify and address social and environmental interventions that may improve health in partnership with the community and other agencies 3.6 Establish and maintain links with support agencies, resource networks and associated health services in the local and regional area
4. Evaluate health programs	4.1 Collect and document data to contribute to the evaluation of health programs 4.2 Interpret data according to program and organisational requirements to identify the strengths and areas for improvement of health programs 4.3 Report on findings to management in line with organisational guidelines 4.4 Maintain client and community confidentiality in line with organisational and community requirements

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTAHW019 Deliver primary health care programs for Aboriginal and/or Torres Strait Islander communities

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of the unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- delivered and maintained at least one primary health care program to Aboriginal and/or Torres Strait Islander communities, including:
  - undertaking health checks relevant to the program content area
  - implementing screening procedures
  - explaining and describing procedures and illnesses/disorders to clients using clear, simple, culturally appropriate language
  - promoting healthy lifestyles
  - offering brief interventions as required to support individual client health

© Commonwealth of Australia, 2025
HumanAbility

  - observing, obtaining and interpreting client information in relation to health issues, behaviour and health services
  - communicating and negotiating as required with colleagues, community members and other agencies and negotiating with them as required
  - reading and writing reports
  - interpreting simple statistics, charts and test results relevant to the program
  - preparing written documentation relevant to the program
  - using computer-based and/or paper-based client record systems
  - demonstrating client confidentiality at all times when handling client information obtained in writing or verbally
- evaluated at least one health care program by:
  - working with groups in the community to seek input and feedback on health services
  - ensuring the program addresses specific client and community needs for guidance, support and information
  - ensuring delivery is consistent with community needs, values and beliefs.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- organisational policies and procedures and legislation or regulations relating to:
  - client confidentiality
  - referral, including various levels of urgency, and follow-up of client
  - mandatory reporting
  - notifiable communicable diseases
  - limits of own ability and authority
  - reporting procedures
  - documentation
- health screening and surveillance methods relevant to the area/region, including:
  - use of equipment
  - testing procedures
  - interpretation and analysis of results of testing
  - ‘normal’ range of results
  - record-keeping for effective follow-up and management
- occupational health and safety practices and procedures relevant to the work (e.g. manual handling)

© Commonwealth of Australia, 2025
HumanAbility

- contact details of available health and support services in the region and how to access them
- evaluation methodology

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre
- as part of a multidisciplinary primary health care team
- with Aboriginal and/or Torres Strait Islander clients and communities.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment must be undertaken by a workplace assessor who has expertise in this unit of competency and who is:

- an Aboriginal and/or Torres Strait Islander Health Worker

or:

- accompanied by an Aboriginal and/or Torres Strait Islander person who is a recognised member of the community with experience in primary health care

HLTAHW020 Administer medications

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Application

This unit covers the required skills and knowledge to administer medication to Aboriginal and/or Torres Strait Islander clients. It involves determining the medication requirements of an individual client, calculating dosage and performing the clinical skills necessary to administer the required medication. It also involves supporting a client to self administer medication.

This unit applies to Aboriginal and/or Torres Strait Islander health workers with the relevant authority in their state or territory to administer medication.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 HumanAbility

Elements define the essential outcomes.	*The performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Interpret and clarify orders and instructions for medication	1.1 Receive, correctly interpret and clarify written and verbal orders and instructions for medications with medical practitioners and other senior health staff 1.2 Identify potential drug interactions and refer to an appropriately authorised person 1.3 Check written and verbal medication instructions against published medications information resources 1.4 Recognise special precautions and contraindications with the use of particular medications and refer to an appropriate person
2. Prepare medication	2.1 Access medication according to organisational procedures and policies and within scope of own role and legislative requirements 2.2 Use published medications resources to determine the appropriate route or method for administration of medication 2.3 Correctly identify medication dosage in standard treatment manual or calculate mathematically 2.4 Measure out required dose or volume of medication accurately using required and/or relevant equipment 2.5 Confirm with relevant authorised person the calculated and measured medication dosage to be administered
3. Administer medications safely	3.1 Administer medications appropriately, observing universal precautions and aseptic handling procedures, in line with organisation, legal and regulatory requirements 3.2 Prepare a hygienic and sanitised environment for the administration of medications 3.3 Assist in the administration of medications by appropriate methods and routes, observing standard precautions and in line with organisation, legal and regulatory requirements 3.4 Identify any adverse events or allergic reactions, including anaphylaxis, related to medication and take appropriate action in line with standard protocols 3.5 Dispose of used equipment, packaging, medical waste

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*The performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	and other products according to manufacturer's instructions, infection control and organisational procedures and policies
4. Instruct and monitor clients to self administer medication	4.1 Prepare, or assist client to prepare, medication for self administration as required
	4.2 Demonstrate to client correct use of relevant equipment for self medication
	4.3 Guide client through the process of self administration of medication and provide assistance as necessary
	4.4 Confirm with the client the completion of self administration
	4.5 Instruct and educate client to dispose of used equipment, packaging, medical waste and other products according to manufacturer's instructions, infection control and organisational procedures and policies
5. Document administration procedures	5.1 Keep client file up to date by completing all relevant records relating to the specific medication administered, including access, storage and disposal requirements
	5.2 Store all relevant documentation securely according to organisation policies and procedures

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Numeracy	• in order to reconstitute powdered medicine as a mixture using ratios • in order to measure specified dosages of tablets and medicines for injection
Reading	• in order to interpret medicine manufacturer's specifications • in order to access and use written information in approved product information sources relating to medications

Assessment Requirements for HLTAHW020 Administer medications

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has

- administered medication by each of the following routes or methods at least once:
  - oral
  - sublingual/buccal
  - dry powder inhalers
  - metered dose/spacer inhalers
  - nebulisers
  - oxygen therapy
  - topical medications
  - suppositories

© Commonwealth of Australia, 2025 HumanAbility

- subcutaneous injection
- intramuscular injections
- intravenous injections
- Z-track injections
- intravenous infusion/cannulation fluid

- safely administered medication on at least three occasions to a range of clients across the lifespan by
  - observing and applying the Six Rights of Medication, being:
    - Right person
    - Right dose
    - Right route
    - Right medication
    - Right time
    - Right documentation
  - consulting and confirming actions with an authorised practitioner at all relevant times
  - determining medication requirements, including:
    - consulting client and other relevant support persons for medication history and allergies
    - reviewing relevant documentation
    - identifying options, active ingredients, indications, contraindications, precautions, side effects, interactions of medications and accurate client information
    - maintaining records of client medication
  - interpreting orders and instructions for medication, including:
    - receiving written and verbal orders and instructions from authorised persons/practitioners
    - documenting orders and correctly interpreting them
    - consulting medical practitioners and senior health staff for clarification on medication instructions
  - using published medication references and resources to where appropriate
  - referring queries of potential drug interactions and contraindications to appropriate personnel
  - where appropriate, supporting clients in their choice, access to and use of traditional and western medications including:
    - providing information to clients on mechanisms of action, dosing and possible side effects
    - identifying, supporting and promoting traditional/bush medications and traditional healers
    - providing and explaining Consumer Medications Information to clients
    - instructing clients on self-administration of medications
  - documenting administration of medication according to legislative requirements and organisation procedures and policies.

© Commonwealth of Australia, 2025 HumanAbility

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- The Six Rights of Medication, being:
  - Right person
  - Right dose
  - Right route
  - Right medication
  - Right time
  - Right documentation
- differences between generic and trade names for medication
- application of standard and additional precautions in the administration of medications
- awareness and application of infection control and sterile environment policies and procedures
- understanding of medication commonly used and effects on the body
- pathophysiology associated with these systems, including acute chronic condition and conditions associated with a specific body system
- pharmacology to address pathophysiology, including:
  - antibiotics
  - analgesics
  - contra indications
  - complications
  - psychiatric medications
  - oral hypoglycaemics
  - insulin
- awareness of reaction to medication administration, including:
  - indications
  - contraindications
  - complications
  - adverse effects
  - interactions
- presenting symptoms and signs that may impact on medication administration, including:
  - bruising, swelling, cuts and abrasions
  - appearance of eyes, ears, mouth and gums

© Commonwealth of Australia, 2025 HumanAbility

  - blood pressure, respirations and temperature
  - emotional and mental state
- correct techniques for medication preparation and administration for adults and children by the following routes or methods:
  - oral medication, including counting of tablets, preparation of syrups using graduated measure and/or syringes, Webster Packs, scored tablets, cutting devices and dosette boxes
  - sublingual/buccal, including usage of unopened and dated medication
  - dry powder, metered dose and spacer inhalers, including operation of accuhalers and aerolisers
  - nebulisers and oxygen therapy, including selection of appropriate equipment selection (oxygen cylinder or air pump)
  - topical and transdermal medications, including prevention of self absorption
  - suppositories, including use of lubricant and client positioning
  - subcutaneous injections, including preparation of syringe and angle degree for insertion
  - intramuscular and Z-track injections, including correct sites for babies, children and adults for injection, preparation of syringe and angle degree for insertion
  - intravenous injections, infusion/cannulation including required equipment, inspection and preparation of cannula site, and follow up observation
  - management of cold chain medications including differences between and use of purpose built vaccine and domestic refrigerators, transport and storage
  - anaphylaxis management, including checking for signs of moderate or severe anaphylaxis and possible causes
- organisational, legislative and regulatory requirements for transport, storage, use, dispensing and safe disposal of medications
- different methods of medication administration and reactions for adults and children
- requirements of the Pharmaceutical Benefits Scheme (PBS)
- Quality Use of Medicines and the Consumer Medication Information
- National Medication access and review initiatives for Aboriginal/Torres Strait Islander people
- special considerations in use of medications, including:
  - complicating factors of chronic illness
  - pregnancy and lactation
  - renal impairment
  - anti-coagulant therapy
  - potential drug interactions
  - babies, children, adults and the elderly
  - informed consent and understanding of the client
- types of locally available/used traditional bush medications and their uses, benefits, side effects and interaction with other medications
- complementary roles of traditional or bush healers

© Commonwealth of Australia, 2025 HumanAbility

Assessment Conditions

Unless state or territory legislation prevents practice in the workplace, skills must be demonstrated working

- in a health service or centre
- as part of a multi-disciplinary primary health care team
- with Aboriginal and/or Torres Strait Islander clients and communities.

Note: Where state or territory legislation prevents practice in the workplace, simulated assessment environments may only be used in place of workplace assessment.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment must be undertaken by a workplace assessor who has expertise in this unit of competency and who is:

- a Registered Aboriginal or Torres Strait Islander Health Practitioner

or:

- a Registered Health Practitioner accompanied by an Aboriginal or Torres Strait Islander person who is a recognised member of the community with experience in primary health care.

HLTAHW021 Provide nutrition guidance for specific health care

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements

Application

This unit describes the required skills and knowledge to promote healthy nutrition to address the requirements of a range of client groups and to improve community nutrition.

The unit applies to those Aboriginal and/or Torres Strait Islander Health Workers providing a range of primary health care services to Aboriginal and/or Torres Strait Islander clients and communities.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Provide information on nutritional needs at different stages of life	1.1 Provide information on nutritional requirements of pregnant and lactating women 1.2 Promote dietary guidelines for children and adolescents, including importance of breastfeeding and appropriate introduction of solid foods 1.3 Explain nutritional requirements for babies and toddlers to family and/or carers 1.4 Provide information on dietary guidelines for adults 1.5 Provide information for older people on nutrition requirements and food preparation issues
2. Inform clients of dietary requirements of specific conditions	2.1 Identify clients with specific conditions requiring counselling for healthy eating 2.2 Provide overweight clients with information on strategies to achieve long-term weight reduction 2.3 Identify common dietary restrictions for clients with specific health conditions and assist clients to obtain and follow specific dietary advice on appropriate nutrition 2.4 Refer clients to other health professionals and support agencies for nutritional advice as required
3. Work with community agencies to promote nutrition	3.1 Discuss the link between nutrition and health with communities, their agencies, stores and other representatives 3.2 Promote appropriate food storage, hygiene and preparation practices 3.3 Discuss policies that promote good health through nutrition with communities, their agencies, stores and relevant representatives

© Commonwealth of Australia, 2025 HumanAbility

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Numeracy	• in order to interpret nutritional information as expressed in kj, calories, g, mg, mcg, percentages and decimals

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTAHW021 Provide nutrition guidance for specific health care

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- provided accurate and relevant information on:
  - healthy eating and diet
  - exercise and activity
  - nutritional requirements
  - available supports and referral services
- provided information at least once to the following types of people, either as individual clients or through community health promotion:
  - pregnant and lactating women
  - infants, toddler, children and adolescents
  - adults and the elderly

© Commonwealth of Australia, 2025 HumanAbility

- overweight and obese clients
- used culturally appropriate and safe communication skills to ensure all information was understood when interacting with each of these clients and/or community groups.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- organisational policies and procedures and legislation or regulations relating to:
  - client confidentiality
  - referral, including various levels of urgency, and follow-up of client
  - mandatory reporting
  - notifiable communicable diseases
  - limits of own ability and authority
  - reporting procedures
  - documentation
- food and dietary guidelines in line with 'Dietary Guidelines for Australian Adults', including:
  - Aboriginal and/or Torres Strait Islander cultural values and beliefs regarding food
  - five food groups and their function with reference to the *Australian Guide to Healthy Eating* and publications such as *A Guide to Promote Healthy Eating for Aboriginal &/or Torres Strait Islander people*
  - food values in traditional Aboriginal and/or Torres Strait Islander food
  - healthy food preparation methods
  - nutrition education models
- *Australian Guide to Healthy Eating*
- Dietary Guidelines for Australian Adults
- Dietary Guidelines for Children and Adolescents in Australia
- Dietary Guidelines for Older Australians
- nutritional requirements at different life stages, including a focus on breastfeeding and the introduction of solids
- nutritional needs of people with chronic conditions.

Assessment Conditions

Skills must be demonstrated working:

HLTAHW022 Address social determinants of Aboriginal and/or Torres Strait Islander health

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Application

This unit deals with the required skills and knowledge to promote and apply strategies to address social determinants that underpin and contribute to Aboriginal and Torres Strait Islander health issues, in the context of delivering primary health care services.

The unit applies to those Aboriginal and/or Torres Strait Islander Health Workers providing a range of primary health care services to Aboriginal and/or Torres Strait Islander clients and communities.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 HumanAbility

Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Identify social determinants of health	1.1 Research the social determinants of Aboriginal and/or Torres Strait Islander health 1.2 Analyse social determinants of health with consideration of equity, social gradient and justice issues 1.3 Investigate specific impacts of social, political, economic and environmental factors on the health of Aboriginal and/or Torres Strait Islander clients
2. Promote awareness of social determinants of health	2.1 Provide information about social determinants of health as part of primary health care service delivery 2.2 Encourage Aboriginal and/or Torres Strait Islander clients and communities to be self-determining and support their empowerment 2.3 Assist Aboriginal and/or Torres Strait Islander clients and communities to achieve greater access and equity across a range of social, educational, economic and health systems and services 2.4 Promote awareness of social determinants of Aboriginal and/or Torres Strait Islander health across community service networks 2.5 Encourage community control in the delivery of health services to Aboriginal and/or Torres Strait Islander people
3. Implement strategies to address social determinants of health	3.1 Identify where organisational policies reflect ways to address the identified determinants of Aboriginal and/or Torres Strait Islander health 3.2 Deliver primary health care services in line with community requirements 3.3 Encourage and support clients to access health services and resources 3.4 Support local community values, beliefs and gender roles in the delivery of health services 3.5 Utilise existing partnering relationships to promote primary health care for Aboriginal and/or Torres Strait

- evaluated the effectiveness of at least one strategy used to address social determinants.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- organisational policies and procedures and legislation or regulations relating to:
  - client confidentiality
  - referral, including various levels of urgency, and follow-up of client
  - mandatory reporting
  - notifiable communicable diseases
  - limits of own ability and authority
  - reporting procedures
  - documentation
- social, cultural, political and environmental determinants of Aboriginal and/or Torres Strait Islander health. This includes:
  - importance of land, tradition and cultural practice
  - impact of socio-economic factors on health
  - social and political factors that perpetuate disadvantage
  - importance of personal achievement, education and supportive family/social networks
  - barriers to improving environmental determinants of ill health
  - impact of loss, grief and trauma
  - issues of food security/access
- means to address access and equity issues, such as:
  - strategies to maintain strong culture and supportive social networks and maximise educational, employment and social opportunities for children
  - understanding the political context of health care systems and access to benefits such as Medicare and pharmaceutical benefits
  - community development initiatives
- aspects of Aboriginal and/or Torres Strait Islander health, including:
  - community perceptions of major health issues affecting them and underlying causes
  - perceptions of non-Aboriginal and/or Torres Strait Islander people relating to major Aboriginal and/or Torres Strait Islander health issues and underlying causes
- primary health care model
- key comparative health statistics.
-

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	work team and community
	2.5 Access, adapt or develop resources (human, financial and physical) as required to suit the needs of the health issue, audience and program delivery context
	2.6 Document plans for health promotion and community development according to organisational procedures and policies
3. Deliver a health promotion and community development program	3.1 Provide health care and community development programs to the community in ways that are consistent with Aboriginal and/or Torres Strait Islander community values and beliefs
	3.2 Integrate and implement health screeningsand implement on own practice to enhance understanding work team and communityeeds, concerns and resource availability, surveillance and education activities into the programs, as appropriate
	3.3 Provide information in plain language to clients about health problems common to their particular client group, using culturally appropriate and safe communication skills
	3.4 Refer common health problems identified as part of the program to professionals and support services
	3.5 Support clients and families in accessing health care services and associated benefits as required
	3.6 Provide guidance, support and assistance to individuals and families coping with social and emotional issues according to identified needs and cultural protocols
	3.7 Reflect on own practice to enhance understanding
4. Monitor and evaluate health promotion program	4.1 Evaluate health promotion and community development program against criteria that reflect identified community health objectives
	4.2 Monitor and evaluate community health outcomes
	4.3 Collect, document and interpret data to contribute to the evaluation of health programs

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	4.4 Seek to identify program strengths as well as areas for improvement as a basis for continual enhancement of health outcomes
	4.5 Communicate outcomes of the evaluation to relevant stakeholders to guide future activities in the delivery of health promotion and health services to the community
	4.6 Seek feedback on program effectiveness and provide to community and organisational representatives
	4.7 Prepare reports from data collected and provide to management in line with organisational guidelines
	4.8 Maintain client and community confidentiality in line with organisational and community requirements
	4.9 Support ongoing community development strategies

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Numeracy	• in order to adapt, develop and monitor financial resources • in order to develop key performance indicators and corresponding measures • in order to collect, analyse and report on numerical data collected

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Assessment Requirements for HLTAHW023 Plan, develop and evaluate health promotion and community development programs

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- planned and delivered at least one primary health care promotion and community development program to Aboriginal and/or Torres Strait Islander communities, including:
  - assessing community health needs
  - identifying strategies, goals, activities and key performance indicators
  - observing, obtaining and interpreting client information in relation to health issues, behaviour and health services
  - developing a health promotion plan in consultation with key stakeholders
  - preparing a proposal/submission for funding and resources
  - ensuring the program addresses specific client and community needs for guidance, support and information
  - ensuring delivery is consistent with community needs, values and beliefs

© Commonwealth of Australia, 2025 HumanAbility

  - communicating with and seeking feedback from clients, colleagues, community members and other agencies and negotiating with them as required
- evaluated at least one health promotion and community development program against identified goals and performance criteria by:
  - collecting feedback from community and staff implementing the program
  - analysing feedback against identified goals and performance criteria
  - reporting on outcomes of evaluation to community and the organisation
  - identified areas for improvement in the program.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- organisational policies and procedures and legislation or regulations relating to:
  - client confidentiality
  - referral, including various levels of urgency, and follow-up of clients
  - mandatory reporting
  - notifiable communicable diseases
  - limits of own ability and authority
  - reporting procedures
  - documentation
- basic understanding of community development theory
- health promotion programs relevant to the area/region/community
- social determinants that impact on health issues for the relevant community
- The Ottawa Charter for Health Promotion
- program planning cycle
- familiarity with a range of conditions, diseases and disorders
- effective strategies to monitor and manage identified health problems in line with community needs and sensitivities
- features of chronic illness, including:
  - complex causality
  - multiple risk factors
  - long latency periods
  - a prolonged course of illness
  - functional impairment or disability

© Commonwealth of Australia, 2025 HumanAbility

- specific chronic conditions affecting Aboriginal and/or Torres Strait Islander clients and communities, including:
  - cardiovascular disease
  - diabetes
  - cancer
  - chronic respiratory disease
  - chronic kidney disease
  - asthma
  - arthritis
  - oral disease
- impact of chronic conditions on major body organs and systems
- groups at high risk of chronic condition
- determinants of chronic condition, including:
  - smoking
  - physical activity
  - nutrition
  - alcohol intake
  - use of illicit drugs
  - obesity, weight and waist circumference
  - unsafe sexual practices
  - genetic factors
- treatment and management of chronic conditions, including:
  - working in collaboration with clients, family and significant others to promote self management as far as possible
  - medication
  - surgery
  - regular exercise
  - good nutrition
  - cessation of smoking
  - cessation or moderation of alcohol use
  - cessation of illicit drug use
- regular screenings for changes in disease presentation and detection of other diseases
- how to contact and access health and support services available in the region
- linkages between conditions such as diabetes and eye health, nutrition and hearing, etc.
- occupational health and safety practices and procedures relevant to the work
- principles of adult education
- evaluation methodology.

Assessment Conditions

Skills must be demonstrated working:

© Commonwealth of Australia, 2025 HumanAbility

- in a health service or centre
- as part of a multidisciplinary primary health care team
- with Aboriginal and/or Torres Strait Islander clients and communities.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment must be undertaken by a workplace assessor who has expertise in this unit of competency and who is:

- an Aboriginal and/or Torres Strait Islander Health Worker

or:

- accompanied by an Aboriginal and/or Torres Strait Islander person who is a recognised member of the community with experience in primary health care.

HLTAHW024 Work in alcohol, other drugs & mental health care w/ Aboriginal &/or Torres Strait Islander Comm.

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Application

This unit describes the required skills and knowledge as preparation for working with Aboriginal or Torres Strait Islander communities to provide health education and support relating to alcohol and other drugs (AOD) and mental health. It addresses the rights and responsibilities of the position, the system in which this work is undertaken and the professional boundaries and cultural issues relating to this type of work.

This unit applies to those Aboriginal and/or Torres Strait Islander Health Workers providing a range of primary health care services to Aboriginal and/or Torres Strait Islander clients and communities.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

© Commonwealth of Australia, 2025 HumanAbility

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the Element.*
1. Work within the context of alcohol and other drugs and mental health	1.1 Consider the relationship between AOD and mental health (including dual diagnosis) when working with clients 1.2 Identify difficulties that the worker may encounter in carrying out their role in the community and take these into consideration in the work 1.3 Take into account in service delivery the changing role of females and males within Aboriginal and Torres Strait Islander communities 1.4 Work within the role and limitations of the job definition and community expectations of the role
2. Demonstrate commitment to the philosophy of social and emotional wellbeing	2.1 Build and maintain a relationship of trust with the client and/or family/carer, with active promotion of and strict adherence to confidentiality 2.2 Consider the rights of the individual in all work undertaken 2.3 Consistently demonstrate understanding and consideration of the underpinning values and philosophy of social and emotional wellbeing in the context of Aboriginal and/or Torres Strait Islander health work 2.4 Demonstrate commitment to the empowerment of Aboriginal and/or Torres Strait Islander people and access and equity principles 2.5 Give clients, family and community the opportunity to participate in service planning and support activities 2.6 Take into account personal values, history, experiences and family/kinship when working with Aboriginal and/or Torres Strait Islander communities 2.7 Support the role of traditional healers and use of bush or traditional medicines as appropriate to each client's needs

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the Element.*
3. Work within legal and ethical boundaries	3.1 Complete documentation in accordance with legal and ethical requirements 3.2 Maintain confidentiality in accordance with organisational policies and protocols 3.4 Liaise with other organisations as appropriate 3.5 Consider the rights of the individual in all work undertaken 3.6 Carry out duties within relevant legislative requirements and frameworks as required
4. Maintain accountability and responsibilities	4.1 Access the organisation's policies and procedures in regard to workers and operate in accordance with these 4.2 Ensure all work is undertaken within the organisation's reporting and accountability frameworks 4.3 Follow organisational occupational health and safety guidelines 4.4 Access information to clarify the employer's responsibilities to the worker 4.5 Observe organisational requirements for participation in processes as appropriate
5. Observe professional boundaries when working	5.1 Communicate professional boundaries to clients in a culturally appropriate and safe manner 5.2 Maintain confidentiality when working with clients and other agencies 5.3 Observe organisational boundaries when working with clients and other agencies 5.4 Clarify organisational expectations with particular regard to professional and personal boundaries
6. Work with the clients involved with the justice system	6.1 Provide advocacy and support for clients involved with the justice system as appropriate and in accordance with organisational policies and protocols

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the Element.*
	6.2 Identify and observe the role and limitations of Aboriginal and/or Torres Strait Islander Health Workers work within the justice system
	6.3 Access, on behalf of clients, the processes of the justice system that will impact on clients, as appropriate
7. Complete relevant documentation	7.1 Collect information (i.e. data) as required to complete workplace documentation
	7.2 Complete documentation appropriate to the social and emotional wellbeing work role in line with organisational requirements and reporting arrangements (such as reports to funding bodies)

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment *skills) that are essential to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTAHW024 Work in alcohol, other drugs & mental health care w/ Aboriginal &/or Torres Strait Islander Comm.

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- undertaken AOD and mental health work with clients within the legal and ethical boundaries of the work and with a commitment to the philosophy of social and emotional wellbeing
- maintained the professional boundaries of the work role and addressed accountability and responsibilities appropriately when performing work role and in interacting with each client
- addressed the needs of clients from culturally and linguistically diverse backgrounds and balanced expectations of the organisation, the community and clients
- completed all reports and documentation relevant to the client and their treatment

© Commonwealth of Australia, 2025
HumanAbility

- advocated and supported clients when required.

All performance evidence must be performed at least once.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- organisational policies and procedures and legislation or regulations relating to:
  - client confidentiality
  - referral, including various levels of urgency, and follow-up of clients
  - mandatory reporting
  - notifiable communicable diseases
  - limits of own ability and authority
  - reporting procedures
  - documentation
- impact of cultural and spiritual factors on the way mental health problems develop and present
- rights as employees – industrial awards, duty of care, occupational health and safety, workers' compensation
- support systems available for employees – e.g. counselling, unions, professional associations
- the role, rights and responsibilities relating to social and emotional wellbeing work:
  - legal responsibilities to clients, organisation and self
  - reporting responsibilities
  - accountability to organisation and community
  - confidentiality requirements for social and emotional wellbeing work
  - ethical responsibilities
  - professional boundaries
- justice system and its processes relevant for the jurisdiction
- relevant mental health legislation and regulations for the jurisdiction
- conflict resolution and mediation.

Assessment Conditions

Skills must be demonstrated working:

© Commonwealth of Australia, 2025
HumanAbility

- in a health service or centre
- as part of a multidisciplinary primary health care team
- with Aboriginal and/or Torres Strait Islander clients and communities.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

HLTAHW025 Provide information and strategies in health care

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Application

This unit describes the skills and knowledge required to conduct health promotion as part of primary health care services for Aboriginal and/or Torres Strait Islander communities. The unit may be contextualised to apply information and strategies in specific areas of health care.

