ICTWEB513 Build dynamic websites

Release: 1

ICTWEB513 Build dynamic websites

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Application

This unit describes the skills and knowledge required to analyse and design websites to meet technical requirements.

It applies to individuals working as web developers, who are responsible for the analysis, design, implementation and testing of websites.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Web

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Define and analyse technical requirements	1.1 Identify business requirements and applicable legislative standards 1.2 Determine and document purpose, expectations and functionality of website according to organisational procedures 1.3 Analyse user interface design requirements including user needs, design principles and operating systems
2. Produce software design specifications	2.1 Produce a hierarchy of website showing navigation according to website requirements 2.2 Confirm content is logical and accessible to user according to website requirements 2.3 Produce prototype of user interface 2.4 Determine and document website architectural requirements

ELEMENT	PERFORMANCE CRITERIA
	2.5 Design data storage requirements according to website requirements
3. Develop website to specified design	3.1 Create software components of website according to website requirements 3.2 Test components of website according to organisational procedures 3.3 Integrate components and produce web application
4. Test and finalise web application	4.1 Test website against requirements and amend accordingly 4.2 Confirm website is secure and bug free according to cyber security procedures and protocols 4.3 Test functionality of website on multiple browsers and devices and update as required 4.4 Obtain feedback from required personnel and update web site as required 4.5 Complete and document design structure according to organisational procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> Analyses complex documentation from a variety of sources and consolidates information applicable to specific criteria when determining requirements
Writing	<ul style="list-style-type: none"> Prepares documentation analysing requirements and design specifications Writes and edits code and technical data in a logical manner using the required syntax
Planning and organising	<ul style="list-style-type: none"> Accepts responsibility for planning and sequencing complex tasks and workload Negotiates key aspects with others, including required capabilities, efficiencies and effectiveness
Problem solving	<ul style="list-style-type: none"> Applies systematic and analytical decision-making processes for complex situations and issues
Self-management	<ul style="list-style-type: none"> Takes responsibility for following policies, procedures and standards
Technology	<ul style="list-style-type: none"> Uses and investigates new digital technologies and applications

SKILL	DESCRIPTION
	<ul style="list-style-type: none">• Manages and manipulates data and communicates with others in a secure and stable digital environment

Unit Mapping Information

Supersedes and is equivalent to ICTWEB501 Build a dynamic website.
