# Assessment Requirements for ICTSAS204 Record client support requirements

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- log and record calls according to organisational policy and procedures
- prioritise and escalate client support requests according to organisational policy and procedures.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify a range of software and hardware diagnostic tools
- describe organisational procedures for escalating issues
- describe maintenance procedures
- identify business scheduling requirements
- describe current business practices to prepare reports
- identify organisational procedures to rate and prioritise client requests
- identify roles and responsibilities of the information and communications technology (ICT) division.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work and include access to:

- sites where logging and client support may be recorded and prioritised
- client support history records

© Commonwealth of Australia, 2025 Future Skills Organisation

- organisational policy and procedures related to:
  - critical process
  - escalation procedures
  - logging procedures
  - prioritising client requests.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTSAS205 Maintain ICT system integrity

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to protect and secure stand-alone or networked client server environments.

It applies to technical support individuals who are required to maintain workflow and quality processes in a small or large office environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Systems administration and support

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Carry out system backup | 1.1 Create and review organisational backup schedule<br>1.2 Determine storage media and hardware for backups<br>1.3 Ensure backups are carried out according to the schedule<br>1.4 Label and store backups according to organisational standards<br>1.5 Maintain records of backups |
| 2. Restore system backup | 2.1 Determine and test restoration procedures according to |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | organisational standards<br>2.2 Restore data under instruction from an appropriate person<br>2.3 Restore data according to organisational standards<br>2.4 Document and report on backup results |
| 3. Maintain virus protection | 3.1 Maintain and update virus protection software according to operating system in use<br>3.2 Carry out virus scanning and report detected viruses to appropriate person<br>3.3 Remove viruses and update scanning software |
| 4. Follow copyright procedures and record software licences where appropriate | 4.1 Identify copyright procedures for licensed software used by the organisation<br>4.2 Maintain records of licence number and location<br>4.3 Monitor operation and use of licensed software where applicable<br>4.4 Check personal computers and networks to ensure software compliance<br>4.5 Report licensing anomalies related to software to an appropriate person |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1-1.5, 2.1-2.3, 3.1-3.3, 4.1-4.5 | • Interprets familiar textual information from a range of sources to identify and review practices and determine that appropriate standards have been maintained<br>• Researches and interprets information to identify, monitor and evaluate technical information and maintain appropriate standards |
| Writing | 1.4, 1.5, 2.4, 4.2, 4.5 | • Develops materials and resources using simple vocabulary to record information in a sequential manner, adhering to standards for client engagement as well as internal reference |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Navigate the world of work | 1.1-1.5, 2.1-2.4, 3.1-3.3, 4.1-4.5 | • Understands roles and responsibilities for task and makes basic decisions on work completion parameters in accordance with organisational standards |
| Interact with others | 2.2, 4.5 | • Identifies and takes steps to follow accepted communication practices and protocols |
| Get the work done | 1.1-1.5, 2.1-2.4, 3.1-3.3, 4.1-4.5 | • Plans and implements routine tasks, aiming to achieve them efficiently<br>• Makes low-impact decisions within familiar situations, based on a range of predefined or routine solutions, and evaluates the effectiveness of the outcome<br>• Understands the purposes, specific functions and key features of common digital systems and tools, and operates them effectively to complete routine tasks |

# Assessment Requirements for ICTSAS205 Maintain ICT system integrity

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- protect and secure stand-alone or networked client server environments and operating systems according to system maintenance procedures
- complete file backup according to organisational standards
- recover, delete and archive according to backup and recovery procedure
- check computers and networks for compliance with licensing requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify organisational standards regarding:
  - backup and recovery procedures and operations
  - labelling and storage of backups
- describe current industry accepted hardware and software products
- describe current viruses and protection methods
- identify common diagnostic tools
- identify inventory procedures
- identify maintenance procedures
- describe storage and retrieval guidelines
- explain system performance
- identify software copyright and General Public Licence (GPL) or copyright responsibilities.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work and include access to:

- sites with a representative range of stand-alone and networked client server environments
- antivirus software
- technical records and documentation.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTSAS206 Detect and protect from spam and destructive software

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to reduce the risk of a computer's operation being affected by spam or destructive software.

It applies to technical support individuals who, while working under a level of supervision, have responsibility to exercise the discretion required to protect and secure equipment and software in a small or large office environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Systems administration and support

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Detect and remove destructive software | 1.1 Identify common types of destructive software<br>1.2 Select and install virus protection compatible with the operating system in use<br>1.3 Investigate other advanced systems of protection for further options |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.4 Install software updates on a regular basis<br>1.5 Configure software security settings to prevent destructive software from infecting computer<br>1.6 Run or schedule to run virus protection software on a regular basis<br>1.7 Report detected destructive software to appropriate person and remove the destructive software |
| 2. Identify and take action to stop spam | 2.1 Identify common types of spam<br>2.2 Take appropriate action in regard to spam<br>2.3 Configure and use a spam filter<br>2.4 Report spam to appropriate person |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1-1.5, 2.1-2.3 | • Researches and interprets information to identify misleading information and compare technical specifications, and identify solutions to new and emerging issues to maintain system |
| Writing | 1.7, 2.4 | • Uses simple vocabulary to report information in a familiar sequential manner to the appropriate personnel |
| Oral Communication | 1.7 | • Presents factual information in a clear manner, using specific and appropriate language |
| Interact with others | 1.7 | • Identifies and takes steps to follow accepted communication practices and protocols |
| Get the work done | 1.1-1.7, 2.1-2.4 | • Plans and implements routine tasks, aiming to achieve them efficiently<br>• Initiates standard diagnostic procedures when responding to familiar and unfamiliar problems within immediate context, and seeks input from others when problems remain unresolved<br>• Understands the purposes, specific functions and key |

# Assessment Requirements for ICTSAS206 Detect and protect from spam and destructive software

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- install virus protection software and updates
- schedule virus protection software to run on a regular basis
- remove common destructive software
- identify common spam types and take appropriate action.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe spam and virus intrusions and identify appropriate remedial actions
- identify the types of protective applications used against viruses and spam
- identify the operating systems supported by the organisation
- identify the common components of computer hardware that may be affected by spam.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work and include access to:

- sites with a representative range of computer hardware, application software and operating systems
- current antivirus and anti-spam software
- technical records, vendor documentation, enterprise procedures and guidelines.

# ICTSAS207 Protect and secure information assets

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to ensure information assets are protected from improper access and appropriate actions are taken to secure assets in the event that they are threatened.

It applies to individuals who, while working under a level of supervision, have responsibility in a frontline technical support capacity to exercise in a small or large office environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Systems administration and support

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Identify assets and threats | 1.1 Identify types of information assets in the organisation<br>1.2 Identify mechanisms by which information assets are accessed, transmitted and stored<br>1.3 Establish nature of threats to information assets and determine effect that loss or damage may have to the organisation |
| 2. Secure assets | 2.1 Identify actions, mechanisms and strategies to protect |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | information assets<br>2.2 Secure assets within scope of authority<br>2.3 Report issues to appropriate person and other issues where they are outside scope of authority |
| 3. Mitigate or prevent damage to assets | 3.1 Identify signs and evidence that information assets are threatened or undergoing loss or damage<br>3.2 Provide first level response to reduce effects, mitigate damage and protect evidence<br>3.3 Report incident, effects and actions to appropriate person |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1-1.3, 2.2, 2.3, 3.1 | • Researches and interprets text to identify misleading information and compare technical specifications, and identify solutions to new and emerging issues to maintain system |
| Writing | 2.3, 3.3 | • Uses simple vocabulary to report textual information in a sequential manner to the appropriate personnel |
| Oral Communication | 2.3 | • Presents factual information in a clear manner, using specific and appropriate language |
| Navigate the world of work | 1.1-1.3, 2.1-2.3, 3.1-3.3 | • Understands roles and responsibilities for task and makes basic decisions on work completion parameters in accordance with organisational standards |
| Interact with others | 2.2, 2.3 | • Identifies and takes steps to follow accepted communication practices and protocols |

# Assessment Requirements for ICTSAS207 Protect and secure information assets

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- identify the organisation's information assets and the ways in which these assets are used
- establish potential threats to information assets and analyse the effects these threats would have on the organisation
- implement measures to secure assets, and mitigate or prevent damage, according to organisational requirements
- discuss details of security threats and issues relating to information assets with appropriate persons
- report issues or incidents according to organisational requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify information assets and key sources of information assets
- identify the types of security responses available to secure assets
- identify assets supported by the organisation
- describe general information and communications technology (ICT) hardware and security implications
- identify the organisation’s security procedures.

© Commonwealth of Australia, 2025 Future Skills Organisation

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work and include access to:

- a site with computer hardware and office environments representing a range of workplaces
- appropriate software systems
- organisational information assets
- technical records, documentation and enterprise procedures.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTSAS208 Maintain ICT equipment and consumables

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to maintain the operation of basic computer hardware and peripherals, including the replacement of consumables.

It applies to technical support individuals who, while working under a level of supervision, perform mainly routine tasks within an office environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Systems administration and support

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Clean equipment | 1.1 Access and verify cleaning supplies for usability on the selected equipment<br>1.2 Record maintenance actions undertaken according to organisational procedures<br>1.3 Clean equipment according to manufacturer specifications and organisational manuals<br>1.4 Ensure basic work health and safety (WHS) principles and |

# Assessment Requirements for ICTSAS208 Maintain ICT equipment and consumables

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- clean equipment following manufacturer specifications and work health and safety (WHS) policy and procedures
- replace and dispose of consumables according to regulations and organisational policy
- test and maintain equipment in working order, following WHS procedures
- record activities and actions appropriately.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify current industry accepted hardware and software, and manufacturer maintenance guides
- describe organisational systems related to storage and retrieval of information and equipment
- identify workplace health and safety principles and responsibilities, including ergonomics, work periods and breaks, and conservation techniques
- identify chemical storage, control and disposal procedures.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work, and include access to:

- a site at which equipment maintenance may be carried out

© Commonwealth of Australia, 2025 Future Skills Organisation

- equipment currently used in industry
- relevant equipment documentation that may affect maintenance activities.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTSAS209 Connect and use a home based local wireless network

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to install, configure and secure devices to a small home based local network.

It applies to individuals who, while working under a level of supervision, have responsibility in a frontline technical support capacity.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Systems administration and support

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Confirm requirements for home office wireless network | 1.1 Document client requirements and confirm with appropriate person<br>1.2 Identify available documentation and technical support options<br>1.3 Identify the digital devices to be connected to the network and confirm wireless network component requirements<br>1.4 Take action to ensure client support expectations are covered by vendor warranty and support services |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.5 Ensure required work health and safety (WHS) standards are incorporated as part of the installation process |
| 2. Prepare for installation | 2.1 Obtain digital devices and wireless network components<br>2.2 Validate that contents of delivered components and physical contents match the packing list and resolve discrepancies if necessary<br>2.3 Determine internet service provider (ISP) connection properties |
| 3. Install and configure the wireless router and adapters | 3.1 Install the wireless router<br>3.2 Configure the wireless router using the router configuration properties<br>3.3 Install the wireless adapters<br>3.4 Configure the wireless fidelity (Wi-Fi) system |
| 4. Secure the wireless system | 4.1 Set the security components of the system<br>4.2 Test the security components<br>4.3 Review any updated documentation regarding security issues and the components used |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Learning | 1.2, 1.3, 2.1, 3.1-3.4, 4.3 | • Identifies and uses basic knowledge of industry hardware and software appropriate to the environment<br>• Identifies and uses new or upgraded technology skills to enhance learning |
| Reading | 1.2-1.5, 2.1-2.3, 3.1-3.4, 4.1-4.3 | • Interprets a range of texts to evaluate and integrate strategies to maintain effective methods that adhere to client requirements and standards |
| Writing | 1.1 | • Uses simple vocabulary to record information in a sequential manner that adheres to client requirements and for internal reference |
| Oral | 1.1, 1.4 | • Uses listening and questioning techniques to confirm |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Communication | | requirements |
| Navigate the world of work | 1.1-1.5, 2.1-2.3, 3.1-3.4, 4.1-4.3 | • Understands roles and responsibilities for task and makes basic decisions on work completion parameters in accordance with client requirements and WHS standards |
| Interact with others | 1.1, 1.2, 1.4, 2.2 | • Identifies and takes steps to follow accepted communication practices and protocols |
| Get the work done | 1.1-1.5, 2.1-2.3, 3.1-3.4, 4.1-4.3 | • Plans and implements routine tasks aiming to achieve them efficiently<br>• Makes low-impact decisions within familiar situations, based on a range of predefined or routine solutions and evaluates the effectiveness of the outcome<br>• Understands the purposes, specific functions and key features of common digital systems and tools, and operates them effectively to complete routine tasks |

# Assessment Requirements for ICTSAS209 Connect and use a home based local wireless network

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- determine suitable wireless fidelity (Wi-Fi) requirements for small home office style settings
- connect and integrate Wi-Fi components into a small office system safely
- install and configure wireless routers and adapters as part of a Wi-Fi system
- secure components of a Wi-Fi system.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify computer component installation procedures
- describe current industry accepted Wi-Fi network products
- describe Wi-Fi installation requirements
- identify and describe common Wi-Fi systems and Wi-Fi security considerations
- identify internet service provider (ISP) connection protocols
- identify and describe relevant work health and safety (WHS) procedures for electrical equipment
- identify wireless network components.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work, and include access to:

© Commonwealth of Australia, 2025 Future Skills Organisation

- the internet to enable configuration procedures
- Wi-Fi equipment currently used in industry
- technical support to support the Wi-Fi installation
- technical documentation.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTSAS301 Run standard diagnostic tests

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to troubleshoot problems and conduct diagnostic tests on a range of platforms.

It applies to individuals who, while working under a level of supervision, have responsibility to action tasks in a frontline technical support capacity.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Systems administration and support

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Identify common symptoms and preventative maintenance techniques | 1.1 Develop a troubleshooting process to help resolve problems<br>1.2 Determine the specific symptoms relevant to different types of hardware, operating system and printer problems<br>1.3 Identify common preventative maintenance techniques to support maintenance strategies |
| 2. Operate system diagnostics | 2.1 Run the system diagnostic program according to specification<br>2.2 Modify the system configuration as indicated by the diagnostic |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | program<br>2.3 Carry out preventative maintenance in line with organisational guidelines |
| 3. Scan system for viruses | 3.1 Scan the system to check and maintain virus protection<br>3.2 Report identified viruses to an appropriate person<br>3.3 Remove virus infections found by the scan using software tools and procedures, or by restoring backups<br>3.4 Document relevant symptom and removal information |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1-1.3, 2.1-2.3, 3.3 | • Interprets textual information to identify issues and solutions to maintain the appropriate standards |
| Writing | 3.2, 3.4 | • Records key information to note output of investigations, and sequences writing to produce cohesive text for reference |
| Oral Communication | 3.2 | • Presents factual information in a clear manner, using specific and appropriate language |
| Interact with others | 3.2 | • Selects and uses appropriate strategies to establish and maintain spoken communication in familiar and some unfamiliar contexts<br>• Derives meaning from a range of oral texts in familiar and some unfamiliar contexts |
| Get the work done | All | • Takes responsibility for planning, sequencing and prioritising tasks and own workload for efficiency and effective outcomes<br>• Makes routine decisions and implements standard procedures for routine tasks, using formal decision making processes for more complex and non-routine situations<br>• Applies formal problem solving processes when tackling an unfamiliar problem, breaking complex issues into manageable parts and identifying and |

# Assessment Requirements for ICTSAS301 Run standard diagnostic tests

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- identify hardware and operating system problems
- conduct diagnostic tests on a range of platforms according to preventative maintenance and diagnostic policy
- identify the root causes of the problems
- scan systems for computer viruses
- remove viruses using software tools and procedures
- remove viruses by restoring backups.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the client business domain, including client organisation structure and business functionality
- identify the current industry accepted hardware and software diagnostic tools, including products that manage:
  - backup procedures
  - configuration procedures
  - hardware maintenance
  - organisational security
- describe common symptoms of problems associated with:
  - desktop applications
  - operating systems
  - laptops

© Commonwealth of Australia, 2025 Future Skills Organisation

    - mobile devices
    - printers
    - other common peripherals
- describe a range of preventative tasks relevant to maintaining hardware and software applications
- describe the organisational procedures relevant to diagnostic testing.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work and include access to:

- special purpose tools, equipment, materials and industry software packages
- security guidelines
- backup procedures
- diagnostic software
- organisational guidelines.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTSAS303 Care for computer hardware

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to manage the maintenance and location of hardware.

It applies to frontline technical support individuals who work under a level of supervision but have some responsibility to maintain organisational hardware.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Systems administration and support

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Establish safe work practices | 1.1 Determine, record and apply relevant legal requirements and work health and safety (WHS) standards to the installation and maintenance of computer hardware<br>1.2 Determine, record and apply requirements specified by hardware manufacturers<br>1.3 Determine, record and apply safe work practices, taking into account legal and manufacturer requirements |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| 2. Establish location requirements for hardware and peripherals | 2.1 Determine and apply suitable environmental conditions for hardware and peripherals<br>2.2 Determine and apply system protection devices where appropriate<br>2.3 Determine and apply requirements when moving hardware<br>2.4 Determine and apply suitable storage principles for hardware and associated peripherals and media |
| 3. Establish maintenance practices | 3.1 Determine maintenance requirements specified by the equipment manufacturer<br>3.2 Produce maintenance schedules<br>3.3 Perform diagnostic functions, including replacing suspect components with other serviceable components and reloading associated software<br>3.4 Determine whether unserviceable components are replaceable through warranty, replacement or upgrade<br>3.5 Perform diagnostic functions using the operating system and third party diagnostic tools |
| 4. Determine appropriate hardware quality standards | 4.1 Consider and apply business requirements in respect of hardware matters<br>4.2 Determine and apply quality standards to the selection of appropriate hardware and associated peripherals |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1-1.3, 2.1-2.4, 3.1, 3.4, 4.1, 4.2 | • Researches and interprets a range of texts to identify requirements and standards, compare technical specifications, and identify solutions to new and emerging issues to maintain the environment |
| Writing | 1.1-1.3, 3.2 | • Uses simple vocabulary to record key information in a sequential manner to maintain the appropriate standards and for internal reference |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Oral Communication | 3.5 | • Presents factual information in a clear manner, using specific and appropriate language |
| Numeracy | 3.2, 4.1 | • Recognises and applies familiar measurements relating to time durations and uses mathematical calculations to measure and calculate amounts |
| Navigate the world of work | 1.1-1.3, 4.1, 4.2 | • Takes some personal responsibility for adherence to legal and regulatory requirements by establishing safe work practices |
| Get the work done | All | • Plans and implements routine tasks and workload, making limited decisions on sequencing, timing and collaboration, and seeks assistance in setting priorities<br>• Makes low-impact decisions within familiar situations, based on a range of predefined or routine solutions and evaluates the effectiveness of the outcome<br>• Responds to predictable routine problems and implements standard or logical solutions<br>• Identifies ideas for other applications and considers them in current contexts<br>• Uses digital technology for basic reading, recording and searching information, and communications, following routine procedures and security requirements |

# Assessment Requirements for ICTSAS303 Care for computer hardware

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- perform diagnostic functions by replacing components, reloading software and using operating system and other diagnostic tools
- establish location requirements for system hardware and associated peripheral devices
- follow safe work practices
- determine maintenance requirements and establish maintenance schedule
- apply appropriate quality standards to computer hardware and peripherals.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the range of quality levels in current common hardware
- describe the importance of maintenance
- describe workplace health and safety principles specific to working with mains-powered equipment
- identify and describe the potential environmental effects of common types of hardware
- identify common security issues that impact on computer hardware
- identify the software related to hardware operations
- identify common system hardware and associated peripherals functions.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work and include access to:

- computer hardware, software and diagnostic tools
- warranty records and reports
- maintenance schedules
- vendor documentation
- safe work practices.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTSAS304 Provide basic system administration

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to implement components of systems backup, restore, security and licensing in a stand-alone or client server environment.

It applies to individuals who, while working under limited supervision, have responsibility in a frontline technical support capacity to exercise discretion and judgement, using appropriate knowledge to provide assistance.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Systems administration and support

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Record security access | 1.1 Obtain client access requirements and clearance levels according to organisational requirements<br>1.2 Issue computer or network user account and password details to client<br>1.3 Provide security documentation and access to client<br>1.4 Record user account and security access details to maintain |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | system integrity and assist later auditing |
| 2. Record software licences | 2.1 Determine what licensed software is used within the organisation<br>2.2 Maintain records of licence number and location<br>2.3 Check personal computers and network for illegal software<br>2.4 Report illegal software to appropriate person |
| 3. Carry out system backup | 3.1 Create or review organisational backup schedule<br>3.2 Complete file backups according to schedule<br>3.3 Label and store backups according to organisational requirements<br>3.4 Maintain record of backups |
| 4. Restore system backup | 4.1 Determine and test restore procedures according to organisational guidelines<br>4.2 Complete a restore under supervision of an appropriate person<br>4.3 Record completed restore according to organisational guidelines |
| 5. Apply security access controls | 5.1 Document security access as per clearance guidelines set by management<br>5.2 Maintain a security access register in line with organisational guidelines to record which client or groups have access to which resources<br>5.3 Identify the security controls on the file system provided by the operating system<br>5.4 Apply effective access control on files and directories |

# Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 2.1, 4.1, 5.1, 5.3 | • Interprets and evaluates a range of textual information to maintain effective methods while adhering to appropriate standards |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Writing | 1.2, 1.4, 2.2, 2.4, 3.4, 4.3, 5.1, 5.2 | • Records detailed information incorporating both factual and professional language that adheres to organisational standards |
| Oral Communication | 1.2, 2.4, 4.2 | • Provides information using language appropriate to environment and audience<br>• Uses listening and questioning techniques to confirm understanding |
| Numeracy | 1.4, 2.2, 3.3, 3.4, 4.1-4.3, 5.1-5.4 | • Extracts and evaluates the mathematical information embedded in a range of tasks and texts to maintain records for internal reference |
| Navigate the world of work | 1.1-1.4, 2.1-2.4 | • Appreciates the implications of legal and regulatory responsibilities related to own work, and is beginning to recognise some general legal principles applicable in relation to security access and software |
| Interact with others | 2.4, 4.2 | • Selects the appropriate form, channel and mode of communication when reporting illegal software use<br>• Contributes to specific activities requiring joint responsibility and accountability when completing a restore under supervision |
| Get the work done | All | • Takes responsibility for planning and organising own work, identifying ways of sequencing and combining elements for greater efficiency, and considering how to link with the work of others<br>• Implements actions as per plan, making slight adjustments if necessary<br>• Selects from a range of pre-determined options in routine situations, identifying and taking some situational factors into account<br>• Monitors and controls access to digitally stored and transmitted information |

# Assessment Requirements for ICTSAS304 Provide basic system administration

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- perform a systems backup, restore and maintain correct usage according to licensing agreements in a stand-alone or client server environment
- maintain software licence records and check for copyright compliance within the system
- maintain security access records and apply access controls on network resources.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe common backup procedures
- identify and outline operating systems used by the organisation
- describe the organisational security procedures
- identify organisational standards to:
  - carry out backup and restore operations
  - label and store backups
  - record security and software details
- describe the selection, functions and features of appropriate diagnostic tools
- identify software copyright responsibilities
- identify the system's current functionality.

© Commonwealth of Australia, 2025 Future Skills Organisation

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work and include access to:

- operating systems
- software licence records
- technical records and documentation
- organisational backup and restore procedures
- organisational security guidelines.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTSAS305 Provide ICT advice to clients

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to provide information and communications technology (ICT) advice and support to clients, including the communication of comprehensive technical information.

It applies to frontline technical support individuals who work under a level of supervision but have responsibility for providing technical support.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Systems administration and support

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Review client support issues | 1.1 Check for new problems logged by client<br>1.2 Check previous logs for similar problems or requests from client<br>1.3 Investigate and document support issues affecting client<br>1.4 Notify client of the results of investigation and provide advice and support on findings |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.5 Obtain client feedback and make changes |
| 2. Provide advice on software, hardware or network | 2.1 Confirm software, hardware or network requirements with client<br>2.2 Investigate and document a solution<br>2.3 Document additional requirements identified in the investigation and refer them to the client<br>2.4 Obtain approval from client to implement the solution<br>2.5 Investigate and document amount of technical support client may require<br>2.6 Discuss and agree level of technical support identified with client<br>2.7 Arrange time with client when support will take place<br>2.8 Provide technical support as part of group or one-to-one instruction to the client<br>2.9 Provide manuals and help documentation to client |
| 3. Obtain client feedback | 3.1 Create an appropriate evaluation or feedback form or other mechanism to gather feedback about solution and support provided<br>3.2 Provide client with instructions on how to complete form or use other means of providing feedback<br>3.3 Distribute evaluation or feedback to client<br>3.4 Review feedback from client to identify areas for improvement |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1-1.3 , 1.5, 2.2, 2.5, 3.4 | • Interprets and evaluates information to compare technical specifications, identify areas of improvement and recognise solutions to new and emerging issues |
| Writing | 1.3-1.5, 2.2, 2.3, 2.5, | • Uses written vocabulary, grammatical structures and conventions to accurately convey instructions and |

# Assessment Requirements for ICTSAS305 Provide ICT advice to clients

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- investigate client support requests and provide a documented solution after consultation with client
- convey comprehensive technical information to clients in a clear, concise, jargon-free and coherent manner
- use technical manuals and ‘help’ documentation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and describe the available in-house and vendor support
- explain contract and service agreements with vendors
- identify features of different types of hardware supported by the organisation
- identify sources of information relevant to the provision of services and support
- identify operating system:
  - functions and basic features
  - supported by the organisation
- identify and describe security and network guidelines and procedures
- identify the advanced features of software, including the functions and support provided by the organisation.

© Commonwealth of Australia, 2025 Future Skills Organisation

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work and include access to:

- peers and supervisors for obtaining information
- relevant information sources
- technical records and documentation.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTSAS306 Maintain equipment and software

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to carry out maintenance and fault repair according to organisational procedures, in order to keep equipment and software operating.

It applies to frontline technical support individuals who work under a level of supervision and have some responsibility to maintain computer systems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Systems administration and support

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Determine and undertake required equipment maintenance | 1.1 Examine and review specified equipment and maintenance procedures in order to determine those procedures that can be handled internally<br>1.2 Organise and undertake internal maintenance as specified in the maintenance procedures<br>1.3 Report problems promptly to appropriate person |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| 2. Diagnose and repair faults | 2.1 Assess an existing problem situation and identify the main problem area<br>2.2 Test suspected faulty equipment or software for possible failures or performance degradation, using available technology<br>2.3 Analyse the test results<br>2.4 Review historical fault data for information of relevance to existing faults<br>2.5 Develop plans, with prioritised tasks and contingency arrangements for the repair or replacement of faulty equipment or software, with minimum disruption to client<br>2.6 Liaise with appropriate person to obtain approval for the plans<br>2.7 Obtain necessary components and repair equipment or software in a timely, organised manner, following work health and safety (WHS) standards |
| 3. Update documentation and make recommendations for future maintenance | 3.1 Record maintenance and fault data and equipment modifications, according to organisational standards<br>3.2 Identify and report instances where preventative measures are needed<br>3.3 Review and update maintenance and fault data, and report outcomes periodically to appropriate person |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.2, 2.3, 2.4, 2.7, 3.2 | • Integrates and evaluates a range of textual information to record and maintain appropriate procedures while adhering to appropriate standards |
| Writing | 1.3, 3.2, 3.3 | • Conveys specific information using clear and precise language and the appropriate format for audience and purpose, and records information for internal reference |
| Oral Communication | 1.3, 2.6, 3.3 | • Articulates clearly using appropriate language and listening and questioning techniques to report data and confirm proposed plans |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Numeracy | 2.5, 2.7 | • Recognises and applies familiar measurements relating to time durations |
| Navigate the world of work | 3.1, 3.2, 3.3 | • Understands how own role meshes with others and contributes to broader work goals when addressing organisational standards and reporting to appropriate persons |
| Interact with others | 1.3, 2.6, 3.3 | • Generally understands what to communicate, with whom and how when reporting problems, gaining approval for plans and reviewing and updating data and reporting outcomes |
| Get the work done | 1.1, 1.2, 2.1-2.7, 3.1-3.3 | • Plans a range of routine and some non-routine maintenance tasks, and repair or replacement of faulty equipment, accepting stated goals and aiming to achieve them efficiently<br>• Selects from a range of predetermined options in routine situations, identifying and taking situational factors into account when determining whether procedures can be handled internally<br>• Selects from a range of predetermined options when diagnosing and repairing faults, identifying and taking situational factors into account<br>• Understands key principles and concepts that underpin the design and operation of digital systems and tools, and applies these when troubleshooting existing technology, repairing faults and making recommendations for future maintenance |

# Assessment Requirements for ICTSAS306 Maintain equipment and software

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- undertake maintenance according to maintenance procedures
- identify and resolve a defined range of equipment and software problems
- maintain accurate records according to organisational guidelines.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and describe equipment and software maintenance practices
- identify help-desk response level escalation procedures
- describe the operation and purpose of specified equipment
- identify and describe the operation of technical diagnostic tools
- identify quality assurance practices
- identify relevant service level agreements (SLAs) to determine conditions of the SLA cover
- describe client warranty claims, repair or replacement procedures
- identify system's current functionality
- describe organisational work health and safety (WHS) procedures.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work and include access to:

© Commonwealth of Australia, 2025 Future Skills Organisation

- technical environment with a variety of operational equipment
- maintenance procedures, software and tools
- technical manuals
- records and documentation
- organisation health and safety procedures.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTSAS307 Install, configure and secure a small office or home office network

## Modification History

| | |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to identify available network components relevant to client requirements and to install, configure and secure those components as part of a small office or home office (SOHO) network.

It applies to individuals who work under a level of supervision and have experience with analysis and problem solving when working with technologies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Systems administration and support

## Elements and Performance Criteria

| **ELEMENT** | **PERFORMANCE CRITERIA** |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Confirm client requirements and identify relevant network equipment | 1.1 Identify and clarify client requirements for the small office home office network<br>1.2 Identify most suitable network design to meet client requirements<br>1.3 Develop and document network design<br>1.4 Identify most suitable network technologies, devices and protocols and network cables and connectors to meet network |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | design<br>1.5 Review available network technologies, devices and protocols and determine the most appropriate to meet client requirements<br>1.6 Source vendors and service suppliers to obtain specifications, availability and cost of identified components<br>1.7 Ensure client sign-off for proposed network design and associated components |
| 2. Install and configure hardware and software | 2.1 Develop installation plans with prioritised tasks and contingency arrangements for installation of components with minimum disruption to client<br>2.2 Liaise with appropriate person to obtain approval for plans, including security clearance and timing<br>2.3 Confirm and review supplier documentation that network cables and connectors have been installed according to industry standards, client requirements and building requirements<br>2.4 Install and configure computer and other hardware according to network design and industry standards, using knowledge of relevant installation and configuration tools<br>2.5 Install and configure network software according to network design and industry standards<br>2.6 Install and configure other software according to network design and industry standards |
| 3. Configure and test network | 3.1 Troubleshoot client-side connectivity using appropriate networking settings to review relevant network tools<br>3.2 Test installed software and hardware, using available networking tools to ensure components function as expected<br>3.3 Test network settings to ensure network is functioning according to specification<br>3.4 Resolve problems identified in testing process |
| 4. Secure network | 4.1 Identify possible security concepts and technologies relevant to securing the network<br>4.2 Apply specific protection using identified security features to protect against possible network attacks<br>4.3 Troubleshoot different types of security intrusion symptoms and issues |
| 5. Document completed work, hand over to client | 5.1 Document final network design and associated hardware, |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| and obtain client approval | software and security features<br>5.2 Document installation, boot up and configuration procedures as per client requirements<br>5.3 Complete handover and secure sign-off from client |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.2, 1.4-1.6, 2.3-2.6, 3.2, 3.3, 4.1, 4.3 | • Interprets a range of texts to critically evaluate and design the appropriate network, comparing technical specifications and associated costs to install and maintain the network while adhering to requirements and standards |
| Writing | 1.3, 1.7, 2.1, 2.3, 5.1, 5.2, 5.3 | • Records specific information using clear and precise language and appropriate format to develop network plans, instructions, installation and technical specifications while adhering to requirements and standards |
| Oral Communication | 1.1, 2.2, 2.3 | • Participates in a verbal exchange of factual information using listening and questioning techniques to clarify appropriate network installation processes have been maintained and adhere to associated requirements and standards |
| Numeracy | 1.2, 1.4, 1.6, 2.2-2.4 | • Uses a range of mathematical calculations to evaluate and compare numerical information and forecast costs, and applies familiar measurements concerning available or consumed data, time durations and appropriate cable length |
| Navigate the world of work | 1.7, 2.2, 5.3 | • Recognises and follows explicit and implicit protocols and meets expectations associated with own role when obtaining approval and sign-off at relevant stages of job |
| Get the work done | All | • Plans a range of routine and some non-routine tasks, accepting stated goals and aiming to achieve them efficiently, confirming client requirements and identifying relevant equipment<br>• Implements actions as per plan, making slight |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| | | adjustments if necessary, and addressing some unexpected issues<br>• Makes decisions quickly and intuitively in familiar situations requiring immediate attention, drawing on past experience to identify key variables, consider possible implications of different courses of action and determine the best course of action<br>• Uses systematic, analytical processes in configuration and testing of network, setting goals, gathering relevant information, and identifying and evaluating options against agreed criteria<br>• Applies formal problem solving processes when resolving network problems and troubleshooting symptoms and issues, breaking complex issues into manageable parts and identifying and evaluating several options for action<br>• Understands key principles and concepts that underpin the design and operation of digital systems and tools |

# Assessment Requirements for ICTSAS307 Install, configure and secure a small office or home office network

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- identify the most suitable network hardware and software equipment to meet client requirements
- install, configure and test the network according to client requirements, and produce appropriate documentation
- identify possible security threats and secure the network.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify current industry accepted hardware and software products, including those used for networks
- identify data and voice transmission technologies and protocols
- identify hardware and software installation procedures
- describe local area network (LAN) capabilities and characteristics, including:
  - network types
  - internet protocol addressing
  - switch and hub operation
- describe network connections, both wired and wireless
- describe networking technologies, including network operating systems and cabling standards
- describe network operating systems and their basic installation procedures for small office applications
- summarise set-up and configuration procedures

© Commonwealth of Australia, 2025 Future Skills Organisation

- summarise security implications for a home office network
- describe the methods to secure a home network
- identify small business and home office networking requirements
- identify software packages supported by the organisation
- identify and describe the industry standards applicable to small networks.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work and include access to:

- current industry standard software, hardware, and networking technologies
- server and workstation hardware and software
- internet connection
- live network
- network components, hardware and software
- networked computers
- vendor hardware and software components
- technical documentation and installation manuals.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTSAS401 Perform unit test for a class

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to ensure that the system is proved adequate, before handover to the client or user, by unit testing functionality and reliability of individual components.

It applies to individuals who use technical and specialised knowledge and apply a systematic approach to and fault finding and problem solving in information and communications technology (ICT) testing environments.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Systems administration and support

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare for test | 1.1 Determine test criteria<br>1.2 Prepare test environment<br>1.3 Perform static tests using appropriate test tools to verify correct behaviour of modules<br>1.4 Use a test harness program to exercise module behaviour |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.5 Test objects containing lower level class instances separately<br>1.6 Prepare data to facilitate path testing<br>1.7 Prepare data to facilitate member function testing |
| 2. Conduct test | 2.1 Ensure clean test environment<br>2.2 Initialise test environment<br>2.3 Run test harness and document results in line with test and acceptance processes<br>2.4 Finalise test environment |
| 3. Analyse and classify results | 3.1 Review and classify test results to highlight areas of concern<br>3.2 Compare test results against requirements and design specifications in line with quality benchmarks<br>3.3 Forward test results to appropriate person<br>3.4 Review feedback<br>3.5 Ensure compliance with documentation and reporting standards |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.6, 1.7, 3.1-3.4 | • Interprets and analyses technical specifications and numerical data from a range of sources to determine requirements and complete necessary actions |
| Writing | 2.3, 3.2, 3.3, 3.5 | • Records and presents specific information logically, using appropriate formats and structures, and revises documents based on feedback and outcomes |
| Oral Communication | 1.1, 3.3 | • Uses active questioning and listening techniques to confirm understanding of testing arrangements and to seek feedback |
| Numeracy | 1.6, 1.7, 2.3, 3.1- 3.5 | • Uses mathematical equations to calculate and compare numerical test data for technical reports and to determine required actions |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Navigate the world of work | 3.4, 3.5 | • Takes personal responsibility for following explicit and implicit policies, procedures and standards |
| Interact with others | 3.3 | • Selects and uses appropriate conventions and protocols when communicating with clients and others in a range of work contexts |
| Get the work done | 1.1-1.7, 2.1-2.4, 3.1-3.3, 3.5 | • Takes responsibility for planning, sequencing and prioritising tasks and own workload for efficiency and effective outcomes<br>• Makes routine decisions and implements standard procedures for routine tasks, using formal decision making processes for more complex and non-routine situations<br>• Uses the main features and functions of digital tools to complete work tasks |

# Assessment Requirements for ICTSAS401 Perform unit test for a class

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- prepare at least TWO test environments
- conduct unit tests, covering:
  - member function test
  - path test
  - static test
- analyse, document and report test results.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain object-oriented programming language
- compare and contrast the key features and processes of automated test tools
- discuss client business domain relating to class to be tested
- outline input and output requirements
- describe organisational requirements relating to class to be tested
- analyse system testing requirements
- analyse underlying test data.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work and include access to:

- special purpose tools, equipment, materials
- industry software packages
- suitable test plan

© Commonwealth of Australia, 2025 Future Skills Organisation

- specific requirements
- design documents used in analysis of the test
- suitable class to test.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTSAS402 Implement configuration management strategies

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to implement administrative and technical procedures throughout the software development and documentation life cycle.

It applies to individuals working in a range of information and communications technology (ICT) development environments who have responsibility to ensure work is completed to quality standards and technical requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Systems administration and support

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Identify and clarify configuration management requirements | 1.1 Develop and assemble identification standards for the naming and version control of software and documentation, and provide to stakeholders<br>1.2 Identify software configuration tools and procedures for the required level of integration into the programming environment<br>1.3 Identify responsibilities for configuration management within the project and for ongoing support, including approval of changes |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.4 Take action to ensure that stakeholders are aware of their roles<br>1.5 Identify point at which items are subjected to configuration control with stakeholders |
| 2. Employ appropriate control mechanisms | 2.1 Identify and document method for identification and recording of change requests in line with organisational requirements, and ensure this is maintained during development process<br>2.2 Take action to ensure evaluation criteria and process for approval of change requests are employed according to organisational requirements<br>2.3 Take action to ensure other management, security and access control criteria are employed according to organisational requirements<br>2.4 Implement controls to ensure that necessary audit trials and alerts for variations or non-conformance are continuously maintained during development |
| 3. Implement monitoring mechanisms | 3.1 Implement controls to ensure mechanisms to identify software status throughout the software development life cycle are continuously maintained<br>3.2 Document development and maintenance of records and status reports required to show the history of baselines and their links to backups<br>3.3 Take action to ensure level of detail required in status reports, and identification of target audiences, meet the configuration management procedures, International Organization for Standardization (ISO), International Electrotechnical Commission (IEC) and Australian Standards (AS) and organisational requirements<br>3.4 Integrate configuration management into general project management processes for monitoring and control purposes and document |
| 4. Manage release of product | 4.1 Take action to ensure physical and functional completeness of items for release to all stakeholders<br>4.2 Identify and implement requirements for formal control of software products<br>4.3 Determine and document policies for retention of baseline or master copies, taking into account safety and security, legislative requirements and organisational guidelines |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.2, 3.3, 4.2 | • Researches and analyses technical textual information and numerical data from a range of sources to determine requirements and complete necessary actions |
| Writing | 1.1, 1.4, 2.1, 3.2, 3.4, 4.3 | • Uses clear and accurate language and documentation formats appropriate to the audience/purpose to convey complex technical information |
| Oral Communication | 1.1, 1.4 | • Uses active questioning and listening techniques to confirm understanding, gain consensus on concepts and liaise with stakeholders |
| Numeracy | 1.1, 2.1, 2.4, 3.2-3.4, 4.3 | • Uses mathematical equations to calculate and compare numerical data for a range of technical and planning reports, and to determine required actions |
| Navigate the world of work | 1.4, 2.1-2.3, 3.3 | • Takes personal responsibility for following explicit and implicit policies and procedures, and ensures that necessary standards and legislative requirements are met |
| Interact with others | 1.1 | • Selects and uses appropriate conventions and protocols when communicating with co-workers and others in a range of work contexts |
| Get the work done | 1.1-1.5, 2.1-2.4, 3.1-3.4, 4.1-4.3 | • Takes responsibility for planning, sequencing and prioritising tasks and own workload for efficiency and effective outcomes<br>• Makes routine decisions and implements standard procedures for routine tasks, using formal decision making processes for more complex and non-routine situations<br>• Uses main features and functions of digital tools to complete work tasks |

# Assessment Requirements for ICTSAS402 Implement configuration management strategies

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- identify and clarify configuration management requirements
- identify and action control mechanisms
- implement administrative and technical procedures
- maintain reliable and valid technical and administrative procedures
- use quality processes, audit trails and version control.

Note: Evidence must be provided for at least TWO situations or organisations.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- compare and contrast project planning methodologies and tools
- explain benchmarking methodologies when implementing monitoring mechanisms
- describe how to formulate software size models and size estimates when employing control mechanisms
- discuss quality assurance and quality processes when implementing monitoring mechanisms
- describe software development methodologies when identifying and clarifying configuration management requirements
- identify and summarise relevant organisational guidelines, legislation and codes of practice.

# ICTSAS403 Review site environmental factors prior to ICT system implementation

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to review, identify and assess the impact of site environmental factors prior to commencing information and communications technology (ICT) system installation.

It applies to individuals who use specialised knowledge and a systematic approach to assess a physical site to determine its suitability for system installation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Systems administration and support

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Plan work area | 1.1 Obtain technical and environmental system requirements for equipment to be installed and document site requirements, including work health and safety (WHS) site specific requirements<br>1.2 Consider and take action on requirements associated with equipment against installation requirements<br>1.3 Conduct on-site inspection and audit against site specifications<br>1.4 Formulate preliminary recommendations for site and assess |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | impact on system installation schedule<br>1.5 Prepare preliminary report specifying recommended changes to the site to meet requirements and submit report to appropriate person for approval |
| 2. Evaluate environment | 2.1 Organise appropriate support staff to facilitate successful installation<br>2.2 Install cabling and other environmental equipment to required technical and industry standards<br>2.3 Manage hardware installation to ensure WHS standards for hardware installation are adhered to<br>2.4 Review and test hardware and software to ensure system meets client business requirements and system objectives |
| 3. Document recommendations | 3.1 Prepare final report documenting findings and issues relating to site requirements and preparation<br>3.2 Submit final recommendations to appropriate person for approval |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.3 | • Interprets and analyses complex technical and non-technical information and data from a range of sources to determine requirements and complete necessary actions |
| Writing | 1.1, 1.4, 1.5, 3.1 | • Accurately records a range of technical information and uses clear language and documentation formats to convey findings |
| Oral Communication | 1.5, 2.2, 3.2 | • Uses active questioning and listening techniques to confirm understanding and convey information to team members and clients |
| Numeracy | 1.1, 1.3, 1.4, 3.1 | • Uses mathematical equations to calculate and compare numerical data against technical requirements and to determine required actions |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Navigate the world of work | 1.1, 1.2, 2.3 | • Takes personal responsibility for establishing and complying with legislative requirements |
| Interact with others | 1.5, 2.2, 3.2 | • Selects and uses appropriate conventions and protocols when communicating with co-workers and others in a range of work contexts |
| Get the work done | 1.2-1.4, 2.1-2.4, 3.2 | • Takes responsibility for planning, sequencing and prioritising tasks and own workload for efficiency and effective outcomes<br>• Uses formal analytical thinking techniques for identifying issues and generating possible solutions, seeking input from others as required<br>• Uses the main features and functions of digital tools to complete work tasks |

# Assessment Requirements for ICTSAS403 Review site environmental factors prior to ICT system implementation

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- identify environmental prerequisites prior to commencement of information and communications technology (ICT) system installation
- sequence the preparatory steps
- consider time and budget constraints
- document and submit recommendations.

Note: Evidence must be provided for at least TWO site installation schedules.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss key features of current industry accepted hardware and software products
- analyse current system's functionality
- describe general features and capabilities of network devices
- describe physical prerequisites needed for system installation
- outline possible legislative requirements relating to cabling and building preservation
- identify key features of quality assurance practices
- discuss role of stakeholders and degree of stakeholder involvement
- describe vendor equipment specifications and installation requirements.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work and include access to:

© Commonwealth of Australia, 2025 Future Skills Organisation

- special purpose tools, equipment and material
- industry software packages
- staff resources and technical equipment
- live network
- server and workstation hardware and software
- several different device types to be installed
- a number of scenarios, such as local area networks (LANs) incorporating hubs, routers and peripherals.

Assessors must satisfy NVR/AQTF assessor requirements.

# Assessment Requirements for ICTSAS404 Acquire ICT system components

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- identify and confirm correct system components
- follow procurement procedures to purchase components
- fulfil technical and business requirements
- communicate with client and other stakeholders.

Note: Evidence must be provided for at least TWO systems.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- compare and contrast the key features of current industry accepted hardware and software products
- compare and contrast financial management options, including leasing arrangement
- identify information gathering techniques
- analyse risk management in relation to information and communications technology (ICT) component use and items procured
- outline quality assurance practices in relation to identifying and acquiring ICT system components
- discuss the client business domain
- research vendor product directions
- describe organisational procurement procedures.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work and include access to:

- special purpose tools, equipment and materials
- industry software packages
- current system architectures
- current business and ICT strategic plans
- data models
- functional process descriptions
- service levels
- user requirements.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTSAS405 Identify and evaluate ICT industry vendor technologies

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to research, evaluate and recommend an industry vendor to supply information and communications technology (ICT) components, and to negotiate with the vendor for supply of identified components. It covers testing and making comparisons and evaluations, including consideration of factors such as after sales service and reliability.

It applies to individuals who use technical and specialised knowledge, and apply a systematic approach to select the most appropriate vendors for the organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Systems administration and support

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Select method to be used for identifying suitable vendor | 1.1 Evaluate organisational purchasing policy as a means of identifying vendors and document outcomes<br>1.2 Consider and undertake other means of identifying suitable vendors and document outcomes |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.3 Recommend preferred method of vendor selection to client<br>1.4 Plan and document selection process |
| 2. Review vendor offerings | 2.1 Notify vendors of organisation's requirements<br>2.2 Undertake evaluation process by comparing offers against organisational requirements<br>2.3 Organise vendor demonstrations and performance benchmark tests<br>2.4 Select vendor based on specific technical criteria, servicing, warranty and after sales service |
| 3. Prepare contracts and delivery requirements | 3.1 Prepare contracts for review by appropriate person<br>3.2 Identify and document delivery arrangements with suppliers<br>3.3 Clarify installation responsibilities with suppliers<br>3.4 Review warranty and support requirements with suppliers and service-level agreement<br>3.5 Confirm details with client |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.2, 3.3 | • Interprets, analyses and reviews complex technical information and numerical/financial data from a range of sources to determine client requirements and complete necessary actions |
| Writing | 1.1-1.4, 2.1, 3.1-3.4 | • Develops material containing specific requirements using clear and technical language, and organises content in a manner that supports the purpose of the document |
| Oral Communication | 1.3, 2.1, 3.1, 3.3, 3.4 | • Obtains information by listening and questioning and participates in verbal exchanges with a range of stakeholders using detailed and clear language to express requirements, gain consensus and convey information |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Numeracy | 1.1, 1.2, 1.4, | • Uses mathematical equations to calculate and compare numerical data against technical and financial requirements and to determine required actions |
| Interact with others | 2.3, 3.1, 3.3, 3.5 | • Selects and uses appropriate conventions and protocols when communicating with client, vendors and others in a range of work contexts |
| Get the work done | 1.1, 1.2, 1.4, 2.1-2.4, 3.1-3.4 | • Takes responsibility for planning, sequencing and prioritising tasks and own workload for efficiency and effective outcomes<br>• Uses formal analytical thinking techniques for identifying issues and generating possible solutions, seeking input from others as required |

# Assessment Requirements for ICTSAS405 Identify and evaluate ICT industry vendor technologies

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- select an appropriate vendor to supply components according to organisational requirements
- communicate with vendors and clients
- evaluate vendors offerings
- prepare contracts and delivery documentation
- demonstrate consistency in the acquisition of technical and business requirements.

Note: Evidence must be provided on at least TWO occasions.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss different benchmarking methodologies
- describe the key features of change management systems
- explain the key features of contracts in relation to supply and support
- compare and contrast the key features of current industry accepted hardware and software products
- compare and contrast the key features of financial management and leasing arrangements
- identify information gathering techniques
- outline quality assurance practices in relation to evaluating and recommending information and communications technology (ICT) vendors
- analyse risk management in relation to evaluating and recommending ICT vendors
- discuss the client business domain
- research vendor product trends.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work and include access to:

- special purpose tools, equipment and materials
- industry software packages
- current business and ICT strategic plans
- service levels and user requirements.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTSAS406 Implement and hand over system components

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to ensure the system is operational prior to hand over for client use, including conducting formal testing and trials to determine whether the system satisfies its acceptance criteria.

