HLTCSD306B Respond effectively to difficult or challenging behaviour

Modification History

Unit Descriptor
This unit of competency describes the skills and knowledge required to respond effectively to difficult or challenging behaviour of clients and others. These skills are associated with handling difficult incidents rather than managing ongoing behaviour difficulties.

Application of the Unit
The unit will be suitable for work roles such as Security Officers, Care Assistance Workers and others exposed to difficult and challenging behaviour. Application of this unit should be contextualised to reflect any requirements, issues and practices specific to each workplace.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate this competency unit:

- This unit is most appropriately assessed in the workplace (simulating difficult or challenging behaviour) or in a simulated workplace and under the normal range of work conditions
- This unit can be assessed independently, but holistic assessment practice is encouraged with other related units of competency
- Assessment may be conducted on one occasion but should include a diverse range of sources of difficult and challenging behaviours, as may be expected in the workplace
- A diversity of assessment tasks is also essential for holistic assessment
Access and equity considerations:

All workers in the health industry should be aware of access and equity issues in relation to their own area of work.

All workers should develop their ability to work in a culturally diverse environment.

In recognition of particular health issues facing Aboriginal and Torres Strait Islander communities, workers should be aware of cultural, historical and current issues impacting on health of Aboriginal and Torres Strait Islander people.

Assessors and trainers must take into account relevant access and equity issues, in particular relating to factors impacting on health of Aboriginal and/or Torres Strait Islander clients and communities.