This unit applies to those Aboriginal and/or Torres Strait Islander Health Workers providing a range of primary health care services to Aboriginal and/or Torres Strait Islander clients and communities.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Promote health care	1.1 Consider identified community and individual client needs in determining priorities and potential areas to be addressed by health promotion 1.2 Provide accurate information about the nature, incidence and potential impacts of health conditions in relation to Aboriginal and/or Torres Strait Islander communities 1.3 Provide accurate information about the importance of regular health checks, compliance with treatment regimens and medications, and the need to follow-up and monitor problems 1.4 Provide health information in plain language, using visual aids where appropriate 1.5 Discuss risk factors relating to specific health problems in the context of local, cultural, community, family and individual issues 1.6 Provide practical advice relating to maintaining good health in line with individual and community needs and organisational guidelines
2. Provide support to clients with health problems	2.1 Provide support for clients with common health problems in Aboriginal and/or Torres Strait Islander communities 2.2 Provide guidance about health issues in line with community needs 2.3 Use culturally appropriate educational resources for health programs 2.4 Provide information about resources available in the community and state in relation to addressing health issues 2.5 Support clients to take a self-care approach to maintaining health in line with identified individual needs 2.6 Make appropriate referrals for clients with health problems 2.7 Maintain confidentiality to reflect community and organisational guidelines

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
3. Follow-up clients with health problems	3.1 Organise follow-up care for clients with health problems using computer- and/or paper-based registers 3.2 Identify clients who are significantly overdue for health care checks and employ active-recall strategies 3.3 Identify social and environmental factors that impact on health problem and address them in partnership with the community and other agencies 3.4 Promptly report any notifiable health problems detected or suspected in line with organisational and regulatory requirements

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Numeracy	• in order to calculate results of blood pressure checks, checking medication dosages, and blood glucose readings

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- determined priorities and potential areas to be addressed in health promotion based on community and individual client needs
- promoted health care including:
  - providing accurate information about the nature, incidence and potential impacts of particular health conditions in relation to Aboriginal and/or Torres Strait Islander communities
  - presenting accurate information about the importance of regular checks, compliance with treatment regimes and medications, and the need to follow-up and monitor health problems
  - communicating health information in plain language, using visual aids where appropriate

© Commonwealth of Australia, 2025 HumanAbility

  - discussing risk factors relating to specific health problems
  - providing practical advice relating to maintaining good health
- provided support to clients, including:
  - providing guidance about health issues
  - using culturally appropriate educational resources for health programs
  - providing information about resources available in community and statewide
  - offering blood pressure checks, checking medication dosages and blood glucose readings
  - supporting clients to take a self-care approach to maintaining health
  - making appropriate referrals for clients
  - identifying clients who require follow-up for health issues and initiating procedures to support their ongoing health care.

All performance evidence must be demonstrated at least once.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- organisational policies and procedures and legislation or regulations relating to:
  - client confidentiality
  - referral, including various levels of urgency, and follow-up of clients.
  - mandatory reporting
  - notifiable communicable diseases
  - limits of own ability and authority

Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- communicated effectively in a group and one-on-one environment to promote healthy practices and discussed health issues on at least three separate occasions
- provided accurate and relevant information and guidance about men's sexual health in line with identified individual and community needs on at least three separate occasions
- provided information and strategies for at least three individual male clients by:
  - taking a sexual history
  - explaining concepts related to sexuality, including:
    - sexuality and the human sexual response
    - sexual behaviour

© Commonwealth of Australia, 2025 HumanAbility

  - o at-risk sexual behaviour
  - o sexual discrimination
- explaining and demonstrating purpose and methods of contraception
- informing clients about STIs including history, transmission, prevention, investigations, management, complications, contact tracing and confidentiality
- exploring, reflecting on and clarifying client's personal experience and values in relation to sexuality
- making referrals at an appropriate time and to an appropriate person in relation to specific STIs.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- organisational policies and procedures and legislation or regulations relating to:
  - client confidentiality
  - referral, including various levels of urgency, and follow-up of clients
  - mandatory reporting
  - notifiable communicable diseases
  - limits of own ability and authority
  - reporting procedures
  - documentation
- influences on the development of sexuality, such as gender, spiritual and cultural values, kinship practices, individual ethics and socialisation.
- past and present sexual trends within Aboriginal and non-Aboriginal contexts
- sexual physiology and the human sexual response
- the influence on human sexuality and sexual response of factors such as:
  - disability
  - domestic violence
  - rape
- healthy sexual behaviours and attitudes and practices that may interfere with sexual health and emotional wellbeing including:
  - safer sex practices and barriers to same
  - influence of alcohol and other drug use on sexual behaviours
- purpose of contraception and available options
- sexually transmissible infections, including:
  - description/definition, statistics, signs and symptoms, universal precautions, common STIs, notifiable STIs
  - history of STIs in the Aboriginal community and effects of STIs on the community

© Commonwealth of Australia, 2025 HumanAbility

  - transmission, testing and complications related to STIs
  - impact on the ability of Aboriginal and Torres Strait Islander women to have children
  - contact tracing/ partner notification
  - available ways to prevent, manage and/or treat these diseases
- risk factors for contracting STIs/HIV, including:
  - relationship between STIs and increased risk of contracting HIV
  - unprotected anal, vaginal and oral sex, receptive and insertive
  - partners, mother to baby, blood to blood
  - unsafe drug injection
- importance of confidentiality, the limits to confidentiality and addressing this in a community.

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre
- as part of a multidisciplinary primary health care team
- with Aboriginal and/or Torres Strait Islander clients and communities.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment must be undertaken by a workplace assessor who has expertise in this unit of competency and who is:

- an Aboriginal and/or Torres Strait Islander Health Worker

or:

- accompanied by an Aboriginal and/or Torres Strait Islander person who is a recognised member of the community with experience in primary health care.

outcomes.	needed to demonstrate achievement of the element.
1. Develop positive relationships with women	1.1 Provide regular contact opportunities for women in the community 1.2 Provide opportunities for women to voice their opinions in a safe and supported environment 1.3 Advocate for the rights and needs of women in the community
2. Promote healthy lifestyle practices	2.1 Provide information on sexual, reproductive and women's health to address identified individual and community needs 2.2 Discuss sexual practices and attitudes in relation to their impact on sexual and reproductive health and emotional wellbeing 2.3 Explain methods of contraception within a cultural context 2.4 Work within a multidisciplinary team to promote healthy sexual and lifestyle practices
3. Identify and discuss women's health and wellbeing	3.1 Identify and explain issues relevant to women's health and wellbeing 3.2 Provide advice about individual women's health issues in line with organisational guidelines 3.3 Provide emotional support to women and families as appropriate 3.4 Identify and discuss risk factors for women and refer to appropriate support agencies as required 3.5 Deliver, implement and monitor care for women as per health management protocol in accordance with legislative guidelines 3.6 Work with a team to deliver effective health promotion and education for Aboriginal and/or Torres Strait Islander women using appropriate facilitation, problem-solving and instructional practices
4. Identify and discuss women's sexual health	4.1 Explain risk factors and indicators of sexually transmissible infections (STIs)

© Commonwealth of Australia, 2025 HumanAbility

4.2 Identify and explain methods of basic management for STIs

4.3 Prepare and present HIV/AIDS information within an STI context at a community level

4.4 Explain principles and procedures of HIV/AIDS testing and provide information as required

4.5 Explain interventions to address issues relating to STIs in the community as required

4.6 Provide advice about sexual and reproductive health issues in line with community needs and organisational guidelines

4.7 Provide information about resources available in the community and state in relation to addressing sexual and reproductive health issues

4.8 Make appropriate referrals to address identified STIs, HIV and sexual and reproductive health issues

4.9 Maintain confidentiality to reflect community and organisation guidelines and in line with notification requirements

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment *skills) that are essential to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTAHW027 Provide information and strategies in sexual health for women

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- communicated effectively in a group and one-on-one environment to promote healthy practices and discuss health issues on at least three separate occasions
- provided information and strategies to support the health of at least three women. This includes:
  - taking a sexual history
  - providing accurate and relevant information and guidance about women's sexual health in line with identified individual and community needs on at least three separate occasions, including:
    - explaining concepts related to sexuality, including:
      - sexuality and human sexual response
      - sexual behaviour

© Commonwealth of Australia, 2025 HumanAbility

- at-risk sexual behaviour
- sexual discrimination

o explaining and demonstrating purpose and methods of contraception

- informing clients about STIs including history, transmission, prevention, investigations, management, complications, contact tracing and confidentiality
- exploring, reflecting on and clarifying personal experience and values in relation to sexuality
- making referrals at an appropriate time and to an appropriate person in relation to specific STIs.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

This includes knowledge of:

- organisation policies and procedures and legislation or regulations relating to:
  - client confidentiality
  - referral, including various levels of urgency, and follow-up of clients
  - mandatory reporting
  - notifiable communicable diseases
  - limits of own ability and authority
  - reporting procedures
  - documentation
- anatomy and physiology of sexual/reproductive organs
- strategies to support women's health and wellbeing
- health prevention screening options for early identification of women's health issues
- impact and treatment of conditions affecting women's health and wellbeing, e.g. breast screening, cervical screening, domestic violence, sexual assault, menopause, vaginal prolapse and continence issues
- healthy sexual behaviours such as:
  - safe-sex practices
  - contraception
  - influence of alcohol and other drug use on sexual behaviours
- sexually transmissible infections, including:
  - description/definition, statistics, signs and symptoms, universal precautions, common STIs, notifiable STIs
  - history of STI in the Aboriginal community and effects of STIs on the community
  - transmission, testing and complications related to STIs

© Commonwealth of Australia, 2025 HumanAbility

- impact on the ability of Aboriginal and Torres Strait Islander women to have children
- contact tracing/ partner notification
- available ways to prevent, manage and/or treat these diseases

- risk factors for contracting STIs/HIV, including:
  - relationship between STIs and increased risk of contracting HIV
  - unprotected anal, vaginal and oral sex, receptive and insertive
  - partners, mother to baby, blood to blood
  - unsafe drug injection.

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre
- as part of a multidisciplinary primary health care team
- with Aboriginal and/or Torres Strait Islander clients and communities.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment must be undertaken by a workplace assessor who has expertise in this unit of competency and who is:

- an Aboriginal and/or Torres Strait Islander Health Worker

or:

- accompanied by an Aboriginal and/or Torres Strait Islander person who is a recognised member of the community with experience in primary health care.

HLTAHW028 Provide information and strategies in chronic condition care

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Application

This unit describes the skills and competencies required to conduct health promotion related to chronic conditions as part of primary health care services for Aboriginal and/or Torres Strait Islander communities.

The unit applies to those Aboriginal and/or Torres Strait Islander Health Workers providing a range of primary health care services to Aboriginal and/or Torres Strait Islander clients and communities.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 HumanAbility

Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Promote the prevention of chronic conditions	1.1 Consider identified community and individual client needs in determining priorities and potential areas to be addressed by chronic condition health promotion 1.2 Identify primary, secondary and tertiary prevention strategies for prevalent chronic conditions across the lifespan 1.3 Provide accurate information about the nature, prevalence and potential impacts of chronic conditions in relation to Aboriginal and/or Torres Strait Islander communities 1.4 Provide health information in plain language, using culturally appropriate and safe communication skills, and visual aids where appropriate 1.5 Discuss risk factors relating to specific chronic conditions in the context of local, cultural, community, family and individual issues 1.6 Explain and/or demonstrate practices for early detection of specific chronic conditions 1.7 Provide practical advice relating to maintaining good health in relation to prevalent chronic conditions and in line with individual and community needs and organisational guidelines
2. Provide support to clients with chronic conditions	2.1 Equip clients with common chronic conditions to make decisions about their health 2.2 Assist clients with chronic conditions to actively participate in the development of multidisciplinary care plans 2.3 Use culturally appropriate educational resources for chronic condition programs 2.4 Provide information about resources available in the community and state in relation to addressing chronic condition issues 2.5 Support clients to take a self-care approach to maintaining health in line with individual needs 2.6 Make appropriate referrals for clients with chronic conditions in accordance with organisation procedures and policies

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	2.7 Maintain confidentiality to reflect community and organisation guidelines
	2.8 Offer brief interventions for smoking cessation as required, using motivational interviewing and other relevant techniques
	2.9 Identify patterns of alcohol consumption and offer brief interventions as required
3. Follow-up clients with chronic conditions	3.1 Identify clients with chronic conditions who are significantly overdue for health care checks and engage follow-up and active recall strategies according to organisation procedures and policies
	3.2 Identify social and environmental factors that impact on chronic conditions and address them in partnership with the Aboriginal community and other agencies

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Numeracy	• in order to offer blood pressure checks, check medication dosages, and blood glucose readings
Reading	• in order to interpret protocols for the management of conditions, and interpret and contribute to the development of implementation of care plans

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

Assessment Requirements for HLTAHW028 Provide information and strategies in chronic condition care

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- provided on at least three separate occasions access to accurate health information on chronic conditions relevant to community and individual needs
- supported and guided at least three clients with chronic conditions
- referred at least three clients with chronic conditions to relevant services
- organised and ensured follow-up care for at least three clients.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

© Commonwealth of Australia, 2025 HumanAbility

This includes knowledge of:

- organisation policies and procedures and legislation or regulations relating to:
  - client confidentiality
  - referral, including various levels of urgency, and follow-up of clients
  - mandatory reporting
  - notifiable communicable diseases
  - limits of own ability and authority
  - reporting procedures
  - documentation
- prevalence and statistical incidence of diabetes, heart disease and chronic kidney disease in Aboriginal and/or Torres Strait Islander populations compared to non-Aboriginal and/or Torres Strait Islander populations
- importance of self-management and the promotion of health-seeking behaviours
- importance of developing care plans that involve the client and the multidisciplinary care team
- health promotion strategies for all chronic conditions (primary, secondary and tertiary prevention), including:
  - maternal and infant/child health
  - smoking cessation
  - national recommendations for healthy eating (including avoiding foods high in saturated fat and salt)
  - national recommendations for physical activity
  - vaccination (hepatitis B, pneumococcal, influenza & HPV)
  - oral health
  - safe alcohol consumption
  - social and emotional wellbeing
  - annual child and adult health checks
- features of chronic illness, including:
  - complex causality
  - multiple risk factors
  - long latency periods
  - a prolonged course of illness
  - functional impairment or disability
- specific chronic conditions affecting Aboriginal and/or Torres Strait Islander clients and communities, including:
  - cardiovascular disease
  - diabetes
  - cancer

© Commonwealth of Australia, 2025 HumanAbility

  - chronic respiratory disease
  - chronic kidney disease
  - asthma
  - arthritis
  - oral disease
- specific impact of chronic conditions on major body organs and systems
- groups at high risk of chronic conditions
- determinants of chronic conditions, including:
  - smoking
  - physical activity
  - nutrition
  - alcohol intake
  - use of illicit drugs
  - obesity, weight and waist circumference
  - unsafe sexual practices
  - genetic factors
- treatment and management of chronic conditions, including:
  - working strategically with clients, family and significant others to promote self-management as far as possible
  - medication
  - surgery
  - regular exercise
  - good nutrition
  - cessation of smoking
  - cessation or moderation of alcohol use
  - cessation of illicit drug use
  - regular screenings for changes in disease presentation and detection of other diseases
- in relation to cardiovascular diseases:
  - the concept of ‘cardiovascular risk factors’, the significance of an individual having multiple risk factors
  - the development of atherosclerosis and the basic pathophysiology of coronary heart disease, cerebrovascular disease and peripheral vascular disease
  - basic medical and surgical management of coronary heart disease
  - basic knowledge of the causes, prevention and management of other cardiovascular diseases including rheumatic heart disease, heart failure and cardiomyopathies
- in relation to diabetes mellitus:
  - basic pathophysiology of type II contrasted with type I diabetes mellitus and gestational diabetes
  - complications of diabetes (macrovascular: coronary heart disease, cerebrovascular disease and peripheral vascular disease; and microvascular: neuropathies, retinopathy and nephropathy)

© Commonwealth of Australia, 2025 HumanAbility

  - main elements of the 'diabetes annual cycle of care'
  - importance of follow-up for women with gestational diabetes and their children
  - role of other members of the multidisciplinary care team (e.g. GP, endocrinologist, diabetes educator, podiatrist, dietician, ophthalmologist/optometrist, psychologist)
- in relation to chronic kidney disease:
  - basic pathophysiology of chronic kidney disease (causes, body systems affected, progression/staging)
  - importance of early detection of chronic kidney disease in effort to defer or prevent end-stage kidney disease
  - screening and monitoring of chronic kidney disease (including blood and urine tests)
  - strategies to delay progression of chronic kidney disease (including control of blood sugar, blood pressure and smoking cessation)
  - complications (including hypertension, anaemia, bone demineralisation and high potassium levels) and major causes of death
  - options for management of end-stage kidney disease (palliative care, haemodialysis, continuous ambulatory peritoneal dialysis, transplant).
  - dilemmas and difficulties faced by Aboriginal and/or Torres Strait Islander people and their families who need to relocate to distant centres in order to access dialysis treatment
- supporting clients in self-care, including diet, physical activity, foot care, self-monitoring of blood sugar, and use of diabetes medicines in relation to chronic renal disease, :
  - basic pathophysiology of chronic renal failure (causes, body systems affected, natural history)
  - factors which may worsen or accelerate renal failure (including: high blood pressure, anti-inflammatory drugs, poor diabetes control, dehydration, high protein diet)
  - clinical features of advanced renal failure
  - the importance of early detection of renal disease in efforts to defer or prevent end-stage renal failure
  - options for treatment of end-stage renal failure (haemodialysis, chronic ambulatory peritoneal dialysis, transplant)
- the dilemmas and difficulties faced by Aboriginal people and their families who need to relocate to distant centres in order to access dialysis treatment
- familiarity with a range of other common chronic conditions in Aboriginal populations:
  - chronic liver disease – causes, clinical features and principles of management (including hepatitis B, hepatitis C, alcoholic liver disease and cirrhosis)
  - chronic obstructive lung disease, relationship to smoking and principles of management
- agencies able to provide support and assistance to Aboriginal and/or Torres Strait Islander people with chronic disabilities
- strategies to assist Aboriginal and/or Torres Strait Islander people with disabilities to live fulfilling and productive lives in the community
- methods of organising care of clients with chronic conditions (e.g. disease registers, care plan schedules in medical files, tagging files, computerised client information and recall systems)

© Commonwealth of Australia, 2025 HumanAbility

- value of the opportunistic approach to chronic condition surveillance (comprehensive check-ups as people come to the clinic)

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre
- as part of a multidisciplinary primary health care team
- with Aboriginal and/or Torres Strait Islander clients and communities.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment, including medical equipment used to conduct checkups, such as sphygmomanometer and glucometer to monitor blood pressure and blood sugar.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment must be undertaken by a workplace assessor who has expertise in this unit of competency and who is:

- an Aboriginal and/or Torres Strait Islander Health Worker

or:

- accompanied by an Aboriginal and/or Torres Strait Islander person who is a recognised member of the community with experience in primary health care.

HLTAHW029 Provide information and strategies in maternal and infant health

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Application

This unit describes the required skills and knowledge to conduct health promotion related to maternal and child health as part of primary health care services for Aboriginal and/or Torres Strait Islander communities.

It applies to those Aboriginal and/or Torres Strait Islander Health Workers providing a range of primary health care services to Aboriginal and/or Torres Strait Islander clients and communities.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 HumanAbility

Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Provide health information, support and care for women and families in pregnancy	1.1 Develop positive relationships with women and families 1.2 Provide information and support on maintaining good health and wellbeing prior to and during pregnancy 1.3 Provide emotional support to women and families as appropriate during pregnancy 1.4 Identify and discuss risk factors for mother and baby and refer to appropriate support agencies 1.5 Identify, support and advocate safe birthing practices and cultural beliefs 1.6 Discuss roles, relationships and responsibilities to support safe birthing, including the role of the Aboriginal and/or Torres Strait Islander Health Worker as an advocate for women and families 1.7 Deliver, implement and monitor care as per standard treatment protocol in accordance with legislative guidelines 1.8 Work with a team to deliver effective health promotion and education for Aboriginal and/or Torres Strait Islander families using appropriate facilitation, problem-solving and instructional practices
2. Provide health information, support and care after birth for women, infants and families	2.1 Provide information and support for self-care and wellbeing during the post-natal period 2.2 Provide advice to mothers on routine care of the newborn 2.3 Implement strategies to establish and support breastfeeding 2.4 Discuss with mother and family the importance of nutrition, physical activity, rest, sleep and support with the care of family in the immediate post-natal period 2.5 Identify minor post-natal problems for mother and newborn and provide advice and referral to appropriate agencies 2.6 Deliver, implement and monitor care in the post-natal period as per standard treatment protocol in accordance with legislative guidelines

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	2.7 Work with a team to deliver effective health promotion and education for Aboriginal and/or Torres Strait Islander families using appropriate facilitation, problem-solving and instructional practices
3. Support maternal, infant and family health and wellbeing	3.1 Deliver, implement and monitor care as per standard treatment protocol in accordance with legislative guidelines
	3.2 Organise reminders, transport and other assistance to attend care and/or provide support according to women's needs
	3.3 Implement strategies to improve maternal and/or infant health in line with community requirements and organisation
	3.4 Identify, engage and support high-risk families
	3.5 Provide support and referral to appropriate agencies as required
	3.6 Keep statistics on attendance for antenatal care and birthing outcomes and use to evaluate maternal health program

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment *skills) that are essential to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTAHW029 Provide information and strategies in maternal and infant health

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- provided information and strategies to at least three women and their infants to support maternal and infant health by:
  - communicating in an effective and culturally safe and appropriate manner to understand the mother's and infant's needs
  - providing accurate and relevant information and guidance about maternal and infant health and wellbeing
  - communicating effectively with client to obtain information and ensure understanding of information provided
  - assisting mothers presenting with antenatal problems
  - liaising between service providers, individuals, families and community groups to support maternal and infant health

© Commonwealth of Australia, 2025 HumanAbility

  - reflecting on own level and application of skills and knowledge to achieve desirable outcomes for clients
- worked within a team on at least three occasions to deliver effective health promotion and education for Aboriginal and/or Torres Strait Islander communities and clients around maternal and infant health by:
  - using appropriate facilitation, problem-solving and instructional practices
  - communicating effectively and in a culturally safe and appropriate manner
  - promoting discussion of health issues around maternal and infant health.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- organisation policies and procedures and legislation or regulations relating to:
  - client confidentiality
  - referral, including various levels of urgency, and follow-up of clients
  - mandatory reporting
  - notifiable communicable diseases
  - limits of own ability and authority
  - reporting procedures
  - documentation
- standard treatment protocols in accordance with legislative guidelines
- role of the Aboriginal and Torres Strait Islander Health Worker in relation to maternal and infant health education and care
- culturally appropriate and safe birthing practices
- awareness of the health and wellbeing of mother and child which encompasses physical, social-emotional and nutritional aspects
- health conditions and associated risks related to pregnancy, maternal and infant health which includes:
  - alcohol and other drugs
  - smoking
  - nutrition
  - domestic violence
  - sexual assault
- relevant evaluation criteria for monitoring effectiveness of specific maternal and infant health management program.

HLTAHW030 Provide information and strategies in eye health

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Application

This unit describes the skills and knowledge required to conduct health promotion related to eye health as part of primary health care services for Aboriginal and/or Torres Strait Islander communities.

This unit applies to those Aboriginal and/or Torres Strait Islander Health Workers providing a range of primary health care services to Aboriginal and/or Torres Strait Islander clients and communities.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Provide information, support and community education related to eye health	1.1 Provide accurate information to the community about eye health and associated risk factors 1.2 Provide information about the importance of regular eye checks, compliance with treatment regimens and medications, and the need to follow-up and monitor eye problems 1.3 Provide information on available eye health care resources and services, including specialist resources 1.4 Support clients in self-care practices related to eye health, as required 1.5 Explain common eye conditions to the community including their treatment and management strategies 1.6 Discuss with community members using appropriate resources how a healthy lifestyle affects the eye 1.7 Promote community eye education and awareness using available resources
2. Perform an eye health check	2.1 Establish trust with the client through active promotion of and strict adherence to confidentiality 2.2 Use effective, culturally appropriate and safe communication skills to obtain a history from the client 2.3 Measure distance, near and pinhole Visual Acuity 2.4 Diagnose conjunctivitis, corneal foreign bodies and minor ocular trauma 2.5 Identify and grade the severity of trachoma 2.6 Identify and refer clients who require full eye examination by an Optometrist or Ophthalmologist 2.7 Take retinal photographs as required
3. Treat eye health issues	3.1 Recommend treatment eye drops for patients with conjunctivitis 3.2 Show clients the correct procedure for instilling

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	eye drops or applying ointment
	3.3 Perform basic first aid procedures to address acute eye problems, as required
	3.4 Assist patients to understand common surgical concepts using relevant eye care resources at an appropriate level
	3.5 Instil dilating or anaesthetic eye drops
	3.6 Treat conjunctivitis, corneal foreign bodies and minor ocular trauma
4. Organise visiting Optometry or Ophthalmology Clinic	4.1 Schedule dates for visiting clinic
	4.2 Arrange travel for practitioners involved in the visiting clinic
	4.3 Promote details of the visiting clinic in the community using appropriate methods
	4.4 Confirm and arrange for required equipment as part of the clinic with visiting practitioners
	4.5 Organise patient lists and bookings
	4.6 Arrange language translation services as required
	4.7 Provide protocols and information to support culturally appropriate practice and communication to visiting practitioner/s
	4.8 Accompany visiting practitioner/s to remote locations and support culturally appropriate and safe interactions
	4.9 Complete all relevant paper work, patient records and recall lists
5. Support client referrals	5.1 Coordinate hospital visits for patients
	5.2 Arrange patient transport to the appointment
	5.3 Facilitate access to services for people with low vision
	5.4 Maintain patient records and recall lists

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	5.5 Provide support and follow-up to patients
6. Arrange for spectacles for clients	6.1 Assist clients to select suitable spectacles
	6.2 Take pupillary distance (PD), Bifocal and progressive height measurements for ordering spectacles
	6.3 Make appropriate fitting and adjustments of spectacles to client's face and ears
	6.4 Repair damaged spectacles for continued use, as appropriate
7. Follow-up eye health care programs	7.1 Record and collect patient data to contribute to eye health profile according to the organisational policies and procedures
	7.2 Evaluate eye health programs in line with organisation guidelines and community requirements
	7.3 Maintain client confidentiality in line with organisation guidelines
	7.4 Regularly update and maintain records of eye health care programs according to organisational policies and procedures
	7.5 Implement strategies to improve eye health in line with community requirements and organisation guidelines

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment *skills) that are essential to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- communicated effectively in a group and one-on-one environment to promote healthy practices and discussed eye health issues on at least three separate occasions
- provided accurate and relevant information and guidance about eye health care for at least three clients, and ensured each client's understanding of information
- performed each of the following on at least three occasions:
  - an emergency pupil assessment
  - a basic external eye examination
  - vision and visual acuity testing
  - diagnosis and treatment of conjunctivitis, corneal foreign bodies and minor ocular trauma

© Commonwealth of Australia, 2025 HumanAbility

  - trachoma identification and grading
  - retinal photographs
  - pinhole acuity measurement
  - eye drop and ointment instillation
  - eye patch and eye shield fitting
  - spectacle adjustments and minor repairs
- facilitated referrals for patients and liaised between service providers, individuals, families and community groups
- organised a regular or visiting Optometry or Ophthalmology Clinic at least once, including:
  - scheduling provider dates and organising travel logistics
  - organising patient lists and bookings
  - completing paperwork and maintaining patient records
- evaluated eye health programs and implemented strategies to improve eye health in the community on at least one occasion.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- anatomy and physiology of the eye
- broad facts of eye diseases (manifestation, impact and treatment)
- eye-related symptoms and signs that suggest a need for urgent/emergent medical or optometric assessment
- refractive errors and spectacle correction
- children’s vision issues (strabismus and amblyopia)
- diabetes
- organisation policies and procedures
- strategies to:
  - improve eye health in the community
  - address clients presenting with eye problems
  - coordinate provision of optimum level of eye health service delivery
- eye health problems requiring referral
- effective self-care practices for eye health
- relevant evaluation criteria for monitoring effectiveness of eye health care program.

© Commonwealth of Australia, 2025 HumanAbility

Assessment Conditions

Unless state or territory legislation prevents practice in the workplace, skills must be demonstrated working:

- in a health service or centre
- as part of a multidisciplinary primary health care team
- with Aboriginal and/or Torres Strait Islander clients and communities.

Note: Where state or territory legislation prevents practice in the workplace, simulated assessment environments may only be used in place of workplace assessment.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment including retinal cameras, and tools and equipment used to test visual acuity, to measure pupillary distance and Bifocal and progressive height measurements and to adjust spectacles.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment must be undertaken by a workplace assessor who has expertise in this unit of competency and who is:

- an Aboriginal and/or Torres Strait Islander Health Worker

or:

- accompanied by an Aboriginal and/or Torres Strait Islander person who is a recognised member of the community with experience in primary health care.

