ICTTEN413 Undertake remote diagnosis and repair of network faults

Release: 1

ICTTEN413 Undertake remote diagnosis and repair of network faults

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to undertake fault diagnostic and repair strategies for working with remote network equipment.

It applies to individuals working as field technicians, remotely accessing the network and the Network Operation Centre (NOC) which controls the coordination of remote network activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Diagnose remote faults	1.1 Install remote access software on notebook computers 1.2 Verify network fault by analysing relevant data 1.3 Investigate context and background information relevant to the network fault 1.4 Source appropriate documentation and test equipment relevant to the network fault 1.5 Conduct appropriate tests and analyse results 1.6 Diagnose network faults using established methodical strategies

ELEMENT	PERFORMANCE CRITERIA
	in a timely fashion without disruption to other services
2. Plan remote repair	2.1 Assess involvement level of the NOC in planning the repair 2.2 Plan for any necessary outages and notify customers 2.3 Develop repair strategies to clear fault 2.4 Develop a strategy for rerouting customer traffic if applicable 2.5 Advise on-site personnel of required work and clearly communicate the repair strategy
3. Repair fault	3.1 Initiate remote repair strategies to reconfigure or repair remote equipment in a manner safe to self, fellow workers, network equipment and public 3.2 Inform customers of repair progress where fault has caused degradation of service or outage 3.3 Escalate unresolved faults according to established enterprise procedure 3.4 Test remote repair for required performance 3.5 Assess ongoing network performance and the likelihood of further problems
4. Report remote diagnosis and repair and document results	4.1 Notify all relevant parties of results of remote diagnosis and repair 4.2 Record details relating to any outage according to enterprise procedures 4.3 Complete all relevant documentation and recommend any changes required by the enterprise quality assurance system

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 1.3, 3.3, 4.2, 4.3	<ul style="list-style-type: none"> Recognises and interprets complex technical data, procedures, equipment, system manuals and specifications
Writing	2.2-2.5, 3.2, 4.1-4.3	<ul style="list-style-type: none"> Uses clear, specific and industry-related terminology

		to produce and update workplace documentation and make recommendations
Oral Communication	2.2, 2.5, 3.2, 4.1	<ul style="list-style-type: none"> • Articulates clearly and concisely to provide advice and guidance to technical personnel working across different levels and in different contexts • Uses well-developed listening and questioning techniques to confirm understanding
Numeracy	1.2, 1.5	<ul style="list-style-type: none"> • Interprets a wide variety of numerical readings and data
Navigate the world of work	3.1, 3.3, 4.2	<ul style="list-style-type: none"> • Takes personal responsibility for adherence to legal and regulatory responsibilities, and enterprise policies and procedures relevant to own work • Alerts others of issues that may affect self or others, with specific reference to safety
Interact with others	2.2, 3.2, 4.1	<ul style="list-style-type: none"> • Selects and uses appropriate conventions and protocols when communicating with customers and technical staff in a range of work contexts
Get the work done	1.1, 1.3-1.6, 2.1-2.3, 3.1, 3.3-3.5, 4.3	<ul style="list-style-type: none"> • Understands key principles and concepts underpinning design and operation of digital systems and tools, and applies these when troubleshooting existing technology • Works logically and systematically to monitor, analyse and action job priorities • Implements actions according to a predetermined plan, making adjustments if necessary • Makes decisions quickly and intuitively in familiar situations requiring immediate attention, drawing on past experience to identify key variables and determine the best course of action • Uses analytical processes to decide on a course of action, establishing criteria for deciding between options and seeking input and advice from others when escalating difficulties
