

ICTNWK402 Install and configure virtual machines for sustainable ICT

Release: 1

ICTNWK402 Install and configure virtual machines for sustainable ICT

Modification History

| Release | Comments | | |
|---------|--|--|--|
| | This version first released with ICT Information and Communications Technology Training Package Version 1.0. | | |

Application

This unit describes the skills and knowledge required to develop and implement virtualisation technologies with the goal of providing a more sustainable information and communications technology (ICT) environment.

It applies to individuals who work in the network area of organisations and are responsible for the use of virtual machines to increase sustainability.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Networking

Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA | | |
|--|---|--|--|
| Elements describe the essential outcomes. | Performance criteria describe the performance needed to demonstrate achievement of the element. | | |
| 1. Identify virtualisation benefits and features | 1.1 Research and determine government and industry guidelines and policies for use of desktop and server virtualisation | | |
| | 1.2 Identify benefits of virtualisation of desktop and server environments | | |
| | 1.3 Identify available features of current virtualisation software | | |
| | 1.4 Select virtualisation solution based on current and future needs of the client | | |
| 2. Install and configure virtualisation software | 2.1 Identify, clarify and organise requirements of the client relating to virtualisation technologies, following organisational | | |

Approved Page 2 of 5

| ELEMENT | PERFORMANCE CRITERIA | | | |
|---|---|--|--|--|
| | requirements | | | |
| | 2.2 Identify hardware, software and infrastructure components required to be installed and configured to meet technical requirements | | | |
| | 2.3 Install and configure software to provide support for virtualisation of desktop and server operating systems | | | |
| | 2.4 Configure virtualisation software application features to accommodate required functionality, relating to client and business needs | | | |
| 3. Install and configure virtual machines | 3.1 Install virtual machine consistent with client, commercial and business requirements | | | |
| | 3.2 Configure virtual machine consistent with client, commercial and business requirements | | | |
| | 3.3 Test functionality of installed virtual machine | | | |
| 4. Configure virtual networks of virtual | 4.1 Configure internet protocol (IP) addressing to match chosen network configuration | | | |
| machines | 4.2 Configure virtual network as host only configuration | | | |
| | 4.3 Configure virtual network as bridged configuration | | | |
| | 4.4 Configure virtual network as network address translation (NAT) configuration | | | |
| | 4.5 Configure services to operate under current network configuration | | | |
| | 4.6 Test functionality of virtual network configuration | | | |
| 5. Back up and restore | 5.1 Back up virtual machine state on shutdown | | | |
| virtual machines | 5.2 Restore state on start-up of virtual machine | | | |
| | 5.3 Back up virtual hard drive and software configuration files | | | |
| | 5.4 Restore virtual hard drive and software configuration files | | | |

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

| Skill | Performance Criteria | Description |
|-------|-------------------------|-------------|
| | Cincina | |

Approved Page 3 of 5

| Reading | 1.1, 2.1, 3.1, 3.2 | • | Recognises and interprets industry and government guidelines and organisational policy to determine job requirements |
|----------------------------|---|---|--|
| Oral Communication | 1.4, 2.1 | • | Elicits information and client business needs by using listening and questioning techniques |
| Navigate the world of work | 2.1 | • | Complies with explicit organisational policies and procedures |
| Get the work done | 1.2-1.4, 2.1, 2.3, 2.4, 3.1-3.3, 4.1-4.6, 5.1-5.4 | • | Determines job priorities, resources and equipment, and works logically and systematically to undertake clearly defined and familiar tasks. Takes responsibility for routine decision making by selecting from a range of predetermined options in routine situations, identifying and taking some situational factors into account. Initiates standard procedures when adapting configuration procedures, depending on differing operational contingencies, risk situations and environments. Understands key principles and concepts underpinning the design and operation of digital systems and tools, and applies these when troubleshooting existing technology and when seeking to understand the potential impact of new technology. In familiar contexts, responds promptly and intuitively to problems involving virtualised machine environments requiring immediate attention. |

Unit Mapping Information

| Code and title current version | Code and title previous version | Comments | Equivalence status |
|--|---------------------------------|---|--------------------|
| ICTNWK402 Install and configure virtual machines for sustainable ICT | | Updated to meet Standards for Training Packages | Equivalent unit |