HLTAHW031 Provide information/strategies to enhance capacities of Aboriginal/Torres Strait Islander families

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Application

This unit describes the skills and knowledge required to provide information and strategies related to promoting and enhancing the capacities of families and communities (including children and young people) as part of primary health care services for Aboriginal and/or Torres Strait Islander communities.

This unit applies to those Aboriginal and/or Torres Strait Islander Health Workers providing a range of primary health care services to Aboriginal and/or Torres Strait Islander clients and communities.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 HumanAbility

Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Provide strategies to promote and strengthen the capacities of families and communities	1.1 Determine the components of a 'healthy family' and strategies to strengthen the family unit 1.2 Demonstrate knowledge of and respect for the diversity of culture, skin and language groups and family structures in relation to achieving healthy families and communities 1.3 Provide accurate information about the incidence, impacts and social and psychological context of family health problems in Aboriginal and/or Torres Strait Islander communities 1.4 Discuss the obstacles to healthy family and community development in relation to family and/or domestic violence, and abuse of children and young people 1.5 Provide practical advice relating to early identification, management and prevention of family health problems in accordance with community cultural needs and work role obligations 1.6 Work in collaboration with primary health care workers, multidisciplinary teams, organisations and other agencies to support 'healthy family' outcomes
2. Work in partnership with Aboriginal and/or Torres Strait Islander people and communities	2.1 Develop and implement strategies to increase participation of Aboriginal and/or Torres Strait Islander people in health service delivery 2.2 Ensure delivery of health care, services and programs reflect culturally safe and appropriate practice 2.3 Ensure health care, services and programs encourage self-determination and community control to ensure improved health outcomes 2.4 Identify and utilise resources to promote effective partnerships with Aboriginal and/or Torres Strait Islander people, organisations and communities 2.5 Support the development of effective partnerships between staff, Aboriginal and/or Torres Strait Islander people and their communities to facilitate accessibility, affordability and acceptability of appropriate health and workplace services

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
3. Identify immediate risks and needs	3.1 Comply with federal, state or territory workplace legislation which may impact on primary health care workers' practice and responsibilities 3.2 Use culturally appropriate interpersonal skills to promote confidence and rapport, allowing the effective exchange of accurate and relevant information 3.3 Assess, analyse and respond to any indicators of risk or threats to the safety of children, young people, family and/or community members 3.4 Use culturally appropriate methods to accurately record relevant, specific and general circumstances to ensure that all relevant information is collected and complies with organisational, legal and ethical obligations 3.5 Identify own limitations in addressing and assessing clients' needs and, where appropriate, seek assistance from appropriate community person/s or work collaboratively with relevant organisations
4. Implement strategies to empower children, young people, families and communities	4.1 Identify current community and government intervention and support policies in relation to family health issues in Aboriginal and/or Torres Strait Islander communities 4.2 Discuss the principles of community development and ways in which community development strategies promote empowerment and re-empowerment 4.3 Use culturally appropriate educational resources to assess, analyse and prevent identified children, youth and family health issues 4.4 Make appropriate referrals for clients with family health problems in line with community and organisational legislation and guidelines

Assessment Requirements for HLTAHW031 Provide information/strategies to enhance capacities of Aboriginal/Torres Strait Islander families

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- supported at least five families (including children and/or young people) to develop their capabilities. This includes:
  - communicating effectively in a group and one-on-one environment to promote healthy practices and discussing health issues
  - providing accurate and relevant information and guidance about family issues and strategies to strengthen families, in line with identified individual and community needs
  - identifying intervention and support strategies appropriate to the client's family issues

© Commonwealth of Australia, 2025
HumanAbility

- making referrals to appropriate services to assist with client's family health problems and following up as required.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- definitions and forms of violence, sexual assault, physical and emotional abuse and neglect, including:
  - indicators and common behaviours
  - factors involved and links between them
  - potential impact on individuals and families involved and the community
  - likely needs of individuals and families involved
  - knowledge of the social, political, historical, and economic context of family and domestic violence, including types and nature of violence
  - nature and dynamics of abuse, assault and violence in Aboriginal and/or Torres Strait Islander communities
  - impact of the risk of and actual violence and abuse on children, families, adults and community
  - misconceptions and prevalent attitudes about violence and abuse which impede individuals and families seeking help, and hinder community development and other interventions
- strategies to support children, young people and families who:
  - have experienced or are at risk of familial violence, sexual assault, physical and emotional abuse or neglect
  - are in crisis situations
  - require long-term support
- how to apply community development principles and strategies
- diversity of Aboriginal and/or Torres Strait Islander cultures
- impact of colonisation on individual and community identity through the loss of family, kin, language, social structures, traditional land ownership, law, knowledge and cultural practices
- interaction between western and traditional practices, including impact of 'culture shock'
- historical, social, political and economic factors contributing to ill health and chronic conditions among Aboriginal and/or Torres Strait Islander peoples
- culturally safe and appropriate forms of communication and interaction with individuals and communities

© Commonwealth of Australia, 2025
HumanAbility

- organisation procedures, state, territory and/or federal legislation and regulations informing own scope of practice, including:
    - duty of care
    - mandatory reporting requirements and child protection systems
    - ethical considerations
    - children's and human rights
    - codes of practice
    - discrimination on unlawful grounds, including race, sex, sexual orientation, gender, religion, culture
- current organisation procedures, practices and standards relating to:
    - client assessment
    - allocation of services
    - case management
    - interviewing
    - code of conduct
    - confidentiality
    - file management
    - use of resources
    - programmed intervention
- additional services including:
    - other health care practices or agencies for referral of individuals and families
    - interpreter and translation services
- own professionalism, including:
    - own values and attitudes and potential impact on clients
    - ethical decision-making.

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre
- as part of a multidisciplinary primary health care team
- with Aboriginal and/or Torres Strait Islander clients and communities.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

© Commonwealth of Australia, 2025
HumanAbility

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment must be undertaken by a workplace assessor who has expertise in this unit of competency and who is:

- an Aboriginal and/or Torres Strait Islander Health Worker

or:

- accompanied by an Aboriginal and/or Torres Strait Islander person who is a recognised member of the community with experience in primary health care.

HLTAHW032 Supervise individual workers

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Application

This unit describes the required skills and knowledge of a supervisor or manager supporting individual workers who are part of a team or working alone. It includes induction of new staff, planning work, appraising performance and supporting workers to manage workload.

This unit applies to those Aboriginal and/or Torres Strait Islander Health Workers providing a range of primary health care services to Aboriginal and/or Torres Strait Islander clients and communities.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Induct and orient new staff	1.1 Discuss job position, including scope of practice, responsibilities and authority with new workers 1.2 Provide new workers with information about the community, organisation and work group and their industrial rights and responsibilities 1.3 Enable workers to have access to resources, support and networks required in their role 1.4 Provide new workers with, or facilitate access to, cross-cultural awareness programs as required 1.5 Identify and plan for any immediate training as required when joining the organisation
2. Develop individual work plan in consultation with worker	2.1 Discuss and develop individual work plan to meet work unit objectives and action plans 2.2 Identify, agree and document performance goals 2.3 Review work plan regularly in discussion with worker and adjust plan if necessary
3. Undertake performance appraisal with worker	3.1 Regularly review worker's performance against agreed criteria/expectations in line with organisation guidelines 3.2 Provide feedback to worker on performance and discuss 3.3 Discuss training and development needs or preferences with worker and document
4. Support workers in their work role	4.1 Discuss work load and other work-related issues with workers on a regular basis 4.2 Explore and implement support mechanisms to address issues in line with individual, community and organisation requirements 4.3 Support strategies to address workers' development needs

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	4.4 Provide mentoring support, or opportunities to receive mentoring
	4.5 Provide workers with access to opportunities to discuss their own wellbeing and support appropriate assistance as required
5. Assist workers to plan career paths	5.1 Discuss workers' career options and preferences
	5.2 Identify opportunities for career progression or development
	5.3 Identify training and development needs in regards to desired career path in line with individual preferences and organisation requirements
	5.4 Develop and document an individual training and development plan for worker, to reflect individual and organisation requirements
	5.5 Assist workers to develop their skills and knowledge in line with individual and organisation guidelines

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- inducted at least three new staff, including providing information regarding the community, organisation and rights and responsibilities of the role
- developed at least three work plans in consultation with the new staff members and in accordance with organisational needs and performance goals
- reviewed staff performance and provided feedback on at least three occasions
- supported professional development of at least three staff members by:
  - identifying training needs and opportunities
  - assisting staff in developing career plans and identifying opportunities for career progression and professional development

© Commonwealth of Australia, 2025 HumanAbility

- contributing to the ongoing support and development of staff involved in provision of primary health care services to Aboriginal and/or Torres Strait Islander clients.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- relevant organisation guidelines
- awards or Enterprise Bargaining Agreements (where they exist)
- organisational human resource management policies
- union documents/guidelines/policies
- performance appraisal protocols
- conditions of service
- strategies to meet staff training needs
- networking and information exchange processes
- career progression opportunities
- community support mechanisms
- industrial relations principles and current issues

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre
- as part of a multidisciplinary primary health care team
- with Aboriginal and/or Torres Strait Islander clients and communities.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. HLTAHW033 Maintain community health profile

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Application

This unit describes the required skills and knowledge to develop, evaluate and amend a community health profile, using information collected on the community's health. This profile can then used as a basis for further research and decision-making regarding health care service delivery.

This unit applies to those Aboriginal and/or Torres Strait Islander Health Workers providing a range of primary health care services to Aboriginal and/or Torres Strait Islander clients and communities.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 HumanAbility

Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Develop a community health profile	1.1 Obtain community agreement before developing the community profile 1.2 Check information collected on the community for accuracy 1.3 Consult key people to determine priorities and timelines for action 1.4 Compile community health information into a community health profile document in line with organisation guidelines 1.5 Present information to organisation and community representatives, using visual and other aids to support understanding as required
2. Review the community health profile	2.1 Determine timelines for reviewing community health profile in line with organisation requirements 2.2 Regularly review and update community health profile in line with new and relevant information 2.3 Consult key organisation and community representatives to review the profile in line with changing community health needs 2.4 Identify and consider requirements of relevant agencies when reviewing the profile
3. Amend the community health profile	3.1 Incorporate new and changed community needs, issues and priorities into the community health profile, amending the profile document as required 3.2 Amend information systems and records as required 3.3 Present updated information to organisation and community representatives

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and

HLTAHW034 Provide healthy lifestyle programs and advice

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Application

This unit describes the required skills and knowledge to plan, promote, deliver and evaluate a healthy lifestyle program. It requires application of knowledge of nutrition, cultural awareness and an understanding of the dietary, physical and emotional factors that influence healthy lifestyle choices.

This unit applies to those Aboriginal and/or Torres Strait Islander Health Workers providing a range of primary health care services to Aboriginal and/or Torres Strait Islander clients and communities.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 HumanAbility

Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Prepare for and promote the training program	1.1 Identify characteristics of the participants and recognise their specific learning needs 1.2 Plan a timetable for program delivery and confirm after consultation with all stakeholders 1.3 Identify, arrange and/or order resources in consultation with stakeholders and/or the community 1.4 Present information about the program in a clear and concise manner that is appropriate to the target group and distribute it in a variety of ways 1.5 Select training delivery methods appropriate to the participants' needs as well as a suitable location and available resources
2. Deliver training in a context appropriate to the community	2.1 Ensure training is delivered in a safe, accessible and culturally secure environment and is based on culturally appropriate practices 2.2 Select appropriate strategies and techniques to check for understanding and facilitate the learning process 2.3 Negotiate training objectives, planned activities and assessment procedures (if applicable) with participants to meet their specific and/or changing needs 2.4 Encourage self-determination and community control to ensure improved healthy lifestyle outcomes 2.5 Ensure confidentiality for all participants
3. Discuss behaviour in relation to diet and exercise	3.1 Address factors that influence weight gain and the concept of energy balance 3.2 Explain basic eating patterns for healthy weight and the disadvantages of quick weight-loss diets 3.3 Discuss the process and stages of, and factors influencing, behaviour change 3.4 Identify barriers to behaviour change and explore realistic solutions 3.5 Explain the benefits of physical activity and discuss common myths about physical activity

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	3.6 Explain how to develop and set SMART (specific, measurable, attainable, realistic and timely) goals
4. Discuss self-esteem and how it relates to health	4.1 Discuss self-esteem and the factors that influence it
	4.2 Describe the effects of low self-esteem
	4.3 Explore realistic ways of improving self-esteem
	4.4 Review ways of making and maintaining healthy lifestyle changes and weight loss and associated benefits
	4.5 Discuss ways of seeking ongoing support to help achieve goals
	4.6 Plan activities to provide ongoing support and help to achieve goals
5. Develop participants' skills in interpreting food labels and shopping to a budget	5.1 Explain how to identify healthy amounts of fat, salt and sugar from food labels
	5.2 Discuss how to identify dietary terms and other terms for fat and sugar
	5.3 Discuss benefits of budgeting and ways of shopping to get value for money
	5.4 Explain the "10 Plan Shopping Guide" for balancing diet and budget and provide opportunities for practice
	5.5 Discuss ways of buying food so that the money goes further and compare prices per kilo
	5.6 Investigate range of foods available in local store(s) during a shopping tour and read food labels to ascertain nutritional value of particular foods
	5.7 Plan healthy meals for one day
6. Provide low-fat cooking exercises	6.1 Discuss ways to cut down on fat and demonstrate low-fat cooking methods
	6.2 Explain the healthy eating pyramid and the

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	principles of healthy eating
	6.3 Sort foods according to the *Australian Guide to Healthy Eating* and describe the elements of a healthy eating plan
	6.4 Prepare and cook food using low-fat methods
7. Raise awareness of diabetes	7.1 Explain risk factors for type 2 diabetes
	7.2 Address factors involved in type 2 diabetes prevention
	7.3 Describe the signs and symptoms of type 2 diabetes
	7.4 Discuss factors that affect diabetes management and strategies for managing diabetes
	7.5 Provide definitions of type 1 diabetes, type 2 diabetes and gestational diabetes mellitus
	7.6 Describe long- and short-term complications associated with diabetes
8. Review and evaluate the training program	8.1 Obtain feedback about the program, resources used and outcomes achieved from participants and the community
	8.2 Encourage participants to self-evaluate and set future personal goals
	8.3 Negotiate changes needed in the program with all stakeholders
	8.4 Document the program evaluation according to organisational requirements
	8.5 Suggest improvements to the program delivery plan to supervisor, other individuals, agencies and communities
	8.6 Implement changes to the program delivery plan in consultation with the community and stakeholders as required

Assessment Requirements for HLTAHW034 Provide healthy lifestyle programs and advice

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- planned for at least one training program to deliver healthy lifestyle information and advice by:
  - identifying a target audience for the program
  - determining the content of the program, and the timeframes for delivery
  - promoting the program through appropriate forums
  - securing the location and necessary resources for the program delivery
- delivered the training program at least twice by:
  - communicating in a culturally appropriate and safe manner at all times with participants
  - addressing the needs of individual participants, and the group as a whole

© Commonwealth of Australia, 2025 HumanAbility

  - checking for understanding of individuals, and supporting involvement of the group in training
  - providing information about:
    - healthy diet, including appropriate intake of specific ingredients such as salt, sugar and fat
    - shopping for health food and meal preparation
    - dietary guidelines
    - diet and self-esteem issues
    - preparation of healthy meals
    - food labels and nutritional values
    - principles of the Australian Dietary Guidelines
    - links between diabetes and a healthy lifestyle, and general diabetes awareness
- evaluated both healthy lifestyle training programs, customised to address participant and community needs by:
  - communicating with individuals, families and communities to identify, establish and maintain lifestyle changes to achieve improved health
  - identifying areas and suggesting specific measures for improvement.
- documented all aspects of planning, delivery and evaluation of at least one healthy lifestyle training program.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- organisation policies and procedures and legislation or regulations relating to:
  - client confidentiality
  - referral, including various levels of urgency, and follow-up of clients
  - mandatory reporting
  - notifiable communicable diseases
  - limits of own ability and authority
  - reporting procedures
  - documentation
- nutrition for good health
- specific nutritional issues for Aboriginal and/or Torres Strait Islander communities and individuals
- *Australian Guide to Healthy Eating* and the nutrients associated with each food group
- *Aboriginal and Torres Strait Islander Guide to Healthy Eating*

© Commonwealth of Australia, 2025 HumanAbility

- basic eating patterns for healthy weight and factors associated with quick weight-loss diets
- benefits and common myths relating to physical activity
- processes of behaviour change, including:
  - stages of behaviour change
  - factors that influence behaviour change
  - barriers to behaviour change
- nutritional needs of people at different stages in the lifecycle
- risk factors associated with common nutrition-related diseases.

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre
- as part of a multidisciplinary primary health care team
- with Aboriginal and/or Torres Strait Islander clients and communities.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment must be undertaken by a workplace assessor who has expertise in this unit of competency and who is:

- an Aboriginal and/or Torres Strait Islander Health Worker

or:

- accompanied by an Aboriginal and/or Torres Strait Islander person who is a recognised member of the community with experience in primary health care.

HLTAHW035 Provide information and support around cancer

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Application

This unit describes the required skills and knowledge to provide information about cancer and support for people and their families, to enable informed choices about prevention and screening, diagnosis and treatment, through to survivorship or palliation.

This unit applies to those Aboriginal and/or Torres Strait Islander Health Workers providing a range of primary health care services to Aboriginal and/or Torres Strait Islander clients and communities.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Promote the awareness of cancer prevention, screening and early detection	1.1 Provide accurate and current information about the nature, incidence and potential impacts of cancer in relation to Aboriginal and/or Torres Strait Islander communities 1.2 Provide health information regarding cancer in plain language, using visual aids where appropriate 1.3 Discuss risk factors relating to cancer in the context of local, cultural, community, family and individual issues 1.4 Provide information on ways to prevent or reduce the risk of cancer 1.5 Provide information about best-practice guidelines around early detection of specific cancers, in line with current recommendations
2. Provide support to clients with cancer	2.1 Provide support for clients with cancer and their families in Aboriginal and/or Torres Strait Islander communities in line with health service guidelines and identified protocols 2.2 Provide culturally appropriate and current educational resources about cancer and its treatment to clients and their families 2.3 Inform clients about services available in the community and statewide in relation to addressing cancer issues 2.4 Support clients to take a patient-choice lead in determining their treatment and cancer care 2.5 Facilitate appropriate referrals for clients with cancer in line with organisational guidelines and multidisciplinary clinical partnerships 2.6 Maintain confidentiality to reflect community and health service guidelines
3. Organise follow-up care for clients with cancer	3.1 Organise follow-up care for clients with cancer using recall functions on computer information systems

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	3.2 Provide current information about cancer survivorship and what this may mean in relation to family, community and returning to work
	3.3 Explain palliation in a timely and culturally sensitive way to clients and their families
	3.4 Provide feedback about the effectiveness of cancer information and support provided by local health services
	3.5 Identify social and environmental factors that impact on cancer and address them in partnership with the Aboriginal and/or Torres Strait Islander community and other agencies

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Learning	• in order to locate, evaluate and organise information to suit intended audience and purpose
Numeracy	• in order to interpret, calculate and express the level of incidence of cancer using ratios and percentages

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTAHW035 Provide information and support around cancer

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- communicated effectively and in a culturally safe and appropriate manner, on at least one occasion, to Aboriginal and/or Torres Strait Islander clients to promote community awareness of and current information about cancer and its different signs and symptoms and risk factors
- provided support to at least three clients diagnosed with cancer and/or undergoing cancer treatment by:
  - providing information about diagnostic tests and investigation techniques
  - equipping clients with resources and explaining support services and their roles for the client and their families
  - providing information regarding different treatment options

© Commonwealth of Australia, 2025 HumanAbility

- liaising with other services to ensure appropriate exchange of client information
- assisting in planning and implementing care needs
- identifying and addressing barriers to receiving treatment
- explaining palliation options, if required
- facilitating appropriate referrals for clients.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- epidemiology and pathophysiology including:
  - common signs and symptoms that aid early detection of cancer
  - how cancer is detected and treated
  - the basic definition of cancer and how cancer multiplies and spreads (i.e. the ‘weed’ analogy)
  - the outcomes for Aboriginal and Torres Strait Islander people and why outcomes are generally worse for them than other Australians
  - the statistical incidence of the main cancers affecting Aboriginal and Torres Strait Islander people including the common cancers affecting men and women
- prevention and risk factors such as:
  - how the social determinants of health affect wellbeing in relation to family, community and culture
  - an understanding that Aboriginal and Torres Strait Islander people face a much higher burden of tobacco-related cancers than other people in the community
  - ways to prevent or reduce the risk of cancer, including lifestyle-associated risk factors, such as smoking, alcohol, physical inactivity, overweight, obesity, poor diet, overexposure to sunlight, unsafe sex, hepatitis B, hepatitis C, human papillomavirus (HPV) and the role of vaccinations
- screening and early detection, including:
  - factors that influence an individual’s decision to participate in screening programs relevant to Aboriginal and Torres Strait Islander communities
  - benefits of early diagnosis
  - national screening programs available
  - locations of where treatment options and support services are available
  - the importance of patient choices (including the engagement of traditional healers and adherence to religious belief systems)
- support during the cancer journey such as:

© Commonwealth of Australia, 2025 HumanAbility

  - the emotional and psychosocial impact of cancer diagnosis and treatment
  - ways to access Aboriginal and/or Torres Strait Islander and other agencies and networks coordinating care for clients and their families who have experienced cancer
  - ways to access referral agencies and other resources
  - ways to communicate with clients and families during the emotional and psychosocial impact of cancer diagnosis and treatment
- follow-up care, including:
  - mechanisms for ensuring clients attend local health services for regular check-ups
  - support mechanisms to manage physical and psychosocial care upon client's return home
- palliation, including:
  - methods of managing the psychosocial aspects of symptoms and pain
  - pain management methods and advanced symptoms management for people with terminal cancer
  - ways to judge the appropriate time and to use culturally sensitive language to talk about the principles and philosophy of palliative care with Aboriginal and/or Torres Strait Islander people
- administration and quality control, incorporating:
  - the use of client information systems and recall functions to follow-up clients
  - ways to enable Aboriginal and/or Torres Strait Islander Health Workers to provide feedback on cancer programs in the local health services where they are employed, to management and community
- methods that are patient-choice led and individualised to cultural values of people under treatment:
  - whereby multidisciplinary team principles and practices (including supportive care needs) are identified before treatment starts
  - including common forms of treatment, such as surgery, radiotherapy, chemotherapy, non-active and traditional healing.

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre
- as part of a multidisciplinary primary health care team
- with Aboriginal and/or Torres Strait Islander clients and communities.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

© Commonwealth of Australia, 2025 HumanAbility

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment must be undertaken by a workplace assessor who has expertise in this unit of competency and who is:

- an Aboriginal and/or Torres Strait Islander Health Worker

or:

- accompanied by an Aboriginal and/or Torres Strait Islander person who is a recognised member of the community with experience in primary health care.

HLTAHW036 Provide information and support to women with breast cancer

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Application

This unit describes the required skills and knowledge to provide information and support around breast cancer, including breast awareness and early detection, diagnosis, treatment and follow-up care, as part of primary health care services for Aboriginal and/or Torres Strait Islander communities.

The unit applies to those Aboriginal and/or Torres Strait Islander Health Workers providing a range of primary health care services to Aboriginal and/or Torres Strait Islander clients and communities.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

© Commonwealth of Australia, 2025 HumanAbility

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Promote awareness and early detection of breast cancer	1.1 Identify community and individual client needs in determining priorities for promotion of breast awareness and early detection of breast cancer 1.2 Provide accurate clinical information about the nature of breast cancer, including the definition and signs and symptoms 1.3 Give clients accurate information on incidence, survival and mortality rates of breast cancer in relation to Aboriginal and/or Torres Strait Islander communities 1.4 Discuss risk factors relating to breast cancer in the context of cultural, community, family and individual issues 1.5 Explain practices for early detection of breast cancer 1.6 Provide information and practical advice relating to modifiable risk factors of developing breast cancer
2. Provide information and support to clients being investigated for a breast cancer symptom	2.1 Equip clients with an overview of investigation methods and diagnostic tests for breast cancer 2.2 Provide information about own service and role to other organisations 2.3 Facilitate communication between services to optimise service delivery
3. Provide information and support to clients being treated for breast cancer	3.1 Provide information and current evidence regarding breast cancer treatments 3.2 Promote the exchange of information about care needs and positive multidisciplinary clinical partnerships in planning and implementing breast cancer care 3.3 Collaborate with clients, their family/significant others and the multidisciplinary team in planning and implementing care to meet the multiple health and support needs of clients 3.4 Provide appropriate information and resources on supportive care, and facilitate access to health services and

© Commonwealth of Australia, 2025 HumanAbility

	community resources which provide such care
4. Provide information and support to clients to complete breast cancer follow-up care	4.1 Provide information to clients on follow-up care in relation to the breast cancer journey 4.2 Collaborate with clients, their family/significant others and the multidisciplinary team in planning and implementing follow-up care 4.3 Identify barriers to accessing treatment for cancer in Aboriginal and/or Torres Strait Islander women 4.4 Provide information on key psychosocial issues facing Aboriginal and/or Torres Strait Islander women with cancer 4.5 Use basic, culturally appropriate communication skills to support women being treated for breast cancer 4.6 Identify patients at higher risk of psychosocial distress who may benefit from additional assessment and appropriate referral for psychosocial care 4.7 Provide continuity of care for the patient, communicating regularly and collaboratively with the multidisciplinary health care team

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Learning	• in order to locate, evaluate and organise information to suit intended audience and purpose
Numeracy	• in order to interpret, calculate and express the level of incidence of cancer using ratios and percentages

© Commonwealth of Australia, 2025 HumanAbility

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTAHW036 Provide information and support to women with breast cancer

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- provided support to at least three different women diagnosed with breast cancer by offering:
  - advice about available treatment
  - information about further diagnostic tests and investigation techniques
  - explanation of available services and their roles
  - support to clients undergoing breast cancer treatment, including assistance with:
    - information regarding different treatment options
    - liaison with other services to ensure appropriate exchange of client information
    - care plans and their implementation
    - identifying and addressing barriers to receiving treatment

© Commonwealth of Australia, 2025 HumanAbility

    - access to support services for the client and their families
  - follow-up with clients and identification of psychosocial issues, referring as required
  - a collaborative approach to working with the multidisciplinary health care team to support client needs
- communicated effectively and in a culturally safe and appropriate manner to Aboriginal and/or Torres Strait Islander women to promote community awareness of and current information about breast cancer and its signs and symptoms and risk factors. This must occur on at least one occasion in a group environment.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- early signs and symptoms of breast cancer
- risk factors of early breast cancer
- early detection breast cancer strategies such as:
  - breast awareness
  - mammography screening every two years
- statistical incidence, survival and mortality rates of breast cancer in the Aboriginal and/or Torres Strait Islander population compared to the whole Australian population
- definition of breast cancer, including:
  - Ductal Carcinoma in Situ (DCIS)
  - early breast cancer
  - secondary breast cancer
- healthy lifestyle strategies to reduce the risk of developing breast cancer
- the three diagnostic components (also known as triple test) of early breast cancer which are:
  - medical history and clinical breast examination
  - imaging-mammography and/or ultrasound
  - biopsy
- treatments for early breast cancer, including the aim of treatment, duration and side-effects, including:
  - chemotherapy
  - hormonal therapy
  - radiotherapy
  - surgery (mastectomy and breast-conserving surgery)
  - targeted therapy

© Commonwealth of Australia, 2025 HumanAbility

- the key psychosocial issues for Aboriginal and/or Torres Strait Islander women with breast cancer, including:
  - emotional
  - psychological
  - physical
  - practical
- agencies able to provide support and assistance to Aboriginal and/or Torres Strait Islander women with breast cancer.

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre
- as part of a multidisciplinary primary health care team
- with Aboriginal and/or Torres Strait Islander clients and communities.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment must be undertaken by a workplace assessor who has expertise in this unit of competency and who is:

- an Aboriginal and/or Torres Strait Islander Health Worker

or:

- accompanied by an Aboriginal and/or Torres Strait Islander person who is a recognised member of the community with experience in primary health care.