It applies to individuals who may work under supervision but have a level of responsibility in ensuring work is planned and completed according to quality and client requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Systems administration and support

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Confirm system integrity | 1.1 Check functioning of the system and its components in both a stand-alone and integrated environment<br>1.2 Specify shortcomings or problems and create an action plan<br>1.3 Review action plan with client<br>1.4 Document system components according to standards and procedures |
| 2. Provide operation and | 2.1 Identify and document operational issues and procedures |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| maintenance guidance | 2.2 Discuss maintenance issues with technical support, and document outcomes<br>2.3 Compare maintenance, operational and warranty considerations with service level agreements (SLAs) and document discrepancies<br>2.4 Clarify outstanding issues with client |
| 3. Hand over system to client | 3.1 Demonstrate installed system to client<br>3.2 Obtain client sign-off to confirm satisfaction and acceptance of the installed system<br>3.3 Discuss and confirm short-term implementation support with client<br>3.4 Discuss and confirm further training needs with client<br>3.5 Document needs and submit to appropriate person for action |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.3,1.4, 2.3 | • Interprets and analyses numeric data and textual information containing technical terms and specifications to determine and adhere to requirements |
| Writing | 1.2, 1.4, 2.1-2.4, 3.5 | • Records information using required format, accurate spelling and grammar, and terminology specific to requirements<br>• Develops material containing specific requirements using clear and technical language, and organises content in a manner that supports the purpose of the document |
| Oral Communication | 1.3, 2.2, 2.4, 3.1, 3.2, 3.4 | • Uses clear language to explain technical information and participates effectively in verbal exchanges to clarify requirements in formal and informal situations |
| Navigate the world of work | 1.1, 3.2 | • Takes personal responsibility for following explicit and implicit policies, procedures and standards |
| Interact with | 1.3, 2.2, 2.4, 3.1, | • Selects and uses appropriate conventions and protocols when communicating with client and others in a range |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| others | 3.3-3.5 | of work contexts |
| Get the work done | 1.1-1.3, 2.1, 2.3, 3.2-3.4 | • Takes responsibility for planning, sequencing and prioritising tasks and own workload for efficiency and effective outcomes<br>• Uses formal analytical thinking techniques for identifying issues and generating possible solutions, seeking input from others as required<br>• Uses the main features and functions of digital tools to complete work tasks |

# Assessment Requirements for ICTSAS406 Implement and hand over system components

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- confirm system integrity prior to hand over
- provide operational and maintenance guidance
- hand over system to client.

Note: Evidence must be provided on at least TWO occasions.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss current business practices related to preparing reports, including confirming system integrity and handing over the system
- evaluate current industry accepted hardware and software products to enable candidate to optimise value of a supply contract
- outline key aspects of change management systems
- discuss issues relating to the client-business domain
- describe a range of information gathering techniques
- explain key operational procedures for ICT systems
- analyse key features and processes involved in project planning, including:
  - constraints
  - guidelines
  - deadlines
- outline key features of quality assurance practices
- analyse role of stakeholders in service level agreements (SLA) and discuss degree of stakeholder involvement in determining levels of responsibility in a project
- describe vendor product trend directions.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work and include access to:

- special purpose tools, equipment and materials
- industry software packages
- customer computer site and system or suitable simulated system and environment
- implementation plan
- people involved in hand over
- project plan
- service level agreements.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTSAS407 Conduct pre-installation audit for software installation

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to identify and appraise critical pre-existing systems or components prior to the installation of software, including establishing compatibility and interoperability requirements.

It applies to individuals who apply technical and specialised software development knowledge and systematic approaches to determine client/system software requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Systems administration and support

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Assess compatibility of existing software | 1.1 Confirm details of software loaded on client system from actual system and from existing system documentation<br>1.2 Identify software prerequisites for new software<br>1.3 Confirm customer requirements with technical specifications<br>1.4 Confirm and assess compatibility issues against installation |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | plan and cost constraints<br>1.5 Document recommendations on variances, level and software consistency for consideration by appropriate person |
| 2. Confirm interoperability of software with environment | 2.1 Confirm no conflicts between new software and previously installed software and hardware<br>2.2 Measure degree of interoperability between software<br>2.3 Confirm interoperable functioning of all software involved |
| 3. Assess system capacity to install ordered software | 3.1 Obtain details of current system memory, disk, available disk storage, and other specific hardware requirements from investigation of system and system documentation<br>3.2 Confirm hardware prerequisites for new software are met, implications noted and minimum requirements identified<br>3.3 Confirm and assess capacity issues against installation plan and cost constraints<br>3.4 Document recommendations on variances in capacity for consideration by appropriate person |
| 4. Prepare and distribute audit report | 4.1 Document findings, recommendations and impact on project in a manner appropriate for target audience<br>4.2 Present and distribute the audit analysis report according to organisational standards and procedures |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1-1.3, 3.1 | • Compares and contrasts complex technical information and numerical/financial data from a range of sources to determine client requirements and complete necessary actions |
| Writing | 1.5, 3.2, 4.1, 4.2 | • Develops material containing specific requirements using clear and technical language, and organises content in a manner that supports the purpose of the document |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Oral Communication | 1.3, 1.5, 3.4, 4.2 | • Obtains information by listening and questioning, and participates in verbal exchanges with a range of stakeholders, using detailed and clear language to express requirements and present information |
| Numeracy | 1.4, 2.2, 3.1-3.4, 4.1 | • Uses mathematical equations to calculate and compare numerical data against technical and financial requirements, and to determine required actions |
| Interact with others | 1.3, 1.5, 3.4, 4.2 | • Selects and uses appropriate conventions and protocols when communicating with client and others in a range of work contexts |
| Get the work done | 1.1-1.5, 2.1-2.3, 3.1-3.4, 4.1 | • Takes responsibility for planning, sequencing and prioritising tasks and own workload for efficiency and effective outcomes<br>• Uses formal analytical thinking techniques for identifying and documenting issues<br>• Uses main features and functions of digital tools to complete work tasks |

# Assessment Requirements for ICTSAS407 Conduct pre-installation audit for software installation

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- assess capability of hardware on which new system is to be installed
- assess capacity of hardware to run the installed system
- confirm new systems will operate cooperatively with existing systems
- prepare an audit report and relevant documentation
- distribute the documentation.

Note: Evidence must be provided for at least TWO installations.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- compare and contrast current industry accepted hardware and software product
- analyse a client business domain and the current information and communications technology (ICT) system functionality
- describe the key features of:
  - quality assurance practices
  - risk management practices
- describe the role of stakeholders and the degree of stakeholder involvement.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work and include access to:

- special purpose tools, equipment, materials and industry software packages

© Commonwealth of Australia, 2025 Future Skills Organisation

- documentation tools
- operational system and system specifications
- technical specifications of software to be installed.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTSAS408 Complete data transition in data migration process

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to undertake manipulation, migration and conversion of data between systems or databases while maintaining data integrity.

It applies to individuals who use technical and specialised knowledge, and apply a systematic approach to perform operations relating to the implementation of new systems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Systems administration and support

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Perform data transition | 1.1 Identify and document data that is to be migrated, transferred or archived<br>1.2 Collect required data, target database requirements and implementation details<br>1.3 Clean up data to match new data structures and rules<br>1.4 Write and test conversion programs if required by the implementation plan, or use conversion tools |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.5 Ensure clean data take-on by re-keying or converting according to database requirements and conversion plan<br>1.6 Migrate data to target environment<br>1.7 Archive data according to requirements |
| 2. Check data transition | 2.1 Run reports and other tests on old and new data to verify the quantity and quality of data transition<br>2.2 Run production or specialised programs against data to confirm control totals<br>2.3 Check referential integrity and data constraints and requirements against database requirements and conversion plan<br>2.4 Verify that data transition has been completed according to requirements and plans |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.3, 2.1, 2.2, 2.3 | • Compares and contrasts complex technical information and numerical data from different sources to determine requirements and complete necessary actions |
| Writing | 1.1, 1.4 | • Develops material using specific and technical language, and organises content in a manner that supports the purpose of the document |
| Numeracy | 2.1, 2.2 | • Uses mathematical equations to calculate quantities and to compare numerical data against technical requirements to determine required actions |
| Get the work done | 1.1-1.7, 2.1-2.4 | • Takes responsibility for planning, sequencing and prioritising tasks and own workload for efficiency and effective outcomes<br>• Uses main features and functions of digital tools to complete work tasks |

# Assessment Requirements for ICTSAS408 Complete data transition in data migration process

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- identify data to be migrated
- transfer data from one system to another
- produce consistency in results
- verify database integrity for transferred data.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe current industry accepted hardware and software products, including their general features and capabilities
- identify and summarise new and existing systems' current functionality
- describe data management systems when performing data transition, including:
  - data integrity
  - database structures
  - quality assurance practices
  - software tools
  - system data requirements
- describe the client business domain relevant to data transition
- outline client's data management and data security policy and procedures.

# ICTSAS409 Manage risks involving ICT systems and technology

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to implement procedures that identify, analyse, evaluate and monitor risks involving information and communications technology (ICT) systems and technology. This includes the development and management of contingency plans.

It applies to individuals who provide high level technical skills and knowledge, and systematic approaches to manage risk in ICT systems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Systems administration and support

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Establish risk context | 1.1 Review and document organisational and technical environment<br>1.2 Establish and document risk boundaries according to business operating and strategic environment |
| 2. Identify risk factors | 2.1 Develop or acquire a measurement scale for project risk, which |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | includes importance, complexity, time and resources required<br>2.2 Identify project risks based on the measurement scale developed and document according to business requirements<br>2.3 Identify business impact of changes and document according to current and future business directions |
| 3. Implement contingency plans | 3.1 Classify each risk and create contingency plans that address how the risk will be monitored and overcome, if possible<br>3.2 Identify measurable benchmarks to track the treatment of risks to the new system<br>3.3 Identify risk management intervention points according to benchmarked performance tolerances<br>3.4 Demonstrate use of phased implementation and piloting to reduce risk factors |
| 4. Monitor, update and report risk profile | 4.1 Conduct regular risk updates to add new risks and remove old ones<br>4.2 Update contingency plans when appropriate to incorporate new information<br>4.3 Conduct risk reviews at major project milestones and document outcomes<br>4.4 Establish feedback processes to provide warning of potential new risks according to business requirements |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1 | • Compares and contrasts complex technical information and numerical data from different sources to determine requirements and complete necessary actions |
| Writing | 1.1, 1.2, 2.1-2.3, 3.1, 4.2, 4.3 | • Develops material using specific and technical language, and organises content in a manner that supports the purpose of the document |
| Oral | 4.1, 4.3, 4.4 | • Obtains information by listening and questioning, and participates in verbal exchanges with stakeholders |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Communication | | using clear and accurate language to express requirements and present information |
| Numeracy | 2.1-2.3, 3.2, 3.3, 4.2 | • Uses mathematical equations to calculate and compare numerical data against benchmarks to determine required actions<br>• Creates or uses measurement scales to rate and prioritise risk |
| Interact with others | 4.1, 4.3, 4.4 | • Selects and uses appropriate conventions and protocols when communicating with stakeholders in a range of work contexts |
| Get the work done | 1.1, 1.2, 2.1-2.3, 3.1-3.4, 4.1-4.4 | • Takes responsibility for planning, sequencing and prioritising tasks and own workload for efficiency and effective outcomes<br>• Uses formal analytical thinking techniques for identifying issues and generating possible solutions, seeking input from others as required |

# Assessment Requirements for ICTSAS409 Manage risks involving ICT systems and technology

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- identify and document where risk occurs
- develop and implement measures to mitigate or obviate risk
- set up procedures for regular risk management
- monitor, review and report risk profile

Note: Evidence must be provided for at least TWO information and communications technology (ICT) environments.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- analyse and discuss risk management strategies and issues
- outline key features of regulation, standards and codes of practice relevant to risk management including:
  - ethics
  - copyright and intellectual property
  - privacy legislation
- identify and describe guidelines required for updating technology
- describe the business supply chain for the ICT industry
- summarise user analysis and the client relationship management (CRM) systems
- describe business process design principles in relation to risk management.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work and include access to:

- special purpose tools, equipment and materials
- industry software packages
- analysis software
- business website
- networks
- requirements documentation
- risk management plan
- site server
- site server software
- software applications
- updated or new technology
- user analysis
- web servers.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTSAS410 Identify and resolve client ICT problems

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to record and prioritise client support activities, determine the required resources, solve client information and communications technology (ICT) problems or escalate as necessary.

It applies to experienced individuals who apply specialised and technical knowledge and have responsibility for providing support to end users.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Systems administration and support

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Determine client problems | 1.1 Determine client problem by using questioning or other techniques<br>1.2 Document responses of client for follow-up action<br>1.3 Examine logged requests to determine specific requirements<br>1.4 Take action where required to gain further information<br>1.5 Refer to a database of known problems to identify possible |

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | resolution options |
| 2. Prioritise client problems | 2.1 Determine scale of the problem based on information gathered<br>2.2 Establish and record relevant constraints<br>2.3 Undertake an impact analysis of the problem to determine severity and risks<br>2.4 Prioritise problem according to organisation's escalation procedures<br>2.5 Provide advice and support to the client from database of known problems, where appropriate |
| 3. Refer problems where required | 3.1 Investigate and apply appropriate process to follow when referring problems to third parties<br>3.2 Provide third party with client and problem details as required<br>3.3 Document advice and support provided by third party according to organisational guidelines, where appropriate |
| 4. Carry out maintenance | 4.1 Obtain appropriate components for resolution in line with organisational guidelines<br>4.2 Complete maintenance in line with organisational guidelines<br>4.3 Store or dispose of used components following organisational environmental guidelines |
| 5. Prepare maintenance report | 5.1 Prepare a maintenance report, including information about problems and resolution action<br>5.2 Forward maintenance report to client for feedback |
| 6. Confirm problem resolution | 6.1 Obtain feedback from client to ensure requirements have been met<br>6.2 Forward client feedback to appropriate person for sign-off and record in known problems database as appropriate |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Reading | 1.3, 1.5, 2.2, 6.1, 6.2 | • Interprets technical specifications and numerical data from a range of documentation and sources to assist in rectifying problems |
| Writing | 1.2, 2.2, 2.5, 3.2, 3.3, 5.1 | • Uses clear language and formats appropriate for the audience to convey explicit technical information, requirements and recommendations |
| Oral Communication | 1.1, 2.5, 3.2, 5.2, 6.1 | • Uses inclusive questioning techniques to obtain information from clients and provides clear and precise advice and information to others |
| Navigate the world of work | 1.4 | • Develops and maintains knowledge relevant to work role |
| Interact with others | 1.1, 2.5, 5.2, 6.1, 6.2 | • Selects and uses appropriate conventions and protocols when communicating with client and others in a range of work contexts |
| Get the work done | 1.1, 1.4, 1.5, 2.1-2.4, 3.1-3.3, 4.1-4.3 | • Takes responsibility for planning, sequencing and prioritising tasks and own workload for efficiency and effective outcomes<br>• Uses formal analytical thinking techniques for identifying issues and generating possible solutions, seeking input from others as required<br>• Uses main features and functions of digital tools to complete work tasks |

# Assessment Requirements for ICTSAS410 Identify and resolve client ICT problems

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- record and prioritise client support activities
- determine required resources
- resolve client problems or escalate according to organisational guidelines or practices
- prepare maintenance report
- seek and record client feedback.

Note: Evidence must be supplied for at least two client support activities.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe hardware and software products:
  - currently in use
  - supported by the organisation
- outline sustainable practices consistent with information and communications technology (ICT) industry
- explain help desk or service desk structure and escalation procedures
- describe key functions and basic features of operating system
- describe organisational structure of workplace
- discuss principles of equal employment opportunity and anti-discrimination relating to client ICT problems
- relating to client ICT problems
- outline workplace security and network guidelines and procedures.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work and include access to:

- special purpose tools, equipment and materials
- industry software packages
- sites with a representative range of current industry-standard hardware, software and diagnostic tools
- technical records
- organisational guidelines
- vendor documentation.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTSAS411 Assist with policy development for client support procedures

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes skills and knowledge required to contribute to the formulation of client support procedures to be included within organisational policy.

It applies to experienced individuals who may work under supervision and have a level of responsibility to ensure work is completed to quality standards and requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Systems administration and support

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Determine support issues | 1.1 Review current client support procedures followed by the organisation if appropriate<br>1.2 Gather feedback from client detailing positive and negative aspects of their contact with the organisation<br>1.3 Gather feedback from user who executes client support procedures, detailing problems with current methods |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| 2. Develop client support procedures | 2.1 Create or update client support procedures using information gathered from client and user<br>2.2 Forward new client support procedures to appropriate person for review |
| 3. Provide recommended changes for client support policy | 3.1 Evaluate feedback on client support policy<br>3.2 Incorporate changes to client support policy<br>3.3 Determine impact the new policy will have on organisational guidelines and client interactions<br>3.4 Prepare report detailing changes in policy and impact on the client and user in a clear and concise manner<br>3.5 Forward report and updated policy to appropriate person for approval |
| 4. Update documented client support policy | 4.1 Amend policies to include new client support procedures<br>4.2 Issue new policies to clients and users in line with organisational guidelines<br>4.3 Maintain policy updates in line with organisational guidelines |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 3.1 | • Interprets and analyses technical information and numerical data from different sources to determine requirements and complete necessary actions |
| Writing | 1.2, 1.3, 2.1, 3.2, 3.4, 4.1 | • Develops and presents specific information logically and concisely, using appropriate formats and clear and accurate language<br>• Revises documents based on feedback from others and implements version-control procedures |
| Oral Communication | 1.2, 1.3, 2.2, 3.5, 4.2 | • Effectively uses questioning and active listening techniques, and participates in verbal exchanges to obtain information and gather feedback from a range of stakeholders<br>• Uses detailed and clear language to express |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| | | requirements and present information |
| Numeracy | 1.1, 2.1, 3.4, 4.1 | • Interprets, analyses and presents numeric information in documents and reports |
| Navigate the world of work | 4.3 | • Takes personal responsibility for maintaining policies as required by organisational guideline |
| Interact with others | 2.2, 3.5, 4.2 | • Selects and uses appropriate conventions and protocols when communicating with client and others in a range of work contexts |
| Get the work done | 1.1-1.3, 2.1, 2.2, 3.1-3.4, 4.1, 4.3 | • Takes responsibility for planning, sequencing and prioritising tasks and own workload for efficiency and effective outcomes<br>• Uses formal analytical thinking techniques for identifying issues and generating possible solutions, seeking input from others as required |

# Assessment Requirements for ICTSAS411 Assist with policy development for client support procedures

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- evaluate and analyse existing client support policy and procedures
- create or update procedures for current or emerging needs
- elicit feedback and review proposed changes
- make recommendations on new changes
- update and maintain policies.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss current trends and issues in information and communications technology (ICT) relevant to client support
- describe the key features of the organisational guidelines for client maintenance and administration
- explain the key features of organisational policy for access and security
- describe the review process and its key stages.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work and include access to:

- special purpose tools, equipment and materials
- industry software packages

© Commonwealth of Australia, 2025 Future Skills Organisation

- sites, peers and supervisors to identify the extent and quality of the contribution required
- information about systems or networks to be supported
- technical manuals, tools and organisational guidelines
- current business requirements and documentation standards.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTSAS412 Action change requests

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to receive, review and carry out change requests while using a change management system, according to client requirements.

This unit applies to individuals who may work under supervision and have a level of responsibility to ensure work is completed to quality standards and requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Systems administration and support

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Review change requests | 1.1 Receive and document requests for hardware and software changes from client, using a change management system and according to organisational help desk procedures<br>1.2 Gather and organise system data relevant to the change requests, using available diagnostic tools<br>1.3 Review proposed changes against current and future business requirements and examine system data, with work team, to select appropriate changes |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.4 Discuss and clarify the selected changes with client |
| 2. Modify system according to requested changes | 2.1 Develop a plan, with prioritised tasks and contingency arrangements, for modification of the system<br>2.2 Undertake selected system changes according to organisational guidelines and procedures, and according to manufacturer recommendations<br>2.3 Test system changes for performance, and identify problems<br>2.4 Resolve identified problems<br>2.5 Revise relevant client and technical documentation to reflect system changes according to organisational standards<br>2.6 Notify client of status of change and update change management system, as per organisational help desk procedures |
| 3. Prepare and deliver training on use of modified system | 3.1 Prepare training to meet needs of client in using the changed system<br>3.2 Deliver prepared training appropriate to client |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.2,1.3 | • Interprets and analyses technical textual information and numerical data to determine requirements and complete necessary actions |
| Writing | 1.1, 1.4, 2.1, 2.5, 2.6 | • Uses clear language and formats appropriate to the task to record and update explicit technical information, requirements and recommendations |
| Oral Communication | 1.4, 2.6, 3.2 | • Uses clear and precise language, and interacts effectively with a range of personnel to convey complex technical information, including during training sessions |
| Interact with others | 1.3, 3.2 | • Selects and uses appropriate conventions and protocols when communicating with co-workers and client in a range of work contexts |
| Get the work | 1.1-1.3, 2.1-2.6, 3.1, | • Takes responsibility for planning, sequencing and |

# Assessment Requirements for ICTSAS412 Action change requests

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- review and assess change requests/requirements
- prioritise tasks
- plan and implement change procedures
- comply with organisational guidelines and client requirements
- prepare and deliver training appropriate to the client.

Note: Evidence must be provided for at least TWO organisations or situations.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- analyse current practices relating to:
  - change management procedures and criteria
  - change-management tools
  - help desk practices
  - quality assurance practices
- describe key features of the client business domain including the role of stakeholders and the degree of stakeholder involvement
- describe the key features and capabilities of current industry-accepted hardware and software products
- analyse current service level agreements (SLAs) within or between organisations
- explain the process for system testing
- outline the system's current functionality.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work and include access to:

- special purpose tools, equipment and materials
- industry software packages
- change request documentation
- physical system or network
- technical manuals
- appropriate diagnostic tools
- current business requirements
- documentation standards
- Change management system.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTSAS413 Manage resolution of system faults on a live system

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to manage reactive errors and failures on a live system.

It applies to individuals who apply specialised and technical knowledge and a systematic approach to monitor, maintain and troubleshoot maintenance requirements on systems that are currently operating.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Systems administration and support

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Determine maintenance methodologies and repositories | 1.1 Identify the nature of modification to the system<br>1.2 Confirm existence and currency of repositories<br>1.3 Review repositories for changes and develop new backup procedures<br>1.4 Prepare or check modification request forms and levels of authority for sign-off |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.5 Develop a hierarchy of modifications and the response for each<br>1.6 Determine backup and blackout strategies in place |
| 2. Implement change management system | 2.1 Follow standards and procedures for logging the change request<br>2.2 Document expected impact to user base during implementation<br>2.3 Identify levels of possible failure and related reporting procedures<br>2.4 Document expected outcomes of the modification<br>2.5 Inform user of modification implications<br>2.6 Assign modification to appropriate person for actioning |
| 3. Report review of results | 3.1 Complete aspects of the change system and ensure modification is tested and operational<br>3.2 Prepare report and deliver to appropriate person, indicating the results of modification<br>3.3 Update and amend documentation and repositories |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1-1.3 | • Interprets technical and non-technical information and numerical data from a range of documentation and sources to assist with troubleshooting and rectifying problems |
| Writing | 1.3-1.5, 2.2, 2.4, 2.5, 3.2, 3.3 | • Records and reports specific information logically, using appropriate formats and structures, and revises and updates documentation and repositories based on outcomes of action |
| Oral Communication | 2.5, 2.6 | • Uses industry specific vocabulary to explain and present information to a range of personnel |
| Numeracy | 1.2, 1.3, 1.5, 2.1, 3.2, 3.3 | • Uses mathematical equations to calculate and compare numerical data to determine required actions and for preparing technical reports |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Interact with others | 2.5, 2.6, 3.2 | • Selects and uses appropriate conventions and protocols when communicating with co-workers and others in a range of work contexts |
| Get the work done | 1.1-1.6, 2.1-2.3, 2.6, 3.1-3.3 | • Takes responsibility for planning, sequencing and prioritising tasks and own workload for efficiency and effective outcomes<br>• Uses formal analytical thinking techniques for identifying issues and generating possible solutions, seeking input from others as required<br>• Uses main features and functions of digital tools to complete work tasks |

# ICTSAS414 Evaluate system status

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes skills and knowledge required to evaluate the status of a running system, covering both hardware and software aspects to determine system performance and reliability.

It applies to individuals who apply specialised and technical knowledge and a systematic approach to assessing and evaluating systems prior to problem resolution or upgrades.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Systems administration and support

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Determine scope and evaluation parameters | 1.1 Determine scope of the system evaluation<br>1.2 Comply with organisational requirements when planning a ‘change of status’ test<br>1.3 Review reason for the evaluation, its objectives, deliverables and key performance indicators, using appropriate capacity tools<br>1.4 Plan and document status evaluation and factor in time, environment, internal and external issues |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.5 Alert affected users if evaluation is likely to impact their operations<br>1.6 Develop a plan for the evaluation and identify resources and methods to be used |
| 2. Carry out evaluation | 2.1 Organise required resources as outlined in the plan, and put in place manual or computerised evaluation methods<br>2.2 Run evaluation process according to agreed scope and evaluation parameters<br>2.3 Record status as per procedural parameters and plan<br>2.4 Observe and document during evaluation the effects of changes to system status that are made, according to effect being evaluated<br>2.5 Observe and record effects not listed and that may require further investigation |
| 3. Report on evaluation | 3.1 Prepare a report to the appropriate person, indicating results of status check in the documentation<br>3.2 Highlight anomalies observed in status check that are outside the expected results<br>3.3 Make recommendations for changes to improve system |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.3, 2.4, 2.5 | • Analyses and evaluates technical and non-technical information and numerical data from a range of sources to assist with fault finding and troubleshooting problems |
| Writing | 1.4-1.6, 2.3-2.5, 3.1, 3.2 | • Prepares material using clear and accurate language and numerical data in order to convey explicit information, requirements and recommendations |
| Oral Communication | 1.5 | • Participates in verbal exchanges with a range of stakeholders to obtain information and express requirements |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Numeracy | 1.4, 2.4, 2.5, 3.1, 3.2 | • Uses mathematical equations to calculate and compare numerical data to determine required actions and for preparing technical reports |
| Interact with others | 1.5, 3.1 | • Selects and uses appropriate conventions and protocols when communicating with client and others in a range of work contexts |
| Get the work done | 1.1-1.4, 1.6, 2.1, 2.2, 2.4, 2.5, 3.1-3.3 | • Takes responsibility for planning, sequencing and prioritising tasks and own workload for efficiency and effective outcomes<br>• Uses formal analytical thinking techniques for identifying issues and generating possible solutions<br>• Uses main features and functions of digital tools to complete work tasks |

# Assessment Requirements for ICTSAS414 Evaluate system status

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- determine scope of system performance and reliability for hardware and software
- identify comprehensive performance indicators
- evaluate system performance
- document and report on results.

Note: Evidence must be provided for at least TWO systems.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss capacity planning
- describe the key features of change-control procedures
- describe the key features of client business domain, including the role and level of stakeholder involvement
- compare and contrast the key features and capabilities of current industry accepted hardware and software products
- describe the key features of help desk and maintenance practices
- describe the features of one or more change management tools
- discuss quality assurance practices
- explain the process for system testing
- outline the system's current functionality and describe the features and functions of the system under evaluation.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work and include access to:

- special purpose tools, equipment and materials
- industry software packages
- documentation standards
- backup and recovery policies
- database package with data
- server and networked personal computer.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTSAS415 Optimise ICT system performance

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to identify, improve and monitor information and communications technology (ICT) system performance.

It applies to individuals who are experienced technical support personnel, such as help desk supervisors, ICT support technicians and user support specialists responsible for maintaining computer system performance.

No licensing, legislative, or certification requirements apply to this unit at the time of publication.

## Unit Sector

Systems administration and support

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Identify areas of poor performance | 1.1 Collect system performance data during various usage conditions and times, using available technical tools<br>1.2 Evaluate the collected system performance data related to organisational benchmarks and client feedback to identify areas of poor performance |
| 2. Investigate methods to improve system | 2.1 Identify options to improve performance through discussing the system performance findings with appropriate person and |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| performance | accessing technical resources<br>2.2 Create a report for appropriate person, including cost analysis and identified options for alternative courses of action designed to measurably improve performance<br>2.3 Present report to appropriate person for decision as to preferred course of action |
| 3. Develop an implementation plan for system optimisation | 3.1 Develop a plan for implementing the approved optimisation, with prioritised tasks and minimum disruption to clients<br>3.2 Factor project budget and staff availability into the implementation plan<br>3.3 Submit the implementation plan to the appropriate person for approval and revision, if necessary |
| 4. Modify system to optimise performance | 4.1 Install or configure system components according to installation procedures and organisational guidelines, following the implementation plan<br>4.2 Measure and record the change in performance resulting from the system modification to assess that the required level of optimisation has been achieved<br>4.3 Update appropriate documentation according to organisational guidelines to reflect the system optimisation |
| 5. Monitor ongoing system performance | 5.1 Implement and maintain a performance register<br>5.2 Review and assess benchmarks and performance regularly with the work team to enable timely optimisation and updates |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.2, 4.3 | • Analyses and evaluates technical and non-technical information and numerical data from a range of sources to determine benchmarks and performance indicators |
| Writing | 2.2, 2.3, 3.3, 4.2, | • Accurately records information and numerical data, and prepares material using clear and accurate |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| | 4.3, 5.1 | language to convey explicit information, requirements and recommendations |
| Oral Communication | 2.1, 5.2 | • Uses active listening and questioning techniques, and participates in verbal exchanges with a range of stakeholders to obtain information and express requirements |
| Numeracy | 1.1, 2.2, 3.2, 4.2 | • Uses mathematical equations to calculate and compare numerical and financial data to determine required actions and for preparing technical reports |
| Navigate the world of work | 4.1 | • Takes personal responsibility for following explicit and implicit policies and procedures |
| Interact with others | 2.1-2.3, 3.3, 5.2 | • Selects and uses appropriate conventions and protocols when communicating with co-workers and others in a range of work contexts<br>• Collaborates with others to achieve shared goals |
| Get the work done | 1.1,1.2, 2.1, 2.2, 3.1, 3.2, 4.1-4.3, 5.1, 5.2 | • Takes responsibility for planning, sequencing and prioritising tasks and own workload for efficiency and effective outcomes<br>• Applies analytical processes to resolve technical or conceptual problems<br>• Uses main features and functions of digital tools to complete work tasks |

# Assessment Requirements for ICTSAS415 Optimise ICT system performance

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- analyse system performance and document a plan to improve performance
- modify and tune the system to keep the system balanced and performing well.

Note: Evidence must be provided for at least TWO organisations or occasions.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- analyse business scheduling requirements, including the role of stakeholders and the degree of stakeholder involvement
- compare and contrast current industry standard hardware and software monitoring tools, and how to interpret information produced from monitoring
- describe optimum system performance, change-control procedures and theoretical concepts
- analyse one or more change management tools
- discuss quality assurance practices with regard to proposed changes to information and communication technology (ICT) systems
- analyse current system functionality and describe the key features and functions of the system under modification.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work, and include access to special purpose tools, equipment, materials and industry software packages including:

© Commonwealth of Australia, 2025 Future Skills Organisation

- special purpose tools, equipment and materials
- industry software packages, including:
  - system components and software for performance tuning
  - technical manuals and resources
  - fault logs
  - diagnostic tools.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTSAS416 Implement maintenance procedures

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to set up maintenance procedures to keep equipment and software operating effectively.

It applies to individuals who use technical and specialised knowledge, and apply a systematic approach to maintaining computer equipment in an organisation.

No licensing, legislative, or certification requirements apply to this unit at the time of publication.

## Unit Sector

Systems administration and support

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Determine best practices for equipment and software maintenance | 1.1 Identify equipment and software that are to be maintained, and implement processes to ensure future acquisitions of equipment and software are identified<br>1.2 Identify vendor documentation, peer organisations or research information detailing best practices in equipment and software maintenance to improve system performance and reliability<br>1.3 Develop recommended maintenance and operations guidelines for equipment and software maintenance based on the above |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | research<br>1.4 Obtain requirements from user in the area of equipment maintenance and reliability<br>1.5 Document procedures for maintenance based on best practices |
| 2. Identify resources to provide equipment and software maintenance | 2.1 Identify and record the level of support that can be provided by in-house resources<br>2.2 Identify and record the support to be supplied by external or third-party organisations<br>2.3 Develop or update service level agreement (SLA) with internal user and third-party suppliers |
| 3. Revise practices, where appropriate | 3.1 Monitor and review maintenance operation<br>3.2 Identify problem areas, including failures to meet SLAs, and consider changes to maintenance procedures<br>3.3 Assess changes in consultation with user, support staff and third-party suppliers<br>3.4 Design and implement improvements to maintenance procedures |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.2, 2.1, 2.2, 3.2 | • Researches and analyses technical and non-technical information and numerical data from a range of sources to determine benchmarks and performance indicators |
| Writing | 1.3, 1.4, 1.5, 2.1-2.3, 3.3, 3.4 | • Accurately records information and numerical data, and prepares material using clear and accurate language in order to convey explicit information, requirements and recommendations |
| Oral Communication | 1.4, 2.3, 3.3 | • Uses active listening and questioning techniques, and participates in verbal exchanges with a range of stakeholders in formal and informal situations to obtain information and express requirements |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Numeracy | 1.1, 1.2, 2.1,2.2, 3.2 | • Uses mathematical equations to calculate and compare numerical data to determine required actions and for preparing documentation |
| Interact with others | 1.4, 2.3, 3.3 | • Selects and uses appropriate conventions and protocols when communicating with users and others in a range of work contexts |
| Get the work done | 1.1-1.4, 2.3, 3.1-3.4 | • Takes responsibility for planning, sequencing and prioritising tasks and own workload for efficiency and effective outcomes<br>• Applies analytical processes to resolve technical or conceptual problems<br>• Uses main features and functions of digital tools to complete work tasks |

# Assessment Requirements for ICTSAS416 Implement maintenance procedures

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- set up and document the maintenance procedures to keep equipment and software operating
- identify resource requirements
- document or update service level agreements (SLAs)
- revise maintenance procedures.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- analyse client business domain including:
  - the role of stakeholders and the degree of stakeholder involvement
  - business scheduling requirements
- compare and contrast the key features and capabilities of current industry standard hardware and software products
- describe the key features and purpose of diagnostic tools and one or more change management tools
- describe the key features of help desk and maintenance practices and procedures
- discuss quality assurance practices
- analyse the system's current functionality and performance level.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work, and include access to:

- industry software packages
- technical environment with a variety of operational equipment
- technical manuals and tools.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTSAS417 Undertake ICT system capacity planning

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to monitor and assess the current and future capacity requirements of an information and communications technology (ICT) system, plan future enhancements and install the identified enhancements.

It applies to experienced individuals who work under limited supervision and use technical and specialised knowledge to undertake strategic planning and forecasting initiatives.

No licensing, legislative, or certification requirements apply to this unit at the time of publication.

## Unit Sector

Systems administration and support

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Analyse existing system capacity | 1.1 Review existing system configuration information, both hardware and software, to determine capacity issues<br>1.2 Investigate the current system workload and analyse its effect on the capacity to perform<br>1.3 Examine the current service level agreement (SLA) to determine agreed-upon capacity standards<br>1.4 Examine and analyse the fault logs for those caused by |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | capacity problems<br>1.5 Discuss and review capacity issues with users<br>1.6 Document information gathered about the existing system workload and capacity according to organisational guidelines |
| 2. Determine future capacity requirements | 2.1 Interview the user to gather data about future system capacity requirements<br>2.2 Organise, analyse and evaluate future requirements data to obtain a forecast workload for the system<br>2.3 Using data and information gathered, compare existing workload with the forecast workload and evaluate to determine capacity problem areas<br>2.4 Estimate resources and equipment required to resolve predicted capacity problems<br>2.5 Undertake a financial analysis of the estimated capacity requirements<br>2.6 Organise and document information according to organisational guidelines<br>2.7 Prepare and present a report to appropriate person, detailing recommendations for capacity enhancements based on an analysis of documentation |
| 3. Develop plan for capacity enhancements | 3.1 Develop a plan for implementing recommended enhancements, with prioritised tasks and minimum disruption to users<br>3.2 Factor into the implementation plan the availability of finances, staff and other requirements<br>3.3 Submit the implementation plan to appropriate person for approval and revision |
| 4. Install capacity enhancements | 4.1 Install capacity enhancements according to installation procedures, organisational guidelines and implementation plan<br>4.2 Measure the increase in capacity and performance resulting from installed equipment to assess whether capacity requirements have been met<br>4.3 Update documentation according to organisational guidelines to reflect the capacity enhancements |
| 5. Monitor ongoing capacity requirements | 5.1 Monitor and assess the impact of new technology and application development on capacity and performance<br>5.2 Implement and maintain a performance database |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 5.3 Review and assess benchmarks and performance regularly with work team to enable timely capacity enhancements and updates of benchmarks |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1-1.4, 2.3, 2.7, 5.3 | • Researches and evaluates technical and non-technical information and numerical and financial data from a range of sources to determine benchmarks and performance indicators |
| Writing | 1.5, 1.6, 2.1, 2.6, 2.7, 3.1-3.3, 5.2 | • Accurately records information and numerical data, and prepares documentation using clear and accurate language to convey explicit information, requirements and recommendations |
| Oral Communication | 1.5, 2.1, 3.3, 5.3 | • Uses listening and questioning techniques to obtain and convey information |
| Numeracy | 2.3- 2.5, 3.1, 3.2, 4.2, 5.1-5.3 | • Uses mathematical equations to calculate, compare and estimate numerical and financial data required for forecasting and planning activities |
| Interact with others | 1.5, 2.1, 2.7, 3.3, 5.3 | • Selects and uses appropriate conventions and protocols when communicating with users, co-workers and others in a range of work contexts<br>• Collaborates with others to achieve shared goals |
| Get the work done | 1.1-1.6, 2.2-2.7, 3.1-3.3, 4.1, 5.1-5.3 | • Takes responsibility for planning, sequencing and prioritising tasks and own workload for efficiency and effective outcomes<br>• Applies analytical processes to resolve technical or conceptual problems<br>• Uses main features and functions of digital tools to complete work tasks |

# Assessment Requirements for ICTSAS417 Undertake ICT system capacity planning

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- monitor and accurately assess current and future capacity requirements of a system and document outcomes
- predict and document capacity requirements, with forecasts being realistic and achievable
- plan and install capacity enhancements
- create and maintain required documentation.

Note: Evidence must be provided for at least TWO organisations or occasions.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- analyse and describe the system's current functionality
- outline the key features of:
  - component performance management
  - current industry accepted hardware and software products
  - financial analysis
  - client business domain
  - performance monitoring tools
  - quality assurance practices with regard to proposed Information and Communications Technology (ICT) capability enhancements
  - service level agreements relating to proposed ICT capability
  - enhancements
  - role of stakeholders and the degree of stakeholder involvement.

© Commonwealth of Australia, 2025 Future Skills Organisation

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work, and include access to:

- special purpose tools, equipment, materials and
- industry software packages
- live system
- service level agreements
- fault logs
- users
- hardware components for installation.

Assessor must satisfy NVR/AQTF assessor requirements.

# ICTSAS418 Monitor and administer security of an ICT system

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to monitor and administer security functions of an information and communications technology (ICT) system.

It applies to experienced individuals who, while working under a level of supervision, have responsibility in a frontline technical support capacity to ensure organisational standards are met, and apply technical and specialised knowledge to maintain the security of a system.

No licensing, legislative, or certification requirements apply to this unit at the time of publication.

## Unit Sector

Systems administration and support

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Ensure user accounts are controlled | 1.1 Modify default user settings to ensure they conform to security policy<br>1.2 Modify previously created user settings to ensure they conform to updated security policy<br>1.3 Ensure legal notices displayed at logon are appropriate<br>1.4 Check strength of passwords using the appropriate utilities and |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | consider tightening rules for password complexity<br>1.5 Take action to ensure password procedures are reviewed with appropriate other internal departments<br>1.6 Monitor email to uncover breaches in compliance with legislation<br>1.7 Access information services to identify security gaps and take appropriate action using hardware and software or patches |
| 2. Secure file and resource access | 2.1 Review inbuilt security and access features of the operating system and consider need for further action<br>2.2 Develop or review the file security categorisation scheme, and develop an understanding of the role of users in setting security<br>2.3 Monitor and record security threats to the system<br>2.4 Implement a virus checking process and schedule for the server, computer and other system components<br>2.5 Investigate and implement inbuilt or additional encryption facilities |
| 3. Monitor threats to the network | 3.1 Use third-party software or utilities to evaluate and report on system security<br>3.2 Review logs and audit reports to identify security threats<br>3.3 Carry out spot checks and other security strategies to ensure that procedures are being followed<br>3.4 Prepare and present an audit report and recommendations to appropriate person<br>3.5 Obtain approval for recommended changes to be made |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.3, 1.6, 1.7, 2.1, 2.2, 2.5, 3.1, 3.5 | • Researches and analyses technical and non-technical information and system data from a range of sources to determine requirements and complete necessary actions |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Writing | 1.5, 2.2, 2.3, 3.1, 3.4 | • Accurately records information and system data using required format, terminology and conventions specific to requirements<br>• Prepares reports using concise language and correct spelling and grammar to convey explicit information, requirements and recommendations |
| Oral Communication | 1.5, 3.1, 3.5 | • Obtains information by listening and questioning, and participates in verbal exchanges with a range of personnel using detailed and clear language to contribute information and express requirements and recommendations |
| Numeracy | 1.1, 1.2, 2.3-2.5, 3.1, 3.2 | • Uses mathematical equations to calculate and compare system and numerical data to determine required actions and prepare reports and schedules |
| Interact with others | 1.5, 3.4, 3.5 | • Selects and uses appropriate conventions and protocols when communicating with others in a range of work contexts |

# Assessment Requirements for ICTSAS418 Monitor and administer security of an ICT system

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- review user accounts for their security control
- identify security features available in the operating environment
- monitor, document and administer security functions on the system
- monitor threats to the network using:
  - third-party diagnostic tools
  - implementation of virus checking process and schedule
  - preparation of an audit report and recommendations.

Note: Evidence must be provided for at least TWO systems or occasions.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the key features of current industry accepted hardware and software products related to IT security
- discuss privacy issues and legislation with regard to IT security
- explain the key components of risk analysis process for system security
- describe the key features of specific security technology and systems technologies
- analyse the client business domain, including client organisation structure and business functionality.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work and include access to:

© Commonwealth of Australia, 2025 Future Skills Organisation

- special purpose tools, equipment and materials
- industry software packages
- the security policy
- industry and organisational standards
- a live system.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTSAS419 Support system software

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to operate and support system software.

It applies to individuals who provide assistance and use technical and specialised knowledge and a systematic approach to tasks to ensure organisational standards are met in maintaining the operating system.

No licensing, legislative, or certification requirements apply to this unit at the time of publication.

## Unit Sector

Systems administration and support

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Maintain system software | 1.1 Evaluate system effectiveness against organisational requirements and benchmarks to determine if maintenance activities should be commenced<br>1.2 Use system utilisation, file and disk structure, performance reports and files to identify peak periods and possible performance problems<br>1.3 Monitor system data levels to determine whether system performance is consistent with predetermined standards |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.4 Troubleshoot the system, if required, with appropriate system tools<br>1.5 Monitor and retune the system to improve performance |
| 2. Set up and manage system files | 2.1 Evaluate system requirements and monitor the appropriateness of file and folder structures<br>2.2 Use appropriate administration and tools to create file and folder structures<br>2.3 Set security, access and sharing of file system to meet requirements<br>2.4 Identify virus protection requirements of the network in line with policies and organisational requirements<br>2.5 Scan system for viruses and remove detected viruses<br>2.6 Test file system to ensure appropriate access is available to user groups<br>2.7 Ensure logon scripts and custom written utilities and programs conform to organisational guidelines for simple programming constructs<br>2.8 Document the file system created according to organisational guidelines |
| 3. Monitor and manage system usage and security | 3.1 Monitor user access against user access levels<br>3.2 Review security requirements for user and data to be stored on network<br>3.3 Determine risks that data is exposed to, and formulate appropriate prevention and recovery processes<br>3.4 Implement a system to provide backup and to restore services in the event of a disaster<br>3.5 Document disaster recovery procedures |
| 4. Carry out system backup | 4.1 Confirm backup schedule meets organisational requirements<br>4.2 Ensure system backups are completed according to organisational, scheduling and system requirements<br>4.3 Ensure that a secure off-site location for the storage of backup media is provided and used<br>4.4 Ensure system backups are recorded according to organisational requirements |
| 5. Restore system backup | 5.1 Ensure system restores are completed when required for system recovery or testing according to organisational guidelines |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 5.2 Optimise the restored system according to organisational requirements<br>5.3 Ensure system restores are documented according to organisational requirements |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.2, 2.1, 2.4, 2.5, 2.7, 3.1-3.3 | Interprets and analyses technical and non-technical information and system data from a range of sources to determine requirements and complete necessary actions |
| Writing | 2.8, 3.3, 3.5, 4.4, 5.3 | Accurately records information and system data using required format, terminology and conventions specific to requirements<br>Prepares reports using concise language and correct spelling and grammar to convey explicit information and requirements |
| Numeracy | 1.2, 2.7, 2.8, 3.2, 5.3 | Uses mathematical equations to calculate and compare system and numerical data to determine required actions and to prepare reports |
| Get the work done | 1.1-1.5, 2.1-2.3, 2.5, 2.6, 2.8, 3.1, 3.3-3.5, 4.1, 4.2, 4.4, 5.1, 5.2 | Takes responsibility for planning, sequencing and prioritising tasks and own workload for efficiency and effective outcomes<br>Applies analytical processes to resolve technical or conceptual problems<br>Uses main features and functions of digital tools to complete work tasks |

# Assessment Requirements for ICTSAS419 Support system software

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- monitor and document system software performance according to vendor and organisational benchmarks
- maintain system performance to these benchmarks
- use a wide range of features and system tools.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- analyse and describe system software and system tools
- outline the key features of change management systems
- describe the client business domain
- describe the quality assurance practices with regard to supporting system software
- identify and describe vendor products and trends in product development.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work and include access to:

- special purpose tools, equipment and materials
- industry software packages
- organisational performance benchmarks
- live system

© Commonwealth of Australia, 2025 Future Skills Organisation

- client user requirements.

Assessors must satisfy NVR/AQTF assessor requirements.

| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to resolve first-level user support difficulties or change requests remotely.

It applies to experienced individuals who, while working under a level of supervision, have responsibility in a frontline technical support capacity to exercise discretion and judgement using appropriate knowledge to provide assistance and remote help desk support to clients.

No licensing, legislative, or certification requirements apply to this unit at the time of publication.

## Unit Sector

Systems administration and support

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Determine the user support issue | 1.1 Determine the eligibility status of the individual experiencing the user support difficulty against organisational guidelines for user support services<br>1.2 Clarify the user support difficulty or change request with client, using active listening and questioning techniques where possible<br>1.3 Confirm the nature of the user support difficulty or change |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | request with client, using technical language that is understandable by the client |
| 2. Identify the hardware or software being used by the customer or client | 2.1 Identify the software, hardware, network connection or application being used by the client<br>2.2 Identify the outcome the client is trying to achieve and the stage of the process they have reached, using active listening and questioning techniques<br>2.3 Step the client back to the beginning of the process using plain English<br>2.4 Walk the client through the process in a clear and logical manner |
| 3. Confirm resolution of user support issue | 3.1 Determine, describe and eliminate factors that may have created the user support issue or permit it to recur<br>3.2 Explain and guide the client through a complete recovery and resolution process for the issue or change request<br>3.3 Provide sufficient instruction to the client to enable effective handling and resolution of the issue, if it recurs<br>3.4 Offer next level escalation or lodgement of change request, explaining cost involved, if user request is not possible to resolve under current circumstances<br>3.5 Document changes where appropriate |
| 4. Maintain communication link | 4.1 Confirm resolution of difficulty with client according to client service policy<br>4.2 Confirm client satisfaction with the current service according to client service policy<br>4.3 Inform client of additional support or services available, according to the organisation's client service policy<br>4.4 Provide the client with additional information related to products and services offered by the organisation, as required by the organisation's sales promotion requirements<br>4.5 Complete the client contact records according to the client service requirements |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 2.1 | • Interprets and analyses technical and non-technical information from a range of sources to determine requirements and complete necessary actions |
| Writing | 3.5, 4.5 | • Accurately records client information using required format, terminology and conventions<br>• Uses concise language and correct spelling and grammar to clearly convey explicit information and actions taken |
| Oral Communication | 1.1-1.3, 2.1-2.4, 3.1-3.4, 4.1-4.4 | • Uses active questioning and listening techniques to convey and clarify information and confirm understanding<br>• Conveys complex technical information using clear and concise language pitched to a level that the client understands |
| Numeracy | 3.4, 3.5, 4.4 | • Uses mathematical equations to calculate costs and estimate time in providing client services and in determining required actions |
| Interact with others | 1.2, 1.3, 2.2-2.4, 3.2-3.4, 4.1-4.4 | • Selects and uses appropriate conventions and protocols when communicating with clients in a range of work contexts |
| Get the work done | 1.1-1.3, 2.1, 2.3, 2.4, 3.1-3.4, 4.1-4.5 | • Takes responsibility for planning, sequencing and prioritising tasks and own workload for efficiency and effective outcomes<br>• Applies analytical processes to resolve technical or conceptual problems<br>• Uses main features and functions of digital tools to complete work tasks |

# Assessment Requirements for ICTSAS420 Provide first-level remote help desk support

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- identify the user difficulty and support required
- resolve first-level user support difficulties remotely
- demonstrate customer service skills
- obtain client feedback and document problem resolution.

