The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- • Australian/New Zealand Standards, workplace health and safety (WHS) policies, current Dental Board of Australia guidelines on infection control, Commonwealth and State/Territory legislation requirements and organisation policies relating to dental laboratory work
- • Fundamental oral anatomy including:
 - - dentition – arrangement of the teeth, naming and coding of teeth
 - - structures of the oral cavity – hard and soft palate, lateral and posterior borders of the oral cavity, tongue and floor of the mouth
 - - teeth form and function
- • properties of custom tray materials including:

- - acrylic resins
 - - light-cured composite
- • rationale for using space filling materials
- • desirable properties and design features of custom impression trays including:
 - - a design that holds the impression material in the correct position in the mouth
 - - a design that supports the lips and cheeks so that the functional depth and shape of the sulcus is recorded
 - - a design that allows for positioning of the handle to avoid the lip during impression taking
 - - rigidity, strength, dimensional stability and smoothness
 - - spacing to permit the correct thickness of the impression material to be used.

Assessment Conditions

Skills must have been demonstrated in a dental laboratory workplace or in a simulated dental laboratory environment that reflects workplace laboratory conditions. The following conditions must be met for this unit:

- • use of suitable facilities, equipment and resources including:
 - - access to work order
 - - Dental Board of Australia guidelines on infection control on which the candidate bases the planning process
 - - laboratory safety manuals and procedures in line with relevant Commonwealth and State/Territory legislation
 - - WHS policies on which the candidate bases the planning process.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTDET003 Construct registration rims

Modification History

N/A

Application

This unit of competency describes the skills and knowledge required to design and manufacture registration rims for removable prostheses.

This unit applies to work in dental technology.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Select and prepare materials	1.1 Read and interpret the work order 1.2 Select appropriate material for the base 1.3 Select appropriate material for the rim 1.4 Prepare model to enable appropriate application of selected base material

2. Construct base	2.1 Apply selected base material to model 2.2 Process base material according to type of material selected 2.3 Trim base material to peripheral contours of model and appropriate landmarks
3. Construct registration rim	3.1 Construct rim to industry standard in selected material 3.2 Trim rim to prescribed dimensions and appropriate landmarks 3.3 Smooth and polish rim according to material chosen 3.4 Decontaminate the registration rim according to infection control guidelines 3.5 Dry the registration rim and place in a sealed container for dispatch

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Unit Mapping Information

Assessment Requirements for HLTDET003 Construct registration rims

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- • read and correctly interpreted 4 work orders
- • used standard precautions and safe work practices to fabricate maxillary and mandibular registration rims using a range of flexible and rigid base and rim material for the following dentitions (4 rims in total):
 - - partial with a combination of bounded and unbounded saddle areas
 - - edentulous
- • critically evaluated the 4 registration rims produced to meet technical laboratory and clinician requirements.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- • Australian/New Zealand Standards, workplace health and safety (WHS) policies, Dental Board of Australia guidelines on infection control, Commonwealth and State/Territory legislation and organisation policies relating to dental laboratory work
- • fundamental oral anatomy including:
 - - dentition – arrangement of the teeth, naming and coding of teeth
 - - structures of the oral cavity – hard and soft palate, lateral and posterior borders of the oral cavity, tongue and floor of the mouth
 - - teeth form and function
- • properties of materials used to construct registration rims, including rigid and flexible bases.

Assessment Conditions

Skills must have been demonstrated in a dental laboratory workplace or in a simulated dental laboratory environment that reflects workplace laboratory conditions. The following conditions must be met for this unit:

- • use of suitable facilities, equipment and resources including:
 - - access to work order
 - - Dental Board of Australia guidelines on infection control on which the candidate bases the planning process
 - - laboratory safety manuals and procedures in line with relevant Commonwealth and State/Territory legislation
 - - materials for construction of rims
 - - WHS policies on which the candidate bases the planning process.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTDET004 Articulate models and transfer records

Modification History

N/A

Application

This unit of competency describes the skills and knowledge required to transfer oral records and mount models on an articulator.

This unit applies to work in dental technology.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Select and prepare the articulator	1.1 Apply standard precautions when receiving, handling and working on dental materials 1.2 Decontaminate occlusal registration rims according to infection control guidelines 1.3 Confirm requirements of work order 1.4 Select and adjust articulator in accordance with work order

	1.5 Ensure all adjustable settings of the articulator are set to their neutral or zero settings 1.6 Identify the mounting method to be used
2. Select and prepare materials	2.1 Position models and oral records in articulator for a range of prosthetic appliances 2.2 Prepare mounting materials and apply to models 2.3 Establish and secure centric records 2.4 Remove excess material and smooth to produce a neat finish 2.5 Clean equipment
3. Transfer oral records to articulator	3.1 Transpose records as provided 3.2 Record midline 3.3 Set and record vertical height 3.4 Set the condylar angles to the work order given

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

		the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Removal of pre-requisites	

Assessment Requirements for HLTDET004 Articulate models and transfer records

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- • used standard precautions and safe work practices to mount at least one of each of the following types of articulators with attached registrations rims:
 - - planeline articulator
 - - adjustable articulator with face/ear bow
- • critically evaluated both types of articulations produced to meet technical laboratory and clinician requirements.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- • Australian/New Zealand Standards, workplace health and safety (WHS) policies, Dental Board of Australia guidelines on infection control, Commonwealth and State/Territory legislation and organisation policies relating to dental laboratory work
- • fundamental oral anatomy including:
 - - structures of the oral cavity such as hard and soft palate, lateral and posterior borders of the oral cavity, tongue and floor of the mouth
 - - teeth form and function
 - - dentition – arrangement of the teeth, naming and coding of teeth
- • articulation procedures
- • mechanical devices:
 - - articulators
 - - face-bows
- • recording techniques and devices
- • relevant material science for carrying out procedures.

Assessment Conditions

Skills must have been demonstrated in a dental laboratory workplace or in a simulated dental laboratory environment that reflects workplace laboratory conditions. The following conditions must be met for this unit:

- • use of suitable facilities, equipment and resources including
 - - access to work order
 - - Dental Board of Australia guidelines on infection control on which the candidate bases the planning process
 - - laboratory safety manuals and procedures in line with relevant Commonwealth and State/Territory legislation
 - - WHS policies on which the candidate bases the planning process.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTDET005 Construct thermoformed bases and appliances

Modification History

N/A

Application

This unit of competency describes the skills and knowledge required to construct thermoformed bases and appliances such as mouthguards, bleaching trays and orthodontic retainers.

This unit applies to work in dental technology.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare model	1.1 Interpret work order 1.2 Mark outline and scribe finishing lines where applicable 1.3 Apply block-out material as required

2. Thermo-form appliance or base from blank	2.1 Select thermo-forming material in accordance with the work order and appliance to be constructed 2.2 Select thermo-forming equipment according to material 2.3 Apply heat to material to ensure that blank has been uniformly softened 2.4 Adapt softened material to model ensuring adaptation is uniform with constant thickness as specified by manufacturer's instructions 2.5 Allow material to cool 2.6 Verify adaptation
3. Trim, shape and finish appliances or bases	3.1 Remove thermo-formed blank 3.2 Trim to outline and fit to model 3.3 Refine outline 3.4 Smooth and finish appliance or base

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTDET005 Construct thermoformed bases and appliances

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- • read and correctly interpreted work orders and constructed the following 3 appliances:
 - - mouthguard
 - - bleaching tray
 - - splint
- • used standard precautions and safe work practices to trim, polish and finish 2 thermo-formed appliances suitable for insertion in the mouth
- • critically evaluated the 2 different types of thermo-formed appliances produced to meet technical laboratory and clinician requirements.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- • Australian/New Zealand Standards, workplace health and safety (WHS) policies, Dental Board of Australia guidelines on infection control, Commonwealth and State/Territory legislation and organisation policies relating to dental laboratory work
- • fundamental oral anatomy including:
 - - articulation and occlusion
 - - dentition – arrangement of the teeth, naming and coding of teeth
 - - structures of the oral cavity – hard and soft palate, lateral and posterior borders of the oral cavity, tongue and floor of the mouth
 - - teeth form and function
- • polymer science
- • relevant material science for carrying out procedures
- • thermoforming technology.

Assessment Conditions

Skills must have been demonstrated in a dental laboratory workplace or in a simulated dental laboratory environment that reflects workplace laboratory conditions. The following conditions must be met for this unit:

- • use of suitable facilities, equipment and resources, including:
 - - access to work orders
 - - Dental Board of Australia guidelines on infection control on which the candidate bases the planning process
 - - laboratory safety manuals and procedures in line with relevant Commonwealth and State/Territory legislation
 - - WHS policies on which the candidate bases the planning process.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTDET006 Construct immediate dentures

Modification History

N/A

Application

This unit of competency describes the skills and knowledge required to construct complete and partial immediate replacement dentures and surgical templates.

This unit applies to work in dental technology.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Arrange artificial teeth for try-in	1.1 Select artificial teeth in accordance with work order 1.2 Arrange artificial teeth in current edentulous area in accordance with work order
2. Arrange artificial teeth and construct surgical template for finish	2.1 Remove model teeth individually and prepare the ridge in accordance with work order

	2.2 Arrange artificial teeth in sequence as each model tooth is removed 2.3 Adjust existing artificial teeth if necessary when commencing removal of model teeth 2.4 Contour wax surfaces 2.5 Invest/key and boil out 2.6 Finalise the ridge shape 2.7 Duplicate and pour model 2.8 Construct surgical template
3. Process immediate dentures	3.1 Trim and polish immediate dentures 3.2 Process surgical template 3.3 Trim and polish surgical template 3.4 Decontaminate the denture and surgical template according to infection control guidelines 3.5 Place denture and surgical template in a suitable container that will keep moist in accordance with infection control guidelines

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTDET006 Construct immediate dentures

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed 1 set of sequenced written instructions and the manufacturers' instructions for preparing materials used in immediate dentures
- used standard precautions and safe work practices to construct an immediate denture from at least one denture suitable for insertion in the mouth including 1 of each of the following:
 - - maxillary or mandibular anterior tooth with at least one of the following:
 - o flanged denture with bone re-contouring
 - o flanged denture without bone re-contouring
 - o open-faced denture
 - - maxillary or mandibular posterior tooth with at least one of the following:
 - o flanged denture with bone re-contouring
 - o flanged denture without bone re-contouring
 - o open-faced denture
- critically evaluated the 1 immediate denture produced to meet technical laboratory and patient requirements.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- Australian/New Zealand Standards, workplace health and safety (WHS) policies, Dental Board of Australia guidelines on infection control, Commonwealth and State/Territory legislation and organisation policies relating to dental laboratory work
- advantages of immediate dentures for the patient including:
 - - accurate positioning of the artificial teeth
 - - control of post-extraction haemorrhage

- - correct restoration of the vertical and horizontal relationships between maxilla and mandible
 - - maintenance of appearance
- • fundamental oral anatomy, including:
 - - dentition – arrangement of the teeth, naming and coding of teeth
 - - structures of the oral cavity – hard and soft palate, lateral and posterior borders of the oral cavity, tongue and floor of the mouth
 - - teeth form and function
- • clinical treatment procedures necessary to prepare the patient for immediate denture insertion, including:
 - - where there are posterior teeth and no existing partial denture
 - - where a partial denture is present
- • disadvantages of immediate dentures for the patient including:
 - - the implications for the patient where appearance of anterior artificial teeth cannot be approved at try-in
 - - the implications of rapid bone resorption following extraction
- • types of immediate replacement dentures and their advantages and disadvantages:
 - - flanged denture without bone re-contouring
 - - flanged denture with bone re-contouring
 - - open-faced denture.

Assessment Conditions

Skills must have been demonstrated in a dental laboratory workplace or in a simulated dental laboratory environment that reflects workplace laboratory conditions. The following conditions must be met for this unit:

- • use of suitable facilities, equipment and resources including:
 - - access to work order
 - - Dental Board of Australia guidelines on infection control on which the candidate bases the planning process
 - - laboratory safety manuals and procedures in line with relevant Commonwealth and State/Territory legislation
 - - WHS policies on which the candidate bases the planning process.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTDET007 Construct removable acrylic partial dentures

Modification History

N/A

Application

This unit of competency describes the skills and knowledge required to construct removable acrylic partial dentures.

This unit applies to work in dental technology.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Design acrylic removable partial denture	1.1 Confirm the survey of the model carried out by the operator 1.2 Confirm design and transfer to master model 1.3 Block-out undesirable undercuts 1.4 Scribe food lines 1.5 Duplicate master model to create a working model

2. Select and prepare materials	2.1 Select materials according to laboratory work order 2.2 Establish shape and dimension of component parts from design
3. Arrange artificial teeth	3.1 Select teeth and position in wax to establish aesthetics and function 3.2 Contour wax so that denture is suitable for try-in. 3.3 Decontaminate denture according to infection control guidelines and place in a suitable container for dispatch
4. Construct retainer units.	4.1 Construct components as required 4.2 Join components as required 4.3 Secure teeth and components in wax 4.4 Contour facial and lingual aspects 4.5 Secure appliance for processing
5. Select and prepare materials and processing technique	5.1 Identify the appropriate polymer system for case 5.2 Identify the appropriate investment technique 5.3 Identify the appropriate processing cycle 5.4 Select polymeric material to construct the prosthesis 5.5 Prepare system components in accordance with manufacturers' instructions 5.6 Allow materials to reach application stage
6. Process denture or appliance	6.1 Apply appropriate investment techniques 6.2 Apply material to investment mould 6.3 Process the polymeric material for the correct length of time at the correct temperature 6.4 Devest model and remove any processing irregularities and sharp edges before fitting onto master model 6.5 Confirm accuracy of retainer units
7. Finish denture or appliance	7.1 Reposition models on the articulator where possible 7.2 Assess the articulated prosthesis and confirm that articulation is appropriate where possible 7.3 Make any necessary adjustments to maintain original vertical dimension

	7.4 Polish the non-fitting surface of the prosthesis to create a smooth high shined surface 7.5 Evaluate the finished prosthesis 7.6 Decontaminate the finished prosthesis in accordance to infection control procedures 7.7 Place in a sealed container ready for dispatch

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTDET007 Construct removable acrylic partial dentures

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- • read and correctly interpreted 1 laboratory work order for removable acrylic partial denture
- • used standard precautions and safe work practices during the set-up and waxing of partial dentures to produce 1 acrylic partial denture with a combination of bounded and free end saddle areas, suitable for insertion in the mouth
- • critically evaluated the 1 acrylic partial denture produced to meet technical laboratory and patient requirements.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- • Australian/New Zealand Standards, workplace health and safety (WHS) policies, Dental Board of Australia guidelines on infection control, Commonwealth and State/Territory legislation and organisation policies relating to dental laboratory work
- • advantages and disadvantages of partial dentures
- • fundamental oral anatomy, including:
 - - dentition – arrangement of the teeth, naming and coding of teeth
 - - structures of the oral cavity – hard and soft palate, lateral and posterior borders of the oral cavity, tongue and floor of the mouth
 - - teeth form and function
- • fundamentals of dental polymers including:
 - - acrylic and modified acrylic prosthetic teeth
 - - acrylic plastics as soft liners
 - - acrylic plastics for denture bases including composition and properties
 - - acrylic-metal combinations
 - - acrylics for construction of custom trays

- - modified acrylic denture base plastics including manipulation and processing
 - - the polymerisation process including cross-linked polymers, copolymers, modified polymers and vinyl plastics
- • principles of partial denture design
- • surveying techniques
- • stages in the design of partial dentures:
 - - classifying, supporting and outlining the saddles
 - - connecting the various components together
 - - providing additional components where necessary to resist rotation
 - - providing reciprocation and bracing
 - - providing retention
 - - reviewing the design for hygiene, support and retention.

Assessment Conditions

Skills must have been demonstrated in a dental laboratory workplace or in a simulated dental laboratory environment that reflects workplace laboratory conditions. The following conditions must be met for this unit:

- • use of suitable facilities, equipment and resources including:
 - - access to work order
 - - Dental Board of Australia guidelines on infection control on which the candidate bases the planning process
 - - laboratory safety manuals and procedures in line with relevant Commonwealth and State/Territory legislation
 - - WHS policies on which the candidate bases the planning process.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTDET008 Construct cast alloy removable partial denture framework

Modification History

N/A

Application

This unit of competency describes the skills and knowledge required to construct burnout patterns for cast metal framework and to deinvest, trim, treat, finish and evaluate alloy structures.

This unit applies to work in dental technology.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare master model	1.1 Read and interpret the work order 1.2 Confirm the survey of model that has been carried out by the operator 1.3 Transfer design to master model

	1.4 Block out undesirable undercuts 1.5 Create clasp ledges 1.6 Scribe food lines 1.7 Apply tissue relief 1.8 Apply saddle relief
2. Construct refractory model	2.1 Duplicate master model in refractory material to produce an accurate copy of the model 2.2 Construct sprue former as necessary 2.3 Prepare the refractory model appropriately and apply an appropriate hardener or sealant
3. Wax and invest removable partial denture framework	3.1 Transfer design outline correctly to the refractory model 3.2 Select appropriate wax and pre-formed components 3.3 Wax up patterns to the refractory cast consistent with the design 3.4 Sprue the pattern using material of the correct size and in the correct shape and position for the material being cast, and attach it to the investment former 3.5 Select appropriate investment and technique according to the alloy 3.6 Prepare investment materials in accordance with manufacturers' instructions 3.7 Treat the surface of the wax, patterns and sprues 3.8 Allow for investment setting time in accordance with manufacturer's instructions
4. Burnout and cast removable partial denture framework	4.1 Select appropriate alloy according to work order 4.2 Select burnout and preheat cycles for appropriate investment and alloy combination 4.3 Burnout wax from investment mould and hold at recommended temperature for casting 4.4 Melt alloy and cast using appropriate materials, equipment and techniques
5. Devest, trim, finish and evaluate alloy structures for removable partial denture	5.1 Select and apply cooling cycle 5.2 Remove the cast alloy structure from the investment without damaging the integrity of the structure

	5.3 Remove oxides using an appropriate abrasive or chemical treatment 5.4 Visually examine the cast alloy structure and correctly identify any casting faults and assess the viability of the casting 5.5 Remove sprues and trim and shape the alloy structure 5.6 Treat the surface of the alloy using appropriate materials and equipment, and finish using appropriate abrasives and polishes 5.7 Position the cast on the master model and check accuracy of major connection and clasps, and adjust any metal occlusal contacts with antagonist 5.8 Decontaminate the denture framework according to infection control guidelines 5.9 Dry the denture framework, replace on model and place in a sealed container for dispatch

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTDET008 Construct cast alloy removable partial denture framework

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- • followed a set of sequenced written instructions and manufacturers' specifications for preparing materials used in a cast for removable alloy partial denture
- • used standard precautions and safe work practices to construct 1 removable alloy framework that includes a combination of bounded and free end saddles
- • critically evaluated the 1 cast for removable alloy partial denture produced to meet technical laboratory and patient requirements.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- • Australian/New Zealand Standards, workplace health and safety (WHS) policies, Dental Board of Australia guidelines on infection control, Commonwealth and State/Territory legislation and organisation policies relating to dental laboratory work
- • fundamental oral anatomy including:
 - - dentition – arrangement of the teeth, naming and coding of teeth
 - - structures of the oral cavity – hard and soft palate, lateral and posterior borders of the oral cavity, tongue and floor of the mouth
 - - teeth form and function
- • dental alloys
- • heat treatment
- • melting and casting
- • relevant material science for carrying out procedures
- • solidification
- • surface finishing

Assessment Conditions

Skills must have been demonstrated in a dental laboratory workplace or in a simulated dental laboratory environment that reflects workplace laboratory conditions. The following conditions must be met for this unit:

- - use of suitable facilities, equipment and resources including
- - access to work order
- - Dental Board of Australia guidelines on infection control on which the candidate bases the planning process
- - laboratory safety manuals and procedures in line with relevant Commonwealth and State/Territory legislation
- - WHS policies on which the candidate bases the planning process.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTDET009 Construct crown and bridge structures

Modification History

N/A

Application

This unit of competency describes the skills and knowledge required to construct crown and bridge structures including inlays, veneers and substructures.

This unit applies to work in dental technology.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare crown and bridge model	1.1 Pour or construct model using crown and bridge model system 1.2 Prepare crown and bridge model to appropriate height and with level occlusal plane in accordance with crown and bridge model system used 1.3 Section crown and bridge model in accordance with work order requirements

	1.4 Prepare die for construction of restoration in accordance with work order
2. Wax and invest fixed partial dentures and structures	2.1 Wax up crown and bridge restorations 2.2 Sprue crown and bridge wax pattern and prepare for processing 2.3 Select appropriate investment material according to the material to be used 2.4 Prepare investment materials according to the manufacturers' instructions 2.5 Invest wax patterns
3. Burnout, process and finish fixed partial dentures and structures	3.1 Select burnout techniques appropriate to the investment material and restoration material 3.2 Process restoration/substructure in appropriate material 3.3 Devest restoration/substructure without damaging it 3.4 Check for defects 3.5 Trim and finish restoration while maintaining all contact areas and margins 3.6 Evaluate the finished restoration 3.7 Decontaminate the restoration according to infection control guidelines 3.8 Dry the casting, replace on model and place in a sealed container for dispatch

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTDET009 Construct crown and bridge structures

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- used standard precautions and safe work practices to design and construct 1 maxillary or mandibular anterior and posterior crown
- critically evaluated the 1 maxillary or mandibular anterior and posterior crown produced to meet technical laboratory and patient requirements.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- • Australian/New Zealand Standards, workplace health and safety (WHS) policies, Dental Board of Australia guidelines on infection control, Commonwealth and State/Territory legislation and organisation policies relating to dental laboratory work
- • fundamental oral anatomy including:
 - - dentition – arrangement of the teeth, naming and coding of teeth
 - - structures of the oral cavity related to crown and bridge structures
 - - teeth form and function
 - - tooth preparation including basic cementation techniques of restorations
 - - articulation and occlusion
- • casting
- • dental metallurgy
- • factors responsible for casting defects
- • finishing and polishing
- • fundamentals of crown and bridge impressions including:
 - - properties
 - - types
 - - techniques

- - compatibility with crown and bridge model materials
- • properties of model and die materials including:
 - - epoxy and polymer materials
 - - gypsum materials
 - - manipulation of crown and bridge model materials
- • properties of crown and bridge materials:
 - - casting and pressing materials
 - - computer-aided design (CAD) and computer-aided manufacturing (CAM)
 - - ceramic bonding materials
 - - other relevant materials
- • use of pattern materials including:
 - - wax and plastic pattern techniques
 - - emerging technology techniques
- • investment and burnout including:
 - - fundamental knowledge of investment materials
 - - investing and expansion of the investment
 - - burnout
 - - waxing and spruing techniques.

Assessment Conditions

Skills must have been demonstrated in a dental laboratory workplace or in a simulated dental laboratory environment that reflects workplace laboratory conditions. The following conditions must be met for this unit:

- • use of suitable facilities, equipment and resources including:
 - - access to work order
 - - Dental Board of Australia guidelines on infection control on which the candidate bases the planning process
 - - laboratory safety manuals and procedures in line with relevant Commonwealth and State/Territory legislation
 - - WHS policies on which the candidate bases the planning process.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTDET010 Join alloy structures

Modification History

N/A

Application

This unit of competency describes the skills and knowledge required to join dental alloys using thermal processes.

This unit applies to work in dental technology.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Solder components	1.1 Identify and position component materials accurately to comply with the design and in a manner that enables the optimum join to be made 1.2 Select appropriate solder and flux according to the component materials 1.3 Select appropriate heating methods

	1.4 Apply and control solder 1.5 Evaluate each finished join 1.6 Clean, trim, shape and finish components to produce a smooth surface free of sharp edges and irregularities
2. Weld components	2.1 Identify and position component materials accurately to comply with the design, and in a manner that enables the optimum join to be made 2.2 Select appropriate welding techniques and equipment 2.3 Weld components 2.4 Evaluate each finished weld 2.5 Clean, trim, shape and finish components to produce a smooth surface free of sharp edges and irregularities

Foundation Skills

The Foundation Skills describe those required skills (employability skills, language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- • followed 2 sets of sequenced written instructions and manufacturers' instructions for preparation of materials for joining alloy structures
- • used standard precautions and safe work practices to produce 2 soldered or welded joints that exhibit bio-compatibility and optimum mechanical properties
- • critically evaluated the 2 joined alloy structures produced to meet technical laboratory and patient requirements, including joint:
 - - position
 - - strength
 - - integrity
 - - function.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- • Australian/New Zealand Standards, workplace health and safety (WHS) policies, Dental Board of Australia guidelines on infection control, Commonwealth and State/Territory legislation and organisation policies relating to dental laboratory work
- • fundamental oral anatomy including:
 - - dentition – arrangement of the teeth, naming and coding of teeth
 - - structures of the oral cavity – hard and soft palate, lateral and posterior borders of the oral cavity, tongue and floor of the mouth
 - - articulation and occlusion
- • dental metallurgy and dental alloys, including noble and non-noble alloys
- • finishing methods
- • fluxes
- • infection control guidelines for the decontamination of completed laboratory work

- • orthodontic wires
- • soldering and welding techniques including laser welding technology.

Assessment Conditions

Skills must have been demonstrated in a dental laboratory workplace or in a simulated dental laboratory environment that reflects workplace laboratory conditions. The following conditions must be met for this unit:

- • use of suitable facilities, equipment and resources including:
 - - access to work order
 - - Dental Board of Australia guidelines on infection control on which the candidate bases the planning process
 - - laboratory safety manuals and procedures in line with relevant Commonwealth and State/Territory legislation
 - - WHS policies on which the candidate bases the planning process.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTDET011 Construct ceramic and fixed restorations

Modification History

N/A

Application

This unit of competency describes the skills and knowledge required to take a tooth shade and construct ceramic and fixed restorations.

This unit applies to work in dental technology.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Take tooth shade	1.1 Read and interpret work order 1.2 Provide full details of the procedure to the patient or carer where appropriate 1.3 Obtain and document consent following ethical and legal requirements 1.4 Consider the accuracy of natural and artificial light

	1.5 Position the patient correctly for the procedure 1.6 Consult patient regarding requirements and aesthetic outcomes 1.7 View mouth to gain overview of procedure. 1.8 Select technique and prepare equipment and materials for tooth shade recording 1.9 Implement standard precautions to prevent the spread of infection 1.10 Instruct patient on participation during the procedure 1.11 Select tooth shade and consult patient regarding findings, and gain acceptance 1.12 Document the tooth shade 1.13 Discuss any follow-up procedures with the patient
2. Prepare sub-structures	2.1 Read and interpret the work order 2.2 Design and form substructure 2.3 Process the substructure 2.4 Assess substructure for accuracy and appropriateness 2.5 Prepare the bonding surface of the substructure if required for porcelain build up in accordance with the manufacturer's instructions
3. Select, apply and process ceramics	3.1 Select appropriate ceramic for substructure or restoration 3.2 Apply procedures to selected ceramic for substructures or restoration 3.3 Process the restoration in accordance with the manufacturer's instructions
4. Trim, shape and finish ceramic restorations	4.1 Trim the ceramic restoration to required anatomical shape 4.2 Finish the ceramic restoration to meet clinically accepted standards 4.3 Evaluate the quality of the finished restoration 4.4 Decontaminate the ceramic restoration according to infection control guidelines 4.5 Dry the ceramic restoration, place on model and place in a sealed container for dispatch and record completed work order

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTDET011 Construct ceramic and fixed restorations

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- • read and correctly interpreted work order for the following 4 fixed restorations
- • fabricated the following 4 ceramic restorations using standard precautions and safe work practices to a standard that is suitable for insertion in the mouth:
 - - 1 maxillary or mandibular anterior crown
 - - 1 maxillary or mandibular posterior crown
 - - 1 anterior veneer
 - - 1 posterior inlay
- • critically evaluated the work produced to meet technical laboratory and patient requirements including:
 - - shade of the ceramic matches the work order requirements
 - - fit of the restoration is accurate
 - - restoration is of an appropriate anatomical form, shape and surface finish
 - - restoration is free of faults
 - - restoration provides the correct occlusion and articulation
 - - proximal contact areas are in contact with the contact areas of the adjacent teeth.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- • Australian/New Zealand Standards, workplace health and safety (WHS) policies, Dental Board of Australia guidelines on infection control, Commonwealth and State/Territory legislation and organisation policies relating to dental laboratory work
- • fundamental oral anatomy including:
 - - dentition – arrangement of the teeth, naming and coding of teeth

- - structures of the oral cavity related to crown and bridge structures
 - - teeth form and function
 - - occlusion
- • tooth preparation including basic cementation techniques of restorations
- • dental ceramic restorations
- • properties of different restoration and substructure materials
- • ceramic bonding to substructures
- • composition and properties of dental ceramics
- • processing ceramic restorations
- • causes of common faults during construction
- • critical issues and techniques for taking tooth shades including:
 - - effects of aging, tooth wear and staining on shade
 - - colour
 - - rationale and objectives for taking shades
- • social, cultural and psychological factors affecting patient perception and acceptance of tooth shade
- • factors which influence selection of tooth shades
- • physics of light refraction including properties of materials used in aesthetic restoration

Assessment Conditions

Skills must have been demonstrated in a dental laboratory workplace or in a simulated dental laboratory environment that reflects workplace laboratory conditions. The following conditions must be met for this unit:

- • use of suitable facilities, equipment and resources, including:
 - - access to work order
 - - Dental Board of Australia guidelines on infection control on which the candidate bases the planning process
 - - laboratory safety manuals and procedures in line with relevant Commonwealth and State/Territory legislation
 - - WHS policies on which the candidate bases the planning process.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- • read and correctly interpreted work order for the design of 1 orthodontic appliance with active and passive components
- • used standard precautions and safe work practices to manufacture 1 orthodontic appliance ensuring it is a suitable for insertion in the mouth
- • critically evaluated the 1 orthodontic appliance produced to meet technical laboratory and patient requirements, including that it:
 - - is free from defects
 - - is suitable for insertion in the mouth
 - - is effective for the purpose
 - - meets the requirements of the planned design
 - - complies with the work order.

Knowledge Evidence

The candidate must demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- • Australian/New Zealand Standards, workplace health and safety (WHS) policies, Dental Board of Australia guidelines on infection control, Commonwealth and State/Territory legislation and organisation policies relating to dental laboratory work
- • fundamental oral anatomy including:
 - - dentition – arrangement of the teeth, naming and coding of teeth
 - - structures of the oral cavity – hard and soft palate, lateral and posterior borders of the oral cavity, tongue and floor of the mouth
 - - teeth form and function
 - - articulation and occlusion
- • aims and objectives of orthodontic treatment using removable appliances

- • how to select and fabricate components for removable orthodontic appliances:
 - - dental metallurgy
 - - wrought wire fabrication techniques.

Assessment Conditions

Skills must have been demonstrated in a dental laboratory workplace or in a simulated dental laboratory environment that reflects workplace laboratory conditions. The following conditions must be met for this unit:

- • use of suitable facilities, equipment and resources including:
 - - access to work order
 - - Dental Board of Australia guidelines on infection control on which the candidate bases the planning process
 - - laboratory safety manuals and procedures in line with relevant Commonwealth and State/Territory legislation
 - - WHS policies on which the candidate bases the planning process.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- • followed 1 set of sequenced written instructions and manufacturers' instructions for the construction of 1 oral splint
- • used standard precautions and safe work practices to design and manufacture 1 oral splint for a range of jaw relations and malocclusions
- • finished at least 1 oral splint suitable for insertion in the mouth
- • critically evaluated the 1 oral splint produced to meet technical laboratory and patient requirements, including confirming that the splint:
 - - is suitable for insertion in the mouth
 - - is free from defects
 - - is effective for the purpose
 - - meets the requirements of the planned design
 - - complies with the work order.

Knowledge Evidence

The candidate must demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- • Australian/New Zealand Standards, workplace health and safety (WHS) policies, Dental Board of Australia guidelines on infection control, Commonwealth and State/Territory legislation and organisation policies relating to dental laboratory work
- • fundamental oral anatomy including:
 - - dentition – arrangement of the teeth, naming and coding of teeth
 - - structures of the oral cavity – hard and soft palate, lateral and posterior borders of the oral cavity, tongue and floor of the mouth
 - - teeth form and function
 - - articulation and occlusion
- • dental metallurgy

- • processing of wax patterns in acrylic resin
- • relevant material science for carrying out procedures
- • signs and symptoms of temporomandibular joint disorder (TMJ), including process for referrals
- • use of surveying equipment
- • use of vacuum forming procedures
- • properties of materials used in the construction of oral splints, including:
 - - acrylic resins (heat activated, chemically activated, thermoformed)
 - - other relevant materials.

Assessment Conditions

Skills must have been demonstrated in a dental laboratory workplace or in a simulated dental laboratory environment that reflects workplace laboratory conditions. The following conditions must be met for this unit:

- • use of suitable facilities, equipment and resources including:
 - - access to work order
 - - Dental Board of Australia guidelines on infection control on which the candidate bases the planning process
 - - laboratory safety manuals and standard operating procedures in line with relevant Commonwealth and State/Territory legislation
 - - WHS policies on which the candidate bases the planning process.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Elements and Performance Criteria

Element	Performance criteria
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare case	1.1 Apply standard precautions when receiving, handling and working on dentures and appliances 1.2 Decontaminate dentures and appliances according to infection control guidelines 1.3 Read and correctly interpret work order 1.4 Examine fractured components for defects

	1.5 Realign, position and secure fractured components in their correct relationship
2. Prepare model	2.1 Construct model according to the work order. 2.2 Construct articulation key
3. Repair denture or appliance	3.1 Prepare and shape denture surfaces to allow for bonding with the new material 3.2 Relocate components 3.3 Select and prepare materials and processing equipment 3.4 Apply repair materials using the correct technique to the required shape and thickness 3.5 Process materials according to manufacturers' instructions
4. Modify denture or appliance where required	4.1 Decontaminate impressions according to infection control guidelines 4.2 Pour the model material into the impression in accordance with accepted techniques 4.3 Articulate case and transfer records, or construct articulation key as required 4.4 Prepare denture or appliance surfaces appropriately for the modification to be made 4.5 Reline, re-base or modify the denture in accordance with work order
5. Trim, shape and finish denture or appliance	5.1 Trim denture or appliance to relevant anatomical outline or required extension of the base 5.2 Examine the tissue fitting surface and remove any processing anomalies and sharp surfaces 5.3 Refine and polish surfaces and produce required contours 5.4 Evaluate the finished prosthesis 5.5 Decontaminate the appliance according to infection control guidelines 5.6 Place the appliance in a sealed container for dispatch

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTDET014 Repair and modify dentures and appliances

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- • read and correctly interpreted 1 work order and manufacturers' instructions for repair and modification of removable prostheses, and used standard precautions and safe work practices for constructing repairs and modification for a maxillary or mandibular denture with a combination of the following:
 - - replace, add or modify new or existing artificial teeth
 - - replace, add or modifying new or existing metallic components
 - - modify the denture base
- • critically evaluated the 1 repaired or modified denture produced to meet technical laboratory and patient requirements, including confirming that the repaired or modified denture:
 - - is compliant with the work order
 - - is free from defects
 - - is functionally effective in line with the design
 - - is suitable for insertion in the mouth.

Knowledge Evidence

The candidate must demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- • Australian/New Zealand Standards, workplace health and safety (WHS) policies, Dental Board of Australia guidelines on infection control, Commonwealth and State/Territory legislation and organisation policies relating to dental laboratory work
- • fundamental oral anatomy including:
 - - dentition – arrangement of the teeth, naming and coding of teeth
 - - structures of the oral cavity – hard and soft palate, lateral and posterior borders of the oral cavity, tongue and floor of the mouth
 - - teeth form and function

- • constructional faults that cause fractures of denture base including:
 - - absence of balanced occlusion
 - - inadequate polymerisation times and temperatures
 - - incorrect dough consistency when packing
 - - incorrect positioning of maxillary posterior teeth
 - - insufficient thickness of acrylic resin in the anterior palatal region of the denture
 - - rapid cooling after processing
- • constructional faults that cause broken teeth
- • denture base materials
- • denture decontamination procedures when modifying acrylic
- • methods for modifying, repairing and maintaining removable prostheses.

Assessment Conditions

Skills must have been demonstrated in a dental laboratory workplace or in a simulated dental laboratory environment that reflects workplace laboratory conditions. The following conditions must be met for this unit:

- • use of suitable facilities, equipment and resources including:
 - - access to work order
 - - Dental Board of Australia guidelines on infection control on which the candidate bases the planning process
 - - laboratory safety manuals and standard operating procedures in line with relevant Commonwealth and State/Territory legislation
 - - WHS policies on which the candidate bases the planning process.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTDET015 Construct complete removable acrylic dentures and appliances

Modification History

N/A

Application

This unit of competency describes the skills and knowledge required to construct a trial prosthesis suitable for insertion in the mouth, convert it to clinically acceptable materials and finish according to laboratory standards.

This unit applies to work in dental technology.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Articulate by means of face-bow	1.1 Receive face-bow with completed bite registration. 1.2 Read and interpret work order 1.3 Articulate on an industry specific articulator in accordance with clinician requirements

2. Prepare case for setting of teeth	2.1 Select artificial teeth in accordance with work order 2.2 Modify bases and rims as required for positioning teeth
3. Arrange artificial teeth	3.1 Follow work order to position and attach the prescribed artificial teeth 3.2 Shape and contour the supportive wax and contour to gingival outline
4. Wax up denture for try-in	4.1 Contour facial and lingual aspects 4.2 Locate and relieve muscle attachments 4.3 Smooth and round peripheral extensions 4.4 Confirm distal extensions 4.5 Decontaminate the trial prosthesis according to infection control guidelines 4.6 Dry the trial prosthesis and place in a sealed container for dispatch
5. Check and modify the returned trial prosthesis	5.1 Decontaminate the returned prosthesis and identify any modifications that are required 5.2 Check the returned trial prosthesis for loosening or movement of teeth and make necessary adjustments 5.3 Fit the returned trial prosthesis to the model if it needs to be modified, articulate and make necessary modifications
6. Wax case for finish consistent with work order	6.1 Evaluate the work order, models and denture design and decide whether or not to use a duplicate model for processing the final prosthesis 6.2 Apply wax as required by work order 6.3 Contour facial and lingual aspects
7. Select and prepare materials and processing technique	7.1 Identify the appropriate polymer system for case 7.2 Identify the appropriate investment technique 7.3 Identify the appropriate processing cycle 7.4 Select polymeric material to construct the prosthesis 7.5 Prepare system components in accordance with manufacturers' instructions 7.6 Allow materials to reach application stage
8. Process denture	8.1 Apply appropriate investment techniques 8.2 Apply material to mould

	8.3 Process the polymeric material for the correct length of time at the correct temperature 8.4 Devest model and remove the processed prosthesis without causing damage to it 8.5 Trim excess material and remount on articulator
9. Finish denture	9.1 Select methods, materials and equipment for trimming, finishing and polishing the prosthesis appropriate to the appliance and the materials used in its construction 9.2 Reposition models on the articulator where possible 9.3 Assess the articulated prosthesis and confirm that articulation is appropriate to the work order 9.4 Make any necessary adjustments to maintain original vertical dimension 9.5 Remove any processing irregularities and sharp edges 9.6 Polish the non-fitting surfaces of the prosthesis to create smooth, polished surfaces 9.7 Evaluate the finished prosthesis 9.8 Decontaminate the dentures according to infection control guidelines 9.9 Place in a sealed container for dispatch

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTDET015 Construct complete removable acrylic dentures and appliances

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- • read and correctly interpreted 2 work orders, arranged artificial teeth, and used standard precautions and safe work practices to wax, process and finish 1 maxillary and 1 mandibular complete acrylic prosthesis to a standard suitable for insertion in the mouth
- • critically evaluated the 2 complete acrylic prostheses produced to meet technical laboratory and patient requirements, including confirming that each acrylic prosthesis:
 - - is compliant with the work order
 - - is free from defects
 - - is functionally effective in line with the design and occlusion and is suitable for insertion in the mouth.

Knowledge Evidence

The candidate must demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- • Australian/New Zealand Standards, workplace health and safety (WHS) policies, Dental Board of Australia guidelines on infection control, Commonwealth and State/Territory legislation and organisation policies relating to dental laboratory work
- • fundamental oral anatomy including:
 - - dentition – arrangement of the teeth, naming and coding of teeth
 - - structures of the oral cavity – hard and soft palate, lateral and posterior borders of the oral cavity, tongue and floor of the mouth
 - - teeth form and function
- • articulation procedures
- • properties of a range of dental materials used in the construction of removable acrylic prostheses including:
 - - atomic structure

- - chemical bonding and reactions
- - classification of materials
- - classification of matter
- - properties of materials
- • knowledge of dental polymers including:
 - - acrylic and modified acrylic prosthetic teeth
 - - acrylic plastics as soft liners
 - - acrylic plastics for denture bases including composition and properties
 - - acrylic-metal combinations
 - - acrylics for construction of custom trays
 - - modified acrylic denture base plastics including manipulation and processing
 - - the polymerisation process including cross-linked polymers, copolymers, modified polymers and vinyl plastics
- • mechanical devices:
 - - articulators
 - - face-bows
- • recording techniques and devices
- • relevant material science for carrying out procedures.
-

Assessment Conditions

Skills must have been demonstrated in a dental laboratory workplace or in a simulated dental laboratory environment that reflects workplace laboratory conditions. The following conditions must be met for this unit:

- • use of suitable facilities, equipment and resources including:
 - - access to work order
 - - Dental Board of Australia guidelines on infection control on which the candidate bases the planning process
 - - laboratory safety manuals and standard operating procedures in line with relevant Commonwealth and State/Territory legislation
 - - WHS policies on which the candidate bases the planning process.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Link

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTDET016 Design digital dental restorations and appliances using computer-aided design (CAD)

Modification History

N/A

Application

This unit of competency describes the skills and knowledge required to design dental restorations and appliances using computer-aided design (CAD) technologies.

This unit applies to dental technicians working in dental laboratories.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

Nil

Competency field(s)

Dental

Unit sector(s)

Dental technology

Elements and Performance Criteria

<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine restoration or appliance requirements.	1.1 Access and interpret work order. 1.2 Apply standard infection control precautions when receiving, handling and working on dental materials. 1.3 Ensure accuracy of work order and seek additional information as required.

	1.4 Assess quality of impression, model or intraoral scan and seek any required adjustments. 1.5 Scan physical impression, model or download intraoral scan and create digital representation of impression. 1.6 Identify technologies and computer-aided design (CAD) software required to complete digital design of restoration or appliance, and ensure availability.
2. Design restoration or appliance using computer-aided design (CAD).	2.1 Access required technologies and computer-aided design (CAD) software. 2.2 Follow workplace policies and procedures to access and import digital impression files into computer-aided design (CAD) software. 2.3 Create 3-D images by manipulating 3-D shapes. 2.4 Establish coordinate system and orientation according to work order. 2.5 Manipulate computer-aided design (CAD) software features and functions to create digital design of restoration or appliance. 2.6 Apply rendering techniques to digital design of restoration or appliance.
3. Finalise digital design for manufacturing.	3.1 Ensure digital design of restoration or appliance accurately reflects requirements of work order. 3.2 Make any final adjustments to ensure integrity and accuracy of digital design. 3.3 Ensure digital design is available in format required for manufacturing. 3.4 Finalise digital design for production and store according to workplace requirements.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed below.

Skills	DESCRIPTION

Reading skills to:	• interpret technical language within various texts.
Oral communications skills to:	• pronounce complex words correctly and use them in the correct context.
Self-management skills to:	• work within parameters of own scope of practice.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

HLTDET016 Design digital dental restorations and appliances using computer-aided design (CAD)		This unit has been created to address a skill or task required by industry that is not covered by an existing unit of competency	Newly created

Assessment Requirements for HLTDET016 Design digital dental restorations and appliances using computer-aided design (CAD)

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- read and correctly interpreted four work orders
- used computer-aided design (CAD) software and technologies to prepare four digitally designed restorations or appliances, one of which must be a unit of crown and bridge work. The remaining three must be selected from two of the following categories:
 - prosthetics
 - chrome casting
 - orthodontics
 - splints
- applied infection control precautions and safe work practices to prepare the above four digital restoration or appliance designs
- critically evaluated the above four digital restoration or appliance designs to meet requirements of the work order.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- Australian/New Zealand Standards, workplace health and safety (WHS) policies, Dental Board of Australia guidelines on infection control, Commonwealth legislation and State/Territory legislation, and organisational policies relating to dental laboratory work
- requirements and organisational policies relating to dental laboratory work including:
 - use of standard infection control precautions
 - use of personal protective equipment
 - requirements for the use of technologies and computer-aided design (CAD) software
 - requirements for storage of digital designs

- work health and safety
- benefits and limitations of computer-aided design (CAD) in digital dentistry
- commonly used types of computer-aided design (CAD) technologies used in the dental industry
- digital design processes and procedures
- digital design file types
- digital and physical impressions and properties
- types of digital restorations and appliances
- properties of restoration and appliance material applicable to computer-aided manufacturing (CAM) and the applicability of each material
- computer-aided manufacturing types and processes commonly used in digital dentistry
- fundamentals of oral anatomy:
 - dentition – arrangement of teeth, naming and coding of teeth
 - structures of the oral cavity – hard and soft palate, lateral and posterior borders of the oral cavity, tongue and floor of mouth
 - teeth form and function.

Assessment Conditions

Skills must have been demonstrated in a dental laboratory workplace or in a simulated dental laboratory environment that reflects workplace laboratory conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources:
 - access to a variety of work orders
 - digital and/or physical impressions or models
 - computer-aided design (CAD) software and technologies commonly used within the dental industry
 - Dental Board of Australia guidelines on infection control on which the candidate bases the planning process
 - laboratory safety manuals and procedures in line with relevant Commonwealth and State/Territory legislation.

Assessors must satisfy the standards for registered training providers' requirements for assessors.

HLTENN035 Practise nursing within the Australian health care system

Modification History

N/A

Application

This unit describes the performance outcomes, skills and knowledge required to practise as a nursing professional within the Australian health care system, providing health care across the lifespan of people in health and community care services and environments.

This unit applies to enrolled nursing work carried out in consultation and collaboration with registered nurses, and under supervisory arrangements aligned to the Nursing and Midwifery Board of Australia (NMBA) regulatory authority legislative requirements.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian Standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Enrolled Nursing

Elements and Performance Criteria

Elements	Performance criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

1. Apply principles and requirements of nursing practice to work in the Australian health care system.	1.1. Apply principles of primary and tertiary health care and the principles of wellness to Australian contemporary nursing practice. 1.2. Identify agencies to facilitate positive health outcomes. 1.3. Identify funding sources for health care in Australia. 1.4. Identify political and economic policy and the impact on health care delivery in Australia. 1.5. Apply requirements of alternative and non-traditional approaches to health care and identify their place in contemporary nursing practice. 1.6. Apply requirements of Aboriginal and Torres Strait Islander health and principles of cultural safety. 1.7. Provide nursing care in accordance with NMBA Enrolled Nurse Standards for Practice. 1.8. Identify current health issues impacting clinical practice and health policy development. 1.9. Identify requirements of the National Nursing and Midwifery Digital Health Capability Framework and its impacts on the health care environment.
2. Identify and respond to factors and issues affecting health in Australia.	2.1. Identify the historical development and current perspectives of the Australian nursing profession within the scope of practice of an enrolled nurse. 2.2. Incorporate theoretical concepts of nursing theory in clinical engagement and practice related to nursing care. 2.3. Identify existing health support services to respond to health issues facing people in Australia. 2.4. Identify and evaluate community health promotional strategies.

	2.5. Incorporate the principles of wellness to emotional and social wellbeing.
3. Work in the context of professional nursing practice.	3.1. Apply requirements of and work within the enrolled nurse scope of practice. 3.2. Follow organisation procedures that comply with audit and accreditation processes. 3.3. Apply jurisdictional requirements relating to the NMBA Enrolled Nurse Standards for Practice.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTENN035 Practise nursing within the Australian health care system

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- complete one clinical work placement in professional nursing practice that involves:
 - performing two different professional interactions with the registered nurse and multidisciplinary health care team to demonstrate adaptation to nursing role and application of knowledge to nursing practice
 - reflecting on the two professional interactions and identifying how nursing practice contributed health outcomes.

The tasks must be undertaken in accordance with the Nursing and Midwifery Board of Australia (NMBA) professional practice standards, codes and guidelines.

Knowledge Evidence

Demonstrate knowledge required to complete tasks outlined in elements and performance criteria of this unit:

- Nursing and Midwifery Board of Australia Enrolled Nurse Standards for Practice
- principles of primary and tertiary health care
- principles of wellness
- alternative, integrative and non-traditional approaches to health care in Australia
- health and illness issues facing people who have come from countries other than Australia
- health issues and impacts for health care delivery for Aboriginal and Torres Strait Islander people and culturally and linguistically diverse groups
- Aboriginal and Torres Strait Islander health and principles of cultural safety
- historical and current perspectives of the nursing profession
- development and historical context of the Australian health care system, current health service models and State/Territory standards of care
- health care environments and the roles of the multidisciplinary health care team and personnel associated with health service delivery
- themes that impact health and illness for people from Australia and other countries, including environment, cultural barriers and community acceptance

- social, political and economic impacts on health care delivery including funding sources and constraints on services and resource allocation
- overall structure, strengths and weakness of the Australian health care system and the local area
- current issues which impact health policy development
- National Nursing and Midwifery Digital Health Capability Framework
- how health and illness factors impact people
- roles of regulatory authorities, and industrial and professional bodies
- role of the Congress of Aboriginal and Torres Strait Islander Nurses and Midwives (CATSINaM)
- national, State/Territory and local health priorities.

Assessment Conditions

To be eligible to apply for registration as an enrolled nurse and to practice in Australia, each applicant must complete a Diploma of Nursing program accredited by the Australian Nursing and Midwifery Accreditation Council (ANMAC) and approved as ‘an approved program of study’ by the Nursing and Midwifery Board of Australia (NMBA) in accordance with the Enrolled Nurse Accreditation Standards.

For more detail visit <https://www.ahpra.gov.au>.

Skills must be demonstrated in the workplace or in a simulated environment as specified in the performance evidence that model industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors.

Assessors must also hold current registration as a registered nurse with the Nursing and Midwifery Board of Australia (NMBA).

Link

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTENN036 Apply communication skills in nursing practice

Modification History

N/A

Application

This unit describes the performance outcomes, skills and knowledge required to communicate effectively with people, families and carers, and with other health care professionals, in health care settings.

Communication in nursing practice requires using information technology as well as interpersonal skills applied therapeutically in nursing care and small group discussions.

This unit applies to enrolled nursing work carried out in consultation and collaboration with registered nurses, and under supervisory arrangements aligned to the Nursing and Midwifery Board of Australia (NMBA) regulatory authority legislative requirements.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian Standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements	Performance criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

1. Use effective communication strategies.	1.1. Apply principles of effective communication to facilitate communications. 1.2. Maximise opportunities to involve the person, families and carers in care and treatment. 1.3. Clarify roles and responsibilities of the multidisciplinary health care team for effective communicating situations, including clarifying own role as an enrolled nurse. 1.4. Apply respectful and empathetic communication techniques. 1.5. Use contemporary health terminology in written and verbal communications.
2. Identify and address constraints to effective communication.	2.1. Implement strategies within scope of practice to address communication situations in accordance with organisational policies and procedures. 2.2. Identify and address the need for advocacy for the person, families and carers in care.
3. Use information technology to support communication in nursing practice.	3.1. Use information technology to prepare, document and communicate nursing patient clinical records and reports to the multidisciplinary health care team. 3.2. Comply with organisational policies and procedures for electronic communication. 3.3. Apply organisational policies and procedures to access data for the purpose of nursing care within scope of practice. 3.4. Apply ethical and legal regulatory requirements for electronic practices. 3.5. Apply Australian Health Practitioner Regulation Agency (AHPRA) social media guidelines to own practice. 3.6. Provide information in accordance with organisational policies and procedures to enable informed decision making.
4. Lead small group discussions.	4.1. Monitor and respond to changing group dynamics.

	4.2. Clarify purpose of group meetings and manage discussion to achieve identified objectives. 4.3. Implement meeting procedures appropriate to meeting purpose. 4.4. Clarify participant roles and use communication strategies to support their effective contribution to discussion.
5. Give and receive feedback for performance improvement.	5.1. Apply communication strategies that deliver constructive outcomes in giving and receiving feedback. 5.2. Use language in a respectful manner to give and receive feedback. 5.3. Use constructive feedback to improve own professional performance.
6. Evaluate effectiveness of communication.	6.1. Participate in debriefing sessions following communication of situations. 6.2. Evaluate, document and report outcomes of applied communication strategies.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTENN036 Apply communication skills in nursing practice

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- communicate effectively within the context of the enrolled nurse scope of practice in three different situations that involve:
 - one situation involving a person, families or carers
 - one situation involving work colleagues.

The tasks must be undertaken in accordance with the Nursing and Midwifery Board of Australia (NMBA) professional practice standards, codes and guidelines.

Knowledge Evidence

Demonstrate knowledge required to complete tasks outlined in elements and performance criteria of this unit:

- National Safety and Quality Health Service (NSQHS) Standards: Communicating for Safety Standard
- Congress of Aboriginal and Torres Strait Islander Nurses and Midwives (CATSINaM)
- Aboriginal and Torres Strait Islander health and principles of cultural safety
- culturally appropriate communication
- characteristics of effective partnerships in nursing:
 - confidentiality
 - trust
 - self-reflection
 - social conversation
 - creating a therapeutic environment
- documentation related to clinical handover
- communication strategies and techniques:
 - interviewing techniques
 - active listening
 - conflict resolution

- interpersonal communication
 - negotiating solutions
 - group dynamics
 - access and use of interpreters
- factors that facilitate and inhibit communication including cognitive and physical disability
- information technology use in professional communication
- principles underpinning nursing documentation including legal obligations
- principles, processes and practices of open disclosure in line with the Australian Open Disclosure Framework
- medical terminology used in clinical situations and relevant to enrolled nurse practice
- sensory losses and appropriate nursing responses
- social media policies relevant to nursing practice.

Assessment Conditions

To be eligible to apply for registration as an enrolled nurse and to practice in Australia, each applicant must complete a Diploma of Nursing program accredited by the Australian Nursing and Midwifery Accreditation Council (ANMAC) and approved as ‘an approved program of study’ by the Nursing and Midwifery Board of Australia (NMBA) in accordance with the Enrolled Nurse Accreditation Standards.

For more detail visit <https://www.ahpra.gov.au>.

Skills must be demonstrated in the workplace or in a simulated environment as specified in the performance evidence that model industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors.

Assessors must also hold current registration as a registered nurse with the Nursing and Midwifery Board of Australia (NMBA).

N/A

Application

This unit of competency describes the performance outcomes, skills and knowledge required, within the scope of practice, to perform preliminary and ongoing physical health assessments of all body systems, gathering data that contributes to an individualised health plan of care.

This unit applies to enrolled nursing work carried out in consultation and collaboration with registered nurses, and under supervisory arrangements aligned to the Nursing and Midwifery Board of Australia (NMBA) regulatory authority legislative requirements.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian Standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements	Performance criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

1. Perform admission assessment.	1.1. Introduce self and explain processes before commencing nursing assessment activities. 1.2. Collect and record admission information including gender, age, cultural, religious and spiritual information in accordance with organisational policies and procedures, and practice standards. 1.3. Perform baseline clinical assessment and document findings including vital signs. 1.4. Interpret and analyse objective and subjective assessment data against normal range. 1.5. Record lifestyle patterns, health history and current health practices. 1.6. Clarify emotional and physical needs of the families and carers. 1.7. Document and communicate alterations and deteriorations of health status.
2. Contribute to plan of nursing care.	2.1. Analyse health history and health assessment to identify risks, likely impacts on daily living activities and care needs. 2.2. Use a problem-solving approach to assist comprehensive nursing care planning. 2.3. Clarify and reflect the person's interests and physical, emotional and psychosocial needs in nursing care planning and documentation.
3 Evaluate and modify plan of nursing care.	3.1. Analyse, evaluate and review nursing care planning decisions with registered nurse and multidisciplinary health care team. 3.2. Confirm with the person, families or carers that planned nursing care reflects their needs including their uniqueness, culture, religious beliefs and management of stress. 3.3. Ensure plan of nursing care is based on principles of contemporary, evidence-based practice and incorporates risk assessment. 3.4. Review and evaluate plan of nursing care to ensure care needs are met.
4. Perform discharge procedures.	4.1. Collect discharge planning data.

	• 4.2. Contribute to nursing assessment and document issues to facilitate discharge. • 4.3. Identify community support services and resources to assist in discharge planning. • 4.4. Check to ensure discharge requirements are planned and updated including follow up requirements, discharge prescriptions, My Healthcare Record, referrals and reports for ongoing treatment to health practitioners.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTENN037 Perform clinical assessment and contribute to planning nursing care

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- perform nursing admission and discharge as per organisational policies and procedures for:
 - one person in the workplace.
 - one person in the workplace or in a simulated environment.
- conduct comprehensive clinical health assessment on two different persons including:
 - blood glucose monitoring.
 - vital signs.
 - integumentary assessment.
 - urinalysis
 - neurological observations.
 - neurovascular observations.
 - pain assessment.
- develop one plan of nursing care based on the comprehensive clinical health assessment.

The tasks must be undertaken in accordance with the Nursing and Midwifery Board of Australia (NMBA) professional practice standards, codes and guidelines.

Knowledge Evidence

Demonstrate knowledge required to complete tasks outlined in elements and performance criteria of this unit:

- admission and discharge planning procedures and processes and documentation required.
- human growth and developmental stages.
- influences of genetics and environment on development.
- impact of family on a person's gender-specific health care needs.
- how to use equipment for health assessment and data collection.

- how to assist a person in activities of daily living including aids to assist activities.
- how to perform clinical measurements and assessments for:
 - vital signs.
 - blood glucose level test.
 - height and weight.
 - oxygen therapy.
 - neurological observation and conscious state.
 - neurovascular observation.
 - sensory perception, personal aids and devices required for hearing and sight.
 - skin assessment.
 - urinalysis
 - pain assessment
 - gastrointestinal and bowel sounds
- techniques for interpretation and analysis of health-related information.
- principles for undertaking a health assessment.
- signs, symptoms and response to a deteriorating person.
- how and when to report person's deterioration.
- wellness approach to health, including physiology and psychosocial aspects.
- variations in health needs and activities of daily living across a person's lifespan.

Assessment Conditions

To be eligible to apply for registration as an enrolled nurse and to practice in Australia, each applicant must complete a Diploma of Nursing program accredited by the Australian Nursing and Midwifery Accreditation Council (ANMAC) and approved as 'an approved program of study' by the Nursing and Midwifery Board of Australia (NMBA) in accordance with the Enrolled Nurse Accreditation Standards.

For more detail visit <https://www.ahpra.gov.au>.

Skills must be demonstrated in the workplace or in a simulated environment as specified in the performance evidence that model industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Assessors must also hold current registration as a registered nurse with the Nursing and Midwifery Board of Australia (NMBA).

Elements and Performance Criteria

Elements	Performancecriteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

1. Prepare a person for nursing care procedures.	1.1. Explain procedures, preparation required and timeframe involved, and gain consent. 1.2. Apply culturally safe approaches for all peoples including specific approaches required for Aboriginal and Torres Strait Islander peoples. 1.3. Maintain privacy and dignity during preparation and procedures.
2. Implement nursing care procedures to meet identified needs.	2.1. Provide assistance to address personal and oral hygiene and dressing and grooming needs to achieve health outcomes. 2.2. Identify contributing factors and implement strategies to prevent skin problems and manage skin integrity. 2.3. Confirm nutritional and elimination needs and apply strategies to meet identified needs. 2.4. Assist respiratory function by demonstrating and promoting deep breathing and coughing exercises. 2.5. Use measures to promote comfort, rest and sleep. 2.6. Encourage the person to contribute to their own independence and mobility through active and passive exercises. 2.7. Identify and respond to signs and symptoms of emergency situations and conditions. 2.8. Use emergency procedures and initiate basic life support according to organisational policies and procedures.
3. Monitor identified nursing care needs.	3.1. Maintain ongoing monitoring through observation and using equipment and devices. 3.2. Prioritise work activities to address urgent needs and maintain a balanced approach to own workload. 3.3. Record and report concerns in the person's condition and behaviour to the registered nurse, and report situations of risk according to organisational policies and procedures.

4. Evaluate outcomes of nursing care provided.	4.1. Identify and evaluate own contribution to nursing plan of care. 4.2. Evaluate progress towards planned outcomes as documented in the plan of care. 4.3. Make required changes to nursing plan of care in line with nursing best practice. 4.4. Record and report evaluation of nursing care provided.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTENN038 Implement, monitor and evaluate nursing care

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- implement and monitor two different nursing plans of care in the workplace.
- evaluate one nursing plan of care
- use emergency codes and perform basic life support in a simulated environment on an adult, child and infant manikin according to organisational policies and procedures.

The tasks must be undertaken in accordance with the Nursing and Midwifery Board of Australia (NMBA) professional practice standards, codes and guidelines.

Knowledge Evidence

Demonstrate knowledge required to complete tasks outlined in elements and performance criteria of this unit:

- role of the Congress of Aboriginal and Torres Strait Islander Nurses and Midwives (CATSINaM)
- Aboriginal and Torres Strait Islander health and principles of cultural safety
- activities of daily living.
- factors that promote and impede comfort, sleep and rest
- purpose of hygiene and grooming.
- actual and potential nursing care including:
 - hygiene
 - eye care
 - aural care
 - continence and elimination
 - continence management including aids and devices
 - physical comfort
 - sleep disturbances
 - oral hygiene
 - immobility

- respiration and circulation
- fluid and nutritional deficits
- pain assessment and interventions
- confirming underlying medical condition
- sensory deficits including use of personal aids and devices
- cognitive deficits
- allergic reactions
- severe intolerances
- age
- length of stay
- mental health condition
- pain
- presence of morbidity and co-morbidities
- basic life support using Australian Resuscitation Council (ARC) guidelines
- risk prevention strategies:
 - maintaining a safe environment
 - preventing falls and falls assessment
 - promoting active and passive exercises
 - promoting deep breathing and coughing exercises
 - maintaining skin integrity and pressure area care
- recording and reporting requirements for comprehensive clinical handovers
- organisational procedures for evaluation of nursing outcomes.

Assessment Conditions

To be eligible to apply for registration as an enrolled nurse and to practice in Australia, each applicant must complete a Diploma of Nursing program accredited by the Australian Nursing and Midwifery Accreditation Council (ANMAC) and approved as ‘an approved program of study’ by the Nursing and Midwifery Board of Australia (NMBA) in accordance with the Enrolled Nurse Accreditation Standards.

For more detail visit <https://www.ahpra.gov.au>.

Skills must be demonstrated in the workplace or in a simulated environment as specified in the performance evidence that model industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors.

Assessors must also hold current registration as a registered nurse with the Nursing and Midwifery Board of Australia (NMBA).

HLTENN039 Apply principles of wound management

Modification History

N/A

Application

This unit describes the performance outcomes, skills and knowledge required to apply contemporary wound management principles to the care of persons with various types of wounds. It involves working with the registered nurse within the multidisciplinary health care team to contribute to the assessment, treatment and ongoing management of wounds.

This unit applies to enrolled nursing work carried out in consultation and collaboration with registered nurses, and under supervisory arrangements aligned to the Nursing and Midwifery Board of Australia (NMBA) regulatory authority legislative requirements.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian Standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements	Performancecriteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

1. Prepare for wound care management.	1.1. Use infection control principles to minimise cross-infection during nursing assessment and implementation of wound management plans. 1.2. Interpret wound management plan relating to wound care including dressing type and frequency of intervention. 1.3. Identify stage of wound healing and determine wound care product.
2. Contribute to development and implementation of a wound plan of care.	2.1. Apply findings from physical health status and wound pain assessment to implement wound care. 2.2. Apply requirements of wound healing physiology and aetiology to the wound care plan. 2.3. Identify wound management products and techniques for each phase of wound healing. 2.4. Contribute to an individual wound management plan in consultation with the registered nurse. 2.5. Apply requirements of wound classification in wound care planning. 2.6. Document wound management plan for intervention and assessment. 2.7. Implement contemporary wound management strategies to manage the person's wounds. 2.8. Apply requirements of wound healing phase of haemostasis. 2.9. Apply requirements of preventative wound care strategies to develop and implement the wound care plan. 2.10. Apply contemporary assessment techniques to implement wound care strategies, in accordance with national standards and organisational policies and procedures. 2.11. Access and prepare wound dressing products as required in the wound

	management plan for the identified phase of wound healing. • 2.12. Dispose of used articles including hazardous waste according to organisational policies and procedures. • 2.13. Make the person comfortable and complete required wound management documentation.
• 3. Assess and document wound and wound care plan.	• 3.1. Assist assessment of the wound using medical terminology. • 3.2. Apply requirements of the physiological and biochemical processes associated with normal wound healing when assessing wounds. • 3.3. Identify factors that impact on wound healing including psychosocial impact of a wound. • 3.4. Identify common problems and complications of wounds. • 3.5. Document the wound care plan. • 3.6. Apply universal precautions and infection control principles to the wound care plan.
• 4. Apply wound management strategies to wounds.	• 4.1. Apply requirements of wound complexity and the pathological processes of wound healing for wounds. • 4.2. Identify common problems and complications of wounds. • 4.3. Adhere to aseptic technique in the application of wound care. • 4.4. Adhere to aseptic technique to remove wound sutures, surgical clips and to shorten and remove wound drains. • 4.5. Participate in the development, review and assessment of individualised wound plans.
• 5. Assist in evaluating outcomes of nursing actions.	• 5.1. Involve person and carer in assessment process. • 5.2. Monitor responses to wound management strategies, and progress towards planned wound management goals.

	• 5.3. Assess, document and communicate progress of wound healing and wound care strategy outcomes using contemporary wound management terminology. • 5.4. Assist in assessing wound management strategies and products used. • 5.5. Communicate assessment findings for modified and alternative wound management strategies, procedures and goals for the person. • 5.6. Work within a cost-effective framework for wound management. • 5.7. Identify, plan and apply health education and promotion strategies to wound management.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTENN039 Apply principles of wound management

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- perform wound care, including wound assessment, wound care planning and health education in the workplace on three different wounds.

The tasks must be undertaken in accordance with the Nursing and Midwifery Board of Australia (NMBA) professional practice standards, codes and guidelines.

Knowledge Evidence

Demonstrate knowledge required to complete tasks outlined in elements and performance criteria of this unit:

- National Safety and Quality Health Service (NSQHS) Standards
- Aseptic Non Touch Technique (ANTT) guidelines for wound dressings
- community and educational resources and professional organisations associated with wound management
- historical development of contemporary wound management strategies
- pain management and medication administration timeframes to wound care
- causes of wounds:
 - micro-organisms
 - common fungal infections
 - common viral infections
 - surgical
 - trauma
 - chronic illness
- organisational policies and procedures for wound care
- wound management terminology
- rapid response to physical injury:
 - to control bleeding:
 - vasoconstriction

- platelet response
 - biochemical response
 - three phases of tissue repair and regeneration:
 - inflammation (0 - 4 days)
 - reconstruction (2 - 24 days)
 - maturation (24 days - 1 year)
- wound management techniques:
 - wound debridement
 - wound drains and wound drainage systems
 - wound specimen collection
 - interpreting laboratory results in consultation with registered nurse and multidisciplinary health care team
 - doppler assessment
 - compression therapy
 - wound cleansing
 - wound measurement
 - clinical photography
 - wound tracing
- types of wounds:
 - surgical wounds
 - pressure ulcers
 - venous ulcers
 - arterial ulcers
 - mixed ulcers
 - malignant wounds
 - neuropathic ulceration wounds
 - infected wounds
 - burns
 - fistulas and sinuses
 - skin grafts
 - traumatic
 - skin tears
- wound management strategies:
 - wound management principles

- moist wound healing
- comprehensive assessment
- individualised wound plan of care
- skin assessment
- risk assessment
- pressure support and relieving devices
- prevention programs
- wound characteristics
- procedures for collecting wound specimens for microbiology and cytology
- selection of wound products:
 - primary dressing
 - secondary dressing
 - wound cleansing.

Assessment Conditions

To be eligible to apply for registration as an enrolled nurse and to practice in Australia, each applicant must complete a Diploma of Nursing program accredited by the Australian Nursing and Midwifery Accreditation Council (ANMAC) and approved as ‘an approved program of study’ by the Nursing and Midwifery Board of Australia (NMBA) in accordance with the Enrolled Nurse Accreditation Standards.

For more detail visit <https://www.ahpra.gov.au>.

Skills must be demonstrated in the workplace or in a simulated environment as specified in the performance evidence that model industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors.

Assessors must also hold current registration as a registered nurse with the Nursing and Midwifery Board of Australia (NMBA).

HLTENN040 Administer and monitor medicines and intravenous therapy

Modification History

N/A

Application

This unit describes the performance outcomes, skills and knowledge required to administer and monitor medicine and intravenous (IV) therapy including calculating dosage requirements, reading and applying written instructions from an authorised prescriber, assessing the person for medicine effectiveness and side effects, and responding to an allergic pharmacological reaction.

This unit applies to enrolled nursing work carried out in consultation and collaboration with registered nurses and under supervisory arrangements aligned to the Nursing and Midwifery Board of Australia (NMBA) regulatory authority legislative requirements.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian Standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements	Performance criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

1. Minimise potential risk to ensure safe administration of medicine.	1.1. Refer to drugs and poisons schedules and classifications as determined by law. 1.2. Identify indications for prescribed medicine and intravenous (IV) therapy. 1.3. Identify pharmacology and substance incompatibilities in relation to specific situations involving medicine administration, blood and blood products. 1.4. Evaluate the effect of commonly used medicine and IV fluids on the body before medicine administration and IV infusion. 1.5. Refer to medical history records to identify documented allergies and contraindications.
2. Prepare for medicine administration and infusion of IV fluids.	2.1. Explain the process of medicine administration and IV fluid infusion to the person, confirm their understanding and obtain consent. 2.2. Identify correct administration route and site for medicine and IV fluid to be administered and position the person. 2.3. Calculate accurate medicine dosage and IV fluid infusion rate for administration of drugs. 2.4. Prepare medicine in accordance with legislative and jurisdictional requirements and organisational policies and procedures. 2.5. Identify medicine administration techniques and precautions specific to the person's situation and as per medicine orders. 2.6. Prepare blood and blood products for blood transfusions according to organisational policies and procedures. 2.7. Assess intravenous access site and line for abnormalities and refer to registered nurse and treating team as required in accordance with the National Safety and Quality Health Service (NSQHS) Standards.
3. Administer and store medicine.	3.1. Administer medicine and IV fluid to the person applying the Rights of Medication Administration and in accordance with jurisdictional and legislative requirements,

	organisational policies and procedures and professional practice standards. • 3.2. Report a person's refusal of medicine, IV therapy and incomplete medicine and IV therapy administration to the supervising registered nurse. • 3.3. Ensure medicine and blood and blood products are stored, handled and disposed of according to legislation, organisational policies and procedures and manufacturer instructions.
• 4. Monitor and evaluate a person's response to administered medicine, IV fluids and blood and blood products.	• 4.1. Identify, monitor, document and report acute and delayed adverse reactions of the person to administered medicine, IV fluids, blood and blood products. • 4.2. Implement emergency actions in response to identified adverse event. • 4.3. Monitor and evaluate IV cannula according to organisational policies and procedures. • 4.4. Provide information to the person, families or carer relating to administration of medicines including possible side effects.
• 5. Assess effectiveness of pain-relieving medicine.	• 5.1. Undertake comprehensive pain assessment. • 5.2. Clarify location and nature of pain and discomfort, taking into account factors that influence person's perception of pain. • 5.3. Identify prescribed medicines and complementary strategies to alleviate pain and discomfort. • 5.4. Assess evaluate and document medicine effectiveness and undertake comprehensive pain assessment.

Modification History

N/A

Performance Evidence

Demonstrate evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- for two people:
 - reference medical history records to identify documented allergies and contraindications
 - use the Rights of Medication Administration and calculate medicine with 100% accuracy to administer medicines:
 - oral medicine including two in simulation and three in the workplace
 - sub-cutaneous injection including one in simulation and one in the workplace
 - intramuscular injection in simulation
 - peripheral IV injection including one in simulation and one in the workplace
 - prepare equipment for IV therapy and blood and blood products
 - monitor administration including assessing cannula site

The tasks must be undertaken in accordance with the Nursing and Midwifery Board of Australia (NMBA) professional practice standards, codes and guidelines.

Knowledge Evidence

Demonstrate knowledge required to complete tasks outlined in elements and performance criteria of this unit:

- legal requirements for practice parameters of enrolled nurse in relation to the administration and documentation of medicine, including legal requirements for each route of administration
- Australian Commission on Safety and Quality in Health Care (ACSQHC) National Standard Medication Charts
- legal and regulatory framework including Commonwealth and State/Territory drugs and poisons acts, regulations and codes
- pharmacology of medicine:
 - pharmacodynamics

- pharmacokinetics
 - pharmacotherapeutics
 - therapeutic drug levels
 - anaphylactic reactions
 - adverse reactions
 - contraindications
 - precautions
 - side effects
- management of potential complications of blood transfusion
- safe transport, storage, handling, checking and disposal of blood and blood products
- Rights of Medication Administration requirements:
 - right medicine
 - right dose
 - right prescription
 - right route
 - right time
 - right person
 - right expiration date
 - right to refuse
 - right documentation
 - right response
 - right form
- high risk medicine as per the ACSQHC
- how medicine is administered via the following routes:
 - oral
 - sublingual and buccal
 - inhalation
 - subcutaneous
 - intramuscular
 - intravenous
 - enteral
 - intranasal
 - ocular
 - rectal

- transdermal
- vaginal
- aural
- IV medicine administration methods:
 - push
 - bolus
 - gravity
 - electronic infusion pump
 - secondary line
 - syringe driver
 - subcutaneous
- intravascular access devices:
 - central venous catheter (CVC)
 - peripherally inserted central catheter (PICC)
 - vascath
 - implanted venous port
 - Hickman
- access devices:
 - peripheral
 - central
 - percutaneous
 - subcutaneous
- patient-controlled analgesia (PCA)
- pharmacodynamic effects of medicine groups:

Anaesthetics	Anticonvulsants
Analgesia	Antidepressants
Antacids	Antidiarrheals
Antianginals	Antiemetics
Anxiolytics	Antifungals
Antiarrhythmics	Antihistamines
Antibiotics	Antihypertensives
Anticholinergics	Anti-inflammatory
Anticoagulants	

Antineoplastics Antiparkinsonian Antipruritic Antipsychotics Antiseptics Antiulcer Antivirals	Hormones Hypnotics, sedatives Hypoglycaemics Insulin
Beta-blockers Benzodiazepines Bronchodilators	Electrolyte solutions
Laxatives/aperients	Ophthalmic, otic Nasal medicine – nasopharyngeal medicine
Contraceptives Corticosteroids	Diuretics
Including narcotic analgesia	Vitamins

- techniques for calculating medicine dosages:
 - calculation formulae
 - ACSQHC tall man lettering
 - commonly used dose measurement:
 - microgram (microg, MICROg)
 - milligram (mg)
 - gram (g)
 - millilitre (mL)
 - litre (L)
 - millimole (mmol)
 - calculation of dosages of injectable drugs including liquid and solid unit dosages
 - flow rate:
 - drops per minute
 - millilitres per hour
 - paediatric dosage calculations including body weight, surface area and age-related dose reduction

- geriatric dosage calculations including body weight, surface area and age
 - dose administration aids (DAAs) where dose is already calculated
- organisational policies and procedures for addressing medicine errors
- drugs commonly used for fluid and electrolyte imbalance:
 - alkalisers
 - diuretics
 - electrolytes
 - replacement solution.

Assessment Conditions

To be eligible to apply for registration as an enrolled nurse and to practice in Australia, each applicant must complete a Diploma of Nursing program accredited by the Australian Nursing and Midwifery Accreditation Council (ANMAC) and approved as ‘an approved program of study’ by the Nursing and Midwifery Board of Australia (NMBA) in accordance with the Enrolled Nurse Accreditation Standards.

For more detail visit <https://www.ahpra.gov.au>.

Skills must be demonstrated in the workplace or in a simulated environment as specified in the performance evidence that model industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Elements and Performance Criteria

Elements	Performancecriteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

1. Practise within scope of professional nursing practice.	1.1. Identify legislative requirements relevant to professional nursing practice and explain how these requirements impact own nursing practice. 1.2. Comply with requirements of legislation related to nursing practice and identify implications of non-compliance. 1.3. Apply codes of ethics, codes of conduct and the enrolled nurse standards for practice. 1.4. Function within scope of jurisdictional requirements for enrolled nurse professional nursing practice. 1.5. Respond to each person in accordance with organisational policies and procedures, including responding appropriately and sensitively to complaints. 1.6. Complete documentation in accordance with State/Territory legislation and organisational policies and procedures. 1.7. Monitor and record compliance with legal obligations and requirements.
2. Apply legal framework to nursing practice.	2.1. Apply concepts of negligence, duty of care and vicarious liability to professional practice as an enrolled nurse. 2.2. Obtain consent before undertaking treatment and procedures. 2.3. Apply principles of restraint including correct intent and application of restraint. 2.4. Use and interpret common legal terms associated with nursing practice. 2.5. Write nursing practice reports according to legal requirements and organisational expectations and requirements. 2.6. Observe privacy and confidentiality requirements in accordance with legislative requirements and organisational policies and procedures.
3. Apply ethical concepts to clinical practice.	3.1. Identify and describe ethics and its place in nursing practice.

	• 3.2. Apply ethical practice in own interactions with the person, families or carers and colleagues. • 3.3. Identify contemporary ethical issues and potential conflicts of interest that may impact nursing practice. • 3.4. Identify, document and report potential ethical issues in accordance with organisational policies and procedures. • 3.5. Develop and implement strategies to resolve ethical issues within own nursing practice in accordance with role parameters.
• 4. Support the rights, interests and needs of the person, families and carers.	• 4.1. Comply with legal responsibilities and duty of care requirements in care activities and interactions with the person, families and carers. • 4.2. Encourage person to exercise their right to make informed decisions about their care. • 4.3. Demonstrate respect and support for dignity of the person, families and carers. • 4.4. Advocate for the person, families and carers in accordance with jurisdictional enrolled nurse scope of practice.
• 5. Apply open disclosure processes.	• 5.1. Reflect on and apply the principles and processes of open disclosure in own work in a health care environment. • 5.2. Identify the roles of other health care workers in relation to open disclosure.

Assessment Requirements for HLTENN041 Apply legal and ethical parameters to nursing practice

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- work within and reflect on the legal and ethical parameters that apply to professional nursing practice in one documented situation in the workplace
- work within and reflect on the legal and ethical parameters that apply to professional nursing practice in one documented situation related to an Aboriginal and Torres Strait Islander person.

The tasks must be undertaken in accordance with the Nursing and Midwifery Board of Australia (NMBA) professional practice standards, codes and guidelines.

Knowledge Evidence

Demonstrate knowledge required to complete tasks outlined in elements and performance criteria of this unit:

- national, State or Territory and local legal and ethical considerations relevant to the nursing profession, and how these are applied in nursing practice:
 - vulnerable person check
 - role of the NMBA in regulating the nursing profession including:
 - code of ethics for nurses in Australia
 - code of conduct for nurses
 - decision-making framework
 - enrolled nurse standards for practice
 - nursing guidelines and practice fact sheets
 - role of the Congress of Aboriginal and Torres Strait Islander Nurses and Midwives (CATSINaM)
 - Aboriginal and Torres Strait Islander health and principles of cultural safety
 - continuing professional education opportunities
 - direct and indirect discrimination and its implications
 - duty of care
 - equal employment opportunity (EEO)

- human rights including access to health care
- informed consent
- anti-discrimination legislation
- declaration on the Rights of Indigenous Peoples
- insurance requirements including professional indemnity insurance arrangements for enrolled nurses
- life and death issues:
 - power of attorney
 - living wills and advanced directives
 - guardianship
- mandatory reporting
- privacy, confidentiality and disclosure
- policy frameworks for nursing practice
- social media policy and the potential implications on ethics, professionalism and nursing
- Commonwealth and State or Territory legislation and legal provisions that affect the development of nursing programs and provision of services and procedures:
 - Health Practitioner Regulation National Law Act (the National Law) enacted in each State or Territory
 - National Safety and Quality Health Service (NSQHS) Standards
 - health legislation relating to drugs, medicines and poisons
 - mental health legislation
 - Privacy Act
 - Health Records Act
 - Aged Care Act
 - carers recognition legislation
 - Criminal Code Act
 - Disability Discrimination Act and associated anti-discrimination legislation
 - children and young people legislation enacted in each State or Territory
 - working with children legislation as enforced in each State or Territory
 - workplace health and safety (WHS) legislation
- ethical decision making models
- contemporary ethical concepts and principles in nursing:
 - autonomy

- beneficence and non-maleficence
 - confidentiality
 - justice
 - rights
 - veracity
- application of ethical principles to enrolled nurse practice:
 - definitions of ethics, bioethics and nursing ethics
 - theoretical concepts informing ethical conduct
 - ethical issues in relation to:
 - voluntary assisted dying.
 - advanced care directive.
 - abortion
 - tissue transplantation.
 - reproductive technology.
 - organ donation.
 - restraint
 - open disclosure
 - quality of life
 - conscientious objection
 - abuse
 - consent
 - artificially prolonging life.
 - refusal and withdrawal of treatment.
 - stem cell research.
 - cultural and religious matters.
- application of the law to enrolled nurse practice including:
 - civil, common and statute law, the court system, precedents and sources.
 - law of torts including negligence, trespass, assault and battery, types of consent, valid consent, legal and intellectual, capacity, clinical incapacity, false imprisonment and defamation
 - common legal terms including vicarious liability, defendant, plaintiff, harassment, expert witness, coronial inquests, functions of the coroner and giving evidence to the coroner.

Assessment Conditions

To be eligible to apply for registration as an enrolled nurse and to practice in Australia, each applicant must complete a Diploma of Nursing program accredited by the Australian Nursing and Midwifery Accreditation Council (ANMAC) and approved as 'an approved program of study' by the Nursing and Midwifery Board of Australia (NMBA) in accordance with the Enrolled Nurse Accreditation Standards.

For more detail visit <https://www.ahpra.gov.au>.

Skills must be demonstrated in the workplace or in a simulated environment as specified in the performance evidence that model industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Assessors must also hold current registration as a registered nurse with the Nursing and Midwifery Board of Australia (NMBA).

Link

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTENN042 Implement and monitor care for a person with mental health conditions

Modification History

N/A

Application

This unit describes the performance outcomes, skills and knowledge required to contribute to the nursing care and treatment of a person with a mental health condition.

This unit applies to enrolled nursing work carried out in consultation and collaboration with registered nurses, and under supervisory arrangements aligned to the Nursing and Midwifery Board of Australia (NMBA) regulatory authority legislative requirements.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian Standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit sector(s)

Enrolled Nursing

Elements and Performance Criteria

Elements	Performance criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

1. Identify and address mental health legislation requirements.	1.1. Identify and evaluate the key features of mental health legislation as they apply to own work practices and the health care setting. 1.2. Describe values and philosophies that apply to mental health care. 1.3. Support the rights and dignity of the person with a mental health condition. 1.4. Work in a manner that reflects underpinning values and philosophies of mental health care and is consistent with legal obligations.
2. Respond to signs of mental health conditions.	2.1. Identify conditions relating to the mental state and behaviour using broad classifications of mental health conditions and terms associated with mental health conditions. 2.2. Recognise signs and symptoms of mental health conditions and respond within the scope of an enrolled nurse. 2.3. Recognise biopsychosocial effects in the person with a mental health condition. 2.4. Recognise impacts that racism, discrimination, negative stereotyping and stigma can have on a person with a mental health condition and ensure own interactions with the person are positive. 2.5. Negotiate with the person with a mental health condition.
3. Contribute to care planning and conduct initial clinical observations.	3.1. Undertake risk assessment, using recognised risk assessment methodology, under supervision of a registered nurse to develop the plan of care for the person. 3.2. Participate in multidisciplinary health care team meetings to ensure resources and approaches used in care planning meet individual and group needs. 3.3. Observe and document the person's behaviour and identify signs and symptoms of reduced physical health and changes to behaviour. 3.4. Provide health promotion and educational strategies in accordance with organisational

	policies and procedures in response to signs and symptoms of reduced physical health. • 3.5. Apply recovery principles to nursing care with support from multidisciplinary health care team to maximise health outcomes for individuals and groups.
• 4. Contribute to recovery of a person with a mental health condition.	• 4.1. Plan, prioritise and implement nursing interventions with the person, registered nurse, multidisciplinary health care team and the person's families and carers. • 4.2. Respect the person's dignity and uniqueness and use strategies to encourage their contribution to their own plan of care. • 4.3. Assist the person, families and carers to participate in therapeutic interventions. • 4.4. Confirm the person understands the use, administration methods and possible effects of medications including known adverse effects. • 4.5. Advise the person, families and carers about community resources and opportunities and adapt the advice to the individual needs of the person. • 4.6. Support the person as a valued member of the community to build on their own strengths and to take as much responsibility as possible for decisions that affect their lives. • 4.7. Identify and apply principles of contemporary, evidenced-based nursing practice that reflect recovery-oriented care for a person who has a mental health condition.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTENN042 Implement and monitor care for a person with mental health conditions

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- for two different people with a mental health condition, one in the workplace and one in the workplace or simulation:
 - use health information and clinical presentation to reach a conclusion of possible nursing interventions reflective of the mental health condition
 - analyse, plan and evaluate the health care of people with a mental health condition.

The tasks must be undertaken in accordance with the Nursing and Midwifery Board of Australia (NMBA) professional practice standards, codes and guidelines.

Knowledge Evidence

Demonstrate knowledge required to complete tasks outlined in elements and performance criteria of this unit:

- application of nursing theory to a mental health context
- social, psychological, cognitive and physical factors associated with mental health conditions
- consumer and carer perspectives on mental health care
- impact of racism, stigma, discrimination, culture and belief systems on a person with a mental health condition
- common mental health conditions by classification and disorder, and their treatment and management:
 - mood disorders
 - anxiety disorders
 - dual diagnosis
 - substance abuse disorders
 - psychotic disorders
 - eating disorders
 - organic disorders

- self-harm
- de-escalation response in distress and crisis including:
 - communicating
 - identifying possible causal factors and addressing where possible
 - enlisting support and assistance from colleagues
 - managing personal safety and violence prevention
- common behaviours associated with mental health conditions, and the effect of behaviours on the person and others
- techniques for managing challenging behaviours:
 - recognising and deflecting triggers
 - active listening and observation
 - effectively communicating
 - seeking expert assistance
- the principles of recovery in the mental health context
- national framework for Australian Government recovery-orientated mental health services
 - National Safety and Quality Health Care Service (NSQHC) Standards
 - jurisdictional Mental Health Act
- role of Congress of Aboriginal and Torres Strait Islander Nurses and Midwives (CATSINaM)
- Aboriginal and Torres Strait Islander mental health and cultural safety
- impacts of inter-generational trauma
- key features of mental health legislation:
 - assessment and treatment provided in the least intrusive and restrictive way
 - people supported to make and participate in decisions about their assessment, treatment and recovery
 - individuals' rights, dignity and autonomy protected and promoted
 - priority given to comprehensive care and support options that are responsive to individual needs
 - wellbeing and safety of children and young people protected and prioritised
 - carers recognised and supported in decisions about treatment and care
- key terms associated with mental health conditions
- strategies for managing individual wellbeing and oral health issues related to medication, adverse effects, and the interplay between mental health and physical states.

Assessment Conditions

To be eligible to apply for registration as an enrolled nurse and to practice in Australia, each applicant must complete a Diploma of Nursing program accredited by the Australian Nursing and Midwifery Accreditation Council (ANMAC) and approved as ‘an approved program of study’ by the Nursing and Midwifery Board of Australia (NMBA) in accordance with the Enrolled Nurse Accreditation Standards.

For more detail visit <https://www.ahpra.gov.au>.

Skills must be demonstrated in the workplace or in a simulated environment as specified in the performance evidence that model industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors.

Assessors must also hold current registration as a registered nurse with the Nursing and Midwifery Board of Australia (NMBA).

Elements and Performance Criteria

Elements	Performance criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify acute health conditions.	1.1. Undertake comprehensive nursing assessment to identify acute health condition.

	1.2. Identify pathophysiology and psychosocial impact of the acute health condition and confirm nursing and health care needs. 1.3. Identify common aetiology of acute health conditions for common disorders of the human body.
2. Contribute to nursing care, education and planning for acute health conditions.	2.1. Contribute to health education and planning care of acute health conditions in consultation with the multidisciplinary health care team. 2.2. Implement nursing care appropriate to the plan of care for acute health conditions. 2.3. Contribute to person-centred care discussions with the multidisciplinary health care team. 2.4. Contribute to discharge planning.
3. Perform and evaluate nursing interventions for acute health conditions.	3.1. Analyse and problem solve to prioritise and implement nursing interventions to reflect changes with an acute health condition. 3.2. Gather, observe, evaluate, report and document responses to provided care including variations from expected outcomes and concern for the deteriorating person. 3.3. Develop and prioritise the plan of care. 3.4. Implement and evaluate nursing care for delegated elements of acute health conditions based on comprehensive nursing assessment.
4. Contribute to nursing care for planned interventional treatments and procedures.	4.1. Contribute to the plan of care that considers the status of acute care presentations. 4.2. Implement nursing management for planned interventional treatments and procedures. 4.3. Identify and implement post treatment and procedural nursing care and associated documentation. 4.4. Implement post treatment and procedure observations and documentation and report unexpected outcomes and observations. 4.5. Recognise acute deterioration, prioritise and escalate care, implement the escalation process and report to the registered nurse.

	4.6. Identify and implement pain management interventions to minimise immobility risks and promote optimal health status and recovery.
5. Contribute to emergency response in the acute care environment.	5.1. Identify and implement enrolled nurse's role and responsibilities in an emergency response. 5.2. Use emergency equipment in an emergency situation. 5.3. Identify and implement the emergency response plan including preparing and using emergency equipment, medicine, documentation, after care required in an emergency response and resuscitation.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- for one or more persons with an acute health condition:
 - analyse health information and the clinical presentation to reach an accurate conclusion on possible health care planning and nursing interventions related to their acute health condition in consultation with a registered nurse
 - perform nursing interventions for acute health treatment in the workplace including pre-operative preparation and post operative care
 - implement nursing interventions including:
 - monitoring of vital signs and neurological observations
 - assessing chest pain
 - inserting and removing indwelling urinary catheter (IDC)
 - replacing, removing and shortening a drain device
- analyse health information and clinical presentation of one Aboriginal and Torres Strait Islander person to reach an accurate conclusion on possible culturally safe health care planning and nursing interventions.

The tasks must be undertaken in accordance with the Nursing and Midwifery Board of Australia (NMBA) professional practice standards, codes and guidelines.

Knowledge Evidence

Demonstrate knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- role of Congress of Aboriginal and Torres Strait Islander Nurses and Midwives (CATSINaM)
- Aboriginal and Torres Strait Islander health and principles of cultural safety
- acute health conditions including:
 - renal disorders
 - gastrointestinal disorders
 - neurological disorders

- respiratory disorders
 - cardiovascular disorders
 - integumentary disorders
 - central nervous system disorders
 - musculoskeletal disorders
 - reproductive disorders
 - sensory disorders
 - endocrine disorders
- clinical manifestations of acute disease states and illnesses requiring nursing interventions
- signs of deterioration
- escalating care
- comprehensive approach to care in the acute care environment including nursing interventions and outcomes
- techniques for recording electrocardiograph (ECG)
- pre- and post-operative nursing care as charted
- post-operative nursing care:
 - level of consciousness
 - vital signs
 - fluid intake and output:
 - urinary retention
 - vomiting
 - wound and drain care
 - intravenous therapy
 - IDC
 - pain assessment
 - surgical drains and dressings
 - neurovascular observations
 - skin colour
 - intercostal catheter
 - underwater seal drainage (UWSD)
 - pressure area care
 - oral care
 - passive and active exercise

- documentation
- techniques to perform interventions:
 - oropharyngeal and tracheostomy suctioning
 - UWSD tube management
 - intercostal catheter care
 - ostomy and stoma care
 - musculoskeletal traction
 - anti-embolic treatments.
 - care of drainage devices
 - care of suprapubic catheter
 - inserting and removing IDC
 - applying isolation nursing practices
 - inserting and removing nasogastric (NG) tubes
 - feeding through NG tubes and percutaneous feeding tube
 - nasogastric and percutaneous nutrition.
 - performing blood specimen collection (venepuncture)
- medical devices:
 - continuous positive airway pressure (CPAP) and bilevel positive airway pressure (BiPAP)
 - peripherally inserted central catheter (PICC) and midline management
 - pacemakers and defibrillators
- principles of acute surgical nursing and associated interventions:
 - shock
 - sepsis
 - burns
 - angina
 - dehydration
- principles of surgical nursing and associated surgical procedures and terminology:
 - elective and emergency surgery
 - anaesthetics
 - amputation
 - general surgery
 - thoracic surgery
 - colon and rectal surgery

- obstetrics and gynaecology
- gynaecologic oncology
- neurological surgery
- ophthalmic surgery
- oral and maxillofacial surgery
- orthopaedic surgery:
 - hand
 - sports medicine
 - paediatric orthopaedics
 - spine surgery
 - foot and ankle
 - joint replacement
 - trauma
 - oncology
- otolaryngology
- paediatric surgery:
 - neonatal
 - prenatal
 - trauma
 - oncology
- urology
- vascular surgery
- plastic and maxillofacial:
 - hand surgery.

Elements and Performance Criteria

Elements	Performance criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

1. Identify impact of chronic health condition on a person.	1.1. Identify chronic health condition and seek information to confirm impact of health condition. 1.2. Develop plan of care based on application of evidence-based knowledge of condition on body systems. 1.3. Identify common chronic health conditions and health and lifestyle limitations.
2. Contribute to chronic health education and care planning.	2.1. Contribute to person-centred care and development of self-management strategies. 2.2. Evaluate and document response to nursing care including variations and unexpected outcomes. 2.3. Identify and contribute to health education and evaluation of impact of chronic health condition. 2.4. Identify community-based care services available for restorative and rehabilitation care. 2.5. Confirm health and lifestyle adjustments for chronic condition in planning care. 2.6. Contribute to and implement nursing care for chronic condition.
3. Implement and evaluate nursing interventions in chronic health conditions.	3.1. Apply nursing interventions considering physical, emotional and psychosocial needs. 3.2. Encourage and support informed independent decision making for optimal chronic condition health outcomes. 3.3. Perform nursing interventions based on the plan of care cultural diversity, dignity and respect. 3.4. Encourage and incorporate self-care into the plan of nursing care for interventions.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTENN044 Implement and monitor care for a person with chronic health conditions

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- analyse health information and clinical presentation of two persons, at least one must be Aboriginal and Torres Strait Islander
- perform nursing interventions in the workplace contributing to the support of two people who have chronic health conditions

The tasks must be undertaken in accordance with the Nursing and Midwifery Board of Australia (NMBA) professional practice standards, codes and guidelines.

Knowledge Evidence

Demonstrate knowledge required to complete tasks outlined in elements and performance criteria of this unit:

- broad context for chronic disease:
 - role of World Health Organization (WHO) in the management and prevention of chronic disease
 - Australian health priorities for chronic disease and prevention
 - common chronic health conditions in Australia
 - Australian health priorities for chronic disease and prevention in Aboriginal and Torres Strait Islander people
 - impacts of chronic disease:
 - social
 - emotional
 - physical
 - psychological
 - financial
- rehabilitation strategies and equipment used for treatment of chronic health conditions:
 - physiotherapy
 - diabetic support
 - occupational therapy

- hydrotherapy
 - complementary therapies
 - ambulatory aids
 - prosthetic devices
- chronic health conditions:
 - renal disorders
 - gastrointestinal disorders
 - neurological disorders
 - respiratory disorders
 - cardiovascular disorders
 - integumentary disorders
 - central nervous system disorders
 - musculoskeletal disorders
 - reproductive disorders
 - sensory disorders
 - endocrine disorders
- techniques for performing nursing interventions
- strategies to address and manage chronic disease in the relevant work context:
 - prevention
 - use of treatments
 - principles of and practices for person-focused nursing practice
 - maintenance of positive life roles
 - behavioural changes
 - stages of change to establish readiness for attitudinal and behavioural change
 - principles of optimal restorative, palliative and end of life care
- role of Congress of Aboriginal and Torres Strait Islander Nurses and Midwives (CATSINaM)
- Aboriginal and Torres Strait Islander health and principles of cultural safety.

Assessment Conditions

To be eligible to apply for registration as an enrolled nurse and to practice in Australia, each applicant must complete a Diploma of Nursing program accredited by the Australian Nursing and Midwifery Accreditation Council (ANMAC) and approved as ‘an approved program of study’ by the Nursing and Midwifery Board of Australia (NMBA) in accordance with the Enrolled Nurse Accreditation Standards.

For more detail visit <https://www.ahpra.gov.au>.

Skills must be demonstrated in the workplace or in a simulated environment as specified in the performance evidence that model industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Elements and Performance Criteria

Elements	Performance criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

1. Respond to health requirements of an older person.	1.1. Apply requirements of age-related physical changes and transitions and the psychosocial needs of the person, families and carers to own practice. 1.2. Identify age-related pathophysiological disorders and how they may affect the person, families and carers. 1.3. Adjust communication for people who have sensory impairments. 1.4. Apply interventions to ameliorate care. 1.5. Develop and implement strategies to ensure social inclusiveness and cultural diversity. 1.6. Identify and respond to signs of distress and behaviours of concern.
2. Contribute to the plan of care for an older person.	2.1. Assess older person's health using aged care assessment tools. 2.2. Identify possible age-related effects of polypharmacy. 2.3. Document and report health findings according to organisational policies and procedures. 2.4. Contribute to development of nursing plan of care within the context of the health care setting and organisational policies and procedures. 2.5. Recognise signs and symptoms to be applied to the plan of care including wellbeing and oral health problems. 2.6. Identify reablement abilities and limitations to promote capacity for self-care. 2.7. Discuss possible impacts of age-related pathophysiological disorders including impact capacity to perform daily living activities. 2.8. Document responses to nursing interventions and report changes.

• 3. Apply nursing practice in the aged care environment.	• 3.1. Identify factors and common stereotypes associated with ageing and how these can adversely impact the older person. • 3.2. Apply best practices to impact issues involved in aged care including impacts on families and carers. • 3.3. Consider own values, attitudes and beliefs to ensure interventions are conducted within scope of practice of the enrolled nurse. • 3.4. Promote health maintenance with the older person and provide information on available community services for the person, families and carers. • 3.5. Apply work practices reflecting theories of ageing and apply best practice care guidelines for older people.
• 4. Identify requirements and address issues in aged care nursing practice.	• 4.1. Identify legal requirements and possible ethical and other issues of concern in an aged care practice. • 4.2. Ensure own work practice accords with legal requirements, is ethical and supports the rights and dignity of the older person, families and carers. • 4.3. Advocate for the person, families and carers as required within own role parameters and organisational policies and procedures. • 4.4. Observe and respond to physical, emotional and mental signs of stress. • 4.5. Provide care for the deceased using standard precautions and in accordance with organisational policies and procedures and guidelines.
• 5. Use strategies related to the progressive and variable nature of cognitive impairment.	• 5.1. Identify the nature of cognitive changes and use treatments and nursing interventions. • 5.2. Provide activities suitable for people with cognitive changes reflecting their individual likes and dislikes. • 5.3. Communicate and apply strategies to relieve distress and agitation.

6. Develop and implement strategies to minimise impact of responsive behaviours.	6.1. Observe and document behaviours and environmental factors to assist in determining triggers contributing to responsive behaviours. 6.2. Identify potential impacts responsive behaviours have in determining a response. 6.3. Implement best practice strategies to minimise impact of responsive behaviours.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTENN045 Implement and monitor care of the older person

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- analyse health information and clinical presentation of two older people to reach a conclusion on possible nursing interventions related to their care in consultation with a registered nurse
- perform nursing interventions for one older person in the workplace with cognitive change or impaired cognition and one older person with the condition of frailty

The tasks must be undertaken in accordance with the Nursing and Midwifery Board of Australia (NMBA) professional practice standards, codes and guidelines.

Knowledge Evidence

Demonstrate knowledge required to complete tasks outlined in elements and performance criteria of this unit:

- role of aged care regulators.
- the potential impacts of dual and multiple diagnoses on identification and prioritisation of the older person's needs
- chronic psychological and age-related health problems
- sexuality and the older person
- personal hygiene:
 - activities of daily living (ADLs)
 - continence management
 - oral care
- counselling and support services and resources in the aged care environment and wider community
- support and comfort required for grieving families and carers within own role parameters
- difference between end-of-life care and palliative care of dying and after death care in consultation with registered nurse
- functional assessment tools for assessing older people, including recognition of cognitive impairment including delirium and depression

- nature of cognitive change related to progressive neurological condition and strategies and nursing interventions that can be used
 - diagnoses of dementia and how it presents
 - mini mental and psychogeriatric assessment scale using a developed and recognised standard assessment scale
 - the importance of a safe, physical, social and emotional environment for older people, and particularly for people with cognitive impairment
- legal and professional obligations relating to physical, chemical and psychological restraint
- legal and ethical issues and considerations, and assessment tools relevant to the older person:
 - advance care directives
 - Aged Care Act
 - Aged Care Funding instruments
 - Aged Care Quality Standards
 - carers recognition legislation
 - NMBA code of ethics and code of conduct for nurses
- primary health care and services for the older person
- stereotypes and influences on ageing
- physical triggers and strategies to respond to responsive behaviour:
 - distraction including reminiscing, walking and listening to music
 - behaviour modification
- pain management
- use of prescribed hearing aids and alternative listening devices
- integration of complementary therapies into practice settings
- elder abuse
- nursing assessments of the older person:
 - nutritional assessment
 - skin assessment
 - continence assessment
- physiology of the ageing process as it relates to disease processes:
 - sensory function
 - cardiac function
 - respiratory function
 - neurological function

- musculoskeletal function
- genitourinary function
- endocrine function
- renal function
- oncological disorders
- integumentary functions.

Assessment Conditions

To be eligible to apply for registration as an enrolled nurse and to practice in Australia, each applicant must complete a Diploma of Nursing program accredited by the Australian Nursing and Midwifery Accreditation Council (ANMAC) and approved as ‘an approved program of study’ by the Nursing and Midwifery Board of Australia (NMBA) in accordance with the Enrolled Nurse Accreditation Standards.

For more detail visit <https://www.ahpra.gov.au>.

Skills must be demonstrated in the workplace or in a simulated environment as specified in the performance evidence that model industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors.

Assessors must also hold current registration as a registered nurse with the Nursing and Midwifery Board of Australia (NMBA).

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTENN046 Contribute to maternal and infant health care

Modification History

N/A

Application

This unit describes the performance outcomes, skills and knowledge required to provide care to mother and newborn infant in postnatal, neonatal, child and family health care and paediatric health care settings.

This unit applies to enrolled nursing work carried out in consultation and collaboration with registered nurses and registered midwives and under supervisory arrangements aligned to the Nursing and Midwifery Board of Australia (NMBA) regulatory authority legislative requirements.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian Standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements	Performance criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

1. Work as part of the maternity health care team.	1.1. Assist registered midwife by performing delegated aspects of care for mother and newborn infant. 1.2. Assist midwife to prepare mother to adopt safe practices in caring for newborn infant. 1.3. Record observations of mother and newborn infant and report abnormal observations to midwife. 1.4. Apply midwifery terms used during pregnancy and in postpartum care to contribute to care of newborn infant. 1.5. Document, report and escalate variances in care progress. 1.6. Provide delegated aspects of care for mother and newborn infant to support maternal and newborn infant health.
2. Support mother and newborn infant to meet identified goals.	2.1. Evaluate progress of mother and newborn infant towards goals in plan of care. 2.2. Review and discuss unmet goals in plan of care. 2.3. Assist the midwife to meet care goals and to support mother to interact with newborn infant. 2.4. Assist midwife to educate mother on delegated aspects of newborn infant health and offer information about available support services.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTENN046 Contribute to maternal and infant health care

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- provide maternity care for two mothers and their newborn infants in the workplace, in collaboration and consultation with midwife and multidisciplinary health care team involving:
 - umbilical cord care
 - preparation of feeding formulas
 - dressing newborn infant and changing newborn infant nappies
 - safe practice for bathing, holding, settling and positing newborn infant for sleeping
 - breastfeeding and care of mother's nipples

The tasks must be undertaken in accordance with the Nursing and Midwifery Board of Australia (NMBA) professional practice standards, codes and guidelines.

