ICTTEN419 Implement and troubleshoot enterprise routers and switches

Release: 1

ICTTEN419 Implement and troubleshoot enterprise routers and switches

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to determine customer needs, use information communication technologies (ICT) to meet network requirements, rectify equipment errors and create appropriate workplace documentation.

It applies to individuals working as installers of internet protocol (IP) networks, enterprise network technicians, network administrators and other network support personnel.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Prepare for implementation of network routers and switches	1.1 Prepare for given job according to work health and safety (WHS) and environmental requirements with appropriate personnel 1.2 Identify safety hazards and implement risk control measures in consultation with appropriate personnel 1.3 Determine nature and scope of network routers, network switches and network resources from job briefs or appropriate personnel 1.4 Select and obtain network services and network application requirements according to enterprise procedures

ELEMENT	PERFORMANCE CRITERIA
	<p>1.5 Obtain identified operating instructions, manuals, hardware and software testing methodologies</p> <p>1.6 Consult appropriate personnel to ensure the task is coordinated effectively with others involved at the worksite</p>
2 Implement network switches and routers	<p>2.1 Configure routers and switches according to manufacturer's specifications and enterprise procedures</p> <p>2.2 Determine network addressing scheme for network connectivity, and verify using calculations</p> <p>2.3 Activate, and verify wide area network (WAN) links provide network connectivity</p> <p>2.4 Enable network services and network applications to the network to complete network connectivity process</p> <p>2.5 Set up traffic access and filtering according to enterprise procedures</p>
3 Troubleshoot network switches and routers	<p>3.1 Monitor network performance and isolate faults using diagnostic and analysis tools</p> <p>3.2 Troubleshoot network and internet connectivity according to manufacturer's specifications and enterprise procedures</p>
4 Document configuration and troubleshooting records	<p>4.1 Restore work-site to safe condition according to established safety procedures</p> <p>4.2 Record and store essential implementation information according to enterprise procedures</p> <p>4.3 Notify appropriate personnel of completion of the task according to enterprise procedures</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3, 1.4, 2.1, 2.5, 3.2, 4.2, 4.3	<ul style="list-style-type: none"> Recognises and interprets technical, legislative and operational documentation to determine job requirements

Writing	1.1, 1.2, 4.2, 4.3	<ul style="list-style-type: none"> Uses clear, specific and industry-related terminology to produce and update workplace documentation and in communications with relevant personnel
Oral Communication	1.1-1.3, 4.3	<ul style="list-style-type: none"> Clearly liaises with personnel on technical matters Uses listening and questioning skills to confirm understanding for requirements
Numeracy	2.2	<ul style="list-style-type: none"> Interprets technical data and performs calculations to verify information
Navigate the world of work	1.1, 1.2, 4.1	<ul style="list-style-type: none"> Takes personal responsibility for adherence to legal and regulatory responsibilities relevant to own work, and draws attention to any issues that may affect self or others Recognises and follows explicit and implicit protocols and meets expectations associated with own role
Interact with others	1.6	<ul style="list-style-type: none"> Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction
Get the work done	1.4, 1.5, 2.1-2.5, 3.1, 3.2	<ul style="list-style-type: none"> Understands key principles and concepts underpinning design and operation of digital systems and tools, and applies these as required including troubleshooting common network problems Takes responsibility for planning and organising own workload, identifying ways of sequencing and combining elements for greater efficiency Implements actions according to a predetermined plan, making adjustments if necessary Makes decisions quickly and intuitively in familiar situations requiring immediate attention, drawing on past experience to identify key variables and determine the best course of action Recognises and anticipates an increasing range of unexpected problems, their symptoms and causes on the basis of safety and specified work outcomes