Note: Evidence must be provided for at least TWO organisations/clients.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the key features of customer service policies and procedures
- identify and discuss the range of contexts where escalation procedures are required
- identify the work health and safety (WHS) procedures related to the work environment and organisational requirements
- describe user support policies of limited complexity related to known or commonly used options.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the system administration and support field of work and include access to special purpose tools, equipment, materials and industry software packages including:

- customer service policies
- user support policies
- escalation procedures

© Commonwealth of Australia, 2025 Future Skills Organisation

- communications hardware.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTSAS421 Support users and troubleshoot desktop applications

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to sustain users who run operating systems (OS) in a corporate or home environment.

It applies to individuals who provide frontline support to users and apply technical and specialised knowledge to fault finding and problem solving.

No licensing, legislative, or certification requirements apply to this unit at the time of publication.

## Unit Sector

Systems administration and support

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Install, configure and troubleshoot applications | 1.1 Install application for client<br>1.2 Configure and customise application within user environment<br>1.3 Resolve application problems |
| 2. Resolve issues related to usability, customisation and connectivity | 2.1 Determine issues and problems experienced by the client<br>2.2 Research solutions to issues and problems<br>2.3 Recommend solutions to client |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 2.4 Resolve issues and problems |
| 3. Configure application security | 3.1 Identify and troubleshoot problems related to security permissions<br>3.2 Identify and respond to security incidents<br>3.3 Manage application security settings |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 2.2, 3.1 | • Researches and analyses complex technical and non-technical information from a range of sources to determine requirements and complete necessary actions |
| Writing | 2.3 | • Uses clear language and appropriate formats to convey and present explicit information |
| Oral Communication | 2.3 | • Participates in verbal exchanges using clear and concise language to convey and clarify complex technical information |
| Numeracy | 1.2, 2.1, 3.3 | • Uses mathematical equations to calculate and compare numerical data to solve problems and determine required actions |
| Interact with others | 2.3 | • Selects and uses appropriate conventions and protocols when communicating with clients in a range of work contexts |
| Get the work done | 1.1-1.3, 2.1, 2.2, 2.4, 3.1-3.3 | • Takes responsibility for planning, sequencing and prioritising tasks and own workload for efficiency and effective outcomes<br>• Applies analytical processes to resolve technical or conceptual problems<br>• Uses main features and functions of digital tools to complete work tasks |

# Assessment Requirements for ICTSAS421 Support users and troubleshoot desktop applications

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- install, configure and troubleshoot computer applications
- customise computer applications
- anticipate and respond to a range of security incidents.

Note: Evidence must be provided for at least TWO users/situations.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the key features of operating systems (OS) and office applications including an analysis of the current system
- identify sources of OS patches
- discuss specific features of security incidents
- describe the key features of typical systems and procedures of user support.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work and include access to special purpose tools, equipment, materials and industry software packages, including:

- appropriate OS installation compact disk or recovery boot disks
- computers with application errors
- samples of operating system patches
- stand-alone or networked personal computer.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTSAS422 Scope implementation requirements

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to define boundaries and deliverables of a system installation project, in one location, in the context of an overall implementation plan.

It applies to individuals who apply specialised and technical knowledge to strategic initiatives and project planning.

No licensing, legislative, or certification requirements apply to this unit at the time of publication.

## Unit Sector

Systems administration and support

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Determine scope | 1.1 Review project plan and other documentation<br>1.2 Determine installation requirements<br>1.3 Identify other implementation issues |
| 2. Confirm scope with parties | 2.1 Develop and document preliminary project scope and submit to appropriate person<br>2.2 Review requests for revision to scope |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 2.3 Identify areas for further development<br>2.4 Prepare implementation plan and forward to appropriate person |
| 3. Update plans to account for scope | 3.1 Review implementation plan, taking into account scope of system<br>3.2 Review key dates and events to determine if conflicts exist<br>3.3 Confirm revised plans and documents with appropriate person for final approval and sign-off |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 2.2, 2.3, 3.1, 3.2 | • Researches and analyses complex technical and non-technical information from a range of sources to determine requirements and complete necessary actions |
| Writing | 2.1, 2.4, 3.3 | • Develops material for a specific audience using clear and detailed language and appropriate formats to convey explicit information, requirements and recommendations<br>• Reviews and updates documentation based on feedback received |
| Oral Communication | 3.3 | • Participates in verbal exchanges using clear and concise language to convey and clarify complex technical information |
| Numeracy | 1.1, 1.2, 2.1, 3.1, 3.2 | • Uses mathematical equations to calculate, compare and estimate numerical and financial data required for planning and scheduling |
| Interact with others | 2.1, 2.4, 3.3 | • Selects and uses appropriate conventions and protocols when communicating with others in a range of work contexts |
| Get the work done | 1.1-1.3, 2.1-2.4, 3.1-3.3 | • Takes responsibility for planning, sequencing and prioritising tasks and own workload for efficiency and effective outcomes<br>• Applies analytical processes to resolve technical or conceptual problems |

# Assessment Requirements for ICTSAS422 Scope implementation requirements

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- prepare a project plan and implement an approach that addresses:
  - drivers
  - measures of success
  - implementation by functional area
  - coordination.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and describe project planning, including the scope and roles of individuals
- outline the key features of:
  - client business domain
  - information and communications technology (ICT) related services and issues
- identify and describe possible legislative requirements relating to cabling and building preservation
- describe the role of stakeholders and degree of stakeholder involvement
- summarise current trends in vendor products
- analyse and describe:
  - current industry accepted hardware and software products
  - prerequisites needed for system installation
  - vendor specifications and requirements for installation.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work and include access to special purpose tools, equipment, materials and industry software packages, including:

- project documentation
- staff
- resources
- technical equipment.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTSAS424 Support different operating systems

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to repair boot up procedures in a variety of operating systems (OS).

It applies to individuals who use technical and specialised knowledge and a systematic approach to troubleshooting and fault finding.

No licensing, legislative, or certification requirements apply to this unit at the time of publication.

## Unit Sector

Systems administration and support

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Determine organisation's help desk procedures | 1.1 Review organisation's technical support procedures<br>1.2 Interrogate help desk system<br>1.3 Liaise with client |
| 2. Identify OS | 2.1 Examine operating system file and root structure<br>2.2 Identify profile information<br>2.3 Explore the help structure |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 2.4 Observe boot process |
| 3. Differentiate OS | 3.1 Compare and contrast features of OS<br>3.2 Examine kernel file structures<br>3.3 Determine currency of operating system |
| 4. Analyse OS boot processes | 4.1 Analyse boot procedures<br>4.2 Evaluate associated boot files<br>4.3 Itemise boot procedures for different operating procedures |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.2, 2.1, 3.2 | • Interprets and analyses complex technical information from a range of sources to determine requirements and complete necessary actions |
| Writing | 1.3, 4.3 | • Records information in the correct format, using accurate spelling and grammar, and terminology and conventions specific to requirements |
| Oral Communication | 1.3 | • Participates in verbal exchanges using clear and concise language to convey and clarify complex technical information |
| Numeracy | 1.2, 3.3, 4.3 | • Uses mathematical equations to calculate and compare numerical data required for troubleshooting and problem solving |
| Interact with others | 1.3 | • Selects and uses appropriate conventions and protocols when communicating with clients in a range of work contexts |
| Get the work done | 1.1,1.2, 2.1-2.4, 3.1-3.3, 4.1-4.3 | • Takes responsibility for planning, sequencing and prioritising tasks and own workload for efficiency and effective outcomes<br>• Applies analytical processes to resolve technical or conceptual problems<br>• Uses main features and functions of digital tools to complete work tasks |

# ICTSAS425 Configure and troubleshoot operating system software

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to configure, maintain and troubleshoot operating system (OS) software to ensure organisational requirements and client needs are met.

It applies to individuals who are required to install, configure, optimise and troubleshoot OS software to meet organisational requirements.

No licensing, legislative, or certification requirements apply to this unit at the time of publication.

## Unit Sector

Systems administration and support

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Identify available operating systems | 1.1 Compare and contrast different OS<br>1.2 Identify and demonstrate knowledge of basic OS features<br>1.3 Research OS vendor sites to obtain technical specifications and system requirements<br>1.4 Install and configure the OS using features such as Internet |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | Information Services (IIS)<br>1.5 Determine licensing, hardware and security requirements and provide recommendations to appropriate person |
| 2. Install, configure and optimise operating systems | 2.1 Install, configure and test the OS using the installation components and boot utility options<br>2.2 Use the OS user interface to correctly configure the installation<br>2.3 Identify different directory structures and demonstrate management of virtual memory<br>2.4 Optimise system to meet organisational requirements<br>2.5 Document system according to organisational requirements |
| 3. Resolve problems using tools | 3.1 Identify command line options and system tools available to troubleshoot problems<br>3.2 Identify specific problems and implement strategies for resolution<br>3.3 Use options and tools to resolve common operating system issues |
| 4. Provide instruction for new operating system implementation | 4.1 Provide one-to-one instruction about changes to the client or users as required<br>4.2 Obtain client evaluation about new system to ensure requirements are met, using appropriate feedback mechanism |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1-1.3, 1.5, 2.3, 3.1, 4.2 | • Researches and analyses technical textual information and numeric data to source solutions and determine necessary actions |
| Writing | 1.5, 2.5, 4.2 | • Uses clear and technical language and formats appropriate to the task to record and convey information, requirements and recommendations |
| Oral Communication | 1.5, 4.1, 4.2 | • Uses clear and precise language to convey complex technical information and listening and questioning |

# Assessment Requirements for ICTSAS425 Configure and troubleshoot operating system software

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- determine the appropriate operating system
- install, configure and test an operating system (OS)
- improve system performance with minimum disruption to clients
- identify faults and rectify with utilities and tools
- instruct the client or users on the changes in OS
- seek client and user feedback.

Note: Evidence must be provided in at least TWO organisations or situations.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise the requirements of different operating systems
- outline the architecture of current technical systems
- identify and describe the key current industry accepted hardware and software products
- describe the functions and features of the OS used by the organisation
- describe the installation and configuration of systems software including:
  - organisational requirements for OS software
  - prerequisites for system software installation
  - set-up and configuration procedures
  - software packages supported by the organisation
  - system’s current functionality
  - system’s diagnostic software
  - vendor specifications and requirements for installation.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the systems and administration support field of work, and include access to special purpose tools, equipment, materials and industry software packages including:

- personal computer where installation may be performed
- OS software
- technical documentation
- organisational documentation.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTSAS426 Locate and troubleshoot ICT equipment, system and software faults

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to troubleshoot problems and apply systematic processes to fault finding across a wide range of information and communications technology (ICT) disciplines.

It applies to individuals who apply a systematic approach to finding faults, troubleshooting problems and solving issues in a wide range of ICT related areas.

No licensing, legislative, or certification requirements apply to this unit at the time of publication.

## Unit Sector

Systems administration and support

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Choose the most appropriate fault finding method | 1.1 Develop a troubleshooting process to help resolve problems<br>1.2 Analyse and document the system that requires troubleshooting<br>1.3 Identify available fault finding tools and determine the most appropriate for the identified problem<br>1.4 Obtain the required fault finding tools |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.5 Identify legislation, health and safety requirements, codes, regulations and standards related to the problem area |
| 2. Analyse the problem to be solved | 2.1 Collect data relevant to the system<br>2.2 Analyse the data to determine if there is a problem and the nature of the problem<br>2.3 Determine specific symptoms of hardware, operating system and printer problems |
| 3. Identify a solution and rectify the problem | 3.1 Formulate a solution and make provision for rollback<br>3.2 Systematically test variables until the problem is isolated<br>3.3 Rectify the problem<br>3.4 Create a list of probable causes of the problem |
| 4. Test system and complete documentation | 4.1 Test the system to ensure the problem has been solved and record results<br>4.2 Identify and implement common preventative maintenance techniques to support ongoing maintenance strategies<br>4.3 Document the signs and symptoms of the problem and its solution, and load to database of problems or solutions for future reference |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.5, 2.1, 2.2 | • Identifies, analyses and evaluates technical textual information and technical system data to source solutions and determine necessary actions |
| Writing | 1.2, 3.4, 4.1, 4.3 | • Records specific information relating to issues and outcomes in a sequential manner using correct grammar and spelling |
| Navigate the world of work | 1.5 | • Identifies and complies with organisational and legislative requirements |
| Get the work | 1.1-1.5, 2.1-2.3, | • Takes responsibility for planning, sequencing and |

# Assessment Requirements for ICTSAS426 Locate and troubleshoot ICT equipment, system and software faults

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- determine the most appropriate fault finding method
- document the troubleshooting process
- analyse and identify faults
- obtain suitable tools and equipment
- apply simple checks, tests and fault finding methodologies
- apply the recommended means to rectify fault and document results.

Note: Evidence must be provided for at least TWO organisations or situations.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain client support and maintenance practices
- identify and describe current industry accepted hardware and software products, including features and capabilities
- discuss the system's current functionality, including details of the proposed system modifications
- describe one or more change management tools
- explain the key features of quality assurance practices with regard to locating and troubleshooting information and communications technology (ICT) equipment, system and software faults
- outline the change control procedures of the organisation
- describe a range of trouble shooting methodologies and system testing tools
- list and describe common symptoms of faulty ICT equipment
- identify and describe legislative, regulatory, standards or codes of practice that impact on the ICT service sector.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work, and include access to special purpose tools, equipment, materials and industry software packages including:

- system to be diagnosed
- diagnostic and fault finding tools
- technical and system documentation
- organisational requirements for documenting solution.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTSAS501 Develop, implement and evaluate an incident response plan

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to develop and implement an incident response plan. The results of the incident response plan must be evaluated if they affect the mission of the organisation.

It applies to individuals who apply high-level technical skills and specialised knowledge to provide broad support functions in maintaining network service.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Systems administration and support

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Develop the incident response program | 1.1 Develop the incident management policy<br>1.2 Identify services the incident response team should provide<br>1.3 Create incident response plans according to security policy and organisational goals<br>1.4 Develop procedures for incident handling and reporting |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.5 Create incident response exercises and red-teaming activities<br>1.6 Develop specific processes for collecting and protecting forensic evidence during incident response<br>1.7 Specify incident response staffing and training requirements<br>1.8 Establish the response program |
| 2. Implement the incident response program | 2.1 Apply response actions in reaction to security incidents according to established policy, plans and procedures<br>2.2 Respond to and report incidents<br>2.3 Assist in collecting, processing and preserving evidence according to requirements<br>2.4 Execute incident response plans<br>2.5 Execute red-teaming activities and incident response exercises<br>2.6 Ensure lessons learned from incidents are collected in a timely manner and are incorporated into review plans<br>2.7 Collect, analyse and report incident management measures |
| 3. Evaluate the incident response program | 3.1 Assess efficiency and effectiveness of incident response program activities and implement changes as required<br>3.2 Examine effectiveness of red teaming and incident response tests, training and exercises<br>3.3 Assess effectiveness of communication between incident response team and related internal and external organisations, implementing changes where appropriate<br>3.4 Identify and implement improvements based on assessments of effectiveness |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.2 | • Analyses textual information and data to determine necessary actions |
| Writing | 1.1, 1.3, 1.4, 1.6-1.8, | • Uses clear and accurate language and documentation formats appropriate to the task |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| | 2.2, 2.6, 2.7 | |
| Oral Communication | 1.7, 2.2 | • Uses clear and accurate language to provide and obtain information relevant to the task |
| Numeracy | 1.3, 2.7 | • Accurately interprets, analyses and documents numerical and technical system data<br>• Uses mathematical equations to calculate data for technical reports |
| Navigate the world of work | 1.3, 1.4, 1.6, 2.1 | • Works autonomously, making high-level decisions to achieve and improve organisational goals<br>• Develops and implements strategies that ensure organisational policies, procedures and regulatory requirements are met<br>• Monitors and reviews the organisations policies, procedures and adherence to legislative requirements in order to implement and manage change |
| Interact with others | 1.7, 2.2, 3.3 | • Uses a variety of relevant communication tools and strategies in building and maintaining effective working relationships<br>• Influences and fosters a collaborative culture facilitating a sense of commitment and workplace cohesion<br>• Understands diversity and seeks to integrate diversity into the work context for managing change, making decisions and achieving shared outcomes |
| Get the work done | 1.1-1.6, 1.8, 2.1-2.4, 2.6, 2.7, 3.1-3.4 | • Plans strategic priorities and outcomes within a flexible, efficient and effective context in a diverse environment exposed to competing demands<br>• Gathers and analyses data and seeks feedback to improve plans and processes<br>• Addresses complex problems involving multiple variables, using formal analytical, lateral thinking techniques, experience and knowledge to focus in on the root cause<br>• Explores new and innovative ideas to develop and improve performance |

# Assessment Requirements for ICTSAS501 Develop, implement and evaluate an incident response plan

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- develop and document an incident response program
- respond to an incident response activation and operation
- evaluate the incident response.

Note: Evidence must be provided on at least TWO occasions.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the key features of:
  - client business domain
  - relevant workplace procedures and legislative requirements when formulating prevention and recovery strategy
  - systems engineering when evaluating threats
- analyse and describe:
  - backup methodologies
  - specific components of the business planning process relevant to the development of information and communications technology (ICT) business solutions
  - system functionality of a current business.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work and include access to:

© Commonwealth of Australia, 2025 Future Skills Organisation

- ICT business specifications
- information on the security environment, including relevant laws and legislation
- existing organisational security policies, organisational expertise and knowledge
- possible security environment, including threats to security that are, or are held to be, present in the environment
- risk analysis tools and methodologies
- ICT security assurance specifications
- incident scenarios.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTSAS502 Establish and maintain client user liaison

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to establish and maintain client user liaison in an information and communications technology (ICT) environment, post support implementation. This occurs after the business critical functions have been determined.

It applies to individuals who are responsible for system and business analysis and administration, and liaising with clients to ensure that their requirements are fully met.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Systems administration and support

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Determine support areas | 1.1 Identify and record information communications technology used in the organisational unit<br>1.2 Identify stakeholders of the system<br>1.3 Identify organisational structure, culture and politics related to support requirements<br>1.4 Determine the level of support required by each organisational |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | unit |
| 2. Develop support procedures | 2.1 Contact organisational units as required to verify support needs<br>2.2 Establish procedures for providing required support, including method of contact, frequency of meetings and reporting<br>2.3 Document agreed procedures or service level agreement (SLA) |
| 3. Assign support personnel | 3.1 Identify ICT skills required to assist each organisational unit with support activities<br>3.2 Assign personnel according to human resource processes<br>3.3 Verify availability of selected personnel<br>3.4 Provide support using agreed procedures<br>3.5 Obtain feedback from appropriate persons on a regular basis |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1-1.3, 3.1 | • Comprehends textual information and numerical data to determine and adhere to required actions |
| Writing | 1.1, 2.1, 2.3, 3.3, 3.5 | • Records key information in the required format and layout, and develops material to a specific audience using clear and detailed language to convey explicit information, requirements and recommendations |
| Oral Communication | 2.1, 3.3, 3.5 | • Uses appropriate language, tone and pace to interact effectively with others, and listening and questioning techniques to obtain feedback relevant to the task |
| Navigate the world of work | 3.2, 3.4 | • Takes full responsibility for following policies, procedures and legislative requirements, and identifies organisational implications of new legislation or regulation<br>• Seeks to improve policies and procedures to better meet organisational goals |
| Interact with others | 2.1, 3.2, 3.3, 3.5 | • Implements strategies for a diverse range of colleagues and clients to build rapport and foster strong relationships |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| | | • Influences and fosters a collaborative culture, and facilitates a sense of commitment and workplace cohesion |
| Get the work done | 1.4, 2.1, 2.2, 3.4, 3.5 | • Plans strategic priorities and outcomes within a flexible, efficient and effective context in a diverse environment exposed to competing demands<br>• Gathers and analyses data and seeks feedback to improve plans and processes<br>• Addresses complex problems involving multiple variables, using formal analytical, lateral thinking techniques, experience and knowledge to focus in on the root cause |

# Assessment Requirements for ICTSAS502 Establish and maintain client user liaison

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- establish and maintain client liaison
- establish and document procedures for providing required support
- identify information and communications technology (ICT) skill requirements
- assign appropriate support personnel.

Note: Evidence must be provided in at least TWO ICT environments.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- specify adequate response times for providing services
- analyse the role of stakeholders in the organisation, and their level of dependence on ICT infrastructure
- explain the capabilities of a range of ICT devices
- research and evaluate current industry accepted hardware and software products
- identify and describe equipment that is vital in supplying business critical services, including:
  - internet file transaction security for client accounts
  - web server for e-business
- describe in detail the areas related to the organisation’s services and the ICT system functionality required to supply the essential and desirable services to the organisation
- describe the quality assurance practices relating to the supplied service and service level agreements (SLAs)
- analyse the role of ICT in the client's business domain
- identify and describe server types to provide:
  - application

© Commonwealth of Australia, 2025 Future Skills Organisation

- backup
- email
- firewall
- proxy
- web.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work, and include access to:

- special purpose tools, equipment and materials
- industry software packages
- agreed procedures or SLAs
- documented support requirements
- technical records and documentation.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTSAS503 Perform systems tests

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to ensure that the properties of the entire system are tested and proved adequate before handover to the client or user for final acceptance testing.

It applies to experienced individuals employed in a range of information and communications technology (ICT) work environments who apply specialised and technical knowledge and systematic approaches to testing and fault finding.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Systems administration and support

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare for test | 1.1 Prepare test environment<br>1.2 Determine software life cycle<br>1.3 Define test plan and appropriate test tools<br>1.4 Recognise and separate the system into runnable modules that mirror live scenarios |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.5 Gather and prepare logs and result sheets<br>1.6 Notify operations of scheduled test to ensure preparedness and understanding of implications for operations<br>1.7 Test scripts for online test or test run for batch test<br>1.8 Conduct walk-through to review expected results against acceptance criteria and system requirements documentation |
| 2. Conduct test | 2.1 Run test scripts and document results according to test and acceptance processes<br>2.2 Perform required quality benchmarks or comparisons for acceptance testing<br>2.3 Adopt organisation and industry standards<br>2.4 Compare actual results to expected results on completion of each system unit, and complete result sheets |
| 3. Analyse and classify results | 3.1 Summarise and classify results, highlighting critical or urgent areas of concern, and prepare report<br>3.2 Compare results against requirements<br>3.3 Notify operations of test completion<br>3.4 Log attendees' details or comments and gain required signatures<br>3.5 Schedule feedback meeting to discuss report and possible next actions with stakeholders, if necessary<br>3.6 Ensure test reporting complies with documentation and reporting standards |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.2, 1.8, 2.2-2.4, 3.1, 3.2 | • Interprets and analyses a range of textual information and numerical data to determine necessary actions |
| Writing | 1.5, 1.6, 2.1, 2.4, 3.1, 3.4, 3.6 | • Uses clear language to record and report technical information, and checks for accuracy at all times<br>• Uses writing style and documentation formats |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| | | appropriate to the task |
| Oral Communication | 1.6, 3.3, 3.5 | • Uses clear and accurate language to provide and obtain information relevant to the task |
| Numeracy | 1.5, 1.8, 2.2, 2.4, 3.1 | • Uses mathematical equations to calculate financial and technical data<br>• Accurately records, analyses and documents numerical and technical system data |
| Navigate the world of work | 2.3, 3.6 | • Takes full responsibility for following policies, procedures and legislative requirements, and identifies organisational implications of new legislation or regulation |
| Interact with others | 1.6, 3.3, 3.5 | • Influences and fosters a collaborative culture and facilitates a sense of commitment and workplace cohesion<br>• Uses a variety of relevant communication tools and strategies to build and maintain effective working relationships |
| Get the work done | 1.1, 1.3-1.5, 1.7, 1.8, 2.1, 2.2, 3.1, 3.5 | • Plans strategic priorities and outcomes within a flexible, efficient and effective context in a diverse environment exposed to competing demands<br>• Gathers and analyses data and seeks feedback to improve plans and processes<br>• Applies systematic and analytical decision making processes for complex and non-routine situations<br>• Addresses complex problems involving multiple variables, using formal analytical, lateral thinking techniques, experience and knowledge to focus in on the root cause |

# Assessment Requirements for ICTSAS503 Perform systems tests

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- test the operation and consistency of the total system prior to delivery according to system requirements, including testing:
  - performance
  - security
  - configuration sensitivity
  - start-up and recovery from failure modes
- analyse test results
- prepare reports in compliance with documentation and reporting standards.

Note: Evidence must be provided on at least TWO occasions or systems.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- compare and contrast the key features and processes of automated test tools
- analyse input and output requirements
- describe organisational practice and rules for preparing test
- describe particular system requirements and key features
- analyse underlying test data
- Identify and summarise industry standards appropriate to performing system tests.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work, and include access to:

© Commonwealth of Australia, 2025 Future Skills Organisation

- requirements and design documents
- human resources
- hardware and environments for system test use (all testing to be carried out on the same platform as the completed system; scheduled testing to be on the production platform; production environment is required as part of test preparation)
- system or application suitable for testing.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTSAS504 Develop and conduct client acceptance test

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to plan and conduct acceptance testing as part of the process whereby clients will determine whether to accept the system.

It applies to experienced individuals working in a range of information and communications technology (ICT) environments, who apply specialised and technical knowledge in the development of strategic initiatives and in performing or organising others to complete complex technical operations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Systems administration and support

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Identify acceptance criteria and develop test plan | 1.1 Review system requirements documentation and project plans to identify mandatory system objectives and optional criteria, and conditions for system acceptance<br>1.2 Develop test plan based on system requirements<br>1.3 Review and validate test plan based on mandatory criteria, conditions, and system objectives and requirements<br>1.4 Communicate test plan to client and prepare client for |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | acceptance test<br>1.5 Notify appropriate person of the scheduled acceptance test |
| 2. Perform functional testing on software modules | 2.1 Prepare test environment for client use<br>2.2 Perform testing according to test plan and documentation<br>2.3 Execute each test cycle<br>2.4 Document errors, difficulties and problems |
| 3. Validate test results against expected results | 3.1 Record and investigate discrepancies and corrections according to project procedures and timeframe<br>3.2 Brief client on outcomes to ensure client understands test results<br>3.3 Monitor system performance as required<br>3.4 Reschedule required code changes or modifications |
| 4. Obtain sign-off and acceptance | 4.1 Confirm test results with client<br>4.2 Identify and document client concerns over system operation<br>4.3 Identify possible solutions to concerns and notify appropriate development staff as required<br>4.4 Confirm client approval and obtain sign-off<br>4.5 Seek and formalise agreement of involved parties regarding the rescheduling of further required maintenance |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.3 | • Interprets and analyses textual information and data from a range of sources to determine necessary testing and actions |
| Writing | 1.2, 1.4, 1.5, 2.4, 3.1, 3.2, 4.1-4.5 | • Uses clear and accurate language and documentation formats appropriate to different audiences/purposes to convey technical information |
| Oral | 1.4, 1.5, 3.2, 4.1-4.5 | • Uses clear and accurate language to convey technical information to a range of personnel |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Communication | | • Uses questioning and listening techniques to confirm understanding of testing arrangements |
| Numeracy | 1.1, 2.4, 3.1, 4.1 | • Uses mathematical equations to calculate financial and technical data and to organise schedules<br>• Accurately interprets, analyses and documents numerical and technical system data |
| Navigate the world of work | 1.3 | • Identifies and acts on issues that contravene relevant policies, procedures and legal requirements |
| Interact with others | 1.4, 1.5, 3.2, 4.1-4.5 | • Selects, implements and manipulates communications systems, processes and practices for maximum impact<br>• Uses a variety of relevant communication tools and strategies in building and maintaining effective working relationships<br>• Influences and fosters a collaborative culture and facilitates a sense of commitment and workplace cohesion |
| Get the work done | 1.1, 1.2, 2.1-2.3, 3.1, 3.3-3.5 | • Plans strategic priorities and outcomes within a flexible, efficient and effective context in a diverse environment exposed to competing demands<br>• Gathers and analyses data and seeks feedback to improve plans and processes<br>• Addresses complex problems involving multiple variables, using formal analytical, lateral thinking techniques, experience and knowledge to focus in on the root cause<br>• Uses digital technologies to manage business operations and actively investigates new technologies for strategic and operational purposes |

# Assessment Requirements for ICTSAS504 Develop and conduct client acceptance test

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- develop a test plan based on system requirements and acceptance criteria
- undertake functional testing
- validate results and obtain client sign-off acceptance.

Note: Evidence must be provided on at least TWO systems.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- compare and contrast the key features and processes of automated test tools
- analyse key aspects of business rules and standards
- discuss client user requirements
- analyse the system or application being tested
- describe a range of testing techniques.
-

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work, and include access to:

- business requirements
- project documentation, including:
  - templates
  - standards

© Commonwealth of Australia, 2025 Future Skills Organisation

  - specifications
  - client user and technical manuals
  - test plan
- technical components of system, including:
  - software
  - hardware
  - network
- staffing resources, including development, operations and client user representatives
- system application suitable for testing
- functional test cases to satisfy the agreed acceptance criteria (acceptance tests relate to the functionality of the system as stated in the requirements specification).

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTSAS505 Review and update disaster recovery and contingency plans

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to analyse the impact of the system on the organisation and carry out risk analysis, disaster recovery and contingency planning.

It applies to individuals who apply a wide range of higher level technical skills and systematic problem solving approaches in information and communications technology (ICT) related areas.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Systems administration and support

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Evaluate impact of system on business continuity | 1.1 Identify business critical functions and the security environment from documentation and from discussion with business area and project team<br>1.2 Identify critical data and software from documentation<br>1.3 Assess potential impact of business risk and threats on ICT systems |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.4 Identify and evaluate statutory requirements, commercial requirements and contingency possibilities according to specifications and cost constraints |
| 2. Evaluate threats to system | 2.1 Identify threats to the system, considering security analysis and internal and external business environment<br>2.2 Evaluate risk minimisation alternatives against specifications and cost constraints |
| 3. Formulate prevention and recovery strategy | 3.1 Evaluate prevention and recovery options to support critical business functions against business specifications and cost constraints<br>3.2 Review current operational procedures to ensure adequate risk safeguards and contingency plans are in place<br>3.3 Submit disaster recovery and prevention strategy to appropriate person for approval |
| 4. Develop disaster recovery plan to support strategy | 4.1 Identify and document resources required for disaster recovery according to specifications and cost constraints<br>4.2 Identify and document processes required for disaster strategy according to project standards<br>4.3 Identify cut-over criteria before initiating disaster plan<br>4.4 Document disaster recovery plan and submit to appropriate person for review and sign-off |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.2, 1.4, 3.2, 4.1, 4.3 | • Researches and analyses textual information and technical data/specifications from a range of documentation and sources to inform the development of contingency plans |
| Writing | 3.3, 4.1,4.2, 4.4 | • Uses clear and accurate language and formats appropriate to the task to convey explicit technical information, systems data requirements and recommendations |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Oral Communication | 1.1 | • Participates in a verbal exchange of ideas and elicits the view and opinions of others by listening and questioning |
| Numeracy | 1.2, 1.4, 4.4 | • Accurately interprets, analyses and documents numerical, financial and technical system data |
| Navigate the world of work | 1.4, 2.1, 3.2, 4.2 | • Develops and implements strategies to ensure organisational policies, procedures and regulatory requirements are met<br>• Monitors and reviews the organisations policies, procedures and adherence to legislative requirements to implement and manage change |
| Interact with others | 1.1, 3.3, 4.4 | • Uses relevant communication tools and strategies in building and maintaining effective working relationships<br>• Influences and fosters a collaborative culture that facilitates a sense of commitment and workplace cohesion |
| Get the work done | 1.1, 1.3, 1.4, 2.1, 2.2, 3.1, 3.2 | • Plans strategic priorities and outcomes within a flexible, efficient and effective context in a diverse environment exposed to competing demands<br>• Gathers and analyses data and seeks feedback to improve plans and processes<br>• Addresses complex problems involving multiple variables, using formal analytical, lateral thinking techniques, experience and knowledge to focus in on the root cause |

# Assessment Requirements for ICTSAS505 Review and update disaster recovery and contingency plans

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- develop a contingency plan that identifies threats and minimises down time for business critical functions
- develop clear and specific directions on how to handle serious down time
- coordinate, plan and articulate flexible logistics requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- compare and contrast backup methodologies
- explain the business planning process relevant to the development of information and communication technology (ICT) business solutions
- analyse the client business domain
- evaluate disaster recovery plan strategies and components, including:
  - physical security
  - system failure, accident or sabotage (hackers)
  - denial of service
  - virus attack
  - cyber attack
  - telecommunications failure
  - contingency arrangements
- interpret and analyse key workplace health and safety, legislative and organisational requirements relevant to the task
- evaluate the organisation’s current systems functionality and systems engineering.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work, and include access to:

- vulnerability assessment and general definition of requirements
- acceptance test plan
- business impact analysis
- information technology security assurance specifications
- relevant statutory documentation.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTSAS506 Update ICT system operational procedures

## Modification History

| | |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to assess, update and document the operational procedures required to use the information and communications technology (ICT) system.

It applies to individuals who apply technical and specialised knowledge and systematic approaches to documentation in a range of ICT related areas.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Systems administration and support

## Elements and Performance Criteria

| **ELEMENT** | **PERFORMANCE CRITERIA** |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Assess technical and user documentation | 1.1 Review current versions of technical and user documentation<br>1.2 Compare accuracy of technical and user documentation with current system functionality<br>1.3 Identify and document inaccuracies in the documentation |
| 2. Update procedures | 2.1 Determine operational procedure requirements using review outcomes<br>2.2 Develop or update operating procedures for the system |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 2.3 Submit proposed operating procedures to appropriate person |
| 3. Update documentation | 3.1 Review feedback and make appropriate changes<br>3.2 Update technical and user documentation to incorporate changes<br>3.3 Submit technical and user documentation to appropriate person for final approval<br>3.4 Distribute technical and user documentation as agreed with appropriate person |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1-1.3, 3.1 | • Interprets and analyses textual information and data to compare accuracy of content documentation and determine necessary actions |
| Writing | 1.3, 2.2, 3.1, 3.2 | • Develops material containing specific requirements using clear and technical language<br>• Organises content and version control in a manner that supports the purpose of the document |
| Numeracy | 1.1, 1.2 | • Accurately interprets, analyses and documents numerical and technical system data |
| Interact with others | 2.3, 3.3, 3.4 | • Uses a variety of relevant communication tools and strategies in building and maintaining effective working relationships |
| Get the work done | 1.2, 2.1, 2.2, 3.1, 3.3, 3.4 | • Plans strategic priorities and outcomes within a flexible, efficient and effective context in a diverse environment exposed to competing demands<br>• Gathers and analyses data and seeks feedback to improve plans and processes<br>• Addresses complex problems involving multiple variables, using formal analytical, lateral thinking techniques, experience and knowledge to focus in on the root cause |

# Assessment Requirements for ICTSAS506 Update ICT system operational procedures

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- analyse system functionality
- review and update technical and user documentation for at least TWO systems or occasions
- develop procedures to operate systems.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the client business domain
- explain current business practices related to preparing reports
- compare and contrast the key features and capabilities of current industry accepted hardware and software products
- describe documentation standards and tools
- discuss the role of stakeholders and the degree of stakeholder involvement.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work, and include access to:

- special purpose tools, equipment and materials
- industry software packages
- system or project related documentation

© Commonwealth of Australia, 2025 Future Skills Organisation

- staffing resources
- documentation tools.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTSAS507 Implement and evaluate systems for regulatory and standards compliance

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to implement and evaluate the application of the principles, policies and procedures that enable an enterprise to meet applicable information security laws, regulations and standards to satisfy statutory requirements, perform industry-wide best practices, and achieve its information security program goals.

It applies to individuals who apply specialised and technical knowledge in developing strategic initiatives in an information and communications technology (ICT) work environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Systems administration and support

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Implement compliance systems | 1.1 Monitor and assess the information security compliance practices of personnel according to enterprise policy and procedures |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.2 Maintain ongoing and effective communications with key compliance stakeholders<br>1.3 Conduct internal audits to determine if information security control objectives, controls, processes, and procedures are effectively applied and maintained, and perform as expected |
| 2. Evaluate compliance systems | 2.1 Assess the effectiveness of enterprise compliance program controls against appropriate benchmarks<br>2.2 Assess the effectiveness of information security compliance process and procedures for process improvement and implement changes where appropriate<br>2.3 Compile, analyse and report performance measures |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 2.1 | • Interprets and analyses a range of complex textual information and data to determine necessary actions |
| Writing | 1.2, 2.3 | • Uses clear, accurate and concise language and appropriate formats to convey complex content for a range of audiences |
| Oral Communication | 1.1, 1.2, 2.3 | • Uses clear and precise language to explain and present information and obtain feedback relevant to the task and audience |
| Numeracy | 1.3 | • Accurately interprets, analyses and documents numerical and technical system data |
| Navigate the world of work | 1.1, 1.3, 2.1 | • Monitors and reviews the organisations policies, procedures and adherence to legislative requirements<br>• Develops and implements strategies to ensure organisational policies, procedures and regulatory requirements are met |
| Interact with others | 1.2 | • Selects, implements and manipulates communications systems, processes and practices for maximum impact |
| Get the work done | 1.1, 1.3, 2.1-2.3 | • Plans strategic priorities and outcomes within a flexible, efficient and effective context in a diverse |

# Assessment Requirements for ICTSAS507 Implement and evaluate systems for regulatory and standards compliance

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- monitor and assess information security compliance
- conduct internal audits
- assess the effectiveness of enterprise compliance
- compile, analyse and report performance measures.

Note: Evidence must be provided on at least TWO occasions.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the client business domain
- compare and contrast the key security features and capabilities of current industry accepted hardware and software products
- research and report on the key features of legislation relating to information and communications technology (ICT) security
- evaluate the operating system, including strengths and weaknesses over lifetime of product
- discuss privacy issues and legislation relating to integrating legal requirements with ICT security.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work, and include access to:

- ICT business specifications

© Commonwealth of Australia, 2025 Future Skills Organisation

- information on the security environment, including laws or legislation, existing organisational security policies, organisational expertise and knowledge
- possible security environment, which includes threats to security that are, or are held to be, present in the environment
- risk analysis tools and methodologies
- ICT security assurance specifications.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTSAS509 Provide client ICT support services

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to liaise with client users while providing information and communications technology (ICT) support.

It applies to individuals who apply high level technical and specialised knowledge in assisting users.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Systems administration and support

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Identify support procedures | 1.1 Identify support required by client<br>1.2 Review support-call documentation to identify client contact person<br>1.3 Review service level agreement (SLA) and appropriate procedures to determine action, and include escalation procedures<br>1.4 Verify support requirements with client contact |
| 2. Undertake support | 2.1 Provide support activity required by the client |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 2.2 Maintain communication with client contact throughout support activity by email, phone or other specific process<br>2.3 Document action taken for support activity<br>2.4 Acknowledge protocol differences during support activity |
| 3. Gather feedback | 3.1 Submit resolution documentation to client contact<br>3.2 Contact client to determine satisfaction with support process<br>3.3 Conduct follow up action, as required |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1-1.3 | • Analyses textual information and data to determine client support |
| Writing | 1.4, 2.2-2.4, 3.1, 3.2 | • Uses clear and accurate language, and documentation formats appropriate to the task |
| Oral Communication | 1.4, 2.2, 2.4, 3.2 | • Obtains information by listening and questioning, and participates in verbal exchanges of information and solutions using concise and clear language |
| Numeracy | 1.3, 2.3, 3.1 | • Accurately interprets, analyses and documents numerical and technical system data |
| Navigate the world of work | 1.3 | • Reviews the organisation's policies, procedures and adherence to legislative requirements in order to implement and manage change |
| Interact with others | 1.4, 2.2 | • Uses a variety of relevant communication tools and strategies in building and maintaining effective working relationships |
| Get the work done | 1.1, 1.3, 2.1, 3.3 | • Accepts responsibility for planning and sequencing complex tasks and workload, negotiating key aspects with others and taking into account capabilities, efficiencies and effectiveness<br>• Gathers and analyses data and seeks feedback to improve plans and processes<br>• Addresses complex problems involving multiple variables, using formal analytical, lateral thinking |

# Assessment Requirements for ICTSAS509 Provide client ICT support services

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- undertake support services, including:
  - identifying support requirements and procedures
  - client contact
  - documenting support provided
  - liaise with user to obtain feedback
  - act on feedback as appropriate.

Note: Evidence must be provided for at least TWO clients.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the client business domain and importance of client contact
- compare and contrast the key features and capabilities of current industry accepted hardware and software products
- explain help desk and maintenance practices
- describe quality assurance practices relating to information and communications technology (ICT) support
- discuss the role of stakeholders and degree of stakeholder involvement
- evaluate current system functionality
- describe the structure and purpose of service level agreements (SLAs).

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work, and include access to:

# ICTSAS510 Review and develop ICT maintenance strategy

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to review, develop and set up maintenance strategies and supporting processes to achieve continuity of information and communications technology (ICT) operations and business functions.

It applies to individuals who apply specialised and technical knowledge in developing strategic initiatives and in performing or organising others to complete complex technical operations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Systems administration and support

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Identify and analyse maintenance needs | 1.1 Identify risks to business continuity due to system malfunction, including quantification of possible loss<br>1.2 Identify core business functions and determine the service requirements for those functions<br>1.3 Develop a maintenance philosophy to meet business needs and apply it to dealings with the client |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| 2. Identify and analyse IT system components to be maintained | 2.1 Review systems architecture and configuration documentation for currency<br>2.2 Conduct an equipment and software audit if appropriate information is not available<br>2.3 Determine and document the warranty status of components and software according to vendor, project or organisational requirements<br>2.4 Identify critical components and software, and document recommendations regarding possible service arrangements |
| 3. Develop service level agreements | 3.1 Determine the views and requirements of the client in order to identify maintenance requirements<br>3.2 Prepare service level agreements (SLAs) to match client user and business requirements |
| 4. Formulate maintenance strategy | 4.1 Examine maintenance options against cost constraints, risks to business continuity and SLAs<br>4.2 Identify a specific maintenance strategy based on cost, business and SLA requirements<br>4.3 Create a preventative maintenance schedule based on cost, business and SLA requirements<br>4.4 Negotiate a maintenance strategy with client and make changes to SLAs where necessary<br>4.5 Document the recommended procedure for approval from appropriate person according to organisational requirements |
| 5. Define client and supplier processes and standards | 5.1 Negotiate and create reporting procedures for service requests with client and suppliers<br>5.2 Determine response time standards with client and suppliers<br>5.3 Create escalation procedures with client and suppliers<br>5.4 Set up the help desk or other support function according to agreed standards and procedures and in line with industry best practices |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

© Commonwealth of Australia, 2025 Future Skills Organisation

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 2.1, 2.3, 2.4, 4.1 | • Interprets and analyses technical specifications and data and textual information from a range of sources to develop maintenance strategy |
| Writing | 3.1, 3.2, 4.4, 4.5, 5.1-5.3 | • Uses clear and accurate language and documentation formats appropriate to different audiences/purposes to convey technical and business information |
| Oral Communication | 3.1, 4.4, 5.1-5.4 | • Obtains information by listening and questioning and participates in verbal exchanges of information |
| Numeracy | 1.1, 4.1-4.3, 5.1, 5.2 | • Uses mathematical equations to calculate financial and technical data and to organise schedules<br>• Accurately interprets, analyses and documents numerical and technical system data |
| Navigate the world of work | 2.3, 4.5, 5.4 | • Develops and implements strategies that ensure organisational policies, procedures and regulatory requirements are met<br>• Monitors and reviews the organisation's policies, procedures and adherence to legislative requirements to implement and manage change |
| Interact with others | 3.1, 4.4, 4.5 | • Uses a variety of relevant communication tools and strategies in building and maintaining effective working relationships and negotiating solutions<br>• Influences and fosters a collaborative culture to facilitate a sense of commitment and workplace cohesion |
| Get the work done | 1.1-1.3, 2.1-2.4, 4.2-4.4, 5.1-5.4 | • Develops plans to manage relatively complex routine and non-routine tasks with an awareness of how they might contribute to broader strategy and goals<br>• Gathers and analyses data and seeks feedback to improve plans and processes<br>• Makes high impact decisions in a complex and diverse environment, using input from a range of sources<br>• Addresses complex problems involving multiple variables, using formal analytical, lateral thinking techniques, experience and knowledge to focus in on the root cause |

# Assessment Requirements for ICTSAS510 Review and develop ICT maintenance strategy

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- identify and analyse maintenance needs
- determine maintenance strategies
- implement support processes for maintaining the continuity of information and communications technology (ICT) operations and business functions
- define standards required for helpdesk support.

Note: Evidence must be provided for at least TWO clients.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the client business domain and the features of the ICT system that support the client's business activity
- describe the key features of current industry accepted hardware and software products
- explain the information found in product warranty and service difficulty records
- research and document helpdesk and maintenance practices, including general composition and operation of information database for tracking hardware, software and operational issues
- describe how the system has been set up to process data and what data elements are stored
- explain quality assurance practices with reference to maintenance, warranty and repair of network equipment and software
- discuss relationships between the stakeholders and the service provider.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work, and include access to:

- special purpose tools, equipment, materials and industry software packages
- systems architecture documentation and
- warranty documents.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTSAS511 Prioritise ICT change requests

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to analyse and prioritise change requests as part of managing information and communications technology (ICT) systems that undergo continual change.

It applies to experienced individuals who provide technical advice, guidance and leadership in resolution of specified problems, and may have responsibility for organising others.

No licensing, legislative, or certification requirements apply to this unit at the time of publication.

## Unit Sector

Systems administration and support

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Classify and monitor change requests | 1.1 Receive and record change requests from the client or other sources<br>1.2 Classify and prioritise change requests according to business guidelines and service level agreements (SLAs) |
| 2. Determine priority settings | 2.1 Identify risks to business continuity and prioritise changes that reduce risks for implementation |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 2.2 Evaluate costs and benefits of implementing changes against the current system<br>2.3 Examine benefits and costs of how and when a change is made, including risks to business continuity<br>2.4 Schedule change analysis according to business down periods and periods of business-critical activities |
| 3. Develop change analysis work plan to develop and implement changes | 3.1 Analyse similar change requests that might be developed and implemented simultaneously<br>3.2 Determine impact to the system and organisation of methodology and timing of change<br>3.3 Notify reason for the change to key stakeholders<br>3.4 Determine resources necessary to carry out the change development, taking into account time and cost constraints<br>3.5 Develop a change plan based on change analysis<br>3.6 Review change-plan documentation to ensure it is completed according to system documentation standards<br>3.7 Forward change plan to appropriate person for consideration and decision |
| 4. Confirm change plan is complete and satisfies client | 4.1 Conduct feedback session with client groups to ensure change requirements are satisfactory<br>4.2 Complete follow-up work and make recommendations for changes in procedures or documentation |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 2.3, 3.1, 3.6 | • Interprets and analyses technical specifications and data and textual information from a range of sources to develop maintenance strategy |
| Writing | 1.1, 3.3, 3.5-3.7, 4.2 | • Uses clear and accurate language and documentation formats appropriate to different audiences/purposes to convey technical and business information |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Oral Communication | 1.1, 3.3, 3.7, 4.1, 4.2 | • Facilitates groups to present and collect information and gain consensus on concepts<br>• Obtains information by listening and questioning and participates in verbal exchanges of information to negotiate solutions appropriate to a range of personnel and situations |
| Numeracy | 2.2-2.4, 3.1, 3.2, 3.4, 3.6 | • Uses mathematical equations to calculate financial and technical data and organise schedules<br>• Accurately interprets, analyses and documents numerical and technical system data |
| Interact with others | 3.3, 3.7, 4.1 | • Identifies and uses appropriate conventions and protocols when communicating with colleagues and stakeholders |
| Get the work done | 1.2, 2.1-2.4, 3.1-3.6, 4.2 | • Develops plans to manage relatively complex routine and non-routine tasks with an awareness of how they might contribute to broader strategy and goals<br>• Uses problem solving techniques to analyse required outcomes in order to manage change to ICT systems |

# Assessment Requirements for ICTSAS511 Prioritise ICT change requests

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- review change requests and prioritise according to business guidelines and service level agreements (SLAs)
- evaluate cost-benefit analysis, including risks to business continuity
- develop change analysis work plan
- review change procedures and make appropriate recommendations.

