ICTPRG605 Manage development of technical solutions from business specifications

Release: 1

ICTPRG605 Manage development of technical solutions from business specifications

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Application

This unit describes the skills and knowledge required to manage the process of compiling client business specifications to produce business solutions.

It applies to those who manage complex technology projects within the Information and Communications Technology (ICT) industry.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Programming and software development

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine business requirements	1.1 Determine and document technical and organisational requirements 1.2 Identify, summarise and document organisational business model 1.3 Determine, manage and document key stakeholder requirements
2. Evaluate impact of technical requirements	2.1 Review and document business problems, opportunities and objectives 2.2 Review hardware, software and network requirements 2.3 Determine and document processes requiring changed by the business solution

ELEMENT	PERFORMANCE CRITERIA
	2.4 Determine and document expected impact of technical requirements on organisational business activities
3. Produce technical business solutions	3.1 Determine and document solution implementation costs 3.2 Determine and document recommendations for supplier products 3.3 Finalise and document technical solutions and align to organisational requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

SKILL	DESCRIPTION
Numeracy	<ul style="list-style-type: none"> Uses mathematical formulas and calculations to estimate and plan project costs
Oral communication	<ul style="list-style-type: none"> Uses listening and questioning techniques to convey client requirements, and articulate complex information using specific language required for audience
Reading	<ul style="list-style-type: none"> Demonstrates knowledge of and interpretation of complex technical and operational documentation, to determine and confirm job requirements
Writing	<ul style="list-style-type: none"> Prepares reports, required documentation expressing ideas and solutions and correspondence for specific audiences according to organisational procedures
Teamwork	<ul style="list-style-type: none"> Actively identifies the requirements of important communication exchanges, selecting required channels, format, tone and content to suit the purpose and audience Fosters a collaborative culture within own sphere of influence, facilitating a sense of commitment and cohesion, and highlighting, and using the strengths of those involved
Planning and organising	<ul style="list-style-type: none"> Operates from a broad conceptual plan, developing the operational detail in stages, regularly reviewing priorities and performance during implementation, and identifying and addressing issues
Problem solving	<ul style="list-style-type: none"> Uses a range of strategies to store, access and organise virtual information, recognising that design choices will influence what information is retrieved, and how it may be interpreted, and used Is aware of the importance of knowledge, monitoring and controlling access to digitally stored and transmitted information Uses a mix of intuitive and formal processes to identify key

SKILL	DESCRIPTION
	<p>information and issues, evaluate alternative strategies, anticipate consequences, implementation issues and contingencies</p> <ul style="list-style-type: none">• Uses a nuanced knowledge of context to adapt varied business procedures to requirements, depending on operational contingencies, risk situations and environments
Self-management	<ul style="list-style-type: none">• Uses systematic processes, setting goals, gathering required information and identifying and evaluating options against agreed criteria
Technology	<ul style="list-style-type: none">• Demonstrates sophisticated knowledge of principles, concepts, language and practices associated with the digital world and uses these to troubleshoot, and understand, the uses and potential of new technology

Unit Mapping Information

Supersedes and is equivalent to ICTPRG602 Manage the development of technical solutions from business specifications and ICTTEN516 Produce technical solutions from business specifications.