Knowledge Evidence

Demonstrate knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- role of midwife in antenatal and postpartum care
- anatomy and physiology and associated terminology related to pregnancy, birth, postnatal period, lactation and care of newborn infant
- breastfeeding support
- World Health Organization (WHO) code for breastfeeding, development and establishment of breastfeeding and benefits of breast milk and breastfeeding
- primary health care approaches to care planning
- community support services for maternal and newborn infant care
- community support services for Aboriginal and Torres Strait Islander maternal and newborn infant care including Aboriginal Community Controlled Health Organisations (ACCHO)
- common abnormalities of newborn infant

- common obstetric emergencies
- artificial formula use:
 - preparation volumes to be consumed according to age
 - methods for sterilisation of equipment
- process of grief associated with infant death and care of mother and family
- impact of cultural practices and beliefs in relation to birthing
- impact of cultural practices and beliefs in relation to Aboriginal and Torres Strait Islander communities birthing
- interactions with newborn infant:
 - individual differences in newborn infant needs for rest and sleep and rest patterns
 - signs of stress, distress and pain in newborn infant
 - safe and unsafe practices for use with newborn infants
 - practices and routines used by families and underlying cultural and personal rationale
 - emotional, physical and language development of newborn infant
 - attachment theory
 - Sudden Infant Death Syndrome (SIDS) and safe sleeping techniques.
 - brain development in newborn infant
- newborn infant screening
- principles for recognising a deteriorating mother and newborn infant and raising issues of concern
- umbilical cord care
- role of Congress of Aboriginal and Torres Strait Islander Nurses and Midwives (CATSINaM)
- Aboriginal and Torres Strait Islander health and principles of cultural safety.

Assessment Conditions

HLTENN047 Apply nursing practice in the primary health care setting

Modification History

N/A

Application

This unit describes the performance outcomes, skills and knowledge required to work in a primary health care environment including community-based, educational, occupational and informal settings, and in general practice.

Primary health care involves a person-centred and comprehensive approach to health care. It is made accessible to people by being located as close as possible to where they live and supporting their full participation in the spirit of self-reliance and self-determination.

This unit applies to enrolled nursing work carried out in consultation and collaboration with registered nurses and under supervisory arrangements aligned to the Nursing and Midwifery Board of Australia (NMBA) regulatory authority legislative requirements.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian Standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements	Performance criteria

<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Work as part of a multidisciplinary health care team in a primary health care environment.	1.1. Apply principles of primary health care and work within the philosophical framework supporting the primary health care system. 1.2. Identify primary health care service model and roles and professional expertise of members of the multidisciplinary health care team. 1.3. Make decisions and initiate action based on results of clinical assessment in collaboration with members of the multidisciplinary health care team.
2. Provide health education and health promotion for illness prevention.	2.1. Identify health literacy issues that potentially inhibit the person's capacity to access, understand, evaluate and communicate information to ensure and improve their health. 2.2. Adopt strategies to support the person's capacity to gain and understand information. 2.3. Support the person to engage in illness prevention through health promotion programs. 2.4. Participate in health education programs and community groups.
3. Identify health presentation in the primary health care environment.	3.1. Identify clinical manifestations of health conditions and their presentation on health status. 3.2. Apply requirements of primary health issues of communities and target groups to identify and prioritise the nursing plan of care. 3.3. Perform comprehensive primary health assessment to gather health records determining priorities and potential areas of risk during implementation of the primary health care plan. 3.4. Confirm information with members of the primary health care team.

	3.5. Identify actual and potential environmental health issues and the impact on individuals and the community.
4. Perform nursing interventions that support health care needs.	4.1. Ensure nursing interventions reflect assessed care needs and individuality including cultural, religious, age, gender, physical, psychological and social needs. 4.2. Implement nursing interventions using respectful practices that support dignity and privacy. 4.3. Apply fundamentals to promote self-care. 4.4. Plan and adjust nursing interventions to meet optimal daily living activities. 4.5. Identify and prioritise nursing interventions according to the assessed care needs. 4.6. Initiate emergency treatment according to organisational policies and procedures.
5. Evaluate outcomes of planned primary health care and promote resources.	5.1. Monitor, evaluate and document response to nursing interventions, progress towards achieving planned primary health goals and report findings to multidisciplinary health care team. 5.2. Identify community and other resources to match needs and provide information on available resources and how to access them.

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- analyse health information and the clinical presentation of one person to reach a plan of care
- address the needs of one person using primary health care principles
- review and update a plan of care for one person to address primary health care needs

The tasks must be undertaken in accordance with the Nursing and Midwifery Board of Australia (NMBA) professional practice standards, codes and guidelines.

Knowledge Evidence

Demonstrate knowledge required to complete tasks outlined in elements and performance criteria of this unit:

- health challenges facing Australian communities including Aboriginal and Torres Strait Islander communities
- environmental health issues facing Australian communities including Aboriginal and Torres Strait Islander communities
- environmental health issues facing Australian communities
- philosophy underpinning primary health care
- philosophy underpinning Aboriginal Community Controlled Health Organisations (ACCHO)
- acute mental health episodes
- management of first aid and other emergency treatments specific to a community
- age specific health issues across the lifespan for infants, children, adolescents, adults and older people
- social determinants of health and wellness
- cultural determinants of health and wellness
- problem-solving strategies.
- evidence-based practice

- health including the illness continuum
- literature and professional bodies associated with primary health care management
- service delivery models:
 - preventative
 - curative
 - rehabilitative
- National Disability Insurance Scheme (NDIS) requirements
- role of Congress of Aboriginal and Torres Strait Islander Nurses and Midwives (CATSINaM)
- Aboriginal and Torres Strait Islander health and principles of cultural safety
- telehealth, health informatics and technology
- national immunisation programs:
 - immunisation schedule
 - catch up immunisation schedule
 - screening for all ages.

Assessment Conditions

To be eligible to apply for registration as an enrolled nurse and to practice in Australia, each applicant must complete a Diploma of Nursing program accredited by the Australian Nursing and Midwifery Accreditation Council (ANMAC) and approved as ‘an approved program of study’ by the Nursing and Midwifery Board of Australia (NMBA) in accordance with the Enrolled Nurse Accreditation Standards.

HLTENN048 Apply nursing practice in the emergency care setting

Modification History

N/A

Application

This unit describes the performance outcomes, skills and knowledge required to work as part of the emergency care team in an emergency care environment including hospital emergency department, primary health care service and mobile hospital service.

Enrolled nurses working in emergency care hold and apply specialised in-depth knowledge, integrate theory and practice, and make reliable clinical assessments and judgements.

This unit applies to enrolled nurses, registered with the Nursing and Midwifery Board of Australia (NMBA), seeking specialisation in enrolled nurse work that is carried out in consultation and collaboration with registered nurses, and under direct or indirect supervisory arrangements aligned to the NMBA regulatory authority legislative requirements.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian Standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

Elements and Performance Criteria

Elements	Performance criteria

<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Work as part of emergency health care team.	1.1. Identify own role in providing emergency care and contributions made by emergency services personnel, referring agencies, the hospital and others in the emergency care team. 1.2. Provide nursing care in response to trauma and under emergency care conditions supporting the emergency care team. 1.3. Work in the emergency health care team to foster positive group dynamics with other health care professionals. 1.4. Identify and confirm emergency care needs and clarify problems and complications within scope of practice. 1.5. Undertake pre-, intra- and post diagnostic procedures in line with organisational policies and procedures and within scope of practice. 1.6. Apply requirements to prepare for transport to another care environment and health care facility. 1.7. Identify deteriorating patient in emergency care situations and respond in accordance with educational preparation, scope of practice and organisational policies and procedures. 1.8. Document nursing interventions and emergency care response to interventions provided.
2. Contribute to quality and safety of emergency nursing care.	2.1. Assess and prioritise emergency care activities rapidly in provision of emergency nursing care. 2.2. Identify potential and actual risks when providing emergency care and participate in organisational risk identification, assessment and management processes. 2.3. Analyse and problem solve to propose actions and implement nursing intervention. 2.4. Identify and escalate nursing care where patient acuity exceeds own knowledge, skill and assessed competence and consult with registered nurse and treating multidisciplinary health care team.

3. Promote improvement and advancement of emergency nursing.	3.1. Document outcomes of care and communicate findings to members of the emergency care team in accordance with organisational policies and procedures. 3.2. Evaluate nursing interventions provided and identified outcomes against evidence-based best practice in emergency care nursing. 3.3. Seek opportunities and participate in professional development to guide own practice and act as a resource for colleagues. 3.4. Identify symptoms of stress and professional burnout in self, peers and colleagues, and refer to services within organisational policies and procedures and scope of practice.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- work as a member of the emergency health care team in the workplace providing emergency nursing interventions for:
 - bleeding from multiple injury sites
 - respiratory distress
 - unstable musculoskeletal injury
 - head, neck or spinal injuries
 - person with diabetes who has hypoglycaemia or hyperglycaemia
 - uncontrolled vomiting, diarrhoea and dehydration
 - confusion and aggressive behaviour
- provide advanced resuscitation on a simulation manikin and administer emergency medications according to organisational policies and procedures in a simulated environment
- conduct two activities to support quality and promote safe innovations in emergency nursing to an emergency team based on knowledge acquired through own professional development and learning

The tasks must be undertaken in accordance with the Nursing and Midwifery Board of Australia (NMBA) professional practice standards, codes and guidelines.

Knowledge Evidence

Demonstrate knowledge required to complete tasks outlined in elements and performance criteria of this unit:

- role of members participating in an emergency care team
- emergency care and first aid principles
- anatomy, physiology and pathophysiology sufficiently in-depth and specialised to make judgements and to make a professional contribution in the emergency care setting:
 - musculoskeletal injuries and head, neck and spinal injuries
 - hypovolemic shock

- poisonings and substance misuse
 - febrile convulsions and epilepsy
 - abusive and behaviour issues from injury and substance misuse
 - respiratory distress
 - emergency medical conditions
- purpose and indications of pathology and diagnostic tests:
 - blood tests commonly taken in emergency situations
 - skeletal X-rays
 - computerised tomography (CT) scan
 - magnetic resonance imaging (MRI) scan
 - positron emission tomography (PET) scan
 - electrocardiogram (ECG).

Assessment Conditions

To be eligible to apply for registration as an enrolled nurse and to practice in Australia, each applicant must complete a Diploma of Nursing program accredited by the Australian Nursing and Midwifery Accreditation Council (ANMAC) and approved as ‘an approved program of study’ by the Nursing and Midwifery Board of Australia (NMBA) in accordance with the Enrolled Nurse Accreditation Standards.

For more detail visit <https://www.ahpra.gov.au>.

Skills must be demonstrated in the workplace or in a simulated environment as specified in the performance evidence that model industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors.

Assessors must also hold current registration as a registered nurse with the Nursing and Midwifery Board of Australia (NMBA).

Elements and Performance Criteria

Elements	Performance criteria

<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Provide orthopaedic nursing care.	1.1. Analyse and problem solve to propose actions and implement nursing interventions. 1.2. Undertake comprehensive nursing assessment to develop, prioritise and implement nursing plan of care. 1.3. Provide, evaluate and document nursing care interventions of orthopaedic condition. 1.4. Identify where patient acuity exceeds own knowledge, skill and assessed competence and consult with registered nurse and multidisciplinary health care team.
2. Clarify impact of orthopaedic condition.	2.1. Revise current practices and how they apply to orthopaedic conditions and associated pathophysiology as they apply to each clinical manifestation. 2.2. Identify psychosocial impact and potential complications and clarify assessed nursing care needs. 2.3. Evaluate impacts and complications of orthopaedic condition. 2.4. Contribute to long-term management and planning of recovery phase of care.
3. Promote improvement and advancement of orthopaedic nursing.	3.1. Monitor and evaluate nursing care provided as part of the continuous improvement process. 3.2. Evaluate nursing interventions provided and identify outcomes against evidence-based best practice in orthopaedic nursing. 3.3. Seek opportunities and participate in professional development to guide own practice and act as a resource for colleagues.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- work as a member of the multidisciplinary health care team in the workplace providing orthopaedic nursing interventions for:
 - fracture with external fixation
 - fracture with internal fixation
 - fracture requiring non-surgical management
 - musculoskeletal injury where the person requires continuous passive motion (CPM) therapy
 - amputation where the person requires assistance with a prosthetic aid or device
- conduct two activities to support quality and promote safe innovations in orthopaedic nursing for a multidisciplinary health care team based on knowledge acquired through own professional development and learning

The tasks must be undertaken in accordance with the Nursing and Midwifery Board of Australia (NMBA) professional practice standards, codes and guidelines.

Knowledge Evidence

Demonstrate knowledge required to complete tasks outlined in elements and performance criteria of this unit:

- impact of orthopaedic conditions:
 - limitations in ability to perform daily living activities
 - loss and limitation of physical function
 - reduction in musculoskeletal function
 - accompanying trauma, injuries and impact of secondary disease processes
 - impact on sexuality, relationships, self-image and body image
 - grief and loss
 - need for support with personal coping mechanisms and community support mechanisms
 - need for support with maintenance and improvement of quality of life

- anatomy, physiology and pathophysiology of clinical manifestations of orthopaedic conditions sufficiently in-depth and specialised to make judgements and to make a professional contribution to the orthopaedic care team:
 - musculoskeletal conditions:
 - gout
 - systemic lupus erythematosus
 - osteomyelitis
 - bursitis
 - epicondylitis
 - hallux valgus
 - avascular necrosis
 - compartment syndrome
 - thromboembolism
 - disseminated intravascular coagulation
 - delayed union
 - fat embolism
 - contractures
 - injuries requiring (CPM) therapy
 - amputation requiring assistance with prosthetic aids
 - congenital musculoskeletal conditions:
 - torticollis
 - spina bifida
 - traumatic musculoskeletal conditions:
 - dislocations
 - sprains
 - fractures
 - traumatic amputations
 - degenerative musculoskeletal conditions:
 - arthritis
 - back pain
 - muscle spasm
 - disc prolapse
 - osteoarthritis
 - osteitis deformans

- osteomalacia
 - surgical interventions for musculoskeletal conditions:
 - internal and external fixtures for fractures
 - applications of surgical braces
 - removal of bunions
 - elective surgical procedures including joint replacement surgery
 - laminectomy
 - surgical amputation
 - bone tumours:
 - metastatic bone carcinoma
 - multiple myeloma
 - bone tuberculosis
 - osteosarcoma
 - chondrosarcoma
 - orthopaedic equipment and devices:
 - traction
 - castings
- community and in-hospital rehabilitation services available for the person with orthopaedic conditions
- diagnostic tests associated with orthopaedics and their meaning:
 - X-rays
 - computerised tomography (CT) scans
 - magnetic resonance imaging (MRI) scans
 - ultrasounds
 - bone scans
 - biopsies
- specialised medical and surgical nursing management of the person with orthopaedic condition including emergency management of complications
- phases of recovery and how these impact nursing care for the person with orthopaedic condition
- reflective practice and evidence-based practice in line with current literature and work of professional bodies associated with medical conditions.

<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Work in rehabilitation nursing environment.	1.1. Provide nursing care for the person with physical disability and chronic illness. 1.2. Provide nursing care that supports a multidisciplinary health care team to achieve cost effective health care outcomes. 1.3. Work in the rehabilitation care team to foster positive group dynamics with other health care professionals. 1.4. Contribute to long-term management and planning requiring rehabilitative care to maintain optimum function and lifestyle. 1.5. Identify opportunities for person to self-manage rehabilitative care needs.
2. Contribute to rehabilitation process.	2.1. Contribute to a safe and therapeutic environment and support activities that promote return of optimal function and minimise functional decline. 2.2. Apply requirements of manifestations of areas of dysfunction and associated pathophysiology of clinical manifestation. 2.3. Analyse and problem solve to propose actions and implement nursing interventions in line with changes to level of dysfunction. 2.4. Undertake physical assessment to develop and implement rehabilitation nursing plan of care. 2.5. Clarify psychosocial impact of dysfunction on daily living activities. 2.6. Communicate to reach agreement on multidisciplinary health care team goal setting for optimal rehabilitation and minimal functional decline. 2.7. Identify and apply strategies to prevent complications and chronic illness.
3. Promote improvement of nursing care and	3.1. Review and evaluate plan of care and modify according to progress toward planned outcomes.

advancement of rehabilitation nursing.	• 3.2. Evaluate and document nursing care provided. • 3.3. Evaluate nursing interventions and outcomes against evidence-based best practice in rehabilitation nursing care. • 3.4. Seek opportunities and participate in professional development to guide own practice and act as a resource for colleagues.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- work as a member of the multidisciplinary health care team in the workplace, providing nursing interventions for three patients with different conditions requiring rehabilitation
- conduct two activities to support quality and promote safe innovations in rehabilitation nursing applicable to a multidisciplinary health care team-based setting based on knowledge acquired through own professional development and learning

The tasks must be undertaken in accordance with the Nursing and Midwifery Board of Australia (NMBA) professional practice standards, codes and guidelines.

Knowledge Evidence

Demonstrate knowledge required to complete tasks outlined in elements and performance criteria of this unit:

- community and in-hospital services available for people requiring rehabilitation
- analytical thinking and problem-solving strategies related to nursing care of a person undergoing rehabilitation
- diagnostic tests used to determine rehabilitative therapy
- phases of care for people requiring rehabilitation
- philosophy underpinning rehabilitative management
- principles of health assessment
- anatomy, physiology and pathophysiology of conditions requiring rehabilitation sufficiently in-depth and specialised to make judgements and to make a professional contribution in the rehabilitation care setting
- factors included in the assessment of the impact of dysfunction:
 - performance of daily living activities
 - loss and limitations to physical function
 - accompanying trauma and injuries
 - impact on sexuality, relationships, self-image and body image

- grief and loss
- loss of vocation
- coping mechanisms
- personal and community support mechanisms
- level of communication
- maintenance and improvement of quality of life
- maintenance and improvement of lifestyle
- impact of secondary disease processes.

Assessment Conditions

To be eligible to apply for registration as an enrolled nurse and to practice in Australia, each applicant must complete a Diploma of Nursing program accredited by the Australian Nursing and Midwifery Accreditation Council (ANMAC) and approved as ‘an approved program of study’ by the Nursing and Midwifery Board of Australia (NMBA) in accordance with the Enrolled Nurse Accreditation Standards.

For more detail visit <https://www.ahpra.gov.au>.

Skills must be demonstrated in the workplace or in a simulated environment as specified in the performance evidence that model industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors.

Assessors must also hold current registration as a registered nurse with the Nursing and Midwifery Board of Australia (NMBA).

HLTENN051 Apply nursing practice in sexual and reproductive health care

Modification History

N/A

Application

This unit describes the performance outcomes, skills and knowledge required to provide nursing interventions for people with sexual and reproductive health care needs.

Enrolled nurses providing nursing care in the area of sexual and reproductive health hold and apply specialised in-depth knowledge, integrate theory and practice and make reliable clinical assessments and judgements.

This unit applies to enrolled nurses, registered with the Nursing and Midwifery Board of Australia (NMBA), seeking specialisation in enrolled nurse work that is carried out in consultation and collaboration with registered nurses, and under direct or indirect supervisory arrangements aligned to the NMBA regulatory authority legislative requirements.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian Standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements	Performance criteria

<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify and discuss sexual and reproductive health problems.	1.1. Identify sexual health screening programs and support services to identify health issues. 1.2. Evaluate observations and pathology results indicating variations from normal sexual and reproductive health status. 1.3. Provide information at a primary health care level on risk factors, indicators and interventions for sexually transmissible infections (STIs) and blood-borne infections (BBIs). 1.4. Use a confidential and safe place for confirming contact tracing, disclosure of information and requirements in reporting notifiable STIs or BBIs. 1.5. Use health information and resources to explain the development of sexual health conditions. 1.6. Promote safe and healthy sexual and lifestyle practices and provide associated resources and information.
2. Clarify impact of sexual and reproductive health condition.	2.1. Apply contemporary requirements of sexual and reproductive health conditions and associated pathophysiology to clinical practice. 2.2. Identify psychosocial impact and potential complications and clarify care needs. 2.3. Identify pathophysiology and disease process within scope of enrolled nursing practice to articulate and respond to care needs.
3. Contribute to team planning and nursing interventions for sexual and reproductive health care.	3.1. Identify where the acuity of a person exceeds own knowledge, skill and assessed competence and refer to others within the multidisciplinary health care team. 3.2. Identify effects of culture, ageing, disability and illness on sexuality and sexual behaviour. 3.3. Identify nursing interventions to incorporate contemporary sexual and reproductive health strategies into practice. 3.4. Liaise with multidisciplinary health care team to provide information related to

	maintaining sexual and reproductive health in line with community needs and organisational policies and procedures. • 3.5. Apply resources and referral to service providers on sexual health and reproductive health care. • 3.6. Assess, evaluate and amend plan of care as required to ensure progress toward planned outcomes.
• 4. Promote improvements in sexual and reproductive health.	• 4.1. Evaluate nursing care interventions provided and outcomes against evidence-based best practice in sexual and reproductive health in collaboration with the registered nurse and align with organisational continuous improvement objectives. • 4.2. Seek opportunities and participate in professional development, to guide own practice and act as a resource for colleagues.
• 5. Address contemporary issues in sexual and reproductive health.	• 5.1. Apply requirements of influences that shape sexuality in current and historical contexts. • 5.2. Identify, educate and evaluate contraception choices to support and provide health education about available options. • 5.3. Educate and support pregnancy choices and options for unplanned pregnancies. • 5.4. Provide information and referral options on risk-taking behaviours and educate to promote safe sex practices.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTENN051 Apply nursing practice in sexual and reproductive health care

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- perform a sexual health assessment on one female and one male person in the workplace
- conduct two activities to support quality and promote innovations in sexual and reproductive health for a multidisciplinary health care team based on knowledge acquired through own professional development and learning

The tasks must be undertaken in accordance with the Nursing and Midwifery Board of Australia (NMBA) professional practice standards, codes and guidelines.

Knowledge Evidence

Demonstrate knowledge required to complete tasks outlined in elements and performance criteria of this unit:

- historical development of sexual and reproductive health strategies to support women's and men's health and wellbeing
- health prevention screening options for early identification of women's and men's health issues
- conditions and factors affecting women's health and wellbeing, and their impact and treatment:
 - breast screening
 - cervical screening
 - family violence.
 - sexual assault
 - menopause
 - vaginal prolapse and continence issues
- sexual physiology and human sexual response
- philosophy underpinning sexual and reproductive health management
- medical and surgical procedures associated with sexual and reproductive health

- anatomy, physiology and pathophysiology of sexual and reproductive health and clinical manifestation of sexual and reproductive conditions sufficiently in-depth and specialised to make judgements and to make a professional contribution in the sexual and reproductive health care setting
- sexual and reproductive health-related matters:
 - contraception
 - health problems affecting sexuality:
 - spinal cord injuries
 - diabetes mellitus
 - hypertension
 - infertility
 - menopause
 - pregnancy options
 - puberty
 - risk taking behaviours
 - sexual abuse
 - sexual dysfunction
 - sexual orientation
- healthy sexual behaviours and attitudes and practices:
 - safer sex practices
 - barriers to use of safer sex practices
- factors that interfere with sexual health and emotional wellbeing including influence of alcohol and other drug use on sexual behaviours
- sexually transmissible infections (STIs):
 - description, definition, statistics, signs and symptoms, and universal precautions
 - common STIs and blood-borne infections (BBIs)
 - notifiable STIs and BBIs
 - transmission, testing and complications related to STIs
 - contact tracing and partner notification
 - ways to prevent, manage and treat STIs
- risk factors for contracting STIs and BBIs:
 - relationship between STIs and increased risk of contracting BBIs
 - unprotected anal, vaginal and oral sex
 - receptive and insertive partners

- mother to baby
 - blood to blood
 - unsafe drug injection
- age and gender issues related to sexual health for the older adult, young adult and adolescent
- community resources and services for sexual and reproductive health promotion and education
- cultural diversity and inclusion.

Assessment Conditions

To be eligible to apply for registration as an enrolled nurse and to practice in Australia, each applicant must complete a Diploma of Nursing program accredited by the Australian Nursing and Midwifery Accreditation Council (ANMAC) and approved as 'an approved program of study' by the Nursing and Midwifery Board of Australia (NMBA) in accordance with the Enrolled Nurse Accreditation Standards.

Elements and Performance Criteria

Elements	Performance criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

1. Identify need for clinical assessment.	1.1. Apply requirements of pathophysiology of body systems to make informed judgement on actual and potential health problems. 1.2. Source, assess and evaluate presenting clinical health data to identify homeostasis imbalance indicating abnormal functioning of body systems. 1.3. Apply active listening in interview assessment to identify, clarify and confirm health information prior to assessment.
2. Perform physical assessment.	2.1. Obtain consent prior to preparation for planned assessments, interventions and procedures. 2.2. Perform head-to-toe physical assessment using evidence-based assessment tools and techniques. 2.3. Apply culturally specific approach to client privacy and dignity and seek feedback on comfort level. 2.4. Apply person-centred interview techniques to obtain assessment information. 2.5. Identify deterioration and communicate concerns to registered nurse.
3. Perform nursing interventions.	3.1. Apply analytical questioning and diagnostic reasoning to clinical presentations, possible health conditions, illnesses and injuries to make intervention choices. 3.2. Perform clinical interventions and care provision based on information gathered through assessment. 3.3. Establish priorities of care based on assessment outcomes and judgements made. 3.4. Document assessment outcomes according to organisational policies and procedures and provide information to those involved in ongoing care of the person. 3.5. Act promptly to respond to acute deterioration and deliver care.
4. Communicate assessment outcomes.	4.1. Provide feedback and results of clinical care and assessment using medical language and terminology. 4.2. Communicate and confirm outcomes, health status, current and future care, and interventions required.

	• 4.3. Assess impact of outcomes, health status and interventions. • 4.4. Communicate outcomes and proposed actions to registered nurse and use a collaborative approach for follow up with multidisciplinary health care team.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTENN052 Provide advanced clinical assessment

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- analyse changes in a person's health status, perform physical examinations and make sound clinical judgements for three different people presenting with a condition, illness or injury in the workplace
- interpret blood test results of three different people, analysing for abnormalities indicating changes in health status and treatment

The tasks must be undertaken in accordance with the Nursing and Midwifery Board of Australia (NMBA) professional practice standards, codes and guidelines.

Knowledge Evidence

Demonstrate knowledge required to complete tasks outlined in elements and performance criteria of this unit:

- communication strategies that underpin assessment and communication with the person, families, carers and other health professionals:
 - mode of communication for information being provided
 - interviewing techniques
 - information technology and health technologies to capture clinical data for responsive coordination and dissemination to the multidisciplinary health care team
 - factors for consideration when communicating with people with:
 - communication related disabilities
 - mental health conditions
 - pharmacological and alcohol addiction and misuse
 - adverse behavioural responses to unfamiliar environments.
 - person under stress including trauma, death and life-threatening situations
- advanced concepts underpinning human maintenance systems including immunity and homeostasis imbalance causing physical changes associated with:
 - thermoregulation

- acidosis and alkalosis
 - diabetes including hypoglycaemia and hyperglycaemia
 - nutrition, hydration and dehydration
 - cancer treatment
 - trauma
 - infection
 - poisoning
 - shock
 - sepsis
- clinical assessment techniques and tools used in a head-to-toe physical body examination:
 - inspection and observations
 - palpation
 - percussion
 - auscultation
 - olfaction
- processes for neurological system examination sensory motor responses:
 - neurological system
 - cardiovascular and lymphatics system
 - respiratory system
 - gastrointestinal system
 - musculoskeletal and integumentary system
 - endocrine system
 - renal
 - metabolic
 - cognitive
 - reproductive
- effects of intrinsic factors on person's condition including age and health
- effects of extrinsic factors on person's condition including environment and medications
- techniques for evaluating common blood test results and their meaning as indicators of health conditions and illnesses:
 - albumin
 - arterial blood gas (ABG).

- blood sugar level (BSL), haemoglobin A1C
 - blood urea nitrogen (BUN)
 - calcium
 - cardiac enzymes (CE)
 - cholesterol
 - electrolytes (EUC) including sodium, potassium, chloride urea and creatinine
 - full blood count (FBC)
 - high-density lipoprotein (HDL)
 - iron
 - low-density lipoprotein (LDL)
 - liver function test
 - cross match.
 - blood cultures
 - coagulation studies (Coags)
 - erythrocyte sedimentation rate (ESR)
 - magnesium
 - phosphorus
 - triglycerides
 - thyroid stimulating hormone (TSH)
 - uric acid
- techniques for identifying subtle changes in a person's condition through knowledge of a person's patterns of responses and comparing responses over periods of time
 - principles for recognising and responding to a deteriorating person and raising issues of concern about the deterioration
 - socio-economic, physiological, emotional and physical variables related to clinical presentation of a person.

Assessment Conditions

To be eligible to apply for registration as an enrolled nurse and to practice in Australia, each applicant must complete a Diploma of Nursing program accredited by the Australian Nursing and Midwifery Accreditation Council (ANMAC) and approved as 'an approved program of study' by the Nursing and Midwifery Board of Australia (NMBA) in accordance with the Enrolled Nurse Accreditation Standards.

For more detail visit <https://www.ahpra.gov.au>.

Skills must be demonstrated in the workplace or in a simulated environment as specified in the performance evidence that model industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Assessors must also hold current registration as a registered nurse with the Nursing and Midwifery Board of Australia (NMBA).

Elements and Performance Criteria

Elements	Performance criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

1. Apply theoretical concepts and principles in providing critical care nursing.	1.1. Identify current health status and limitations of medications and therapeutic regimes in the critical care setting. 1.2. Identify factors impacting the health status and report significant alterations. 1.3. Identify and respond to psychosocial needs in the critical care setting. 1.4. Identify and apply a systems approach to nursing care.
2. Contribute to caring in the critical care setting.	2.1. Identify role of specialist nursing and medical services in the critical care setting and work effectively with others. 2.2. Identify factors relevant to the situation giving consideration to physical, psychological, social and economic impacts. 2.3. Evaluate, document and revise plan of care using data collected and communicate to multidisciplinary health care team. 2.4. Identify care options, discuss advance care planning and advocate for optimal care outcomes.
3. Perform advanced enrolled nursing interventions to attain and maintain optimal health.	3.1. Manage nursing workload according to needs and re-prioritise care activities rapidly when circumstances change. 3.2. Undertake pre-, intra- and post diagnostic procedures in line with organisational policies and procedures and within scope of practice. 3.3. Assess and prioritise emergency care activities rapidly in provision of emergency nursing care. 3.4. Identify and escalate nursing care where the person's acuity exceeds own knowledge, skill and assessed competence and consult with registered nurse and treating multidisciplinary health care team.
4. Develop own practice in the critical care nursing environment.	4.1. Make proposal for nursing interventions in consultation with registered nurse to promote improved outcomes.

	• 4.2. Evaluate nursing interventions provided and outcomes against evidence-based best practice in critical care nursing. • 4.3. Identify symptoms of stress and professional burnout in self, peers and colleagues, and refer to services within organisational policies and procedures and scope of practice. • 4.4. Seek opportunities and participate in professional development to guide own practice and act as a resource for colleagues.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTENN053 Apply nursing practice in the critical care setting

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- perform nursing care interventions on three people in a critical care setting in the workplace by:
 - care of an arterial line
 - care of central venous access device
 - assessment of chest pain
 - recording and monitoring of electrocardiograph readings for abnormalities
 - use of continuous cardiac monitoring equipment
 - administration of non-invasive continuous positive airway pressure (CPAP) and bilevel positive airway pressure (BiPAP)
 - care of permanent and temporary mechanical ventilation including suctioning and bagging
 - use of peripherally inserted central catheter (PICC) and midline care
 - use of underwater seal drain (UWSD) management.

The tasks must include use of advanced communication and medical terminology to communicate effectively with the person, families and carers, and the registered nurse and other health professionals to record or report the outcomes.

The tasks must be undertaken in accordance with the Nursing and Midwifery Board of Australia (NMBA) professional practice standards, codes and guidelines.

Knowledge Evidence

Demonstrate knowledge required to complete tasks outlined in elements and performance criteria of this unit:

- advanced life support including advanced cardiopulmonary resuscitation
- nursing procedures relevant to a critical care setting including infusion pumps and patient-controlled analgesia pumps and syringe drivers
- anatomy, physiology and pathophysiology related to critical care issues sufficiently in-depth and specialised to make judgements and to make a professional contribution in the critical care setting

- priority of care in an emergency situation in the critical care setting
- actual and potential problems in critical care:
 - respiratory failure
 - increased intracranial pressure
 - deteriorating person and levels of consciousness
 - haemorrhage
 - hypercapnia
 - inability to clear secretions
 - inability to cough
 - aspiration
 - shortness of breath
 - electrolyte imbalance
 - fluid overload
 - hypoxia and hypoxaemia
 - chest pain
 - stroke
 - vessel occlusion
 - pneumothorax
 - pacemaker lead displacement
 - arrhythmia
 - allergic reaction
 - shock.

Assessment Conditions

To be eligible to apply for registration as an enrolled nurse and to practice in Australia, each applicant must complete a Diploma of Nursing program accredited by the Australian Nursing and Midwifery Accreditation Council (ANMAC) and approved as ‘an approved program of study’ by the Nursing and Midwifery Board of Australia (NMBA) in accordance with the Enrolled Nurse Accreditation Standards.

Elements and Performance Criteria

Elements	Performance criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

1. Register a donor giving blood and blood components.	1.1. Identify new, lapsed and regular donors and use documentation according to information gained. 1.2. Use eligibility assessment tools to elicit informative responses. 1.3. Check donor records against responses, identify and record discrepancies, inconsistencies, omissions and ambiguities, and report to designated personnel. 1.4. Respond to donor's questions and, before seeking their consent, seek feedback from donor to confirm understanding of nature and purpose of procedures. 1.5. Record donor information, donor decision and signed consent in donor record. 1.6. Refer information in line with organisational policies and procedures, where donor information indicates unsuitability to donate. 1.7. Protect confidentiality of the donor.
2. Assess suitability for blood and blood component donation.	2.1. Check donor against selection criteria requirements for blood and blood component donations. 2.2. Provide information about the nature and sequence of session activities suitable to donor's needs and concerns. 2.3. Provide feedback regarding eligibility to donate. 2.4. Evaluate haematological results to identify variation from normal health status and refer to registered nurse. 2.5. Determine accessibility of ante-cubital veins in both arms and refer to registered nurse where not easily accessible.
3. Observe behaviour before and after donation and report physical irregularities.	3.1. Observe donor behaviour for physical irregularities to identify situations including anxiety and fainting. 3.2. Alert supervising registered nurse and take action in line with organisational policies and procedures to ensure donor safety.

	3.3. Document and report incident in line with organisational policies and procedures.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTENN054 Contribute to the registration eligibility and assessment of donors

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- register and assess three people as donors for blood or blood products

The tasks must be undertaken in accordance with the Nursing and Midwifery Board of Australia (NMBA) professional practice standards, codes and guidelines.

Knowledge Evidence

Demonstrate knowledge required to complete tasks outlined in elements and performance criteria of this unit:

- apheresis
- organisational policies and procedures relevant to blood donors
- documentation and components of donor declaration form
- importance and potential impact of the quality of the donation, and the reasons for careful selection of donors of blood and blood components:
 - infectious diseases and incubation periods
 - age, height and weight
 - health of donor including recent surgery, invasive procedures, immunisations, injury and illness
 - family health history
 - frequency of donation
 - geographical locations prior to donation which require special consideration
 - lifestyle
 - medications
 - occupational activities that are considered hazardous
 - recreational activities that are considered hazardous
 - workers compensation
 - safety of blood supply
 - safety of recipients

- safety of service provided to customers
 - safety of staff
 - production of a quality product
- types of donations:
 - plasma
 - platelet
 - red blood cell plasma
- purpose and use of apheresis donations including timeframe requirements
- purpose and use of blood and blood products, including types and functions of infusion and transfusion
- safe disposal, and minimisation of waste of resources resulting from collection of unsuitable donations
- World Health Organization (WHO) guidelines:
 - selection of blood donors
 - international travel and health vaccination requirements
- Australian Code of Good Manufacturing Practice (GMP) for Blood and Blood Components, Human Tissues and Human Cellular Therapy Products
- Australian Red Cross service for blood and blood products donations
- Monthly Index of Medical Specialities (MIMS)
- National Blood Transfusion Committee (NBTC).

Assessment Conditions

To be eligible to apply for registration as an enrolled nurse and to practice in Australia, each applicant must complete a Diploma of Nursing program accredited by the Australian Nursing and Midwifery Accreditation Council (ANMAC) and approved as ‘an approved program of study’ by the Nursing and Midwifery Board of Australia (NMBA) in accordance with the Enrolled Nurse Accreditation Standards.

For more detail visit <https://www.ahpra.gov.au>.

Skills must be demonstrated in the workplace or in a simulated environment as specified in the performance evidence that model industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors.

Assessors must also hold current registration as a registered nurse with the Nursing and Midwifery Board of Australia (NMBA).

HLTENN055 Apply nursing practice in the respiratory care setting

Modification History

N/A

Application

This unit describes the performance outcomes, skills and knowledge required to provide nursing care to a person with respiratory impairment in primary health care, hospitals, hospices, home and community care, and long-term care facilities.

Enrolled nurses providing respiratory nursing care hold and apply specialised in-depth knowledge, integrate theory and practice, and make reliable clinical assessments and judgements.

This unit applies to enrolled nurses, registered with the Nursing and Midwifery Board of Australia (NMBA), seeking specialisation in enrolled nurse work that is carried out in consultation and collaboration with registered nurses, and under direct or indirect supervisory arrangements aligned to the NMBA regulatory authority legislative requirements.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian Standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

Elements and Performance Criteria

Elements	Performance criteria

<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Apply theoretical concepts and principles in providing respiratory nursing care.	1.1. Apply theoretical concepts and principles to work in the respiratory nursing care environment. 1.2. Undertake comprehensive nursing assessment to inform nursing plan of care. 1.3. Evaluate respiratory function and communicate to multidisciplinary health care team. 1.4. Identify physical, psychological, social and economic factors relevant to health care status and outcomes of planned care.
2. Assist in providing optimal respiratory health.	2.1. Identify factors impacting respiratory status and re-prioritise care activities rapidly when circumstances change. 2.2. Participate in risk identification, assessment and management processes for respiratory impairment. 2.3. Provide support during pre-, intra- and post diagnostic procedures and provide information on the procedures. 2.4. Identify responses to nursing interventions and confirm understanding of how to manage the respiratory impairment after discharge. 2.5. Provide information about available community resources and how to access them. 2.6. Identify where the acuity of a person exceeds own knowledge, skill and assessed competence and refer to multidisciplinary health care team.
3. Provide respiratory nursing care.	3.1. Make proposals for nursing interventions that promote optimal outcomes. 3.2. Evaluate nursing interventions and identified outcomes against evidence-based best practice in respiratory care nursing. 3.3. Evaluate responses to health interventions and education resources, and continuously

	improve promotions and resources based on feedback. 3.4. Seek opportunities and participate in professional development to guide own practice and act as a resource for colleagues.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTENN055 Apply nursing practice in the respiratory care setting

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- perform the nursing care interventions on three people in a respiratory care setting:
 - care of an arterial line
 - use of positive airway pressure (CPAP) and bilevel positive airway pressure (BiPAP)
 - care of permanent and temporary mechanical ventilation including suctioning and bagging
 - use of tracheal suction via an endotracheal tube (ETT)
 - assistance with insertion or removal of pleural and intercostal or underwater seal drains (UWSD)
 - administration of oxygen based on evaluation of oximetry readings or blood gas analysis in consultation with registered nurse

The tasks must include use of advanced communication and medical terminology to communicate effectively with the person, families and carers, and the registered nurse and other health professionals to record or report the outcomes.

The tasks must be undertaken in accordance with the Nursing and Midwifery Board of Australia (NMBA) professional practice standards, codes and guidelines.

Knowledge Evidence

Demonstrate knowledge required to complete tasks outlined in elements and performance criteria of this unit:

- respiratory anatomy, physiology and pathology, sufficiently in-depth and specialised to make judgements and to make a professional contribution to respiratory nursing care.
- respiratory conditions:
 - acute respiratory distress syndrome
 - asthma
 - bronchitis, bronchiolitis and bronchiectasis
 - chronic obstructive airway disease

- cystic fibrosis
- emphysema
- haemothorax
- lung cancer
- pulmonary oedema
- pneumonia
- pulmonary embolism (PE)
- pneumothorax
- sleep apnoea
- tuberculosis (TB)
- actual and potential problems from respiratory conditions:
 - aspiration
 - hypoxia
 - hypercapnia
 - inability to clear secretions
 - inability to cough
 - inability to protect airway
 - respiratory failure
 - shortness of breath
- potential nursing interventions related to respiratory conditions:
 - administration of non-invasive ventilation, CPAP and BiPAP
 - assisting with insertion and removal of pleural drains
 - care of an arterial line and evaluation of blood gas analysis
 - care of a person with a tracheostomy:
 - tracheostomy dressing
 - tracheal suction via an endotracheal tube (ETT) and tracheostomy
 - evaluating the results of oximetry readings.
 - respiratory assessment:
 - chest auscultation
 - inspection
 - pulse oximetry
 - respiratory rate
 - pulse rate
 - blood pressure

- sedation score
- past medical history
- accessory muscles in use when breathing
- degree of shortness of breath (SOB)
- evaluating results of spirometry testing
- surgical procedures for respiratory conditions
- oxygen management.

Assessment Conditions

To be eligible to apply for registration as an enrolled nurse and to practice in Australia, each applicant must complete a Diploma of Nursing program accredited by the Australian Nursing and Midwifery Accreditation Council (ANMAC) and approved as ‘an approved program of study’ by the Nursing and Midwifery Board of Australia (NMBA) in accordance with the Enrolled Nurse Accreditation Standards.

For more detail visit <https://www.ahpra.gov.au>.

Skills must be demonstrated in the workplace or in a simulated environment as specified in the performance evidence that model industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors.

Assessors must also hold current registration as a registered nurse with the Nursing and Midwifery Board of Australia (NMBA).

HLTENN056 Apply nursing practice in the cardiovascular care setting

Modification History

N/A

Application

This unit describes the performance outcomes, skills and knowledge required to apply the principles of cardiovascular nursing care to provide comprehensive nursing care and maintain a person's optimal cardiovascular health.

Enrolled nurses working in cardiovascular nursing hold and apply specialised in-depth knowledge, integrate theory and practice, and make reliable clinical assessments and judgements.

This unit applies to enrolled nurses, registered with the Nursing and Midwifery Board of Australia (NMBA), seeking specialisation in enrolled nurse work that is carried out in consultation and collaboration with registered nurses, and under direct or indirect supervisory arrangements aligned to the NMBA regulatory authority legislative requirements.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian Standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements	Performance criteria

<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Contribute to multidisciplinary health care team in caring for a person with cardiovascular condition.	1.1 Contribute information to nursing plan of care that reflects nursing needs and includes nursing actions to maximise cardiovascular function and minimise potential complications. 1.2 Identify role of specialist nursing and medical services in dealing with cardiovascular conditions and work within that context. 1.3 Identify factors relevant to the health situation, including physical, psychological, social and economic impacts. 1.4 Review clinical data collected and monitor cardiovascular condition. 1.5 Communicate to multidisciplinary health care team members.
2. Perform nursing interventions in the cardiovascular health care setting.	2.1 Prioritise nursing interventions according to person's needs. 2.2 Undertake pre-, intra- and post diagnostic procedures in line with scope of practice and organisational policies and procedures. 2.3 Participate in risk identification, assessment and management processes. 2.4 Apply decision-making framework to modify nursing interventions and use problem-solving approaches in response to changes in condition. 2.5 Identify where acuity of a person exceeds own knowledge, skill and assessed competence and consult with multidisciplinary health care team. 2.6 Administer prescribed emergency medication based on principles of drug actions and in accordance with organisational policies and procedures and own scope of enrolled nursing practice. 2.7 Make nursing care proposals in consultation with registered nurse to

	promote improved outcomes for the condition.
3. Evaluate effectiveness of nursing interventions and planned support for continuing self-care.	3.1 Evaluate nursing interventions and identified outcomes against evidence-based best practice in cardiovascular nursing care. 3.2 Identify responses of the person, families and carers to nursing interventions and their understanding of ongoing management of cardiovascular impairment. 3.3 Identify opportunities to provide information on available community resources and how to access them. 3.4 Assess, prior to discharge, the person's understanding of their cardiovascular condition, medications, therapeutic regimes and follow up care required.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Unit Mapping Information

Current Code and Title	Previous Code and Title	Comments	Equivalence

Assessment Requirements for HLTENN056 Apply nursing practice in the cardiovascular care setting

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- perform nursing care interventions with three people with a cardiovascular condition in the workplace through:
 - administration of non-invasive continuous positive airway pressure (CPAP) and bilevel positive airway pressure (BiPAP)
 - use of peripherally inserted central catheter (PICC) and midline management
 - monitoring of electrocardiograph readings for abnormalities
 - underwater seal drain (UWSD) management

The tasks must include use of advanced communication and medical terminology to communicate effectively with the person, families and carers, and the registered nurse and other health professionals to record or report the outcomes.

The tasks must be undertaken in accordance with the Nursing and Midwifery Board of Australia (NMBA) professional practice standards, codes and guidelines.

Knowledge Evidence

Demonstrate knowledge required to complete tasks outlined in elements and performance criteria of this unit:

- issues and manifestation:
 - physiology and pathophysiology related to cardiovascular issues
 - execution of emergency care for cardiovascular issues
 - clinical manifestations of chronic disease states
- cardiovascular conditions:
 - congestive heart failure
 - acute pulmonary oedema
 - pulmonary embolism
 - arrhythmia:
 - ventricular tachycardia
 - ventricular fibrillation

- asystole
 - symptomatic brady and tachycardia
 - atrial fibrillation
- congenital heart defects:
 - accessory pathways
 - septal defects
 - Tetralogy of Fallot
 - dextracardia
- ischaemic heart disease, angina and myocardial infarction
- heart valve dysfunction
- sub-acute bacterial endocarditis
- pericarditis
- acute chest pain
- cardiomyopathy
- carotid stenosis
- abdominal aortic aneurysm
- peripheral vascular disease
- deep vein thrombosis
- actual and potential problems relating to cardiovascular conditions:
 - electrolyte imbalance
 - fluid overload
 - hypoxia and hypoxaemia
 - chest pain
 - structural heart damage
 - sepsis
 - haemorrhage
 - neurovascular damage including cerebral vascular accident
 - vessel occlusion
 - pneumothorax
 - pacemaker lead displacement
 - arrhythmia
 - exercise intolerance
- cardiovascular procedures:
 - cardiac stents

- percutaneous transluminal coronary angioplasty (PTCA) with and without stent
- pacemaker
- cardiac access vascular graft (CAVG)
- mitral valvotomy
- electrophysiology studies, with and without ablation
- implantable cardioverter defibrillator (ICD)
- cardioversion
- echocardiogram
- exercise stress test
- nuclear medicine scans
- transoesophageal echocardiogram (TOE)
- hyper and hypo tension
- pericardiocentesis
- abdominal aortic aneurysm (AAA) repair
- varicose veins
- amputations
- actions designed to maximise cardiovascular function and minimise potential complications
- reflective practice and evidence-based best practice for cardiovascular nursing
- organisational processes for evaluation of nursing interventions.

Assessment Conditions

To be eligible to apply for registration as an enrolled nurse and to practice in Australia, each applicant must complete a Diploma of Nursing program accredited by the Australian Nursing and Midwifery Accreditation Council (ANMAC) and approved as ‘an approved program of study’ by the Nursing and Midwifery Board of Australia (NMBA) in accordance with the Enrolled Nurse Accreditation Standards.

For more detail visit <https://www.ahpra.gov.au>.

Skills must be demonstrated in the workplace or in a simulated environment as specified in the performance evidence that model industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors.

Assessors must also hold current registration as a registered nurse with the Nursing and Midwifery Board of Australia (NMBA).

HLTENN057 Contribute to the nursing care of a person with diabetes

Modification History

N/A

Application

This unit describes the performance outcomes, skills and knowledge required to provide nursing care to a person with diabetes including assessing needs, planning and implementing nursing interventions, evaluating outcomes, and educating the person on the condition and available resources.

This unit applies to enrolled nursing work carried out in consultation and collaboration with registered nurses, and under supervisory arrangements aligned to the Nursing and Midwifery Board of Australia (NMBA) regulatory authority legislative requirements.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian Standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements	Performance criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

1. Assess needs of a person with diabetes.	1.1. Apply requirements of the pathophysiology of types of diabetes. 1.2. Perform nursing assessment using contemporary assessment tools, resources and strategies and incorporating review of health status, lifestyle and treatment regimes. 1.3. Determine understanding of condition, self-management strategies and medications. 1.4. Identify possible factors impacting the health and significant alterations in the condition. 1.5. Identify family and carer understanding of and involvement in the person's diabetes care and the impact on care planning and provision.
2. Perform nursing interventions to assist in achieving and maintaining optimal diabetes health.	2.1. Prioritise care according to needs and re-prioritise care activities when circumstances change. 2.2. Apply plan of care and ensure it reflects the care needs of a person with diabetes. 2.3. Identify response to nursing interventions and understanding of ongoing management of the condition, including strategies for self-management. 2.4. Evaluate blood and urine test results related to diabetic condition and report findings to the multidisciplinary health care team. 2.5. Administer prescribed and emergency medicine as indicated. 2.6. Liaise with registered nurses about alterations in condition while providing ongoing support.
3. Identify diabetes care services in the Australian health care environment.	3.1. specialist services and complementary roles of organisations and individuals involved in supporting and delivering diabetes care. 3.2. Identify need to refer person to a diabetes registered nurse educator and other specialist services and complementary roles of organisations and individuals involved in supporting and delivering diabetes care.

4. Evaluate care plan for a person with diabetes and support self-management.	4.1. Identify and evaluate diabetes management plan to ensure compliance and escalate intervention where identified. 4.2. Evaluate nursing interventions and identified outcomes against evidence-based best practice in diabetes nursing care. 4.3. Evaluate person's understanding of the diabetes condition, medications, therapeutic regimes and self-management. 4.4. Promote self-management of condition and assist person to provide accurate information to families and carers on diabetes care needs. 4.5. Document uptake of health promotion initiatives to support self-management.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTENN057 Contribute to the nursing care of a person with diabetes

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- provide nursing care to three people with diabetes involving:
 - a person who has become hypoglycaemic
 - a person who has become hyperglycaemic

The tasks must be undertaken in accordance with the Nursing and Midwifery Board of Australia (NMBA) professional practice standards, codes and guidelines.

Knowledge Evidence

Demonstrate knowledge required to complete tasks outlined in elements and performance criteria of this unit:

- anatomy, physiology and pathophysiology related to diabetes and diabetic conditions including:
 - type 1 diabetes
 - type 2 diabetes
 - gestational diabetes mellitus
- insulin administration devices
- potential problems related to care of a person with diabetic conditions:
 - hypoglycaemia
 - hyperglycaemia
 - diabetic ketoacidosis (DKA)
 - Hyperglycaemic Hyperosmolar Nonketotic Syndrome (HHNS)
 - Hyperosmotic Hyperglycaemic Syndrome (HHS)
 - retinopathy
 - infection
 - psychosocial issues
- health promotion goals and expected outcomes:
 - glycaemic control

- optimal nutrition
- weight loss or gain
- smoking cessation
- foot and eye care
- oral hypoglycaemic therapy
- insulin therapy
- blood glucose monitoring
- factors influencing self-esteem of the person with diabetes
- issues related to diabetes care delivery and diabetes related services
- underlying environmental and social factors contributing to diabetes in the Australian general population, including the factors involved with higher rates experienced by Aboriginal and Torres Strait Islander people
- role of Congress of Aboriginal and Torres Strait Islander Nurses and Midwives (CATSINaM)
- Aboriginal and Torres Strait Islander health and principles of cultural safety
- organisational processes for evaluation of care plans.

Assessment Conditions

To be eligible to apply for registration as an enrolled nurse and to practice in Australia, each applicant must complete a Diploma of Nursing program accredited by the Australian Nursing and Midwifery Accreditation Council (ANMAC) and approved as ‘an approved program of study’ by the Nursing and Midwifery Board of Australia (NMBA) in accordance with the Enrolled Nurse Accreditation Standards.

For more detail visit <https://www.ahpra.gov.au>.

Skills must be demonstrated in the workplace or in a simulated environment as specified in the performance evidence that model industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors.

Assessors must also hold current registration as a registered nurse with the Nursing and Midwifery Board of Australia (NMBA).

Elements and Performance Criteria

Elements	Performance criteria

<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Work in the multidisciplinary health care team in the perioperative environment.	1.1. Work within enrolled nurse scope of practice to support nursing care team in managing care needs in the perioperative environment. 1.2. Contribute to effective teamwork and positive group dynamics of the multidisciplinary health care team. 1.3. Communicate professionally with members of the perioperative team. 1.4. Apply philosophical framework for managing perioperative care in own nursing practice.
2. Contribute to preparation for surgical intervention.	2.1. Provide delegated elements of person-centred care considering physical, emotional, spiritual and cultural needs. 2.2. Apply contemporary perioperative clinical assessment tools and document physiological and psychological variables in assessment and report. 2.3. Work in accordance with perioperative standards, guidelines and policies.
3. Perform clinical nursing actions in the perioperative environment.	3.1. Analyse and problem solve to prioritise and adapt nursing interventions to reflect changes in condition. 3.2. Perform nursing interventions to assist surgical team during surgical procedure. 3.3. Identify actual and potential manual handling and environmental hazards and take action to reduce risk and promote safety. 3.4. Check equipment relevant to practice requirements is operational and functionally fit for purpose, and take corrective action and report detected faulty equipment and environmental hazards. 3.5. Apply principles of infection control in the perioperative environment in line with standards and organisational policies and procedures.

	3.6. Identify where the acuity of a person exceeds own knowledge, skill and assessed competence and refer to multidisciplinary health care team.
4. Promote improvement and advancement of perioperative nursing care.	4.1. Evaluate nursing interventions and identified outcomes against evidence-based best practice in perioperative nursing. 4.2. Seek opportunities and participate in professional development to guide own practice and act as a resource for colleagues.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTENN058 Apply nursing practice in the perioperative setting

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- apply specialised clinical nursing skills for three people during anaesthesia, surgery and recovery in perioperative nursing environment involving:
 - preparing and positioning the person for a surgical procedure
 - performing intra-operative observations and supporting scrub nurse with monitoring materials
 - maintaining airway before and after surgery
 - using oral suctioning techniques intra-operatively
 - collecting specimens for pathology

The tasks must be undertaken in accordance with the Nursing and Midwifery Board of Australia (NMBA) professional practice standards, codes and guidelines.

Knowledge Evidence

Demonstrate knowledge required to complete tasks outlined in elements and performance criteria of this unit:

- Australian College of Perioperative Nurses (ACORN) Standards for Perioperative Nursing in Australia
- legislation relating to hazards in the perioperative environment including electrical hazards, radiation hazards and sharps disposal
- national, State/Territory and local legal and ethical considerations relevant to the nursing profession and application to nursing practice
- policy statements, literature and guidelines from professional bodies associated with perioperative care and management including ACORN
- medical terminology associated with perioperative care
- philosophical framework for perioperative nursing
- anaesthetic pharmacology
- complications of surgical procedures and their management including emergency and first aid treatment

- complications associated with anaesthesia, including emergency treatment, infection control practices and organisational policies and procedures specific to perioperative environment
- positioning of a person for surgical procedures including potential for post operative pressure injury from incorrect position during surgery
- risk of falls post surgery
- use of complex technologies:
 - anaesthetic machines
 - lasers
 - cavitron ultrasonic surgical aspirator (CUSA)
 - endoscopic equipment
- actual and potential problems relating to perioperative care:
 - electrolyte imbalance
 - fluid overload
 - reduced carbon dioxide
 - hypoxia and hypoxaemia
 - sepsis
 - haemorrhage
 - neurovascular damage
 - cerebral vascular accident
 - arrhythmia.

Assessment Conditions

To be eligible to apply for registration as an enrolled nurse and to practice in Australia, each applicant must complete a Diploma of Nursing program accredited by the Australian Nursing and Midwifery Accreditation Council (ANMAC) and approved as 'an approved program of study' by the Nursing and Midwifery Board of Australia (NMBA) in accordance with the Enrolled Nurse Accreditation Standards.

For more detail visit <https://www.ahpra.gov.au>.

Skills must be demonstrated in the workplace or in a simulated environment as specified in the performance evidence that model industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Assessors must also hold current registration as a registered nurse with the Nursing and Midwifery Board of Australia (NMBA).

Elements and Performance Criteria

Elements	Performance criteria

<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Work in the hyperbaric environment.	1.1. Identify roles and responsibilities of members of the multidisciplinary health care team in the hyperbaric environment. 1.2. Identify potential and actual hazards in the hyperbaric environment and observe workplace health and safety requirements in own practice. 1.3. Identify rationale for pre-hyperbaric treatment safety checklists and participate in pre-hyperbaric treatment safety processes. 1.4. Identify potential causes of emergencies associated with the hyperbaric chamber and hyperbaric treatment and use methods to prevent emergencies. 1.5. Apply requirements of the hyperbaric chamber and locate main oxygen valve for situations and emergencies where the valve needs to be shut off. 1.6. Set up hyperbaric chamber equipment for treatments and solve problems during hyperbaric treatments. 1.7. Identify actual and potential contraindications to hyperbaric therapy for the person undergoing hyperbaric treatment and the multidisciplinary health care team. 1.8. Undertake annual hyperbaric medical and promote requirement with colleagues.
2. Contribute to comprehensive and specific assessment for hyperbaric treatment.	2.1. Perform nursing assessment using resources and tools specific to the hyperbaric unit in line with organisational policies and procedures. 2.2. Identify possible physical and psychological complications of hyperbaric treatment including contraindications based on findings of the assessment. 2.3. Evaluate physical, psychological and social impacts of hyperbaric treatment with the person, families and carers and ensure their knowledge is sufficient for informed consent.

	2.4. Identify where acuity of a person exceeds own knowledge, skill or assessed competence and consult with multidisciplinary health care team.
3. Perform nursing interventions in the hyperbaric environment.	3.1. Apply strategies for managing anxiety during hyperbaric therapy. 3.2. Monitor and manage drainage tubes including interventions related to suction in the hyperbaric chamber at depth and at surface. 3.3. Apply principles related to hyperbaric oxygen therapy when setting up and managing breathing system in the hyperbaric chamber. 3.4. Perform wound management and record wound response to hyperbaric therapy and report to the multidisciplinary health care team. 3.5. Respond to hyperbaric emergencies and toxicity in line with organisational policies and procedures. 3.6. Analyse and problem solve to propose and implement nursing interventions to reflect changes in the condition in consultation with registered nurse. 3.7. Evaluate nursing interventions and identified outcomes against evidence-based best practice in hyperbaric nursing care.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTENN059 Apply nursing practice in the hyperbaric environment

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- perform nursing interventions for three different people undergoing a session of hyperbaric therapy in the workplace

The tasks must be undertaken in accordance with the Nursing and Midwifery Board of Australia (NMBA) professional practice standards, codes and guidelines.

Knowledge Evidence

Demonstrate knowledge required to complete tasks outlined in elements and performance criteria of this unit:

- Australian Standards applicable for work in compressed air and hyperbaric oxygen facilities
- basic structure and internal layout of a hyperbaric chamber
- common dive tables for hyperbaric treatment and their indications
- common treatment profiles for hyperbaric therapy and their indications
- conditions indicated and contraindicated for hyperbaric therapy treatment and the mechanisms of therapeutic benefit
- educational resources and professional organisations associated with hyperbaric therapy
- emergencies associated with the hyperbaric chamber and treatment:
 - fire inside the chamber
 - fire outside the chamber
 - emergency decompression
 - explosive decompression
 - uncontrolled compression
 - power failure
 - communication failure
 - chamber atmospheric contamination
 - isolation emergency including actual and potential violence

- hyperbaric chamber treatment:
 - the chamber and sequence of events that occur during treatment
 - air equalisation observation techniques
 - strategies for managing an anxious patient during hyperbaric treatment
 - prohibited items in the chamber
 - clothing for treatments
 - complications
 - location of main oxygen valve and how to shut off
 - maintaining hyperbaric chamber cleanliness
 - fire and medical emergency procedures
- symptoms of hyperbaric central nervous systems (CNS) toxicity and actions in response to the symptoms.
- indications for hyperbaric therapy:
 - decompression sickness
 - carbon monoxide poisoning
 - smoke inhalation
 - osteoradionecrosis
 - selected wound healing
 - mixed non-aerobic and aerobic infections
 - air and gas embolism
 - osteomyelitis and refractory
 - gas gangrene and clostridial myonecrosis
 - soft tissue radio-necrosis
 - crush injuries and compartment syndrome
 - compromised skin grafts and flaps
 - thermal burns
 - blood loss
 - spider bites
- legislative requirements for practice
- complications of hyperbaric therapy:
 - cardiac arrest and airway management
 - hypoglycaemia
 - oxygen toxicity including CNS and pulmonary
 - isolation emergency including actual and potential violence

- pneumothorax
 - claustrophobia
 - sinus and dental barotrauma
 - lung barotrauma
- physiological effects of increased atmospheric pressure on the human body and of breathing 100 per cent oxygen, hyper oxygenation, helium and mixed gases under hyperbaric conditions
- rationale for annual staff hyperbaric medicals
- contraindications for hyperbaric therapy:
 - pulmonary function tests
 - tissue perfusion tests
 - excessive alcohol intake
 - dehydration
 - asthma
 - anxiety states or claustrophobia
 - dental work in the previous 24 hours
 - strenuous exercise before and after therapy
 - flying within 24 hours of treatment
- anatomy, physiology and pathophysiology related to hyperbaric issues sufficiently in-depth and specialised to make judgements and to make professional contributions to hyperbaric nursing care
- screening procedures to identify suitability for hyperbaric treatment
- considerations for paediatric persons
- theories of physics as they relate to hyperbaric treatments including:
 - Boyle's law
 - Charles's law
 - Henry's law
 - Dalton's law.

Assessment Conditions

To be eligible to apply for registration as an enrolled nurse and to practice in Australia, each applicant must complete a Diploma of Nursing program accredited by the Australian Nursing and Midwifery Accreditation Council (ANMAC) and approved as 'an approved program of study' by the Nursing and Midwifery Board of Australia (NMBA) in accordance with the Enrolled Nurse Accreditation Standards.

For more detail visit <https://www.ahpra.gov.au>.

Skills must be demonstrated in the workplace or in a simulated environment as specified in the performance evidence that model industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Assessors must also hold current registration as a registered nurse with the Nursing and Midwifery Board of Australia (NMBA).

Link

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTENN060 Apply nursing practice in the paediatric care setting

Modification History

N/A

Application

This unit describes the performance outcomes, skills and knowledge to provide care for paediatric persons in primary health care, hospitals, hospices, and home and community care.

Paediatric and child health nurses working in the paediatric nursing environment hold and apply specialised in-depth knowledge, integrate theory and practice, and make reliable clinical assessments and judgements.

This unit applies to enrolled nurses, registered with the Nursing and Midwifery Board of Australia (NMBA), seeking specialisation in enrolled nurse work that is carried out in consultation and collaboration with registered nurses, and under direct or indirect supervisory arrangements aligned to the NMBA regulatory authority legislative requirements.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian Standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements	Performancecriteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

1. Contribute to nursing care in the paediatric setting.	1.1. Identify roles and responsibilities of members of the multidisciplinary health care team in the paediatric environment and support the team in managing nursing care needs. 1.2. Work in the multidisciplinary health care team to foster positive group dynamics with other health care professionals. 1.3. Provide nursing care and advocate for the rights of the paediatric person, families and carers. 1.4. Provide information to the paediatric person, families and carers on community resources and how to access them. 1.5. Identify where acuity of a paediatric person exceeds own knowledge, skill and assessed competence and consult with multidisciplinary health care team.
2. Clarify the impact of the paediatric condition on the person, families and carers.	2.1. Perform person-centred nursing assessment to identify pathophysiology of presenting and underlying conditions and related issues. 2.2. Communicate at the developmental stage of the paediatric person. 2.3. Collect health information about the health condition and identify self-management strategies and current treatment regime. 2.4. Provide person-centred nursing care to address health condition and nursing interventions. 2.5. Evaluate impacts and complications of the paediatric person's condition. 2.6. Prioritise workload according to needs and re-prioritise care rapidly in changing circumstances. 2.7. Support paediatric person, families and carers using developmental care, atraumatic care and family-centred care principles, during pre-, intra- and post diagnostic procedures.
3. Promote improvement of paediatric nursing care.	3.1. Propose nursing interventions in consultation with registered nurse to promote improved outcomes and health condition.

	• 3.2. Evaluate nursing interventions and outcomes against evidence-based best practice in paediatric nursing. • 3.3. Evaluate responses of the paediatric person, families and carers to health promotion and educational resources, and participate in organisational continuous improvement processes of these resources. • 3.4. Seek opportunities and participate in professional development to guide own practice and act as a resource for colleagues.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTENN060 Apply nursing practice in the paediatric care setting

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- analyse health information and the clinical presentation of three people in the paediatric workplace environment to reach a substantiated conclusion about possible health care planning and nursing interventions related to their health condition
- perform nursing interventions on a paediatric person in the workplace:
 - collect urine specimen from a paediatric person
 - assess and document vital signs
 - perform developmentally appropriate pain assessment

The tasks must be undertaken in accordance with the Nursing and Midwifery Board of Australia (NMBA) professional practice standards, codes and guidelines.

Knowledge Evidence

Demonstrate knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- strategies to limit painful procedures:
 - distraction therapy
 - procedural sedation
 - family strategies
- childhood perceptions of health status
- developmental milestones and factors influencing growth and development
- cognitive and psychosocial development from birth to adolescence
- factors influencing self-esteem
- factors influencing learning needs
- factors influencing interactions with parent, families and carers with paediatric person including Aboriginal and Torres Strait Islander health and cultural safety issues
- techniques to participate positively as a member of a multidisciplinary health care team

- Aboriginal health worker role
- techniques to support interpersonal and therapeutic relationships including Aboriginal and Torres Strait Islander health and cultural safety
- paediatric differences in anatomy and physiology
- clinical manifestations of common paediatric conditions and associated pathophysiology:
 - allergies
 - asthma
 - cancer
 - cerebral palsy
 - epilepsy
 - infectious disease
 - injury
 - mental health condition
 - paediatric dermatology
 - type 1 and type 2 diabetes
 - respiratory infection
- special health requirements related to paediatric conditions and issues:
 - sleep disorders
 - nutritional disorders
 - feeding alternatives
 - health perceptions of the paediatric person.
 - separation from parents, families and carers
 - congenital conditions
 - psychomotor dysfunction
 - alcohol and other drug induced disorders and injuries
 - physical and psychological abuse
 - near drowning
 - bed wetting
- complementary therapies used in comprehensive practice
- role of Congress of Aboriginal and Torres Strait Islander Nurses and Midwives (CATSINaM)
- Aboriginal and Torres Strait Islander health and principles of cultural safety
- organisational processes for evaluation of nursing interventions for improvement.

Assessment Conditions

To be eligible to apply for registration as an enrolled nurse and to practice in Australia, each applicant must complete a Diploma of Nursing program accredited by the Australian Nursing and Midwifery Accreditation Council (ANMAC) and approved as 'an approved program of study' by the Nursing and Midwifery Board of Australia (NMBA) in accordance with the Enrolled Nurse Accreditation Standards.

HLTENN061 Apply nursing practice in the contemporary aged care setting

Modification History

N/A

Application

This unit describes the performance outcomes, skills and knowledge required to work in the contemporary aged care environment providing specialised nursing care to support the continued independence of older people.

This unit applies to care provided for older people in their own home, in community and day care centres, in acute and sub-acute hospital settings, and in residential high care and low care settings in aged care environments.

Enrolled nurses working in aged care nursing, integrate theory and gerontological knowledge to practice and make clinical assessments and sound clinical judgements based on enrolled nursing assessments.

This unit applies to enrolled nurses, registered with the Nursing and Midwifery Board of Australia (NMBA), seeking specialisation in enrolled nurse work that is carried out in consultation and collaboration with registered nurses, and under direct or indirect supervisory arrangements aligned to the NMBA regulatory authority legislative requirements.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian Standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

Nursing

Elements and Performance Criteria

Elements	Performance criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify health care needs of older person in contemporary aged care setting.	1.1. Identify physical and psychological effects of ageing on the human body and apply to provision of information and support. 1.2. Adjust communication strategies when communicating with an older person with sensory loss. 1.3. Apply physical and psychosocial assessment when evaluating health of older people. 1.4. Identify funding arrangements and associated documentation requirements that impact aged care provision and ensure funding and documentation requirements are met. 1.5. Recognise crisis situations and emergency management responses including infectious and other serious risk outbreak. 1.6. Apply the principles for Dignity of Risk and consumer choice in the aged care settings. 1.7. Identify advanced care directive and advanced care choices.
2. Manage care using person-centred approach to support continued independence.	2.1. Reflect, analyse and problem solve to prioritise and adapt nursing interventions to reflect changes in condition. 2.2. Structure nursing care according to needs and re-prioritise care activities when circumstances change. 2.3. Reflect on own nursing interventions to ensure they support independence and person-centred care. 2.4. Plan and initiate pre-, intra- and post diagnostic procedures for the older person in accordance with best practice evidence. 2.5. Identify and evaluate rehabilitation principles that underpin nursing interventions for the older person and apply to nursing care.

	• 2.6. Confirm therapies and capacity for self-management with families and carers. • 2.7. Identify condition and current therapies and review ability for self-management. • 2.8. Identify where acuity of a person exceeds own knowledge, skill and assessed competence and consult with multidisciplinary health care team.
• 3. Assess and respond to loss and grief.	• 3.1. Identify effects of grief and loss on physical, emotional, cognitive, behavioural, social and spiritual domains. • 3.2. Analyse and problem solve to encourage the person, families and carers experiencing loss and grief reaction to verbalise feelings and provide support. • 3.3. Assess nursing care needs while advocating for choice of care including right to refuse care and treatment.
• 4. Promote improvement and advancement of aged care nursing.	• 4.1. Document outcomes and proposed actions and communicate to the registered nurse using a collaborative approach for follow up with multidisciplinary health care team. • 4.2. Apply person-centred care and elder abuse principles and apply compulsory reporting requirements for suspicion and allegation of elder abuse. • 4.3. Evaluate nursing interventions and identified outcomes against evidence-based best practice in aged care nursing. • 4.4. Seek opportunities and participate in professional development to guide own practice and act as a resource for colleagues.

Assessment Requirements for HLTENN061 Apply nursing practice in the contemporary aged care setting

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- provide nursing care and management towards planned nursing outcomes for two people in the workplace:
 - admission and assessment of older person to contemporary aged care setting
 - self-management strategies

The tasks must be undertaken in accordance with the Nursing and Midwifery Board of Australia (NMBA) professional practice standards, codes and guidelines.

Knowledge Evidence

Demonstrate knowledge required to complete tasks outlined in elements and performance criteria of this unit:

- aged care system in Australia
- protocols for admission and transfer of older person to acute care environments
- aged care assessment, funding arrangements and associated documentation
- age-related adjustments and transitions for the older person
- evidence-based practice in aged care environment
- health illness continuum model
- pain assessment of an older person
- philosophies of loss and grief:
 - how to deal with others experiencing loss
 - grief reactions
 - end of life care interventions
- philosophy underpinning aged care and extended care management
- legal and ethical issues and assessment tools relevant to the older person:
 - advance care directives
 - Aged Care Act

- aged care funding
- carers recognition legislation.
- aged care risk classification system
- NMBA code of ethics for nurses in Australia
- NMBA code of professional conduct for nurses in Australia
- Residential Care Quality Assessment (ResCareQA)
- legal requirements associated with abuse of the older person
- Clinical Governance Standards
- Aged Care Accreditation Standards
- organisational processes for evaluation of nursing interventions for improvement.

Assessment Conditions

To be eligible to apply for registration as an enrolled nurse and to practice in Australia, each applicant must complete a Diploma of Nursing program accredited by the Australian Nursing and Midwifery Accreditation Council (ANMAC) and approved as ‘an approved program of study’ by the Nursing and Midwifery Board of Australia (NMBA) in accordance with the Enrolled Nurse Accreditation Standards.

For more detail visit <https://www.ahpra.gov.au>.

Skills must be demonstrated in the workplace or in a simulated environment as specified in the performance evidence that model industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors.

Assessors must also hold current registration as a registered nurse with the Nursing and Midwifery Board of Australia (NMBA).

Elements and Performance Criteria

Elements	Performance criteria

<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Contribute to ostomy care.	1.1. Work within scope of practice to provide and support ostomy and stoma care. 1.2. Identify specialist care services and community agencies that provide and support ostomy and stoma care, and the possible role in long-term ostomy care. 1.3. Discuss and evaluate ongoing nursing care and management plan with the supervising registered nurse and the multidisciplinary health care team. 1.4. Provide continuity of nursing care in partnership with service providers and agencies.
2. Assess health care needs of a person with a stoma.	2.1. Perform health assessment using assessment tools relevant to current situation and needs. 2.2. Collect information in accordance with organisational policies and procedures. 2.3. Identify physiological, pathological and congenital conditions leading to the stoma creation. 2.4. Determine own knowledge of the condition, therapies and self-management requirements, and impacts on care planning and provision. 2.5. Identify family and carer's knowledge of and involvement in the ostomy and stoma care. 2.6. Identify possible psychological factors impacting person with a stoma, families and carers.
3. Perform nursing interventions to assist a person with a stoma.	3.1. Follow nursing plan of care to reflect care needs specific to stoma care requirements. 3.2. Identify and apply principles of contemporary stoma management according to organisational policies and procedures when providing nursing care. 3.3. Identify opportunities to provide health education and promote health and self-management of the stoma.

	3.4. Provide education to promote health and self-management of the stoma. 3.5. Identify responses to nursing interventions and person's understanding of ongoing management of condition, including strategies for self-management. 3.6. Escalate findings and care that are outside normal parameters to treating team. 3.7. Identify where acuity of a person exceeds own knowledge, skill and assessed competence and consult with multidisciplinary health care team.
4. Evaluate progress toward expected outcomes of care.	4.1. Review the nursing plan of care and modify according to progress toward planned outcomes. 4.2. Evaluate and document understanding of person's stoma condition, medications, therapeutic regimes and self-management. 4.3. Identify outcomes against evidence-based best practice in stoma nursing care when evaluating nursing interventions provided. 4.4. Document outcomes of care and communicate findings to multidisciplinary health care team in accordance with organisational policies and procedures.

Assessment Requirements for HLTENN062 Implement and monitor care for a person with a stoma

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- assess three people using different assessment tools to identify physiological, pathological or congenital conditions leading to stoma creation
- apply principles of stoma management to provide nursing care to two people with a stoma in the workplace including:
 - replacing stoma drainage bag
 - assessing stoma for signs of obstruction, prolapse, necrosis and impaired integrity

The tasks must be undertaken in accordance with the Nursing and Midwifery Board of Australia (NMBA) professional practice standards, codes and guidelines.

Knowledge Evidence

Demonstrate knowledge required to complete tasks outlined in elements and performance criteria of this unit:

- principles of contemporary stoma management
- health promotion activities for a person with a stoma and associated issues
- terminology and issues associated with stoma management:
 - ostomy
 - colostomy
 - ileostomy
 - urostomy
 - stricture
 - obstruction
 - prolapse
 - retraction
 - parastomal hernia
 - necrosis

- altered fluid and electrolyte states
 - nutrition and hydration
 - body image and sexuality
 - psychological and psycho-social
 - peritonitis
 - impaired stomal integrity
- anatomy, physiology and pathophysiology related to stoma issues
- processes for stoma management:
 - pre-operative and pre-procedure bowel preparation
 - wound care specific to stoma operation
- bridge site care
- appliance and product selection and management
- management of skin and peristomal skin conditions
- skin care and products to assist in managing incontinence
- management of constipation, diarrhoea and flatus
- care of high output stomas
- odour control
- community services and resources for stoma care
- organisational processes for evaluation of nursing interventions for improvement.

Assessment Conditions

To be eligible to apply for registration as an enrolled nurse and to practice in Australia, each applicant must complete a Diploma of Nursing program accredited by the Australian Nursing and Midwifery Accreditation Council (ANMAC) and approved as ‘an approved program of study’ by the Nursing and Midwifery Board of Australia (NMBA) in accordance with the Enrolled Nurse Accreditation Standards.

Elements and Performance Criteria

Elements	Performance criteria

<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Work as part of a multidisciplinary health care team in mental health care.	1.1. Support multidisciplinary health care team to manage care of person requiring mental health care. 1.2. Contribute to teamwork and positive group dynamics when working with health care colleagues. 1.3. contributions of emergency services, referring agencies, hospital and community team staff and community support groups to the care needs of the person with a mental health condition. 1.4. Participate safely as part of team in interventions involving chemical and physical restraint, and document in accordance with organisational policies and procedures. 1.5. Identify where the acuity of a person exceeds own knowledge, skill and assessed competence and refer to multidisciplinary health care team.
2. Clarify impact of mental health treatment and rehabilitation on the person, families and carers.	2.1. Perform mental health assessment. 2.2. Identify impact of mental health condition on the person, families and carers. 2.3. Identify opportunities to provide the person, families and carers with information on availability and access to recovery-orientated health services and community resources. 2.4. Provide education to promote wellbeing and self-management of the mental health condition.
3. Relate therapeutically to a person with a mental health condition.	3.1. Respond therapeutically to behaviour recognising antecedents for behaviour. 3.2. Acknowledge individual experiences in a non-judgemental manner. 3.3. Identify stages and philosophy of therapeutic relationships.

	• 3.4. Prioritise care issues in accordance with their presentation and behaviour. • 3.5. Maintain professional boundaries with the person and set limits for therapeutic interventions. • 3.6. Identify own verbal and non-verbal cues that impact the person and others and amend communication practices. • 3.7. Seek opportunities and participate in professional development to guide own practice.
• 4. Evaluate plan of care for a person with mental health condition and support self-management.	• 4.1. Evaluate and review plan of care and propose modifications according to the person's progress toward planned outcomes. • 4.2. Evaluate nursing interventions and identified outcomes against evidence-based best practice in mental health nursing care. • 4.3. Promote self-management of condition and assist to provide accurate information. • 4.4. Document uptake of health promotion initiatives to support self-management.

Assessment Requirements for HLTENN063 Apply nursing practice in the contemporary mental health care setting

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- provide nursing care and management for three people with a mental health condition and document progress towards planned nursing outcomes in the workplace that involves:
 - non-treatment engagement
 - adverse effects of pharmacology used to treat mental health condition
 - risk of self-harm and requirements for physical restraint
 - alcohol and other drug misuse
 - coping skills
 - changes to sleep and concentration patterns

The tasks must be undertaken in accordance with the Nursing and Midwifery Board of Australia (NMBA) professional practice standards, codes and guidelines.

Knowledge Evidence

Demonstrate knowledge required to complete tasks outlined in elements and performance criteria of this unit:

- broad classifications of mental health conditions
- nursing theory in a mental health context
- mental health pharmacology including therapeutic and adverse effects
- diagnostic tests used in mental health assessment and their significance
- ethical issues associated with use of antipsychotic medications
- national framework for recovery-oriented mental health services
- sources of research related to mental health care and evidence-based nursing practice
- national, State/Territory and local legal and ethical issues regarding participation of the person, families and carers in planning and recovery, and how these are applied in organisations and individual practice:
 - codes of practice

- discrimination
- dignity of risk
- duty of care
- human rights
- informed consent
- mandatory reporting
- practice standards
- privacy, confidentiality and disclosure
- policy frameworks
- records management
- rights and responsibilities of workers, employers and individuals accessing the service
- mental health legislation and its impact on individual workers
- work role boundaries including responsibilities and limitations
 - role of other workers
 - roles of families and carers
- work health and safety
- national framework for recovery-orientated mental health services:
 - principles of recovery-oriented practice
 - evidence-based practice in the context of recovery
- cultural health promotion activities for persons with mental health conditions
- factors influencing self-esteem
- medical terminology associated with contemporary mental health care
- philosophy underpinning mental health care
- principles of mental health assessment and risk assessment
- antecedents and clinical manifestations of mental health conditions
- interventions involving chemical and physical restraint
- reducing restriction interventions
- classification systems for mental health conditions:
 - Diagnostic and Statistical Manual of Mental Disorders (DSM-5)
 - Classification of Mental and Behavioural Disorders (ICD-10)
- organisational processes for evaluation of nursing interventions.

Assessment Conditions

To be eligible to apply for registration as an enrolled nurse and to practice in Australia, each applicant must complete a Diploma of Nursing program accredited by the Australian Nursing and Midwifery Accreditation Council (ANMAC) and approved as 'an approved program of study' by the Nursing and Midwifery Board of Australia (NMBA) in accordance with the Enrolled Nurse Accreditation Standards.

For more detail visit <https://www.ahpra.gov.au>.

Skills must be demonstrated in the workplace or in a simulated environment as specified in the performance evidence that model industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Assessors must also hold current registration as a registered nurse with the Nursing and Midwifery Board of Australia (NMBA).

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTENN064 Apply nursing practice in the rural and remote setting

Modification History

N/A

Application

This unit describes the performance outcomes, skills and knowledge required to adapt nursing practice to the unique working conditions in rural and remote environments that are impacted by isolation and distance with restricted access to specialist health practitioners and services.

Enrolled nurses work as part of a multidisciplinary health care team across a wide range of care levels and settings and emergency care services.

This unit applies to enrolled nurses, registered with the Nursing and Midwifery Board of Australia (NMBA), seeking specialisation in enrolled nurse work that is carried out in consultation and collaboration with registered nurses, and under direct or indirect supervisory arrangements aligned to the NMBA regulatory authority legislative requirements.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian Standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements	Performance criteria

<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Establish impact of rural and remote context on nursing practice.	1.1. Establish systemic impacts of location on health care services as a context for work. 1.2. Identify individual situations where time, distance and environmental issues affect care. 1.3. Gather, review and analyse information to identify gaps, benefits and limitations of health care service options and capacity for effective response. 1.4. Engage with the community health care network to determine interrelationships and opportunities for collaborative work practice.
2. Adjust assessment and care practices to rural and remote context.	2.1. Prioritise and coordinate work team responsibilities in the context of location being beyond the timely reach of specialist medical assistance. 2.2. Adjust assessment tools and techniques within the constraints of environmental impacts on care and availability of resources in accordance with organisational policies and procedures. 2.3. Address concerns with registered nurse related to stabilisation and transport of a person and requirements for further assessment and management. 2.4. Evaluate options for transporting a person and waiting for medical assistance in relation to environmental issues, risks, transport availability and the person's condition. 2.5. Re-prioritise nursing care activities rapidly in changing circumstances. 2.6. Use emerging health technologies to provide specialist health care services. 2.7. Apply efficient, sustainable, flexible and responsive collaborative nursing practice models to rapidly changing needs of health care.
3. Contribute to improved outcomes in	3.1. Review own practice and professional isolation in the work environment and identify opportunities for professional development.

rural and remote communities.	• 3.2. Use professional and community collaboration and networking to inform practice improvements. • 3.3. Act as a resource for colleagues and other health professionals providing mentoring and coaching within authorised scope of practice. • 3.4. Participate in organisational processes for continuous improvement of health care service delivery using own practice experience to inform contributions. • 3.5. Seek and use community feedback on practice and service delivery. • 3.6. Identify and take opportunities to empower community members to seek health care and participate in health promotion and illness prevention initiatives. • 3.7. Provide community health education to target areas of risk and concern and address chronic disease risk factors and illness prevention using culturally accepted modes of communication.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- work as part of the multidisciplinary health care team within scope of practice in the Australian rural and remote workplace setting that involves:
 - three emergency situations involving stabilisation and transport
 - three non-emergency situations
- respond to the required clinical interventions for three people to treat and manage the person's condition, illness or injury via communication modes including phone, video or radio
- conduct one activity in the workplace with the multidisciplinary health care team that supports improved outcomes of nursing practice in rural and remote contexts
- conduct one health education session to engage the community in development and ownership of health programs that meet locally specific health needs

The tasks must be undertaken in accordance with the Nursing and Midwifery Board of Australia (NMBA) professional practice standards, codes and guidelines.

Knowledge Evidence

Demonstrate knowledge required to complete tasks outlined in elements and performance criteria of this unit:

- changing demands for services in rural and remote communities using telehealth
- economic, political and socio-economic factors impacting rural and remote health care:
 - federal, State/Territories and local government funding arrangements that impact availability of health services and health programs
 - expansion of scope of practice for nurses
 - shortage in health workforce
 - ageing population
 - prevalence of chronic disease
 - social disadvantage

- organisations in rural and remote areas and models of health care provided:
 - My Aged Care
 - National Disability Insurance Scheme (NDIS)
 - National Disability Insurance Agency (NDIA)
 - consumer directed care (CDC)
 - mobile health service
 - person-centred care (PCC)
 - primary health care (PHC)
 - Aboriginal Community Controlled Health Organisations (ACCHO)
 - tertiary level care, community and regional hospitals
- nursing practice models used in rural and remote contexts:
 - team nursing and shared care approach.
 - total patient care and patient-focused care
 - quality caring model used in acute care
 - process engagement and community health nursing used in chronic disease management
- assessment tools, techniques and procedures, and nursing guidelines used in rural and remote contexts
- provision of remote nursing care:
 - how and when to access emergency response services
 - communication systems, equipment and methods
- emergency situations and how the care approach can be adjusted in the rural and remote context
- non-emergency situations and how the care approach can be adjusted in the rural and remote context
- emerging health technologies, their features and how they are used and accessed:
 - telehealth services
 - mobile health services with specialised diagnostic equipment
 - Hospital in the Home (HIH) services
- types of participants in a rural and remote multidisciplinary health care team and their roles:
 - Aboriginal health practitioner
 - community care worker
 - health care assistant
 - medical practitioner

- nurse practitioner
 - pharmacist
 - physiotherapist and occupational therapist
 - registered nurse and registered midwife
 - social worker
- options for transport including emergency services using road, air and water
- sources of information on best practice nursing in rural and remote settings
- organisational processes and how they are adapted and used in rural and remote context:
 - risk identification
 - risk management
- community-based health services, public health services, social health care programs and health promotion programs
- community health education, health promotion activities, social media content and interactions, and health information literature
- local and community cultures and health promotion activities
- role of Congress of Aboriginal and Torres Strait Islander Nurses and Midwives (CATSINaM)
- Aboriginal and Torres Strait Islander health and principles of cultural safety.

Assessment Conditions

To be eligible to apply for registration as an enrolled nurse and to practice in Australia, each applicant must complete a Diploma of Nursing program accredited by the Australian Nursing and Midwifery Accreditation Council (ANMAC) and approved as ‘an approved program of study’ by the Nursing and Midwifery Board of Australia (NMBA) in accordance with the Enrolled Nurse Accreditation Standards.

For more detail visit <https://www.ahpra.gov.au>.

Skills must be demonstrated in the workplace or in a simulated environment as specified in the performance evidence that model industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors.

Assessors must also hold current registration as a registered nurse with the Nursing and Midwifery Board of Australia (NMBA).

HLTENN065 Research and report on nursing trends and practice

Modification History

N/A

Application

This unit describes the performance outcomes, skills and knowledge required to identify research needs, source and analyse emerging trends and best practice in nursing and report on the outcomes of evidenced-based practice research to inform continuous improvement at a systemic or organisational level.

This unit applies to enrolled nurses, registered with the Nursing and Midwifery Board of Australia (NMBA), seeking specialisation in enrolled nurse work that is carried out in consultation and collaboration with registered nurses, and under direct or indirect supervisory arrangements aligned to the NMBA regulatory authority legislative requirements.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian Standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit sector(s)

Nursing

Elements and Performance Criteria

Elements	Performance criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

1. Identify research need.	1.1. Reflect on experience and outcomes of own nursing practice to identify opportunities for research. 1.2. Work with professional colleagues in relation to systemic change and areas for collaborative research. 1.3. Identify and analyse internal and external factors that impact on the research process and the application of potential research outcomes. 1.4. Select research focus and develop objectives linked to workplace needs.
2. Research nursing trends and best practice.	2.1. Develop and document research plan including objectives and methodologies. 2.2. Assess and select research strategies suited to research focus. 2.3. Access and explore information about current, emerging and innovative ideas and trends in nursing practice. 2.4. Source and collate evidence-based information about nursing best practice.
3. Analyse researched information.	3.1. Compare best practice evidence to current nursing practice and determine potential for development and change in own workplace. 3.2. Assess strengths, relevance, reliability and recency of information gathered by research in the context of contemporary nursing practice. 3.3. Identify and analyse how researched information can be used and adapted for workplace improvement. 3.4. Assess feasibility, benefits and risks associated with researched information and its potential use. 3.5. Develop substantiated positions and ideas from research and analysis.
4. Report on research.	4.1. Test and confirm positions developed from research through collaboration with colleagues. 4.2. Develop reports using language and format reflective of the audience, purpose and context.

	• 4.3. Incorporate reasoned argument and substantiated evidence into reporting. • 4.4. Present research findings according to organisational standards and review processes.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTENN065 Research and report on nursing trends and practice

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- identify an area of research focus
- apply research strategies
- methodically analyse and apply one piece of nursing specific evidence-based practice to the continuous improvement of nursing practice in the workplace.

Knowledge Evidence

Demonstrate knowledge required to complete tasks outlined in elements and performance criteria of this unit:

- ways in which own practice informs research
- processes for engaging others in identification of research needs
- internal and external factors that potentially impact research and its application:
 - approval frameworks
 - ethics approval
 - organisational policies and procedures
 - resource constraints
 - National Health and Medical Research Council (NHMRC)
 - Australian Commission on Safety and Quality in Health Care (ACSQHC)
 - health policy frameworks
 - national health priorities
- features and formats of research plans
- research strategies, how they are implemented and their application for different research objectives:
 - qualitative
 - quantitative
- evidence-based information – what it is, what it isn't and how it is developed and used in health care

- information sources for research in nursing practice:
 - existing research and literature
 - public and private health organisations
 - organisations in other industries
 - professional bodies
 - nurse practitioners
 - clinical nurse specialists
- processes that support analysis of information to interpret the research and how to use them:
 - analysing
 - comparing
 - contrasting
 - challenging
 - reflecting
 - distinguishing relevant from irrelevant
 - drawing multidisciplinary connections
 - making links between information and its application to the workplace
- report writing:
 - key inclusions in a research report
 - how to match report format, structure and content to audience and context
 - techniques for developing and substantiating positions and arguments in writing
 - use of referencing
 - copyright and plagiarism.

Assessment Conditions

To be eligible to apply for registration as an enrolled nurse and to practice in Australia, each applicant must complete a Diploma of Nursing program accredited by the Australian Nursing and Midwifery Accreditation Council (ANMAC) and approved as ‘an approved program of study’ by the Nursing and Midwifery Board of Australia (NMBA) in accordance with the Enrolled Nurse Accreditation Standards.

For more detail visit <https://www.ahpra.gov.au>.

Skills must be demonstrated in the workplace or in a simulated environment as specified in the performance evidence that model industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Assessors must also hold current registration as a registered nurse with the Nursing and Midwifery Board of Australia (NMBA).

Elements and Performance Criteria

Elements	Performance criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

1. Model high standards of performance.	1.1. Initiate and undertake on going professional development to make own clinical performance consistent with professional standards and the organisation's vision and objectives. 1.2. Support collaboration and continuous improvement and provide ongoing professional development to colleagues. 1.3. Use professional, respectful and positive modes of communication. 1.4. Participate in committees and working parties that contribute positively to clinical practice and patient outcomes through quality improvement processes.
2. Reflect on clinical work practices and potential improvements.	2.1. Observe and reflect on effectiveness of work practices in meeting desired outcomes. 2.2. Identify opportunities for systemic improvements in own area of nursing practice. 2.3. Identify challenges and ideas with registered nurse and multidisciplinary health care team. 2.4. Test ideas with registered nurse and multidisciplinary health care team in a positive and collaborative way. 2.5. Gather and use information and feedback relevant to ideas from within and outside the multidisciplinary health care team. 2.6. Participate in team leadership and decision making. 2.7. Undertake professional development to enable an advanced level of care provision.
3. Participate in processes for quality improvement.	3.1. Identify opportunities and contribute to organisational process for systemic improvements to clinical guidelines for nursing practice. 3.2. Represent and reflect perspectives and experience of self and colleagues in organisational forums. 3.3. Engage with multidisciplinary health care team regarding plan of care and systemic aspects of clinical practice.

	3.4. Identify and articulate issues and practical processes for implementing change.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTENN066 Contribute to improvement for advancement of clinical practice

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- contribute to the improvement of one clinical work practice through participation in organisational processes for quality improvement
- apply ethical considerations and code of conduct to contribute to a system of quality improvement.

Knowledge Evidence

Demonstrate knowledge required to complete tasks outlined in elements and performance criteria of this unit:

- links between enrolled nursing practice and organisational vision and objectives, and how they are demonstrated in clinical practice:
 - reproducibility and reliability
 - clinical flexibility to local circumstances
 - validity of health gains and costs predicted
 - health outcome is at an acceptable cost
- ways of supporting colleagues as an enrolled nurse:
 - informal mentoring and coaching
 - in accordance with the professional delegation framework
 - participation in performance review
- features of collaboration:
 - types of behaviours that support effective collaborative relationships
 - benefits of collaboration, including the value of collaboration as a problem-solving tool
 - roles played by people in a collaborative process
 - problems encountered in a collaborative process and how they are avoided and resolved
 - participation in education of self, individuals and groups in the work context

- types of clinical work practices where the enrolled nurse is involved in continuous improvement, and the structures and processes that support the improvement process in relation to:
 - clinical practice and governance
 - quality assurance and improvement
 - risk identification and management
 - recording of health information
 - clinical standards and guidelines
 - assessment tools
- sources of information that inform improvements in clinical practice and how these are used:
 - organisational policies and procedures
 - code of conduct and ethical behaviours
 - vision statements
 - practice in other organisations
 - clinical research and literature reviews
 - evidence-based nursing practice guidelines
 - National Safety and Quality Health Service (NSQHS) Standards
- types of opportunities in health organisations to contribute at systemic level, how they are structured, and key stakeholders involved:
 - nursing and midwifery peak bodies
 - nursing and midwifery executives
 - nurse practitioners
 - expert reference groups
 - committees
 - conferences
 - forums
 - accreditation
 - risk management and quality assurance
- strategies for participation in organisational forums:
 - how to gather and prepare relevant information
 - techniques for structuring the presentation of information and ideas
 - processes and techniques to substantiate positions and ideas.

Assessment Conditions

To be eligible to apply for registration as an enrolled nurse and to practice in Australia, each applicant must complete a Diploma of Nursing program accredited by the Australian Nursing and Midwifery Accreditation Council (ANMAC) and approved as 'an approved program of study' by the Nursing and Midwifery Board of Australia (NMBA) in accordance with the Enrolled Nurse Accreditation Standards.

For more detail visit <https://www.ahpra.gov.au>.

Skills must be demonstrated in the workplace or in a simulated environment as specified in the performance evidence that model industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Assessors must also hold current registration as a registered nurse with the Nursing and Midwifery Board of Australia (NMBA).

HLTENN067 Apply, implement and monitor nursing care in a contemporary paediatric setting

Modification History

N/A

Application

This unit describes the performance outcomes, skills and knowledge to provide care for paediatric persons in primary health care, hospitals, hospices, home and community care, and long-term care facilities.

Nurses working in the paediatric nursing environment hold and apply specialised in-depth knowledge, integrate theory and practice, and make reliable clinical assessments and judgements.

This unit applies to enrolled nurses, registered with the Nursing and Midwifery Board of Australia (NMBA), seeking specialisation in enrolled nurse work that is carried out in consultation and collaboration with registered nurses, and under direct or indirect supervisory arrangements aligned to the NMBA regulatory authority legislative requirements.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian Standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements	Performance criteria

<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Apply theoretical concepts, principles and nursing interventions in providing paediatric nursing care.	1.1 Identify health status, limitations and therapeutic nursing plan of care to provide care for the paediatric person in the paediatric environment. 1.2 Identify factors affecting health status and report significant alterations to registered nurse. 1.3 Identify and respond to psychosocial and physiological needs in a paediatric care environment. 1.4 Identify and apply systematic approach to paediatric nursing care.
2. Contribute to nursing care of the paediatric.	2.1 Identify and apply specialist paediatric nursing care. 2.2 Identify factors relevant to the physical, psychosocial, social, sexual, emotional and cognitive development in the continuity of nursing care planning. 2.3 Review and analyse clinical data in accordance with developed plan of care and communicate findings to the registered nurse and multidisciplinary health care team. 2.4 Work with multidisciplinary health care team to confirm care preferences and developmental needs.
3. Develop own practice in the paediatric care environment to perform nursing interventions to promote, maintain and restore optimal health.	3.1 Communicate appropriately according to the developmental stage of the paediatric person during assessment and collection of health information. 3.2 Identify quality and safety issues in paediatric care. 3.3 Identify actual and potential risks when providing paediatric care and participate in identifying organisational risk assessment and management processes.

	• 3.4 Prioritise and provide nursing care according to the assessed care and developmental needs and re-prioritise planned care activities where the condition changes. • 3.5 Identify where the acuity and assessed care needs exceeds level of knowledge, skill and competence and refer to registered nurse. • 3.6 Support the paediatric person, families and carers using developmental care, atraumatic care and family-centred care principles.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTENN067 Apply, implement and monitor nursing care in a contemporary paediatric setting

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- perform nursing interventions on two paediatric persons in the workplace:
 - communicate in a developmental style
 - complete a physical and social assessment of the paediatric person and their families and carers
 - assess and document vital signs
 - assess, plan, carry out, evaluate and document person-centred nursing care in partnership with paediatric person, families, carers and the multidisciplinary health care team
 - deliver nursing care in accordance with policies, procedures and professional standards for practice
 - apply the principles of growth and developmental milestones to clinical practice
 - identify the potential impact of hospitalisation on paediatric persons

The tasks must be undertaken in accordance with the Nursing and Midwifery Board of Australia (NMBA) professional practice standards, codes and guidelines.

Knowledge Evidence

Demonstrate knowledge required to complete tasks outlined in elements and performance criteria of this unit:

- paediatric development:
 - physical
 - cognitive
 - psychosocial
- paediatric nursing care
- tools used to prevent trauma:
 - play therapy
 - procedural sedation

- family strategies
- health problems in paediatrics
- disease process and paediatric conditions
- paediatric assessment and documentation
- impacts of hospitalisation and disease process on paediatric person
- oral hygiene
- nutritional advice for:
 - healthy diet related to developmental stage
 - anorexia
 - obesity
- legal and ethical issues for care of children and working with children
- legislative requirements including mandatory reporting of child sexual abuse
- conditions for creating a safe physical, social and emotional environment for paediatric persons and those at high risk
- paediatric life-limiting conditions and support services for paediatric person, families and carers.

Assessment Conditions

To be eligible to apply for registration as an enrolled nurse and to practice in Australia, each applicant must complete a Diploma of Nursing program accredited by the Australian Nursing and Midwifery Accreditation Council (ANMAC) and approved as ‘an approved program of study’ by the Nursing and Midwifery Board of Australia (NMBA) in accordance with the Enrolled Nurse Accreditation Standards.

For more detail visit <https://www.ahpra.gov.au>.

Skills must be demonstrated in the workplace or in a simulated environment as specified in the performance evidence that model industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors.

Assessors must also hold current registration as a registered nurse with the Nursing and Midwifery Board of Australia (NMBA).

Elements and Performance Criteria

Elements	Performance criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

1. Identify and apply palliative approach to care.	1.1. Undertake assessments using palliative principles and approach. 1.2. Apply pathophysiological changes associated with a life-limiting illness. 1.3. Assess pain management and implement strategies to address pain. 1.4. Assess preferences for symptom management and quality of life. 1.5. Reflect on lifestyle choices to formulate and implement the plan of care. 1.6. Identify and work within roles and responsibilities of the multidisciplinary health care team when planning palliative care.
2. Support families and carers using palliative care approach.	2.1. Identify and apply the advanced care plan and directive. 2.2. Provide the families and carers with opportunities to confirm spiritual and cultural issues. 2.3. Apply communication techniques when accessing support services. 2.4. Monitor condition and provide accurate and timely information that respects the families and carers' wishes.
3. Identify needs of a person requiring end of life care.	3.1. Provide nursing care by applying a palliative approach and culturally sensitive end of life care. 3.2. Provide symptom management including goals of care, education, psychological and spiritual support. 3.3. Identify end of life care needs for those with cognitive decline and mental health impairment.
4. Identify and respond to signs of deterioration and the stages of dying.	4.1. Support the person, families and carers throughout the end of life phase. 4.2. Identify physiological signs and symptoms of dying and report signs of deterioration and implement the person's wishes as per the plan of care.

	4.3. Support the dignity of the person when undertaking care activities in their end of life stages. 4.4. Identify and respond to legal and ethical issues with deterioration and stages of dying.
5. Provide care after death.	5.1. Determine extinction of life and acknowledge bereavement support. 5.2. Ensure after death care is carried out with dignity and respect, and that individual customs, culture, religion, spiritual practices and choices are taken into account. 5.3. Provide care of the body after death using standard precautions.
6. Recognise and reflect on own emotional self-care.	6.1. Identify and reflect on own need for self-care. 6.2. Identify and implement ways to sustain own social and emotional wellbeing. 6.3. Encourage self and colleagues to access support and participate in professional debriefing.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTENN068 Provide end of life care and a palliative approach in nursing practice

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- analyse health information and clinical presentation of one person to reach a conclusion of possible palliative care planning and nursing interventions
- provide nursing care using a palliative approach to one person in the workplace
- perform nursing interventions through the end of life stages to one person
- The tasks must include professional interactions with the person, families and carers

The tasks must be undertaken in accordance with the Nursing and Midwifery Board of Australia (NMBA) professional practice standards, codes and guidelines.

Knowledge Evidence

Demonstrate knowledge required to complete tasks outlined in elements and performance criteria of this unit:

- identification of needs of the person, families and carers through a palliative care approach
- assessment and management of delirium
- State/Territory legislation on advance care planning, advance care directives and notification of a death
- cultural, religious and spiritual factors underpinning end of life choices
- ethical and legal issues related to a palliative care approach:
 - voluntary assisted dying
 - decisions regarding advance care directives
 - conflicts that occur in relation to personal values and decisions made by and for the person
 - organ donation
 - request for autopsy
- hydration and nutrition requirements during palliative care and at end of life
- pain management:

- medication administered using a syringe driver and intima sub-cut lines
 - common non-pharmaceutical and complementary care
- indications and contraindications for use of syringe driver in administration of pain medication
- indications for intima sub-cut lines for pain relief, anti-nausea and steroid injections
- impact of loss and grief on person, families, carers and team members
- own role and responsibilities, and those of other team members involved in palliative care
- digital tools used to support a palliative approach in aged care settings
- organisational policies, procedures, protocols and practices in relation to palliative care
- resources available to those requiring grief and bereavement support.

Assessment Conditions

To be eligible to apply for registration as an enrolled nurse and to practice in Australia, each applicant must complete a Diploma of Nursing program accredited by the Australian Nursing and Midwifery Accreditation Council (ANMAC) and approved as ‘an approved program of study’ by the Nursing and Midwifery Board of Australia (NMBA) in accordance with the Enrolled Nurse Accreditation Standards.

For more detail visit <https://www.ahpra.gov.au>.

Skills must be demonstrated in the workplace or in a simulated environment as specified in the performance evidence that model industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors.

Assessors must also hold current registration as a registered nurse with the Nursing and Midwifery Board of Australia (NMBA).

Link

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes.</i>	<i>Performance criteria specify the level of performance needed to demonstrate achievement of the element.</i>
1. Comply with personal hygiene standards as required by the food safety program	1.1 Follow personal hygiene procedures 1.2 Report health conditions and/or illness and follow organisation procedures for continuing participation in food services

	1.3 Follow organisation requirements for wearing bandages and dressings 1.4 Wear appropriate clothing, personal protective clothing and footwear and maintain cleanliness to avoid contamination 1.5 Follow hand washing procedures and use required facilities
2. Contribute to the cleanliness of food handling areas according to the food safety program	2.1 Maintain the workplace in a clean and tidy order to meet workplace requirements 2.2 Comply with workplace measures to prevent pests entering food premises 2.3 Identify and report indicators of pest presence
3. Follow food safety program	3.1 Handle and store food according to the food safety program 3.2 Store, use and dispose of single use items appropriately to avoid damage and contamination 3.3 Keep food for disposal separate and follow procedures for food disposal 3.4 Identify and report processes and practices which are not consistent with the food safety program 3.5 Take corrective action within level of responsibility 3.6 Report any corrective action to supervisor and according to legislative and organisation documentation requirements

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTFSE001 Follow basic food safety practices

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- identified at least 4 appropriate times for hand washing and followed correct hand washing procedures
- cleaned and tidied work areas at least 2 times to avoid contamination and pests
- identified at least 2 food items for disposal and followed food disposal procedures
- identified, corrected and reported at least 2 processes or practices that were not consistent with food safety program.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- food safety program and procedures and consequences of not following these procedures
- current national, state or territory food safety laws, standards and codes, including:
 - meaning of contaminant, contamination and potentially hazardous foods as defined by the current code
 - hygiene actions that must be adhered to by businesses to avoid food-borne illnesses
 - employee responsibility to participate in hygienic practices
 - reasons for food safety programs and what they must contain
 - role of local government regulators
 - basic aspects of hazard analysis and critical control points (HACCP) method of controlling food safety
- food hazards and major causes of food contamination and food-borne illnesses, including:
 - airborne dust

- colleagues without appropriate training or understanding of good hygiene practices, policies and procedures
 - contaminated food
 - contaminated garbage
 - dirty equipment and utensils
 - equipment not working correctly, including fridge and temperature probes
 - items, including linen, tea towels and towels that may be contaminated with human waste, including blood and body secretions
 - not following organisation procedures
 - vermin
- sources and effects of microbiological contamination of food
- personal hygiene requirements, including:
 - appropriate bandages and dressings to be used when undertaking food handling
 - clothing and footwear requirements for working in and/or moving between food handling areas
 - reporting of illness
 - restrictions on wearing of jewellery and other adornments, such as nail polish
 - personal clothing maintenance, laundering and storage requirements
- workplace hygiene hazards when handling food and food contact surfaces, including:
 - pest containment requirements
 - responsibilities for maintaining the work area in a clean and tidy state
 - suitable standard for materials, equipment and utensils used in the food handling area
 - use and storage of cleaning equipment
 - food disposal requirements
 - waste collection, recycling and handling procedures
- minimum hand washing occasions:
 - before commencing or recommencing work with food
 - immediately after handling raw food, smoking, coughing, sneezing, blowing the nose, eating, drinking, touching the hair, scalp or any wound, and using the toilet.