Note: Evidence must be provided for at least TWO clients or situations.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the client business domain
- analyse help desk and maintenance practices
- explain the quality assurance practices relating to information and communications technology (ICT) system changes
- discuss the role of stakeholders and the degree of stakeholder involvement
- compare and contrast key features and capabilities of current industry accepted hardware and software products, including change management tools
- analyse the system's current functionality
- describe the purpose and features of SLAs.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work, and include access to:

© Commonwealth of Australia, 2025 Future Skills Organisation

- special purpose tools, equipment and materials
- industry software packages
- sites on which change requests may be coordinated
- SLAs currently used in industry
- business guidelines.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTSAS512 Review and manage delivery of maintenance services

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to review and manage the delivery of maintenance services.

It applies to individuals with managerial experience and responsibility for supervising individuals working under their direct or indirect supervision.

No licensing, legislative, or certification requirements apply to this unit at the time of publication.

## Unit Sector

Systems administration and support

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Review service standards | 1.1 Review service level agreements (SLAs)<br>1.2 Identify actual fault reporting and restoration performance, and compare with SLAs to ensure they meet requirements<br>1.3 Record areas of discrepancy |
| 2. Review infrastructure | 2.1 Identify internal support and maintenance options<br>2.2 Undertake a review of infrastructure |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 2.3 Record areas of discrepancy |
| 3. Determine and implement solutions | 3.1 Compare service standards and infrastructure discrepancies, and identify gaps in existing service<br>3.2 Document discrepancies identified<br>3.3 Determine cost effective solutions and impact<br>3.4 Implement solutions |
| 4. Organise reviews | 4.1 Determine guidelines for regular reviews with stakeholders<br>4.2 Undertake reviews as per agreed guidelines<br>4.3 Document review process and submit to the stakeholder<br>4.4 Ensure effective reporting procedures are in place and used |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.2, 3.1 | • Evaluates textual and numerical information from a range of documentation to inform maintenance requirements and solutions |
| Writing | 1.3, 2.1, 2.3, 3.2, 4.1, 4.3 | • Uses clear and precise language and document formats appropriate to the task to convey explicit information and instructions |
| Numeracy | 3.3 | • Calculates and compares whole numbers and decimals to estimate projected costs against budgets |
| Navigate the world of work | 3.4, 4.2, 4.4 | • Works independently and collectively in making decisions to achieve organisation outcomes in maintenance service delivery |
| Get the work done | 1.2, 2.1, 2.2, 3.1, 3.3, 3.4, 4.1-4.4 | • Accepts responsibility for planning, prioritising and sequencing complex tasks and workload<br>• Uses problem solving techniques to analyse required outcomes in order to manage maintenance-service delivery |

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Requirements for ICTSAS512 Review and manage delivery of maintenance services

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- analyse and report on faults and restoration performance
- comply with service level agreement (SLA)
- review infrastructure and document discrepancies
- analyse and prioritise requests according to business requirements
- implement cost effective solutions and evaluate impact.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe and explain business scheduling requirements
- discuss capacity planning and change-control procedures
- compare and contrast current industry accepted hardware and software products, including their general features and capabilities
- outline key features of the client business domain
- evaluate help desk and maintenance practices
- analyse the role of stakeholders and the degree of stakeholder involvement
- describe the system's current functionality and the features and functions of system under modification.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work, and include access to:

- special purpose tools, equipment and materials
- industry software packages
- sites on which review of maintenance-services delivery may be conducted
- established ICT service infrastructure
- SLAs and business guidelines.

Assessor must satisfy NVR/AQTF assessor requirements.

# ICTSAS513 Develop detailed test plans

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to plan for testing information and communications technology (ICT) systems, including software development, systems administration, networking, and web development, by collating documentation of conditions and expected results sufficiently to allow for thorough system testing.

It applies to individuals who use technical and specialised knowledge and systematic approaches in performing or organising others to complete complex technical testing operations.

No licensing, legislative, or certification requirements apply to this unit at the time of publication.

## Unit Sector

Systems administration and support

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare test environment and gather tools | 1.1 Determine structure of system and user accounts to understand the test environment<br>1.2 Determine areas to test and test objectives, according to organisational standards<br>1.3 Ensure accessibility of documentation |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.4 Notify user representatives or approval authorities of objectives and scheduled test<br>1.5 Notify operations staff of scheduled test to ensure preparedness and an understanding of implications |
| 2. Prepare test data | 2.1 Gather test schedules according to organisational standards<br>2.2 Correlate schedules with related functionality according to organisational standards<br>2.3 Check testing schedule prior to validation according to organisational standards<br>2.4 Prepare test drivers or stubs for test harness according to organisational standards<br>2.5 Register test plan and initiate log entries according to organisational standards |
| 3. Complete test plan and acceptance processes | 3.1 Use software metrics where appropriate<br>3.2 Validate test and acceptance processes<br>3.3 Ensure documentation and reporting comply with test plan and quality benchmarks |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.2, 2.1-2.3 | • Analyses and evaluates textual and numerical information from a range of documentation to determine required action |
| Writing | 1.4, 1.5, 3.3 | • Uses clear and precise language and document formats appropriate to the audience and task to convey explicit information and instructions |
| Oral Communication | 1.4, 1.5 | • Uses clear and accurate language, and inclusive and collaborative techniques to convey information to a range of personnel |
| Numeracy | 2.2, 2.5, 3.3 | • Uses mathematical equations to calculate and compare numerical test data to determine required actions |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Interact with others | 1.4, 1.5 | • Identifies and uses appropriate conventions and protocols when communicating with colleagues and others |
| Get the work done | 1.1-1.5, 2.1-2.5, 3.1-3.3 | • Accepts responsibility for planning, prioritising and sequencing complex tasks and workload<br>• Applies systematic and analytical decision making processes for complex and non-routine situations<br>• Uses digital technologies to manage ICT operations |

# Assessment Requirements for ICTSAS513 Develop detailed test plans

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- interpret software specifications
- develop a comprehensive test plan that documents:
  - test conditions or cases to be applied
  - data to be processed
  - automated testing coverage
  - expected results
  - activities, dependencies and effort required to conduct the system test.

Note: Evidence must be provided for at least TWO systems.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe key features of at least three different operating systems, with detailed knowledge of operating systems relevant to project requirements
- compare and contrast key features of automated test tools, with detailed knowledge of features and processes of tools relevant to the project
- discuss organisational requirements, including a testing schedule
- analyse system or application being tested
- describe quality benchmarks appropriate for testing
- describe testing techniques and process relevant to the project.

© Commonwealth of Australia, 2025 Future Skills Organisation

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work, and include access to:

- special purpose tools, equipment and materials
- industry software packages
- system engineering management plan
- test and evaluation program plan
- system or application suitable for testing plus its associated documentation
- organisational plans and documentation.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTSAS514 Perform integration tests

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to ensure that the components of the system operate together to the expected standard.

It applies to senior development staff who are responsible for ensuring that sub-systems function correctly when combined.

No licensing, legislative, or certification requirements apply to this unit at the time of publication.

## Unit Sector

Systems administration and support

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare for test | 1.1 Prepare test environment<br>1.2 Prepare test scripts (online test) or test run (batch test) for running<br>1.3 Review expected results against test and acceptance criteria<br>1.4 Confirm pre-existing modules and compile modification logs<br>1.5 Perform static tests of each point of integration and verify correctness of arguments, positional parameters and return values |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | in each integration suite<br>1.6 Review results of earlier component testing and ensure critical issues are identified and considered |
| 2. Conduct test | 2.1 Select appropriate test tools<br>2.2 Run test scripts and document results against software life cycle model<br>2.3 Ensure that memory leakage, global name-space pollution and static variables are specifically addressed for each integration unit in line with test and acceptance criteria<br>2.4 Follow and adopt integration standards where appropriate in line with quality benchmarks<br>2.5 Compare test results to requirements on completion of each integration component |
| 3. Analyse and classify results | 3.1 Summarise and classify test results and highlight areas of concern<br>3.2 Compare test results against requirements and design specification, and prepare report<br>3.3 Notify operations of completion of testing where appropriate<br>3.4 Ensure attendees' details and comments are logged and signatures gained<br>3.5 Schedule and conduct a feedback meeting to discuss report and possible next actions with stakeholders if necessary<br>3.6 Ensure test reporting complies with documentation and reporting standards |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.3, 1.6, 2.5, 3.2 | • Analyses and evaluates textual and numerical information from a range of documentation to determine required action |
| Writing | 2.2, 3.1-3.4, 3.6 | • Accurately records information and system data using required format, terminology and conventions specific |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| | | to requirements<br>• Prepares reports using concise language and correct spelling and grammar to convey explicit information, requirements and recommendations |
| Oral Communication | 3.3-3.5 | • Uses clear and accurate language and inclusive and collaborative techniques to convey and obtain information from a range of personnel |
| Numeracy | 1.3, 1.4, 2.5, 3.1 | • Uses mathematical equations to calculate, compare and evaluate numerical test data to determine required actions |
| Interact with others | 3.3-3.5 | • Identifies and uses appropriate conventions and protocols when communicating with colleagues and stakeholders |
| Get the work done | 1.1-1.6, 2.1-2.5, 3.1-3.6 | • Develops plans to manage relatively complex routine and non-routine tasks with an awareness of how they might contribute to broader strategy and goals<br>• Uses problem solving techniques in analysing required outcomes to perform integration tests<br>• Uses digital technologies to manage information and communications technology (ICT) operations |

# Assessment Requirements for ICTSAS514 Perform integration tests

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- prepare the test environment
- conduct tests using appropriate test tools and integration standards and quality benchmarks
- perform integration requirements for the units
- determine whether the units operate according to specifications
- analyse and classify results
- prepare reports that comply with documentation and reporting standards.

Note: Evidence must be provided on at least TWO systems or occasions.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the key features of at least two programming languages, with detailed knowledge of programming languages required by current system/project
- compare and contrast automated test tools, with detailed knowledge of features and processes of tools used for current system/project
- identify input and output requirements
- discuss organisational practice, standards and benchmarks relating to integration testing
- analyse and describe the system or application being tested
- describe key features and processes of testing techniques and tools
- analyse underlying test data.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work, and include access to:

- special purpose tools, equipment and materials
- industry software packages
- acceptance criteria
- test plan
- integration standards
- requirements and design documents used in test analysis
- system or application suitable for testing.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTSAS515 Manage the testing process

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to effectively manage and administer the end-to-end testing process, including test definition, execution and reporting.

It applies to experienced individuals who work autonomously in performing or organising others to complete complex technical operations.

No licensing, legislative, or certification requirements apply to this unit at the time of publication.

## Unit Sector

Systems administration and support

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Develop test schedule | 1.1 Determine testing requirements and objectives<br>1.2 Review test plan, where available<br>1.3 Develop testing timeline and allocate resources<br>1.4 Document test objectives and schedule according to test procedures and distribute to appropriate person<br>1.5 Obtain feedback and incorporate relevant changes |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| 2. Complete test procedures | 2.1 Copy necessary code into the testing environment<br>2.2 Allocate and manage personnel carrying out the testing process<br>2.3 Administer alterations or changes to the code<br>2.4 Integrate code into production environment |
| 3. Review the completeness and accuracy of the system | 3.1 Administer full system test to ensure suitability of the system<br>3.2 Document outcomes of system test for use in subsequent development phases<br>3.3 Evaluate results of system test to determine acceptability of system |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.2 | • Compares and evaluates textual information and numerical data/specifications from a range of documentation to inform testing requirements |
| Writing | 1.3-1.5, 2.3, 3.2 | • Uses technically specific language and a range of writing styles to articulate requirements<br>• Uses appropriate formats and structures to present information logically for different audiences and revises documents based on feedback and outcomes |
| Oral Communication | 1.5, 2.2 | • Explains technical requirements and plans to relevant personnel, using clear and precise language and listening and questioning skills to confirm understanding |
| Interact with others | 1.4, 1.5, 2.2 | • Identifies and uses appropriate conventions and protocols when communicating with colleagues and others |
| Get the work done | 1.1-1.5, 2.1-2.4, 3.1-3.3 | • Develops plans to manage relatively complex routine and non-routine tasks with an awareness of how they might contribute to broader strategy and goals<br>• Uses problem solving techniques to analyse required outcomes in order to manage the testing process<br>• Uses digital technologies to manage operations |

# ICTSAS516 Perform stress and load tests on integrated platforms

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to plan and perform tests to ensure the ability of a system to cope with expected high levels of data volume.

It applies to experienced individuals who provide specialised and technical knowledge in completing complex technical operations to ensure that the proposed system can handle anticipated loads.

No licensing, legislative, or certification requirements apply to this unit at the time of publication.

## Unit Sector

Systems administration and support

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Create test plan | 1.1 Determine scope, objectives and specific tests to place load on the system, including expected results and performance impact<br>1.2 Determine and document standards for acceptance and compliance with client<br>1.3 Determine and document clear responsibilities and contact points with third party suppliers for support<br>1.4 Identify testing resources and tools from a range of available |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | sources<br>1.5 Identify and record base-system loads or level of activity against which the test will be measured<br>1.6 Identify processes or steps in test, including automated testing<br>1.7 Assemble test plan documentation and distribute to appropriate person |
| 2. Undertake test | 2.1 Implement test plan according to test plan sequencing<br>2.2 Confirm that each technology component operates correctly within integrated platform<br>2.3 Confirm that integrated platform operates to project and industry standards<br>2.4 Undertake documentation of testing outcomes to meet project standards<br>2.5 Detect faults |
| 3. Diagnose and resolve faults | 3.1 Identify and document faults according to project plan<br>3.2 Diagnose faults and take corrective action<br>3.3 Manage problem resolution processes according to project procedures<br>3.4 Enforce compliance standards with third party suppliers as required |
| 4. Update documentation | 4.1 Update appropriate project and system documentation to record and present test findings to development staff for their attention, if test is unsuccessful |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.4 | • Interprets and analyses a range of textual information and numeric data from a range of technical sources to determine necessary actions |
| Writing | 1.2-1.5, 1.7, 2.4, 3.1, | • Develops technical and procedural documentation using clear and precise language and numerical data to |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| | 3.5, 4.1 | convey test outcomes, requirements and recommendations |
| Oral Communication | 1.3, 4.1 | • Uses clear and precise language to convey and present complex technical information to a range of personnel<br>• Uses questioning and listening techniques to confirm understanding, gain consensus on concepts and clarify responsibilities |
| Numeracy | 1.1, 1.5, 2.2, 4.1 | • Uses mathematical equations to calculate numerical data and compare test outcomes |
| Interact with others | 1.3, 1.7, 3.4, 4.1 | • Identifies and uses appropriate conventions and protocols when communicating with colleagues and others |
| Get the work done | 1.1-1.6, 2.1-2.5, 3.1-3.4 | • Develops plans to manage relatively complex routine and non-routine tasks with an awareness of how they might contribute to broader strategy and goals<br>• Uses problem solving techniques to analyse required outcomes to perform stress and load tests<br>• Uses digital technologies to manage information and communications technology operations |

# Assessment Requirements for ICTSAS516 Perform stress and load tests on integrated platforms

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- create a test plan and undertake a test that includes analysis of the system's ability to cope with expected high levels of data volume within predetermined performance standards
- identify problems and fault-resolution strategies that may occur during stress testing
- check that the system operates in the manner expected under expected conditions
- check that supporting material, including procedures and forms, is accurate and suitable for the purpose intended
- determine that stated conditions reflect the upper limits expected by client
- ensure there are no unacceptable reductions in service
- ensure individual elements and the overall system provide the desired result or functionality
- complete and update documentation accurately.

Note: Evidence must be provide on at least TWO occasions or systems.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- compare and contrast the key features and processes of automated test tools
- analyse organisational requirements relating to stress and load testing
- evaluate program design and performance characteristics
- describe system or application requirements and performance
- describe key features and processes of testing techniques.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work, and include access to:

- special purpose tools, equipment and materials
- industry software packages
- business requirements
- project documentation, including templates, standards, specifications and client user and technical manuals
- business rules and expected loads
- base tools
- technical components of system, including software, hardware and network
- staffing resources, including development, operations and client user representatives
- system or application suitable for testing.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTSAS517 Use network tools

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to use tools to assist in managing a network effectively.

It applies to individuals who apply technical and specialised knowledge to monitor security and resolve issues for the network.

No licensing, legislative, or certification requirements apply to this unit at the time of publication.

## Unit Sector

Systems administration and support

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Use command line tools | 1.1 Analyse command-line environment<br>1.2 Differentiate command-line and graphical user interface (GUI) systems<br>1.3 Identify command-line tools<br>1.4 Apply command-line tools in GUI environment |
| 2. Use hardware tools | 2.1 Identify appropriate hardware tools and their function<br>2.2 Review work health and safety (WHS) requirements for tool |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | use<br>2.3 Manage network using hardware tools<br>2.4 Analyse test results |
| 3. Use software tools | 3.1 Identify appropriate software tools for network security<br>3.2 Determine areas of vulnerability<br>3.3 Classify function of each tool<br>3.4 Manage network using software tools<br>3.5 Analyse test results |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 2.1, 2.2, 3.1 | • Identifies and interprets textual information and numerical data from a range of sources to determine necessary actions |
| Writing | 1.3 | • Records textual and numerical data in format specific to requirements |
| Numeracy | 3.5 | • Uses mathematical equations to calculate numerical data and compare test outcomes |
| Get the work done | 1.1-1.3, 2.1, 2.3, 2.4, 3.1-3.5 | • Accepts responsibility for planning, prioritising and sequencing complex tasks and workload<br>• Uses problem solving techniques to analyse required outcomes and manage the network<br>• Uses digital technologies to manage network operations |

# Assessment Requirements for ICTSAS517 Use network tools

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- to manage a network effectively
- identify and use appropriate hardware and software tools:
- monitor network performance
- identify network threats
- isolate security breaches.

Note: Evidence must be provided on at least TWO networks or occasions.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe available network tools
- explain processes and techniques related to using network tools
- analyse key features of the range of attacks that affect network security
- discuss key problems and challenges relating to network security.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work, and include access to:

- special purpose tools, equipment and materials
- hardware and software tools
- security diagnostic software
- maintenance procedures
- network system.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTSAS518 Install and upgrade operating systems

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to maintain, install new and upgrade existing operating systems (OS) in a medium to large organisation.

It applies to individuals who apply technical and specialised knowledge to undertake complex support operations.

No licensing, legislative, or certification requirements apply to this unit at the time of publication.

## Unit Sector

Systems administration and support

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Determine organisational help desk procedures | 1.1 Review organisation’s technical support procedures<br>1.2 Interrogate help desk system<br>1.3 Liaise with client |
| 2. Install or upgrade a desktop OS | 2.1 Install an OS<br>2.2 Upgrade an existing OS<br>2.3 Research and implement automated OS installation techniques |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | and procedures<br>2.4 Migrate files |
| 3. Manage and troubleshoot resource access | 3.1 Configure local resources access<br>3.2 Configure sharing of local resources<br>3.3 Assign access rights to shared resources |
| 4. Configure and troubleshoot hardware devices and drivers | 4.1 Determine and resolve problems with hardware resources<br>4.2 Research and install appropriate device drivers<br>4.3 Configure hardware resources<br>4.4 Configure device drivers |
| 5. Configure and troubleshoot the desktop and user environments | 5.1 Construct profiles for users<br>5.2 Organise shortcuts<br>5.3 Arrange screen management |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.2, 2.3, 3.1-3.3, 4.2 | • Interprets and analyses a range of textual information and numerical data from a range of technical sources to determine necessary actions |
| Writing | 1.3 | • Uses clear and precise information and numerical data in appropriate formats to convey information to clients/users |
| Oral Communication | 1.3 | • Uses clear and accurate language to convey technical information to clients/users |
| Numeracy | 1.1, 2.3, 4.2 | • Interprets and applies numerical data in source materials relevant to the activity |
| Interact with others | 1.3 | • Identifies and uses appropriate conventions and protocols when communicating with clients |
| Get the work | 1.2, 2.1-2.4, 3.1-3.3, | • Accepts responsibility for planning, prioritising and sequencing complex tasks and workload |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| done | 4.1-4.4, 5.1-5.3 | • Uses problem solving techniques to analyse required outcomes to manage client operating systems<br>• Uses digital technologies to manage information and communications technology (ICT) operations |

# Assessment Requirements for ICTSAS518 Install and upgrade operating systems

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- determine organisation operating systems (OS) requirements
- install or upgrade OS
- customise OS to user requirements
- manage and configure hardware devices
- manage and configure desktop.

Note: Evidence must be provided for at least TWO operating systems.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain procedures and techniques involved in the installation and upgrade of OS
- explain procedures and principals involved in unattended OS installation
- describe OS configuration issues that may arise with hardware and desktop environments.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work, and include access to:

- special purpose tools, equipment and materials
- industry software packages
- stand-alone or networked personal computers
- appropriate OS installation compact disk or recovery boot disks
- drivers for connected devices

© Commonwealth of Australia, 2025 Future Skills Organisation

- helpdesk system
- OS service packs.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTSAS601 Implement change management processes

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to apply techniques that facilitate the planning, implementation and monitoring of information and communications technology (ICT) change.

It applies to experienced individuals who provide specialised technical advice, guidance and leadership in a range of areas requiring change-management in ICT systems.

No licensing, legislative, or certification requirements apply to this unit at the time of publication.

## Unit Sector

Systems administration and support

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Plan ICT system changes | 1.1 Research and develop change procedures and conventions<br>1.2 Develop ICT change management plan<br>1.3 Identify key personnel responsible for change management policy and procedures<br>1.4 Train staff and management in change management procedures and policies |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.5 Evaluate current ICT system to determine changing user or business patterns<br>1.6 Identify key personnel responsible for authorising and implementing change management plan |
| 2. Identify technology system change needs | 2.1 Determine current ICT benchmarks<br>2.2 Compare identified needs against performance benchmarks to identify possible changes<br>2.3 Assess proposed changes to determine impact<br>2.4 Notify key personnel of necessary change |
| 3. Implement change | 3.1 Plan change schedule<br>3.2 Prioritise changes and allocate resources<br>3.3 Implement change management plan and procedures<br>3.4 Involve stakeholders in the implementation process<br>3.5 Capture new performance benchmarks to measure changes<br>3.6 Ensure appropriate liaison methods are used<br>3.7 Identify training requirements<br>3.8 Notify stakeholders of change |
| 4. Monitor and review implementation | 4.1 Measure change performance against new benchmarks<br>4.2 Submit performance results to stakeholders<br>4.3 Obtain sign-off on changes<br>4.4 Provide appropriate documentation and reporting |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 2.1, 2.2 | • Interprets and analyses a range of textual information and numerical data from a range of technical sources to determine necessary actions |
| Writing | 1.1, 1.2, 2.4, 3.8, | • Uses clear and accurate language and documentation formats appropriate to different audiences/purposes to |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| | 4.2, 4.4 | convey technical and non-technical information |
| Oral Communication | 1.4, 2.4, 3.4, 3.8 | • Uses inclusive and collaborative techniques to share, promote and convey information about new systems and changes to a range of personnel |
| Numeracy | 1.5, 2.2, 3.1, 3.5, 4.1, 4.4 | • Uses mathematical equations to calculate and compare numerical data against benchmarks and to plan and organise schedules |
| Navigate the world of work | 3.3, 3.6, 4.3 | • Takes a lead role in the development and facilitation of change management in an ICT environment |
| Interact with others | 1.4, 2.4, 3.4, 3.6, 3.8, 4.2, 4.3 | • Uses a variety of relevant communication tools and strategies in building and maintaining effective working relationships |
| Get the work done | 1.2, 1.3, 1.5, 1.6, 2.1-2.3, 3.1-3.3, 3.5, 3.7, 4.1, 4.4 | • Plans strategic priorities and outcomes within a flexible, efficient and effective context in a diverse environment exposed to competing demands<br>• Addresses complex problems involving multiple variables, using formal analytical, lateral thinking techniques, experience and knowledge<br>• Uses digital technologies to manage business operations and actively investigates new technologies for strategic and operational purposes |

# Assessment Requirements for ICTSAS601 Implement change management processes

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- identify and plan information and communications technology (ICT) system changes
- implement, monitor and review ICT system changes, including:
  - applying guidelines and policies to the change management process
  - maintaining appropriate version control
  - maintaining compliance with existing accessibility and other policies.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss key change management principles
- compare and contrast key functions and features of current information technology systems
- describe internet and internetworking architecture
- explain principles and structure of performance benchmarking
- analyse server access security procedures and general security issues relating to a particular operating system
- discuss methods of communicating change to stakeholders.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work, and include access to:

© Commonwealth of Australia, 2025 Future Skills Organisation

- special purpose tools, equipment and materials
- industry software packages
- international standards
- operational data from an organisation
- needs analysis data
- organisational planning guidelines
- version control guidelines.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTSMB401 Set up and operate a contractor business

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to own, operate and manage a small scale contractor business with employees that install telecommunications services.

It applies to individuals who operate their own contracting business delivering and installing telecommunications services to major service providers.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

## Unit Sector

Telecommunications – small and micro business

## Elements and Performance Criteria

| Elements | Performance Criteria |
|---|---|
| *Elements describe the essential outcomes* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Set up business operation | 1.1 Develop business plan for small business operation according to business planning guidelines<br>1.2 Follow statutory and legal requirements to register business<br>1.3 Mitigate liabilities by obtaining adequate business insurance<br>1.4 Provide and maintain vehicle through purchase, lease or hire purchase, including managing fringe benefits tax (FBT) liabilities |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | |
|---|---|
| | according to business plan |
| 2. Provide client service | 2.1 Develop and maintain client base to support business plan<br>2.2 Analyse and determine client expectations in relation to industry standards<br>2.3 Provide client service that meets client expectations according to enterprise standards<br>2.4 Monitor and evaluate performance on installations completed against industry standards |
| 3. Perform small business financial management tasks | 3.1 Record income and expenditure using bookkeeping tools and software according to normal accounting standards<br>3.2 Construct small business financial balance sheet using banking records or supply information to accountant according to normal accounting standards<br>3.3 Calculate small business taxation and superannuation requirements or supply information to accountant according to normal accounting standards<br>3.4 Complete a business activity statement (BAS) or supply data to accountant according to normal accounting standards |
| 4. Cost and quote installation | 4.1 Establish extent of work to be completed through professional and personable discussions with client<br>4.2 Complete job specification for quote with cost estimates of time required to complete work<br>4.3 Estimate and include cost of materials using supplier quoted prices<br>4.4 Determine and include margin for profit and ongoing costs for installation according to business plan<br>4.5 Check finalised quote for accuracy<br>4.6 Submit quote to client within agreed timeframe |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| **Skill** | **Performance Criteria** | **Description** |
|---|---|---|
| Reading | 1.1-1.4, 2.2, 2.4, | • Evaluates and integrates facts and ideas to construct meaning from a prescribed and limited |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| | 3.4, 4.3, 4.5 | range of text types, including relevant regulatory, taxation and insurance information |
| Writing | 1.1, 2.1, 2.3, 2.4, 3.4, 4.2, 4.6 | • Conveys intended meaning on familiar topics for a limited range of purposes and audiences |
| Oral Communication | 2.3, 2.4, 4.1 | • Selects and uses appropriate strategies to establish and maintain spoken communication in familiar and some unfamiliar contexts, particularly in relation to clients, employees and government officers |
| Numeracy | 1.1, 1.3, 1.4, 2.2, 2.4, 3.1-3.4, 4.1-4.6 | • Selects from and uses a variety of mathematical and problem solving strategies in a range of familiar and some less familiar contexts, including preparation of quotes and calculation of profit margins<br>• Extracts and evaluates the mathematical information embedded in a range of tasks and texts, including interpretation of financial information |
| Navigate the world of work | 1.2, 2.3 | • Takes personal responsibility for adherence to legal and regulatory responsibilities relevant to business registration<br>• Recognises and follows protocols in relation to enterprise standards and meets client expectations associated with role |
| Get the work done | 1.1, 1.3, 1.4, 2.1-2.4, 3.1, 3.2, 4.1 | • Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context to develop a business plan<br>• Implements actions as per plan, making slight adjustments if necessary, and addressing some unexpected issues<br>• Makes a range of critical and non-critical decisions in relation to mitigating liabilities and providing client service, taking a range of constraints into account<br>• Uses analytical processes to decide on a course of action, establishing criteria for deciding between options when developing client solutions<br>• Uses a broad range of features within bookkeeping tools and applications to improve personal productivity, optimising software functions for specific purposes |

# Assessment Requirements for ICTSMB401 Set up and operate a contractor business

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of the ability to:

- produce a business plan and set up a business
- define and meet client needs
- perform simple financial management tasks including maintaining simple financial records, and completing business activity statement (BAS), fringe benefits tax (FBT) and insurance documentation
- quote for installation jobs that cover all aspects of costing.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- specify business registration and licensing requirements
- identify and describe Commonwealth, state, territory and local government legislative requirements relating to business operations including:
  - anti-discrimination
  - environmental issues
  - equal employment opportunity
  - industrial relations
  - work health and safety (WHS)
  - taxation requirements
- analyse costs associated with running a business
- identify the current tax rates
- identify relevant industry codes of practice and evaluate their impact on the business
- identify relevant industry standards in relation to:

© Commonwealth of Australia, 2025 Future Skills Organisation

  - materials and labour costs
  - rates of pay
- identify common business liabilities
- evaluate several sources of advice and specialist services
- identify sources of information about regulatory, taxation and insurance requirements and issues.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – small and micro business field of work and include access to:

- Australian Taxation Office guides
- industry standards labour rates
- general office bookkeeping procedures
- client service guides
- material suppliers
- financial management record keeping software.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTSMB402 Operate a contractor business with employees

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes skills and knowledge required to operate a contracting business in a competitive installation environment. This includes recruiting and managing employees as well as promoting the business and maintaining business compliance.

It applies to individuals who operate or are establishing an installation business employing support staff or installers. It may also apply to a business that uses subcontractors.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

## Unit Sector

Telecommunications – small and micro business

## Elements and Performance Criteria

| Elements | Performance Criteria |
|---|---|
| *Elements describe the essential outcomes* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Recruit employees | 1.1 Define and document employee roles<br>1.2 Locate and tap sources of employees<br>1.3 Evaluate and select candidates for employment based on documented employee roles |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | |
|---|---|
| | 1.4 Provide induction to employees |
| 2. Manage employees | 2.1 Assign work to employees in line with employee roles<br>2.2 Develop strategy for retention of employees with rewards and incentives<br>2.3 Apply payroll operation<br>2.4 Maintain and manage employee on-costs using manual or computer based system<br>2.5 Monitor and evaluate employee performance against business policies and standards |
| 3. Promote the business | 3.1 Identify growth opportunities for the business<br>3.2 Design and develop advertising material to stimulate growth of the business, including evaluating process for establishing website<br>3.3 Research availability of network to promote the business |
| 4. Maintain compliance | 4.1 Research and identify compliance requirements for the business<br>4.2 Develop and implement procedures to ensure compliance<br>4.3 Implement system to monitor compliance<br>4.4 Implement actions to improve compliance performance |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| **Skill** | **Performance Criteria** | **Description** |
|---|---|---|
| Reading | 1.2, 1.3, 2.1, 2.5, 3.1-3.3, 4.1 | • Evaluates and integrates facts and ideas to construct meaning from a range of text types |
| Writing | 1.1, 1.4, 2.2, 2.3, 2.5, 3.2, 3.3, 4.1, 4.2 | • Communicates relationships between ideas and information in a style appropriate to the audience and purpose including business plans, advertising materials, job descriptions and business procedures |
| Oral Communication | 1.2-1.4, 2.1, 2.5, 4.2-4.4 | • Listens to others carefully and critically and demonstrates flexibility in spoken texts by choosing appropriate structures and strategies in a range of contexts such as engagement with clients, employees and contractors |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Numeracy | 2.3, 2.4 | • Selects from and uses a variety of mathematical and problem solving strategies in a range of familiar and some less familiar contexts, including checking financial information |
| Get the work done | 1.4, 2,1, 2.5, 3.1, 3.2, 4.2-4.4 | • Uses a formal decision making process when selecting staff and monitoring their performance, setting or clarifying goals, gathering information, and identifying and evaluating several choices against a limited set of criteria<br>• Uses analytical processes to decide on a course of action, establishing criteria for deciding between options in relation to identifying growth opportunities<br>• Understands and explicitly applies some basic principles of analytical and lateral thinking when developing promotional material and developing and implementing a compliance system<br>• Accepts responsibility for planning and sequencing complex tasks and workload, negotiating key aspects with others and taking into account capabilities, efficiencies and effectiveness<br>• Makes critical decisions quickly and intuitively in complex situations, taking into consideration a range of variables including the outcomes of previous decisions<br>• Applies systematic and analytical decision making processes for complex and non-routine situations |

# Assessment Requirements for ICTSMB402 Operate a contractor business with employees

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of the ability to:

- recruit employees and document roles
- maintain payroll management records
- allocate work and supervise employees
- identify business growth opportunities
- develop promotional materials
- identify business compliance requirements
- develop compliance processes
- monitor compliance

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- interpret Commonwealth, state, territory and local government legislative requirements relating to contract business operation, including those relating to:
  - anti-discrimination
  - the environment
  - equal employment opportunity
  - industrial relations
  - work health and safety (WHS)
- outline and evaluate the common methods of marketing relevant to a contractor business
- identify and interpret compliance requirements within the limits of an installation service business
- identify sources of advice and specialist services.

© Commonwealth of Australia, 2025 Future Skills Organisation

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – small and micro business field of work and include access to:

- resources and references, including Australian Taxation Office guides, human resource texts, recruitment guides and compliance legislation codes and practices
- performance management tools
- financial management record-keeping software.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTSUS401 Install and test renewable energy system for ICT networks

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to install a renewable energy system and integrate it into an information and communications technology (ICT) network.

It applies to individuals in the ICT industry who operate with a degree of autonomy, but who may also supervise the work of others when necessary.

The specialised nature of the role focuses on meeting sustainability targets using renewable energy solutions and resulting in more economical systems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – sustainability

## Elements and Performance Criteria

| Elements | Performance Criteria |
|---|---|
| *Elements describe the essential outcomes* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Plan to install renewable energy system | 1.1 Prepare for work according to relevant legislation, codes, regulations and standards<br>1.2 Arrange access to site according to required procedure |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | |
|---|---|
| | 1.3 Assess extent of system implementation using feasibility report and organisational guidelines<br>1.4 Produce report to meet client and organisational requirements<br>1.5 Liaise with appropriate person to obtain approval for plans with recommendations<br>1.6 Determine and source renewable energy components according to agreed plan |
| 2. Install and test renewable energy system | 2.1 Install and configure components according to work health and safety (WHS) and environmental requirements, plan, and manufacturer's and organisational requirements<br>2.2 Identify and resolve problems<br>2.3 Integrate renewable system into network<br>2.4 Test and enhance system performance to meet organisational requirements |
| 3. Complete documentation and clean up worksite | 3.1 Produce evaluation report on actual cost and benefits of implementing renewable energy system to organisation<br>3.2 Provide support manual for client<br>3.3 Record all test results and records for client<br>3.4 Notify client and obtain sign off |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| **Skill** | **Performance Criteria** | **Description** |
|---|---|---|
| Reading | 1.1, 1.3, 1.4, 1.6, 2.1, 2.4 | • Identifies, analyses and evaluates complex text to determine legislative, regulatory, technical and business requirements, and confirm network requirements |
| Writing | 1.4, 1.5, 3.2-3.4 | • Prepares reports, design solutions and recommendations that convey an understanding of outcomes and alternatives, and uses terminology appropriate to present to relevant personnel |
| Oral Communication | 1.5, 3.4 | • Articulates clearly using specific language suitable for technical, operational and business audiences to convey requirements<br>• Uses listening and questioning techniques to |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| | | confirm understanding |
| Numeracy | 3.1 | • Analyses numerical information to assess cost and benefits of renewable energy options |
| Navigate the world of work | 1.1-1.4, 2.1, 2.4 | • Recognises and responds to both explicit and implicit organisational procedures and protocols, and to legislative and regulatory requirements |
| Interact with others | 3.2, 3.4 | • Selects appropriate communication protocols in a range of work contexts |
| Get the work done | 1.1-1.3, 1.6, 2.1-2.4 | • Develops plans for complex activities with strategic implications<br>• Systematically gathers and analyses all relevant information and evaluates options to make informed decisions<br>• Uses a range of digitally based technology and applications to access and filter data, and extract, organise, integrate and share relevant information in effective ways<br>• Recognises and takes responsibility for addressing predictable and some less predictable problems in familiar work contexts |

# Assessment Requirements for ICTSUS401 Install and test renewable energy system for ICT networks

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of the ability to:

- determine and meet client requirements for installation of a renewable energy system
- plan and connect hardware components according to vendor and technical specifications
- follow all work health and safety (WHS) requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe systems diagnostic features
- explain business processes
- identify client business domain, business function and organisation
- outline compatibility issues and resolution procedures
- discuss the configuration of internet protocol (IP) networks
- identify current industry accepted hardware products and renewable energy system products
- outline the essential components of client and business liaison
- explain how to document technical specifications
- describe the linkage between processes
- describe vendor specifications and requirements for component installation
- discuss the following technologies:
  - alternate energy, such as solar, wind and chemical
  - areas of the hardware relevant to configuration and testing
  - installation procedures

© Commonwealth of Australia, 2025 Future Skills Organisation

- renewable energy system relevant to configuration and testing
- renewable energy system functionality
- set up and configuration procedures.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – sustainability field of work and include access to:

- a site on which renewable energy solutions can be implemented
- renewable energy systems currently used in industry
- relevant documentation, feasibility studies, equipment manuals and other site related documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# Assessment Requirements for ICTSUS402 Install and test power saving hardware

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of the ability to:

- determine and meet client requirements for installation and testing of power saving hardware
- plan and connect the hardware components according to vendor and technical specifications.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe systems diagnostic features
- outline business processes
- summarise client business domain, business function and organisation
- discuss compatibility issues and resolution procedures
- describe the process of configuration of internet protocol (IP) networks
- identify current industry accepted hardware products
- describe the major components of client and business liaison
- explain how to document technical specifications
- discuss linkage between processes
- identify set up and configuration procedures
- outline technologies such as:
  - areas of the hardware relevant to configuration and testing
  - installation procedures
  - power saving hardware functionality

© Commonwealth of Australia, 2025 Future Skills Organisation

- explain vendor specifications and requirements for component installation.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – sustainability field of work and include access to:

- a site on which energy saving solutions can be implemented
- power saving hardware currently used in industry
- relevant documentation, feasibility studies, equipment manuals and other site-related documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# Assessment Requirements for ICTSUS403 Install and test power management software

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of the ability to:

- clarify and meet client requirements for installation and testing of power management software
- plan and connect the software components according to vendor and technical specifications across a variety of situations.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify areas of the hardware relevant to configuration and testing
- explain current industry-accepted software products, with general features and capabilities
- summarise appropriate installation procedures
- outline work health and safety (WHS) requirements in relation to work safety, environmental factors and ergonomic considerations
- explain power saving software functionality
- describe set up and configuration procedures
- discuss systems diagnostic features
- explain vendor specifications and requirements for component installation.

# ICTSUS404 Install thin client applications for power over ethernet

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to set up energy and cost efficient installations to meet sustainability targets by remotely feeding power over ethernet (PoE).

It applies to individuals with a range of telecommunication skills who install and configure thin client applications to enable PoE on a low powered workstation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – sustainability

## Elements and Performance Criteria

| Elements | Performance Criteria |
|---|---|
| *Elements describe the essential outcomes* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Plan to install thin client applications | 1.1 Assess extent of applications to be implemented using feasibility report and organisational guidelines<br>1.2 Highlight issues associated with adoption of Web 2.0 applications<br>1.3 Produce implementation plan and present to client<br>1.4 Liaise with appropriate person to obtain approval for plans with any |

# Assessment Requirements for ICTSUS404 Install thin client applications for power over ethernet

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of the ability to:

- determine and meet client requirements for thin client applications
- install and configure components according to vendor and technical specifications.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline why businesses use thin technologies
- explain client business domain, business function and organisation
- summarise compatibility issues and resolution procedures
- explain the configuration of internet protocol (IP) networks
- discuss the importance of client and business liaison
- explain how to document technical specifications
- summarise linkage between processes
- explain set up and configuration procedures
- discuss systems diagnostic features
- explain Web 2.0 including:
  - applications and functionality
  - areas of the Web 2.0 relevant to configuration and testing
  - current industry accepted Web 2.0 products
  - vendor specifications and requirements for Web 2.0 applications
  - Web 2.0 application procedures.

# ICTSUS501 Implement server virtualisation for a sustainable ICT system

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to install and integrate a virtual server in a network to replace multiple physical servers, reducing power requirements of individual servers and meeting sustainability targets.

It applies to individuals with a high level of specialist technical skills and knowledge in telecommunications and information and communications technology (ICT) networks using internet protocol (IP) systems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – sustainability

## Elements and Performance Criteria

| Elements | Performance Criteria |
|---|---|
| *Elements describe the essential outcomes* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Plan to implement server virtualisation | 1.1 Assess extent of virtualisation to be implemented using feasibility report and organisational guidelines<br>1.2 Analyse existing server infrastructure use<br>1.3 Research and analyse alternative virtualisation scenarios, including |

# Assessment Requirements for ICTSUS501 Implement server virtualisation for a sustainable ICT system

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of the ability to:

- communicate with clients for business purposes
- determine and meet client requirements for installation and testing a virtual server
- install, integrate and test virtualisation components according to vendor and technical specifications.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain client business domain, business function and organisation
- summarise compatibility issues and resolution procedures
- describe configuration of internet protocol (IP) networks
- identify current industry-accepted products
- describe the process of documenting technical specifications
- outline linkage between processes
- discuss systems diagnostic features
- summarise the following technologies:
  - power supply requirements and management
  - registered random access memory (RAM)
  - server design and network architecture
  - set up and configuration procedures
  - single and multiple processors
  - vendor specifications and requirements for software installation

© Commonwealth of Australia, 2025 Future Skills Organisation

- virtual server functionality.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – sustainability field of work and include access to:

- a site and equipment on which servers can be virtualised
- server virtualisation currently used in industry
- relevant documentation, feasibility studies, equipment manuals and other site-related documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTSUS601 Integrate sustainability in ICT planning and design projects

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to integrate sustainability concepts and policies into information and communications technology (ICT) planning and design projects. These projects typically involve upgrades of equipment hardware and software or new installations of next generation networks (NGN) using emerging technologies.

It applies to individuals who have high level specialist technical skills and knowledge in optical communications and IT networks using internet protocol (IP) systems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – sustainability

## Elements and Performance Criteria

| Elements | Performance Criteria |
|---|---|
| *Elements describe the essential outcomes* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare to integrate sustainability into planning and | 1.1 Evaluate suitable ICT projects into which sustainability can be integrated<br>1.2 Negotiate with stakeholders to establish extent to which |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | |
|---|---|
| design stages of ICT project | sustainability is to be integrated<br>1.3 Research and identify suitable technology solutions applicable to project<br>1.4 Gather power consumption data on ICT equipment required for energy audit based on agreed standard |
| 2. Devise strategies for incorporating sustainability into ICT project | 2.1 Determine and oversee implementation of short term technology solutions to achieve reduction of power consumption<br>2.2 Initiate and progress sustainable management principles that result in reduced environmental impact<br>2.3 Establish, regularly review and improve key performance indicators (KPI) on sustainability performance<br>2.4 Incorporate innovative planning and design rules for ICT projects that foster sustainability and environmental best practice |
| 3. Analyse energy audit data | 3.1 Identify energy usage within scope of ICT project and provide detailed report<br>3.2 Estimate potential energy savings and payback periods for recommended actions<br>3.3 Estimate carbon dioxide ($CO^2$) emissions for nominated project<br>3.4 Evaluate estimated $CO^2$ emissions with comparable benchmarks<br>3.5 Make recommendations in order of priority and give estimates of implementation costs on integration of sustainability for other ICT projects |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| **Skill** | **Performance Criteria** | **Description** |
|---|---|---|
| Reading | 1.4, 2.3 | • Gathers, interprets and analyses a range of complex textual information from a range of sources and identifies relevant and key information |
| Writing | 1.2, 3.1, 3.5 | • Records technical requirements and procedures for diverse audiences using precise language and specialised terminology to convey an understanding of outcomes and alternatives |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Oral Communication | 1.1, 1.2 | • Clearly articulates and validates policy and strategy benefits for project requirements using specific language suitable for different audiences to convey requirements<br>• Uses listening and questioning techniques to confirm understanding<br>• Effectively negotiates contracts with suppliers |
| Numeracy | 2.3, 3.1-3.5 | • Uses complex mathematical formulae to estimate $CO^2$ emissions, analyse and confirm capacity requirements and plan budgetary and workforce needs |
| Get the work done | 1.1, 1.3, 1.4, 2.1, 2.3, 2.4, 3.1-3.3, 3.5 | • Develops plans to manage relatively complex, non-routine tasks with an awareness of how they may contribute to longer term operational and strategic goals<br>• Takes responsibility for own workload, negotiating some key aspects with others<br>• Systematically gathers and analyses all relevant information and evaluates options to make informed decisions<br>• Reflects on the ways in which digital systems and tools are used or could be used to achieve work goals, and recognises strategic and operational applications<br>• Uses analytical processes to decide on a course of action, establishing criteria for deciding between options |

# Assessment Requirements for ICTSUS601 Integrate sustainability in ICT planning and design projects

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of the ability to:

- plan and integrate sustainability into information and communications technology (ICT) projects by devising strategies to conserve resources
- analyse energy audit data on enterprise resource consumption
- develop and monitor policies for review and improvements, benchmarking against industry best practice and attempting new approaches continuously over time.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss best practice approaches relevant to own work area
- explain environmental or sustainability legislation, regulations and codes of practice applicable to the industry and organisation
- discuss and explain work health and safety (WHS) implications for new policy
- explain how to estimate $CO^2$ emissions
- summarise ICT power consumption calculations
- discuss policy development processes and practices
- summarise power consumption audit methodology
- identify principles, practices and available tools and techniques of sustainability management relevant to the telecommunications industry
- describe quality assurance systems relevant to own organisation
- summarise systems and procedures to aid in the achievement of workplace sustainability.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – sustainability field of work and include access to:

- sites on which planning, design and integration of sustainability may be carried out
- relevant legislation, standards, guidelines, reports and equipment specifications and drawings
- a range of workplace documentation, personnel, information and resources including:
  - compliance obligations
  - organisational plans.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTSUS602 Establish a business case for sustainability and competitive advantage in ICT projects

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to seek business advantages by developing innovative and sustainable solutions in information and communications technology (ICT) project plans.

It applies to individuals who prepare planning, cost-benefit analysis and return on investment for the implementation of sustainable schemes at the enterprise level and who work with high-level specialist training skills and knowledge in optical telecommunications and IT networks using internet protocol (IP) systems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – sustainability

## Elements and Performance Criteria

| Elements | Performance Criteria |
|---|---|
| *Elements describe the essential outcomes* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare information for establishing a | 1.1 Evaluate proposed ICT project to determine scope and potential of sustainability integration |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | |
|---|---|
| business case | 1.2 Research appropriate sources of information relevant to project to prepare business case<br>1.3 Analyse and evaluate expected goals of project and relate business case to broader organisational goals<br>1.4 Identify and consult with stakeholders to plan and validate options<br>1.5 Identify and report on any assumptions and known constraints that can impact on project |
| 2. Produce business case for ICT sustainability project | 2.1 Evaluate critical success factors to determine vital strategy for project to successfully implement sustainability and gain competitive advantage<br>2.2 Prepare cost-benefit analysis and estimate overall benefit obtained by introducing or improving sustainability in project<br>2.3 Prepare estimate of costs over appropriate time period and determine potential of return on investment (RoI)<br>2.4 Evaluate and analyse alternative options to determine benefits, disadvantages, costs and risks |
| 3. Produce business case documentation | 3.1 Validate options with stakeholders and determine recommended option<br>3.2 Prepare implementation plan for recommended option for ICT project<br>3.3 Produce executive summary of proposal, including consequences of not implementing sustainability activity |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| **Skill** | **Performance Criteria** | **Description** |
|---|---|---|
| Reading | 1.2, 1.3, 2.1 | • Analyses and evaluates complex textual information to determine technical solutions and to evaluate the benefits of improving or introducing sustainability |
| Writing | 1.4, 1.5, 2.2, 2.3, 3.1-3.3 | • Prepares a business case for diverse audiences using precise language and specialised terminology to convey an understanding of outcomes and alternatives<br>• Uses specific language to record technical requirements and procedures |
| Oral | 1.1, 1.4, 1.5, | • Clearly articulates and validates policy and strategy |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Communication | 3.1 | benefits for project requirements using specific language suitable for different audiences to convey requirements<br>• Uses listening and questioning techniques to confirm understanding |
| Numeracy | 2.2-2.4 | • Uses mathematical formulae to analyse and confirm capacity requirements and to plan budgetary and workforce needs |
| Navigate the world of work | 1.3 | • Recognises and responds to both explicit and implicit organisational procedures and protocols |
| Get the work done | 1.1-1.3, 1.5, 2.1, 2.2, 2.4 | • Develops plans to manage relatively complex, non-routine tasks with an awareness of how they may contribute to longer term operational and strategic goals<br>• Takes responsibility for own workload, negotiating some key aspects with others<br>• Systematically gathers and analyses all relevant information and evaluates options to make informed decisions<br>• Understands key principles and concepts underpinning the design and operation of digital systems and tools, and applies these when seeking to understand the potential of new technology<br>• Uses analytical processes to decide on a course of action, establishing criteria for deciding between options |

# Assessment Requirements for ICTSUS602 Establish a business case for sustainability and competitive advantage in ICT projects

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of the ability to:

- demonstrate a measurable improvement of a business through the implementation of a chosen strategy using benchmark indicators
- communicate effectively with stakeholders on approaches to sustainability improvements, development and implementation, and contribute to resolution of disputes among stakeholders
- use software systems for recording and filing documentation, measuring current usage, and interpreting all visual data and information
- identify improvements and benchmarks against industry best practice by continuously reviewing and improving policies over time.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise best practice approaches relevant to sustainability
- discuss environmental and sustainability legislation, regulations and codes of practice applicable to the industry and organisation
- describe equal employment opportunity, equity and diversity principles and work health and safety (WHS) implications of policy being developed
- explain policy development processes and practices
- outline principles, practices and available tools and techniques of sustainability management relevant to the information and communications technology (ICT) industry
- elucidate quality assurance systems relevant to own organisation
- discuss relevant industry competency

© Commonwealth of Australia, 2025 Future Skills Organisation

- evaluate relevant organisational policies, procedures and protocols as they relate to sustainability
- summarise relevant systems and procedures to aid in the achievement of workplace sustainability
- explain how to calculate ICT power consumption
- discuss energy consumption and energy audit methodology
- summarise the environmental impacts of products, processes, systems and services.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – sustainability field of work and include access to:

- sites on which preparation of a business case for introducing or improving sustainability in an ICT project may be carried out
- relevant legislation, standards, guidelines, reports, and equipment specifications and drawings
- a range of workplace documentation and personnel information and resources, such as compliance obligations, organisational plans and work responsibilities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTSUS801 Plan and manage virtualisation for ICT sustainability

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to analyse, plan and manage options using virtualisation and managed services for organisational processes to meet sustainability targets.