HLTAHW037 Support the safe use of medications

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This unit was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages.

Application

This describes the skills and knowledge required to support Aboriginal and/or Torres Strait Islander clients and communities to safely use medication through the provision of accurate information about medicines. This unit includes investigating individual client needs for information, and researching and delivering knowledge to clients to support the Quality Use of Medicines. It also involves delivering information as part of health promotion activities with communities or identified groups.

The unit applies to those Aboriginal and/or Torres Strait Islander Health Workers providing a range of primary health care services to Aboriginal and/or Torres Strait Islander clients and communities.

This unit does not include skills and knowledge to administer or supervise self-administration of medication, which is covered in HLTAHW020 Administer medications.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

© Commonwealth of Australia, 2025 HumanAbility

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Determine client medication requirements	1.1 Consult client and/or significant others for medication history and allergies 1.2 Review relevant documentation 1.3 Identify options and contraindications of commonly used medications and discuss with prescriber and other relevant staff 1.4 Maintain appropriate records of client medication in line with organisation requirements
2. Interpret and clarify orders and instructions for medication	2.1 Receive and correctly interpret written and verbal orders and instructions for medications 2.2 Identify potential drug interactions and refer to the authorised prescriber 2.3 Consult authorised practitioners and other senior health staff if required to clarify medication instructions 2.4 Check written and verbal medication instructions against published medicines' information resources 2.5 Recognise special precautions and contraindications of use of particular medicines and refer to an appropriate person
3. Support clients in their use of traditional and western medicines	3.1 Identify traditional/bush medicines commonly used in the local community 3.2 Support and promote the role of traditional healers and traditional/bush medicines as an adjunct to western medical treatment 3.3 Identify generic and brand names of medicines used commonly in Aboriginal and/or Torres Strait Islander primary health practice, using reference sources as required 3.4 Provide information to clients on mechanisms of action, dosing and common side-effects 3.5 Provide Consumer Medicines Information (CMI)

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	and explain to clients as required
	3.6 Support clients to question proposed medical treatments to clarify the purpose, action and any issues relating to medication
	3.7 Obtain feedback from client to determine their understanding of information provided
	3.8 Support clients, where appropriate, to obtain prescription medicines under the Pharmaceutical Benefits Scheme (PBS) and other federal initiatives
4. Deliver information to support clients in the use of medications	4.1 Deliver clear and accurate information to support the client's Quality Use of Medicines in a confidential and culturally appropriate and safe manner
	4.2 Check the client's understanding of information provided and support the client to make decisions and further inquiries about medication use
	4.3 Support clients to obtain access to benefit schemes and other supports as appropriate
	4.4 Evaluate the impact of information on the individual client's health through follow-up contact
	4.5 Document all information provided about medications according to organisation procedures
5. Provide advice about storage and transport of medication	5.1 Explain to client the importance of correct and secure storage of medication in the home or other locations, including keeping medication away from children
	5.2 Advise clients of the correct way to handle medication, including cold chain transport for medication requiring refrigeration
	5.3 Explain to clients the importance of only using in date and undamaged medication
	5.4 Provide advice to clients to correctly transport, store and dispose of their medications

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
6. Provide information and support to community	6.1 Communicate in a culturally appropriate and safe manner with community members to identify community or specific group requirements for medication information 6.2 Investigate generic medication information to be provided to support community or specific group needs 6.3 Identify and make use of culturally appropriate and safe ways to effectively provide information to community and specific groups about medication 6.4 Support individual members of community or specific groups to gain individual advice about specific medication issues 6.5 Evaluate the impact of information on the community or a specific group's awareness and use of medication through follow-up contact with community members

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Numeracy	• in order to interpret and explain dosage requirements to client

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTAHW037 Support the safe use of medications

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This unit was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- provided clear and accurate information to support the safe use of medicines to least five individual clients. This includes:
  - communicating effectively and in a culturally safe and appropriate manner to identify client information needs about medication, and providing information to meet those needs
  - undertaking research and using various medication references and resources, such as MIMS, standing orders, guidelines and CMI in line with the Quality Use of Medicines framework and organisational requirements
  - using published medication references and resources to:
    - check written orders for medicines
    - identify medicines by their generic and/or brand names
    - note potential drug interactions
    - identify special precautions and contraindications

© Commonwealth of Australia, 2025 HumanAbility

    - check terms and abbreviations commonly used in prescribing and administering medications
  - confirming information to be provided to the client with relevant health professionals
  - working within the scope and parameters of the work role as a member of a multidisciplinary team providing primary health care to Aboriginal and/or Torres Strait Islander clients and community
  - maintaining records and documentation in line with organisational requirements
- provided clear and accurate information to support the local Aboriginal and/or Torres Strait community, or a section of the community, in the use of medicines by on at least one occasion by:
  - using culturally appropriate and safe communication to determine needs for medication information by a community or specific group
  - researching and determining the information to be provided
  - delivering information in a culturally appropriate and safe manner to a group of community members.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- application of universal precautions in the administration of medicines
- basic medications commonly used in daily role, and effects on the body
- federal and state legislation relating to the control, labelling, storage and dispensing of drugs and medication
- workplace health and safety issues
- organisational policies and procedures relating to drugs and medications
- schemes and programs to support access to medications, including the PBS and Close The Gap Initative
- relevant services provided by Commonwealth, state and territory to support medication use
- signs of anaphylaxis and appropriate management /referral
- Quality Use of Medicines and the CMI
- National medication access and review initiatives for Aboriginal/Torres Strait Islander people
- special considerations in use of medicines, including:
  - pregnancy and lactation
  - renal failure
  - anti-coagulant therapy

© Commonwealth of Australia, 2025 HumanAbility

  - potential drug interactions
  - differences of medication impact on children and adults
- types of locally available/used traditional bush medicines and their benefits.

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre
- as part of a multidisciplinary primary health care team
- with Aboriginal and/or Torres Strait Islander clients and communities.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment must be undertaken by a workplace assessor who has expertise in this unit of competency and who is:

- an Aboriginal and/or Torres Strait Islander Health Worker

or:

- accompanied by an Aboriginal and/or Torres Strait Islander person who is a recognised member of the community with experience in primary health care.

Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This unit was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages.

Application

This unit describes the skills and knowledge required to identify, assess and implement care related to the growth and development, and to promote wellbeing for, children from birth to 5 years of age.

The unit applies to Aboriginal and Torres Strait Islander Health Workers who are working with families and children within a primary health care context.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Assess current child physical health and wellbeing	1.1 Consult family or carer regarding child, family and social history

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	1.2 Review documentation relevant to child's physical and emotional health
	1.3 Conduct a full assessment of the child according to organisation procedures
	1.4 Identify normal and abnormal findings in conducting child health assessment
	1.5 Recognise and respond to indicators for potentially serious health concerns according to standard treatment in line with protocols
	1.6 Record information according to organisation guidelines
2. Develop a health care plan	2.1 Identify physical and emotional health needs of infants and children
	2.2 Discuss and confirm child health requirements of the health care plan with primary health care team and/or supervisors
	2.3 Work collaboratively with families or carers, the multidisciplinary team, organisations and agencies to develop a health care plan
	2.4 Identify appropriate health care activities to include in plan
	2.5 Develop plans according to standard treatment protocols, work roles and legislative frameworks
	2.6 Discuss health care plans and possible options with parents or carers and where possible, with the child to support understanding and cooperation
3. Deliver health care to children according to health care plan	3.1 Provide care according to the child health plan and client requirements
	3.2 Refer to standard treatment protocols, own work role and scope and legislative frameworks to implement the care plan
	3.3 Implement immediate and appropriate actions in response to relevant child health conditions in line with

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	standard protocols
	3.4 Provide health education to family or carers and encourage questions to support understanding
	3.5 Where possible, encourage the child to ask questions about own health to support the child's own understanding and involvement in health care
4. Monitor and review continuing care for children	4.1 Use regular appointments and checkups to monitor the progress of the health care plan and health of the child
	4.2 Discuss outcomes of health checks with primary health care team to identify required changes to health care plan
	4.3 Ensure continuing health care plans are made to reflect ongoing monitoring of health and continued care

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment *skills) that are essential to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTAHW038 Assess and promote physical and emotional wellbeing of children

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This unit was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- assessed the physical and emotional wellbeing of at least three children aged birth to 5 years by:
  - engaging and communicating with each child's family in a culturally appropriate and safe manner to gather information about the child
  - communicating in a safe and welcoming manner with each child
  - undertaking an assessment of the child's physical health
  - completing an assessment of the child's emotional health
  - interpreting assessment results and responding accordingly to results outside of normal ranges
  - identifying areas to address in each child's health care plan
- developed a health care plan for at least three children aged birth to 5 years by:
  - consulting with relevant staff and colleagues on appropriate health care for the child
  - discussing health needs of the child with the family

© Commonwealth of Australia, 2025 HumanAbility

- provided health care according to the health care plan for at least three children aged birth to 5 years, including;
  - referring the client to appropriate health care providers according to the child's needs
  - encouraging the child and family to ask questions about the health care being delivered
- monitored health care of at least three children aged birth to 5 years and made adjustments to the health care plan according to child's progress and health.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- application of universal precautions
- workplace health and safety issues
- physical and cognitive developmental milestones
- communication with families and children
- assessment of the physical wellbeing of children
- child social and emotional wellbeing assessment
- assessment and management of the following common child health conditions:
  - anaemia
  - respiratory conditions including chest infections, viruses and asthma (acute and ongoing management)
  - oral health and dental problems
  - diarrhoea, acute and persistent
  - ear and hearing problems including examination, assessment and management
  - rashes and skin conditions
  - urinary problems
  - cardiac including rheumatic heart disease and acute rheumatic fever
- health care which includes growth monitoring
- assessment and management of failure to thrive and growth faltering
- language and communication assessment and referral procedures
- childhood immunisation schedule and requirements
- dehydration and rehydration requirements in unwell children
- assessment and management of serious conditions for children birth to five years – the unwell child and the warning signs
- management of the febrile child
- child safety and protection including child neglect, physical and emotional abuse and sexual abuse; non accidental injuries in children

© Commonwealth of Australia, 2025 HumanAbility

- Charter on Rights of Children and Young People in Health Care Settings in Australia
- child health promotion strategies including:
  - immunisations
  - disease prevention and hygiene-
  - mental health promotion
  - early learning promotion
  - exercise and physical wellbeing
- organisation policies and procedures relating to child health and wellbeing assessment, planning and implementing health care.

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre
- as part of, and under the supervision of, a multidisciplinary primary health care team
- with Aboriginal and/or Torres Strait Islander clients and communities.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment including diagnostic tools for child health assessments.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

Assessment must be undertaken by a workplace assessor who has expertise in this unit of competency and who is:

- an Aboriginal and/or Torres Strait Islander Health Worker

or:

- accompanied by an Aboriginal and/or Torres Strait Islander person who is a recognised member of the community with experience in primary health care.

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	strategies
	1.2 Maintain confidentiality of client information
	1.3 Use culturally appropriate and safe methods during interactions
	1.4 Provide information to children and their families/carers regarding growth and development procedures
	1.5 Use appropriate screening tools and equipment as per child health protocols and procedures
	1.6 Conduct screening in accordance with organisational policies and procedures and workplace health and safety requirements, in line with job role
	1.7 Use age-appropriate strategies when performing growth and developmental screening
	1.8 Accurately document growth and development screening data
2. Interpret results of growth and development screening and undertake actions	2.1 Review screening findings against tools and in accordance with organisational protocols
	2.2 Recognise deviations from normal parameters regarding child growth and development
	2.3 Recognise the cumulative effects of multiple risk factors and the developmental implications
	2.4 Provide information to child, parent/caregiver regarding the results and the negotiated care plan required
	2.5 Discuss and develop a plan in consultation with appropriate health care professionals, organisations and/or agencies
	2.6 Implement appropriate actions and care according to organisational protocols, in line with work role and legislative frameworks
3. Promote optimal growth development and wellbeing in	3.1 Provide information to parents and carers regarding influences that shape growth, development and

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This unit was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- monitored the growth and development of at least three children aged birth to 5-years-old by:
  -using effective communication strategies which demonstrate cultural appropriateness and safety to engage with the families and/or carers of each child
  - explaining the purpose and promoting the benefits of screening to clients and parents/carer
  - taking a detailed history, eliciting relevant information from the child, carer or family and documentation
  - using screening tools and equipment in accordance with organisational protocols
  - making referrals for assessment based on parental concerns and any observed variations
  - initiating appropriate actions in response to growth and development screening results, in line with organisational procedures and protocols, for presenting health conditions
  - explaining concepts related to growth and development including:

© Commonwealth of Australia, 2025 HumanAbility

  - nutrition – including breastfeeding
  - physical activity
  - environment
- informing parents/caregivers about age-appropriate milestones of growth and development including;
  - fine and gross motor skills
  - emotional, social and behavioural development
  - language and communication
- documenting outcomes of all assessment, treatment decisions and monitoring according to organisation procedures and policies and in regard to confidentiality of the clients and families.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

This includes knowledge of:

- core principles of child development and broader knowledge of current research around child development
- the impact of contextual factors that influence and challenge a child's physical, emotional and psychological development
- broad understanding of the domains of child development
- developmental milestones within specific age groups
- indicators of abnormal or 'red flags' within the age-specific developmental domains
- differences among children in stage of development, needs, interests and strengths when providing services to children
- application of standard universal precautions
- past and present growth and development trends within Aboriginal and Torres Strait Islander population
- maternal history and issues related to pregnancy and childbirth
- differences in growth patterns for breastfed and formula-fed children, preterm infants and infants with a disability
- assessment and management of failure to thrive and growth faltering
- child health promotion strategies including:
  - immunisations
  - disease prevention and hygiene
  - mental health promotion
  - protective behaviors
  - early learning promotion

HLTAHW040 Promote burns prevention in homes and the community

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This unit was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages.

Application

This unit describes the skills and knowledge required to educate community members on burn and scald hazards and other risk factors within the home and community.

This unit applies to those Aboriginal and/or Torres Strait Islander Health Workers providing a range of primary health care services to Aboriginal and/or Torres Strait Islander clients and communities.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Identify burn and scald risk factors	1.1 Demonstrate respect for Aboriginal and/or Torres Strait Islander community values, beliefs and gender

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	roles when assessing burn and scald hazards
	1.2 Establish high-risk age groups, families or community members
	1.3 Identify the perceptions that high-risk groups have of risk-taking behaviour
	1.4 Undertake risk assessment of client's environment to identify potential burn and scald hazards
	1.5 Complete risk assessment of potential burn and scald hazards within the workplace and community setting
	1.6 Research national burns epidemiology for Aboriginal and Torres Strait Islander people, to raise burns awareness
2. Provide prevention information and education	2.1 Communicate basic steps of burns first aid to client or community member
	2.2 Demonstrate safer practices for identified burn and scald hazards
	2.3 Deliver prevention information and education to clients or community members
	2.4 Provide appropriate burns prevention and education literature and resources to clients and community members
	2.5 Identify burn or scald prevention infrastructure legislation in housing standards and inform clients and community members
	2.6 Identify and make contact with services from which mechanical prevention aids can be obtained and installed (i.e. smoke alarms)
3. Evaluate burns and scalds prevention strategies	3.1 Evaluate prevention strategies according to workplace policy and procedures
	3.2 Monitor incidence and severity of burn or scald injuries in the community
	3.3 Obtain feedback from clients and community

Assessment Requirements for HLTAHW040 Promote burns prevention in homes and the community

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This unit was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- explained and described burns prevention strategies using clear, simple language
- worked with community to seek input and feedback on burns prevention programs
- observed, obtained and interpreted information from at least three clients in relation to burn injuries, client behaviour and health services
- worked with clients, colleagues, community members and other agencies as required
- performed a risk assessment of potential burn hazards in the community.

All performance evidence must be performed at least once.

© Commonwealth of Australia, 2025 HumanAbility

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- effective strategies to monitor and manage identified burn risks in line with community needs and sensitivities
- methods of evaluating burns prevention programs and providing feedback to health service management and the community in line with organisation and community requirements
- epidemiology of Aboriginal and Torres Strait Islander people
- the range of burn injuries:
    - thermal burn
    - chemical burn
    - electrical burn
    - cold injury
- prevention information and safer practices for identified burn and scald hazards
- basic home fire safety including high-risk groups, behaviour that contributes to fire injury and fatalities, and smoke alarm placement, installation and maintenance
- appropriate burns education and prevention literature
- other burns prevention programs locally, in the region, state, territory and/or federally and resources available to health workers
- legislation around burn or scald prevention infrastructure in housing
- sources providing advice around mechanical prevention aids
- ways to contact and access available health and support services in the region
- Advanced Medical Program Video-Conferencing facilities.

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre
- as part of a multidisciplinary primary health care team
- with Aboriginal and/or Torres Strait Islander clients and communities.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

HLTAHW041 Assess and manage emergency treatment of burns

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This unit was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages.

Application

This unit describes the skills and knowledge required to effectively assess the severity of a burn injury and implement appropriate emergency care and management strategies for clients in Aboriginal and Torres Strait Islander communities.

The unit applies to those Aboriginal and/or Torres Strait Islander Health Workers providing a range of primary health care services to Aboriginal and/or Torres Strait Islander clients and communities.

All work is to be carried out with guidance from and under supervision of a medical practitioner or other appropriate health care professional.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 HumanAbility

Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Assess the severity of a burn injury	1.1 Use culturally appropriate and safe communication skills when treating clients 1.2 Assess the size and depth of a burn injury using appropriate estimation methods 1.3 Identify the pre-disposing factors to burn depth progression 1.4 Identify the pre-disposing factors to delayed burn wound healing
2. Implement burn injury emergency management procedures appropriate to the client's burn injury	2.1 Identify need(s) for emergency services and medical assistance and undertake triage as required 2.2 Communicate with personnel, emergency management services and medical assistance personnel as appropriate 2.3 Undertake a systematic survey of the client's clinical status using standard emergency treatment principles 2.4 Use pain management strategies with the client 2.5 Refer clients with a burn injury to a Burn Unit, as appropriate 2.6 Identify and implement emergency management procedures and select correct wound dressing to treat identified type of wound 2.7 Commence intravenous resuscitation under supervision and/or as directed by a medical officer or other qualified personnel 2.8 Monitor and document fluid balance chart 2.9 Monitor and document the client's ongoing clinical status
3. Treat burn injury according to specific burn type	3.1 Undertake a risk assessment of potential hazards in the incident area 3.2 Identify need(s) for emergency services/medical assistance and undertake triage as required 3.3 Communicate with appropriate personnel, emergency management services and medical assistance

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	as appropriate
	3.4 Convey information on client's burn injury to relevant personnel to minimise the risk of complications
	3.5 Use Personal Protective Equipment (PPE) when undertaking first aid
	3.6 Use irrigation to minimise injury to unaffected body parts and to the health worker
	3.7 Identify specific risks and implement management procedures to treat identified burn
	3.8 Deliver appropriate first aid to a client, according to type of burns wound, using available resources and within the context of client and environmental factors
	3.9 Treat wound(s) in the immediate post-first-aid period
4. Assess psychosocial needs and risks, implementing techniques that support the client and family.	4.1 Establish effective communication with a client and family
	4.2 Provide a supportive environment to a client and family in crisis
	4.3 Identify presentation patterns of possible non-accidental burn injury in children and mandatory obligations when working with children
	4.4 Identify presentation patterns of possible non-accidental burn injury in adults and provide appropriate support strategies
	4.5 Undertake risk assessment of a client, identifying risk factors which may indicate a risk to self or the safety of others

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

© Commonwealth of Australia, 2025 HumanAbility

Numeracy	• in order to measure heart rate, temperature and blood pressure in determining clinical status • in order to calculating probability and likelihood as part of risk assessment

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTAHW041 Assess and manage emergency treatment of burns

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This unit was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- performed emergency burn procedures for at least five different clients with burn injuries. This includes:
  - assessing percentage of Total Burn Surface Area (TBSA) using Lund and Browder
  - estimating burn depth
  - communicating with personnel from emergency management services and/or medical services
  - calculating fluid resuscitation requirements according to modified Parklands formula
  - commencing intravenous resuscitation under supervision and/or as directed by a Medical Officer or other qualified personnel
  - monitoring and documenting:
    - fluid balance chart
    - vital signs
  - undertaking a risk assessment of potential hazards in the incident area

© Commonwealth of Australia, 2025 HumanAbility

- delivering information to minimise the risks of complications
- delivering appropriate first aid to the burn type
- administering appropriate wound care in the immediate post-first-aid period, appropriate to the type of burn
- performing 'to the floor' irrigation in relation to chemical burn injuries
- communicating information to minimise the risk of burn wound complications
- using PPE as required
- instigating communication with clients and families
- enabling a supportive environment for clients and families
- providing support strategies for clients with possible non-accidental burn injuries.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- structure and function of the skin
- principles of healing
- principles of burns shock
- effects of burn injury on the immune system
- pathophysiology of inhalation injury
- estimating the percentage of TBSA using the Lund & Browder method
- determination of burn depth
- knowledge of the Jackson Burn Wound Model
- principles of moist wound healing
- predisposing factors to burn depth progression
- predisposing factors to delayed burn wound healing
- morbidity and mortality rates of burn injuries
- referral guidelines for clients with a burn injury to a Burns Unit
- regional emergency services
- expert medical assistance
- emergency burns injury management procedures:
    - incident severity assessment
    - systematic assessment of the person's clinical status
    - pain management strategies
- specific risks and management of:
    - chemical injury

© Commonwealth of Australia, 2025 HumanAbility

  - electrical injury
  - circumferential injury
  - inhalation injury
  - children with burn injuries
- fluid input and urinary output
- monitoring and documenting the person's clinical status
- specific first aid management for thermal, chemical, and electrical burns, and cold injuries
- potential hazards associated with:
  - flame, scald and contact burn incidents
  - liquid and powder chemical burn incidents
  - electrical burn incidents
  - LPG, ice and other cold injury incidents
- contact persons from emergency and medical services
- information that minimises the risk of complications
- predisposing factors to burn depth progression
- correct emergency management of spinal injury (electrical injuries)
- PPE usage
- risks and management of specific chemical burns, including:
  - acid burn
  - alkaline burn
  - powder chemical burn
  - alkali-metal burn
  - bitumen burn
- burn wound care and management, including:
  - principles of wound care
  - what environment minimises risk of infection
  - principles of wound dressing selection
  - traditional or bush medicines and local products that may help or infect a burn injury
- initial psychosocial management, encompassing:
  - effective communication with family and client
  - supportive environment for family and client
  - mandatory obligations when working with children
  - supportive strategies in relation to non-accidental injuries when working with adults.

Assessment Conditions

Skills must be demonstrated working:

© Commonwealth of Australia, 2025 HumanAbility

- in a health service or centre
- as part of a multidisciplinary primary health care team
- with Aboriginal and/or Torres Strait Islander clients and communities.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment must be undertaken by a workplace assessor who has expertise in this unit of competency and who is:

- an Aboriginal and/or Torres Strait Islander Health Worker

or:

- accompanied by an Aboriginal and/or Torres Strait Islander person who is a recognised member of the community with experience in primary health care.

HLTAHW042 Implement a burns rehabilitation care plan

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This unit was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages.

Application

This unit describes the skills and knowledge required to manage and promote the ongoing physical, physiological and psychological rehabilitation of a client recovering from a burn injury.

The unit applies to those Aboriginal and/or Torres Strait Islander Health Workers providing a range of primary health care services to Aboriginal and/or Torres Strait Islander clients and communities.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Assess the psychosocial impact of burn injuries on clients	1.1 Respect Aboriginal or Torres Strait Islander people's community values, beliefs and gender roles when assessing psychosocial impact 1.2 Undertake risk assessment of the client, identifying

Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	factors which may indicate risk to themselves or the safety of others
	1.3 Identify the social and cultural implications of a burns injury
	1.4 Note possible signs of trauma and/or major mental health issues related to the burn injury
	1.5 Identify pre-existing factors in the individual, family and/or community that may impede or facilitate recovery and the healing process
	1.6 Involve family or significant others in the assessment process
2. Implement a care plan in response to psychosocial assessment	2.1 Develop a care plan in consultation with the client and/or significant others, in line with organisation, community and confidentiality requirements
	2.2 Address client's rehabilitation needs and findings of routine psychosocial assessment in the care plan
	2.3 Document care plan in line with organisation and community requirements
	2.4 Communicate care plan to client and/or their carer(s) and negotiate as required to encourage full understanding and agreement
	2.5 Take action to minimise risk of harm to self or others during implementation of care plan
	2.6 Support client to take a self-care approach to health in line with individual needs and organisational requirements
3. Develop scar management strategies	3.1 Identify factors affecting scar formation
	3.2 Apply pressure garments correctly and with care
	3.3 Implement methods to minimise hypertrophy, increase scar pliability and protect burned skin
	3.4 Implement methods to prevent or minimise contracture
	3.5 Employ simple techniques to reduce itching
	3.6 Instruct the client about basic massage techniques, as

© Commonwealth of Australia, 2025 HumanAbility

Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	appropriate
	3.7 Refer clients to allied health professionals, as appropriate
	3.8 Discuss reconstructive options with allied health professionals and clients, if relevant
4. Incorporate nutrition and exercise in care plan	4.1 Explain to the client the importance of nutrition in burn recovery
	4.2 Develop an exercise program in consultation with health professionals that encourages movement and ambulation
	4.3 Instruct the client in basic exercises under the supervision of a health professional
	4.4 Facilitate exercise through splinting/positioning
	4.5 Use adaptive equipment where relevant
	4.6 Discuss the consequences of not following an exercise program with the client and/or carer(s)
5. Refer clients in line with care plan	5.1 Identify and inform clients of community and health services that provide support to burns patients and/or their families
	5.2 Make referrals in line with service policy and procedures
	5.3 Follow-up with clients and families once referred

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment *skills) that are essential to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTAHW042 Implement a burns rehabilitation care plan

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This unit was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- formulated care plans for at least three clients by:
  - collaborating with other members of a multi-disciplinary team to determine:
    - findings of psychosocial assessment
    - risk of harm to self and others
  - communicating care plans to each client and checking their understanding
  - using a motivational interviewing approach
  - correctly determining the appropriate rehabilitation therapies required in the specific circumstance of burns rehabilitation
  - carrying out rehabilitation procedures and education safely and effectively on at least three occasions, including:
    - positioning and splinting
    - oedema management
    - movement and ambulation
    - functional activity
    - adaptive aids

© Commonwealth of Australia, 2025 HumanAbility

    - nutrition
- supporting each client to take a self-care approach to health with provision of appropriate information and other measures
- referring clients as necessary in accordance with service policy and procedures
- following up with patients and their families once referred
- educating and informing clients about psychosocial issues and possible services to assist recovery.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- reconstructive options in relation to burns rehabilitation
- principles of scar management, working in collaboration with allied health professionals
- aims and consequences of rehabilitation exercise regimes – under the supervision of a health professional
- psychosocial factors affecting burn injury clients:
    - risk to self and others
    - social and cultural implications
    - common individual reactions to a burns injury
    - possible signs of trauma and mental health issues
    - pre-existing factors in family and wider community that may impede or facilitate recovery and the healing process
    - family involvement
    - communication skills
- community and health services which may support burns patients and/or their families with psychosocial needs
- referral process in accordance with service policy and procedures.

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre
- as part of a multi-disciplinary primary health care team
- with Aboriginal and/or Torres Strait Islander clients and communities.

© Commonwealth of Australia, 2025 HumanAbility

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment, including medical equipment, splints and pressure garments used in aiding wound recovery.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment must be undertaken by a workplace assessor who has expertise in this unit of competency and who is:

- an Aboriginal and/or Torres Strait Islander Health Worker

or:

- accompanied by an Aboriginal and/or Torres Strait Islander person who is a recognised member of the community with experience in primary health care.

HLTAHW043 Facilitate access to tertiary health services

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Application

This unit describes the required skills and knowledge to develop and maintain links with tertiary referral centres for Aboriginal and/or Torres Strait Islander health. It includes developing and maintaining networks with health services, assisting clients requiring transport and accommodation, providing information, and participating in discharge planning.

