Assessment Requirements for ICTICT617 Lead the evaluation and implementation of current industry specific technologies

Assessment Requirements for ICTICT617 Lead the evaluation and implementation of current industry specific technologies

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

* identify, document and lead a review of at least one new and established and at least one emerging technology.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

* industry standard technology trends and directions in Information and Communications Technology (ICT) sector
* features and uses of industry standards relevant to new technologies
* industry standard vendor products features, functions and uses relevant to existing and new technologies
* information gathering techniques relevant to evaluating new technologies
* general features, capabilities and application of industry standard hardware and software products.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

* a site where industry specific technologies may be used
* industry specific technologies currently used in industry.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