It applies to individuals who have responsibility for conducting or managing information and communications technology (ICT) infrastructure projects, such as network managers, ICT infrastructure managers, network planners and designers, consultants or contractors.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Sustainability

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Develop organisational plan to implement ICT virtualisation | 1.1 Critically analyse current enterprise operations to determine what processes or practices can be realised using virtualisation to ensure long-term sustainability within organisational guidelines<br>1.2 Research and analyse alternative virtualisation scenarios, including risk analysis and relative comparisons of each, considering return on investment (RoI) |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.3 Produce results of analysis, prioritising sequence of processes to be virtualised based on enterprise priorities and setting of sustainability targets for organisation |
| 2. Manage strategies for deploying virtual machines | 2.1 Critically analyse business factors that cause enterprises to migrate to virtualisation<br>2.2 Identify virtualisation inhibitors preventing organisation from deploying strategies on local virtual machines<br>2.3 Produce virtualisation management plan to capitalise on using virtual machines according to enterprise priorities |
| 3. Manage outsourced services and cloud networks | 3.1 Critically analyse ICT requirements of organisation to produce cloud architecture, using multiple cloud computing elements indicating layers of cloud client stack<br>3.2 Produce cost–benefit analysis<br>3.3 Produce analytical justifications that will determine deployment model to meet business requirements of organisation<br>3.4 Establish service level agreement (SLA) with managed services provider (MSP) or network provider to ensure responsibilities of stakeholders are specified and agreed to |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.2, 2.1, 2.2, 3.1, 3.3 | • Critically analyses documentation from a variety of sources and records and consolidates information to determine requirements |
| Writing | 1.2, 1.3, 2.3, 3.3, 3.4 | • Prepares analytical reports, management plans and SLAs, and documents technical requirements and procedures for a diverse range of people in required format |
| Numeracy | 1.2, 3.2 | • Analyses and confirms capacity and interoperability requirements, calculates cost–benefit analysis and produces budget requirements and limitations |
| Navigate the world of | 1.1, 1.3, 2.3, 3.3 | • Works autonomously, making high level decisions to achieve and improve organisational goals<br>• Develops and implements strategies that ensure |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| work | | organisational policies, procedures and regulatory requirements are being met<br>• Monitors and reviews the organisation's policies, procedures and adherence to legislative requirements to implement and manage change |
| Get the work done | 1.1, 1.2, 1.3, 2.1, 2.2, 3.1, 3.3, 3.4 | • Plans strategic priorities and outcomes within a flexible, efficient and effective context, in a diverse environment exposed to competing demands<br>• Gathers and analyses data and seeks feedback to improve plans and processes<br>• Makes high impact decisions in a complex and diverse environment, using input from a range of sources<br>• Explores and incubates new and innovative ideas through unconstrained analysis and critical thinking to develop and improve the organisation's goals<br>• Uses digital technologies to manage business operations and actively investigates new technologies for strategic and operational purposes |

# Assessment Requirements for ICTSUS801 Plan and manage virtualisation for ICT sustainability

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- develop an effective plan for virtualisation and manage strategies, including managed services
- determine and meet client requirements for installation and testing of virtual server
- perform information and communications technology (ICT) power-consumption calculations
- install, integrate and test virtualisation components according to vendor and technical specifications
- produce an accurate cost-benefit analysis and virtualisation management plan for justification
- establish an effective service level agreement (SLA).

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- research and specify best practice approaches relevant to sustainability
- contrast common business processes, including:
  - relevant organisational policies, procedures and protocols
  - relevant systems and procedures to aid in the achievement of workplace sustainability
- determine the client business domain, including client organisational structure and business functionality
- define cloud computing architecture
- outline compatibility issues and resolution procedures
- specify the configuration of internet protocol (IP) networks

© Commonwealth of Australia, 2025 Future Skills Organisation

- critique current industry-accepted products
- research and specify energy consumption and energy audit methodologies
- outline environmental and sustainability legislation, regulations and codes of practice applicable to the industry and organisation
- explain the environmental impact of products, processes, systems and services
- explain linkage between policies and the development of processes and practices
- explain principles, practices and available tools and techniques of sustainability management relevant to the ICT industry
- describe quality assurance systems relevant to own organisation
- identify a range of relevant managed services, including software, network and support
- describe technologies and other requirements relevant to virtualisation, including:
  - cloud computing
  - power supply requirements and management
  - server design and network architecture
  - set-up and configuration procedures
  - single and multiple processors
  - vendor specifications and requirements for software installation
  - virtual server functionality
  - system diagnostics
  - using software simulation.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the sustainability field of work and include access to:

- relevant documentation
- current server virtualisation
- site and equipment on which servers can be virtualised.

Assessors must satisfy NVR/AQTF assessor requirements.

# Assessment Requirements for ICTSUS802 Conduct a business case study for integrating sustainability in ICT planning and design projects

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- establish an effective business case to introduce or improve sustainability in an information and communications technology (ICT) project
- produce an accurate cost–benefit analysis showing overall benefit of integrating sustainability into an ICT project
- devise, implement and review management strategies showing a measurable improvement using the chosen benchmark indicators.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- compare best practice approaches relevant to sustainability
- research and contrast energy consumption and energy audit methodologies
- research and critically evaluate environmental and sustainability legislation, regulations and codes of practice applicable to the industry and the organisation
- evaluate the environmental impacts of products, processes, systems and services
- interpret global and national initiatives, legislation, policies and guidelines relevant to project
- research and critique the principles, practices and available tools and techniques of sustainability management relevant to the ICT industry
- explain quality assurance systems relevant to own organisation
- formulate the relevant organisational policies, procedures and protocols required to assist in achieving workplace sustainability

© Commonwealth of Australia, 2025 Future Skills Organisation

- research and apply sustainability assessment tools and key performance indicators and benchmarks
- describe sustainable management principles and strategies
- critique the various software tools for ICT power consumption and CO2 emissions calculations.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the sustainability field of work and include access to:

- a range of workplace documentation
- personnel associated with a relevant business
- legislation, specifications and guidelines
- a site on which preparation of a business case may be carried out.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTSUS803 Research strategies using SAP solutions for sustainable economic and environmental outcomes

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to establish a business case to justify the implementation of systems, applications and products (SAP) in operational strategies to achieve more sustainable business operations and environmental sustainability. It involves accessing industry information and applying legislative guidelines.

It applies to individuals who may work in a role as a business analyst, project manager, consultant, planner or designer who has responsibility for conducting or managing business operations and who plans and conducts cost–benefit analysis and return on investment for the implementation of sustainable schemes at an enterprise level.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Sustainability

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Scope enterprise for establishing business case for integrating SAP into | 1.1 Critically analyse current enterprise operations to determine what processes or practices can be realised using SAP to ensure long-term sustainability within organisational guidelines |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| business operations | 1.2 Research and critically analyse range of alternative SAP product and services solutions, including risk analysis and relative comparisons to prepare business case for validation with stakeholders<br>1.3 Produce preliminary results of scoping analysis with recommended priority of SAP solutions that would optimise business sustainability and deliver competitive advantage |
| 2. Plan and conduct business case for using SAP solutions | 2.1 Evaluate scoping analysis report to produce operating costs estimate projected over appropriate time period for a proposed plan, based on SAP solution for business critical operation<br>2.2 Conduct cost–benefit analysis to predict potential return on investment (RoI) on economic and environmental sustainability and business benefits derived by proposed SAP solution<br>2.3 Produce executive summary of proposal for validation with stakeholders, including risk analysis if SAP solution activity is not implemented |
| 3. Devise management strategies for implementing SAP sustainability solution in business operations | 3.1 Produce management plan to implement sustainability strategies using SAP software solution tools to improve profitability and reduce environmental impacts<br>3.2 Establish regular reviews using SAP reports to improve key performance indicators (KPIs) on sustainability performance<br>3.3 Produce energy usage analysis for proposed SAP solution using projected carbon dioxide (CO2) emissions with comparable benchmarks<br>3.4 Provide detailed feasibility report to support long-term economic and environmental benefits |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.2, 2.1, 3.2 | • Critically analyses plans and other documentation from a variety of sources and consolidates information to determine requirements |
| Writing | 1.2, 1.3, 2.3, 3.1-3.4 | • Generates complex written reports, executive summaries, |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| | | business cases and other documents, demonstrating control over a broad range of writing styles and purposes<br>• Prepares documentation expressing ideas, exploring complex issues and constructed logically, succinctly and accurately |
| Numeracy | 2.1, 2.2, 3.3 | • Uses highly-developed numeracy skills to interpret complex information and to perform complex calculations for costing, return on investment and sustainability targets and benchmarks |
| Navigate the world of work | 1.1 | • Works autonomously making high level decisions to achieve and improve organisational goals<br>• Develops and implements strategies that ensure organisational policies, procedures and regulatory requirements are being met<br>• Monitors and reviews the organisation's policies, procedures and adherence to legislative requirements to implement and manage change |
| Interact with others | 1.2, 2.3, 3.2 | • Uses a variety of relevant communication tools and strategies in building and maintaining effective working relationships<br>• Influences and fosters a collaborative culture, facilitating a sense of commitment and workplace cohesion<br>• Understands diversity and seeks to integrate diversity into the work context, for managing change, making decisions and achieving shared outcomes |
| Get the work done | 1.1-1.3, 2.3, 3.2-3.4 | • Plans strategic priorities and outcomes within a flexible, efficient and effective context in a diverse environment exposed to competing demands<br>• Gathers and analyses data and seeks feedback to improve plans and processes<br>• Explores and incubates new and innovative ideas through unconstrained analysis and critical thinking to develop and improve the organisation's goals<br>• Uses digital technologies to manage business operations and actively investigate new technologies for strategic and operational purposes |

# Assessment Requirements for ICTSUS803 Research strategies using SAP solutions for sustainable economic and environmental outcomes

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- conduct a scoping exercise and produce an analytical report
- conduct an effective cost–benefit analysis using systems applications and products (SAP) solutions to justify return on investment (RoI) on economic and environmental sustainability
- produce an accurate executive summary for stakeholder validation
- produce a thorough management plan to implement strategies using SAP software solutions
- produce an accurate energy usage analysis and feasibility report for long-term sustainability.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise and recommend best practice approaches relevant to SAP sustainability
- appraise the extensive range of SAP software solutions and tools
- research and specify energy consumption and energy audit methodologies
- review waste and recycling policies and management
- contrast strategies for procurement and supply chain management
- outline business operation and procedures
- research and specify environmental and sustainability legislation, regulations and codes of practice applicable to the industry and the organisation
- research and evaluate carbon emission global and national legislation, targets and benchmarks

© Commonwealth of Australia, 2025 Future Skills Organisation

- critique environmental impacts of products, processes, systems and services
- specify the principles, practices and available tools and techniques of social, economic and environmental sustainability management
- research and summarise various strategies and benefits applicable to conducting a business sustainably, including:
  - quality assurance systems relevant to own organisation
  - relevant organisational policies, procedures and protocols
  - relevant systems and procedures to aid in the achievement of a sustainable workplace.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the sustainability field of work and include access to:

- a range of workplace documentation
- relevant personnel
- organisational plans
- relevant legislation
- equipment specifications
- sites on which preparation of a business case may be carried out.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTSUS804 Use ICT to improve sustainability outcomes

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to use ICT tools and technologies to improve sustainability outcomes for a range of industries through monitoring and reporting on greenhouse gas emissions.

It applies to individuals with a high level of autonomy who are excellent communicators with telecommunications and systems skills and management abilities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Sustainability

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Design and manage a sustainability audit | 1.1 Use audit tool that reflects criteria of benchmark, nature of risks, relevant information and data types, evaluation of performance and legislative requirements<br>1.2 Define scope, objectives and benchmarks for audit in consultation with relevant stakeholders<br>1.3 Document requirements for audit resources, timing, schedule and responsibilities consistent with industry best practice and |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | relevant standards<br>1.4 Ensure collection strategies are objective and systematic, and that information and data is valid and reliable<br>1.5 Report outcomes clearly and concisely, including benefits to be achieved by adoption of audit recommendations |
| 2. Monitor energy consumption and emissions | 2.1 Analyse requirements of National Greenhouse and Energy Reporting System (NGERS) and other relevant legislation and industry standards in relation to a range of industries and needs of specific organisations<br>2.2 Identify links with functional areas and environmental management systems to ensure comprehensive information and data collection<br>2.3 Determine hardware and software required for collecting, collating, analysing and reporting emissions-related information and data<br>2.4 Factor requirement for an external audit into the monitoring proposal<br>2.5 Critically evaluate energy consumption and emissions data<br>2.6 Develop improvement strategies based on review of data<br>2.7 Use industry best practice as quality benchmark |
| 3. Develop ICT solutions to improve sustainability outcomes | 3.1 Research and analyse mitigation and adaptation strategies appropriate for a range of industries<br>3.2 Benchmark and document performance expectations in consultation with relevant stakeholders<br>3.3 Develop and document technical specifications including hardware, software, networking, interface and security and hazard management requirements<br>3.4 Determine timelines, resources and costs for implementation and ongoing monitoring and maintenance<br>3.5 Analyse impact of ICT solution in relation to performance benchmarks<br>3.6 Analyse opportunities and develop recommendations to improve sustainability of enterprise products, services and processes<br>3.7 Present report for client sign-off |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 2.1, 2.2, 2.5-2.7, 3.3 | • Identifies, analyses and evaluates complex textual information to inform sustainability solutions |
| Writing | 1.2, 1.3, 1.5, 2.4, 2.6, 3.2, 3.3, 3.6, 3.7 | • Produces detailed reports and related documentation and develops recommendations using precise language and specialised terminology to convey understanding of outcomes |
| Oral Communication | 1.2, 1.5, 3.2, 3.7 | • Articulates clearly using specific language suitable to client and stakeholder audiences to convey requirements, and uses listening and questioning techniques to confirm understanding |
| Numeracy | 1.1, 2.5, 3.4 | • Uses mathematical formulae to plan budgetary requirements and evaluate timelines for solution implementation and ongoing monitoring requirements<br>• Interprets complex energy consumption and emissions data to identify workplace improvements |
| Navigate the world of work | 1.1, 1.3, 2.1 | • Recognises and responds to both explicit and implicit organisational procedures and protocols and legislative/regulatory requirements |
| Get the work done | 1.1-1.4, 2.2, 2.3 | • Develops flexible plans for complex, high impact activities with strategic implications involving diverse stakeholders with potentially competing demands<br>• Takes responsibility for defining key aspects of own workload, balancing own needs and priorities with those of the work group<br>• Systematically gathers and analyses all relevant information and evaluates options to make high-impact and informed decisions<br>• Considers strategic and operational potential of digital trends to achieve work goals, enhance work processes, create opportunities and reduce risks |

# Assessment Requirements for ICTSUS804 Use ICT to improve sustainability outcomes

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- audit and critically analyse patterns of energy use
- develop monitoring and reporting systems that comply with regulatory requirements
- develop a workable implementation strategy
- formulate solutions to improve sustainability outcomes
- develop benchmarks for reviewing and improving performance.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain auditing sustainability processes and practices
- discuss corporate social responsibility
- describe development processes and practices
- clarify hazard identification and control
- explain industry standards
- discuss the legislative framework underpinning sustainability
- summarise principles, practices and available tools and techniques of sustainability management relevant to a range of industries
- outline relevant international business and organisational standards
- discuss sustainability from a local, national and international perspective
- summarise sustainability including ecological, economic and social issues
- discuss technical performance measurements.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the Telecommunications – Sustainability industry and include access to:

- relevant reports, legislation, regulations and standards
- suitable hardware, software, resources and equipment
- internet connection with suitable bandwidth
- relevant documentation including manufacturers' technical specifications.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTSUS805 Manage improvements in ICT sustainability

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to improve energy conservation and energy efficiency in information and communications technology (ICT) operations and to encourage changing user behaviour.

It applies to individuals who work in a managerial capacity with a high degree of autonomy and high level of responsibility with excellent communication skills, high level technical management abilities and a broad knowledge of the design of system networks. In this role, individuals research and analyse network management databases, plan changes, diagnose and fix network problems, and report outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – sustainability

## Elements and Performance Criteria

| Elements | Performance Criteria |
|---|---|
| *Elements describe the essential outcomes* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Critically analyse organisation's | 1.1 Audit and assess level and type of use across range of ICT devices, infrastructure and software<br>1.2 Audit and establish baselines of ICT energy consumption and other |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | |
|---|---|
| ICT assets energy footprint | elements contributing to organisation's carbon footprint<br>1.3 Assess ICT usage in relation to its contribution to organisation's business goals and priorities<br>1.4 Determine critical issues for organisation relevant to ICT usage and carbon footprint<br>1.5 Assess current ICT usage in relation to sustainable asset management<br>1.6 Apply industry best practice where appropriate |
| 2. Develop ICT sustainability strategies and policy | 2.1 Include goals for reduction of sustainability impacts and equipment life cycle management approaches in organisational policy<br>2.2 Check policy scope is consistent with industry standards and benchmarks, and amend where necessary<br>2.3 Ensure policy reflects organisation's commitment to sustainability as integral part of business planning and business opportunity<br>2.4 Consult with stakeholders as integral part of policy development, implementation and review processes<br>2.5 Recommend policy options based on effectiveness, timeframes and cost<br>2.6 Develop and produce strategies for implementation, monitoring, review and audit as part of policy documentation |
| 3. Formulate technical and behavioural solutions to improve ICT sustainability | 3.1 Determine and document hardware, software, network and interface requirements of solutions<br>3.2 Develop strategies to improve sustainability outcomes, including energy efficiency and alternative energy sources<br>3.3 Develop guidelines for improving sustainability through asset management<br>3.4 Document requirements, resource allocations, training needs, hazard controls and implementation timelines for selected strategies, and obtain sign off from relevant stakeholders |
| 4. Monitor and evaluate sustainability data | 4.1 Develop criteria for measuring performance improvement<br>4.2 Identify trends that may indicate need for remedial action and use to promote continuous improvement of performance<br>4.3 Modify policy and technical solutions in response to data analysis, to ensure improvements are made<br>4.4 Determine scope, frequency and method of monitoring and reporting in consultation with stakeholders<br>4.5 Review data to ensure compliance with management of sustainability and legislative requirements<br>4.6 Document findings and present to stakeholders |

# Assessment Requirements for ICTSUS805 Manage improvements in ICT sustainability

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of the ability to:

- analyse patterns of information and communications technology (ICT) use
- develop policy that complies with regulatory requirements
- develop a workable implementation strategy
- formulate solutions to reduce ICT based emissions
- develop measurable criteria for reviewing improvement.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss energy efficiency and alternative energy sources
- assess the risks, hazards and controls associated with sustainable improvements in ICT
- outline industry standards
- explain the following aspects of IT:
  - hardware
  - interfacing
  - networking
  - software
- describe the legislative framework underpinning sustainability
- explain policy development processes and practices
- summarise principles, practices and available tools and techniques of sustainability management in the ICT industry
- outline relevant International Organization for Standardization (ISO) standards

© Commonwealth of Australia, 2025 Future Skills Organisation

- discuss sustainability from a local, national and international perspective
- summarise sustainability including ecological, economic and social issues.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – sustainability field of work and include access to:

- relevant government and scientific reports
- conference papers
- vendor white papers
- resources, tools and networking equipment
- suitable hardware and software
- suitable bandwidth for internet connections
- relevant legislation and regulations
- manufacturers' technical specifications
- relevant ISO standards.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTSUS806 Lead applied research in ICT sustainability

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to plan, conduct and report on applied research to influence strategic practices on information and communications technology (ICT) sustainability and outcomes within an organisational context. The unit also covers constructing an applied research strategy, using a range of applied research techniques, and analysing and presenting findings.

It applies to individuals who are in a leadership capacity and excellent innovators and communicators, with a very high level of technical management skills and knowledge of telecommunications networks and systems. In this role, individuals must be able to undertake detailed research, analysis and evaluation. Outcomes and solutions must be presented with clarity.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – sustainability

## Elements and Performance Criteria

| Elements | Performance Criteria |
|---|---|
| *Elements describe the essential outcomes* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Provide | 1.1 Provide vision for applied research strategy to meet sustainability |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | |
|---|---|
| direction for development of applied research strategy for ICT sustainability | requirements of identified research purpose<br>1.2 Clarify and confirm applied research purpose and needs of target group<br>1.3 Facilitate development of policies and procedures in relation to conducting applied research for enterprise<br>1.4 Guide development of mechanisms for collecting and maintaining data in systematic manner<br>1.5 Review factors affecting reliability and validity of data<br>1.6 Review relevant research ethics and codes of conduct |
| 2. Control use of range of applied research techniques and resources | 2.1 Review and evaluate range of applied research methods and theories, and data collection techniques<br>2.2 Guide selection of appropriate methods to gather and analyse data on sustainability relevant to research project<br>2.3 Authorise access to appropriate sources of information relevant to research project<br>2.4 Select sustainable management principles that will have most sustainable impact on project<br>2.5 Ensure relevance of research through integrity of data collected and analysis tools used |
| 3. Promote findings | 3.1 Ensure accuracy of data and research details, and adherence to any legal requirements<br>3.2 Evaluate relevance of collated and analysed data against original applied research strategy<br>3.3 Evaluate impact of findings<br>3.4 Recommend implementation strategies<br>3.5 Ensure documentation and presentation of research findings is in clear and logical manner consistent with audience needs<br>3.6 Identify need for and appropriate approach to further research<br>3.7 Promote research findings and approach to further research |

# Assessment Requirements for ICTSUS806 Lead applied research in ICT sustainability

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of the ability to:

- direct the formulation of a research proposal or plan that includes:
  - specific research questions on sustainability
  - valid population or sample size
  - description of the geographical, cultural, social or institutional context within which the research will be carried out
  - a full description of the data collection methods
  - analysis of the limitations to research design
- manage the design of an applied research project using appropriate tools and techniques
- design a research report with analysis of data, and valid and reliable findings
- evaluate relevance of the research results
- conduct research using recognised research techniques.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise environmental and sustainability legislation, regulations and codes of practice applicable to the industry and organisation
- explain audit methodology on information and communications technology (ICT) energy, waste, product life cycles and $CO^2$ emissions
- discuss principles, practices and available tools and techniques of sustainability management relevant to the telecommunications industry
- describe communication processes and methods

© Commonwealth of Australia, 2025 Future Skills Organisation

- explain data collection methods
- summarise legislation, regulations, policies, procedures and guidelines relating to handling or storing data, including privacy and freedom of information
- describe presentation techniques
- outline reporting methods
- discuss research ethics and codes of conduct
- summarise research tools and methods
- discuss selection of appropriate applied research techniques
- outline leadership strategies relevant to a research environment.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – sustainability field of work and include access to:

- a research activity that relates to an actual workplace or simulated context and topic
- a range of tools and techniques appropriate to the given situations and research topic.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTSUS807 Conduct and manage a life cycle assessment for sustainability

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to conduct a life cycle assessment (LCA) to investigate and evaluate the human health and environmental impacts arising from the provision of a product, process or service.

It applies to individuals who are excellent communicators with a very high level of technical management skills and knowledge of telecommunications networks and systems. In this role, individuals must be able to undertake detailed research, analysis and evaluation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – sustainability

## Elements and Performance Criteria

| Elements | Performance Criteria |
|---|---|
| *Elements describe the essential outcomes* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Define and scope project goal | 1.1 Access appropriate sources of information relevant to LCA project<br>1.2 Define goal of project<br>1.3 Specify information needed to inform decision makers |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | |
|---|---|
| | 1.4 Determine required level of specificity<br>1.5 Determine data organisation and display of results<br>1.6 Define scope of study<br>1.7 Determine ground rules for performing the work |
| 2. Conduct life cycle inventory (LCI) | 2.1 Generate life cycle flow diagram<br>2.2 Develop data collection plan for LCI<br>2.3 Collect actual data<br>2.4 Evaluate and document LCI results |
| 3. Conduct life cycle impact assessment (LCIA) | 3.1 Select and define impact categories<br>3.2 Classify LCI results to impact categories<br>3.3 Model LCI impacts within impact categories using science based conversion factors<br>3.4 Normalise potential impacts in ways that can be compared<br>3.5 Assign impact categories by grouping into one or more sets to facilitate interpretation of results<br>3.6 Assign weighting factors to emphasise most important potential impacts |
| 4. Interpret and evaluate results from LCI and LCIA and communicate them | 4.1 Identify significant issues based on LCI and LCIA<br>4.2 Evaluate completeness check, consistency check and sensitivity check<br>4.3 Make recommendations for improving product, process or service life cycle |
| 5. Report results of LCA study | 5.1 Document results of LCA study<br>5.2 Finalise report with conclusion, and make recommendations as a result of LCA study |

# Assessment Requirements for ICTSUS807 Conduct and manage a life cycle assessment for sustainability

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of the ability to:

- scope and define the goals of a unique life cycle assessment (LCA) for sustainability
- produce a life cycle inventory (LCI) using relevant software and data collection strategies
- use life cycle assessment and other software for researching and interpreting charts, flowcharts, graphs and other visual data and information
- evaluate LCI and life cycle impact assessment (LCIA) results, using completeness, consistency and sensitivity checks
- make best practice recommendations based on the results of the LCA study.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline best practice approaches relevant to own work area
- summarise environmental and sustainability legislation, regulations and codes of practice applicable to the industry and organisation
- outline the need to consider equal opportunity, equity and diversity principles and work health and safety (WHS) when conducting sensitivity checks for policy development
- outline policy development processes and practices
- explain principles, practices and available tools and techniques of sustainability management relevant to the telecommunications industry
- outline quality assurance systems relevant to own organisation
- discuss relevant organisational policies, procedures and protocols
- explain relevant systems and procedures to aid in the achievement of workplace sustainability

© Commonwealth of Australia, 2025 Future Skills Organisation

- explain ICT power consumption calculations
- explain power consumption and energy audit methodology
- discuss estimating $CO^2$ emissions
- summarise environmental impacts of products, processes, systems and services.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – sustainability field of work and include access to:

- sites on which planning, design and integration of sustainability may be carried out
- relevant legislation, standards, guidelines, reports and equipment specifications and drawings
- a range of workplace documentation and personnel information and resources (such as compliance obligations, organisational plans and work responsibilities).

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTCR201 Use rigging practices and systems on telecommunications network structures

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to perform rigging work during system installations for telecommunications radio structures.

It applies to individuals who are usually highly skilled verbal and non-verbal communicators working in a team environment. They must be appropriately licensed to complete high risk work and be able to safely use all required equipment.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

## Unit Sector

Telecommunications – telecommunications rigging installation

## Elements and Performance Criteria

| Elements | Performance Criteria |
|---|---|
| *Elements describe the essential outcomes* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare rigging systems | 1.1 Prepare for work according to relevant legislation, codes, regulations and standards<br>1.2 Arrange access to site and confirm client requirements<br>1.3 Inform appropriate personnel of existing and potential site hazards |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | |
|---|---|
| | 1.4 Select tools and safety equipment required for safe rigging practice<br>1.5 Use rigging systems in telecommunications environment according to specifications<br>1.6 Identify proposed position of equipment to be mounted on telecommunications radio structures according to specifications and industry practice<br>1.7 Estimate safe working loads for rigging systems and equipment according to specifications<br>1.8 Select and inspect rigging equipment to ensure it is fit for purpose according to specifications |
| 2. Set up and carry out rigging work on telecommunications radio structures | 2.1 Set up rigging and dogging equipment following safe working practices and procedures according to all relevant work health and safety (WHS) legislation<br>2.2 Operate rigging equipment and install telecommunications antenna and associated equipment according to specifications<br>2.3 Use internationally recognised communication signals and protocols with crane drivers and helicopter crews according to the Crane Association Crane Safety Manual for Operators/Users |
| 3. De-rig and complete documentation | 3.1 De-rig and lower rigging equipment according to specifications<br>3.2 Restore site to client expectations following completion of installation according to industry practice<br>3.3 Complete documentation and notify client for sign off |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| **Skill** | **Performance Criteria** | **Description** |
|---|---|---|
| Reading | 1.1, 1.5-1.8, 2.1, 2.2, 3.1 | • Interprets textual information from relevant sources to identify equipment suitability and adhere to procedures and standards |
| Writing | 3.3 | • Legibly completes relevant reports and documentation using clear and technically specific language |
| Oral | 1.2, 1.3, 2.3, 3.3 | • Uses listening and questioning skills to confirm understanding for requirements, participates in a |

# Assessment Requirements for ICTTCR201 Use rigging practices and systems on telecommunications network structures

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of the ability to:

- apply work health and safety (WHS) requirements and work practices associated with rigging
- carry out basic dogging skills
- carry out basic rigging skills
- use specialised hand or power tools and equipment normally used in rigging.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the features and operating requirements of rigging equipment
- explain hypothermia symptoms and methods of prevention and treatment
- discuss licensing and regulatory issues applying to rigging practices and systems on telecommunications radio structures
- summarise knowledge of meteorology and weather prediction
- describe remote-area first aid
- explain:
  - electromagnetic radiation (EMR) safety practices
  - optical fibre-cabling and equipment safety practices
  - personal protective equipment for rigging projects
  - requirements of WHS legislation, relevant regulations, and applicable site and company WHS procedures
  - rigging practices and systems to telecommunications radio structures
  - working-at-heights safety practices.

# ICTTCR202 Use operational safety in a telecommunications rigging environment

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to use fall arrest, fall guarding and fall restraint when working at heights in a telecommunications rigging environment for standard telecommunications structures.

It applies to individuals who are usually highly skilled communicators working in a team environment. They must be appropriately licensed to complete high-risk work and be able to safely use all required equipment.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

## Unit Sector

Telecommunications – telecommunications rigging installation

## Elements and Performance Criteria

| Elements | Performance Criteria |
|---|---|
| *Elements describe the essential outcomes* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare to use operational safety in telecommunications | 1.1 Prepare for given work according to relevant legislation, codes, regulations and standards, and applicable to fall arrest, fall guarding and fall restraint systems |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | |
|---|---|
| rigging environment | 1.2 Select tools and safety equipment required for safe rigging practice |
| 2. Assess hazards associated with wearing safety equipment | 2.1 Inform appropriate personnel of potential faults and non-compliances in personal equipment<br>2.2 Inform appropriate personnel of primary hazards associated with use of safety harness and associated equipment and control strategies |
| 3. Check and fit safety harness | 3.1 Use correct safety harness fitting method<br>3.2 Confirm that lanyard is appropriate for task and check lanyard and harness for faults according to manufacturer's specifications and workplace procedures<br>3.3 Fit safety harness according to manufacturer's instructions |
| 4. Use a safety harness in telecommunications environment | 4.1 Minimise risks to self and others while using safety harness and lanyards using identified safety principles associated with effective fall arrest, fall guarding and fall restraint systems<br>4.2 Confirm safety of possible hook-on points and select optimum hook-on points<br>4.3 Attach and detach lanyards in safe manner to and from anchor points |
| 5. Verify rescue plan to be activated in event of a fall | 5.1 Confirm rescue plan is in place with work supervisor<br>5.2 Notify individuals of their roles in rescue plan<br>5.3 Provide report to supervisor on application of operational safety in rigging practice in telecommunications environment |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| **Skill** | **Performance Criteria** | **Description** |
|---|---|---|
| Reading | 1.1, 3.2, 3.3 | • Interprets textual information from relevant sources to identify equipment suitability and adhere to procedures and standards |
| Writing | 2.1, 2.2, 5.1-5.3 | • Legibly completes relevant reports and documentation using clear and technically specific language |
| Oral Communication | 2.1, 5.1, 5.2 | • Uses listening and questioning skills to confirm understanding of requirements, participates in a verbal exchange of ideas and solutions, and uses |

# Assessment Requirements for ICTTCR202 Use operational safety in a telecommunications rigging environment

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of the ability to:

- apply all work health and safety (WHS) requirements and work practices associated with fall arrest, fall guarding and fall restraint when working at heights in a telecommunications rigging environment.
- check and fit a safety harness according to industry practice
- use a safety harness where a fall hazard exists at height in a telecommunications context
- produce a rescue plan to be activated in the event of a fall.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline electromagnetic radiation (EMR) safety practices
- discuss fall arrest, fall guarding and fall restraint when working at heights in a telecommunications rigging environment
- list features and operating requirements of rigging equipment
- identify government legislation, regulations, and by-laws relating to rigging works including:
  - applicable site and company WHS procedures
  - WHS legislation
  - relevant codes of practice
  - subsequent amendments in regards to fall arrest, fall guarding and fall restraint when working at heights in a telecommunications rigging environment
- describe hazards associated with wearing a safety harness and associated equipment

© Commonwealth of Australia, 2025 Future Skills Organisation

- summarise licensing and regulatory issues applying to rigging practices and systems on telecommunications radio structures
- discuss optical fibre cabling and equipment safety practices
- identify personal protective equipment for rigging projects
- describe the rescue plan to be activated in the event of a fall
- outline risks present when working on telecommunications radio structures
- explain safe rigging practices and systems to telecommunications radio structures
- describe suspension trauma
- summarise working-at-heights safety practices
- identify workplace operational procedures.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – telecommunications rigging installation field of work and include access to special purpose tools, equipment and materials.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTCR203 Use safe rigging practices to climb and perform rescues on telecommunications network structures

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to assess risk, use rigging equipment, and climb and perform rescues on standard telecommunications network structures.

It applies to technical staff who work in a team environment and who use rigging on telecommunications radio structures and may make use of rigging plant and equipment, fall arrest, fall guarding and fall constraint.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

## Unit Sector

Telecommunications – telecommunications rigging installation

## Elements and Performance Criteria

| Elements | Performance Criteria |
|---|---|
| *Elements describe the essential outcomes* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare to use safe rigging practices | 1.1 Notify appropriate personnel and take necessary precautions to minimise, control or eliminate hazards that may exist during work activities<br>1.2 Prepare for given work according to minimum approach distances for hazards on telecommunications network structures, as prescribed in relevant legislation, codes, regulations and |

| | |
|---|---|
| | standards |
| 2. Assess status and condition of telecommunications network structures and identify climbing route | 2.1 Inspect and assess status and condition of telecommunications structures, according to industry practice<br>2.2 Plot optimum climbing route to avoid hazards and ensure most effective use of selected equipment, according to manufacturer's instructions and industry practice |
| 3. Prepare climbing equipment | 3.1 Select climbing equipment in keeping with structures to be climbed, according to industry practice<br>3.2 Inspect climbing equipment for damage, according to specifications and industry practice |
| 4. Climb telecommunications network structures | 4.1 Use safe climbing practices when ascending telecommunications network structures according to work health and safety (WHS) practices<br>4.2 Maintain permanent attachment when more than three metres from ground, adhering to safety requirements<br>4.3 Maintain three points of contact at all times, according to industry practice<br>4.4 Manage ropes to avoid entanglement or fouling on structure<br>4.5 Maintain safe working and minimum approach distances from hazards on telecommunications network structures at all times, according to standards and regulations |
| 5. Use climbing and working fall arrest systems | 5.1 Perform transfers to and from climbing system and working system using fall prevention practices, according to industry practice<br>5.2 Use working fall arrest system, according to specifications |
| 6. Perform rescues | 6.1 Perform rescues according to situation, industry practice and local instruction<br>6.2 Ascertain and seek required medical treatment according to enterprise standards<br>6.3 Report accidents or incidents according to company procedures and local instructions |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

© Commonwealth of Australia, 2025 Future Skills Organisation

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.2, 2.2, 3.2, 4.1, 4.5, 5.1, 5.2 | • Interprets textual information from relevant sources to identify equipment suitability and adhere to procedures and standards |
| Writing | 1.1, 6.3 | • Accurately completes relevant reports and documentation using clear and technically specific language and diagrammatic information |
| Oral Communication | 1.1, 6.1, 6.3 | • Uses listening and questioning skills to confirm understanding for requirements, and participates in a verbal exchange of ideas and solutions<br>• Uses appropriate, detailed and clear language to address key personnel and to disseminate information |
| Numeracy | 1.2, 4.2, 4.3, 4.5 | • Uses mathematical formulae to calculate ratios and scale, make adjustments to equipment and interpret methodological information |
| Navigate the world of work | 1.2, 2.1, 2.2, 3.1, 3.2, 4.1-4.5, 5.1, 5.2, 6.1, 6.3 | • Takes personal responsibility for adherence to legal and regulatory requirements, standards, manufacturer's instructions and industry practice relevant to own work context, and draws attention to any issues that may affect self or others in relation to climbing and performing rescues |
| Get the work done | 1.2, 2.1, 2.2, 3.1, 3.2, 4.4, 6.2 | • Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of the climbing and rescue context to identify relevant information and risks, and to identify and evaluate alternative strategies and resources<br>• Makes a range of critical and non-critical decisions regarding route, equipment and need for medical treatment in relatively complex climbing and rescue situations, taking a range of constraints into account<br>• Recognises and takes responsibility for addressing predictable and some less predictable safety problems in familiar work contexts |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| | | • Initiates standard procedures when responding to familiar problems within immediate context<br>• Applies formal problem-solving processes when selecting equipment and managing ropes, breaking complex issues into manageable parts and identifying and evaluating several options for action |

# Assessment Requirements for ICTTCR203 Use safe rigging practices to climb and perform rescues on telecommunications network structures

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of the ability to:

- use safe rigging practices according to all work health and safety (WHS) legislative requirements, regulations and standards
- assess the status and condition of the telecommunications structure to be climbed and plot a climbing route according to industry practice
- select climbing equipment and climb a telecommunications network structure
- work safely using climbing and working fall arrest systems
- perform rescues from telecommunications network structures to industry standards.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss falls, including:
  - fall factors according to the Guidelines for the Prevention of Falls
  - fall prevention
  - fall types according to Australian Standards and regulations
- list features and operating requirements of rigging equipment
- summarise optical fibre cabling and equipment safety practices
- identify personal protective equipment for rigging projects
- summarise, in relation to radio frequency (RF) electromagnetic radiation (EMR):
  - associated risks
  - methods of detecting

© Commonwealth of Australia, 2025
Future Skills Organisation

    - need to verify and maintain the EMR hazard management plan against an on-site situation
    - preparing for work at a telecommunications site with potential EMR hazards
    - reporting EMR hazards safety practices
    - sources and types of RF EMR
- discuss rescue methods and practices relevant to the rigging environment
- outline safe rigging principles
- describe suspension trauma, including:
    - cause
    - effect
    - prevention
    - treatment
- discuss, in relation to a safety harness:
    - hazards associated with wearing a safety harness
    - how to check, fit and use a safety harness
    - the types and application of different safety harnesses
- explain licensing and regulatory issues applying to rigging practices and systems on telecommunications radio structures
- outline risks present when working on telecommunications radio structures
- clarify specific WHS issues that affect rigging, including:
    - relevant regulations, and applicable site and company WHS procedures
    - rigging practices and systems for telecommunications radio structures
    - safe climbing practices, including maintaining three points of contact while climbing
    - safe working and minimum approach distances for hazards on telecommunications network structures, according to standards and regulations
    - safety requirements when working at heights according to WHS legislation.

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – telecommunications rigging installation field of work and include access to special purpose tools, equipment and materials.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTCR301 Build a telecommunications radio structure

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to build a foundation, and assemble and mount a telecommunications radio structure.

It applies to individuals who have a dual specialist classification as rigger installers and who may install radio structures for Worldwide Interoperability for Microwave Access (WiMAX) wireless broadband access networks, antenna installation for radio and television broadcasting, and cellular mobile communications.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

## Pre-requisite Unit

ICTTCR201 Use rigging practices and systems on telecommunications network structures

ICTTCR202 Use operational safety in a telecommunications rigging environment

ICTTCR203 Use safe rigging practices to climb and perform rescues on telecommunications network structures

## Unit Sector

Telecommunications – telecommunications rigging installation

## Elements and Performance Criteria

| Elements | Performance Criteria |
|---|---|

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.2-1.5, 2.2-2.4, 3.2, 3.3, 3.5 | • Interprets textual information from relevant sources to plan, identify all job requirements and adhere to procedures and standards |
| Writing | 1.1, 4.1, 4.3 | • Accurately completes relevant reports and documentation, using clear and technically specific language and diagrammatic information |
| Oral Communication | 1.1, 2.1, 4.3 | • Uses listening and questioning skills to confirm understanding of requirements, and participates in a verbal exchange of ideas and solutions<br>• Uses appropriate, detailed and clear language to disseminate information |
| Numeracy | 1.2, 2.2, 3.2-3.5 | • Interprets numerical information and measures, and calculates ratios and scale |
| Navigate the world of work | 1.2, 1.5, 2.1-2.4, 3.2-3.5 | • Takes personal responsibility for adherence to legal and regulatory requirements, standards, manufacturer's guidelines and industry practice relevant to own work context, and draws attention to any issues that may affect self or others when preparing for and implementing building activities |
| Get the work done | 1.1-1.5, 2.1-2.4, 3.1, 4.2 | • Applies formal problem solving processes when tackling an unfamiliar problem in relation to equipment and logistics, breaking complex issues into manageable parts and identifying and evaluating several options for action<br>• Takes responsibility for planning and organising own workload, identifying ways of sequencing and combining elements for greater efficiency, and considering how to link with the work of others<br>• Applies formal processes when preparing for building, producing plans with logically sequenced steps, and reflecting awareness of |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| | | time and resource constraints and the needs of others in the immediate vicinity<br>• Implements actions as per plan, making slight adjustments if necessary and addressing unexpected issues<br>• Makes a range of critical and non-critical decisions in relatively complex building situations, taking a range of constraints into account in relation to equipment, tools and materials |

# Assessment Requirements for ICTTCR301 Build a telecommunications radio structure

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of the ability to:

- undertake pre-construction checks to ensure a safe working environment
- construct foundations according to engineering specifications
- select site for hoisting equipment, ensuring location is safe for the operator and the construction
- preassemble the structure at ground level, ensuring completion of each assembled component
- assemble and mount a telecommunications radio structure, including temporary and permanent guy anchors
- install functional and protective earthing systems, following security and safety procedures.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise the impact that weather conditions impose on the constructions and installation of telecommunications structures
- describe the safety risks associated with the installation of telecommunications equipment in remote areas including:
  - hypothermia symptoms and methods of prevention and treatment
  - electromagnetic radiation (EMR) safety practices
  - personal protective equipment for rigging projects
  - working-at-heights safety practices
- discuss the features and operating requirements of:

© Commonwealth of Australia, 2025 Future Skills Organisation

  - construction equipment
  - rigging equipment
- identify the information required to build a telecommunications radio structure
- describe rigging practices and systems for telecommunications radio structures
- list legislation, codes of practice and other formal agreements that impact on the work activity
- summarise licensing and regulatory issues applying to rigging practices and systems on telecommunications radio structures
- describe manufacturer's requirements for safe operation of equipment
- discuss the following work health and safety (WHS) requirements:
  - WHS legislation and regulations
  - company procedures relating to the activity and site conditions
- discuss typical issues and challenges that can occur on an installation site.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – telecommunications rigging installation field of work and include access to special purpose tools, equipment and materials.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTCR302 Install radio plant and equipment on telecommunications structures

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to install basic telecommunications radio plant and equipment on standard telecommunications structures.

It applies to technical staff who install basic telecommunications radio plant and equipment on telecommunications structures and use rigging plant and equipment, fall arrest, fall guarding and fall constraint.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

## Pre-requisite Unit

ICTTCR201 Use rigging practices and systems on telecommunications network structures

ICTTCR202 Use operational safety in a telecommunications rigging environment

ICTTCR203 Use safe rigging practices to climb and perform rescues on telecommunications network structures

## Unit Sector

Telecommunications – telecommunications rigging installation

## Elements and Performance Criteria

| Elements | Performance Criteria |
|---|---|
| *Elements* | *Performance criteria describe the performance needed to demonstrate* |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | |
|---|---|
| *describe the essential outcomes* | *achievement of the element.* |
| 1. Prepare for installation of radio plant | 1.1 Prepare for given work according to relevant legislation, codes, regulations and standards<br>1.2 Arrange access to site and discuss client requirements<br>1.3 Inform appropriate personnel of existing and potential site hazards<br>1.4 Select tools and safety equipment required for safe rigging practice<br>1.5 Develop installation plans in agreement with client or site supervisor<br>1.6 Procure materials and verify delivery against inventory according to industry practice |
| 2. Install plant and equipment | 2.1 Set up rigging equipment for safe and effective use according to specifications<br>2.2 Install telecommunications radio equipment and feeders according to specifications and industry practice following work health and safety (WHS) and environmental requirements<br>2.3 Maintain installation progress documentation according to company and client requirements |
| 3. Assist with testing and fault finding | 3.1 Assist with testing of telecommunications radio equipment mounted on telecommunications structures<br>3.2 Identify and locate faults by interpreting test results and rectify according to industry practice<br>3.3 Document test results according to specifications and client requirements |
| 4. Clean up site and complete documentation | 4.1 De-rig and lower rigging equipment according to specifications<br>4.2 Restore site to client expectations following completion of installation, according to industry practice<br>4.3 Complete documentation and notify client for sign off |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| **Skill** | **Performance Criteria** | **Description** |
|---|---|---|

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Reading | 1.1, 1.6, 2.1, 2.2, 3.2, 3.3, 4.1, 4.3 | • Interprets texts from relevant sources to plan installations, identify job requirements and adhere to procedures and standards |
| Writing | 1.3, 1.5, 2.3, 3.3, 4.3 | • Uses correct terminology, spelling and grammar when advising others of requirements<br>• Develops and completes relevant reports and documentation using clear and technically specific language, and correctly recording numerical data and diagrammatic information |
| Oral Communication | 1.2, 1.3, 1.5, 1.6, 4.3 | • Uses listening and questioning skills to confirm understanding of requirements<br>• Participates in a verbal exchange of ideas and solutions and uses appropriate, detailed and clear language to address key personnel and client, and to disseminate information |
| Numeracy | 1.5, 1.6, 2.1, 2.2, 3.2 | • Uses mathematical formulae to take accurate measurements and to interpret technical data, and when purchasing supplies and creating supply lists |
| Navigate the world of work | 1.1, 1.6, 2.1-2.3, 3.2, 3.3, 4.1, 4.2 | • Takes personal responsibility for adherence to legal and regulatory requirements, standards, specifications and industry practice relevant to own work context, and draws attention to any issues that may affect self or others in relation to radio installations, de-rigging and site restoration |
| Get the work done | 1.1-1.6, 3.1, 3.2 | • Plans and implements a range of routine and some non-routine radio installation tasks, accepting stated goals and aiming to achieve them efficiently and safely<br>• Uses systematic, analytical processes when assisting with testing, setting goals, gathering relevant information, and identifying and evaluating options against agreed criteria<br>• Recognises and anticipates an increasing range of familiar problems, their symptoms and causes, actively looking for early warning signs and implementing contingency plans |

# Assessment Requirements for ICTTCR302 Install radio plant and equipment on telecommunications structures

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of the ability to:

- install basic telecommunications radio plant and equipment according to job specifications and all work health and safety (WHS) legislation, regulations, standards and environmental requirements
- assist with testing and fault-finding basic telecommunications radio plant and equipment mounted on telecommunications structures
- use effective communications skills related to:
  - dogging
  - work associates
  - supervisors
  - team members
  - enterprise documentation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline antenna principles
- outline the features and operating requirements of rigging equipment
- discuss relevant regulations and typical issues and challenges that may occur on site
- explain rigging practices and systems in relation to telecommunications radio structures, and related licensing and regulatory issues
- discuss the main principles of:
  - electromagnetic radiation (EMR) safety practices
  - optical fibre cabling and equipment safety practices

© Commonwealth of Australia, 2025 Future Skills Organisation

  - working-at-heights safety practices
- summarise specific WHS requirements relating to the activity and site conditions, including:
  - basic survival skills
  - company WHS procedures
  - hypothermia
  - remote area first aid.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – telecommunications rigging installation field of work and include access to special purpose tools, equipment and materials.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTCR303 Protect against electromagnetic radiation and systems hazards when working on telecomms radio sites

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to protect personnel against electromagnetic radiation (EMR) and system hazards when working on standard telecommunications structures with radio sites.