Assessment Conditions

Skills must have been demonstrated in a workplace or a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities equipment and resources, including:

- food service and food safety program policies and procedures
- food service facilities, equipment and utensils for handling, storing and disposing of food and beverages
- appropriate clothing and footwear
- personal protective clothing and wound dressings
- food and beverages
- cleaning equipment
- hand washing facilities and equipment
- modelling of industry operating conditions.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTFSE002 Provide ward or unit based food preparation and distribution services

Modification History

N/A

Application

This unit describes the skills and knowledge required to distribute and collect menus, prepare minor meals and refreshments, plate meals, distribute meals and provide general housekeeping functions.

This unit applies to workers who may have multi-functional or multi-skilled roles with duties which include food service work combined with a range of other duties (e.g. cleaning, portering, wardsperson, personal care, linen distribution and client transport).

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes.</i>	<i>Performance criteria specify the level of performance needed to demonstrate achievement of the element.</i>
1. Distribute and collect menus from clients according to established routines and procedures	1.1 Distribute menus to clients receiving diet therapy or nutritional support

	1.2 Provide assistance to clients with appropriate menu selections, including clients with special needs 1.3 Collect menus from clients receiving diet therapy or nutritional support 1.4 Communicate client feedback and concerns in relation to menus or food choices in accordance with organisation policy
2. Plate, heat and distribute meals and beverages	2.1 Comply with safe food handling and hygiene practices and infection control procedures 2.2 Plate meals from bulk food to organisation standards and requirements 2.3 Implement portion control to minimise waste 2.4 Rethermalise and/or reheat meals according to food standards and regulations 2.5 Assemble meal trays and check for accuracy against documentation prior to delivery 2.6 Prepare beverage utensils for use 2.7 Leave trolley or tray in an appropriate location for meal delivery 2.8 Deliver and leave meals and/or beverages in the appropriate place for clients and within the designated timeframe 2.9 Replace missing or incorrect meals and/or beverages appropriately 2.10 Replace or refill water jugs according to specific client requirements and established policy and procedure 2.11 Check room numbers, bed numbers and client name against appropriate documentation 2.12 Identify if the client needs assistance to sit up and report or provide required assistance in accordance with role and organisation policy and procedure
3. Prepare minor meals, refreshments and snacks	3.1 Prepare minor meals, refreshments and snacks in an attractive manner 3.2 Deliver minor meals according to schedule
4. Collect and maintain clean stock of utensils and meal trays	4.1 Seek client feedback on meals and beverages and report to appropriate person/s in accordance with organisation procedure

	4.2 Collect meal trays and all utensils after client has finished eating and return for cleaning 4.3 Check tray for foreign objects or client belongings 4.4 Maintain a stock of clean drinking utensils 4.5 Report insufficient food or fluid intake to the appropriate person/s in accordance with organisation procedure
5. Maintain good housekeeping	5.1 Clean and maintain ward or unit food service area and equipment according to organisation standards and procedures 5.2 Replenish food stocks, crockery and utensils

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has:

- followed established food safety, manual handling and other food services procedures when preparing food and distributing it to clients receiving diet therapy or nutritional support, including:
 - distributing and collecting menus from at least 2 clients
 - soliciting feedback from 2 clients and forwarded to appropriate person
 - plating, rethermalising or heating and distributing at least 3 main meals and beverages to clients
 - following appropriate procedures for at least 2 clients requiring assistance to sit
 - reporting the sufficiency or insufficiency of food intake of 2 clients to appropriate person and using organisational documentation and reporting technologies.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- food safety principles
- hazard analysis and critical control points (HACCP) principles
- legislative requirements of food service role
- causes of food contamination and cross-contamination
- factors that place client at nutritional risk
- customer service principles and techniques for encouraging meal choice and consumption
- microbiological basis for food deterioration and food poisoning
- role and need for special diets and nutritional support, including common types of special diets and nutritional supplements

- client special needs, including:
 - disabilities
 - eating difficulties
 - intellectual difficulties
 - frail and aged
 - confusion and dementia
 - nutrition risk factors
 - metabolic disorders
 - different cultural requirements
 - require diet supplements
- organisational procedures relating to food services, including:
 - food safety program
 - menu ordering and processing system
 - meals distribution equipment and operational procedures
 - manual handling and infection control
 - procedures for delivery of meals to potentially infectious clients
 - rethermalise and reheating procedures
 - reporting and documentation requirements, including client satisfaction and consumption
- ordering, documentation and reporting technologies.

Assessment Conditions

Skills must have been demonstrated in a workplace or a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities equipment and resources, including:
 - food service and food safety program policies and procedures
 - food service facilities, equipment and utensils for handling, preparing, storing, heating, transporting and disposing of food and beverages
 - ordering, documentation and reporting technologies
 - menus, recipes and associated ingredients
 - appropriate clothing and footwear
 - personal protective clothing and wound dressings
 - food and beverages
 - cleaning equipment
 - hand washing facilities and equipment

- modelling of industry operating conditions.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTFSE003 Perform kitchenware washing

Modification History

N/A

Application

This unit describes the skills and knowledge required to stack, wash, dry and store dishes, kitchenware and associated implements.

This unit applies to food services staff who work under supervision. Work is usually performed within a prescribed range of functions involving known routines and procedures.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for HLTFSE003 Perform kitchenware washing

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has :

- operated dishwasher safely and in accordance with manufacturer's recommendations at least 2 times, including:
 - stacking kitchenware
 - using correct chemicals
 - unstacking and storing kitchenware
- hand washed and dried at least 2 items using the correct water temperature, chemicals and personal protective clothing
- identified and disposed of at least 2 cracked, chipped or broken kitchenware items.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in the elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role. This includes knowledge of:

- legal and organisational requirements regarding:
 - infection control
 - manual handling
 - temperature requirements for hand and machine washing, rinsing and drying
 - personal protective clothing.

Assessment Conditions

Skills must have been demonstrated in a workplace or a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities equipment and resources, including:
 - commercial dishwasher and hand dishwashing facilities, detergents and equipment
 - personal protective clothing

- kitchenware
- kitchenware storage facilities
- modelling of industry operating conditions.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- processed at least 3 orders efficiently and correctly
- accurately managed 3 cash transactions
- displayed both refrigerated and non-refrigerated food products appropriately
- advised at least 2 clients on products.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- range of products and services
- legal considerations, including:
 - food safety
 - workplace health and safety (WHS), including manual handling
 - basic Australian consumer law
 - pricing, including goods and services tax (GST)
- cafeteria policies and procedures in relation to:
 - customer service
 - exchanges and returns
 - bag checking
 - product display
 - handling, packing and wrapping goods or merchandise
 - stock availability
 - cleaning and waste disposal
 - open and close procedures
- cash and non-cash handling procedures, including:

- balancing point-of-sale equipment
 - calculating non-cash documents
 - change required, denominations of change and tendering change
 - counting cash
 - maintenance of cash float
 - opening and closing point-of-sale terminal
 - recording and transferring takings
 - security of cash and non-cash transactions
- functions and operation of point-of-sale equipment
- key features of a calculator
- food products characteristics and their effects on preparation and handling requirements for display.

Assessment Conditions

Skills must have been demonstrated in a workplace or a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities equipment and resources, including:
 - cash register or other point-of-sale equipment
 - heating and refrigeration equipment
 - cafeteria policies and procedures
 - food and beverages
- modelling of industry operating conditions, including:
 - customer interaction
 - cash handling.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- monitored the implementation of the food safety program, including:
 - using 2 monitoring methods
 - identifying 2 unsafe food items
 - implementing corrective action for addressing 2 unsafe food items and reported to supervisor
- identified 2 potential or actual food safety hazards through monitoring or client complaint and investigated processes that contributed to the breach and recommended corrective action.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- food safety program requirements for:
 - monitoring
 - hazard analysis and critical control points (HACCP)
 - methods of control, especially time and temperature controls used in the receiving, storing, preparing, processing, displaying, serving, packaging, transporting and disposing of food
 - corrective action
 - food separation and recall procedures for unsafe food
 - reporting and documenting
- food safety hazards, the conditions under which they occur, and the possible consequences for:
 - biological agents in food
 - chemical agents in food
 - physical agents in food

- condition of food
- monitoring methods, including organisational procedures, taking temperature and pH measurements, collecting samples and visual inspection
- high risk individuals, including:
 - children or babies
 - pregnant women
 - aged persons
 - people with immune deficiencies or allergies
 - chronically unwell.

Assessment Conditions

Skills must have been demonstrated in a workplace or a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities equipment and resources, including:
 - food service and food safety program policies and procedures
 - food service facilities, equipment and utensils for handling, preparing, storing, heating, transporting and disposing of food and beverages
 - monitoring equipment
 - appropriate clothing and footwear
 - personal protective clothing and wound dressings
 - food and beverages
 - cleaning equipment
 - hand washing facilities and equipment
- modelling of industry operating conditions.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTFSE006 Prepare foods suitable for a range of client groups

Modification History

N/A

Application

This unit describes the skills and knowledge required to prepare and present meals in a manner that meets the nutritional requirements of client groups in a range of health and community services and food service settings.

This unit applies to food services staff with well developed skills where some discretion and judgement is required. Individuals will take responsibility for their own outputs and may have limited responsibility for the output of others.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes.</i>	<i>Performance criteria specify the level of performance needed to demonstrate achievement of the element.</i>
1. Identify the <i>client groups</i> in a range of settings	1.1 Identify client groups 1.2 Identify and confirm the nutritional needs of the client groups in accordance with organisation procedures, dietitian and medical staff

	1.3 Identify a range of <i>foods</i> that meet the nutritional needs of the client groups in accordance with organisational guidelines
2. Select appropriate foods for specific client groups	2.1 Select appropriate foods for menu items to meet the nutritional needs of specific client groups and to promote healthy eating 2.2 Select appropriate standard recipes
3. Prepare, cook and serve <i>meals</i> suitable for specific client group	3.1 Prepare food by accurately following standard recipes to ensure product consistency, nutritional integrity and to minimise wastage 3.2 Modify food texture to meet the needs of client groups and organisation standards 3.3 Use portion control equipment to plate meals in accordance with organisation requirements 3.4 Serve meals in an appealing and attractive manner
4. Follow procedures for safe food preparation	4.1 Monitor workplace safety and take action to identify and prevent hazards 4.2 Promptly rectify faults to equipment or refer promptly for remedial action 4.3 Use suitable food preparation and cookery methods to maximise nutritional value of foods prepared and maintain food safety 4.4 Use infection control and hygiene procedures according to legislative and organisation guidelines 4.5 Discard out-of-date food and ingredients 4.6 Comply with cleaning, sanitation and waste storage and disposal practices 4.7 Receive, store, prepare, cook, transport, serve and handle food to prevent deterioration, contamination and the growth of microorganisms 4.8 Store leftover food safely and hygienically and use within a safe period of time or discard according to organisation procedures
5. Evaluate meals and work performance	5.1 Seek feedback from clients to determine levels of satisfaction 5.2 Evaluate meals against organisation standards and client satisfaction

	5.3 Seek advice and feedback from colleagues and supervisor regarding client feedback and work performance 5.4 Use advice and feedback to identify areas for development and opportunities for continuous improvement of work standard

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTFSE006 Prepare foods suitable for a range of client groups

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- selected appropriate recipes and prepared a different main meal suitable for each of the following clients:
 - client with a specific cultural requirement
 - client with an allergy
 - client with restricted diet due to drug-food interactions
 - client with swallowing issues requiring food texture modification.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- food safety principles and regulations
- food safety hazards and risks
- food safety program requirements
- basic cookery methods, including the principles of bulk cooking
- client conditions and associated needs and requirements
- specific dietary requirements, including:
 - coeliac
 - diabetes
 - food allergies
 - food intolerances
 - swallowing problems requiring food texture modification
 - malnutrition
- current Australian Standards for texture modified food and fluids
- food and fluid texture modification techniques

- different cultural requirements relevant to client group and individuals, including:
 - halal
 - Hindu
 - kosher
 - vegetarian
 - vegan
- foods that promote good health and principles of nutrition, including food selection and cookery methods that comply with the current *Dietary Guidelines for Australians* for the general population, including adults, children and adolescents
- additional dietary guidelines for specific populations, including older people and unwell people
- key health and legal consequences of failing to address special requirements:
 - drug-food interactions
 - allergic reactions
 - anaphylaxis
 - food sensitivity or intolerance reactions
 - choking.

Assessment Conditions

Skills must have been demonstrated in a workplace or a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities equipment and resources, including:
 - food service and food safety program policies and procedures
 - food service facilities, equipment and utensils for handling, preparing, storing, heating, transporting and disposing of food and beverages
 - menus, recipes and associated ingredients
 - appropriate clothing and footwear
 - personal protective clothing and wound dressings
 - food and beverages
 - cleaning equipment
 - hand washing facilities and equipment
 - manufactures' manuals for kitchen equipment
 - food packaging and storage requirements
- modelling of industry operating conditions.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTFSE007 Oversee the day-to-day implementation of food safety in the workplace

Modification History

N/A

Application

This unit describes the skills and knowledge required to supervise the day-to-day implementation of the food safety program across the entire business, process or food handling area.

This unit applies to workers who oversee and support others to implement the requirements of the food safety plan.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes.</i>	<i>Performance criteria specify the level of performance needed to demonstrate achievement of the element.</i>
1. Support colleagues to implement the food safety program	1.1 Communicate food safety requirements and procedures to others in the workplace 1.2 Support people in the food area to meet food safety requirements

	1.3 Instruct food handlers on food safety program and legal requirements for completing food safety records
2. Control food safety in the workplace	2.1 Identify processes and procedures that have or could result in a food safety breach 2.2 Implement procedures and controls for responding to and preventing food safety breaches 2.3 Investigate actual and potential non-conformance and complaints from clients relating to food safety 2.4 Respond to non-conformance and follow procedures to identify, separate and/or recall non-conforming food 2.5 Develop or revise procedures to support food safety control and prevent further breaches 2.6 Communicate all additional and/or revised processes and procedures to food handlers

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTFSE007 Oversee the day-to-day implementation of food safety in the workplace

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- supervised workplace food safety program by:
 - communicating food safety requirements to at least 2 colleagues
 - identifying and revising at least 2 policies or procedures that may result in a food safety breach and communicating changes to colleagues
 - investigating at least 2 breaches or complaints and implemented appropriate corrective action and controls.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal obligations for food safety:
 - personal and company liability
 - relevant national, state/territory and industry-specific legislation and regulations
 - client requirements
- principles of a systematic approach to managing food safety, which includes:
 - identification of hazards that are likely to occur
 - establishing appropriate methods of control
 - monitoring controls
 - describing corrective action to be taken if control conditions are not met
 - recording information
- procedures for:
 - identifying, separating and recalling non-conforming product
 - handling, preparation, processing, display, packaging and storage requirements of materials and products used in the food handling area

- reporting and record keeping
- maintaining the food handling area:
 - cleaning and sanitation
 - pest control
 - waste management and food disposal
 - equipment calibration
 - temperature measuring devices.

Assessment Conditions

Skills must have been demonstrated in a workplace or a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities equipment and resources, including:
 - food service and food safety program policies and procedures
 - food service facilities, equipment and utensils for handling, storing and disposing of food and beverages
 - appropriate clothing and footwear
 - personal protective clothing and wound dressings
 - food and beverages
 - cleaning equipment
 - hand washing facilities and equipment
- modelling of industry operating conditions.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTFSE008 Conduct internal food safety audits

Modification History

N/A

Application

This unit describes the skills and knowledge required to plan and conduct a food safety audit and to report and follow up audit outcomes.

This unit applies to any worker involved in internal auditing against the current food safety standards. At this level, workers would be required to exercise judgement within clearly defined guidelines.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes.</i>	<i>Performance criteria specify the level of performance needed to demonstrate achievement of the element.</i>
1. Plan a food safety audit	1.1 Identify and locate information and resources required to conduct the audit 1.2 Develop and negotiate an audit plan with the food business to meet audit scope

2. Conduct a food safety audit	2.1 Collect information that is adequate, representative and meets audit requirements 2.2 Analyse information to assess adequacy of the food safety program 2.3 Review records to assess compliance with the food safety program 2.4 Assess compliance with the food safety program in the food business 2.5 Inspect premises and transport vehicles, as required, to confirm that they meet the design and construction requirements set out by food safety legislation 2.6 Identify areas requiring corrective action
3. Report and follow up audit outcomes	3.1 Report situations presenting an imminent and serious risk to the safety of food in accordance with legislative requirements 3.2 Prepare audit reports to address audit scope requirements 3.3 Communicate the results of the audit to the food business and to enforcement agencies as required by legislation 3.4 Confirm areas requiring corrective action with the food business 3.5 Develop a corrective action plan 3.6 Confirm implementation of corrective action as set out in the corrective action plan 3.7 Review corrective action and implement follow-up requirements

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTFSE008 Conduct internal food safety audits

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- planned, conducted and documented at least 2 food safety audits to meet audit scope, legal and organisational requirements of food business.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- relevant sections of the food standards codes, legislation, industry guidelines and food processes relevant to health and community services sectors and necessary to verify food safety compliance
- purpose, scope and stages of the internal food safety audit
- legal and organisational requirements and processes for:
 - internal and external second or third-party audits
 - internal and external audit roles, responsibilities and legal liabilities
 - prescribed fees, levies and charges
 - appropriate ethical conduct of auditors
 - certification and/or registration of auditors and authorised officers
 - food safety and the purpose and intent of current legislation
 - reporting findings of the audit, conflict of interest, confidentiality, rights of appeal and giving evidence in court
 - reporting non-conformities that present an imminent and serious risk to the safety of food
 - business classification and scope and frequency of audit
 - training and assessment requirements for food safety workers and supervisors
 - minimum standards of design and construction required of food premises, fixtures, fittings, equipment and transport vehicles as required by food safety legislation and relevant Australian Standards

- audit procedures and techniques:
 - recording and reporting requirements
 - business systems and related reference documents and appropriate application of these in an audit
 - data analysis methods
 - techniques for collecting information, including choice of appropriate methods to ensure data is adequate and representative
- food safety program procedures and requirements
- food safety hazards and associated risks
- where food business control methods or limits vary from industry standards or where there are no industry standards, technical knowledge required to assess data used by the business to validate acceptable limits
- hazard analysis and critical control points (HACCP) procedures, including:
 - techniques for identifying hazards that may be reasonably expected to occur
 - determining appropriate control methods
 - monitoring and record keeping
 - validating and corrective action requirements.

Assessment Conditions

Skills must have been demonstrated in a workplace or a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities equipment and resources, including a real food business within the health or community services sectors where food safety hazards are identified and controlled by a food safety program
- modelling of industry operating conditions.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

- In addition, the person assessing this unit of competency must be a competent and approved food safety auditor, as defined by food safety legislation.

Link

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTFSE009 Apply cook-freeze and reheating processes

Modification History

N/A

Application

This unit describes the skills and knowledge required to freeze, thaw and reheat food to ensure microbiological safety and palatability.

This unit applies to food services staff who work under supervision.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes.</i>	<i>Performance criteria specify the level of performance needed to demonstrate achievement of the element.</i>
1. Receive and store goods in accordance with appropriate food hygiene and health standards	1.1 Check delivered goods to ensure correct quantities, appropriate use-by dates and temperature 1.2 Record temperature check results 1.3 Move stock to freezer storage 1.4 Check and record freezer temperatures according to requirements

	1.5 Report departure from established standards concerning the receipt of goods, temperature checks and stock quality 1.6 Follow stock rotation procedures 1.7 Discard expired stock
2. Prepare frozen food for reheating	2.1 Remove required items from freezer and place in chiller according to established procedures of the food service 2.2 Space trays to permit air circulation 2.3 Relax product to 0-4 degrees Celsius within 24 hours 2.4 Safely transport to point of service while maintaining correct temperatures
3. Reheat food product	3.1 Pre-heat oven to meet temperature standards 3.2 Prepare product for reheating 3.3 Space trays to allow air flow 3.4 Use reheating times according to manufacturer's recommendations, oven type, loading procedures and other established procedures for the food service 3.5 Check and record product temperature 3.6 Clean thermometers between checking each item 3.7 Undertake reheating of non-relaxed food in emergencies according to established procedures of the food service
4. Serve reheated food	4.1 Transfer reheated food to heated bain-marie 4.2 Maintain temperature at 70 degrees Celsius 4.3 Minimise warm holdings 4.4 Maintain portion control 4.5 Serve or deliver the meal at a temperature that complies with food safety standards and policy of the food service

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTFSE009 Apply cook-freeze and reheating processes

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has:

- applied the correct procedures to handle 3 delivered food items, including:
 - receiving and storing goods
 - freezing and storing frozen food
 - relaxing frozen food
 - reheating food products
- reheated 2 items of non-relaxed food to meet a supply emergency in accordance with established procedures.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- food storage and packing requirements
- hazard analysis and critical control points (HACCP)
- workplace health and safety (WHS), infection control and hygiene regulations
- temperature specifications for the maintenance of food safety and quality
- essential cook-freeze and reheating equipment and purposes
- characteristics and uses of different pre-cooked food types subject to chilling and freezing:
 - culinary terms and trade names
 - bulk foods
 - plated meals
 - sous-vide products
 - meals-on-wheels
 - takeaway meals

- contents of stock date codes and rotation labels
- stock rotation principles, including first in first out
- indicators of spoilage and contamination of chilled and frozen food items in storage
- food safety procedures and methods for handling and serving a variety of uncooked and pre-cooked food:
 - thawing
 - transferring
 - rethermalising
 - maintaining reheated food items
- quality indicators for rethermalised food items:
 - appearance
 - colour
 - consistency
 - moisture content
 - shape
 - size
 - taste
 - texture.

Assessment Conditions

Skills must have been demonstrated in a workplace or a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities equipment and resources, including:
 - food service and food safety program policies and procedures
 - food service facilities, equipment and utensils for handling, storing, freezing and reheating food
 - appropriate clothing and footwear
 - personal protective clothing and wound dressings
 - hand washing facilities and equipment
- modelling of industry operating conditions.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element</i>
1. Prepare for clinical measurement	1.1 Determine clinical measurement requirements and own role limitations from review of client information 1.2 Assess environment for suitability to conduct a clinical measurement 1.3 Follow standard procedures for infection control

	1.4 Gather, prepare and check readiness of equipment and consumables prior to use 1.5 Identify client following organisation and regulatory procedures 1.6 Clearly communicate measurement procedures and purpose to client 1.7 Collect and accurately document client information as required 1.8 Give client the opportunity to ask questions and discuss any concerns 1.9 Obtain agreement from the client in accordance with clinical guidelines, organisation policies and procedures
2. Obtain clinical measurements	2.1 Follow personal hygiene and infection control procedures 2.2 Use equipment according to its purpose and operating instructions 2.3 Use appropriate manual techniques and adapt to suit specific client needs and issues that arise 2.4 Obtain valid, reliable and accurate results by following standard sequences and procedures 2.5 Read and document numerical and other measurement data 2.6 Identify non valid results and repeat procedures as required 2.7 Accurately record and report results in accordance with clinical guidelines, organisation policies and procedures and confidentiality requirements 2.8 Communicate outcome of measurements clearly and simply to client if appropriate to do so
3. Finalise clinical measurement process	3.1 Assist, advise and instruct client in accordance with needs of specific test procedures 3.2 Clean, sterilise and/or dispose of equipment and consumables in accordance with manufacturers' requirements and infection control procedures 3.3 Clean work area and dispose of waste in line with organisation protocols and infection control procedures 3.4 Store equipment and consumables in accordance with clinical guidelines, organisation policies and procedures

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTHPS001 Take clinical measurements

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed established protocols, infection control and safety requirements to produce accurate, valid and reliable clinical measurements from at least 3 different clients
- taken different types of clinical measurements including at least 3 of each of the following:
 - vital signs (blood pressure (BP), pulse, respirations, temperature)
 - body height, weight and circumference measurement (including body mass index (BMI) calculation)
 - blood glucose measurement
 - chemical reagent strip urinalysis
 - colour blindness testing
 - distance visual acuity testing
 - screening audiometry
 - spirometry

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations for taking clinical measurements (national, state/territory, local), including:
 - children in the workplace
 - duty of care
 - informed consent, what it means, and the limitations of obtaining consent by workers who are not health professionals
 - mandatory reporting
 - records management

- privacy, confidentiality and disclosure
 - industry standards
 - rights and responsibilities of workers, employers and clients
 - work role boundaries – responsibilities and limitations
- standard infection control requirements for clinical measurements:
 - hand washing
 - use of personal protective equipment (PPE)
 - avoiding contact with bodily fluids
 - sharps injury considerations
 - waste disposal
- types of clinical measurements that may be taken by those supporting medical practitioners:
 - vital signs
 - body height, weight and circumference measurement (including BMI calculation)
 - colour blindness testing
 - distance visual acuity testing
 - screening audiometry
 - spirometry
- clinical measurement procedures including:
 - terminology
 - sequencing for measurement
 - type of data produced, its recording and use
- features and correct use of medical testing equipment:
 - sphygmomanometer
 - stethoscope
 - timing device
 - thermometer
 - peak flow meter and disposable mouth pieces
 - penlight
 - percussion (reflex) hammer
 - measuring tape
 - equipment for measuring height and weight
 - goose-neck lamp or other light source

- types of information included in client medical records and rationale for these:
 - test details – name, date, time
 - name of supplies used including batch and lot number and expiry date, if applicable
 - results
 - adverse effects or incidents
 - advice or instructions given
 - information collected regarding client's current health status, physical and social function
 - signature requirements
- cultural and religious factors that impact on the approach to taking clinical measurements
- anatomy and physiology to enable performance of clinical measurement to be accurate and of minimum risk to clients

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - sphygmomanometer
 - stethoscope
 - timing device
 - thermometer
 - peak flow meter and disposable mouth pieces
 - spirometer and disposable mouth pieces
 - penlight
 - measuring tape
 - equipment for measuring height and weight
 - colour blindness test plates (eg Ishihara)
 - visual acuity chart
 - audiometer and quiet room
 - goose-neck lamp or other light source
 - hand washing facilities
 - disposable gloves
- modelling of industry operating conditions, including:

- interaction with clients
- integration of situations requiring problem solving

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element</i>
1. Prepare environment and equipment	1.1 Obtain and clarify instructions from health professional or according to organisation procedures 1.2 Follow standard procedures for infection control 1.3 Assess environment for suitability

	1.4 Gather, prepare and check readiness of equipment and consumables prior to use 1.5 Confirm readiness and availability of emergency equipment, medications and supplies as appropriate for procedure
2. Prepare client	2.1 Read client information and confirm client identity in accordance with organisation procedures 2.2 Clearly communicate information to client and confirm their understanding 2.3 Give client the opportunity to ask questions and discuss any concerns 2.4 Obtain agreement from the client in accordance with clinical guidelines, organisation policies and procedures 2.5 Check for contraindications to procedure according to direction and confirm client's status within scope of own job role 2.6 Assist with positioning client for procedure ensuring client comfort and accessibility according to safe manual task procedures and health professional's instructions 2.7 Recognise and respond appropriately to client needs for reassurance
3. Follow health professional directions	3.1 Respond to requests for assistance according to workplace protocols and within the scope of own job role 3.2 Monitor client's condition as directed and within scope of own job role 3.3 Report abnormal observations or client reactions to health professional immediately, in line with directions from the health professional 3.4 Deal with adverse incidents as per workplace protocols and directions from health professional 3.5 Accurately document procedure in client's medical record under supervision of the health professional in line with protocols and confidentiality requirements
4. Complete follow up tasks	4.1 Assist, advise and instruct client in accordance with practitioner instructions

	4.2 Monitor client for signs of adverse reaction for appropriate time period as directed and within scope of own job role 4.3 Advise and instruct client as per organisation protocol and in line with health professional's instructions 4.4 Clean and dispose of equipment and consumables in accordance with manufacturers' requirements and infection control procedures 4.5 Clean work area and dispose of waste in line with practice protocols and infection control procedures 4.6 Store equipment and consumables in accordance with clinical guidelines, organisation policies and procedures

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTHPS002 Support health professional in the delivery of care

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed established protocols, procedures and infection control and safety requirements to provide assistance in delivery of care under the direction of a health professional for the following 5 procedures:
 - dressing of wounds not involving scheduled medication wound care
 - suture and staple removal
 - removal of plasters
 - application of bandaging, splints and slings
 - set up and monitoring of nebulisation without medication
- followed established protocols, procedures, infection control and safety requirements to provide assistance to a health professional who is undertaking:
 - pap tests
 - plastering
 - physical examination
 - minor operations

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations for supporting the health professional in the delivery of care, including:
 - duty of care
 - informed consent, what it means, and the limitations of obtaining consent by workers who are not health professionals
 - records management
 - privacy, confidentiality and disclosure

- industry standards
 - work role boundaries – responsibilities and limitations
 - risk management considerations
 - work health and safety
 - manual task safety procedures
- standard infection control requirements for clinical procedures:
 - hand washing
 - use of personal protective equipment (PPE)
 - avoiding contact with bodily fluids
 - needle stick injury considerations
 - waste disposal
 - how to assist with the maintenance of surgical asepsis and the reasons for maintaining a sterile field
- how to assist with the maintenance of surgical asepsis and the reasons for maintaining a sterile field
- procedures, equipment and terminology used for commonly occurring care procedures undertaken by health professionals, including:
 - dressing of wounds not involving scheduled medication wound care
 - suture and staple removal
 - pap tests
 - plastering/removal of plasters
 - physical examination
 - application of bandaging, splints and slings
 - set up and monitoring of nebulisation without medication
 - minor operations
- types of information included in client medical records and rationale for these, including:
 - procedures detail – name, date, time
 - name of supplies used including batch and lot number and expiry date, if applicable
 - details of procedure
 - site of procedure
 - results of procedure
 - any adverse effects or incidents
 - advice or instructions given

- information collected regarding client's current health status, physical and social function
- medical assistant's signature or initials

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - client information and medical records
 - disposable gloves
 - hand hygiene facilities
 - equipment and consumables needed for specific procedures, including:
 - bandage scissors
 - cleaning agents
 - dressing packs – basic, for skin lesion
 - dressings, swabs and bandages
 - examination couch with sheets or disposable covers
 - flow meter for oxygen cylinder
 - moisture proof sheets (blueys)
 - nebulisation mask and bowl (adult and child sizes)
 - oxygen tubing
 - pap testing equipment
 - patient gown
 - plaster of paris and padding
 - plaster saw
 - sharps container
 - simulated wound with removable sutures and staples
 - skin cleansing solution
 - splinting material
 - stainless steel dressing trolley
 - staple remover, stitch cutting blade, stitch removal scissors
 - suture material
- modelling of industry operating conditions, including:
 - interaction with clients

- integration of situations requiring problem solving

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element</i>
1. Monitor medication stock levels	1.1 Conduct an inventory of medications against required stock levels according to instructions from health professional and established procedures 1.2 Take action to ensure medications beyond expiry date are not used, in line with organisation guidelines

	1.3 Correctly interpret information about cold chain requirements and monitor and maintain cold chain according to medication needs 1.4 Monitor and update medication stock in the health practitioner's bag according to instructions from health professional
2. Order stock	2.1 Identify potential shortfalls in stock levels and take action to ensure stock is replenished in a timely manner under direction from health professionals 2.2 Accurately complete stock orders according to procedures as required
3. Handle and store medication stocks	3.1 Handle medications according to scope of own role and in accordance with manufacturer's instructions 3.2 Unpack medication orders and check items and quantities against order for accuracy 3.3 Store medications according to manufacturer's recommendations 3.4 Dispose of medications in accordance with regulatory requirements and health professional instructions
4. Maintain medication documentation	4.1 Maintain accurate log books of medications in accordance with legislative requirements 4.2 Maintain accurate documentation of cold chain management

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTHPS003 Maintain medication stocks

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed regulatory and organisation procedures to maintain the medication stocks for at least 1 health workplace under the direct or indirect supervision of a health professional

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- basic pharmacology, including the major medication categories and the types of conditions they treat
- storage requirements for different types of medication
- purpose and features of consumer medicine information (CMI)
- how to organise dosage administration aids
- legal and ethical considerations (national, state/territory and local) for medication storage, handling and checking, including:
 - codes of practice
 - Australian Psychology Accreditation Council (APAC) *Guiding principles to achieve continuity in medication management*
 - Royal Australian College of General Practitioners (RACGP) *Standards for general practices*
 - *Standard for the uniform scheduling of medicines and poisons*
 - specific legislation, including:
 - health acts and regulations
 - legislation and regulations pertaining to Schedule 8 (S8) controlled drugs
 - drugs and poisons
 - controlled substances

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - temperature controlled storage
 - secure storage
 - dosage administration aids
 - medication stocks
 - medication documentation
 - regulatory requirements for medications
 - MIMS or similar reference guide
 - procedures for the candidate to follow
- modelling of industry operating conditions, including integration of situations requiring problem solving

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTHPS004 Measure spirometry

Modification History

N/A

Application

This unit describes the skills and knowledge required to prepare a client for spirometry, complete the spirometry test and to provide a report as an aid to the diagnosis and management of ventilatory impairment.

This unit applies to any health worker who takes spirometry measurements. Spirometry measurement is commonly conducted in hospitals, respiratory physicians rooms, general practitioner (GP) rooms, pharmacies and pathology collection centres.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element</i>
1. Prepare spirometer and materials for use	1.1 Check cleanliness and functionality of spirometer and other materials 1.2 Validate or calibrate spirometer in accordance with manufacturer specifications

2. Prepare client for procedure	2.1 Greet client courteously and identify self 2.2 Identify client following organisation and regulatory procedures 2.3 Obtain, read, and accurately record client information, in accordance with organisation policies and procedures 2.4 Identify and responds to contraindications for performing spirometry within scope of own job role 2.5 Obtain clarifications from requesting health professional when necessary 2.6 Take accurate client measurements, consider other inputs and calculate reference values from established value sets 2.7 Seat client correctly for procedure
3. Perform spirometry	3.1 Initialise equipment to commence recording and record additional information 3.2 Coach client through procedure with the provision of continuous instruction, encouragement and reassurance 3.3 Observe client throughout the procedure for ability to continue 3.4 Identify recording as technically correct 3.5 Provide client with feedback on performance 3.6 Repeat spirometry as necessary to comply with current standards for repeatability 3.7 Make technically acceptable measurements according to current standards 3.8 Select indices for report in accordance with current standards 3.9 Identify the need for administration of a bronchodilator in accordance with current standards and medical officer request 3.10 Allow sufficient time for peak effect from bronchodilator and repeat spirometry 3.11 Identify and respond to clinical emergencies in accordance with organisation emergency procedures
4. Complete spirometry measurement	4.1 Assist client as required on completion of procedure

	4.2 Review follow up arrangements with client 4.3 Respond appropriately to client's questions 4.4 Dispose of or clean materials in accordance with organisation policies and procedures, and infection control guidelines 4.5 Clean, restock and store equipment according to manufacturer's guidelines 4.6 Complete report to technically acceptable standards, provide a provisional interpretation of results and forward to physician for final interpretation 4.7 Forward report and interpretation to requesting medical officer 4.8 Enter details of client and test completed on to database and/or hospital information system

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTHPS004 Measure spirometry

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed established technical, infection control and safety procedures to produce spirometry measurements for at least 3 different clients that accurately reflect the maximal expiratory ventilatory capacity:
 - recognised and responded appropriately to errors due to both client performance and technical faults
 - provided provisional interpretation against established reference values

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- purpose, principles and protocols of spirometry
- legal and ethical considerations for spirometry, including:
 - duty of care
 - informed consent
 - records management
 - privacy, confidentiality and disclosure
 - industry standards
 - work role boundaries – responsibilities and limitations
- basic pharmacology related to respiratory function relevant for spirometry measurement
- anatomy and physiology relevant for understanding and conducting spirometry
- set up, operation and routine maintenance of spirometry equipment
- patterns of normal/abnormal results related to both respiratory disease and technical factors relevant for spirometry measurement
- features of technically correct recordings, including:
 - no hesitation at start

- evidence of maximal effort
 - no cough within first second
 - end of test criteria met
 - reproducibility
- mathematical and statistical information relevant for spirometry measurement
- reference values required for spirometry measurement and the factors that contribute to calculation of client reference values and how to incorporate these, including:
 - weight
 - height
 - age
 - gender
 - race
- how to convert volumes from atmospheric temperature and pressure (ATP) to body temperature and pressure saturated (BTPS)
- common causes of client non compliance in spirometry and the appropriate remedies
- complications and contraindications for clients undergoing spirometry measurement, and how to respond
- emergency procedures specific to spirometry instrument quality control procedures, including:
 - calibration
 - biological control measures
- relevance of environmental factors in spirometry, including temperature and humidity
- features and functions of respiratory therapy products

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - spirometer
 - client information
 - procedures for candidate to follow
- modelling of industry operating conditions, including integration of situations requiring problem solving

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTHPS005 Handle medical specimens

Modification History

N/A

Application

This unit describes the skills and knowledge required to handle specimens including organising off-site testing and performing certain on-site tests.

This unit applies to any health worker handling medical specimens. The scope of this unit does not include any specimen collection.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element</i>
1. Follow standard procedures for handling specimens	1.1 Apply standard precautions and codes of practice when handling medical specimens 1.2 Select and use equipment and instruments suited to the specimen being handled

	1.3 Transfer specimen into appropriate container and seal properly, ensuring correct method of preservation has been used 1.4 Label containers accurately and store specimens in specified conditions 1.5 Follow established procedures in case of adverse incident
2. Organise off-site testing of specimens	2.1 Prepare specimens for transport according to specifications for packaging and transport 2.2 Check that specimen is accompanied by required accurately completed documentation 2.3 Arrange pick-up of specimen, if required, ensuring specimens are in correct location for pick-up
3. Conduct on-site testing of specimens	3.1 Use and maintain equipment in accordance with manufacturer's instructions 3.2 Conduct tests following practice protocols, standard precautions and industry standards 3.3 Accurately document results and report to appropriate personnel 3.4 Read and recognise significantly abnormal results and report appropriately and in a timely fashion

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTHPS005 Handle medical specimens

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed established technical, infection control and safety procedures when handling at least 4 different specimen types

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations for specimen handling (national, state/territory, local):
 - codes of practice
 - records management and labelling
 - privacy, confidentiality and disclosure
 - work role boundaries – responsibilities and limitations
 - work health and safety
- standard infection control requirements:
 - hand hygiene
 - use of personal protective equipment (PPE)
 - avoiding contact with bodily fluids
 - needle stick injury considerations
 - waste disposal
- different types of medical specimens and associated handling procedures, including those for:
 - urine
 - blood
 - oral fluids
 - skin scrapings

- storage conditions for different types of specimen
- transport requirements for different types of specimen
- types of on-site tests and how they are conducted, including:
 - uriscreen
 - pregnancy tests
 - blood glucose level measurement
- how to deal appropriately with adverse incidents

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - real specimens
 - packaging
 - storage facilities
 - documented procedures for the candidate to follow
- modelling of industry operating conditions, including integration of situations requiring problem solving

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTHPS006 Assist clients with medication

Modification History

N/A

Application

This unit describes the skills and knowledge required to prepare for and provide medication assistance, and complete medication documentation. It also involves supporting a client to self-administer medication.

This unit applies to community services and health workers with authority in their state or territory to assist with the administration of medication.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element</i>
1. Prepare to assist with medication	1.1 Establish scope of own ability to provide assistance with medication according to organisation guidelines and jurisdictional regulatory requirements

	1.2 Identify lines of authority to delegate the task, accountability and actions to be taken to handle contingencies 1.3 Confirm that equipment and all forms of medication to be administered are complete, ready for distribution and up to date 1.4 Confirm with supervisor the authority to proceed with assisting in the processes used in delivery of medication to clients 1.5 Follow infection prevention and control procedures
2. Prepare the client for assistance with administration of medication	2.1 Clarify specific assistance required to address personal needs of each client 2.2 Identify level and type of supervision required by client for assistance with medications within organisation policies and work role responsibilities 2.3 Correctly identify and greet each client, explain administration procedures and prepare them for medication 2.4 Check individual client medications according to organisation procedures 2.5 Prior assisting client with their medication, check for presence of any client physical or behavioural changes and report to supervisor or health professional 2.6 Recognise circumstances in which medication administration should not proceed and seek advice of supervisor or health professional
3. Support clients with administration of medication	3.1 Prompt client to take medication at correct time 3.2 Prepare medications and support clients with administration of medication according to legislation, organisation policies, medication requirements and individual care plans 3.3 Make checks to ensure the right medication is given at the right time, to the right person, in the right amount, via the right route 3.4 Oversee and observe clients when taking medication and confirm with them their ingestion or completion 3.5 Implement documented procedures for medication not being administered or absorbed

	3.6 Complete medication administration records according to organisation procedures and regulatory requirements 3.7 Observe client for changes in condition and report to supervisor or health professional as required by organisation procedures
4. Handle medication contingencies	4.1 Report any concerns with the administration of medication to supervisor and/or health professional according to organisation procedures and protocols 4.2 Identify, report, record and address individual's reactions to medication according to organisation guidelines and health professional's instructions 4.3 Clearly identify contaminated or out of date medication and implement organisation's procedures for safe and appropriate disposal 4.4 Identify, report and record changes in individual's condition, within essential timeframes where relevant, according to organisation guidelines 4.5 Identify procedures to address/respond to changes in the client's condition or needs according to the organisation's guidelines 4.6 Promptly report any inconsistencies observed with the medication or client to the supervisor or health professional and take action according to their direction 4.7 Document and address all inconsistencies according to organisation guidelines and procedures
5. Complete medication distribution and documentation	5.1 Discard waste products according to organisation procedures and manufacturer's instructions 5.2 Collect used equipment, discarded medications/applicators and rubbish and place in appropriate/designated receptacle according to instructions 5.3 Clean and store unused and used medication containers and administration aids in accordance with infection control guidelines 5.4 Follow the organisation's arrangements and procedures to replenish dose administration aids and supplies of medications

	5.5 Store medication charts, care plans or treatment sheets according to organisation procedures 5.6 Complete medication storage procedures in compliance with legislation and own role responsibility

Foundation Skills

The Foundation Skills describe those required skills (such as language, literacy, numeracy and employment skills) that are essential to performance.

Numeracy –to calculate and check correct dosage of medication, expiry dates and client information. This includes basic calculations of ratios and volume.

Reading –to correctly check and interpret client information and dosage instructions.

The remaining foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Unit Mapping Information

		Significant change to knowledge evidence.	

Assessment Requirements for HLTHPS006 Assist clients with medication

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- provided assistance with medication:
 - to at least 5 different clients according to their care plans
 - with at least 5 different types of medications
 - used at least 3 different modes of administration
- consistently adhered to procedures and regulatory requirements for assisting with medication, including:
 - checked the care plan and confirming details
 - checked medication, including expiry dates and dosage instructions
 - confirmed client identity
 - calculated correct dosage
 - conducted pre and post administration client checks
 - cleaned equipment and disposed and stored medications according to organisation procedures completed accurate documentation

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the work role. This includes knowledge of:

- legislation, regulations, codes of practice and workplace policies, including:
 - commonwealth and state/territory legislation regarding the administration of medication including the Drugs and Poisons Act
 - Disability Services Acts (commonwealth and state)
 - Aged Care Act
 - duty of care
 - work health and safety
 - standard and additional infection control precautions

- roles and responsibilities of those involved in medication administration and limitations of own role in only providing assistance
- basic medication terminology
- forms of medication, and how they are handled, administered and stored, including:
 - capsules
 - drops
 - inhalants
 - liquids
 - lotions and creams
 - ointments
 - patches
 - powders
 - tablets
 - wafers
 - pessary
 - suppository
- characteristics of at least 10 commonly used medications in the area of work, including prescribed and over the counter medications, including:
 - purpose
 - expected effects and potential reactions
 - contraindications for use
 - consequences of incorrect use
 - storage requirements
 - disposal requirements
- documentation requirements for the administration of medication, including:
 - purpose
 - potential impacts of errors and reasons for error medication charts, their role and procedures for use

Assessment Conditions

Skills must have been demonstrated in the workplace unless state or territory legislation prevents this occurring with the addition of simulations and scenarios where the full range of contexts and situations have not been provided in the workplace. The following aspects of the performance evidence must have been demonstrated using simulation prior to demonstration in the workplace/with members of the general public

- consistently adhered to procedures and regulatory requirements for assisting with medication, including:
 - checked the care plan and confirming details
 - checked medication, including expiry dates and dosage instructions
 - confirmed client identity
 - calculated correct dosage
 - conducted pre and post administration client checks
 - cleaned equipment and disposed and stored medications according to organisation procedures
 - completed accurate documentation

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - placebo medication, administration equipment, charts and documentation
 - individualised plan
 - workplace policies and procedures

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must be a registered nurse or registered enrolled nurse or registered Aboriginal and/or Torres Strait Islander health practitioner.

Link

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTHPS007 Administer and monitor medications

Modification History

N/A

Application

This unit describes the skills and knowledge required to administer medications to people and monitor them, as per the delegation from a relevant health professional, in accordance with legislation and the employing organisation's medication and delegation policies and practice.

This unit applies to community services and health workers with the relevant authority in their state or territory to administer medication and monitor them as per the delegation from a relevant health professional.

Ongoing requirements to demonstrate competency in drug calculations may apply, and users should refer to relevant state/territory regulatory requirements.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element</i>
1. Identify situations that are a potential risk to the	1.1 Access and read information to enable identification of substance incompatibilities based on care plan and delegation

safe administration of medications	1.2 Identify environmental and time management issues that may impact on or contraindicate administration of medication 1.3 Report potential risks related to medication administration to delegating health professional 1.4 Confirm client identity and if any allergies exist 1.5 Identify drugs and poisons schedules and classifications as determined by law 1.6 Pro-actively identify any limitations in own capability in relation to undertaking delegated medication administration function and report to delegating health professional
2. Prepare for medication administration	2.1 Confirm delegating health professionals authority to proceed with delegation of medication administration according to organisation policies, guidelines and protocols and jurisdictional legislative and regulatory requirements 2.2 Clarify own role and limitations in providing assistance with medication administration with delegating health professional 2.3 Check that all equipment, including dose administration aids, are complete, ready for use, up to date and tamper free before proceeding 2.4 Follow infection control procedures 2.5 Confirm medication administration route and procedure 2.6 Confirm purpose and function of prescribed medications from care plans and delegating health professional 2.7 Accurately calculate medication dosages according to authorised documented request 2.8 Prepare medications according to delegated role and in line with legal and environmental guidelines
3. Identify and prepare the client for administration of medication	3.1 Greet and identify client according to organisation procedures and prepare for medication administration 3.2 Check client medication according to organisation guidelines and the delegation from the health professional 3.3 Accurately explain the administration procedure to the client

	3.4 Prior to the administration of medication, check the client for any physical or behavioural changes that may indicate the need to report to delegating health professional
4. Administer medications within legal parameters	4.1 Administer medications as delegated within role responsibility 4.2 Administer medications according to "rights of medication", specific requirements from the form prescribed and in accordance with defined legislation, organisation procedures, professional standards and prescriber's written instructions where available 4.3 Assist the client taking the medication as required and according to documented procedures and professional standards 4.4 Oversee and observe the client when taking medication and confirm ingestion or completion of administration 4.5 Dispose of all used and unused medication, containers, according to organisation procedures 4.6 Identify signs from client "when necessary" medications might be required, then inform delegating health practitioner and act in accordance with organisation's policies, procedures, delegation and role responsibility 4.7 Record administration of medications according to organisation policy 4.8 Provide accurate information to clients and carers on medication administration, including possible side effects as per instructions of the delegating health professional
5. Monitor client response to administered medication	5.1 Identify possible acute and delayed adverse reactions to medications, respond within role responsibility and report to supervisor or health professional 5.2 Implement emergency response for identified acute and delayed adverse reactions within role responsibility 5.3 Record and report response to emergency strategies 5.4 Identify signs of a client experiencing pain and report to health professional 5.5 Observe and record client response to pain relieving medication and report to health professional

6. Handle medication contingencies	6.1 Report medication refusal or incomplete ingestion to supervising health professional according to organisation's procedures and protocols 6.2 Clearly identify contaminated or out of date medication and implement organisation's procedures for safe and appropriate disposal 6.3 Observe and record changes in the client's condition according to the organisation's guidelines and report to supervisor and health professional 6.4 Record and report any inconsistencies according to delegation and organisation guidelines and procedures
7. Complete medication distribution and administration	7.1 Manage medication equipment and used containers according to infection control guidelines 7.2 Complete arrangements and procedures to replenish dose administration aids and supplies 7.3 Store medication charts, care plans and treatment sheets according to the organisation's procedures 7.4 Complete medication storage procedures in compliance with legislation and own role responsibility

Foundation Skills

The Foundation Skills describe those required skills (such as language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTHPS007 Administer and monitor medications

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- safely administered medication to at least 10 different people, including:
 - applied the rights of medication
 - consulted and confirmed actions with an authorised practitioner at all relevant times
 - determined medication requirements
 - understood and responded appropriately to orders and instructions for medication
- calculated medications with 100% accuracy and used the rights of medication and standard precautions to administer medication, using each of the following routes or methods:
 - oral
 - sublingual/buccal
 - dry powder inhalers
 - metered dose/spacer inhalers
 - nebulisers
 - topical medications
 - suppositories
 - sub-cutaneous injection using pre-loaded syringes or pens
- documented the administration of medication according to legislative requirements and organisation procedures and policies

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the work role. This includes knowledge of:

- legislation, regulations, codes of practice, professional standards and workplace policies, including:

- commonwealth and state/territory legislation concerning administration of medication, including the Drugs and Poisons Act
 - Disability Services Acts (commonwealth and state/territory)
 - Aged Care Act
 - duty of care
 - work health and safety
 - standard and additional precautions
- principles, practices and regulatory framework underpinning delegation and supervision, accountability and responsibility
- roles and responsibilities of those involved in assisting with medications and limitations of own role
- scheduled medications and interpretation of scheduling:
 - schedule 2
 - schedule 3
 - schedule 4
 - schedule 8
- forms of medication, and how they are handled, administered and stored, including:
 - capsules
 - drops
 - inhalants
 - liquid
 - lotion and cream
 - ointments
 - patches
 - powder
 - tablets
 - wafers
 - pessary
 - suppository
- basic pharmacology of medications, including:
 - pharmacodynamics (biochemical and physiological effects of commonly used pharmacology on the body)
 - pharmacokinetics (the action of commonly used pharmacology in the body over a period of time, including the processes of absorption)
 - pharmacotherapeutics (therapeutic uses and effects of pharmacology used for common medical conditions)

- toxicology (adverse effects of chemicals on the organs of the body)
- key aspects of medication groups and categories and their general effect on body systems and major disorders, including:
 - central nervous system
 - musculo-skeletal system
 - peripheral nervous system
 - endocrine system
 - cardiovascular system
 - respiratory system
 - gastrointestinal system
 - renal/urinary system
 - reproductive systems
 - immune system
 - integumentary system
 - eye, ear and special senses
 - micro-organisms
 - neoplastic disease
- major factors that affect the action of drugs, including:
 - age
 - disease
 - processes
 - nutrition
 - hydration
- cross infection and prevention strategies including:
 - correct hand washing techniques
 - glove usage
 - awareness of how infection is spread
- procedures and legal requirements for different medication administration routes and consequences of incorrect use:
 - aural
 - insulin by sub-cutaneous injection using pre-loaded syringes or pens
 - intranasal
 - ocular
 - oral

- rectal
 - topical (including transdermal)
 - vaginal
- substance incompatibilities and contra-indications, including those related to:
 - warfarin and aspirin
 - medication and diet
 - medication and sunlight
 - infection
 - alcohol
- basic understanding of:
 - anaphylactic reactions
 - side effects
 - precautions
- characteristics of at least twenty commonly used medications in the area of work, including prescribed and over the counter medications:
 - purpose
 - expected effects and potential reactions, including anaphylactic reactions
 - contraindications for use
 - consequences of incorrect use
 - storage requirements
 - disposal requirements
- documentation requirements for medication administration:
 - purpose
 - potential impacts of errors and reasons for error
 - medication charts, their role and procedures for use

Assessment Conditions

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations has not been provided in the workplace. The following aspects of the performance evidence must have been demonstrated using simulation prior to demonstration in the workplace or with members of the general public and where state/territory legislation prevents this practice in the workplace:

- calculated medications with 100% accuracy and used the rights of medication and standard precautions to administer medication

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - placebo medication, administration equipment, charts and documentation
 - individualised plans
 - workplace policies and procedures

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must be a registered nurse or registered enrolled nurse or registered Aboriginal and Torres Strait Islander health practitioner.

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTHPS008 Provide clinical mentoring in the work environment

Modification History

N/A

Application

This unit describes the skills and knowledge required to provide mentoring of another person delivering clinical care to client's in the work environment. Clinical mentors act as a support person for direct care workers providing emotional and professional support.

This unit applies to workers supervising direct client care workers and offers a potential pathway into workplace training roles.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria specify the level of performance needed to demonstrate achievement of the element</i>
1. Establish a mentoring relationship with mentee's during clinical supervision	1.1 Identify scope of learning outcomes, realistic expectations and boundaries of the mentoring relationship according to workplace policies and organisation procedures

	1.2 Develop mutual trust, confidence, rapport and teamwork in the mentoring relationship 1.3 Develop an agreed plan on how the mentoring relationship will be conducted
2. Facilitate and mentor the delivery of appropriate client care	2.1 Encourage opportunities for mentees to self-audit their provision of clinical care and identify workplace opportunities for further training needs 2.2 Facilitate clinical reasoning discussions about client clinical care needs and outcomes 2.3 Provide appropriate clinical care mentoring advice and/or support to individuals or groups using a variety of methods and technology
3. Oversee the welfare of mentee's who perform clinical skills in the workplace 4. Evaluate the mentoring process	3.1 Discuss and clarify the risks associated with clinical procedures and the mentee's readiness for provision of clinical care 3.2 Take adequate measures to protect the physical and psychological wellbeing of mentee and their clients when undertaking clinical care procedures 3.3 Ensure appropriate workplace opportunity for practice in delivery of the required clinical skill competencies 3.4 Ensure adequate educational follow-up is made available to support the future delivery of the required competencies 3.5 Engage mentee's personal growth through professional development opportunities 4.1 Communicate and document feedback and closure of the mentoring relationship with mentee and relevant management structures 4.2 Evaluate mentoring plans and processes against agreed outcomes and reporting processes and procedures 4.3 Document improvement opportunities for future clinical mentoring programs

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Current Code and Title	Previous Code and Title	Comments	Equivalence
HLTHPS008 Provide clinical mentoring in the work environment	HLTAMBCR504C Provide clinical mentoring in the work environment	This version was released in HLT Health Training Package release 2.0 and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements.	Not equivalent

Assessment Requirements for HLTHPS008 Provide clinical mentoring in the work environment

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must evidence that the candidate has:

- provided clinical mentoring/supervision to at least 1 mentee in the workplace including:
 - fostered mentees learning through their clinical expertise
 - set timeframes to achieve learning outcomes
 - evaluated and reported on clinical skills and care provided by mentee

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- relevant organisation policies and procedures
- knowledge of clinical skills relevant to the workplace and exceeding that of supervised mentee
- mentoring and coaching techniques and strategies
- how to set the boundaries, timeframe and scope for learning outcomes.
- how to facilitate, monitor and evaluate clinical skills mentoring

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as, using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTHPS009 Perform peripheral intravenous cannulation

Modification History

N/A

Application

This unit describes the skills and knowledge required to perform peripheral intravenous cannulation on clients.

This unit applies to registered enrolled nurses, registered Aboriginal and/or Torres Strait Islander health practitioners and emergency workers for whom peripheral intravenous cannulation is part of the job role. They may be working in hospitals, primary health care in rural remote locations, pathology services, out-of-hospital settings or in other allied health care environments.

The extent of the practitioner's role for peripheral intravenous cannulation may be subject to state/territory legislation and organisation policy, and competency should be demonstrated within the context of applicable legislation and organisation practice.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element</i>

1. Prepare for peripheral intravenous cannulation	1.1 Correctly identify client and authorised request/s for peripheral intravenous cannulation 1.2 Explain procedure to client and obtain consent and check for allergies 1.3 Identify any additional specific requests/tests relevant to the procedure before proceeding 1.4 Ensure client is correctly and comfortably positioned to access the veins 1.5 Work with multidisciplinary team to coordinate activities to ensure they do not impact on peripheral vascular cannulation 1.6 Discuss with parent/carer/staff member appropriate holding and/or distraction technique for a client during cannulation 1.7 Assemble and prepare peripheral intravenous cannulation equipment using standard precautions 1.8 Apply tourniquet/blood pressure cuff to limb, palpate for identification of suitable vein and then release tourniquet/blood pressure cuff 1.9 Prepare and clean insertion site for cannulation
2. Perform peripheral intravenous cannulation	2.1 Identify own work health and safety (WHS) risks associated with poor posture during procedure and adjust client's position 2.2 Use aseptic technique to insert peripheral intravenous cannula in accordance with manufacturer's instructions and organisation policies and procedures 2.3 Respond to complications in accordance with organisation policy and procedures and refer client to supervisor
	2.4 Dress the site with visibility of cannula entry and secure cannula to limb. 2.5 Date the cannula in-situ dressing site, ensure client is left comfortable and is provided with relevant information and instructions 2.6 Dispose of wastes, taking into account opportunities to address waste minimisation, environmental responsibility and sustainable practice issues 2.7 Document in client's health information the site of peripheral intravenous cannulation and number of attempts
3. Monitor peripheral intravenous cannula in-situ	3.1 Assess site and cannula patency regularly in accordance with organisation procedures

	3.2 Refer to supervisor or authorised personnel observed indications for cannula removal 3.3 Upon authorised request, remove intravenous cannula, cover insertion site and check bleeding has stopped

Foundation Skills

The Foundation Skills describe those required skills (such as, language, literacy, numeracy and employment skills) that are essential to performance

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Unit Mapping Information

HLTHPS009 Perform peripheral intravenous cannulation	HLTPAT409D Perform intravenous cannulation for sample collection	This version was released in HLT Health Training Package release 2.0 and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements.	Not equivalent

Assessment Requirements for HLTHPS009 Perform peripheral intravenous cannulation

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- prepared equipment and performed peripheral intravenous cannulation for 3 different clients according to manufacturer's instructions and organisation procedures
- monitored 1 in-situ peripheral intravenous cannula, documenting assessment of the patency of the cannula and condition of the site
- safely removed 1 peripheral intravenous cannula from a client in accordance with organisation procedures

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- basic anatomy and physiology of the circulatory system and first aid relevant to bleeding from peripheral vascular system
- factors necessitating a client to need a peripheral intravenous cannula to be in-situ:
 - venous blood samples
 - intravenous fluids
 - medication
- identification of suitable veins in the upper and lower limbs for peripheral intravenous cannulation including:
 - size and condition of clients vein
 - use of non-dominant limb if possible
 - avoid the cephalic vein in clients with chronic renal failure
 - expected duration of the in-situ intravenous cannula
- identification of veins to avoid using for peripheral intravenous cannulation:
 - areas of flexion e.g. antecubital fossa or bony prominences
 - vein just below the previous cannulation site

- bruised or phlebitis areas
 - areas of poor venous return
 - limb with arteriovenous fistulae or shunt
 - infected limb e.g. cellulitis
 - arm on the same side as a previous lymph node dissection, mastectomy or affected by a cerebrovascular accident
 - limb with an implanted venous access device
 - if surgical procedure is required on limb
- basic medical terminology used in peripheral vascular cannulation and pathology laboratory requests
- factors which may affect the chemical analysis of blood collected from an in-situ peripheral intravenous cannula:
 - appropriate times to collect
 - impact of drugs
 - timing of last dose
 - required fasting times
 - protecting the integrity of the specimen
- how to position client for comfort and adjust chair or bed to reduce practitioners WHS risk factors associated with poor posture during repetitive tasks
- clinical applications for sizes (gauge) of cannula required, selection should take into account:
 - previous cannulation sites
 - age of patient e.g. neonates, children and the older person
 - purpose of peripheral intravenous cannula:
 - rapid transfusion
 - intravenous fluids
 - long term medication
- care and maintenance of peripheral intravenous cannula in- situ
- complications associated with peripheral intravenous cannulation:
 - occlusion
 - infection
 - phlebitis
 - rupture
 - migration
 - extravasation

- unsuccessful cannulation attempt, client discomfort or distress
- how to safely use equipment associated with peripheral intravenous cannulation:
 - tourniquet and/or blood pressure cuff
 - chlorhexidine and alcohol swabs
 - peripheral intravenous cannula
 - local anaesthetic cream and dressings
 - extension set and/or three-way tap device & bung associated with intravenous therapy
 - flushing in-situ cannula with syringe
- pre-collection criteria when peripheral intravenous cannulation is for the purpose of collecting blood including:
 - fasting and/or dietary restrictions
 - drug therapies administered to client
 - physical health status of client
 - referral of client to an appropriate health professional if pre-criteria is not met prior to cannulation

Assessment Conditions

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations has not been provided in the workplace. The following aspects of the performance evidence must have been demonstrated using simulation prior to demonstration in the workplace or with members of the general public and where state/territory legislation prevents this occurring:

- prepared equipment and performed peripheral intravenous cannulation for 3 different clients according to manufacturer's instructions and organisation procedures
- monitored 1 in-situ peripheral intravenous cannula, documenting assessment of the patency of the cannula and condition of the site
- safely removed 1 peripheral intravenous cannula from a client in accordance with organisation procedures

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - simulation learning equipment e.g. simulation limb suitable for peripheral intravenous cannulation
 - dressing pack for aseptic technique
 - solution for cleaning cannulation site
 - tape for securing cannula
 - suitable dressing to cover and allow visibility of entry site of cannula

- peripheral intravenous cannulation equipment
- personal protective equipment
- clinical waste disposal equipment
- tourniquet/blood pressure cuff
- organisation procedure used in the planning of the procedure

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Link

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTHPS010 Interpret and use information about nutrition and diet

Modification History

N/A

Application

This unit describes the skills and knowledge required to interpret and use basic information about nutritional principles and healthy diet. It does not include the provision of therapeutic nutritional or dietary advice to individual clients or the recommendation of ‘practitioner only’ nutritional products.

This unit applies to individuals working with clients within the limits of the *Australian dietary guidelines*. They make referrals to other health professionals or accredited practising dietitians when those limits are exceeded.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australia/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element</i>
1. Access nutritional and dietary information	1.1 Establish credible sources of information about nutrition and diet

	1.2 Access and interpret current dietary guidelines for healthy Australians and nutritional information that support self-care 1.3 Extract and distil information relevant to own practice
2. Use information about diet and nutrition	2.1 Determine situations where nutrition and diet may play a role for individual clients 2.2 Integrate knowledge of basic nutrition and diet into service provision 2.3 Promote healthy diet and nutrition to others based on the <i>Australian dietary guidelines</i> 2.4 Provide information on lifestyle, self-care practices and specialist services related to diet and nutrition 2.5 Identify situations where referral to a health care professional is required and take action accordingly
3. Maintain own knowledge of nutrition	3.1 Identify and use opportunities to update nutritional knowledge 3.2 Monitor current issues and trends in nutrition and diet 3.3 Evaluate potential changes in own work based on updated knowledge

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Unit Mapping Information

Current Code and Title	Previous Code and Title	Comments	Equivalence
HLTHPS010 Interpret and use information		This unit has been created to address a skill or task required	Newly created

about nutrition and diet		by industry that is not covered by an existing unit of competency	

Assessment Requirements for HLTHPS010 Interpret and use information about nutrition and diet

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- used critical thinking skills to review and distil information about nutrition and diet
- used information about nutrition and diet within the scope of own job role in the provision of services to at least 3 different people

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical requirements in relation to the provision of nutritional and diet information to clients:
 - roles, responsibilities and limitations of different people
 - conflicts of interest and ethical considerations
- source of information about nutrition and diet and ways to assess their credibility
- established evidence-based sources of information about nutrition and diet
- anatomy and physiology relating to diet, including:
 - structure of the digestive system
 - role of metabolism
 - digestive processes and activities, including:
 - ingestion
 - mechanical digestion
 - propulsion
 - chemical digestion
 - absorption
 - defecation
- primary components of *Australian dietary guidelines*, including those for older Australians, children and adolescents.

- foods and their key features as described in the *Australian dietary guidelines*, including diet related aspects of chronic disease:
 - diabetes
 - cardiovascular
 - obesity/eating disorders
- basic principles and practices of nutrition and healthy diet, including nutrients, their function, recommended dietary intake (RDI), toxicity and their food sources
- benefits of antioxidants, and food groups that provide good sources
- influences on food choices for individuals
- food labelling and interpretation
- role and implications of using food additives and preservatives
- health implications of food choices
- role of good nutrition in avoiding dietary diseases
- effects of various processing and cooking methods and food storage on nutrients
- commonly encountered food intolerances
- main types and characteristics of special diets that are part of contemporary Australian society:
 - diabetic
 - coeliac/gluten free/low gluten
 - low cholesterol
 - low fat
 - sugar free
 - vegetarian
 - vegan
 - diets specific to different cultures and religions
- the meaning of:
 - drug–food interactions
 - food allergy
 - food intolerance
 - alkaline and acidity charts
- indicators of need for referral to specialist advice

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working

conditions by modelling industry operating conditions and contingencies, as well as using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTHSS002 Perform general maintenance and provide assistance to tradespersons

Modification History

N/A

Application

This unit describes the skills and knowledge required to safely and appropriately perform minor non-trade maintenance tasks and to assist tradespersons with specialised tasks. It also describes the skills and knowledge required to select and use the appropriate materials and equipment, including hand and power tools.

This unit applies to individuals who take responsibility for their own outputs within defined procedures and known routines and may participate in supervised work teams. Work performed requires a range of well-developed skills where some discretion and judgement is required to deal with problems and unscheduled tasks.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes.</i>	<i>Performance criteria specify the level of performance needed to demonstrate achievement of the element.</i>

1. Identify and plan for maintenance task	1.1 Receive maintenance request and assess requirements for assistance, access, timeframes, costs, equipment, materials and tools 1.2 Assess disruption to normal operations and inform those affected 1.3 Isolate area in accordance with organisation requirements to maintain safety of others 1.4 Identify workplace health and safety (WHS) requirements and use <i>personal protective equipment in accordance with legislative and organisation requirements</i> 1.5 Read operation maintenance schedules and drawings to plan work
2. Perform maintenance	2.1 Select and use appropriate tools, materials and equipment in accordance with manufacturer guidelines and WHS requirements 2.2 Check tools for serviceability and safe use 2.3 Assemble tools, equipment and materials and prepare the work area 2.4 Locate and hold in place material needed for both hand and power tool application 2.5 Use both hand and power tools safely and effectively 2.6 Safely locate both hand and power tools when not in immediate use 2.7 Perform maintenance task according to organisation maintenance policy and procedure 2.8 Identify problems or tasks requiring specialised assistance or tradesperson and report to supervisor
3. Assist tradesperson with construction and/or maintenance tasks	3.1 Follow instructions of the tradesperson and clarify type and details of assistance required 3.2 Read relevant plans, drawings, operational maintenance manuals and scheduled maintenance plans to assist with task 3.3 Provide information and assistance to tradesperson 3.4 Report accurate information and updates between tradespersons and supervisor
4. Clean up work area	4.1 Clear the work area and remove waste according to organisation waste disposal requirements 4.2 Store materials for re-use or disposal

	4.3 Clean, maintain and store tools, equipment and power leads
5. Complete documentation	5.1 Inform supervisor of task completion and any faults or problems identified 5.2 Record the completion of the maintenance task according to organisation policy and procedure 5.3 File or forward documentation according to organisation requirements

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed correct procedures to complete at least 2 maintenance requests, including finalising documentation requirements
- performed a variety of general maintenance tasks that included the following:
 - use of at least 3 hand tools
 - use of at least 2 tools powered by electricity or compressed air
- responded to at least 2 requests to assist a tradesperson in a maintenance or construction task.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- organisation maintenance and reporting policies and procedures
- purpose and use of personal protective equipment, including:
 - overalls
 - boots
 - hard hats
 - safety glasses and goggles
 - gloves
 - ear plugs and muffs
 - face mask and respirators
 - sunscreen
- operation maintenance schedules and drawings
- environmental issues impacting on maintenance work
- principles of planned and preventative maintenance

- purpose and use of hand and power tools, including:
 - brooms
 - bars (crow and pinch)
 - bolt cutters
 - brooms
 - chisels
 - hacksaws and handsaws
 - hammers
 - measuring tapes
 - nips
 - picks and mattocks
 - pliers
 - sealant gun
 - shovel or spades
 - sledge hammers
 - spanners and wrenches
 - spirit level
 - straight edge
 - string lines
 - trowels and float
 - wire cutters
 - paint brushes and rollers
 - spatula or putty knives
 - screwdrivers
 - drills
 - nail guns
 - staplers
 - sanders
 - angle grinders
 - pneumatic wrenches
 - circular saw
 - jig saws
 - planers
 - routers

- jackhammer
- workplace health and safety (WHS) policies and procedures
- organisation's buildings, structures, building services, plant, equipment and machinery to be maintained
- facility, plant, equipment and machinery faults and problems which will require referral to a tradesperson
- construction sequencing and the role of individual trade groups
- activities of individual trades sufficient to enable effective assistance to be given
- purpose and use of common maintenance materials, including:
 - paint
 - thinners
 - timber
 - adhesives
 - lubricants
 - sealant
 - nails, screws, bolts, rivets and nuts
 - laminates.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - WHS procedures
 - personal protective equipment
 - organisation and manufacture guidelines and procedures
 - maintenance requests
 - suitable work area, equipment and materials
 - hand and power tools appropriate to the maintenance tasks
- modelling of industry operating conditions.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTHSS003 Perform general cleaning tasks in a clinical setting

Modification History

N/A

Application

This unit describes the skills and knowledge required to perform general cleaning duties to maintain a clinical area in a clean, tidy and fit for use condition.

This unit applies to a variety of workers in the community services and health industry. Tasks may be performed under limited supervision and under predetermined guidelines as part of a broader health or community services role or as part of a specialised cleaning role.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes.</i>	<i>Performance criteria specify the level of performance needed to demonstrate achievement of the element.</i>
1. Prepare to clean safely	1.1 Use personal protective equipment in accordance with workplace requirements 1.2 Check and set up cleaning equipment in accordance with manufacturer guidelines and organisation procedures

	1.3 Select suitable cleaning agents and measure and prepare in accordance with manufacturer safety guidelines and organisation procedures 1.4 Barricade work site and install appropriate signs to isolate area being cleaned
2. Clean and maintain surfaces in clinical areas	2.1 Identify surface type and texture and select suitable cleaning equipment, agent and method/s 2.2 Remove dirt, soil, stains and spillages from surfaces and clean and dry in accordance with organisation procedures
3. Ensure maintenance of cleaning standards	3.1 Maintain wet areas in an odour, soil and hazard free condition 3.2 Clean unit or location to achieve a low bacteria condition as required by organisation 3.3 Ensure surfaces and areas are regularly cleaned in accordance with the organisation established cleaning schedules and routines 3.4 Follow all infection control procedures to minimise cross-contamination
4. Manage waste	4.1 Assess all waste for health and safety risks and handle in accordance with relevant organisation and workplace health and safety (WHS) requirements 4.2 Remove waste promptly according to established procedures to maintain a clean and tidy area and avoid build-up of unpleasant odours 4.3 Spot clean waste receptacles and surrounds and replace soiled liners to minimise build-up of odour and to maintain a soiled-free appearance
5. Store equipment and cleaning agents safely	5.1 Clean and dry equipment before storage 5.2 Store cleaning agents in accordance with manufacturer instructions and organisation policy

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTHSS003 Perform general cleaning tasks in a clinical setting

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed organisation procedures, including selecting correct equipment and agents, to undertake cleaning of a clinical setting with the following hazards:
 - clinical waste
 - body fluid spill
 - sharps.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- organisation procedures relating to cleaning, including:
 - schedules and routines
 - use of cleaning agents
 - surface type requirements
 - sharps handling
 - manual handling
 - infection control
 - gross tissue samples
- surface types and textures and suitable cleaning equipment, agents and methods
- manufacturers' guidelines for cleaning equipment and agents
- range and extent of cleaning responsibilities in relation to other aspects of the worker's role
- cleaning hazards, including:
 - clinical waste, body fluids and tissue
 - slippery surfaces

- loose electrical fittings
- broken glass
- high bacteria growths
- needle stick injuries
- sharp surfaces
- fumes from cleaning agents
- allergic reactions
- client's cleaning chemical mixtures
- unlabelled cleaning chemical containers
- types of cleaning agents, including:
 - chemical mixed on the job or pre-mixed
 - neutral PH detergents
 - acidic cleaners
 - graffiti remover.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - cleaning schedules and routines
 - clinical setting and items to be cleaned
 - personal protective equipment
 - cleaning agents and equipment
- modelling of industry operating conditions.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTHSS004 Handle and move equipment, goods and mail

Modification History

N/A

Application

This unit describes the skills and knowledge required to deal with the safe collection, handling, sorting, movement, portage and delivery of items to internal and external customers.

This unit applies to workers providing portering, courier or similar services in a health or community services setting. Work is typically performed under supervision, with predetermined guidelines and generally within a team environment. Individuals are accountable for their own results.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes.</i>	<i>Performance criteria specify the level of performance needed to demonstrate achievement of the element.</i>
1. Prepare to move equipment, goods and mail	1.1 Sort equipment, goods and mail for collection and internal and external delivery 1.2 Maintain a clean and tidy sorting area

	1.3 Determine requirements for manual handling assistance to lift and move equipment or goods safely 1.4 Plan appropriate routes and transportation requirements
2. Collect and deliver equipment, goods and mail	2.1 Disconnect and clean equipment in accordance with organisation requirements 2.2 Lift and move equipment and goods safely in accordance with organisation procedures 2.3 Secure equipment, goods and mail for transportation 2.4 Collect items for internal and external delivery 2.5 Deliver equipment, goods and mail according to instructions and schedules 2.6 Place delivered equipment, goods and mail in required location 2.7 Position and reconnect equipment according to organisation requirements
3. Finalise collections and deliveries	3.1 Follow organisation procedures for equipment and goods requiring repair 3.2 Return repaired equipment to required location 3.3 Complete required documentation

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTHSS004 Handle and move equipment, goods and mail

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed the correct procedures to deliver equipment, goods and mail both internally and externally on at least 2 separate occasions, including reading instructions and completing documentation requirements.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- relevant organisation procedures relating to:
 - manual handling
 - infection control
 - personal protective equipment
 - privacy and confidentiality
 - security
 - delivery points, routes and schedules
 - precautions for adverse weather conditions
 - handling, moving or transporting:
 - electronic, computer and mechanical equipment
 - beds and furniture
 - parcels, mail and boxes
 - fragile and perishable items
 - confidential items
 - pathology specimens
 - hazardous substances.

Assessment Conditions

Skills must have been demonstrated in a workplace or a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities equipment and resources including:
 - transport equipment
 - sorting equipment for mail
 - organisation policies and procedures manuals
- modelling of industry operating conditions.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTHSS005 Undertake routine stock maintenance

Modification History

N/A

Application

This unit describes the skills and knowledge required to maintain predetermined stock levels of supplies, consumables, equipment and other store items at ward, unit, sub-store or departmental level.

This unit applies to a variety of health or community service roles involving stock maintenance. At this level workers perform under supervision and generally within a team environment within predetermined guidelines.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes.</i>	<i>Performance criteria specify the level of performance needed to demonstrate achievement of the element.</i>
1. Maintain and monitor stock levels	1.1 Monitor quality of <i>stock</i> and storage conditions, including temperature, light, humidity, pest control and stock organisation 1.2 Determine store requirements against specified stock levels 1.3 Replenish stores and stationery items

	1.4 Rotate perishable stock according to use-by dates 1.5 Report deviations to supervisor according to organisation procedures
2. Prepare order lists and forward stock	2.1 Complete accurate inventory list of stock requirements 2.2 Record stock requirements and order number in ordering system and prepare order 2.3 Obtain authorisation for order from supervisor and forward to appropriate department 2.4 Update inventory list based on stock usage and inventory change
3. Receive and store goods	3.1 Receive and check stock against order and record received stock in the order book 3.2 Notify supervisor if received order is inaccurate or incomplete 3.3 Unpack stock and store in the designated <i>location</i>

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- completed at least 2 inventory lists of stock requirements and prepared associated orders on 2 separate occasions
- received, checked and ordered stock against 2 separate orders, including unpacking, storing and reporting errors to supervisor.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- relevant organisation procedures, including:
 - workplace health and safety (WHS)
 - manual handling
 - personal protective equipment
 - stock control and maintenance, including:
 - inventory taking
 - verbal, written and electronic ordering
 - expiry dates on perishable items
 - storage and stock rotation
 - manual and electronic documentation and records.

Assessment Conditions

Skills must have been demonstrated in a workplace or a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities equipment and resources, including:
 - stock and storage facilities
 - personal protective equipment

- manual and electronic documentation and records for stock maintenance
- modelling of industry operating conditions.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTHSS006 Collect and manage linen stock at user-location

Modification History

N/A

Application

This unit describes the skills and knowledge required to collect soiled linen from user-locations, deliver soiled linen to a designated holding area, distribute clean linen and maintain economic linen stock levels at user-locations.

This unit applies to health or community service roles involving laundry service. At this level workers perform under supervision and generally within a team environment within predetermined guidelines.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for HLTHSS006 Collect and manage linen stock at user-location

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed organisation procedures to:
 - collect soiled linen from at least 3 user-locations and transport to designated holding location
 - respond to at least 1 accident relating to handling soiled linen that involved a sharp injury
 - distribute clean linen to at least 3 user-locations including maintaining stock levels.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- types of linen and individual uses
- delivery and collection timetables
- organisation policies and procedures relating to linen
- relevant workplace health and safety (WHS) legislation and requirements of role, including:
 - manual handling
 - infection control
 - sharps handling
 - personal protective equipment
 - incident and accident reporting
- hazards associated with linen handling, including:
 - exposure to heat
 - sharp objects
 - potentially infectious linen

- sharps
- foreign objects.

Assessment Conditions

Skills must have been demonstrated in a workplace or a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities equipment and resources, including:
 - linen stock, user-locations and storage facilities
 - linen equipment, including trolleys, bags, baskets and bins
 - personal protective equipment
 - collection and distribution procedures, including WHS
 - inventory management procedures and documentation
- modelling of industry operating conditions.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes.</i>	<i>Performance criteria specify the level of performance needed to demonstrate achievement of the element.</i>
1. Follow workplace requirements and relevant legislation to prepare for handling and storage of medical gas and equipment	1.1 Read work sheets to determine medical gas handling requirements

	1.2 Select equipment required for medical gas handling appropriate for the size of cylinder and work tasks 1.3 Organise and set up work areas to ensure safe, effective and efficient handling of medical gas equipment 1.4 Inspect <i>medical gas equipment</i> to ensure cleanliness of all components, including yoke, manifold or regulator 1.5 Identify potential medical gas <i>hazards</i> to work and manage associated risks according to job requirements 1.6 Report and document identified hazards and risks 1.7 Select emergency and <i>personal protective equipment</i> and fit in accordance with manufacturer specifications 1.8 Fit and test bottles and regulators
2. Follow workplace procedures and legislative requirements to handle medical gas equipment	2.1 Use personal protective equipment and recommended precautions when handling medical gas equipment 2.2 Confirm only trained and authorised personnel are involved in handling medical gas equipment 2.3 Handle medical gas cylinders and related equipment with care and position according to manufacturer recommendations 2.4 Select appropriate trolley size and type for the movement of cylinders 2.5 Restrain cylinders for transport 2.6 Select appropriate regulators for use with cylinder 2.7 Close valves prior to transport 2.8 Close cylinder valves and release regulator pressure after use 2.9 Monitor gas pipeline and manifold systems 2.10 Replace empty bottles and banks as soon as exhausted 2.11 Open cylinder valves on manifold banks in accordance with manufacturer guidelines and

	organisation requirements and whether they are manual or automatic
3. Follow workplace procedures and legislative requirements for storing medical gas cylinders and equipment	3.1 Store all cylinders and equipment in appropriate storage locations in accordance with manufacturer recommendations 3.2 Store cylinders away from combustible material 3.3 Use cylinder stock on a rotational system and keep full and empty cylinders separate 3.4 Protect cylinders from cold and heat 3.5 Close and secure storage area 3.6 Display clearly visible signage outside medical gas storage area

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- prepared, handled and stored medical gas cylinders and equipment in accordance with workplace requirements on 3 separate occasions
- identified at least 2 actual or potential hazards associated with medical gas and followed workplace and role requirements to address risks.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- relevant industry standards and legislation for storage and handling of gases in cylinders
- workplace requirements and policies for storage and handling of gases in cylinders
- potential risks and hazards to gas equipment use and associated precautions and workplace health and safety (WHS) requirements
- personal protective equipment
- emergency response procedures
- transportation requirements and equipment
- cylinder identification
- gas types.

Assessment Conditions

Skills must have been demonstrated in a workplace or a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities equipment and resources, including:
 - medical gas equipment
 - emergency and personal protective equipment

- work sheets
- modelling of industry operating conditions, including:
 - a supervisor to whom the candidate reports.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTHSS008 Perform routine servicing of plant, equipment and machinery

Modification History

N/A

Application

This unit describes the skills and knowledge required to regularly service plant, equipment and machinery in accordance with maintenance schedules.

This unit applies to workers with well-developed skills where some discretion and judgement is required. Individuals will take responsibility for their own outputs within clearly defined guidelines and may participate in supervised work teams.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes.</i>	<i>Performance criteria specify the level of performance needed to demonstrate achievement of the element.</i>
1. Carry out routine assessment of plant, equipment and machinery	1.1 Identify service requirements of plant, equipment and machinery according to organisation requirements and manufacturers' guidelines

	1.2 Identify potential repair and replacement requirements of plant, equipment and machinery according to organisation requirements and manufacturer guidelines
2. Prepare for routine servicing and/or minor repairs	2.1 Identify and use required personal protective equipment 2.2 Prepare tools, equipment, parts and materials required to undertake the task 2.3 Read maintenance manuals and documented servicing routines to determine requirements 2.4 Prepare the area required to undertake the task
3. Perform routine servicing and minor repairs	3.1 Service and/or repair plant, equipment and machinery according to maintenance manuals, manufacturer guidelines, enterprise procedures and workplace health and safety (WHS) practices 3.2 Inform <i>appropriate person/s</i> upon completion of the task and complete the maintenance record 3.3 Advise appropriate person/s of faults and major repair and replacement requirements

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTHSS008 Perform routine servicing of plant, equipment and machinery

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed correct procedures when performing routine servicing and minor repairs of at least 3 different examples of plant, equipment or machinery, including:
 - identifying and addressing faults
 - selecting and using correct tools and equipment
 - following workplace health and safety (WHS) procedures
 - selecting and using correct personal protective equipment.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- organisation plant, equipment and machinery to be serviced and repaired
- organisation maintenance and reporting procedures
- amount of time required to complete routine servicing of plant, equipment and machinery
- WHS policies and procedures
- identification of plant, equipment and machinery faults and problems that will require reference to a tradesperson
- purpose and procedure of common routine servicing tasks, including:
 - cleaning or changing filters
 - adjustments and calibrations
 - checking for wear
 - lubrication
 - checking fluid levels and adding fluids
 - cleaning .

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities equipment and resources, including:
 - personal protective equipment
 - maintenance manuals and procedures
 - manufacturer instructions for plant, equipment and machinery being maintained
 - suitable work area that includes examples of plant, equipment and machinery
 - hand and power tools appropriate to the maintenance tasks in the organisation and to the worker's role
- modelling of industry operating conditions.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTINF001 Comply with infection prevention and control policies and procedures

Modification History

N/A

Application

This unit describes the skills and knowledge required to follow organisational infection prevention and control procedures, including implementing standard and transmission-based precautions and responding to infection risks.

This unit applies to individuals working in health and direct client care contexts.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element</i>
1. Follow standard and additional precautions for infection prevention and control	1.1 Follow hand hygiene practices in accordance with organisations policies and procedures 1.2 Implement hand care procedures and cover cuts and abrasions

	1.3 Follow organisation procedures for choice and use of personal protection equipment 1.4 Follow procedures for respiratory hygiene and cough etiquette 1.5 Follow procedures for environmental cleaning 1.6 Follow procedures for handling, transporting and processing of linen in a manner that controls the spread of infection 1.7 Follow procedures for disposal of contaminated waste 1.8 Follow procedures for handling and cleaning client equipment that prevents skin and mucous membrane exposures, contamination of clothing, and transfer of pathogens 1.9 Identify and respond to situations where additional precautions may be required to prevent transmission of infection
2. Identify infection hazards and assess risks	2.1 Identify infection hazards associated with own role and work environment 2.2 Identify own areas of responsibility in relation to infection prevention and control 2.3 Assess risk by determining the likelihood and severity of harm from identified hazards. 2.4 Document and report activities and tasks that put self, clients, visitors and/or other workers at risk 2.5 Identify appropriate control measures to minimise risk in accordance with organisations procedures
3. Follow procedures for managing risks associated with specific hazards	3.1 Follow protocols for care after exposure to blood or other body fluids as required 3.2 Place appropriate signs when and where appropriate 3.3 Remove spills in accordance with the policies and procedures of the organisation 3.4 Minimise contamination of materials, equipment and instruments by aerosols and splatter 3.5 Identify, separate and maintain clean and contaminated zones

	3.6 Confine records, materials and medicaments to a well-designated clean zone 3.7 Confine contaminated instruments and equipment to a well-designated contaminated zone

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTINF001 Comply with infection prevention and control policies and procedures

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed established organisation infection prevention and control procedures on at least 3 separate occasions
- followed established organisation infection prevention and control procedures at least once for each of the following:
 - hand hygiene and care of hand
 - use of personal protective equipment
 - handling of waste
 - enforcing clean and contaminated zones
 - limitation of contamination
 - surface cleaning

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- established guidelines for the prevention and control of infection, including those for:
 - personal and hand hygiene:
 - how to hand wash
 - how to hand rub
 - pre-surgical hand preparation
 - clinical moments when hand hygiene should be performed with soap and water rather than alcohol-based hand rub
 - non-clinical moments for hand hygiene hand care, including guidelines on maintaining intact skin, fingernails and jewellery/watches
 - use and scope of personal protective equipment guidelines for:
 - glove use

- wearing gowns and waterproof aprons
 - wearing masks
 - wearing protective glasses
- surface cleaning:
 - cleaning procedures and their specified times
 - routine surface cleaning
- managing a blood or body fluid spill
- sharps handling and disposal techniques
- reprocessing procedures for equipment
- types of additional precautions and their relevance to particular areas of work or client groups
- types of hazards in the work environment and associated risks and control measures
- chain of infection:
 - source of infectious agent
 - mode of transmission
 - susceptible host
- basis of infection, including:
 - bacteria and bacterial spores
 - difference between harmless microorganisms and pathogens
 - difference between colonisation, infection and disease
 - fungi
 - viruses
- key modes of disease transmission – contact, airborne and droplet:
 - paths of transmission including direct contact, aerosols and penetrating injuries
 - risk of acquisition
 - sources of infecting microorganisms including persons who are carriers, in the incubation phase of the disease or those who are acutely ill
- factors that increase the susceptibility to infection:
 - immune status
 - wounds or devices
 - medications and comorbidities
 - age

Assessment Conditions

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations have not been provided in the workplace or may occur only rarely.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - organisational infection prevention and control guidelines
 - personal protective equipment
 - hand hygiene facilities and equipment
 - medical or client care equipment relevant to the workplace
 - clinical and other waste and waste disposal equipment
 - areas for cleaning
 - equipment for cleaning, including sterilised sharps if relevant to role
- modelling of industry operating conditions, including integration of problem solving activities to which the candidate responds

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Link

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTINF002 Process reusable medical devices and equipment

Modification History

N/A

Application

This unit describes the skills and knowledge required to clean, sterilise and package reusable medical devices and equipment.

This unit applies to workers in office based health practice settings such as general practitioner (GP) surgeries, dental practices and other environments where a limited range of sterilisation equipment may be available. They follow established procedures and work under general supervision.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element</i>
1. Prepare to clean used items	1.1 Follow safe work practices and infection prevention and control in accordance with legislative and workplace guidelines

	1.2 Sort reusable medical devices and safely dispose of single use devices 1.3 Segregate and dispose of waste according to organisation and legislative requirements 1.4 Disassemble reusable medical devices and equipment for cleaning and disinfection according to manufacturer's instructions
2. Clean and dry used items	2.1 Maintain work flow protocols in reprocessing area 2.2 Interpret safety data sheet (SDS) and select required cleaning products 2.3 Select cleaning processes based on manufacturer's recommendations and evaluation of reusable medical devices construction and composition 2.4 Use cleaning methods that avoid the generation of aerosols 2.5 Make accurate calculations for the preparation of cleaning chemicals 2.6 Dry and inspect reusable medical devices for cleanliness and damage
3. Prepare and pack items for sterilisation	3.1 Open and unlock reusable medical devices with hinges or ratchets 3.2 Prepare instrument trays in accordance with workplace protocols 3.3 Package or wrap reusable medical devices in a manner that prevents damage to delicate items 3.4 Use chemical indicator according to standards 3.5 Pack, secure and label sterile barrier systems (SBS) to comply with aseptic removal principles
4. Sterilise loads	4.1 Interpret and apply manufacturer recommendations for cleaning and checking of steriliser and accessory equipment. 4.2 Correctly use the numerical and other features of the steriliser and operate in accordance with manufacturer instructions 4.3 Assign cycle and batch control number and complete documentation.

	4.4 Load steriliser to ensure sterilant contact and according to standards 4.5 Remove sterilised load immediately on completion of cycle 4.6 Follow criteria for release of processed items considering manual task risk factors
5. Comply with quality management requirements	5.1 Interpret and adhere to operational monitoring and testing, performance qualification and maintenance of sterilisers and associated equipment 5.2 Comply with documentation requirements for sterilisation cycles, batch control and load release 5.3 Report and document all steriliser faults, malfunction and load non-conformance 5.4 Store documentation in accordance with organisation procedures

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.	

Range of conditions

No conditions apply to this unit of competency at the time of publication.

		Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Removed prerequisite.	

Assessment Requirements for HLTINF002 Process reusable medical devices and equipment

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed organisation procedures, work processes, safe manual handling requirements and national standards for the reprocessing of reusable medical devices on at least 3 occasions
- operated and monitored reprocessing equipment on at least 1 occasion
- identified and responded to routine process and maintenance problems and variations

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- roles and responsibilities of those involved in reprocessing in different health contexts
- safe work practices, standard precautions and organisation protocols for the reprocessing and storage of reusable medical devices
- risk factors associated with manual tasks and safe manual handling techniques
- key aspects of Spauldings classification
- safe work practices and standard precautions when handling and disposing of sharps
- manual instrument cleaning techniques
- procedures for use of:
 - steam sterilisers
 - thermal washer-disinfector
 - water and air pressure guns
 - automated lubrication device
 - drying cabinet
 - hermetic heat sealers

Assessment Conditions

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations have not been provided in the workplace or may occur only rarely.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - infection control policies and procedures
 - soiled re-usable medical devices
 - operational cleaning and sterilising equipment
 - safety data sheets
 - manufacturer instructions
- modelling of industry operating conditions, including:
 - presence of time constraints for activities
 - presence of situations requiring problem solving

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTINF003 Implement and monitor infection prevention and control policies and procedures

Modification History

N/A

Application

This unit describes the skills and knowledge required to provide information about infection prevention and control procedures, integrate those procedures into work practices and monitor workplace performance.

This unit applies to individuals working in health or direct client care contexts, who have a coordination, team leading or supervisory responsibility in relation to infection prevention and control.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element</i>
1. Provide information about infection prevention and control policies and procedures	1.1 Explain correct and current infection prevention and control information clearly to the work group

	1.2 Regularly provide information about identified hazards and the outcomes of infection risk assessments 1.3 Provide opportunities for the work group to seek further information on workplace infection prevention and control issues and practices 1.4 Adapt communication to the needs of different workers
2. Integrate infection prevention and control policy and procedure into work practices	2.1 Implement infection prevention and control policy and procedures with members of the work group 2.2 Maintain liaison with person responsible for organisation-wide infection prevention and control 2.3 Provide coaching and support as required to ensure that individuals or teams are able to implement infection prevention and control practices 2.4 Adopt work procedures to reflect appropriate infection prevention and control practice 2.5 Promptly resolve issues raised through consultation or refer to the appropriate personnel 2.6 Implement workplace procedures for dealing with infection prevention and control risks and hazardous events 2.7 Encourage colleagues to report infection risks and to improve infection prevention and control procedures
3. Monitor infection prevention and control procedures performance and implement improvements in practices	3.1 Promptly investigate infectious hazardous events to identify their cause in accordance with organisation policy and procedure 3.2 Monitor work procedures to control infection risks 3.3 Regularly review and adjust work procedures to improve infection prevention and control practice 3.4 Provide feedback to colleagues on compliance issues, changes in work procedures and infection prevention and control outcomes

	3.5 Identify and respond to inadequacies in work procedures and infection prevention and control measures or report to designated personnel 3.6 Maintain accurate records of infection prevention and control risks and incidents as required 3.7 Use aggregate infection prevention and control information reports to identify hazards, to monitor and improve risk control methods and to indicate training needs 3.8 Document, report and investigate potential breaches of infection prevention and control in accordance with organisation procedures

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTINF003 Implement and monitor infection prevention and control policies and procedures

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- implemented and monitored infection prevention and control policy and procedures for at least 1 work area and at least 1 team of workers, incorporating:
 - hand hygiene and hand care
 - use of personal protective equipment
 - surface cleaning
 - waste management
 - handling of potentially infectious material
 - hazard identification and risk assessment and management

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- key features of infection prevention and control regulation and guidelines:
 - Australian standards
 - government guidelines
 - manufacturer documentation
- management and work processes used to control infection:
 - assessment
 - monitoring
 - reporting processes and hierarchies
 - training requirements
- standard and additional infection prevention and control precautions, including:
 - personal hygiene
 - use of personal protective equipment

- surface cleaning
 - handling of potentially infectious material
- key aspects of communicable disease transmission and their relationship to different work processes
- infection risks and control measures specific to work area and related work processes
- hierarchy of risk control measures from most to least preferred:
 - elimination
 - engineering controls
 - administrative control
 - personal protective equipment

Assessment Conditions

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations have not been provided in the workplace or may occur only rarely.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - organisational infection prevention and control policies and procedures
 - personal protective equipment
 - hand washing facilities and equipment
 - medical or client care equipment relevant to the workplace
 - clinical and other waste
 - areas for cleaning
- modelling of industry operating conditions, including:
 - interaction with a team
 - presence of real or simulated risks, hazards and infection prevention and control problems to which the candidate responds

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTINF004 Manage the prevention and control of infection

Modification History

N/A

Application

This unit describes the skills and knowledge required to develop, implement and monitor infection prevention and control systems and procedures in work contexts where health and personal care services are provided.

This unit applies to people working in roles with managerial responsibilities for infection prevention and control in small to medium sized organisations. There may or may not be a team of workers involved.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element</i>
1. Establish framework for infection prevention and control	1.1 Access and interpret legislation, regulations and codes of practice for infection prevention and control 1.2 Collate and evaluate information on workplace requirements for infection prevention and control

	1.3 Evaluate current policies, systems and procedures for compliance and quality 1.4 Consult with relevant colleagues on infection prevention and control issues and requirements 1.5 Develop and document infection prevention and control systems and procedures, including record keeping and reporting systems 1.6 Define and allocate infection prevention and control responsibilities
2. Establish procedures for hazard identification and risk control	2.1 Establish hazard identification and risk assessment tools 2.2 Develop workplace processes for risk control 2.3 Ensure risk controls and hazard specific procedures are consistent with the hierarchy of control 2.4 Put in place incident reporting and investigation procedures 2.5 Document hazard identification and risk assessment systems and procedures
3. Implement and monitor infection prevention and control practices	3.1 Communicate infection prevention and control systems, procedures and responsibilities to relevant colleagues 3.2 Support implementation by facilitating resources and training 3.3 Monitor day to day effectiveness of infection prevention and control procedures and address issues of concern
4. Evaluate infection prevention and control performance	4.1 Assess infection prevention and control systems against compliance requirements 4.2 Review incidents as key sources of information 4.3 Seek feedback on systems and procedures from relevant colleagues 4.4 Identify and action improvements to systems and procedures

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTINF004 Manage the prevention and control of infection

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- developed compliant infection prevention and control systems and procedures for at least 1 work environment:
 - accessed and analysed compliance and workplace information
 - developed and documented systems and procedures for:
 - hazard identification and risk control
 - personal hygiene
 - use of personal protective equipment
 - handling and transport of potentially infectious material
 - limitation of contamination
 - cleaning and maintenance
 - communicated responsibilities to relevant people
- monitored infection prevention and control systems and procedures for at least 1 work environment and responded to problems

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- key features of infection prevention and control regulation and guidelines and compliance requirements:
 - Australian standards
 - government guidelines
 - manufacturer documentation
- principles and processes of planning
- systems and procedures needed to meet compliance and quality requirements for infection prevention and control:

- work processes and precautions
 - hazard identification and risk control
 - monitoring and evaluation
 - reporting processes and hierarchies
 - training requirements
- links between infection prevention and control systems and other management systems:
 - work health and safety
 - work organisation
 - human resource management
- for the specific work environment:
 - ways the infections are spread
 - types of hazards and risks
 - control methods
- sustainability considerations for development of infection prevention and control systems and procedures

Assessment Conditions

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations have not been provided in the workplace or may occur only rarely.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - facilities and equipment used in the candidate's place or intended place of work
 - current infection prevention and control regulations and standards
- modelling of industry operating conditions, including presence of real or simulated risks and hazards to which the candidate responds

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTINF005 Maintain infection prevention for skin penetration treatments

Modification History

N/A

Application

This unit describes the performance outcomes, skills and knowledge required to maintain infection prevention during skin penetration treatments and to review clinic compliance with the applicable state or territory and local council requirements.

It requires the ability to identify, manage and control infection risks to clients, self and work colleagues.

This unit applies to individuals who make independent treatment decisions.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes.</i>	<i>Performance criteria specify the level of performance needed to demonstrate achievement of the element.</i>
1. Comply with infection control regulations and guidelines and related legal obligations.	1.1 Identify federal, state or territory, and local standards, regulations and guidelines that apply to beauty treatments and skin penetration procedures

	1.2 Review organisational infection control policy and procedures for compliance 1.3 Identify infection control risks for skin penetration treatments 1.4 Monitor workplace for potential infection control risks
2. Monitor hygiene of premises.	2.1 Observe workplace to ensure surfaces and equipment are cleaned and disinfected 2.2 Clean and disinfect non-penetrating instruments and articles 2.3 Monitor removal and disposal of contaminated material 2.4 Monitor handling and disposal of sharps and the cleaning of blood or body fluid spills 2.5 Check dilution rates, use and storage of cleaning products 2.6 Monitor storage of cleaning and treatment equipment 2.7 Provide clean linen or single use, disposable coverings for each treatment 2.8 Place soiled linen and protective clothing in a suitable receptacle. 2.9 Clean and disinfect work area after treatment
3. Maintain infection control for skin penetration treatments.	3.1 Maintain personal protection using standard and additional precautions for client contact as required 3.2 Provide single use, disposable and clean instruments where possible for each treatment 3.3 Ensure instruments, equipment or other items intended to penetrate the skin or be used on mucous membranes are sterile at time of use 3.4 Follow skin preparation procedures to minimise risk of transmission 3.5 Immediately dispose of single-use items and waste in appropriate containers 3.6 Separate, remove, clean and sterilise potentially contaminated items according to organisation infection control policy and procedure

4. Sterilise equipment and maintain steriliser.	4.1 Ensure work flows from dirty zone to clean zone 4.2 Clean and dry items to be sterilised 4.3 Load steriliser and set steriliser cycle according to manufacturer instructions and Australian standard. 4.4 Unload packages, inspect for sterilising, validate and record details according to manufacturer instructions and Australian standards 4.5 Store sterile items correctly to prevent contamination 4.6 Monitor the sterilising process 4.7 Inspect and clean steriliser and steriliser trays according to manufacturer guidelines and Australian standard
5. Maintain awareness of clinic design for control of infection risks.	5.1 Identify aspects of the design of premises, surfaces, fixtures and fittings that minimise risk of transmission of infection 5.2 Arrange cleaning area to ensure the separation of dirty and clean items and work flow is from dirty to clean to sterile. 5.3 Clean cleaning and sterilising area according to organisational policy and procedures.

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance .

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.	

Assessment Requirements for HLTINF005 Maintain infection prevention for skin penetration treatments

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- integrated the maintenance of infection control with skin penetration technical skills that individually or in combination demonstrate:
 - identification of potential cross contamination risks, protecting self and client from infection risks
 - choosing and using appropriate cleaning, disinfection and sterilising procedures for instruments, equipment and equipment attachments and work surfaces
 - use of correct steriliser operation procedures:
 - packaging of items
 - loading
 - monitoring
 - validation
 - calibration
 - documentation requirements
 - disposing of waste and sharps
- provided a written review of workplace compliance with relevant state or territory and local council laws, regulations and requirements for skin penetration treatments.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- Australian standards AS/NZS4815 and 4187 relating to infection control in office based health care facilities
- relevant state or territory legislation and guidelines relating to infection control procedures for skin penetration treatments
- local council requirements for businesses offering skin penetration treatments

- organisational policy and procedures relating to infection control
- legal responsibilities in relation to infection control, sterilising, registration or business licensing, conduct of occupation, and maintenance of premises relevant to role
- standard and additional precautions as defined by the National Health and Medical Research Council (NHMRC)
- industry codes of practice
- aetiology of infection
- sources of infection and means of transmission
- risk management in relation to infection control
- procedures and practices that support infection control measures and prevent infection transmission
- cleaning, disinfection and sterilising procedures
- procedures for responding to spills
- needle stick or sharps injury procedures for notification and response
- impact of premises layout and workflow on infection control risks
- manufacturer instructions in relation to cleaning, disinfecting and sterilising equipment and products
- risk management process for identifying treatment infection control risks
- workplace infection control risks.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - clinical and other waste and waste disposal equipment
 - equipment for cleaning, including sterilised sharps if relevant to role
 - hand hygiene facilities and equipment
 - medical or client care equipment relevant to the workplace
 - organisational infection prevention and control policies and procedures
 - personal protective equipment
 - WHS procedures
- modelling of industry operating conditions, including integration of problem solving activities to which the candidate responds

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Link

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTINFCOV001 Comply with infection prevention and control policies and procedures

Modification History

N/A

Application

This unit describes the skills and knowledge required to follow organisational infection prevention and control procedures, including implementing standard and transmission-based precautions and responding to infection risks.

