Release: 1

Assessment Requirements for ICTICT604 Identify and implement business innovation

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- define the organisation's strategic directions
- develop innovations to assist the business
- produce a cost-benefit analysis of suggested innovations
- develop an implementation plan for the innovations.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the culture of the business versus traditional business models
- identify internal and external sources of information
- outline legal, ethical and security issues relating to business strategies
- outline records management principles
- identify relevant legislation from levels of government that effect business operation, especially regarding workplace health and safety (WHS) and environmental issues, equal opportunity, industrial relations and anti-discrimination
- outline the structure of the business.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general information and communications technology (ICT) industry, and include access to:

- a range of business documents covering vision, mission statements and strategic directions

- a site where business opportunities for innovation may be implemented.

Assessors must satisfy NVR/AQTF assessor requirements.
