Assessment Requirements for ICTPMG603 Manage ICT project planning

Release: 1

Assessment Requirements for ICTPMG603 Manage ICT project planning

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop an information and communications technology (ICT) project management plan
- select appropriate methodology
- develop project schedule
- develop a project budget
- establish budgetary controls.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline current and emerging industry practice in relation to:
    - estimation techniques and methods
    - planning techniques and methods
    - project management methodologies
    - system development methodologies
- explain the impact of business needs on project management, including implications for project control and expected returns on business investment.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the ICT project management field of work and include access to:

- industry software packages

- an organisation's identified problem, opportunity or unfulfilled legislative need.

Assessors must satisfy NVR/AQTF assessor requirements.