This unit applies to technical staff who work on telecommunications radio sites and may make use of rigging plant and equipment, fall arrest, fall guarding and fall constraints on standard telecommunications structures.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide or the relevant regulator for details of licensing, legislative or certification requirements.

## Unit Sector

Telecommunications – telecommunications rigging installation

## Elements and Performance Criteria

| Elements | Performance Criteria |
|---|---|
| *Elements describe the essential outcomes* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare for work at telecommunications site with potential | 1.1 Prepare for given work using safe working practices and procedures according to WHS legislation, codes, regulations and standards<br>1.2 Assess potential sources of radio frequency (RF) EMR, allowing |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | |
|---|---|
| EMR hazards | permissible public and occupational EMR exposure limits according to Australian Radiation Protection and Nuclear Safety Agency (ARPANSA)<br>1.3 Verify methods for determining EMR levels, and strategies for eliminating, minimising or isolating on-site EMR hazards according to industry practice<br>1.4 Confirm work objectives and specifications of equipment to be installed, according to design drawings, installation plans and equipment manufacturer's specifications<br>1.5 Select equipment and personal protective equipment required to support the EMR hazard management plan according to company policy |
| 2. Plan and carry out EMR hazard management plan in relation to on-site situation | 2.1 Produce EMR hazard management plan according to company policy<br>2.2 Consult with client to confirm EMR hazard management plan and update if required<br>2.3 Communicate agreed EMR hazard management plan to all personnel on site |
| 3. Monitor EMR hazard management plan | 3.1 Maintain ongoing communication to all personnel regarding amendments to EMR hazard management plan according to company policy<br>3.2 Ensure that personal radiation monitor (Radman) is worn according to manufacturer's instructions and industry practice |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.2, 1.4, 1.5, 3.2 | • Interprets textual information from relevant sources to plan, identify job requirements and adhere to procedures and standards |
| Writing | 2.1, 2.2, 3.1 | • Uses correct terminology, spelling and grammar when advising others of requirements<br>• Produces and completes relevant reports and documentation using clear and technically specific language, and accurately records numerical data and diagrammatic information |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Oral Communication | 1.4, 2.2, 2.3, 3.1 | • Uses listening and questioning skills to confirm understanding of requirements<br>• Participates in a verbal exchange of ideas and solutions, and uses appropriate, detailed and clear language to address key personnel and client and to disseminate information |
| Numeracy | 1.4 | • Interprets numerical information and applies to specifications |
| Navigate the world of work | 1.1-1.5, 2.1, 3.1, 3.2 | • Takes personal responsibility for adherence to legal and regulatory requirements, standards, specifications, industry practice and company policy relevant to own work context, and draws attention to any issues that may affect self or others |
| Get the work done | 1.1-1.5 | • Uses systematic, analytical processes in relation to assessing potential hazards, setting goals, gathering relevant information, and identifying and evaluating options against agreed criteria<br>• Applies formal problem solving processes when adapting rigging activities and requirements to particular sites and conditions, breaking complex issues into manageable parts and identifying and evaluating several options for action |

# Assessment Requirements for ICTTCR303 Protect against electromagnetic radiation and systems hazards when working on telecomms radio sites

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of the ability to:

- produce and maintain the electromagnetic radiation (EMR) hazard-management plan for an on-site situation
- carry out work according to the EMR hazard management plan, job specifications and all work health and safety (WHS) regulations and standards.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the principles of EMR propagation from antenna
- identify features and operating requirements of rigging equipment
- outline licensing and regulatory issues applying to rigging practices and systems on telecommunications radio structures
- describe remote area first aid
- describe rigging practices and systems to telecommunications radio structures
- summarise EMR including:
  - sources and types of radio frequency EMR
  - associated risks
  - risk assessment and mitigation strategies
  - methods of detecting and reporting EMR hazards
  - potential dangers of overexposure
  - safety practices and devices
- outline optical fibre cabling and equipment safety practices

© Commonwealth of Australia, 2025
Future Skills Organisation

- outline the relevant requirements of WHS legislation, relevant regulations, and applicable site and company WHS procedures
- describe working-at-heights safety practices.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – telecommunications rigging installation field of work and include access to special purpose tools, equipment and materials.

# ICTTEN201 Use electrical skills in telecommunications work

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required for an entry- level worker to use electrical skills, working with analog and digital, cabling and wireless networking in telecommunications.

It applies to individuals who undertake basic testing, circuit building, and evaluation of cable and wireless devices, and who may work in domestic, commercial or industrial situations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Connect up, test and verify DC and AC circuitry | 1.1 Identify any hazards and work health and safety (WHS) issues for a safe work site, and notify appropriate personnel<br>1.2 Connect a series and a parallel DC and AC circuit configuration following safe work practices<br>1.3 Choose appropriate test equipment and measure values of electrical quantities of circuits<br>1.4 Use calculations to verify measured values of electrical |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | quantities in a series and in a parallel circuit configuration<br>1.5 Compare measured values to calculated values, and determine reasons for any variations<br>1.6 Measure low voltage (LV), extra low voltage (ELV) or telecommunications network voltage (TNV) to determine if values are within equipment or power supply specifications<br>1.7 Use appropriate test equipment to measure AC voltage (multimeter) or AC current (clamp meter) in a safe manner that does not require an LV circuit to be disconnected<br>1.8 Test residual current devices (RCD) or earth leakage devices to ensure they are operational prior to working with AC mains powered equipment, power supplies and tools<br>1.9 Evaluate results and determine probable faults, if relevant |
| 2. Evaluate analog and digital signals | 2.1 Compare characteristics of an analog signal and a digital signal<br>2.2 Produce a layout using building blocks to represent a typical analog and a digital circuit showing different characteristics between an analog signal and a digital signal<br>2.3 Produce 4-bit binary codes with their decimal equivalent to represent output voltages of a digital to analog converter<br>2.4 Choose appropriate test equipment and measure output voltage of a digital device for *high* and *low* logic states |
| 3. Perform cable selection | 3.1 Compare basic transmission characteristics of different types of cables used in telecommunications and select the most appropriate cable type to suit application characteristics<br>3.2 Connect two devices with a patch cable and test the connection |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 2.1, 3.1 | • Interprets textual information to inform decision-making process |
| Writing | 2.2 | • Uses industry specific language to produce technical documentation |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Oral Communication | 1.1 | • Articulates specific concerns and issues clearly and listens to and acts on responses of others |
| Numeracy | 1.4-1.6, 1.9, 2.2, 2.4 | • Performs basic calculations to check data, make predictions and make comparisons<br>• Selects and uses appropriate tools to take measurements, analyse results and perform calculations |
| Navigate the world of work | 1.1, 1.2, 1.7, 1.8 | • Follows legislative requirements and organisational protocols, policies and procedures relevant to own role |
| Get the work done | 1.3, 1.5, 1.6, 1.9, 2.3, 2.4, 3.1 | • Determines job sequence and works logically and systematically to undertake clearly defined tasks<br>• Analyses task requirements to decide on appropriate equipment and practices<br>• Applies problem-solving processes to locate and resolve faults, and reviews impact of decisions |

# Assessment Requirements for ICTTEN201 Use electrical skills in telecommunications work

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- use fundamental electrical principles to solve basic AC and DC electrical problems
- connect and test an AC and DC circuit
- evaluate and compare characteristics of analog and digital signals
- compare and select cables according to transmission characteristics.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe principles of AC and DC electricity and how it impacts telecommunications work including:
  - AC and DC electrical SI units of measurement
  - work health and safety (WHS) issues
  - Ohm’s law and other relevant calculations
  - circuit configuration
- identify and describe common AC and DC faults, fault finding techniques and use of testing equipment
- explain application of binary to decimal conversion and vice versa
- describe principles of analog and digital electronics and building blocks common to analog and digital circuits
- explain the distinction between analog and digital signals and devices
- explain encoding techniques and their application in wired, wireless and optical communications systems

© Commonwealth of Australia, 2025 Future Skills Organisation

- outline features and applications of unshielded twisted pair (UTP), coaxial and fibre cables
- list typical electronic devices, cable types and their applications
- explain modulation techniques used in wired, wireless and optical communications systems
- explain techniques to convert analog to digital and digital to analog
- describe characteristics of signal transmission
- list and describe common telecommunications cables and the characteristics of use and application.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the Telecommunications Network Engineering field of work and include access to:

- appropriate AC and DC testing equipment
- manufacturer's documentation and equipment
- safety equipment.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# Assessment Requirements for ICTTEN202 Use hand and power tools

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- accurately interpret work orders relevant to selection and use of tools
- interpret specifications and instructions relating to materials and equipment on which tools are to be used
- prepare work environment and set up tools for safe and effective use
- perform work processes following all relevant safety requirements applying to use of hand and power tools
- monitor tool operation for correct operation during use
- inspect completed work to verify correct tool operation and use
- communicate evidence of faults and other problems
- comply with all related work health and safety (WHS) requirements and work practices.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline electrical and compressed air safety
- describe equipment types, characteristics, technical capabilities and limitations
- describe features and operating requirements of hand and power tools
- outline general housekeeping policies and procedures
- define industry and worksite terminology
- identify information required to operate equipment according to a test specification
- identify job safety analysis (JSA) or safe work method statement
- list and describe legislation, codes of practice and other formal agreements that impact the work activity

© Commonwealth of Australia, 2025 Future Skills Organisation

- identify manufacturer's requirements for safe operation of equipment
- list materials commonly used in the industry
- interpret safety data sheets (SDS) and materials handling methods
- outline operational, maintenance and basic diagnostic procedures
- identify and describe common power sources
- identify specific WHS requirements relating to the activity and site conditions
- describe typical issues and challenges that occur onsite.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications network engineering field of work and include access to:

- sites where hand and power tools may be used
- hand and power tools currently used in industry
- relevant regulatory and equipment documentation that impact the use of hand and power tools.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN203 Install and configure a home or small office network

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required for entry level networking support to establish a small office or home office (SOHO) internet connected PC network.

It applies to individuals who may work as an installer or network technician configuring small networks with simple internet protocol (IP) addressing schemes that share a limited range of resources.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare for installation of home or small office network | 1.1 Prepare for given work confirming site-specific work health and safety (WHS) and environmental requirements with appropriate personnel<br>1.2 Identify safety hazards and implement risk control measures in consultation with appropriate personnel<br>1.3 Determine nature and scope of the network and network resources from job briefs or appropriate personnel |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.4 Select and obtain personal computer system and network device requirements according to enterprise procedures<br>1.5 Obtain operating instructions, manuals, hardware and software testing methodologies<br>1.6 Consult appropriate personnel to ensure task is coordinated effectively with others involved at the worksite |
| 2. Install and troubleshoot home or small office network | 2.1 Set up personal computer systems according to manufacturer's specifications and enterprise procedures<br>2.2 Set up, configure and share network resources between network devices<br>2.3 Determine network addressing scheme for network connectivity and confirm using calculations<br>2.4 Troubleshoot network and internet connectivity according to manufacturer's specifications and enterprise procedures<br>2.5 Identify security threats and initiate control measures according to enterprise procedures |
| 3. Complete and document network installation | 3.1 Restore worksite to safe condition according to established safety procedures<br>3.2 Record and store essential installation information according to enterprise procedures<br>3.3 Notify appropriate personnel of completion of the task according to enterprise procedures<br>3.4 Notify appropriate personnel and obtain sign-off |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Writing | 3.2, 3.4 | • Completes workplace documentation accurately using appropriate form and vocabulary for intended audience |
| Oral Communication | 3.3, 3.4 | • Conveys specific messages efficiently and uses an appropriate tone and vocabulary for intended audience |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Numeracy | 2.3 | • Confirms decisions using basic calculations and predictions |
| Navigate the world of work | 1.1-1.4, 2.4, 2.5, 3.1-3.3 | • Follows legislative requirements and organisational protocols, policies and procedures relevant to own role |
| Interact with others | 1.1-1.3, 1.6 | • Collaborates and cooperates with others to achieve specific outcomes |
| Get the work done | 1.4, 1.5, 2.1-2.5 | • Prioritises and plans work to meet organisational requirements and client expectations<br>• Recognises and anticipates a range of problems, actively looking for early warning signs and implementing contingency plans when appropriate |

# Assessment Requirements for ICTTEN203 Install and configure a home or small office network

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- implement work health and safety (WHS) workplace procedures and practices
- plan installation of an internet connected network with advice and approvals of relevant personnel
- set up and configure wired and wireless networks with simple addressing schemes
- troubleshoot network and internet connectivity
- set up resource sharing
- deploy simple firewall network security
- obtain sign-off with relevant personnel.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline correct usage of tools and equipment
- describe enterprise WHS procedures
- outline basic computer systems and network operating systems
- describe computer networking principles (wired and wireless)
- outline network addressing systems (basic)
- explain network services and associated network models and protocols
- outline network security management
- outline troubleshooting procedures.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications network engineering field of work and include access to:

- a site where installation of a small office home office network may be conducted
- tools, equipment and materials currently used in the industry
- relevant workplace procedures, specifications and reference materials.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN204 Install and configure a small to medium business network

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to establish and support a small to medium business network capable of providing wide area network (WAN) connectivity and common web internet services.

It applies to individuals who may be working as a small to medium enterprise (SME) internet protocol (IP) network installer, network technician or SME network support person.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications networks engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare for installation of small to medium enterprise network | 1.1 Prepare for given work, confirming site-specific work health and safety (WHS) and environmental requirements with appropriate personnel<br>1.2 Identify safety hazards and implement risk control measures in consultation with appropriate personnel |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.3 Determine nature and scope of business network and network resources from job briefs or appropriate personnel<br>1.4 Select and obtain computer system and network device requirements according to enterprise procedures<br>1.5 Obtain operating instructions, manuals, hardware and software testing methodologies<br>1.6 Consult appropriate personnel to ensure the task is coordinated effectively with others involved at worksite |
| 2. Install and configure small to medium enterprise network | 2.1 Set up wired infrastructure according to manufacturer's specifications and enterprise procedures<br>2.2 Set up and configure resource sharing on a network server<br>2.3 Install WAN connection and ISP services and configure according to enterprise procedures<br>2.4 Troubleshoot network and internet connectivity according to manufacturer's specifications and enterprise procedures<br>2.5 Implement data back-up and disaster recovery measures according to enterprise procedures |
| 3. Complete and document network installation | 3.1 Restore worksite to safe condition according to established safety procedures<br>3.2 Record and store essential installation information according to enterprise procedures<br>3.3 Notify appropriate personnel of completion of the task according to enterprise procedures<br>3.4 Notify customer and obtain sign-off |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.3 | • Identifies and interprets scope of job and relevant procedures |
| Writing | 3.2, 3.4 | • Completes workplace documentation accurately using appropriate form and vocabulary for the intended |

# Assessment Requirements for ICTTEN204 Install and configure a small to medium business network

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- implement work health and safety (WHS) workplace procedures and practices
- plan installation of a network that uses subnet addressing and provides internet service provider (ISP) services
- set up and configure wired infrastructure
- troubleshoot local network and wide area network (WAN) connectivity and services
- configure resource sharing on a network server
- provide network data back-up and disaster recovery.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify correct usage of tools and equipment
- outline data back-up services and procedures
- describe enterprise WHS procedures
- define ISP services
- outline network device configuration
- describe network models and topologies
- define subnet addressing
- outline troubleshooting procedures
- describe WAN services and ISP responsibilities.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications network engineering field of work and include access to:

- a site where installation of a small to medium business network may be conducted
- tools, equipment and materials currently used in industry
- relevant workplace procedures
- product and manufacturing specifications and reference materials.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN205 Build and maintain a secure network

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to build a simple and secure wired local area network (LAN) or wide area network (WAN) using a range of client server applications and services.

It applies to individuals who may work in job roles such as an installer of internet protocol (IP) networks, a WAN and LAN network technician or a WAN and LAN network support person.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare to build LAN or WAN | 1.1 Prepare for given work confirming site-specific work health and safety (WHS) and environmental requirements, with appropriate personnel<br>1.2 Identify safety hazards and implement risk control measures in consultation with appropriate personnel<br>1.3 Determine network design specification from job briefs or |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | appropriate personnel<br>1.4 Determine network addressing scheme for network connectivity and confirm using calculations<br>1.5 Select and obtain network hardware according to established procedures<br>1.6 Obtain operating instructions, manuals, hardware and software testing methodologies<br>1.7 Consult appropriate personnel to ensure the task is coordinated effectively with others involved at the worksite |
| 2. Build and verify network | 2.1 Establish connections between network hardware according to manufacturer's specifications and established procedures<br>2.2 Verify network routing and switching to conform to network design specification<br>2.3 Set up, configure and share network resources between network devices |
| 3. Monitor network performance and troubleshoot network | 3.1 Monitor network traffic and assess performance metrics against manufacturer's specifications and established procedures<br>3.2 Identify security threats and initiate control measures according to enterprise procedures<br>3.3 Troubleshoot network and internet connectivity according to manufacturer's specifications and enterprise procedures |
| 4. Complete and document network build | 4.1 Restore worksite to safe condition according to established safety procedures<br>4.2 Record and store network schematics and network addressing scheme<br>4.3 Notify appropriate personnel of completion of the task<br>4.4 Notify customer and obtain sign-off |

# Foundation Skills

# Assessment Requirements for ICTTEN205 Build and maintain a secure network

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- effectively implement work health and safety (WHS) workplace procedures and practices
- develop a network addressing scheme
- determine required network components to build the network
- plan, build, configure, test and analyse performance of a network
- troubleshoot network problems.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe enterprise WHS procedures
- explain internet and computer network communication
- outline network addressing schemes including open systems interconnect (OSI) and transmission control protocol (TCP)/IP model
- describe planning the cabling of ethernet networks
- define the seven layer OSI model
- identify correct tool and equipment usage
- identify troubleshooting procedures.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications network engineering field of work and include access to:

© Commonwealth of Australia, 2025 Future Skills Organisation

- a site where building and maintenance of secure network may be conducted
- tools, equipment and materials currently used in industry
- relevant workplace procedures
- product and manufacturing specifications and reference material.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN206 Operate new media software packages

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to produce a media design through selection and appraisal of media software tools, assessment and manipulation of software functions and the use and creation of graphics and editing media files.

It applies to individuals who want an introduction to the use of media software packages and may eventually lead to employment in graphic design, industrial design, or production of promotional and marketing media material.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Identify relevant new media software and supporting hardware to meet design brief | 1.1 Perform media work in a safe manner to comply with work health and safety (WHS) criteria and accepted industry practice<br>1.2 Identify basic requirements of media design brief, including user environment from customer specifications<br>1.3 Research and review new media software and hardware available to realise design requirements |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.4 Select a new media software program to meet design brief requirements<br>1.5 Identify relevant new media hardware to support design brief requirements<br>1.6 Select, re-encode and transcode relevant file formats to process and modify digital media files to suit user application |
| 2. Develop a new media graphic design | 2.1 Review design brief to ensure customer requirements are well interpreted<br>2.2 Procure or create suitable graphics, video or sound to meet requirements of design brief<br>2.3 Manipulate graphics, video or sound using freely available software tools for evaluating capabilities and limitations of different software packages<br>2.4 Produce a media design according to customer specifications, and save new media files using designated file formats |
| 3. Review new media design | 3.1 Evaluate media design for creative, dramatic and technical quality, file size, and data suitability to meet the brief<br>3.2 Test and run graphics, video and sound of media design as part of a multimedia presentation, and present designs in the appropriate format |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.2, 1.3, 1.4, 1.5, 2.1 | • Interprets workplace documents and confirms specifications are met |
| Numeracy | 2.3, 3.1 | • Calculates dimensions and measurements to meet job specifications |
| Navigate the world of work | 1.1 | • Follows legislative requirements and organisational protocols, policies and procedures relevant to own role |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Get the work done | 1.3, 1.4, 1.6, 2.2, 2.3, 2.4, 3.1, 3.2 | • Prioritises and plans work to meet organisational expectations, legislative requirements and client expectations<br>• Recognises and anticipates a range of problems, actively looking for early warning signs and implementing contingency plans when appropriate<br>• Evaluates features of digital tools against set criteria to inform decisions about suitability<br>• Uses digital technologies and systems to enter, manipulate and store data |

# Assessment Requirements for ICTTEN206 Operate new media software packages

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- evaluate new media software
- manipulate files effectively
- produce an effective media design using two new media software packages
- evaluate a design
- test and run a design.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain functions and features of two new media applications
- define graphic design and stylistic language conventions
- identify software tools to develop, edit and test design
- outline principles of:
  - digital imaging and file formats
  - file management
  - transfer systems
  - video and sound file formats
  - visual design principles
- outline vendor product directions in new media hardware and software
- describe visualisation and interpreting creative information, scripts (text) and images.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications network engineering field of work and include access to:

- work stations with appropriate software tools
- media capable PCs
- peripheral media equipment with HD capability
- LAN with media server
- internet access.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN207 Install and test internet protocol devices in convergence networks

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required for entry-level installations and testing for internet protocol (IP) based telecommunications networking, using convergent technologies to deliver services of Next Generation Networks (NGN).

It applies to technicians and cable installers who install and maintain IP-based equipment for customer and service providers for NGN services, including internet protocol TV (IPTV), IP security, digital home networks, IP-based cable access TV (CATV), IP core and access networks, home automation, interactive TV, radio frequency identification (RFID), biometric recognition systems, mesh networks, smart grids and cloud computing.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Gather information to prepare for installation of IP device | 1.1 Obtain work health and safety (WHS) requirements and environmental requirements for a given work area, and clarify with appropriate personnel |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.2 Identify safety hazards and notify appropriate personnel<br>1.3 Obtain identified operating instructions, manuals, and hardware and software testing methodologies<br>1.4 Obtain documentation on a range of IP devices that can be networked according to the open system interconnection (OSI) reference model in networking<br>1.5 Obtain the range of required IP devices to be connected to the network and identify the IP-based telecommunications application that will be provided |
| 2. Prepare for installation of IP device | 2.1 Select IP device for installation that can be integrated into existing network<br>2.2 Obtain appropriate hardware, software, network protocols, peripheral devices and media types and connectors for configuration process<br>2.3 Draw physical topology of the device connection to network and seek approval from appropriate personnel<br>2.4 Obtain configuration details to start setting up device |
| 3. Configure and test IP device | 3.1 Determine network addressing scheme for mapping network connectivity and verify by calculations<br>3.2 Assign a valid static IP address to device<br>3.3 Use network commands to determine and verify the media access control (MAC) address, the IP address and network performance of the device<br>3.4 Determine security threats and initiate security solutions to prevent security breaches according to enterprise procedures |
| 4. Complete and document network installation | 4.1 Restore worksite to safe condition according to established safety procedures<br>4.2 Record and store essential installation information according to enterprise procedures<br>4.3 Notify appropriate person of task completion according to enterprise procedures |
| 5. Test wireless link | 5.1 Select types of wireless connections used in telecommunications<br>5.2 Set up a wireless link to connect two wireless devices, following safe work practices<br>5.3 Transmit data over the link and verify accuracy of received data |

© Commonwealth of Australia, 2025 Future Skills Organisation

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.3-1.5, 3.3, 3.1 | • Evaluates information and products from a variety of sources to ensure appropriateness to client needs |
| Writing | 2.3, 3.2, 3.3, 4.2, 4.3, 5.3 | • Develops accurate and industry specific drawings<br>• Writes computer code and commands and records technical data, ensuring correct syntax and accuracy |
| Oral Communication | 4.3 | • Uses clear language and concepts, and tone and pace appropriate for audience and purpose |
| Numeracy | 3.1 | • Performs basic mathematical calculations to compare and verify connectivity |
| Navigate the world of work | 1.1, 3.4, 4.1-4.3, 5.2 | • Understands roles and responsibilities for task and makes basic decisions on work and completion parameters<br>• Ensures knowledge of WHS requirements<br>• Recognises organisational expectations and follows explicit protocols and procedures<br>• Seeks clarification when required |
| Interact with others | 1.1, 1.2, 2.4 | • Follows instructions regarding what and how to communicate, following predetermined scripts<br>• Initiates a connection with others through verbal, or nonverbal communication responding as appropriate |
| Get the work done | 1.2-1.5, 2.1-2.4, 3.1-3.4, 4.1, 5.1-5.3 | • Plans and implements routine tasks and workload, making limited decisions on sequencing, timing and collaboration, and seeks assistance in setting priorities<br>• Makes low-impact decisions within familiar situations, based on a range of predefined or routine solutions and evaluates outcome effectiveness<br>• Responds to predictable routine problems and implements standard or logical solutions<br>• Uses digital technology for basic reading, recording and searching information, and for communications following routine procedures and security requirements |

# Assessment Requirements for ICTTEN207 Install and test internet protocol devices in convergence networks

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- prepare for installation of internet protocol (IP) device connected to a network
- set up and configure IP device with simple addressing schemes
- test and secure device against security threats
- produce essential installation information
- follow work health and safety (WHS) workplace procedures and practices
- test wireless link.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe principles of computer networking and identify common types and protocols used
- describe IP-based telecommunications and importance of network configuration including:
  - IP addressing
  - IP devices
- identify and describe the purpose of common hardware and software used in IP communications
- identify and summarise organisational policies and procedures relating to installation and testing of internet protocol devices
- describe common procedures for basic testing and troubleshooting an IP device
- describe procedures for assigning networking protocols
- explain the purpose for internet security and describe common configurations

© Commonwealth of Australia, 2025 Future Skills Organisation

- describe various basic wireless technologies and their application in communications
- describe environmental factors requiring management on telecommunications equipment
- identify and describe WHS requirements and personal safety issues relating to installation and testing of internet protocol devices
- define open system interconnection (OSI) and explain various levels involved
- identify common types of peripheral devices used in network communications systems
- calculate using the binary system
- describe common computer commands used to verify and manage IP and network performance
- identify common security threats attributed to networks and specify solutions to combat these threats
- identify common wireless technologies used in communications.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications network engineering field of work and include access to:

- a small network with IP devices
- tools, equipment, materials and documentation required for installing and testing IP devices
- relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN301 Provide infrastructure for telecommunications network equipment

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to install supporting infrastructure for telecommunications equipment and associated hardware equipment.

It applies to field officers, installation technicians or technical supervisors from carriers, contractors or other service providers who install switching, transmission and radio networks and the various transmission paths – including cable, optical fibre, radio, microwave and satellite.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare for installation infrastructure work | 1.1 Obtain relevant legislation, codes, regulations and standards for compliance when conducting work<br>1.2 Notify customer to arrange site access and obtain installation plan and specifications |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.3 Conduct site survey to verify infrastructure installation requirements can be met<br>1.4 Identify site hazards and notify appropriate personnel to make site safe<br>1.5 Notify customer of alterations required to installation design and make recommendations for possible solutions<br>1.6 Obtain approval for alterations and update installation plan<br>1.7 Develop installation activity schedule to minimise workplace disruption and according to relevant regulations and standards<br>1.8 Obtain material supplies, safety equipment, resources, tools and test equipment so it is available when required for installation for safe work practice |
| 2. Build network equipment infrastructure | 2.1 Prepare for given work according to work health and safety (WHS) and environmental requirements<br>2.2 Build metal superstructure to house equipment according to manufacturer's specifications and to safety and electrical standards<br>2.3 Build ducts and tray ways for signal and data cabling and optical cables according to plan and specification after consultation with operational staff<br>2.4 Build busbars or power cabling infrastructure as specified on the plan<br>2.5 Install cable distribution frames according to plan and manufacturer's specifications<br>2.6 Install earthing to all metal infrastructures according to specifications |
| 3. Install power infrastructure | 3.1 Install batteries and rectifiers and connect according to manufacturer's and WHS requirements<br>3.2 Test and monitor battery discharge levels and obtain replacement batteries under warranty where required |
| 4. Supervise DC power distribution | 4.1 Coordinate and arrange for power distribution work to be performed by qualified personnel to meet electrical safety requirements and certifications<br>4.2 Monitor electrical work to ensure compliance with installation plan<br>4.3 Identify and rectify faults where possible or escalate according to enterprise policy |
| 5. Restore site and | 5.1 Attach infrastructure labels and designations according to |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| complete documentation | enterprise requirements<br>5.2 Complete inspection sheets and declare asset ready for next stage of installation using appropriate sign-off documentation<br>5.3 Clean up and prepare site in readiness for next installation phase<br>5.4 Notify customer and obtain sign-off |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.3, 2.1-2.6, 3.1, 4.1, 4.2 | • Interprets and applies textual information from plans, specifications, legislation and regulatory documents to building and construction |
| Writing | 1.3, 1.5-1.7, 5.1, 5.2, 5.4 | • Documents outcomes and changes to plans using industry relevant terminology and recognised plan symbols<br>• Prepares documentation for outcomes of tests and inspections for reporting to clients and others |
| Oral Communication | 1.2, 1.4-1.6, 2.3, 5.4 | • Uses active listening skills and oral exchange when discussing and clarifying installation parameters and providing feedback to clients<br>• Actively engages with others to communicate work requirements and activities |
| Numeracy | 2.2-2.6, 3.2 | • Takes measurements and uses them for work layout and construction<br>• Makes calculations appropriate to measuring and estimating materials for construction |
| Navigate the world of work | 1.1, 1.7, 2.1, 2.2, 3.1, 4.1, 4.3, 5.1 | • Accepts responsibility and ownership for the task and makes decisions on completion parameters and the need of coordination with others<br>• Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements |
| Interact with others | 1.2, 1.4-1.6, 2.3, 3.2, 4.1 | • Selects and uses appropriate conventions and protocols when communicating to clients and co- workers in a range of work contexts |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| | | • Complies with work instructions and contributes to work group discussions using accepted conventions |
| Get the work done | 1.1, 1.3, 1.4, 1.7, 1.8, 2.2-2.6, 3.1, 3.2, 4.1-4.3, 5.2, 5.3 | • Takes responsibility for planning, sequencing and prioritising tasks and workload for efficiency and effective outcomes<br>• Makes routine decisions and implements standard procedures for routine tasks, using formal decision-making processes for more complex and non-routine situations |

# Assessment Requirements for ICTTEN301 Provide infrastructure for telecommunications network equipment

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- identify potential earthing locations, cable routes, cables trays, data cabinets, telecommunication enclosures and distributors
- build metal superstructure
- install protective earth and functional earth installations
- install power infrastructure
- supervise DC power distribution
- discuss and inform the customer on the progress of works and obtain sign off when completed.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and describe cabling types, connectors and cabling structures
- recognise common customer telecommunications applications and related equipment
- demonstrate connections to carrier infrastructure or equipment
- recognise and describe current legislation relating to installation of telecommunications equipment and connection to carrier services
- describe environmental impact of cabling works, including options for green ICT installations
- describe network topologies, interface and interconnect solutions
- recognise and describe work health and safety (WHS) requirements for:
  - working in confined spaces
  - electrical safety

© Commonwealth of Australia, 2025 Future Skills Organisation

  - working at heights
  - lifting
  - materials handling
  - other physical hazards
- outline network and transmission equipment and their application
- describe power requirements and electrical safety as they apply to the network environment
- recognise warranty information for equipment supplies and contractor work guarantees.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the Telecommunications networks engineering field of work and include access to:

- a site where installation of supporting infrastructure may be conducted
- plant, tools and equipment currently used in industry
- relevant regulatory and equipment documentation that impact work activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN302 Install telecommunications network equipment

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to effectively install and test telecommunications network equipment. It includes processes for checking plans, obtaining equipment, and handling equipment and supplies.

It applies to field officers, technicians or technical supervisors employed by carriers, contractors or other service providers, who install new, or replace old, switching, transmission and radio networks and various transmission paths – including cable, optical fibre, radio, microwave and satellite telecommunications equipment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Plan for installation of telecommunications network equipment | 1.1 Prepare for given work according to relevant work health and safety (WHS) and environmental requirements<br>1.2 Notify customer to arrange site access if necessary<br>1.3 Assess existing and potential site hazards<br>1.4 Verify location of proposed network equipment installation |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | according to appropriate plans obtained from authorised personnel<br>1.5 Develop installation plans to ensure minimal workplace disruption and according to relevant legislation, codes, regulations and standards<br>1.6 Obtain tools and test equipment required for safe work practice<br>1.7 Notify affected parties of possible network outage, if required |
| 2. Install network hardware and cabling | 2.1 Install network equipment according to the plan and manufacturer's instructions, using safe industry practices<br>2.2 Insert equipment cards and modules<br>2.3 Install all interconnecting cables to specification<br>2.4 Confirm service interruption is within limits agreed with customer<br>2.5 Document all installation drawings for customer |
| 3. Install equipment accessories | 3.1 Install alarms according to instruction manuals and specifications<br>3.2 Install operations administration and maintenance system according to specification<br>3.3 Install communication facilities for operational staff according to specification, taking into account any special needs of the site and operational staff<br>3.4 Install operator communication facilities according to needs and specifications |
| 4. Configure and test system | 4.1 Install software and configuration instructions according to system specifications, if required<br>4.2 Test to verify system performance according to customer requirements<br>4.3 Recommend any possible changes and confirm with customer<br>4.4 Record all test results |
| 5. Clean up worksite and complete documentation | 5.1 Remove and dispose of installation waste and debris from worksite according to environmental requirements<br>5.2 Restore changes made to work area during installation, to customer's satisfaction<br>5.3 Complete all installation documents and present to customer<br>5.4 Declare asset ready for commissioning and integration<br>5.5 Notify customer and obtain sign-off |

© Commonwealth of Australia, 2025 Future Skills Organisation

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.4, 2.1, 2.3, 3.1-3.4, 4.1, 4.2 | • Interprets information from plans, specifications and manufacturers' instruction manuals |
| Writing | 1.5, 2.5, 4.4, 5.3, 5.5 | • Uses clear and specific terminology to produce installation plans and instructions appropriate for audience<br>• Records results of tests in required format using industry-specific language |
| Oral Communication | 1.2, 1.4, 1.7, 2.4, 4.3, 5.5 | • Uses appropriate strategies to establish and maintain dialogue, notify parties of disruptions and changes to planned work |
| Numeracy | 1.4, 1.5 | • Accurately interprets measurements from plans and applies results to installation plans and documents<br>• Calibrates test equipment and calculates and compares results with specifications |
| Navigate the world of work | 1.1, 1.4, 2.4, 5.1 | • Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements<br>• Identifies and acts on issues that contravene relevant policies, procedures and legal requirements |
| Interact with others | 1.2, 1.4, 5.4 | • Follows accepted communication practices and protocols<br>• Uses a range of strategies to establish a sense of connection and build rapport with clients/workmates |
| Get the work done | 1.3-1.6, 2.1-2.4, 3.1-3.4, 4.1, 4.2, 5.1, 5.2, 5.4 | • Takes responsibility for planning, sequencing and prioritising tasks and own workload for efficiency and effective outcomes, occasionally negotiating changes<br>• Maintains required records and reports according to organisational requirements<br>• Makes routine decisions and implements standard procedures for routine tasks, using formal decision-making processes for more complex and non-routine situations |

# Assessment Requirements for ICTTEN302 Install telecommunications network equipment

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- plan and install network hardware and cabling according to equipment or system manuals and customer specifications
- configure and test installation
- verify cable continuity
- comply with all related work health and safety (WHS) requirements and work practices
- notify customer of work progress and obtain sign off.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- select appropriate cabling types, connectors and cabling structures
- identify connections to carrier infrastructure or equipment
- recognise electrical and/or optical properties of installation
- describe network and transmission equipment principles
- outline power requirements and electrical safety
- explain typical performance parameters and faults that may be encountered in customer equipment and related connection and transmission media
- describe various test equipment types suitable for tests to be made
- identify handling and environmental compliances for waste disposal.

# ICTTEN303 Locate, identify and rectify recurrent network faults

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to use systematic and logical fault-finding techniques according to all safety requirements and work practices.

It applies to individuals working as cablers and technicians who install and maintain a broad range of telecommunications networks.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare for fault-finding activity | 1.1 Prepare for given work according to work health and safety (WHS) and environmental requirements<br>1.2 Arrange access to site according to required procedure<br>1.3 Locate existing and potential site hazards<br>1.4 Contact customer to verify nature of recurrent fault and the network type |
| 2. Conduct activities for | 2.1 Analyse fault history using fault records to establish nature of |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| recurrent network fault-finding | fault<br>2.2 Select test equipment and conduct appropriate test to identify potential faults ensuring the diagnostic process does not compromise the integrity of the network element or system<br>2.3 Evaluate test results to determine relevant symptoms of recurrent fault using appropriate methods and appropriate process<br>2.4 Locate probable cause, type and location of the fault<br>2.5 Rectify fault or escalate to appropriate level |
| 3. Report fault-findings and solutions | 3.1 Prepare customer report on the diagnostic procedure, fault identification and fault clearance<br>3.2 Update fault records database<br>3.3 Restore worksite to the customer's satisfaction<br>3.4 Notify customer and obtain sign-off |

# Foundation Skills

# Assessment Requirements for ICTTEN303 Locate, identify and rectify recurrent network faults

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- discuss faults with clients
- test telecommunications networks to identify faults
- identify and rectify recurrent faults
- conduct and report on a fault-finding task in a telecommunications network for a range of faults
- use systematic and logical fault-finding techniques in telecommunications networks and field testing procedures to particular workplace situations
- comply with all related work health and safety (WHS) requirements and work practices
- notify customer when work has been complete and obtain sign off.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline application of Ohm’s law, impedance and reactance formulas to solve alternating current (AC) electrical problems when diagnosing faults
- summarise behaviour of faulty network elements, including symptoms and impact on network
- clarify interpretation of test results and network element/system specifications
- outline the operation and purpose of testing equipment
- explain the operation of transformers
- provide a summary of telecommunications networks
- describe performance testing and fault-finding techniques of telecommunications networks
- summarise systematic and logical fault-finding

© Commonwealth of Australia, 2025 Future Skills Organisation

- describe types of power sources used in telecommunications networks.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- sites on which network testing and fault-finding may be conducted
- line transmission, optical and radio measurement equipment currently used in industry
- system documentation, and other site-related documentation necessary to conduct tests and fault-finding investigations.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN304 Recover customer premises equipment

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to develop and enact a recovery plan and recover, package and label communications equipment including telephony, data, video, digital broadcasting and computer networks on residential, commercial or industrial installations according to all safety requirements and work practices.

It applies to technical staff who dismantle and recover customer premises systems and equipment for new installations or upgrades of indoor or outdoor telecommunications equipment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare to recover customer equipment | 1.1 Obtain relevant legislation, codes, regulations and standards<br>1.2 Notify customer for site access and location details of customer equipment for recovery<br>1.3 Identify site hazards and notify customer to make site safe |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.4 Arrange for tools and lifting equipment if required |
| 2. Recover customer equipment | 2.1 Verify equipment is out of operational service and disconnect from all power feeds<br>2.2 Dismantle equipment and peripheral units according to work health and safety (WHS) and environmental requirements with minimal disruption to building occupants<br>2.3 Package and label recovered equipment and dispose of according to arranged disposal agreement |
| 3. Complete documentation and clean up worksite | 3.1 Amend site records to show existing equipment layout<br>3.2 Clean up and restore site to customer satisfaction<br>3.3 Collect and dispose of waste material and debris according to environmental requirements<br>3.4 Notify customer of job completion to obtain sign-off and present with a copy of documentation |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 2.3 | • Recognises and interprets technical documentation, including equipment manuals and specifications |
| Writing | 1.2, 1.3, 2.3, 3.1, 3.4 | • Uses clear, specific and industry-related terminology to complete and update workplace documentation |
| Oral Communication | 1.2, 1.3, 2.3, 3.4 | • Liaises with customers about technical requirements, using specific and relevant language<br>• Uses listening and questioning techniques to confirm understanding |
| Navigate the world of work | 2.2, 3.2, 3.3 | • Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements |
| Get the work done | 1.1, 1.3, 1.4, 2.3 | • Determines job priorities, resources and equipment, and works logically and systematically to undertake clearly defined and familiar tasks |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| | | • Implements actions according to a predetermined plan, making slight adjustments if necessary<br>• Takes responsibility for routine decision-making by selecting from a range of predetermined options in routine situations, identifying and taking some situational factors into account<br>• Initiates standard procedures when responding to familiar logistical problems within immediate context |

# Assessment Requirements for ICTTEN304 Recover customer premises equipment

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- discuss equipment recovery options with customer
- develop a recovery plan
- safely disconnect, dismantle and recover customer premises' equipment
- package and label recovered equipment
- notify customer of progress and obtain sign off
- apply work health and safety (WHS) requirements and work practices.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline relevant legislation, codes of practice and other formal agreements that impact the work activity
- summarise manufacturer requirements for safe operation of equipment
- summarise customer premises' equipment and customer premises' cabling
- explain regulatory and specific WHS requirements relating to the site
- describe types of power sources used with telecommunications equipment
- discuss the nature of customer equipment recovery and the documentation required to affect recovery
- identify and describe the use of equipment used for recovery work
- outline typical issues and challenges that occur on site.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a site where recovery of customer premises' equipment can be conducted
- plant, tools and equipment currently used in industry
- relevant regulatory and equipment documentation that impact work activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN305 Refurbish customer premises equipment

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to renovate, repair and test recovered customer equipment for reinstallation.

It applies to individuals who are technically adept and may work on all types of customer premises' equipment (CPE), including telephony, data, video, digital broadcasting and computer networks, including local area networks (LAN) and multimedia in domestic, commercial or industrial installations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Process recovered equipment | 1.1 Conduct a visual inspection of external condition of the customer equipment, and assess for refurbishment<br>1.2 Conduct functional tests on equipment to determine suitability for repair<br>1.3 Liaise with customers to ensure equipment condition and repairs are understood and accepted |

# Assessment Requirements for ICTTEN305 Refurbish customer premises equipment

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- discuss the repair and refurbishment options with customer
- process recovered equipment
- renovate and repair equipment
- package refurbished product.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe features and operating requirements of test equipment
- outline legislation, codes of practice and other formal agreements that impact the work activity
- summarise manufacturer's requirements for safe operation of equipment
- identify and describe operation of test equipment and the results they provide
- provide a summary of customer premises' equipment
- outline specific work health and safety (WHS) requirements relating to the activity and site conditions
- describe test methods and performance requirements
- outline typical issues and challenges that occur on site.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- systems and equipment to refurbish
- test equipment and tools for refurbishment currently used in industry
- manufacturer's specifications.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN306 Commission an electronic unit

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to commission an electronic unit within a telecommunications environment with applications. Applications include voice over internet protocol (VoIP), radio frequency identification (RFID), security networks, telephony, data, video and multimedia.

The commissioning may be for a new installation or upgrade of capacity or technology for an existing network or subsystem for convergence to Next Generation Networks (NGN).

It applies to individuals working as field officers and technicians from telecommunications carriers, other service providers and contractors.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare to commission electronic unit | 1.1 Prepare for work following work health and safety (WHS) requirements |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.2 Organise resources based on existing and potential site hazards<br>1.3 Notify customer or network operations personnel to gain site access and network specifications<br>1.4 Determine the type and complexity of electronic unit from specifications<br>1.5 Verify installed electronic unit and associated cabling conform to specifications<br>1.6 Establish commissioning dates and confirm with all parties<br>1.7 Determine commissioning parameters according to specification, and establish planned outage if required<br>1.8 Obtain test equipment and check suitability and calibration status<br>1.9 Produce a preliminary commissioning plan according to manufacturer's instructions and enterprise guidelines for discussion with customer<br>1.10 Inform affected customers of impending action and likely timing and impact of the work |
| 2. Organise planned outages | 2.1 Negotiate outage times with appropriate groups and affected customers to minimise disruptions<br>2.2 Refer to contingency plans and arrange for emergency communications if required<br>2.3 Notify alarm management centre of planned action<br>2.4 Obtain authority to proceed from relevant control centre and notify customers affected by the outage |
| 3. Perform commissioning procedures | 3.1 Program equipment or install software according to manufacturer's specifications<br>3.2 Set electronic unit parameters according to manufacturer’s specifications and customer requirements<br>3.3 Set up test equipment and conduct tests according to manufacturer’s specifications and industry practice<br>3.4 Connect and test network access facilities for correct performance<br>3.5 Conduct cut over according to project design and industry practice in consultation with appropriate personnel<br>3.6 Check remote alarm and monitoring features are functional, if applicable |
| 4. Finalise commissioning | 4.1 Update relevant databases according to enterprise and network |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| documentation | guidelines<br>4.2 Notify appropriate personnel of commissioning results and work completion<br>4.3 Complete administrative tasks according to industry practice and enterprise guidelines |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.4, 1.5, 1.7, 1.9, 2.2, 3.1-3.3, 4.1, 4.3 | • Recognises and interprets technical documentation and specifications to determine important information |
| Writing | 1.3, 1.6, 1.9, 1.10, 2.1-2.4, 3.5, 4.1-4.3 | • Uses clear, specific and industry-related terminology to develop network documentation and update workplace records and in written communications with customers |
| Oral Communication | 1.3, 1.6, 1.10, 2.1, 2.3, 2.4, 3.5, 4.2 | • Liaises with appropriate personnel about technical requirements using specific and relevant language<br>• Uses listening and questioning techniques to confirm understanding |
| Numeracy | 1.7 | • Evaluates and reviews technical data to determine commissioning parameters |
| Navigate the world of work | 1.1, 3.3, 3.5, 4.3 | • Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements |
| Interact with others | 1.10, 2.1 | • Uses appropriate protocols when communicating in a range of familiar work contexts |
| Get the work done | 1.2, 1.6-1.8, 2.2, 2.4, 3.1-3.4, 3.6, 4.1 | • Determines job priorities and works logically and systematically to undertake clearly defined and familiar tasks, arrange site access and organise necessary equipment and resources<br>• Implements actions according to a predetermined plan, making slight adjustments if necessary and addressing |

# Assessment Requirements for ICTTEN306 Commission an electronic unit

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- commission an electronic unit according to specifications
- communicate effectively with stakeholders
- negotiate arrangements for commissioning
- deal with faults and problems and provide solutions.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain electrical and/or optical properties to be measured
- identify common networking equipment
- outline legislation and licensing requirements surrounding installation of telecommunications equipment
- summarise network operation procedures
- explain power requirements and electrical safety
- describe test equipment types
- outline transmission type and signals that may be encountered.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- sites on which installation and commissioning procedures can be conducted

© Commonwealth of Australia, 2025 Future Skills Organisation

- relevant regulatory and equipment documentation that impact commissioning
- testing equipment currently used in industry.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN307 Repair and replace telecommunications network hardware

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to fix and reinstate equipment in switching, transmission and fixed and mobile radio networks; including the various transmission path components, such as cable, optical fibre, radio, microwave and satellite.

It applies to individuals working as field officers, technicians or technical supervisors for carriers, or other service providers. It also applies to work performed under direction of the Network Operations Centre (NOC), where control of the network is coordinated.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare for hardware repair and replacement | 1.1 Obtain relevant legislation, codes, regulations and standards for the given work<br>1.2 Discuss and record details of hardware to be repaired or replaced, and proposed work schedule with the appropriate person at NOC |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.3 Work safely according to relevant safety legislation and company work practices, identifying hazards and using personal protective equipment<br>1.4 Obtain appropriate replacement hardware and associated documentation<br>1.5 Inspect network and determine need for repair task<br>1.6 Obtain tools and check they are in good working order<br>1.7 Undertake an impact risk assessment of the hardware replacement with the NOC, and prepare for contingencies using contingency plan |
| 2. Rectify fault by replacing hardware | 2.1 Replace equipment as instructed by the NOC following anti-static precautions in the case of sensitive electronic equipment and work health and safety (WHS) and environmental requirements<br>2.2 Inform NOC if problems occur with hardware replacement so escalation may commence and contingency plan initiated<br>2.3 Test replacement hardware to ensure satisfactory functionality |
| 3. Clean up worksite and complete administrative work | 3.1 Remove waste and debris from worksite and dispose of according to environmental requirements and restore work area to NOC satisfaction<br>3.2 Recover faulty equipment and return to appropriate point for disposal or refurbishment<br>3.3 Complete documentation, update fault records and make recommendations according to the enterprise quality assurance system<br>3.4 Notify appropriate person at the NOC of job completion and obtain sign-off |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.3 | • Recognises and interprets technical, regulatory and enterprise documentation |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Writing | 1.2, 1.4, 2.2, 3.3, 3.4 | • Uses clear, specific and industry-related terminology to complete and update workplace documentation |
| Oral Communication | 1.2, 2.2, 3.4 | • Liaises with a range of personnel about technical and operational requirements using specific and relevant language<br>• Uses listening and questioning techniques to confirm understanding |
| Numeracy | 2.3 | • Uses a core group of mathematical formulas involving power, voltage, current and the resistance, capacitance or inductance of various components |
| Navigate the world of work | 1.3, 3.1 | • Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements |
| Get the work done | 1.1, 1.4-1.7, 2.1, 2.3, 3.2, 3.4 | • Determines job priorities, resources and equipment, and works logically and systematically to undertake clearly defined and familiar tasks<br>• Implements actions according to a predetermined plan, making adjustments if necessary<br>• Takes responsibility for routine decision-making by selecting from a range of predetermined options in routine situations, identifying and taking some situational factors into account<br>• Initiates standard procedures when responding to familiar faults within immediate context<br>• Understands purpose and some specific functions of common digital tools used in work contexts |

# Assessment Requirements for ICTTEN307 Repair and replace telecommunications network hardware

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- rectify fault as instructed by Network Operations Centre (NOC), following work health and safety (WHS) requirements and anti-static precautions
- replace telecommunications hardware within service assurance guidelines according to enterprise procedures
- update fault records database according to enterprise procedures
- liaise with appropriate personnel in the NOC for information and reporting purposes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain application of direct current (DC) and alternating current (AC) electrical principles
- describe static electricity and its importance in testing and working with telecommunications equipment
- describe behaviour of faulty network elements including symptoms and impact on network
- interpret test results and network element or system specifications
- describe the operation and purpose of testing equipment
- summarise common telecommunications hardware and network structures
- outline performance testing and fault-finding techniques of telecommunications networks
- explain systematic and logical fault-finding
- list types of power sources used in telecommunications networks
- select and describe appropriate test equipment used to undertake fault finding procedures.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a suitable site to replace telecommunications network hardware
- a range of hardware currently used in industry
- a range of general and test equipment required for testing telecommunications network hardware.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN308 Maintain an electronic system

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to inspect critical aspects of electronic systems, and replace and dispose of items confirming performance is within specification and operating levels are normal.

