**Release: 1**

## ICTDRE402 Integrate data delivery modes

### Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

### Application

This unit describes the skills and knowledge required to connect and configure a media centre that integrates signal for distribution.

It applies to individuals working as installers in the digital reception sector integrating services from multiple sources and in multiple formats (radio frequency, digital, data, and voice) for both inward and outbound signals into complex customer systems.

No licensing, legislative or certification requirements apply at the time of publication.

### Unit Sector

Telecommunications – Digital Reception Technology

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Evaluate existing customer equipment	1.1 Obtain relevant legislation, codes, regulations and standards for compliance when conducting work 1.2 Notify customer to verify installation order and arrange for site access to comply with security arrangements 1.3 Notify supervisor of identified safety hazards at worksite and complete job safety analysis (JSA) before commencing work 1.4 Use test equipment to verify customer equipment is operational prior to installation 1.5 Assess equipment capabilities and connection types against customer requirements for suitability 1.6 Assess customer premises against installation plan according to

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
	<p>client specifications and by-laws, standards and regulations</p> <p>1.7 Produce an installation diagram using appropriate drawing symbols to indicate connection details of customer system</p>
<p>2. Design and build a multiple service customer system solution</p>	<p>2.1 Determine connection requirements and pathways for each service to be connected and locate a signal source for each service</p> <p>2.2 Confirm compatibility for proposed pathway options connections to existing system and for optimal performance</p> <p>2.3 Produce preliminary connection plan with block diagrams and specifications to optimise system performance</p> <p>2.4 Evaluate connection plan design to determine any local spectrum management issues arising from multiple services</p> <p>2.5 Produce final connection design with amendments to eliminate local spectrum management contentions, if required</p> <p>2.6 Select and connect cables according to connection plan using appropriate materials</p> <p>2.7 Activate equipment to check network operation</p> <p>2.8 Resolve connection issues that arise during build phase and modify connection plan</p>
<p>3. Provide enterprise equipment with multiple services</p>	<p>3.1 Determine optimal method of connection to each service source according to client specifications</p> <p>3.2 Connect service to system following work health and safety (WHS) and environmental requirements, and test to identify and rectify connection issues</p> <p>3.3 Notify service provider if problems cannot be rectified locally, and escalate unresolvable connection issues accordingly</p>
<p>4. Configure services and optimise customer system across multiple services</p>	<p>4.1 Conduct client specific and customer set-up operations for each service</p> <p>4.2 Test performance of enterprise and customer equipment across a range of settings</p> <p>4.3 Test integrated performance of system across multiple services</p> <p>4.4 Record and evaluate test results to satisfy manufacturer's operational margins</p> <p>4.5 Tune customer equipment for optimal integrated performance across multiple services</p> <p>4.6 Restore site to original condition and customer satisfaction</p>
<p>5. Train customer and</p>	<p>5.1 Conduct customer training appropriate to equipment, services and</p>

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
complete contract documentation	<p>vendor literature</p> <p>5.2 Complete appropriate records and update administration systems according to enterprise policy</p> <p>5.3 Record and store test results in appropriate database, leaving copies on site according to enterprise policy</p> <p>5.4 Provide warranties to customer in required format where work and equipment are subject to warranty</p> <p>5.5 Prepare invoices and other financial documentation where required and present to customer</p> <p>5.6 Obtain authorised signatures on required documentation to confirm acceptance of completed work</p>

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

<b>Skill</b>	<b>Performance Criteria</b>	<b>Description</b>
Reading	1.1, 1.4-1.6, 2.4, 3.1, 4.2, 5.1	<ul style="list-style-type: none"> <li>Interprets textual information from appropriate sources to identify relevant and key information</li> </ul>
Writing	1.3, 1.7, 2.3, 2.5, 4.4, 5.2, 5.3, 5.5	<ul style="list-style-type: none"> <li>Uses clear, specific and industry-related terminology to complete workplace documentation</li> </ul>
Oral Communication	1.2, 1.3, 3.3, 5.1	<ul style="list-style-type: none"> <li>Articulates clearly using appropriate language for environment, and uses listening techniques to confirm understanding</li> </ul>
Numeracy	4.3, 5.5	<ul style="list-style-type: none"> <li>Takes readings and measurements and interprets results</li> <li>Uses simple calculations to prepare financial documentation</li> </ul>
Navigate the world of work	1.1, 5.4,	<ul style="list-style-type: none"> <li>Takes responsibility for following safe, sustainable, appropriate, and efficient workplace procedures</li> </ul>
Interact with others	5.6	<ul style="list-style-type: none"> <li>Liaises with customer to sign-off on completed work when completed to customer's requirements</li> </ul>
Get the work	1.3, 2.1, 2.2, 2.6-2.8, 3.2, 3.3, 4.1, 4.3,	<ul style="list-style-type: none"> <li>Plans, organises and implements tasks efficiently to meet customer requirements</li> </ul>

done	4.5, 4.6	<ul style="list-style-type: none"> <li>• Makes decisions on technical requirements</li> <li>• Advises service provider of any problems that cannot be resolved locally</li> </ul>
------	----------	---
