ICTNWK422 Install and manage servers

Release: 1

ICTNWK422 Install and manage servers

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Application

This unit describes the skills and knowledge required to install and manage a server. It includes the ability to conduct initial configuration and testing, administration, software distribution and updates, profiling and troubleshooting.

It applies to individuals with Information and Communications Technology (ICT) skills, involved in network management, server administration and similar roles.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Networking

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to install a server	1.1 Identify required server applications and features according to organisational requirements 1.2 Determine required operating system features and network service outputs according to task requirements 1.3 Access and back up local data according to organisational policies and procedures 1.4 Arrange access to site and advise users of deployment and down time expectations
2. Install server	2.1 Create disk partitioning scheme, file systems and virtual memory according to business needs 2.2 Install and configure network operating system, server applications and network services according to task

ELEMENT	PERFORMANCE CRITERIA
	requirements 2.3 Reconnect and reconfigure connectivity devices 2.4 Patch operating system and applications, restore security and reliability requirements 2.5 Restore local data to new server according to organisational requirements
3. Configure and administer the server	3.1 Configure network directory service according to organisational requirements, policies and procedures 3.2 Create and manage security and network access to users according to organisational requirements 3.3 Configure user environment using operating system policies and scripts 3.4 Create directory structure and quotas according to organisational requirements
4. Test server	4.1 Test server against task requirements 4.2 Seek and respond to feedback on server performance from required personnel 4.3 Test and validate any changes or additions against organisational requirements
5. Finalise documentation and clean-up worksite	5.1 Document configuration and operational changes made to server according to organisational policies and procedures 5.2 Document server status according to organisational procedures 5.3 Dispose of excess equipment according to organisational and e-waste policies

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Learning	<ul style="list-style-type: none"> Keeps up to date with organisational and e-waste recycling policies and procedures relevant to own rights and responsibilities
Numeracy	<ul style="list-style-type: none"> Identifies and interprets numerical data associated with devices, networks, servers and component specifications
Oral communication	<ul style="list-style-type: none"> Uses listening and questioning techniques to confirm information and requirements and gather feedback

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none">Identifies, interprets and analyses online and hard copy documentation containing complex ICT related terminology, acronyms and concepts
Writing	<ul style="list-style-type: none">Prepares required documentation conveying explicit recommendations, requirements and information using specific and relevant language
Planning and organising	<ul style="list-style-type: none">Uses organisational policies and procedures in context when negotiating, planning and undertaking work
Problem solving	<ul style="list-style-type: none">Responds intuitively to problems requiring immediate attention, quickly drawing on experience to devise solutions
Technology	<ul style="list-style-type: none">Identifies purpose, needs and limitations when selecting devices and applications for different tasks

Unit Mapping Information

Supersedes and is equivalent to ICTNWK401 Install and manage a server.