This unit applies to those Aboriginal and/or Torres Strait Islander Health Workers working independently and as part of a multidisciplinary team to deliver primary health care services to Aboriginal and/or Torres Strait Islander clients and community.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*

© Commonwealth of Australia, 2025 HumanAbility

Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Develop and maintain cooperative working relationships with tertiary health services	1.1 Gather information about relevant tertiary health services, organisations and key contacts 1.2 Establish networks to meet client needs and organisation objectives as required 1.3 Maintain working relationships between and within organisations to provide benefits for clients and the organisation 1.4 Provide and share information and resources about own and other organisations as requested
2. Support clients to access tertiary health services	2.1 Provide clients with information about available tertiary health services and support, as appropriate 2.2 Assist clients and their families with transport and accommodation to access tertiary health services as required 2.3 Liaise with government and non-government agencies, departments and organisations as required 2.4 Provide advocacy to support relationships between clients and other organisations and agencies as required
3. Participate in discharge planning	3.1 Identify and communicate with key individuals involved in discharge planning at the tertiary health service 3.2 Discuss discharge planning with clients and their families 3.3 Liaise with the tertiary health service in relation to timing of discharge, transport needs, medication and client follow-up requirements

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and

© Commonwealth of Australia, 2025 HumanAbility

employment skills) that are essential to performance.

Numeracy	• in order to gather and interpret relevant health services information, including costs to clients

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Assessment Requirements for HLTAHW043 Facilitate access to tertiary health services

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- worked effectively across the range of health support services, in line with community needs and workplace requirements, to support at least three different clients in accessing tertiary health services by:
  - establishing and maintaining working relationships and networks with relevant tertiary health services for the benefit of clients and own organisation
  - providing accurate and relevant information and guidance to support each client's understanding of and access to tertiary health services by:
    - gathering relevant information about tertiary health services for each client's identified needs
    - providing oral and written information about the available services and processes
    - assisting clients with written documents
    - arranging and/or supporting travel and accommodation of clients accessing tertiary health services

© Commonwealth of Australia, 2025 HumanAbility

- interpreting and communicating costs to clients, if relevant
- supporting discharge arrangements, including liaising between the tertiary health service and the client on each client's behalf.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- relevant tertiary health services available to Aboriginal and/or Torres Strait Islander clients needing access to specialised care, including Aboriginal Community Controlled Health Organisations
- arrangements needed to assist client to access available support services, including transport, accommodation and other needs incidental to accessing tertiary health services
- communication strategies, including cross-cultural communication
- major tertiary referral centres in the relevant metropolitan or regional centre, including:
  - locations
  - functions
  - services
  - specialities
- key individuals in tertiary referral centres and their:
  - contact details
  - roles/ position
- organisation standards, policies and procedures, including discharge procedures.

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre
- individually or as a member of a multidisciplinary primary health care team
- with Aboriginal and/or Torres Strait Islander clients and communities.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessment Requirements for HLTAHW044 Advocate on behalf of the community

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- advocated for at least one Aboriginal and/or Torres Strait Islander community, or identified group within that community, by:
  - identifying and clarifying at least one area of concern relating to Aboriginal and/or Torres Strait Islander community health in consultation with the community
  - supporting the community to develop at least one strategy to address the identified issue
  - discussing identified issues within own health service, and facilitating change to address identified issues
  - communicating with relevant agencies and organisations, as identified, to address issues
  - promoting identified community interests in appropriate forums
  - lobbying relevant government and non-government agencies, departments and organisations to facilitate change

© Commonwealth of Australia, 2025 HumanAbility

- negotiating with stakeholders relevant to the identified issues.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- relevant policies, protocols and procedures of the organisation
- key aspects of:
  - Royal Commission into Aboriginal Deaths in Custody
  - National Aboriginal Health Strategy
  - relevant current federal, state/territory and local government policies and legislation
  - Charter of Human Rights and Rights of the Child
  - child protection legislation
  - domestic violence legislation
  - anti-discrimination legislation
  - Disability Support Services and Veterans' Affairs guidelines.

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre
- individually or as a member of a multidisciplinary primary health care team
- with Aboriginal and/or Torres Strait Islander clients and communities.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Plan a health program as part of primary health care services	1.1 Identify community health needs in partnership with the community
	1.2 Review, with primary health team, existing health program activities for effectiveness in addressing identified community health needs
	1.3 Establish priorities for development of health programs
	1.4 Identify relevant community members, primary health staff and other health professionals to support the development of health programs
	1.5 Identify necessary resources and availability
2. Develop a health program as part of primary health care services	2.1 Design program in partnership with key representatives of the community and relevant agencies/organisations
	2.2 Identify appropriate delivery strategies according to the needs of the target group, location and health issue
	2.3 Promote client self-care approach to health as part of health program
	2.4 Ensure health program has a holistic, culturally sensitive approach
	2.5 Develop effective measures to ensure record maintenance, confidentiality and compliance with legislation
	2.6 Design evaluation criteria and processes to measure the program’s effectiveness in addressing identified community health objectives
3. Evaluate health program as part of a primary health care service	3.1 Review program records to evaluate program against criteria that reflect identified community health objectives
	3.2 Identify program strengths and areas for improvement as a basis for continual enhancement of

Assessment Requirements for HLTAHW045 Plan, develop and evaluate primary health care programs for Aboriginal/Torres Strait Islander comm.

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- planned and developed at least two programs as part of primary health care services across a range of contexts, including:
  - assessing and addressing community health needs
  - consulting key community representatives and related agencies/organisations
  - analysing funding requirements for programs to prepare proposal/submission
  - identifying appropriate delivery and evaluation strategies
  - accessing, adopting or developing required resources
- evaluated at least one health program as part of primary health care services by:
  - assessing program against criteria that reflects identified community health objectives
  - identifying program strengths and areas for improvement

© Commonwealth of Australia, 2025 HumanAbility

- seeking feedback on program effectiveness and providing feedback to community and organisations.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- relevant policies, protocols and procedures of the organisation
- health programs relevant to the area/region/community
- management of common existing and potential health problems for the community
- effective strategies to monitor and manage identified health problems in line with community needs and sensitivities
- occupational health and safety practices and procedures relevant to the work (e.g. manual handling)
- available health and support services in the region.

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre
- individually or as a member of a multidisciplinary primary health care team
- with Aboriginal and/or Torres Strait Islander clients and communities.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment must be undertaken by a workplace assessor who has expertise in this unit of competency and who is:

an Aboriginal and/or Torres Strait Islander Health Worker

or:

HLTAHW046 Apply advanced skills in primary health care

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Application

This unit deals with the required skills and knowledge to independently develop, implement and evaluate a care plan for individual clients.

It involves independent decision-making and problem-solving in relation to a wide range of health problems which may impact on Aboriginal and/or Torres Strait Islander clients, as well as the initiation of tests, examinations and treatments.

This unit applies to those Aboriginal and/or Torres Strait Islander Health Workers working independently and as part of a multidisciplinary team to deliver primary health care services to Aboriginal and/or Torres Strait Islander clients and communities.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 HumanAbility

Elements define the essential outcomes.	*Performance Criteria specify the level of performance needed to demonstrate achievement of the Element.*
1. Assess client's health	1.1 Build and maintain relationship of trust with each client, with active promotion of and strict adherence to confidentiality 1.2 Undertake detailed assessment in line with protocols for specific health condition/s 1.3 Review client records to determine priorities and potential areas of risk for each client 1.4 Evaluate impact of previous care strategies 1.5 Initiate relevant examinations and tests as required to identify and/or clarify any suspected or identified health issues and/or abnormalities 1.6 Communicate with the client in a culturally appropriate and safe manner in relation to any health issues and/or abnormalities and to inform ongoing health management
2. Interpret common pathology tests	2.1 Explain significance of common haematological, biochemical and microbiological test abnormalities to clients in plain language 2.2 Assess numerical test values against normal reference ranges 2.3 Refer abnormal pathology test results to medical practitioners as appropriate
3. Develop care plan	3.1 Formulate care plan to address identified health issues 3.2 Develop care plan with reference to the relevant health care team and other health care providers 3.3 Develop care plan in collaboration with the client 3.4 Propose treatment in accordance with organisation policies and procedures and as negotiated with the client, their family and/or the community 3.5 Include measures consistent with standing orders/written protocols, based on health assessment findings 3.6 Refer client as required to relevant health

Assessment Requirements for HLTAHW046 Apply advanced skills in primary health care

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has, on at least three different occasions:

- undertaken a detailed health assessment of Aboriginal and/or Torres Strait Islander clients, including adults and children
- reviewed all relevant information for clients, including past treatment plans, to support the health assessment
- carried out, and interpreted the outcomes of, relevant tests and examinations to identify and clarify specific health issues
- developed care plans for clients, including treatment, in consultation with relevant health care team and health care professionals
- communicated all aspects of the health care plan to clients and/or family in a culturally appropriate and safe manner, encouraging understanding and questions
- implemented the health care plan by:
  - initiating treatment, including administering specific treatment procedures
  - referring clients to appropriate health services

© Commonwealth of Australia, 2025 HumanAbility

    - using medical equipment necessary to determined treatment actions
    - monitoring the client's progress and adjusting treatment as required to support health
    - supporting the client to engage in their health care plan by providing information to the client about their specific health issues
    - using client appointments to review the progress of the client under the treatment plan
- documented all stages of the assessment, planning and implementation of health care
- communicated at all times with the client in culturally appropriate and safe ways to support their health treatment, during the assessment, and planning and implementation of treatment
- exercised decision-making and problem-solving skills in their treatment of clients
- consulted and referred to other health professionals as required to support client care.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- key aspects of anatomy/physiology, pharmacology, and microbiology, associated with a range of health conditions including chronic conditions health
- common treatments and associated care services and treatments relevant to client's overall health
- availability, effectiveness and risks associated with identified treatments and associated care services
- other conditions that may occur and require concurrent management
- commonly requested pathology tests, their indications, normal ranges and implications for client care management, including:
    - full blood examination and ESR
    - random and fasting blood sugars
    - glycated haemoglobin
    - electrolytes and creatinine
    - liver function tests
    - lipid tests
    - thyroid function tests
    - iron studies
    - cardiac enzymes
    - urinary albumin-creatinine ratio
    - tests for sexually transmissible infections
    - microscopy, culture and sensitivities
- administration of specific procedures, including:
    - nasogastric tube (NGT) insertion and the management of fluids and medications
    - intraosseous (bone marrow) insertion and cannulation

© Commonwealth of Australia, 2025 HumanAbility

  - complex wound and burns management
  - assessment and examination of lungs and respiratory system
  - insertion of an indwelling catheter (IDC)
  - application of POP
  - intravenous therapy administration and management, and fluid balance assessment and management
  - intravenous cannula insertion in adult and paediatrics
- organisational standards, policies and procedures.

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre
- individually or as a member of a multidisciplinary primary health care team
- with Aboriginal and/or Torres Strait Islander clients and communities.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment must be undertaken by a workplace assessor who has expertise in this unit of competency and who is:

- an Aboriginal and/or Torres Strait Islander Health Worker

or:

- accompanied by an Aboriginal and/or Torres Strait Islander person who is a recognised member of the community with experience in primary health care

HLTAHW047 Support and promote social and emotional wellbeing of staff and clients

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Application

This unit describes the required skills and knowledge to provide social and emotional support to clients and staff, and to promote the importance of maintaining social and emotional wellbeing in the workplace.

It covers social and emotional support required by those involved in face-to-face delivery of primary health care services.

The unit applies to those Aboriginal and/or Torres Strait Islander Health Workers working independently and as part of a multidisciplinary team to deliver primary health care services to Aboriginal and/or Torres Strait Islander clients and communities.

This unit equips Aboriginal and/or Torres Strait Islander Health Workers to provide support related to social and emotional wellbeing and does not infer that they are qualified counsellors.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

© Commonwealth of Australia, 2025 HumanAbility

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Assess social and emotional needs	1.1 Seek relevant information to determine client's current mental/emotional state and history 1.2 Observe behaviour and body language and note unusual behaviour 1.3 Communicate effectively with the client using culturally appropriate and safe language and interactions, to identify underlying social and emotional needs and issues 1.4 Make a risk assessment in relation to potential for suicide, self-harm and/or violence 1.5 Develop a social and emotional health care plan that addresses client's needs, in consultation with the client and relevant health care team 1.6 Maintain confidentiality in line with organisation requirements 1.7 Identify issues requiring mandatory notification and report to an appropriate authority
2. Support a client's social and emotional wellbeing	2.1 Implement and review client's social and emotional health care plan in line with their needs and organisation procedures 2.2 Provide relevant information to support the client to make informed decisions about addressing social and emotional wellbeing issues 2.3 Support individual clients to implement, maintain and review self-care strategies 2.4 Monitor and review application of stress reduction techniques and activities by clients, as required to maintain and/or enhance effectiveness 2.5 Provide referral as required, to maintain and/or enhance social and emotional wellbeing in line with individual, community and organisation requirements

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
3. Provide social/emotional support in the workplace	3.1 Encourage and support staff to address the personal impact of dealing with client social and emotional wellbeing issues 3.2 Make debriefing sessions readily available and conduct with staff in groups and/or one-on-one 3.3 Support staff to access professional assistance as appropriate, including referrals 3.4 Provide education and awareness programs as required to support staff and enhance their self-awareness and support personal development 3.5 Support staff to acknowledge the impact of the shared history of transgenerational trauma 3.6 Manage serious or potentially serious issues referred by other staff with sensitivity and professionalism

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment *skills) that are essential to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Assessment Requirements for HLTAHW047 Support and promote social and emotional wellbeing of staff and clients

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- provided support and promoted social and emotional wellbeing for at least three clients by:
  - communicating in a culturally appropriate and safe manner at all times with each client to gain confidence, trust and client history
  - assessing social and emotional wellbeing issues, including making a risk assessment of each client
  - providing immediate and ongoing support and monitoring as required to address issues
  - referring clients appropriately as part of treatment
  - working with each client to identify and implement self-care strategies for social and emotional wellbeing
  - providing information to each client about social and emotional wellbeing
  - maintaining client confidentiality

© Commonwealth of Australia, 2025 HumanAbility

- supported at least two staff members who provide social and emotional wellbeing to clients by:
  - communicating in a culturally appropriate and safe manner to conduct debriefing and supervision of staff
  - assisting staff with decision-making and problems with client's treatment and progress
  - encouraging staff to access services for their own social and emotional wellbeing
  - interacting appropriately with staff within professional boundaries and according to organisation procedures and policies

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- effective techniques for providing social and emotional support, including self-help and stress management strategies
- effective communication skills to:
  - build rapport
  - question and probe to identify underlying social/emotional health issues
  - clarify issues
  - provide feedback
  - listen empathetically
  - provide support
- special needs of Aboriginal and/or Torres Strait Islander Health Workers and their clients, such as:
  - issues relating to dispossession, stolen generations and cultural loss
  - social issues relating to overcrowded housing, community pressures on Aboriginal and/or Torres Strait Islander Health Workers
- available and effective referral services for counselling and associated social/emotional support
- organisation policy and procedures to provide social/emotional support to staff (in-house and through referral)
- key aspects of human psychology and mental health care
- culture and spirituality issues
- legislative and confidentiality requirements.

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre
- individually or as a member of a multidisciplinary primary health care team

HLTAHW048 Apply a strategic approach to Aboriginal and/or Torres Strait Islander health

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Application

This unit describes the required skills and knowledge to develop and implement strategies to address social determinants that underpin and contribute to Aboriginal and/or Torres Strait Islander health issues in the context of delivering primary health care services.

The unit applies to those Aboriginal and/or Torres Strait Islander Health Workers working independently and as part of a multidisciplinary team to deliver primary health care services to Aboriginal and/or Torres Strait Islander clients and communities.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 HumanAbility

Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Support strategic initiatives in health service delivery	1.1 Identify current strategies to improve health of Aboriginal and/or Torres Strait Islander clients 1.2 Articulate potential negative aspects of current strategies on behalf of Aboriginal and/or Torres Strait Islander clients and communities 1.3 Contribute knowledge of Aboriginal and/or Torres Strait Islander communities and related health issues to inform strategic development on primary health care services 1.4 Suggest potential improvements to health system, infrastructure, services and resources to address perceived needs 1.5 Discuss strategic approaches to resolution of issues related to social determinants of health, and community control, with clients, community representatives, service providers and related organisation representatives
2. Promote awareness of health strategies	2.1 Raise strategic issues at organisational, regional, state and/or national level in line with health work role 2.2 Support strategic initiatives in line with organisation policies and practices, community requirements and Aboriginal and/or Torres Strait Islander health work role 2.3 Explain strategic initiatives relating to Aboriginal and/or Torres Strait Islander health to health care team 2.4 Inform clients and communities about strategic initiatives and encourage individuals to take advantage of associated benefits 2.5 Promote benefits of achieving positive strategic outcomes for Aboriginal and/or Torres Strait Islander communities
3. Contribute to strategic issues in health care delivery	3.1 Investigate and clarify specific impacts of strategic initiatives on the health of Aboriginal and/or Torres Strait Islander clients 3.2 Identify appropriate evaluation processes and criteria to assess effectiveness of strategic initiatives 3.3 Evaluate outcomes of health care strategies against criteria that reflect identified community health objectives

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	3.4 Seek to identify strategic strengths as well as areas for improvement as a basis for continual enhancement of health outcomes
	3.5 Seek feedback on effectiveness of strategic initiatives from and provided to community and organisation(s) involved in health service delivery
	3.6 Communicate outcomes of the evaluation to relevant stakeholders to guide future activities in the delivery of health services to the community

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment *skills) that are essential to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTAHW048 Apply a strategic approach to Aboriginal and/or Torres Strait Islander health

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- supported, promoted and implemented at least one strategy to improve the health of Aboriginal and/or Torres Strait Islander people by:
  - assessing how social determinants impact health and how their impact may be reduced
  - building and maintaining relationships with community groups, agencies and organisations involved in developing and implementing strategic initiatives impacting on the health of Aboriginal and/or Torres Strait Islander clients and communities
  - communicating effectively with stakeholders and clients, including:
    - investigating and explaining strategic initiatives (including negative aspects) to individuals and groups
    - facilitating discussions
  - contributing to the evaluation of strategic initiatives undertaken

© Commonwealth of Australia, 2025 HumanAbility

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- social, cultural and environmental determinants of Aboriginal and/or Torres Strait Islander health, including:
  - traditional cultural practices and lifestyle and their impact on Aboriginal and/or Torres Strait Islander health
  - importance of land, tradition and cultural practice
  - impact of socio-economic factors on health
  - social and political factors that perpetuate disadvantage
  - importance of personal achievement, education and supportive family /social networks
  - impact of environmental factors on health
  - barriers to improving environmental determinants of ill-health
- ways to address access and equity issues, such as:
  - strategies families may employ to maintain strong culture and supportive social networks as well as maximising educational, employment and social opportunities for their children
  - political context of the health care system and availability and access to Medicare benefits
- aspects of Aboriginal and/or Torres Strait Islander health, including:
  - Aboriginal and/or Torres Strait Islander community perceptions of major health issues affecting them, and underlying causes
  - perceptions of non-Aboriginal and/or Torres Strait Islander people relating to major Aboriginal and/or Torres Strait Islander health issues and underlying causes
- key health statistics (national, state and/or local), such as:
  - life expectancy at birth
  - infant mortality rate
  - age-standardised mortality ratios for selected health conditions
  - incidence of selected health conditions such as diabetes, rheumatic fever and dental caries
- lifestyle and behavioural determinants and strategies to address them, including:
  - food supply in communities, to support nutrition and holistic health
  - nutrition, physical activity, rest and sleep in relation to holistic health
  - known behaviours that pose significant health risk
  - lifestyle practices and effects on health
  - education and promotion of healthy lifestyle practices
  - principles of wellbeing applied to work and study practices
- primary health care model.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Work within the context of social and emotional wellbeing	1.1 Acknowledge differences between roles of social and emotional wellbeing workers and Aboriginal Primary Health Care workers as appropriate 1.2 Identify difficulties that the worker may encounter in carrying out their role in the community and take into consideration in the work 1.3 Take into account the changing role of females and males within Aboriginal and Torres Strait Islander communities, in service delivery 1.4 Work within the role and limitations of the worker's job definition and community expectations of their role
2. Work within the legal and ethical boundaries of the social and emotional wellbeing worker	2.1 Complete documentation in accordance with legal and ethical requirements 2.2 Maintain confidentiality in accordance with organisational policies and protocols 2.3 Include traditional healers in the health team as appropriate 2.4 Liaise with other organisations as appropriate 2.5 Consider the rights of the individual in all work undertaken within the social and emotional wellbeing area 2.6 Carry out duties within the Mental Health Act (or equivalent) as required for social and emotional wellbeing work
3. Maintain accountability and responsibilities	3.1 Access and work in accordance with organisation policies and procedures in regard to workers 3.2 Undertake all work within the organisation's reporting and accountability frameworks 3.3 Follow organisation occupational health and safety guidelines

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	3.4 Access information to clarify the employer's responsibilities to the worker
	3.5 Observe organisation requirements for participation in processes as appropriate (e.g. in regard to performance appraisal systems)
4. Observe professional boundaries when working	4.1 Define, understand and communicate professional boundaries to clients in a culturally appropriate manner
	4.2 Maintain confidentiality when working with clients and other agencies
	4.3 Observe organisational boundaries when working with clients and other agencies
	4.4 Clarify organisation expectations with particular regard to the professional and personal boundaries in social and emotional wellbeing work in relation to counselling other staff, or advising management on staff counselling
5. Demonstrate commitment to the philosophy of social and emotional wellbeing	5.1 Demonstrate in all work undertaken, understanding and consideration of the underpinning values and philosophy of social and emotional wellbeing in the context of Aboriginal and/or Torres Strait Islander health work
	5.2 Maintain in all work undertaken, a demonstrated commitment to the empowerment of Aboriginal and/or Torres Strait Islander people and access and equity principles
	5.3 Give clients, family and community opportunities to participate in service planning and support activities
	5.4 Plan and implement social and emotional wellbeing work taking into account personal values, history, experiences and family/kinship

Assessment Requirements for HLTAHW049 Work effectively in social and emotional wellbeing

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- undertaken social and emotional wellbeing work with clients within the legal and ethical boundaries of the social and emotional wellbeing worker, and with a commitment to the philosophy of social and emotional wellbeing
- maintained the professional boundaries of the work role and addressed accountability and responsibilities appropriately
- addressed the needs of clients from culturally and linguistically diverse backgrounds
- balanced expectations of the organisation, the community and clients in undertaking social and emotional wellbeing work
- used high-level effective communication skills
- completed relevant documentation.

© Commonwealth of Australia, 2025 HumanAbility

All performance evidence must be demonstrated at least once.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- traditional healing
- cultural law and its consequences
- rights as employees – industrial awards, duty of care, occupational health and safety, workers' compensation
- support systems available for employees – e.g. counselling, unions, professional associations
- the role, rights and responsibilities relating to social and emotional wellbeing work:
  - legal responsibilities to clients, organisation and self
  - reporting responsibilities
  - accountability to organisation and community
  - confidentiality requirements for social and emotional wellbeing work
  - ethical responsibilities
  - professional boundaries
- justice system and its processes
- Mental Health Act and relevant regulations
- conflict resolution and mediation
- stress-management techniques
- changing roles of Aboriginal men and women in communities
- broad knowledge of:
  - government structures
  - political structures
  - adult guardianship
  - rights of clients.

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre
- individually or as a member of a multidisciplinary primary health care team
- with Aboriginal and/or Torres Strait Islander clients and communities.

© Commonwealth of Australia, 2025 HumanAbility

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment must be undertaken by a workplace assessor who has expertise in this unit of competency and who is:

- an Aboriginal and/or Torres Strait Islander Health Worker

or:

- accompanied by an Aboriginal and/or Torres Strait Islander person who is a recognised member of the community with experience in primary health car

HLTAHW050 Develop a healing framework for social and emotional wellbeing work

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Application

This unit describes the required skills and knowledge for Aboriginal and/or Torres Strait Islander health workers to facilitate a healing journey and to better understand and empathise with clients.

Aboriginal and/or Torres Strait Islander Health Workers who undertake a healing journey themselves have an increased awareness of their own issues and limitations. This self knowledge enables them to work more effectively with others in the healing process.

This unit equips Aboriginal and/or Torres Strait Islander Health Workers to provide support related to social and emotional wellbeing and does not infer that they are qualified counsellors.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

© Commonwealth of Australia, 2025 HumanAbility

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Observe local cultural traditions and practice	1.1 Acknowledge traditional ownership of the land and seek permission to allow the healing process to take place on the land 1.2 Recognise the presence of traditional land owners in the healing process, including their role in the spiritual aspects of the healing process 1.3 Clarify local kinship structures, roles and obligations through discussion with Elders 1.4 Acknowledge the importance of the support processes of extended families in preparation for healing and in undergoing a healing process
2. Conduct and support a facilitated group healing process	2.1 Discuss cultural grieving processes 2.2 Develop and agree to rules for participation in a healing group as part of a group, ensuring safety, confidentiality and cultural security during and after the process 2.3 Use verbal and non-verbal communication skills to support the healing process 2.4 Support self-expression and healing through art, dancing, storytelling, singing and/or painting 2.5 Disclose self-selected past emotional influences with the group involved in the healing process and relate to the present situation and potential future 2.6 Use appropriate techniques to examine transgenerational trauma with the group
3. Reflect on healing process	3.1 Document outcomes according to organisation procedures 3.2 Discuss with appropriate staff, colleagues, peers or mentors own reaction to the process 3.3 Engage in ongoing reflective practice

Assessment Requirements for HLTAHW050 Develop a healing framework for social and emotional wellbeing work

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- participated in facilitated healing processes and developed healing frameworks for at least three client and/or groups of Aboriginal and/or Torres Strait Islander people by:
  - using appropriate verbal and non-verbal communication to understand and support at least three groups within the context of a healing process
  - applying self-reflection practices and disclosure to facilitate healing processes
  - acknowledging and clarifying the contribution of traditional roles, structures and processes to the healing process
  - using appropriate techniques to support the healing process through self-expression
  - completing a healing journal to document the healing process.

© Commonwealth of Australia, 2025 HumanAbility

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- storytelling therapies
- male and female perspectives
- transgenerational trauma
- story maps
- alternative therapies – art, music
- professional boundaries
- referral processes
- joint counselling techniques
- local language, culture and practices
- self-healing journey processes
-

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre
- individually or as a member of a multidisciplinary primary health care team
- with Aboriginal and/or Torres Strait Islander clients and communities.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment must be undertaken by a workplace assessor who has expertise in this unit of competency and who is:

- an Aboriginal and/or Torres Strait Islander Health Worker

© Commonwealth of Australia, 2025 HumanAbility

or:

- accompanied by an Aboriginal and/or Torres Strait Islander person who is a recognised member of the community with experience in primary health care

HLTAHW051 Respond to loss, grief and trauma

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements. Pre-requisite unit removed.

Application

This unit describes the required skills and knowledge to provide a healing response to expressions of grief, loss and trauma.

This unit applies to those Aboriginal and/or Torres Strait Islander Health Workers working independently and as part of a multidisciplinary team to deliver primary health care services to Aboriginal and/or Torres Strait Islander clients and communities.

