

ICTSS00076 Wireless LAN and IP Network Installation Skill Set

ICTSS00076 Wireless LAN and IP Network Installation Skill Set

Modification History

Release	Comments
Release 4	This version released with ICT Information and Communications Technology Training Package version 6.0.
	Release 4 created to reflect the updated units of competency.
Release 3	This version released with ICT Information and Communications Technology Training Package Version 5.0.
Release 2	This version released with ICT Information and Communications Technology Training Package version 4.0.
	Release 2 created to update the new unit code ICTNWK421.
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Description

This skill set addresses the skills and knowledge required in the installation of a secure wireless local access network (LAN) and associated networking elements.

Pathways Information

This skill set provides credit towards ICT41219 Certificate IV in Telecommunications Engineering Technology.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Approved Page 2 of 3

Skill Set Requirements

```
ICTNWK421 Install, configure and test network security
ICTNWK432 Build an enterprise wireless network
ICTWHS202 Work safely in a radio frequency electromagnetic radiation environment
ICTTEN312 Install telecommunications network equipment
ICTTEN417 Install, configure and test a router
ICTTEN434 Install, configure and test internet protocol networks
```

Target Group

This skill set is for those individuals who require further training in the installation of information and communication technology networks.

Suggested words for Statement of Attainment

These units of competency meet industry requirements for installing secure wireless local access networks.