It applies to individuals working as technicians on site and from remote locations. This work does not include the major servicing of equipment or repair due to breakdowns.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare to maintain system | 1.1 Consult with customer or property owner to arrange site access if required<br>1.2 Plan schedule of routine preventive maintenance for electronic system based on recommended maintenance periods from manufacturer’s handbooks and specifications<br>1.3 Report to appropriate person the impact of proposed maintenance activities on customer’s service delivery |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.4 Confirm equipment is accessible and correctly set up for on-site preventive maintenance activities and for remote interrogation if required<br>1.5 Confirm alarms are functioning according to manufacturer's specifications and enterprise guidelines<br>1.6 Take corrective action if anomalies or faults are detected, according to enterprise guidelines and manufacturer's specifications |
| 2. Undertake preventive maintenance routines on site and remotely | 2.1 Conduct preventive maintenance according to planned schedule<br>2.2 Report to appropriate person any instances where maintenance activities cannot be fully met or where there are identified defects outside the planned schedule<br>2.3 Verify equipment is functioning against expected operational parameters to confirm operational status<br>2.4 Take corrective action if faults are detected, according to enterprise guidelines and manufacturer's specifications<br>2.5 Escalate to next level of support when required, where preventive maintenance activity falls outside own level of expertise<br>2.6 Dispose of on-site waste materials according to safe working practices and approved procedures |
| 3. Make recommendations and update records | 3.1 Record results of routine tests and make recommendations<br>3.2 Store records according to enterprise guidelines |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.2, 1.5, 2.4, 3.2 | • Recognises and interprets technical documentation such as equipment manuals and specifications |
| Writing | 1.1, 1.3, 2.2, 3.1 | • Uses clear, specific and industry related terminology to develop network documentation, update workplace records, and in written communications with customers |
| Oral | 1.1, 1.3, 2.2 | • Participates in verbal exchanges about technical and operational requirements using specific and relevant |

# ICTTEN309 Provide infrastructure for telecommunications network customer equipment

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to install supporting infrastructure for telecommunications equipment and associated hardware, including access equipment and associated media, power and monitoring equipment, and alarm systems.

It applies to field officers, installation technicians or technical supervisors of contractors or other service providers for switching, transmission, radio networks and the various transmission paths, including cable, optical fibre, radio, microwave and satellite.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare for installation infrastructure work | 1.1 Obtain relevant legislation, codes, regulations and standards for compliance when conducting work<br>1.2 Notify customer to arrange site access and obtain installation plan and specifications<br>1.3 Conduct a site survey to verify infrastructure installation |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | requirements can be met<br>1.4 Identify site hazards and notify appropriate personnel to make site safe<br>1.5 Notify customer of alterations required to installation design and make recommendations for possible solutions<br>1.6 Obtain approval for alterations, and update installation plan<br>1.7 Develop installation activity schedule to minimise disruption to the workplace and according to relevant regulations and standards<br>1.8 Obtain material supplies, safety equipment, resources, tools and test equipment to be available when required for installation for safe work practice |
| 2. Build customer equipment infrastructure | 2.1 Prepare for given work according to work health and safety (WHS) and environmental requirements<br>2.2 Build telecommunications closet or telecommunications equipment room to house equipment, distributors and AC-DC power systems according to design plans, manufacturer's specifications and to safety and electrical standards<br>2.3 Build cable support systems for signal, data cabling and optical cables, including entrance facilities, intra, and inter building facilities according to plan and specification<br>2.4 Organise installation of mains AC electrical power cabling infrastructure as specified on the plan<br>2.5 Install cable distribution frames according to plan and manufacturer's specifications<br>2.6 Install protective earthing to metal infrastructures or gas arrestors according to specifications or design |
| 3. Install uninterrupted power supply (UPS) power infrastructure | 3.1 Install batteries, rectifiers and uninterrupted power supply (UPS) systems as required by specifications or design and connect according to manufacturer's and work health and safety (WHS) requirements<br>3.2 Test and monitor UPS battery discharge levels and obtain replacement batteries under warranty where required<br>3.3 Identify and rectify faults where possible or escalate according to enterprise policy |
| 4. Restore site and complete documentation | 4.1 Attach infrastructure labels and designations according to enterprise requirements<br>4.2 Complete inspection sheets and declare asset ready for customer |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | sign-off documentation<br>4.3 Clean up site<br>4.4 Notify customer and obtain sign-off |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 2.2-2.6, 3.1, 3.2, | • Reads and interprets plans, specifications and other documentation from a variety of sources and consolidates information to determine requirements |
| Writing | 1.3, 1.6, 4.1, 4.2, | • Accurately records information and prepares correspondence and documentation using clear language and organisational formats and protocols |
| Oral Communication | 1.2, 1.4, 1.5, 4.4 | • Effectively participates in verbal exchanges using collaborative and inclusive techniques including active listening and questioning and reading of verbal and non-verbal signals to convey and clarify information |
| Numeracy | 1.3, 2.2, 2.3, 2.5, 2.6, | • Takes measurements and use them for work layout and construction<br>• Makes calculations appropriate for measuring and estimating materials for construction |
| Navigate the world of work | 1.7, 2.1, 2.2, 3.1, | • Complies with explicit policies and procedures<br>• Explores and implements, where identified, implicit expectations of policies and procedures<br>• Ensures knowledge of legislative requirements and products is kept up to ensure compliance |
| Get the work done | 1.2-1.8, 2.1-2.6, 3.1, 3.2, 4.1, 4.2 | • Takes responsibility for planning, sequencing and prioritising tasks and own workload for efficiency and effective outcomes<br>• Makes routine decisions and implements standard procedures for routine tasks, using formal decision-making processes for more complex and non-routine situations<br>• Addresses less predictable problems and initiates standard procedures in response, applying |

|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- identify potential earthing locations, cable routes, cables support systems, data cabinets, telecommunication enclosures and distributors
- construct metal superstructure and racks
- install protective earth installations
- organise AC mains power infrastructure
- install uninterrupted power supply (UPS) back up power
- notify customer of works progress.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe cabling types, connectors and cabling structures used in telecommunications networks
- identify and describe common customer telecommunications applications and related equipment
- identify connections to carrier infrastructure or equipment
- identify and summarise current legislation relating to installation of telecommunications equipment and connection to carrier services
- list tools and test equipment required for an infrastructure installation
- describe the process of a site survey, and the data that should be recorded
- describe environmental impacts, including options for information and communications technology (ICT) installations
- discuss network topologies, interface and interconnect solutions

© Commonwealth of Australia, 2025 Future Skills Organisation

- identify work health and safety (WHS) requirements for managing hazards on the worksite including:
  - confined spaces
  - electrical safety
  - working at heights
  - lifting
  - materials handling
  - physical hazards
- summarise network and transmission customer equipment likely to be encountered
- describe common backup UPS systems and AC mains power requirements and electrical safety for telecommunications networks
- discuss types of warranty information for equipment supplies and contractor work guarantees
- describe the importance of correctly labelling an installation.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a site where installation of supporting infrastructure may be conducted, or a simulated environment
- plant, tools and equipment currently used in industry
- relevant regulatory and equipment documentation that impact work activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN310 Remove and replace electronic circuit boards in carrier equipment

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package version 3.0. |

## Application

This unit describes the skills and knowledge required to remove and replace electronic circuit boards and associated equipment in switching, transmission, fixed, mobile radio, access and site environmental management networks, including the various transmission path components.

It applies to linesworkers, technicians or technical supervisors working for carriers, or other service providers. It also applies to work, which may be performed under direction of the relevant authority.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications networks engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare for hardware replacement | 1.1 Obtain repair/replacement brief, relevant legislation, codes, regulations and standards for the job<br>1.2 Discuss and record details of hardware to be removed or replaced, and proposed work schedule with the relevant authority<br>1.3 Inspect network and determine the scope of the repair task |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.4 Work safely according to relevant safety legislation and client practices<br>1.5 Obtain appropriate new or replacement hardware and associated installation documentation<br>1.6 Obtain tools and check they are in good working order<br>1.7 Undertake an impact risk assessment of the hardware replacement with the relevant authority and prepare a contingency plan |
| 2. Replace hardware | 2.1 Notify relevant authority of any building or equipment cabinet alarms that might be activated by accessing site<br>2.2 Verify serial/part numbers of replacement card<br>2.3 Determine card suite, rack, shelf and slot location<br>2.4 Remove and replace connecting cables and card as required<br>2.5 Replace electronic equipment, as instructed by the relevant authority, following relevant anti-static precautions<br>2.6 Complete associated jumpering or cabling as required<br>2.7 Request relevant authority or integration team to activate the card<br>2.8 Escalate any hardware replacement problems with the relevant authority and implement contingency plan<br>2.9 Restore pressurisation systems as required |
| 3. Clean up worksite and complete required documentation | 3.1 Remove and dispose of waste and debris from worksite, according to environmental requirements, and restore work area<br>3.2 Recover faulty equipment and return to appropriate point for disposal or refurbishment<br>3.3 Complete documentation, update fault records and make recommendations according to the client practices<br>3.4 Notify relevant authority of job completion and obtain sign-off |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance | Description |

# Assessment Requirements for ICTTEN310 Remove and replace electronic circuit boards in carrier equipment

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 3.0. |

## Performance Evidence

Evidence of the ability to:

- interpret, discuss and confirm required work
- obtain documentation, equipment and hardware for required work
- notify relevant personnel of alarms that could be activated in the access and restoration of equipment cabinets and enclosures
- prepare a contingency plan to use if card replacement is unsuccessful, in consultation with relevant personnel
- remove and replace circuit boards as instructed by relevant authority, following work health and safety (WHS) requirements and anti-static precautions
- replace telecommunications hardware according to client practices
- follow required practices or contingency plan if hardware replacement is unsuccessful
- update fault records and complete required documentation
- restore site to required condition
- liaise with personnel from relevant authority for information and reporting purposes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain application of direct current (DC) and alternating current (AC) electrical principles to the removal and replacement of circuit boards
- describe static electricity and its impact on electronic circuit boards in telecommunications equipment
- outline performance testing and fault finding techniques of telecommunications networks
- describe the purpose and operation of common testing equipment

© Commonwealth of Australia, 2025 Future Skills Organisation

- describe the behaviour of faulty network elements including symptoms and impact on network
- summarise common telecommunications hardware and network structures
- list types of power sources used in telecommunications networks.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a suitable site to replace telecommunications network hardware
- a range of hardware currently used in industry
- a range of general and test equipment required for testing telecommunications network hardware.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN311 Inspect, clean and handle optical fibre cable and connectors

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package version 3.0. |

## Application

This unit describes the skills and knowledge required to inspect and clean optical fibre connectors and to follow handling and placement practices for optical fibre patch leads and cables. It relates to practices necessary in the installation and patching of fibre for new or replacement cables in switching, transmission and fixed and mobile radio networks.

It applies to linesworkers, technicians or jointers working for carriers, or other service providers. It also applies to work performed under direction of the relevant authority.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications networks engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare for fibre patching | 1.1 Obtain relevant legislation, codes, regulations and standards for the given work<br>1.2 Obtain the design schematics and cut over sequence for fibre patching<br>1.3 Discuss and record details of activities and work schedule with |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | the relevant authority<br>1.4 Work safely according to relevant safety legislation and company work practices, identifying hazards, including laser safety, dangerous materials handling and using personal protective equipment<br>1.5 Ensure all tools and materials required for patching are available and in good condition<br>1.6 Undertake an impact risk assessment, including customer impact risk and work health and safety (WHS) guidelines for the fibre patching requirements, and prepare any necessary notifications |
| 2. Prepare each connector and bulkhead for patching | 2.1 Place fibre patch leads in support pathways avoiding pressure points, crushing and excess bending<br>2.2 Identify appropriate connector and lead type<br>2.3 Ensure connectors match bulkhead connectors<br>2.4 Remove connector dust cover and inspect connecting surface for dust or damage using the correct optical scope<br>2.5 Clean connector, if necessary, with the recommended cleaning materials and tools and re-inspect<br>2.6 Insert connector and label in accordance with client practices<br>2.7 Secure cables according to manufacturer's instructions and client practices<br>2.8 Escalate any hardware replacement problems with the relevant authority<br>2.9 Test replacement hardware to ensure satisfactory functionality |
| 3. Clean up worksite and complete administrative work | 3.1 Remove waste and debris from worksite and dispose of according to environmental requirements<br>3.2 Recover faulty equipment and return to appropriate point for disposal or refurbishment<br>3.3 Complete documentation, update fault records and make recommendations according to client practices<br>3.4 Notify appropriate person at the relevant authority of job completion and obtain sign-off |

© Commonwealth of Australia, 2025 Future Skills Organisation

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.2, 1.3, 1.4, 1.6, 2.7, 2.8, 3.3 | • Recognises and interprets technical, regulatory and enterprise documentation |

# Assessment Requirements for ICTTEN311 Inspect, clean and handle optical fibre cable and connectors

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 3.0. |

## Performance Evidence

Evidence of the ability to:

- interpret, discuss and confirm required work
- obtain and check documentation, equipment and hardware for required work
- complete an impact risk assessment
- inspect fibre connectors using inspection scopes
- clean connectors using approved methods
- handle optical fibre cable and connectors to prevent damage
- complete patching as per patching schedule and under the direction of the relevant authority
- follow work health and safety (WHS) requirements and anti-static precautions
- follow required practices or contingency plan if hardware replacement is unsuccessful
- update fault records and complete required documentation
- restore site to required condition
- liaise with appropriate personnel for information and reporting purposes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain application of direct current (DC) and alternating current (AC) electrical principles to required work
- describe static electricity and its importance in testing and working with telecommunications equipment
- outline performance testing and fault finding techniques of telecommunications networks
- describe the operation and purpose of testing equipment

© Commonwealth of Australia, 2025 Future Skills Organisation

- describe behaviour of faulty network elements including symptoms and impact on network
- summarise common telecommunications hardware and network structures
- list types of power sources used in telecommunications networks.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a suitable site to replace telecommunications network hardware
- a range of hardware currently used in industry

# ICTTEN401 Identify requirements for customer telecommunications equipment

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to pinpoint equipment and place cables within domestic, commercial or industrial installations, and includes planning access to existing infrastructure and completing all necessary documentation.

It applies to individuals working cablers and registered with an Australian Communications and Media Authority (ACMA) – accredited registrar.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare to identify services required | 1.1 Contact customer to arrange access to site and identify customer equipment and discuss customer requirements<br>1.2 Assess site-specific safety requirements and enterprise work health and safety (WHS) processes and procedures<br>1.3 Confirm details of types and models of existing and proposed |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | customer equipment<br>1.4 Establish intended uses of customer's equipment to assist in identifying cabling requirements<br>1.5 Establish required cabling requirements with customer and make alternative recommendations<br>1.6 Locate existing facilities and systems including network facilities<br>1.7 Verify building construction by observation to confirm accessibility<br>1.8 Utilise existing floor plans where available and integrate into subsequent documentation<br>1.9 Notify customer where physical location may incur additional cost<br>1.10 Prepare a report on required services |
| 2. Establish availability of and access to existing cabling | 2.1 Calculate capacity of existing cabling against proposed usage to ensure appropriate decisions are taken on extent of new cabling required<br>2.2 Inspect cabling to ensure compliance with ACMA regulations, relevant legislation, codes, regulations and standards<br>2.3 Prepare a report on cabling infrastructure and equipment to meet customer requirements |
| 3. Complete required reports and documentation | 3.1 Complete all required documents promptly and accurately according to company policy<br>3.2 Obtain customer confirmation of documented requirements where required<br>3.3 Distribute relevant documentation promptly to required parties<br>3.4 Obtain sign-off from customer |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Reading | 1.2, 1.9, 3.1 | • Recognises and interprets technical documentation such as equipment manuals and specifications and other drawings to determine job requirements |
| Writing | 1.4, 1.5, 1.7, 1.9, 1.10, 2.3, 3.1, 3.2, 3.4 | • Uses clear, specific and industry-related terminology to produce and update workplace documentation |
| Oral Communication | 1.1, 1.3, 1.5, 1.9, 3.2, 3.4 | • Uses listening and questioning skills to confirm understanding for requirements, participates in a verbal exchange of ideas and solutions, and uses appropriate, detailed and clear language to address key personnel and disseminate information |
| Numeracy | 1.9, 2.1 | • Uses mathematical formulae to measure equipment requirements and calculate equipment costs within budgetary constraints |
| Navigate the world of work | 1.2, 2.2, 3.1 | • Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements |
| Interact with others | 3.3 | • Actively identifies requirements of important communication exchanges, selecting appropriate channels, format, tone and content to suit purpose and audience |
| Get the work done | 1.4, 15, 1.6, 1.7 3.4 | • Determines job priorities, resources and equipment, and works logically and systematically to undertake clearly defined and familiar tasks<br>• Implements actions according to a predetermined plan, making slight adjustments if necessary<br>• Takes responsibility for routine decision-making by selecting from a range of predetermined options in routine situations, identifying and taking some situational factors into account<br>• Initiates standard procedures when responding to familiar equipment and logistics problems within immediate context |

# Assessment Requirements for ICTTEN401 Identify requirements for customer telecommunications equipment

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- discuss and negotiate with customers their needs and expectations for customer equipment
- identify services required, and availability and access to existing cabling
- identify locations of equipment and placement of cables on support structures and building faces for both internal and external locations for service delivery
- complete required reports and documentation including order forms, services checklists and quotation forms.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain features and operating requirements of test equipment
- summarise legislation, codes of practice and other formal agreements that impact the work activity
- describe manufacturer’s requirements for safe operation of equipment
- explain specific work health and safety (WHS) requirements relating to the activity and site conditions
- describe the process of evaluating a customer premises to determine requirements
- outline typical issues and challenges that occur on site.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- sites on which telecommunications installations can be conducted
- relevant databases, licensing requirements and other site- related documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN402 Estimate and quote for customer telecommunications equipment installation

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to assess and estimate costs for all types of customer cabling needs.

It applies to individuals who undertake successful negotiations with customers and suppliers, and who update schematic drawings and specifications.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Confirm and update schematic drawings and specifications | 1.1 Obtain existing specifications and drawings and prepare additional or new schematic drawings and specifications for installation if required<br>1.2 Confirm all fittings, cable types and equipment locations with customer |
| 2. Price labour, materials and other relevant items | 2.1 Obtain quotations and delivery dates from suppliers to ensure |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| and establish availability | fair comparisons across suppliers<br>2.2 Estimate labour costs based on company or industry labour rates and conditions<br>2.3 Check pricing documentation to ensure supply proposal matches customer specification for material, quality and performance |
| 3. Estimate labour, materials and other relevant item requirements | 3.1 Prepare estimations allowing for contingencies during installation and relevant legislation, codes, regulations and standards<br>3.2 Calculate costs using standard unit measures where relevant<br>3.3 Ensure estimates will return a profit on installation where appropriate |
| 4. Prepare and confirm quote with customer | 4.1 Prepare an equipment installation quote that meets customer requirements<br>4.2 Negotiate changes and variations to meet customer and company needs |
| 5. Establish customer's financial arrangements | 5.1 Obtain customer’s approval of purchase arrangements and method of payment<br>5.2 Complete finance company negotiations successfully, where required, and obtain customer’s agreement |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 2.3 | • Recognises and interprets technical documentation such as equipment manuals and specifications and other drawings to determine job requirements |
| Writing | 1.1, 1.2, 3.1, 4.1, 4.2, 5.1, 5.2 | • Uses clear, specific and industry-related terminology to produce and update workplace documentation |
| Oral Communication | 1.2, 4.2, 5.1, 5.2 | • Participates in an oral exchange with customers and suppliers, requiring some negotiation and liaison on technical and operational matters |
| Numeracy | 2.2, 3.1-3.3 | • Uses mathematical formulae to measure equipment |

# Assessment Requirements for ICTTEN402 Estimate and quote for customer telecommunications equipment installation

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- determine customer equipment requirements
- prepare detailed estimates, updated schematic drawings and specifications, including material and labour costs for telecommunications equipment installations
- negotiate with contractors on material availability and pricing for customer equipment installations
- complete detailed quotes for installations that allow for variations
- negotiate and confirm variations to quote and financial arrangements with customer.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe features of customer telecommunications equipment
- outline legislation, codes of practice and other formal agreements that impact the work activity
- explain processes and techniques required to prepare plans, estimate and quote for installations
- describe specific work health and safety (WHS) issues that may impact a quotation for customer equipment installation
- outline typical issues and challenges that occur when negotiating with customers.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- sites on which estimates and quotes may be conducted
- relevant databases, licensing requirements and other site- related documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN403 Assign a transmission path

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to allocate channel capacity to a customer or customer group based on details provided in a service request.

It applies to individuals working as technical officers or engineers for private and public organisations. They combine technical skills with organisational skills to assess customer requirements and allocate a transmission medium to provide access to the customer.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Collect data to evaluate capability of transmission path | 1.1 Determine service details from service request<br>1.2 Use transmission medium plans to locate customer position relative to the access network provisioning<br>1.3 Evaluate existing transmission mediums in close proximity to assess their capability to deliver service to customer<br>1.4 Specify equipment to be used on the service from service request |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.5 Specify line interface type to be used, according to enterprise guidelines |
| 2. Allocate transmission medium for service | 2.1 Select appropriate transmission medium to deliver service to customer's premises<br>2.2 Record information about transmission medium between customer's premises and exchange or network terminal point<br>2.3 Verify service delivery point interface at exchange or network terminal point is compatible with required system<br>2.4 Conduct appropriate allocation process to assign new services and send completed allocation information to appropriate field staff to verify physical allocation before providing service |
| 3. Maintain transmission medium records | 3.1 Advise relevant personnel of impending bearer shortages to facilitate future planning allocation<br>3.2 Update plans and databases to record all details |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.2, 1.5 | • Recognises and interprets technical documentation to determine job requirements |
| Writing | 1.4, 1.5, 2.2, 2.3, 3.1, 3.2 | • Uses clear, specific and industry-related terminology to record and notate workplace documentation |
| Oral Communication | 1.4, 1.5, 2.3, 3.1 | • Uses listening and questioning skills to confirm understanding of requirements and participates in a verbal exchange with technical staff, subject matter experts and manufacturers<br>• Uses appropriate, detailed and clear language to address key personnel and disseminate information |
| Numeracy | 2.4 | • Makes calculations to determine capacity requirements |
| Interact with others | 2.4 | • Actively identifies requirements of important communication exchanges, selecting appropriate channels, format, tone and content to suit purpose and |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| | | audience |
| Get the work done | 1.3, 2.4, 3.2 | • Determines job priorities, resources and equipment, and works logically and systematically to undertake clearly defined and familiar tasks<br>• Implements actions according to a predetermined plan, making slight adjustments if necessary<br>• Takes responsibility for routine decision-making by selecting from a range of predetermined options in routine situations, identifying and taking some situational factors into account<br>• Understands purpose and specific functions of common digital tools used in work contexts |

# Assessment Requirements for ICTTEN403 Assign a transmission path

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- assess transmission needs for a transmission path according to service request
- select suitable equipment to provide new services
- communicate effectively with stakeholders to meet customer needs
- assess future needs.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- review common customer telecommunications applications and related equipment
- investigate core networks using emerging and converging technologies
- explain current legislation relating to installation of telecommunications equipment and connection to carrier services
- evaluate customer access options and their technical support systems
- describe multiplexing principles and transmission hierarchies
- summarise network and transmission equipment
- outline network topologies, interfaces and interconnect solutions.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- sites where transmission paths can be allocated

© Commonwealth of Australia, 2025 Future Skills Organisation

- a computer networking facility
- relevant regulatory and equipment documentation
- equipment currently used in industry.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN404 Install and configure a wireless mesh network

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to connect and test wireless networking equipment or radio communications equipment.

It applies to individuals working as technicians and technical officers for private and public organisations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Configure wireless mesh nodes and wireless access points | 1.1 Determine internet protocol (IP) addressing schemes from design plan, obtained from appropriate personnel<br>1.2 Confirm compatibility of factory installed firmware in wireless routers with mesh routing requirements – otherwise install upgrade firmware<br>1.3 Configure wireless router settings and wireless fidelity (WiFi) for wireless access point settings for inclusion in mesh network<br>1.4 Connect mesh node and access node back-to-back via a straight |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | LAN cable according to design plan |
| 2. Connect separate mesh networks via backbone | 2.1 Configure routing software on mesh and backbone nodes to enable mesh traffic to reach backbone<br>2.2 Connect mesh node and backbone node back-to-back via a straight LAN cable<br>2.3 Configure gateway server and gateway node and add required services to network |
| 3. Test connectivity within mesh network | 3.1 Assemble all wireless mesh routers with configuration sheets attached, and power up routers<br>3.2 Connect PC to a wireless mesh router and confirm an IP address is provided automatically by dynamic host configuration protocol (DHCP)<br>3.3 Confirm connectivity to mesh nodes and the gateway by pinging individual IP addresses, and rectify faulty nodes if required |
| 4. Test network connectivity via wireless backbone | 4.1 Install mesh nodes according to design plan<br>4.2 Install and align directional antennas on wireless backbone path according to installation instructions and work health and safety (WHS) procedures<br>4.3 Confirm connectivity between mesh clusters at either end of wireless backbone |
| 5. Clean up worksite and complete administrative work | 5.1 Remove waste from worksite, dispose of according to environmental requirements and restore work area to customer's satisfaction<br>5.2 Update documentation records and make recommendations according to enterprise policy<br>5.3 Notify customer of job completion and obtain sign-off |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 4.2, 5.2 | • Recognises and interprets technical documentation to |

# Assessment Requirements for ICTTEN404 Install and configure a wireless mesh network

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- configure wireless mesh nodes
- install wireless mesh nodes, access point nodes and gateway
- test nodes for connectivity.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain requirements for 802.11 wireless protocols
- describe allocation of internet protocol (IP) addresses and subnet masks
- summarise antenna gain and polarisation
- outline cable loss
- explain calculation of effective isotropic radiated power (EIRP)
- explain calculation of line of site radio range
- explain decibels and related units
- outline network topologies
- describe radio frequency (RF) bands
- summarise routing protocols
- outline transmission control protocols(TCP)-IP describe wireless networking hardware, access points, wireless routers and gateway.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- sites on which configuring and installing wireless mesh network may be conducted
- technical documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN405 Install configuration programs on PC based customer equipment

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to install software on customer equipment, including digital home integration, security, voice over IP (VoIP), internet protocol television (IPTV), radio frequency identification (RFID), wireless networking and home automation.

It applies to individuals working as field officers, technicians or technical supervisors for telecommunications carriers, contractors or other service providers.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare to install software | 1.1 Arrange site access according to required procedure<br>1.2 Determine the type of customer equipment from the installation plan to prepare software requirements to provide required functionality<br>1.3 Prepare equipment software configuration specifications to |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | include enhancements in customer requirements and confirm with customer<br>1.4 Notify customers of proposed software installation<br>1.5 Confirm software compatibility with existing system if required<br>1.6 Document job software specification |
| 2. Install program and provide secure remote access | 2.1 Configure customer specific data according to system specifications<br>2.2 Install and test system functionality to verify system operational performance following work health and safety (WHS) regulations, manufacturer's specifications and industry standards<br>2.3 Develop and configure security arrangements and codes for remote access systems in consultation with customer<br>2.4 Conduct tests to validate security arrangements |
| 3. Undertake administrative tasks | 3.1 Save and record configuration program and provide program back-up for contingency use by customer<br>3.2 Complete administrative tasks and provide a copy of job specification to be securely stored on site following enterprise policy<br>3.3 Notify customer of job completion and obtain sign-off |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.2, 2.1, 3.2 | • Recognises and interprets technical and enterprise policy documentation to determine job requirements |
| Writing | 1.3, 1.4, 1.6, 2.3, 3.2, 3.3 | • Uses clear, specific and industry-related terminology to produce and update workplace documentation |
| Oral Communication | 1.3, 1.4, 3.3 | • Participates in an oral exchange with customers and technical staff on technical and operational matters |
| Numeracy | 1.3 | • Uses mathematical formulae to make calculations and take readings for necessary configuration changes |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Navigate the world of work | 2.2 | • Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements relevant to own work context |
| Interact with others | 1.3, 2.3 | • Selects and uses appropriate conventions and protocols when communicating with customers in a range of work contexts |
| Get the work done | 1.1-1.3, 1.5, 1.6, 2.2-2.4, 3.1, 3.2 | • Understands key principles and concepts underpinning design and operation of digital systems and tools, and applies these when troubleshooting existing technology and when seeking to understand the potential of new technology<br>• Determines job priorities, resources and equipment, and works logically and systematically to arrange site access and arrange equipment deliveries<br>• Implements actions according to a predetermined plan, making adjustments if necessary<br>• Takes responsibility for routine decision-making by selecting from a range of predetermined options in routine situations, identifying and taking some situational factors into account<br>• When dealing with complex issues, may use intuition to identify problems, switching to analytical processes to modify activities depending on operational contingencies |

# Assessment Requirements for ICTTEN405 Install configuration programs on PC based customer equipment

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- prepare software configuration
- load software into customer equipment
- install security programs agreed with customer
- test program and program features including:
  - system facilities
  - product features
  - required peripherals associated with the product
  - system functionality
- notify customer of progress and obtain sign off.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- define channel allocations
- outline common operating systems and their impact on the configuration of, or version of software to be installed
- explain internet protocol (IP) addressing
- describe logon procedures
- outline numbering formats
- describe product or service functions to ensure correct operation of completed installation
- explain relevant regulatory and industry requirements.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a suitable site for installation of system programs
- equipment currently used in industry
- relevant regulatory and enterprise documentation impacting testing and installation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN406 Effect changes to existing customer premises equipment systems and equipment

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to effect changes to existing customer premises' equipment (CPE), systems and products, through producing plans, carrying out alterations and testing new work.

It applies to individuals who may be working as linespeople, line installers and technicians for telecommunications carriers, contractors, other service providers or private providers who upgrade or modify customer equipment and systems.

No licensing, legislative or certification requirements apply to this unit at the time of publication

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare requirements for alteration | 1.1 Arrange site access according to required procedure and comply with site security arrangements and relevant legislation, codes, regulations and standards<br>1.2 Assess facilities and capacity to ensure requirements can be met<br>1.3 Evaluate existing system availability and access to accommodate |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | proposed changes<br>1.4 Notify appropriate personnel of identified safety hazards at worksite<br>1.5 Evaluate compatibility of existing and proposed systems and equipment before proceeding with planned changes<br>1.6 Negotiate planned system outages and outage time with the customer |
| 2. Document specifications and plans for alteration | 2.1 Produce an amendment plan of systems alterations to assess suitability with existing system<br>2.2 Produce specifications for alteration requirements according to customer requirements<br>2.3 Select materials and tools and equipment compatible with upgrade activity |
| 3. Install additional equipment and program system feature changes | 3.1 Produce an activity plan for minimal disruption of alterations to ongoing client activity<br>3.2 Carry out all alterations in a safe manner according to relevant standards and regulations and manufacturer's specifications<br>3.3 Test new work in isolation and when integrated with existing systems to confirm compatibility of alterations with existing network |
| 4. Update plans and records | 4.1 Update all plans and documents to show installed systems accurately and clearly<br>4.2 Complete documentation for customer support |
| 5. Restore site to required condition | 5.1 Remove waste and debris from worksite and dispose of according to environmental requirements to maintain safe worksite conditions<br>5.2 Recover obsolete equipment and return to customer or disposal of as agreed with customer<br>5.3 Notify customer of job completion and obtain sign-off |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

© Commonwealth of Australia, 2025 Future Skills Organisation

| Skill | Performance Criteria | Description |
|---|---|---|
| Writing | 2.1, 2.2, 3.1, 4.1, 4.2, 5.3 | • Completes workplace documentation accurately using appropriate form and vocabulary for intended audience |
| Oral Communication | 1.4, 5.3 | • Conveys specific messages efficiently and uses an appropriate tone and vocabulary for intended audience |
| Navigate the world of work | 1.1, 3.2, 5.1, 5.2 | • Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements relevant to own work context |
| Interact with others | 1.4, 1.6, 5.2 | • Selects appropriate form, channel and mode of communication when liaising with customers and personnel on technical and operational matters |
| Get the work done | 1.1, 1.3, 1.5, 2.1, 2.2, 3.1, 3.3 | • Prioritises and plans work to meet deadlines and client expectations<br>• Uses digital technologies and systems to complete required tasks |

# Assessment Requirements for ICTTEN406 Effect changes to existing customer premises equipment systems and equipment

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- identify customer's needs
- develop plans and drawings to give effect to planned changes to systems and equipment
- alter system and equipment including physical and programming change according to work health and safety (WHS) regulations and relevant standards
- identify, conduct and interpret tests appropriate to the change
- notify customer and relevant personnel of progress.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline legislation, codes of practice and other formal agreements that impact changes to customer equipment and systems
- identify manufacturer's requirements for safe operation of equipment
- define network addressing
- consider specific WHS requirements relating to customer premises' equipment
- establish types of customer premises' equipment (CPE) that may require upgrade
- describe typical issues and challenges that occur on site
- identify vendor products.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications network engineering field of work and include access to:

- systems and equipment to effect changes
- appropriate manuals and specifications
- relevant enterprise policies.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN407 Cut over customer premises equipment major upgrades

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to cut over major equipment and network upgrades in customer premises, and test and rectify problems.

It applies to individuals working at a supervisory level who may be in charge of installation and maintenance teams responsible for new installations and upgrades of telecommunications customer premises equipment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare for cut over | 1.1 Obtain relevant legislation, codes, regulations and standards for compliance when conducting work<br>1.2 Notify customer for site access, security arrangements and location details of customer equipment for major upgrade<br>1.3 Identify site hazards and notify appropriate personnel to make site safe |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.4 Prepare cut over plan and seek approval from customer<br>1.5 Complete functional testing of new systems and equipment prior to cut over to minimise system downtime<br>1.6 Notify network carrier of cut over details to prevent unnecessary alarm call-outs and reports<br>1.7 Organise system back-up with support personnel |
| 2. Cut over system and equipment into service | 2.1 Conduct cut over works for major system upgrade according to cut over plan with minimal disruption to customer service according to work health and safety (WHS) and environmental requirements<br>2.2 Conduct tests according to technical manuals and specifications to complete installation task<br>2.3 Analyse test results to verify system compatibility and interoperability with existing system<br>2.4 Rectify any problems, if required |
| 3. Finalise work and clean up worksite | 3.1 Complete documentation containing installation details and test records<br>3.2 Amend site records to show existing equipment layout<br>3.3 Organise customer training in the new or modified system<br>3.4 Clean up and restore site to customer satisfaction<br>3.5 Collect and dispose of waste material and debris according to environmental requirements<br>3.6 Notify customer of job completion to obtain sign-off and present with a copy of documentation |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Writing | 1.4, 3.1, 3.2, 3.6 | • Completes workplace documentation accurately using appropriate form and vocabulary for intended audience |
| Oral Communication | 1.2, 1.3, 1.6, 3.6 | • Conveys specific messages efficiently and uses an appropriate tone and vocabulary for intended audience |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Numeracy | 2.3 | • Interprets numerical information to assist decision-making |
| Navigate the world of work | 1.1-1.3, 2.1, 2.2, 3.4, 3.5 | • Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements relevant to own work context |
| Interact with others | 1.4, 1.7, 3.3 | • Selects appropriate form, channel and mode of communication when liaising with customers and personnel on technical and operational matters |
| Get the work done | 1.4, 1.5, 1.7, 2.1, 2.2, 2.4, 3.3 | • Considers a range of complex factors when planning and completing tasks to ensure work is completed accurately and safely<br>• Applies problem-solving processes to determine solutions for less predictable problems<br>• Recognises and anticipates a range of problems, actively looking for early warning signs and implementing contingency plans when appropriate<br>• Uses digital technologies and systems to complete required tasks |

# Assessment Requirements for ICTTEN407 Cut over customer premises equipment major upgrades

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- develop and implement an effective cut over plan
- identify and organise resources including customer resources and access as necessary to complete cut over
- conduct cut over and relevant tests according to work health and safety (WHS) and environmental requirements
- interpret test results to identify and resolve problems
- finalise administrative tasks and initiate training.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline cut over procedures
- define customer premises' equipment CPE
- illustrate features and operating requirements of test equipment
- outline information required to operate equipment according to a test specification
- outline legislation, codes of practice and other formal agreements that impact the work activity
- explain manufacturer's requirements for safe operation of equipment
- describe specific work health and safety (WHS) requirements relating to activity and site conditions
- explain test methods and performance requirements
- describe typical issues and challenges that occur on site.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications network engineering field of work and include access to:

- a site where cut over can be conducted
- plant, tools and equipment currently used in the industry
- relevant regulatory and equipment documentation impacting work activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN408 Complete equipment and software upgrades

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to upgrade telecommunications equipment and software in service provider networks and customer premises, and may apply to switching, transmission, radio, and computer networks using cable, optical fibre, radio, microwave and satellite transmission.

It applies to individuals who supervise installation and maintenance teams involved in new installations or maintenance, upgrades and cut overs of emerging technologies in IP-based telecommunications networks.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare for upgrade activity | 1.1 Obtain relevant legislation, codes, regulations and standards for compliance when conducting work<br>1.2 Contact customer for site access, security arrangements and location details of equipment for upgrade<br>1.3 Identify site hazards and notify appropriate personnel to make |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | site safe<br>1.4 Prepare an upgrade plan against work order and seek approval from customer<br>1.5 Organise system back-up from support personnel<br>1.6 Obtain tools and test equipment and check for accuracy and safety<br>1.7 Allocate specific tasks according to the skill mix of staff involved<br>1.8 Run test plan on current equipment and identify and rectify problems in consultation with planners<br>1.9 Complete functional testing of new systems and equipment prior to upgrade to minimise system downtime<br>1.10 Analyse test results to predict compatibility and interoperability issues of equipment and systems prior to the upgrade work |
| 2. Undertake upgrade | 2.1 Implement upgrade according to design specification, following work health and safety (WHS) and environmental requirements<br>2.2 Follow procedures for upgrade of network in sequential order as defined in instruction manuals<br>2.3 Monitor progress of upgrade periodically to ensure plans in relation to time and duration are being met<br>2.4 Notify planner of problems encountered with detail of the impact on the upgrade plan<br>2.5 Abort upgrade and implement contingency plan if upgrade plan cannot be realised without major disruption to network<br>2.6 Monitor system response during upgrade and take action according to instructions provided |
| 3. Test upgrade for acceptance | 3.1 Undertake tests according to predetermined test plan<br>3.2 Analyse test results and verify against specified performance levels<br>3.3 Escalate problems encountered according to enterprise policy<br>3.4 Invoke reversion procedure to pre-upgrade state, if directed by planners, according to enterprise policy<br>3.5 Record upgrade test results and provide to network management group<br>3.6 Run post-upgrade routines according to documented |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | procedures |
| 4. Monitor post-upgrade performance | 4.1 Conduct ongoing tests to ensure success of upgrade<br>4.2 Monitor relevant alarms to measure impact of upgrade<br>4.3 Review customer complaints to assess impact of upgrade on customer satisfaction |
| 5. Finalise administrative work and clean up worksite | 5.1 Complete relevant work documentation and administrative tasks according to enterprise policy<br>5.2 Amend site records to show upgraded equipment layout<br>5.3 Organise customer training in the new or modified system<br>5.4 Clean up and restore site to customer satisfaction<br>5.5 Collect and dispose of waste material and debris according to environmental requirements<br>5.6 Declare asset ready for use<br>5.7 Notify customer of upgrade job completion to obtain sign-off of work order and present with a copy of documentation |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 2.1, 2.2, 2.6, 4.3 | • Interprets and analyses complex technical information |
| Writing | 1.4, 3.5, 5.1, 5.2, 5.7 | • Employs appropriate vocabulary and tone to convey specific information to different audiences |
| Oral Communication | 1.2, 2.4, 5.7 | • Conveys specific messages efficiently and uses an appropriate tone and vocabulary for intended audience |
| Numeracy | 1.10, 3.2, 3.5 | • Performs calculations to analyse data and records results in required format |
| Navigate the world of work | 1.1-1.3, 1.5, 1.6, 2.1, 2.2, 3.3, 3.4, 3.6, 5.1, 5.4, 5.5 | • Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements relevant to own work context |
| Interact with | 1.4, 1.5, 1.7, 1.8, | • Selects appropriate form, channel and mode of |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| others | 2.4, 5.4 | communication when liaising with customers and personnel on technical and operational matters |
| Get the work done | 1.7-1.10, 2.3, 2.5, 2.6, 3.1-3.6, 4.1, 4.2, 5.3, 5.6 | • Organises, plans and sequences own workload and schedules work activities of others<br>• Applies problem-solving processes and reviews impact to ensure solutions or contingency plans are effective<br>• Uses digital technologies and systems to complete work tasks |

# Assessment Requirements for ICTTEN408 Complete equipment and software upgrades

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- analyse implications of hardware and software upgrade on remainder of the network
- identify components of the upgrade process
- prepare an upgrade plan and organise system back-up
- run test plan and analyse test results
- implement upgrade according to work health and safety requirements
- monitor progress of upgrade periodically using both vendor- and enterprise-specific monitoring tools
- implement contingency plan when required, and analyse alarms and alarm conditions
- escalate unresolved problems and review customer complaints to assess impact of upgrade
- make necessary arrangements with the customer for site access and training.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain alarms used to monitor operation of computer software systems
- explain use of back-up systems
- illustrate common upgrades and post-upgrade routines
- describe escalation and outage procedures
- investigate network management systems
- outline telecommunications networks and equipment
- identify telecommunications monitoring tools
- describe telecommunications test equipment and test set-ups
- describe telecommunications wiring practices.

© Commonwealth of Australia, 2025 Future Skills Organisation

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a site where upgrade may be conducted
- equipment, software, test and monitoring equipment currently used in industry
- relevant regulatory, equipment, enterprise and vendor documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN409 Commission an electronic system

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to commission an electronic system with applications, including cellular telemetry, voice over IP (VoIP), radio frequency identification (RFID), supervisory control and data acquisition (SCADA) networks and SCADA security, telephony, data, video, IP television (IPTV) and multimedia.

It applies to individuals who may work as field officers and technicians employed by telecommunications carriers, service providers or contractors.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare to commission electronic system | 1.1 Prepare for work following work health and safety (WHS) requirements<br>1.2 Organise resources based on existing and potential site hazards<br>1.3 Contact customer or network operations personnel for site access and network specifications<br>1.4 Determine function and requirements of electronic system from |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | specifications<br>1.5 Identify potential security threats and vulnerability where remote monitoring and control via public telecommunications network or internet are used, and report to appropriate personnel<br>1.6 Verify installed electronic system and associated cabling conform to specifications, and assess compatibility of system units<br>1.7 Establish commissioning dates with all parties and establish planned outage<br>1.8 Check suitability and calibration status of test equipment<br>1.9 Produce a preliminary commissioning plan according to manufacturer's instructions and enterprise guidelines for discussion with the customer |
| 2. Organise planned outages | 2.1 Negotiate outage times with appropriate groups and affected customers to minimise disruptions<br>2.2 Arrange for emergency communications based on contingency plans<br>2.3 Notify alarm management centre of planned action<br>2.4 Obtain authority to proceed from relevant control centre and notify customers affected by the outage |
| 3. Perform commissioning procedures | 3.1 Configure electronic system parameters and install software according to manufacturer’s specifications and customer requirements<br>3.2 Conduct tests according to manufacturer’s specifications and industry practice<br>3.3 Conduct cut over according to project design and industry practice in consultation with appropriate personnel<br>3.4 Conduct a security audit, including remote threat analysis in applications where the public telecommunications network or internet is linked to the overall electronic system |
| 4. Finalise commissioning | 4.1 Record configuration information and update relevant databases according to enterprise and network guidelines<br>4.2 Notify appropriate person of commissioning results and work completion<br>4.3 Complete administrative tasks according to industry practice and enterprise guidelines |

© Commonwealth of Australia, 2025 Future Skills Organisation

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.4 | • Interprets complex information to determine job requirements |
| Writing | 1.9, 4.1 | • Completes technical workplace documentation using vocabulary and form appropriate to intended audience |
| Navigate the world of work | 1.1, 1.5-1.7, 4.1, 4.3 | • Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements relevant to own work context |
| Interact with others | 1.3, 1.5, 1.6, 2.1, 2.3, 2.4, 4.2 | • Collaborates and negotiates with others to achieve specific goals<br>• Selects appropriate form, channel and mode of communication when liaising with customers and personnel on technical and operational matters |
| Get the work done | 1.2, 1.4, 1.7, 1.8, 1.9, 2.2, 3.1-3.4 | • Considers a range of complex factors when completing set tasks to ensure work is completed accurately and safely<br>• Recognises and anticipates a range of problems, actively looking for early warning signs and implementing contingency plans when appropriate<br>• Uses digital technologies and systems to complete required tasks |

# Assessment Requirements for ICTTEN409 Commission an electronic system

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- effectively negotiate arrangements for commissioning
- accurately configure electronic equipment and system parameters
- commission electronic system according to specifications and following work health and safety (WHS) requirements
- deal with faults and problems and provide solutions
- identify potential security threats and vulnerability.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain acceptance testing
- formulate a commissioning procedure and commissioning tests for an electronic system
- identify electrical and optical properties to be measured
- evaluate an extensive range of networking equipment
- outline legislation and licensing associated with installation of telecommunications equipment
- outline network operation procedures
- explain power requirements and electrical safety
- explain setup and operation of test equipment applicable to a wide range of measurements
- outline transmission type and signals that may be encountered.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- sites on which installation and commissioning procedures may be conducted
- relevant regulatory and equipment documentation
- testing equipment currently used in industry.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN410 Locate, diagnose and rectify faults

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to locate, diagnose and rectify faults in telecommunications networks.

It applies to individuals who may work as telecommunications officers, communications cablers, or installers of customer premises' equipment, for optical and radio frequency (RF) equipment, multimedia and IP networks.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Plan to locate and rectify fault | 1.1 Prepare for given work according to relevant legislation, work health and safety (WHS) regulations, codes, standards and identified hazards<br>1.2 Arrange site access according to required procedure<br>1.3 Obtain information on the nature of fault from the customer<br>1.4 Obtain suitable testing tools and equipment and specify personal |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | protective equipment<br>1.5 Conduct fault-finding using methodical and safe practices suitable for system and problem type |
| 2. Locate and diagnose fault | 2.1 Conduct appropriate test to identify type of fault<br>2.2 Isolate fault progressively to remove likely variables from assessment<br>2.3 Locate fault without undue interruptions to customer activity, in the shortest possible time<br>2.4 Notify customer of findings |
| 3. Rectify fault | 3.1 Determine options to rectify fault, and present options to customer<br>3.2 Advise customer of costs of any repair not covered by service agreement<br>3.3 Rectify fault if in agreement with client<br>3.4 Conduct work in a manner which is safe for repairer and customer<br>3.5 Refer any unresolved faults to other parties for resolution or escalation if required |
| 4. Complete documentation and clean up worksite | 4.1 Advise customer of successful fault clearance and secure sign-off<br>4.2 Complete all records<br>4.3 Complete reports to justify fault diagnosis and rectification methodology, if required<br>4.4 Remove all waste and debris from worksite and dispose of them according to environmental requirements<br>4.5 Restore any changes made to worksite during fault repair to the customers satisfaction |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Writing | 4.1, 4.2, 4.3 | • Completes technical workplace documentation using appropriate language and form to meet specific purpose |
| Oral Communication | 1.3, 2.4, 3.2 | • Articulates specific requirements clearly and checks understanding<br>• Uses questioning and active listening to obtain required information |
| Numeracy | 2.1 | • Interprets numerical data from network tests |
| Navigate the world of work | 1.1, 1.2, 3.4, 4.4, 4.5 | • Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements relevant to own work context |
| Interact with others | 1.3, 3.1, 3.3, 3.5, 4.1 | • Selects appropriate form, channel and mode of communication when liaising with customers and personnel on technical and operational matters |
| Get the work done | 1.2, 1.4, 1.5, 2.1, 2.2, 2.3, 3.1, 3.3 | • Plans and implements tasks in line with organisational expectations, legislative requirements and work role<br>• Recognises and anticipates a range of problems, actively looking for early warning signs and implementing contingency plans when appropriate<br>• Uses digital technologies and systems to complete required tasks |

# Assessment Requirements for ICTTEN410 Locate, diagnose and rectify faults

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- effectively identify different faults
- establish context and background information, and determine and rank likely causes of fault
- obtain suitable tools and equipment and apply simple checks, tests and fault-finding methodology
- apply recommended means to rectify fault
- comply with all related work health and safety (WHS) requirements and work practices
- ensure customer and relevant personnel are informed of progress.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- evaluate various fault-finding techniques for different networking situations
- specify and evaluate test equipment used for fault finding
- specify safety standards required when testing different types of systems
- outline common network faults and their rectification
- explain the value of specific regulatory and other documentation required when testing and reporting on test results.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- an appropriate site
- test and related equipment currently used in industry
- relevant technical specifications and requirements
- regulatory and site-related documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN411 Monitor, analyse and action telecommunications network alarms

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to diagnose problems, restore a network, normalise an alarm system and examine the impact on a network.

