Assessment Requirements for ICPSCP281 Finish screen print products

Release: 1

Assessment Requirements for ICPSCP281 Finish screen print products

Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- finish TWO different screen printed jobs and apply final processing requirements according to manufacturer and job specifications, and enterprise procedures.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain techniques that are used to determine defects and irregularities and how they can be rectified
- outline the features of a quality screen printed job
- describe the health and safety concerns when finishing print jobs and handling the printed product
- list the equipment, tools and materials used for final processing and the processes that are undertaken as indicated in the job specifications
- describe monitoring and maintaining the quality of the finished product throughout final processing
- describe the handling techniques that are used to prevent damage to the processed product
- outline the correct methods for disposing of waste material
- explain the post-production cleaning methods that are used
- name the type and frequency of maintenance that should be performed on equipment
- outline the final quality checking methods
- explain the method used for maintaining and recording job information
- identify required manuals, safety and other documentation and briefly outline the relevant information in each source.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the screen printing field of work and include access to special purpose tools, equipment and materials.

Assessors must satisfy NVR/AQTF assessor requirements.
