**Assessment Requirements for ICTCBL211
Install an above ground equipment
enclosure**

Release: 1

Assessment Requirements for ICTCBL211 Install an above ground equipment enclosure

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- prepare to install an enclosure using construction plans
- use appropriate tools and equipment to construct and connect an enclosure according to plans, specifications, and work health and safety (WHS) requirements
- complete reports and document alterations to plans as appropriate.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list the plant, tools and equipment required for construction
- describe enclosure construction methods
- describe footings and foundations
- read, interpret and make basic modifications to plans
- read and interpret legislation, codes of practice and other formal agreements that impact on the work activity
- identify specific WHS requirements relating to the activity and site conditions
- identify typical issues and challenges that occur on site.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – cabling field of work and include access to:

- sites where enclosure construction and connection may be conducted

- construction tools and equipment currently used in industry
- relevant regulatory and equipment documentation that impacts on construction.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
