ICTWEB525 Implement quality assurance process for websites

Release: 1

ICTWEB525 Implement quality assurance process for websites

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Application

This unit describes the skills and knowledge required to develop and conduct planned and systematic actions to ensure that websites conform to applicable standards and fulfil client expectations.

It applies to individuals in the web field of work that use highly developed communication, analysis and technical skills to determine intelligent strategies for ongoing website improvement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Web

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Establish standards	1.1 Identify applicable regulatory, accessibility, industry and organisational compliance standards for websites 1.2 Develop and quantify measurable performance standards from those standards 1.3 Establish centralised, distributed or combined quality assurance methodology 1.4 Determine specification from which website was developed 1.5 Establish guidelines for controlling, updating and loading new content on to website 1.6 Document established quality assurance procedures and

ELEMENT	PERFORMANCE CRITERIA
	<p>processes according to organisational procedures</p> <p>1.7 Confirm standards, guidelines and quality assurance methodology with required personnel and distribute documents as required</p>
