

# ICTNWK417 Build an enterprise wireless network

Release: 1

## ICTNWK417 Build an enterprise wireless network

## **Modification History**

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

# **Application**

This unit describes the skills and knowledge required to build an enterprise, community or mesh wireless network within and outside buildings.

It applies to individuals with excellent task management, interpersonal and information and communications technology (ICT) skills working in senior design roles in the networking area, who are required to develop complex wireless networks for organisations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

#### **Unit Sector**

Networking

#### **Elements and Performance Criteria**

ELEMENT	PERFORMANCE CRITERIA		
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.		
1. Confirm client	1.1 Identify and clarify organisational requirements of the client		
requirements and network equipment required	1.2 Evaluate client requirements along with business needs in order to translate into technical requirements		
	1.3 Review existing network design documentation to ensure it is authorised, current and complete		
	1.4 Identify network topology		
	1.5 Identify the components required to be installed to meet the technical requirements		
	1.6 Contact vendors and service suppliers to obtain specifications and availability of identified components		

Approved Page 2 of 5

ELEMENT	PERFORMANCE CRITERIA		
	1.7 Ensure preliminary work is completed within the required timeframe		
2. Prepare for installation	2.1 Ensure client and users are aware of date and time of installation		
	2.2 Gather, prepare and check installation and safety equipment		
	2.3 Assess on-site safety arrangements for installers and users		
3. Select, install and	3.1 Select appropriate hardware based on identified components		
configure access points and other wireless devices	3.2 Install and configure hardware to provide wireless access to network		
	3.3 Ensure connections are secured against intrusion or data access by unauthorised persons, are safe for users, and are protected from the environment		
	3.4 Configure security, monitoring, logging and quality of service features consistent with standards and protocols		
	3.5 Ensure test equipment is calibrated		
	3.6 Test wireless network systems performance and verify that it meets enterprise requirements and is consistent with standards and protocols		
4. Select, install and	4.1 Select appropriate antennas based on design plan		
configure antennas	4.2 Safely install and configure antennas to provide wireless access to network		
	4.3 Measure and assess signal strength within and outside building		
	4.4 Resolve and report radio frequency interference issues		
5. Select, install and	5.1 Identify possible security threats to assets		
configure antennas	5.2 Configure client server and helper security devices		
	5.3 Configure associations and filters		
6. Train users	6.1 Provide training for users to establish and manage network connections		
	6.2 Resolve pairing and log-on difficulties for users		
	6.3 Inform users of wireless network etiquette and traffic capacity issues		
	6.4 Advise users of help desk contact details		
7. Monitor and administer	7.1 Monitor wireless network performance using diagnostic		

Approved Page 3 of 5

ELEMENT	PERFORMANCE CRITERIA	
wireless network	tools, including appropriate software	
	7.2 Debug networking issues to maintain trouble-free wireless connection	
	7.3 Document current settings and store securely, consistent with commercial and business requirements	
8. Finalise build process	8.1 Review network for performance issues, planned maintenance or upgrade requirements	
	8.2 Report to client with network documentation and recommendations for performance issues	
	8.3 File documentation according to organisational guidelines	

## **Foundation Skills**

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 1.3, 1.5, 3.4, 3.6, 4.1, 8.3	Gathers, interprets and analyses information from a range of sources and identifies relevant and key information
Writing	4.4, 7.3	Prepares workplace documentation that incorporates an evaluation of information and specialised language in a format and style appropriate to a specific audience
Oral Communication	1.1, 1.2, 1.6, 2.1, 4.4, 6.1, 6.3, 6.4, 8.2	<ul> <li>Uses active listening and observational and questioning techniques to identify information and confirm, clarify or revise understanding</li> <li>Articulates requirements and strategies clearly and distinctively, using technical language appropriate to audience and environment</li> </ul>
Numeracy	3.5, 4.3	Interprets numerical information to calibrate equipment and measure and assess signal strength
Navigate the world of work	8.3	Complies with explicit organisational policies and procedures

Approved Page 4 of 5

	Interact with others	6.1, 6.3, 6.4, 8.2	•	Recognises and applies the protocols governing what to communicate, with whom and how in a range of different contexts
done  3.1-3.6, 4.1, 4.2, 4.4, 5.1-5.3, 6.2, 7.1-7.3, 8.1, 8.3  planning processes to ensure work is completed according to time constraints ar an increasingly intuitive understanding of context to identify relevant information and risks  Understands the importance of secure information in relation to own work and ta personal responsibility for identifying and managing risk  Understands the purposes, specific function and key features of common digital system and tools, and operates them effectively to complete routine tasks		3.1-3.6, 4.1, 4.2, 4.4, 5.1-5.3, 6.2, 7.1-7.3,	•	Uses a combination of formal, logical planning processes to ensure work is completed according to time constraints and an increasingly intuitive understanding of context to identify relevant information and risks  Understands the importance of secure information in relation to own work and takes personal responsibility for identifying and managing risk  Understands the purposes, specific functions and key features of common digital systems and tools, and operates them effectively to complete routine tasks  Initiates standard procedures when solving a broad range of ICT problems  Uses familiar digital systems and tools to access, organise, analyse and store

# **Unit Mapping Information**

Code and title current version	Code and title previous version	Comments	Equivalence status
	ICANWK417A Build an enterprise wireless network	Updated to meet Standards for Training Packages	Equivalent unit
