Assessment Requirements for ICPPRP286 Scan images for reproduction

Release: 1

Assessment Requirements for ICPPRP286 Scan images for reproduction

Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- use desktop flat-bed scanner and reproduce THREE line originals, ensuring quality of scanned image meets specified quality standards and final media requirements
- locate and use task-relevant information from a variety of information sources
- ensure underlying skill of scanning images are transferable across design and pre-press sectors
- identify substrate for reproduction and ensure quality of scanned image is suitable for the identified printing processes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe relevant printing processes and electronic media
- identify scanning requirements
- describe characteristics of a line original
- outline factors that determine line scanning resolution
- name controls that exist within the software for line scanning
- name essential hardware specifications and software requirements for line scanning
- outline specific software requirements to process and output the image
- outline work health and safety (WHS) concerns of operating a scanner and standards that relate to working for periods of time on computers
- list manuals, safety and other documentation relevant to this task, and identify where are they kept and what information is included in these documents.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the Pre-Press field of work and include access to special purpose tools, equipment and industry software packages.

Assessors must satisfy NVR/AQTF assessor requirements.
