

ICTICT527 Develop and maintain blockchain solutions

Release: 1

ICTICT527 Develop and maintain blockchain solutions

Modification History

Release	Comments
	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Application

This unit describes the skills and knowledge required to identify, develop and maintain blockchain solutions to specified business needs.

It applies to those in roles, including senior software developers or blockchain developers, who perform the planning, development and implementation of new and existing technologies to business models in the Information and Communications Technology (ICT) and related industries.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

General ICT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
Determine blockchain solution requirements	1.1 Establish blockchain objectives, purpose and requirements according to organisational needs
	1.2 Identify organisational processes and transactional types suitable for blockchain technology
	1.3 Identify organisational use-case according to organisational needs
	1.4 Determine legislation and organisational policies and procedures for blockchain and determine impact on solution
Design blockchain solution components	2.1 Gather data according to organisational needs 2.2 Design integration workflow according to organisational need

Approved Page 2 of 4

	2.3 Determine security and platform for blockchain solution 2.4 Document design plan according to organisational needs
3. Implement blockchain solution	3.1 Set up required platform according to design plan 3.2 Initialise blockchain solution according to vendor specifications 3.3 Implement required consensus portal 3.4 Execute smart command in required platform according to blockchain solution 3.5 Debug and scale blockchain solution
4. Maintain blockchain solution	 4.1 Test performance against organisational needs and requirements 4.2 Determine and conduct maintenance tests 4.3 Determine and document maintenance schedule 4.4 Submit documentation to required personnel and seek and respond to feedback

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Learning	Monitors outcomes of decisions, considering results and identifying key concepts and principles that may be adaptable in the future
Numeracy	Uses mathematical formulae to calculate required equipment, undertake measurements and determine response times
Oral communication	Obtains information to confirm requirements and responsibilities distinctively using appropriate industry language
Reading	Recognises and interprets technical, manufacturer and organisational documentation to determine and confirm job requirements
Writing	Prepares documentation outlining maintenance schedule according to specified requirements
Planning and organising	Operates from a broad conceptual plan, developing the operational detail in stages, regularly reviewing priorities and performance during implementation, and identifying and addressing issues
Problem solving	Uses nuanced understanding of context to recognise anomalies and subtle deviations to normal expectations, focusing attention and remedying problems as they arise
Self-management	Takes full responsibility for identifying and considering relevant organisational protocols and requirements

Approved Page 3 of 4

SKILL	DESCRIPTION
	Uses systematic processes, setting goals, gathering required information and identifying and evaluating options against agreed criteria
Technology	Demonstrates a sophisticated understanding of principles, concepts, language and practices associated with the digital world

Unit Mapping Information

No equivalent unit. New unit.
