**Assessment Requirements for ICTSAS407
Conduct pre-installation audit for software
installation**

Release: 1

Assessment Requirements for ICTSAS407 Conduct pre-installation audit for software installation

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- assess capability of hardware on which new system is to be installed
- assess capacity of hardware to run the installed system
- confirm new systems will operate cooperatively with existing systems
- prepare an audit report and relevant documentation
- distribute the documentation.

Note: Evidence must be provided for at least TWO installations.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- compare and contrast current industry accepted hardware and software product
- analyse a client business domain and the current information and communications technology (ICT) system functionality
- describe the key features of:
 - quality assurance practices
 - risk management practices
- describe the role of stakeholders and the degree of stakeholder involvement.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work and include access to:

- special purpose tools, equipment, materials and industry software packages
- documentation tools

- operational system and system specifications
- technical specifications of software to be installed.

Assessors must satisfy NVR/AQTF assessor requirements.