This unit equips Aboriginal and/or Torres Strait Islander Health Workers to provide support related to social and emotional wellbeing and does not infer that they are qualified counsellors.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

© Commonwealth of Australia, 2025 HumanAbility

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the Element.*
1. Identify effects of loss, grief and trauma	1.1 Clarify impact of specific loss, grief and/or trauma at the individual, family and community level 1.2 Take into account historical impact of loss, grief and trauma on Aboriginal and/or Torres Strait Islander people 1.3 Recognise culturally appropriate expressions of loss and grief 1.4 Identify and respect specific approaches and responses of individuals, families and communities to loss, grief and/or trauma 1.5 Recognise effects of stress on individuals and communities in relation to experiences of loss, grief and trauma, including trans-generational trauma and grief 1.6 Identify culturally appropriate strategies for responding to stress at the community, family and individual levels 1.7 Communicate strategies and options to individual clients and refer, where relevant and appropriate
2. Provide a healing response to loss, grief and trauma	2.1 Determine healing response to loss, grief and/or trauma appropriate to the needs of each situation and the individuals involved 2.2 Provide appropriate support and available resources to assist individuals and families to deal with their loss, grief and/or trauma 2.3 Provide timely referral as appropriate to support ongoing healing in line with the needs of the situation and individuals involved 2.4 Maintain duty of care, confidentiality and cultural protocols
3. Manage own stress in work role	3.4 Monitor own stress level in relation to working in the area of loss, grief and trauma, including trans-generational trauma and grief

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the Element.*
	3.5 Use appropriate stress management strategies to manage own stress
	3.6 Consult relevant team members or other professionals for own social and emotional support

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment *skills) that are essential to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTAHW051 Respond to loss, grief and trauma

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements. Pre-requisite unit removed.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- responded to loss, grief and trauma for at least three clients by:
  - developing culturally appropriate responses to situations of loss, grief and trauma
  - communicating effectively with clients. This includes:
    - building rapport
    - clarifying impact of loss
    - explaining support options
    - referring clients to specialist services
  - dealing with cross-cultural issues
  - recognising effects of stress on individuals and communities and implementing culturally appropriate strategies to manage stress

© Commonwealth of Australia, 2025 HumanAbility

- monitoring own stress and using appropriate stress-management strategies, including consulting team members and professionals for own social and emotional support.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- concepts of loss and grief
- nature and effects of psychological and spiritual trauma
- effects of trans-generational trauma and grief, colonisation and institutional racism on Aboriginal people
- cultural protocols and taboos
- specialist services for loss, grief and trauma
- statutory responsibilities including duty of care requirements
- narrative therapy approaches
- indicators of stress
- awareness of own values and attitudes around loss, grief and trauma
- organisational standards, policies and practices.

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre
- individually or as a member of a multidisciplinary primary health care team
- with Aboriginal and/or Torres Strait Islander clients and communities.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

© Commonwealth of Australia, 2025 HumanAbility

Assessment must be undertaken by a workplace assessor who has expertise in this unit of competency and who is:

an Aboriginal and/or Torres Strait Islander Health Worker

or:

accompanied by an Aboriginal and/or Torres Strait Islander person who is a recognised member of the community with experience in primary health care.

HLTAHW052 Deliver primary health care to Aboriginal and/or Torres Strait Islander clients in confinement

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Application

This unit describes the required skills and knowledge for an Aboriginal or Torres Strait Islander worker to perform effectively in delivery of primary health care services to clients in the confinement of a prison or corrective services environment.

This unit applies to those Aboriginal and/or Torres Strait Islander Health Workers working independently and as part of a multidisciplinary team to deliver primary health care services to Aboriginal and/or Torres Strait Islander clients and communities.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT PERFORMANCE CRITERIA

© Commonwealth of Australia, 2025 HumanAbility

Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Prepare to work with clients in confinement	1.1 Clarify prison policies and procedures to identify potential for providing primary health care services to inmates 1.2 Clarify overlapping and complementary roles of workers in the prison environment 1.3 Identify boundaries and constraints relating to own work role in the prison environment 1.4 Seek to identify level of awareness of own role among staff and inmates in the prison environment 1.5 Clarify potential for own role to enhance client care in the prison environment 1.6 Professionally assert scope of practice appropriate to own role and skills with prison staff
2. Advocate for clients effectively from within prison	2.1 Clarify inmate needs for health care and support as appropriate to own role 2.2 Recognise potential impacts and challenges of providing client advocacy from inside the prison 2.3 Employ strategies to effectively manage conflict or resentment arising from client advocacy activities 2.4 Clarify rights and responsibilities of inmates and assert as required 2.5 Support inmates in relation to parole and release issues as required 2.6 Contribute to post-release support as appropriate
3. Support inmates to make informed health choices	3.1 Use accurate information about the inmate's health and potential care as a basis for informing clients about available options 3.2 Explain potential consequences of available options to clients 3.3 Support clients through the continuum of care in line with own work role

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
4. Contribute to enhancing awareness of cultural safety issues	4.1 Raise cultural safety issues in the prison environment with staff in relation to health issues for Aboriginal and/or Torres Strait Islander clients 4.2 Build own tolerance and mutual respect of colleagues by seeking to understand reasons for any insensitivity or culturally unsafe practices 4.3 Reinforce colleagues' application of cultural safety practices in the workplace through public and/or personal recognition 4.4 Provide leadership in the implementation of culturally safe principles and practice
5. Promote change to enhance cultural safety in the prison environment	5.1 Participate in the development and/or refinement of prison policies on cultural safety 5.2 Identify change agents who may facilitate and/or champion needed change 5.3 Identify potential blockages to change 5.4 Mobilise available support to enhance cultural safety in the prison environment 5.5 Enlist community support to enhance cultural safety in the prison environment

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Learning	• in order to acknowledge that confusion and mistakes form part of the learning process • in order to develop and trial own approach to different tasks when manuals and guides are unavailable

© Commonwealth of Australia, 2025 HumanAbility

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTAHW052 Deliver primary health care to Aboriginal and/or Torres Strait Islander clients in confinement

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- worked effectively with at least three clients in a prison or corrective services environment by:
  - using appropriate strategies for protection of self and others in a culturally unsafe work environment
  - using self-protective behavioural strategies to maintain resilience in the prison environment
  - providing information and advice to assist at least three inmates to maintain a level of physical, mental and spiritual health in the prison environment
  - supporting at least three inmates with parole and release issues
  - communicating effectively with clients and stakeholders. This includes:
    - clarifying inmate needs

© Commonwealth of Australia, 2025 HumanAbility

- advocating for cultural safety of clients in the prison environment
- discussing and reinforcing cultural safety practices with colleagues
- dealing with conflict.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- cultural safety principles, practices and issues
- scope of own professional role and roles of associated health professionals
- components of culturally safe health care
- overview of Australian justice and prison systems
- techniques to empower clients to make choices relating to health care in the prison system
- assertive communication techniques

Assessment Conditions

Skills must be demonstrated working:

- as part of a health service or centre, providing services to prisons and/or a corrective services facility
- individually or as a member of a multidisciplinary primary health care team
- with Aboriginal and/or Torres Strait Islander clients and communities.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment must be undertaken by a workplace assessor who has expertise in this unit of competency and who is:

- an Aboriginal and/or Torres Strait Islander Health Worker

© Commonwealth of Australia, 2025 HumanAbility

or:

- accompanied by an Aboriginal and/or Torres Strait Islander person who is a recognised member of the community with experience in primary health care.

HLTAHW053 Address impact of food security on community health

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Application

This unit describes the skills and knowledge required to conduct health care programs to address impacts of food production, manufacturing and distribution on health in Aboriginal and/or Torres Strait Islander communities

This unit applies to those Aboriginal and/or Torres Strait Islander Health Workers working independently and as part of a multidisciplinary team to deliver primary health care services to Aboriginal and/or Torres Strait Islander clients and communities.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 HumanAbility

Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Examine food security issues in Aboriginal and/or Torres Strait Islander community	1.1 Research food security issues in the local context 1.2 Describe the characteristics of food security and coping strategies employed in the local context 1.3 Examine the underlying determinants of food availability, food access and food utilisation in the local context 1.4 Investigate the factors that influence stability of food availability, food access and food utilisation in the local context 1.5 Demonstrate an understanding of the link between food security, wellbeing and livelihoods
2. Analyse food availability, food access and food use issues for the community	2.1 Establish enablers and barriers to food security in the local context 2.2 Identify individuals, groups and communities that are vulnerable to food insecurity 2.3 Analyse the local food supply and evaluate it against relevant evidence-based guidelines 2.4 Identify and prioritise the different factors and domains that affect food security in the local context 2.5 Determine how the organisation can contribute to improving food security 2.6 Review and evaluate community policies and programs relevant to food security
3. Formulate strategies to protect food security and address food insecurity in vulnerable groups	3.1 Identify key stakeholders across disciplines to contribute to improving food security in the local context 3.2 Engage the community and key stakeholders in the development, implementation and evaluation of strategies to improve food security 3.3 Determine key roles and responsibilities of all stakeholders to improve food security 3.4 Consider collaborative, multilevel approaches to addressing food security 3.5 Identify how organisation can contribute to

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	improving food security
	3.6 Develop a plan to address food security in the local context for the organisation
	3.7 Monitor and evaluate food security activities in the workplace and local context
	3.8 Advocate for improved food security in local context, especially for vulnerable groups

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment *skills) that are essential to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTAHW053 Address impact of food security on community health

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- investigated and analysed the relationship between community health issues and food security in the local context for at least one Aboriginal and/or Torres Strait Islander community by:
  - accessing relevant resources to determine nutritional needs of specific client groups
  - identifying groups at risk of food insecurity
  - monitoring and analysing the food systems and assessing available food sources (including traditional and non-traditional food sources) against the Australian Dietary Guidelines
  - developing appropriate strategies to promote and improve food security at household and community level
  - evaluating interventions based on evidence and good practice

© Commonwealth of Australia, 2025 HumanAbility

- researching and accessing data to assess and understand food security issues in the local context
- working with the community utilising a community engagement approach to promote and improve food security at community and household level
- consulting with a range of stakeholders from different disciplines
- advocating for increased resources and attention to food in the local community, in particular vulnerable households or groups
- investigating and analysing the relationship between community health issues and available food supply
- working with a community to propose and develop strategies and action plans to improve community health by addressing food supply practices, policies and associated issues
- communicating effectively with individuals and groups, including:
  - clarifying and discussing issues relating to food supply, systems and security
  - presenting and discussing evidence-based actions and strategies to improve food security and nutrition.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- the concept of ‘food security’ and ‘food insecurity’ and its relevance to Aboriginal and Torres Strait Islander people and the context in which people are living
- underlying determinants and consequences of food insecurity
- core food groups and their nutrients
- food needed at different stages in the lifecycle for wellbeing
- different factors (i.e. social, cultural, economic and environmental) that impact on food availability, food access and food use at the global, national, community and household level
- food insecurity-related community health issues
- preventative health and community engagement principles
- continuous quality improvement
- evidence-based practice and sustainable approaches to improving food security in the local context
- Australian Dietary Guidelines and World Health Organisation recommendations impacting on the needs of everyday basic necessities for life and living for Aboriginal and Torres Strait Islander people.

© Commonwealth of Australia, 2025 HumanAbility

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre
- individually or as a member of a multidisciplinary primary health care team

HLTAHW054 Support renal dialysis clients in the community setting

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements. Pre-requisite units removed.

Application

This unit describes the skills and knowledge required to help support clients considering renal replacement therapy and to provide routine care for clients undertaking dialysis in the community setting.

This unit applies to those Aboriginal and/or Torres Strait Islander Health Workers working independently and as part of a multidisciplinary team to deliver primary health care services to Aboriginal and/or Torres Strait Islander clients and communities.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Assist clients to make informed choices on renal replacement therapy	1.1 Provide information on renal failure and renal replacement therapy options to clients with chronic renal failure and their families, in consultation with the health care team 1.2 Identify and provide to clients appropriate health education resources on renal disease dialysis and transplantation 1.3 Provide information and practical assistance to renal clients who need to travel to distant referral centres for assessment, treatment or training 1.4 Support current and potential future dialysis 'helpers' with information and practical assistance in their role 1.5 Ensure client access to specialist nephrology care
2. Measure hydration status of renal dialysis clients	2.1 Obtain history of shortness of breath or postural dizziness 2.2 Measure 'wet' or 'dry' weight and compare with ideal body weight 2.3 Elicit physical signs of fluid overload 2.4 Interpret client weight, blood pressure and other clinical signs to determine hydration status 2.5 Revise ideal body weight estimates in consultation with senior staff 2.6 Document assessments in accordance with organisational policies and procedures
3. Undertake routine pathology testing for dialysis clients	3.1 Provide information on routine dialysis tests to clients in plain language 3.2 Collect blood specimens and complete pathology request forms according to standard protocols 3.3 Interpret routine test results and give basic client feedback 3.4 Refer abnormal test results to medical staff for

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA action
4. Support renal clients to access and use medicines wisely	4.1 Provide clients with plain language information on mechanisms of action, dosing and common side-effects of medicines commonly used in dialysis care 4.2 Identify potential drug interactions, special precautions, contraindications and side-effects and refer to a medical practitioner 4.3 Administer medicine by oral and intramuscular routes in accordance with medicine orders, organisation policies and procedures and legal frameworks 4.4 Support and monitor client adherence to medicines regimen 4.5 Provide assistance with supply of medicines and use of dose administration aids according to client needs 4.6 Keep records of chronic medicines supply and administration in accordance with organisation policies and procedures

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Numeracy	• in order to interpret test results, including normal and abnormal readings and measurements

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTAHW054 Support renal dialysis clients in the community setting

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements. Pre-requisite units removed.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- provided information, guidance and support to at least three clients and their families in relation to health management options and issues for clients with chronic renal failure by:
  - recognising situations requiring immediate or urgent action
  - working with other members of multidisciplinary team to ensure actions determined in the client's care plan are carried out and documented
  - carrying out mathematical calculations for renal dialysis clients. This includes:
    - identifying differences between weight measures
    - calculating doses
    - measuring medication
  - communicating effectively with clients, care team and referral agencies. This includes:
    - interpreting test results

© Commonwealth of Australia, 2025 HumanAbility

    - explaining test results to clients
    - documenting information on client care plans
- making timely and appropriate referrals, and providing accurate and relevant details to clients and referral agencies
- holistically evaluating impact of renal dialysis treatment on client's physical, mental and emotional condition and behaviour
- monitoring outcomes of renal dialysis treatment and medication regimes
- administering medicines by oral and intramuscular routes
- contributing to evaluation of client's prescribed treatment/care plan.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- basic anatomy and physiology of the renal system
- common causes of chronic renal failure
- underlying environmental and social factors contributing to high rates of renal disease in Aboriginal and/or Torres Strait Islander communities
- management principles for common co-morbidities (including diabetes, high blood pressure, hyperlipidaemia)
- factors that can slow decline of renal function
- key aspects of microbiology relevant to peritoneal, blood and skin infection in renal disease
- pathophysiology of chronic renal failure, including:
    - fluid retention and pulmonary oedema
    - electrolyte balance and hazards of high potassium
    - calcium metabolism and renal bone disease
    - anaemia
- signs and symptoms of uraemia and fluid retention
- meaning and interpretation of common pathology tests for chronic renal failure and dialysis
- haemodialysis technology – theory, machine components, terminology, infrastructure requirements, risks and benefits
- peritoneal dialysis – theory, terminology, procedures, risks and benefits
- different types of renal dialysis units and their function
- nutritional considerations for renal dialysis clients
- medicines in common use in management of chronic renal failure including basic mechanisms of action, precautions and side-effects
- organisation policies and procedures.

© Commonwealth of Australia, 2025 HumanAbility

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre
- individually or as a member of a multidisciplinary primary health care team
- with Aboriginal and/or Torres Strait Islander clients and communities.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment must be undertaken by a workplace assessor who has expertise in this unit of competency and who is:

- an Aboriginal and/or Torres Strait Islander Health Worker

or:

- accompanied by an Aboriginal and/or Torres Strait Islander person who is a recognised member of the community with experience in primary health care.

HLTAHW055 Provide care to clients undertaking renal dialysis in the community setting

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements. Prerequisite units removed.

Application

This unit describes the skills and knowledge required to provide health care to clients that is specific to continuous ambulatory peritoneal dialysis or home haemodialysis being undertaken in the community setting.

This unit applies to those Aboriginal and/or Torres Strait Islander Health Workers working independently and as part of a multidisciplinary team to deliver primary health care services to Aboriginal and/or Torres Strait Islander clients and communities.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 HumanAbility

Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Assess peritoneal catheter exit site and client dressing technique	1.1 Identify signs of exit site infection 1.2 Elicit signs of catheter tunnel infection 1.3 Obtain exit site swab and send for microbiological analysis 1.4 Appraise client technique for dressing exit site 1.5 Instruct client on appropriate exit site care 1.6 Document condition of exit site and refer problems in accordance with organisation policies and procedures
2. Assess patency of arteriovenous (A-V) fistula	2.1 Obtain history of pain, swelling or trauma around A-V fistula 2.2 Elicit history of haemodialysis needling problems or abnormal ‘A’ and ‘V’ pressure readings 2.3 Palpate fistula for thrill and auscultate for bruit 2.4 Identify signs suggesting fistula stenosis or infection 2.5 Promptly report potential fistula problems to medical staff for assessment 2.6 Document findings of assessment in client notes
3. Identify common or serious dialysis problems	3.1 Identify clinical features suggestive of dialysis-related peritonitis and promptly refer clients 3.2 Consider causes and take note of peritoneal fluid failing to drain 3.3 Recognise clinical features of uraemia 3.4 Anticipate hazards associated with haemodialysis after a number of missed dialysis sessions and communicate risks to client 3.5 Refer identified dialysis problems to senior health staff according to organisation procedures and clinical guidelines
4. Broker supply of dialysis	4.1 Obtain information on client’s requirements for

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
consumables and support use	dialysis consumables 4.2 Order stock from supplier in accordance with client needs and organisational procedures 4.3 Support and monitor appropriate storage arrangements for dialysis consumables 4.4 Identify, document, report and resolve problems with supply or storage of dialysis consumables 4.5 Facilitate client use of their dialysis treatment protocol

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment *skills) that are essential to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTAHW055 Provide care to clients undertaking renal dialysis in the community setting

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements. Prerequisite units removed.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- provided care to at least three clients undertaking renal analysis in a community setting by:
  - assessing peritoneal catheter exit site. This includes:
    - identifying signs of exit site infection
    - identifying signs of catheter tunnel infection
    - swabbing exit site and sending specimen for testing
  - instructing client on appropriate dressing technique
  - documenting findings of assessment
  - assessing patency of arteriovenous fistula. This includes:
    - identifying signs suggesting fistula stenosis or infection
    - palpating fistula for thrill and auscultating for bruit

© Commonwealth of Australia, 2025 HumanAbility

    - obtaining history of pain and haemodialysis needling problems
- identifying common and serious dialysis problems
- referring client to senior health staff
- ordering and recording stock of dialysis consumables and storing correctly.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- basic anatomy and physiology of the renal system
- common causes of chronic renal failure (diabetes, glomerulonephritis, hypertension, urinary tract obstruction, inherited abnormalities)
- underlying environmental and social factors contributing to high rates of renal disease in Aboriginal and/or Torres Strait Islander communities
- management principles for common co-morbidities (including diabetes, high blood pressure, hyperlipidaemia)
- factors that can slow decline of renal function (e.g. control of high blood pressure, use of angiotensin-converting-enzyme (ACE) inhibitors, avoidance of non steroidal anti-inflammatory drugs (NSAIDS)
- microbiology relevant to peritoneal, blood and skin infection in renal disease
- pathophysiology of chronic renal failure, including:
    - fluid retention and pulmonary oedema
    - electrolyte balance and hazards of high potassium
    - calcium metabolism and renal bone disease
    - anaemia
- signs and symptoms of uraemia and fluid retention
- meaning and interpretation of common pathology tests for chronic renal failure and dialysis
- haemodialysis technology
- peritoneal dialysis – theory, terminology, procedures, risks and benefits
- different types of renal dialysis units and their function
- medicines in common use in management of chronic renal failure including basic mechanisms of action, precautions and side-effects
- organisation policies and procedures.

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre
- individually or as a member of a multidisciplinary primary health care team

© Commonwealth of Australia, 2025 HumanAbility

- with Aboriginal and/or Torres Strait Islander clients and communities.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment must be undertaken by a workplace assessor who has expertise in this unit of competency and who is:

an Aboriginal and/or Torres Strait Islander Health Worker

or:

accompanied by an Aboriginal and/or Torres Strait Islander person who is a recognised member of the community with experience in primary health care.

HLTAHW056 Provide sexual and reproductive health care

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements. Prerequisite units removed.

Application

This unit describes the required skills and knowledge to provide clients with health care services in addition to general health care and specific to sexual and reproductive health.

This unit applies to those Aboriginal and/or Torres Strait Islander Health Workers working independently and as part of a multidisciplinary team to deliver primary health care services to Aboriginal and/or Torres Strait Islander clients and community.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 HumanAbility

Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Check sexual and reproductive health	1.1 Undertake tests, observations and other screening procedures in line with protocols and client requirements 1.2 Review client records to determine priorities and potential areas of risk for each client 1.3 Question client appropriately to identify and/or clarify any sexual and/or reproductive health issues and/or significant variations from normal parameters 1.4 Use medical equipment effectively and maintain in accordance with organisation policies 1.5 Consult relevant allied professionals and available documentation in relation to the sexual and/or reproductive health of the client 1.6 Obtain informed consent for all examinations and tests and undertake appropriate pre-test discussion before testing for HIV or other blood-borne viruses
2. Provide care to clients with sexual health problems	2.1 Respect Aboriginal and/or Torres Strait Islander community values, beliefs and gender taboos in assessing and managing sexual health problems 2.2 Engage clients in holistic sexually transmissible infection (STI) risk assessment and take an appropriate sexual health history for each client presenting or identified with a sexual health problem 2.3 Assess common sexual health problems according to clinical presentation and treat/refer/support in line with standard protocols and organisation guidelines 2.4 Obtain history of sexual contacts where an STI is identified, negotiate contact tracing and follow-up contacts for testing and treatment in line with standard protocols 2.5 Develop holistic health care plan for each client with sexual health problems 2.6 Support and counsel clients with STIs to assist in treatment and prevention of infection 2.7 Ensure records of STI management and contact tracing are kept confidential and secure 2.8 Maintain current, complete, accurate and relevant

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	records for each client interaction
3. Provide information on sexual and reproductive health care	3.1 Promote safe sex practices or other STI risk-reduction strategies and distribute condoms as appropriate
	3.2 Discuss common methods of birth control with clients, explaining each method, its advantages and disadvantages
	3.3 Discuss transmission of STIs and complications with the client as appropriate
	3.4 Discuss symptoms of pregnancy with clients and identify as appropriate
	3.5 Provide information on healthy lifestyle and risks during pregnancy
	3.6 Provide clients with information which is age and culturally appropriate and aligned with their specific needs
	3.7 Employ a range of interpersonal techniques to ensure own values are not imposed on clients and information is provided in a non-judgmental way
	3.8 Provide referral where own personal and professional abilities do not match client needs
4. Evaluate effectiveness of sexual and reproductive health care	4.1 Monitor sexual and reproductive health in line with schedule and criteria incorporated in care plan for each client
	4.2 Evaluate intervention/ongoing sexual and/or reproductive health care against standing order/written care protocols and client level of comfort and compliance with health care practices
	4.3 Ascertain degree of improvement of client's holistic health and compare with expectations under the health care plan
	4.4 Undertake clinical re-assessment and/or review of treatment/medication regime as required where client

Assessment Requirements for HLTAHW056 Provide sexual and reproductive health care

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements. Prerequisite units removed.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- provided information, guidance and support to at least three clients with sexual and/or reproductive health issues by:
  - monitoring the outcomes of sexual and reproductive health care services
  - conducting an accurate sexual and/or reproductive health assessment, including requesting pathology tests
  - recognising situations requiring immediate or urgent action
  - providing treatment, medicine and advice/information appropriate to sexual and/or reproductive health in a safe and effective manner and within guidelines
  - maintaining client records and care plans
  - communicating effectively with client. This includes:
    - obtaining information about sexual and reproductive health

© Commonwealth of Australia, 2025 HumanAbility

    - counselling clients
    - ensuring clients understand treatment options
- holistically evaluating impact of treatment on client's physical, mental and emotional condition and behaviour
- making timely and appropriate referrals, providing accurate and relevant details to clients and referral agencies
- reflecting on own and others' values in relation to sexual behaviour and health.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- key aspects of anatomy/physiology, pharmacology, pathology and basic microbiology relevant to sexual and/or reproductive development stages and health
- knowledge of key aspects of microbiology relevant to sexual and/or reproductive health and prevention of infection or cross infection
- health conditions and associated issues related to sexual and/or reproductive health
- nature, history, pathology and transmission of sexually transmissible infections and relevant interventions
- understanding of oppression and discrimination in relation to sexuality
- assessment methods, equipment and testing procedures associated with sexual and reproductive health and STIs
- methods of birth control and their advantages and disadvantages
- organisation policies and procedures

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre
- individually or as a member of a multidisciplinary primary health care team
- with Aboriginal and/or Torres Strait Islander clients and communities.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

HLTAHW057 Provide antenatal health care

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements. Prerequisite units removed.

Application

This unit describes the skills and knowledge required to provide Aboriginal and/or Torres Strait Islander women with specialist antenatal health care services.

The unit applies to those Aboriginal and/or Torres Strait Islander Health Workers working independently and as part of a multidisciplinary team to deliver primary health care services to Aboriginal and/or Torres Strait Islander clients and communities.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 HumanAbility

Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Plan and deliver health care during pregnancy	1.1 Take and document general, social and obstetric health history 1.2 Identify signs and symptoms of pregnancy and calculate expected date of delivery 1.3 Develop an antenatal care plan based on standard protocols and consultations with relevant health professionals 1.4 Provide information to women on healthy living and maternal health risks 1.5 Perform antenatal clinical assessments in line with standard protocols and client requirements in accordance with job role and legislative frameworks 1.6 Provide information on safe birthing options, signs of labour, stages of labour, pain management techniques and family attendance at delivery 1.7 Identify common conditions and potentially serious complications of pregnancy, provide advice, care and appropriate referrals 1.8 Support women to attend appointments as per their antenatal care plan 1.9 Practice within a multidisciplinary team to provide culturally appropriate support, services and care
2. Monitor and evaluate antenatal health care	2.1 Monitor continuing antenatal care according to organisation procedures 2.2 Regularly update information on obstetric history and antenatal care assessment at the planned birthing facility according to organisation procedures 2.3 Review progress and outcomes in consultation with pregnant woman 2.4 Maintain registers of women undergoing antenatal care according to organisation policies and procedures 2.5 Keep schedules of participation in antenatal care and use to organise continuing care according to woman’s needs 2.6 Organise and/or provide reminders, transport and other assistance to attend care according to women’s

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- provided antenatal care for at least five clients by:
  - undertaking comprehensive health checks specific to antenatal care for each client
  - documenting a general, social and obstetric health history
  - recognising and acting upon situations requiring immediate or urgent action
  - providing treatment, medicine and other health care services appropriate to antenatal health in a safe and effective manner and within guidelines
  - providing information, guidance and support to clients and their families with antenatal health issues
  - monitoring the outcomes of antenatal health care services and made any required revisions to services, care plans or information provided

© Commonwealth of Australia, 2025 HumanAbility

    - liaising between service providers, individuals, families and community groups to support antenatal health
    - holistically evaluating impact and outcome of treatment on client's physical, mental and emotional condition and behaviour
    - making timely and appropriate referrals, providing accurate and relevant details to clients and referral agencies
- provided supervision for at least one other staff member providing antenatal health care

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- organisation policies and procedures relating to client confidentiality
- role of the Aboriginal Health Worker in counselling and health education
- anatomy/physiology, pharmacology, pathology and basic microbiology relevant to pregnancy
- microbiology relevant to antenatal health and prevention of infection or cross infection
- nutritional needs of pregnant women
- health conditions, obstetric problems and associated issues related to pregnancy
- strategies to:
    - improve antenatal health in the community
    - address clients presenting with antenatal problems
    - coordinate provision of optimum level of maternal health service delivery
- relevant assessment methods and use of associated equipment and testing procedures
- relevant treatments, medicines and associated care services available
- risks and contraindications associated with relevant treatments and medication.

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre
- individually or as a member of a multidisciplinary primary health care team
- with Aboriginal and/or Torres Strait Islander clients and communities.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. HLTAHW058 Prepare for and support childbirth

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements. Prerequisite units removed.

Application

This unit describes advanced skills and knowledge required to support Aboriginal and/or Torres Strait Islander women during childbirth and support of childbirth in a culturally safe environment.