This unit applies to individuals working in health and direct client care contexts.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element</i>
1. Follow standard and additional precautions for infection prevention and control	1.1 Follow hand hygiene practices in accordance with organisations policies and procedures 1.2 Implement hand care procedures and cover cuts and abrasions

	1.3 Follow organisation procedures for choice and use of personal protection equipment 1.4 Follow procedures for respiratory hygiene and cough etiquette 1.5 Follow procedures for environmental cleaning 1.6 Follow procedures for handling, transporting and processing of linen in a manner that controls the spread of infection 1.7 Follow procedures for disposal of contaminated waste 1.8 Follow procedures for handling and cleaning client equipment that prevents skin and mucous membrane exposures, contamination of clothing, and transfer of pathogens 1.9 Identify and respond to situations where additional precautions may be required to prevent transmission of infection
2. Identify infection hazards and assess risks	2.1 Identify infection hazards associated with own role and work environment 2.2 Identify own areas of responsibility in relation to infection prevention and control 2.3 Assess risk by determining the likelihood and severity of harm from identified hazards. 2.4 Document and report activities and tasks that put self, clients, visitors and/or other workers at risk 2.5 Identify appropriate control measures to minimise risk in accordance with organisations procedures
3. Follow procedures for managing risks associated with specific hazards	3.1 Follow protocols for care after exposure to blood or other body fluids as required 3.2 Place appropriate signs when and where appropriate 3.3 Remove spills in accordance with the policies and procedures of the organisation 3.4 Minimise contamination of materials, equipment and instruments by aerosols and splatter 3.5 Identify, separate and maintain clean and contaminated zones

	3.6 Confine records, materials and medicaments to a well-designated clean zone 3.7 Confine contaminated instruments and equipment to a well-designated contaminated zone

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Unit Mapping Information

Current Code and Title	Previous Code and Title	Comments	Equivalence
HLTINFCOV001 Comply with infection prevention and control policies and procedures		This unit has been created to address a skill or task required by industry that is not covered by an existing unit of competency	Newly created

Assessment Requirements for HLTINFCOV001 Comply with infection prevention and control policies and procedures

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed established organisation infection prevention and control procedures on at least 3 separate occasions
- followed established organisation infection prevention and control procedures at least once for each of the following:
 - hand hygiene and care of hand
 - use of personal protective equipment
 - handling of waste
 - enforcing clean and contaminated zones
 - limitation of contamination
 - surface cleaning

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- established guidelines for the prevention and control of infection, including those for:
 - personal and hand hygiene:
 - how to hand wash
 - how to hand rub
 - pre-surgical hand preparation
 - clinical moments when hand hygiene should be performed with soap and water rather than alcohol-based hand rub
 - non-clinical moments for hand hygiene hand care, including guidelines on maintaining intact skin, fingernails and jewellery/watches
 - use and scope of personal protective equipment guidelines for:
 - glove use

- wearing gowns and waterproof aprons
 - wearing masks
 - wearing protective glasses
- surface cleaning:
 - cleaning procedures and their specified times
 - routine surface cleaning
- managing a blood or body fluid spill
- sharps handling and disposal techniques
- reprocessing procedures for equipment
- types of additional precautions and their relevance to particular areas of work or client groups
- types of hazards in the work environment and associated risks and control measures
- chain of infection:
 - source of infectious agent
 - mode of transmission
 - susceptible host
- basis of infection, including:
 - bacteria and bacterial spores
 - difference between harmless microorganisms and pathogens
 - difference between colonisation, infection and disease
 - fungi
 - viruses
- key modes of disease transmission – contact, airborne and droplet:
 - paths of transmission including direct contact, aerosols and penetrating injuries
 - risk of acquisition
 - sources of infecting microorganisms including persons who are carriers, in the incubation phase of the disease or those who are acutely ill
- factors that increase the susceptibility to infection:
 - immune status
 - wounds or devices
 - medications and comorbidities
 - age

Assessment Conditions

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations have not been provided in the workplace or may occur only rarely.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - organisational infection prevention and control guidelines
 - personal protective equipment
 - hand hygiene facilities and equipment
 - medical or client care equipment relevant to the workplace
 - clinical and other waste and waste disposal equipment
 - areas for cleaning
 - equipment for cleaning, including sterilised sharps if relevant to role
- modelling of industry operating conditions, including integration of problem solving activities to which the candidate responds

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTKIN001 Develop kinesiology practice

Modification History

N/A

Application

This unit describes the skills and knowledge required to establish the foundations of kinesiology practice, evaluate what makes a sustainable practice and then to develop an approach to own practice.

This unit applies to kinesiologists and other practitioners who may use kinesiology as an adjunct to another complementary or allied health modality.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Establish foundations of kinesiology practice	1.1 Identify, access and interpret information about the central philosophies of kinesiology practice 1.2 Evaluate the kinesiology system of healing in relation to its application to current health issues

	1.3 Compare and contrast kinesiology, other complementary health modalities and broader health practice
2. Represent the kinesiology framework	2.1 Determine information needs of different individuals and groups 2.2 Identify key messages that represent the philosophy and practice of kinesiology 2.3 Communicate information about kinesiology at a level of depth appropriate to audience needs
3. Determine requirements for sustainable kinesiology practice	3.1 Identify key issues that affect the development and sustainability of professional practice 3.2 Identify economic, environmental, human and social considerations and their impact on professional practice 3.3 Establish a personal health strategy that supports kinesiology practice 3.4 Access, interpret and collate current information that supports kinesiology best practice
4. Develop approach to own practice	4.1 Reflect on professional goals and aspirations 4.2 Identify and assess professional opportunities in kinesiology 4.3 Consider the opportunities and constraints of individual personal circumstances 4.4 Make decisions about practice direction, based on reflection and research 4.5 Develop practical strategies that address own practice goals

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Unit Mapping Information

HLTKIN001 Develop kinesiology practice	HLTKIN401C Work within a kinesiology framework	This version was released in HLT Health Training Package release 2.0 and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.	Not equivalent

Assessment Requirements for HLTKIN001 Develop kinesiology practice

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- used critical thinking skills to:
 - review and reflect on information from a range of sources about kinesiology practice
 - evaluate and articulate requirements for sustainable kinesiology practice
- communicated key messages about kinesiology to meet the information needs of at least 3 different individuals or groups
- developed goals for own practice that reflect the values and philosophies of kinesiology

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- philosophies and principles of kinesiology:
 - historical development of kinesiology – its origin and the different modalities upon which kinesiology is based
 - central philosophies and principles, including the model of self responsibility
 - the kinesiology approach to client assessment
 - balancing techniques used in kinesiology
 - the role of muscle monitoring in providing neurological feedback from the client
 - concept of energetic balance
- types of imbalance commonly addressed through kinesiology:
 - muscle imbalances
 - physical pain
 - stress – physical, mental, emotional

- structural deviations
 - energetic/vibrational imbalances
 - learning challenges
 - nutritional/biochemical imbalances
 - sensitivities
 - performance below desired levels
- key features of complementary therapies used in conjunction with kinesiology
 - naturopathy
 - reflexology
 - Traditional Chinese Medicine
 - remedial massage
- key features of allied health services and their relationship to kinesiology, including:
 - physiotherapy
 - chiropractic
 - osteopathy
 - counselling
- place of kinesiology practice in the broader health care system
- features and differences of allopathic and natural medicine approaches to health
- professional kinesiology networks and industry bodies
- different models of professional kinesiology practice and their key features:
 - sole practitioners
 - employment opportunities in multi-modality centres
- components of sustainable practice:
 - economic – opportunities and viability
 - environmental
 - human – personal health and professional development
 - social responsibility
- factors for consideration in maintaining personal health for kinesiology practice, including:
 - the need to maintain own energetic awareness and balance
 - techniques for working with own breathing
- legal and ethical considerations (national and state/territory) and how these are applied in individual practice:
 - children in the workplace

- codes of conduct
- continuing professional education
- discrimination
- dignity of risk
- duty of care
- human rights
- informed consent
- insurance requirements
- mandatory reporting
- practitioner/client boundaries
- privacy, confidentiality and disclosure
- records management
- work role boundaries – responsibilities and limitations
- work health and safety

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must:

- have current clinical experience working as a kinesiologist providing services to the general public
- hold practising membership of an Australian professional body that represents kinesiologists
- fulfil the continuing professional development requirements of the professional body to which they belong

HLTKIN002 Conduct indicator muscle monitoring

Modification History

N/A

Application

This unit describes the skills and knowledge required to monitor neurological feedback from the body using manual muscle monitoring. It requires the ability to prepare self and client, gain consent, establish indicator muscles, make pre-checks and to integrate both client and practitioner perspectives in indicator muscle monitoring to determine imbalances. This skill is the fundamental tool used in kinesiology. The use of self-testing, where the practitioner tests themselves on behalf of the client, falls outside of the scope of this unit.

This unit applies to complementary and allied health practitioners who use muscle monitoring within their practice. The practitioner may or may not be a kinesiologist.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare self and client for muscle monitoring	1.1 Provide accurate information to client about scope of muscle monitoring and the relationship between tester and the person being tested

	1.2 Establish client willingness from indicator muscle response, plus written and verbal consent 1.3 Complete checks on own readiness according to modality procedure
2. Establish indicator muscle	2.1 Place chosen indicator muscle into correct starting position and apply stabilisation that supports both client and practitioner 2.2 Demonstrate to client the direction in which pressure will be applied and the muscle's range of motion 2.3 Use clear verbal cues to ensure the client is ready for monitoring 2.4 Apply gentle progressive pressure appropriate to the muscle being monitored and the client's ability to respond 2.5 Use techniques that avoid muscle fatigue when specific muscle is subject to ongoing monitoring 2.6 Recognise muscle facilitation and inhibition and the relationship to different aspects of the prime mover 2.7 Use a level of pressure that allows for the indicator muscle response to be recognised, making judgments about rate and speed based on client responses and own experience 2.8 Request and observe feedback from the client regarding level of comfort 2.9 Modify monitoring method in light of client's feedback.
3. Apply muscle monitoring pre-checks	3.1 Identify and balance the muscle's ability to lock and unlock according to modality procedure 3.2 Identify and balance neurological disorganisation according to modality procedure 3.3 Check and balance energy function of central meridian for normal flow according to modality procedure 3.4 Check and balance hydration according to modality procedure 3.5 Check and balance ionisation according to modality procedure 3.6 Select and follow procedures for other modality specific pre-checks

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Unit Mapping Information

Current Code and Title	Previous Code and Title	Comments	Equivalence
HLTKIN002 Conduct indicator muscle monitoring		This unit has been created to address a skill or task required by industry that is not covered by an existing unit of competency	Newly created

Assessment Requirements for HLTKIN002 Conduct indicator muscle monitoring

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- conducted indicator muscle monitoring on at least 60 different people, including men, women, young people and elders, including:
 - demonstrated lock and unlock on indicator muscles
 - corrected muscle response when test produces unlock response
 - used indicator muscle monitoring for physical, emotional or biochemical challenges
 - used all limbs on both left and right side of the body with client in supine and prone positions
 - integrated information from practitioner and client perspectives, evidenced by:
 - use of appropriate level of pressure
 - nature of own posture
 - enhanced communication and connection with client
 - pace of monitoring
- had own muscles monitored by at least 10 different people

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- relationship between client and self:
 - as one circuit
 - importance of neutrality of tester
- terminology of muscle monitoring in kinesiology:
 - indicator/indicator change or lock/unlock not weak/strong
 - hold not resist
 - firm monitoring not strength testing

- factors that affect establishment of the indicator muscle response, including:
 - circuit locating
 - switching/overload
 - central and governing meridians
 - hydration
- neurological perspectives on the roles of conscious and subconscious aspects of muscle monitoring
- information from the practitioner's perspective that informs muscle monitoring, including:
 - mechanics of muscles:
 - prime movers
 - synergist, antagonists and fixator muscles
 - neurological circuits controlling muscle function - spinal reflexes
 - control of muscle proprioception - muscle spindle cells
 - golgi tendon apparatus
 - emotional/mental connectivity of muscles
 - biochemical connectivity of muscles
 - muscle recruitment of synergist or other muscles
- information from the client's perspective that informs muscle monitoring:
 - sensing of change between lock, unlock and vice versa
 - role of mental/emotional resource created by thoughts and feelings
 - importance of own experience of muscle monitoring to inform practice and the role experience plays in achieving consistent results
- differences between information from the practitioner and client perspectives
- ways to educate clients for awareness of indicator muscle responses
- kinesiology techniques to clear inhibited and over-facilitated muscles

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated clinical environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable, facilities, equipment and resources, including hand sanitiser and/ or hot running water for washing hands

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must:

- have at least 2 years current clinical experience working as a kinesiologist providing services to the general public
- hold practising membership of an Australian professional body that represents kinesiologists
- fulfil the continuing professional development requirements of the professional body to which they belong

Link

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine scope of client needs	1.1 Explore and clarify client expectations 1.2 Provide clear information about scope and limits of services to be provided 1.3 Recognise needs that are beyond scope of own practice and make referrals to other health care professionals

	1.4 Seek client information respectfully and sensitively, using purposeful, systematic and diplomatic questions 1.5 Identify and respond to any barriers to information gathering and assessment 1.6 Collect accurate, relevant and organised health record and document in a form which can be interpreted readily by other professionals 1.7 Manage information in a confidential and secure way according to records management legislative requirements
2. Use indicator muscle monitoring for assessment	2.1 Provide clear and accurate information about the muscle monitoring process and factors impacting effectiveness 2.2 Obtain client consent to proceed with assessment 2.3 Follow standard infection control procedures 2.4 Follow established modality protocols to physically prepare the client for muscle monitoring 2.5 Seek client feedback on comfort levels and maintain client dignity at all times 2.6 Use muscle monitoring to investigate physical, mental, emotional, nutritional, energetic, lifestyle and other appropriate contexts 2.7 Investigate causes of indicator muscle stress responses in a deliberate, logical and compassionate manner 2.8 Use questioning with client to gain further required information 2.9 Accurately record findings of muscle monitoring
3. Develop treatment plans	3.1 Correlate outcomes of muscle monitoring, other information gathered and case history 3.2 Read, interpret and integrate information and reports from other health professionals 3.3 Identify and respond to pre-requisites or contraindications to balancing. 3.4 Evaluate and respond to the physical, mental, emotional and lifestyle factors that contribute to successful treatment outcomes 3.5 Identify frequency, duration and possible sequencing of balances to address client needs

	3.6 Accurately document proposed treatment plan
4. Confirm treatment plan with client	4.1 Communicate with the client correlations between client history, current client presentation and kinesiology principles 4.2 Discuss with the client possible approaches to treatment based on assessment findings 4.3 Agree priorities and expectations in consultation with the client 4.4 Respond to client enquiries using language the client understands 4.5 Discuss referral and collaborative options with the client according to individual needs

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTKIN003 Perform kinesiology assessments

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 200 hours of kinesiology client consultation work
- prepared for and managed kinesiology sessions for at least 40 different people, 10 of whom must be seen at least 3 times. Clients must include males and females from different stages of life with varied presentations
- selected and used kinesiology assessment procedures according to modality
- collected and recorded information from the client's perspective during consultations relating to:
 - client history:
 - medical
 - surgical
 - family
 - personal
 - cultural
 - lifestyle
 - nutrition
 - goals
 - expectations
 - presenting issues, chief complaints and symptoms:
 - location
 - quality
 - quantity and severity
 - timing
 - onset
 - frequency

- duration
 - setting in which they occur
 - aggravating or relieving factors
- stress factors
- base line for comparison measurements - pain, energy levels, flexibility, postural stress
- collected and recorded information from the practitioner's perspective during consultations via all of the following:
 - muscle monitoring
 - static and dynamic postural observation
 - verbal and non-verbal communication congruency
 - weight, skin tone, hair lustre and other detected imbalances of the client and according to modality
 - lifestyle assessment
- interacted effectively with clients:
 - clearly articulated information about services, treatment options and rationale
 - engaged clients in decision making

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- scope and limitations of kinesiology
- legal and ethical considerations (national and state/territory) for client assessment and treatment planning:
 - codes of conduct
 - duty of care
 - informed consent
 - mandatory reporting
 - practitioner/client boundaries
 - privacy, confidentiality and disclosure
 - records management
 - work role boundaries:
 - working within scope of practice
 - presenting symptoms that require referral to a medical practitioner
 - work health and safety

- anatomy & physiology - structure and physiological function of all anatomical systems and regions of the body
- factors and barriers that may impact on assessment, including:
 - physical
 - emotional
 - cognitive
 - cultural
- factors that affect individual health status, including:
 - age
 - gender
 - constitution
 - lifestyle
 - diet
 - medications
 - alcohol and drugs
 - allergies
 - personal and medical history
 - values and attitudes
 - balance of rest and activity
 - physical environment
 - social environment
- client information required for assessment and the scope and depth of information needed around:
 - presenting condition - signs and symptoms
 - past health history - medical, surgical, family, personal and social
 - nutritional factors
 - whether other health professionals have been consulted for same presenting condition or other conditions and their remarks
- different ways that signs and symptoms of conditions present, including:
 - physical
 - emotional
 - cognitive
 - social
- kinesiology assessment techniques and considerations and how they are used, including:

- muscle monitoring
- techniques for assessment of:
 - gait
 - posture
 - motion
 - gross motor skills
 - comprehension
 - hydration
- regional/specific assessments
- contraindications to kinesiology balancing and how to respond, including:
 - unwillingness to accept self-responsibility model
 - client expectation of testing for medically determined pathology parameters
 - presence of infectious diseases suggested by fever, nausea and lethargy without receipt of diagnosis from medical practitioner
- referral options for practitioners:
 - professional health services including complementary health modalities
 - community resources and support services
- indicators for referral, including:
 - client expectation of treatment for named medical disease or condition
 - undiagnosed pain
 - infection or infectious diseases
 - undiagnosed lumps and tissue changes
 - unexplained inflammation
 - unexplained thirst
 - oedema
 - mood swings
 - bleeding and bruising
 - nausea, vomiting or diarrhoea
 - fever
 - sudden loss of weight
- factors that may impact on muscle monitoring and assessment, including:
 - age
 - allergies
 - constitution

- diet
 - energy capacity
 - environment – physical, social
 - gender
 - fragility
 - medications
 - nutritional status
 - fitness levels
 - lifestyle
 - personal and medical history
 - muscle monitoring pre-checks
 - use of alcohol or recreational drugs
 - values and attitudes
- the role and limitations of information and reports from other health professionals and how to establish whether the information can be used
- factors for consideration in developing a treatment plan:
 - knowledge of the effect kinesiology has or can have on a person
 - constitutional make up
 - interactions with other treatments
 - relevance of other medical information
 - pain levels
 - improvements from both client and practitioner perspectives
 - presenting issue status
- protocols for treatment plans that support reliable evidence in a consistent, sequential, measured and detailed manner

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated clinical environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - health assessment consultation forms
 - private consultation area
 - massage table/table and chair
 - reference manual
 - hand sanitiser and/or hot running water for washing hands

- modelling of industry operating conditions, including provision of services to the general public
- clinic supervision by a person who meets the assessor requirements outlined below for at least 50 of the 200 hours of client consultations. The remaining 150 hours may be completed under the guidance of a mentor. The mentor must either meet the assessor requirements outlined below or be registered with an Australian professional body that represents kinesiologists as a mentor.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must:

- have at least 2 years current clinical experience working as a kinesiologist providing services to the general public
- hold practising membership of an Australian professional body that represents kinesiologists
- fulfil the continuing professional development requirements of the professional body to which they belong

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare the client for kinesiology balance	1.1 Provide clear information about muscle monitoring and balancing and confirm understanding 1.2 Explain factors which may interfere with the effectiveness of the balance

	1.3 Inform the client of potential reactions during and following a session and the appropriate course of action to take 1.4 Explain to the client how the balancing process supports innate healing capacities and the role of the kinesiologist as the facilitator for that process
2. Identify priority issue through kinesiological enquiry	2.1 Identify priority issue based on client's expectations, review of data from assessment and the client treatment plan 2.2 Respond to client enquiries using language the client understands 2.3 Muscle monitor to confirm client's willingness and capacity for healing on the priority issue 2.4 Identify and record imbalances according to modality procedures and the client treatment plan 2.5 Identify and evaluate need for singular or multiple sessions based on outcomes of enquiry and client feedback
3. Apply balancing techniques through muscle monitoring	3.1 Identify balancing options and select relevant muscles using established modality protocols based on kinesiology enquiry and assessment indications 3.2 Use the condition and response of the client as a continual feedback to the initial assessment 3.3 Maintain client-focused attention throughout the session 3.4 Use appropriate correction techniques as indicated by muscle monitoring responses 3.5 Explain corrections and/or activities performed during the session to the client
4. Monitor and record progress of balancing	4.1 Monitor and evaluate effectiveness of all corrections 4.2 Recognise reactions to treatment and respond promptly if necessary 4.3 Continue applying corrections until the muscle monitoring process indicates that the balance is complete for this session or the agreed amount of time has passed/elapsed 4.4 Record client awareness relevant to issue on assessment record

	4.5 Compare baseline assessment and evaluate effectiveness of balance
5. Finalise the session	5.1 Educate client in relevant and practical techniques that support the balance 5.2 Answer client queries with clarity using appropriate language 5.3 Use honesty and integrity when explaining recommendations to the client 5.4 Request client to monitor reactions and to contact practitioner as required 5.5 Promote client independence and self-responsibility in treatment when appropriate 5.6 Accurately document details of information provided to client 5.7 Determine need for ongoing sessions in consultation with client

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 200 hours of kinesiology client consultation work
- prepared for and managed full contextual balances according to modality procedures for at least 40 different people, 10 of whom must be seen at least 3 times. Clients must include males and females from different stages of life with varied presentations
- demonstrated accurate muscle monitoring including the starting point, range of test, and the testing direction of at least 70 muscles, either individually or as part of a group, on at least 2 occasions per muscle or group. Muscles of the neck, shoulder, arm, trunk, hip and upper leg, lower leg and foot must be included
- used surrogate muscle balancing on at least 3 different muscles from 3 different regions of the body
- performed each of the following balancing techniques on at least 2 occasions:
 - general kinesiology techniques, including:
 - pre-checks for balancing: hydration, central and governing meridians, switching/overload
 - stress statements, goals and affirmations, including reactive stress process
 - use of scan lists
 - age recession using muscle monitoring
 - balancing via a surrogate
 - polarity
 - specific muscle balancing techniques, including:
 - proprioception: spindle cell mechanism and golgi tendon apparatus
 - reflexes including:
 - spinal
 - neurolymphatic
 - neurovascular

- surrogate muscle balancing
 - balancing unmonitorable muscles, tendons and ligaments
 - muscle stretch
 - repeated/sustained muscle imbalance
 - reactive muscle patterns
- structural balancing techniques, including:
 - posture analysis balancing
 - balancing regions of the physical body including the neck, lower back, upper back, pelvis, neck and jaw
 - joints, including the knee, hip, shoulder and temporomandibular joints (TMJ)
 - gait reflexes
 - righting reflexes or cloacals
 - cranial imbalances
 - structural deviations
- neurological balancing techniques, including:
 - central and governing meridian circuit
 - neurological disorganisation
 - cross crawl integration
 - fight/flight survival responses
 - neurological integration
- emotional balancing techniques, including:
 - emotional stress release
 - emotional defusion techniques
 - using lists of emotions
 - visualisations/imagery
 - psychological reversals
 - addressing fears and phobias
- vibrational balancing techniques, including:
 - use of vibrational essences
 - use of colour and sound in balancing
 - balancing the human subtle energy systems including the acupuncture meridian system, chakras, figure 8 energy flows and the aura
 - balancing meridians and acupressure points including the use of the law of 5 elements

- nutritional balancing techniques, including:
 - food sensitivity monitoring
 - food sensitivity/intolerance balancing
 - balancing biochemical factors including hydration, dysglycemic, absorption of nutrients, and bioavailability of nutrients
 - toxin elimination balancing
 - balancing to support detoxification
 - use of Riddler's and nutritional points in balancing
 - nutritional support and digestive disturbance balancing

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations (national and state/territory) for client balancing:
 - codes of conduct
 - duty of care
 - informed consent
 - mandatory reporting
 - practitioner/client boundaries
 - privacy, confidentiality and disclosure
 - records management
 - work role boundaries
 - working within scope of practice
 - presenting symptoms that require referral to a medical practitioner
 - work health and safety
- the innate healing capacities of the body
- factors that may interfere with balancing:
 - over-facilitation
 - energy capacity and availability
 - energy blockage
 - suppression
 - willingness to change
- potential dangers for balancing, including dangers of placing food in the mouth during sensitivity testing

- potential reactions during balancing and how to respond:
 - discomfort
 - emotional reactions
 - feedback - verbal, tactile, visual
 - deep relaxation
 - changes in body temperature
 - healing crisis
- methods of monitoring treatment progress, including:
 - client feedback
 - challenge correction/more mode
 - re-assessment of original issues
- types of reinforcement suggestions and resources that can be provided to clients for their use outside the clinical environment
- ways to respond to barriers to progress within a kinesiology framework
- muscle monitoring position and direction for at least 70 muscles, including:
 - muscle origin
 - insertion
 - action
 - contraction
 - extension
 - range and direction of test
- general kinesiology techniques, why and how they are used:
 - pre-checks for balancing: hydration, central and governing meridians, switching/overload
 - stress statements, goals and affirmations, including reactive stress process
 - use of scan lists
 - age recession using muscle monitoring
 - balancing via a surrogate
 - polarity
- specific muscle balancing techniques, why and how they are used:
 - proprioception: spindle cell mechanism and golgi tendon apparatus
 - reflexes including:
 - spinal
 - neurolymphatic

- neurovascular
 - surrogate muscle balancing
 - balancing unmonitored muscles, tendons and ligaments
 - muscle stretch
 - repeated/sustained muscle imbalance
 - reactive muscle patterns
- structural balancing techniques , why and how they are used, including:
 - posture analysis balancing,
 - balancing regions of the physical body including the neck, lower back, upper back, pelvis, neck and jaw
 - joints, including the knee, hip, shoulder and TMJ
 - gait reflexes
 - righting reflexes or cloacals
 - cranial imbalances
 - structural deviations
- neurological balancing techniques, why and how they are used, including:
 - central and governing meridian circuit
 - neurological disorganisation
 - cross crawl integration
 - fight/flight survival responses
 - neurological integration
- emotional balancing techniques, why and how they are used, including:
 - emotional stress release
 - emotional defusion techniques
 - using lists of emotions
 - visualisations/imagery
 - psychological reversals
 - addressing fears and phobias
 - emotional impact on physical structure
- vibrational balancing techniques, why and how they are used, including:
 - vibrational essences
 - colour and sound in balancing
 - balancing the human subtle energy systems including the acupuncture meridian system, chakras, figure 8 energy flows and the aura

- balancing meridians and acupressure points including the use of the law of 5 elements
- nutritional balancing techniques, why and how they are used, including:
 - food sensitivity monitoring
 - food sensitivity/intolerance balancing
 - balancing biochemical factors including hydration, dysglycemic, absorption of nutrients, and bioavailability of nutrients
 - toxin elimination balancing
 - balancing to support detoxification
 - use of Riddler's and nutritional points in balancing
 - nutritional support and digestive disturbance balancing
- cautious considerations of current supplementation
- boundaries of a kinesiologist's role in relation to nutrition
- need for referral to dietician, herbalist, naturopath, or homeopath

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated clinical environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - client information – case history, treatment plan
 - private consultation area
 - massage/table and chair
 - reference manual
 - hand sanitiser and/or hot running water for washing hands
- modelling of industry operating conditions, including provision of services to the general public
- clinic supervision by a person who meets the assessor requirements outlined below for at least 50 of the 200 hours of client consultations. The remaining 150 hours may be completed under the guidance of a mentor. The mentor must either meet the assessor requirements outlined below or be registered with an Australian professional body that represents kinesiologists as a mentor.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must:

- have at least 2 years current clinical experience working as a kinesiologist providing services to the general public

- hold practising membership of an Australian professional body that represents kinesiologists
- fulfil the continuing professional development requirements of the professional body to which they belong

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTKIN005 Monitor and evaluate client progress

Modification History

N/A

Application

This unit describes the skills and knowledge required to rechallenge previous assessments and balances and adapt treatment plans accordingly. It also includes using individual client evaluation to inform overall practice.

This unit applies to kinesiologists.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Evaluate client progress	1.1 Seek client feedback about impacts of balances and compliance with the treatment plan 1.2 Identify improvements or changes in client condition and compare with expectations in the treatment plan 1.3 Identify and respond to factors that may be inhibiting client progress

	1.4 Seek additional client information when progress suggests the need for further investigation 1.5 Identify unresolved issues or further areas for support as required 1.6 Accurately document findings in client records
2. Adjust treatment based on evaluation	2.1 Determine the need for adjustment to treatment plan based on evaluation findings, muscle monitoring and analysis of other information 2.2 Adjust treatment plans based on outcomes and review of research or evidence that support kinesiology practice 2.3 Accurately document any adjustments to treatment plan 2.4 Re-evaluate and determine whether to terminate case or to plan for further improvement on a different issue if required
3. Develop practice from client evaluation	3.1 Review progress of client in context of own individual practice 3.2 Identify areas of own practice for further research or development to support client outcomes 3.3 Pro-actively seek and respond to professional development opportunities

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

HLTKIN005 Monitor and evaluate client progress	HLTKIN509B Monitor and evaluate kinesiology balances	This version was released in HLT Health Training Package release 2.0 and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Minimum clinic hours added. Additional assessor requirements.	Not equivalent

Assessment Requirements for HLTKIN005 Monitor and evaluate client progress

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 200 hours of kinesiology client consultation work
- prepared for and managed kinesiology sessions for at least 40 different people, 10 of whom must be seen at least 3 times. Clients must include males and females from different stages of life with varied presentations
- measured outcomes through client feedback and own assessment using baseline measurements and indicators of change

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations (national and state/territory) for client monitoring:
 - codes of conduct
 - duty of care
 - informed consent
 - mandatory reporting
 - practitioner/client boundaries
 - privacy, confidentiality and disclosure
 - records management
 - work role boundaries
 - working within scope of practice
 - presenting symptoms that require referral to a medical practitioner
 - work health and safety
- expectations of treatments for different conditions and client groups, and factors that impact on those expectations:

- client history
 - contraindications
 - compliance
 - interactions with other treatments
 - yellow and red flags
 - client general health
 - presenting condition
 - impact of reinforcement for the client
- base line for comparison measurements according to modality procedure, including for:
 - pain
 - energy levels
 - flexibility
 - postural stress
- sources of research and evidence that support kinesiology practice
- principles underpinning continuation or variation of treatment
- impact indicators including:
 - changes in awareness, knowledge and skills
 - changes in intended behaviour
 - changes in individual capacity, i.e. confidence, self esteem, social skills, problem solving skills, increased help-seeking behaviour, coping skills and self management
 - changes in relationships
- client satisfaction indicators:
 - whether clients feels heard, understood, educated about the issue
 - achievement of goal/contextual issue
- outcome indicators of improved:
 - mental wellbeing
 - physical wellbeing
 - emotional wellbeing
 - energetic wellbeing

Assessment Conditions

Skills must have been demonstrated in the workplace or in a clinical environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - client information – case history, treatment plan
 - private consultation area
 - massage/table and chair
 - reference manual
 - hand sanitiser and/or hot running water for washing hands
- modelling of industry operating conditions, including provision of services to the general public
- clinic supervision by a person who meets the assessor requirements outlined below for at least 50 of the 200 hours of client consultations. The remaining 150 hours may be completed under the guidance of a mentor. The mentor must either meet the assessor requirements outlined below or be registered with an Australian professional body that represents kinesiologists as a mentor.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must:

- have at least 2 years current clinical experience working as a kinesiologist providing services to the general public
- hold practising membership of an Australian professional body that represents kinesiologists
- fulfil the continuing professional development requirements of the professional body to which they belong

HLTMSG001 Develop massage practice

Modification History

N/A

Application

This unit describes the skills and knowledge required to establish the foundations of massage practice, evaluate what makes a sustainable practice and then to develop an approach to own practice.

This unit applies to massage therapists.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Establish foundations of massage practice	1.1 Identify, access and interpret information on the central philosophies of massage practice 1.2 Evaluate the massage system of treatment and its application to current health issues

	1.3 Compare and contrast massage, other complementary health modalities and broader health practice
2. Represent the massage framework	2.1 Determine information needs of different individuals and groups 2.2 Identify key messages that represent the philosophy and practice of massage 2.3 Communicate information about massage at level of depth appropriate to audience needs
3. Determine requirements for sustainable massage practice	3.1 Identify key issues that affect the development and sustainability of professional practice 3.2 Identify economic, environmental, human and social considerations, and their impact on professional practice 3.3 Establish a personal health strategy that supports massage practice 3.4 Access, interpret and collate current information that supports professional practice
4. Develop approach to own practice	4.1 Reflect on professional goals and aspirations 4.2 Identify and assess professional opportunities in massage 4.3 Reflect on the opportunities and constraints of individual personal circumstances 4.4 Make decisions about practice direction, based on reflection and research 4.5 Develop practical strategies that address own practice goals

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTMSG001 Develop massage practice

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- used critical thinking skills to:
 - review and reflect on information from a range of sources about massage practice
 - evaluate and articulate requirements for sustainable massage practice
- communicated key messages about massage therapy to meet the information needs of at least 3 different individuals or groups
- developed goals for own practice that reflect the values and philosophies of massage therapy

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- historical development of massage
- different types of massage treatments and their key features and purpose, including the difference between relaxation and remedial massage
- key features of complementary therapies used in conjunction with massage, including:
 - aromatherapy
 - reflexology
- key features of allied health services and their relationship to massage, including:
 - physiotherapy
 - osteopathy
 - chiropractic
 - exercise physiology
 - dietetics
 - naturopathy

- place of massage practice in the broader health care system
- professional massage networks and industry bodies
- different models of professional massage practice and their employment opportunities
- components of sustainable practice:
 - economic – opportunities and viability
 - environmental
 - human – personal health, professional development
 - social responsibility
- legal and ethical considerations (national and state/territory) and how these are applied in individual practice:
 - children in the workplace
 - codes of conduct
 - continuing professional education
 - discrimination
 - dignity of risk
 - duty of care
 - human rights
 - informed consent
 - insurance requirements
 - mandatory reporting
 - practitioner/client boundaries
 - privacy, confidentiality and disclosure
 - records management
 - work role boundaries – responsibilities and limitations
 - work health and safety

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources
- modelling of industry operating conditions and contingencies

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine scope of client needs	1.1 Clarify client expectations 1.2 Provide clear information about scope and limits of services to be provided

	1.3 Collect accurate, relevant and organised health record and document in a form which can be interpreted readily by other professionals 1.4 Recognise needs that are beyond scope of own practice, and make referrals to other health care professionals as required 1.5 Identify and respond to any barriers to information gathering and assessment 1.6 Seek client information respectfully and sensitively, using purposeful, systematic and diplomatic questions 1.7 Manage information in a confidential and secure way
2. Make a physical assessment	2.1 Advise client about the physical assessment process and obtain client consent to proceed 2.2 Follow clinical and practitioner hygiene protocols 2.3 Respect client dignity and anticipate potential sensitivities 2.4 Seek client feedback on comfort levels throughout assessment process 2.5 Assess client through palpation, observation and range of motion (ROM) testing 2.6 Identify and respond to contra-indications to massage treatment 2.7 Accurately document assessment findings
3. Determine and communicate treatment approach	3.1 Determine treatment needs by integrating findings from physical assessment, observation and communication 3.2 Discuss assessment and rationale for treatment with the client 3.3 Respond to client enquiries using language the client understands 3.4 Discuss referral and collaborative options with the client as required

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTMSG002 Assess client massage needs

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 80 hours of massage client consultation work
- prepared for and managed at least 40 massage assessments - clients must include males and females from different stages of life with varied presentations
- completed physical assessments using palpation, observation and active, passive and resisted ROM testing
- interacted effectively with clients:
 - clearly articulated information about services, treatment options and rationale
 - engaged clients in decision making

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations (national and state/territory) for client assessment:
 - codes of conduct
 - duty of care
 - informed consent
 - mandatory reporting
 - practitioner/client boundaries
 - privacy, confidentiality and disclosure
 - records management
 - working role boundaries
 - working within scope of practice
 - presenting symptoms that require referral to a medical practitioner
 - work health and safety

- referral options for massage practitioners, including:
 - professional health services including complementary health modalities
 - community resources and support services
- factors and barriers that may impact on massage assessment:
 - physical
 - psychological
 - cultural
- factors that affect individual health status:
 - age
 - gender
 - constitution
 - lifestyle
 - diet
 - personal and medical history
 - values and attitudes
 - balance of rest and activity
 - physical environment
 - social environment
- client information required prior to physical assessment, including:
 - case history
 - client expectations
- considerations for performing physical massage assessments:
 - environment
 - equipment
 - client privacy
 - client instructions
- physical assessment techniques, how and when they are used, including:
 - postural assessment
 - range of motion (active, passive and resisted)
 - palpation
- contraindications to treatment and possible indications for referral, including:
 - protracted pain or pain which is non re-producible or neural in origin
 - fatigue

- circulatory disorders
- inflammation
- lumps and tissue changes
- rashes and changes in the skin
- oedema
- mood alterations
- infection
- changes in habits such as appetite elimination or sleep
- bleeding and bruising
- nausea, vomiting or diarrhoea
- temperature-hot or cold
- major muscle anatomy, including:
 - surface anatomy
 - origin and insertion
 - palpable bony landmarks
 - reciprocal inhibition, antagonist/agonist, synergists
 - actions including individual actions, planes and synergistic groups of the following muscles:
 - temporalis
 - masseter
 - frontalis
 - sternocleidomastoid
 - trapezius
 - levator scapulae
 - latissimus dorsi
 - supraspinatus
 - infraspinatus
 - teres major
 - teres minor
 - subscapularis
 - rhomboids
 - pectoralis major
 - pectoralis minor
 - rectus abdominis

- quadratus lumborum
- psoas
- erector spinae
- gluteus maximus
- gluteus medius
- piriformis
- quadriceps
- tibialis anterior
- peroneals
- hamstrings
- adductor magnus
- adductor longus
- gastrocnemius
- soleus
- deltoid
- biceps brachii
- triceps brachii
- flexor carpi radialis
- flexor carpi ulnaris
- palmaris longus
- pronator teres
- brachioradialis
- extensor carpi radialis
- supinator
- skeleton:
 - bones of the body
 - major bony landmarks
 - surface anatomy and palpable bony landmarks
 - bone growth and remodelling
- joints:
 - joint classifications – fibrous, cartilaginous, synovial (glide, plane, ball/socket, saddle, hinge, condyloid, pivot)
 - joint actions
- physiology:

- soft tissue:
 - muscle contraction
 - muscle physiology (reflexes, chemistry, proprioceptors)
 - tendons and ligaments
 - fascia
- hard tissue:
 - bone growth and development
 - abnormal bone growth
- recognition of in terms of contra-indications:
 - inflammation (cardinal signs, physiology at cellular level)
 - injury and wound healing (acute/chronic, stages, grades)
 - pain types
 - tendinopathy

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated clinical environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - client information – case history
 - private consultation area
 - adjustable height massage table
 - towels/sheets for draping
 - oils/balms
 - hot/cold packs
 - bolsters
- modelling of industry operating conditions, including provision of services to the general public
- clinic supervision by a person who meets the assessor requirements outlined below for at least 60 of the 80 hours of client consultation work

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must:

- have current clinical experience working as a massage therapist providing services to the general public

- hold practising membership of an Australian professional body that represents massage therapists
- fulfil the continuing professional development requirements of the professional body to which they belong

Link

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTMSG003 Perform remedial massage musculoskeletal assessments

Modification History

N/A

Application

This unit describes the skills and knowledge required to assess the needs of clients presenting with soft tissue dysfunction, musculoskeletal imbalance or restrictions in range of motion (ROM). It requires the ability to gather client information, conduct specific tests and bring information together to develop a remedial massage treatment plan. There is a strong focus on functional anatomy.

This unit applies to remedial massage therapists.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine scope of client needs	1.1 Explore and clarify client expectations 1.2 Provide clear information about scope and limits of services to be provided

	1.3 Collect an accurate, relevant and organised health record, and document in a form which can be interpreted readily by other professionals 1.4 Recognise needs that are beyond scope of own practice and make referrals to other health care professionals as required 1.5 Identify and respond to any barriers to information gathering and assessment 1.6 Seek client information respectfully and sensitively, using purposeful, systematic and diplomatic questions 1.7 Manage information in a confidential and secure way
2. Make a physical assessment	2.1 Provide information about the physical assessment process and obtain client consent to proceed 2.2 Follow clinical and practitioner hygiene procedures 2.3 Respect client dignity and anticipate sensitivities 2.4 Seek client feedback on comfort levels 2.5 Assess client through palpation, observation and ROM testing 2.6 Identify variations from normal posture or structural function in relation to presenting symptoms 2.7 Analyse static and dynamic variables of posture through use of functional and special testing indicated by presenting condition 2.8 Use ongoing questioning with client to gain further information as required 2.9 Accurately document information from the physical assessment
3. Develop treatment plan	3.1 Correlate results of physical assessment with case history 3.2 Consider available medical information and incorporate into analysis within scope of own practice 3.3 Identify condition according to stage and related implications 3.4 Identify and respond to indications or contraindications for remedial massage

	3.5 Determine optimum type, duration and frequency of treatments 3.6 Use professional judgement to draw substantiated conclusions about treatment needs 3.7 Establish expected treatment outcomes based on the remedial massage framework and evidence 3.8 Accurately document proposed treatment plan
4. Confirm assessment and treatment plan with client	4.1 Discuss assessment, its implications and rationale for treatment with the client 4.2 Assign and agree treatment priorities and expectations in consultation with the client 4.3 Schedule times and session lengths suited to the required techniques and sequences 4.4 Respond to client enquiries using language the client understands 4.5 Discuss referral and collaborative options with the client as required

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTMSG003 Perform remedial massage musculoskeletal assessments

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 200 hours of massage client consultation work
- prepared for and managed at least 60 remedial massage musculoskeletal assessments - clients must include males and females from different stages of life with varied presentations
- used remedial massage assessment techniques appropriately, including:
 - discussion
 - muscle strength and length tests
 - observation, including variations of posture
 - orthopaedic tests
 - palpation of prominent bones/structure and phasic and postural muscles
 - ROM tests
 - temperature
- interacted effectively with clients:
 - clearly articulated information about services, treatment options and rationale
 - engaged clients in decision making

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations (national and state/territory) for client assessment:
 - codes of conduct
 - duty of care
 - informed consent
 - mandatory reporting

- practitioner/client boundaries
 - privacy, confidentiality and disclosure
 - records management
 - work role boundaries:
 - working within scope of practice
 - presenting symptoms that require referral to a medical practitioner
 - work health and safety
- referral options for practitioners:
 - professional health services including complementary health modalities
 - community resources and support services
 - types and availability of further medical testing
- factors and barriers that may impact on assessment, including:
 - physical
 - psychological
 - cultural
- factors that affect individual health status, including:
 - age
 - gender
 - constitution
 - lifestyle
 - diet
 - personal and medical history
 - values and attitudes
 - balance of rest and activity
 - physical environment
 - social environment
- client information required for remedial massage assessment and the scope and depth of information needed around:
 - client expectations
 - client history and its components
 - client current state of health
 - signs and symptoms
 - onset
 - duration

- location
 - quality and severity
 - non-verbal
- protocols for performing physical massage assessments:
 - environment
 - equipment
 - client privacy
 - client instructions
- remedial massage diagnostic techniques, how and when they are used:
 - discussion
 - muscle strength and length tests
 - observation, including variations of posture
 - orthopaedic tests
 - palpation of prominent bones/structure and phasic and postural muscles
 - ROM tests
 - temperature
- contraindications to treatment and possible indications for referral:
 - weak bone/joint instability
 - neurological dysfunction
 - vascular disorders
 - lack of working diagnosis
 - pain of excessive nature or abnormal responses to treatment
 - patient non-compliance
- anatomy:
 - body systems relevant to massage assessment
 - muscular physiology
 - nervous system, including myotomes, peripheral nerves, nerve impingements (both root and peripheral)
 - integumentary
 - skeletal
 - muscles – major muscle actions including individual actions, planes and synergistic groups:
 - temporalis
 - masseter

- frontalis
- pterygoids
- longus colli
- digastric
- rectus capitis posterior
- obliquus capitis superior
- obliquus capitis inferior
- splenius capitis
- splenius cervicis
- semi-spinalis capitis
- scalenes
- sternocleidomastoid
- trapezius
- levator scapulae
- latissimus dorsi
- supraspinatus
- infraspinatus
- teres major
- teres minor
- subscapularis
- rhomboids
- pectoralis major
- pectoralis minor
- serratus anterior
- intercostals
- serratus posterior superior
- rectus abdominis
- quadratus lumborum
- psoas
- transverse abdominis
- internal/external obliques
- erector spinae
- semispinalis
- multifidus

- rotatores
- gluteus maximus
- gluteus medius
- gluteus minimus
- piriformis
- gemellus superior/inferior
- obturator internus and externus
- quadratus femoris
- quadriceps
- sartorius
- gracilis
- pectineus
- tibialis anterior
- tibialis posterior
- peroneals
- flexor digitorum longus
- flexor hallucis longus
- hamstrings
- adductor magnus
- adductor longus
- popliteus
- gastrocnemius
- soleus
- extensor digitorum longus
- extensor hallucis longus
- deltoid
- biceps brachii
- triceps brachii
- flexor carpi radialis
- flexor carpi ulnaris
- palmaris longus
- pronator teres
- brachioradialis
- brachialis

- extensor carpi radialis
 - supinator
 - anconeus
 - coracobrachialis
 - thenar muscle
- skeleton:
 - bones of the body
 - major bony landmarks
 - surface anatomy and palpable bony landmarks
 - bone growth and remodelling
 - bony landmarks pertaining to muscles
- joints:
 - joint classifications – fibrous, cartilaginous, synovial (glide, plane, ball/socket, saddle, hinge, condyloid, pivot)
 - joint actions
 - detailed joint anatomy for each major joint (shoulder, hip, sacroiliac, knee, ankle/foot, wrist, elbow, acromioclavicular, sternoclavicular, costal, spine, atlanto-occipital, temporomandibular)
 - accessory/secondary/coupled motions of joints
 - capsular restrictions and patterns
- physiology:
 - soft tissue:
 - muscle contraction
 - muscle physiology (reflexes, chemistry, proprioceptors)
 - tendons and ligaments
 - fascia
 - hard tissue:
 - bone growth and development
 - abnormal bone growth
- conditions commonly seen by massage therapists, including:
 - neck, back pain and headache
 - muscle, connective tissue and joint pain
 - arthritis
 - repetitive strain injuries and occupational overuse syndromes
 - postural problems

- sports and activity related conditions
 - stress, anxiety and other mood related problems
- treatment planning techniques and considerations

Assessment Conditions

Skills must have been demonstrated in the workplace or in a clinical environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - health assessment/client consultation forms
 - private consultation area
 - adjustable height massage table
 - towels/sheets for draping
 - oils/balms
 - hot/cold packs
 - bolsters
- modelling of industry operating conditions, including provision of services to the general public
- clinic supervision by a person who meets the assessor requirements outlined below for at least 150 of the 200 hours of client consultation work

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must:

- have current clinical experience working as a massage therapist providing services to the general public
- hold practising membership of an Australian professional body that represents massage therapists
- fulfil the continuing professional development requirements of the professional body to which they belong

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTMSG004 Provide massage treatments

Modification History

N/A

Application

This unit describes the skills and knowledge required to prepare for and provide massage treatments using a defined range of techniques and sequences.

This unit applies to massage therapists providing general health maintenance treatments. It does not include remedial massage techniques.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare client for treatment	1.1 Clearly outline how the treatment will be provided and managed based on assessment and agreed treatment approach 1.2 Explain factors which may interfere with the effectiveness of the treatment

	1.3 Inform the client of possible physical or emotional reactions during and following a session, and the appropriate course of action to take 1.4 Follow established protocols to physically prepare the client for treatment 1.5 Confirm client consent for treatment
2. Use massage techniques and sequences	2.1 Determine treatment sequence, location and degree of pressure according to assessment indications and scope of practice 2.2 Position client to optimise comfort and support while allowing for effective application of techniques 2.3 Maintain client dignity through use of draping 2.4 Maintain therapist postures that ensure a controlled distribution of body weight 2.5 Maintain client-focused attention throughout session 2.6 Adjust treatment techniques and pressure based on client feedback
3. Monitor treatment	3.1 Use the condition and response of the client during treatment as feedback to the initial assessment 3.2 Use established massage assessment frameworks 3.3 Recognise reactions to treatment and respond promptly if necessary 3.4 Seek feedback during and after treatment, and evaluate need for ongoing or additional treatment, including referral to other health services
4. Provide advice and resources to the client	4.1 Provide client education in relation to self care 4.2 Answer client queries with clarity, using appropriate language 4.3 Provide accurate details of treatment plans, schedules and recommendations to the client 4.4 Clearly document treatment details and recommendations made

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTMSG004 Provide massage treatments

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 80 hours of massage client consultation work
- prepared for and managed at least 40 massage treatment sessions - clients must include males and females from different stages of life with varied presentations
- used all of the following massage techniques:
 - effleurage
 - frictions
 - kneading
 - longitudinal gliding strokes
 - petrissage
 - compressions
 - tapotement
 - vibrations

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- massage techniques and how to apply them, for the following:
 - effleurage (kneading)
 - longitudinal gliding strokes
 - compressions
 - tapotement
 - heat pack application
- endangerment sites, where they are and the limitations of touching these depending on scope of practice:

- anterior triangle of the neck
 - posterior triangle of the neck
 - axillary area
 - medial epicondyle
 - lateral epicondyle
 - sternal notch and anterior throat
 - umbilicus area
 - twelfth rib dorsal body
 - sciatic notch
 - inguinal triangle
 - popliteal fossa
- potential reactions during treatment and how to respond:
 - discomfort
 - emotional reactions
 - feedback - verbal, tactile, visual
 - muscle spasms
 - body temperature discomfort
 - deep relaxation
- potential reactions following treatment and appropriate client advice to provide
- methods of monitoring treatment progress:
 - reassessment
 - client feedback
- types of advice and resources that can be provided to clients for their use outside the clinical environment
- documentation requirements for recording treatment details

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated clinical environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - client information – case history
 - private consultation area
 - adjustable height massage table
 - towels/sheets for draping

- oils/balms
- hot/cold packs
- bolsters
- modelling of industry operating conditions, including provision of services to the general public
- clinic supervision by a person who meets the assessor requirements outlined below for at least 60 of the 80 hours of client consultation work

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must:

- have current clinical experience working as a massage therapist providing services to the general public
- hold practising membership of an Australian professional body that represents massage therapists
- fulfil the continuing professional development requirements of the professional body to which they belong

HLTMSG005 Provide remedial massage treatments

Modification History

N/A

Application

This unit describes the skills and knowledge required to prepare for and provide remedial massage treatments based on the outcomes of an existing health assessment and treatment plan.

This unit applies to remedial massage therapists working with clients presenting with soft tissue dysfunction, musculoskeletal imbalance or restrictions in range of motion (ROM).

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

Assessment Requirements for HLTMSG005 Provide remedial massage treatments

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 200 hours of massage client consultation work
- prepared for and managed at least 60 remedial massage treatment sessions - clients must include males and females from different stages of life with varied presentations
- applied techniques in each of the following positions during client consultation sessions according to client needs:
 - prone
 - supine
 - seated
 - side-lying recumbent
- used all of the following techniques appropriately:
 - frictions
 - passive joint movement
 - passive soft tissue movement
 - deep tissue massage
 - muscle energy
 - neuromuscular
 - press and release
 - myofascial (without skin penetration)
 - trigger point therapy (without skin penetration)
 - lymphatic drainage
 - temperature therapy
 - proprioceptive neuromuscular facilitation (PNF)
 - stretching

- mobilisation and movement at major joints (without adjustments or high velocity manipulations)

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations (national and state/territory) for client assessment:
 - codes of conduct
 - duty of care
 - informed consent
 - mandatory reporting
 - practitioner/client boundaries
 - privacy, confidentiality and disclosure
 - records management
 - work role boundaries:
 - working within scope of practice
 - presenting symptoms that require referral to a medical practitioner
 - work health and safety
- remedial massage techniques and how to apply them:
 - friction techniques
 - compressive techniques
 - passive joint movement techniques
 - passive soft tissue movement
 - deep tissue massage
 - muscle energy techniques
 - myofascial techniques (without skin penetration)
 - trigger point therapy (without skin penetration)
 - lymphatic drainage
 - temperature therapy
 - topical applications
 - PNF
 - stretching techniques
 - mobilisation and movement at major joints (without adjustments or high velocity manipulations)

- remedial massage techniques to address the following conditions:
 - sciatica
 - arthritis
 - headache
 - plantar fasciiti
 - shoulder impingement
 - TMJ dysfunction
 - repetitive strain injuries
 - medial and lateral epicondylitis
 - carpal tunnel syndrome
 - postural imbalances
- endangerment sites - where they are and how to use palpatory skills in these areas according to scope of practice, including:
 - anterior triangle of the neck
 - posterior triangle of the neck
 - femoral triangle
 - cubital fossa
 - axillary area
 - medial epicondyle
 - lateral epicondyle
 - sternal notch and anterior throat
 - umbilicus
 - twelfth rib dorsal body
 - sciatic notch
 - inguinal triangle
 - popliteal fossa
- potential reactions during treatment and how to respond:
 - discomfort
 - emotional reactions
 - feedback - verbal, tactile, visual
 - muscle spasms
 - body temperature discomfort
 - deep relaxation
- potential reactions following treatment and appropriate client advice to provide

- types of advice and resources that can be provided to clients for their use outside the clinical environment
- documentation requirements for recording treatment details

HLTMSG006 Adapt remedial massage treatments to meet specific needs

Modification History

N/A

Application

This unit describes the skills and knowledge required to adapt remedial massage assessment and treatment strategies to meet the needs of clients of different genders and at different stages of life. It also includes the requirement to be able to identify and respond to other specific needs with which the practitioner may be unfamiliar.

This unit applies to remedial massage therapists.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Adapt assessment and treatment strategies to stages of life	1.1 Anticipate and take account of client sensitivities to ensure client dignity is maintained 1.2 Tailor approaches that take account of different cognitive abilities of clients at different stages of life

	1.3 Adjust physical processes to take account of client capabilities and physical body features 1.4 Recognise norms and deviations associated with age and gender 1.5 Obtain consents from others when appropriate
2. Respond to unfamiliar presentations	2.1 Recognise situations where presenting cases or aspects of presenting cases fall outside current knowledge base or expertise 2.2 Refer client to other practitioners when case is not appropriate to own scope of practice 2.3 Identify, access and interpret sources of additional information and advice when appropriate to continue with the case 2.4 Enhance own capacity to deal with the case by conducting case specific research 2.5 Integrate findings into client treatment plans and record details
3. Extend and expand own knowledge base	3.1 Pro-actively identify and respond to professional development opportunities 3.2 Develop and adjust work practices as part of ongoing practice development

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTMSG006 Adapt remedial massage treatments to meet specific needs

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 200 hours of massage client consultation work
- managed at least 60 remedial massage assessment and treatment sessions - clients must include males and females from different stages of life with varied presentations
- effectively adapted communication, assessment and treatment strategies to meet client needs
- conducted case specific research for at least 3 cases, where key aspects of the condition are not known to the candidate

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations (national and state/territory) for working with specific groups:
 - children in the workplace
 - codes of conduct
 - discrimination:
 - age
 - disability
 - racial
 - sex
 - duty of care
 - informed consent
 - mandatory reporting
 - practitioner/client boundaries

- privacy, confidentiality and disclosure
- records management
- work role boundaries:
 - working within scope of practice
 - presenting symptoms that require referral to a medical practitioner
- work health and safety
- treatment management factors that must be considered for clients of different genders and at different stages of life:
 - case taking
 - variations in approach to physical examination
 - home recommendations
- major developmental milestones for different stages of life
- features of common health conditions that affect the following groups and how those conditions are assessed and treated in the remedial massage framework:
 - children
 - adolescents
 - adult females at different stages of life
 - adult males at different stages of life
- factors for consideration when providing any form of palliative care
- professional responsibilities when presenting cases fall outside of practitioner's current scope, including:
 - when referral is appropriate or required
 - information and advice sources
 - case research techniques

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated clinical environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - client information – health assessment consultation forms, case history, treatment plan
 - private consultation area
 - adjustable height massage table
 - towels/sheets for draping
 - oils/balms

- hot/cold packs
 - supports
- modelling of industry operating conditions, including:
 - provision of services to the general public
- clinic supervision by a person who meets the assessor requirements outlined below for at least 150 of the 200 hours of client consultation work

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must:

- have current clinical experience working as a remedial massage therapist providing services to the general public
- hold practising membership of an Australian professional body that represents remedial massage therapists
- fulfil the continuing professional development requirements of the professional body to which they belong

HLTMSG007 Adapt remedial massage practice for athletes

Modification History

N/A

Application

This unit describes the skills and knowledge required to determine the remedial massage needs of athletes and to adjust assessment and treatment to develop preventative and injury related treatment strategies for athletes and other sport active people.

This unit applies to remedial massage therapists.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine scope of massage services required	1.1 Obtain information from athlete about their potential service needs 1.2 Collate and evaluate information from others involved in the health management of the athlete 1.3 Determine where and how massage fits within the overall athlete health management program

	1.4 Confirm own role and responsibilities with athlete and other health management professionals
2. Adapt remedial massage assessment and treatment strategies to athlete needs	2.1 Incorporate pre and post event massage based on demands and impacts of the sporting activity and individual profile 2.2 Identify musculoskeletal sports injuries and their potential for treatment with massage within scope of own practice 2.3 Tailor sports injury management strategies that incorporate the concept of stages of recovery 2.4 Recommend sport injury specific therapies and exercises that support massage treatment 2.5 Provide athlete education in relation to self-massage techniques as required 2.6 Provide recommendations for ongoing support packages to aid recovery from injury 2.7 Integrate sport related information and research evidence into treatment plan and clearly document treatment details
3. Monitor and evaluate athlete treatment strategies	3.1 Review effectiveness of treatment plans based on client response to preventative and injury related treatments 3.2 Evaluate impact of ongoing treatment in relation to client's physical, mental and emotional condition relative to their sport 3.3 Seek feedback from others involved in the health management of the athlete and ensure that advice provided is in line with advice of other health professionals 3.4 Adjust plans based on evaluations in consultation with client and colleagues 3.5 Accurately document recommendations and changes to treatment plans

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTMSG007 Adapt remedial massage practice for athletes

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 200 hours of massage client consultation work
- managed at least 60 remedial massage assessment and treatment sessions - clients must include males and females from different stages of life with varied presentations
- assessed and treated at least 3 different sporting injuries to recovery stage

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- roles and responsibilities of different people associated with the health management of the athlete, including:
 - sports coaches
 - sports psychologists
 - exercise physiologists
 - medical practitioners
 - physiotherapists
 - chiropractors
 - osteopaths
 - exercise therapists
 - dietitians/nutritionists
- legal and ethical considerations (national and state/territory) for client assessment and treatment:
 - codes of conduct
 - duty of care
 - informed consent

- mandatory reporting
- practitioner/client boundaries
- privacy, confidentiality and disclosure
- records management
- work role boundaries:
 - working within scope of practice
 - presenting symptoms that require referral to a medical practitioner
- work health and safety
- relevant principles of human movement and sport biomechanics:
 - muscle strength testing
 - length testing
 - isometric, concentric and eccentric contractions
- pre-event and post-event massage techniques and their application, including:
 - physiological warm-up
 - psychological preparation including stress release and motivation
 - maintenance massage, including muscle facilitation and stimulation, plus muscle relaxation and neural calming
 - self-management and self-massage programs
 - full range of movement of the joints and muscles without aggressive proprioceptive neuromuscular facilitation (PNF) type stretching:
 - active assisted range of motion (ROM)
 - muscle energy techniques
- features of acute, chronic and overuse musculoskeletal injuries in sport, including referral potential, rate of recovery and how massage can assist the following:
 - bone injuries:
 - fracture
 - periosteal contusion
 - stress fracture
 - 'bone strain', 'stress reaction'
 - osteitis/periostitis
 - apophysitis
 - articular cartilage injuries:
 - osteochondral/chondral fractures
 - minor osteochondral injury
 - chondropathy - softening, fibrillation, fissuring, chondromalacia

- joint injuries:
 - dislocation
 - subluxation
 - synovitis
 - osteoarthritis
- ligament injuries - sprain/tear (grades I - III)
- muscle injuries:
 - strain/tear (grades I - III)
 - contusion
 - cramp
 - acute compartment syndrome
 - chronic compartment syndrome
 - delayed onset muscle soreness
 - focal tissue thickening/fibrosis
 - myositis ossificans
- tendon injuries:
 - tear (complete or partial)
 - tendinitis
 - paratendinitis/tenosynovitis
 - tendinosis
- bursa injuries:
 - traumatic bursitis
 - bursitis
- nerve injuries:
 - neuropraxia
 - minor nerve injury/irritation
 - entrapment
 - increased neural tension
- skin injuries and how massage therapists need to work in areas subject to:
 - burns
 - laceration
 - abrasion
 - puncture wound

- types of cryotherapy or thermotherapy used for recovery from injury and techniques used to apply them, including:
 - conduction - cold packs, ice massage and immersion baths
 - convection - cooling devices
 - radiation
 - friction
 - topical application
- indications, contraindications and considerations for use of cryotherapy:
 - adverse reactions to topical application
 - adequate time to achieve cryotherapy goals without causing adverse reactions
- indications, contraindications and considerations for use of thermotherapy:
 - myofascial hypertonicity
 - fascial adherence
 - potential for scalding
- uses and indications for taping and splinting that are within scope of massage practice

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated clinical environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - client information – health assessment consultation forms, case history
 - consultation area
 - adjustable height massage table
 - towels/sheets for draping
 - oils/balms
 - hot/cold packs
 - supports
 - tape
- modelling of industry operating conditions, including provision of services to athletes or sports active people
- clinic supervision by a person who meets the assessor requirements outlined below for at least 150 of the 200 hours of client consultation work

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must:

- have current clinical experience working as a remedial massage therapist providing services to the general public
- hold practising membership of an Australian professional body that represents remedial massage therapists
- fulfil the continuing professional development requirements of the professional body to which they belong

Link

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTMSG008 Monitor and evaluate remedial massage treatments

Modification History

N/A

Application

This unit describes the skills and knowledge required to monitor and evaluate remedial massage treatments, both from an individual client and whole of practice perspective.

This unit applies to remedial massage therapists.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Evaluate client progress	1.1 Seek client feedback about treatment impacts and compliance with the treatment plan 1.2 Make own observations and assessment of client changes based on massage framework 1.3 Evaluate treatment impacts in relation to client's physical, mental, spiritual and emotional wellbeing

	1.4 Compare changes and improvements with expectations in the treatment plan, existing research and evidence from own practice 1.5 Seek additional information from clients when progress suggests this is needed 1.6 Accurately document progress in client treatment plan
2. Adjust treatment based on evaluation	2.1 Determine the need for adjustment to treatment plan based on evaluation of client progress 2.2 Identify and respond to factors that may be inhibiting client progress 2.3 Adjust treatment plans based on outcomes and sources of research or evidence that support massage practice 2.4 Accurately document any adjustments to treatment plans
3. Develop practice from client evaluation	3.1 Review progress of clients in context of own individual practice 3.2 Identify areas of own practice for further research or development to support client outcomes 3.3 Pro-actively seek and respond to professional development opportunities

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

HLTMSG008 Monitor and evaluate remedial massage treatments		This unit has been created to address a skill or task required	Newly created

		by industry that is not covered by an existing unit of competency	

Assessment Requirements for HLTMSG008 Monitor and evaluate remedial massage treatments

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 200 hours of massage client consultation work
- managed at least 60 remedial massage assessments and treatment sessions - clients must include males and females from different stages of life with varied presentations
- monitored and evaluated treatments provided to at least 5 different clients with at least 3 treatments per client

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations (national and state/territory) for monitoring and evaluation:
 - children in the workplace
 - codes of conduct
 - duty of care
 - informed consent
 - mandatory reporting
 - practitioner / client boundaries
 - privacy, confidentiality and disclosure
 - records management
 - work role boundaries
 - working within scope of practice
 - presenting symptoms that require referral to a medical practitioner
 - work health and safety
- types of criteria by which remedial massage treatments are evaluated

- expectations of treatment for different conditions and client groups, and factors that impact on those expectations:
 - client history
 - contraindications
 - compliance
 - interactions with other treatments
 - client general health
 - presenting condition
- methods of monitoring treatment progress:
 - re-assessment
 - client feedback
- barriers to therapeutic progress and ways to respond within a massage framework
- sources of research and evidence that support massage practice
- principles underpinning continuation or variation of treatment
- professional development opportunities in remedial massage

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated clinical environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - client information – case history, treatment plan
 - private consultation area
 - adjustable height massage table
 - towels/sheets for draping
 - oils/balms
 - hot/cold packs
 - supports
- modelling of industry operating conditions, including provision of services to the general public
- clinic supervision by a person who meets the assessor requirements outlined below for at least 150 of the 200 hours of client consultation work

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must:

- have current clinical experience working as a remedial massage therapist providing services to the general public
- hold practising membership of an Australian professional body that represents remedial massage therapists
- fulfil the continuing professional development requirements of the professional body to which they belong

HLTOHC001 Recognise and respond to oral health issues

Modification History

N/A

Application

This unit describes the skills and knowledge required to identify variations and recognise oral health issues through a visual check, observation of patient behaviour and habits, signs and symptoms and physical condition of patients. This enables the candidate to respond appropriately to the clinical findings to initiate follow up oral health care.

This unit applies to workers in a range of health and community services environments where their work role requires them to recognise and respond to oral health issues.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards for maintaining infection control, and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes.</i>	<i>Performance criteria specify the level of performance needed to demonstrate achievement of the element</i>
1. Identify variations in patient behaviour and habits	1.1 Identify opportunities to observe patient behaviour, physical functions, capabilities and habits that may indicate oral health issues or associated pain or discomfort

	1.2 Observe, listen for self-reports and question patient and family/or carer to determine whether the patient is experiencing pain or discomfort that may be associated with oral health issues 1.3 Access relevant information on contributing factors that may produce variation from normal behaviour
2. Undertake basic visual oral check and questioning	2.1 Obtain consent from the patient to conduct basic visual oral check and questioning from patient and/or family/carers 2.2 Ensure comfort of patient by developing trust and rapport, adapting environment and optimal time based on patient needs 2.3 Provide support for patient's head or chin if necessary to enhance visual access without creating discomfort for the patient 2.4 Seek assistance from patient to open their own mouth to limit hand contact inside the mouth 2.5 Prepare and perform basic visual oral checks in line with own work role and use of standard precautions 2.6 Identify signs and symptoms of oral health issues that may indicate variation from normal and actively listen to and be aware of self-reports
3. Follow up and promote ongoing oral health care	3.1 Complete documentation and reporting processes, using information from patient, and/or family/carers or other relevant people as well as own observations in relation to oral health issues 3.2 Discuss oral health issues with patient and/or carer in line with organisation policies and procedures and respecting patient priorities and choices 3.3 Take appropriate action within work role, including liaising with supervisor in consultation with patient to ensure appropriate referral occurs 3.4 Use appropriate communication strategies to provide information relevant to promoting and maintaining good oral health 3.5 Provide instruction to support patients to take a self-care approach to oral health in line with individual needs where possible 3.6 Identify and address key barriers to management or self-management of oral health 3.7 Review and monitor oral health issues

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

		practices and terminology.	

Assessment Requirements for HLTOHC001 Recognise and respond to oral health issues

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed a visual oral health check on 5 patients, including:
 - identified any signs and symptoms related to oral health care issues
 - gathered relevant information from visual check and questioning to initiate appropriate follow up oral health care
 - used appropriate manual handling techniques when working with patients with special care needs or mental health condition

Knowledge Evidence

The candidate must demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- basic anatomy and physiology underpinning oral health, including what is considered healthy and unhealthy
- patient behaviour and habits which contribute to oral health issues
- causes and prevention of tooth decay, gum disease and tooth wear, including erosion, abrasion and attrition.
- effective self-care practices for oral health including cause, control and prevention of dental plaque
- state/territory and national government policy and programs and reporting processes for oral health
- accessibility to services, including availability of private and public oral health services, including eligibility for services
- role of oral health professionals
- factors that impact on oral health, including:
 - abuse (neglect of oral health needs)
 - access to dental and health services

- alcohol, licit and illicit drugs and substances, over the counter and herbal treatments
- correct infant feeding practices
- damage from habitual grinding of teeth
- diet and nutrition, including fluids and excessive intake of sugar
- fluoride
- general health and wellbeing
- immunosuppressant conditions, HIV, chemotherapy and radiation
- injury to mouth, such as from a seizure
- medical history
- oral piercings
- patient oral health information
- presence of plaque and calculus
- psychological issues, such as fear of being seen without dentures or persisting with ill-fitting dentures for satisfaction of others
- salivary function
- smoking
- social and cultural determinants of health
- susceptible tooth surfaces
- transmission of bacteria particularly from family/carer to child
- teeth misalignment causing trauma to teeth
- trauma to mouth as a result of an accident
- healthy eating recommendations as identified in the *National health and medical research council's (NHMRC) Australian dietary guidelines*

Assessment Conditions

Skills and knowledge must be demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely.

The following aspect of the performance evidence must have been demonstrated using 10 simulation scenarios prior to demonstration in the workplace or with members of the general public:

- performing a visual oral health check

The following conditions must be met for this unit

- use of suitable equipment and resources, including:
 - appropriate personal protective equipment (PPE)

- *Dental board of Australia – dental guidelines* on infection control on which the candidate bases the planning process
- modelling of industry operating conditions, including access to people for the simulated scenarios

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Link

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTOHC002 Inform and support patients and groups about oral health

Modification History

N/A

Application

This unit describes the skills and knowledge required to provide practical information and instruction to patients and groups to promote and support good oral health care practices. The skills and knowledge will enable the candidate to provide health promotion and practical demonstration and instruction of oral hygiene practices and techniques.

This unit applies to workers in a range of health and community services environments whose work roles provide them with an opportunity to promote and support good oral health care.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards for maintaining infection control, and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes.</i>	<i>Performance criteria specify the level of performance needed to demonstrate achievement of the element</i>

1. Develop and maintain understanding of oral health information and issues	1.1 Build on understanding of what constitutes good oral health 1.2 Maintain current knowledge on the risk factors and outcomes associated with poor oral health and hygiene practices 1.3 Identify oral health hygiene techniques used to address specific patient needs and preferences 1.4 Demonstrate own commitment to oral health through awareness and application of effective self-care oral health practices 1.5 Recognise social and cultural determinants of health as well as varying individual motivations and capacity to carry out good oral health care practices
2. Provide information related to oral health using a person-centred approach	2.1 Address agreed outcomes in planning for oral health care needs by explaining the link between oral health and general health 2.2 Prepare information so that it is relevant to the target audience and use a person-centred approach to identify and respond effectively to individual needs 2.3 Engage and respond to concerns of patient by providing oral health care information, including issues associated with poor oral health and hygiene 2.4 Negotiate with patient a flexible approach to delivery of oral health information 2.5 Explain relevant information on the importance of regular oral checks with an oral health practitioner
3. Provide specific information and instruction on oral hygiene self-care techniques and appropriate aids	3.1 Collect data specific to patient by questioning, observing and accessing available information from patient and/or carer 3.2 Instruct and explain tooth brushing and soft tissue techniques and use of appropriate aids, explain their advantages in terms of achieving and maintaining effective oral health 3.3 Demonstrate and provide instruction on the care of partial and full dentures 3.4 Identify opportunities for participants to demonstrate learned skills 3.5 Encourage and support patients, including people with special needs to follow effective self-care techniques for oral hygiene practices to make

	knowledge, attitude and behavioural changes where possible
4. Evaluate effectiveness of oral health information session	4.1 Obtain feedback from the patient and/or group to determine whether the information is correctly received and understood 4.2 Implement changes to information or delivery processes based on feedback

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has:

- communicated effectively to 5 patients to provide information that addresses their oral health care needs, including:
 - impact of oral health on general health and wellbeing
 - causes and prevention of dental plaque, dental caries, dental erosion and periodontal disease, dental trauma
 - diet and nutrition
 - denture care on patients with dentures
 - evaluating how well target audience has understood the oral health and self-care practice information provided
 - reflecting on and improving own level and application of skills and knowledge to motivate target audience and achieve key oral health outcomes

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- basic anatomy and physiology underpinning oral health, including what is considered healthy and unhealthy
- patient behaviour and habits which contribute to oral health issues
- causes and prevention of tooth decay, gum disease and tooth wear including erosion, abrasion and attrition
- good oral health refers to a person's mouth that has:
 - breath without offensive odour
 - inflammation and lesion-free soft tissue
 - intact and stable teeth without cavities
 - moist lips without chapping
 - no build-up of food, calculus or plaque

- no oral pain
 - pink, moist, uncoated tongue
 - watery plentiful saliva
 - well-fitting dentures
- accessibility to services, including availability of private and public oral health services and eligibility for services
- effective self-care practices for oral health including cause, control and prevention of dental plaque
- factors that impact on oral health, including:
 - abuse (neglect of oral health needs)
 - access to dental and health services
 - alcohol, licit and illicit drugs and substances, over the counter and herbal treatments
 - bacteria in dental plaque
 - correct infant feeding practices
 - damage from habitual grinding of teeth
 - diet and nutrition, including fluids and excessive intake of sugar
 - fluoride
 - general health and wellbeing
 - immunosuppressant conditions, HIV, chemotherapy and radiation
 - injury to mouth, such as from a seizure
 - medical history
 - oral piercings
 - patient oral health information
 - presence of plaque and calculus
 - psychological issues, such as fear of being seen without dentures or persisting with ill-fitting dentures for satisfaction of others
 - salivary function
 - smoking
 - social and cultural determinants of health
 - susceptible tooth surfaces
 - transmission of bacteria particularly from family/carer to child
 - teeth misalignment causing trauma to teeth
 - trauma to the mouth as a result of an accident

- healthy eating and drinking recommendations as identified in *National health and medical research council's (NHMRC) Australian dietary guidelines*

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as, using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Link

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTOHC003 Apply and manage use of basic oral health products

Modification History

N/A

Application

This unit describes the skills and knowledge required to apply and manage use of basic oral health products and provide assistance to patients in the use of those products as identified in an individualised oral health care plan.

This unit applies to workers whose work roles specifically include the application of identified oral health products in line with product guidelines and in compliance with all regulations related to the supply and use of regulated products (excluding fluoride varnish).

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards for maintaining infection control and the policies and procedures of the oral health practice or organisation

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes.</i>	<i>Performance criteria specify the level of performance needed to demonstrate achievement of the element</i>
1. Prepare for and participate in the application of basic oral health care products	1.1 Identify and comply with manufacturers' guidelines relating to each product and its application

	1.2 Identify high risk products and comply with specific guidelines relating to their application 1.3 Explain product application process and purpose to patient and/or carer in line with product guidelines, oral health care benefits and any risks 1.4 Obtain feedback from patient to determine that procedure is understood and obtain consent from patient and/or carer to undertake process 1.5 Confirm patient is comfortably positioned according to their individual needs 1.6 Prepare products and equipment as required and check the expiry date on product
2. Apply basic oral health care products	2.1 Determine volume and strength to apply of product in a safe and effective manner in line with oral health care plan and product guidelines 2.2 Supervise and support patient to apply own product where able 2.3 Where assistance is required position self to suit patient or situation 2.4 Ensure application is undertaken using correct size/type applicator at correct location 2.5 Adapt techniques or arrangements outlined in the oral health care plan in case of patient refusal or inability to comply
3. Support oral health and oral hygiene of patients with special care needs	3.1 Support patient with special care needs in line with oral health care plan 3.2 Be aware of common oral health problems associated with patients with palliative care needs and take appropriate action in line with their needs 3.3 Understand oral health problems associated with nil by mouth instructions and take appropriate action in line with patient needs 3.4 Access relevant information on common difficulties associated with dementia that may result in oral health problems and take appropriate action in line with patient needs

	3.5 Update knowledge of common side effects of medication on oral health and initiate follow up care with health practitioner on identified patient needs 3.6 Ensure identified preventive measures are implemented in line with oral health care plan
4. Complete reporting and documentation and evaluate outcomes	4.1 Document and record processes undertaken and report any concerns arising during oral health practices 4.2 Maintain and file documentation using relevant technology 4.3 Evaluate the feedback and outcomes of the processes undertaken in collaboration with health care team to adjust oral health care plan

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTOHC003 Apply and manage use of basic oral health products

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- applied identified oral health products to 3 patients that require special care needs in line with product guidelines and oral health care benefits in compliance with all regulations related to the supply and use of regulated products (excluding fluoride varnish)
- identified and responded at least 1 time to risks associated with applying oral health products including:
 - allergic reaction or sensitivity to product/s
 - injury to soft tissue from product/s

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- relevant state/territory and national government policy and programs and reporting processes for oral health and regulations related to the supply and use of regulated products
- accessibility to services including availability of private and public oral health services, including eligibility for services
- basic anatomy and physiology underpinning oral health, including what is considered healthy and unhealthy
- benefits and risks associated with basic oral health products
- common equipment and aids utilised in the application of oral hygiene products e.g. mouth props
- factors that impact on oral health, including:
 - abuse (neglect of oral health needs)
 - access to dental and health services
 - accumulation of plaque and calculus

- alcohol, licit and illicit drugs and substances, over the counter and herbal treatments
- alcohol misuse
- bacteria in dental plaque
- correct infant feeding practices
- damage from habitual grinding of teeth
- diet and nutrition, including fluids
- fluoride
- general health and wellbeing
- immunosuppressant conditions, HIV, chemotherapy and radiation
- injury to mouth, such as from a seizure
- medical history
- oral piercings
- patient oral health information
- psychological issues, such as fear of being seen without dentures or persisting with ill-fitting dentures for satisfaction of others
- salivary function
- smoking
- social and cultural determinants of health
- susceptible tooth surfaces
- transmission of bacteria particularly from family/carer to child
- trauma to the mouth as a result of an accident
- healthy eating recommendations as identified in the *National health and medical research council's (NHMRC) Australian dietary guidelines*
- individualised oral health care support plans, including terminology
- work health and safety (WHS) issues and procedures, including those related to manual handling and infection control
- oral disease and broad treatment options available
- oral health issues for identified high risk sub-populations
- oral side effects of medications, such as metallic taste in the mouth, dry mouth syndrome and ulcers
- dry mouth syndrome (xerostomia) related to conditions such as diabetes, ageing
- own work role and responsibilities in oral health care
- personal safety and security risks associated with provision of oral hygiene care support

- practical use of oral health products
- principles and practices in undertaking technical skills associated with the application of oral health products
- principles and practices of confidentiality, privacy, respect and consent
- processes and strategies to support people with oral hygiene care needs
- role of carers in relation to oral health care needs of patients
- saliva and its role in the maintenance of oral health:
 - acting as a lubricant
 - delivering calcium, phosphate and fluoride to the tooth surface
 - protecting teeth by neutralising acid
- significance of service setting, including specific contexts, such as providing oral hygiene in a patient care setting or in a patient's private home
- signs and symptoms of an allergic reaction to an oral health product
- specialist oral care and support for patients in circumstances, such as those who:
 - are aged
 - are on nil by mouth instructions
 - are receiving palliative care
 - are undergoing chemotherapy
 - who have enteral feeding, such as via a nasogastric tube or a percutaneous endoscopic gastrostomy (PEG) tube
 - have dementia
 - have epilepsy
 - have intellectual or physical disability
 - have loss of tooth through extraction
 - have loss of tooth through injury
 - have medical or psychiatric conditions
 - have post-surgery or trauma needs
- strategies to minimise personal safety and security risks associated with provision of oral hygiene care support
- symptoms and signs that suggest a need for further assessment and/or treatment
- the interaction between oral health and general health
- basic oral health care products, including:
 - products specified in the patient's individualised oral health care plan, such as:
 - alcohol-free mouthwash

- antibacterial products
- lip moisturiser
- non-medically prescribed therapeutic agents and topical analgesic
- remineralisation products
- saliva substitutes/stimulants:
 - chewing gum
 - gels
 - liquids
 - lozenges
 - sprays
- common oral health problems associated with patients with palliative care needs may include but are not limited to:
 - angular cheilitis
 - candida (thrush)
 - debris
 - dental caries
 - dry mouth and/or lips
 - excessive saliva
 - hairy leukoplakia
 - herpes simplex
 - kaposi sarcoma (HIV patients only)
 - sensitive mouth
 - ulcers, including viral and traumatic

Assessment Conditions

Skills and knowledge must be demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations cannot be provided in the workplace.

The following aspect of the performance evidence must have been demonstrated using 10 simulation scenarios prior to demonstration in the workplace or with members of the general public:

- applying identified oral health products safely and effectively

The following conditions must be met for this unit

- use of suitable equipment and resources, including:
 - age related oral health care resources

- appropriate personal protective equipment (PPE)
- *Dental board of Australia – dental guidelines* on infection control on which the candidate bases the planning process
- oral hygiene self-care aids and technique
- specialised equipment, placebo or simulated oral health products utilised in provision of oral hygiene
- modelling of industry operating conditions, including access to people for the simulated scenarios

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTOHC005 Use basic oral health screening tools

Modification History

N/A

Application

This unit describes the skills and knowledge required to prepare for and conduct authorised oral health screening tests within scope of work role to identify the need for referral to an oral health practitioner or for additional education or instruction in oral health care.

This unit applies to workers in a range of health and community service environments where authorised basic oral health screening is carried out.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards for maintaining infection control, and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria specify the level of performance needed to demonstrate achievement of the element</i>
1. Prepare for and participate in basic routine oral health screening services	1.1 Explain screening procedure and rationale to patient/s, check understanding and obtain consent from patient and/or carer to conduct screening 1.2 Prepare screening materials, instruments and tools

	1.3 Take into account patient's ability to self-report and select most suitable tools and approach 1.4 Comply with directions of screening tool instructions, guidelines and/or training approved by the oral health sector 1.5 Use screening tool to question patients about their oral health and take into account specific individual issues 1.6 Demonstrate an understanding of existing health conditions and impacts on oral health
2. Follow screening tool questioning, observation and recording requirements	2.1 Record and document observations about patient's oral health in appropriate format according to tool and organisation guidelines 2.2 Consult with other health personnel where necessary to confirm or clarify screening results, and record processes and outcomes 2.3 Interpret findings based on screening results and report results to health practitioner or oral health team 2.4 Document reporting processes, use information from patient and/or carer and own observations
3. Review screening process and referral outcomes	3.1 Address identified needs for oral health education and/or assessment in consultation with others and refer where necessary 3.2 Where appropriate, discuss with patients and other relevant stakeholders any issues or obstacles relating to referrals made 3.3 Where screening was unsuccessful report and follow up appropriately 3.4 Clarify screening effectiveness by obtaining feedback from patients and other relevant stakeholders and identify any issues in own use of screening tool/s

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTOHC005 Use basic oral health screening tools

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has completed the following tasks at least once:

- communicated effectively with 5 patients to establish a relationship of trust to provide oral health information, including gaining patient's understanding of how the oral health screening tools are used
- used relevant endorsed oral health screening tool/s and techniques on 5 different patients, including:
 - interpreting and reporting results
 - documentation of findings
 - referral of patients as required

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- how to use the relevant endorsed oral health screening tool/s and techniques including:
 - preparation of screening tools
 - communication strategies to aid in screening instrument questioning
 - evaluation of tool effectiveness
 - follow-up on unsuccessful screening
- oral health screening instruments and ways to respond to the results, including:
 - referral pathways and processes
 - screening tools, procedures and associated rationale for use
 - workplace policies, procedures and programs for screening
- relevant state/territory and national government policy, programs and reporting processes for oral health

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as, using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Link

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTOHC006 Apply fluoride varnish

Modification History

N/A

Application

This unit describes the skills and knowledge required by practitioners working specifically in rural, remote and isolated areas and/or facilities that have knowledge and experience in oral health care, to apply fluoride varnish in line with prescribed treatment as outlined in an individualised oral health care plan and in accordance with relevant jurisdictional, legislative and regulatory requirements.

The unit applies to registered Aboriginal and/or Torres Strait Islander health practitioners, registered nurses and registered enrolled nurses in primary health care settings in rural, remote and isolated areas where the work roles may require the application of fluoride varnish.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards for maintaining infection control, and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria specify the level of performance needed to demonstrate achievement of the element</i>
1. Prepare for the application of fluoride varnish	1.1 Check scope of own work role to ensure it includes application of fluoride varnish as advised by an

	authorised oral health practitioner in an individualised oral health care plan 1.2 Confirm the patient's oral health care plan, developed by an oral health practitioner, specifically includes the application of fluoride varnish and that there are no contraindications to this procedure 1.3 Confirm consent 1.4 Explain fluoride varnish application procedure to patient and/or family/carer and check their understanding of the benefits of fluoride varnish, need for regular applications, and the risks associated with fluoride varnish 1.5 Explain the advantages and disadvantages of fluoride varnish over other procedures 1.6 Prepare fluoride varnish kit and personal protective equipment (PPE) as required
2. Apply fluoride varnish to teeth	2.1 Position the patient for safety and comfort 2.2 Use PPE in accordance with infection control policies and procedures throughout procedure 2.3 Prepare teeth for fluoride varnish application in accordance with product instructions and application protocols 2.4 Dispense appropriate amount of fluoride varnish 2.5 Apply fluoride varnish in correct manner with applicator to teeth as recommended in the oral health care plan
3. Provide information to patient and/or family/carer about post-application advice and follow up requirements	3.1 Advise patient and/or family/carer of the importance of following instructions and recommended guidelines for eating, drinking fluids and brushing/cleaning teeth following fluoride varnish application 3.2 Inform patient and/or family/carer of any expected short term changes in tooth appearance or sensation, including colour, feel or taste 3.3 Provide post-application information to patient and/or family/carer in both verbal and written or picture formats as appropriate to their individual needs or preferences 3.4 Ensure patient and/or family/carer understand oral health practitioner's recommended schedule for ongoing application in line with their individualised oral health care plan

4. Record and document information about the application	4.1 Record and document details of the application undertaken, information provided and any concerns arising during contact with patient and/or family/carer 4.2 Use relevant technology to complete documentation according to organisation's policies and procedures

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTOHC006 Apply fluoride varnish

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- applied fluoride varnish safely and effectively to 5 people in line with product guidelines, jurisdictional legislation and regulation relating to fluoride schedule, supply, authorisation and disposal, including:
 - prepared self and the client using personal protective equipment against risks associated with the use of fluoride varnish
 - identified and responded to risks associated with applying fluoride varnish
 - evaluated own capabilities in the application of fluoride varnish skills

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- fluoride varnish refers to:
 - a highly concentrated form of fluoride which is applied to tooth's surface as a type of topical fluoride therapy. may be applied to enamel, dentine or cementum of tooth and can be used to help prevent decay, remineralise tooth surface and treat dentine hypersensitivity
 - not permanent varnish but due to adherent nature will stay in contact with tooth surface for several hours
- accessibility to services, including availability of private and public oral health services and eligibility for services
- awareness of relevant jurisdictional legislation and regulation relating to fluoride, including schedule, supply, authorisation and disposal
- application of fluoride varnish in the correct manner refers to:
 - keeping client mouth open
 - maintaining moisture control
 - retracting lip and cheek, wiping and applying a thin layer of varnish to the teeth as prescribed in the oral health care plan

- ensuring varnish is applied without contact with other tissues
 - never dispensing product in excess to that stated in the oral health care plan
- how to reflect on own level of knowledge to achieve desirable outcomes and maintain own capabilities
- awareness of risks associated with fluoride varnish
- basic anatomy and physiology underpinning oral health and hygiene
- causes and prevention of common dental diseases especially dental caries
- common equipment utilised in the application of fluoride
- effective self-care practices for oral health, including cause, control and prevention of dental plaque
- emergency procedures that may be required during the application of fluoride varnish
- factors that impact on oral health, including:
 - abuse (neglect of oral health needs)
 - access to dental and health services
 - alcohol, licit and illicit drugs and substances over the counter and herbal treatments
 - bacteria in dental plaque
 - correct infant feeding practices
 - damage from habitual grinding of teeth
 - diet and nutrition, including fluids and excessive intake of sugar
 - fluoride
 - general health and wellbeing
 - immunosuppressant conditions, HIV, chemotherapy and radiation
 - injury to mouth, such as from a seizure
 - medical history
 - oral piercings
 - patient oral health information
 - presence of plaque and calculus
 - psychological issues, such as fear of being seen without dentures or persisting with ill-fitting dentures for satisfaction of others
 - salivary function
 - smoking
 - social and cultural determinants of health
 - susceptible tooth surfaces
 - transmission of bacteria particularly from family/carer to child

- teeth misalignment causing trauma to teeth
 - trauma to the mouth as a result of an accident
- work health and safety (WHS) issues and procedures, including those related to manual handling of fluoride varnish and personal safety and security risks associated with provision of fluoride varnish application
- own work role and responsibilities in the application of fluoride varnish
- principles and practices of confidentiality, privacy and consent of fluoride treatment
- evaluation criteria for monitoring effectiveness of fluoride varnish application program
- role of significant others in supporting patient's oral health care needs
- safe application of fluoride varnish
- safe storage of products
- relationship between oral health and general health

Assessment Conditions

Skills and knowledge must be demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely.

The following aspect of the performance evidence must have been demonstrated using simulation prior to demonstration in the workplace or with members of the general public

- apply fluoride varnish safely and effectively

Note: Where state/territory legislation prevents practice in the workplace, simulated assessment environments may only be used in place of workplace assessment.

The following conditions must be met for this unit

- use of suitable equipment and resources, including:
 - appropriate personal protective equipment (PPE)
 - oral hygiene self-care aids and technique
 - placebo fluoride varnish
 - specialised equipment utilised in the application of fluoride varnish
 - modelling of industry operating conditions, including access to people for the simulated scenarios

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Link

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTOHC007 Recognise and respond to oral health issues

Modification History

N/A

Application

This unit describes the performance outcomes, skills and knowledge required to identify variations and recognise oral health issues through a visual check, observation of patient behaviour and habits, signs and symptoms and physical condition of patients. This enables the candidate to respond appropriately to the clinical findings to initiate follow up oral health care.

This unit applies to workers in a range of health and community services environments where their work role requires them to recognise and respond to oral health issues.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Oral Health

Elements and Performance Criteria

Elements	Performance criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

1. Identify variations in patient behaviour and habits.	1.1. Identify opportunities to observe patient behaviour, physical functions, capabilities and habits that may indicate oral health issues or associated pain or discomfort. 1.2. Observe, listen for self-reports and question patient, family or carer to determine whether the patient is experiencing pain or discomfort that may be associated with oral health issues. 1.3. Access relevant information on contributing factors that may produce variation from normal behaviour. 1.4. Apply safe manual handling techniques to support patients with special care needs.
2. Undertake basic visual oral check and questioning.	2.1. Obtain consent from the patient, family or carer to conduct basic visual oral check and questioning. 2.2. Ensure comfort of patient by developing trust and rapport, adapting environment based on patient needs. 2.3. Provide support for patient's head or chin if necessary, to enhance visual access without creating discomfort for the patient. 2.4. Seek assistance from patient to open their own mouth to limit hand contact inside the mouth. 2.5. Prepare and perform basic visual oral checks in line with own work role and use of standard precautions. 2.6. Identify signs and symptoms of oral health issues that may indicate variation from normal and actively listen to and be aware of self-reports.
3. Follow up and promote ongoing oral health care.	3.1. Complete documentation and reporting processes, using information from patient and family or carer or other relevant people as well as own observations in relation to oral health issues. 3.2. Discuss oral health issues with patient and family or carer in line with organisational policies and procedures and respecting patient priorities and choices. 3.3. Take appropriate action within work role, including liaising with supervisor in consultation with patient to ensure appropriate referral occurs.

	• 3.4. Use focussed communication strategies to provide information relevant to promoting and maintaining good oral health. • 3.5. Provide instruction to support patients to take a self-care approach to oral health in line with individual needs where possible. • 3.6. Identify and address key barriers to management or self-management of oral health. • 3.7. Review and monitor oral health issues.

•

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTOHC007 Recognise and respond to oral health issues

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- perform a visual oral health check on five different patients, including:
 - identifying any signs and symptoms related to oral health care issues
 - gathering relevant information from visual check and questioning to initiate appropriate follow up oral health care
 - using safe manual handling techniques as required when working with patients with special care needs.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- basic anatomy and physiology underpinning oral health, including what is considered healthy and unhealthy
- patient behaviour and habits which contribute to oral health issues
- causes and prevention of tooth decay, gum disease and tooth wear, including erosion, abrasion and attrition
- effective self-care practices for oral health including cause, control and prevention of dental plaque
- State or Territory and national government policy and programs and reporting processes for oral health accessibility to services, including availability of private and public oral health services, including eligibility for services.
- role of oral health professionals
- factors that impact on oral health, including:
 - abuse including neglect of oral health needs
 - access to dental and health services
 - alcohol, licit and illicit drugs and substances, over the counter and herbal treatments
 - correct infant feeding practices

- damage from habitual grinding of teeth
- diet and nutrition, including fluids and excessive intake of sugar
- fluoride
- general health and wellbeing
- immunosuppressant conditions, HIV, chemotherapy and radiation
- injury to mouth, including from a seizure
- medical history
- oral piercings
- patient oral health information
- presence of plaque and calculus
- psychological issues, including fear of being seen without dentures or persisting with ill-fitting dentures for satisfaction of others
- salivary function
- smoking
- social and cultural determinants of health
- susceptible tooth surfaces
- transmission of bacteria particularly from family or carer to child
- teeth misalignment causing trauma to teeth
- trauma to mouth as a result of an accident
- communication strategies that focus on patient needs including mental health and disabilities
- safe manual handling techniques
- organisational policies and procedures for:
 - patient privacy
 - confidentiality of patient information and disclosure
 - documentation and reporting
- healthy eating recommendations as identified in the National Health and Medical Research Council's (NHMRC) Australian dietary guidelines.

Assessment Conditions

Skills must be demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely.

The following aspect of the performance evidence must have been demonstrated using ten simulation scenarios prior to demonstration in the workplace or with members of the general public:

- performing a visual oral health check

Assessment must ensure:

- access to suitable equipment and resources, including:
 - appropriate personal protective equipment (PPE)
- access to current Dental board of Australia (DBA) and Australian Health Practitioner Regulation Agency (AHPRA) guidelines and practice standards
- access to current Dental Board of Australia (DBA) infection control and record keeping guidelines
- access to National Health and Medical Research Council's (NHMRC) Australian dietary guidelines
- access to organisational policies and procedures for:
 - patient privacy
 - confidentiality of patient information and disclosure
 - documentation and reporting
- modelling of industry operating conditions including access to people for simulations and scenarios in oral health care work.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Link

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTOHC008 Inform and support patients and groups about oral health

Modification History

N/A

Application

This unit describes the performance outcomes, skills and knowledge required to provide practical information and instruction to patients and groups to promote and support good oral health care practices. This enables the candidate to provide health promotion and practical demonstration and instruction of oral hygiene practices and techniques.

This unit applies to workers in a range of health and community services environments whose work roles provide them with an opportunity to promote and support good oral health care.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit sector(s)

Oral Health

Elements and Performance Criteria

Elements	Performance criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

1. Develop and maintain understanding of oral health information and issues.	1.1. Use credible sources of oral health information to interpret what constitutes good oral health. 1.2. Maintain current knowledge on the risk factors and outcomes associated with poor oral health and hygiene practices. 1.3. Identify oral health hygiene techniques used to address specific patient needs and preferences. 1.4. Demonstrate own commitment to oral health through awareness and application of effective self-care oral health practices. 1.5. Recognise social and cultural determinants of health as well as varying individual motivations and capacity to carry out good oral health care practices.
2. Provide information related to oral health using a person-centred approach.	2.1. Address agreed outcomes in planning for oral health care needs by explaining the link between oral health and general health. 2.2. Prepare information so that it is relevant to the target audience and use a person-centred approach to identify and respond effectively to individual needs. 2.3. Engage and respond to concerns of patient by providing oral health care information, including issues associated with poor oral health and hygiene. 2.4. Negotiate with patient a flexible approach to delivery of oral health information. 2.5. Explain relevant information on the importance of regular oral checks with an oral health practitioner.
3. Provide specific information and instruction on oral hygiene self-care, techniques and appropriate aids.	3.1. Collect data specific to patient by questioning, observing and accessing available information from patient or carer. 3.2. Instruct and explain tooth brushing and soft tissue techniques and use of appropriate aids, detailing their advantages in terms of achieving and maintaining effective oral health.

	3.3. Demonstrate and provide instruction on the care of partial and full dentures. 3.4. Identify and implement opportunities for participants to demonstrate learned skills. 3.5. Encourage and support patients, including people with special needs to follow effective self-care techniques for oral hygiene practices to make knowledge, attitude and behavioural changes where possible.
4. Evaluate effectiveness of oral health information session.	4.1. Obtain feedback from the patient or group to determine whether the information is correctly received and understood. 4.2. Reflect on outcomes and implement changes to information or delivery processes based on feedback.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Mapping information updated. Updated to reflect current industry practices and terminology.	Equivalent

Assessment Requirements for HLTOHC008 Inform and support patients and groups about oral health

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- communicate effectively to at least one individual patient and a group of at least five patients to provide information that addresses their oral health care needs, including:
 - impact of oral health on general health and wellbeing
 - causes and prevention of dental plaque, dental caries, dental erosion and periodontal disease and dental trauma
 - diet and nutrition
 - denture care on patients with dentures
- for each of the above, evaluate how well target audience has understood the oral health and self-care practice information provided
- for each of the above, reflect on and improve own level and application of skills and knowledge to motivate target audience and achieve key oral health outcomes.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- basic anatomy and physiology underpinning oral health, including what is considered healthy and unhealthy.
- patient behaviour and habits which contribute to oral health issues
- causes and prevention of tooth decay, gum disease and tooth wear including erosion, abrasion and attrition
- what constitutes good oral health:
 - breath without offensive odour
 - inflammation and lesion-free soft tissue in mouth
 - intact and stable teeth without cavities
 - moist lips without chapping
 - no build-up of food, calculus or plaque
 - no oral pain

- pink, moist, uncoated tongue
 - watery plentiful saliva
 - well-fitting dentures
- accessibility to services, including availability of private and public oral health services and eligibility for services
- effective self-care practices for oral health including cause, control and prevention of dental plaque
- factors that impact on oral health, including:
 - abuse including neglect of oral health needs
 - access to dental and health services
 - alcohol, licit and illicit drugs and substances, over the counter and herbal treatments
 - bacteria in dental plaque
 - correct infant feeding practices.
 - damage from habitual grinding of teeth.
 - diet and nutrition, including fluids and excessive intake of sugar.
 - fluoride
 - general health and wellbeing
 - immunosuppressant conditions, HIV, chemotherapy and radiation
 - injury to mouth, including from a seizure
 - medical history
 - oral piercings
 - patient oral health information
 - presence of plaque and calculus
 - psychological issues, including fear of being seen without dentures or persisting with ill-fitting dentures for satisfaction of others
 - salivary function.
 - smoking
 - social and cultural determinants of health
 - susceptible tooth surfaces
 - transmission of bacteria particularly from family or carer to child
 - teeth misalignment causing trauma to teeth
 - trauma to the mouth as a result of an accident
- healthy eating and drinking recommendations as identified in National Health and Medical Research Council's (NHMRC) Australian dietary guidelines

- processes to obtain feedback and evaluate health information sessions for future improvement.

Assessment Conditions

Skills must be demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies.

Assessment must ensure:

- access to suitable facilities, equipment and resources including:
 - credible sources of information on oral health
 - oral health equipment and aids
 - dentures
- access to current Dental Board of Australia (DBA) infection control and record keeping guidelines
- access to National Health and Medical Research Council's (NHMRC) Australian dietary guidelines
- modelling of industry operating conditions including access to people for simulations and scenarios in oral health care work

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Link

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTOHC009 Apply and use basic oral health products

Modification History

N/A

Application

This unit describes the performance outcomes, skills and knowledge required to apply and use basic oral health products and provide assistance to patients in the use of those products as identified in an individualised oral health care plan.

This unit applies to workers whose work roles specifically include the application of identified oral health products in line with product guidelines and in compliance with all regulations related to the supply and use of regulated products, excluding fluoride varnish.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Oral Health

Elements and Performance Criteria

Elements	Performance criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

1. Prepare for and participate in the application of basic oral health products.	1.1. Identify and comply with manufacturers' guidelines relating to each product and its application. 1.2. Identify high risk products and comply with specific guidelines relating to their application. 1.3. Explain product application process and purpose to patient and carer in line with product guidelines, oral health care benefits and any risks. 1.4. Obtain feedback from patient to determine that procedure is understood and obtain consent from patient or carer to undertake process. 1.5. Confirm patient is comfortably positioned according to individual needs. 1.6. Prepare products and equipment as required and check the expiry date on product.
2. Apply basic oral health products.	2.1. Determine volume and strength of product to apply in a safe and effective manner in line with oral health care plan and product guidelines. 2.2. Supervise and support patient to apply own product where able. 2.3. Where assistance is required position self to suit patient or situation. 2.4. Ensure application is undertaken using correct size and type of applicator at correct location. 2.5. Adapt techniques or arrangements outlined in the oral health care plan in case of patient refusal or inability to comply.
3. Support oral health and oral hygiene of patients with special care needs.	3.1. Support patient with special care needs in line with oral health care plan. 3.2. Identify common oral health problems associated with patients with palliative care needs and take appropriate action in line with their needs.

	3.3. Identify oral health problems associated with nil by mouth instructions and take appropriate action in line with patient needs. 3.4. Access relevant information on common difficulties associated with dementia that may result in oral health problems and take appropriate action in line with patient needs. 3.5. Update knowledge of common side effects of medication on oral health and initiate follow up care with health practitioner on identified patient needs. 3.6. Ensure identified preventive measures are implemented in line with oral health care plan.
4. Complete reporting and documentation and evaluate outcomes.	4.1. Document and record processes undertaken and report any concerns arising during oral health practices. 4.2. Maintain and file documentation using relevant technology. 4.3. Evaluate the feedback and outcomes of the processes undertaken in collaboration with health care team to adjust oral health care plan.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTOHC009 Apply and use basic oral health products

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- apply oral health products excluding fluoride varnish, to at least three patients that require special care needs in line with product guidelines and oral health care benefits and in compliance with all regulations related to the supply and use of regulated products
- identify and respond to risks associated with applying oral health products including:
 - allergic reaction or sensitivity to products
 - injury to soft tissue from products.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- relevant State or Territory and national government policy and programs and reporting processes for oral health and regulations related to the supply and use of regulated products
- accessibility to services including availability of private and public oral health services, including eligibility for services
- basic anatomy and physiology underpinning oral health, including what is considered healthy and unhealthy
- benefits and risks associated with basic oral health products
- common equipment and aids utilised in the application of oral hygiene products including mouth props
- factors that impact on oral health, including:
 - abuse or neglect of oral health needs
 - access to dental and health services
 - accumulation of plaque and calculus
 - alcohol, licit and illicit drugs and substances, over the counter and herbal treatments.
 - alcohol misuse.

- bacteria in dental plaque
- correct infant feeding practices
- damage from habitual grinding of teeth
- diet and nutrition, including fluids
- fluoride
- general health and wellbeing
- immunosuppressant conditions, HIV, chemotherapy and radiation
- injury to mouth, including from a seizure
- medical history
- oral piercings
- patient oral health information
- psychological issues, including fear of being seen without dentures or persisting with ill-fitting dentures for satisfaction of others
- salivary function
- smoking
- social and cultural determinants of health
- susceptible tooth surfaces
- transmission of bacteria particularly from family or carer to child
- trauma to the mouth as a result of an accident
- healthy eating recommendations as identified in the National Health and Medical Research Council's (NHMRC) Australian dietary guidelines.
- individualised oral health care support plans, including terminology
- work health and safety (WHS) issues and procedures, including those related to manual handling and infection control
- oral disease and broad treatment options available
- oral health issues for identified high risk sub-populations
- oral side effects of medications, including metallic taste in the mouth, dry mouth syndrome and ulcers
- dry mouth syndrome or xerostomia related to conditions including diabetes, ageing
- own work role and responsibilities in oral health care
- personal safety and security risks associated with provision of oral hygiene care support
- practical use of oral health products
- principles and practices in undertaking technical skills associated with the application of oral health products

- principles and practices of confidentiality, privacy, respect and consent
- processes and strategies to support people with oral hygiene care needs
- role of carers in relation to oral health care needs of patients
- saliva and its role in the maintenance of oral health:
 - acting as a lubricant
 - delivering calcium, phosphate and fluoride to the tooth surface
 - protecting teeth by neutralising acid
- significance of service setting, including specific contexts, including providing oral hygiene in a patient care setting or in a patient's private home
- signs and symptoms of an allergic reaction to an oral health product
- specialist oral care and support for patients in circumstances, including those who:
 - are aged
 - are on nil by mouth instructions
 - are receiving palliative care
 - are undergoing chemotherapy
 - who have enteral feeding, including via a nasogastric tube or a percutaneous endoscopic gastrostomy (PEG) tube
 - have dementia
 - have epilepsy
 - have intellectual or physical disability
 - have loss of tooth through extraction
 - have loss of tooth through injury
 - have medical or psychiatric conditions
 - have post-surgery or trauma needs
- strategies to minimise personal safety and security risks associated with provision of oral hygiene care support
- symptoms and signs that suggest a need for further assessment or treatment
- the interaction between oral health and general health
- basic oral health care products, including:
 - products specified in the patient's individualised oral health care plan, including:
 - alcohol-free mouthwash
 - antibacterial products
 - lip moisturiser

- non-medically prescribed therapeutic agents and topical analgesic
- remineralisation products
- saliva substitutes or stimulants:
 - chewing gum
 - gels
 - liquids
 - lozenges
 - sprays
- common oral health problems associated with patients with palliative care needs including but not limited to:
 - angular cheilitis
 - candida or thrush
 - debris
 - dental caries
 - dry mouth and lips
 - excessive saliva
 - hairy leukoplakia
 - herpes simplex
 - kaposi sarcoma including HIV patients
 - sensitive mouth
 - ulcers, including viral and traumatic
 - processes to document and evaluate oral health practices.

Assessment Conditions

Skills must be demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations cannot be provided in the workplace.

The following aspect of the performance evidence must have been demonstrated using ten simulation scenarios prior to demonstration in the workplace or with members of the general public:

- applying identified oral health products safely and effectively

Assessment must ensure:

- access to suitable equipment and resources, including:
 - age related oral health care resources
 - appropriate personal protective equipment (PPE)
 - oral hygiene self-care aids and technique

- specialised equipment, placebo or simulated oral health products utilised in provision of oral hygiene
- access to current Dental board of Australia (DBA) and Australian Health Practitioner Regulation Agency (AHPRA) guidelines and practice standards
- access to current Dental Board of Australia (DBA) infection control and record keeping guidelines
- access to National Health and Medical Research Council's (NHMRC) Australian dietary guidelines
- modelling of industry operating conditions including access to people for simulations and scenarios in oral health care work

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTOHC010 Use basic oral health screening tools

Modification History

N/A

Application

This unit describes the performance outcomes, skills and knowledge required to prepare for and conduct authorised oral health screening tests within scope of work role to identify the need for referral to an oral health practitioner or for additional education or instruction in oral health care.

