# Assessment Requirements for ICTCYS405 Develop cyber security incident response plans

## Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- develop a plan in response to cyber security incidents for each of the following areas:
  - organisation's network
  - organisation's system
  - Wi-Fi network
  - an application
  - a human error.

In the course of the above, the candidate must:

- establish at least two test scenarios in each plan
- develop at least two test metrics and at least two baselines in each plan
- adhere to organisational procedures.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- features and principals of networking, Wi-Fi networks and applications
- procedures in testing cyber security incident test plans
- metrics and baselines used in cyber security incident test plans
- roles and responsibilities of test committees
- organisational procedures and requirements applicable to developing cyber security incident response plans, including:
  - documenting established requirements and incident response plans
  - establishing response committees
  - testing methodologies

- establishing baselines and metrics
- cyber incidents and scenarios.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- software required in testing cyber security incident response plans
- required hardware and its components
- Wi-Fi network
- an application
- text-editing software
- information applicable to organisational environment, processes and previous cyber security incidents.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