This unit applies to those Aboriginal and/or Torres Strait Islander Health Workers working independently and as part of a multidisciplinary team to deliver primary health care services to Aboriginal and/or Torres Strait Islander clients and communities.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 HumanAbility

Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Plan and support culturally safe birthing for women and their families	1.1 Identify local birthing practices and cultural beliefs and discuss with women in planning and advocating for culturally appropriate and safe birthing options 1.2 Discuss roles, relationships and responsibilities to support culturally safe birthing, including the role of the Aboriginal and/or Torres Strait Islander Health Worker as an advocate for women and families 1.3 Discuss and identify signs of onset of labour and support women to attend the planned place of birth as required 1.4 Provide physical and emotional support to women as appropriate during childbirth and the immediate post-partum period 1.5 Support women and their families to take a self-care approach in line with individual needs to organisation and community requirements 1.6 Maintain referral and communication networks with medical staff, specialist obstetricians, midwives, allied health staff, birthing facilities and female community Elders regarding culturally safe birthing options and services
2. Prepare and deliver safe birthing	2.1 Maintain emergency delivery bundles and instructions in isolated community settings 2.2 Identify signs and symptoms of imminent unexpected childbirth 2.3 Seek urgent professional assistance and advice with birthing as necessary 2.4 Prepare to manage untimely birth in a community or home setting using the best available resources 2.5 Identify helpers and allocate tasks as appropriate based on experience and knowledge 2.6 Prepare appropriate equipment and medication 2.7 Institute basic management of second and third stages of labour, if needed 2.8 Undertake initial management of post-partum haemorrhage according to emergency care guidelines and

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	organisational protocols, as well as other common birthing emergencies
	2.9 Arrange safe evacuation in consultation with medical or midwifery staff if required and as per organisation procedures
3. Monitor and evaluate care	3.1 Monitor care of individual women after birth according to organisation procedures
	3.2 Regularly update client files with birthing and postnatal details according to organisation procedures and policies
	3.3 Review progress and outcomes in consultation with pregnant woman
	3.4 Maintain registers of women undergoing postnatal care according to organisation policies and procedures
	3.5 Keep schedules of participation in antenatal care and use to organise continuing care according to woman's needs
	3.6 Organise transport and other assistance as required to women post-birth
	3.7 Supervise other staff participating in provision of birthing practices
	3.8 Maintain referral and communication networks with medical staff, specialist obstetricians, midwives, allied health staff, birthing facility staff and female community Elders
	3.9 Keep statistics for birthing outcomes and use to evaluate maternal health programs

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

© Commonwealth of Australia, 2025 HumanAbility

Numeracy	• in order to measure and interpret vital signs during labour, including temperature, pulse and respiration (TPR), blood pressure, rate of contractions and foetal heart beat detected using foetal stethoscope and Doppler
Learning	• in order to draw selectively on past experience and learning and adapt to new context

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

Assessment Requirements for HLTAHW058 Prepare for and support childbirth

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements. Prerequisite units removed.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- prepared for and supported at least five women during the pregnancy and birthing process, including:
  - communicating effectively with each client and family if available to obtain information and ensure understanding of information provided
  - providing treatment, medicine and other health care services appropriate to interpartum health in a safe and effective manner and within guidelines
  - liaising between service providers, individuals, families and community groups
  - holistically evaluating the impact of treatment on client's physical, mental and emotional condition and behaviour
  - performing all required assessments to determine health of the client and baby

© Commonwealth of Australia, 2025 HumanAbility

- interpreting assessment outcomes to determine course of action for health care, including issues requiring immediate action
- utilising referral services as necessary
- recognising situations requiring immediate or urgent action and taking appropriate action as required within current job role, legislative requirements and organisation procedures
- supporting the client to attend appointments for monitoring of own and baby's health.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- birthing practices suitable for culturally safe and positive birth outcomes
- organisation policies and procedures relating to client confidentiality
- anatomy/physiology, pharmacology, pathology and basic microbiology relevant to pregnancy, maternal and/or infant health
- knowledge of microbiology relevant to maternal and/or infant health and prevention of infection or cross infection
- health conditions, obstetric problems and associated issues related to pregnancy, maternal and infant health
- medical problems occurring in pregnancy requiring referral and follow-up
- relevant assessment methods and use of associated equipment and testing procedures
- relevant treatments, medicines and associated care services available
- risks and contraindications associated with relevant treatments and medication
- realistic expectation of client condition during monitoring of progress
- obstetric problems, including:
  - antepartum haemorrhage
  - vaginal discharges
  - fluid loss from the vagina
  - ruptured membranes (including onset of labour, prolapsed cord, infection)
  - abdominal pain in pregnancy (including braxton hicks contractions and labour contractions)
  - pre-term labour
  - breech presentation
  - post-partum or intrapartum haemorrhage
  - shoulder dystocia
  - retained placenta
  - obstructed labour
  - eclampsia
- vital signs during childbirth or delivery, including:

© Commonwealth of Australia, 2025 HumanAbility

  - TPR
  - blood pressure
  - auscultation of foetal heart rate
  - blood glucose level
  - foetal palpation
  - fundal height measurements
  - urinalysis
  - weight
  - monitoring progress of labour
  - bloods
  - rate of contractions
- baseline observations including, but not limited to:
  - temperature, pulse, respiration
  - blood pressure
  - blood loss per vaginum
  - condition of fundus
  - rate of contractions
  - progress of labour
  - documentation of findings from a physical assessment and follow-up as per policy and procedures manual
  - pain assessment
  - blood sugar levels
  - pulse oximetry
  - recognition of significant abnormalities in cardiotocograph (CTG) reading
- immediate care required for newborns, including:
  - use of humidicribs
  - intravenous infusions
  - blood sugar levels
  - skin-to-skin contact and breastfeeding in the first hour after birth
  - weight, length and head circumference measurements
  - temperature
  - respiratory rate
  - APGAR scoring and assessment
  - resuscitation
  - oxygen administration.

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre

© Commonwealth of Australia, 2025 HumanAbility

- individually or as a member of a multidisciplinary primary health care team
- with Aboriginal and/or Torres Strait Islander clients and communities.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures (such as unplanned or emergency births) where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment must be undertaken by a workplace assessor who has expertise in this unit of competency and who is:

- an Aboriginal and/or Torres Strait Islander Health Worker

or:

- accompanied by an Aboriginal and/or Torres Strait Islander person who is a recognised member of the community with experience in primary health care.

HLTAHW059 Provide postnatal and infant health care

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements. Prerequisite units removed.

Application

This unit describes the required skills and knowledge to provide Aboriginal and/or Torres Strait Islander women, infants and their families with specialist health care services in postnatal and infant health.

This unit applies to those Aboriginal and/or Torres Strait Islander Health Workers working independently and as part of a multidisciplinary team to deliver primary health care services to Aboriginal and/or Torres Strait Islander clients and communities.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Provide health information, support and care after birth for women, infants and families	1.1 Perform maternal and infant physical assessment and record observations of mother and infant in line with standard protocols and organisational guidelines 1.2 Provide information and support for self-care and wellbeing in the postnatal period 1.3 Provide advice on routine care of the newborn to mothers and refer as appropriate and within organisational guidelines and/or procedures 1.4 Implement strategies to establish and support breastfeeding 1.5 Discuss with the client the importance of nutrition, exercise, rest, sleep and support with domestic tasks and care of family in the immediate postnatal period 1.6 Identify minor postnatal problems for mother and newborn and provide appropriate advice 1.7 Identify potentially serious health conditions for mother and newborn and refer to senior health staff 1.8 Provide information on contraceptive options 1.9 Deliver, implement and monitor care in the postnatal period as per standard treatment protocols and in accordance with legislative guidelines 1.10 Undertake immediate care in response to at-risk situations 1.11 Observe and support maternal-infant attachment
2. Organise and evaluate maternal health programs	2.1 Maintain registers of women undergoing postnatal care according to organisational policies and procedures 2.2 Keep schedules of participation in postnatal care and use to organise continuing care for women 2.3 Organise and/or provide reminders, transport and other assistance to attend care according to women's needs 2.4 Provide support to other staff participating in provision of postnatal care 2.5 Maintain referral and communication networks

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	with medical staff, specialist obstetricians, midwives, allied health staff, birthing facility staff and female community Elders
	2.6 Keep statistics on attendance for antenatal care and birthing outcomes and use to evaluate maternal health programs

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Numeracy	• in order to perform physical assessment of mother and infant, including measuring height, length and weight

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTAHW059 Provide postnatal and infant health care

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements. Prerequisite units removed.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- delivered postnatal health care for at least five clients, including:
  - conducting comprehensive health checks related to postnatal and infant health
  - providing treatment, medicine and other health care services appropriate to postnatal and infant health in a safe and effective manner and within guidelines
  - providing information, guidance and support to clients and their families with postnatal and/or infant health issues
  - monitoring the outcomes of postnatal and infant health care services and making any required revisions to services, care plans or information provided
  - recognising situations requiring immediate or urgent action, and implementing appropriate procedures
  - implementing strategies to support breastfeeding

© Commonwealth of Australia, 2025 HumanAbility

  - discussing the importance of nutrition, exercise, rest and sleep
  - identifying minor postnatal problems for mother and newborn
  - communicating effectively with client to:
    - obtain information from client
    - provide advice and information on self-care, wellbeing, routine care of newborns and contraceptive options
    - discuss postnatal and infant health care issues
  - recording all observations of mother and/or newborn according to organisation procedures
  - maintaining registers of mothers undergoing postnatal care, keeping schedules of participation and statistics on attendance
  - supporting mothers and babies to attend follow-up appointments for health services
- supervised at least one staff member participating in postnatal care.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- key aspects of anatomy/physiology, pharmacology, pathology and basic microbiology relevant to postnatal and infant health
- knowledge of microbiology relevant to postnatal and infant health and prevention of infection or cross infection
- postnatal nutritional needs of women and infants, including support of breastfeeding and other nutritional needs of the infant
- health conditions, obstetric problems and associated issues related to postnatal and infant health
- strategies to:
  - improve maternal and neonatal health in the community
  - address clients presenting with postnatal problems
  - coordinate provision of optimum level of maternal health service delivery
- postnatal medical problems requiring referral
- effective postnatal care practices for mother and baby
- relevant assessment methods and use of associated equipment and testing procedures
- relevant treatments, medicines and associated care services available
- risks and contraindications associated with relevant treatments and medication
- relevant evaluation criteria for monitoring effectiveness of specific postnatal and infant health management program
- organisation policies and procedures, generally, and in particular relating to client confidentiality
- role of the Aboriginal Health Worker in counselling and health education

© Commonwealth of Australia, 2025 HumanAbility

- vaccination schedules
- minor and major complications of pregnancy and required treatments
- realistic expectation of client condition during monitoring of progress.

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre
- individually or as a member of a multidisciplinary primary health care team
- with Aboriginal and/or Torres Strait Islander clients and communities.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment must be undertaken by a workplace assessor who has expertise in this unit of competency and who is:

- an Aboriginal and/or Torres Strait Islander Health Worker

or:

- accompanied by an Aboriginal and/or Torres Strait Islander person who is a recognised member of the community with experience in primary health care

HLTAHW060 Plan for medical emergencies

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Application

This unit describes the required skills and knowledge to prepare and promote a plan of action for providing a clinical response to emergencies of a medical nature in Aboriginal and/or Torres Strait Islander communities.

This unit applies to those Aboriginal and/or Torres Strait Islander Health Workers working independently and as part of a multidisciplinary team to deliver primary health care services to Aboriginal and/or Torres Strait Islander clients and communities.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Liaise with relevant agencies and key people	1.1 Identify organisation policies and protocols for dealing with medical emergencies 1.2 Consult relevant agencies and key people to determine required roles in a medical emergency 1.3 Identify and document resource availability
2. Develop an emergency plan	2.1 Develop strategies for responding to medical emergencies in consultation with key people from the community and local agencies 2.2 Determine preferred options in consultation with key people and the community, as time and resources permit 2.3 Develop the plan proactively, whenever possible 2.4 Ensure the plan meets legislative requirements for providing clinical care
3. Document, distribute and promote the emergency action plan	3.1 Document the medical emergency action plan 3.2 Distribute the medical emergency action plan to all health service providers 3.3 Ensure health service providers are included in procedures relevant to their allocated roles and responsibilities
4. Evaluate and modify the emergency action plan	4.1 Consult key people about the effectiveness of the medical emergency action plan 4.2 Adapt the plan as required to address community, organisation and legislative requirements 4.3 Distribute the amended plan to all local health service providers

Assessment Requirements for HLTAHW060 Plan for medical emergencies

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- undertaken relevant research and consultation to develop an emergency plan to respond to emergencies of a medical nature, which involved:
  - communicating effectively with a range of relevant stakeholders to:
    - investigate options for responding to medical emergencies
    - determine preferred options
    - consult about the effectiveness of the plan
  - developing strategies to address such emergencies in line with stakeholder and related legislative requirements
- documented, distributed, promoted and evaluated an emergency plan to address requirements of the community, health service providers and related organisations
- implemented aspects of the plan in line with work role and responsibilities

© Commonwealth of Australia, 2025 HumanAbility

- written reports and documented the action plan.
-

All performance evidence must be demonstrated at least once.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- how to operate relevant equipment and technology
- local resources
- key community networks
- client confidentiality
- local disaster planning processes
- legislation protocols and policies or guidelines
- network development
- knowledge of key issues and information relating to individual and community health, including biology and development, psychology, disease and treatment options, and culture and tradition
- organisation policies and procedures.

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre
- individually or as a member of a multidisciplinary primary health care team
- with Aboriginal and/or Torres Strait Islander clients and communities.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. Assessment Requirements for HLTAHW061 Engage in community health research

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- planned, conducted and coordinated all aspects of at least one research project to inform the provision of health services for Aboriginal and/or Torres Strait Islander individuals and communities, including:
  - communicating effectively with stakeholders, including community members
  - ensuring confidentiality of individual and community information as appropriate
  - applying research methodologies
  - developing information-gathering tools and action plans
  - presenting written information in research reports
  - analysing and presenting information clearly
  - evaluating research processes and findings
- conducted at least two community group consultation sessions about the purpose, methodology and outcomes of the research.

© Commonwealth of Australia, 2025 HumanAbility

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- available local resources, including relevant equipment and technology
- sources of information
- research techniques and processes, including small group facilitation
- community development principles
- research ethics – community ownership of data
- relevant guidelines on research, including:
  - National Statement on Ethical Conduct in Human Research
  - Values and Ethics – Guidelines for Ethical Conduct in ATSI Health Research
- relevant policies, protocols and procedures of the organisation.
-

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre
- individually or as a member of a multidisciplinary primary health care team
- with Aboriginal and/or Torres Strait Islander clients and communities.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Set team and individual team member objectives	1.1 Access organisation, program and action plans and identify priorities/issues for the team in line with organisation requirements 1.2 Develop team objectives in consultation between workers and supervisor in line with organisation requirements 1.3 Develop individual objectives in consultation with workers to address team objectives and action plans
2. Identify staffing gaps	2.1 Work in consultation with supervisors and/or other team members to identify staffing gaps 2.2 Determine needs for additional staff and/or training/development of existing staff in terms of skills required to achieve identified work outcomes 2.3 Communicate staffing and training needs to relevant organisation authority for action
3. Supervise daily work schedule	3.1 Develop duty roster and/or daily work schedule for the team to ensure all required services are met 3.2 Monitor and adjust work schedules as required to meet action plan needs
4. Facilitate networking and information exchange between team members	4.1 Identify existing networks for team members and support their use 4.2 Set up new networks and/or information exchange processes as required to facilitate achievement of identified outcomes 4.3 Support use of networks and information exchange processes in the work environment
5. Work with management	5.1 Consult managers on work issues 5.2 Keep managers informed of work and team issues

© Commonwealth of Australia, 2025 HumanAbility

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Numeracy	• in order to use temporal measurements and estimations of completion times and rates to develop work rosters

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTAHW062 Supervise health care team

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- supervised at least one health care team on an ongoing basis by:
  - identifying current networks and establishing new networks for at least three workers
  - encouraging the use of networks
  - setting unit objectives in line with priorities, action plans and organisation requirements
  - developing individual objectives for at least three workers, in line with organisation requirements
  - identifying and responding to staff gaps in consultation with others
  - creating and monitoring team rosters and schedules, adjusting as needed
  - consulting management as required when specific issues arise.

© Commonwealth of Australia, 2025 HumanAbility

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- relevant requirements of legislation, awards and conditions of service
- relevant organisation human resource management policies
- strategies to meet staff training needs
- networking and information exchange processes
- existing program policy
- organisation guidelines, policies and procedures.

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre
- individually or as a member of a multidisciplinary primary health care team
- with Aboriginal and/or Torres Strait Islander clients and communities.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment must be undertaken by a workplace assessor who has expertise in this unit of competency and who is:

- an Aboriginal and/or Torres Strait Islander Health Worker

or:

- accompanied by an Aboriginal and/or Torres Strait Islander person who is a recognised member of the community with experience in primary health care

- individually or as a member of a multidisciplinary primary health care team
- with Aboriginal and/or Torres Strait Islander clients and communities.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment must be undertaken by a workplace assessor who has expertise in this unit of competency and who is:

- an Aboriginal and/or Torres Strait Islander Health Worker

or:

- accompanied by an Aboriginal and/or Torres Strait Islander person who is a recognised member of the community with experience in primary health care

HLTAHW064 Manage budgets

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Application

This unit describes the competencies required to manage the day-to-day responsibilities of administering budgets for a program, work unit or cost centre. It is intended to address skills and knowledge required by those who manage a project budget or program budgets relating to delivery of health care for Aboriginal and/or Torres Strait Islander communities.

This unit applies to those Aboriginal and/or Torres Strait Islander Health Workers working independently and as part of a multidisciplinary team to deliver primary health care services to Aboriginal and/or Torres Strait Islander clients and communities.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 HumanAbility

Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the Element.*
1. Prepare budget	1.1 Identify and document workplace resource needs in accordance with workplace action plans 1.2 Cost and record funding needs 1.3 Prepare budget document and present to supervisor (or other relevant authority) for endorsement
2. Monitor budget expenditure	2.1 Maintain systems for monitoring finances 2.2 Ensure money is expended according to the endorsed budget document 2.3 Identify changing priorities and discuss with supervisor (or other relevant authority) 2.4 Amend budget document in response to changing priorities 2.5 Satisfy accountability requirements

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment *skills) that are essential to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit

Assessment Requirements for HLTAHW064 Manage budgets

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- prepared, documented and presented budget information in line with organisation requirements on at least one occasion, including:
  - monitoring expenditure and reviewing budgetary provisions in line with identified priorities and accountability requirements
  - costing and recording funding needs
  - identifying changing priorities and discussing issues with supervisor
  - managing financial aspects in line with requirements of own role
  - amending budget document to reflect changes in priorities.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

© Commonwealth of Australia, 2025 HumanAbility

This includes knowledge of:

- organisation guidelines relating to funding applications, budget compilation and expenditure
- organisation procedures for cost-centre management
- accounting procedures as required by level of responsibility and workplace

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre
- individually or as a member of a multidisciplinary primary health care team
- with Aboriginal and/or Torres Strait Islander clients and communities.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment must be undertaken by a workplace assessor who has expertise in this unit of competency and who is:

- an Aboriginal and/or Torres Strait Islander Health Worker

or:

- accompanied by an Aboriginal and/or Torres Strait Islander person who is a recognised member of the community with experience in primary health care

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- performed their role in Aboriginal and/or Torres Strait Islander primary health care by using each of the following on at least one occasion:
  - critical thinking and analysis
  - professional review and skills development
  - self-reflection and evaluation
  - time management and prioritisation
  - problem-solving using logic, analysis and sound argument
  - effective and culturally appropriate and safe communication skills for:
    - analysis and interpretation of evidence
    - consultation methods
    - decision-making techniques
    - team negotiation and networking
    - written and oral presentations.

© Commonwealth of Australia, 2025 HumanAbility

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the work role. These include knowledge of:

- critical thinking processes
- reflective practices, benefits and limitations
- organisation standards, policies and procedures
- cultural and linguistic issues for the individual Aboriginal and/or Torres Strait Islander health professional
- best practice, philosophy/vision/mission statements
- characteristics of critical thinking and analysis
- cultural and religious considerations for primary health care
- demonstrated awareness of the history and development of the role of the Aboriginal and/or Torres Strait Islander Health Worker and practitioner
- educational and career opportunities for Aboriginal and/or Torres Strait Islander Health Worker and practitioner
- ethical guidelines including confidentiality, duty of care and public liability
- patterns of primary health care (including functional, team, client assignment)
- performance appraisal processes and practices
- quality improvement programs and accreditation standards
- role of evidence-based practice
- understanding of the role and function of professional and industrial bodies relevant to Aboriginal and/or Torres Strait Islander Health Worker and practitioner
- understanding of the role of the health care team members

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre
- individually or as a member of a multidisciplinary primary health care team
- with Aboriginal and/or Torres Strait Islander clients and communities.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Monitor community needs for primary health care	1.1 Research community health care needs over time using community consultation and analysis of available statistical and documented information 1.2 Seek community feedback to identify relevance and effectiveness of existing primary health care in meeting perceived community needs 1.3 Analyse research data and identify community health trends 1.4 Analyse and report findings in line with organisation guidelines and community requirements
2. Monitor primary health service and program delivery	2.1 Analyse existing primary health care service and program resources to determine availability and need 2.2 Monitor implementation of policies and procedures for primary health care service delivery to ensure compliance with organisation guidelines and community requirements 2.3 Investigate feedback and complaints from clients and the community and take action to adapt primary health care services and programs as required 2.4 Monitor and analyse existing primary health care services and programs in relation to addressing identified community health needs and regulatory requirements 2.5 Investigate and analyse issues relating to primary health care service and program delivery 2.6 Monitor service and program delivery to ensure legislative requirements are addressed
3. Evaluate effectiveness of primary health care	3.1 Evaluate existing primary health care strategies and services on a regular basis in relation to community needs and legislative requirements 3.2 Identify gaps in primary health care services to the community and discuss potential improvements with the community

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	3.3 Ensure the views or concerns of clients and the community are appropriately represented in relation to delivery of primary health care services
	3.4 Ensure confidentiality of clients and the community is maintained
4. Advocate on primary health care issues	4.1 Identify and contact relevant individuals/agencies about issues of concern regarding delivery of primary health care services
	4.2 Represent views and concerns of community and individual clients effectively and ensure confidentiality is maintained
	4.3 Prepare submissions and proposals as required to support delivery of primary health care services
	4.4 Recommend changes to policies, practices and priorities on the basis of research data

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment *skills) that are essential to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTAHW066 Manage the delivery of Aboriginal and/or Torres Strait Islander primary health care

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements. Pre-requisite unit removed.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- planned and managed the delivery of at least one health care service and/or program to effectively address the needs of Aboriginal and/or Torres Strait Islander communities, including:
  - consulting with the community as part of review and revision of services to identify and implement service improvements as an ongoing process
  - advocating on behalf the primary health care service to:
    - promote services and programs
    - seek resources
    - promote staff
  - conducting and reporting on research, using analytical skills applied to quantitative and qualitative data

© Commonwealth of Australia, 2025 HumanAbility

- formulating clear, valid and functional recommendations
- participating in discussions and negotiations with community members regarding the provision of health services
- participating in and monitoring quality assurance programs.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- Aboriginal and/or Torres Strait Islander community primary health needs, treatment options and any associated issues
- legislation, organisational guidelines and community requirements relating to health service provision
- up-to-date knowledge of principles and practice of primary health care and resources required to address specific community needs
- referral resources and processes
- traditional health, healing and medicines
- individual and community health including biology and development, psychology, disease and treatment options, culture and tradition
- key individuals and agencies with local, regional and broader responsibilities related to primary health care provision
- evaluation methodology to determine the effectiveness of services delivered.

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre
- as a senior member of and/or supervising a primary health care team
- with Aboriginal and/or Torres Strait Islander clients.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessment Requirements for HLTAHW067 Manage health education and promotion

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- managed the provision of at least one health education and promotion service to effectively address the needs of Aboriginal and/or Torres Strait Islander individuals and communities, including:
  - working with other staff to identify and evaluate existing health education and promotion services
  - communicating effectively with relevant community members, agencies and other organisations to support the delivery of health education and promotion services
  - advocating on behalf of Aboriginal and/or Torres Strait Islander communities in relation to the provision of health education and promotion services
  - conducting research and preparing reports detailing effectiveness of primary health care health education and promotion programs
  - lobbying and advocating at high levels to support health education and promotion programs for Aboriginal and/or Torres Strait Islander communities

© Commonwealth of Australia, 2025 HumanAbility

- undertaking organisational planning to support the delivery of health education and promotion programs.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- individual and community health including broad knowledge base of biology and development, psychology, disease and treatment options, culture and tradition
- primary health care health needs and service delivery options
- legislation relating to the delivery of primary health care services
- organisational guidelines relating to health service provision
- referral resources
- traditional health, healing and medicines.

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre
- as a senior member of and/or supervising a primary health care team
- with Aboriginal and/or Torres Strait Islander clients.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment must be undertaken by a workplace assessor who has expertise in this unit of competency and who is:

- an Aboriginal and/or Torres Strait Islander Health Worker

or:

© Commonwealth of Australia, 2025 HumanAbility

- accompanied by an Aboriginal and/or Torres Strait Islander person who is a recognised member of the community with experience in primary health care

Assessment Requirements for HLTAHW068 Develop work plans

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- prepared at least one work plan for a whole organisation or for a team within an organisation, in line with priorities of Aboriginal and/or Torres Strait Islander communities in relation to the provision of health services. The candidate should have effectively addressed strategic initiatives and business plans by:
  - accessing and analysing relevant information as a basis for planning, including budgets and previous planning documents
  - using culturally safe and appropriate communication skills to liaise with relevant staff member to determine scope, outcomes and focus of work plan
  - networking, negotiating and resolving conflict as required
  - communicating outcomes of the plan to relevant staff members to obtain feedback for review
  - adjusting the plan as appropriate
  - documenting the final work plan according to organisational procedures and policies

© Commonwealth of Australia, 2025 HumanAbility

- prepared work plans for at least three individual staff members to effectively address strategic initiatives and business plans arising out of the developed team or organisational work plan by:
  - using culturally safe and appropriate communication skills to liaise with each staff member to determine scope, outcomes and focus of the individual work plans
  - networking, negotiating and resolving conflict as required
  - identifying training opportunities as part of the work plan for each staff member
  - documenting each individual work plan according to organisational procedures and policies
- reviewed the performance of at least one team/organisational work plan and at least one individual staff member plan by:
  - gaining feedback from community and staff as to the outcomes of the work plan
  - identifying successes and areas for improvement in each work plan
  - reporting outcomes of review as required by organisational procedures and policies.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- National Aboriginal Health Strategy
- relevant up-to-date national policies and reports, such as 'National Aboriginal and Torres Strait Islander Oral Health Workshop – Report and Action Plan'
- relevant organisational policy and guidelines
- Commonwealth, state /territory and local government policies
- existing strategic and work unit plans
- community networks and planning processes

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre
- as a senior member of and/or supervising a primary health care team
- with Aboriginal and/or Torres Strait Islander clients.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

© Commonwealth of Australia, 2025 HumanAbility

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment must be undertaken by a workplace assessor who has expertise in this unit of competency and who is:

- an Aboriginal and/or Torres Strait Islander Health Worker

or:

- accompanied by an Aboriginal and/or Torres Strait Islander person who is a recognised member of the community with experience in primary health care

HLTAHW069 Develop health care policy

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Application

This unit describes the required skills and knowledge to develop organisation policies and influence government policy development in ways that address community health care needs and organisation guidelines.

This unit applies to senior Aboriginal and/or Torres Strait Islander Health Workers overseeing clinical aspects of the delivery of primary health care services and/or managing the overall delivery of primary health care services and programs to Aboriginal and/or Torres Strait Islander clients and communities.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 HumanAbility

Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Develop policies for health-related workplace	1.1 Identify government policies that affect the workplace and its functions and document implications 1.2 Identify and document workplace policies needed to address government requirements 1.3 Discuss policy requirements with the community and associated health agencies to determine impact and contradictions with other primary health care policies and initiatives 1.4 Develop and/or revise policies in consultation with the community 1.5 Seek endorsement from key stakeholders for policy recommendations 1.6 Promote policies through organisation with training and other measures as necessary 1.7 Monitor and review workplace policies
2. Influence government policy development	2.1 Identify and document government policies that result in service duplication or gaps in community needs 2.2 Develop strategies for influencing government policies in consultation with the community and health agencies 2.3 Represent views and needs of community to government 2.4 Discuss progress/outcome of representations with the community 2.5 Monitor and review strategies

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment *skills) that are essential to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTAHW070 Manage human resources

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- provided human resource management to a health service or centre by:
  - recruiting staff as required by organisational needs
  - managing at least three staff members, including:
    - developing and reviewing performance management plans for individual staff members
    - identifying and supporting access to training opportunities
    - providing information to staff about industrial rights within the workplace, including grievance procedures, awards and work conditions
    - communicating in a culturally appropriate and safe manner with staff when discussing, negotiating and/or resolving issues
    - advocating on behalf of staff as required by individual circumstances .