This unit applies to workers in a range of health and community service environments where authorised basic oral health screening is carried out within a structured oral health care plan.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements	Performance criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for and participate in basic routine	1.1. Explain screening procedure and rationale to patients, check understanding and

oral health screening services.	obtain consent from patient or carer to conduct screening. 1.2. Prepare screening materials, instruments and tools. 1.3. Determine patient ability to self-report and select most suitable tools and approach. 1.4. Comply with directions of screening tool instructions, guidelines or training approved by the oral health sector. 1.5. Use screening tool to question patients about their oral health and take into account specific individual issues.
2. Follow screening tool questioning, observation and recording requirements.	2.1. Record and document observations about patient oral health according to tool and organisation guidelines. 2.2. Consult with other health personnel where necessary to confirm or clarify screening results and record processes and outcomes. 2.3. Interpret findings based on screening results and report results to health practitioner or oral health team. 2.4. Document reporting processes using information from patient or carer and own observations.
3. Review screening process and referral outcomes.	3.1. Address identified needs for oral health education or assessment in consultation with others and refer where necessary. 3.2. Discuss any issues or obstacles relating to referrals with patients and other relevant stakeholders. 3.3. Where screening was unsuccessful report and follow up according to organisational policies and procedures. 3.4. Clarify screening effectiveness by obtaining feedback from patient and other relevant stakeholders and identify any issues in own use of screening tools.

Assessment Requirements for HLTOHC010 Use basic oral health screening tools

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- communicate effectively with at least five patients to establish a relationship of trust and provide oral health information, including gaining patient's understanding of how the oral health screening tools are used
- use relevant endorsed oral health screening tools and techniques on five different patients, including:
 - interpreting and reporting results
 - documentation of findings
 - referral of patients as required.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- how to use the relevant endorsed oral health screening tools and techniques including:
 - preparation of screening tools
 - communication strategies to aid in screening instrument questioning
 - evaluation of tool effectiveness
 - follow-up on unsuccessful screening
- oral health screening instruments and ways to respond to the results, including:
 - referral pathways and processes
 - screening tools, procedures and associated rationale for use
 - workplace policies, procedures and programs for screening
- impacts of existing health conditions on oral health
- relevant National and State or Territory government policy, programs and reporting processes for oral health.

Assessment Conditions

Skills must be demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies.

Assessment must ensure:

- access to suitable facilities, equipment and resources including:
 - oral health screening tools and instruments
- access to current Dental Board of Australia (DBA) and Australian Health Practitioner Regulation Agency (AHPRA) guidelines
- access to current Dental Board of Australia (DBA) infection control and record keeping guidelines
- modelling of industry operating conditions including access to people for simulations and scenarios in oral health care work

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

HLTOHC011 Apply fluoride varnish

Modification History

N/A

Application

This unit describes the performance outcomes, skills and knowledge required by practitioners and dental assistants typically working in rural, remote and isolated areas or facilities that have knowledge and experience in oral health care, to apply fluoride varnish in line with prescribed treatment as outlined in an individualised oral health care plan and in accordance with relevant jurisdictional, legislative and regulatory requirements.

The unit applies to dental assistants, registered Aboriginal and/or Torres Strait Islander health practitioners, registered nurses and registered enrolled nurses in primary health care settings in rural, remote and isolated areas where the work roles may require the application of fluoride varnish.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian standards for maintaining infection control, and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Oral Health

Elements and Performance Criteria

Elements	Performance criteria

<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for the application of fluoride varnish.	1.1. Check scope of own work role to ensure it includes application of fluoride varnish as advised by an authorised oral health practitioner in an individualised oral health care plan. 1.2. Confirm the patient oral health care plan, developed by an oral health practitioner, specifically includes the application of fluoride varnish and that there are no contraindications to this procedure. 1.3. Explain fluoride varnish application procedure to patient and family or carer and check their understanding of the benefits of fluoride varnish, need for regular applications, and the risks associated with fluoride varnish. 1.4. Explain the advantages and disadvantages of fluoride varnish over other procedures. 1.5. Confirm patient consent. 1.6. Prepare fluoride varnish kit and personal protective equipment (PPE) as required by patient, practitioner and self.
2. Apply fluoride varnish to teeth.	2.1. Position the patient for safety and comfort. 2.2. Use PPE in accordance with infection control policies and procedures throughout procedure. 2.3. Prepare teeth for fluoride varnish application in accordance with product instructions and application protocols. 2.4. Dispense appropriate amount of fluoride varnish. 2.5. Apply fluoride varnish in correct manner with applicator to teeth as recommended in the oral health care plan.
3. Provide information to patient and family or carer about post-application	3.1. Advise patient, family or carer of the importance of following instructions and recommended guidelines for eating, drinking

advice and follow up requirements.	fluids and brushing and cleaning teeth following fluoride varnish application. • 3.2. Inform patient and family or carer of any expected short-term changes in tooth appearance or sensation, including colour, feel or taste. • 3.3. Provide post-application information to patient and family or carer in both verbal and written or picture formats as required by their individual needs or preferences. • 3.4. Ensure patient and family or carer understand oral health practitioner's recommended schedule for ongoing application in line with their individualised oral health care plan.
• 4. Record and document information about the application.	• 4.1. Record and document details of the application undertaken, information provided and any concerns arising during contact with patient and family or carer. • 4.2. Use relevant technology to complete documentation according to organisational policies and procedures.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

		Training Packages. Mapping information updated. Updated to reflect current industry practices and terminology.	

Assessment Requirements for HLTOHC011 Apply fluoride varnish

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- apply fluoride varnish safely and effectively to at least five people in line with product guidelines, jurisdictional legislation and regulation relating to fluoride schedule, supply, authorisation and disposal, including:
 - preparing self and the patient using personal protective equipment against risks associated with the use of fluoride varnish
 - identifying and responding to risks associated with applying fluoride varnish.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- characteristics and uses of fluoride varnish including:
 - topical fluoride therapy for enamel, dentine or cementum of tooth
 - non-permanent, but adherent nature to stay in contact with tooth surface for several hours
 - use in prevention of decay
 - use in remineralising tooth surface
 - use in treating dentine hypersensitivity
 - risks associated with fluoride varnish
- accessibility to services, including availability of private and public oral health services and eligibility for services
- awareness of relevant jurisdictional legislation and regulation relating to fluoride, including schedule, supply, authorisation and disposal
- processes for correct application of fluoride varnish:
 - keeping client mouth open
 - maintaining moisture control
 - retracting lip and cheek, wiping and applying a thin layer of varnish to the teeth as prescribed in the oral health care plan

- ensuring varnish is applied without contact with other tissues
 - never dispensing product in excess to that stated in the oral health care plan
- techniques for reflecting on own level of skills and knowledge to achieve desirable outcomes and maintain own capabilities
- basic anatomy and physiology underpinning oral health and hygiene
- causes and prevention of common dental diseases especially dental caries
- common equipment utilised in the application of fluoride
- effective self-care practices for oral health, including cause, control and prevention of dental plaque
- emergency procedures that may be required during the application of fluoride varnish
- factors that impact on oral health, including:
 - abuse including neglect of oral health needs
 - access to dental and health services
 - alcohol, licit and illicit drugs and substances over the counter and herbal treatments
 - bacteria in dental plaque
 - correct infant feeding practices
 - damage from habitual grinding of teeth
 - diet and nutrition, including fluids and excessive intake of sugar
 - fluoride
 - general health and wellbeing.
 - immunosuppressant conditions, HIV, chemotherapy and radiation
 - injury to mouth, including from a seizure
 - medical history
 - oral piercings
 - patient oral health information
 - presence of plaque and calculus
 - psychological issues, including fear of being seen without dentures or persisting with ill-fitting dentures for satisfaction of others
 - salivary function
 - smoking
 - social and cultural determinants of health
 - susceptible tooth surfaces
 - transmission of bacteria particularly from family or carer to child
 - teeth misalignment causing trauma to teeth

- trauma to the mouth as a result of an accident
- work health and safety (WHS) issues and procedures, including those related to manual handling of fluoride varnish and personal safety and security risks associated with provision of fluoride varnish application
- current Dental Board of Australia (DBA) infection control and record keeping guidelines
- National and State or Territory infection control guidelines and procedures
- correct use of personal protective equipment
- own work role and responsibilities in the application of fluoride varnish
- principles and practices of confidentiality, privacy and consent of fluoride treatment
- evaluation criteria for monitoring effectiveness of fluoride varnish application program
- role of significant others in supporting patient's oral health care needs
- safe application of fluoride varnish
- safe storage of products
- relationship between oral health and general health
- organisational policies and procedures for documentation and reporting.

Assessment Conditions

Skills must be demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely.

The following aspect of the performance evidence must have been demonstrated using simulation prior to demonstration in the workplace or with members of the general public.

- apply fluoride varnish safely and effectively.

Note: Where State or Territory legislation prevents practice in the workplace, simulated assessment environments may be used in place of workplace assessment.

Assessment must ensure:

- access to suitable equipment and resources, including:
 - appropriate personal protective equipment (PPE)
 - oral hygiene self-care aids and technique
 - placebo fluoride varnish
 - specialised equipment utilised in the application of fluoride varnish
- access to current Dental Board of Australia (DBA) and Australian Health Practitioner Regulation Agency (AHPRA) guidelines and practice standards

- access to current Dental Board of Australia (DBA) infection control and record keeping guidelines
- access to National and State or Territory infection control guidelines and procedures
- modelling of industry operating conditions including access to people for simulations and scenarios in oral health care work

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Link

HLTOPD001 Provide advice on optical appliances

Modification History

N/A

Application

This unit describes the skills and knowledge required to determine client optical needs from prescriptions, and provide detailed technical advice on appliances.

This unit applies to optical dispensers who work according to prescriptions provided by optometrists or ophthalmologists.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine client optical needs	1.1 Access and correctly interpret prescription or customer record 1.2 Determine style and performance requirements in consultation with the client

	1.3 Take and record accurate client measurements 1.4 Identify particular challenges or special needs of the client in relation to product options 1.5 Identify opportunities to suggest new or innovative products 1.6 Select products that meet client optical needs
2. Provide appliance information to client	2.1 Provide accurate and current style and performance details about available appliance options 2.2 Explain how the optical appliance will meet visual, functional and cosmetic needs 2.3 Provide accurate details of product costs 2.4 Involve the client in the decision making process and provide opportunities to ask questions and discuss concerns 2.5 Record advice provided according to organisation requirements

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTOPD001 Provide advice on optical appliances

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 100 hours of direct client contact work
- provided advice on optical appliances to at least 5 different clients
- provided advice on both spectacles and contact lenses
- provided sound technical advice on options to clients taking account of:
 - weight
 - lens thickness
 - centration
 - curvature

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- industry context for provision of advice on optical appliances, including:
 - industry structure and profile
 - interrelationships between different parts of the industry
 - modes of optical practice
 - how dispensaries and laboratories operate
- terminology used to describe optical appliances, their features and use
- legal and ethical considerations for providing optical advice to clients:
 - duty of care
 - informed consent
 - privacy, confidentiality and disclosure
 - records management

- work role boundaries – responsibilities and limitations of different industry roles
 - work health and safety
- needs of different client groups
 - children and youth
 - adults of both genders
 - older people
- measuring techniques and requirements
- ways to assist clients select the most appropriate optical appliance, including:
 - how to assess the clients needs and interpret the requirements of different types of prescription
 - the principles of cosmetics and fashion to spectacle selection
 - the important parameters of lifestyle and image in the selection of spectacles
 - how to select suitable frames for clients and their prescription
 - how to select a suitable lens and lens treatment for the client
 - the inter-pupillary distance and multifocal fitting heights
 - basic facial fitting and adjustment of spectacle frames and mounts
- concepts and principles behind the design of spectacle lenses including:
 - different categories of lenses and frames
 - examples of current lens designs
 - how lens aberrations can be corrected or reduced
 - how to determine and specify appropriate lens design
 - the design and performance of spectacle lenses
 - the function of aspheric lens designs
 - the six main types of aberrations which are encountered in specific lenses
- types of spectacle frames and their performance characteristics

Assessment Conditions

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations have not been provided in the workplace. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - back vertex distance (BVD) gauge or rule
 - frame adjusting tools
 - opticians lens measure

- parallel rule or equivalent
- pupillary distance (PD) rule
- pupillometer
- spectacle frames
- spectacle lenses
- modelling of industry operating conditions, including provision of services to the general public

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Link

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTOPD002 Dispense optical appliances

Modification History

N/A

Application

This unit describes the skills and knowledge required to use specialised optical knowledge to confirm and check appliance selection, fit appliances and follow procedures to complete the dispensing process.

This unit applies to optical dispensers who work according to prescriptions provided by optometrists or ophthalmologists.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Confirm appliance selection	1.1 Check appliance selection against prescription details or customer record 1.2 Confirm selection with client

	1.3 Gain consent from client for fitting where applicable
2. Fit optical appliances	2.1 Organise required fitting equipment and materials 2.2 Correctly interpret technical aspects of customer requirements from records 2.3 Follow standard fitting procedures and take account of special client needs 2.4 Adjust frames to client to optimise visual performance 2.5 Ensure optical appliances meet hygiene standards 2.6 Give the client the opportunity to voice concerns in relation to optical appliance and make appropriate response
3. Instruct client on wear and care	3.1 Provide client with details about how to wear the appliance 3.2 Offer information about appliance care routines
4. Finalise dispensing process	4.1 Complete financial transactions in accordance with relevant policies and procedures 4.2 Follow correct procedures for client rebates 4.3 Complete and store records in accordance with relevant policies, procedures and confidentiality requirements 4.4 Offer follow up services in accordance with organisation procedures

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTOPD002 Dispense optical appliances

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 100 hours of direct client contact work
- dispensed optical appliances to at least 5 different clients

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations for dispensing optical advice to clients:
 - duty of care
 - informed consent
 - privacy, confidentiality and disclosure
 - records management
 - work role boundaries – responsibilities and limitations
 - work health and safety
- how to interpret and transpose an optical prescription
- anatomy and physiology of the eyes, including:
 - common disorders of the eye
 - structure of the human eye and its physiological functioning
 - the procedures involved in cataract extraction with intra-ocular lenses, including multifocal and toric IOL and factors that may influence the dispensing process
 - implant and refractive surgery
- basic theory of light, including:
 - basic calculation of angles of incidence, refraction, deviation and critical angles

- how light is propagated and how commonly observed effects may occur
 - various light-induced phenomena
- ophthalmic prism, including:
 - effects of ophthalmic prism upon the eyes, and the need for ophthalmic prism in prescriptions
 - solving by both calculation and graphical methods, a variety of prism problems
 - the relationship between lens power, decentration and prism
 - the use of a tangent scale to measure ophthalmic prism
 - effect produced by varying the index, diameter, prismatic specifications, or form of a lens
 - the processes and assessment of vision, colour vision and perception
 - optical calculations and measurements, including measurements to determine the inter-pupillary distance and fitting heights for all lenses
 - effects produced by varying the index, diameter, prismatic specifications and form of a lens
- features of spherical lenses and their suitability for different customers, including:
 - concepts of vergence and their use in optical calculations
 - how to construct diagrams to illustrate image formation using simple ray-tracing techniques
 - refractive effects of a lens as the sum of its 2 surface powers
 - refractive properties of spherical lens surfaces
- features of astigmatic lenses and their suitability for different customers, including:
 - how to perform calculations related to the application of astigmatic lenses in optical prescriptions
 - formulae required to calculate the centre and edge thickness of spherical and astigmatic lenses
 - nature of astigmatism
 - the difference between cylindrical and sphero-cylindrical for astigmatic conditions
 - various forms of astigmatic lenses
- features of contact lenses and their suitability for different customers, including:
 - acceptable hygiene standards
 - examples of causes of wearing problems and lens hygiene and the correct procedures for lens maintenance
 - relevant Quality Assurance Standards
 - the correct methods of contact lens handling, insertion and removal

- the parameters of contact lenses from prescription data supplied
 - how lenses are manufactured
 - features and options for multifocal and progressive lenses
- commonly occurring problems and potential solutions in a dispensing situation
- requirements of dispensing spectacles to clients with special or complex needs, including:
 - commonly occurring problems in a dispensing situation and possible solutions
 - the appropriate action to be taken according to prescription requirements and the special needs of the client
 - visual screening
- how to determine criteria influencing dispensing procedures necessary for aspheric lenses
- referral protocol and procedures
- health fund and rebate requirements

Assessment Conditions

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations have not been provided in the workplace. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - back vertex distance (BVD) gauge or rule
 - frame adjusting tools
 - opticians lens measure
 - thickness callipers
 - parallel rule or equivalent
 - millimetre rule or pupillary distance (PD) rule
 - pupillometer
 - spectacle frames
 - spectacle lenses
- modelling of industry operating conditions, including provision of services to the general public

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTOPD003 Dispense atypical prescriptions

Modification History

N/A

Application

This unit describes the skills and knowledge required to evaluate client needs, take measurements and make calculations to facilitate effective dispensing for atypical prescriptions, including for low vision clients. Low vision occurs when, after accurate refraction and the provision of spectacles or contact lenses to correct the refractive error, good visual acuity is not achievable.

This unit applies to optical dispensers who work according to prescriptions provided by optometrists or ophthalmologists.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Evaluate client needs	1.1 Interpret the parameters of atypical prescriptions and transpose as required

	1.2 Analyse the prescription and identify areas of freedom and constraints 1.3 Assess the individual needs and requirements of the client 1.4 Select possible frame, lens and treatment combinations to suit individual requirements based on principles of low vision aid selection, depending on client's needs
2. Determine specifications for atypical prescriptions	2.1 Take accurate measurements and make calculations necessary to accurately dispense atypical prescriptions 2.2 Select option that best meets cosmetic, optical and functional needs 2.3 Determine the correct working distance for low vision aids
3. Fit frames and lenses for atypical prescriptions	3.1 Organise required fitting equipment and materials 3.2 Select and specify appropriate bevelling and edging requirements to enhance the cosmetics and quality of the spectacles 3.3 Select appropriate lens treatments or additional requirements to maximise the visual performance and enhance the quality of the finished spectacles 3.4 Measure and specify the most appropriate lens fitting criteria 3.5 Ensure the quality of the finished spectacles 3.6 Fit and adjust the spectacles to client needs
4. Instruct client on wear and care	4.1 Provide client with details about how to wear the appliance 4.2 Offer information about appliance care routines 4.3 Reinforce and support advice provided by low vision practitioner on correct use of low-vision aids
5. Finalise dispensing process	5.1 Complete financial transactions in accordance with relevant policies and procedures 5.2 Follow correct procedures for client rebates 5.3 Complete and store records in accordance with relevant policies, procedures and confidentiality requirements

	5.4 Offer follow up services in accordance with organisation procedures

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTOPD003 Dispense atypical prescriptions

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- dispensed optical appliances in response to at least 5 different atypical prescription needs
- determined the criteria for atypical dispensing, including making accurate calculations for the following:
 - change in vertex distance
 - compensated power (F_c)
 - effective power (F_e)
 - effectivity
 - prescriptions requiring compensations
- calculated differential prismatic effect and compensation using different sized segments, Fresnel prisms, or slab off bifocals
- calculated field of view and determine ways to improve the field of view
- calculated spectacle magnification and determine ways to reduce the effects of aniseikonia
- compounded and resolved prism

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations for dispensing optical advice to clients:
 - duty of care
 - informed consent
 - privacy, confidentiality and disclosure
 - records management
 - work role boundaries – responsibilities and limitations

- work health and safety
- requirements of dispensing spectacles to clients with special or complex needs, including:
 - low vision, what it is, and how various aids may be used to assist such clients
- types of atypical prescriptions, how to interpret and transpose them, including:
 - anisometropia
 - aphakia
 - high ametropia
 - prism
- features and capabilities of aphakic lenses including:
 - aspheric lens design
 - centering
 - compensating for vertex distance change
 - edging/bevelling profile
 - full field lens design
 - general problems associated with dispensing aphakic lenses including jack-in-the-box effect and ring scotoma
 - lenticular designs
- field of view and its impact on atypical dispensing, including:
 - apparent versus real
 - aspheric lenses
 - calculations
 - high minus corrections
 - high plus corrections
- features of high ametropia including:
 - back vertex power (F'_v) front vertex power (F_v)
 - compensated surface power
 - corrections
 - prescription requirements and constraints
 - thick lens power
 - types
- high minus lenses and negative lenticulars and how they are used, including:
 - centering
 - compensating for vertex distance change

- dispensing high index materials
 - edging/bevelling profile
 - high index materials
 - lenticular types and designs
 - surface reflections and the need for anti-reflection and multi-coatings
- high prismatic corrections and how they are achieved, including:
 - edging/bevelling profile
 - fresnels and their use
 - high horizontal prism
 - high vertical prism
- ways to respond to aniso and antimetropia including:
 - base curve selection
 - correcting vertical imbalance problems
 - effects of lens form (shape)
 - effects of thickness
 - prism differential
- features of spectacle magnification including:
 - effects on visual acuity
 - positive compared to negative lenses
 - retinal image size

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - vertex distance calculator (disc or table/chart)
 - vertex distance rule
 - vertex distance calliper (distometer type)
 - lens measure
 - pupillary distance (PD) rule
 - pupillometer
 - thickness callipers
- modelling of industry operating conditions, including integration of problem solving activities

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Link

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTOPD004 Edge and fit ophthalmic appliances

Modification History

N/A

Application

This unit describes the skills and knowledge required to perform edging and fitting of spectacle lenses and to apply techniques, treatments and processes to finish or repair spectacle frames and lenses.

This unit applies to optical dispensers who work according to prescriptions provided by optometrists or ophthalmologists.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for edging and fitting	1.1 Access and correctly interpret required information and prescriptions 1.2 Prepare and check equipment and instruments for operational readiness

	1.3 Select and prepare personal protective equipment as required
2. Perform edging and fitting	2.1 Edge lenses following the tolerances allowed by Australian standards 2.2 Produce accurate formers 2.3 Use special hand-edging techniques to modify lenses for change-overs and centring corrections 2.4 Edge, drill, groove and mount spectacle lenses to frames 2.5 Edge, drill and mount spectacle lenses to rimless frames
3. Adjust and repair frames and lenses	3.1 Repair and modify spectacle frames to meet client needs 3.2 Complete standard alignment of frames to required standards 3.3 Produce tinted lenses to required standards
4. Utilise computer technology	4.1 Select appropriate technology and software applications to achieve the requirements of the task 4.2 Adjust workspace, furniture and equipment to suit the ergonomic requirements of the user 4.3 Use technology according to organisation requirements and in a way which promotes a safe work environment 4.4 Carry out or arrange routine maintenance in order to ensure that equipment is maintained in accordance with manufacturer's instructions and organisation requirements 4.5 Identify equipment faults and take action in accordance with manufacturer's instructions or by reporting fault to designated person
5. Conduct final checking procedures against Australian standards	5.1 Determine any axis or centring error and apply Australian standards tolerances. 5.2 Verify powers, axes and centration by checking the spectacles on the focimeter 5.3 Check lens surface for scratching and aberrations 5.4 Adjust the frame to standard alignment 5.5 Check metal framed spectacles for strain and reduce as required 5.6 Clean spectacles using appropriate cleaners

	5.7 Clean, maintain and store equipment in accordance with manufacturers requirements and infection control procedures 5.8 Accurately document procedures undertaken according to organisation procedure

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTOPD004 Edge and fit ophthalmic appliances

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- edged and fitted at least 10 pairs of spectacles to Australian standards, demonstrating the appropriate handling of the following types of frames and materials:
 - nylon (nyl-tag) rimless
 - metal full rim
 - plastic full rim
- automatically edged lenses using:
 - former cutting
 - blocking/chucking systems
 - machine operation
 - drilling
 - grooving
- hand edged lenses using:
 - hand bevelling techniques
 - safety chamfering
 - changeovers
- addressed common lens problems:
 - rectifying off-axis lenses
 - reducing unwanted vertical and/or horizontal prism
- repaired and modified spectacle frames, including:
 - alignment
 - refitting nylon
 - re-pinning and riveting joints
 - sink joints
 - soldering metal frames

- undertaking frame part replacements
 - undertake digital frame tracing
- used the features of a manual focimeter for the following tasks:
 - correct neutralisation
 - determination of additions
 - determination of axes
 - determination of centration
 - determination of powers
 - determination of prism
- accurately calculated minimum size uncut (MSU) using centration chart and by calculation to allow for pupillary distance (PD) and decentration for prism
- made templates and eliminated errors using:
 - hand techniques
 - machine techniques
- tinted lenses to match tint samples
- mounted lenses

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- Australian standards tolerances
- transmission and absorption data and its role in edging and fitting
- properties of lenses, including:
 - refractive index
 - abbe value
 - specific gravity
 - impact resistance
 - transmission and absorption
- features and use of impact resistant safety lenses including:
 - advantages and disadvantages
 - Australian standards for both general purpose and industrial use
 - evaluation of materials including glass, CR-39 (allyl diglycol carbonate), trivex, higher index plastics, polycarbonate and laminates
 - impact resistance

- impact testing requirements, conditions and procedures
 - principles and processing of chemical toughening
 - problems and special lens requirements
- filter and tinted lens processes including:
 - Australian standards requirements
 - plastic lens tinting including dyes and tint types, equipment, preparation, problems and solutions
 - transmission testing including equipment and instrumentation, equipment limitations and Australian standards
- vacuum coatings and their use, including:
 - absorptive (tinted) coatings
 - handling, cleaning and care of coatings
 - manufacturing processes
 - multiple layer antireflection (AR) coatings
 - single AR coating
- the effects of surface reflections and ghost images on lenses
- edging and fitting glazing techniques
- frame measurement systems including boxing and datum
- features of different frames and rims and how to work with them:
 - different frame materials and their scope of use
 - techniques for working with frames and rims heating, manipulation, adjusting, handling and repair
 - rimless types
 - drilled rimless frames
 - standard nylon rims
- nasal cut and nasal add techniques
- features and functions of edging and fitting equipment:
 - automatic edgers
 - calibration and checking tools
 - focimeters (lensmeters)
 - frame alignment tools
 - hand edging equipment
 - marking/centration devices
 - edging wheel designs and characteristics

- machine designs
- current and emerging software applications used in the optical dispensing environment

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - automatic edgers
 - hand edgers
 - blockers
 - markers
 - focimeters (lensmeters)
 - nylon groover
 - drill
 - clavulus
 - parallel rules
 - millimetre (PD) rules
 - frame tools
 - frames
 - lenses
 - adhesive and protection pads/films
 - formers
 - frame heater
 - soldering unit
 - tint bath
 - dyes
- modelling of industry operating conditions, including:
 - integration of time constraints
 - integration of problem solving activities

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Link

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element</i>
1. Place optical appliance orders	1.1 Interpret and transpose optical prescriptions 1.2 Identify and follow up on discrepancies 1.3 Complete ordering procedures using correct optical terminology and documentation 1.4 Respond to technical queries about optical appliance orders

2. Check optical appliance orders	2.1 Verify details of order received against client record 2.2 Organise required equipment and materials 2.3 Check the spectacles on the focimeter to identify and verify powers, axes and centration 2.4 Determine any axis or centring error and apply Australian standards tolerances 2.5 Check lens surface for scratching and aberrations 2.6 Adjust frames to standard alignment and check for strain as appropriate 2.7 Clean spectacles using cleaning agents suited to the material 2.8 Fit appliances from checked orders to client
3. Service optical appliance orders	3.1 Identify maintenance and adjustment requirements for optical appliances 3.2 Make minor repairs and identify when work needs to be referred to specialist frame repairer 3.3 Make standard frame adjustments to optical appliances 3.4 Fit and edge lenses according to scope of own job role and organisation requirements
4. Maintain equipment	4.1 Clean equipment and attachments in accordance with manufacturer's recommendations and infection control procedures 4.2 Complete routine maintenance procedures on equipment in accordance with manufacturer's requirements 4.3 Store equipment and attachments in accordance with manufacturer's recommendations and organisation policies and procedures

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- transposed at least 10 different prescriptions
- placed orders for all of the following processes and materials and frames
 - spectacle lens edging
 - plastic frames
 - metal frames
 - nylon (nyl-tag) rimless
 - tinted lenses
- checked at least 10 different orders using focimeter, other equipment and standard checking processes, including:
 - calculated minimum size uncut (MSU) using centration chart and by calculation to allow for PD and decentration for prism
 - identified completed spectacle lens thickness
 - used problem solving techniques in reducing unwanted vertical and/or horizontal prism and rectifying off-axis lenses
 - interpreted transmission and absorption data including manufacturer's transmission curves
 - corrected neutralisation
 - determined:
 - additions
 - axes
 - centration
 - powers
 - prism
- edged and fitted lenses, including:
 - single vision

- bifocal and/or progressive
- completed all of the following minor repairs, adjustments and frame part replacements:
 - repaired and serviced nylon rims
 - lens insertion
 - fitted frame
 - soldered metal frames
 - replaced:
 - temples
 - fronts
 - pads
 - screws

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- manufacturer transmission curves and how to interpret them
- transmission and absorption data and how to interpret
- nature of vacuum coatings on lenses, including:
 - absorptive (tinted) coatings
 - handling, cleaning and care of coatings
 - manufacturing processes
 - multiple layer anti-reflection (AR) coatings
 - single AR coating
 - surface reflections and ghost images
- filter and tinted lens processes including:
 - Australian standards
 - transmission testing including equipment and instrumentation, equipment limitations and Australian standards
- properties of lenses:
 - curve selection and thickness considerations
 - Australian standards requirements
- frame measurement systems, including boxing and datum
- drilled rimless frames including mounts and rimless types and equipment needed

- scope of metal and plastic frame material including:
 - heating
 - manipulation
 - adjusting
 - handling
 - repair
- standard nylon rims including the equipment needed
- impact resistant safety lenses including:
 - advantages and disadvantages
 - Australian standards for both general purpose and industrial use
 - evaluation of materials including glass, CR-39 (allyl diglycol carbonate), trivex, higher index plastics, polycarbonate and laminates
 - impact resistance
- lens glazing and grooving techniques
- automatic edging processes including:
 - machine designs
 - machine operation
- edging and fitting techniques for single vision and bifocal/progressive lenses
- scope of routine maintenance for optical equipment
- workplace processes for equipment maintenance:
 - routine checking of equipment
 - preparation of a maintenance program
 - encouraging feedback from work colleagues
 - regular back-ups of data
 - keeping a log book of detected faults
 - regular occupational health and safety inspections
 - checking that repairs have been carried out
- current and emerging technology used in optical work

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - automatic edgers

- hand edgers
- blockers
- markers
- focimeters (lensmeters)
- nylon groover
- drill
- parallel rules
- papillary distance (PD) or millimetre rules
- frame tools
- frames
- lenses
- adhesive and protection pads/films
- formers
- frame heater
- soldering unit
- modelling of industry operating conditions, including:
 - integration of time constraints
 - integration of problem solving activities

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTOUT001 Implement safe access and egress

Modification History

N/A

Application

This unit describes the knowledge and skills required to ensure the safe removal of the patients under routine and non-routine conditions and environments. It may be necessary for the individual to ensure the safe removal of the patient by overcoming obstacles, using problem solving or use of specialised equipment.

This unit applies to pre-hospital or out-of-hospital health care workers.

The skills in this unit must be applied in accordance with Commonwealth and State or Territory legislation, Australian Standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
Elements define the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Assess situation in relation to safe access and egress.	1.1. Survey scene and assess condition of patient in relation to procedures necessary for safe removal of patient.

	• 1.2. View situation to identify and mitigate dangers according to established clinical guidelines and protocols. • 1.3. Identify obstacles impacting safe access and egress. • 1.4. Formulate access and egress plan based on an assessment of all factors associated with the situation or incident and in line with legislation and codes of practice. • 1.5. Identify additional resources required, including specialised knowledge, workers or equipment, based on an assessment of all factors associated with the situation or incident, and with patient and worker welfare as the prime concern.
2. Implement procedure to enable safe access and egress.	• 2.1. Request or arrange for additional or specialised workers and equipment according to the assessed need. • 2.2. Implement access and egress plan using equipment and workers necessary to ensure safe access and egress, and patient welfare. • 2.3. Negotiate and maintain means of safe access and egress according to Commonwealth and State/Territory legislation including workplace health and safety Acts, and according to established clinical guidelines and protocols. • 2.4. Use available resources to ensure safe access and egress, and patient welfare.
• 3. Evaluate access and egress procedure.	• 3.1 Monitor progress of access and egress constantly to ensure welfare of the patient and safety of workers. • 3.2 Communicate with patient and monitor their welfare, condition and any other factors impacting the safe movement of the patient. • 3.3. Modify access and egress plan to reflect situation and ensure safety and the welfare of the patient. • 3.4. Address barriers to safe access and egress as they arise. 3.5. Identify and arrange for additional resources as required to complete procedure.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTOUT001 Implement safe access and egress

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role.

There must be evidence that the candidate has performed three extrications of a patient including:

- analysing the scene and developing access and egress plans, recognising that the welfare of the patient, workers and bystanders is paramount
- conducting risk assessment and identifying hazards
- applying the correct lifting techniques
- communicating the plan to patient, colleagues and other emergency workers at the scene
- amending original plan as situation dictates
- achieving access and egress in environments using equipment to reflect situation.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- policies and procedures relating to access and egress including:
 - industry guidelines
 - Commonwealth and State or Territory legislation
 - established clinical guidelines and protocols
 - work health and safety
- appropriate methods to utilise resources to ensure safe access and egress
- factors that affect safety and welfare of patient and crew
- dangers associated with hazardous situations, and the appropriate response agency for hazard control
- patient care under circumstances requiring complex access and egress procedures
- relevant equipment and its uses, including specialist equipment for hazardous versus a routine situation

- factors which affect safe access and egress and patient welfare such as decision-making guidelines for extrication versus delivery of immediate patient care.

Assessment Conditions

Skills must be demonstrated in a workplace or in a simulated environment that reflects workplace conditions.

Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Link

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTOUT002 Receive and respond to requests for ambulance service

Modification History

N/A

Application

This unit describes the skills and knowledge required to receive and respond to requests for ambulance services and to transfer calls for action. Call-taking work is carried out in accordance with standard organisational policies and procedures for operations.

This unit applies to individuals working in an ambulance communications centre.

The skills in this unit must be applied in accordance with Commonwealth and State or Territory legislation, Australian Standards and industry codes of practice .

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Receive request for service.	1.1. Promptly answer incoming requests for service. 1.2. Establish details of the situation using communication skills, techniques and resources as per established protocol. 1.3. Record complete details of the request in a timely and efficient manner.

	1.4. Respect confidentiality at all times. 1.5. Assess and communicate any danger to the caller, patient or the ambulance crew attending.
2. Respond to request for service.	2.1. Use organisational systems and procedures to gain information from the caller and determine urgency of the request. 2.2. Record information electronically in accordance with organisational policies and procedures. 2.3. Communicate information to the caller in line with the situation and patient's needs. 2.4. Provide first aid advice to the caller. 2.5. Determine a suitable priority case using a prioritising tool.
3. Apply strategies to manage the call.	3.1. Use advanced communications skills to consistently help develop a rapport with the caller. 3.2. Confirm with the caller that the information they have provided is accurate and complete in accordance with organisational policies and procedures. 3.3. Adjust tone or manner to respond to the caller's individual needs or situational contingencies.
4. Refer and finalise request.	4.1. Identify and action any need to refer the request for service. 4.2. Terminate the call and take any required follow-up action.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role.

There must be evidence that the candidate has, on three occasions problem solved and used available tools and referrals involving:

- receiving and dealing with requests for ambulance service efficiently and accurately in accordance with organisational policies and procedures for the following situations:
 - life-threatening
 - non-life-threatening
 - routine or scheduled bookings
 - difficult or distressed callers
- using digital technology including:
 - using operating system tools accurately and proficiently
 - using a keyboard to accurately input and extract data
 - meeting organisational requirements for speed and accuracy of data entry
- using oral communication, interpersonal skills, and communications resources effectively including:
 - asking questions to collect patient history, clinical symptoms, contributing factors and individual circumstances in accordance with organisational policies and procedures
 - responding calmly to multiple demands in a working environment with high operating activity
 - using initiative in responding to challenging situations and individuals in a professional manner
 - working well in a team environment
 - showing empathy with callers
 - initiating and working with interpreters as required to meet patient needs
- documenting information including:
 - recording concise comprehensive and legible information
 - preparing written records

- responding to situational contingencies using available tools and referrals.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for operations
- communications resources
- emergency and non-emergency services and their function
- working knowledge of the geographical area
- codes and abbreviations or specialist terminology used by the organisation when receiving or taking action in response to request for service
- service protocols for referral and requests in order to:
 - act on received request for service
 - request assistance as required from another service including police, fire brigade or interpreters
 - pass on the request for service, or obtain information from ambulance workers, supervisor or authorised medical advisor
 - provide immediate clinical advice to callers.

Assessment Conditions

Skills must be demonstrated in a workplace or in a simulated environment that reflects workplace conditions.

Assessment must ensure access to:

- suitable facilities, resources and equipment as per local governing body including:
 - communication protocols, equipment and systems
 - triage tools for request for service
- modelling of industry operating conditions including access to real people for simulations and scenarios of callers requesting ambulance service.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Link

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTOUT003 Assign and coordinate ambulance service resources

Modification History

N/A

Application

This unit describes the skills and knowledge required to allocate a coordinated response to requests for ambulance service resources to ensure service delivery.

This unit applies to individuals working in an ambulance communications centre. Workers have knowledge of communication equipment, systems and protocols for coordination of ambulance services in accordance with organisational policies and procedures for operations.

The skills in this unit must be applied in accordance with Commonwealth and State or Territory legislation, Australian Standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Allocate ambulance service resources.	1.1. Assign resources to incidents in accordance with service delivery model and local industrial agreements. 1.2. Respond to an emergency or non-emergency routine case. 1.3. Identify location and commitment of service resources.

2. Dispatch resources.	• 2.1. Provide clear, timely and accurate situation information to assigned ambulance crew. • 2.2. Use communication equipment and systems to locate and dispatch resources within set timeframes as determined by local deployment plans.
3. Monitor progress of assigned resources.	• 3.1. Monitor progress of ambulance crew at the scene of an incident or situation or at the receiving facility. • 3.2. Establish the need for additional resources provided by the assigned resource worker at the earliest opportunity. • 3.3. Monitor availability of worker and vehicles for re-assignment. • 3.4. Monitor and follow up on resources and service coordination including any supplementary resources and ensuring safety at the scene.
4. Coordinate resources and liaise with ambulance worker.	• 4.1. Undertake and coordinate resource allocation within set timeframes. • 4.2. Identify and communicate factors affecting the provision of additional resource availability to assigned ambulance crew. • 4.3. Implement on scene communication chain of command when several resources are on scene. • 4.4. Determine the need for other service involvement, ensuring that the other service is contacted and adequately briefed and that correct assistance is requested when dealing with multi-agency incidents. • 4.5. Document activation of supplementary resources and external agencies. • 4.6. Record information pertaining to dispatch records of ambulance resources in accordance with organisational policies and procedures.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTOUT003 Assign and coordinate ambulance service resources

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role.

There must be evidence that the candidate has problem solved to analyse information and make decisions that ensure the most efficient and effective use of resources, in order to:

- coordinate and manage ambulance resources according to organisational policies and procedures for the following four situations:
 - urgent
 - non-urgent
 - incidents when the involvement of other emergency services is needed
 - incident involving multiple casualties
- use digital technology for three different situations including:
 - using communication equipment and systems
 - assigning and coordinating resources
 - ensuring communication with staff
- meeting organisational requirements for speed and accuracy when updating and maintaining records.

Knowledge Evidence

Demonstrated knowledge to complete the tasks outlined in elements and performance criteria of this unit:

- local standard emergency operation procedures and organisational communication protocols
- basic knowledge of the geographical area
- basic knowledge of ambulance service resources available for assignment
- incident debriefing and support techniques as per organisational policies and procedures
- methods of using communications equipment and systems in line with communication protocols including:
 - phones

- radios
 - a computer system
- available resources and their application:
 - road
 - aviation
 - maritime
 - other emergency services and their role:
 - fire brigade
 - police
 - State Emergency Services (SES)
 - other non- emergency services and their function:
 - voluntary organisations
 - utilities
 - community services departments
- organisational policies and procedures for coordination of multiple ambulance resources responding to a single incident
- business continuity plans that must be implemented in event of system failure or emergency evacuation.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions.

- Assessment must ensure access to:
- suitable facilities, resources and equipment as per local governing body including:
 - communication protocols, equipment and systems
 - agency dispatch protocols and procedures.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Link

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTOUT004 Assess and deliver basic clinical care

Modification History

N/A

Application

This unit of competency describes the knowledge and skills required to conduct clinical assessment and deliver basic clinical care in a pre-hospital or out-of-hospital environment.

This unit applies to pre-hospital and out-of-hospital health care workers. The worker provides basic life support and prioritises clinical care of a patient in accordance with established clinical practice guidelines.

The skills in this unit must be applied in accordance with Commonwealth and State or Territory legislation, Australian Standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
Elements define the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Make initial incident and patient assessment.	1.1. Conduct pre-planning before arrival at scene based on information communicated in the request for service. 1.2. Conduct scene survey according to established clinical guidelines and protocols.

	• 1.3. Conduct primary survey of patient. • 1.4. Conduct a secondary survey, including a systematic physical examination of the whole body using applied clinical knowledge, taking vital signs and level of consciousness. • 1.5. Obtain and document history of the event. • 1.6. Identify patient's main complaints as a basis for systematic prioritised treatment. • 1.7. Apply situational knowledge of the patient to guide selection of treatment options. • 1.8. Determine the time-critical issues given resource considerations. • 1.9. Assess transport requirements and destination, versus transport criticality, to ensure requirements of urgency and patient care are met. • 1.10. Conduct a focussed physical examination of the patient based on complaint or mechanism of injury.
2. Plan basic pre-hospital or out-of-hospital patient care.	• 2.1. Establish priorities of care based on initial patient assessment according to established clinical guidelines and protocols. • 2.2. Develop a treatment plan and outline treatment priorities. • 2.3. Identify and develop contingency plans based on mechanisms of injury and potential for patient deterioration according to established clinical guidelines and protocols.
3. Implement basic patient care procedures.	• 3.1. Implement all patient care procedures and pharmacological therapies within own level of expertise and authority to practise, and the limits of established clinical guidelines and protocols. • 3.2. Identify the need to seek assistance immediately where the situation or patient's condition requires treatment that is outside scope or authority to practise. • 3.3. Operate equipment required for patient management according to manufacturer or supplier instructions and established clinical guidelines and protocols. • 3.4. Apply infection prevention and control principles to patient care.

	3.5. Use safe lifting and patient handling techniques in accordance with workplace health and safety (WHS) requirements and organisational policy and procedures.
4. Monitor basic patient care and modify according to patient needs.	4.1. Re-assess patient at intervals and modify treatment according to patient needs, according to established clinical guidelines and protocols. 4.2. Monitor pharmacological outcomes, noting effectiveness of treatment regime and amend according to patient's condition.
5. Handover patient to a healthcare professional, facility or service.	5.1. Document patient details according to established clinical guidelines and protocols. 5.2. Maintain patient confidentiality. 5.3. Ensure documentation for clinical handover procedures contains all relevant information. 5.4. Convey information to authorised individuals involved in ongoing patient care. 5.5. Maintain patient care until responsibility for patient is taken over by a healthcare professional or service.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Unit Mapping Information

		practices and terminology.	

Assessment Requirements for HLTOUT004 Assess and deliver basic clinical care

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role.

There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 80 hours work, under clinical supervision in the workplace
- performed a clinical assessment and implemented basic care in a pre-hospital or out-of-hospital context on at least three different patient presentations for an illness or trauma impacting health status including:
 - primary survey
 - secondary survey
 - planning and implementing basic clinical care based on assessment and time-criticality
 - monitoring patient
 - safely delivering patient to a healthcare professional, facility or service
- performed basic life support on an adult, child and infant simulation manikin according to established clinical guidelines and protocols.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- Commonwealth and State or Territory legal considerations for emergency health care workers working in out-of-hospital care, and how these are applied in organisations including:
 - discrimination
 - duty of care
 - mandatory reporting
 - health records and information privacy
 - drugs and poisons
 - informed consent

- work health and safety
- clinical practice guidelines and protocols
- ethical considerations for emergency health care workers working in out-of-hospital care, and how these are applied in organisations including:
 - scope of practice
 - practitioner and patient boundaries:
 - responsibilities
 - limitations
 - National Safety and Quality Health Service (NSQHS) Standards
- techniques for assessing and interpreting vital signs including:
 - level of consciousness:
 - Glasgow Coma Score (GCS)
 - alert, voice, pain, unresponsive (AVPU)
 - respiratory status:
 - rate
 - rhythm
 - effort
 - breath sounds
 - temperature status:
 - febrile
 - afebrile
 - hypothermic
 - blood volume and perfusion status:
 - pulse
 - blood pressure
 - capillary refill
 - skin
 - pain status
- components of and techniques used for primary survey and secondary survey
- basic anatomy and physiology of body systems:
 - cardiovascular
 - respiratory
 - musculo-skeletal
 - endocrine

- nervous
 - digestive
 - urinary
 - reproductive
 - integumentary
 - lymphatic
 - special senses
- basic pharmacology of medications:
 - pharmacodynamics, pharmacokinetics, pharmacotherapeutics, toxicology
 - indications and contraindications
 - side effects and adverse reactions
- administration:
 - routes
 - oral
 - intranasal
 - intramuscular
 - infection prevention and control
- control of medications/substances:
 - legal requirements and organisational policies and procedures for storage, handling, administration, disposal and documentation of drugs
 - scheduling
- basic life support techniques, including procedures and equipment used within established clinical guidelines and protocols
- methods of documenting patient medical history including pre-existing conditions, allergies, social and emotional wellbeing, and current medication or treatment plans to provide to receiving health facility workers
- receiving facility requirements or how to access these requirements
- procedures to undertake when the required patient treatment is outside the scope or authority to practise of the attending worker.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions.

Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as using suitable facilities, equipment and resources.

The performance evidence requirement for performing clinical assessments and implementing basic clinical care for three patients must have been demonstrated using simulation before being demonstrated in the workplace and with members of the public.

Assessment must ensure access to suitable facilities, resources and equipment as per local governing body including:

- simulation with adult, child and infant manikins
- vital signs monitoring devices
- organisational policies and procedures and established clinical guidelines on which the candidate bases the planning process
- documents used for reporting.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Link

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTOUT005 Assess and deliver standard clinical care

Modification History

N/A

Application

This unit of competency describes the skills and knowledge required to conduct clinical assessments and deliver standard patient care in the pre-hospital and out-of-hospital environment.

This unit applies to out-of-hospital health care workers. The worker assists in advanced life support, prioritises clinical care, implements time-critical health care procedures and therapies, and monitors patients based on patient needs and in accordance with established clinical practice guidelines and protocols.

The skills in this unit must be applied in accordance with Commonwealth and State or Territory legislation, Australian Standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
Elements define the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Perform out-of-hospital patient assessment.	1.1. Conduct pre-planning of assessment before arrival at scene based on information communicated in the request for service.

	• 1.2. Conduct scene survey according to established clinical guidelines and protocols. • 1.3. Perform systematic patient assessment to collect and analyse information. • 1.4. Use clinical knowledge to assess the mechanism and patterns for injury or illness to make an informed decision about the patient's condition. • 1.5. Use principles of anatomy and physiology to identify variations from normal homeostasis. • 1.6. Differentiate between patients who require rapid stabilisation and transport because of trauma or illness, and those who require further on-the-scene assessment and management. • 1.7. Use equipment correctly to support patient care being implemented.
2. Plan out-of-hospital patient care.	• 2.1. Determine time-critical issues given resource considerations. • 2.2. Assess transport requirements and appropriate destination, versus transport criticality, to ensure requirements of urgency and patient care are met. • 2.3. Assess the effects and any associated risks of proposed patient's condition. • 2.4. Develop a patient management plan based on patient's needs and assessment of scene. • 2.5. Use available information to justify patient management plan.
3. Implement out-of-hospital patient care procedures.	• 3.1. Implement all care and treatment procedures within established scope of practice defined by organisational guidelines and protocols. • 3.2. Commence pharmacological therapies as determined by patient's presenting condition, within established scope of practice defined by organisational guidelines and protocols. • 3.3. Identify need for assistance where the situation or patient's condition requires treatment that is outside the scope of practice and seek clinical support immediately.
4. Monitor and evaluate out-of-hospital patient care.	• 4.1. Evaluate patient care interventions and pharmacological therapy, noting effectiveness of treatment regime and amend according to patient's condition in accordance with established clinical guidelines and protocols.

	• 4.2. Use equipment to monitor all aspects of patient's condition at appropriate intervals. • 4.3. Record data regarding patient's condition, noting any trends and their impacts on patient condition. • 4.4. Identify signs of deterioration in patient's condition. • 4.5. Modify management of patient's condition and evaluate regularly as treatment occurs.
5. Handover patient.	• 5.1. Document patient details, assessment findings and patient management using a systematic approach. • 5.2. Convey information using a systematic handover approach. 5.3. Maintain patient care until the transfer is complete.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTOUT005 Assess and deliver standard clinical care

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role.

There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of 160 hours work, under clinical supervision in the workplace
- performed a clinical assessment and implemented standard care in an out-of-hospital context on at least five different patient presentations for an illness or trauma impacting health status including:
 - primary survey
 - secondary survey
 - planning and implementing patient management based on assessment, time-criticality and available resources
 - monitoring patient
 - transferring care using a systematic approach to handover
- responded in different operational conditions or circumstances to implement the following standard clinical care interventions according to established clinical guidelines and protocols:
 - airway management for a patient
 - cardiac monitoring through limb leads only
 - cardiac rhythm evaluation as shockable or non-shockable
 - manual defibrillation on a simulation manikin according to established clinical guidelines and protocols
 - administering and responding to the effects of pharmacological therapy to treat and manage patient's illness or condition
- performed basic life support and be able to assist in advanced life support on an adult, child and infant simulation manikin according to established clinical guidelines and protocols.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- Commonwealth and State/Territory legal considerations for emergency health care workers working in out-of-hospital care, and how these are applied in organisations including:
 - discrimination
 - duty of care
 - mandatory reporting
 - health records and information privacy
 - drugs and poisons
 - informed consent
 - work health and safety
- organisational policies and procedures and established clinical guidelines and protocols for patient care and emergency equipment
- ethical considerations for emergency health care workers working in out-of-hospital care, and how these are applied in organisations including:
 - scope of practice
 - practitioner and patient boundaries:
 - responsibilities
 - limitations
 - National Safety and Quality Health Service (NSQHS) Standards
- techniques for assessing and interpreting vital signs
- methods of obtaining and documenting patient medical history for provision to receiving health facility workers including:
 - pre-existing conditions
 - allergies
 - social and emotional wellbeing
 - current medication or treatment plans
- components of and techniques used for primary survey and secondary survey
- variations from normal functioning of body systems
- procedures and equipment to be used within established clinical guidelines and protocols for:
 - advanced life support assistance
 - advanced resuscitation assistance

- critical thinking and diagnostic reasoning techniques and processes for:
 - diagnostic reasoning in the clinical setting
 - identification of key problems and issues
 - risks involved in responding to patient needs
- pathophysiology of common presentations including:
 - burns
 - trauma
 - cardiovascular emergencies
 - respiratory disorders including:
 - asthma
 - common environmental emergencies:
 - toxic or industrial chemicals
 - heat stress
 - exposure to cold
 - neurovascular
 - digestive and endocrine system including:
 - diabetes
 - urinary and reproductive issues
 - abdominal pain
 - stages of labour – pre and post-delivery emergencies
 - musculo-skeletal injury
- mental illness:
 - definition
 - stigma
 - causes
 - classifications
- acute behavioural disturbance
- poisoning, envenomation or overdose emergencies including:
 - neurotoxins, myotoxins, haemotoxins
 - illicit drugs
- pharmacology therapy and concepts underpinning pharmacology:
 - pharmacological agents for the management of common disorders
 - pharmacokinetics

- preparation, properties, uses and indications of pharmacology
- pharmacology terminology
- pharmacodynamics-pharmacological interactions
- safe storage, handling and disposal of pharmacological products in accordance with the Acts and regulations pertaining to these products.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions.

Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as using suitable facilities, equipment and resources.

The performance evidence requirement to implement standard clinical care interventions must have been demonstrated using simulation before being demonstrated in the workplace and with members of the public.

Assessment must ensure access to:

- use of facilities, resources and equipment as per local governing body including:
 - simulation with adult, child and infant manikins
 - vital signs monitoring devices
 - ECG recording device
 - placebo samples of pharmacological preparations for use in simulation scenarios.
- forms and documents for recording of patient care.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

HLTOUT006 Transport emergency patients

Modification History

N/A

Application

This unit describes the skills and knowledge required to transport vehicle occupants to and from a health care facility or service under emergency circumstances. This includes patients, crew, emergency service and other workers, relatives and assistance animals. The unit includes skills for loading, driving and unloading a vehicle safely, and for checking vehicles and equipment in order to restock and remedy faults.

This unit applies to pre-hospital and out-of-hospital health care workers.

The skills in this unit must be applied in accordance with Commonwealth and State or Territory legislation, Australian Standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
Elements define the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare and check vehicle and equipment.	1.1. Check vehicle and equipment systematically and comprehensively based on local vehicle checklist or inventory.

	• 1.2. Conduct vehicle checks on a regular basis according to organisational policies and procedures to ensure continuing serviceability of vehicle and equipment. • 1.3. Ensure interior and exterior cleanliness of vehicle in accordance with organisational policies and procedures for minimisation of infection risk to vehicle occupants. • 1.4. Maintain vehicle operating stock to organisational minimum and maximum levels. • 1.5. Maintain vehicle and equipment according to established clinical guidelines and protocols.
2. Ensure faults in vehicle and equipment are remedied.	• 2.1. Identify and report general nature of faults in accordance with organisational policies and procedures. • 2.2. Assess risk of all faults, malfunctioning vehicle or equipment against patient care priorities and notify personnel in accordance with organisational policies and procedures. • 2.3. Establish need for additional or replacement resources and communicate to other workers.
3. Convey and receive information relating to emergency transport.	• 3.1. Establish and maintain communication with control centre according to established clinical guidelines and protocols. • 3.2. Notify receiving facility according to established clinical guidelines and protocols.
4. Load, unload and secure occupants and equipment for emergency transportation.	• 4.1. Remove patients from scene in a manner consistent with established clinical guidelines and protocols. • 4.2. Load and unload patients smoothly, consistent with safe work practices and according to established clinical guidelines and protocols. • 4.3. Ensure patient illness or injury is not exacerbated by unnecessary movement during loading and unloading of patient. • 4.4. Ensure vehicle occupants are secured in vehicle according to organisational policies and procedures. • 4.5. Organise and secure equipment in accordance with established clinical guidelines and protocols.

5. Transport patient under emergency conditions.	• 5.1. Establish and maintain communication as required between driver and patient care officer to ensure safe transport and effective patient care. • 5.2. Drive vehicle to current road conditions and in a manner that avoids exacerbation of patient condition. • 5.3. Recognise and negotiate hazards at low risk in accordance with road traffic Acts and legal requirements governing emergency vehicles. • 5.4. Notify vehicle occupants of upcoming hazards to facilitate preparation and management of situation for safety of patient and self. • 5.5. Utilise maps and Global Positioning Systems (GPS) as required to navigate to a specified destination. • 5.6. Choose route to receiving facility according to distance, time, travel and terrain and monitor factors likely to cause delays or route deviations.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Current Code and Title	Previous Code and Title	Comments	Equivalence
HLTOUT006 Transport emergency patients	HLTAMB003 Transport emergency patients	This version was released in HLT Health Training Package release 5.0 and meets the requirements of the 2015 Standards for Training Packages. Updated to reflect current industry	Not equivalent

		practices and terminology.	

Assessment Requirements for HLTOUT006 Transport emergency patients

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role.

There must be evidence that the candidate has checked the safety of transport vehicle and safely transported three different emergency patients under operational conditions including:

- loading and unloading
- performing driving skills suited to the case being attended
- assessing and analysing available driving routes using navigation aids and available resources
- efficiently and safely driving patient transfer vehicles under different operational conditions for transport of emergency patients
- adhering to applicable road traffic Acts and regulations

An emergency patient is defined as an individual requiring active treatment by a clinician while en-route to a receiving facility or hospital. It does not necessarily require activation of warning signals, emergency siren and lights.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- methods of loading and unloading patients with life-threatening conditions
- organisational policies and procedures related to:
 - vehicles used for transportation
 - equipment in vehicle
 - vehicle checks
 - cleanliness of vehicle
 - reporting of faulty vehicle
 - risk assessment of faults
- relevant Acts and Regulations
- organisational policies and procedures related to transport of emergency patients including:

- manual handling and lifting
 - care and restraint of patient and others during transportation
 - emergency patient care procedures during transportation
 - State or Territory road rules and regulations when driving patient transfer vehicles
 - use of communications equipment and systems for transporting emergency patients
- stock inventory and the safe storage and disposal of pharmacological products
- protocols for safe transport of vehicle occupants under priority:
 - patients
 - crew
 - emergency service and other workers
 - clinical staff
 - relatives or carers
 - assistance animals.

Assessment Conditions

Skills must be demonstrated in an operational vehicle used for the transport of emergency patients. This should be in the workplace or in a simulated environment that reflects workplace conditions.

Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as using suitable facilities, equipment and resources.

Driving skills must have been demonstrated at least once using simulation prior to any demonstration in the workplace.

Assessment must ensure access to facilities, resources and equipment as per local governing body including:

- transport vehicle
- communication protocols, devices and equipment used in emergency vehicles
- modelling of industry operating conditions including access to real people for simulations and scenarios in transporting emergency patients.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

HLTOUT007 Transport non-emergency patients under operational conditions

Modification History

N/A

Application

This unit describes the skills and knowledge required to load, unload and drive vehicles safely to transport vehicle occupants to and from a facility or service in non-emergency conditions. It includes using communication equipment and checking vehicles and equipment in order to restock and remedy faults.

This unit applies to pre-hospital and out-of-hospital health care workers.

The skills in this unit must be applied in accordance with Commonwealth and State or Territory legislation, Australian Standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

2. Ensure faults in vehicle and equipment are remedied.	• 2.1. Identify and report general nature of faults in accordance with organisational policies and procedures. • 2.2. Assess risk of all faults, malfunctioning vehicle or equipment against patient care priorities and notify personnel in accordance with organisational policies and procedures. • 2.3. Establish need for additional or replacement resources and communicate to other workers.
3. Convey and receive information relating to transport.	• 3.1. Use communication techniques and procedures consistent with legislation and according to established clinical guidelines and protocols. • 3.2. Notify receiving facility according to local standard non-emergency patient transport procedures.
• 4. Load, unload and secure vehicle occupants for transportation.	• 4.1. Load and unload patient, consistent with safe work practices and organisational policy and procedures. • 4.2. Ensure support or assistance is provided during loading and unloading of patient. • 4.3. Transport others to accompany the patient, where such a need has been identified and there is a capacity to do so, in accordance with established clinical guidelines and protocols. • 4.4 Ensure vehicle occupants are secured in vehicle according to organisational policies and procedures.

	4.5. Organise and secure equipment in accordance with Australian Standards, legislation and organisational policies and procedures.
5. Transport patient under routine driving conditions.	5.1. Establish and maintain communication as required between driver and vehicle occupants to ensure effective patient care during transport. 5.2. Drive vehicle to current road conditions and in a manner that avoids exacerbation of patient condition. 5.3. Drive vehicle under operational conditions in a low risk manner and according to legal requirements. 5.4. Notify vehicle occupants of upcoming hazards to facilitate preparation and management of situation for safety of patient and self. 5.5. Utilise maps and Global Positioning Systems (GPS) as required to navigate to a specified destination. 5.6. Choose the most efficient route and monitor factors likely to cause delays or route deviations.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Unit Mapping Information

Assessment Requirements for HLTOUT007 Transport non-emergency patients under operational conditions

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role.

There must be evidence that the candidate has checked the safety of transport vehicle and safely transported three different non-emergency patients under operational conditions including:

- loading and unloading
- performing driving skills suited to the case being attended
- assessing and analysing available driving routes using navigation aids and available resources
- efficiently and safely driving patient transfer vehicles under different operational conditions for transport of non-emergency patients
- adhering to applicable road traffic Acts and regulations

A non-emergency patient is defined as an individual that requires transport and may not require active treatment by a clinician while en-route to a receiving facility.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- methods of loading and unloading non-emergency patients
- organisational policies and procedures for:
 - vehicles used for transportation of non-emergency patients
 - equipment in vehicle
 - vehicle checks
 - cleanliness of vehicle
 - reporting of faulty vehicle
 - risk assessment of faults
- relevant Acts and Regulations
- organisational policies procedures related to transport of non-emergency patients including:

- manual handling and lifting
- care and restraint of patient and others during transportation
- non-emergency patient care procedures during transportation
- State/Territory road rules and regulations when driving patient transfer vehicles
- use of communications equipment and systems for transporting non-emergency patients
- stock inventory and the safe storage and disposal of pharmacological products
- protocols for safe transport of vehicle occupants:
 - patients
 - crew
 - clinical staff
 - relatives or carers
 - assistance animals.

Assessment Conditions

Skills must be demonstrated in an operational vehicle used for the transport of non-emergency patients. This should be in the workplace or in a simulated environment that reflects workplace conditions.

Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as using suitable facilities, equipment and resources.

Driving skills must have been demonstrated at least once using simulation prior to any demonstration in the workplace.

Assessment must ensure access to facilities, resources and equipment as per local governing body including:

- transport vehicle
- communication protocols, devices and equipment used in emergency vehicles
- modelling of industry operating conditions including access to real people when using simulations and scenarios to demonstrate transporting non-emergency patients.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

HLTOUT008 Manage a scene

Modification History

N/A

Application

This unit describes the skills and knowledge required to manage non-emergency and emergency situations. Individuals are required to follow procedures, evaluate scene safety and identify any security risks and to communicate and coordinate with other emergency services personnel involved in patient care at the scene. It also describes skills required for coordination with and by other emergency services personnel.

This unit applies to pre-hospital and out-of-hospital health care workers.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian Standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Elements and Performance Criteria

Element	Performance criteria
Elements define the essential outcomes of a unit of competency.	The Performance Criteria specify the level of performance required to demonstrate achievement of the Element.
1. Attend scene.	1.1. Undertake roles as prescribed by Acts, regulations and organisational policies and procedures.

	• 1.2. Identify and maintain lines of communication with others according to communication protocols and organisational policies and procedures. • 1.3. Support collaborative planning and action in accordance with organisational requirements.
2. Assess the environment to identify real and potential hazards.	• 2.1. Gather information to enable accurate assessment of the situation or incident. • 2.2. Identify real or potential hazards where there are risks to participants or bystanders. • 2.3. Assess the approach to an incident, identifying visible signs of danger. • 2.4. Position vehicle, equipment and resources to facilitate safe access and egress and protect self, colleague and patient. • 2.5. Identify opportunities to utilise organisational resources where required to secure the scene.
• 3. Communicate with those involved in the incident.	• 3.1. Communicate information about the incident or scene to coordinator and other medical, emergency and allied services involved with the incident in a clear, concise and comprehensive manner. • 3.2. Provide information to people involved in the incident or facilitate others to do so. • 3.3. Communicate and gather information from other organisations at the scene to inform the improvement of services and avoid duplication of effort.
• 4. Control hazards.	• 4.1. Ensure security and safety of the scene and negate or minimise existing and potential hazards to patients, colleagues and others. • 4.2. Use personal protective clothing and equipment for infection prevention and workplace health and safety in accordance with organisational policies and procedures. • 4.3. Manage combative patients or others to ensure security of the scene. • 4.4. Use hazard-controlling resources safely in accordance with organisational policies and procedures.

5. Evaluate the scene environment.	5.1. Monitor the environment at the scene to identify changes that may compromise safety or patient care. 5.2 Recognise and communicate the need for additional resources according to environmental changes. 5.3 Contribute to the provision of feedback for the improvement of scene management.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTOUT008 Manage a scene

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role.

There must be evidence that the candidate has managed one non-emergency and one emergency scene where an individual requires active treatment by a clinician including:

- ensuring safety of self, patient and others
- identifying hazards, real or potential, where there are risks to participants or bystanders
- minimising risk by enlisting hazard reduction agents
- ensuring rapid and safe access and egress
- engaging existing personnel for situational information
- analysing available information and making decisions that ensure effective scene management
- managing multiple competing priorities
- identifying and implementing available resources in accordance with established clinical guidelines and protocols.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- relevant policies and procedures relating to scene management including:
 - organisational policies and procedures
 - State/Territory policies and procedures
- role of other emergency services personnel
- function of other organisations including medical and other emergency and allied agencies, and their limitations
- organisational policies, procedures and strategies for scene management
- hazards and potential hazards that occur at a scene and their effect on safe access and egress
- relevant current national standards including:

- National Safety and Quality Health Service (NSQHS) Standards
- procedures and management principles required to manage combative patients or others in order to secure the scene
- current practices, procedures and equipment used to communicate in the workplace including:
 - confidentiality requirements
 - organisational policy and procedures relating to liaison with other organisations.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions.

Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as using suitable facilities, equipment and resources.

Assessment must ensure access to use of facilities, resources and equipment as per local governing body including:

- operational vehicle used for the transport of emergency and non-emergency patient
- organisational policies and procedures for managing a scene
- equipment required for scene management, including personal protective equipment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

HLTOUT009 Manage the scene of a major incident

Modification History

N/A

Application

This unit of competency describes the skills and knowledge required to manage the scene of a major incident as the first arriving resource and then participate in the management and coordination following the arrival of further resources.

This unit applies to pre-hospital and out-of-hospital health care workers.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian Standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Elements and Performance Criteria

Element	Performance criteria
Elements define the essential outcomes of a unit of competency.	The Performance Criteria specify the level of performance required to demonstrate achievement of the Element.
1. Respond to scene as first crew.	1.1. Provide initial situation report (SITREP) in accordance with organisational policies and procedures that enable the declaration of a major incident.

	• 1.2. Position vehicle in close proximity to incident based on assessment of environmental threats and availability of access and egress. • 1.3. Allocate roles of Initial Commander and Initial Triage Officer or Clinician. • 1.4. Determine the need for personal protective equipment and use in accordance with organisational policies and procedures.
2. Undertake role of Initial Commander.	• 2.1. Take charge of ambulance activities at incident scene in accordance with organisational policies and procedures. • 2.2. Conduct scene assessment. • 2.3. Establish and maintain communications with control centre and Primary Triage Officer. • 2.4. Liaise with other emergency agency commanders at the scene. • 2.5. Identify the need for additional ambulance resources and equipment. • 2.6. Document key information and decisions. • 2.7. Hand over all information to Forward Command upon their arrival at the scene.
3. Undertake role of Primary Triage Officer.	• 3.1. Coordinate the triage sieve of casualties at the incident site in accordance with organisational policies and procedures. • 3.2. Provide estimate of casualty numbers. • 3.3. Use triage sieve to tag patients according to priority and severity of injury. • 3.4. Ensure only life-saving treatment is performed. • 3.5. Encourage bystanders to assist with basic casualty treatment.
4. Respond to scene as additional resource.	• 4.1. Proceed to incident as directed by control centre. • 4.2. Park vehicle in designated ambulance parking area. • 4.3. Take equipment to the scene. • 4.4. Report to the Scene Commander.

	• 4.5. Undertake tasks as delegated by Scene Commander and in accordance with organisational policies and procedures. • 4.6. Use communication equipment to relay information.
5. Participate in end of incident activities.	• 5.1. Follow stand down or end of incident instructions from Incident Commander. • 5.2. Participate in debriefing in accordance with organisational policies and procedures.

-

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

HLTOUT009 Manage the scene of a major incident		This unit has been created to address a skill or task required by industry that is not covered by an existing unit of competency	Newly created

Assessment Requirements for HLTOUT009 Manage the scene of a major incident

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role.

There must be evidence that the candidate has:

- performed triage sieve with tags in accordance with organisational policies and procedures for 10 casualties of varying conditions and severity of injury
- used communication equipment to provide SITREPs at regular intervals until completion of incident and in accordance with organisational policies and procedures
- debriefed at completion of incident in accordance with organisational policies and procedures.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- key features of major incident response plans
- organisational documents used when managing major incidents
- operational functions and use of communications equipment required to manage a major incident
- standardised process for SITREPs and the use of ETHANE mnemonic
- personal protective equipment for major incident management including tabards
- key roles of major incident management personnel, including:
 - Initial Commander
 - Initial Triage Officer or Clinician
 - Primary Triage Officer
 - Forward Commander
 - Medical Commander
 - Secondary Triage Officer
 - Casualty Clearing Officer
 - Parking Officer

- Loading Officer
 - Scene Commander
 - Incident Commander
 - Ambulance Commander
- incident severity levels:
 - Level 1 incident
 - Level 2 incident
 - Level 3 incident
 - Level 4 incident
- process and protocol for declaration of a major incident
- triage sieve processes
- triage SORT processes
- organisational policies and procedures in relation to major incident management
- legislation and industrial guidelines in relation to major incident management
- processes for scene assessment, hazard identification and risk mitigation
- working knowledge of the role of other emergency services personnel
- signs and indications of:
 - terrorism
 - hazardous materials (HAZMAT)
 - chemical, biological, radiological or nuclear material (CBRN)
- basic life support for applying life-saving treatment:
 - basic airway management
 - major haemorrhage control.

Assessment Conditions

Skills must be demonstrated in simulated or desk-top environment.

Assessment must ensure access to:

- triage tags
- major incident response plan action cards
- organisational documents.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

HLTOUT010 Communicate in complex situations to support health care

Modification History

N/A

Application

This unit of competency describes the skills and knowledge required to effectively communicate with patients, colleagues, health providers and ambulance service callers in complex situations using verbal and non-verbal interactions. It requires workers to address these significant challenges in the context of providing a health care service.

This unit applies to pre-hospital and out-of-hospital health care workers in a range of settings.

The skills in this unit must be applied in accordance with Commonwealth and State or Territory legislation, Australian Standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

Elements and Performance Criteria

Element	Performance criteria
Elements define the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Communicate with patients, colleagues, health providers and ambulance service callers.	1.1. Introduce self to commence the communication exchange. 1.2. Establish rapport through use of an open, sensitive and confident manner.

	• 1.3. Obtain information with sensitivity and respect for confidentiality as demanded by the situation. • 1.4. Convey information about care procedures in a manner and at a time consistent with the overall need of the patient and the situation as a whole. • 1.5. Clarify and respect the role and authority of health providers involved in the situation. • 1.6. Monitor recipient's understanding of information and adjust the mode of communication according to the needs and urgency of the situation.
2. Use effective communication techniques.	• 2.1. Use questioning and listening techniques to identify, clarify and confirm situational needs. • 2.2. Ensure communication is clear and reflective of the situation, context and activities undertaken. • 2.3. Identify early signs of complex or difficult situations or problems and respond. • 2.4. Deal with conflict in a manner that prevents escalation. • 2.5. Seek advice and assistance about communication difficulties to maintain effective communication. • 2.6. Acknowledge and confirm information received to ensure understanding.
3. Use available modes of communication to convey and receive information.	• 3.1. Use job specific communication systems to convey complex information clearly. • 3.2 Complete all documentation required for reporting in accordance with organisational policies and procedures.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTOUT010 Communicate in complex situations to support health care

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role.

There must be evidence that the candidate has verbally communicated with patients and co-workers and developed responses to meet the differing needs for each of the following situations:

- a person displaying challenging behaviors including:
 - under influence of substance misuse
 - acute behavioral disturbance
 - under stress due to current situation
- a person who has English as their second language
- a person who has a communication-related disability including:
 - hearing difficulties
 - speech impediment.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- codes and communication terminology used by out-of-hospital health care workers
- communication techniques including:
 - use of open-ended questions
 - active listening
 - asking for clarification and probing
 - responses to a range of views from patients, carers or others
 - understanding use of empathy with patient, carers or colleagues
 - using discretion and confidentiality, respecting individual differences especially when using touch and other non-verbal means of communication
- complex communication needs of people with:
 - communication-related disabilities

- hearing difficulties
- speech impediment
- cross-cultural communications needs
- mental illness
- pharmacological and alcohol addiction or misuse
- adverse behavioral responses to unfamiliar environments
- complex communication needs of a person under stress due to situations including trauma, death and life-threatening situations to themselves or others
- organisational policies and procedures applied to identified situations where complex communication needs may be present
- processes for preparing handover reports
- referral processes for staff requiring counselling services.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions.

Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as using suitable facilities, equipment and resources.

Assessment must ensure access to modelling of industry operating conditions including access to real people for simulations and scenarios.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

HLTPAT001 Identify and respond to clinical risks in pathology collection

Modification History

N/A

Application

This unit describes the skills and knowledge required to recognise client risk factors, identify emergency situations and provide emergency or first aid response to client reactions associated with pathology specimen collection.

This unit applies to any individual for whom pathology collection is part of the job role. They may be working in collection centres, in hospitals or in other health care environments.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Recognise and assess potential risk	1.1 Identify potential clinical risks of performing collection procedure from review of client information in accordance with organisation procedures

	1.2 Assess client against pre-test criteria and determine risk in accordance with organisation procedures 1.3 Identify and refer potential risk situations beyond scope of own role to appropriate person
2. Identify situations requiring emergency or first aid response	2.1 Observe clients for reactions during and after collection procedure 2.2 Promptly recognise signs of adverse reaction or complication
3. Respond to client reactions and complications	3.1 Follow documented procedures for any reactions and complications 3.2 Follow first aid protocols in accordance with organisation policies and procedures 3.3 Provide clear information to client and obtain consent from client where possible 3.4 Complete accurate record of incidents in accordance with organisation policies and procedures

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTPAT001 Identify and respond to clinical risks in pathology collection

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- assessed and recognised potential clinical risks from review of information from at least 3 different clients
- recognised adverse reactions and complications and followed required procedures in response to at least 3 different adverse events
- recognised adverse reactions and complications requiring first aid response and provided first aid according to procedures for all of the following:
 - fainting
 - fitting
 - arterial puncture
 - nerve damage
 - bruising
 - excessive or prolonged bleeding
 - diabetic emergency
 - falls
 - grazes
 - scarring and burns
 - vomiting

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations (national and state/territory) for emergency response, and how these are applied in organisations:
 - duty of care
 - informed consent

- privacy, confidentiality and disclosure
- records management
- work role boundaries:
 - scope and limitations of own role in assessing clinical risk
 - points of referral for risk situations beyond scope of own role
- work health and safety
- standard infection control requirements for clinical procedures:
 - hand hygiene
 - use of personal protective equipment (PPE)
 - avoiding contact with bodily fluids
 - sharps injury prevention and treatment if sustained
 - waste disposal
- client information that may inform assessment of risk:
 - clinical history
 - allergies
 - current and recent medications
 - recent illnesses
 - reactions/complications to previous collection procedures
- anatomy and physiology relevant to pathology collections:
 - vascular and nervous systems, particularly the close association of blood vessels and nerves of the limbs relevant to pathology collection
 - arteries, veins and capillaries
 - heart function – significant structures, greater blood vessels that enter and exit the heart
 - direction of flow of oxygenated and deoxygenated blood through the heart and lungs
 - features of collection sites
- types and features of clinical risks commonly associated with pathology collection:
 - reactions and complications to procedure
 - infection
 - hemoconcentration
 - haemolysis
 - blood components
 - sharps injury

- excessive bleeding
 - damage to nervous system
 - vascular damage
 - location of venous access
 - concurrent treatments and therapy
 - intravenous (IV) therapy
- emergency procedures for client reactions and complications
- first aid and care protocols for:
 - fainting
 - fitting
 - arterial puncture
 - nerve damage
 - bruising
 - excessive bleeding
 - diabetic emergency
 - falls
 - grazes
 - scarring and burns

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including documented emergency and first aid procedures for the candidate to follow
- modelling of industry operating conditions, including presence of situations requiring problem solving

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTPAT002 Perform venous blood collections

Modification History

N/A

Application

This unit describes the skills and knowledge required to confirm collection requirements, prepare client and equipment, and perform routine blood collections using venous blood collection.

This unit applies to any individual for whom blood collection is part of the job role. They may be working in collection centres, in hospitals or in other health care environments.

This unit relates to collections from adults of varied ages and genders, adolescents and children over 5 years of age. It does not include collections from babies, neonates, arterial collections or collections made via artificial access devices such as central lines, peripherally inserted central catheter (PICC) lines, or intra venous (IV) catheter.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

1. Greet client and confirm pre-test criteria	1.1 Greet client courteously and identify self 1.2 Identify client following organisation and regulatory procedures 1.3 Confirm that client meets pre-testing criteria for required collection 1.4 Obtain, interpret and accurately record personal and clinical information in accordance with organisation policies and procedures 1.5 Correctly explain collection procedure to client 1.6 Obtain consent for collection procedure from client
2. Prepare for venous blood collection procedure	2.1 Select appropriate collection site based on client evaluation 2.2 Assemble equipment appropriate to test requested site selected 2.3 Position client to ensure comfort and safety of both client and collector 2.4 Identify when assistance may be needed and seek help if required
3. Draw blood	3.1 Adopt standard and additional infection control guidelines and precautions according to organisation documented procedure 3.2 Clean site with approved cleansing agent and allow to air dry prior to collection 3.3 Apply and remove/loosen tourniquet according to requirements of equipment being used 3.4 Confirm suitable vein through palpation of site and clean skin according to organisation documented procedure 3.5 Anchor vein below the site according to documented procedure 3.6 Insert needle at approved angle of 30 degrees or less 3.7 Collect correct volume of blood in appropriate collection tubes in the approved order of draw, as recommended by the manufacturer 3.8 Once correct amount collected, withdraw needle and apply direct pressure to site using dry cotton swab for minimum of 2 minutes and until bleeding has visibly stopped 3.9 Dispose of needle immediately and safely using approved sharps disposal device

	3.10 Invert collection tubes within timeframe required as recommended by manufacturer 3.11 Observe client before, during and after collection for potential adverse effects and respond according to procedure
4. Follow post-blood collection procedures	4.1 Accurately label blood collection tubes in front of client with time and date of collection, client details and other required information following regulatory and organisational guidelines 4.2 Dispose of waste in accordance with infection control protocols and organisation policies and procedures 4.3 Confirm tube labelling information accuracy with client 4.4 Confirm that site has visibly stopped bleeding after appropriate time lapse and apply dressing 4.5 Complete other collection documentation in accordance with organisation procedures 4.6 Provide client with correct post venepuncture care instructions 4.7 Prepare collected samples for transit or store according to test and organisation requirements

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 35 hours of pathology collection work under the supervision of a person currently working in a phlebotomist role for at least 18 hours per fortnight
- followed established technical, infection control and safety procedures and collected blood suitable for testing using venous blood collection with a maximum of two attempts from at least 20 different people comprising adults of varied ages
- used the following methods of collection:
 - evacuated system (at least 10 times)
 - winged infusion sets and/or needle and syringe as per organisation policy and procedure

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations for blood collection, and how these are applied in organisations:
- children in the workplace
 - duty of care
 - informed consent
 - mandatory reporting
 - privacy, confidentiality and disclosure
 - records management
 - supportive holding for procedures (limitations)
 - work role boundaries
 - blood collection role in different contexts
 - sources of blood sample requests

- work health and safety
- standard infection control requirements for clinical procedures:
 - hand hygiene
 - use of personal protective equipment (PPE)
 - avoiding contact with bodily fluids
 - sharps injury prevention and treatment if sustained
 - waste disposal
- industry terminology used in blood collection:
 - equipment
 - procedures
 - abbreviations
 - blood test names
 - appropriate venepuncture sites
 - clinical history and medication details
- key aspects of human anatomy and physiology in relation to the vascular, arterial and nervous system and relevant to the variety of blood collection procedures and collection sites
- components of blood in relation to quality blood samples and pre-analytical error:
 - serum plasma
 - red cells
 - white cells
 - platelets
- clinical risks of blood collection procedures and procedures designed to minimise those risks
- collection procedure factors which contribute to a quality sample collection and impact on laboratory testing
- pre-analytical factors which may affect the chemical analysis of blood and impact on collection:
 - appropriate times to collect
 - impact of drugs
 - timing of last dose
 - required fasting times
 - protecting the integrity of the specimen
- features, functions and use of venepuncture equipment:
 - evacuated systems – multi-sample needles and winged infusion sets

- needles and syringes
 - tourniquets
 - cleansing solutions and swabs
 - collection tubes
- blood sample handling, processing, transit and storage methods
- requirements for selection and collection into tubes with variable additives:
 - ethylenediaminetetraacetic acid (EDTA)
 - sodium citrate
 - lithium/sodium heparin
 - fluoride oxalate
 - separation gel
 - blood culture bottles

Assessment Conditions

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations have not been provided in the workplace. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - tourniquets
 - collection tubes
 - syringes and needles and/or winged infusion set (butterfly)
 - multi-sample needle and holder
 - evacuated blood collection equipment
 - sharps containers
 - alcohol wipes
 - dressings
 - PPE
 - hand hygiene facilities
 - documented collection procedures for the candidate to follow
- modelling of industry operating conditions, including:
 - interactions with clients from general public
 - presence of situations requiring problem solving in non-routine situations
- supervision of candidate's work activities by a person currently working in a phlebotomist role for at least 18 hours per fortnight
- at least 5 of the 20 collections must be directly observed in workplace by the assessor

The following aspects of the performance evidence must have been demonstrated using simulation prior to demonstration in the workplace or with members of the general public:

- venous blood collection technique using the following equipment
 - evacuated system
 - winged infusion sets
 - needle and syringe

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTPAT003 Perform capillary blood collections

Modification History

N/A

Application

This unit describes the skills and knowledge required to confirm collection requirements, prepare client and equipment, and collect capillary blood using specific collection criteria, techniques and equipment.

This unit applies to any individual for whom capillary blood collection is part of the job role. They may be working in collection centres, in hospitals or in other health care environments.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian /New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Confirm collection requirements	1.1 Greet client courteously and identify self 1.2 Identify client following organisation and regulatory procedures 1.3 Confirm that client meets pre-testing criteria for required collection

	1.4 Obtain, interpret and accurately record personal and clinical information in accordance with organisation policies and procedures 1.5 Explain collection procedure to client 1.6 Obtain consent for collection procedure from client
2. Prepare for skin puncture blood collection	2.1 Confirm method and site of collection based on correct interpretation of clinical request and age of client 2.2 Select equipment to ensure the collection meets test and organisational requirements 2.3 Provide clear advice about the procedure to client or carer 2.4 Use appropriate warming device to safely prepare site as required in accordance with documented organisation procedure 2.5 Position client to ensure comfort and safety of both client and collector, using supportive holding techniques 2.6 Identify when assistance may be needed and seek help if required 2.7 Determine minimum volumes of blood required according to testing organisation's requirements and volume limits based on client age and weight
3. Draw blood	3.1 Adopt standard and additional infection control guidelines and precautions according to organisation documented procedure 3.2 Clean site with approved cleansing agent and allow to air dry prior to collection 3.3 Puncture the skin in the appropriate location, using an approved lancet appropriate to site selected and client age 3.4 Collect capillary blood sample into appropriate collection containers devices to ensure sample integrity and correct order of draw in accordance with manufacturer's guidelines 3.5 Mix sample by gentle inversion, maintaining sample integrity as required 3.6 Following collection, apply pressure to puncture site until site has stopped bleeding 3.7 Observe client before, during and after collection for potential adverse effects and respond according to procedure

4. Follow post-blood collection procedures	4.1 Accurately label blood collection tubes in front of client with time and date of collection, client details and other required information following regulatory and organisational guidelines 4.2 Dispose of waste in accordance with infection control protocols and organisation policies and procedures 4.3 Confirm information accuracy with client or carer 4.4 Confirm that site has stopped bleeding after appropriate time lapse and apply wound dressing 4.5 Complete other collection documentation in accordance with organisation procedures 4.6 Prepare collected samples for transit or store according to test requirements

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Unit Mapping Information

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed established technical, infection control and safety procedures and collected blood using skin puncture from at least 3 different people of varying ages

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations for capillary blood collection, and how these are applied in organisations:
 - children in the workplace
 - duty of care
 - informed consent
 - mandatory reporting
 - privacy, confidentiality and disclosure
 - records management
 - supportive holding for procedures (limitations)
 - work role boundaries
 - boundaries of responsibilities
 - capillary blood collection role in different contexts, and situations where skin puncture is the most appropriate collection technique
 - sources of blood sample requests
 - work health and safety
- standard infection control requirements for clinical procedures:
 - hand hygiene
 - use of personal protective equipment (PPE)
 - avoiding contact with bodily fluids

- needle stick injury considerations
 - waste disposal
- industry terminology used in skin puncture blood collection:
 - equipment
 - procedures
 - abbreviations
 - skin puncture sites
 - clinical history and medication details
- key aspects of human anatomy and physiology in relation to the skin, vascular, arterial and nervous system relevant to capillary collections
- clinical risks of capillary blood collection procedures and procedures designed to minimise those risks
- factors which may affect the chemical analysis of blood and impact on collection:
 - appropriate times to collect
 - impact of drugs
 - timing of last dose
 - required fasting times
 - protecting the integrity of the specimen
- techniques for blood collection through skin puncture
- features, functions and use of skin puncture blood collection equipment:
 - approved lancets
 - cleansing solutions and swabs
 - collection tubes (microtainers)
 - dressings
- blood sample handling, processing, transit and storage methods
- requirements for selection and collection into tubes with variable additives:
 - ethylenediaminetetraacetic acid (EDTA)
 - lithium/sodium heparin
 - fluoride oxalate
 - separation gel

Assessment Conditions

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations have not been provided in the workplace. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - sharps containers
 - bio waste bins
 - alcohol wipes
 - dressings
 - PPE
 - hand hygiene facilities
 - documented collection procedures for the candidate to follow
- modelling of industry operating conditions, including:
 - interactions with clients and carers from general public
 - presence of situations requiring problem solving in non-routine situations
- supervision of candidate's work activities by a person currently working in a phlebotomist role for at least 18 hours in a fortnight time period

The following aspect of the performance evidence must have been demonstrated using simulation prior to demonstration in the workplace or with members of the general public:

- capillary blood collection technique

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed established technical, infection control and safety procedures for a minimum of 5 different specimen types selected from the following:
 - aspirates
 - breath
 - DNA swabs
 - nail clippings and/or scrapings
 - saliva
 - semen
 - skin scrapings
 - sputum
 - stool
 - swabs – bacterial, viral and PCR
 - urine

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations for pathology collection, and how these are applied in organisations:
 - children in the workplace
 - duty of care
 - informed consent
 - mandatory reporting
 - privacy, confidentiality and disclosure

- records management
 - work role boundaries
 - boundaries of responsibilities
 - sources of non blood sample requests and interactions with other health services
 - work health and safety
- standard infection control requirements for clinical procedures:
 - hand hygiene
 - use of personal protective equipment (PPE)
 - avoiding contact with bodily fluids
 - sharps injury prevention and treatment if sustained
 - waste disposal
- industry terminology used in specimen collection:
 - equipment
 - procedures
 - abbreviations
 - medical terminology
- key aspects of anatomy and physiology sufficient to make safe specimen collection
- clinical risk factors in specimen collection and procedures designed to minimise those risks for different specimen types
- factors which may affect the chemical analysis of specimens and the impact on collection:
 - appropriate times to collect
 - timing of last dose
 - required fasting times
 - protecting the integrity of the specimen
- features, functions and use of the following specimen collection equipment:
 - sterile jars
 - 24hr urine containers with and without additives
 - swabs - viral, bacterial, polymerase chain reaction (PCR), deoxyribonucleic acid (DNA)
 - paediatric urine collection bag
 - breath balloons
 - skin scraping equipment
 - nail clipping and scraping equipment

- handling and storage methods for different specimen types

Assessment Conditions

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations have not been provided in the workplace. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - steri-wipes or alcohol wipes
 - paediatric urine bags
 - swabs
 - scalpels
 - sterile containers
 - breath balloons
 - collection devices for skin and nail scrapings
 - packaging equipment consistent with regulatory and organisational transport requirements
 - documented collection procedures for the candidate to follow
- modelling of industry operating conditions, including:
 - interactions with clients from the general public
 - presence of situations requiring problem solving
- supervision of candidate's work activities by a person currently working in a collection role for at least 18 hours in a fortnight time period

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTPAT005 Collect specimens for drugs of abuse testing

Modification History

N/A

Application

This unit describes the skills and knowledge required to confirm collection requirements, prepare client and equipment and collect specimens via urine and/or oral and breath testing following the special procedures that apply for drugs of abuse testing.

This unit applies to individuals working in collection centres, in hospitals, in other health care environments and workplaces where drugs of abuse testing takes place.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

HLTPAT010 Collect specimens for drugs of abuse testing	HLTPAT005 Collect specimens for drugs of abuse testing		Equivalent

Assessment Requirements for HLTPAT005 Collect specimens for drugs of abuse testing

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed established technical, infection control and safety procedures plus those required by the relevant standard, during collections from at least 3 different clients
- selected, prepared and used compliant equipment and collection kits
- collected urine, oral fluid or breath specimens for drugs of abuse testing

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- context for drugs of abuse testing including industry, social services, prisons, medical and legal purposes
- legal and ethical considerations (national and state/territory), including the requirements of AS/NZS 4308:2008 or AS 4760-2006 and any revisions thereof, and how these are applied in organisations:
 - duty of care
 - informed consent
 - mandatory reporting
 - privacy, confidentiality and disclosure
 - records management
 - work role boundaries
 - work health and safety
- pre-collection, during and post-collection procedures required to meet chain of custody requirements, including:
 - suitable environment to collect sample
 - client privacy
 - staff safety

- specific environmental and specimen requirements to eliminate tampering
- collection procedures required to meet chain of custody requirements, including:
 - client supervision and seclusion
 - collection procedures that eliminates the opportunity to tamper with specimen
 - documentation requirements
 - integrity testing of samples as required by standard
- storage and transportation procedures required to meet chain of custody requirements, including:
 - chain of custody process
 - security satchels and labels
 - storage
 - courier requirements
- drugs of abuse, including:
 - types of drugs included
 - chemistry
 - effect on body
 - types of collection
 - methods of analysis

Assessment Conditions

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations have not been provided in the workplace. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, required by the relevant standard:
- modelling of industry operating conditions, including:
 - interaction with non-compliant clients
 - presence of situations requiring problem solving
- supervision of candidate's work activities by a person currently working in a collection role for at least 18 hours in a fortnight time period

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTPAT006 Receive, prepare and dispatch pathology specimens

Modification History

N/A

Application

This unit describes the skills and knowledge required to receive specimens, complete the administrative process to prepare samples for pathology testing, and dispatch specimens. This unit does not cover the dispatch of dangerous goods or the transport of specimens to external facilities.

This unit applies to individuals working in specimen reception roles in laboratories and pathology collectors and assistants in collection centres.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Receive specimens	1.1 Receive and process specimens and requests in accordance with organisation policies and procedures

	1.2 Check pathology request forms and specimens documentation for adequate labelling in accordance with organisation and regulatory requirements 1.3 Ensure suitability of specimens for requested tests consulting laboratory directories or manuals 1.4 Reject specimens if necessary and complete documentation in accordance with organisation policies and procedures 1.5 Notify or consult with senior staff members as required 1.6 Follow infection control and workplace safety protocols relating to the safe handling of specimens
2. Complete administrative processing of specimens	2.1 Label specimens and request forms with unique laboratory number or bar code label in accordance with organisation policies and procedures 2.2 Register request forms, specimen and patient information into laboratory information systems in accordance with organisation policies and procedures 2.3 Complete administrative documentation in accordance with organisation policies and procedures
3. Prepare specimens	3.1 Confirm requirements for specimen processing in accordance with organisation procedures 3.2 Perform separation of sample by centrifugation in accordance with test requirements and organisation procedures 3.3 Prepare and label tubes for aliquotting in accordance with organisation procedures 3.4 Transfer sample by aliquotting into appropriate tubes in accordance with organisation policies and procedures 3.5 Sort samples according to appropriate laboratory department for testing in accordance with organisation policies and procedures 3.6 Store samples in accordance with test requirements and organisation procedures

4. Dispatch specimens	4.1 Ensure specimens for dispatch are packaged and labelled in accordance with organisation and regulatory requirements 4.2 Complete appropriate dispatch documentation in accordance with organisation policies and procedures 4.3 Dispatch specimens in accordance with organisation procedures and regulatory requirements

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed established procedures, safety requirements and infection control guidelines in the receipt, registration, sorting, storage and dispatch of at least 5 different pathology specimens

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations for pathology specimen reception and preparation work, and how these are applied in organisations:
 - codes of practice, impact on national laboratory standards on role
 - privacy, confidentiality and disclosure
 - records management
 - work role boundaries
- types of hazardous substances that may be received and how to respond:
 - bio-hazardous substances
 - formalin
 - hydrochloric acids
 - additives and fixatives
- criteria for rejection of specimens at reception stage
- pre-test processing requirements and procedures:
 - coding
 - sorting
 - aliquotting
- medical terminology and chemical abbreviations used in the pathology specimen handling process

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - pipettes
 - aliquot pots
 - personal protective equipment (PPE)
 - contaminated waste disposal
 - fridge
 - dryer
 - temperature controls
- modelling of industry operating conditions, including presence of situations requiring problem solving

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- monitored impost stock according to workplace procedures on at least 10 occasions and completed associated selection, dispatch and documentation requirements
- identified issues outside scope of own practice and referred to the authorised person

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical requirements (national, state/territory) for impost stock monitoring, and how these are applied in organisations, including:
 - codes of conduct
 - duty of care (and implications of negligence)
 - privacy, confidentiality and disclosure
 - records management
 - rights and responsibilities of workers, employers and clients
 - specific legislation:
 - medicines and their use
 - the practice of pharmacy
 - different schedules of medicines and pharmaceutical products
 - work role boundaries – responsibilities and limitations
 - work health and safety
- key information in standard pharmaceutical references and their use by pharmacy assistants, including:
 - *Australian pharmaceutical formulary and handbook* (APF)
 - MIMs
 - *Australian medicines handbook* (AMH)

- Micromedex
- proprietary and generic names of pharmaceutical products and the differences between them
- principles and procedures for imprest stock control
- features of pharmaceutical data management systems
- purpose of batch numbering and expiry dates on pharmaceutical products

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - pharmaceutical stock management procedures
 - pharmacy imprest system
 - pharmaceutical products
- modelling of industry operating conditions, including presence of time constraints for activities

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTPHA002 Pack pharmaceutical products

Modification History

N/A

Application

This unit describes the skills and knowledge required to package or pre-package pharmaceutical products, including the repackaging of medicines according to Pharmacy Board of Australia's *Guidelines on specialised supply* arrangements, national guidelines and legislation on the filling of dose administration containers.

This unit applies to pharmacy assistants and technicians working under the supervision of a pharmacist.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element</i>
1. Prepare for packaging	1.1 Comply with dress code, safety requirements and personal hygiene procedures prior to entering the packaging area

	1.2 Obtain packaging documentation, work sheet and interpret instructions from authorised person and according to packaging specifications 1.3 Clean and prepare work area according to pre-determined work sheet or equivalent 1.4 Identify, clean, prepare and set packaging equipment 1.5 Identify and report discrepancies in equipment functioning and take corrective action according to the instructions of an authorised person 1.6 Obtain appropriate and sufficient packaging materials according to stock issuing procedures 1.7 Obtain approved medicine 1.8 Prepare and check labels according to work sheet and legal requirements 1.9 Submit work sheet and labels to pharmacist for approval
2. Pack products	2.1 Operate packaging equipment to pack products 2.2 Label container/units according to labelling specifications on the work sheet 2.3 Apply in-process controls and record results accurately 2.4 Report deviations to authorised person and take corrective action according to instructions from an authorised person
3. Conduct quality control	3.1 Obtain approval from authorised person at designated points in the packaging process according to work sheet 3.2 Obtain relevant quality control documentation and check product specifications according to work sheet 3.3 Reconcile and verify packaging materials under supervision of an authorised person 3.4 Submit sample
4. Complete packaging process	4.1 Reconcile number of labels printed with number used and report discrepancies to the pharmacist 4.2 Alert authorised person of excess materials 4.3 Complete batch documentation and forward according to standard operating procedures

	4.4 Obtain final approval from the pharmacist before releasing packed medicines/product to storage areas 4.5 Clean equipment according to manufacturer instructions

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTPHA002 Pack pharmaceutical products

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed workplace procedures and safe packaging practices for at least 10 different product batches, including at least 5 dose administration aids (DAAs)/dose administration containers for an individual client
- identified issues outside scope of own practice and referred to the authorised person

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical requirements (national, state/territory) for pharmacy work, and how these are applied in organisations, including:
 - codes of conduct
 - duty of care (and implications of negligence)
 - privacy, confidentiality and disclosure
 - records management
 - rights and responsibilities of workers, employers and clients
 - specific legislation:
 - medicines and their use
 - the practice of pharmacy
 - different schedules of medicines and pharmaceutical products
 - work role boundaries – responsibilities and limitations
 - work health and safety
- legal requirements and principles of pharmaceutical product labelling (product name, batch numbering and expiry date):
 - Pharmacy Board of Australia's *Guidelines on specialised supply arrangements*, national guidelines and legislation on the filling of dose administration containers

- specific labelling requirements for filling DAAs and other containers
- key information for inclusion:
 - date on which the container was filled
 - directions for use of each medicine according to work sheet
 - inclusion of ancillary labels, where required
 - name, strength, form and quantity of all medicines supplied in the container
 - pharmacy details
- Pharmacy Board of Australia *Guidelines for dispensing medicines*, that apply to individual workers
- key information in standard pharmaceutical references and their use by pharmacy assistants, including:
 - *Australian pharmaceutical formulary and handbook (APF)*
 - MIMs
 - *Australian medicines handbook (AMH)*
 - Micromedex
- infection control principles and their relevance to pharmaceutical packaging
- features of packaging equipment including their operation, cleaning and maintenance, including:
 - counting trays
 - irons
 - heat sealing equipment
 - measures
 - scales
 - tweezers
- packaging principles and processes, including:
 - calculations, weights and measures
 - properties of container types and selection for use
 - various pack sizes and selection for use
 - types of packaging materials
- environmental conditions required for pharmaceutical packaging related to:
 - humidity, light
 - security
 - temperature
 - ventilation

- product identification and handling, including those for:
 - formulary medicines and non-formulary medicines
 - products with the required integrity as well as those whose integrity has been compromised
 - routine handling of products and products requiring special handling

Assessment Conditions

Skills must be demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - weighing and measuring equipment
 - packaging equipment and materials, including DAAs and containers
 - pharmaceutical stock management procedures
- modelling of industry operating conditions, including time constraints for completing packaging activities

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTPHA003 Assist with dispensing of prescriptions and medication orders

Modification History

N/A

Application

This unit describes the skills and knowledge required to accept and check the validity of prescriptions and medication orders, and assist the pharmacist by preparing labels, assembling products and completing documentation.

This unit applies to pharmacy assistants and technicians working under the supervision of a pharmacist.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element</i>
1. Accept order for dispensing	1.1 Receive prescription or medication order and complete and confirm client details 1.2 Identify the prescriber and initiating source for the purpose of costing and data entry

	1.3 Read documentation to confirm the legality, validity and completeness of the prescription or medication order 1.4 Identify if client is eligible to access the medicine through the Pharmaceutical Benefits Scheme (PBS) 1.5 Identify and report discrepancies to pharmacist 1.6 Provide information to client about dispensing expectations in terms of time and cost as required
2. Ensure clinical evaluation by pharmacist	2.1 Refer prescription or medication order to pharmacist for clinical evaluation 2.2 Confirm pharmacist has completed a clinical evaluation before filling the order 2.3 Complete required documentation prior to dispensing
3. Prepare for labelling of medicines	3.1 Enter dispensing data into the pharmacy system and check accuracy against documentation 3.2 Generate label, and cautionary and advisory labels to meet legal and regulatory requirements 3.3 Follow procedures to deal with contraventions of law 3.4 Check information on labels for accuracy and clarity against dispensing requirements 3.5 Alert the pharmacist to any relevant warnings from the pharmacy system
4. Assemble items	4.1 Interpret prescription or medication order requirements and refer to pharmacist where details or quantities are unclear 4.2 Select prescribed products in the correct quantities of each item, according to prescription or medication order, ensuring expiry date is appropriate 4.3 Use barcode scanning technology during the dispensing process according to Pharmacy Board of Australia <i>Guidelines for dispensing medicines</i> 4.4 Package and label correct quantities into a suitable container with correct and clear labelling 4.5 Check packed item for accuracy and visibility of expiry date 4.6 Mark order with the quantity supplied, signature and date

	4.7 Self check work to ensure accuracy of assembled items 4.8 Assemble items for an easy and complete check by the pharmacist
5. Finalise dispensing of medicine	5.1 Verify that prescription or medication order is checked and signed by the pharmacist 5.2 Complete accurate final documentation 5.3 Record relevant information and statistics according to workplace requirements

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed workplace procedures, safe dispensing practices, The International System of Units (SI) and most recent *Australian pharmaceutical formulary and handbook* (APF) to accurately process at least 50 items from prescriptions/medication orders
- identified issues outside scope of own practice and referred to the authorised person

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical requirements (national, state/territory) for dispensing prescriptions, and how these are applied in organisations, including:
 - codes of conduct
 - duty of care (and implications of negligence)
 - privacy, confidentiality and disclosure
 - records management
 - rights and responsibilities of workers, employers and clients
 - specific legislation:
 - medicines and their use
 - the practice of pharmacy
 - different schedules of medicines and pharmaceutical products
 - work role boundaries – responsibilities and limitations
 - work health and safety
- legal requirements for dispensing of medicines:
 - information requirements on prescriptions and medication orders
 - requirements to be satisfied for a complete, unambiguous and valid prescription/medication order and actions to take if validity is questionable

- specific requirements for dispensing controlled medicines
- Pharmacy Board of Australia *Guidelines for dispensing medicines*
- key information in standard pharmaceutical references and their use by pharmacy assistants, including:
 - APF
 - MIMs
 - *Australian medicines handbook* (AMH)
 - Micromedex
- dispensing procedures:
 - procedures and rationale for validating orders
 - types of discrepancies or potential issues found on prescriptions and medication orders, and how to respond to these
 - accepted self-checking processes to ensure accuracy
 - charging for pharmaceuticals e.g. organisation policy and the PBS
 - legal requirements and principles of pharmaceutical product labelling
 - prescribing conventions, and abbreviations and medical terminology used for instructions for the use of medicines
 - principles of calculations, weights and measures using the SI system
 - processes for reconstitution of products
 - properties of container types and principles of selection for use
- features of pharmaceutical products:
 - methods of administration, and use and effect on human physiology
 - common proprietary and generic names and their differences
 - medicine forms, dose, strength and quantity
 - principles and procedures for maintaining their security
 - principles and range of storage requirements
- product identification and handling, including those for:
 - formulary medicines and non-formulary medicines
 - products with the required integrity as well as those whose integrity has been
 - routine of handling products and products requiring special handling
- infection control principles and their relevance to dispensing medicines

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - weighing and measuring equipment
 - prescriptions and medication orders
 - pharmaceutical references
- modelling of industry operating conditions, including time constraints for completing dispensing activities

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTPHA004 Order, maintain and distribute pharmaceutical stock

Modification History

N/A

Application

This unit describes the skills and knowledge required to maintain a pharmaceutical stock control system and distribute pharmaceutical products.

