Assessment Requirements for ICPSUP263

Perform basic industry calculations

Release: 1

Assessment Requirements for ICPSUP263 Perform basic industry calculations

Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- perform numerical calculations involving basic arithmetic, percentages and geometry to calculate costs, dimensions, weights, areas, density and volumes
- complete activities using basic measuring tools used in the printing industry
- document the results of calculations.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain how to perform quick approximations of expected answers
- describe parallax errors and how they affect measurements
- explain how acceptable tolerances in measurement are determined
- list the measuring tools available in the workplace and briefly describe the function of each tool.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the Support field of work and include access to special purpose tools, equipment and materials.

Assessors must satisfy NVR/AQTF assessor requirements.
