# Assessment Requirements for ICTICT610 Manage copyright, ethics and privacy in an ICT environment

## Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- analyse legislation and standards related to copyright, professional conduct and privacy in the information and communications technology (ICT) industry
- contribute to the review and development of code of ethics, and monitor the workplace to ensure code of ethics is appropriate and being applied
- contribute to the review and development of a privacy policy, and monitor the workplace to ensure the policy is appropriate and being applied
- ensure the adherence to copyright, ethics and privacy in a team.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the Australian Computer Society Code of Ethics
- identify and explain federal and state or territory legislation and policy relevant to an ICT environment relating to:
  - access and equity
  - copyright and intellectual property
  - workplace health and safety (WHS)
  - privacy
- describe the processes and procedures by which an organisation communicates its policies and procedures
- outline organisational requirements for customer service
- summarise typical ICT system security systems and procedures.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general ICT industry and include access to:

- relevant organisational policies
- legislation and standards documentation
- industry codes of practice.

Assessors must satisfy NVR/AQTF assessor requirements.
