Organise and monitor cabling to ensure
compliance with regulatory and industry
standards**

Release: 1

Assessment Requirements for ICTCMP201 Organise and monitor cabling to ensure compliance with regulatory and industry standards

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- organise, schedule and establish communication protocols for cabling work
- monitor work activity and reallocate as required to meet specifications, work health and safety (WHS) and ensure compliance with relevant regulations and standards
- ensure cabling work is completed and records are maintained.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete unit requirements safely and effectively, the individual must:

- describe and explain Australian Communications and Media Authority's (ACMA) Competency Requirements for Telecommunications Cabling Provider Rules, legislation, codes of practice and other formal agreements that impact work activity
- describe and explain cable installations
- list features and operating requirements of test equipment
- describe and explain information required to operate equipment according to a test specification
- explain manufacturer's requirements for safe operation of equipment
- identify specific work health and safety (WHS) requirements relating to activity and site conditions
- describe test methods and performance requirements
- identify and explain typical issues and challenges that occur on site.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the Telecommunications – Compliance field of work and include access to:

- sites where staff monitoring may be required
- supervision rules
- use of tools, materials and equipment currently used in industry
- relevant regulatory and equipment documentation that impact work activities.

Note: Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Refer to the ICT Implementation Guide Companion Volume for recommended assessor details.