This unit applies to pharmacy assistants and technicians working under the supervision of a pharmacist.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element</i>
1. Procure stock	1.1 Identify items and quantity required for order, according to predetermined minimum and maximum stock levels 1.2 Obtain requisition requirements from authorised personnel

	1.3 Source supplier according to organisation procedures and contractual obligations 1.4 Interpret information to identify availability and cost of item and provide information to pharmacist 1.5 Generate and place order following approval by delegated staff member
2. Process new stock	2.1 Accept delivery of stock and match delivery documentation with stock delivered 2.2 Check condition of stock and expiry date and report deviations to the appropriate person 2.3 Reconcile stock with order or control lists and report discrepancies to the appropriate person 2.4 Inform pharmacist of medicines with specific recording requirements according to legal requirements and local policy 2.5 Maintain batch traceability 2.6 Accurately complete data capture requirements, including reconciliation of statements and invoices 2.7 Comply with organisation procedures to return stock to supplier
3. Handle and maintain stock	3.1 Store stock according to stock storage and rotation requirements 3.2 Maintain conditions to minimise risk of contamination 3.3 Monitor stock on a regular basis, including minimum and maximum stock levels, and report deviations to the appropriate person 3.4 Monitor and maintain correct storage requirements and report deviations to the appropriate person 3.5 Maintain accurate location maps 3.6 Check security compliance and report irregularities to the appropriate person
4. Select and pack item order	4.1 Select and pack items according to order requirements 4.2 Complete data entry requirements associated with processing orders

	4.3 Check labelling, specific handling instructions and delivery information for accuracy in line with identified requirements 4.4 Check packaging is completed according to specific instructions
5. Dispatch orders	5.1 Check delivery documentation for accuracy and follow requirements 5.2 Implement packaging and handling procedures to ensure the security, integrity, cold chain maintenance and breakage avoidance of delivered goods 5.3 Complete medicine registers and other documentation accurately, as required
6. Process returned stock	6.1 Inspect returned products for their expiry date and integrity, and place in designated area 6.2 Place reusable returned stock in appropriate designated area 6.3 Dispose of unusable returned items according to organisation procedure 6.4 Complete inspection documentation accurately and forward for authorisation 6.5 Maintain accurate records and complete credit process in a timely manner
7. Assist in stocktaking procedures	7.1 Check stock lists of all items for stocktaking 7.2 Reconcile actual stock against stock lists 7.3 Count stock and check expiry dates 7.4 Identify stock discrepancies and report to the appropriate person 7.5 Determine minimum and maximum stock levels and report to the appropriate person 7.6 Complete and maintain accurate stocktake documentation

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

 - MIMs
 - *Australian medicines handbook (AMH)*
 - Micromedex
- product identification and handling, including those for:
 - formulary medicines and non-formulary medicines
 - products with the required integrity as well as those whose integrity has been compromised
 - routine of handling products and products requiring special handling
 - packaging and transport specifications
- principles of procurement of pharmaceutical products including:
 - central supply systems and tender processes
 - purpose and process of purchasing contracts
 - sources of stock, including non-formulary items and Special Access Scheme (SAS) items
 - sources to determine legitimate receivers of stock
 - stock ordering processes and systems
- storage requirements for different types of stock:
 - environmental conditions
 - rotation requirements
- principles and procedures of stock control and maintenance including:
 - input and access of data relevant to stock control
 - financial implications of stock level control
 - maintaining security of pharmaceutical products
 - purpose of batch numbering and expiry dates on pharmaceutical items
 - procedures for dealing with alerts and company recalls
 - different methods of disposal of unwanted pharmaceutical products and outdated stock
 - procedures for dealing with returned stock
- infection control principles and their relevance to pharmaceutical stock control

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:

- stock reporting and data systems
- prescriptions and medication orders
- pharmaceutical references
- modelling of industry operating conditions, including time constraints for stock control activities

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTPHA005 Conduct small scale compounding and labelling of pharmaceutical products

Modification History

N/A

Application

This unit describes the skills and knowledge required to complete small scale compounding of non-sterile pharmaceutical products from predetermined formulae, including extemporaneous dispensing.

This unit applies to pharmacy assistants and technicians working under the supervision of a pharmacist.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element</i>
1. Source information on formula	1.1 Select appropriate formula and master batch sheet for product, based on correct interpretation of the medication order or prescription

	1.2 Confirm suitability of chosen master work sheet and availability of resources 1.3 Obtain authority of pharmacist to proceed
2. Prepare for production process	2.1 Comply with dress code, safety and personal hygiene procedures prior to entering the work area 2.2 Clean work area and equipment correctly 2.3 Confirm inventory levels of raw materials and disposable equipment 2.4 Prepare a work sheet referenced from a master work sheet 2.5 Verify that batch/work sheets are clearly written in logical order with clear directions and contains all the required information 2.6 Assign product batch number 2.7 Generate the product labels referenced from the master label detailed on the master work sheet 2.8 Check and note the number of labels generated 2.9 Submit work sheet and labels to pharmacist for approval 2.10 Check and set up compounding requirements and equipment
3. Obtain equipment and supplies	3.1 Acquire materials listed on the work sheet according to stock levels and stock requisitioning procedures 3.2 Check raw materials to ensure they have been released from quarantine for use by authorised persons 3.3 Verify raw materials against batch work sheet and record raw material batch numbers and expiry dates 3.4 Weigh or measure raw materials in designated area 3.5 Obtain required authorisation or checks at designated points according to work sheet
4. Compound products	4.1 Allocate approved raw materials to equipment according to batch work sheet 4.2 Compound product according to method on work sheet 4.3 Monitor and adjust compounding to comply with work sheet specifications

	4.4 Perform verification procedures, inspect finished product for deviations and report to authorised person 4.5 Pack compounded product as specified on the work sheet, and following approval from an authorised person 4.6 Label containers/units according to labelling specifications on the work sheet 4.7 Obtain required authorisation or checks at designated points
5. Complete production process	5.1 Reconcile number of labels printed with number used and report discrepancies to the pharmacist 5.2 Place product in quarantine area under appropriate storage conditions 5.3 Clean machinery and manufacturing area and dispose of disposable equipment safely 5.4 Complete all required documentation and forward to an authorised person 5.5 Report all discrepancies to an authorised person 5.6 Obtain final approval from the pharmacist before releasing packed medicines to storage areas
6. Participate in quality control	6.1 Pack and label a retention sample and/or quality control sample if specified on the work sheet 6.2 Submit product sample and relevant documentation to quality control, where specified 6.3 Record and file product quality control assay results
7. Store and transport released product	7.1 Store products according to work sheet documentation 7.2 Obtain released product(s) from quarantine store 7.3 Pack released product(s) into delivery containers which will maintain the required ambient conditions for the product 7.4 Deliver product to destination 7.5 Advise receipting area personnel of specific storage requirements 7.6 Complete and file records and/or work sheets

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed workplace procedures and industry codes to correctly and safely compound and label at least 5 different batches of pharmaceutical products listed in the *Australian pharmaceutical formulary and handbook* (APF)
- identified issues outside scope of own practice and referred to the authorised person

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical requirements (national, state/territory) for pharmacy work, and how these are applied in organisations, including:
 - codes of conduct
 - duty of care (and implications of negligence)
 - privacy, confidentiality and disclosure
 - records management
 - rights and responsibilities of workers, employers and clients
 - specific legislation:
 - medicines and their use
 - the practice of pharmacy
 - different schedules of medicines and pharmaceutical products
 - work role boundaries – responsibilities and limitations in manufacturing products
 - work health and safety
- key information in standard pharmaceutical references and their use in manufacturing, including:
 - APF

- MIMs
- *Australian medicines handbook (AMH)*
- Micromedex
- rationale for, and key features of:
 - The Society of Hospital Pharmacists (SHPA) *Guidelines for medicines prepared in Australian hospital pharmacy departments*
 - Pharmaceutical Inspection Convention and Pharmaceutical Inspection Co-operation Scheme (PIC/S) *Guide to good practices for the preparation of medicinal products in healthcare establishments*
- product identification and handling, including those for:
 - formulary medicines and non-formulary medicines
 - products with the required integrity as well as those whose integrity has been compromised
 - routine of handling products and products requiring special handling
- nature and use of different dosage forms including:
 - oral
 - parenteral products
 - topical
- infection control requirements for small scale compounding of pharmaceutical products, including:
 - correct disposal of sharps and residues
 - cleaning and disinfection processes
 - personal hygiene
 - sources and types of contamination and required responses (microbial, cross-chemical, physical, environmental; and corrective strategies)
- manufacturing processes relating to small scale compounding, including:
 - nature and use of oral and topical dosage forms
 - chemical and physical properties of raw materials in relation to formulation and compounding
 - types of equipment, their key features and use
 - compounding of a product according to a work sheet
 - principles and procedures of formulae calculations, weights and measures
 - processes for dilution, suspension, incorporation and reconstitution
- risk considerations and procedures for pharmaceutical manufacturing:
 - product security
 - handling and storage of hazardous materials

- quarantine periods
- requirements for formulated manufacturing documentation
 - different documentation types, their scope and purpose
 - worksheet processes
 - information quality requirements including clarity, logic and completeness
- labelling requirements for compounded products, including:
 - adherence to legislative requirements
 - name, form and strength of product
 - ancillary labels as part of label details
 - hazard warnings
 - spacing for entry of batch numbers and expiry dates
- packaging methods, container materials and principles for selection
- storage and transport requirements and rationale for different types of product including:
 - hazardous materials
 - special storage considerations:
 - humidity
 - isolation
 - light
 - temperature
 - ventilation
- features and use of pharmacy systems used for small scale compounding

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - weighing and measuring equipment
 - utensils
 - raw materials
 - pharmaceutical references
- modelling of industry operating conditions, including presence of time constraints for activities

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTPHA006 Provide assistance in dispensary administration

Modification History

N/A

Application

This unit describes the skills and knowledge required to use dispensary administration systems to maintain dispensary information, process Pharmaceutical Benefits Scheme (PBS) claims and complete other specialised administration tasks.

This unit applies to pharmacy assistants and technicians working under the supervision of a pharmacist.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element</i>
1. Perform dispensing administration tasks	1.1 Use technical and numerical features of dispensary administrative systems correctly 1.2 Issue and update pharmaceutical entitlement and benefit documents to and for clients within scope of own job role

2. Maintain dispensary information	2.1 Update dispensary system with accurate information as required 2.2 Back up dispensary system information to ensure secure data 2.3 Identify and respond to information discrepancies 2.4 Identify and extract correct clinical and financial data required for reporting and claiming systems 2.5 Inform relevant pharmacist of changes to data stored in the dispensary information system 2.6 Maintain confidentiality of dispensary information
3. Process pharmaceutical benefit claims	3.1 Collate prescriptions eligible for PBS claims and confirm details 3.2 Interpret and use financial information related to claims 3.3 Submit pharmaceutical claims to relevant authority 3.4 Maintain accurate records for claims submission

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTPHA006 Provide assistance in dispensary administration

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- prepared at least 2 batches of PBS or Section 100 claims using pharmacy systems to complete administrative tasks, including:
 - sourced, extracted, recorded and disseminated both clinical and financial dispensary information
 - identified and resolved issues to enable claims to be submitted
 - provided accurate information to clients and pharmacist
- identified issues outside scope of own practice and referred to the authorised person

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical requirements (national, state/territory) for dispensary administration, and how these are applied in organisations, including:
 - codes of conduct
 - duty of care (and implications of negligence)
 - privacy, confidentiality and disclosure
 - records management
 - rights and responsibilities of workers, employers and clients
 - specific legislation:
 - medicines and their use
 - the practice of pharmacy
 - different schedules of medicines and pharmaceutical products
 - work role boundaries – responsibilities and limitations
 - work health and safety

- key information in standard pharmaceutical references and their use by pharmacy assistants, including:
 - *Australian pharmaceutical formulary and handbook* (APF)
 - MIMs
 - *Australian medicines handbook* (AMH)
 - Micromedex
- types of hardware and software used in pharmacy administration, and features of their use
- features of the PBS:
 - schedule of PBS
 - process for Pharmaceutical Benefit Authority items including streamline authority, phone authority and written authority.
 - process for highly specialised drugs
- dispensary information management requirements, including:
 - accounting
 - stock control
 - compliance documentation
 - patient information
- requirements for client entitlement
- types of pharmaceutical benefit documents and their use

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - electronic records of prescriptions and medication orders
 - web based claiming systems
- modelling of industry operating conditions, including:
 - time constraints for data entry and claims processing
 - presence of situations requiring problem solving

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Link

HLTPHA007 Conduct small-scale compounding and labelling of aseptic pharmaceutical products

Modification History

N/A

Application

This unit describes the skills and knowledge required to complete small scale compounding of sterile pharmaceutical products from pre-determined formulae, including extemporaneous dispensing. This includes cytotoxic and total parental nutrition (TPN) products.

This unit applies to pharmacy assistants and technicians working under the supervision of a pharmacist.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element</i>
1. Source information on formula	1.1 Select appropriate formula and master work sheet for the product, based on correct interpretation of the prescription or medication order

	1.2 Confirm suitability of chosen master work sheet and availability of resources 1.3 Obtain authority of pharmacist to proceed
2. Prepare for production process	2.1 Confirm the availability of the appropriate laminar flow hood/clean room or cytotoxic drug safety cabinet/cytotoxic suite or room or isolator required to compound the product according to the work sheet 2.2 Comply with dress code, safety and personal hygiene procedures prior to entering the work area 2.3 Clean work area and equipment correctly 2.4 Maintain inventory levels of materials and disposable equipment 2.5 Prepare a work sheet referenced from a master work sheet 2.6 Assign product batch number 2.7 Verify that the work sheets are clearly written in logical order with clear directions and contain all the required information 2.8 Generate the product labels referenced from the master label detailed on the master work sheet 2.9 Check and note the number of labels generated 2.10 Submit work sheet and labels to pharmacist for approval 2.11 Check and set up compounding requirements and disposable equipment
3. Obtain equipment and supplies	3.1 Assemble materials used in aseptic compounding as listed in the work sheet, according to stock levels and stock requisitioning procedures 3.2 Check materials to ensure they have been released from quarantine for use by authorised persons 3.3 Verify materials against manufacturing work sheet and record material batch numbers and expiry dates 3.4 Select appropriate types, size and features of containers and packaging listed in the work sheet 3.5 Weigh or measure materials in designated area 3.6 Obtain required authorisation or checks at designated points according to the work sheet

4. Prepare for sterile manufacturing	4.1 Transfer raw materials, disposable equipment, required containers or packaging and covered work sheet to pre-production area 4.2 Follow hand washing, gowning and gloving procedures 4.3 Disinfect and transfer materials, disposable equipment and work sheet to sterile production area
5. Prepare for cytotoxic production	5.1 Check that cytotoxic spill cleaning kits are available in all production areas 5.2 Select and use appropriate sterile personal protective equipment for safe handling and preparation of cytotoxic drugs as required 5.3 Follow specific procedures to minimise risk of exposure to cytotoxic drugs
6. Compound products using aseptic techniques	6.1 Allocate approved bulk materials, intermediary products and containers to appropriate equipment 6.2 Incorporate materials according to work sheet using appropriate manipulation technique 6.3 Compound product according to method on manufacturing work sheet 6.4 Prepare cytotoxic products using procedures for safe handling of cytotoxic drugs 6.5 Operate specialist equipment and use specialist supplies in sterile production preparation 6.6 Perform verification procedures and inspect finished product for deviations and report to authorised person 6.7 Pack compounded product into appropriate container as specified on the work sheet, and following approval from an authorised person 6.8 Label containers according to labelling specifications on the work sheet 6.9 Obtain required authorisation or checks at designated points

7. Complete production process	7.1 Reconcile the number of labels printed with number used and report discrepancies to the pharmacist 7.2 Place product in quarantine area under appropriate storage conditions 7.3 Clean machinery and manufacturing area and dispose of disposable equipment safely 7.4 Follow procedures for cleaning cytotoxic spills, and exposure to cytotoxic drugs 7.5 Complete required documentation and forward to an authorised person 7.6 Report discrepancies to an authorised person 7.7 Obtain final approval from pharmacist before releasing compounded medicines to storage areas 7.8 Discard waste materials appropriately
8. Participate in quality control	8.1 Pack and label a retention sample and/or quality control sample if specified on the work sheet 8.2 Perform environmental monitoring and report abnormal readings to an authorised person 8.3 Submit product sample and relevant documentation to quality control 8.4 Record and file product quality control assay results and manufacturing area environmental monitoring results
9. Store and transport released product	9.1 Store products according to the work sheet 9.2 Obtain released product(s) from quarantine store 9.3 Pack released product(s) into delivery containers which will maintain the required ambient conditions for the product 9.4 Deliver product to destination ensuring safe transport of cytotoxic products 9.5 Advise receipting area personnel of storage requirements 9.6 Complete and file records and/or work sheets

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTPHA007 Conduct small-scale compounding and labelling of aseptic pharmaceutical products

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed established procedures and industry codes to accurately and safely produce 10 aseptic products:
 - worked within the requirements of sterile areas, air locks, laminar flow hoods and cytotoxic drug safety cabinet/isolators
- identified issues outside scope of practice and referred these to the authorised person

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical requirements (national, state/territory) for pharmacy work, and how these are applied in organisations, including:
 - codes of conduct
 - duty of care (and implications of negligence)
 - privacy, confidentiality and disclosure
 - records management
 - rights and responsibilities of workers, employers and clients
 - specific legislation:
 - medicines and their use
 - the practice of pharmacy
 - different schedules of medicines and pharmaceutical products
 - work role boundaries – responsibilities and limitations in manufacturing products
 - work health and safety
- key information in standard pharmaceutical references and their use in manufacturing, including:

- *Australian pharmaceutical formulary and handbook (APF)*
- MIMs
- *Australian medicines handbook (AMH)*
- Micromedex
- rationale and key features of:
 - The Society of Hospital Pharmacists (SHPA) *Standards of practice for the safe handling of cytotoxic drugs in pharmacy departments*
 - Pharmaceutical Inspection Convention/Pharmaceutical Inspection Co-operation Scheme (PIC/S) *Guide to good practices for the preparation of medicinal products in healthcare establishments* (PE010-3)
- product identification and handling, including those for:
 - formulary medicines and non-formulary medicines
 - products with the required integrity as well as those whose integrity has been compromised
 - routine of handling products and products requiring special handling
- nature and use of different dosage forms, including:
 - oral
 - parenteral products
 - topical
- infection control requirements for small scale compounding of aseptic pharmaceutical products, including:
 - aseptic technique
 - correct disposal of sharps and residues
 - cleaning and disinfection processes plus sterilisation of pharmaceuticals
 - personal hygiene and clothing standards
 - sources and types of contamination and required responses – microbial, cross-chemical, physical, environmental and corrective strategies
- processes relating to aseptic, including:
 - calculations for all sterile admixtures
 - chemical and physical properties of materials in relation to formulation and compounding
 - principles and procedures of formulae calculations, weights and measures
 - principles of aseptic technique, including cytotoxic manufacturing
 - processes for dilution, suspension, incorporation and reconstitution
 - use of terminal filtration
- risk considerations and procedures for pharmaceutical manufacturing:

- product security
 - handling and storage of hazardous materials
 - quarantine periods
 - management of cytotoxic spills
 - specific hazards related to cytotoxic manufacture
 - transport of cytotoxic medications
- requirements for formulated manufacturing documentation, including:
 - different documentation types, their scope and purpose
 - worksheet processes
 - information quality requirements (including clarity, logic and completeness)
- specific labelling requirements for compounded products, including:
 - adherence to legislative requirements
 - name, form and strength of product
 - ancillary labels as part of label details
 - hazard warnings
 - spacing for entry of batch numbers and expiry dates
- packaging methods, container materials and principles for selection
- storage and transport requirements and rationale for different types of product including:
 - hazardous materials
 - special storage considerations:
 - humidity
 - isolation
 - light
 - temperature
 - ventilation
- features and use of pharmacy systems used for aseptic compounding
- circumstances that require compounding of the product within a laminar flow hood/clean room or cytotoxic drug safety cabinet/cytotoxic suite or room or isolator

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:

- simulated facilities with physically separate areas for preparation/checking of product, hand washing and manipulation of produce
- gowns, gloves and hand washing facilities
- weighing and measuring equipment
- materials (including simulation medicine substitutes such as coloured water) and disposable equipment
- note that a clean room environment is not required for simulated assessment
- modelling of industry operating conditions, including time constraints for completing activity

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTPHA008 Support pharmacist communication with clients and other health professionals

Modification History

N/A

Application

This unit describes the skills and knowledge required to identify and respond to pharmacy client information needs in relation to medicines and pharmacy services. Information recipients may be end user clients or other health professionals supporting the client.

This unit applies to pharmacy assistants and technicians working under the supervision of a pharmacist.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element</i>
1. Identify client information needs	1.1 Review client documentation to identify the medicines the client is taking 1.2 Clarify client information needs with pharmacist

	1.3 Identify and plan to meet client special needs which may impact on the effectiveness of communication 1.4 Use standard assessment tools to identify a client's ability to manage their medications 1.5 Discuss information needs with the client and /or carer and refer needs outside of scope of role to the pharmacist
2. Gather and prepare information to meet client needs	2.1 Access reference material to gather information 2.2 Ensure information is in a suitable format for the client to understand 2.3 Select appropriate modes of communication to suit the purpose and context of the information being provided
3. Provide specific or prepared information to clients	3.1 Provide prepared information to clients when requested by the pharmacist 3.2 Present relevant information to the client clearly and in sufficient detail to meet the needs of the client 3.3 Reinforce the key messages provided to clients by the pharmacist or through consumer medicine information (CMI) and refer needs outside of scope of role to the pharmacist 3.4 Exercise appropriate discretion and confidentiality and explain boundaries of confidentiality to client 3.5 Seek advice and assistance from the pharmacist for unresolved concerns or issues 3.6 Negotiate appointments with client and staff for the provision of information to the client
4. Collect information and provide to other health professionals	4.1 Detect new client admission and notify pharmacist 4.2 Record client's medication brought into hospital 4.3 Communicate medicines supply information to internal medical, nursing staff and community providers 4.4 Obtain discharge planning information from relevant source 4.5 Prepare information for health professional for verification by the pharmacist 4.6 Transfer information to health professional after verification by pharmacist

5. Confirm that client information needs have been met	5.1 Clarify with client that they understand the information provided 5.2 Confirm with the pharmacist that client information needs have been met 5.3 Record details of information provided to the client

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTPHA008 Support pharmacist communication with clients and other health professionals

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- complied with legislative and professional practice standards in the collection and provision of a medicines list for at least 10 clients, using effective communication techniques to elicit and provide information in one-to-one communication, including:
 - listened actively
 - used techniques to establish rapport
 - used techniques to clarify meaning
 - provided clear, concise and correct information both verbally and in writing
 - recognised and addressed issues of concern
- identified issues outside scope of practice and referred them to the pharmacist

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical requirements (national, state/territory) for pharmacy work, and how these are applied in organisations, including:
 - codes of conduct
 - duty of care (and implications of negligence)
 - informed consent
 - privacy, confidentiality and disclosure
 - records management
 - rights and responsibilities of workers, employers and clients
 - specific legislation:
 - medicines and their use
 - the practice of pharmacy
 - different schedules of medicines and pharmaceutical products

- work role boundaries – responsibilities and limitations, including limitations of own work role and type of information able to be provided:
 - CMI
 - confirmation of appointment date and time
 - information about the use of respiratory devices
 - information about the use of dose administration aids (DAAs)
 - standardised (workplace approved) information for clients
 - work health and safety
- purpose and scope of client education to aid compliance with administration of medicines
- procedures for client identification and confirmation of identification
- CMI:
 - purpose and layout
 - sources of pharmacy computer system, National Prescribing Services online CMI search
- documentation:
 - assessment of client's ability to manage medications
 - list of medications brought into hospital
 - that CMI or other medication-related information has been issued to client/carer
- purpose and features of DAAs and limitations and problems with these devices
- principles of effective communication, including recognition of communication and language difficulties and how to overcome these
- features of current medication lists, purpose and layout
- sources and method of preparation of electronic and hard copy information
- purpose of, and methods for, standardised assessment of client's ability to manage medications
- factors that affect clients' ability to manage medications, including special needs related to:
 - communication environment and context
 - cognitive ability
 - cultural or language barriers
- respiratory devices:
 - care of respiratory devices
 - demonstration of respiratory devices

- knowledge, purpose and selection criteria for respiratory devices (including: dry powder inhalers, metered dose inhaler, spacers)
- structure and functions of the body systems and associated components, including:
 - cardiovascular system
 - cells, tissues and organs
 - digestive system
 - endocrine system
 - integumentary system
 - lymphatic system
 - musculo-skeletal system
 - nervous system
 - reproductive system
 - respiratory system
 - the special senses – smell, taste, vision, equilibrium and hearing
 - urinary system
- purposes of different medicine groups, including:
 - analgesics and anti-inflammatory agents
 - anti-coagulants
 - anti-depressants
 - anti-diabetic agents
 - anti-epileptics
 - anti-gout agents
 - anti-histamines
 - anti-hypertensives
 - anxiolytics and hypnotics
 - asthma treating agents
 - cholesterol and lipid lowering agents
 - corticosteroids
 - cytotoxics
 - diuretics
 - gastro-intestinal agents
 - heart medicines
 - hormonal medicines
 - osteoporosis medicines

- viral and anti-bacterial agents, anti-fungals or antibiotics
- factors affecting medicine groups:
 - blood pressure
 - breast feeding
 - geriatric
 - paediatric
 - pregnancy
- issues that affect the use of medicine in an individual:
 - bioavailability
 - bioequivalence
 - medicines absorption
 - medicines distribution
 - medicines elimination
 - medicines half-life
 - medicines metabolism
- concept of medicines:
 - medicines interactions
 - medicines food interactions and incompatibilities

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including CMI
- modelling of industry operating conditions, including communication with clients and health professionals

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Link

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element</i>
1. Identify and address requirements for data and information collection	1.1 Obtain and clarify instructions from pharmacist to ensure correct understanding 1.2 Identify purpose and audience of the data and information to be collected

	1.3 Determine appropriate data and information sources 1.4 Establish timeframe for data and information collection 1.5 Collect data and information to address identified requirements
2. Prepare data and information for use	2.1 Check data and information for completeness and accuracy and respond to discrepancies 2.2 Analyse data and information to address identified purpose and audience 2.3 Collate data and information in a logical manner and prepare for presentation
3. Present workplace data and information	3.1 Select appropriate modes of communication to suit the purpose and context of the information being provided 3.2 Explain data and information to others as required to support its application to workplace operations 3.3 Answer questions about the data and information collected and clarify appropriately within scope of practice 3.4 Record and store data and information according to workplace procedures

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- complied with legal, organisational and Society of Hospital Pharmacists (SHPA) *Standards of practice for clinical pharmacy services* for collection and presentation of accurate data and information:
 - screened at least 30 laboratory tests for abnormal results and notified the pharmacist
 - sourced and gathered at least one set of data or information for the following:
 - preparatory information required for reporting adverse drug reactions and other medication incidents
 - drug utilisation evaluation /audit information requested by the pharmacist
 - specific client data
 - arranged information and presented it in a form appropriate for the purpose of organisation's work practices

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical requirements (national, state/territory) for pharmacy work, and how these are applied in organisations, including:
 - codes of conduct
 - duty of care (and implications of negligence)
 - informed consent
 - privacy, confidentiality and disclosure
 - records management
 - rights and responsibilities of workers, employers and clients

- specific legislation:
 - medicines and their use
 - the practice of pharmacy
 - different schedules of medicines and pharmaceutical products
- work role boundaries – responsibilities and limitations
- work health and safety
- key information in standard pharmaceutical references and their use:
 - *Australian pharmaceutical formulary and handbook* (APF)
 - MIMs
 - *Australian medicines handbook* (AMH)
 - Micromedex
- the role of, and how to utilise pharmacists with specific responsibilities:
 - medicines information
 - quality use of medicines
 - drug utilisation evaluation
 - clinical trials and clinical pharmacists
 - pharmacy managers
- order of referencing in presentation of information i.e. primary, secondary, tertiary references
- concept of drug utilisation evaluation and the data recorded
- concept of key performance indicators and data reported
- pharmacy or health facility management systems and procedures related to the collection and presentation of workplace data and information
- types of data and information collected and presented in the pharmacy context:
 - adverse drug reactions (ADR) and other medication incidents:
 - data required for reporting
 - meaning of ADR
 - process for reporting
 - purpose of reporting
 - biochemical, haematological and microbiology tests:
 - purpose of tests
 - understanding, of the abbreviations used
 - understanding of the concept of reference range
 - clinical trials:

- purpose of collection of information and the data required
 - understanding of the importance of maintaining confidentiality/blinding
- meaning and purpose of medication reconciliation and the potential sources of data used to identify a client's medication history and medication list
- therapeutic drug monitoring:
 - medicines that require monitoring
 - purpose of monitoring
 - understanding of the concept of therapeutic range
- client data interrogation and presentation:
 - client unit record number
 - how to ensure client data retrieved is for the correct client
 - concept of key performance indicators and data reported
 - how to identify and access client data
 - concept of reference range
- different medicine groups and their roles, including:
 - analgesics and anti-inflammatory agents
 - anti-coagulants
 - anti-depressants
 - anti-diabetic agents
 - anti-epileptics
 - anti-gout agents
 - anti-histamines
 - anti-hypertensives
 - anxiolytics and hypnotics
 - asthma treating agents
 - cholesterol and lip lowering agents
 - corticosteroids
 - diuretics
 - gastro-intestinal agents
 - heart medicines
 - hormonal medicines
 - osteoporosis medicines
 - viral and anti-bacterial agents, anti-fungals or antibiotics
- factors affecting action of medicine groups:

- blood pressure
- breast feeding
- geriatric
- hepatic impairment
- paediatric
- pregnancy
- renal impairment
- issues that affect the use of medicine in an individual:
 - bioavailability
 - bioequivalence
 - medicines absorption
 - medicines distribution
 - medicines elimination
 - medicines half-life
 - medicines metabolism
- concept of medicines
 - medicines interactions
 - medicines food interactions and incompatibilities

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - computerised pharmacy administration system that allows Pharmaceutical Benefits Scheme (PBS) dispensing and online claiming
 - computerised access to client information
- modelling of industry operating conditions, including time constraints for completing activities

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTPOP001 Provide basic repairs and maintenance to health hardware and fixtures

Modification History

N/A

Application

This unit describes the skills and knowledge required to perform basic repairs and maintenance to health hardware and fixtures in the home and community.

This unit applies to work in a public health context and workers at this level will work under supervision within established guidelines.

Plumbing work must only be performed by a person authorised by registration or licence granted by the relevant State or Territory regulatory authority under legislation.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes.</i>	<i>Performance criteria specify the level of performance needed to demonstrate achievement of the element.</i>
1. Plan repairs and maintenance work	1.1 Identify potential health risks or problems in health hardware and fixtures

	1.2 Develop a work plan, that includes a timetable and priorities, to address repairs and maintenance requirements for the identified health risks in consultation with supervisor 1.3 Determine the job requirements and the location in which repairs and maintenance are to be carried out 1.4 Notify and coordinate with householders, community members and other community workers regarding the proposed timetable and work plan and obtain necessary approvals 1.5 Identify materials, tools and equipment necessary to complete the work in accordance with established procedures and check against job requirements 1.6 Identify faults and urgent repairs that are within own area of responsibility or expertise 1.7 Report problems that are outside area of responsibility or expertise in accordance with organisation policy and procedure 1.8 Make referrals to other key people or outside agencies in accordance with established procedures
2. Carry out repairs and maintenance	2.1 Follow workplace health and safety (WHS) policies and procedures for carrying out repairs and maintenance and the use of tools, materials and equipment 2.2 Carry out repairs and maintenance in accordance with work plan 2.3 Respond to unplanned events or conditions in accordance with organisation policy and procedure 2.4 Refer problems and gaps identified outside area of responsibility to relevant others in accordance with organisation policy and procedure 2.5 Obtain approval in accordance with established procedures from relevant person to address contingencies 2.6 Store tools and equipment in accordance with organisation policy and procedure upon the completion of work tasks or daily activities
3. Inspect and notify completion of work	3.1 Undertake final inspections to ensure that repairs and maintenance conform to requirements 3.2 Notify and/or document work completion in accordance with organisation policy and procedure

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTPOP001 Provide basic repairs and maintenance to health hardware and fixtures

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- identified at least 2 potential health risks or problems associated with health hardware and fixtures:
 - developing and implementing a work plan that includes strategies to deal with each issue
 - identifying and communicating with stakeholders throughout the process
- carried out at least 2 repair and/or maintenance tasks on health hardware and/or fixtures

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and organisation requirements relating to repair and maintenance work, including:
 - organisation standards, policies and procedures, including:
 - infection control
 - manual handling
 - personal protective equipment
 - immunisation requirements and/or recommendations
 - scope of own role and responsibilities
 - approvals required and process of obtaining approvals
 - referral agencies and their roles and responsibilities
- common faults, risks and problems associated with health hardware and fixtures and how to identify
- correct selection and use of tools, equipment and materials to be used for repairs and other tasks required

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - WHS procedures
 - personal protective equipment
 - organisation and manufacture guidelines and procedures
 - maintenance requests
 - suitable work area, equipment and materials
 - hand and power tools appropriate to the maintenance tasks
- modelling of industry operating conditions

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment Requirements for HLTPOP005 Work in a population health context

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- identified at least 3 organisations that support population health work and their contributions
- identified and researched context and key principles of population health approach relevant to work with at least 1 community or project and identified how work will incorporate context and key principles.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- recent public health strategies and relevant local codes of practice, legislation and regulatory frameworks
- health determinants, including:
 - political
 - biological and genetic factors
 - physical environment
 - socio-economic factors, including:
 - social gradient
 - stress
 - social exclusion
 - work
 - unemployment
 - social support
 - addiction
 - food
 - transport

- housing
 - behavioural
 - cultural
 - quality of health services
- historic concepts of health
- concepts and models of health, including:
 - medical model
 - salutogenic model
 - social view of health
 - academic and professional
- historical, social, political and economic context of population health work and how it relates to and affects environmental health and the subsequent impact on individual and community needs
- principles of health promotion
- principles of population health, including those focused on working with Aboriginal and/or Torres Strait Islander communities
- equity issues in population health
- national, State/Territory and local health initiatives and priorities
- the major organisations involved in population health in Australia and their contributions
- different models of work in the population health sector, including:
 - early intervention and/or disease prevention
 - community development and education
 - health promotion
 - working with individuals
 - working with families and the community
 - original and/or Torres Strait Islander environmental health worker (community funded and/or government funded)
- multi-sectoral and multi-strategic approach to population health.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies as well as using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes.</i>	<i>Performance criteria specify the level of performance needed to demonstrate achievement of the element.</i>
1. Assist in conducting a literature review	1.1 Identify aims of literature review and source relevant organisation reports and key documents with a focus on health needs

	1.2 Consult key stakeholders from the community and other relevant bodies for sources of information relevant to health needs 1.3 Identify and source information and data at local, State/Territory or regional level that may assist in defining and assessing the health needs of the community 1.4 Provide feedback to the work team or team leader on sources of information and assist with reviewing literature
2. Participate in a consultation process with the community	2.1 Contribute to discussions with key stakeholders regarding the health problem, its causes and appropriate interventions and solutions 2.2 Provide briefing materials throughout the consultation process to identify and clarify issues of interest and concern to stakeholders and own organisation 2.3 Provide feedback to the team leader or work team on the results of the consultation process
3. Contribute to activities that assist the community to identify their health needs	3.1 Contribute to activities that assist community to understand the factors contributing to the health issue or problem 3.2 Collect further information and data when needed for input into the analysis and presentation of results arising from the literature review and consultation processes 3.3 Collaborate with team and supervisor to recommend activities to stakeholders that would build the ongoing capacity of the community to understand and identify their health needs

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTPOP006 Contribute to working with the community to identify health needs

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- assisted at least 1 community to identify their health needs, including:
 - participating in at least 2 consultation processes with a range of stakeholders
 - assisting in the review of literature from a range of sources
 - providing at least 2 recommendations to support the ongoing capacity of community to identify health needs.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal, ethical and organisation requirements relating to identifying community health needs, including:
 - relevant international charters and declarations and documents
 - national, State/Territory and local health policies, goals, targets and priorities relevant to the community
 - scope of own role and responsibilities
 - equity issues in population health
 - evidence-based practice
 - quality assurance
 - social change and advocacy processes
 - privacy and confidentiality
 - responsibility to help a community respond to needs they identify which might not necessarily coincide with stated priority health needs
- principles of capacity building
- community health needs: state, conditions or factors in the community which, if absent, prevent people from achieving the optimum of physical, mental and social wellbeing

- types of need:
 - normative need (based on expert opinion)
 - expressed need (based on inferences made from observation of use of health services)
 - comparative need (derived from examining the services provided in a similar population)
 - felt need (based on what members of the community say they need)
- activities that develop an understanding of the factors contributing to the health issue or problem of the community
- overview of the stages in population health project planning
- theory and practice of population health, including health promotion, and health protection and prevention of communicable and non-communicable diseases
- consultation and participation principles and techniques, including:
 - interviews
 - nominal group process
 - questionnaires
 - Delphi Method
 - focus groups
 - forums
 - meetings
- conflict resolution, mediation and problem solving techniques
- literature review processes and sources of information
- difference between and examples of qualitative and quantitative data
- communities and types of data relevant to the community, including:
 - demographic characteristics
 - patterns of behaviour
 - lifestyle.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as, using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTPOP007 Contribute to population health project planning

Modification History

N/A

Application

This unit describes the skills and knowledge required to make a contribution to planning a population health project.

The contribution focuses on working from an existing project plan to develop the detail, such as a timetable for implementing strategies, evaluation and budget.

This unit applies to work in a public health context and workers at this level will work under supervision and within defined guidelines.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes.</i>	<i>Performance criteria specify the level of performance needed to demonstrate achievement of the element.</i>
1. Plan implementation of strategies	1.1 Identify existing plan and related goals and objectives 1.2 Identify project strategies from project plan

	1.3 Identify tasks to be undertaken to implement strategies in consultation with relevant personnel 1.4 Timetable tasks to be undertaken to implement strategies in consultation with relevant personnel 1.5 Source resources required to implement strategy 1.6 Calculate cost of tasks to be undertaken
2. Plan implementation of evaluation tasks	2.1 Identify project evaluation measures from the project plan 2.2 Identify, in consultation with relevant personnel, tasks to be undertaken to collect data using the identified evaluation measures 2.3 Timetable, in consultation with relevant personnel, tasks to be undertaken to collect data using the identified evaluation measures 2.4 Source resources required to collect data using measures identified 2.5 Calculate cost of evaluation tasks to be undertaken
3. Present planning information	3.1 Select appropriate methods of presenting planning information on the basis of planner needs 3.2 Present information logically and include references to relevant data and sources to support assertions

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTPOP007 Contribute to population health project planning

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- consulted with relevant personnel to assist with determining the project plan activities and requirements of at least 2 existing population health project plans, including:
 - timetabling project and evaluation tasks
 - sourcing project and evaluation resources
 - calculating project and evaluation costs
- presented outcomes to the project planner.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and organisation requirements relating to identifying community health needs, including:
 - relevant international charters and declarations and documents
 - national, State/Territory and local health policies, goals, targets and priorities relevant to identifying health needs
 - social change and advocacy processes
 - scope of own role and responsibilities
 - equity issues in population health
 - evidence-based practice
- theory and practice of population health, including health promotion, and health protection and prevention of communicable and non-communicable diseases
- overview of the stages in population health project planning
- planning models
- sources of information, including:

- literature from population health and related disciplines, such as published books, peer-reviewed papers and reports
- literature outlining marketing and behaviour change strategies specific to the community
- demographic data and information
- socio-economic data and information
- data and information from health research and health studies
- expert informants
- key representatives of the community
- national, State/Territory and local health policy documents and implementation guidelines
- overview of the stages in population health project planning and a broad understanding of project management techniques, including time and cost tracking methods.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including population health project plans
- modelling of standard industry operating conditions and contingencies.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTPOP008 Develop and implement disease prevention and control measures

Modification History

N/A

Application

This unit describes the skills and knowledge required to make a basic determination of the relevant diseases in the community, the mode of disease transmission and the possible means of transmission control.

This unit applies to work in a public health context and workers at this level will work under supervision and within defined guidelines.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes.</i>	<i>Performance criteria specify the level of performance needed to demonstrate achievement of the element.</i>
1. Determine diseases affecting the community	1.1 Search for basic signs, symptoms and causes of diseases

	1.2 Determine the diseases affecting the community and confirm with supervisor
2. Work with basic environmental health strategies to limit the transmission of disease	2.1 Develop appropriate control measures to limit the transmission of disease 2.2 Discuss and confirm environmental health strategies selected with supervisor
3. Implement environmental health strategies to limit the transmission of disease	3.1 Identify own roles and responsibilities 3.2 Clarify roles and responsibilities of other key people or agencies 3.3 Identify points of contact in relation to job role 3.4 Implement and monitor control measures

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed correct procedures to identify and address at least 2 potential diseases in the community, including developing and implementing disease prevention and control measures.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and organisation requirements relating to environmental health needs, including:
 - national, State/Territory and local health policies, goals, targets and priorities relevant to identifying health needs
 - scope of own role and responsibilities
 - other key people or agency responsibilities
 - points of contact to assist with the implementation of strategies which are outside own responsibility
- basic germ theory, including:
 - what germs are, including conflict and/or compatibility with traditional knowledge
 - where germs live and their source, including:
 - raw meat
 - rubbish
 - sewerage
 - sick animals
 - conditions that germs need for growth, including:
 - temperature
 - food

- water
 - time
- what parasites are, and types of parasites, including:
 - protozoa
 - worms
 - mites
 - lice
- disease categories (bacterial, viral), types of diseases and their signs and symptoms
- diseases or infection that can be attributed to parasites, types of diseases and their signs and symptoms
- bacterial diseases, including:
 - Salmonella
 - Staphylococcus
 - Campylobacter
 - E-Coli
 - Tetanus
- viral diseases, including:
 - colds and flu
 - Hepatitis A
 - gastroenteritis
 - Trachoma
 - Ross River Fever
 - Australian Encephalitis
- diseases attributed to parasites, including:
 - Dwarf Tape Worm infection
 - Giardiasis
 - hookworm infection
 - threadworm (or Pinworm) infection
 - scabies infection
- signs and symptoms of disease, including:
 - diarrhoea
 - vomiting and/or nausea
 - fever

- abdominal cramps and pains
- headaches
- lethargy
- dehydration
- indigestion
- very painful muscles or joints
- severe spasms and cramps in the neck, face and body
- inability to control movements
- yellowing of the skin and whites of the eyes
- liver dysfunction
- sore eyes
- red eyes
- watering eyes
- rash
- convulsions
- paralysis
- inflammation
- coma
- death
- vehicles and agents of transmission, including:
 - water droplets in the air
 - hands
 - wind blown dust
 - water
 - vectors (insects and rodents)
 - the blood which carries germs around in the body
- strategies and control measures to limit the transmission of diseases in the following contexts:
 - housing
 - water supply
 - sewage
 - rubbish collection and disposal
 - food storage and handling.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as, using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTPOP009 Provide information and support on environmental health issues

Modification History

N/A

Application

This unit describes the skills and knowledge required to provide information and support to community and householders on environmental health issues or hazards that may be of concern.

This unit applies to work in a public health context and workers at this level will work under supervision and within defined guidelines.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes.</i>	<i>Performance criteria specify the level of performance needed to demonstrate achievement of the element.</i>
1. Address information needs of the community and householders	1.1 Monitor and observe potential environmental health hazards or risks in the community and households as part of own work role

	1.2 Identify and discuss any issues of concern with community and householders to determine information needs and level of support required 1.3 Discuss any difficulties or obstacles that may exist which have prevented the community and householders from being able to address issues of concern
2. Provide information and support	2.1 Provide information and support about environmental health to community and householders 2.2 Report any problems, difficulties or obstacles that are outside of area of responsibility or expertise in accordance with organisation policy and procedure

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- identified and provided information and support to at least 2 householders about environmental health issues.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- policies and procedures for providing culturally appropriate information
- alternative ways of providing information when cultural relationships prevent interaction
- germ theory and disease transmission
- environmental health hazards and risks
- strategies for disease prevention
- scope of own role and responsibilities
- methods for determining information needs, including identifying how much community members and householders already know and what information still needs to be provided to assist them in making informed choices or decisions
- procedures for reporting difficulties or obstacles to disease prevention, including:
 - non-durable health hardware already installed in houses that constantly break
 - houses that have been poorly constructed or designed, and as a result are contributing to a range of health problems
 - large numbers of family visiting the household at any one time
 - lack of ongoing repairs and maintenance to health hardware
 - issues in relation to 'shame', including community members and householders not being able to afford to buy health hardware items, or inability to read labels and direction of use

- cultural issues, including sleeping with dogs because they are a very important part of a person's culture and life
- not having access to fridges and freezers to store food
- not having access to washing machines to wash clothes.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies as well as using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- collaborated with at least 1 community to gain support and approval to develop and implement dog health and dog population monitoring strategies and control plans, including consulting with at least 2 dog owners and other key stakeholders.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and organisation requirements relating to dog health and population needs, including:
 - national, State/Territory and local health policies, goals, targets and priorities relevant to identifying health needs
 - scope of own role and responsibilities
 - key people or agency responsibilities
 - points of contact to assist with the implementation of strategies which are outside own area of responsibility
- common dog diseases, including:
 - flea infestation
 - tick infestation
 - worm infestation
 - infected sores or wounds
 - mange
 - eye and ear infections
 - ringworm infection
 - hydatid tapeworm infection
 - hookworm infection

- factors that can lead or contribute to dogs becoming unhealthy, including:
 - hungry dogs
 - too many dogs
 - dogs whose nutritional requirements are not met
 - dogs that are not properly groomed and checked regularly for conditions such as fleas, ticks, ringworms, sores and wounds
 - dogs that are not treated for conditions that may cause infection and affect their health
 - dogs without access to clean and/or dry shelter
 - dogs that are not wormed and immunised
- potential health issues in relation to dogs and population health, including:
 - secondary injury as a result of bites from aggressive dogs
 - potential disease risks and infections from dog bites, including tetanus
 - community members giving food to dogs and going without themselves
 - dogs as vectors or carriers of disease, including when dog plays in sewage waste and then play or lick children
 - allergies due to dog mange causing or contributing to skin disease
 - gastrointestinal infections
 - roundworm and hookworm larval migration
- the roles and responsibilities of community, dog owner, organisations and other key people or specialists in the implementation of the plan
- strategies to monitor dog health and dog population in the community and to develop the necessary plans to address issues of concern, including:
 - dog owners and community education about various strategies in relation to caring for dogs, nutritional food sources, the provision of clean and dry shelter, checking dogs for fleas, ticks, wounds, sores, mange, eye and ear infections, immunising and worming dogs, washing dogs, and seeking help and support for sick dogs
 - reducing the number of internal and external parasites
 - dog sterilisation and contraception
 - euthanasia
- cultural issues which may impact on strategies
- culturally appropriate information provision
- traditional and non-traditional responsibilities and benefits of owning a dog.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies as well as using suitable facilities, equipment and resources.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has

- obtained information on at least 2 separate households to identify gaps that may exist in relation to the provision of ongoing, functional and durable health hardware in the community
- developed and implemented work plans to address the identified risks to health hardware.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and organisation considerations relating to provision of functional, durable health hardware items in home and community, including:
 - national, State/Territory and local health policies, goals, targets and priorities relevant to identifying health needs
 - community reporting processes for repairs and maintenance requirements
 - community processes for funding repairs and maintenance
 - scope of own role and responsibilities
 - roles and responsibilities of key people or agency responsibilities
 - points of contact to assist with the implementation of strategies which are outside own area of responsibility
- durable health hardware items appropriate to the region
- health hardware within a house that may require repair or replacement
- philosophies and principles in relation to housing for health

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies as well as using suitable facilities, equipment and resources.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- provided assistance in testing the quality of 2 water supply samples, including:
 - following workplace health and safety (WHS) and personal protective equipment requirements
 - reporting and following up findings
- identified at least 2 potential water supply contaminants and followed correct procedures to address and follow up concern.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and organisation requirements relating to monitoring the quality and safety of water supply to the community, including:
 - national, State/Territory and local health policies, goals, targets and priorities
 - processes used by key people and outside agencies to sample and treat water supply in the community and/or outstations
 - organisation standards, policies and procedures, including WHS and requirements for personal protective equipment
 - roles and responsibilities of self, key people and agencies
 - points of contact to assist with the implementation of strategies which are outside own area of responsibility
- sources of water in the community and how the community accesses its water supply
- environmental health issues in relation to water supply
- water uses and quality guidelines
- water sampling techniques and treatment and disinfection processes
- how to interpret water testing results

- the signs and indicators of possible contaminants
- strategies to maintain water quality.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - WHS procedures
 - personal protective equipment
 - organisation guidelines and procedures
 - sampling and testing work area, equipment and materials
 - water supply samples
- modelling of industry operating conditions.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTPOP013 Contribute to the implementation of a disaster plan

Modification History

N/A

Application

This unit describes the skills and knowledge required to respond to a disaster as identified in an organisational disaster plan.

This unit applies to work in a public health context and workers at this level will work under supervision and within defined guidelines.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes.</i>	<i>Performance criteria specify the level of performance needed to demonstrate achievement of the element.</i>
1. Identify existing local disaster planning strategies	1.1 Identify local community organisations providing emergency services 1.2 Clarify disaster plan and/or strategies and disaster planning exercises for the community

2. Identify roles in the delivery of the disaster plan	2.1 Identify local disaster planning processes 2.2 Identify roles and responsibilities of the disaster planning coordinator and other persons and determine own role 2.3 Identify relevant State/Territory and local lead agency representatives and contacts as appropriate 2.4 Put in place appropriate joint planning
3. Promote role of community organisations in the delivery of the disaster plan	3.1 Identify and explain roles and responsibilities of community organisation 3.2 Undertake assessment of skills and possible training of community organisation representatives 3.3 Implement disaster plan in line with community and organisation requirements
4. Provide feedback on disaster plan	4.1 Assess the effectiveness of the disaster plan in consultation with stakeholders 4.2 Identify and document ways to improve the disaster plan 4.3 Provide supervisor or manager and disaster planning coordinator with information on the effectiveness of the disaster plan and suggested ways to improve

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Unit Mapping Information

HLTPOP013 Contribute to the implementation of a disaster plan	HLTPOP322C Implement a disaster plan	This version was released in HLT Health Training Package release 3.0	Not equivalent

		and meets the requirements of the 2012 Standards for Training Packages. Title change. Minor changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minor changes to knowledge evidence.	

Assessment Requirements for HLTPOP013 Contribute to the implementation of a disaster plan

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- implemented an existing disaster plan to respond to at least 2 different types of disasters, including collaborating with colleagues and other stakeholders to assess effectiveness of implementation and identify and document improvements to the plan.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- types of disasters, including:
 - floods
 - cyclones
 - nuclear
 - fires
 - riots
 - earthquakes
- disaster plans and planning strategies and processes
- legal and organisational requirements relating to implementing a disaster plan, including:
 - local, state and territory agencies relevant to the implementation disaster plan
 - roles and responsibilities of key people
 - points of contact to assist with the implementation of disaster plan which are outside own area of responsibility
 - scope of own role and responsibilities
 - lines of communication and authority relevant to own role
- group facilitation, negotiation and problem solving techniques
- local networks and community organisations, including:

- state or territory health departments
 - police and other emergency services
 - social security
 - local government
 - non-government organisations
 - service providers
 - community groups
- why community participation and control in decision-making is essential to all aspects of health work, and the role of the health worker in supporting the community in this process.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including disaster plans and equipment outlined in the plan
- modelling of standard industry operating conditions and contingencies.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Link

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTPOP014 Assess readiness for and effect behaviour change

Modification History

N/A

Application

This unit describes the skills and knowledge required to analyse behaviour that impacts health and ways in which to reinforce or change them to promote health.

This unit applies to work in a public health context and workers at this level will demonstrate judgement and limited responsibility within defined guidelines.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes.</i>	<i>The Performance Criteria specify the level of performance needed to demonstrate achievement of the Element.</i>
1. Identify behaviour that impacts negatively on health and assess readiness for change	1.1 Identify social determinants of health and specific influences on individual's behaviour 1.2 Identify environmental factors that restrain change 1.3 Identify behavioural health determinants

	1.4 Assess motivation, commitment and confidence levels to change attitudes, beliefs and behaviour in collaboration with other team members and/or stakeholders 1.5 Reinforce positive beliefs and behaviour 1.6 Consider unintended consequences of desired behaviour and incorporate into the plan
2. Develop and implement plan for behaviour change	2.1 Identify pro-active strategies to support behavioural change based on behaviour change models, research available and consultations with individual, experts and/or stakeholders 2.2 Identify stakeholders or organisations for collaborative partnerships to support facilitating individual behaviour change 2.3 Develop a plan in collaboration with individual and document in accordance with organisation policy and procedure 2.4 Confirm individual's agreement, understanding and participation in relation to the plan 2.5 Develop and agree on an evaluation process to monitor progress with the individual
3. Monitor and review progress	3.1 Identify the most appropriate methods of data collection for recording behaviour 3.2 Collect, summarise and review data related to individual behaviour 3.3 Assess changes in behaviour in collaboration with the individual involved and other experts and stakeholders in accordance with confidentiality requirements 3.4 Review effectiveness of plan in collaboration with individual other experts and/or stakeholders 3.5 Report results of behaviour change strategies in accordance with organisation policy and procedure

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- developed, implemented and reviewed a behaviour change plan for at least 2 individuals, including:
 - consulting and collaborating with each individual, team members and other stakeholders to determine, agree and implement strategies and to monitor and review progress.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and organisation requirements relating to developing and implementing behaviour change plans, including:
 - national, State/Territory and local health policies, goals, targets and priorities
 - organisation standards, policies and procedures, including scope of own role and responsibilities
 - stakeholders or organisations for collaborative partnerships to support facilitating individual behaviour change
 - points of contact to assist with the implementation of strategies which are outside own area of responsibility
- equity issues in population health
- evidence-based practice
- social determinants of health
- environmental factors that restrain change
- behavioural health determinants
- the relationship between attitudes, knowledge and lifestyle factors and behaviour
- the relationship between individual behaviour and health outcomes
- behaviour change models and support strategies

- assessment techniques
- collaborative behaviour change planning processes.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including behaviour change plans and equipment or resources outlined in the plan
- modelling of standard industry operating conditions and contingencies.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTPOP015 Provide information on smoking and smoking cessation

Modification History

N/A

Application

This unit describes the skills and knowledge required to provide information to individuals and groups on the impact of smoking and nicotine dependence and available smoking cessation resources and programs. It does not include providing smoking cessations interventions.

This unit applies to work in a public health context and workers at this level will demonstrate judgement and limited responsibility within defined guidelines.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes.</i>	<i>The Performance Criteria specify the level of performance needed to demonstrate achievement of the Element.</i>
1. Screen clients for smoking	1.1 Discuss the client's tobacco use

	1.2 Assess client's nicotine dependence using a validated method 1.3 Record client results according to organisation policy and procedure 1.4 Maintain client records professionally and accurately 1.5 Observe and maintain client confidentiality in all interactions
2. Provide information on smoking and its effects	2.1 Provide client with information about smoking and its effects relevant to client's individual circumstances and background 2.2 Promote health benefits to the client of quitting smoking relevant to client's specific individual circumstances and background
3. Provide information on smoking cessation treatments and their outcomes	3.1 Identify and promote national and international best practice strategies for smoking cessation 3.2 Take into account needs of special groups in promoting smoking cessation programs 3.3 Provide clients with self-help materials 3.4 Provide referral to telephone counselling and other support services 3.5 Provide follow-up information as requested by the client

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTPOP015 Provide information on smoking and smoking cessation

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has:

- provided at least 3 clients or groups assessed as nicotine dependent with information about smoking and smoking cessation, including promoting benefits of quitting, strategies for smoking cessation and referral services.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- the social, political and economic context of tobacco use in Australian society
- prevalence of smoking in the Australian population, including gender, age and cultural distribution
- cultural and gender factors associated with tobacco use in Australia, including variations in smoking methods and prevalence between culturally and linguistically diverse (CALD) groups and particular demographic groups
- particular problems and needs associated with smoking among special groups, including pregnant and lactating women, adolescents, Aboriginal and Torres Strait Islander people, people with smoking related diseases and people with a mental illness
- behavioural and pharmacological determinants of smoking behaviour
- barriers to quitting smoking
- basic human anatomy and physiology, particularly the brain, the lungs and the circulatory system as it relates to smoking and its effects
- broad characteristics of the chemical constituents in tobacco smoke
- common behavioural triggers associated with smoking
- common symptoms of nicotine withdrawal and their relationship to physical recovery
- evidence-based key strategies for smoking cessation
- interaction of nicotine with various medications
- internationally accepted definitions of nicotine dependence

- physiological links between mental illness and nicotine dependence
- process of neuro-adaptation to nicotine
- processes of titration of nicotine dose and smoker compensation practices
- short and long-term known health effects of active and passive smoking
- validated nicotine dependence screening methods
- smoking cessation self-help and support material and referral agencies.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies as well as using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTPOP016 Provide interventions to clients who are nicotine dependent

Modification History

N/A

Application

This unit describes the skills and knowledge required to treat and manage nicotine dependence, including (singly or in combination) behavioural and pharmacological interventions, such as brief advice and counselling; intensive support and provision of advice on use of appropriate non-prescription and prescription pharmacotherapy.

This unit applies to work in a public health context and workers at this level will demonstrate judgement and sensitivity within defined organisational guidelines for the implementation of smoking cessation strategies.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes.</i>	<i>The Performance Criteria specify the level of performance needed to demonstrate achievement of the Element.</i>

1. Assess needs of clients who are nicotine dependent	1.1 Obtain client history to determine smoking habits in accordance with organisation policy and procedure 1.2 Assess nicotine dependence using a validated method 1.3 Determine smoking cessation treatment based on assessment of client's level of nicotine dependence, stage of change, client history and personal circumstances and background 1.4 Maintain client records professionally and accurately 1.5 Maintain client confidentiality in all interactions
2. Implement interventions	2.1 Match intervention to client's personal circumstances and preferences, including relevant health issues, level of dependence and behavioural triggers 2.2 Conduct brief intervention with client according to client needs 2.3 Use motivational interviewing techniques to increase client's motivation to quit 2.4 Provide intensive counselling according to client's individual needs, circumstances and background 2.5 Identify clients requiring referral to other health professional or agency and action
3. Assist clients in accessing pharmacotherapies for smoking cessation	3.1 Provide client with information about pharmacotherapies, their benefits and contraindications 3.2 Determine suitability of pharmacotherapies for client 3.3 Provide referral to a medical practitioner for pharmacotherapies 3.4 Determine options for optimal combination of smoking cessation therapies with client
4. Monitor client's progress	4.1 Arrange and conduct client follow-up 4.2 Assess client's progress against goals set and interventions conducted and then provide feedback

	4.3 Assess risk of relapse 4.4 Provide behavioural interventions and/or pharmacological advice 4.5 Identify clients requiring referral to other health professional or agency and action
5. Ensure high standards of professionalism and continuing professional development	5.1 Maintain knowledge of smoking cessation therapies 5.2 Undertake assessment of work to identify opportunities for improvement and/or development 5.3 Research developments in smoking cessation practices and apply to improve own practice 5.4 Maintain ongoing personal professional development and training in smoking cessation

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has:

- followed correct procedures to provide a range of interventions to at least 3 clients who are nicotine dependent including:
 - assessing clients nicotine dependence
 - identifying appropriate intervention for each client
 - monitoring client progress and providing additional support or referrals.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- smoking cessation interventions
- principles and techniques of brief intervention
- contraindications associated with use of nicotine replacement therapies (NRT), including recent cardiac events, unstable angina and pregnancy
- evidence-based key strategies for smoking cessation
- evidence-based aspects of dosage and duration of use of NRT
- intensive counselling techniques suitable for smoking cessation interventions
- interaction of nicotine with various medications
- interaction of NRT with medications and other drugs, including caffeine, alcohol and insulin
- internationally accepted definitions of nicotine dependence
- validated nicotine dependence screening methods
- motivational interviewing techniques
- physiological links between mental illness and nicotine dependence
- process of neuro-adaptation to nicotine

- processes of titration of nicotine dose and smoker compensation practices
- types and use of non-prescription (including NRT) and prescription-only pharmacotherapies
- organisation standards, policies and procedures.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies as well as using suitable facilities, equipment and resources.

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes.</i>	<i>The Performance Criteria specify the level of performance needed to demonstrate achievement of the Element.</i>
1. Identify potential pest problems in the community	1.1 Monitor signs of pest problems in the household and community that could potentially pose a risk to people's health

	1.2 Identify environmental conditions contributing to problems 1.3 Discuss potential problems with householders and community members to ascertain the nature and extent of problems 1.4 Identify type of pest, activity level and location of harbourages 1.5 Estimate density of infestation from available evidence of pest activity 1.6 Report findings in accordance with organisation policy and procedure
2. Identify strategies to assist with the control of pests in the community	2.1 Seek information on strategies and methods to control different pests in the community 2.2 Obtain information on advantages and disadvantages and any obstacles that may exist in relation to various methods 2.3 Seek additional advice from key people and outside agencies
3. Determine the best form of pest eradication or control methods for the community	3.1 Discuss potential strategies with the organisation, community and relevant others to determine the best course of action 3.2 Assess options to determine the most effective solutions for the identified problem 3.3 Develop and implement a work plan in relation to the identified strategies in conjunction with supervisor 3.4 Identify and action issues requiring referrals to key people and outside agencies

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has:

- identified at least 2 pest problems in the community that could potentially affect the health of householders and community members and developed and implemented a work plan that includes appropriate strategies and methods of control.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and organisation requirements relating to pest control and community needs, including:
 - national, State/Territory and local health policies, goals, targets and priorities relevant to identifying health needs
 - scope of own role and responsibilities
 - other key people or agency responsibilities
 - points of contact to assist with the implementation of strategies which are outside own area of responsibility
- common pests and rodents found in the area, including mosquitoes, ants, cockroaches and rodents, and the different stages of their lifecycle
- how to set traps
- the links between pests, including rodents and disease transmission
- understanding of the living and breeding places of different pests and the environmental conditions which encourage them to live and breed
- signs of pest and rodent problems
- environmental conditions contributing to pest problems, including:
 - pools of water lying under leaking taps
 - rubbish lying around the yard or community that could potentially become a breeding ground for pests

- houses with broken or non-existent fly wire screens and doors
- toilet vents that are not fly proofed
- bins without tight fitting lids
- septic tanks that are not sealed, or lids broken
- toilets that are blocked or broken
- grass and reeds growing around and in sewage lagoons
- overflowing drains
- dead animals and faeces lying around
- dirty kitchen and food preparation surfaces
- dirty cupboards
- household rubbish that is not properly disposed of
- cracks or crevices in walls or ceilings
- environmental, chemical, biological prevention and control strategies and the advantages and disadvantages of each.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies as well as using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Assessment Requirements for HLTPOP018 Develop a plan of action to address land care issues in the community

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has:

- identified at least 2 potential land care issues in the community and developed and implemented a plan of action that includes strategies to deal with each issue, including identifying and communicating with stakeholders through the process.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and organisation requirements relating to land care issues, including:
 - organisation standards, policies and procedures, including:
 - manual handling
 - personal protective equipment
 - use of tools and equipment
 - scope of own role and responsibilities
 - approvals required and process of obtaining approvals
 - referral agencies and procedures
- environmental health strategies and priorities
- the relationship between land care issues and health
- land care issues and strategies to target the issues that relate, either directly or indirectly, to the possibility of disease transmission and/or health related complaints
- strategies to address specific land care issues, including:
 - necessary requirements to be adhered to when planting tall growing trees close to any power lines
 - ensuring that excessive vegetation growth around sewerage lagoons and in other areas of the community is controlled and maintained
 - planting and maintaining fruit and shade trees in the house yard and community and fruit and shade trees appropriate for the region

- erecting shelters for shade in places where groups of people tend to gather for meetings or ceremonies
- obtaining, planting and maintaining bush medicine in the community
- planting and maintaining trees and shrubs to act as wind breaks against dust in the house yard, general community and outlying areas
- developing the yard area to reduce the impact of overcrowding and problems with wind-blown dust
- planting and maintaining appropriate trees around septic tanks to prevent cars from driving over them and collapsing drains or breaking lids.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies as well as using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Link

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTPOP019 Apply a population health framework

Modification History

N/A

Application

This unit describes the skills and knowledge to support workers to understand and apply the underlying principles and philosophy that must be reflected in all areas of population health work.

This unit applies to work in a public health context and workers at this level will demonstrate judgement and autonomy within broad guidelines.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes.</i>	<i>Performance Criteria specify the level of performance needed to demonstrate achievement of the Element.</i>
1. Apply the principles of the population health approach to relevant work	1.1 Identify current and historic concepts of health and its determinants 1.2 Identify key principles involved in a population health approach

	1.3 Modify work approach to apply key principles of population health
2. Select from a range of change action frameworks that underpin population health work	2.1 Identify relevant population health change action frameworks 2.2 Match appropriate change action frameworks to population health tasks on the basis of theory and/or past evidence 2.3 Apply a multi-disciplinary and multi-strategic approach in population health work
3. Collaborate with others	3.1 Identify and assess relevant local, state/territory and national organisations, networks, policies and initiatives supporting population health 3.2 Identify and examine priority population health issues at the local, State/Territory, national and international levels 3.3 Determine limitations on actions resulting from legislation and discuss with superiors, peers and other team members 3.4 Collaborate with colleagues and clarify own role as part of a strategic approach to population health

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Unit Mapping Information

Assessment Requirements for HLTPOP019 Apply a population health framework

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has:

- identified and researched at least 2 priority population health issues relating to a community and identified relevant population health change action frameworks that could be applied, including identifying and modifying at least 2 potential work practices to support strategies and address limitations.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- evidence-based practice
- national, State/Territory and local health policies, goals, targets and priorities and legislative frameworks relevant to the context of the work role
- a broad range of population health issues and priority areas in Australia
- key principles of population health, including:
 - population focus
 - preventive focus with stress on building individual and/or community's capacity to control health determinants for a better quality of life
 - sensitivity to access and equity issues and health inequalities
 - sensitivity to cultural differences
 - health as a resource for everyday living
 - health as a result of complex interaction among determinants
 - health as a context for power relations with society
 - shared responsibility of health
 - educational-ecological approach
 - evidence-based approach
 - principles of equity and non-discriminatory practice

- models of health, including:
 - medical model
 - salutogenic model
 - social view of health
 - academic and professional
- change action frameworks of population health, including:
 - upstream investment (investment directed at root causes to maximise potential benefits)
 - increased accountability for health outcomes
 - re-orienting health sector
 - capacity building
 - working in partnerships (joint ventures, collaboration, alliances and coalitions)
 - employment of mechanisms to promote community participation
 - public policy development (legislation and regulation, resource allocation and incentives)
 - creation of supportive natural and built environments
 - addressing health inequalities and health inequalities approach
 - personal and social development through provision of information and education for health and enhancement of life skills
- range of population health strategies and application of best practice in population health
- relevant international charters and declarations and documents
- health determinants, including:
 - political factors
 - biological and genetic factors
 - physical environment
 - social factors (social gradient, stress, early life, social exclusion, work, unemployment, social support, addiction, food, transport and housing)
 - behavioural
 - cultural
 - quality of and access to health services
- theory and practice of population health, including health promotion, and health protection and prevention of communicable and non-communicable diseases
- types of organisations involved in population health in Australia
- organisation standards, policies and procedures.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies as well as using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTPOP020 Work with the community to identify health needs

Modification History

N/A

Application

This unit describes the skills and knowledge required to enable particular communities to define and assess their own health needs.

This unit applies to work in a public health context and workers at this level will demonstrate judgement, sensitivity and autonomy within defined guidelines.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes.</i>	<i>Performance Criteria specify the level of performance needed to demonstrate achievement of the Element.</i>
1. Review literature	1.1 Clearly identify health problem and community being addressed 1.2 Identify and access relevant sources of literature and data

	1.3 Review the literature and data to reveal the established causes of the health problem, intervention programs and general information about the community 1.4 Critically appraise information accessed through literature review in terms of reliability and applicability
2. Collect other relevant data to further define community	2.1 Identify relevant types of data required to further define community 2.2 Collect required data that cannot be obtained through a literature search according to organisation procedures and ethical considerations 2.3 Document description of community in a manner that would provide sufficient information for purposes of evaluation and for examination of those considering duplicating interventions
3. Investigate the health problem as it occurs and is perceived within the community	3.1 Identify appropriate means of consulting with community regarding the health problem, its causes and appropriate interventions and solutions 3.2 Implement consultation with community and experts using allocated resources and according to organisation procedures and ethical considerations 3.3 Document results of consultation in a manner that supports planning, evaluating and duplicating interventions and according to organisation procedures and ethical considerations
4. Work with the community to define and prioritise their health needs	4.1 Clearly identify factors contributing to the health problem on the basis of findings from the literature review and other data collected and discuss with the community 4.2 Sort out, in a logical manner, factors that identify causal pathways defining health needs and discuss with the community 4.3 Recommend activities that would build the ongoing capacity of the community to identify their health needs to relevant stakeholders

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Unit Mapping Information

HLTPOP020 Work with the community to identify health needs	HLTPOP502C Work with the community to identify health needs	This version was released in HLT Health Training Package release 3.0 and meets the requirements of the 2012 Standards for Training Packages. Minor changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Minor changes to knowledge evidence.	Not equivalent

Assessment Requirements for HLTPOP020 Work with the community to identify health needs

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has:

- facilitated at least 2 communities to identify, define and prioritise their own health needs including:
 - facilitating consultation between community and experts to identify and review literature and data to determine and understand causes and potential interventions
 - recommending at least 2 activities that would build the ongoing capacity of the community to identify their health needs.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and organisation requirements relating to identifying and assessing the health needs of a community, including:
 - ethical considerations
 - duty of care
 - equity issues in population health
 - evidence-based practice
 - relevant international charters/declarations and documents
 - national, State/Territory and local health policies, goals, targets and priorities
 - organisation standards, policies and procedures, including scope of own role and responsibilities
 - stakeholders or organisations for collaborative partnerships
- strategies and activities that build the ongoing capacity of the community to identify their health needs
- theory and practice of population health, including health promotion, and health protection and prevention of communicable and non-communicable diseases relating to identifying health needs

- principles and techniques of consultation and participation
- social change and advocacy processes
- difference between and examples of qualitative and quantitative data
- stages of health needs assessment
- types of needs, including:
 - normative need (based on expert opinion)
 - expressed need (based on inferences made from observation of use of health services)
 - comparative need (base on examining the services provided in a similar communities)
 - felt need (based on what members of the community say they need)
- sources of information and processes for critical appraisal of literature
- common health problems of a community and causal pathways, including the following components:
 - risk markers (identify the target group, outlines the characteristics associated with occurrence of problem but do not necessarily directly contribute to it)
 - risk factors (directly account for why the problem is occurring)
 - contributing factors (contribute to or account for the risk factors and could be sorted out into predisposing factors, enabling factors and reinforcing factors).

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies as well as using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTPOP021 Plan a population health project

Modification History

N/A

Application

This unit describes the skills and knowledge required to plan the specifics of a population health project.

Work covers the processes of selecting an appropriate health issue, selecting specific intervention strategies, tailoring strategies to appropriate communities, developing goals and objectives, defining ways of measuring these, identifying required and available resources, identifying appropriate stakeholders and communicating with them to plan the project.

This unit applies to work in a public health context and workers at this level will demonstrate judgement and autonomy within defined guidelines. Workers may be responsible for overseeing the outputs of others.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes.</i>	<i>Performance Criteria specify the level of performance needed to demonstrate achievement of the Element.</i>

1. Determine scope of project	1.1 Identify the health issue and burden of illness for the project's focus in consultation with key stakeholders 1.2 Review relevant policies and guidelines to determine scope of the project to address the identified issue 1.3 Identify current related activities in relation to the issue
2. Develop a process for overseeing plan development	2.1 Establish an advisory group representing stakeholders 2.2 Timetable advisory group feedback on each stage of the planning process 2.3 Incorporate feedback where appropriate
3. Select appropriate strategies to achieve identified goals and/or objectives	3.1 Identify project goals and objectives 3.2 Identify strategies most likely to fulfil project goals and objectives on the basis of available literature and suitability, effectiveness, reach and acceptability to stakeholders and community 3.3 Sequence activities to be consistent with timeframes and resources available
4. Plan evaluation	4.1 Select an evaluation design that is appropriate to the goals and objectives and resources available 4.2 Establish measures to collect data on achievement of project goals and objectives 4.3 Determine methods of monitoring and recording aspects of project implementation 4.4 Outline proposed evaluation report purpose, format and content on the basis of consultation with stakeholders
5. Plan project budget	5.1 Assess and access sources of project funding 5.2 Identify, cost and match personnel to meet human resource requirements based on skills and knowledge requirements 5.3 Identify and cost non-human resources, including meeting rooms, information resources and training materials 5.4 Calculate total cost of implementing project plan
6. Ensure resources required are prepared and/or ready for use	6.1 Develop and/or source resources for project and test to ensure acceptability and suitability to the needs of the community 6.2 Brief staff or individuals involved in the project on program rationale, procedures and roles

	6.3 Support staff or individuals to develop the skills required for the fulfilment of project outcomes 6.4 Develop a plan for documenting and disseminating results to relevant stakeholders
7. Finalise project plan	7.1 Document project plan in accordance with organisation requirements 7.2 Disseminate plan to relevant parties for feedback 7.3 Make adjustments to plan based on feedback 7.4 Finalise plan and obtain relevant approvals

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTPOP021 Plan a population health project

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has:

- developed and documented at least 2 population health project plans that each address a different health issue including the determination of:
 - scope, goals, objectives and strategies
 - resources, timeframes and budgetary requirements
 - evaluation scope, purpose, method and measures
 - process for disseminating and obtaining approvals.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and organisation requirements relating to planning a population health project, including:
 - equity issues in population health
 - evidence-based practice
 - social change and advocacy processes
 - relevant international charters and/or declarations and documents
 - national, State/Territory and local health policies, goals, targets and priorities
 - organisation standards, policies and procedures, including scope of own role and responsibilities
- project planning principals and models
- stages in population health project planning
- aspects of population health project planning, including communication strategies, quality assurance and budgeting
- theory and fields of population health, including:
 - health promotion

- environmental health
- communicable diseases
- health risk management and assessment
- methods of monitoring and recording aspects of project implementation, including reach and/or exposure, acceptability and/or satisfaction and quality of materials
- consultation and participation techniques.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies as well as using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has:

- conducted an evaluation of at least 2 population health projects against existing project plans, including documenting and disseminating an evaluation report in accordance with project plan.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and organisation requirements relating to evaluating a population health project, including:
 - equity issues in population health
 - evidence-based practice
 - social change and advocacy processes
 - relevant international charters and/or declarations and documents
 - national, State/Territory and local health policies, goals, targets and priorities
 - organisation standards, policies and procedures, including scope of own role and responsibilities
- project management aspects, including:
 - overview of the stages in population health project planning and evaluation
 - evaluation measures and design
 - quality assurance
 - appropriate reporting formats
- different levels of evaluation, including:
 - process evaluation
 - impact evaluation
 - outcome evaluation.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including project plan and project evaluation plan
- modelling of standard industry operating conditions and contingencies.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has:

- developed, implemented, monitored and evaluated at least 3 separate strategies to build the capacity to promote health at each of the following levels:
 - individual
 - team
 - organisation.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- roles and responsibilities of relevant agencies, legal and organisational considerations relating to developed, implemented, monitored and evaluated strategies, including:
 - equity issues in population health
 - evidence-based practice
 - social change and advocacy processes
 - relevant international charters and/or declarations and documents
 - national, State/Territory and local health policies, goals, targets and priorities
 - organisation standards, policies and procedures, including scope of own role and responsibilities
- theory of capacity building and examples of current strategies
- dimensions of capacity building:
 - development of infrastructure
 - enhancement of program sustainability
 - fostering problem solving capabilities
- principles of effective capacity building practice, including:
 - respecting and valuing pre-existing capacities

- developing mutual trust
 - being responsive to context within which capacity building program sits
 - avoiding pre-packaged ideas and strategies
- key action areas of capacity building, including:
 - organisational development
 - workforce development
 - resource allocation
 - partnerships
 - leadership
- examples of pre-existing capacities, including:
 - skills
 - structures
 - partnerships
 - resources.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies as well as using suitable facilities, equipment and resources.

HLTPOP024 Develop a disaster plan

Modification History

N/A

Application

This unit describes the skills and knowledge required to develop a plan which sets out the roles and responsibilities of workers and others in the community, for responding to a disaster. This plan will be developed in consultation with other relevant agencies and key people.

This unit applies to work in a public health context and workers at this level are required to apply judgement within broad guidelines and take responsibility for their own outputs. Workers may be responsible for overseeing the outputs of others.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes.</i>	<i>Performance Criteria specify the level of performance needed to demonstrate achievement of the Element.</i>
1. Determine framework for creating a disaster plan	1.1 Identify and review existing disaster plans of the organisation

	1.2 Identify and document government policies which affect the organisation's response to a disaster 1.3 Identify legislative and statutory requirements impacting on the disaster plan 1.4 Consult with local, State/Territory and federal government agencies as required to identify and determine roles and responsibilities in the disaster plan
2. Identify and liaise with appropriate community organisations	2.1 Identify community organisations to be involved in a disaster plan and develop an information database 2.2 Establish contact through a variety of communication strategies 2.3 Identify restrictions to effective liaison and develop processes to promote communication with other agencies 2.4 Consult with identified community organisations to identify and determine roles and responsibilities in the disaster plan
3. Incorporate local requirements for disaster planning and relief into a plan	3.1 Collect information on local requirements and resources from key people and organisations 3.2 Identify and determine availability of resourcing requirements for a disaster plan response 3.3 Develop plan in accordance with organisation policy and relevant legislation requirements 3.4 Establish parameters for reviewing and evaluating plan 3.5 Develop a communications strategy to promote the disaster plan to local community, government and other agencies 3.6 Implement the communications strategy
4. Identify and train volunteers	4.1 Determine roles within the disaster plan performed by volunteers and clarify responsibilities involved 4.2 Invite individuals and organisations to take up roles as part of the disaster plan 4.3 Establish training requirements for volunteers to understand the disaster plan and perform their role 4.4 Develop a training program and schedule 4.5 Deliver training to volunteers 4.6 Evaluate and adjust training in accordance with disaster plan modifications

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has:

- developed at least 1 disaster plan in consultation with key stakeholders to respond to at least 3 different types of disasters
- identified and delivered training requirements for volunteers involved in the implementation of the plan.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in the elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- types of disasters including:
 - floods
 - cyclones
 - nuclear
 - fires
 - riots
 - earthquakes
- disaster plans and planning strategies and processes
- community networks
- community views on disaster management
- existing community disaster plans
- legislation relating to disaster management
- local disaster planning processes and networks
- local resources, suppliers and tradespeople
- project development
- relevant Commonwealth, State/Territory and local government policies and guidelines

- policies, protocols and procedures of the organisation
- stakeholder consultation and participation principles and techniques
- local networks and community organisations, including:
 - State or Territory health departments
 - police and other emergency services
 - social security
 - local government
 - non-government organisations
 - service providers
 - community groups.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies as well as using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTPOP025 Provide basic repairs and maintenance to health hardware and fixtures

Modification History

N/A

Application

This unit describes the skills and knowledge required to perform basic repairs and maintenance to health hardware and fixtures in the home and community.

This unit applies to work in a public health context and workers at this level will work under supervision within established guidelines.

Plumbing work must only be performed by a person authorised by an exemption registration or licence granted by the relevant State or Territory regulatory authority under legislation.

The skills in this unit must be applied in accordance with Commonwealth and State or Territory legislation, Australian standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Elements	Performance criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan repairs and maintenance work.	1.1. Identify potential health risks or problems in health hardware and fixtures.

	1.2. Assist in developing a work plan, that includes a timetable and priorities, to address repairs and maintenance requirements for the identified health risks under the guidance of a supervisor. 1.3. Determine the job requirements and the location in which basic repairs and maintenance are to be carried out. 1.4. Notify and coordinate with householders, community members and other community workers the proposed timetable and work plan and obtain necessary approvals. 1.5. Identify materials, tools and equipment necessary to complete the work in accordance with established procedures and check against job requirements. 1.6. Identify faults and urgent repairs that are within own area of responsibility or expertise. 1.7. Report problems that are outside area of responsibility or expertise in accordance with organisational policy and procedures. 1.8. Make referrals to other key people or outside agencies in accordance with established procedures.
2. Carry out basic repairs and maintenance.	2.1. Carry out basic repairs and maintenance in accordance with work plan, using appropriate personal protective equipment (PPE) and in accordance with organisational workplace health and safety (WHS) standards. 2.2. Respond to unplanned events or conditions in accordance with organisational policies and procedures. 2.3. Refer problems and gaps identified outside area of responsibility to relevant others in accordance with organisational policies and procedures. 2.4. Obtain approval in accordance with established procedures from relevant person to address contingencies. 2.5. Store tools and equipment in accordance with organisation policy and procedure upon the completion of work tasks or daily activities.
3. Inspect and notify completion of work.	3.1. Undertake final inspections to ensure that basic repairs and maintenance conform to requirements.

	3.2. Notify or document work completion in accordance with organisation policy and procedure.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTPOP025 Provide basic repairs and maintenance to health hardware and fixtures

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- identify at least two potential health risks or problems associated with inappropriate or defective health hardware and fixtures and in doing so:
 - develop and implement a work plan that includes strategies to deal with each issue under the guidance of a supervisor
 - communicate with stakeholders throughout the process
- carry out at least two basic repair or maintenance tasks on health hardware or fixtures.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures relating to repair and maintenance work, including:
 - infection control
 - manual handling
 - personal protective equipment use
 - workplace health and safety (WHS) standards
 - scope of own role and responsibilities
 - approvals required and process of obtaining approvals
 - referral agencies and their roles and responsibilities
- common faults, risks and problems associated with health hardware and fixtures and how to identify
- correct selection and use of tools, equipment and materials to be used for repairs and other tasks required.

Assessment Conditions

Skills must be demonstrated in workplace or in a simulated environment that reflects workplace conditions.

Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies.

Assessment must ensure access to:

- use of suitable facilities, equipment and resources, including:
 - workplace health and safety (WHS) standards
 - personal protective equipment (PPE)
 - organisational policies and procedures
 - maintenance requests
 - hand and power tools appropriate to the maintenance tasks.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- identify at least two potential health risks or problems associated with sewage systems and develop and implement a work plan that includes strategies to deal with each issue.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational requirements relating to sewage systems work, including:
 - infection control
 - manual handling
 - workplace health and safety standards (WHS)
 - personal protective equipment use
 - reporting requirements
 - scope of own role and responsibilities
 - approvals required and process of obtaining approvals
 - referral agencies and procedures
- household plumbing design and fixtures and the way in which effluent and sullage waste leaves the house or building to go out to the waste disposal system
- water and sewage plans for the community, if available
- type, design and components of the sewage system in the community and how they function, including:
 - septic or onsite systems
 - sewage or effluent systems
- what sewage is and the difference between effluent black water and sullage grey water
- causes of common faults, risks and problems associated with household plumbing and sewage systems and how to identify and prevent them

- sewage disposal strategies for communities or outstations without a sewage disposal system including:
 - onsite or septic system
 - sewage or effluent system
 - grease trap and soakage pit
 - pit toilets and shallow trench latrines.

Assessment Conditions

Skills must be demonstrated in the workplace or in a simulated environment that reflects workplace conditions.

Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies.

Assessment must ensure access to:

- use of suitable facilities, equipment and resources, including:
 - work health and safety (WHS) standards
 - personal protective equipment (PPE)
 - organisational guidelines and procedures.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Assessment Requirements for HLTPOP028 Monitor and maintain rubbish collection and disposal systems

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- identify at least two potential health risks or problems associated with rubbish collection and disposal systems and develop and implement a work plan that includes strategies to deal with each issue.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational requirements relating to rubbish collection and disposal work, including:
 - infection control
 - manual handling
 - personal protective equipment use
 - emergency management plans
 - chemical handling
 - Material Safety Data Sheets (MSDS)
 - reporting requirements
 - scope of own role and responsibilities
 - approvals required and process of obtaining approvals
 - referral agencies and procedures
- procedures for monitoring the integrity of the environment:
 - observing
 - reporting
- diseases transmitted through rubbish collection and disposal and strategies to prevent transmission
- community processes in relation to rubbish collection and disposal
 - recycling and re-using options

- preventative systems
- definitions and sources of rubbish
- rubbish tip designs and environmental health considerations in terms of appropriate location of tip sites
- tip disposal methods and organisation of tip site
- bin designs and sizes
- relevant workplace health and safety standards and the use of personal protection equipment.

Assessment Conditions

Skills must be demonstrated in the workplace or in a simulated work environment that reflects workplace conditions in a local government environment.

Assessment must ensure access to:

- plain English information about legal and ethical responsibilities applicable to job role
- organisational policies and procedures applicable to job role
- code of conduct applicable to job role.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors.

Assessment Requirements for HLTPOP029 Work in a population health context

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- identify at least three organisations that support population health work and their contributions
- identify and research how work will incorporate context and key principles of population health approach relevant to work with at least one community or project.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- recent public health strategies and relevant local codes of practice, legislation and regulatory frameworks
- health determinants, including:
 - political
 - biological and genetic factors
 - physical environment
 - socio-economic factors, including:
 - social gradient
 - stress
 - social exclusion
 - work
 - unemployment
 - social support
 - addiction
 - food
 - transport
 - housing
 - behavioural

- cultural
 - quality of health services
- concepts and models of health, including:
 - medical model
 - salutogenic model
 - social view of health
 - academic and professional
- historical, social, political and economic context of population health work and how it relates to and affects environmental health and the subsequent impact on individual and community needs
- principles of health promotion
- principles of population health, including those focused on working with Aboriginal or Torres Strait Islander communities
- equity issues in population health
- national, State or Territory and local health initiatives and priorities
- the major organisations involved in population health in Australia and their contributions
- different models of work in the population health sector, including:
 - early intervention and/or disease prevention
 - community development and education
 - health promotion
 - working with individuals
 - working with families and the community
 - Aboriginal or Torres Strait Islander environmental health worker, community funded or government funded
- multi-sectoral and multi-strategic approach to population health
- basic Work, Health and Safety (WHS) principles.

Assessment Conditions

Skills must be demonstrated in the workplace or in a simulated environment that reflects workplace conditions.

Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies.

Assessment must ensure access to:

- suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Assessment Requirements for HLTPOP030 Determine and implement disease prevention and control measures

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- follow correct procedures to identify and address at least two potential diseases in the community, that include developing and implementing disease prevention and transmission control measures.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational requirements relating to environmental health needs, including:
 - national, State or Territory and local health policies, goals, targets and priorities relevant to identifying health needs
 - scope of own role and responsibilities
 - other key people or agency responsibilities
 - points of contact to assist with the implementation of strategies which are outside own responsibility
- basic signs, symptoms and causes of disease, including:
 - what germs are, including conflict and compatibility with traditional knowledge
 - where germs live and their source, including:
 - raw meat
 - rubbish
 - sewage
 - sick animals
 - conditions that germs need for growth, including:
 - temperature
 - food
 - water
 - time

- what parasites are, and types of parasites, including:
 - protozoa
 - worms
 - mites
 - lice
- diseases or infection that can be attributed to parasites, types of diseases and their signs and symptoms
- bacterial diseases and their signs and symptoms, including:
 - Salmonella
 - Staphylococcus
 - Campylobacter
 - E-Coli
 - Tetanus
- viral diseases and their signs and symptoms, including:
 - colds and flu
 - Hepatitis A
 - gastroenteritis
 - Trachoma
 - Ross River Fever
 - Australian Encephalitis
- diseases attributed to parasites, their signs and symptoms, including:
 - Dwarf Tape Worm infection
 - Giardiasis
 - hookworm infection
 - threadworm or pinworm infection
 - scabies infection
- signs and symptoms of disease, including:
 - diarrhoea
 - vomiting or nausea
 - fever
 - abdominal cramps and pains
 - headaches
 - lethargy
 - dehydration

- indigestion
- very painful muscles or joints
- severe spasms and cramps in the neck, face and body
- inability to control movements
- yellowing of the skin and whites of the eyes
- liver dysfunction
- sore, red and watery eyes
- skin rash
- convulsions
- paralysis
- inflammation
- coma
- death
- vehicles and agents of transmission, including:
 - water droplets in the air
 - hands
 - wind blown dust
 - water
 - vectors, including:
 - insects
 - rodents
 - the blood which carries germs around in the body
- control measures to limit the transmission of diseases in the following contexts:
 - housing
 - water supply
 - sewage
 - rubbish collection and disposal
 - animal management
 - pest management
- food storage and handling.

Assessment Conditions

Skills must be demonstrated in the workplace or in a simulated environment that reflects workplace conditions.

Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies.

Assessment must ensure access to:

- suitable facilities, equipment and resources
- organisational and local environmental health strategies.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Assessment Requirements for HLTPOP031 Provide information and support on environmental health issues

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- identify and provide information and support to at least two householders about environmental health issues.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- policies and procedures for providing culturally appropriate information
- alternative ways of providing information when cultural relationships prevent interaction
- germ theory and disease transmission
- environmental health hazards and risks including:
 - spraying chemicals and the effects of overuse
- strategies for disease prevention
- scope of own role and responsibilities
- methods for determining information needs, including identifying how much community members and householders already know and what information still needs to be provided to assist them in making informed choices or decisions
- procedures for reporting difficulties or obstacles to disease prevention.
- factors that impact on environmental health including:
 - non-durable health hardware already installed in houses that constantly break
 - houses that have been poorly constructed or designed, and as a result are contributing to a range of health problems
 - large numbers of family visiting the household at any one time
 - lack of ongoing repairs and maintenance to health hardware
 - issues in relation to 'shame', including community members and householders not being able to afford to buy health hardware items, or inability to read labels and direction of use

- cultural issues, including sleeping with dogs because they are a very important part of a person's culture and life
- not having access to refrigerators and freezers to store food
- not having access to washing machines to wash clothes
- animal management
- pest management.

Assessment Conditions

Skills must be demonstrated in the workplace or in a simulated environment that reflects workplace conditions.

Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies.

Assessment must ensure access to:

- suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

HLTPOP032 Monitor and maintain dog health in the community

Modification History

N/A

Application

This unit describes the skills and knowledge required to monitor dog health and dog population in the community and develop the necessary strategies and plans to address issues of concern.

This unit applies to work in a public health context and workers at this level will work under supervision and within defined guidelines.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Elements	Performance criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Monitor dog health and dog population in the community.	1.1. Discuss the need to monitor dog health and population with dog owners and community members to gain support.

	• 1.2. Consult with dog owners and community members to gather information on the health, population and condition of dogs. • 1.3. Record all findings in accordance with organisation guidelines and procedures. • 1.4. Report nature and extent of problem in accordance with organisation guidelines and procedures.
• 2. Contribute to a dog health and dog population control plan.	• 2.1. Discuss possible strategies for dog health and population control with other staff, community and relevant others. • 2.2. Analyse preferred strategies to determine feasibility and appropriateness to the community. • 2.3. Negotiate options with dog owners and community members. • 2.4. Support the establishment of a plan of action with other staff, community and relevant others. • 2.5. Identify the roles and responsibilities of self, other staff, community and other key people in the strategies discussed. • 2.6. Contribute to the coordination of the plan in accordance with job role organisational requirements.
• 3. Implement dog health and dog population control plan.	• 3.1. Apply safe work practices and procedures in performing own role in accordance with the dog health and dog population control plan. • 3.2. Assist community, organisation and relevant key people with implementation of their roles in accordance with the plan. • 3.3. Maintain and access effective networks which contribute to the achievement of the plan. • 3.4. Record results in relation to the implementation of the plan in accordance with organisation policy and procedure. • 3.5. Implement follow-up measures to maintain community dog health and dog population control.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTPOP032 Monitor and maintain dog health in the community

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- collaborate with at least one community to gain support and approval to develop and implement dog health and dog population monitoring strategies and control plans, including consulting with at least two dog owners and other key stakeholders.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational requirements relating to dog health and population needs, including:
 - national, State or Territory and local health policies, goals, targets and priorities relevant to identifying health needs
 - scope of own role and responsibilities
 - key people or agency responsibilities
 - points of contact to assist with the implementation of strategies which are outside own area of responsibility
- common dog diseases, including:
 - flea infestation
 - tick infestation
 - worm infestation
 - infected sores or wounds
 - mange
 - eye and ear infections
 - ringworm infection
 - hydatid tapeworm infection
 - hookworm infection
- factors that can lead or contribute to dogs becoming unhealthy, including:
 - hungry dogs

- too many dogs
- dogs whose nutritional requirements are not met
- dogs that are not properly groomed and checked regularly for conditions such as fleas, ticks, ringworms, sores and wounds
- dogs that are not treated for conditions that may cause infection and affect their health
- dogs without access to clean and dry shelter
- dogs that are not wormed and immunised
- potential health issues in relation to dogs and population health, including:
 - secondary injury as a result of bites from aggressive dogs
 - potential disease risks and infections from dog bites, including tetanus
 - community members giving food to dogs and going without themselves
 - dogs as vectors or carriers of disease, including when dog plays in sewage waste and then plays with or licks children
 - allergies due to dog mange causing or contributing to skin disease
 - gastrointestinal infections
 - roundworm and hookworm larval migration
- the roles and responsibilities of community, dog owner, organisations and other key people or specialists in the implementation of the plan
- strategies to monitor dog health and dog population in the community and to develop the necessary plans to address issues of concern, including:
 - nutritional food sources
 - the provision of clean and dry shelter
 - dog health issues:
 - flea and tick treatment
 - wound and sore treatment
 - mange treatment
 - eye and ear infection treatment
 - immunising and worming dogs
 - washing dogs
 - seeking help and support for sick dogs
 - reducing the number of internal and external parasites
 - dog sterilisation and contraception
 - euthanasia
- cultural issues which may impact on strategies

- culturally appropriate information provision
- traditional and non-traditional responsibilities and benefits of owning a dog.

Assessment Conditions

Skills must be demonstrated in the workplace or in a simulated environment that reflects workplace conditions.

Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies.

Assessment must ensure access to:

- suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

HLTPOP033 Identify pest control strategies

Modification History

N/A

Application

This unit describes the skills and knowledge required to monitor pest problems in the community that could potentially affect the health of householders and community members and identify appropriate methods of control.

This unit applies to work in a public health context and workers at this level will demonstrate judgement and limited responsibility within defined guidelines.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Elements	Performance criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify potential pest problems in the community.	1.1. Monitor signs of pest problems in the household and community that could potentially pose a risk to people's health. 1.2. Identify environmental conditions contributing to problems.

	• 1.3. Discuss potential problems with householders and community members to ascertain the nature and extent of problems. • 1.4. Identify type of pest, activity level and location of harbourages. • 1.5. Estimate density of infestation from available evidence of pest activity. • 1.6. Report findings in accordance with organisational policy and procedures.
• 2. Identify strategies to assist with the control of pests in the community.	• 2.1. Seek information on strategies and methods to control different pests in the community. • 2.2. Obtain information on advantages and disadvantages and any obstacles that may exist in relation to various methods. • 2.3. Seek additional advice from key people and outside agencies.
• 3. Determine the best form of pest eradication or control methods for the community.	• 3.1. Discuss potential strategies with the organisation, community and relevant others to determine the best course of action. • 3.2. Assess options to determine the most effective solutions for the identified problem. • 3.3. Assist in the development and implementation of a work plan in relation to the identified pest eradication or control strategies. • 3.4. Identify and action issues requiring referrals to key people and outside agencies.

Assessment Requirements for HLTPOP033 Identify pest control strategies

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- identify at least two pest problems in the community that could potentially affect the health of householders and community members and develop and implement a work plan that includes appropriate strategies and methods of control.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational requirements relating to pest control and community needs, including:
 - national, State or Territory and local health policies, goals, targets and priorities relevant to identifying health needs
 - scope of own role and responsibilities
 - other key people or agency responsibilities
 - points of contact to assist with the implementation of strategies which are outside own area of responsibility
 - relevant workplace health and safety (WHS) standards
- common pests and rodents found in the area, including mosquitoes, ants, cockroaches and rodents, and the different stages of their lifecycle
- how to set traps
- the links between pests, including rodents and disease transmission
- understanding of the living and breeding places of different pests and the environmental conditions which encourage them to live and breed
- signs of pest and rodent problems
- environmental conditions contributing to pest problems, including:
 - pools of water lying under leaking taps
 - rubbish lying around the yard or community that could potentially become a breeding ground for pests
 - houses with broken or non-existent fly wire screens and doors

- toilet vents that are not fly proofed
- bins without tight fitting lids
- septic tanks that are not sealed, or lids broken
- toilets that are blocked or broken
- grass and reeds growing around and in sewage lagoons
- overflowing drains
- dead animals and faeces lying around
- dirty kitchen and food preparation surfaces
- dirty cupboards
- household rubbish that is not properly disposed of
- cracks or crevices in walls or ceilings
- environmental, chemical, biological prevention and control strategies and the advantages and disadvantages of each.

Assessment Conditions

Skills must be demonstrated in the workplace or in a simulated environment that reflects workplace conditions.

Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies.

Assessment must ensure access to:

- suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

HLTREF001 Develop reflexology practice

Modification History

N/A

Application

This unit describes the skills and knowledge required to establish the foundations of reflexology practice, evaluate what makes a sustainable practice and then to develop an approach to own practice.

This unit applies to any reflexologists.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Establish foundations of reflexology practice	1.1 Identify, access and interpret information about the central philosophies and history of reflexology and zone therapy 1.2 Evaluate the reflexology system of treatment and its application to current health issues

	1.3 Investigate different reflexology styles and their application 1.4 Compare and contrast reflexology, other areas of complementary health modalities and broader health practice
2. Represent the reflexology framework	2.1 Determine information needs of different individuals and groups 2.2 Identify key messages that represent the philosophy and practice of reflexology 2.3 Communicate information about reflexology at level of depth appropriate to audience needs
3. Determine requirements for sustainable practice	3.1 Identify key issues that affect the development and sustainability of professional practice 3.2 Identify economic, environmental, human and social considerations, and their impact on professional practice 3.3 Access, interpret and collate current information that supports professional practice
4. Develop approach to own practice	4.1 Reflect on professional goals and aspirations 4.2 Identify and assess professional opportunities in reflexology 4.3 Reflect on the opportunities and constraints of individual personal circumstances 4.4 Make decisions about overall practice direction, based on reflection and research 4.5 Develop practical strategies to address own practice goals

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Unit Mapping Information

HLTREF001 Develop reflexology practice	HLTREF501B Work within a reflexology framework	This version was released in HLT Health Training Package release 2.0 and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.	Not equivalent

Assessment Requirements for HLTREF001 Develop reflexology practice

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- used critical thinking skills to:
 - review and reflect on information from a range of sources about reflexology practice
 - evaluate and articulate requirements for sustainable reflexology practice
- communicated key messages about reflexology to meet the information needs of at least 3 different individuals or groups
- developed goals for own practice that reflect the values and philosophies of reflexology

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- philosophies and principles of reflexology and zone therapy:
 - historical development of reflexology
 - philosophical tradition of western and eastern body therapies
 - foot and hand system of treatment
 - different types of reflexology treatments and their key features and purpose
- key features of complementary therapies used in conjunction with reflexology, including:
 - acupuncture/acupressure
 - bowen/emmet
 - osteopathy
 - flower essences
 - homoeopathy
 - aromatherapy

- remedial massage
 - Traditional Chinese Medicine
 - naturopathy
 - kinesiology
 - shiatsu
- key features of allied health services and their relationship to reflexology, including:
 - chiropractory
 - podiatry
 - dietetics and nutrition
 - occupational therapy
 - physiotherapy
- place of reflexology practice in the broader health care system, including:
 - nursing facilities
 - hospitals
 - corporate business
 - community care
 - multi-modality
 - leisure and fitness facilities
 - women's health centres
- features and differences of allopathic and naturopathic approaches to health and health treatments
- professional reflexology networks and industry bodies
- different models of professional reflexology practice and their key features:
 - sole practitioners
 - shared clinics
 - employment opportunities
- components of sustainable practice:
 - economic – opportunities and viability
 - environmental
 - human – personal health, professional development
 - social responsibility
- legal and ethical considerations (national and state/territory) and how these are applied in individual practice:
 - children in the workplace

- codes of conduct
- continuing professional education
- discrimination
- dignity of risk
- duty of care
- human rights
- informed consent
- insurance requirements
- mandatory reporting
- practitioner/client boundaries
- privacy, confidentiality and disclosure
- records management
- work role boundaries – responsibilities and limitations
- work health and safety

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources
- modelling of industry operating conditions and contingencies

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors

Link

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTREF002 Provide reflexology for relaxation

Modification History

N/A

Application

This unit describes the skills and knowledge required to gather client information, prepare equipment for reflexology, make observations of the feet and then select and use basic reflexology techniques and sequences based on information and observations.

This unit applies to individuals who provide reflexology relaxation sessions either as part of their work as a dedicated reflexologist or in conjunction with other treatment modalities. It does not include reflexology for therapeutic purposes.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for treatment	1.1 Collect pertinent information regarding client's general health and foot observations 1.2 Review information and use to inform treatment

	1.3 Manage information in a confidential and secure manner 1.4 Access and organise appropriate equipment and materials for treatment 1.5 Prepare the client for treatment with appropriate draping, and confirm comfort levels 1.6 Clearly explain the process of a reflexology treatment to the client 1.7 Advise client of possible physical or emotional reactions both during and after treatment
2. Make feet and hand observations	2.1 Assess and accurately record physical details of feet 2.2 Relate physical condition of feet to client information collected and incorporate into treatment approach 2.3 Observe and record precautions/contra-indications to reflexology and incorporate into treatment approach
3. Select and use reflexology techniques and sequences	3.1 Hold and support feet adequately during treatment 3.2 Use thumb and finger techniques suited to client health status, age, tissue condition and sensitivity 3.3 Apply leverage and pressure as required by selected techniques 3.4 Follow sequences to work all reflexes on both feet and relate to hands, depending on client needs 3.5 Recognise reactions to treatment and provide appropriate response
4. Finalise treatment and advise client	4.1 End the treatment using appropriate protocols 4.2 Provide client with information on recommended follow up activities 4.3 Recognise situations where medical advice is required and advise clients to seek that advice

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Unit Mapping Information

Current Code and Title	Previous Code and Title	Comments	Equivalence
HLTREF002 Provide reflexology for relaxation		This unit has been created to address a skill or task required by industry that is not covered by an existing unit of competency	Newly created

Assessment Requirements for HLTREF002 Provide reflexology for relaxation

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- provided relaxation reflexology to at least 4 different people, selecting reflexology techniques based on sound assessment of the feet:
 - evaluated and responded appropriately to skin and structural abnormalities
 - used techniques and sequences within scope of reflexology thumb and finger practice

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- principles of reflexology and zone therapy:
 - historical development of reflexology
 - foot and hand system of treatment
- legal and ethical considerations (national and state/territory) for providing relaxation reflexology:
 - codes of conduct
 - duty of care
 - informed consent
 - mandatory reporting
 - practitioner/client boundaries
 - privacy, confidentiality and disclosure
 - records management
 - work role boundaries:
 - working within scope of practice
 - presenting symptoms that require referral to a medical practitioner
 - work health and safety

- client information required prior to relaxation treatment
- protocols for conducting reflexology sessions in relation to:
 - environment
 - equipment
 - client privacy
 - responding to client instructions
 - rituals
- key features of the reflexology map of hands and feet
- factors to consider in foot observation and how to respond:
 - overall appearance
 - signs of bacterial or viral infection
 - signs of keratosis, swelling, colour changes and other skin anomalies
 - signs of structural abnormalities
- precautions to be taken in reflexology for relaxation
- signs of structural abnormalities, conditions on which to work lightly, often or for a short time
- reflexology relaxation techniques and how to apply them:
 - diaphragm relaxer
 - spinal twist
 - toe rotation
 - metatarsal kneading
 - back and forth
 - ankle loosening
- reflexology techniques and sequences and how to apply them:
 - thumb and finger walking
 - microrotation with thumbs and fingers
 - hook in and back up
 - palpating
- use of leverage in reflexology and its appropriate use
- holding and supporting techniques
- factors that affect the level of pressure applied
- basic structure and function of systems and regions of the body and their respective reflexes, including:
 - cardiovascular system

- immune/lymphatic system
- endocrine system
- nervous system
- reproductive system
- respiratory system
- muscular system
- articular system
- skeletal system
- digestive system
- urinary systems

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - client and practitioner's seating
 - talc/cream/lotion
 - draping material
 - cleaning equipment
- modelling of industry operating conditions, including provision of services to the general public

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTREF003 Perform reflexology health assessments

Modification History

N/A

Application

This unit describes the skills and knowledge required to assess the therapeutic needs of clients through the lens of a reflexology diagnostic framework. It requires the ability to gather client information, perform a physical assessment and bring information together to develop a reflexology treatment plan.

This unit applies to reflexologists.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine scope of client needs	1.1 Explore and clarify client expectations 1.2 Provide clear information about scope and limits of services to be provided

	1.3 Collect an accurate, relevant and organised health record and document in a form which can be interpreted readily by other professionals 1.4 Recognise needs that are beyond scope of own practice and make referrals to other health care professionals as required 1.5 Identify and respond to any barriers to information gathering and assessment 1.6 Seek client information respectfully and sensitively, using purposeful, systematic and diplomatic questions 1.7 Manage information in a confidential and secure way
2. Make a physical assessment of the feet	2.1 Provide information about the physical assessment and obtain client consent to proceed 2.2 Follow clinical and practitioner hygiene procedures 2.3 Seek client feedback on comfort levels 2.4 Assess client through both visual and tactile observation of the feet 2.5 Identify and assess skin conditions for incorporation into the treatment plan 2.6 Accurately record physical observations of the feet
3. Develop treatment plan	3.1 Correlate results of physical assessment and structural abnormalities of the feet with case history 3.2 Frame the analysis of information through the integration of western and eastern medical models and reflexology philosophy 3.3 Identify pre-requisites or contraindications to treatment 3.4 Select methodologies and treatments considering frequency, length and number of treatments based on outcomes of health assessment 3.5 Use professional judgement to draw substantiated conclusions about treatment needs 3.6 Establish expected treatment outcomes based on the reflexology framework and evidence 3.7 Accurately document proposed treatment plan

4. Confirm assessment and treatment plan with client	4.1 Discuss assessment, its implications and rationale for treatment with the client 4.2 Assign and agree treatment priorities and expectations in consultation with the client 4.3 Schedule times and session lengths suited to the required techniques and sequences 4.4 Respond to client questions using language the client understands 4.5 Discuss referral and collaborative options with the client as required

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

		knowledge evidence. Minimum clinic hours added. Additional assessor requirements.	

