Assessment Requirements for ICTPMG402 Schedule installation of customer premises equipment

Assessment Requirements for ICTPMG402 Schedule installation of customer premises equipment

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- access relevant information and plan an installation project
- schedule work for the installation team according to the plan
- organise supply of materials in a timely manner
- arrange for connection of network services
- monitor and apply contingencies if required.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss the importance and requirements of Australian Communications and Media Authority (ACMA) licensing
- outline the use of computers and application of software programs used in the telecommunications industry
- outline industry cabling practices
- identify work health and safety (WHS) procedures
- outline the stages of project management including:
  - phases of project management
  - roles and responsibilities within project management
  - project reporting
- identify telecommunications components and assemblies
- identify telecommunications customer premises equipment (CPE).

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – project management field of work and include access to:

- a work site where scheduling may be conducted
- relevant hardware and software.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
