Assessment Requirements for ICPDMT492

Create an extensible style sheet

Release: 2

Assessment Requirements for ICPDMT492 Create an extensible style sheet

Modification History

Release	Comments
Release 2	This version first released with ICP Printing and Graphic Arts Training Package Version 1.1. Version created to correct mapping table information.
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- create extensible style sheets for electronic publishing or online documents.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the application of Document Style Semantics and Specification Language (DSSSL), where it can be used to develop an extensible style sheet
- explain the intended purpose of Extensible Stylesheet Language (XSL)
- explain when to use an Extensible Mark-up Language (XML) in preference to Hyper Text Mark-up Language (HTML)
- describe the ways to use both XML and HTML with the one set of data
- describe how Personalised Print Mark-up Language (PPML) relates to XML
- describe a work-based example of the application of metadata and/or PRISM
- outline the essential differences between metadata and PRISM.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the digital media technologies field of work and include access to industry standard software and relevant hardware.

Assessors must satisfy NVR/AQTF assessor requirements.
