Assessment Requirements for ICPPRP231 Manually combine spot colour and basic four-colour images

Assessment Requirements for ICPPRP231 Manually combine spot colour and basic four-colour images

Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- prepare and assemble TWO designated layouts, using a variety of selected image elements, following job brief and according to listed performance criteria (finished film and artwork must be laid-down and spaced according to printer's imposition identified in job specifications and registration of combined images accurately secured)
- find and use information relevant to the task from a variety of information sources
- demonstrate skill of combining safe light and room light environments using various light sensitive materials, exposure and processing systems.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain how printing processes affect requirements for combining
- list appropriate films used for contacting and duplicating
- outline procedure for establishing basic exposure data for contact emulsions
- describe spreading and choking requirements for preparation of a mask
- identify techniques used to control degree of spread and choke
- detail requirements of an effective pin registration system
- name main types of pin register systems and outline their applications\
- list manuals, safety and other documentation relevant to this task and identify where are they kept and what information is included.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the Pre-Press field of work and include access to special purpose tools, equipment and industry software packages.

Assessors must satisfy NVR/AQTF assessor requirements.
