Assessment Requirements for ICTICT410 Conduct post-implementation ICT system reviews

Release: 1

Assessment Requirements for ICTICT410 Conduct post-implementation ICT system reviews

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- plan a review of a system after the implementation has been completed and has been operational for some time
- carry out the review
- document the results.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify client business domain
- identify current industry accepted hardware and software products
- discuss implementation process and issues
- compare review techniques
- identify specific project concerned
- discuss role of stakeholders and the degree of stakeholder involvement in a review.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general information and communications technology (ICT) industry, and include access to:

- a personal computer (PC) where software installation may be performed
- use of software currently used in industry
- documents detailing organisational style guide or policies

- server and workstation hardware and software
- an internet connection
- an operational system and specifications.

Assessors must satisfy NVR/AQTF assessor requirements.