Assessment Requirements for HLTREF003 Perform reflexology health assessments

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 120 hours of reflexology client consultation work
- prepared for and managed at least 60 reflexology assessments - clients must include males and females from different stages of life with varied presentations
- interpreted health and wellness using the reflexology framework and the following assessment techniques
 - touch
 - visual observation
 - listening skills
- interacted effectively with clients:
 - clearly articulated information about services, treatment options and rationale
 - engaged clients in decision making

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations (national and state/territory) for client assessment and treatment planning:
 - codes of conduct
 - duty of care
 - informed consent
 - mandatory reporting
 - practitioner/client boundaries
 - privacy, confidentiality and disclosure
 - records management

- working role boundaries:
 - working within scope of practice
 - presenting symptoms that require referral to a medical practitioner
 - work health and safety
- referral options for practitioners:
 - professional health services including complementary health modalities
 - community resources and support services
 - types and availability of further medical testing
- factors and barriers that may impact on assessment, including:
 - physical
 - psychological
 - cultural
- factors that affect individual health status, including:
 - age
 - constitution
 - lifestyle
 - diet
 - personal and medical history
 - values and attitudes
 - balance of rest and activity
 - physical environment
 - social environment
- client information required for assessment and the scope and depth of information needed around:
 - client objectives and expectations
 - client history and its components
 - client current state of health
 - signs and symptoms:
 - onset
 - duration
 - location
 - quality and severity
 - non-verbal
- different ways that signs and symptoms of conditions present:

- physical
 - psychological
 - social
 - spiritual
- features of signs and symptoms, including:
 - normal tissue texture, flexibility and colour
 - anatomical structure of the feet and hands
 - biomechanical abnormalities
 - common ailments of feet and hands
 - meridian pathways and related ailments
- principles and philosophy of reflexology assessment framework:
 - tender reflexes
 - numbness
 - swelling
 - tension
 - pressure variation suitable to the client
 - work lightly, often and for a short time when client is very ill, young or elderly
 - work less rather than more initially
 - non-verbal feedback – facial expressions and body movements in response to touch
 - verbal feedback
- reflexology diagnostic techniques and considerations:
 - pain sensitivity
 - client tolerance to technique and length of session
 - palpation
 - pressure application
- possible reactions, contra-indications to treatment and/or limitations for assessment:
 - broken bones, severe bruising or sprains in feet and/or hands
 - undiagnosed skin conditions
 - tinea or other infectious conditions
- links between presenting ailments, regions and systems of the body and the condition of the associated reflexes
- common disease states of each body system
- treatment planning techniques and considerations

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated clinical environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - health assessment/client consultation forms
 - client and practitioners seating
 - talc/cream/lotion
 - draping material
 - cleaning equipment
- modelling of industry operating conditions, including provision of services to the general public
- clinic supervision by a person who meets the assessor requirements outlined below for at least 40 of the 120 hours of client consultation work

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must:

- have at least 3 years current clinical experience working as a reflexologist providing services to the general public
- hold practising membership of an Australian professional body that represents reflexologists

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare client for treatment	1.1 Interpret treatment plan and clearly outline how the treatment will be provided and managed 1.2 Explain factors which may interfere with the effectiveness of the treatment 1.3 Inform and advise client about possible physical or emotional reactions during and following a session

	1.4 Follow established protocols to physically prepare the client for treatment 1.5 Confirm client consent for treatment
2. Apply therapeutic reflexology and relaxation techniques	2.1 Select and use relaxation techniques that best prepare the client for treatment 2.2 Use reflexology techniques targeted to required body systems and the relevant reflex areas 2.3 Use and adjust leverage and pressure based on assessment indications and client tolerance 2.4 Use and adjust holding and supporting techniques during treatment to achieve optimum effect 2.5 Follow and complete sequences that target areas of therapeutic need 2.6 Consider general health of the client, tissue condition, age, health and sensitivity 2.7 Maintain client-focussed attention during treatment 2.8 Recognise reactions to treatment and respond promptly as required
3. Provide advice and resources to the client	3.1 Educate client in relevant and practical techniques that support the treatment plan 3.2 Answer client queries with clarity and using language that the client understands 3.3 Provide clear information on techniques being used, their therapeutic benefits and the underpinning philosophy 3.4 Use honesty and integrity when explaining treatment plans, schedules and recommendations to client 3.5 Promote client independence and responsibility in treatment and encourage reflexology self treatment when appropriate 3.6 Discuss and agree on evaluation strategies 3.7 Accurately document treatment provided and details of client communications

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

HLTREF004 Provide therapeutic reflexology treatments	HLTREF503C Provide reflexology treatment	This version was released in HLT Health Training Package release 2.0 and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence. Minimum clinic hours added. Additional assessor requirements.	Not equivalent

Assessment Requirements for HLTREF004 Provide therapeutic reflexology treatments

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 120 hours of reflexology client consultation work
- prepared for and managed at least 60 therapeutic reflexology treatments - clients must include males and females from different stages of life with varied presentations
- used each of the following relaxation techniques on multiple occasions:
 - stroking and effleurage
 - friction - light and deep
 - holding
 - breathing
 - knuckling
 - rotation and loosening
 - stretching
 - kneading
 - twisting and wringing
 - diaphragm relaxer
 - spinal twist
 - toe rotation
- used each of the following therapeutic techniques on multiple occasions:
 - thumb and finger walking
 - microrotation with thumbs and fingers
 - sedating - light or deep
 - hook in and back up
 - palpating

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations (national and state/territory) for client assessment:
 - codes of conduct
 - duty of care
 - informed consent
 - mandatory reporting
 - practitioner/client boundaries
 - privacy, confidentiality and disclosure
 - records management
 - working role boundaries:
 - working within scope of practice
 - presenting symptoms that require referral to a medical practitioner
 - work health and safety
- different reflexology frameworks, systems and techniques:
 - philosophy of system
 - key techniques used
 - variations in maps of the feet and hands
 - interrelationships between frameworks
- reflexology relaxation techniques and how to apply them
- reflexology techniques and how to apply them:
 - thumb and finger walking
 - microrotation with thumbs and fingers
 - sedating - light or deep
 - hook in and back up
 - palpating
 - holding/balancing
- specific reflexology systems and how they are used, including:
 - Ingham
 - Asian/Chinese
 - Universal
 - Dougans

- hands
 - ears
 - face
 - meridians/acupressure points
 - Brazilian toe hold
 - maternity
 - biomechanics/mobilisation
- potential reactions during treatment and how to respond:
 - discomfort
 - emotional reactions
 - feedback - verbal, tactile, visual
 - muscular spasms
 - body temperature discomfort
 - deep relaxation
- potential reactions following treatment and appropriate client advice:
 - increased urination
 - slight headache, nausea, malaise
 - increased bowel symptoms
 - temporary exacerbation of symptoms
- documentation requirements for recording treatment details
- detailed structure and physiological function of all anatomical systems and regions of the body
- common disease states and functional problems of each body system
- relationship of reflexes and energy centres on the feet and hands and the functioning of each body system

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated clinical environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - client information – case history, treatment plan
 - client and practitioner's seating
 - talc/cream/lotion
 - draping material
 - cleaning equipment

- modelling of industry operating conditions, including provision of services to the general public
- clinic supervision by a person who meets the assessor requirements outlined below for at least 40 of the 120 hours of client consultation work

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must:

- have at least 3 years current clinical experience working as a reflexologist providing services to the general public
- hold practising membership of an Australian professional body that represents reflexologists
- fulfil the continuing professional development requirements of the professional body to which they belong

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTREF005 Adapt reflexology treatments to meet specific needs

Modification History

N/A

Application

This unit describes the skills and knowledge required to adapt assessment and treatment strategies to meet the needs of clients of different genders and at different stages of life. It also includes the requirement to be able to identify and respond to other specific needs with which the practitioner may be unfamiliar.

This unit applies to reflexologists.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Adapt assessment and treatment strategies to stages of life	1.1 Anticipate and take account of varying potential client sensitivities to ensure client dignity is maintained 1.2 Tailor assessment and treatment approaches that take account of different cognitive abilities of clients at different stages of life

	1.3 Use reflexology techniques and pressure application that take account of client needs at different stages of life 1.4 Recognise norms and deviations associated with age and gender 1.5 Obtain appropriate consents from others when appropriate
2. Respond to unfamiliar presentations	2.1 Recognise situations where presenting cases or aspects of presenting cases fall outside current knowledge base or expertise 2.2 Refer client to other practitioners when case is not appropriate to own scope of practice 2.3 When appropriate to continue with the case, identify, access and interpret sources of additional information and advice 2.4 Enhance own capacity to deal with unfamiliar cases by conducting case specific research 2.5 Integrate findings into client treatment plans and record details
3. Extend and expand own knowledge base	3.1 Pro-actively identify and respond to professional development opportunities 3.2 Develop and adjust work practices as part of ongoing practice development

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

HLTREF005 Adapt reflexology treatments to meet specific needs		This unit has been created to address a skill or task required by industry that is not covered by an existing unit of competency	Newly created

Assessment Requirements for HLTREF005 Adapt reflexology treatments to meet specific needs

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 120 hours of reflexology client consultation work
- effectively adapted communication, assessment and treatment strategies to meet client needs
- managed at least 60 reflexology assessment and treatment sessions - clients must include males and females from different stages of life with varied presentations
- conducted case specific research for at least 3 cases, where key aspects of the condition are not known to the candidate

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations (national and state/territory) for working with specific groups:
 - children in the workplace
 - codes of conduct
 - discrimination:
 - age
 - disability
 - racial
 - sex
 - duty of care
 - informed consent
 - mandatory reporting
 - practitioner/client boundaries

- privacy, confidentiality and disclosure
- records management
- work role boundaries:
 - working within scope of practice
 - presenting symptoms that require referral to a medical practitioner
- work health and safety
- treatment management factors that must be considered for clients of different genders and at different stages of life:
 - case taking
 - variations in approach to physical contact
- major developmental milestones for different stages of life
- features of common health conditions that affect the following groups and how those conditions are assessed and treated in the reflexology framework:
 - children
 - adolescents
 - adult females at different stages of life:
 - maternity
 - endocrine imbalance
 - fertility
 - menstrual difficulties
 - adult males at different stages of life
- factors for consideration when providing any form of palliative care
- professional responsibilities when presenting cases that fall outside of practitioner's current scope, including:
 - when referral is appropriate or required
 - information and advice sources
 - case research techniques

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated clinical environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - client information – case history, treatment plan
 - private consultation area
 - massage table or reflexology chair

- towels/sheets for draping
- modelling of industry operating conditions, including provision of services to the general public
- clinic supervision by a person who meets the assessor requirements outlined below for at least 40 of the 120 hours of client consultation work

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Link

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTREF006 Monitor and evaluate reflexology treatments

Modification History

N/A

Application

This unit describes the skills and knowledge required to monitor and evaluate therapeutic reflexology treatments, both from an individual client and whole of practice perspective.

This unit applies to reflexologists.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Evaluate client progress	1.1 Seek client feedback about treatment impacts and compliance with the treatment plan 1.2 Make own observations and assessment of client changes based on reflexology framework 1.3 Evaluate treatment impacts in relation to client's physical, mental, spiritual and emotional wellbeing

	1.4 Compare changes and improvements with expectations in the treatment plan, existing research and evidence from own practice 1.5 Seek additional information from clients when progress suggests this is needed 1.6 Accurately document progress in client treatment plan
2. Adjust treatment based on evaluation	2.1 Determine the need for adjustment to treatment plan based on evaluation of client progress 2.2 Identify and respond to factors that may be inhibiting client progress 2.3 Adjust treatment plans based on outcomes and sources of research or evidence that support reflexology practice 2.4 Accurately document any adjustments to treatment plans
3. Develop practice from client evaluation	3.1 Review progress of clients in context of own individual practice 3.2 Identify areas of own practice for further research or development to support client outcomes 3.3 Pro-actively seek and respond to professional development opportunities

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

HLTRNL001 Support a person with chronic kidney disease

Modification History

N/A

Application

This unit describes the skills and knowledge required to provide supportive care of a person with chronic kidney disease including advance care planning.

This unit applies to enrolled nursing work carried out in consultation and collaboration with registered nurse, and under supervisory arrangements aligned to the Nursing and Midwifery Board of Australia regulatory authority legislative requirements; and to Aboriginal and/or Torres Strait Islander health work carried out under direct or indirect supervisory arrangements of a registered nurse or medical practitioner.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Assess impact of chronic kidney disease (CKD) on the person and their educational needs	1.1 Maintain current knowledge of CKD and associated pathophysiology and apply to each clinical manifestation

	1.2 Identify common problems and complications associated with CKD and focus on the person's specific contributing factors when assessing impact on that person 1.3 Discuss with the person the psychosocial impact of CKD on their activities of daily living 1.4 Ascertain and respect person's needs related to their lifestyle, social context and emotional and spiritual choices 1.5 Communicate effectively with the person, family or carer and members of the interdisciplinary health care team 1.6 Clarify the educational needs of the person in terms of stages of the disease, required care and self-management strategies 1.7 Provide support to the person, family or carer in an open and non-judgemental way and within scope of own work role and responsibilities, to ensure they have the freedom to discuss spiritual and cultural issues related to the impacts of CKD
2. Contribute to providing education to the person with CKD	2.1 Provide information and resources to the person, family or carer on the aetiology and pathophysiology of the stages of CKD, within scope of work role and responsibilities 2.2 Update own knowledge and provide the person with relevant information to assist in maintaining their health status and slowing disease progression 2.3 Provide information and support to the person to assist them to establish and maintain an appropriate diet 2.4 Provide the person with access to appropriate health education resources on CKD and renal replacement therapy 2.5 Support the person to access information about treatment options in different stages of the disease, so that they can make informed treatment choices 2.6 Communicate effectively with the person, family or carer to clarify the person's needs related to care, including end-of-life discussion, and refer the person to appropriate members of the interdisciplinary health care team 2.7 Contribute to advance care planning or directives in consultation with the interdisciplinary health care team to identify and meet the changing needs of the person, and changes in advance care planning or directives

3. Contribute to determining the health status of the person with CKD	3.1 Perform holistic primary health care assessment of the person in consultation and collaboration with the registered nurse 3.2 Monitor health status of the person to identify disease progression and report changes, referring the person to others where appropriate within scope of work role and organisation policy and procedures 3.3 Identify possible psychosocial impacts of CKD in discussions with the person and, if required and within scope of work role and organisation policy and procedures, refer the person, family or carer for counselling or assistance 3.4 Assess the psychosocial impact of palliative care on the person's family or carer 3.5 Consult with the interdisciplinary health care team to contribute to effective care planning for the person with CKD
4. Assist the person to develop self-management strategies	4.1 Identify opportunities for the person to self-manage various clinical manifestations and common problems and complications associated with CKD 4.2 Assist the person to adhere to care management strategies and their medical management regime for CKD to maintain optimal health

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTRNL001 Support a person with chronic kidney disease

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- implemented nursing care plans for 3 people with chronic kidney disease (CKD) in consultation and collaboration with interdisciplinary team in the workplace
- provided follow-up care for 3 people with CKD, evaluating their health status and providing relevant health information to meet individual needs in consultation and collaboration with interdisciplinary team in the workplace or in a simulated environment.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- applied anatomy and physiology of the renal system and clinical manifestations and associated pathophysiology of acute kidney injury (AKI) and Stages 1 to 5 of CKD
- underlying environmental and social factors contributing to CKD in the general population in Australia and to the higher rates experienced within Aboriginal and/or Torres Strait Islander communities
- CKD conditions including risk factors:
 - diabetic nephropathy
 - glomerulonephritis
 - hypertensive nephropathy
 - polycystic kidney disease
 - reflux nephropathy
 - kidney stones
- clinical manifestations of CKD including:
 - hypertension
 - anaemia
 - bone disease

- cardiovascular disease
 - impaired immunity
 - electrolyte imbalance
 - fluid imbalance
- complications and impact of CKD including:
 - uraemic breath
 - unusual or metallic taste
 - anorexia
 - nausea and vomiting
 - lethargy
 - change in urination
 - confusion
 - pain
 - increase in depression
 - stages in grief and loss
 - sexual dysfunction
 - general malaise
 - cardiovascular events
 - infections
 - uraemic frost
 - pruritus
 - restless leg syndrome
- screening and prevention of CKD
- immunity and the importance of vaccinations
- changing educational needs of the person as CKD progresses
- assessment of renal function and diagnostic procedures including:
 - common pathology tests to diagnose and monitor CKD and their interpretation
 - interventional and investigational procedures used in the diagnosis and the management of CKD
- management of CKD including:
 - factors that can slow the progression and changes across the continuum of CKD
 - management principles for various clinical manifestations of CKD and associated co-morbidities

- meaning and interpretation of health check results for a person with CKD
 - medicines in common use in health management of a person with CKD including basic mechanism of action, precautions, contraindications and side effects
 - nutritional considerations for a person with CKD
- treatment options (including theory, terminology, procedures, risks and benefits) for a person with CKD including renal replacement therapies such as peritoneal dialysis (PD) and haemodialysis (HD)
- psychosocial impacts
- social needs:
 - disability support
 - family support
 - transport to appointments
 - accommodation
- relevant organisations associated with palliative care and advance care planning
- self-management strategies for a person with CKD, including knowledge the person requires and ways to foster a lifelong commitment to:
 - healthy life style
 - exercise
 - renal diet
 - fluid requirements
 - medication regime
 - care of dialysis access
 - recognising progressive symptoms of CKD
 - vaccination regime
 - diabetes care
 - cardiovascular disease care
 - dental care
 - optometry and ophthalmic care
 - skin care.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as, using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must hold current registration as a registered nurse with Nursing and Midwifery Board of Australia.

Link

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTRNL002 Provide care and support to a person undergoing renal replacement therapy

Modification History

N/A

Application

This unit describes the skills and knowledge required to provide care and support to a person in a health or community setting undergoing renal replacement therapy including peritoneal dialysis and haemodialysis.

This unit applies to enrolled nursing work carried out in consultation and collaboration with registered nurse, and under supervisory arrangements aligned to the Nursing and Midwifery Board of Australia regulatory authority legislative requirements; and to Aboriginal and/or Torres Strait Islander health work carried out under direct or indirect supervisory arrangements of a registered nurse or medical practitioner.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

1. Establish therapeutic relationship with the person to support self-management of renal replacement therapy	1.1 Perform an assessment of the person to establish their cognitive ability to support self-management of renal replacement therapy 1.2 Provide the person, family or carer with the opportunity to ask questions and discuss areas of concern 1.3 Ask the person questions clearly in an appropriate manner, level and pace, and in a way that encourages the person to provide full answers 1.4 Assist and empower the person to self-manage their renal replacement therapy, and provide feedback and education as required 1.5 Recognise and respond appropriately within scope of work role to identified actual and potential problems of the person's proposed renal replacement therapy, and report outcomes to interdisciplinary health care team 1.6 Incorporate referral to community services into advance care planning strategies in consultation and collaboration with interdisciplinary health care team
2. Assess physical health status of a person undergoing dialysis	2.1 Perform a pre-dialysis assessment of the person and report outcomes to interdisciplinary health care team in accordance with scope of work role and organisation policies and procedures 2.2 Examine the person's vascular access for haemodialysis or catheter and exit site for peritoneal dialysis to identify actual and potential problems 2.3 Obtain specimen swab from the person's vascular access site or catheter site if necessary, according to organisation policies and procedures, and send specimen for microbiological analysis 2.4 Identify any significant physical health issues for the person in relation to dialysis prescription and any requirement for adjustments, and report to other members of the interdisciplinary health care team 2.5 Recognise and refer actual and potential problems related to variations from the person's normal health status to interdisciplinary health care team
3. Assist the person in self-care management of peritoneal dialysis treatment	3.1 Review the person's understanding of the procedure in accordance with legal requirements and organisation policies and procedures 3.2 Assess the person's self-care strategies

	3.3 Appraise the person's technique for dressing exit site and provide effective education as required 3.4 Assist the person as necessary with their peritoneal dialysis exchange technique in accordance with organisation policies and procedures and infection control guidelines 3.5 Monitor the person during treatment within scope of work role and within organisation policies and procedures 3.7 Recognise and respond appropriately to actual and potential problems of peritoneal dialysis treatment 3.8 Obtain an effluent specimen if necessary, according to organisation policy and procedures, and send specimen for microbiological analysis 3.9 Assess the person's response to treatment, and document and report outcomes to interdisciplinary health care team 3.10 Assist the person to self-manage peritoneal dialysis consumables using waste minimisation and sustainable practice
4. Perform peritoneal dialysis exchange for the person unable to undertake procedure	4.1 Examine the peritoneal dialysis catheter exit site and perform exit site dressing as required 4.2 Prepare peritoneal dialysis additives for dialysis bag in line with delegation, and consider and identify causes of peritoneal fluid failure to drain 4.3 Perform peritoneal exchange according to prescribed treatment order, organisation policy and procedures 4.4 Monitor person during treatment within scope of work role and within organisation policy and procedures and refer to interdisciplinary health care team 4.5 Identify clinical features suggestive of dialysis-related peritonitis and promptly refer a person to interdisciplinary health care team 4.6 Assess the person's response to dialysis additives and treatment as administered within scope of work role 4.7 Recognise acute and delayed adverse reactions to dialysis additives and respond within scope of work role 4.8 Obtain an effluent specimen if necessary, according to organisation policy and procedures, and send specimen for microbiological analysis

	4.9 Document and report treatment outcomes to interdisciplinary health care team
5. Prepare equipment and the person for haemodialysis treatment	5.1 Explain procedure and prepare the person for treatment and make comfortable 5.2 Prepare machine according to organisation policy and procedures 5.3 Determine dialysis settings according to the person's dialysis prescription within scope of work role and organisation policies and procedures 5.4 Prepare other interventions, including medications, under the direct supervision of, and as delegated by interdisciplinary health care team within scope of work role and organisation policies and procedures 5.5 Prepare consumables for cannulation of the person and connection to machine 5.6 Wash hands and use personal protective equipment in accordance with infection prevention and control guidelines 5.7 Prepare the person's access for cannulation according to organisation policies and procedures 5.8 Identify appropriate site for cannulation, and check for signs suggesting fistula stenosis or infection and consult with interdisciplinary health care team. 5.9 Perform cannulation according to organisation policies and procedures
6. Perform haemodialysis	6.1 Connect the person to haemodialysis machine according to organisation policies and procedures and infection control guidelines 6.2 Monitor the person and refer variations in health status to the interdisciplinary health care team according to organisation policies and procedures 6.3 Recognise and respond appropriately to machine alarms and actual and potential problems of haemodialysis 6.4 Assess the person's response to treatment and other interventions as administered within scope of work role and consult with interdisciplinary health care team 6.5 Recognise acute and delayed adverse reactions to other interventions and respond within scope of work role

	6.7 Disconnect the person from haemodialysis machine in accordance with organisation policy and procedures 6.8 Clean and dry and store equipment in accordance with infection control and manufacturers' instructions 6.9 Examine vascular access site to identify any actual or potential problems and refer to interdisciplinary health care team
7. Evaluate health status of the person at completion of dialysis	7.1 Complete the post-dialysis assessment of the person and document and report outcomes 7.2 Evaluate the person's response to treatment and report to interdisciplinary health care team as required within scope of work role and organisation policy and procedures 7.3 Provide feedback to the person on physical health assessment in order to maintain optimal health status 7.4 Identify opportunities to encourage the person to voice concerns, and respond appropriately

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTRNL002 Provide care and support to a person undergoing renal replacement therapy

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed renal replacement therapy on 3 different people, at least 1 of which must be using peritoneal dialysis and at least 1 of which must be using haemodialysis, including:
 - identifying signs of uraemia and electrolyte imbalance
 - identifying signs of fluid overload
 - identifying signs of dehydration
 - checking peritoneal dialysis exit site
 - assessing patency of vascular access including:
 - palpating fistula for thrill
 - auscultating fistula for bruit
 - checking for signs of infection
 - checking last needle sites.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- infection control strategies for management of a person undergoing renal replacement therapies including:
 - stressing the importance of good hygiene and adequate nutrition in prevention of infection
 - maintaining cleanliness of exit site or fistula arm
 - monitoring and maintaining integrity of skin to prevent infection
 - using no touch technique
- pathophysiology of Stage 5 CKD and common pathology tests to diagnose and monitor CKD and their interpretation

- reportable limits for a person's vital signs and biochemical and haematological results for a person undergoing renal replacement therapy
- immunity and the importance of vaccinations
- management principles for different types of renal replacement therapy including:
 - haemodialysis
 - peritoneal dialysis
- medicines in common use in management of a person with Stage 5 CKD including basic mechanism of action, precautions and side effects
- organisation policy and procedures relating to renal replacement therapy
- potential impact of Stage 5 CKD and renal replacement therapy has on quality of life and self-esteem including issues related to:
 - fluid balance management
 - nutritional management
 - prevention of infection
 - care of dialysis access
 - care of transplanted kidney
 - administration of medications and identification of their side effects
- signs and symptoms of actual and potential problems of renal replacement therapy and the appropriate response including:
 - hypertension, hypotension
 - hyperglycaemia, hypoglycaemia
 - cardiovascular abnormalities
 - fluid and electrolyte imbalance due to rapid or excess fluid or electrolyte removal
 - malnutrition
 - haemodialysis problems
 - haemolysis
 - vascular access problems
 - clotted or stenosed vascular access
 - prolonged bleeding
 - peritoneal dialysis problems
 - peritonitis
 - exit site infection signs and symptoms including:
 - leakage from site, extravasation or bag
 - blocked catheter due to constipation, catheter movement, fibrin plug

- cracking, splitting and discolouration of the catheter
- cuff extrusion
- mobile catheter
- tension of catheter
- extravasation to surrounding tissue or along inguinal canal to scrotum or labia
- contamination of catheter or 'Y' line on bag during exchange process
- blocked or split Tenckhoff catheter
- accidental break in sterile pathway
- hernia
- obesity
- psychosocial issues
- dietary management
- potential vascular access site problems including:
 - decreased thrill
 - high pitched bruit
 - difficulty in needling fistula
 - abnormal arterial and venous pressure readings
 - pain, swelling, redness or trauma
 - false aneurysms
 - blood leak from cannulation site
- own role and responsibilities and those of other health care team members in the delivery of care to a person with CKD.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as, using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must hold current registration as a registered nurse with Nursing and Midwifery Board of Australia.

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTRNL003 Contribute to the nursing care of a person with renal impairment

Modification History

N/A

Application

This unit describes the performance outcomes, skills and knowledge required to provide supportive care of a person with renal impairment and advance care planning.

This unit applies to enrolled nurses, registered with the Nursing and Midwifery Board of Australia (NMBA), seeking specialisation in enrolled nurse work that is carried out in consultation and collaboration with registered nurses, and under direct or indirect supervisory arrangements aligned to the NMBA regulatory authority legislative requirements.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian Standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

Nil

Competency field(s)

Renal

Unit sector(s)

Nursing

Elements and Performance Criteria

Elements	Performance criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

1. Identify a person's knowledge of the impact of renal impairment.	1.1. Assess knowledge of renal impairment and impact on lifestyle, social context and emotional and spiritual choices. 1.2. Confirm understanding of the pathophysiology of renal impairment. 1.3. Identify common problems and complications associated with renal impairment and contributing factors that impact on health and lifestyle. 1.4. Identify psychosocial impacts of renal impairment on activities of daily living. 1.5. Provide support in a culturally safe and open manner. 1.6. Confirm spiritual and cultural issues related to the impacts of renal impairment.
2. Contribute to health status in renal impairment.	2.1. Perform primary health care assessment. 2.2. Monitor health status to identify renal impairment and its progression, and document and report. 2.3. Identify psychosocial impacts of renal impairment and refer for counselling and assistance. 2.4. Consult with the multidisciplinary health care team to contribute to care planning.
3. Contribute to provision of patient education in renal impairment.	3.1. Identify knowledge deficits of the renal impairment. 3.2. Provide information and resources on the aetiology and pathophysiology of the stages of renal impairment. 3.3. Apply contemporary information to assist optimal health status and slowing renal impairment progression. 3.4. Clarify educational requirements for the stages of renal impairment and apply to nursing plan of care and self-management. 3.5. Provide education and support to establish and maintain optimal nutrition and dietary choices in renal impairment.

	3.6. Contribute to health education, resources on renal impairment and renal replacement therapy. 3.7. Communicate information about referral to multidisciplinary health care team for alternative care options as renal impairment progresses, including end of life care. 3.8. Contribute documentation to identify and meet advance care planning and directives.
4. Contribute to self-management strategies for renal impairment.	4.1. Identify opportunities for self-management of clinical manifestations and common complications associated with renal impairment. 4.2. Provide information and access to resources for self-care management strategies to maintain optimal health status.

-

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

HLTRNL003 Contribute to the nursing care of a person with renal impairment	HLTRNL001 Support a person with chronic kidney disease	This version was released in HLT Health Training Package Release 6.0 and meets the requirements of the 2015 Standards for Training Packages. Mapping information updated. Updated to reflect current industry practices and terminology.	Not equivalent

Assessment Requirements for HLTRNL003 Contribute to the nursing care of a person with renal impairment

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- implement nursing care plans for three people with renal impairment
- provide follow-up care of three people with renal impairment in the workplace

The tasks must be undertaken in accordance with the Nursing and Midwifery Board of Australia (NMBA) professional practice standards, codes and guidelines.

Knowledge Evidence

Demonstrate knowledge required to complete tasks outlined in elements and performance criteria of this unit:

- anatomy and physiology of the renal system and clinical manifestations and associated pathophysiology of the stages of renal impairment
- underlying environmental and social factors contributing to renal impairment in the general population in Australia and the higher rates experienced within Aboriginal and Torres Strait Islander communities
- renal impairment conditions and risk factors:
 - diabetic nephropathy
 - glomerulonephritis
 - hypertensive nephropathy
 - polycystic kidney disease
 - reflux nephropathy
 - kidney stones
 - kidney transplant
- clinical manifestations:
 - hypertension
 - anaemia
 - bone disease
 - cardiovascular disease

- impaired immunity
 - electrolyte imbalance
 - fluid imbalance
- complications and impact of renal impairment:
 - uraemic breath
 - unusual and metallic taste
 - anorexia
 - nausea and vomiting
 - lethargy
 - change in urination
 - confusion
 - pain
 - increase in depression
 - stages of grief and loss
 - sexual dysfunction
 - general malaise
 - cardiovascular events
 - infections
 - uraemic frost
 - pruritus
 - restless leg syndrome
- screening and prevention
- immunity and the importance of vaccinations
- changing educational needs
- assessment of renal function and diagnostic procedures:
 - common pathology tests to diagnose and evaluate
 - interventional and investigational procedures used in the diagnosis and management
- management:
 - factors that can slow the progression and changes across the continuum of renal disease
 - principles for clinical manifestations and associated co-morbidities
 - evaluation of health check results

- common medicines, mechanism of action, precautions, contraindications and side effects in renal impairment
 - nutritional considerations
- theory, terminology, procedures, risks and benefits of treatment options including renal replacement therapies:
 - peritoneal dialysis and haemodialysis
- psychosocial impacts
- social needs:
 - disability support
 - family support
 - transport to appointments
 - accommodation
- organisations associated with palliative care and advance care planning.
- self-management strategies:
 - healthy lifestyle
 - exercise
 - renal diet
 - fluid requirements
 - medication regime
 - care of dialysis access
 - recognising progressive symptoms
 - vaccination regime
 - diabetes care
 - cardiovascular disease care
 - dental care
 - optometry and ophthalmic care
 - skin care.

Assessment Conditions

To be eligible to apply for registration as an enrolled nurse and to practice in Australia, each applicant must complete a Diploma of Nursing program accredited by the Australian Nursing and Midwifery Accreditation Council (ANMAC) and approved as ‘an approved program of study’ by the Nursing and Midwifery Board of Australia (NMBA) in accordance with the Enrolled Nurse Accreditation Standards.

For more detail visit <https://www.ahpra.gov.au>.

Skills must be demonstrated in the workplace or in a simulated environment as specified in the performance evidence that model industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Assessors must also hold current registration as a registered nurse with the Nursing and Midwifery Board of Australia (NMBA).

Link

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTRNL004 Apply renal replacement therapy

Modification History

N/A

Application

This unit describes the performance outcomes, skills and knowledge required to provide care and support to a person in health and community settings undergoing renal replacement therapy including peritoneal dialysis and haemodialysis.

This unit applies to enrolled nurses, registered with the Nursing and Midwifery Board of Australia (NMBA), seeking specialisation in enrolled nurse work that is carried out in consultation and collaboration with registered nurses, and under direct or indirect supervisory arrangements aligned to the NMBA regulatory authority legislative requirements.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian Standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements	Performance criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

1. Establish therapeutic relationship to support self-management of renal replacement therapy.	1.1. Perform physical assessment to establish cognitive ability to support self-management of renal replacement therapy. 1.2. Provide opportunity for care dialogue and clarify elements of concern. 1.3. Encourage open dialogue and comprehensive engagement in therapeutic intervention. 1.4. Provide education to encourage self-care management of renal replacement therapy. 1.5. Identify areas of concern relating to self-management of renal replacement therapy, and report to multidisciplinary health care team. 1.6. Provide referral to primary health, tertiary health and community services in collaboration with multidisciplinary health care team.
2. Assess physical health status for dialysis.	2.1. Perform physical pre-dialysis assessment and report outcomes to multidisciplinary health care team. 2.2. Inspect person's access device for suitability for dialysis for foreseeable treatment risks. 2.3. Perform specimen collection of access and catheter sites for microbiological analysis. 2.4. Identify physical health risks related to dialysis prescription, and document and report.
3. Perform peritoneal dialysis exchange.	3.1. Examine peritoneal dialysis catheter exit site and perform exit site dressing. 3.2. Prepare peritoneal dialysis additives for dialysis bag in line with delegation and identify causes of peritoneal fluid failure to drain. 3.3. Perform peritoneal exchange according to prescribed treatment order and organisational policies and procedures.

	• 3.4. Monitor risks associated with treatment during procedure. • 3.5. Document and refer identified risks and clinical features suggestive of dialysis-related peritonitis. • 3.6. Identify acute and delayed adverse reactions to dialysis additives and respond within scope of work role. • 3.7. Document and report treatment outcomes.
• 4. Assist with self-care management of peritoneal dialysis.	• 4.1. Appraise competence and readiness for the procedure and self-management including technique for Tenckhoff catheter care and provide education. • 4.2. Provide assistance and education relating to peritoneal dialysate fluid exchange. • 4.3. Monitor treatment progress and ensure supporting documentation is complete. • 4.4. Identify and respond to procedural variations and risk during peritoneal dialysis treatment. • 4.5. Collect effluent specimen for microbiological analysis. • 4.6. Assess response to treatment and document and report outcomes. • 4.7. Perform self-management appraisal on peritoneal dialysis consumables, sustainable practice and waste minimisation.
• 5. Prepare person and equipment for haemodialysis.	• 5.1. Explain procedure and prepare for treatment. • 5.2. Apply hand hygiene and use of personal protective equipment (PPE) in accordance with infection prevention and control guidelines. • 5.3. Prepare dialysis machine and determine dialysis settings. • 5.4. Identify site for cannulation and signs of fistula stenosis and infection, and report

	abnormalities prior to commencement of procedure. • 5.5. Prepare and perform cannulation according to organisational policies and procedures.
• 6. Perform haemodialysis.	• 6.1. Connect haemodialysis machine according to organisational policies and procedures and infection prevention and control guidelines. • 6.2. Monitor for signs of deterioration during haemodialysis and report variations in health status. • 6.3. Identify and respond to machine alarms and other problems with haemodialysis. • 6.4. Assess response to treatment and other interventions as administered. • 6.5. Identify, respond and document adverse reactions. • 6.6. Complete haemodialysis machine disconnection in accordance with organisational policies and procedures. • 6.7. Provide equipment care in accordance with infection prevention and control guidelines and manufacturer instructions. • 6.8. Inspect vascular access site pre- and post-procedure and report adverse findings.
• 7. Evaluate health status at completion of dialysis.	• 7.1. Complete post-dialysis assessment. • 7.2. Evaluate treatment and report. • 7.3. Provide feedback of physical health assessment. • 7.4. Provide opportunities to listen to concerns and respond.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTRNL004 Apply renal replacement therapy

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- perform renal replacement therapy in the workplace on three different people, one of which must be using peritoneal dialysis and one of which must be using haemodialysis involving:
 - identifying signs of uraemia and electrolyte imbalance
 - identifying signs of fluid overload
 - identifying signs of dehydration
 - checking peritoneal dialysis exit site
 - assessing patency of vascular access including:
 - palpating fistula for thrill
 - auscultating fistula for bruit
 - checking for signs of infection
 - checking last needle sites

The tasks must be undertaken in accordance with the Nursing and Midwifery Board of Australia (NMBA) professional practice standards, codes and guidelines.

Knowledge Evidence

Demonstrate knowledge required to complete the tasks outlined in elements and the performance criteria of this unit:

- techniques for assessing for blood clots in the line post haemodialysis
- techniques for adjusting next haemodialysis treatment parameters as per outcome of latest session
- use of clamps during haemodialysis
- indication for dialysis needle size
- indication for dialyser size
- indication for use of safety fistula catheters
- infection control principles of nursing care during renal replacement therapy

- standards and guidelines for renal care to improve the quality of care and outcomes for persons with kidney disease:
 - education
 - renal diet and nutrition
 - hygiene to minimise risk of fistula and access device infection
 - risk of skin infection
 - principles of aseptic technique for practice
 - common dialysates and dialysers
- pathophysiology of renal impairment and routine diagnostic testing
- normal and abnormal biochemical and haematological markers for undergoing renal replacement therapy
- national immunisation program recommendations for immunosuppressed people.
- types and principles of renal replacement therapies:
 - blood volume monitor (BVM)
 - haemodiafiltration (HDF)
 - heparin-free haemodialysis.
- haemodialysis machine cleaning and testing
- principles of haemodialysis and peritoneal dialysis
- medicines in common use to treat renal impairment
- impact of renal replacement therapy on quality of life and self-esteem including issues related to:
 - fluid and electrolytes
 - diet and nutritional
 - infection control
 - renal transplant
- signs and symptoms of actual and potential problems of renal replacement therapy and responses:
 - hypertension
 - hypotension
 - hyperglycaemia
 - hypoglycaemia
 - hypovolaemia due to rapid and excess fluid and electrolyte removal
 - altered nutritional status
 - haemolysis
 - vascular access

- clotted and stenosed vascular access
- prolonged bleeding
- peritonitis
- care of:
 - leakage from site, extravasation and bag
 - blocked catheter
 - catheter breaches including movement and cracking
 - fibrin plug
 - cuff extrusion
 - extravasation to surrounding tissue
 - contamination of catheter and Y line on bag during exchange process
 - Tenckhoff care
- accidental break in sterile pathway
- hernia
- obesity
- psychosocial issues
- dietary management
- vascular access site inspection for:
 - decreased thrill
 - high pitched bruit
 - difficulty in needling fistula
 - abnormal arterial and venous pressure readings
 - pain, swelling, redness and trauma
 - false aneurysms
 - blood leak from cannulation site
- own role and responsibilities and those of other multidisciplinary health care team members.

Assessment Conditions

To be eligible to apply for registration as an enrolled nurse and to practice in Australia, each applicant must complete a Diploma of Nursing program accredited by the Australian Nursing and Midwifery Accreditation Council (ANMAC) and approved as ‘an approved program of study’ by the Nursing and Midwifery Board of Australia (NMBA) in accordance with the Enrolled Nurse Accreditation Standards.

For more detail visit <https://www.ahpra.gov.au>.

Skills must be demonstrated in the workplace or in a simulated environment as specified in the performance evidence that model industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Assessors must also hold current registration as a registered nurse with the Nursing and Midwifery Board of Australia (NMBA).

HLTSHU001 Work within a framework of traditional oriental medicine

Modification History

N/A

Application

This unit describes the skills and knowledge required to establish the foundations of traditional oriental medicine and then to integrate its philosophies and principles into practice.

This unit applies to any complementary health practitioner whose practice is based on the oriental medicine framework.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Establish foundations of traditional oriental medicine	1.1 Identify, access and interpret information on the central philosophies of traditional oriental medicine 1.2 Evaluate the traditional oriental medicine system of treatment and its application to current health issues

	1.3 Assess and determine how traditional oriental medicine is used within different complementary health modalities and within broader health practice
2. Integrate philosophy of traditional oriental medicine into practice	2.1 Evaluate the ways in which the traditional oriental medicine framework can enhance own practice 2.2 Investigate detailed aspects of client assessment and treatment approach in traditional oriental medicine 2.3 Develop and adjust own practice approaches to reflect traditional oriental medicine framework
3. Extend and expand own skills and knowledge in traditional oriental medicine	3.1 Pro-actively identify and respond to opportunities to expand own knowledge of traditional oriental medicine 3.2 Pro-actively engage and collaborate with peers

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

HLTSHU001 Work within a framework of traditional oriental medicine		This unit has been created to address a skill or task required by industry that is not covered by an existing unit of competency	Newly created

Assessment Requirements for HLTSHU001 Work within a framework of traditional oriental medicine

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- used critical thinking skills to evaluate how the oriental medicine framework is applied in practice
- integrated the traditional oriental medicine framework into the delivery of services for at least 10 different clients:
 - in assessment and diagnosis
 - in treatment provision

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- principles and philosophy of oriental therapies framework:
 - yin and yang,
 - five elements theory
 - five vital substances
 - jing lu
 - zang fu
 - extraordinary organs
 - four methods of diagnosis
 - eight principle patterns
 - six pathogenic influences
 - pattern differentiation and aetiology
 - seven emotions
- how the traditional oriental medicine framework is used and adapted in different modalities:
 - Shiatsu

- qu gong
- corrective exercises
- gua sha
- dietetics
- moxa bustion
- cupping
- acupressure
- how the traditional oriental medicine framework is used at different stages of the treatment process
- philosophical tradition of western and eastern body therapies:
 - rationalistic, analytical approach to an understanding of disease
 - vitalistic, empirical approach to health
 - key features of qualitative, quantitative, cultural and traditional lines of evidence used in traditional oriental medicine
 - nature of the dynamic interchange between the physical, mental, social, environmental and spiritual landscape

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated clinical environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - client information, case history, treatment plan
 - futon
 - linen
- modelling of industry operating conditions, including provision of services to the general public
- clinic supervision by a person who meets the assessor requirements outlined below

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must:

- have at least 5 years current clinical experience working as a Shiatsu therapist providing services to the general public
- hold practising membership of an Australian professional body that represents Shiatsu therapists
- fulfil the continuing professional development requirements of the professional body to which they belong

Link

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTSHU002 Develop Shiatsu practice

Modification History

N/A

Application

This unit describes the skills and knowledge required to establish the foundations of Shiatsu practice, evaluate what makes a sustainable practice and then to develop an approach to own practice. It also includes the ability to communicate key information about Shiatsu to others.

This unit applies to Shiatsu therapists.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Establish foundations of Shiatsu practice	1.1 Identify, access and interpret information on the central philosophies of Shiatsu 1.2 Evaluate the Shiatsu system of treatment and its application to current health issues 1.3 Compare and contrast Shiatsu, other complementary health modalities and broader health practice

2. Represent the Shiatsu framework	2.1 Determine information needs of different individuals and groups 2.2 Identify key messages that represent the philosophy and practice of Shiatsu therapy 2.3 Communicate information about Shiatsu therapy at level of depth appropriate to audience needs
3. Determine requirements for sustainable Shiatsu practice	3.1 Identify key issues that affect the development and sustainability of professional practice 3.2 Identify economic, environmental, human and social considerations, and their impact on professional practice 3.3 Access, interpret and collate current information that supports professional practice
4. Develop approach to own practice	4.1 Reflect on professional goals and aspirations 4.2 Identify and assess professional opportunities in Shiatsu 4.3 Reflect on opportunities and constraints of individual personal circumstances 4.4 Make decisions about practice direction, based on reflection and research 4.5 Develop practical strategies that address own practice goals

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- used critical thinking skills to:
 - review and reflect on information from a range of sources about Shiatsu practice
 - evaluate and articulate requirements for sustainable Shiatsu practice
- communicated key messages about Shiatsu therapy to meet the information needs of at least 3 different individuals or groups
- developed goals for own practice that reflect the values and philosophies of Shiatsu

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- philosophies and principles of Shiatsu:
 - historical development of Shiatsu
 - central philosophies:
 - meridians and meridian therapy
 - yin and yang
 - ki, kyo and jitsu
 - hara
 - importance of personal health strategy
 - philosophical tradition of western and eastern body therapies:
 - rationalistic, analytical approach to an understanding of disease
 - vitalistic, empirical approach to health
 - key features of qualitative, quantitative, cultural and traditional lines of evidence used in Shiatsu

- nature of the dynamic interchange between the physical, mental, social, environmental and spiritual landscape
- Shiatsu system of treatment and effects of Shiatsu application to the body surface
- different styles of Shiatsu treatments and their key features and purpose:
 - stretching, posture and exercise techniques
 - elbows, feet, knees, ball of thumb, hand pressure techniques for whole body treatment
 - meridian stretching techniques
 - hara diagnosis, tonification/dispersion
 - lifestyle and dietary advice
 - relaxation and breathing techniques
 - meditation
- key features of complementary therapies used in conjunction with Shiatsu, including:
 - Traditional Chinese Massage
 - acupuncture
- place of Shiatsu in relation to allied health services
- professional Shiatsu networks and industry bodies
- different models of professional Shiatsu practice and their key features:
 - sole practitioners
 - employment opportunities
- components of sustainable practice:
 - economic – opportunities and viability
 - environmental
 - human – personal health, professional development
 - social responsibility
- legal and ethical considerations (national and state/territory) and how these are applied in individual practice:
 - children in the workplace
 - codes of conduct
 - continuing professional education
 - discrimination
 - dignity of risk
 - duty of care
 - human rights

- informed consent
- insurance requirements
- mandatory reporting
- practitioner/client boundaries
- privacy, confidentiality and disclosure
- records management
- work role boundaries – responsibilities and limitations
- work health and safety

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources
- modelling of industry operating conditions and contingencies

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTSHU003 Maintain personal health and awareness for traditional oriental medicine practice

Modification History

N/A

Application

This unit describes the skills and knowledge required to establish and maintain a personal health strategy consistent with the philosophy of traditional oriental medicine. This forms a key element in the practitioner's ability to effectively treat clients and sustain professional integrity.

This unit applies to any practitioner working within a traditional oriental medicine framework.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Establish a personal health strategy	1.1 Identify and evaluate the factors that contribute to personal and professional well being in the traditional oriental medicine framework

	1.2 Explore own constitution and make-up in the context of five elements theory 1.3 Explore and decide on ways to develop and maintain physical and mental self-discipline 1.4 Develop own health goals consistent with practice philosophy and personal situation 1.5 Determine and document strategies and activities that support personal health goals both physical and spiritual
2. Model philosophies and principles of traditional oriental medicine	2.1 Consistently use strategies and activities identified in own health strategy 2.2 Maintain personal diet that is consistent with the principles of oriental nutrition 2.3 Engage in physical activities that support optimum health 2.4 Identify and respond appropriately to indications of stress
3. Maintain and enhance ability to practice	3.1 Monitor and maintain own energetic awareness and balance 3.2 Develop own qi sensitivity through hara work 3.3 Work with own breathing on an ongoing basis 3.4 Use own development as an integral part of enhancing professional practice

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTSHU003 Maintain personal health and awareness for traditional oriental medicine practice

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- established and followed a personal health strategy that is consistent with the philosophy of traditional oriental medicine

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- five phases theory in relation to personal health
- relationship between personal health and ability to practice
- types of activities that support maintenance of personal health:
 - meditation
 - yoga
 - regular physical activity
 - stress management techniques
- philosophies and principles of oriental nutrition:
 - digestive system
 - major digestive irregularities
 - value of different food types
 - cooking methods
 - food combinations
- qi development and enhancement practices

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources
- modelling of industry operating conditions and contingencies

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must:

- have at least 3 years current clinical experience working as a Shiatsu therapist providing services to the general public
- hold practising membership of an Australian professional body that represents Shiatsu therapists
- fulfil the continuing professional development requirements of the professional body to which they belong

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine scope of client needs	1.1 Explore and clarify client expectations 1.2 Provide clear information about scope and limits of services to be provided

	1.3 Collect an accurate, relevant and organised health record and document in a form which can be interpreted readily by other professionals 1.4 Recognise needs that are beyond scope of own practice and make referrals to other health care professionals according to clients needs 1.5 Identify and respond to any barriers to information gathering and assessment 1.6 Seek client information respectfully and sensitively, using purposeful, systematic and diplomatic questions 1.7 Manage information in a confidential and secure way
2. Make a physical assessment	2.1 Provide information about the physical assessment process and obtain client consent to proceed 2.2 Follow clinical and practitioner hygiene procedures 2.3 Respect client dignity and anticipate sensitivities 2.4 Seek client feedback on comfort levels 2.5 Assess client through hara, back and meridian palpation 2.6 Integrate observation and sensory information gathering techniques 2.7 Use ongoing questioning with client to gain further information according to clients needs 2.8 Accurately document information from the physical assessment
3. Develop treatment plan	3.1 Correlate results of physical assessment with case history 3.2 Consider any available western medical information and incorporate into analysis within scope of own practice 3.3 Bring together eastern and western approaches to pathology 3.4 Analyse energetic patterns and differentiate by assessing signs and symptoms 3.5 Identify condition according to stage and related implications by applying the eight principles of diagnosis 3.6 Identify pre-requisites or contraindications to treatment 3.7 Determine optimum type, duration and frequency of treatments

	3.8 Use professional judgement to draw substantiated conclusions about treatment needs 3.9 Establish expected treatment outcomes based on the Shiatsu framework and evidence 3.10 Accurately document proposed treatment plan
4. Confirm assessment and treatment plan with client	4.1 Discuss assessment, its implications and rationale for treatment with the client 4.2 Assign and agree treatment priorities and expectations in consultation with the client 4.3 Schedule times and session lengths suited to the required techniques and sequences 4.4 Respond to client enquiries using language the client understands 4.5 Discuss referral and collaborative options with the client according to needs

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTSHU004 Perform Shiatsu therapy health assessments

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 200 hours of client consultation work
- prepared for and managed at least 60 Shiatsu health assessments - clients must include males and females from different stages of life with varied presentations
- used the Shiatsu framework to assess therapeutic needs of clients, including:
 - hara palpation
 - observation
 - sensory information gathering techniques
 - use differential diagnostic techniques
- interacted effectively with clients:
 - clearly articulated information about services, treatment options and rationale
 - engaged clients in decision making

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations (national and state/territory) for client assessment and treatment planning:
 - codes of conduct
 - duty of care
 - informed consent
 - mandatory reporting
 - practitioner/client boundaries
 - privacy, confidentiality and disclosure
 - records management

- work role boundaries:
 - working within scope of practice
 - presenting symptoms that require referral to a medical practitioner
 - work health and safety
- referral options for practitioners:
 - professional health services including complementary health modalities
 - community resources and support services
 - types and availability of further medical testing
- factors and barriers that may impact on assessment, including:
 - physical
 - psychological
 - cultural
- factors that affect individual health status, including:
 - constitution
 - lifestyle
 - diet
 - personal and medical history
 - values and attitudes
 - balance of rest and activity
 - physical environment
 - social environment
- factors for consideration for different genders and ages
- client information required for assessment and the scope and depth of information needed around:
 - client objectives and expectations
 - client history and its components
 - client current state of health
 - signs and symptoms:
 - onset
 - duration
 - location
 - quality and severity
 - non-verbal

- different ways that signs and symptoms of conditions present and how these are interpreted in a Shiatsu framework:
 - physical
 - psychological
 - social
 - qi
- features of signs and symptoms
- principles and philosophy of Shiatsu therapy framework:
 - relationships between body types and symptoms according five phases theory
 - primary functions of meridians and meridian extensions developed by masunaga
 - yin and yang
 - character and function of tsubo (acu-points)
 - the eight principles of differentiation (ba gang bian zheng)
- Shiatsu diagnostic techniques and considerations:
 - the four methods of diagnosis (si zhen)
 - back yu points and front mu points and diagnostic zones of hara
 - diagnostic ability of face, complexion, posture and vitality
 - palpatory diagnostic techniques and palpatory sensitivity to conditions of kyo/jitsu (empty/full) meridians
 - listening
 - smelling
 - Masunaga meridian palpation
- possible reactions, contra-indications to treatment and/or limitations for assessment
- pathophysiology of common disease states according to Shiatsu framework:
 - qi imbalances
 - physical
 - emotional
 - mental
- relational dynamics within and between human behaviour, anatomy and physiology, pathology and the natural world
- treatment planning techniques and considerations

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated clinical environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - health assessment, client consultation forms
 - private consultation area
 - futon
 - linen
- modelling of industry operating conditions, including provision of services to the general public
- clinic supervision by a person who meets the assessor requirements outlined below for at least 120 of the 200 hours of client consultation work

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must:

- have at least 3 years current clinical experience working as a Shiatsu therapist providing services to the general public
- hold practising membership of an Australian professional body that represents Shiatsu therapists
- fulfil the continuing professional development requirements of the professional body to which they belong

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare client for treatment	1.1 Interpret treatment plans and clearly outline how the treatment will be provided and managed 1.2 Explain factors which may interfere with the effectiveness of the treatment 1.3 Inform and advise client about possible physical or emotional reactions during and following a session

	1.4 Follow established protocols to physically prepare the client for treatment 1.5 Confirm client consent for treatment
2. Build fundamental Shiatsu principles into treatment	2.1 Ensure sensitivity to ki palpation 2.2 Explore and recognise connection to hara 2.3 Explore and develop energetic relationship between therapist and client 2.4 Maintain client-focused attention throughout the treatment session
3. Use Shiatsu techniques	3.1 Regulate the circulation of ki 3.2 Apply manual perpendicular pressure directed from the hara to the body 3.3 Use appropriate levels of pressure 3.4 Maintain therapist postures that ensure a controlled distribution of body weight
4. Follow Shiatsu sequences	4.1 Determine treatment sequence, location and degree of pressure according to assessment indications 4.2 Select and adhere to specific Shiatsu sequences according to the Shiatsu style being used
5. Work with client during treatment	5.1 Use the condition and response of the client as a continual feedback to the initial assessment 5.2 Incorporate contact with all major body regions within a reasonable time frame 5.3 Position client to optimise their comfort and support while allowing for optimum application of techniques 5.4 Recognise reactions to treatment and respond promptly according to clients needs
6. Provide advice and resources to the client	6.1 Educate client in relevant and practical techniques that support the treatment plan

	6.2 Answer client queries with clarity, using language the client understands 6.3 Use honesty and integrity when explaining treatment plans, schedules and recommendations to the client 6.4 Promote client independence and responsibility in treatment 6.5 Discuss and agree on evaluation strategies 6.6 Accurately document treatment provided and details of client communications

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 200 hours of Shiatsu client consultation work
- prepared for and managed at least 60 Shiatsu treatment sessions - clients must include males and females from different stages of life with varied presentations
- used each of the following sequences during client consultation sessions according to client needs:
 - back sequence
 - upper back and arm sequence
 - side sequence
 - head and neck sequence
 - leg sequence in supine
 - back diagnosis zones for treatment
 - back shu/front mu diagnosis areas for treatment
 - abdominal palpation
 - face sequence
 - feet sequence
 - hip sequence
 - chest sequence
 - arm sequences
 - leg sequence
 - a range of different styles including namikoshi, ohashi zen and barefoot Shiatsu sequences and specific techniques
 - hara palpation and diagnosis
 - tonification and dispersion methods
- used the following pressure and tsubo techniques during client consultation sessions according to client needs:

- perpendicular pressure
 - non perpendicular pressure
 - moving and stationary pressure
 - sustained/continuous and intermittent/moving pressure
 - deep and superficial pressure
 - strong and gentle pressure
 - use of elbows, feet, knees, ball of thumb and hand pressure techniques
- used the following stretching and opening techniques during client consultation sessions according to client needs:
 - stretching exercises
 - stretching across and along the fibres
 - stretching to open channels/meridians, points and joints
- used the following manual techniques during client consultation sessions according to client needs:
 - percussion
 - pinching
 - rolling
 - rubbing
 - vibrating
 - qi projection on and above the body surface
 - muscular contraction and resistance
 - mobilisations of joints
 - use of mother hand
 - palpation of ki along meridians and tsubos
 - tonification and dispersing techniques
- provided other advice to support optimum health
 - lifestyle
 - dietary
 - yoga
 - relaxation
 - meditation

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations (national and state/territory) for client assessment:
 - codes of conduct
 - duty of care
 - informed consent
 - mandatory reporting
 - practitioner/client boundaries
 - privacy, confidentiality and disclosure
 - records management
 - working role boundaries:
 - working within scope of practice
 - presenting symptoms that require referral to a medical practitioner
 - work health and safety
- principles of Shiatsu that are integrated in all treatments
- different Shiatsu styles and sequences, and their indications for use
- Shiatsu treatment techniques, how to apply them, what each technique does, what effects it might have, and what the contraindications are, for the following:
 - Shiatsu sequences
 - Shiatsu pressure and tsubo techniques
 - stretching and opening techniques
- potential reactions during treatment and how to respond:
 - discomfort
 - emotional reactions
 - feedback - verbal, tactile, visual
 - muscular spasms
 - body temperature discomfort
 - deep relaxation
- potential reactions following treatment and appropriate client advice
- types of advice and resources that can be provided to clients for their use outside the clinical environment
- documentation requirements for recording treatment details

- basic structure and function of western medicine systems and regions of the body
- common disease states and functional problems of each body system
- fundamental principles of biomechanics

Assessment Conditions

Skills must have been demonstrated in the workplace or in a clinical environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - client information – case history, treatment plan
 - futon
 - linen
- modelling of industry operating conditions, including provision of services to the general public
- clinic supervision by a person who meets the assessor requirements outlined below for at least 120 of the 200 hours of client consultation work

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must:

- have at least 3 years current clinical experience working as a Shiatsu therapist providing services to the general public
- hold practising membership of an Australian professional body that represents Shiatsu therapists
- fulfil the continuing professional development requirements of the professional body to which they belong

HLTSHU007 Provide oriental therapies treatments

Modification History

N/A

Application

This unit describes the skills and knowledge required to prepare for and provide therapeutic oriental therapies treatments based on the outcomes of an existing health assessment and treatment plan.

This unit applies to therapists who work with oriental therapies as part of a broader complementary health practice.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare client for treatment	1.1 Interpret treatment plans and clearly outline how the treatment will be provided and managed 1.2 Explain factors which may interfere with the effectiveness of the treatment

	1.3 Inform and advise client about possible physical or emotional reactions during and following a session 1.4 Follow established protocols to physically prepare the client for treatment 1.5 Confirm client consent for treatment
2. Apply therapeutic techniques	2.1 Determine treatment sequence, location and degree of pressure according to assessment indications 2.2 Apply oriental therapy techniques protocol 2.3 Use the condition and response of the client as a continual feedback to the initial assessment 2.4 Position client to optimise their comfort and support while allowing for optimum application of techniques 2.5 Maintain therapist postures that ensure a controlled distribution of body weight 2.6 Maintain client-focused attention throughout the treatment session 2.7 Recognise reactions to treatment and respond promptly according to clients needs
3. Provide advice and resources to the client	3.1 Educate client in relevant and practical techniques that support the treatment plan 3.2 Answer client queries with clarity, using appropriate language 3.3 Use honesty and integrity when explaining treatment plans, schedules and recommendations to the client 3.4 Promote client independence and responsibility in treatment 3.5 Discuss and agree on evaluation strategies 3.6 Accurately document treatment provided and details of client communications

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTSHU007 Provide oriental therapies treatments

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 200 hours of oriental therapies client consultation work
- prepared for and managed at least 60 oriental therapies treatment sessions - clients must include males and females from different stages of life with varied presentations
- used the following techniques and sequences according to clients needs:
 - acupressure
 - moxibustion
 - cupping
 - meridian stretching techniques
 - demonstration and explanation of suggested corrective postures, stretches, movements
- provided other advice to support optimum health:
 - lifestyle
 - dietary
 - yoga
 - relaxation
 - meditation
 - poultices and liniments

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations (national and state/territory) for client assessment:
 - codes of conduct
 - duty of care

- informed consent
 - mandatory reporting
 - practitioner/client boundaries
 - privacy, confidentiality and disclosure
 - records management
 - working role boundaries:
 - working within scope of practice
 - presenting symptoms that require referral to a medical practitioner
 - work health and safety
- oriental therapies treatment techniques, how to apply them, what each technique does, what effects it might have, and what the contraindications are, for the following:
 - acupressure
 - moxibustion
 - cupping
 - meridian stretching techniques
 - corrective postures, stretches, movements
- potential reactions during treatment and how to respond:
 - discomfort
 - emotional reactions
 - feedback - verbal, tactile, visual
 - muscular spasms
 - body temperature discomfort
 - deep relaxation
- potential reactions following treatment and appropriate client advice
- types of advice and resources that can be provided to clients for their use outside the clinical environment:
 - advice about nutritional actions based on 8 principal patterns and 6 pathogenic influences
 - medicinal teas and meals
 - seasonal adjustments
 - poultices and liniments
- documentation requirements for recording treatment details
- basic structure and function of western medicine systems and regions of the body
- common disease states and functional problems of each body system

- fundamental principles of biomechanics

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated clinical environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - client information, case history, treatment plan
 - futon
 - linen
- modelling of industry operating conditions, including provision of services to the general public
- clinic supervision by a person who meets the assessor requirements outlined below for at least 120 of the 200 hours of client consultation work

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must:

- have at least 3 years current clinical experience working as a Shiatsu therapist providing services to the general public
- hold practising membership of an Australian professional body that represents Shiatsu therapists
- fulfil the continuing professional development requirements of the professional body to which they belong

HLTSHU008 Adapt Shiatsu and oriental therapies practice to meet specific needs

Modification History

N/A

Application

This unit describes the skills and knowledge required to adapt assessment and treatment strategies to meet the needs of clients of different genders and at different stages of life. It also includes the requirement to be able to identify and respond to other specific needs with which the practitioner may be unfamiliar.

This unit applies to Shiatsu therapists.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Adapt assessment and treatment strategies to stages of life	1.1 Anticipate and take account of varying potential client sensitivities to ensure client dignity is maintained 1.2 Tailor approaches that take account of different cognitive abilities of clients at different stages of life

	1.3 Adjust physical processes to take account client capabilities and physical body features 1.4 Recognise norms and deviations associated with age and gender 1.5 Identify when consent from others is required, and obtain and document according to legal and ethical requirements
2. Respond to unfamiliar presentations	2.1 Recognise situations where presenting cases or aspects of presenting cases fall outside current knowledge base or expertise 2.2 Refer client to other practitioners when case is not appropriate to own scope of practice 2.3 When appropriate to continue with the case, identify, access and interpret sources of additional information and advice 2.4 Enhance own capacity to deal with the case by conducting case specific research 2.5 Integrate findings into client treatment plans and record details
3. Extend and expand own knowledge base	3.1 Pro-actively identify and respond to professional development opportunities 3.2 Develop and adjust work practices as part of ongoing practice development

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 200 hours of Shiatsu and oriental therapies client consultation work
- managed at least 60 Shiatsu/oriental therapies assessment and treatment sessions - clients must include males and females from different stages of life with varied presentations
- effectively adapted communication, assessment and treatment strategies to meet client needs
- conducted case specific research for at least 3 cases, where key aspects of the condition are not known to the candidate

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations (national and state/territory) for working with specific groups:
 - children in the workplace
 - codes of conduct
 - discrimination:
 - age
 - disability
 - racial
 - sex
 - duty of care
 - informed consent
 - mandatory reporting
 - practitioner/client boundaries

- privacy, confidentiality and disclosure
- records management
- work role boundaries:
 - working within scope of practice
 - presenting symptoms that require referral to a medical practitioner
- work health and safety
- treatment management factors that must be considered for clients of different genders and at different stages of life:
 - case taking
 - variations in approach to physical examination and treatment
 - home recommendations
- major developmental milestones for different stages of life
- features of common health conditions that affect the following groups and how those conditions are assessed and treated in the Shiatsu/oriental therapies framework:
 - children
 - adolescents
 - adult females at different stages of life
 - adult males at different stages of life
- factors for consideration when providing any form of end of life/palliative care
- professional responsibilities when presenting cases fall outside of practitioner's current scope, including:
 - when referral is appropriate or required
 - information and advice sources
 - case research techniques

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated clinical environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - client information, case history, treatment plan
 - futon
 - linen
- modelling of industry operating conditions, including provision of services to the general public

- clinic supervision by a person who meets the assessor requirements outlined below for at least 120 of the 200 hours of client consultation work

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must:

- have at least 3 years current clinical experience working as a Shiatsu therapist providing services to the general public
- hold practising membership of an Australian professional body that represents Shiatsu therapists
- fulfil the continuing professional development requirements of the professional body to which they belong

HLTSHU009 Monitor and evaluate traditional oriental medicine treatments

Modification History

N/A

Application

This unit describes the skills and knowledge required to monitor and evaluate treatments provided within the traditional oriental medicine framework, both from an individual client and whole of practice professional development perspective.

This unit applies to practitioners using Shiatsu and other oriental therapies.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Evaluate client progress	1.1 Seek client feedback about treatment impacts and compliance with the treatment plan 1.2 Make own observations and assessment of client changes based on oriental medicine framework

	1.3 Evaluate treatment impacts in relation to client's physical, qi and emotional wellbeing 1.4 Compare changes and improvements with expectations in the treatment plan, existing research and evidence from own practice 1.5 Seek additional information from clients when progress suggests this is needed 1.6 Accurately document progress in client treatment plan
2. Adjust treatment based on evaluation	2.1 Determine the need for adjustment to treatment plan based on evaluation of client progress 2.2 Identify and respond to factors that may be inhibiting client progress 2.3 Adjust treatment plans based on outcomes and sources of research or evidence that support massage practice 2.4 Accurately document any adjustments to treatment plans
3. Develop practice from client evaluation	3.1 Review progress of clients in context of own individual practice 3.2 Identify areas of own practice for further research or development to support client outcomes 3.3 Pro-actively seek and respond to professional development opportunities

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 200 hours of Shiatsu/oriental therapy client consultation work
- managed at least 60 Shiatsu/oriental therapies assessments and treatment sessions - clients must include males and females from different stages of life with varied presentations
- monitored and evaluated Shiatsu and oriental therapies treatments provided to at least 5 different clients with at least 3 treatments per client

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations (national and state/territory) for monitoring and evaluation:
 - children in the workplace
 - codes of conduct
 - duty of care
 - informed consent
 - mandatory reporting
 - practitioner / client boundaries
 - privacy, confidentiality and disclosure
 - records management
 - work role boundaries
 - working within scope of practice
 - presenting symptoms that require referral to a medical practitioner
 - work health and safety

- types of criteria by which Shiatsu and oriental therapies treatments are evaluated
- methods of monitoring treatment progress
 - re-assessment
 - client feedback
- barriers to therapeutic progress and ways to respond within a Shiatsu/oriental therapies framework
- expectations of treatment for different conditions and client groups, and factors that impact on those expectations:
 - client history
 - contraindications
 - compliance
 - interactions with other treatments
 - impact of external environment
 - evaluation of appropriateness of style and technique
 - client general health
 - presenting condition
- sources of research and evidence that support traditional oriental medicine practice
- the role of maintaining personal health and awareness

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated clinical environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - client information, case history, treatment plan

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes of a unit of competency</i>	<i>The Performance Criteria specify the level of performance required to demonstrate achievement of the Element</i>
1. Receive and sort contaminated items	1.1 Follow procedures for collection and transport of items to the cleaning area as required 1.2 Sort reusable items and safely dispose of single use reusable medical devices

	1.3 Check for completeness of set and for multi-part items 1.4 Identify and separate items requiring segregation or specialised processing 1.5 Identify and respond to priority processing requirements 1.6 Report faulty and damaged items to designated person
2. Prepare contaminated items for cleaning and disinfection	2.1 Complete initial pre-cleaning and waste removal processes 2.2 Prepare specialised items for specific cleaning procedures 2.3 Select cleaning processes and equipment based on manufacturer's recommendations and evaluation of item construction and composition 2.4 Disassemble instruments for cleaning and disinfection according to manufacturer's guidelines
3. Complete cleaning and thermal disinfection processes	3.1 Organise workflow using dirty to clean principle 3.2 Interpret operating instructions for cleaning and drying equipment, and test and prepare for use as per organisation procedures 3.3 Complete water quality tests as required 3.4 Select, use and correctly measure chemical products according to safety data sheets 3.5 Complete required manual cleaning with hot water rinsing and drying 3.6 Use soaking, flushing and brushing techniques as required for reusable medical devices with particular structures 3.7 Operate cleaning appliances using safe manual handling techniques 3.8 Select washer disinfectant cycle based on required parameters for specific reusable medical devices 3.9 Minimise waste during the cleaning and disinfection process 3.10 Identify faulty or damaged equipment, and report to designated person

4. Check quality of cleaning and thermal disinfection	4.1 Inspect cleanliness and dryness according to standards and procedures 4.2 Monitor and document processes, check processes and respond to routine problems 4.3 Complete and archive quality management documentation according to organisation procedures 4.4 Identify faults or shortcomings in the cleaning and disinfection process and take action within scope of own work role

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTSTE001 Clean and disinfect reusable medical devices

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed established procedures, work processes and national standards for the sorting, disassembly, cleaning and thermal disinfection of reusable medical devices on at least 3 occasions:
 - identified and responded to routine process and maintenance problems and variations
 - addressed relevant work health and safety, infection control and manual task requirements

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- existence and basic requirements of AS/NZS 4187, and its role in the sterilisation workplace
- reusable medical devices (RMD) product families and associated cleaning requirements, including detergents and brushes
- types and features of cleaning and drying equipment, and their monitoring and maintenance requirements
- steps in the cleaning and disinfection work flow process and the reasons for design of work area
- water quality testing processes
- testing processes for cleaning equipment
- key aspects of thermal disinfection, including:
 - terminology
 - conditions and parameters for thermal disinfection
 - lethality of a moist heat process for a range of temperatures
- quality indicators for cleaning and disinfection processes

- safe work practices in the cleaning area:
 - manual task risk factors and how to control for them
 - infection control and Spaulding's classification
 - personal protective equipment (PPE)

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - reusable medical devices requiring cleaning
 - operational cleaning and drying equipment
 - cleaning procedures to be followed by the candidate
 - equipment operation manuals
 - personal protective equipment
 - quality assurance documentation
- modelling of industry operating conditions, including:
 - speed and timing requirements for the cleaning process
 - presence of situations requiring problem solving

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance required to demonstrate achievement of the element</i>
1. Prepare for inspection and packing	1.1 Select and wear appropriate attire and ensure personal hygiene preparations are followed 1.2 Clean area prior to processing according to infection control guidelines 1.3 Test packing equipment in readiness for use and accurately document results

2. Inspect reusable medical devices	2.1 Sort items according to priority, specialties and packaging requirements and product families 2.2 Inspect items for cleanliness and dryness and reprocess where required 2.3 Inspect items for functionality and completeness according to organisation requirements 2.4 Follow safe procedures for insulation testing as required 2.5 Use illuminated magnifier appropriately 2.6 Identify loan items and implantable items 2.7 Identify, report, remove and/or replace damaged/faulty items and items due for preventative maintenance 2.8 Report missing items according to organisation policies and protocols
3. Prepare and assemble reusable medical devices	3.1 Select, inspect and prepare instrument trays or rigid sterilisation containers against checklists 3.2 Open and unlock items with hinges/ratchets 3.3 Disassemble/loosen multi-part instruments and re-assemble to ensure sterilant contact on all surfaces according to manufacturer's instructions 3.4 Lubricate according to manufacturer instructions 3.5 Prepare hollow ware items with all openings facing the same direction 3.6 Protect delicate and sharp items in accordance with organisation policies and procedures 3.7 Use chemical indicators according to standards
4. Package reusable medical devices	4.1 Select packaging systems with reference to sterilisation method 4.2 Use safe manual handling techniques 4.3 Interpret operating instructions for packaging equipment and use equipment safely 4.4 Pack, secure and label sterile barrier systems to comply with aseptic removal principles

	4.5 Assemble and package thermally disinfected reusable medical devices for transfer to appropriate location 4.6 Complete accurate quality assurance documentation

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed established procedures, work processes and national standards for the inspection, assembly, packaging and labelling of reusable medical devices on at least 3 occasions
- operated and monitored equipment on at least 3 occasions, including illuminated magnifier
- completed accurate quality assurance documentation
- addressed relevant work health and safety, infection control and manual handling requirements
- identified and responded to routine process and maintenance problems and variations

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- packaging in relation to client safety, and implications of negligence
- existence and basic requirements of AS/NZS 4187, and its role in packaging
- features of inspection and test equipment and processes, including:
 - air guns
 - lighted magnification
 - heat sealer
 - height adjustable work stations
 - insulation testing
 - labelling systems
 - instrument checklists
- wrapping and packaging materials and techniques:

- relationship of sterile barrier systems and wrapping material to sterilisation method used
 - sealing materials
 - single use and reusable sterile barrier systems
 - rigid reusable container systems
- classes of chemical indicators
- identification and traceability systems
- performance qualification for packaging
- features of quality assurance documentation
- safe work practices in the sterilisation work area:
 - manual task risk factors and how to control for them
 - infection control
 - personal hygiene

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - wrapping and packaging materials
 - heat sealing equipment
 - sterile barriers systems
 - reusable medical devices:
 - personal hygiene hair ware
 - quality assurance documentation
 - procedures to be followed by the candidate
- modelling of industry operating conditions, including:
 - speed and timing requirements for the checking and packaging process
 - presence of situations requiring problem solving

HLTSTE003 Sterilise loads

Modification History

N/A

Application

This unit of competency describes the skills and knowledge required to follow correct procedures to select and operate sterilisation equipment, interpret steriliser function and parameters in the provision of sterilised reusable medical devices, appropriately load items for sterilisation, and to release sterilised items for distribution. This competency unit does not deal with ethylene oxide sterilisation.

This unit applies to individuals working under general supervision and within established procedures in a range of health service organisations, including hospitals and specialist sterilisation facilities.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance required to demonstrate achievement of the element</i>
1. Prepare sterilisation equipment	1.1 Clean and check steriliser, and accessory equipment according to manufacturer's recommendations

	1.2 Conduct, interpret and record performance test cycles 1.3 Interpret and accurately document results from physical and chemical tests
2. Load steriliser	2.1 Select sterilisation method according to reusable medical devices (RMD) manufacturer requirements 2.2 Assign appropriate cycle and batch control number and complete documentation correctly 2.3 Check packaging, sealing and labelling for compatibility with organisation policies and procedures 2.4 Check load content and configuration for compliance with annual steriliser performance qualification 2.5 Load steriliser to ensure sterilant contact and according to manufacturer's recommendations 2.6 Add additional test items such as biological indicator or process challenge device according to organisation protocol
3. Operate steriliser	3.1 Check steriliser function for sterilant availability 3.2 Check function of physical process recording accessories 3.3 Select appropriate cycle in accordance with organisation policies and procedures 3.4 Identify, report and action faults according to manufacturer's recommendations and organisation policies and procedures
4. Unload and release sterilised loads	4.1 Check and interpret sterilisation cycle parameters and chemical monitors, and record results on completion of cycle 4.2 Remove sterilised load immediately on completion of cycle 4.3 Remove compromised items, dismantle for reprocessing and record details 4.4 Unload cooled load using appropriate handling techniques 4.5 Complete documentation of the sterilising cycle for parametric release 4.6 Complete documentation of the sterilising cycle for parametric release

	4.7 Check and document additional load release tests 4.8 If used, incubate and check results of biological indicators
5. Comply with quality management requirements	5.1 Adhere to operational monitoring and testing, performance qualification and maintenance of sterilisers and associated equipment 5.2 Comply with documentation requirements for sterilising cycles, batch control and load release control 5.3 Report and document all steriliser faults/malfunction and load non-conformance/non-compliance 5.4 Store and archive documentation in accordance with organisation policies and procedures

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTSTE003 Sterilise loads

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed established procedures, work processes and national standards to prepare, operate, load and unload sterilisers and release the sterilised loads on at least three occasions, including:
 - correctly interpreting test results
 - accurately completing all documentation for cycles, tests and load content, including specialised items
 - addressing relevant work health and safety, infection control and manual handling requirements
 - identifying and responding to routine problems within delegated authority

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- terminology used in sterilising and methods of sterilisation used in Australia
- environmental conditions required for efficient functioning of a sterilisation area, including:
 - quarantine protocols
 - conditions and parameters for successful sterilisation
- cleaning protocols and special requirements for sterilisers, trolleys and carriages
- features of sterilisation process that influence sterilisation outcomes, including:
 - cycle stages and physical parameters that determine sterilisation outcomes
 - differences between methods of low temperature sterilisation processes including hydrogen peroxide and peracetic acid
 - the biocidal action of chemical sterilants and impact on sterilisation outcomes
 - monitoring equipment and procedures
- features of steam sterilisation that influence sterilisation outcomes, including:

- cycle stages and physical parameters that influence sterilisation outcomes
- principles of steam generation and steam quality that impact on sterilisation outcomes
- significant mechanical components of steam sterilisers
- the biocidal action of steam under pressure and the impact on sterilisation outcomes
- monitoring equipment and procedures
- performance testing:
 - air removal test
 - process challenge device
 - leak rate test
 - physical, chemical and biological monitoring devices
- requirements of quality assurance documentation, including release processes
- safe work practices in the sterilisation work area:
 - manual task risk factors and how to control for them
 - infection control
 - personal hygiene

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - steam sterilisers
 - reusable medical devices
 - personal protective equipment
 - quality assurance print outs and documentation
 - workplace procedures to be followed
- modelling of industry operating conditions, including:
 - speed and timing requirements for the sterilisation process
 - presence of situations requiring problem solving

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Link

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTSTE004 Manage sterile stock

Modification History

N/A

Application

This unit of competency describes the skills and knowledge required to apply procedures for handling, storing and maintaining sterile stock.

This unit applies to individuals working under general supervision and within established procedures in a range of health service organisations.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance required to demonstrate achievement of the element</i>
1. Store sterile stock	1.1 Select and wear attire, ensuring personal hygiene preparations are in accordance with organisation policies and procedures 1.2 Decant sterile stock supplied in external containers/packaging prior to transfer into the sterile stock area

	1.3 Identify and clean the dedicated area for storing sterile stock, following required documentation processes 1.4 Restrict access and minimise traffic in the sterile stock area
2. Maintain packaging integrity	2.1 Minimise handling of sterile stock 2.2 Inspect items for packaging integrity, labelling and batch control 2.3 Follow organisation procedures for non-conforming stock 2.4 Complete protective packaging as required
3. Maintain stock levels	3.1 Comply with sterile stock rotation practices 3.2 Identify, remove and re-process or discard stock not complying with inventory control guidelines 3.3 Assess and calculate stock and imprest levels 3.4 Correctly interpret order requirements 3.5 Prepare, fill and distribute orders to relevant destination using required documentation 3.6 Document and report supply discrepancies according to procedures
4. Transport sterile stock	4.1 Clean and maintain trolleys and containers using appropriate cleaning procedures 4.2 Load and handle transport equipment safely 4.3 Follow designated route and timetable for transporting sterile stock 4.4 Package any high-level disinfected or off-site delivery items in secure sealable easy to clean containers
5. Complete quality management requirements	5.1 Follow batch control identification procedures 5.2 Accurately complete sterile stock ordering documentation 5.3 Assist with recall procedures according to instructions

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTSTE004 Manage sterile stock

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed established procedures, work processes and national standards for sterile stock management on at least 3 occasions, including:
 - maintaining environmental conditions
 - maintaining stock at required levels
 - handling stock that maintains sterile condition
 - responding to non-conformance
- accurately completed documentation using manual or computerised systems
- addressed relevant work health and safety, infection control and manual handling requirements

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- storage and stock management principles for sterile stock:
 - types of storage requirements
 - time-related shelf life
 - event-related shelf life
 - factors that affect shelf-life of sterile stock
 - procedures to restrict access
 - quality assurance documentation
- recall procedures
- features of a transport system required to maintain sterility of packaged items
- safe work practices in the sterilisation work area:
 - manual task risk factors and how to control for them
 - infection control

- personal hygiene
- personal protective equipment (PPE)

Assessment Conditions

Skills must have been demonstrated in a sterile storage area within the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources:
 - a designated sterile area
 - sterile stock items
 - stock management and ordering systems
 - transport equipment
 - quality assurance documentation
 - workplace procedures to be followed
- modelling of industry operating conditions, including presence of situations requiring problem solving

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes of a unit of competency</i>	<i>The Performance Criteria specify the level of performance required to demonstrate achievement of the Element</i>
1. Prepare and handle reusable medical devices during reprocessing	1.1 Identify and sort reusable medical devices according to reprocessing requirements 1.2 Identify faulty reusable medical devices and report in line with relevant requirements, policies and procedures

	1.3 Disassemble according to manufacturer's guidelines 1.4 Complete initial cleaning and waste removal processes 1.5 Select preparation and cleaning processes suited to the design and composition of instruments
2. Inspect cleaned reusable medical devices	2.1 Inspect instruments during and after processing in line with requirements of specific item 2.2 Inspect instruments with textured surfaces for retained debris under lighted magnification 2.3 Inspect instruments for completeness and working function 2.4 Follow safe work practices to conduct insulation testing as required 2.5 Identify faults and address in line with scope of own work role

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTSTE005 Care for reusable medical devices

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed established procedures, work processes and national standards for the preparing, cleaning and inspecting of reusable medical devices on at least 3 occasions, including:
 - disassembly and re-assembly of multi-part reusable medical devices
 - inspection of reprocessed reusable medical devices, including:
 - scissors
 - box joints and screw joints
 - instruments with long shafts
- prepared, cleaned and inspected a range of reusable medical devices, including:
 - solid items
 - those requiring disassembly
 - those with textured surfaces
 - delicate items
 - manual and powered items
 - cannulated items
 - blind ended instruments
- identified and responded to routine process and maintenance problems and variations
- addressed relevant work health and safety, infection control and manual handling requirements

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- duty of care and impact of instrument care on operative procedures and patient-care outcomes

- existence and basic requirements of AS/NZS 4187, and its role in surgical instrument care
- role of Therapeutic Goods Administration (TGA) for manufacturing registration
- product families both basic categories and instruments for specialties
- use of reusable medical devices in different operative procedures
- cleaning, testing and inspection requirements for reusable medical devices:
 - systems for identifying instruments
 - instrument design and composition and their relationship to reprocessing requirements
 - suitable detergents for different items
 - soaking to remove dyes and adhesives
 - leak testing and requirements for the processing of flexible endoscopes
 - lubrication requirements
 - importance of maintaining passivation layer
 - items requiring insulation testing and impact of insulation testing on client care
- instrument repair requirements and process

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - soiled reusable medical devices
 - operational cleaning and drying equipment
 - cleaning procedures to be followed by the candidate
 - personal protective equipment
- modelling of industry operating conditions, including:
 - speed and timing requirements for the cleaning process
 - presence of situations requiring problem solving

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes of a unit of competency</i>	<i>The Performance Criteria specify the level of performance required to demonstrate achievement of the Element</i>
1. Prepare for chemical disinfection process	1.1 Determine disinfection requirements based on Spaulding's classification 1.2 Complete initial cleaning and waste removal processes

	1.3 Prepare specialised items for specific cleaning processes 1.4 Select cleaning processes according to manufacturer's recommendations 1.5 Disassemble items for cleaning and disinfection according to manufacturer's guidelines
2. Complete chemical disinfection processes	2.1 Test and configure automated chemical disinfection machines according to procedures and manufacturer's recommendations 2.2 Correctly interpret safety data sheets (SDS) 2.3 Select and use instrument grade chemical disinfectants and liquid chemical sterilants according to SDS 2.4 Make accurate measurements and calculations in chemical use 2.5 Follow correct methods of use in accordance with manufacturer's guidelines 2.6 Operate machines according to manufacturer's guidelines and standards 2.7 Minimise waste during the disinfection process 2.8 Monitor hazards during disinfection processes 2.9 Check and complete process records
3. Check quality of chemical disinfection processes	3.1 Complete monitoring and control according to standards and manufacturing guidelines 3.2 Use chemical test strip indicators as per manufacturer's instructions 3.3 Complete quality management documentation 3.4 Identify faults in the disinfection process and take action within scope of own work role

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTSTE006 Chemically disinfect reusable medical devices

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed established procedures, work processes and national standards for the chemical disinfection of reusable medical devices on at least 3 occasions
- operated and monitored chemical disinfection equipment, including selection of appropriate disinfectants for different reusable medical devices
- identified and respond to routine process and maintenance problems and variations
- addressed relevant work health and safety, infection control and risk management requirements
- completed accurate documentation of tests, cycles and proof of process for manual or automated processes

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- role of chemical disinfection in client safety, and the implications of negligence
- existence and basic requirements of AS/NZS 4187 for chemical disinfection
- key aspects of Gastroenterological Nurses College of Australia (GENCA) Guidelines
- fundamental knowledge of microbiology in relation to disinfection
- key aspects of chemical disinfection, including:
 - terminology
 - reusable medical devices requiring disinfection
 - Spaulding's classification
 - conditions and parameters for successful chemical disinfection
 - range and selection of effective chemical disinfectants based on chemical application, type of reusable medical device and manufacturer's instructions

- Therapeutic Goods Administration (TGA) requirements for compliance, validation of disinfectant classification (registered or listed), efficacy and disinfectant labelling
 - specific monitoring equipment and procedures
 - documentation
- quality indicators for chemical disinfection
- safe work practices:
 - fume extraction devices
 - leak testing
 - infection control principles
 - microbiological testing
 - personal protective equipment (PPE)
 - protection of reusable medical devices from recontamination
 - manual task risk factors and how to control for them
 - infection control

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources:
 - chemical disinfection equipment and accessories
 - monitoring and reporting equipment
 - reusable medical devices requiring chemical disinfection
- modelling of industry operating conditions, including:
 - speed and timing requirements for the cleaning process
 - presence of situations requiring problem solving

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance required to demonstrate achievement of the element</i>
1. Plan for monitoring and maintenance	1.1 Contribute to determination of scope and nature of monitoring and maintenance requirements 1.2 Address needs for preventative maintenance as part of the planning process

	1.3 Prepare work schedules according to operational requirements and manufacturer's guidelines
2. Monitor and maintain equipment performance	2.1 Complete planned and random checks of equipment performance 2.2 Evaluate numerical and technical data to validate equipment performance and identify issues 2.3 Troubleshoot discrepancies in accordance with manufacturer's guidelines 2.4 Report issues beyond scope of responsibility without delay and according to organisation procedures 2.5 Liaise with maintenance personnel as required 2.6 Assist with implementation of contingency plans and review of critical incidents according to job role
3. Maintain records and reports	3.1 Ensure that monitoring, maintenance and repair records are complete, correct and within the work area 3.2 Evaluate and act upon non-compliant records and reports 3.3 Assist with management of recall processes 3.4 Maintain and upgrade equipment information according to current requirements
4. Review performance	4.1 Evaluate equipment performance and determine the need for changes to related work processes 4.2 Seek feedback from colleagues and end users 4.3 Assess the need for new equipment based on monitoring and provide input to purchase and commissioning 4.4 Provide input to management processes based on reviews undertaken

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- assisted with the development, implementation and evaluation of monitoring and maintenance plans for at least 2 types of cleaning equipment including at least 1 type of steriliser

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- features, functions and tracking and monitoring systems of different reprocessing equipment:
 - ultrasonic washers
 - washer-disinfectors
 - automated lubrication devices
 - leak testers
 - dryers
 - insulation testers
 - steam sterilisers
 - heat sealers
 - low temperature sterilisers
- administration and record keeping requirements:
 - testing and monitoring
 - validation requirements
 - maintenance and repair
 - recall systems
 - reporting as per AS/NZS 4187

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - cleaning and sterilisation equipment
 - test data for analysis
 - documentation for completion
 - equipment manuals and maintenance and repair records
- modelling of industry operating conditions, including presence of situations requiring problem solving

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- contributed to the development and use of monitoring programs according to national standards for at least 2 types of cleaning processes
- contributed to the development and use of monitoring programs according to national standards for both a packaging process and a sterilisation process, including:
 - documented risk analysis
 - process verification systems
 - record keeping systems
 - work instructions for monitoring processes
- evaluated incidences of non-compliance and contributed to appropriate responses

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- testing systems requirements for cleaning, packaging, sterilisation and storage according to relevant standards
- administration and record keeping requirements for testing, monitoring and maintenance
- types of process problems that occur, reasons for these occurring and ways to resolve them
- risk control solutions and how these are implemented
- scope of job role and delegation and escalation within scope of job role

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:

- test manufacturer's recommendations
- work instructions
- maintenance records
- AS/NZS 4187 standards

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors

HLTTCM001 Develop Traditional Chinese Medicine (TCM) remedial massage practice

Modification History

N/A

Application

This unit describes the skills and knowledge required to establish the foundations of Traditional Chinese Medicine (TCM) remedial massage practice, evaluate what makes a sustainable practice and then to develop an approach to own practice. It also includes the ability to communicate key information about TCM to others.

This unit applies to TCM remedial massage therapists.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element</i>
1. Establish foundations of TCM massage practice	1.1 Identify, access and interpret information on central philosophies of TCM remedial massage 1.2 Evaluate the TCM remedial massage system of treatment and its application to current health issues

	1.3 Compare and contrast TCM, other complementary health modalities and broader health practice
2. Represent the TCM framework	2.1 Determine information needs of different individuals and groups 2.2 Identify key messages that represent the philosophy and practice of TCM remedial massage 2.3 Communicate information about TCM remedial massage at level of depth appropriate to audience needs
3. Determine requirements for sustainable TCM massage practice	3.1 Identify key issues that affect the development and sustainability of professional practice 3.2 Identify economic, environmental, human and social considerations, and their impact on professional practice 3.3 Access, interpret and collate current information that supports professional practice
4. Develop approach to own practice	4.1 Reflect on professional goals and aspirations 4.2 Identify and assess professional opportunities in TCM remedial massage practice 4.3 Reflect on opportunities and constraints of individual personal circumstances 4.4 Make decisions about practice direction, based on reflection and research 4.5 Develop practical strategies that address own practice goals

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- used critical thinking skills to:
 - reviewed and reflected on information from a range of sources about TCM remedial massage practice
 - evaluated and articulated requirements for sustainable TCM remedial massage practice
- communicated key messages about TCM remedial massage to meet the information needs of at least three different individuals or groups
- developed goals for own practice that reflect the values and philosophies of TCM

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- philosophies and principles of TCM:
 - historical development
 - central philosophies
 - meridians and meridian therapy
 - yin and yang
 - five elements
 - Qi, blood, body fluid and body essence
 - five zang and six fu organs system
 - aetiology - six pathogenic factors and seven emotions
 - mechanism of TCM diseases
 - importance of personal health strategy
 - philosophical tradition of western and eastern body therapies
 - rationalistic, analytical approach to an understanding of disease

- vitalistic, empirical approach to health
 - nature of the dynamic interchange between the physical, mental, social, environmental and spiritual landscape
- TCM remedial massage system of treatment and effects of application to the body surface
- different styles of treatments and their key features and purpose
 - relaxation
 - tonification
- key features of complementary therapies used in conjunction with TCM massage, including:
 - gua sha
 - cupping
 - acupuncture
 - moxibustion
- place of TCM in relation to allied health services
- professional networks and industry bodies
- different models of professional practice and their key features:
 - sole practitioners
 - employment opportunities
- components of sustainable practice:
 - economic – opportunities and viability
 - environmental
 - human – personal health, professional development
 - social responsibility
- legal and ethical considerations (national and state/territory) and how these are applied in individual practice:
 - children in the workplace
 - codes of conduct
 - continuing professional education
 - discrimination
 - dignity of risk
 - duty of care
 - human rights
 - informed consent
 - insurance requirements

- mandatory reporting
- practitioner/client boundaries
- privacy, confidentiality and disclosure
- records management
- work role boundaries – responsibilities and limitations
- work health and safety

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Link

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTTCM002 Perform Traditional Chinese Medicine (TCM) remedial massage health assessments

Modification History

N/A

Application

This unit describes the skills and knowledge required to obtain information from clients about their needs, apply the four methods of Traditional Chinese Medicine (TCM) assessment and then bring information together to make a syndrome differentiation and treatment plan for remedial massage needs.

This unit applies to TCM remedial massage therapists.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element</i>
1. Determine scope of client needs	1.1 Explore and clarify client expectations 1.2 Provide clear information about scope and limits of services to be provided

	1.3 Collect accurate and relevant health record and document in a TCM form, which can be interpreted readily by other professionals 1.4 Recognise needs that are beyond scope of own practice and make referrals to other health care professionals as required 1.5 Identify and respond to any barriers to information gathering and assessment 1.6 Seek client information respectfully and sensitively 1.7 Manage information in a confidential and secure way
2. Perform TCM four diagnostic methods	2.1 Provide information about TCM four diagnostic methods process and obtain client consent to proceed 2.2 Follow clinical and practitioner hygiene procedures 2.3 Respect client dignity and anticipate sensitivities 2.4 Seek client feedback on comfort levels 2.5 Assess client through observation, auscultation/olfaction, interrogation and palpation methods 2.6 Integrate four diagnostic methods information gathering techniques 2.7 Use ongoing questioning with client to gain further information as required 2.8 Accurately document information from the physical assessment
3. Develop treatment plan	3.1 Correlate results of TCM four diagnostic methods with case history 3.2 Consider any available western medical information and incorporate into analysis within scope of own practice 3.3 Bring together TCM and western approaches to pathology 3.4 Make TCM syndrome differentiation according to eight principles, internal organs, Qi, blood and body fluid, and to the other syndrome differentiation methods 3.5 Analyse TCM syndrome and identify condition according to stage and related implications by assessing signs and symptoms

	3.6 Identify pre-requisites or contraindications to treatment 3.7 Use professional judgement to draw substantiated conclusions about treatment needs 3.8 Establish expected treatment outcomes based on the remedial massage framework and evidence 3.9 Accurately document proposed treatment plan
4. Confirm TCM syndrome differentiation and treatment plan with client	4.1 Discuss TCM syndrome differentiation and rationale with the client 4.2 Assign and agree treatment priorities in consultation with the client 4.3 Schedule times and session lengths suited to the required techniques and sequences 4.4 Respond to client enquiries using language the client understands 4.5 Discuss referral and collaborative options with the client according to individual needs

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTTTCM002 Perform Traditional Chinese Medicine (TCM) remedial massage health assessments

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 200 hours of TCM remedial massage client consultation work
- prepared for and managed at least 100 TCM remedial massage assessments - clients must include males and females from different stages of life with varied presentations
- used the TCM remedial massage framework to assess client therapeutic needs:
 - used observation, auscultation/olfaction, interrogation and palpation diagnostic methods to collect useful information
 - used different TCM syndrome differentiation knowledge to gather and analyse client conditions
- interacted effectively with clients:
 - clearly articulated information about services, treatment options and rationale
 - engaged clients in decision making

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations (national and state/territory) for client assessment:
 - codes of conduct
 - duty of care
 - informed consent
 - mandatory reporting
 - practitioner/client boundaries
 - privacy, confidentiality and disclosure
 - records management
 - working role boundaries

- working within scope of practice
 - presenting symptoms that require referral to a medical practitioner
- work health and safety
- referral options for practitioners:
 - professional health services including complementary health modalities
 - community resources and support services
 - types and availability of further medical testing
- factors and barriers that may impact on assessment, including:
 - physical
 - psychological
 - cultural
- factors that affect individual health status, including:
 - constitution
 - lifestyle
 - diet
 - personal and medical history
 - values and attitudes
 - balance of rest and activity
 - physical environment
 - social environment
- factors for consideration for different genders and ages:
 - women
 - men
 - children and adolescents
 - older people
- client information required for assessment and the scope and depth of information needed regarding:
 - client objectives and expectations
 - client history and its components
 - client current state of health
 - main clinical complaints
 - signs and symptoms
 - onset
 - duration

- location
 - quality and severity
 - non-verbal
- different ways that signs and symptoms of conditions present:
 - physical
 - psychological
 - social
 - spiritual
- features of signs and symptoms
- philosophy and principles of TCM remedial massage framework, including examination of entirety, combination of disease diagnosis and syndrome differentiation, together using of all diagnostic methods
- TCM four diagnostic methods:
 - observation: spirit, complexion, body shape, deformity, posture and tongue and coating
 - interrogation: chief complaint(s), history of present illness, emotional symptoms, pain, energy level, diet and appetite, stools and urine, female specific presentations
 - auscultation/olfaction: voice, breathing, sighing, cough, hiccup and belching, body smelling
 - palpation: pulse taking, chest, abdomen and four limbs palpation, channels and acu-points palpation
- TCM syndrome differentiation:
 - TCM syndrome identification according to eight principles
 - TCM syndrome identification according to internal organs
 - TCM syndrome identification according to Qi, blood and body fluid
 - TCM syndrome identification according to the others differentiation methods
- possible reactions, contraindications to treatment and/or limitations for assessment:
 - common contra-indications of TCM remedial massage - agnogenic spin injury, fracture, severe internal organ diseases, infection diseases, severe skin diseases
 - limitations of TCM remedial massage - lack of the structures, including lack of anatomic structure, pathology change at certain areas, weakness in specificity, lack of prognosis
- disease processes and affecting factors for a range of common diseases:
 - body constitution
 - diet

- exercise
 - emotion
 - lifestyle
 - treatment methods
- basic physiology and anatomy according to TCM framework
- relational dynamics within and between human behaviour, anatomy and physiology, pathology and the natural world
- aetiology and pathology
- disease causation, acute and chronic inflammatory processes, wound healing and haemorrhage processes
- infectious and immunity process
- character and function of channels and points
- influence of rest and activity on health status
- relationship between physical and social environment and health
- treatment planning techniques and considerations

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated clinical environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - health assessment/client consultation forms
 - private consultation area
 - massage table
 - massage towels
- modelling of industry operating conditions, including provision of services to the general public
- clinic supervision by a person who meets the assessor requirements outlined below for at least 120 of the 200 hours of client consultation work

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must:

- have at least 3 years current clinical experience working as a TCM remedial massage therapist providing services to the general public
- hold practising membership of an Australian professional body that represents TCM remedial massage therapists

- fulfil the continuing professional development requirements of the professional body to which they belong

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element</i>
1. Prepare client for treatment	1.1 Interpret treatment plan and clearly outline how the treatment will be provided and managed 1.2 Explain factors which may interfere with the effectiveness of the treatment

	1.3 Inform the client of possible physical or emotional reactions during and following a session and the appropriate course of action to take 1.4 Follow established protocols to physically prepare the client for treatment 1.5 Confirm client consent for treatment
2. Apply therapeutic techniques	2.1 Determine treatment sequence, location and degree of pressure according to assessment indications and treatment plan 2.2 Apply TCM remedial massage techniques protocol 2.3 Use the condition and response of the client as a continual feedback to the initial assessment 2.4 Position client to optimise their comfort and support while allowing for optimum application of techniques 2.5 Maintain appropriate therapist postures that ensure a controlled distribution of body weight 2.6 Maintain client-focused attention throughout the treatment session 2.7 Recognise reactions to treatment and respond promptly
3. Provide advice and resources for the client	3.1 Educate client in relevant and practical techniques that support the treatment plan 3.2 Answer client queries with clarity, using language the client understands 3.3 Use honesty and integrity when explaining treatment plans, schedules and recommendations to the client 3.4 Promote client independence and responsibility in treatment 3.5 Discuss and agree on evaluation strategies 3.6 Accurately document treatment provided and details of client communications

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 200 hours of TCM remedial massage client consultation work
- prepared for and managed at least 100 different TCM remedial massage treatment sessions - clients must include males and females from different stages of life with varied presentations
- used all of the following essential manual techniques according to the TCM remedial massage framework:
 - press (an fa)
 - rub (mo fa)
 - push (tui fa)
 - grasp (na fa)
 - acupressure (dian xue fa)
 - pinch (nie fa)
 - roll (gun fa)
 - knead (rou fa)
 - separate (bo fa)
 - twist (cuo fa)
 - vibrate (zhen fa)
 - shake (dou fa)
 - percussion (kou fa)
 - circumduct (yao fa)
 - stretch (bashan fa)
- applied the following essential methods according to client needs:
 - cupping (ba guan)
 - skin Scraping (gua sha)

- moxibustion (ai jiu)

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations (national and state/territory) for client assessment:
 - codes of conduct
 - duty of care
 - informed consent
 - mandatory reporting
 - practitioner/client boundaries
 - privacy, confidentiality and disclosure
 - records management
 - working role boundaries
 - working within scope of practice
 - presenting symptoms that require referral to a medical practitioner
- work health and safety (WHS)
- location of acupressure points on the 12 primary meridians, ren mai and du mai
- TCM remedial massage techniques/methods and how to apply them, including what each technique does, what effects it might have and what the cautions and contraindications are, for the following:
 - press (an fa)
 - rub (mo fa)
 - push (tui fa)
 - grasp (na fa)
 - acupressure (dian xue fa)
 - pinch (nie fa)
 - roll (gun fa)
 - knead (rou fa)
 - separate (bo fa)
 - twist (cuo fa)
 - vibrate (zhen fa)
 - shake (dou fa)
 - percussion (kou fa)

- circumduct (yao fa)
 - stretch (bashan fa)
- contraindications to treatment:
 - the client who has excessive agitation, violent rage or deep sorrow conditions
 - the client who is extremely hungry
 - the client who has infectious and inflammatory diseases
 - the client who has circulatory condition which could result haemorrhaging
 - at client's bone fracture site
 - at client's skin area with eczema or tinea conditions
 - at a client's bleeding area
 - at a client's lumps and tissue change site
 - heavy manipulation/pressure to the client's abdomen and lumbosacral area during pregnancy or menstruation
 - heavy manipulation/pressure for a client who is old, young and frail
- potential reactions during treatment and how to respond:
 - syncope
 - excessive sweating
 - discomfort
 - emotional reactions
 - muscular spasms
 - body temperature discomfort
- potential reactions following treatment and appropriate client advice:
 - exacerbation of pain
 - muscle sensitivity
 - sleepiness
 - types of advice and resources that can be provided to clients for their use outside the clinical environment
 - diet
 - exercise
 - lifestyle
- documentation requirements for recording treatment details
- common disease states and functional problems of each body system
- fundamental principles of biomechanics

- major endangerment sites and therapist responsibility and limitations - areas where nerves and blood vessels lie close to the skin and are not well protected, including:
 - anterior triangle of the neck
 - posterior triangle of the neck
 - anterior throat
 - axillary area
 - twelfth rib dorsal body
 - inguinal triangle
 - umbilicus area
- essential methods:
 - cupping (ba guan)
 - skin Scraping (gua sha)
 - moxibustion (ai jiu)

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated clinical environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - client information – case history, treatment plan
 - private consultation area
 - massage table
 - massage towels
 - massage oils
 - cups
 - gua sha facilities
- modelling of industry operating conditions, including provision of services to the general public
- clinic supervision by a person who meets the assessor requirements outlined below for at least 120 of the 200 hours of client consultation work

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must:

- have at least 3 years current clinical experience working as a TCM remedial massage therapist providing services to the general public
- hold practising membership of an Australian professional body that represents TCM remedial massage therapists

- fulfil the continuing professional development requirements of the professional body to which they belong

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element</i>
1. Adapt assessment and treatment strategies to stages of life	1.1 Anticipate and take account of varying potential client sensitivities to ensure client dignity is maintained 1.2 Tailor approaches that take account of different cognitive abilities of clients at different stages of life

	1.3 Adjust physical processes to take account of client capabilities and physical body features 1.4 Recognise norms and deviations associated with age and gender 1.5 Identify when consent from others is required, and obtain and document according to legal and ethical requirements
2. Respond to unfamiliar presentations	2.1 Recognise situations where presenting cases or aspects of presenting cases fall outside current knowledge base or expertise 2.2 Refer client to other practitioners when case is not appropriate to own scope of practice 2.3 When appropriate to continue with the case, identify, access and interpret sources of additional information and advice 2.4 Enhance own capacity to deal with the case by conducting case specific research 2.5 Integrate findings into client treatment plans and record details
3. Extend and expand own knowledge base	3.1 Pro-actively identify and respond to professional development opportunities 3.2 Develop and adjust work practices as part of ongoing practice development

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 200 hours of TCM remedial massage client consultation work
- managed at least 100 TCM remedial massage assessment and treatment sessions - clients must include males and females from different stages of life with varied presentations
- effectively adapted communication, assessment and treatment strategies to meet client needs
- conducted case specific research for at least 3 cases, where key aspects of the condition are not known to the candidate

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations (national and state/territory) for working with specific groups:
 - children in the workplace
 - codes of conduct
 - discrimination:
 - age
 - disability
 - racial
 - sex
 - duty of care
 - informed consent
 - mandatory reporting

- practitioner/client boundaries
- privacy, confidentiality and disclosure
- records management
- work role boundaries:
 - working within scope of practice
 - presenting symptoms that require referral to a medical practitioner
- work health and safety
- treatment management factors that must be considered for clients of different genders and at different stages of life
 - case taking
 - variations in approach to physical examination
- major developmental milestones for different stages of life
- features of common health conditions that affect the following groups and how those conditions are assessed and treated in the TCM remedial massage framework:
 - children
 - adolescents
 - adult females at different stages of life
 - adult males at different stages of life
 - those with traumatic conditions
- factors for consideration when providing any form of palliative care
- professional responsibilities when presenting cases fall outside of practitioner's current scope, including:
 - when referral is appropriate or required
 - information and advice sources
 - case research techniques
- theory of gynaecology and obstetrics according to TCM, including:
 - birth options and settings
 - contraindications and precautions
 - cultural perspectives on birth and birthing
 - gestational disorders
 - gynaecological and obstetric TCM physiology, pathology, aetiology, diagnosis, differentiation of gynaecological conditions
 - pre and post-partum disorders
 - the development of TCM gynaecology and obstetrics

- the TCM Remedial Massage therapist as part of the neonatal health practitioner team
 - the treatment of pain, anxiety and other conditions during labour
 - therapeutic principles and methods
- theory of paediatric massage according to TCM, including:
 - contraindications and precautions
 - paediatric TCM physiology, pathology, aetiology, diagnosis, differentiation of paediatric conditions
 - the development of paediatric TCM
- theory of TCM traumatology:
 - contraindications and precautions
 - functional and clinical anatomy
 - stretches, mobilisations and remedial exercises in TCM traumatology
 - TCM pathology, aetiology, diagnosis and differentiation of traumatic disorders
 - the development of TCM traumatology
 - the use of liniments, poultices and ointments

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated clinical environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - client information – case history, treatment plan
 - private consultation area
 - massage table
 - massage towels
 - massage oils
 - cups
 - gua sha facilities
- modelling of industry operating conditions, including provision of services to the general public
- clinic supervision by a person who meets the assessor requirements outlined below for at least 120 of the 200 hours of client consultation work

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors

In addition, assessors must:

- have at least 3 years current clinical experience working as a TCM remedial massage therapist providing services to the general public
- hold practising membership of an Australian professional body that represents TCM remedial massage therapists
- fulfil the continuing professional development requirements of the professional body to which they belong

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element</i>
1. Evaluate client progress	1.1 Seek client feedback about treatment impacts and compliance with the treatment plan 1.2 Make own observations and assessment of client changes based on TCM remedial massage framework

	1.3 Evaluate treatment impacts in relation to client's physical, mental, spiritual and emotional wellbeing 1.4 Compare changes and improvements with expectations in the treatment plan, existing research and evidence from own practice 1.5 Seek additional information from clients when progress suggests this is needed 1.6 Accurately document progress in client treatment plan
2. Adjust treatment based on evaluation	2.1 Determine the need for adjustment to treatment plan based on evaluation of client progress 2.2 Identify and respond to factors that may be inhibiting client progress 2.3 Adjust treatment plans based on outcomes and sources of research or evidence that support massage practice 2.4 Accurately document any adjustments to treatment plans
3. Develop practice from client evaluation	3.1 Review progress of clients in context of own individual practice 3.2 Identify areas of own practice for further research or development to support client outcomes 3.3 Pro-actively seek and respond to professional development opportunities

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- performed the activities outlined in the performance criteria of this unit during a period of at least 200 hours of client consultation work
- managed at least 100 TCM remedial massage assessment and treatment sessions - clients must include males and females from different stages of life with varied presentations
- monitored and evaluated TCM remedial massage treatments provided to at least 5 different clients with at least 3 treatments per client

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- types of criteria by which TCM treatments are evaluated
- expectations of treatment for different conditions and client groups, and factors that impact on those expectations:
 - client history
 - contraindications
 - compliance
 - interactions with other treatments
- methods of monitoring treatment progress
 - re-assessment
 - client feedback
- barriers to therapeutic progress and ways to respond within a TCM framework
- sources of research and evidence that support TCM remedial massage practice
- principles underpinning continuation or variation of treatment

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated clinical environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - client information – case history, treatment plan
 - private consultation area
 - massage table
 - massage towels
 - massage oils
 - cups
 - gua sha facilities
- modelling of industry operating conditions, including provision of services to the general public
- clinic supervision by a person who meets the assessor requirements outlined below for at least 120 of the 200 hours of client consultation work

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors

In addition, assessors must:

- have at least 5 years current clinical experience working as a TCM remedial massage therapist providing services to the general public
- hold practising membership of an Australian professional body that represents TCM remedial massage therapists\
- fulfil the continuing professional development requirements of the professional body to which they belong

HLTTHE001 Handle and care for operating theatre equipment

Modification History

N/A

Application

This unit describes the skills and knowledge required to prepare theatre equipment, provide basic maintenance support, and contribute to effective use of equipment by providing basic instruction to others on equipment operation.