© Commonwealth of Australia, 2025 HumanAbility

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- organisation human resource management policies and guidelines
- relevant requirements of:
  - industrial relations legislation and regulations at federal, state and territory level
  - enterprise bargaining agreements where they exist in an organisation
  - union documents/guidelines/policies
  - work health and safety legislation and regulations
  - awards and conditions of services.

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre
- as a senior member of and/or supervising a primary health care team
- with Aboriginal and/or Torres Strait Islander clients.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. For example, recruitment of staff may not be required within the timeframe of the assessment. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment must be undertaken by a workplace assessor who has expertise in this unit of competency and who is:

- an Aboriginal and/or Torres Strait Islander Health Worker

or:

© Commonwealth of Australia, 2025 HumanAbility

- accompanied by an Aboriginal and/or Torres Strait Islander person who is a recognised member of the community with experience in primary health care.

HLTAHW071 Manage medicines in Aboriginal and/or Torres Strait Islander primary health care

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements. Prerequisite unit removed.

Application

This unit describes the skills and knowledge required to manage the use of medications in Aboriginal and/or Torres Strait Islander primary health care. It includes supply, transport and storage of medicines; the legal, professional and safety aspects of medicines use; and the supervision of other Aboriginal and/or Torres Strait Islander Health Workers with authority to administer medication, and management of clinic medicines stocks.

This unit applies to those senior Aboriginal and/or Torres Strait Islander Health Workers overseeing clinical aspects of the delivery of primary health care services to Aboriginal and/or Torres Strait Islander communities.

Note: The skills and knowledge specifically required to administer medications is covered by HLTAHW020 Administer medications.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

© Commonwealth of Australia, 2025 HumanAbility

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the Element.*
1. Manage administration of medicines	1.1 Maintain accurate records of medicines' administration in client files according to organisation policies and procedures 1.2 Establish and maintain systems for managing medication administration within the clinic in consultation with relevant medical health professionals and appropriately authorised persons 1.3 Refer individual medication regimens for regular review by authorised practitioner 1.4 Involve pharmacists in medication management including, where appropriate, medication reviews or use of Webster-packs 1.5 Check doses of medicine made up by other health staff for accuracy, including dose, indication and consideration of contraindications 1.6 Support and instruct other health workers in the safe and efficacious use of medicines 1.7 Monitor the appropriate use of medicines by other health staff
2. Initiate assessment and treatment using standard treatment manuals	2.1 Use standard workplace treatment manuals to commence assessment and treatment 2.2 Consult an authorising practitioner in accordance with standard treatment manuals and organisational policies and procedures 2.3 Dispense medicines according to organisational policies and procedures and the appropriate *legal and regulatory framework* 2.4 Document clinical assessments, any advice sought and assessment and treatment initiated in client medical files

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	**PERFORMANCE CRITERIA**
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the Element.*
3. Manage the ordering, transportation, storage and disposal of medicines	3.1 Ensure medicines are securely stored in accordance with legislative requirements 3.2 Establish working relationships with local medical practitioners and pharmacists to support management of clinic medicines stores 3.3 Monitor patterns of medicines use and use this information to inform reorder quantities and ensure minimum stock holdings 3.4 Ensure clinic medicines stock is checked regularly and re-ordered in appropriate quantities 3.5 Source medicines supplies as locally appropriate 3.6 Add new stock and dispose of out-of-date stock according to organisational policies and procedures 3.7 Organise clinic medicines stock logically and securely, with access to clinic medicines store monitored and restricted to authorised personnel 3.8 Correctly apply cold chain principles for storage and transport of medication requiring refrigeration

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment *skills) that are essential to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTAHW071 Manage medicines in Aboriginal and/or Torres Strait Islander primary health care

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements. Prerequisite unit removed.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- managed the safe administration of medicines by appropriately authorised Aboriginal and/or Torres Strait Islander Health Workers or practitioners on at least three occasions by:
  - providing clear information on medicines, through accurate interpretation of MIMS and other medication references and resources, such as standing orders, guidelines and Consumer Medicines Information
  - checking calculations and measurements of dosages undertaken by other authorised practitioners
  - documenting all outcomes of administration of medication in line with own role and medication administered
- initiated treatment involving medication on at least three occasions by:

© Commonwealth of Australia, 2025 HumanAbility

  - using standard treatment manuals to initiate assessment and treatment, in consultation with an authorised practitioner
  - referring to the pharmacist regarding medication
  - consulting authorised practitioners' instructions and orders in regards to dispensing medication
- managed processes for the ordering, transport, storage and disposal of medication on at least one occasion by:
  - managing relationships with relevant suppliers, pharmacies and hospitals
  - overseeing the maintenance of medicines records
  - using checking systems to regularly review out-of-date stock, understocked or other requirements for medication
  - ensuring medication was kept in secured locations and accessed by authorised personnel, according to legislation and organisation procedures and policies
  - applying cold chain storage principles where appropriate in the storage of medications.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- application of universal precautions in the administration of medicines
- key aspects of federal and state legislation relating to the control, storage and dispensing of drugs and medication
- legislative and regulatory requirements for labelling, storage and safe disposal of medicines
- key aspects of the requirements of the Pharmaceutical Benefits Scheme (PBS)
- signs of anaphylaxis and methods of management
- western and traditional/bush medicines and treatments
- special considerations in use of medicines, including:
  - pregnancy and lactation
  - renal failure
  - anti-coagulant therapy
- organisational policies and procedures relating to drugs and medications, including storage, ordering, management and access.
-

Assessment Conditions

Unless state or territory legislation prevents practice in the workplace, skills must be demonstrated working:

- in a health service or centre
- as part of a multidisciplinary primary health care team

© Commonwealth of Australia, 2025 HumanAbility

- with Aboriginal and/or Torres Strait Islander clients and communities.

Note: Where state or territory legislation prevents practice in the workplace, simulated assessment environments may only be used in place of workplace assessment.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment must be undertaken by a workplace assessor who has expertise in this unit of competency and who is:

- a Registered Aboriginal or Torres Strait Islander Health Practitioner

or:

- a Registered Health Practitioner accompanied by an Aboriginal or Torres Strait Islander person who is a recognised member of the community with experience in primary health care.

HLTAHW072 Provide guidance in social and emotional wellbeing

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements. Pre-requisite units removed.

Application

This unit describes the required skills and knowledge to provide social and emotional wellbeing guidance and support to Aboriginal and/or Torres Strait Islander clients in crisis, in need and in the context of an ongoing supportive client/worker relationship.

The unit applies to senior Aboriginal and/or Torres Strait Islander Health Workers overseeing clinical aspects of the delivery of primary health care services and/or managing the overall delivery of primary health care services and programs to Aboriginal and/or Torres Strait Islander clients and communities.

This unit equips Aboriginal and/or Torres Strait Islander Health Workers to provide support related to social and emotional wellbeing and does not infer that they are qualified counsellors.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

© Commonwealth of Australia, 2025 HumanAbility

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	Performance criteria specify the level of performance needed to demonstrate achievement of the element.
1. Work within professional and personal boundaries	1.1 Define and observe professional boundaries when working with a range of clients, including women, men, children, young people, families, and couples 1.2 Explain the professional and personal boundaries of social and emotional wellbeing support and discuss with the client 1.3 Work in accordance with organisation policies on professional and personal boundaries
2. Assess the current status and needs of the client	2.1 Establish a safe, supportive and culturally secure environment for the client 2.2 Explain the process of providing guidance and support to the client 2.3 Discuss the role and limitations of the social and emotional wellbeing worker with the client 2.4 Take client history through discussion with the client and relevant family/community members 2.5 Assess client's current mental status and needs by discussion with the client and appropriate others
3. Plan treatment for the client	3.1 Discuss treatment options with client, including alternative therapies that may include traditional Aboriginal healing 3.2 Develop a treatment plan in consultation with the client
4. Provide appropriate emotional support and guidance to clients	4.1 Establish an emotionally safe and culturally secure environment to support client self-disclosure 4.2 Use a non-judgmental approach and build rapport, empathy and trust with the client 4.3 Take into account socioeconomic demographic, cultural and language needs in all counselling work

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	Performance criteria specify the level of performance needed to demonstrate achievement of the element.
	4.4 Use strategies for resolving conflict and building self-esteem where appropriate
	4.5 Select therapies and techniques appropriate to client's physical, cultural, spiritual, intellectual and emotional needs
	4.6 Provide information to the client as appropriate and at the client's request, in accordance with organisation policy and procedures, confidentiality requirements and duty of care
	4.7 Refer clients to appropriate services and follow-up as required
5. Review counselling treatment with clients	5.1 Discuss effectiveness of the treatment plan with the client
	5.2 Discuss options for variation to the treatment plan and revise with the client
	5.3 Consult colleagues as necessary and appropriate in accordance with confidentiality requirements
6. Review progress of counselling relationship with the client	6.1 Review effectiveness of therapeutic relationship with the client
	6.2 Discuss ending the relationship with the client and others (i.e. other agencies) as appropriate
	6.3 Review impact on the client of ending the counselling relationship
	6.4 Put in place referral and support networks to support client when counselling relationship ends
7. Use self-protection strategies	7.1 Use conflict resolution and negotiation in a crisis as appropriate
	7.2 Take appropriate action to ensure safety of client, self and others in accordance with organisation policies and protocols and available resources

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	Performance criteria specify the level of performance needed to demonstrate achievement of the element. 7.3 Seek emergency assistance as required 7.4 Acknowledge limits of own abilities and refer appropriately in accordance with organisation policies and available resources 7.5 Seek debriefing as required 7.6 Undertake ongoing self-care and stress-management activities

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment *skills) that are essential to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTAHW072 Provide guidance in social and emotional wellbeing

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements. Pre-requisite units removed.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- provided social and emotional wellbeing guidance to at least three clients by:
  - assessing the mental status and needs of each client
  - developing appropriate treatment and/or referral plans/options, including alternative therapies, as appropriate in consultations with colleagues and relevant professionals
  - discussing treatment options with client
  - providing appropriate emotional support and guidance as part of the treatment plan using:
    - listening skills
    - building rapport
    - negotiation
    - questioning, reframing

© Commonwealth of Australia, 2025 HumanAbility

    - externalising
    - reflection process by worker
    - motivational interviewing
  - reviewing the progress of the relationship with the client and colleagues, including the prospect of ending the relationship
  - exercising professional boundaries with each client
  - using self-protection strategies as appropriate to working with each client, including:
    - resolving conflicts and crisis negotiation
    - ensuring safety of self and others
    - seeking emergency assistance and debriefing
    - undertaking stress-management activities.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- conflict resolution strategies for individuals and families
- models and techniques to provide social and emotional support, including:
  - six-step problem-solving method
  - five stages of trauma recovery
  - antecedents, behaviour, consequences model (ABC model of behaviour)
  - cognitive behaviour therapy (CBT) model
  - brief solution-focused therapy
  - narrative therapy
  - subjective, objective, assessment, plan, implementation and evaluation (SOAPIE) notes
  - strategies for counselling survivors of sexual abuse, sexual assault, children and young people, couples, families, grieving families, friends and communities
  - motivational interviewing
  - definitions of grief and models of support
  - strategies of open communication for couples
  - what makes a good counsellor (listening, skills, empathy, trust, etc.)
- healing models, such as:
  - Atkinson’s trans-generational healing model
  - traditional healing practices
  - healing through art, drawing, music
  - social genograms
  - narrative therapy
- local support networks and services

© Commonwealth of Australia, 2025 HumanAbility

- sexual abuse, including:
  - definitions, myths and facts
  - ways survivors feel and behave
  - monitoring sexual abuse
  - patterns in relating to the world for survivors
- sexual assault, including:
  - definitions, myths and facts
  - effects
  - legal and medical procedures
  - strategies for counselling
- Stolen or Removed Generations
- suicide and self-harm, including:
  - risk factors
  - emergency procedures
  - assistance and support (agencies, community, family)
  - counselling strategies
  - referral options
- organisation policies and procedures.

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre
- as a senior member of and/or supervising a primary health care team
- with Aboriginal and/or Torres Strait Islander clients.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment must be undertaken by a workplace assessor who has expertise in this unit of competency and who is:

© Commonwealth of Australia, 2025 HumanAbility

- an Aboriginal and/or Torres Strait Islander Health Worker

or:

- accompanied by an Aboriginal and/or Torres Strait Islander person who is a recognised member of the community with experience in primary health care

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Differentiate between ways to conceptualise and treat mental disorders	1.1 Use mental health classification systems appropriately when diagnosing Aboriginal and/or Torres Strait Islander people 1.2 Identify situations where a traditional healer could make an effective contribution to the treatment and management of Aboriginal and/or Torres Strait Islander clients 1.3 Investigate treatment approaches to potentially reduce the stay in mental institutions for Aboriginal and/or Torres Strait Islander people and assist early return to their communities 1.4 Examine and evaluate the environment of mental health facilities/institutions in relation to potential impact on Aboriginal and/or Torres Strait Islander clients 1.5 Identify the impact of cultural and spiritual factors on the way mental health problems develop and present
2. Address the organisation's role and function in the management and treatment of mental disorders	2.1 Identify ways in which the organisation's administrative and health care staff can physically, spiritually and emotionally support Aboriginal and/or Torres Strait Islander people and their families 2.2 Identify community health organisation's role and manner of preparing and supporting Aboriginal and/or Torres Strait Islander clients to re-enter their communities 2.3 Identify organisation policies and procedures that acknowledge the importance of Aboriginal and/or Torres Strait Islander people's spiritual and emotional ties 2.4 Clarify and support links between agencies providing primary, secondary and tertiary care 2.5 Identify and access appropriately local government and non-government resources available to assist clients from remote areas

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
3. Develop and maintain inter-sectoral networks	3.1 Recognise the importance of cross-sector collaborations between agencies, particularly in the context of early intervention and treatment for clients with multiple diagnoses 3.2 Identify the roles and functions of members of multidisciplinary health care teams 3.3 Recognise different organisational cultures within a drug and alcohol service and a mental health service, and identify their impact on workers 3.4 Identify difficulties in addressing gaps in the system that impede continuity of care 3.5 Emphasise factors/attributes that contribute to a flexible, dynamic and productive health team 3.6 Recognise the importance of policies that reflect equal opportunity and ensure that staff participate in cross-cultural awareness programs 3.7 Identify ways case management can contribute to effective inter-sectoral service delivery 3.8 Identify staff development issues for inter-sectoral workers
4. Use clinical practices appropriate to social and emotional wellbeing work	4.1 Identify clinical practices relevant to social and emotional wellbeing work 4.2 Clarify the meaning of ‘culturally appropriate manner’ in general and specific cultural contexts 4.3 Discuss client treatment with other members of the health care team 4.4 Recognise the importance of accurate clinical baseline observations in practice 4.5 Take client history in accordance with the needs of the client and the health care setting 4.6 Undertake comprehensive reporting in line with organisation requirements 4.7 Identify instances where the social and emotional wellbeing worker might advocate for a client in

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	accordance with the philosophy of the organisation
5. Practise social and emotional wellbeing work	5.1 Use a culturally appropriate manner in all interactions with the client (including active listening, clarifying, probing techniques)
	5.2 Develop care plans and discuss implementation and evaluation with the health care team
	5.3 Conduct client interviews, ensuring there is appropriate preparation and consideration given to opening, developing and closing the interview
	5.4 Review existing records to ensure all appropriate information is taken into account when treating a client
6. Follow organisation's occupational health and safety (OH&S) procedures	6.1 Consult organisation's OH&S policy and procedures manual to clarify for a range of situations
	6.2 Clarify and apply procedures for dealing with clients and their relatives who are verbally or physically threatening
	6.3 Identify and apply organisation OH&S requirements for use in caring for psychotic clients
	6.4 Ensure responses to clients who spit at or bite the worker reflect the appropriate order of priority for maintaining worker safety

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment *skills) that are essential to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTAHW073 Practise social and emotional wellbeing in a clinical setting

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements. Pre-requisite units removed.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- delivered social and emotional wellbeing services within a primary health care setting to at least three Aboriginal and/or Torres Strait Islander clients including:
  - using clinical practices appropriate to social and emotional wellbeing work
  - appropriately identifying treatment and measures to specifically support Aboriginal and/Torres Strait Islander cultures, such as traditional healers
  - providing support and advice to clients
  - working in collaboration with other team members and staff as required
  - communicating with clients in culturally appropriate and safe ways to gain and provide information, and make assessments of social and emotional health

© Commonwealth of Australia, 2025 HumanAbility

- referring clients as required according to their specific social and emotional wellbeing needs
- on at least one occasion, worked with other members of a multi-disciplinary team to identify:
- ways to support social and emotional wellbeing of clients in the primary health care setting
- barriers in providing support to clients, and ways to overcome these
- specific cross-cultural issues which need to be addressed by the team
- ways of working with others outside the team in other sectors, departments or agencies to support care of clients.
-

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- role and responsibilities of a social and emotional wellbeing worker in a multidisciplinary team
- the differences between the roles of a social and emotional wellbeing worker in a community controlled organisation and in a government organisation
- organisational philosophies, values and beliefs
- social and emotional issues associated with mental health of Aboriginal and/or Torres Strait Islander clients
- clinical aspects of mental health assessments, treatments and services
- relevant OH&S requirements for practice, including (but not limited to):
  - duty of care
  - confidentiality
  - debriefing
  - universal precautions
  - hazard/incident reporting procedures.

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre
- as a senior member of and/or supervising a primary health care team
- with Aboriginal and/or Torres Strait Islander clients.

© Commonwealth of Australia, 2025 HumanAbility

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment must be undertaken by a workplace assessor who has expertise in this unit of competency and who is:

- an Aboriginal and/or Torres Strait Islander Health Worker

or:

- accompanied by an Aboriginal and/or Torres Strait Islander person who is a recognised member of the community with experience in primary health care

HLTAHW074 Provide closure on healing processes

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements. Pre-requisite units removed.

Application

This unit describes the required skills and knowledge to bring to a close the healing process as part of a relationship between a client and social and emotional wellbeing worker, as well as to access local therapeutic services, recognising limitations of therapy and factors that may influence clients in contacting a therapist.

The unit applies to senior Aboriginal and/or Torres Strait Islander Health Workers overseeing clinical aspects of the delivery of primary health care services and/or managing the overall delivery of primary health care services and programs to Aboriginal and/or Torres Strait Islander clients and communities.

This unit equips Aboriginal and/or Torres Strait Islander Health Workers to provide support related to social and emotional wellbeing and does not infer that they are qualified counsellors.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

© Commonwealth of Australia, 2025 HumanAbility

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Facilitate a group healing journey	1.1 Review and agree to rules for participation in a healing group as part of a group, ensuring safety, cultural security and confidentiality during and after the process 1.2 Practise verbal and non-verbal communication skills within the group 1.3 Practise self-reflection through review of key issues recorded relating to the healing process 1.4 Acknowledge the impact of confronting own issues by self-disclosure of past emotional influences 1.5 Undertake work to review and complete a healing journey in the group context 1.6 Reflect on the impacts of participation in healing journeys and share in the group context
2. Create a safe place to continue healing	2.1 Acknowledge the importance of healing as an ongoing process for Aboriginal and/or Torres Strait Islander people 2.2 Explore and clarify the relevance of experiencing personal healing as a basis for providing support and healing for clients 2.3 Identify principles for creating a safe and culturally secure place for healing and take action to establish and maintain personal safety 2.4 Acknowledge the importance of the support processes of extended families in preparing for and undergoing a healing process
3. Assist clients to access therapeutic services in the local area	3.1 Identify therapeutic services available in the local area 3.2 Identify obstacles that clients may face when accessing the local therapeutic services

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	3.3 Develop and implement strategies to help clients access local therapeutic services
	3.4 Develop and implement strategies for maintaining primary contact with the client when accessing local therapeutic services

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment *skills) that are essential to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTAHW074 Provide closure on healing processes

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements. Pre-requisite units removed.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- facilitated a healing journey for at least one group of Aboriginal and/or Torres Strait Islander clients by:
  - negotiating rules of participation
  - explaining the relevance of experiencing personal healing as a basis for providing support to clients
  - demonstrating appropriate communication skills
  - providing a safe place for participants to undertake the healing journey
  - identifying an appropriate point to complete part of healing process and provide closure for self and clients
- assisted at least one client to identify and access appropriate therapeutic services to support ongoing healing as required

© Commonwealth of Australia, 2025 HumanAbility

- reflected on their own involvement in healing journey, including any personal areas of concern, on at least one occasion.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- alternative therapies – art, music
- key communication models
- conflict resolution strategies for individuals and families
- debriefing, including:
  - definitions and processes
  - for self
  - for colleagues
- factors that the client may consider when contacting a therapist (e.g. kinship, training, confidentiality, gender, cost, approach, personal warmth, sincere concern, whether they can talk in a candid non-defensive way, reputation, understanding)
- limitations of therapy
- procedures for working with clients in crisis (i.e. safety issues, liaising with emergency agencies, calming strategies, etc.)
- professional boundaries
- self-healing journey
- story maps and storytelling
- strategies for assisting clients to access services
- strategies for overcoming client resistance
- suicide and self-harm
- referral options.

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre
- as a senior member of and/or supervising a primary health care team
- with Aboriginal and/or Torres Strait Islander clients.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

HLTAHW075 Manage community health projects

Modification History

Release	Comments
Release 3	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 2	Correction to metadata and mapping. Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Application

This unit describes the required skills and knowledge to meet project management responsibilities within particular community health programs either in relation to a particular task, or within the context of broad management responsibilities.

This unit applies to senior Aboriginal and/or Torres Strait Islander Health Workers overseeing clinical aspects of the delivery of primary health care services and/or managing the overall delivery of primary health care services and programs to Aboriginal and/or Torres Strait Islander clients and communities.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 HumanAbility

Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Plan a community health project	1.1 Consult key community stakeholders to determine community needs in planning the project 1.2 Develop project proposals/submissions in response to community consultation 1.3 Include consultation with key community stakeholders in project planning processes 1.4 Ensure project plans are in line with community, organisation and legislative requirements
2. Prepare action plan	2.1 Ensure project plan identifies required actions and resources 2.2 Document plan and discuss with other workers 2.3 Identify project risks and assess likelihood and impacts
3. Implement and evaluate project	3.1 Follow project plan and review in operation to address identified community needs 3.2 Ensure community is kept informed of progress on the project 3.3 Discuss project outcomes with supervisors and the community 3.4 Reflect on project recommendations with the supervisor and community 3.5 Document project outcomes 3.6 Evaluate project outcomes and document results

Foundation Skills

Assessment Requirements for HLTAHW075 Manage community health projects

Modification History

Release	Comments
Release 3	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 2	Correction to metadata and mapping. Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 202 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- planned, implemented and evaluated at least one community health project to support the provision of health services for Aboriginal and/or Torres Strait Islander individuals and communities by:
  - consulting appropriately with community, stakeholders, staff and research team about the purpose, methodology and aims of the research
  - ensuring confidentiality of community information relevant to the project
  - performing a project risk assessment
  - coordinating flow of information with community and research team
  - facilitating groups for research, discussion and feedback purposes
  - documenting the progress and outcomes of the project
  - referring to relevant legislative and organisational requirements as appropriate.

© Commonwealth of Australia, 2025 HumanAbility

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- relevant Commonwealth, state/territory and local government policies
- community/sector networks associated with community health
- funding guidelines related to community health projects
- local Community Health Plans
- organisation policies and guidelines.

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre
- as a senior member of and/or supervising a primary health care team
- with Aboriginal and/or Torres Strait Islander clients.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

HLTAHW076 Plan for community emergencies

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Application

This unit describes the required skills and knowledge to develop, prepare and promote plans of action for responding to non-medical emergencies that may affect a community. Planning is undertaken in consultation with other agencies and key people, and sets out the roles and responsibilities of workers and others in the community, for responding to an emergency.

This unit applies to senior Aboriginal and/or Torres Strait Islander Health Workers overseeing clinical aspects of the delivery of primary health care services and/or managing the overall delivery of primary health care services and programs to Aboriginal and/or Torres Strait Islander clients and communities.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 HumanAbility

Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Liaise with relevant government agencies	1.1 Identify and analyse existing relevant disaster plans and policies 1.2 Consult government agencies to determine and confirm different and complementary roles in the local disaster plan
2. Identify and liaise with appropriate community organisations	2.1 Identify community organisations and incorporate in an information database 2.2 Use effective communication strategies to establish contact with community organisations 2.3 Identify barriers to effective liaison and develop processes to facilitate communication with other agencies
3. Develop disaster plan to address local requirements	3.1 Collect information on local requirements and resources from key people and organisations 3.2 Clarify roles and responsibilities of all organisations in relation to responding to a disaster 3.3 Ensure local disaster plan is written to reflect local requirements 3.4 Establish a promotions strategy and facilitate implementation
4. Co-ordinate local support	4.1 Seek volunteers for disaster plan designated roles, via identified organisations and public processes 4.2 Clarify individual, team and organisation roles and responsibilities 4.3 Identify team leaders by discussion with organisations 4.4 Hold meetings to discuss disaster plan and personnel requirements
5. Ensure training for volunteers and staff	5.1 Identify training and resource requirements for volunteers and staff 5.2 Coordinate development and promotion of

Assessment Requirements for HLTAHW076 Plan for community emergencies

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has:

- planned for a community emergency by:
  - consulting effectively with the community to:
    - identify local issues
    - clarify roles and responsibilities of the organisation and community
    - promote community involvement
    - facilitate group discussions to develop the plan
  - consulting with relevant stakeholders, including emergency agencies, to identify responsibilities and roles
  - making and distributing amendments to disaster plan to key stakeholders
- facilitated the implementation of the emergency plan by:
  - developing and implementing a promotions strategy to inform community, staff and relevant stakeholders

© Commonwealth of Australia, 2025 HumanAbility

- identifying volunteers and coordinating relevant training and resources to support their implementation of the plan
- ensuring health service personnel are trained in emergency processes under the plan.

All performance evidence must be demonstrated at least once.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- key community networks relating to emergency response, including local resources, suppliers and tradespeople
- relevant legislation, protocols and policies or guidelines
- local disaster planning processes
- local cultural and community knowledge
- networks development
- relevant equipment and technology in terms of types, sources, operation and maintenance
- client confidentiality requirements.
-

Assessment Conditions

Skills must be demonstrated working:

- in a health service or centre
- as a senior member of and/or supervising a primary health care team
- with Aboriginal and/or Torres Strait Islander clients.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

© Commonwealth of Australia, 2025 HumanAbility

Assessment must be undertaken by a workplace assessor who has expertise in this unit of competency and who is:

- an Aboriginal and/or Torres Strait Islander Health Worker

or:

- accompanied by an Aboriginal and/or Torres Strait Islander person who is a recognised member of the community with experience in primary health care

Assessment Requirements for HLTAHW077 Provide supervision for social and emotional wellbeing workers

Modification History

Release	Comments
Release 2	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. New evidence requirements for assessment, including volume and environment requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role.

There must be evidence that the candidate has:

- supported at least two Aboriginal and/or Torres Strait Islander health workers to provide social and emotional wellbeing support by:
  - providing professional feedback, debriefing and support
  - using culturally appropriate and safe communication skills with the worker to:
    - build rapport and trust
    - obtain information for reviewing practices
    - support the worker to discuss personally confronting issues
    - discuss strategies and techniques to protect the worker and clients
    - maintain confidentiality of the worker and their clients
  - reviewing worker's strategies and practices to reflect on client progress and outcomes, and identify successes and areas for change.

© Commonwealth of Australia, 2025 HumanAbility

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- a range of strategies and practices used to achieve desired client outcomes in relation to social and emotional wellbeing work
- advanced skills, knowledge and attributes required to perform the work effectively
