ICTWEB514 Create dynamic web pages

Release: 1

ICTWEB514 Create dynamic web pages

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Application

This unit describes the skills and knowledge required to produce both server and client-side content for web pages.

It applies to individuals working as web developers, who are responsible for creating dynamic pages to provide interaction between the user and the website. They use highly developed technical and analytical skills when developing the user-website interface.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Web

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to create dynamic web pages	1.1 Obtain and review technical requirements for creating dynamic web pages 1.2 Confirm applicable legislative and organisational standards and procedures applicable to technical requirements 1.3 Identify sections of website requiring client-side dynamic content 1.4 Identify sections of website requiring server-side dynamic content 1.5 Select applicable languages and technology according to technical requirements
2. Create dynamic content	2.1 Identify and create boilerplate templates according to technical requirements

ELEMENT	PERFORMANCE CRITERIA
	2.2 Design and create a database and organise data and content according to data storage requirements 2.3 Create page using selected languages
3. Test and finalise dynamic web pages	3.1 Debug code and confirm security of web page using cyber security protocols and procedures 3.2 Test web page functionality and content across a variety of browsers and devices 3.3 Evaluate web page functionality results and amend as required 3.4 Confirm required dynamic content functions according to task requirements 3.5 Present dynamic web page to required personnel and seek feedback 3.6 Finalise web page and obtain sign-off from required personnel, according to organisational procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> Analyses documentation from a variety of sources and records and consolidates information when determining requirements
Writing	<ul style="list-style-type: none"> Writes and edits code and technical data in a logical manner using required syntax
Planning and organising	<ul style="list-style-type: none"> Accepts responsibility for planning and sequencing complex tasks and workload Negotiates key aspects with others, including required capabilities, efficiencies and effectiveness
Problem solving	<ul style="list-style-type: none"> Applies systematic and analytical decision-making processes for complex situations and issues
Self-management	<ul style="list-style-type: none"> Takes responsibility for following policies, procedures and standards
Technology	<ul style="list-style-type: none"> Uses and investigates new digital technologies and applications Manages and manipulates data and communicates with others in a secure and stable digital environment

Unit Mapping Information

Supersedes and is equivalent to ICTWEB502 Create dynamic web pages.
