ICTICT525 Identify and manage the implementation of industry specific technologies

Release: 1

ICTICT525 Identify and manage the implementation of industry specific technologies

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Application

This unit describes the skills and knowledge required to identify, plan and manage the implementation of industry specific technologies at an identified industry standard.

The unit applies to those engaged in ongoing review and research to identify, manage and evaluate the implementation of industry technologies or techniques to improve aspects of the organisation's activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

General ICT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Analyse and plan implementation of industry specific technologies	1.1 Identify technologies specific to industry sector 1.2 Evaluate relevance of industry specific technologies to organisational requirements 1.3 Plan implementation of industry specific technologies to meet organisational requirements
2. Manage application of industry specific technology	2.1 Coordinate testing of industry specific technology 2.2 Implement specific features and functions of industry specific technology to provide a suitable solution to an identified problem 2.3 Access and use sources of information relating to

ELEMENT	PERFORMANCE CRITERIA
	industry specific technology
3. Review, analyse and evaluate industry specific technology performance	3.1 Analyse implementation of industry specific technology for performance and usability 3.2 Review and evaluate benefits of implemented technology to organisation 3.3 Determine environmental considerations involved with the use of new technology 3.4 Seek feedback from users where appropriate

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Identifies and interprets technical online and hard copy documentation containing complex terminology and diagrams to identify industry specific technologies that will benefit the organisation
Writing	<ul style="list-style-type: none"> Uses vocabulary, grammatical structures and terminology and document structure relevant to the job role and organisation Uses questioning strategies, when developing feedback gathering documentation
Oral Communication	<ul style="list-style-type: none"> Uses listening and questioning techniques for seeking and responding to feedback
Self-management	<ul style="list-style-type: none"> Identifies legislation and regulations relevant to own rights and responsibilities and demonstrates understanding of the implications of these when planning work Uses systematic, analytical processes in complex, non-routine situations, setting goals, gathering relevant information and identifying and evaluating options against agreed criteria
Planning and organising	<ul style="list-style-type: none"> Develops plans to manage relatively complex, non-routine tasks with an awareness of how they may contribute to longer term operational and strategic goals
Technology	<ul style="list-style-type: none"> Demonstrates a sophisticated understanding of principles, concepts, language and practices associated with the digital world and uses these to troubleshoot and understand the uses and potential of new technology

Unit Mapping Information

Supersedes and is equivalent to ICTICT514 Identify and manage the implementation of current industry specific technologies.
