

ICTRFN601 Monitor the capacity of and recommend changes to the cellular mobile network

Release: 1

ICTRFN601 Monitor the capacity of and recommend changes to the cellular mobile network

Modification History

Release	Comments	
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.	

Application

This unit describes the skills and knowledge required to evaluate, analyse and make recommendations at the system design level on antenna installation specifications.

It applies to individuals working as technical officers and engineers who undertake mobile network performance measurements and report on mobile capacity enhancement to senior management.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications - radio frequency networks

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Monitor capacity of cellular mobile network	 1.1 Monitor traffic levels from network management system 1.2 Use approved enterprise plans to identify planned network growth 1.3 Obtain client forecast data from marketing 1.4 Apply identified data against capacity trigger criteria 1.5 Determine coverage and cell parameters
2. Make recommendations	2.1 Identify requirements for additional capacity 2.2 Recommend changes or additions to frequency parameters and

Approved Page 2 of 4

relating to capacity changes	submit to planning personnel		
	2.3 Assess capacity of transmission path, switch resources and recommend improvements, noting transmission medium		
	2.4 Manipulate traffic through switch parameter settings as a means of relieving traffic congestion		
	2.5 Determine cost of proposed changes and undertake studies of appropriate return on investment (RoI)		
3. Assess capacity changes	3.1 Organise tests and studies to ensure that increased capacity adequately caters for traffic flow		
	3.2 Make recommendations for further change to network should increased capacity not meet need		

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description	
Reading	1.2	Recognises and interprets technical information from relevant sources to determine all specifications and frameworks	
Writing	2.2, 2.3, 3.2	Uses clear, specific and industry related terminology to complete and update workplace documentation and when presenting recommendations to relevant personnel	
Oral Communication	3.2	 Liaises with internal and external personnel about technical and operational matters using specific and relevant language and listening Uses questioning techniques to confirm understanding 	
Numeracy	1.4, 2.3, 2.5	 Undertakes mathematical calculations to project costs and calculate returns on investments Uses advanced mathematics methods to manipulate complex numerical data 	
Get the work done	1.1, 1.3-1.5, 2.1, 2.3, 2.4, 3.1	 Determines job priorities and works logically and systematically to undertake clearly defined and familiar tasks Understands the ways in which digital systems and tools are used and recognises all operational applications 	

Approved Page 3 of 4

 Takes responsibility for decision making by selecting from a range of predetermined options routine situations, identifying and taking some situational factors into account Diagnoses faults in different situations, adapts procedures and modifies activities depending or operational contingencies, risk situations and environments 	
 Implements actions according to a predetermined plan, making slight adjustments if necessary and addressing some unexpected issues 	

Unit Mapping Information

Code and title current version	Code and title previous version	Comments	Equivalence status
ICTRFN601 Monitor the capacity of and recommend changes to the cellular mobile network	ICTRFN6098B Monitor the capacity of and recommend changes to the cellular mobile network	Updated to meet Standards for Training Packages	Equivalent unit