This unit applies to operating theatre technicians and other theatre staff who work under supervision in the operating theatre.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element</i>
1. Select and prepare operating theatre equipment	1.1 Identify equipment and consumables requirements, based on consultation with operating theatre team, review of operating list and surgeon preferences

	1.2 Set up, correctly position, and check equipment and consumables in accordance with standard and additional infection control procedures 1.3 Assemble, connect and test components in accordance with specific equipment requirements 1.4 Re-position equipment during theatre procedures, as required by specific procedure 1.5 Accurately document the use of theatre equipment as required 1.6 Withdraw from use and replace equipment if considered not safe for use
2. Support equipment maintenance	2.1 Identify and correct minor equipment problems within scope of own job role 2.2 Refer equipment maintenance to a specialist as required by scope and nature of problem and organisation policy and procedures 2.3 Maintain accurate maintenance log book as required 2.4 Schedule equipment for maintenance based on the needs of the operating theatre 2.5 Maintain communication with relevant operating theatre staff in relation to equipment maintenance
3. Disassemble and store operating theatre equipment	3.1 Follow shut-down procedures in accordance with manufacturer's recommendations 3.2 Assemble and disassemble equipment in accordance with manufacturer's recommendations and manual task risk principles 3.3 Dispose of waste in accordance with infection control protocols and organisation policies and procedures 3.4 Clean equipment using cleaning agent suited to the equipment and in accordance with organisation policy and procedures 3.5 Safely store equipment in accordance with manufacturer's recommendations and manual task risk principles

4. Contribute to operating theatre operations	4.1 Provide clear and correct instructions on equipment operation to individual members of the theatre team as required 4.2 Review equipment effectiveness from a theatre technician's perspective and provide feedback to relevant personnel 4.3 Participate as required in team evaluations of equipment being considered for potential purchase and share information from the theatre technician's perspective

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTTHE001 Handle and care for operating theatre equipment

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed established technical, infection control and safety procedures and instructions for set-up, shut-down, cleaning and storage of operating theatre equipment on at least 3 occasions
- performed routine maintenance procedures on at least 3 different types of equipment

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- scope of operating theatre technician role in working with equipment, including limitations
- medico-legal implications in relation to the use of equipment by the technician in the operating suite environment
- standard and additional infection control procedures that apply to:
 - the operating theatre environment
 - equipment within the operating theatre
- types of theatre equipment and their purpose, including:
 - theatre fixtures and fittings
 - furniture
 - surgical equipment
 - consumables and their sustainable use
- features of operating theatre equipment in relation to:
 - set up
 - assembly and connection
 - preparation for use
 - safe manual handling and risk factors for manual tasks

- intra-operative client safety considerations concerning the location and movement of equipment
- routine equipment maintenance procedures, including:
 - checking
 - calibration
 - cleaning
 - replacement of consumables
 - scheduled maintenance
- types of problems that occur with operating theatre equipment and when specialist maintenance is required
- procedures for organising specialist maintenance

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - a fully equipped operating theatre
 - documented procedures for the candidate to follow
- modelling of industry operating conditions, including presence of situations requiring problem solving

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors

HLTTHE002 Assist with preparation of clients for operative procedures

Modification History

N/A

Application

This unit of competency describes the skills and knowledge required to prepare, transfer and position clients for operative procedures.

This unit applies to operating theatre technicians and other theatre staff who work under the supervision of the anaesthetist and other members of the operating room team.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element</i>
1. Prepare clients for procedure	1.1 Determine preparation needs from review of information 1.2 Select and use personal protective equipment appropriate to procedure

	1.3 Adopt standard and additional infection control guidelines and precautions according to organisation documented procedure 1.4 Attach equipment safely and securely to appropriate sites 1.5 Safely detach equipment when no longer required with minimum risk of damage to client, staff or equipment 1.6 Safely store equipment in accordance with manufacturer's recommendations, or prepare ready for re-use 1.7 Follow established procedures if equipment is found to be faulty
2. Assist with client transfer	2.1 Identify correct operating table and table orientation before client is transferred 2.2 Inform relevant personnel of actions to be performed 2.3 Detach equipment not required following correct procedure and infection control requirements 2.4 Safely and correctly adjust equipment attached to client during transfer 2.5 Maintain a safe working area and clear passage at all times assessing and controlling for manual task risk factors 2.6 Minimise and respond to client discomfort during transfer 2.7 Re-connect and position equipment once transfer is completed following infection control requirements 2.8 Maintain client's dignity before, during and after transfer
3. Position clients for operative procedure	3.1 Inform client of positioning procedure, reassure and seek co-operation as required 3.2 Ensure relevant equipment is available and correctly positioned 3.3 Take into account individual client needs and confirm with relevant personnel 3.4 Follow correct manual handling procedures and seek assistance 3.5 Safely position client to meet the requirements of the anaesthetist and surgeon and the clients condition 3.6 Seek confirmation of correct position from anaesthetist and surgeon 3.7 Maintain the client in correct position as required, using assistive equipment when available 3.8 Maintain client's dignity during positioning

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTTHE002 Assist with preparation of clients for operative procedures

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed established technical, infection control and safety procedures and instructions for the preparation, transfer and positioning of at least 3 different clients

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations for theatre work and how these are applied in organisations, including:
 - children in the workplace
 - duty of care
 - informed consent
 - mandatory reporting
 - privacy, confidentiality and disclosure
 - records management
 - work role boundaries – responsibilities and limitations when working with clients
 - work health and safety
- standard and additional infection control procedures that apply to the operating theatre environment
- features and functions of equipment that needs be handled when preparing clients:
 - during transfer
 - during positioning
- medical terms used in the operating room relevant to technician work
- additional infection control procedures that apply to the operating theatre environment

- human anatomy and physiology in relation to client transfer and positioning, including:
 - normal and abnormal body positions
 - joint movement
 - features of body locations where equipment may need to be attached/detached
- different positions required for operative procedures, associated risks, and how to position clients, including:
 - supine
 - prone
 - lateral
 - lithotomy
- risks, precautions and techniques for protecting clients during moving and positioning
- safe manual handling and risk factors for manual tasks

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - a fully equipped operating theatre
 - beds
 - documented procedures that the candidate follows
- modelling of industry operating conditions, including presence of situations requiring problem solving

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element</i>
1. Maintain sterile field	1.1 Conform with aseptic principles when moving around a sterile field to prevent contamination 1.2 Report personal and other staff breaches of aseptic principles to the relevant staff in accordance with organisation policy and procedures

2. Monitor equipment performance	2.1 Switch on warning devices and check correct operation 2.2 Check levels of gas, electrical and vacuum supplies are adequate for procedure and confirm back-up supply as required 2.3 Observe equipment while in use, recognise faults, and take immediate action to avoid danger to clients, staff and equipment in accordance with organisation policy and procedures 2.4 Follow established procedures to rectify faulty equipment 2.5 Complete accurate equipment documentation in accordance with organisation policy and procedures
3. Attach and detach equipment	3.1 Select and use appropriate personal protective equipment 3.2 Select appropriate client attachments and attach safely and securely to appropriate sites under the guidance of medical staff 3.3 Re-position client attachments during theatre procedures as required 3.4 Safely detach client attachments using techniques that minimise risk of damage to client, staff or equipment 3.5 Provide counter-traction during orthopaedic and plastic procedures and manipulations as directed
4. Connect irrigation	4.1 Select correct irrigation and sequencing for operative procedure under the guidance of the medical staff 4.2 Check information about irrigation type, sterile integrity and expiry date 4.3 Connect irrigation to sterile giving set using correct aseptic techniques 4.4 Change irrigation using aseptic techniques 4.5 Communicate the volume, type and number of irrigation bags to scout nurse 4.6 Dispose of used irrigation bags/giving sets according to organisational policy and procedures
5. Adjust surgical equipment	5.1 Handle surgical equipment under the guidance of medical staff and within manufacturer's guidelines

	5.2 Connect surgical equipment to electrical, vacuum, gas supply in accordance with standard operating procedures 5.3 Adjust surgical equipment settings in accordance with manufacturer's guidelines under guidance of surgical and anaesthetic medical staff 5.4 Clearly communicate accurate readings to medical staff as required 5.5 Recognise and clearly communicate alarms/warnings, abnormal readings and equipment usage times to medical staff as required 5.6 Use aseptic techniques to pass sterile equipment/lines from the surgical team and connect to surgical equipment

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed established technical, infection control and safety procedures and instructions for equipment support in a range of different situations, including at least one of each of the following:
 - during emergencies
 - re-positioning
 - change of surgical procedure

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- scope of operating theatre technician role in working with equipment, including limitations
- medico-legal implications in relation to the use of equipment by the technician in the operating suite environment
- standard and additional infection control procedures that apply to:
 - the operating theatre environment
 - equipment within the operating theatre
- types of surgical equipment, their purpose and specific hazards and precautions in relation to safety of client and staff, including:
 - electrical safety
 - settings of equipment
- features and use of surgical equipment in relation to:
 - set up
 - assembly and connection
 - preparation for use

- safe manual handling
- irrigation equipment, its use and associated hazards
- human anatomy and physiology in relation to client transfer and positioning, including:
 - normal and abnormal body positions
 - joint movement
 - features of body locations where equipment may need to be attached/detached
- different positions required for operative procedures, associated risks, and how to position clients, including:
 - supine
 - prone
 - lateral
 - lithotomy
- operating room air-conditioning and ventilation systems and their impact on the technician's role and work practices

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - fully equipped operating theatre
 - documented procedures that the candidate must follow
- modelling of industry operating conditions, including presence of situations requiring problem solving

Assessment Requirements for HLTWHS001 Participate in workplace health and safety

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be demonstrated evidence that the candidate has completed the following tasks at least once in line with state/territory WHS regulations, relevant codes of practice and workplace procedures:

- contributed to a WHS meeting or inspection in workplace
- conducted a workplace risk assessment and recorded the results
- consistently applied workplace safety procedures in the day-to-day work activities required by the job role
- followed workplace procedures for reporting hazards
- followed workplace procedures for a simulated emergency situation.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- state/territory legislation and how it impacts on workplace regulations, codes of practice and industry standards, including:
 - state/territory WHS authorities
 - rights and responsibilities of employers and workers, including duty of care
 - hazardous manual tasks
 - infection control
- safety signs and their meanings, including signs for:
 - dangerous goods classifications
 - emergency equipment
 - personal protective equipment (PPE)
 - specific hazards such as sharps, radiation
- hazard identification, including:

- definition of a hazard
- common workplace hazards relevant to the industry setting
- workplace procedures for hazard identification
- workplace emergency procedures
- workplace policies and procedures for WHS

Assessment Conditions

Skills must be demonstrated:

- in the workplace

OR

- in an environment that provides realistic in-depth industry validated scenarios and simulations to assess candidates' skills and knowledge.

Assessment must ensure use of:

- current workplace policies and procedures for WHS
- PPE relevant to the workplace and job role of the worker

In addition, assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Link

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTWHS002 Follow safe work practices for direct client care

Modification History

N/A

Application

This unit describes the skills and knowledge required for a worker to participate in safe work practices to ensure their own health and safety, and that of others in work environments that involve caring directly for clients. It has a focus on maintaining safety of the worker, the people being supported and other community members.

This unit applies to all workers who require knowledge of workplace health and safety (WHS) to carry out their own work, in both centre-based and home-based service provision.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes.</i>	<i>Performance criteria specify the level of performance needed to demonstrate achievement of the element.</i>
1. Follow safe work practices for direct client care	1.1 Follow workplace policies and procedures for safe work practices

	1.2 Identify existing and potential hazards in the workplace, report them to designated persons, and record them according to workplace procedures 1.3 Identify any client-related risk factors or behaviours of concern, report them to designated persons, and record them according to workplace procedures 1.4 Follow workplace policies and procedures to minimise risk 1.5 Identify and report incidents and injuries to designated persons according to workplace procedures
2. Follow safe work practices for manual handling	2.1 Follow manual handling procedures and work instructions for minimising manual handling risk 2.2 Identify manual handling hazards and report in line with workplace procedures 2.3 Apply control measures for minimising manual handling risk
3. Follow safe work practices for infection control	3.1 Follow standard precautions as part of own work routine to prevent the spread of infection 3.2 Recognise situations when additional infection control procedures are required 3.3 Apply additional precautions when standard precautions alone may not be sufficient to prevent transmission of infection 3.4 Identify risks of infection and report them according to workplace procedures
4. Contribute to safe work practices in the workplace	4.1 Raise WHS issues with designated persons according to organisational procedures 4.2 Participate in workplace safety meetings, inspections and consultative activities 4.3 Contribute to the development and implementation of safe workplace policies and procedures in own work area
5. Reflect on own safe work practices	5.1 Identify ways to maintain currency of safe work practices in regards to workplace systems, equipment and processes in own work role

	5.2 Reflect on own levels of stress and fatigue, and report to designated persons according to workplace procedures 5.3 Participate in workplace debriefing to address individual needs

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

- *Reading* – in order to accurately read and interpret workplace safety policies and procedures including safety signs, dangerous goods classifications and safety instructions

The remaining foundation skills essential to performance are explicit in the performance criteria of this unit

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be demonstrated evidence that the candidate has completed the following tasks at least once in line with state/territory WHS regulations, relevant codes of practice and workplace procedures:

- contributed to a workplace WHS meeting or inspection
- conducted a workplace risk assessment and recorded the results
- consistently applied workplace safety procedures in the day-to-day work activities required by the job role, including:
 - infection control
 - hazardous manual tasks
 - use of personal protective equipment
 - reporting incidents
- followed workplace procedures for at least one simulated emergency situation.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- state/territory legislation and how it impacts on workplace regulations, codes of practice and industry standards, including:
 - state/territory WHS authorities
 - rights and responsibilities of employers and workers, including duty of care
 - hazardous manual tasks
 - infection control
- safety symbols and their meanings, including signs for:
 - poisons
 - emergency equipment
 - personal protective equipment (PPE)

- specific hazards such as sharps, radiation
- hazard identification, including:
 - definition of a hazard
 - common workplace hazards relevant to the industry setting including hazardous manual tasks, infection control risks and personal safety risks
 - workplace procedures for hazard identification
 - strategies minimising risk
- safety considerations when working in a home-based environment, including:
 - rights and responsibilities of workers and clients
 - basic home fire safety including high-risk groups, behaviour that contributes to fire injury and fatalities, and smoke alarm placement, installation and maintenance.
 - risks to personal safety
 - common sources of infection and means to minimise transfer of infectious diseases
 - fundamentals of the musculoskeletal system and practices to minimise injury to self and clients
- workplace emergency procedures
- workplace policies and procedures for WHS

Assessment Conditions

Skills must be demonstrated:

- in the workplace

OR

- in an environment that provides realistic in-depth industry validated scenarios and simulations to assess candidates' skills and knowledge.

In addition, assessment must ensure use of:

- current workplace policies and procedures for WHS
- PPE relevant to the workplace and job role of the worker

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTWHS003 Maintain work health and safety

Modification History

N/A

Application

This unit describes the skills and knowledge required to implement and monitor work health and safety (WHS) policies, procedures and work practices as part of a small work team.

This unit applies to workers who have a key role in maintaining WHS in an organisation, including duty of care for other workers.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes.</i>	<i>Performance criteria specify the level of performance needed to demonstrate achievement of the element.</i>
1. Contribute to workplace procedures for identifying hazards and controlling risks	1.1 Identify existing and potential hazards and record them according to workplace procedures 1.2 Contribute to the development of strategies for implementing risk controls in line with workplace procedures and policies

	1.3 Implement risk controls in line with the hierarchy of risk control and workplace and legislative requirements 1.4 Identify and report issues with risk controls, including residual risk, in line with workplace and legislative requirements
2. Implement policies and procedures into work team processes	2.1 Regularly provide information about WHS policies and procedures to the work team 2.2 Provide information about identified hazards and the outcomes of risk assessment and risk controls to the work team 2.3 Monitor housekeeping practices to ensure that WHS policies and procedures are followed 2.4 Maintain WHS incident records in the work area according to workplace procedures and legislative requirements
3. Support consultation, cooperation and communication	3.1 Support workplace consultative procedures by encouraging work team participation in consultative activities 3.2 Report health and safety issues in line with workplace procedures and legislative requirements 3.3 Encourage and assist work team members to contribute to WHS

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

- *Written communication* – in order to complete a workplace risk assessment and complete a workplace incident report in line with regulatory guidelines and organisational policies
- *Oral communication* – in order to accurately present information to a small group of at least two participants

The remaining foundation skills essential to performance are explicit in the performance criteria of this unit

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for HLTWHS003 Maintain work health and safety

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be demonstrated evidence that the candidate has completed the following tasks at least once in line with state/territory WHS regulations, relevant codes of practice and workplace procedures:

- conducted a workplace risk assessment and recorded the results, including:
 - identification of hazards and potential hazards
 - risk assessment
 - strategies for minimising risk, and
 - analysis of residual risk
- provided WHS information to at least two workers, including:
 - explanation of WHS policies and procedures
 - demonstration of safe housekeeping practices
 - correct use of personal protective equipment (PPE)
- consistently monitored safety procedures in the day-to-day work activities required by the job role
- completed a workplace incident report
- followed workplace procedures for a simulated emergency situation

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- State/territory legislation and how it impacts on workplace regulations, codes of practice and industry standards, including:
 - state/territory WHS authorities
 - rights and responsibilities of persons conducting a business or undertaking (PCBUs), officers and workers, including duty of care

- legislative requirements for record-keeping and reporting
 - regulatory requirements relevant to the particular industry/type of work site
 - hazardous manual tasks
 - infection control
- Hazards common to the work environment and how they cause harm
- Principles of hazards and risk assessment, including:
 - hazard identification procedures
 - risk assessment process
 - residual risk
 - risk controls
 - hierarchy of control
- Workplace emergency procedures
- Workplace policies and procedures for WHS.

Assessment Conditions

Skills must be demonstrated in the workplace.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessment must ensure use of:

- current workplace policies and procedures for WHS.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Link

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>.

HLTWHS004 Manage work health and safety

Modification History

N/A

Application

This unit describes the skills and knowledge required to establish, maintain and evaluate work health and safety (WHS) policies, procedures and programs in the relevant work area, according to WHS legislative requirements.

This unit applies to workers who have responsibility for WHS as part of their role, including workers with obligations under WHS legislation, persons conducting a business or undertaking (PCBUs), or their officers (as defined by relevant legislation).

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes.</i>	<i>Performance criteria specify the level of performance needed to demonstrate achievement of the element.</i>
1. Establish work health and safety practices	1.1 Access and interpret legislation, regulations, code of conduct and workplace policies and procedures for WHS 1.2 Develop procedures for ongoing hazard identification, and assessment and control of associated risks

	1.3 Ensure risk controls and hazard-specific procedures are consistent with the hierarchy of control and are monitored to support compliance with legislative and regulatory requirements 1.4 Identify requirements for expert WHS advice, and request this advice as required
2. Facilitate consultation, cooperation and communication	2.1 Develop and provide consultative WHS activities to provide advice in relation to work health and safety issues 2.2 Monitor processes for ensuring that workers have an opportunity to contribute feedback on health and safety issues 2.3 Document outcomes of consultation and communicate to workers 2.4 Develop and implement processes to ensure that responsibilities and duties are documented and accountability processes are in place 2.5 Implement and monitor training programs to ensure identified WHS training requirements are addressed, including induction process
3. Monitor compliance with risk control processes	3.1 Develop WHS record-keeping policies and procedures and provide information to workers 3.2 Monitor hazard, incident and injury reporting processes to meet legislative requirements and to inform future prevention strategies 3.3 Evaluate WHS record-keeping policies and procedures for compliance with legislative requirements
4. Evaluate and maintain WHS	4.1 Determine WHS priorities in consultation with work group 4.2 Develop a WHS action plan taking account of priorities and training needs 4.3 Identify potential barriers to improvement 4.4 Establish processes to monitor achievement against the plan and update plans as required

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

- *Written communication* – in order to complete a workplace risk assessment and develop a WHS action plan in line with regulatory guidelines and organisational policies
- *Oral communication* – in order to accurately present information to a small group of at least two participants

The remaining foundation skills essential to performance are explicit in the performance criteria of this unit

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Unit Mapping Information

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be demonstrated evidence that the candidate has completed the following tasks at least once in line with state/territory WHS regulations, relevant codes of practice and workplace procedures:

- conducted a workplace risk assessment and recorded the results, including:
 - identification of hazards and potential hazards
 - risk assessment
 - evaluation of policy/procedure in line with state/territory legislation and industry guidelines
 - development of risk controls and measures
- conducted the following consultative activities with at least two workers:
 - information session about workplace policies and procedures, including demonstration of personal protective equipment (PPE) where required for the job role
 - consultative discussion regarding outcomes of a workplace risk assessment, including risk controls and measures developed as part of the risk assessment process
- monitored workplace compliance with WHS procedures
- developed a WHS action plan, including strategies for monitoring and review
- coordinated workplace procedures for a simulated emergency situation.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- state/territory legislation and how it impacts on workplace regulations, codes of practice and industry standards, including:
 - state/territory WHS authorities
 - rights and responsibilities of persons conducting a business or undertaking (PCBUs), officers and workers, including duty of care

- legislative requirements for record-keeping and reporting
 - due diligence and general duty requirements
 - regulatory requirements relevant to the particular industry/type of work site
 - legislative requirements for consultation
 - hazardous manual tasks
 - infection control
- hazards common to the work environment and strategies for minimisation
- requirements for WHS policies, including:
 - hazard, incident and injury reporting
 - hazard identification, risk assessment and control
 - human resources policies and procedures
 - consultation and participation
 - incident investigation and record-keeping
 - quality system documentation
 - designated person/s for raising issues
 - workplace support services
 - use of personal protective equipment (PPE)
 - emergency procedures
- principles of hazard and risk management, including:
 - risk analysis
 - hazard identification procedures
 - hierarchy of control and its application
 - principles of risk assessment
 - examples of health and safety benchmarks
 - principles of safe design processes

Assessment Conditions

Skills must be demonstrated in the workplace.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

In addition, assessment must ensure use of:

- current workplace policies and procedures for WHS

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTWHS005 Conduct manual tasks safely

Modification History

N/A

Application

This unit describes the skills and knowledge required to recognise potentially hazardous manual tasks, and then to prepare for and complete those tasks in a safe manner.

This unit applies to all workers involved in manual handling tasks.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice. The Hazardous manual tasks code of practice applies to this work.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

Unit sector(s)

N/A

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element</i>
1. Identify manual tasks involving risk	1.1 Recognise manual tasks that may involve risk to self or others 1.2 Identify risk factors that make the manual task hazardous 1.3 Determine the nature and extent of the risk 1.4 Follow organisation procedures for controlling hazardous manual tasks

2. Prepare for manual tasks	2.1 Prepare workplace layout and environment according to organisation procedures 2.2 Organise task and workflow appropriately 2.3 Prepare and package loads for movement, taking account of specific requirements for different materials and organisation procedures 2.4 Select and use personal protective equipment appropriate to the task 2.5 Ensure task is within personal capabilities
3. Complete manual tasks	3.1 Use appropriate posture and handling techniques to reduce muscle load on exertion 3.2 Select, adjust and use mechanical aids and handling devices according to manufacturers instructions 3.3 Pace and schedule tasks according to procedures
4. Contribute to safe work practices	4.1 Identify hazardous manual tasks and report to supervisor according to organisation procedures 4.2 Follow organisation procedures for reporting symptoms of injury or actual injury to self and others 4.3 Participate in workplace safety activities and contribute to the improvement of manual tasks 4.4 Contribute to risk management approach to reduce risks from manual tasks

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Unit Mapping Information

HLTWHS005 Conduct manual tasks safely	HLTHSE204D Follow safe manual handling practices	This version was released in HLT Health Training Package release 2.0 and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.	Not equivalent

Assessment Requirements for HLTWHS005 Conduct manual tasks safely

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- followed legally compliant workplace procedures to prepare for and complete at least 3 different manual tasks relevant to the work role
- contributed to a consultation process about improving manual handling safety

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- key information from work health and safety (WHS) regulations relating to manual tasks and national code of practice
- role and responsibilities of the employer and employees in relation to manual handling safety
- ways in which individual workers are involved in consultation about workplace health and safety
- reporting mechanisms required for workplace injury and compensation claims
- key aspects of the risk management approach to manual tasks
- risk factors and potential sources of risks of hazardous manual tasks:
 - repetition
 - forces
 - postures
 - vibration
 - systems of work
- types of manual task activity and the types of injuries that can result
- the relationship between the human body and risk of injury from performing manual tasks
- functions of the human body:

- basic function of the spine
 - body postures
 - types of muscles
 - principles of levers
- manual handling techniques that support safe work practice:
 - preparing the load/client
 - preparing the environment
 - using the stronger muscles in the legs where possible, rather than spinal muscles
 - maintaining a neutral spine when lifting and carrying
 - using two hands to lift or carry
 - keeping the load close to the body/centre of gravity
 - avoiding lifting objects above shoulder height
 - minimising repetitive movements
 - positions not held for long periods of time
 - avoiding twisting by repositioning feet whilst turning
- types and operational features of mechanical aids, tools and equipment

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - compliant workplace procedures
 - materials, loads and equipment as required by the individual workplace
- modelling of industry operating conditions, including:
 - presence of hazards
 - integration of situations requiring problem solving

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Elements and Performance Criteria

Element	Performance criteria
<i>Elements define the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element</i>
1. Develop strategies to manage personal stress	1.1 Recognise sources of stress in own job role 1.2 Recognise triggers and own response to stress 1.3 Identify strategies to effectively prevent, reduce and manage stress

	1.4 Identify internal and external options and resources for additional support 1.5 Develop a personal stress management plan that responds to identified stressors and triggers
2. Implement stress management strategies	2.1 Use strategies from personal stress management plan that address personal triggers and stressors 2.2 Organise own workload to minimise stress and inform relevant personnel of any variations and difficulties affecting work requirements 2.3 Identify and adopt strategies to balance work/life priorities
3. Evaluate stress reducing strategies	3.1 Monitor and review effectiveness of stress management strategies 3.2 Adjust strategies not meeting the desired outcome and recognise when additional resources and/or support is needed 3.3 Access internal or external options and resources for additional support to meet desired outcomes of the stress management plan

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

		Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements.	

Assessment Requirements for HLTWHS006 Manage personal stressors in the work environment

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- developed, implemented and reviewed 1 personal stress management plan that includes identified sources, triggers and responses to stress
- used strategies from personal stress management plan to manage 2 stressful situations in the workplace involving colleagues and/or clients

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- sources of stress and how they manifest in health and/or community services work environment including:
 - complex client behaviour (emotional, aggressive, cognitive deficit, non-compliance)
 - grief and loss experienced by workers
 - exposure to stressful working conditions and stressful incidents
- work planning and prioritisation techniques e.g. time management strategies
- legal rights relating to the Fair Work Act
- services available for referral, both within the organisation and in the community e.g. informal/formal debriefing sessions and/or workplace counselling
- self-care techniques including:
 - impact of exercise, diet and nutrition on physical health
 - work/life balance strategies
 - complementary and alternative health options

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working

conditions by modelling industry operating conditions and contingencies, as well as, using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Link

PUAECO002 Process emergency incident calls and enquiries

Modification History

N/A

Application

This unit involves the skills and knowledge required to process emergency incident calls and enquiries. It includes receiving incoming incident calls and/or enquiries, providing information to callers in possible danger, locating an incident, requesting assistance and operating equipment.

The unit applies to individuals who process emergency calls for assistance and non-emergency enquiries in an emergency communications centre.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

Not applicable.

Competency field(s)

Emergency Communications

Unit sector(s)

N/A

Elements and Performance Criteria

Elements	Performance criteria	
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.	
Receive incoming incident calls/enquiries	1 . 1	Emergency incident calls are answered promptly using standard agency answering protocols

	1 . 2	Information about the caller, incident or enquiry is established, in accordance with organisational policies and procedures
	1 . 3	Factors which may affect the caller's ability to provide accurate information are assessed and considered
	1 . 4	Type of incident call or enquiry is determined accurately and call authenticity is determined, in accordance with organisational protocols
	1 . 5	Details of the incident call or enquiry are obtained and accurately logged, in accordance with organisational policies and procedures
	1 . 6	Appropriate response is established through consultation with relevant personnel, in accordance with organisational procedures
2 Provide information to callers in possible danger	2 . 1	Potential danger to caller is assessed accurately
	2 . 2	Safety information appropriate to the situation and caller's needs is communicated clearly
3 Locate an incident	3 . 1	Organisation's area of operational responsibility is identified
	3 . 2	Appropriate directories, maps and databases are used to find incident location
	3 . 3	Calls or enquiries are concluded, in accordance with organisational policies and procedures
4 Action received request	4 . 1	Action emergency incident request or call
	4 . 2	Information is summarised and communicated using clear and appropriate language, in accordance with organisational policies and procedures

		4 . 3	Follow up procedures and notifications to other emergency services or agencies are implemented, as required
	Operate equipment	5 . 1	Appropriate equipment is chosen for the task, context and needs of incident
		5 . 2	Equipment is used and operated safely, in accordance with organisational procedures and instructions
		5 . 3	Faulty equipment is identified and reported, in accordance with organisational policies and procedures and alternative strategies are employed, as required

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- answering incident calls or enquiries promptly using standard organisational or agency answering protocols including using techniques to obtain information in as short a time as possible
- communicating orally and in writing
- concluding calls or enquiries and confirming response
- identifying and reporting and/or actioning faults using organisational instructions
- implementing and following organisational policies, procedures and protocols to support response decisions
- locating an incident
- logging incident calls and enquiry details
- providing information to callers in possible danger
- reading and interpreting maps to identify location of incident
- reassuring callers and supplying pre-arrival instructions
- recognising the difference between emergency and non-emergency incident calls and enquiries
- summarising, recording and relaying information accurately to emergency services and/or agencies
- taking appropriate action to process incident calls and enquiries
- using codes, abbreviations or specialist terminology in transmission of information

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- alternative strategies for when equipment is faulty
- codes, abbreviations or specialist terminology used by the organisation when receiving and responding to incoming incident calls and enquiries
- communications and dispatch equipment used in the management of incidents and non-operational enquiries
- directories and databases
- factors that may impact on a caller's ability to provide information, understand directions and reach safety
- fault identification and reporting and/or actioning requirements
- information including environmental factors, operational readiness, risks associated with incident, topography and weather conditions
- methods of establishing information of caller, incident or enquiry including using active listening skills, clarifying, giving full attention to caller, maintaining contact with caller, prompts, summarising and using open questions
- methods of identifying geographical area of operations and map reading techniques
- organisational documentation, policies, procedures and protocols
- organisational instructions
- organisational, emergency service and/or agency resources

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations that includes emergency and non-emergency situations across a range of different callers, types of emergencies and level of activity. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
 - backup telephony systems

- directories, maps and databases to find incident locations
- applicable documentation including organisational policies and procedures, industry standards, regulations, codes of practice, equipment specifications, operations and systems manuals.

N/A

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- acting to identify technical faults including referring to appropriate personnel, if required
- assessing and prioritising information
- identifying and reporting technical faults in Computer Aided Dispatch (CAD)
- implementing backup arrangements
- monitoring, maintaining and updating data and/or information
- operating CAD during peak activity
- recording and relaying data and information accurately
- retrieving information
- setting up, operating and adapting to different programs and/or databases

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- backup arrangements
- codes, terminology and abbreviations
- computer operations and functions
- corrective action procedures
- fault identification and report or action requirements
- organisational documentation, policies and procedures
- organisational instructions
- shift change and break protocols
- specific program and database operations

- techniques to identify computer aided dispatch system technical faults and report requirements

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations that includes emergency and non-emergency situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
 - backup systems, Computer Aided Dispatch (CAD) work station and databases
- applicable documentation including organisational policies and procedures, industry standards, regulations, codes of practice, equipment specifications, operations and systems manuals.

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>.

SIRXMGT001 Supervise and support frontline team members

Modification History

N/A

Application

This unit describes the performance outcomes, skills and knowledge required to monitor the work activities and performance standards of team members to ensure organisational and team goals are achieved to an expected standard.

It applies to individuals working in frontline roles in a diverse range of industry sectors and business contexts. They operate with independence and under limited supervision and guidance from others, and within established organisational policies and procedures.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

Nil

Competency field(s)

Management and Leadership

Unit sector(s)

Cross-Sector

Elements and Performance Criteria

Elements	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Communicate with the team.	1.1.Communicate organisational vision and individual responsibilities clearly to team members. 1.2.Inform team members of expected standards of work and behaviours.

	1.3. Provide team members with relevant information regarding sales targets and team goals.
2. Monitor team performance.	2.1. Follow up allocated tasks and check that standards of performance are met. 2.2. Provide feedback to team members on their performance when required standards are not met. 2.3. Recognise team member's efforts when high, or improved, standards of performance are displayed. 2.4. Determine factors contributing to poor performance and implement solutions for improved performance. 2.5. Recognise training needs of team members and notify relevant personnel as required.
3. Promote team morale.	3.1. Determine team motivators and seek opportunities to improve motivation. 3.2. Create a supportive team environment where all members feel valued. 3.3. Encourage team members to share their views and feedback regarding the workplace and value their input. 3.4. Treat all team members equally and with respect.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

		covered by an existing unit of competency	

Assessment Requirements for SIRXMGT001 Supervise and support frontline team members

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- supervise a work team, across the duration of two different work shifts, to ensure organisational and team goals are achieved
- demonstrate the following skills during supervision of the above work shifts:
 - communicating responsibilities and expected standards of work to team members
 - implementing techniques to motivate team members and improve team morale
 - providing feedback on team members performance
 - monitoring team members for:
 - adherence to policies and procedures
 - customer service standards
 - productivity
 - team interactions.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- primary role of team supervisors
- organisational performance standards for frontline tasks
- strategies and techniques for:
 - effective communication with team members
 - improving team and individual morale
 - increasing team and individual productivity
 - creating a team environment in the workplace
 - motivation others
 - providing feedback regarding performance
 - constructive feedback

- recognition of positive performance
- importance of providing team members with an understanding of the commercial impacts of their behaviours and goal attainment.

Assessment Conditions

Skills must be demonstrated in:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- relevant organisational documentation:
 - performance standards for frontline tasks
 - organisational vision
 - key elements and steps of frontline tasks
- team members; these can be:
 - individuals in an industry workplace, or
 - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SISCAQU001 Test pool water quality

Modification History

N/A

Application

This unit describes the performance outcomes, skills and knowledge required to conduct pool water tests, record test results and make visual ongoing checks.

This unit applies to those working as pool attendants or aquatic operators in aquatic environments, such as council or commercially operated aquatic and leisure centres. Work is performed according to public health regulatory requirements, organisational policies and procedures, and relevant legislation.

Work may be carried out under supervision or with some autonomy, depending on the individual situation and job role.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

Nil

Competency field(s)

Aquatics

Unit sector(s)

Community Recreation

Elements and Performance Criteria

Elements	Performance criteria
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Conduct pool water tests.	1.1 Complete routine pool water tests according to public health regulatory requirements.

	1.2 Interpret test results and compare with public health regulatory requirements. 1.3 Identify and report pool water test irregularities to appropriate personnel for corrective action. 1.4 Respond to contamination incidents within scope of own role. 1.5 Conduct regular sample collection and initiate corrective actions as required. 1.6 Perform regular visual checks of pool water quality, identify issues and initiate corrective actions when required.
2. Record test results.	2.1 Record pool water test results accurately. 2.2 Update swimming pool log according to aquatic facility specifications.

Foundation Skills

Foundation skills essential to performance in this unit are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

SISCAQU015 Test pool water quality	SISCAQU001 Test pool water quality	Non-equivalent. Unit reordered and reworded, with additional information about record keeping and contamination response added.	Not equivalent

Assessment Requirements for SISCAQU001 Test pool water quality

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- test pool water for the following on a minimum of four separate occasions:
 - free chlorine and/or total bromine
 - total chlorine
 - combined chlorine
 - pH
 - total alkalinity
 - cyanuric acid
 - calcium hardness
 - total hardness
 - temperature
- perform routine visual checks for pool water quality.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- legislation and organisational policies and procedures:
 - public health regulatory requirements in the local area
 - health acts
 - infectious diseases regulations
 - dangerous goods act and regulations
 - work health and safety/occupational health and safety
 - environmental legislation
 - local government regulation
 - roles, responsibilities and limitations of own role
- pool water chemistry terms and their meaning:

- pH levels
- alkalinity
- chlorine and or bromine
- temperature
- calcium hardness
- types of pool water tests, their purpose and testing procedures
- visual checks made by pool attendants
- equipment and resources used for testing pool water quality
- responses to contamination incidents.

Assessment Conditions

Skills must be demonstrated in:

- a workplace or simulated aquatic facility with an operating pool.

Assessment must ensure use of:

- pool water testing apparatus
- public health regulatory documentation
- organisational policies and procedures.

Assessment activities that allow the individual to:

- conduct regular pool water tests within industry realistic timeframes.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SISCAQU004 Develop and implement pool water maintenance procedures

Modification History

N/A

Application

This unit describes the performance outcomes, skills and knowledge required to develop, implement, monitor and evaluate systems and procedures for the maintenance of quality pool water in an aquatic recreation facility.

This unit applies to those working autonomously in aquatic leisure centres or community pools, in roles such as program coordinators, swim school coordinators, recreation coordinators or duty managers. Work is performed according to relevant legislation, and organisational policies and procedures.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

Nil

Competency field(s)

Aquatics

Unit sector(s)

Community Recreation

Elements and Performance Criteria

Elements	Performance criteria
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.

1. Develop pool water maintenance procedures.	1.1 Evaluate pool water quality maintenance and treatment needs according to regulatory framework. 1.2 Develop and document systems for pool water maintenance in consultation with appropriate personnel.
2. Implement pool water maintenance procedures.	2.1 Provide accurate and current information and instruction to staff about legislative and technical requirements. 2.2 Delegate testing and treatment tasks according to staff skills. 2.3 Test pool water quality following established procedures. 2.4 Interpret results of tests made by self and others and identify where correction is needed. 2.5 Calculate the amount of chemicals required to correct chemical imbalances in pool water. 2.6 Select and use chemical dosing equipment for treatment of pool water according to manufacturer specifications. 2.7 Monitor pool water quality on ongoing basis, identify issues of concern and respond according to agreed procedures. 2.8 Identify and respond to emergency situations according to agreed procedures. 2.9 Complete accurate documentation
3. Evaluate pool water maintenance procedures.	3.1 Assess effectiveness of pool water maintenance procedures against testing and treatment records. 3.2 Identify and document potential improvements to maintenance procedures. 3.3 Communicate improvements and changes to relevant staff and stakeholders.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

Skills	DESCRIPTION
Reading skills to:	interpret technical content of regulatory requirements.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for SISCAQU004 Develop and implement pool water maintenance procedures

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- develop and document pool water maintenance procedures that meet regulatory requirements for at least one aquatic facility that incorporate:
 - monitoring and treatment procedures for:
 - microbiological levels
 - disinfectant levels
 - pH levels
 - clarity levels
 - staff training requirements
 - safety procedures
 - emergency response procedures
 - documentation and reporting
- implement and evaluate pool water maintenance procedures for at least one aquatic facility
- implement emergency procedures in the event of a chemical emergency on at least one occasion.

Knowledge Evidence

Demonstrated knowledge required to do the task outlined in elements and performance criteria of this unit:

- legislation and industry standards relevant to aquatic facility maintenance with specific focus on local requirements:
 - work health and safety/occupational health and safety
 - dangerous goods act and regulations
 - local government regulations
 - building codes and regulations
- organisational policies and procedures:

- standard operating conditions and levels
 - work health and safety/occupational health and safety
 - risk assessment and control
 - handling of hazardous chemicals
 - emergency response
- factors that affect pool water treatment needs in different contexts:
 - condition of aquatic facility
 - location
 - size
 - nature of services provided
 - availability of resources
- characteristics of water quality:
 - pH levels
 - alkalinity
 - chlorine and / or bromine
 - temperature
 - calcium hardness
 - disinfectant levels
- waterborne bacteria and how to enable these to be monitored and controlled safely:
 - pseudomonas
 - aeruginosa
- consultation and communication mechanisms to develop and implement procedural systems
- content considerations for procedure documents:
 - specific testing and treatment procedures
 - safety requirements (chemicals, plant and equipment)
 - emergency response
 - training requirements
 - documentation and reporting requirements
- water treatment processes:
 - routine pool water tests
 - pool water microbiological tests
 - superchlorination
 - shock dosing

- dechlorination
 - ozonisation or use of sanitizer
 - pool water filtration and recirculation
 - backwashing
 - manual removal of visible contaminants
- features and sources of products for pool water quality maintenance.

Assessment Conditions

Skills must be demonstrated in:

- a workplace or simulated aquatic facility or environment.

Assessment must ensure use of:

- a pool for which a maintenance program would be developed
- information about pool water quality maintenance to allow the individual to develop a tailored system
- organisational policies and procedures
- incident reporting documentation
- resources to maintain facility and equipment.

Assessment activities that allow the individual to:

- implement and monitor pool quality maintenance over time
- respond to a chemical emergency situation.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Link

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=1ca50016-24d2-4161-a044-d3faa200268b>.

SISCAQU008 Instruct water familiarisation, buoyancy and mobility skills

Modification History

N/A

Application

This unit describes the performance outcomes, skills and knowledge required to develop lesson plans and instruct a broad range of clients in water familiarisation, buoyancy and mobility skills. This involves using drills, activities and games according to best practice principles of aquatic activities.

This unit applies to those conducting learn-to-swim and water safety classes in swimming pools and confined natural shallow water venues. Work is performed according to relevant legislation including working with children and/or vulnerable people checks, organisational policies and procedures and best practice principles.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

SISCAQU002 Perform basic water rescues

Competency field(s)

Aquatics

Unit sector(s)

Community Recreation

Elements and Performance Criteria

Elements	Performance criteria
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.

1. Develop lesson plans.	1.1 Consider participant group characteristics and identify water familiarisation, buoyancy and mobility skills to be developed. 1.2 Assess participant readiness. 1.3 Determine appropriate instructional methods to acquire the relevant skills. 1.4 Determine appropriate drills, activities and/or games for the participant group. 1.5 Develop and document lesson plans that incorporate key instructional information.
2. Conduct lessons.	2.1 Allocate sufficient space, assemble resources and check equipment for maintenance requirements. 2.2 Provide clear and accurate instruction on drills, activities and/or games. 2.3 Appropriately introduce participants to the water. 2.4 Demonstrate skills and techniques, and monitor the participation and performance of each participant. 2.5 Observe participant movement through water according to principles of movement in water and adjust or refine individual or group performance, as required. 2.6 Select and use communication techniques that encourage and support participants. 2.7 Modify activity, as required according to participant needs and factors that affect skills acquisition. 2.8 Respond to participants experiencing difficulties and answer questions as required. 2.9 Monitor time and complete drills, activities or games within time allocated. 2.10 Complete lesson documentation.
3. Review and adapt instruction.	3.1 Request and respond to feedback from participants. 3.2 Identify aspects needing further emphasis or attention in future sessions. 3.3 Review own performance and identify areas needing improvement. 3.4 Implement modifications to future instruction in response to feedback and review of participant progress.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for SISCAQU008 Instruct water familiarisation, buoyancy and mobility skills

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- instruct water familiarisation, buoyancy and mobility skills according to legal, ethical and organisational requirements
- develop and implement at least three lesson plans that individually or cumulatively incorporate the following aspects of water familiarisation, buoyancy and mobility skills and documents the teaching points, class formations, safety and equipment:
 - water familiarisation:
 - entering, leaving and moving through water
 - getting face wet
 - submerging and opening eyes under water
 - regaining a standing position
 - breathing
 - buoyancy and mobility:
 - front, back and side floating
 - gliding
 - torpedo
 - sculling
 - treading water
 - stroke exploration
- use and modify the following instructional strategies for individuals and groups:
 - whole skill
 - whole, progressive part, whole
 - progressive part
 - demonstration
 - command and response
 - experiential or problem-solving
 - techniques to encourage the reluctant participant

- reflect on the following key aspects of instruction:
 - the lesson
 - teaching methods used
 - risk management
 - potential ways to enhance learning opportunities.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- legal, ethical and organisational requirements and responsibilities for instruction:
 - work health and safety/occupational health and safety
 - working with children
 - duty of care/safe conduct of activities
 - best practice principles of aquatic activities
 - mandatory reporting
 - implications of negligence
 - waivers and exclusion clauses
 - insurance
 - anti-discrimination and equal opportunity
 - privacy and confidentiality
 - communication protocols
 - a recognised swimming teachers code of conduct
 - swimwear and personal protective equipment
- characteristics of participant groups and appropriate drills for the various characteristics:
 - age
 - stage of development
 - physical or intellectual characteristics
 - cultural and situational factors
- aspects of a body in water:
 - body position and density
 - vertical and lateral rotation
 - balance
- forces effecting movement through water and the factors that affect each force:

- buoyancy:
 - density
 - shape
 - symmetry and asymmetry
 - breathing
 - centre of gravity
 - centre of buoyancy
- propulsion:
 - lift force
 - water friction
 - levers
- resistance:
 - skin
 - frontal
 - eddy
- principles of session planning to develop activity-specific plans:
 - expectations and aspirations of clients
 - numbers of clients
 - client background, experience and developmental stage
 - staff and financial resources
 - cultural and political influences
 - involvement and interest of parents
 - length and number of sessions
 - equipment, materials and provisions
 - precautions and other health and safety information
- learning styles to enable the use of a variety of activities to cater for different client learning preferences:
 - auditory
 - kinaesthetic
 - visual
 - sensory
- principles of growth and development to select and sequence appropriate tasks and activities
- instructional methods and strategies, how and when they are used:

- whole skill
 - whole, progressive part, whole
 - demonstration
 - command and response
 - experiential or problem-solving
 - techniques for reluctant participants
- conditions, factors and external influences that effect participant uptake of skill:
 - physical, intellectual and emotional characteristics
 - environmental conditions
 - other facility users
 - spectators
 - parents
 - other instructors
 - background noise and distractions
 - class size
 - water depth
 - available water space
- potential areas of ongoing instructor improvement:
 - knowledge
 - instructional skills and techniques
- communication techniques that support and encourage participants
- group control techniques
- principles of movement in water and best practice principles of aquatic activities to enable safe, effective and consistent instruction in buoyancy and mobility skills
- water familiarisation, buoyancy and mobility skills to enable accurate and comprehensive instruction to participants
- use, care and maintenance of equipment
- cardiopulmonary resuscitation techniques to enable initial response to emergencies as per Australian Resuscitation Council (ARC) guidelines.

Assessment Conditions

Skills must be demonstrated in:

- a workplace or simulated aquatic facility or confined natural shallow water environment.

Assessment must ensure use of:

- organisational policies and procedures appropriate to risk management
- swimming instructional equipment
- participants to whom instruction is provided, these can be:
 - participants in a workplace, or
 - individuals who participate in project activities, role plays or simulated activities, set up for the purpose of assessment, within a training organisation.

Assessment must ensure access to:

- first aid facilities and equipment.

Assessment activities that allow the individual to:

- develop and conduct lessons in industry required timeframes
- respond to problems that typically arise in water familiarisation, buoyancy and mobility skills instruction.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Link

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=1ca50016-24d2-4161-a044-d3faa200268b>.

SISFFIT003 Instruct fitness programs

Modification History

N/A

Application

This unit describes the performance outcomes, knowledge and skills required to plan, instruct and evaluate a variety of fitness programs and circuit sessions aimed at the health-related components of fitness. It involves programming and instruction of cardiovascular, resistance and flexibility programs for low or moderate risk clients who have completed industry endorsed pre-exercise screening and risk stratification procedures.

This unit applies to fitness instructors who work in a variety of fitness locations such as fitness, leisure and community centres. These individuals typically work independently with some level of autonomy in a controlled environment. Work is performed according to relevant legislation and organisational policies and procedures.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

Nil

Competency field(s)

Fitness

Unit sector(s)

Fitness

Elements and Performance Criteria

Elements	Performance criteria
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.

1. Identify client fitness requirements.	1.1 Consider and confirm client needs, expectations and preferences using suitable questioning techniques. 1.2 Review and advise client of outcomes of pre-exercise health screening procedures. 1.3 Refer client to medical or allied health professionals as required. 1.4 Identify potential barriers to participation. 1.5 Develop and document client profile for re-evaluation purposes.
2. Develop program plans.	2.1 Determine type of training, training methods and equipment required to achieve client goals. 2.2 Calculate total training volume required to achieve client goals. 2.3 Develop and document program plans that incorporate key instructional information to target components of fitness. 2.4 Develop customised training sessions that include a variety of exercises and equipment to meet client needs.
3. Conduct exercise sessions.	3.1 Allocate sufficient space, assemble resources and check equipment for safety and maintenance requirements. 3.2 Provide clear exercise instructions and confirm client understanding. 3.3 Demonstrate exercises, techniques and equipment to client. 3.4 Monitor participation and performance to identify signs of exercise intolerance and modify as required. 3.5 Select and use communication techniques that encourage and support clients. 3.6 Modify session as required considering basic mechanics, safety and fitness outcomes. 3.7 Respond to clients experiencing difficulties and answer questions as required. 3.8 Complete session documentation and progress notes.

4. Evaluate program.	4.1 Monitor and evaluate exercise program at appropriate intervals. 4.2 Request and respond to feedback from clients. 4.3 Review own performance and identify areas needing improvement. 4.4 Identify aspects needing further emphasis or attention in future sessions. 4.5 Evaluate program or activities and discuss modifications to program. 4.6 Document and update records of evaluation and modification of programs.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

Skills	DESCRIPTION
Reading skills to:	- interpret fitness industry and equipment manufacturer guidelines - interpret pre-exercise health screening results and documentation.
Oral communication skills to:	use active listening and questioning techniques to determine client preferences and offer and explain suitable exercises and programs.
Numeracy skills to:	- calculate heart rate and use exercise intensity guidelines, including rate of perceived exertion - determine availability and appropriate timing for area use - determine safe and effective timing within sessions and programs.
Learning skills to:	maintain current knowledge of fitness training methods and equipment.
Problem-solving skills to:	modify session and program as required with consideration and awareness of expected training adaptations specific to client.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for SISFFIT003 Instruct fitness programs

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role. This must include period(s) totalling at least eight hours comprising at least eight different client contact sessions, and:

- plan, document, implement and evaluate at least five fitness programs using the principles of program design to suit the needs of clients with goals related to health-related components of fitness
- plan, document, implement and evaluate at least three circuit training sessions with interrelated components
- conduct sessions that individually or cumulatively incorporate:
 - demonstration, explanation, and instruction in the following:
 - cardiovascular exercises
 - dynamic warm-up and cool-down components
 - resistance exercises:
 - squat
 - static lunge
 - push-up
 - triceps dips
 - prone back extension
 - shoulder press
 - abdominal crunches
 - bent over row
 - lateral raise
 - modified dead lift
 - prone hover
 - flexibility exercises – static and dynamic stretches
 - injury prevention strategies specific to client needs and program
- modify programs for clients, addressing at least three of the following:
 - technical requirements

- changing needs due to fitness adaptations
- changing goals
- client needs, objectives, likes and dislikes
- technical difficulty adjustments of exercises.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- legislative and regulatory requirements regarding fitness programs, sessions and circuit sessions:
 - work health and safety/occupational health and safety
 - duty of care
- organisational policies and procedures in regards to:
 - pre-session screening
 - overcrowding
 - ventilation and/or climate control
 - hygiene
 - participant to instructor ratio
 - emergency
 - risk management
 - standards of personal presentation
 - participant's clothing and footwear
 - use, care and maintenance of equipment
- principles of program design:
 - FITT
 - overload
 - progression
 - specificity
- fitness program planning for improvement of health-related components of fitness:
 - body composition
 - muscle endurance
 - muscle strength
 - cardiorespiratory endurance
 - flexibility

- program design and variables relevant to health-related components of fitness and factors affecting program design
- components of a circuit training session plan:
 - phases:
 - preparation
 - conditioning
 - recovery
 - adaptation
 - rest intervals
 - required equipment
 - floor plan for equipment arrangement
- circuit training session planning considerations and inclusions:
 - equipment
 - layout
 - number of participants
 - phases of session
- training methods and consideration of intensity, program types, sets and reps, circuits, matrices, super-sets, pre-fatigue and interval training
- benefits of fitness sessions and circuit sessions
- contraindications and precautions to participation in session, and suitable modification options for participants where the safety of the participant is not compromised
- exercises and programming requirements for:
 - flexibility:
 - dynamic or active range of motion
 - static
 - muscular endurance and strength:
 - balance and coordination
 - body weight
 - equipment
 - cardiorespiratory endurance
- effects of different exercises on the major body systems:
 - cardiovascular
 - muscular
 - nervous

- skeletal
- methods of monitoring exercise intensity, techniques and progression:
 - heart rate
 - rate of perceived exertion
 - observation of technique
 - completed sets and repetitions
 - loads lifted
- manufacturer and exercise equipment specifications for safe use and techniques
- signs and symptoms of exercise intolerance
- motivational techniques and exercise adherence strategies.

Assessment Conditions

Skills must be demonstrated in:

- a fitness industry workplace or simulated environment with clients with real or simulated health and fitness goals..

Assessment must ensure access to:

- legislation and organisational policies and procedures in relation to fitness programs and circuit training
- industry endorsed risk stratification procedures.

Assessment must ensure use of:

- a variety of fitness industry standard equipment:
 - resistance
 - free weights
 - machines
 - proprioception and stability training equipment
 - cardiovascular training
- an appropriate area for the delivery of circuit training sessions
- client record forms
- documented session plans with inclusion of identified modifications/adjustments needed
- clients; these can be:
 - clients in an industry workplace, or
 - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment within a training organisation.

Assessment activities that allow the individual to:

- develop a variety of fitness programs over a period of time suitable for ensuring adequate time for the client to achieve several health-related components of fitness goals
- demonstrate ability to instruct a variety of circuit sessions, catering for :
 - beginners, intermediate and advanced participants
 - low and high impact.

Assessors must satisfy the Standards for Registered Training Organisation's requirements for assessors, and:

- have achieved a Certificate IV in Fitness or above; and
- have at least 1 year consecutive post qualification fitness industry experience in the application of the skills and knowledge of the Certificate IV in Fitness.

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=1ca50016-24d2-4161-a044-d3faa200268b>.

SISFFIT013 Instruct exercise to young people aged 13 to 17 years

Modification History

N/A

Application

This unit describes the performance outcomes, skills and knowledge required to plan, instruct and evaluate exercise for young people aged thirteen to seventeen years. It requires the ability to supervise young people using fitness facilities and relevant equipment to promote functional capacity and fitness.

It involves using industry endorsed risk management protocols when determining the provision of suitable exercise services. This may include guidance from relevant medical or allied health professionals.

This unit applies to personal trainers who work in a variety of fitness locations such as fitness, leisure and community centres. These individuals typically work autonomously in controlled and uncontrolled fitness environments.

Work is performed according to relevant legislation including working with children or vulnerable people checks, and organisational policies and procedures.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

Nil

Competency field(s)

Fitness

Unit sector(s)

Fitness

Elements and Performance Criteria

Elements	PERFORMANCE CRITERIA

Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify fitness requirements.	1.1 Consider and discuss needs, expectations and preferences using suitable questioning techniques. 1.2 Review and advise participant and parent or carer of outcomes of pre-exercise health screening procedures. 1.3 Refer participant to medical or allied health professionals as required. 1.4 Select and use appropriate baseline functional capacity or fitness assessments, as required. 1.5 Identify potential barriers to participation. 1.6 Develop and document client profile for re-evaluation purposes.
2. Plan exercise session.	2.1 Determine type of training, training methods and equipment required to achieve participant goals. 2.2 Gain parent or carer consent for participation in specified exercise program. 2.3 Develop and document program plans that incorporate participant goals, abilities, and stage of growth and development within instructional information. 2.4 Develop customised training sessions that include a variety of exercises and equipment to meet participant needs.
3. Instruct exercise session.	3.1 Allocate sufficient space, assemble resources and check equipment for safety and maintenance requirements. 3.2 Provide clear exercise instructions and confirm participant understanding. 3.3 Demonstrate exercises, techniques and equipment to participant. 3.4 Monitor participation and performance to identify signs of exercise intolerance and modify as required. 3.5 Select and use communication techniques that encourage and support participants. 3.6 Modify session as required considering basic mechanics, safety and fitness outcomes.

	• 3.7 Respond to participants experiencing difficulties and answer questions as required. • 3.8 Complete session documentation and progress notes.
• 4. Evaluate exercise session.	• 4.1 Monitor and evaluate exercise session at appropriate intervals. • 4.2 Evaluate exercise session according to participant, parent or carer feedback, professional judgement and outcomes of sessions. • 4.3 Review own performance and identify areas needing improvement. • 4.4 Identify aspects needing further emphasis or attention in future sessions. • 4.5 Evaluate program or activities and discuss modifications to future sessions. • 4.6 Document and update records of evaluation and modification.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

Skills	DESCRIPTION
Reading skills to:	• interpret equipment manufacturer guidelines to determine: ○ appropriate use of equipment and facilities to instruct children and adolescents ○ required adaptations to equipment, facilities or exercise to maximise safety, participation and enjoyment of sessions • comprehend organisational policies and procedures regarding roles and responsibilities in exercise prescription and supervision of children and adolescents within the fitness facility or organisation.
Oral communication skills to:	• provide accurate information to children, adolescents, and parents or carers • interact with children, adolescents and parents or carers in an appropriate manner • encourage children and adolescents to participate in an active lifestyle and exercise program.

Numeracy skills to:	work within time schedules of facilities and program requirements.
Learning skills to:	maintain knowledge of current industry methods of pre-exercise screening, baseline assessments of fitness and functional capacity and exercise training methods for children and adolescents.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Unit Mapping Information

Assessment Requirements for SISFFIT013 Instruct exercise to young people aged 13 to 17 years

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- conduct age and skill appropriate baseline assessments:
 - functional motor skills
 - cardiovascular
 - strength
 - agility
 - flexibility
- plan, implement and evaluate at least five fitness programs for young people that reflect appropriate developmental stages, age and ability variations that incorporate:
 - appropriate selection and monitoring of a range of gym-based cardiovascular and resistance equipment, according to industry guidelines
 - demonstration, explanation, and instruction of exercises relevant to age group
 - suitable order and sequence of activities
 - session components that target the needs and goals of the individual
 - suitable duration, intensity, volume
 - appropriate music selection, where appropriate
 - developmental stages of children and adolescents and age variations in physical, mental and social abilities
 - monitoring of client intensity, techniques, posture and safety
 - technique correction
- use the following communication skills:
 - clear verbal communication
 - modelling and demonstration
 - motivational techniques.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- legislative and regulatory requirements regarding safe and appropriate conduct of exercise for children and young adolescents:
 - work health and safety/occupational health and safety
 - duty of care
 - working with children and/or vulnerable people
 - privacy
 - anti-discrimination
- organisational policies and procedures in regards to:
 - industry endorsed risk management protocols, exercise implications and referral requirements
 - ventilation and/or climate control
 - hygiene
 - emergency
 - risk management
 - standards of personal presentation
 - participant's clothing and footwear
 - use, care and maintenance of equipment
 - equipment use and maintenance
 - client supervision
 - incident reporting
- exercise programming and progression principles:
 - FITT
 - overload
 - specificity
 - phasing
 - warm-up
 - conditioning
 - cool down
- health-related components of fitness:
 - cardiorespiratory endurance
 - muscular endurance

- muscular strength
 - flexibility
 - body composition
- functional exercises for motor skills related to participant needs:
 - hopping, jumping, throwing, kicking, running, walking, skipping
 - agility, proprioception, balance, reaction time and speed based exercises
- purpose and use of gym equipment:
 - free weights
 - pin-loaded resistance equipment
 - skipping ropes
 - balls, including medicine and fit balls
 - resistance bands
 - mats
 - cardiovascular equipment, for example treadmill and stepper
- anatomy and physiology related to children and adolescents:
 - thermoregulation
 - cardiovascular system
 - musculoskeletal system
 - nervous system
 - respiratory system
- principles of paediatric and exercise science to enable selection of exercises appropriate to participant characteristics and needs:
 - growth and maturation
 - coordination development and control
 - stability
 - posture in children
 - fundamental skills
 - aerobic capacity
- stages of growth and development in children and adolescents to enable effective planning of programs and selection of exercises:
 - physical
 - social
 - emotional
- exercise implications of age and stages of growth and development:

- changes in growth rate
 - effect of exercise on growth and development
 - social development
 - physiological characteristics of the child through developmental stages
 - session structures for different ages and/or abilities
 - coordination and motor development
 - communication and instructional skill difficulties
 - behavioural change and social needs
 - exercise requirements for different stages of development
- signs and symptoms of major types of injuries typical to children and young adolescents:
 - sprains
 - osteochondroses (severs, patellofemoral pain syndrome, legg-calve-perthes)
 - shoulder instability
 - joint hypermobility
- injury risks related to exercise participation of children and young adolescents
- motivational techniques which incorporate:
 - goal setting
 - positive feedback
 - foundation of play in exercise prescription
- signs and symptoms of exercise intolerance and appropriate management strategies
- the medical and allied health sector to enable appropriate recommendations or referrals be made to parents or carers.

Assessment Conditions

Skills must be demonstrated in:

- a fitness industry workplace or simulated environment that offers a variety of appropriate services and facilities suitable for youth aged 13-17 years.

Assessment must ensure use of:

- a variety of equipment appropriate for use by children and young adolescents
- industry endorsed risk stratification procedures
- organisational policies and procedures related to working with children
- session plan templates with space to identify modifications/adjustments needed
- participants aged 13-17 years; these can be:

- participants in the workplace, or
- individuals who participate in project activities, role plays or simulated activities, set up for the purpose of assessment, within a training organisation.

Assessment must ensure access to:

- manufacturer guidelines on equipment safety and usage.

Assessment activities that allow the individual to:

- use fitness industry endorsed risk stratification procedures and conduct baseline assessments suitable for adolescents aged 13 years and over:
 - functional motor skills, i.e. hopping, jumping, throwing, kicking, running, walking, skipping
 - cardiovascular endurance
 - muscle strength and endurance
 - agility
 - flexibility
 - body composition, if appropriate.

Assessors must satisfy the Standards for Registered Training Organisation's requirements for assessors, and:

- have achieved a Diploma of Fitness or above; and
- have at least 1 year consecutive post qualification fitness industry experience in the application of the skills and knowledge of the Diploma of Fitness.

Link

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=1ca50016-24d2-4161-a044-d3faa200268b>.

SISFFIT014 Instruct exercise to older clients

Modification History

N/A

Application

This unit describes the performance outcomes, skills and knowledge required to plan, instruct and evaluate exercise for male clients aged forty five and over, and female clients aged fifty five and over. It requires the ability to provide instruction of exercise programs aimed at improving health and fitness for older clients, with consideration of aspects of healthy ageing. It also covers promotion of incidental physical activity to clients to minimise the risk of developing sedentary lifestyle behaviours. It involves using industry endorsed risk stratification procedures when determining the provision of suitable advice and referral requirements.

This unit applies to fitness instructors who work in a variety of fitness locations such as fitness, leisure and community centres. These individuals typically work independently with some level of autonomy in a controlled environment.

Work is performed according to relevant legislation and organisational policies and procedures.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit sector(s)

Fitness

Elements and Performance Criteria

Elements	Performance criteria

Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify client fitness requirements.	1.1 Consider and confirm client needs, expectations and preferences using suitable questioning techniques. 1.2 Review and advise client of outcomes of pre-exercise health screening procedures. 1.3 Refer client to medical or allied health professionals as required. 1.4 Select and use appropriate baseline functional capacity or fitness assessments, as required. 1.5 Identify common barriers to exercise participation by older clients. 1.6 Recognise and explain benefits of exercise for older populations and the role of exercise in reducing risks associated with ageing. 1.7 Receive guidance from medical or allied health professionals for exercise participation, as required. 1.8 Develop and document client profile for re-evaluation purposes.
2. Develop program plans.	2.1 Identify settings and program considerations that support safe and sustainable exercise participation for older clients. 2.2 Determine type of training, training methods and equipment required to achieve client goals. 2.3 Develop and document program plans that incorporate instructional information and guidance from medical or allied health professionals if required. 2.4 Explain benefits of exercise and anticipated structural and physiological adaptations as they relate to client goals and needs. 2.5 Develop customised training sessions that include a variety of exercises and equipment to meet client needs. 2.6 Discuss and confirm client understanding of potential signs and symptoms of intolerance contraindications to exercise and recommended precautions.

• 3. Instruct exercise session.	• 3.1 Allocate sufficient space, assemble resources and check equipment for safety and maintenance requirements. • 3.2 Provide clear exercise instructions and confirm client understanding. • 3.3 Demonstrate exercises, techniques and equipment to client. • 3.4 Explain any precautions for exercise relevant to client age, ability and risk status. • 3.5 Monitor participation and performance to identify signs of exercise intolerance and modify as required. • 3.6 Monitor client intensity, techniques, posture and safety, and modify program as required. • 3.7 Seek ongoing guidance from, or refer client to, medical or allied health professionals, as appropriate. • 3.8 Select and use communication techniques that encourage and support clients. • 3.9 Modify session as required considering basic mechanics, safety and fitness outcomes. • 3.10 Respond to clients experiencing difficulties and answer questions as required. • 3.11 Complete session documentation and progress notes.
• 4. Evaluate program.	• 4.1 Monitor and evaluate exercise program at appropriate intervals. • 4.2 Provide written and verbal feedback to medical or allied health professionals, as required. • 4.3 Request and respond to feedback from clients. • 4.4 Review own performance and identify areas needing improvement. • 4.5 Identify aspects needing further emphasis or attention in future sessions. • 4.6 Evaluate program or activities and discuss modifications to program. • 4.7 Document and update records of evaluation and modification of programs.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

Skills	DESCRIPTION
Reading skills to:	interpret and evaluate pre-exercise screening and baseline assessment results.
Oral communication skills to:	explain course of action, including referral and fitness services, as required.
Numeracy skills to:	- use heart rate calculations or other monitoring techniques during training, where relevant - use body mass index calculations during pre-exercise screening, where relevant.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Unit Mapping Information

		of clients, and number and duration of sessions. Knowledge Evidence updated with significant additions and deletions.	

Assessment Requirements for SISFFIT014 Instruct exercise to older clients

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role. This must include period(s) totalling at least five hours comprising at least five different client contact sessions and:

- use industry endorsed pre-exercise screening tools and risk stratification processes to identify the risk level of at least ten older clients
- prepare referral letters to relevant medical or appropriate allied health professionals with supporting pre-exercise health screening documentation for at least two older clients
- plan, document, implement and evaluate suitable exercise programs within scope of practice for older clients:
 - three clients that don't require guidance or instruction provided by medical or allied health professionals
 - two clients in response to guidance or instruction provided by medical or allied health professionals
- conduct sessions that incorporate:
 - appropriate selection and monitoring of a range of equipment appropriate for the client's functional ability, according to industry guidelines
 - demonstration, explanation, and instruction of exercises
 - injury prevention strategies specific to client needs and to minimise the risk of falls
 - suitable order and sequence of activities
 - session components that target the needs and goals of the individual
 - suitable duration, intensity, volume
 - ongoing clear and constructive feedback to clients and, where required, medical or allied health professionals
 - use of evidence based exercise adherence strategies
 - minimise the risk of falls
 - variations and structure suitable to the needs of the older client
 - provision of hydration and rest opportunities as required

- explanation of the role of exercise and incidental physical activity in prevention of chronic diseases and functional decline that may or may not be associated with ageing and reducing the risk of falls
- modify programs for clients, addressing at least three of the following:
 - technical requirements
 - changing needs due to fitness adaptations
 - changing goals
 - client needs, objectives, likes and dislikes
 - technical difficulty adjustments of exercises
 - medical or allied health professional feedback
- conduct periodic ongoing evaluation of outcomes from fitness programs in accordance with the established program goals and industry best practice.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- legislative and regulatory requirements regarding specific population exercise participation:
 - privacy
 - anti-discrimination
 - work health and safety/occupational health and safety
 - duty of care
- organisational policies and procedures in regards to specific population exercise participation:
 - industry endorsed risk management protocols, exercise implications and referral requirements
 - overcrowding
 - ventilation and/or climate control
 - hygiene
 - emergency
 - standards of personal presentation
 - participant's clothing and footwear
 - use, care and maintenance of equipment
- precautions to exercise relevant to the older adults in accordance with industry guidelines where applicable
- signs and symptoms of exercise intolerance and appropriate management strategies

- situations where cessation of exercise program is required, this may include but is not limited to:
 - chest pain at rest or during activity
 - severe breathlessness/feeling faint/dizziness/loss of balance
 - unusual fatigue or shortness of breath
 - asthma aggravation/attack
 - significant muscle, bone or joint pain (beyond what is normally expected during exercise)
 - situation whereby the fitness professional makes a judgement that continuing the session is beyond their professional capabilities and scope of practice, and could potentially compromise client health and safety
- role of medical or allied health professionals for referral processes:
 - accredited exercise physiologist
 - accredited practising dietitian
 - chiropractor
 - continence nurse advisor
 - general practitioner
 - occupational therapist
 - osteopath
 - physiotherapist
 - podiatrist
 - psychologist
 - remedial massage therapist
 - sports doctor
- typical anatomical and physiological considerations for older adults
- common barrier to exercise participation:
 - perceived versus actual barriers
 - initial low fitness level
 - time and access to facilities
 - self-consciousness in client
- methods to overcome barriers to exercise adherence:
 - goal setting
 - feedback
 - healthy habits
- health-related components of fitness:

- body composition
 - flexibility
 - muscle strength
 - muscle endurance
 - cardiovascular endurance
- awareness of major types of injuries or conditions that may present in older clients that may require referral to a relevant medical or appropriate allied health professional:
 - sprains
 - musculoskeletal
 - cardiovascular
 - respiratory
 - other
- importance of strength and balance training in falls prevention
- exercise considerations in regards to the following components of ageing process, injuries and conditions:
 - physiological
 - biomechanical
 - psychological
 - behavioural change and social needs
 - lifestyle and cultural
 - general population characteristics
- awareness of the following injury risks or considerations that may be related to older clients:
 - inadequate skill and physical preparation
 - overtraining
 - biomechanics and exercise technique
 - physical and mental preparation
 - poor core and postural awareness
 - fatigue and recovery
 - history of falls
 - incontinence
- benefits of exercise related to older populations:
 - increased muscle mass
 - maintenance of bone health

- joint health
 - minimising fat levels to prevent disease
 - improved ability to function in everyday tasks and reduced risk of functional decline that is often associated with ageing
 - prevention of chronic disease related to sedentary lifestyles and ageing
 - reduced risk of falls
- concepts of healthy ageing
- risks of leading a sedentary ageing lifestyle:
 - falls
 - low bone density
 - cardiovascular deficiency.

Assessment Conditions

Skills must be demonstrated in:

- a fitness industry workplace or simulated environment with clients with real or simulated health and fitness goals.

Assessment must ensure access to:

- organisational policies and procedures related to older clients
- manufacturer guidelines on equipment safety and usage.

Assessment must ensure use of:

- a variety of equipment appropriate for use by older clients
- industry endorsed risk stratification procedures
- session plan templates with space to identify modifications/adjustments needed
- older clients; these can be:
 - older clients in an industry workplace, or
 - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation.

Assessment activities that allow the individual to:

- develop a variety of exercise programs for older clients over a period of time, ensuring adequate time to allow for the implementation of required modifications
- provide advice regarding fitness services and facilities for older clients
- complete and update client records:
 - pre-exercise screening documents
 - program as prescribed

- modifications
- client consent
- copies of any communications.

Assessors must satisfy the Standards for Registered Training Organisation's requirements for assessors, and:

- have achieved a Certificate IV in Fitness or above; and
- have at least 1 year consecutive post qualification fitness industry experience in the application of the skills and knowledge of the Certificate IV in Fitness.

Link

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=1ca50016-24d2-4161-a044-d3faa200268b>.

SISFFIT019 Incorporate exercise science principles into fitness programming

Modification History

N/A

Application

This unit describes the performance outcomes, skills and knowledge required to incorporate an understanding of exercise science principles into fitness instruction, programming and provision of fitness advice.

This unit applies to the use of physiological and mechanical principles in training to improve the health- and skill-related components of fitness of clients who have recently completed industry endorsed pre-exercise screening and risk stratification procedures.

This unit applies to personal trainers who typically work autonomously in controlled and uncontrolled fitness environments. Work is performed according to relevant legislation and organisational policies and procedures.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

Nil

Competency field(s)

Fitness

Unit sector(s)

Fitness

Elements and Performance Criteria

Elements	Performance criteria
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.

1. Consolidate understanding of exercise science principles.	1.1 Source and access information on exercise science principles relevant to fitness outcomes. 1.2 Discuss/explain how understanding of exercise science principles contribute to safe/optimum technique and skill development. 1.3 Use a wide range of terminology relevant to exercise science principles and fitness outcomes.
2. Apply knowledge to own professional practice.	2.1 Assess ways in which knowledge of exercise science principles may be used, adapted or challenged in instruction and provision of fitness advice. 2.2 Identify current and emerging knowledge of exercise science principles relevant to development of own professional practice. 2.3 Use knowledge of exercise science principles in day-to-day professional practice. 2.4 Modify approach to fitness programming activities and advice as required.
3. Maintain and update knowledge of exercise science principles.	3.1 Identify and use opportunities to update and expand own knowledge of exercise science principles. 3.2 Monitor response to changes made to own professional practice or instruction. 3.3 Continue to adjust own practice to optimise results.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.	
Skills	DESCRIPTION
Oral communication skills to:	provide clients with information related to exercise in a manner which they can understand and implement to their exercise sessions.
Numeracy skills to:	calculate forces and implement basic biomechanical concepts and mathematical equations

	interpret how equipment and body position can be changed to alter the forces applied to the body.
Learning skills to:	ensure application of up-to-date exercise science principles.
Problem-solving skills to:	- accommodate the changing anatomical and physiological responses of the body to exercise programming and instruction - determine how equipment and body position can be changed to alter the forces applied to the body.
Planning and organising skills to:	develop exercise programs that incorporate complex understanding of the anatomical and physiological adaptations that occur from different types of exercise.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for SISFFIT019 Incorporate exercise science principles into fitness programming

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role. This must include period(s) totalling at least five hours comprising at least five different client contact sessions in a mixture of controlled and uncontrolled environments, and:

- effectively use knowledge of exercise science principles to improve own instructional practice to plan and instruct at least five different client sessions
- conduct sessions that individually or cumulatively incorporate:
 - a variety of exercises which are targeted at health- and skill-related components of fitness, for achieving improvements and adaptations in:
 - muscle contractility and force
 - bone strength
 - nervous system activation
 - submaximal and resting heart rates
 - cardiovascular system adaptations
 - variations of exercise
 - with and without equipment
 - exercises to change:
 - joint action
 - stabilisation of the body
 - forces which act on the body during exercise
 - variations in the contribution of energy from three different energy systems
 - consideration of:
 - musculoskeletal anatomy and physiology
 - mechanical principles
 - physiology concepts.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures in relation to:
 - work health and safety/occupational health and safety
 - confidentiality of client information
 - ethical considerations
- industry endorsed client pre-exercise health screening processes
- industry endorsed risk stratification procedures, exercise implications and referral requirements
- the physiology related to achieving improvements in the following health-related components of fitness:
 - body composition
 - flexibility
 - muscle strength
 - muscle endurance
 - cardiorespiratory endurance
- the physiology related to achieving improvements in the following skill-related components of fitness:
 - balance
 - agility
 - power
 - speed
 - reaction time
 - coordination
 - proprioception
- musculoskeletal anatomy and physiology related to achieving improvements in fitness:
 - structure and function of the skeleton
 - joints in the skeleton
 - cellular structure of muscle fibres
 - sliding filament theory
 - effects of different types of exercises on muscle fibre types
 - muscle attachment sites for the major muscles of the body

- structure, range of motion and function of muscles, muscle groups and directional terms
- location and function of skeletal muscle involved in physical activity
- anatomical axis and planes with regard to joint actions and different exercises
- joint actions brought about by specific muscle group contractions
- joints/joint structure with regard to range of motion/movement and injury risk
- joint movement potential and joint actions
- the specific roles of the nervous system in controlling skeletal muscle:
 - the central nervous system
 - the peripheral nervous system including somatic and autonomic nervous systems
- nervous control and transmission of a nervous impulse
- structure and function of a neuron
- role of a motor unit
- function of muscle proprioceptors and the stretch reflex
- reciprocal inhibition and its relevance to exercise
- the neuromuscular adaptations associated with exercise training
- the benefits of improved neuromuscular coordination/efficiency to exercise performance
- concepts and principles of mechanics relevant to fitness:
 - forces which act on the body during exercise
 - common biomechanical terms
 - lever system in the body
 - structure and function of the stabilising ligaments and muscles of the spine
 - the local muscle changes that can take place due to insufficient stabilisation
 - the potential effects of poor posture on movement efficiency
 - the potential problems that can occur as a result of postural deviations
 - the benefits, risks and applications of the following types of stretching: static (passive and active) and dynamic
 - proprioceptive neuromuscular facilitation (PNF)
 - different exercises that can improve posture
- concepts and principles of the physiology of the body in relation to fitness:
 - the function of heart valves
 - coronary circulation
 - short and long term effects of exercise on blood pressure

- the effects of exercise on bones and joints including the significance of weight bearing exercise
- delayed onset muscle soreness (DOMS)
- exercises or techniques likely to cause delayed onset muscle soreness
- the short and long term effects of different types of exercise on muscle
- the benefits and limitations of different methods of monitoring exercise intensity including: talk test, rate of perceived exertion
- heart rate monitoring and the use of different heart rate zones
- physiological responses to physical activity in various environmental conditions
- the expected physiological responses, and appropriate action, to:
 - a single bout of exercise
 - physical activity in various environmental conditions
 - long term exercise programs
- scope of practice for a personal trainer.

Assessment Conditions

Skills must be demonstrated in:

- a fitness industry workplace or simulated environment with clients with real or simulated health and fitness goals.

Assessment must ensure access to:

- current industry endorsed best practice for client pre-exercise health screening and risk stratification
- organisational policies and procedures relevant to incorporating exercise science principles into fitness programming.

Assessment must ensure use of:

- informed consent forms
- client record forms
- planning and evaluation documentation with inclusion of identified improvements to professional practice
- clients; these can be:
 - clients in an industry workplace, or
 - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation.

Assessment activities that allow the individual to:

- demonstrate ability to incorporate exercise science principles into the instruction of sessions catering for:
 - beginners, intermediate and advanced participants
 - low and high impact.

Assessors must satisfy the Standards for Registered Training Organisation's requirements for assessors, and:

- have achieved a Diploma of Fitness or above; and
- have at least 1 year consecutive post qualification fitness industry experience in the application of the skills and knowledge of the Diploma of Fitness.

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=1ca50016-24d2-4161-a044-d3faa200268b>.

SISFFIT031 Implement injury prevention strategies

Modification History

N/A

Application

This unit describes the performance outcomes, skills and knowledge required to incorporate an understanding of injury prevention into fitness instruction, programming and provision of fitness advice. It involves the application of foundation knowledge and skills to support the encouragement of healthy posture, effective movement patterns and safe exercise technique.

This unit requires the ability to screen the injury risk of clients who have a history of current and/or recurrent injury, within the scope of practice as part of or following industry endorsed pre-exercise screening and risk stratification protocols.

It applies to advanced personal trainers who analyse the risk of injury, re-injury or development of avoidable injury complications as well as client response to injury prevention in consultation with relevant medical or allied health professionals. Advanced personal trainers typically work autonomously in controlled and uncontrolled fitness environments. Work is performed according to relevant legislation and organisational policies and procedures.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

Nil

Competency field(s)

Unit sector(s)

Fitness

Elements and Performance Criteria

Elements	Performance criteria

Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Consolidate understanding of injury prevention.	1.1 Source and access information on injury prevention relevant to prevention of recurrence or development of secondary injuries. 1.2 Source and analyse data on common injuries for clients using fitness services. 1.3 Use knowledge of injury prevention strategies in day-to-day professional practice. 1.4 Discuss/explain how understanding of injury prevention strategies contribute to safe/optimum technique and skill development. 1.5 Use a wide range of terminology relevant to injury prevention and fitness outcomes.
2. Analyse client risk of injury.	2.1 Conduct pre-exercise screening using industry endorsed screening protocols. 2.2 Review client history of injury, fitness level and risk factors that may lead to injury or complications for specific fitness activities. 2.3 Observe and analyse client movement and exercise capacity against accepted movement analysis and exercise technique standards. 2.4 Determine need for further functional evaluation and refer client to appropriate allied health professional as required.
3. Develop and implement injury prevention strategies.	3.1 Analyse various exercises, exercise techniques and fitness activities in relation to injury risk. 3.2 Develop injury prevention strategies in consultation with client, and appropriate allied health professional as required. 3.3 Explain injury prevention strategies to client. 3.4 Use preventative strategies in fitness instruction, programming and provision of advice to minimise likelihood of client injury. 3.5 Monitor client progress and seek guidance from, or provide feedback to, allied health professional as required.

	• 3.6 Adjust preventative measures and interventions in response to ongoing client monitoring. • 3.7 Maintain client records of injury prevention strategies.
• 4. Update knowledge of injury trends and prevention.	• 4.1 Evaluate own professional performance and identify potential improvements for future implementation of injury prevention strategies. • 4.2 Identify and use opportunities to update and expand own knowledge of injury trends, preventative measures and interventions. • 4.3 Monitor response to changes made to own professional practice or instruction. • 4.4 Continue to adjust own practice to optimise results.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

Skills	DESCRIPTION
Reading skills to:	• source and comprehend often complex injury prevention information and evidence-based research • interpret pre-exercise screening and fitness appraisal information.
Writing skills to:	• develop detailed client profiles and training records pertaining to prevention strategies and guidance received from medical or allied health professionals.
Oral communication skills to:	• use open and closed probe questioning techniques to: ○ determine client history of injury, fitness level and risk factors.
Teamwork skills to:	• collaborate with various professionals and client in order to establish and follow through with the most appropriate injury prevention strategies for the client, if required.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for SISFFIT031 Implement injury prevention strategies

Modification History

N/A

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role. This must include period(s) totalling at least fifteen hours comprising at least ten different client contact sessions, and:

- effectively use knowledge to improve own professional practice for injury screening, developing and monitoring injury prevention strategies in at least five different client sessions
- conduct sessions that individually or cumulatively incorporate:
 - pre-exercise screening using industry endorsed protocols, including:
 - history of injuries
 - current function at past injury sites
 - industry endorsed risk stratification
 - observation and analysis of the following using at least three functional movements for each client in line with accepted movement and technique standards:
 - functional movement capacity for at least five clients using exercise observation in all of the following movement patterns and scenarios:
 - push
 - pull
 - squat
 - lunge
 - rotate
 - overhead press
 - overhead pull
 - with and without equipment
 - loaded and unloaded
 - records of gait observation for at least three clients:
 - view:
 - anterior
 - posterior

- lateral
- gait cycle:
 - stance phase
 - swing phase
 - flight phase
 - double stance phase
- evaluation:
 - ankle
 - foot
 - tibia
 - knee
 - pelvis
 - trunk
 - head
 - arm
- foot cycle:
 - foot strike
 - mid-stance
 - toe off
- evaluation of:
 - sequence of movement at each joint
 - sequence of muscle actions
 - efficiency of movement
- evidence-based injury prevention strategies supported by relevant research regarding the cause and prevalence of commonly occurring injuries:
 - incidence
 - severity
 - prevalence
 - cause
 - type of injuries
- implementation of at least three injury prevention measures for each client, involving:
 - screening
 - protective equipment

- hydration and healthy eating
- pre-exercise, warm-up and stretching
- neural stretching
- recovery strategies and physical conditioning
- frequency and duration of participation
- correction of technique
- checking for adequate rehabilitation following injury
- appropriate management of risk factors that may predispose the client to further injury
- staff training about risks, referral and appropriate exercise programming for specific populations
- collaboration with medical or allied health professional, stakeholders and clients to develop, implement and monitor injury prevention and management strategies.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- legislation and regulatory requirements:
 - appropriate collection and storage of client information
 - application of legal and ethical limitations of own role
 - work health and safety/occupational health and safety
 - equipment safety standards
- defined roles and responsibilities of the advanced personal trainer and their ethical and legal limitations in implementing injury prevention and management strategies
- risk factors associated with a range of injuries:
 - personal and internal factors
 - past injury to an area
 - biomechanics
 - exercise technique
 - extrinsic factors
 - equipment used
 - gender
 - age – growing as well as ageing bodies
 - training load (acute and cumulative)
 - fitness level

- posture
 - trainer/instructor knowledge and skill
- basic principles of biomechanics to enable the application of appropriate techniques and strategies to minimise injuries for specific fitness activities
- correct execution and teaching points for the following primal functional movement patterns and the implications of results in regards to injury prevention strategies:
 - push
 - pull
 - squat
 - lunge
 - rotate
 - overhead press
 - overhead pull
- pathology of common injury for specific activities, and injury response and the phases of healing and repair:
 - primary or secondary
 - direct or indirect
 - acute or overuse
 - musculoskeletal
- anatomy of the musculoskeletal system and its supporting systems to enable the design of appropriate programs
- function of the neuromuscular system to enable design of appropriate programs
- range of motion and stretching techniques to enable inclusion of exercise variables to suit client functional capacity
- role of exercise and fitness in the prevention, management and rehabilitation of common exercise related injuries and falls prevention
- appropriate measures for joint mobility:
 - visual observation
 - use of appropriate equipment
 - joint specific range of movement
 - tests for specific joints
 - segmental mobility of vertebral section
 - active range
 - functional range
 - hypo or hypermobile joints

- contralateral
 - symptoms
- common types of re-occurring injuries:
 - sprains
 - strains
 - primary or secondary
 - direct or indirect
 - acute or overuse
 - musculoskeletal
- appropriate tests for muscular strength:
 - relative strength
 - muscular endurance including functional endurance
 - primal functional movement patterns and muscle activation for muscle groups used:
 - push
 - pull
 - squat
 - lunge
 - rotate
 - overhead press
 - overhead pull
- functional anatomy of joints:
 - glenohumeral:
 - bones
 - ligaments
 - related structures
 - muscles acting on the joint
 - elbow:
 - bones
 - ligaments
 - related structures
 - muscles acting on the joint
 - lumbo–sacral:
 - bones

- ligaments
 - muscles acting on the joint
- intervertebral:
 - bones
 - ligaments
 - muscles acting on the joint
- hip (coxal):
 - bones
 - ligaments
 - muscles acting on the joint
- knee (tibiofemoral and or patellofemoral):
 - bones
 - ligaments
 - related structures
 - muscles acting on the joint
- ankle (talocrural):
 - bones
 - ligaments
 - related structures
 - muscles acting on the joint
- bony landmarks:
 - mastoid process
 - spinous process of the vertebrae
 - spine of the scapula
 - inferior angle of the scapula
 - acromion process
 - coracoid process
 - xiphoid process
 - lateral epicondyle of humerus
 - head of the radius
 - styloid process
 - olecranon process
 - umbilicus
 - anterior superior iliac spine

- posterior superior iliac spine
- iliac crest
- ischial tuberosity
- greater trochanter
- lateral femoral condyle
- medial epicondyle
- lateral epicondyle
- superior border of the patella
- inferior border of the patella
- lateral malleolus
- medial malleolus
- calcaneus
- factors affecting movement patterns and exercise performance, including deviations in posture or functional limitations at commencement, during, at completion of exercise or movement:
 - asymmetrical muscle tone
 - range of movement and mobility of major joint complexes
 - spinal curvature – lordosis, kyphosis, scoliosis
 - scapula setting:
 - winging of scapula
 - anterior tipping/tilting
 - upward/downward rotation
 - pelvis position:
 - anterior/posterior
 - rotation
 - knee alignment:
 - varus/valgus
 - foot alignment:
 - internal/external rotation
 - pronation/supination
 - forward head
 - stability of major joint complexes
 - muscle strength and activation
 - neuromuscular control

- sitting/standing/supine positions
- processes for, and reasons for referral to appropriate medical or allied health professionals:
 - pain upon presentation to initial session/induction
 - history of uncontrolled/unresolved pain
 - pain during movement or exercise
 - static postural deviations
 - an inability to correct static or dynamic posture
 - restricted joint range of movement, strength imbalance or balance, stability or coordination concern that is limiting function
 - a diagnosed muscle, bone or joint problem with medical or allied health advice that the problem could be made worse by participating in physical activity/exercise
 - client history of an injury that has resulted in residual functional limitation
- industry endorsed scope of practice.

Assessment Conditions

Skills must be demonstrated in:

a fitness industry workplace or simulated environment with clients with real or simulated health and fitness goals.

Assessment must ensure access to:

- anatomical and physiological information and resources related to injury prevention
- anatomical models or images
- legislation and organisational policies and procedures in relation to injury prevention strategies.

Assessment must ensure use of:

- planning and evaluation templates with space to identify improvements to professional practice
- client record forms
- fitness industry standard equipment suitable for analysing client risk of injury and conducting range of movement tests
- industry endorsed client pre-exercise health screening and risk stratification tools
- at least four of the following postural screening equipment:
 - plumb line
 - grid
 - photographic technology

- video analysis
- tape measure
- goniometer
- flexometer
- plurimeter
- pressure biofeedback unit
- medical or allied health professionals for referral processes; these can be:
 - medical or allied health professionals in the workplace, or
 - individuals who participate in project activities, role plays or simulated activities, set up for the purpose of assessment, within a workplace or training organisation
- clients; these can be:
 - clients in an industry workplace, or
 - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation.

Assessment activities that allow the individual to:

- demonstrate ability to incorporate injury prevention knowledge into the instruction of sessions, catering for:
 - beginners, intermediate and advanced participants
 - low and high impact.

Assessors must satisfy the Standards for Registered Training Organisation's requirements for assessors, and:

- have achieved a Diploma of Fitness or above; and
- have at least 2 years consecutive post qualification fitness industry experience in the application of the skills and knowledge of the Diploma of Fitness.

TAEDEL402 Plan, organise and facilitate learning in the workplace

Modification History

N/A

Application

This unit describes skills and knowledge required to plan, organise and facilitate learning for individuals in a workplace, using real work activities as the basis for learning.

It applies to a person working as an entry-level trainer, teacher or facilitator or an employee, team leader or workplace supervisor responsible for guiding learning through work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

Delivery and facilitation

Elements and Performance Criteria

Element	Performance criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Establish effective work environment for learning	1.1 Establish, and agree upon, the objectives and scope of the work-based learning 1.2 Analyse work practices and routines to determine their effectiveness in meeting established learning objectives

	1.3 Identify, and address any workplace health and safety (WHS) implications of using work as the basis for learning
2. Develop a work-based learning pathway	2.1 Address contractual requirements and responsibilities for learning at work 2.2 Arrange for the integration and monitoring of external learning activities with the work-based learning pathway 2.3 Obtain agreement from relevant personnel to implement the work-based learning pathway
3. Establish the learning-facilitation relationship	3.1 Identify the context for learning and the individual's learning style 3.2 Select an appropriate technique or process to facilitate learning, and explain the basis of the technique to the learner 3.3 Develop, document and discuss an individualised learning plan with the learner 3.4 Access, read and interpret documentation outlining the WHS responsibilities of the various parties in the learning environment 3.5 Monitor supervisory arrangements appropriate to learner's levels of knowledge, skill and experience to provide support and encouragement and ensure learner's health and safety
4. Implement the work-based learning pathway	4.1 Explain the objectives of work-based learning, and the processes involved, to the learner 4.2 Sequence the introduction of workplace tasks, activities and processes to reflect the agreed work-based learning pathway 4.3 Encourage learner to take responsibility for learning and to self-reflect 4.4 Develop techniques that facilitate the learner's transfer of skills and knowledge
5. Maintain and develop the learning-facilitation relationship	5.1 Prepare for each session 5.2 Structure learning activities to support and reinforce new learning, build on strengths, and identify areas for further development 5.3 Observe learner cues, and change approaches where necessary, in order to maintain momentum 5.4 Practise ethical behaviour at all times 5.5 Monitor the effectiveness of the learning/facilitation relationship through regular meetings between the parties

6. Close and evaluate the learning-facilitation relationship	6.1 Carry out the closure smoothly, using appropriate interpersonal and communication skills 6.2 Seek feedback from the learner on the outcomes achieved, and the value of the relationship 6.3 Evaluate effectiveness of the work-based pathway against the objectives, processes and techniques used 6.4 Recommend improvements to work-based practice in light of the review process

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 1.3, 2.1, 3.1, 3.4, 3.5, 6.3	Accesses and interprets compliance information, contractual information, WHS information, and documents relevant to learning in the workplace, in the context of consultation and continuous improvement, to apply relevance to requirements
Writing	1.1, 2.3, 3.3, 4.1, 6.3	Develops and maintains documentation relevant to workplace learning, including learning plans and evaluations, in accordance with organisational and workplace requirements
Oral Communication	2.2, 3.3, 4.2, 5.5, 6.1	- Uses oral communication techniques to identify needs, build rapport, agree on learning plans, facilitate effective learning and monitor practice - Selects appropriate vocabulary adjusting language, tone and pace to maintain effective interactions, and to build and maintain engagement with individuals or groups
Navigate the world of work	1.3, 2.1, 5.4	Follows organisational protocols, policies and procedures in the management of records

		Recognises and responds to contractual and ethical requirements associated with own role
Interact with others	1.1, 2.3, 3.5, 4.3, 6.2	- Asks questions to clarify understanding, and seeks feedback and further information - Cooperates and collaborates with others as part of routine activities to achieve team results, and to confirm outcomes meet requirements
Get the work done	1.1-1.3, 2.1-2.3, 3.1-3.5, 4.1-4.4, 5.1-5.3, 5.5, 6.1-6.3	- Organises and completes work according to defined requirements, taking responsibility for decisions and sequencing tasks to achieve efficient outcomes - Uses systematic, analytical processes in complex, routine and non-routine situations, gathering information, and identifying and evaluating options based on organisational needs - Identifies and responds to problems and opportunities for improvement, considering options for different approaches - Uses information and communications technology (ICT) based tools to design work processes and to complete work tasks

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for TAEDEL402 Plan, organise and facilitate learning in the workplace

Modification History

N/A

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- preparing and facilitating work-based learning
- providing a minimum of two examples of developing work-based learning pathways, that include:
 - identifying needs for learning
 - analysing work practices, work environment and work activities
 - organising and allocating work in a way that reflects learning needs, and provides effective learning opportunities through work processes
- conducting a learning facilitation relationship:
 - with at least two individuals
 - demonstrating communication skills and flexibility
 - demonstrating one or more of the processes, or techniques, identified.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- systems, processes and practices within the organisation where work-based learning is taking place
- systems for identifying skill needs within the workplace
- different learning styles, and how to encourage learning for those who learn in different ways
- workplace health and safety (WHS) relating to the work role, including:
 - hazards relating to the industry and specific workplace
 - reporting requirements for hazards and incidents
 - specific procedures for work tasks
 - safe use and maintenance of relevant equipment
 - emergency procedures

- sources of WHS information.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment, and include access to any documentation relating to workplace procedures required by the candidate.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Link

Companion volumes, including implementation guides, are found on the national training register - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=35337905-785d-4f93-8777-e9991ad4c6c3>.

TLID2010 Operate a forklift

Modification History

N/A

Application

This unit involves the skills and knowledge required to operate a forklift in compliance with the relevant state/territory authority licence requirements and regulations, in a variety of operational contexts.

It includes checking forklift condition, driving forklift to fulfil operational requirements, and monitoring and maintaining forklift performance and site conditions.

Assessment of this unit will usually be undertaken within a licensing examination conducted by, or under the authority of, the relevant state/territory work health and safety (WHS)/occupational health and safety (OHS) authority.

Operation of a forklift is performed under some supervision, generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

Not applicable.

Competency field(s)

D - Load Handling

Unit sector(s)

N/A

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Check forklift condition	1	Condition of forklift is checked for compliance with WHS/OHS and workplace requirements for warning devices, manufacturer specifications and nature of load shifting task
	2	Attachments are checked to ensure appropriate adjustment and operation
	3	Mirrors and seats are adjusted for safe operation by driver
	4	Logbooks are checked and appropriate workplace documentation is completed in accordance with workplace requirements
2 Drive forklift	1	Forklift is started, steered, manoeuvred, positioned and stopped in accordance with regulations and manufacturer instructions
	2	Engine power is managed to ensure efficiency and performance and to minimise engine and gear damage
	3	Operational hazards are identified and/or anticipated and avoided or controlled through defensive driving and appropriate hazard control techniques
	4	Forklift is driven in reverse, maintaining visibility and achieving accurate positioning
	5	Forklift is parked, shut down and secured in accordance with manufacturer specifications, regulations and workplace procedures
3 Operate forklift to handle loads	1	Lifting task to be undertaken is appropriately planned, and correct lifting truck and attachments are selected
	2	Load is lifted, carried, lowered and set down in accordance with WHS/OHS legislation, manufacturer specifications and company procedures
4 Monitor site conditions	1	Hazards and traffic flow are identified when selecting the most efficient route and appropriate adjustments are made

		4 . 2	Site conditions are assessed to enable safe operations and to ensure no injury to people or damage to property, equipment, loads or facilities occurs
	Monitor and maintain forklift performance	5 . 1	Performance and efficiency of vehicle operation is monitored during use
		5 . 2	Defective/irregular performance and malfunctions are reported to relevant personnel
		5 . 3	Forklift records are maintained/updated in accordance with workplace procedures and legislative requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- checking and replenishing fluids, and carrying out lubrication processes
- communicating and working effectively with others
- completing relevant documentation
- ensuring forklift and its equipment are maintained in terms of service schedule and standard operating procedures
- identifying points of balance and safe lifting positions on a range of loads when operating a forklift (including accessories)
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring performance of forklift and its equipment, and taking appropriate action as required
- monitoring and prioritising work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with standard operating procedures
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment conforming to industry and WHS/OHS standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- efficient driving techniques
- engine power management and safe operating strategies
- forklift controls, instruments and indicators, and their use
- forklift handling procedures
- high risk work licence requirements
- operating hazards and related defensive driving and hazard control techniques
- operational emergency procedures
- pre-operational checks carried out on forklift and related action
- principles of stress management when driving a forklift
- relevant duty of care requirements for operating a forklift
- relevant WHS/OHS and environmental procedures and regulations
- site layout and obstacles
- workplace operating procedures.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

TLIP5037 Develop workplace policy and procedures

Modification History

N/A

Application

This unit involves the skills and knowledge required to develop and implement a workplace policy, and includes modifying the policy to suit changed circumstances.

It includes developing, communicating and implementing workplace policy as well as reviewing policy as required.

Work must be undertaken in accordance with relevant national, state/territory legislation, regulations and codes of practice.

This unit applies to people with managerial responsibilities who undertake work developing workplace strategies, including the development and implementation of policy and supporting procedures.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Develop workplace policy	1 . 1	Workplace policy requirements are identified
		1 . 2	Information is gathered from a range of sources to plan and develop policy
		1 . 3	Stakeholders are identified and consulted as a key component of the policy development process
		1 . 4	Policy option recommendations are made based on likely effectiveness, timeframes and cost
		1 . 5	Identified workplace policy requirements are reflected in policy developed
		1 . 6	Appropriate methods of implementation are agreed
2	Communicate workplace policy	2 . 1	Workplace policy and expected outcomes are promoted to key stakeholders
		2 . 2	Expected outcomes, activities to be undertaken and assigned responsibilities are communicated to those involved in implementing the policy
3	Implement workplace policy	3 . 1	Workplace policy implementation procedures are developed and communicated to stakeholders
		3 . 2	Strategies for continuous improvement are implemented
		3 . 3	Responsibility to use recording systems for tracking continuous improvement is established and assigned
4	Review workplace policy implementation	4 . 1	Outcomes are documented and feedback is provided to key personnel and stakeholders

		4 . 2	Outcomes of policy implementation are investigated
		4 . 3	Records to identify trends that may require remedial action are monitored and used to promote continuous improvement of performance
		4 . 4	Policy and or procedures are modified as required to ensure agreed improvements are made

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adjusting communication to suit different audiences
- communicating with stakeholders to discuss possible approaches to policy development and implementation, and contributing to resolving disputes among stakeholders
- consulting on and validating policy
- implementing strategy, as part of the policy, that has been devised, implemented and reviewed
- managing different points of view and dissenting stakeholders effectively
- planning, developing and implementing organisational policy that complies with legislative requirements
- preparing written reports using precise expression, language and structures suited to intended audience
- reading and evaluating complex and formal documents such as policy and legislation
- researching, analysing and presenting information
- responding effectively to diversity
- reviewing and improving policies by identifying improvements and benchmarking against industry best practice, and attempting new approaches over time
- working as a member of a team.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- best practice approaches relevant to own work area

- equal employment opportunity, equity and diversity principles, and work health and safety (WHS)/occupational health and safety (OHS) implications of policy being developed
- legislation, regulations and codes of practice applicable to industry and organisation
- quality assurance systems relevant to own organisation
- relevant industry standards
- relevant organisational policies, procedures and protocols.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.
