ICPCBF3910 Use electronic monitoring systems (converting and finishing)

Release: 1

ICPCBF3910 Use electronic monitoring systems (converting and finishing)

Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 4.0.

Application

This unit describes the skills and knowledge required to use electronic monitoring systems for glue lines used in the container and carton sector of the industry, and for gatherers and folders used in the binding and finishing sector.

It applies to individuals who perform a range of defined tasks relating to the printing and graphic arts industry, and who may also provide some leadership and guidance to others with some limited responsibility for the output of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Converting, Binding and Finishing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Set up electronic monitoring system	1.1 Set parameters according to job specifications and enterprise procedures 1.2 Position monitoring system 1.3 Position ejection system 1.4 Position marking system
2. Run job and monitor production	2.1 Monitor and adjust glue line registration and glue application according to job specifications 2.2 Identify and rectify stoppages

ELEMENT	PERFORMANCE CRITERIA
	2.3 Monitor and review initial set-up parameters
3. Review production data	3.1 Monitor production rejects and identify causes 3.2 Evaluate data at the end of the product run 3.3 Complete required production records and enterprise documentation

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	Identifies and interprets text to establish job requirements from information contained within relevant procedures and specifications
Writing	Enters routine data associated with production processes according to organisational requirements
Self-management	Identifies and follows all enterprise procedures for operation of equipment
Planning and organising	Determines priorities and sequences steps involved in clearly defined, familiar tasks
Problem solving	Applies analytical processes to identify causes of production problems
Technology	Follows routine procedures for using digital technology by reading data from electronic monitoring and control systems

Unit Mapping Information

Supersedes and is equivalent to ICPCBF391 Use electronic monitoring systems (converting and finishing).