It applies to individuals who are proficient communicators, excellent trouble-shooters and who have a clear understanding of network alarm systems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Plan response to network alarm | 1.1 Determine alarm severity and specific network elements affected from presentation of alarm<br>1.2 Assess likely impact to client and network of the alarm<br>1.3 Notify the network operating centre (NOC) and other relevant parties of alarm condition<br>1.4 Prioritise actioning of alarms according to existing service level |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | agreement obligations and enterprise policy<br>1.5 Assess impact of any outage issues and major customers affected<br>1.6 Provide information to and seek advice from other relevant parties in identifying the problem and cause of the alarm condition<br>1.7 Diagnose likely cause of alarm condition using established methodical strategies<br>1.8 Escalate diagnosis to higher level fault clearance unit according to enterprise policy where necessary |
| 2. Arrange rectification of network problem | 2.1 Implement enterprise policy relating to outages as required<br>2.2 Rectify network problems when appropriate capability and time constraints can be met<br>2.3 Enact escalation procedures according to enterprise policy<br>2.4 Make all alarm data and diagnosis available to other areas with responsibility and jurisdiction for network restoration<br>2.5 Provide clear and concise instructions to field staff to facilitate all repair efforts<br>2.6 Monitor progress of the network repair effort<br>2.7 Apply enterprise policy in relation to alarms requiring no further action |
| 3. Complete alarm clearance tasks | 3.1 Reset alarms following network restoration<br>3.2 Notify all relevant parties of problem rectification<br>3.3 Undertake appropriate cause and effect studies to prevent re-occurrence of problem<br>3.4 Complete administrative tasks and recommend any changes required by the enterprise quality assurance system |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.4, 1.8, 2.1, 2.3, | • Recognises and interprets complex technical data and procedures to determine job requirements |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| | 2.7, 3.4 | |
| Writing | 1.3, 2.5, 3.2, 3.4 | • Uses clear, specific and industry-related terminology to produce and update workplace documentation |
| Oral Communication | 1.3, 2.5, 3.2 | • Articulates requirements clearly and concisely to provide advice and guidance to others and to liaise with technical personnel working across different levels and in different contexts<br>• Uses well-developed listening and questioning techniques to confirm understanding |
| Numeracy | 1.1 | • Uses mathematical formulae to interpret numerical data |
| Interact with others | 1.6, 2.4 | • Actively identifies requirements of important communication exchanges, selecting appropriate channels, format, tone and content to suit purpose and audience |
| Get the work done | 1.1, 1.2, 1.4, 1.5, 1.7, 1.8, 2.1, 2.2, 2.6, 3.1, 3.3, 3.4 | • Understands key principles and concepts underpinning the design and operation of digital systems and tools, and applies these when troubleshooting existing technology and when seeking to understand the potential of new technology<br>• Works logically and systematically to monitor, analyse and action job priorities<br>• Implements actions according to a predetermined plan, making adjustments if necessary<br>• Makes decisions quickly and intuitively in familiar situations requiring immediate attention, drawing on past experience to identify key variables and determine the best course of action<br>• Uses analytical processes to decide on a course of action, establishing criteria for deciding between options and seeking input and advice from others when necessary |

# Assessment Requirements for ICTTEN411 Monitor, analyse and action telecommunications network alarms

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- monitor and analyse a range of network alarms including use of fault history and ranking of likely causes
- ensure customers and relevant personnel are appropriately notified of network status
- undertake and monitor network repairs
- plan and coordinate actioning of network alarms.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- define purpose of escalation policies and procedures for network alarm systems
- describe installed telecommunications systems and equipment
- explain principles and use of path protection
- outline key components of a telecommunications network
- evaluate commonly used test equipment and test procedures
- outline typical problems and challenges that arise in Network Operations Centres (NOCs) and in the field
- describe typical systems and procedures for monitoring alarms.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

© Commonwealth of Australia, 2025 Future Skills Organisation

- sites on which local and remote monitoring and analysis of network alarms may be conducted
- manufacturer's technical documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN412 Undertake routine maintenance of the telecommunications network

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to perform routine maintenance of network plant and equipment in various telecommunications switching and transmission environments, including wide area networks (WAN), virtual private networks (VPN) and core networks, using wireless, optical, broadband and Next Generation Networking (NGN) technologies.

It applies to individuals working as field officers or technicians from carriers, contractors and other service providers.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Plan routine maintenance | 1.1 Obtain relevant legislation, codes, regulations and standards for the given work<br>1.2 Determine network elements requiring maintenance, and maintenance details from manufacturer's equipment manual |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.3 Notify the Network Operations Centre (NOC) of proposed maintenance schedule and maintenance details to minimise disruption to the network<br>1.4 Assess potential impact of proposed maintenance on customers and network, and plan for possible outage or deferral of maintenance<br>1.5 Obtain necessary tools, test equipment and resources to undertake maintenance<br>1.6 Produce a written schedule of planned routine maintenance<br>1.7 Negotiate schedules and access with the customer, and find out where equipment to be maintained is located on customer premises<br>1.8 Ascertain and record network stability to determine network performance |
| 2. Undertake planned maintenance | 2.1 Conduct routine maintenance tasks following work health and safety (WHS) and environmental requirements, and record results<br>2.2 Escalate unresolved faults according to established enterprise procedure<br>2.3 Test network equipment for required performance following routine maintenance<br>2.4 Check operation of associated network equipment to ensure the maintenance did not generate other faults or alarms |
| 3. Report on routine maintenance and document results | 3.1 Notify all relevant parties of results of the routine maintenance<br>3.2 Update routine maintenance logs and record other additional work for inclusion in the next cycle of maintenance<br>3.3 Complete administrative tasks and recommend any changes as required by the enterprise quality assurance system<br>3.4 Notify NOC of job completion and obtain sign-off |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.2, 2.2, 3.3 | • Recognises and interprets plans, specifications, complex technical data and procedures to determine |

# Assessment Requirements for ICTTEN412 Undertake routine maintenance of the telecommunications network

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- plan a detailed routine maintenance schedule
- conduct and record routine maintenance activities procedures and techniques
- test network equipment and analyse results
- carry out works in compliance with site risk controls, work health and safety (WHS), environmental, quality and communication requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe computer systems required to facilitate a routine maintenance check of a telecommunications network
- explain the operation of network alarm systems
- describe the function and purpose of network management systems
- outline key components of a telecommunications network equipment and architecture, and their function including:
  - switching
  - mobile communications
  - satellite
  - transmission
  - antennas
  - radio frequency
  - basic telephony

© Commonwealth of Australia, 2025 Future Skills Organisation

- identify and specify telecommunications test equipment, test configurations, and analysis of results for a range of telecommunications network problems
- describe WHS risks associated with routine maintenance tasks
- explain telecommunications wiring practices
- explain the use of a scheduler
- describe the importance of customer relations when dealing with clients, in particular, obligations and expectations of the technician
- describe the operation, application and characteristics of digital logic integrated circuits and installation packages
- outline the importance of enterprise policies and procedures for:
  - escalation of issues
  - enterprise information systems

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- sites on which routine maintenance may be conducted
- maintenance tools and test instruments currently used in industry
- relevant regulatory and equipment documentation impacting maintenance activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN413 Undertake remote diagnosis and repair of network faults

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to undertake fault diagnostic and repair strategies for working with remote network equipment.

It applies to individuals working as field technicians, remotely accessing the network and the Network Operation Centre (NOC) which controls the coordination of remote network activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Diagnose remote faults | 1.1 Install remote access software on notebook computers<br>1.2 Verify network fault by analysing relevant data<br>1.3 Investigate context and background information relevant to the network fault<br>1.4 Source appropriate documentation and test equipment relevant to |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | the network fault<br>1.5 Conduct appropriate tests and analyse results<br>1.6 Diagnose network faults using established methodical strategies in a timely fashion without disruption to other services |
| 2. Plan remote repair | 2.1 Assess involvement level of the NOC in planning the repair<br>2.2 Plan for any necessary outages and notify customers<br>2.3 Develop repair strategies to clear fault<br>2.4 Develop a strategy for rerouting customer traffic if applicable<br>2.5 Advise on-site personnel of required work and clearly communicate the repair strategy |
| 3. Repair fault | 3.1 Initiate remote repair strategies to reconfigure or repair remote equipment in a manner safe to self, fellow workers, network equipment and public<br>3.2 Inform customers of repair progress where fault has caused degradation of service or outage<br>3.3 Escalate unresolved faults according to established enterprise procedure<br>3.4 Test remote repair for required performance<br>3.5 Assess ongoing network performance and the likelihood of further problems |
| 4. Report remote diagnosis and repair and document results | 4.1 Notify all relevant parties of results of remote diagnosis and repair<br>4.2 Record details relating to any outage according to enterprise procedures<br>4.3 Complete all relevant documentation and recommend any changes required by the enterprise quality assurance system |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Reading | 1.2, 1.3, 3.3, 4.2, 4.3 | • Recognises and interprets complex technical data, procedures, equipment, system manuals and specifications |
| Writing | 2.2-2.5, 3.2, 4.1-4.3 | • Uses clear, specific and industry-related terminology to produce and update workplace documentation and make recommendations |
| Oral Communication | 2.2, 2.5, 3.2, 4.1 | • Articulates clearly and concisely to provide advice and guidance to technical personnel working across different levels and in different contexts<br>• Uses well-developed listening and questioning techniques to confirm understanding |
| Numeracy | 1.2, 1.5 | • Interprets a wide variety of numerical readings and data |
| Navigate the world of work | 3.1, 3.3, 4.2 | • Takes personal responsibility for adherence to legal and regulatory responsibilities, and enterprise policies and procedures relevant to own work<br>• Alerts others of issues that may affect self or others, with specific reference to safety |
| Interact with others | 2.2, 3.2, 4.1 | • Selects and uses appropriate conventions and protocols when communicating with customers and technical staff in a range of work contexts |
| Get the work done | 1.1, 1.3-1.6, 2.1-2.3, 3.1, 3.3-3.5, 4.3 | • Understands key principles and concepts underpinning design and operation of digital systems and tools, and applies these when troubleshooting existing technology<br>• Works logically and systematically to monitor, analyse and action job priorities<br>• Implements actions according to a predetermined plan, making adjustments if necessary<br>• Makes decisions quickly and intuitively in familiar situations requiring immediate attention, drawing on past experience to identify key variables and determine the best course of action<br>• Uses analytical processes to decide on a course of action, establishing criteria for deciding between options and seeking input and advice from others when escalating difficulties |

# Assessment Requirements for ICTTEN413 Undertake remote diagnosis and repair of network faults

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- communicate effectively with relevant parties, using appropriate technical and non-technical language
- diagnose and identify faults, including using fault history and ranking likely causes
- plan and coordinate repair of network faults
- apply enterprise escalation and outage procedures following related work health and safety (WHS) requirements and work practices
- ensure customers and others are kept notified of works progress.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe telecommunications systems and equipment and technologies likely to be encountered in remote networks
- explain principles and use of path protection
- outline key components of a telecommunications network
- describe test equipment and test procedures required for determining network faults
- evaluate test results and specify solutions
- explain typical problems and challenges that arise in Network Operations Centres (NOCs) and in the field.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- sites on which remote diagnosis and repair of network may be conducted
- test equipment currently used in industry
- manufacturer's technical documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN414 Repair telecommunication system faults

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to examine a customer report or a maintenance schedule, and diagnose faults which may be in optical, computer, radio, satellite, security or radio frequency identification (RFID) systems found in customer and service provider access networks.

It applies to individuals working as field officers, technicians or technical supervisors from carriers, contractors or other service providers.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare for equipment repairs | 1.1 Obtain relevant legislation, codes, regulations and compliance standards for conducting work<br>1.2 Identify hazards, make worksite safe according to relevant safety legislation and company work practices and use personal protective equipment<br>1.3 Notify customer and other appropriate personnel of work, and |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | arrange for site access and security where required<br>1.4 Obtain fault details to determine type of system fault<br>1.5 Determine the type of repair required according to enterprise guidelines, site requirements and type of equipment, and arrange for additional technical support as appropriate<br>1.6 Confirm if warranties and service agreements covering identified repairs exist<br>1.7 Obtain tools and necessary hardware and ensure replacement parts and material is delivered to the worksite at the required time |
| 2. Repair fault | 2.1 Follow work health and safety (WHS) and environmental requirements when carrying out repair or replacement tasks<br>2.2 Notify appropriate personnel of service disruption and remove network equipment from service<br>2.3 Diagnose the fault and carry out repair work on equipment according to manufacturer's or enterprise procedures<br>2.4 Test equipment to manufacturer's specifications following repairs and return to live operation for testing overall performance |
| 3. Complete repair work documentation and administrative tasks | 3.1 Notify customer and other appropriate personnel of completion of repair work according to enterprise guidelines<br>3.2 Record any changes to equipment and store according to enterprise guidelines<br>3.3 Dispose of waste and debris from worksite according to environmental requirements and enterprise guidelines<br>3.4 Complete administrative tasks and make recommendations for improvements under quality assurance system |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.5, 1.6, 2.3, 3.1, 3.3, 3.4 | • Recognises and interprets complex technical documentation and standards to determine job requirements |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Writing | 1.3, 2.2, 3.1, 3.2, 3.4 | • Uses clear, specific and industry-related terminology to produce and update workplace documentation |
| Oral Communication | 1.3, 2.2, 3.1 | • Provides information using language appropriate to audience and context<br>• Uses well-developed listening and questioning techniques to confirm understanding |
| Numeracy | 1.5 | • Uses mathematical formulae to interpret numerical data including equipment specifications |
| Navigate the world of work | 1.2, 2.1, 3.3 | • Takes personal responsibility for adherence to legal and regulatory responsibilities relevant to own work context |
| Interact with others | 1.3, 2.2, 3.1 | • Selects and uses appropriate conventions and protocols when communicating with customers and technical staff in a range of work contexts |
| Get the work done | 1.1, 1.3-1.5, 1.7, 2.3, 2.4 | • Understands key principles and concepts underpinning design and operation of digital systems and tools, and applies these when troubleshooting existing technology<br>• Works logically and systematically to monitor, analyse and action job priorities<br>• Implements actions according to a predetermined plan, making adjustments if necessary<br>• Makes decisions quickly and intuitively in familiar situations requiring immediate attention, drawing on past experience to identify key variables and determine the best course of action<br>• Initiates standard procedures when responding to familiar problems within immediate context |

# Assessment Requirements for ICTTEN414 Repair telecommunication system faults

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- communicate effectively with customers and other personnel, using appropriate technical and non-technical language to ensure understanding
- diagnose and identify faults methodically, using fault history and recognition of likely causes
- repair telecommunication equipment according to manufacturer's or enterprise procedures, applying related work health and safety (WHS) requirements and work practices
- test equipment following repairs and put back into commission
- communicate with personnel and customers during and upon completion of works.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe anti-static procedures required to protect equipment under repair
- outline enterprise policies and procedures
- summarise fault diagnosis techniques
- describe general fault-finding techniques and test equipment
- outline work health and safety (WHS) requirements and work practices
- identify commonly used and emerging products
- explain safety requirements and standards
- summarise telecommunications network and equipment fault types and rectification
- describe telecommunications network and equipment types
- provide a detailed explanation of test equipment.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- sites on which diagnosis and repair of communication equipment may be conducted
- test equipment currently used in industry
- manufacturer's technical documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN415 Install and configure internet protocol TV in a home network

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to arrange a secure internet protocol (IP) network for a customer.

It applies to individuals who install Next Generation Networks (NGNs). These IP networks provide fast internet, voice over internet protocol (VoIP), IPTV and internet TV services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare to implement IPTV in a home network | 1.1 Obtain and clarify work health and safety (WHS) requirements and risk control measures and procedures for a given work area, with appropriate personnel<br>1.2 Evaluate existing customer home network equipment for operational status |
| 2. Design IPTV integration to a home | 2.1 Prepare a configuration layout integrating IPTV to existing customer network using IPTV network elements to provide optimum |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| network to meet customer requirements | video delivery service<br>2.2 Select IPTV network elements to provide optimum video delivery service<br>2.3 Obtain configuration instructions for network elements<br>2.4 Design connection plan to integrate customer network elements and optimise system performance<br>2.5 Identify any connection problems and amend design plan |
| 3. Implement IPTV design plan to a home network | 3.1 Interconnect network elements according to design plan using manufacturer's instructions and IP addressing schemes<br>3.2 Configure and test network elements to provide integrated IPTV to the existing system<br>3.3 Provide a free-to-air (FTA) connection over digital video broadcasting – terrestrial (DVB-T) to complement the IPTV service<br>3.4 Set up customer specific operations as required<br>3.5 Configure security measures in an IPTV network to protect against security threats<br>3.6 Troubleshoot home network according to manufacturer's specifications and escalate unresolvable items to the service provider |
| 4. Complete and document network installation | 4.1 Restore worksite to safe condition, according to established safety procedures<br>4.2 Record and store essential installation information<br>4.3 Notify appropriate personnel of completion of the task and obtain sign-off |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 3.1 | • Recognises and interprets complex technical specifications and related information |
| Writing | 1.1, 2.4, 2.5, 4.2, 4.3 | • Uses clear, specific and industry-related terminology to produce plans and update workplace documentation |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Oral Communication | 4.3 | • Articulates clearly and concisely to provide advice and guidance to customers and personnel<br>• Uses well-developed listening and questioning techniques to confirm understanding |
| Navigate the world of work | 1.1, 4.1 | • Takes personal responsibility for adherence to organisational procedures and protocols, and legal and regulatory responsibilities relevant to own work |
| Get the work done | 1.1, 1.2, 2.1-2.3, 2.5, 3.1-3.6 | • Understands key principles and concepts underpinning design and operation of digital systems and tools, and applies these when troubleshooting existing technology<br>• Works logically and systematically to monitor, analyse and action job priorities<br>• Implements actions according to a predetermined plan, making adjustments if necessary<br>• Makes decisions quickly and intuitively in familiar situations requiring immediate attention, drawing on past experience to identify key variables and determine the best course of action<br>• Uses analytical processes to resolve a predictable range of network problems, establishing criteria for deciding between options and seeking input and advice from others when escalating difficulties |

# Assessment Requirements for ICTTEN415 Install and configure internet protocol TV in a home network

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- create and follow implementation plans for internet protocol television (IPTV)
- install relevant network hardware and software
- configure and test IPTV network according to specified guidelines
- integrate IPTV to existing network
- produce appropriate documentation
- implement secure network.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain competing video delivery over broadband networks
- outline current industry-accepted hardware and software products
- summarise IPTV configurations
- clarify IPTV protocols and encoding techniques
- summarise networking technologies, incorporating substantial depth in network operating systems and IP networks
- outline transmission technologies and protocols
- summarise video compression formats
- describe the common issue that affects home network performance.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a site where installation and configuration of an IPTV network may be conducted
- equipment currently used in industry
- information on different protocols
- relevant technical information, legislative requirements and other site and project-related documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN416 Install, configure and test an internet protocol network

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to select network elements to meet client business specifications, ensure interoperability within the network, apply network topologies, protocols and security issues, and troubleshoot when required.

It applies to individuals who carry out installation, maintenance and upgrade of information and communications technology (ICT) networks, and are employed by telecommunications or information technology networking provisioning companies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare to install IP network | 1.1 Prepare for given work according to relevant legislation, work health and safety (WHS) regulations, codes and standards<br>1.2 Arrange site access according to required procedure<br>1.3 Review existing network design documentation to ensure it is current and complete |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.4 Select components and network elements required to be installed to meet the technical requirements<br>1.5 Contact vendors and service suppliers to obtain specifications and availability of identified components<br>1.6 Develop plans, with prioritised tasks and contingency arrangements, for installation of components with minimum disruption to client<br>1.7 Liaise with appropriate person to obtain approval for the plans, including security clearance and timing |
| 2. Install and configure IP network | 2.1 Install and configure server hardware and software according to organisational and industry standards, following plans<br>2.2 Install and configure computer, other hardware and software, according to organisational and industry standards and plans<br>2.3 Install and configure other software required for the network to operate with security and integrity according to the plan |
| 3. Test and reconfigure IP network | 3.1 Test installed software and hardware, utilising available technical tools, to ensure all components are functioning as expected<br>3.2 Test the network to ensure it is functioning according to specifications<br>3.3 Resolve problems identified in the modified network |
| 4. Complete documentation and clean worksite | 4.1 Complete hardware and asset recording document in line with organisational requirements<br>4.2 Document installation, boot-up and configuration procedures according to organisational requirements<br>4.3 Tabulate test results and complete all user reports<br>4.4 Complete client report and notify of network status<br>4.5 Clean up and restore worksite to client's satisfaction<br>4.6 Secure sign-off from appropriate person |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance | Description |
|---|---|---|

© Commonwealth of Australia, 2025 Future Skills Organisation

| | **Criteria** | |
|---|---|---|
| Reading | 1.1-1.3, 2.1-2.3, 3.2, 4.1, 4.2 | • Recognises and interprets technical, legislative and operational documentation to determine job requirements |
| Writing | 1.5-1.7, 4.1-4.4 | • Uses clear, specific and industry-related terminology to produce and update workplace documentation in predetermined formats |
| Oral Communication | 1.5, 1.7, 4.4 | • Clearly liaises with internal and external personnel on technical, operational and business related matters<br>• Uses listening and questioning skills to confirm understanding for requirements |
| Numeracy | 3.1-3.3 | • Makes calculations required to take test measurements, interpret results and evaluate performance and interoperability of network |
| Navigate the world of work | 1.1, 4.5 | • Takes personal responsibility for adherence to legal and regulatory responsibilities relevant to own work context<br>• Recognises and follows explicit and implicit protocols and meets expectations associated with own role |
| Interact with others | 4.5, 4.6 | • Cooperates with others as part of familiar routine activities and contributes to specific activities requiring joint responsibility and accountability |
| Get the work done | 1.2, 1.4, 1.6, 2.1-2.3, 3.1-3.3, 4.5 | • Understands key principles and concepts underpinning design and operation of digital systems and tools, and applies these as required<br>• Works logically and systematically to monitor, analyse and action job priorities<br>• Implements actions according to a predetermined plan, making adjustments if necessary<br>• Makes decisions quickly and intuitively in familiar situations requiring immediate attention, drawing on past experience to identify key variables and determine the best course of action<br>• Recognises and anticipates an increasing range of familiar problems, their symptoms and causes, depending on differing operational contingencies, risk situations and environments |

# Assessment Requirements for ICTTEN416 Install, configure and test an internet protocol network

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- plan and prepare for the IP network installation task
- select network elements to meet client's business specifications
- install, configure and test network elements to ensure interoperability within the network
- apply network topologies, protocols and security issues
- apply solutions to defined network problems.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain client's business domain, business function and organisation
- describe current industry-accepted hardware and software products
- outline data and voice transmission technologies and protocols
- summarise networking technologies, incorporating substantial depth in some areas
- explain router-based network architectures.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a site where network installation may be conducted
- field measurement equipment currently used in industry

© Commonwealth of Australia, 2025 Future Skills Organisation

- network design documentation
- equipment specifications
- network components
- hardware and software
- a live network
- organisational guidelines
- networked (LAN) computers
- a wide area network (WAN) service point of presence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN417 Install, configure and test a router

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to undertake router installation and configuration, as part of an upgrade in an existing network or the implementation of a new network.

It applies to individuals who carry out installation, maintenance and upgrade of information and communication technologies (ICT) networks.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications networks engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare to install router | 1.1 Prepare for given work according to relevant legislation, work health and safety (WHS) regulations, codes and standards<br>1.2 Arrange site access according to required procedure<br>1.3 Ascertain network topology from technical requirements<br>1.4 Determine the internet protocol (IP) addressing scheme for the network topology |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.5 Evaluate network management and security requirements, with reference to current and future requirements<br>1.6 Select a router with appropriate features according to technical requirements<br>1.7 Choose cables, wireless application protocol (WAP), wide area network (WAN) connectors and other peripherals according to network and router specification, and WAN protocols |
| 2. Install and configure router | 2.1 Assemble router and peripherals according to manufacturer's requirements, enterprise guidelines and protocols<br>2.2 Connect communications cables and WAN connectors to the router and network<br>2.3 Configure router according to manufacturer's instructions and technical requirements, taking into account interoperability requirements with network components |
| 3. Test router and reconfigure network | 3.1 Test the router for connectivity across the network and for routing protocol functions<br>3.2 Adapt or modify predetermined router configuration, depending on outcome of tests<br>3.3 Review router in line with organisational requirements<br>3.4 Test router and peripherals according to manufacturer's instructions and technical requirements<br>3.5 Test hardware and router to ensure full functionality and interoperability<br>3.6 Reconfigure additional hardware as required<br>3.7 Make adjustments to network depending on test results |
| 4. Complete documentation and clean worksite | 4.1 Tabulate test results and complete all user reports<br>4.2 Complete report and notify client of network status<br>4.3 Clean up and restore worksite to client's satisfaction<br>4.4 Secure sign-off from appropriate person |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

© Commonwealth of Australia, 2025 Future Skills Organisation

| **Skill** | **Performance Criteria** | **Description** |
|---|---|---|
| Reading | 1.1-1.3, 2.1, 2.3, 3.2, 3.3 | • Recognises and interprets technical, legislative and operational documentation to determine job requirements |
| Writing | 3.4, 4.1, 4.2 | • Uses clear, specific and industry-related terminology to produce and update workplace documentation in predetermined formats |
| Oral Communication | 4.2 | • Clearly liaises with internal and external personnel on technical, operational and business related matters<br>• Uses listening and questioning skills to confirm understanding for requirements |
| Numeracy | 2.3, 3.1, 3.2, 3.4-3.7 | • Undertakes test measurements, interprets results and evaluates performance and interoperability of network |
| Navigate the world of work | 1.1, 4.3 | • Takes personal responsibility for adherence to legal and regulatory responsibilities relevant to own work<br>• Recognises and follows explicit and implicit protocols and meets expectations associated with own role |
| Interact with others | 4.4 | • Cooperates with others as part of familiar routine activities and contributes to specific activities requiring joint responsibility and accountability |
| Get the work done | 1.2-1.7, 2.1-2.3, 3.1-3.7 | • Understands key principles and concepts underpinning design and operation of digital systems and tools, and applies these as required<br>• Takes responsibility for own workload, negotiating some key aspects with others<br>• Implements actions according to a predetermined plan, making adjustments if necessary<br>• Makes decisions quickly and intuitively in familiar situations requiring immediate attention, drawing on past experience to identify key variables and determine the best course of action<br>• Recognises and anticipates an increasing range of familiar problems, their symptoms and causes, depending on differing operational contingencies, risk situations and environments |

# Assessment Requirements for ICTTEN417 Install, configure and test a router

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- plan and prepare for router installation task
- select router to meet client's business specifications
- install and test the router ensuring interoperability within the network, and applying router principles and technologies
- report on status of completed installation and seek sign-off and customer satisfaction
- use routers
- apply solutions to defined routing problems.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and outline codes of practice for computing
- explain the effect of a router on delimiting broadcast traffic and on conserving bandwidth
- explain how dynamic routing algorithms or protocols create and maintain routing tables
- explain how to provide the network with redundant paths for reliability, and the way routers manage these paths
- summarise the following aspects of routers including:
  - basic router commands
  - configuration
  - clock rate
  - password protection of router
  - routing protocol
  - dynamic routing

© Commonwealth of Australia, 2025 Future Skills Organisation

  - firewalls
  - functions
  - routing protocols and how they operate
  - tables
- describe router-based network architectures
- explain the use of routing tables in intelligent packet routing and switching.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a site where router installation may be conducted
- field measurement equipment currently used in industry
- relevant router specifications
- technical requirements for a network
- router
- cabling
- networked (LAN) computers
- wide area network (WAN) service point of presence
- relevant equipment and organisational documentation.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTTEN418 Install and test a radio frequency identification system

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required for installation of either a new logistical or security network or upgrade of an existing system.

It applies to individuals who integrate new and converging functionalities to information and communications technology (ICT) networks. They are employed by telecommunications and information technology networking provisioning companies specialising in radio frequency identification (RFID) technology.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare to install specified RFID system | 1.1 Prepare for given work according to relevant legislation, work health and safety (WHS) regulations, codes, and standards<br>1.2 Arrange site access according to required procedure<br>1.3 Choose the most suitable RFID system based on specifications and in consultation with appropriate person |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.4 Evaluate options for equipment installation siting and antenna positioning to include effects of electromagnetic interference and shielding<br>1.5 Investigate causes of interference with RFID systems<br>1.6 Specify network element requirements for the installation and any training requirements for clients<br>1.7 Create a deployment plan including down times and advise the user group<br>1.8 Obtain all components and devices required for the RFID system |
| 2. Install specified RFID system and resolve any faults | 2.1 Install interrogators or readers according to given plan<br>2.2 Install tags and document correct procedures for locating and orienting tags<br>2.3 Install and undertake network configuration activities using relevant operating system and application upgrades to integrate RFID system into the overall network<br>2.4 Troubleshoot problems between interrogators or readers, tags and networks, including tuning for optimum performance and rectify any faults |
| 3. Test RFID installation according to specification and standards | 3.1 Test system installation according to design specifications and standards including optimum placement of tags, data transmission completeness and record outcomes<br>3.2 Carry out any changes<br>3.3 Validate changes or additions against specifications<br>3.4 Document the test results |
| 4. Complete documentation in compliance with customer requirements and clean worksite | 4.1 Complete all documentation for users according to the design and customer requirements<br>4.2 Complete report and notify client of network status and standards applying to the installation<br>4.3 Clean up and restore worksite to client's satisfaction<br>4.4 Secure sign-off from appropriate person |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

# Assessment Requirements for ICTTEN418 Install and test a radio frequency identification system

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- plan installation
- use basic research skills for adapting radio frequency identification (RFID) technologies to specified plan and design
- implement and verify RFID operations
- implement RFID architecture across a secure environment
- encode RFID tags and attach to items
- integrate RFID information into business applications
- configure network with IP addressing
- cable and test RFID network
- create technical and user documentation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the client business domain, business function and organisation
- describe common network cable types and connectors
- summarise compatibility issues and resolution procedures
- describe configuration of internet protocol (IP) networks
- describe current industry-accepted hardware and software products used in RFID systems
- explain desktop applications and operating systems as required
- summarise enterprise communication and training systems in relation to training and advising staff involved in deployment
- summarise network topologies

© Commonwealth of Australia, 2025 Future Skills Organisation

- outline RFID technologies including:
  - network operating systems
  - protocols
  - interrogators and sensors
  - wireless technologies
  - cabling standards.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a site where RFID installation may be conducted
- field measurement equipment currently used in industry
- relevant network element specifications
- technical requirements for an RFID network
- cabling
- networked (LAN) computers
- workstations
- RFID diagnostic software
- wide area network (WAN) service point of presence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN419 Implement and troubleshoot enterprise routers and switches

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to determine customer needs, use information communication technologies (ICT) to meet network requirements, rectify equipment errors and create appropriate workplace documentation.

It applies to individuals working as installers of internet protocol (IP) networks, enterprise network technicians, network administrators and other network support personnel.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1 Prepare for implementation of network routers and switches | 1.1 Prepare for given job according to work health and safety (WHS) and environmental requirements with appropriate personnel<br>1.2 Identify safety hazards and implement risk control measures in consultation with appropriate personnel<br>1.3 Determine nature and scope of network routers, network switches and network resources from job briefs or appropriate |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | personnel<br>1.4 Select and obtain network services and network application requirements according to enterprise procedures<br>1.5 Obtain identified operating instructions, manuals, hardware and software testing methodologies<br>1.6 Consult appropriate personnel to ensure the task is coordinated effectively with others involved at the worksite |
| 2 Implement network switches and routers | 2.1 Configure routers and switches according to manufacturer's specifications and enterprise procedures<br>2.2 Determine network addressing scheme for network connectivity, and verify using calculations<br>2.3 Activate, and verify wide area network (WAN) links provide network connectivity<br>2.4 Enable network services and network applications to the network to complete network connectivity process<br>2.5 Set up traffic access and filtering according to enterprise procedures |
| 3 Troubleshoot network switches and routers | 3.1 Monitor network performance and isolate faults using diagnostic and analysis tools<br>3.2 Troubleshoot network and internet connectivity according to manufacturer's specifications and enterprise procedures |
| 4 Document configuration and troubleshooting records | 4.1 Restore work-site to safe condition according to established safety procedures<br>4.2 Record and store essential implementation information according to enterprise procedures<br>4.3 Notify appropriate personnel of completion of the task according to enterprise procedures |

# Foundation Skills

# Assessment Requirements for ICTTEN419 Implement and troubleshoot enterprise routers and switches

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- determine customer networking requirements
- configure routers and switches using hierarchical addressing over virtual local area networks (VLANs) to meet network link requirements
- enable and control access to network services and applications across the network
- diagnose and rectify network hardware and device configuration faults
- document configuration information, fault-finding history and remediation action.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise access control lists
- give examples of characteristics of a typical enterprise including:
  - features and applications
  - work health and safety (WHS) procedures
  - record keeping procedures
  - switching and routing protocols and strategies:
    - hierarchical addressing
    - multilayer switching
    - routing protocols
    - VLAN routing
- summarise implementation of enterprise wide area networks (WAN) links
- explain network diagnostic and troubleshooting techniques
- describe network modelling

© Commonwealth of Australia, 2025 Future Skills Organisation

- specify how to configure and activate network access and security measures
- describe the process of configuring switches and routers to enable local area networks (LAN) and WAN links
- describe the connection process for enterprise networks using WAN services and applications
- describe the purpose of maintaining enterprise network documentation
- summarise the process and importance of troubleshooting network faults and implementing recovery actions
- describe the use of a hierarchical internet protocol (IP) network address scheme
- select and use tools and equipment to analyse enterprise networks.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a network facility and workstations
- operating instructions, installation documents and manuals
- hardware and software testing tools currently used in industry.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN420 Design, install and configure an internetwork

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to determine customer needs, create appropriate workplace documentation, connect and organise an internetwork according to design specifications, resolving technical problems as they arise.

It applies to individuals who design and install internet protocol (IP) networks including enterprise internetwork technicians, network administrators and network support personnel for large, medium and small office home office (SOHO) enterprises.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare for design and installation of internetwork | 1.1 Prepare for given work according to work health and safety (WHS) and environmental requirements with appropriate personnel<br>1.2 Identify safety hazards and implement risk control measures in consultation with appropriate personnel<br>1.3 Determine nature and scope of internetwork from job briefs and appropriate personnel |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.4 Obtain operating instructions, manuals, hardware and software testing methodologies<br>1.5 Consult appropriate personnel to ensure the task is coordinated effectively with others involved at the worksite |
| 2. Design enterprise internetwork | 2.1 Produce enterprise internetwork topology after considering technical requirements, physical and financial constraints and expansion projections<br>2.2 Determine network devices and network resources, according to enterprise procedures<br>2.3 Produce internetwork design including network security and router and switch configurations to meet design specifications and enterprise procedures |
| 3. Install and configure designed internetwork | 3.1 Install network hardware to network topology design plan according to enterprise procedures<br>3.2 Determine network addressing scheme for network connectivity, and verify using calculations<br>3.3 Configure routers and switches to perform logical connection of the internetwork<br>3.4 Conduct connectivity and performance tests to verify network installation meets design specification<br>3.5 Troubleshoot internetwork and internet connectivity according to manufacturer's specifications and enterprise procedures |
| 4. Complete and document network design and installation | 4.1 Restore worksite to safe condition according to established safety procedures<br>4.2 Record and store essential design and installation information according to enterprise procedures<br>4.3 Notify appropriate personnel of completion of the task according to enterprise procedures |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

# Assessment Requirements for ICTTEN420 Design, install and configure an internetwork

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- determine customer requirements
- design internetwork that uses advanced routing and addressing techniques
- install internetwork according to design specification
- configure network devices to meet design functionality
- document internetwork design, installation and configuration.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe enterprise work health and safety (WHS) procedures
- summarise open systems interconnect (OSI) layered communication model
- outline network requirements including:
  - applications
  - lifecycle
  - manageability
  - quality of service
- clarify network design concepts including:
  - business requirements
  - network topologies
  - physical and financial constraints
  - security
  - wired or wireless options

© Commonwealth of Australia, 2025 Future Skills Organisation

- describe tool and equipment use
- outline troubleshooting components of this work including:
  - impact of network failure
  - maintenance
  - troubleshooting methodologies
- analyse impact of applications on traffic flow in the network
- describe network design methodologies used to design networks providing a range of services and applications found in larger networks
- define technical requirements, constraints and manageability issues for a given customer network
- identify and describe common tools and equipment used in internet work.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a site where design and installation of an internetwork network may be conducted
- tools, equipment and materials currently used in industry
- relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN421 Apply advanced routing protocols to network design

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to use software tools, equipment, software and protocols to configure and troubleshoot network routers.

It applies to individuals who work cooperatively with others, interpret technical information accurately and work proficiently with information communication technology (ICT). Installers of internet protocol (IP), small and medium sized enterprise (SME) network technicians, network administrators and network support personnel complete this type of work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Build and test advanced routing | 2.1 Set up router interfaces according to manufacturer's specifications and established procedures<br>2.2 Implement advanced routing protocols to achieve network design requirements<br>2.3 Implement classless addressing across a network to perform logical connectivity, and confirm using calculations<br>2.4 Troubleshoot network routing according to manufacturer's specifications and established procedures<br>2.5 Identify security threats and initiate control measures according to enterprise procedures |
| 3. Complete and document advanced router installation | 3.1 Restore worksite to safe condition according to established safety procedures<br>3.2 Record and store essential installation information according to enterprise procedures<br>3.3 Notify appropriate personnel of completion of the task according to enterprise procedures |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.3, 2.1, 2.4, 2.5, 3.2, 3.3 | • Recognises and interprets enterprise procedures, manuals and specifications to determine job requirements |
| Writing | 1.2, 3.2, 3.3 | • Uses clear, specific and industry-related terminology to develop network documentation and maintain network records |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| | | • Writes concisely when communicating with relevant personnel |
| Oral Communication | 1.2, 1.3, 3.3 | • Liaises and negotiates with customers and peers to achieve design specifications<br>• Uses listening and questioning skills to confirm understanding for requirements |
| Numeracy | 2.3 | • Interprets technical data and performs calculations to verify information |
| Navigate the world of work | 1.1, 1.4, 2.4, 2.5, 3.1-3.3 | • Takes personal responsibility for adherence to legal and regulatory responsibilities relevant to own work context and draws attention to any issues that may affect self or others<br>• Recognises and follows organisational procedures and protocols and meets expectations associated with own role |
| Interact with others | 1.6 | • Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction |
| Get the work done | 1.4, 1.5, 2.1-2.5, 3.2 | • Understands key principles and concepts underpinning design and operation of digital systems and tools, and applies these as required including troubleshooting common network problems according to helpdesk procedures<br>• Takes responsibility for planning and organising own workload, identifying ways of sequencing and combining elements for greater efficiency<br>• Implements actions according to a predetermined plan, making adjustments if necessary<br>• Makes decisions quickly and intuitively in familiar situations requiring immediate attention, drawing on past experience to identify key variables and determine the best course of action<br>• Recognises and anticipates an increasing range of unexpected problems, their symptoms and causes on the basis of safety and specified work outcomes |

# Assessment Requirements for ICTTEN421 Apply advanced routing protocols to network design

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- plan network routing requirements to meet design specification
- configure advanced protocols on network routers
- manage network addressing
- troubleshoot network
- install network security.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain distance vector routing protocols RIP v1 and v2
- outline dynamic routing
- summarise enterprise work health and safety (WHS) procedures
- outline hybrid routing protocols enhanced interior gateway routing protocol (EIGRP)
- explain link-state routing protocols open shortest path first (OSPF)
- explain routing and packet forwarding
- describe routing tables
- summarise scalable routing strategies variable length subnet masking (VSLM) and classless inter-domain routing (CIDR)
- outline security protocols using access lists
- clarify static routing
- explain the use of software tools and equipment.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a network facility and workstations
- tools, equipment and materials currently used in industry
- relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN422 Configure and troubleshoot advanced network switching

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to perform network switch configuration and troubleshooting. This unit applies to large networks involving wireless local area networks (WLANs), virtual local area networks (VLANs), interVLAN routing, remote access management and operating system management of network devices.

It applies to individuals who work cooperatively with others, interpret technical information accurately, and work proficiently with information communication technology (ICT). Installers of internet protocol (IP), enterprise network technicians, network administrators and network support personnel complete this type of work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare to work on switched network | 1.1 Prepare for given work according to work health and safety (WHS) and environmental requirements with appropriate personnel<br>1.2 Identify safety hazards and implement risk control measures in |

# Assessment Requirements for ICTTEN422 Configure and troubleshoot advanced network switching

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- build and configure a routed network
- configure a virtual local area networks (VLAN) on a given network topology
- configure VLAN trunking and spanning tree protocols
- establish VLANs over a wireless network
- design and deploy remote access and network security.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline enterprise work health and safety (WHS) procedures
- explain interVLAN routing
- describe spanning tree protocol
- clarify switch and remote network security management
- describe the tool and equipment required, and their correct usage
- outline troubleshooting procedures
- summarise VLAN trunking protocol
- explain wireless local area network (LAN) set-up and access configuration.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

# ICTTEN423 Install and maintain a wide area network

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to use appropriate tools, equipment, software and protocols to connect and support a wide area network (WAN).

It applies to individuals who work cooperatively with others, interpret technical information accurately and work proficiently with information communication technology (ICT). Installers of internet protocol (IP) networks, IP network technicians, network administrators and network support personnel complete this type of work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |

# Assessment Requirements for ICTTEN423 Install and maintain a wide area network

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- plan installation of a wide area network (WAN) accessible network
- select and apply WAN link protocols
- configure internet protocol (IP) addressing across WAN
- troubleshoot WAN communication issues
- install WAN access security measures.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline enterprise work health and safety (WHS) procedures
- explain IP addressing services and network scaling
- summarise methods of securing network services including access control lists
- explain Open Systems Interconnection (OSI) layered communication model
- outline requirements to provide teleworker network services
- describe correct usage of relevant tools and equipment
- outline WAN link protocols including:
  - frame relay
  - high-level data link control (HDLC)
  - link access procedure, balanced (LAPB)
  - point-to-point protocol (PPP)
- summarise WAN troubleshooting methodologies and analysis and diagnostic tools.

© Commonwealth of Australia, 2025 Future Skills Organisation

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a site where installation and maintenance of a WAN may be conducted
- tools, equipment and materials currently used in industry
- relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN424 Install and configure internet protocol TV in a service provider network

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to design and connect a multi-protocol label switching (MPLS) network for internet protocol TV (IPTV). This includes secure core and access networks for the service provider.

It applies to individuals who interpret technical information accurately and work proficiently with information communication technology (ICT). Technical staff installing an internet protocol (IP) service provider network for delivery of emerging technologies for IPTV using multicast (broadcast) and unicast video on demand (VoD) streaming complete this work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare to implement IPTV service provider | 1.1 Obtain and clarify work health and safety (WHS) requirements and risk control measures and procedures for a given work area with appropriate personnel<br>1.2 Use topology of an IPTV network and design plans to locate |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | network elements for video over broadband<br>1.3 Select network elements to provide optimum video delivery service<br>1.4 Obtain configuration instructions for network elements |
| 2. Implement IPTV network to meet business requirements | 2.1 Configure an IP-MPLS core network overlaying the IP network to deliver IPTV<br>2.2 Implement VoD application to meet bandwidth requirements and quality of service (QoS) requirements for commercial viability of IPTV network<br>2.3 Install and configure video service routers for content delivery system (CDS) applications to support TV streaming and internet streaming, with session shifting for follow-me or mobile video facility<br>2.4 Produce addressing scheme and protocols required for IP multicasting used in the IPTV network<br>2.5 Configure security measures in IPTV network to protect against security threats<br>2.6 Configure label switch routers (LSR) to provide secure methods of transporting IP packets using layer 2 protocols in an MPLS network<br>2.7 Configure MPLS-TE (traffic engineering) to provide routing on diverse paths to avoid congestion and guarantee bandwidth services<br>2.8 Troubleshoot network according to manufacturer's specifications and enterprise procedures |
| 3. Build and configure CDN architecture network | 3.1 Build content delivery network (CDN) architecture overlaying routing and switching architecture of an IP network to deliver internet TV to internet devices<br>3.2 Use routing and switching infrastructure to enable CDN share characteristics of each element to produce network functionality<br>3.3 Install and configure web cache communication protocol (WCCP) on router to redirect traffic flows in real-time to reduce transmission costs and download times |
| 4. Complete and document network installation | 4.1 Restore worksite to safe condition according to established safety procedures<br>4.2 Record and store essential installation information according to enterprise procedures<br>4.3 Notify appropriate personnel of completion of the task according |

# Assessment Requirements for ICTTEN424 Install and configure internet protocol TV in a service provider network

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- install relevant network hardware and software
- configure and test internet protocol television (IPTV) network according to specified guidelines
- configure label switch routers (LSR) in an multi-protocol label switching (MPLS) network
- build and configure content delivery network (CDN) architecture network
- implement secure network.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain competing video delivery over broadband networks
- summarise current industry-accepted hardware and software products
- outline networking technologies incorporating detailed knowledge of network operating systems and IP networks
- describe transmission technologies and protocols including:
  - border gateway protocol (BGP)
  - enhanced interior gateway routing protocol (EIGRP)
  - flash
  - hypertext transfer protocol (HTTP)
  - internet group management protocol (IGMP)
  - open shortest path first (OSPF)
  - real time streaming protocol (RTSP)
  - routing information protocol (RIP)

© Commonwealth of Australia, 2025 Future Skills Organisation

- web cache communication protocol (WCCP) operations.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a site where installation and configuration of an IPTV network may be conducted
- equipment currently used in industry
- information on different protocols
- relevant technical information, legislative requirements and other site and project-related documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN425 Design, install and configure a customer smart technology network

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to test and troubleshoot smart technology network installations.

It applies to individuals who design and install smart grid networks for domestic or industrial enterprises using internet protocol (IP) networking technology.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare for design and installation of a smart technology network | 1.1 Prepare for given work according to work health and safety (WHS) and environmental requirements with appropriate personnel from the enterprise<br>1.2 Identify safety hazards and implement risk control measures in consultation with appropriate personnel<br>1.3 Determine nature and scope of the smart technology network from customer specifications and appropriate personnel |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.4 Obtain operating instructions, manuals, hardware and software testing methodologies<br>1.5 Consult appropriate personnel to ensure task is coordinated effectively with others involved at the worksite |
| 2. Design a customer smart technology network | 2.1 Produce a smart technology network topology that is interoperable and scalable after considering customer requirements, technical specifications, physical and financial constraints and expansion projections<br>2.2 Determine network devices and network resources according to enterprise procedures<br>2.3 Produce smart technology network design including network security and network element configurations to meet design specifications and enterprise procedures |
| 3. Install and configure a designed smart technology network | 3.1 Install smart technology network hardware to topology design plan according to enterprise procedures<br>3.2 Determine network addressing scheme for network connectivity, and verify using calculations<br>3.3 Configure network elements to perform logical connection of smart technology network topology with required network security features<br>3.4 Conduct connectivity and performance tests to verify the network installation meets design specification<br>3.5 Troubleshoot smart technology network and internet connectivity according to manufacturer's specifications and enterprise procedures |
| 4. Complete and document network design and installation | 4.1 Restore worksite to safe condition according to established safety procedures<br>4.2 Record and store essential design and installation information according to enterprise procedures<br>4.3 Notify appropriate personnel of task completion according to enterprise procedures |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

© Commonwealth of Australia, 2025 Future Skills Organisation

| **Skill** | **Performance Criteria** | **Description** |
|---|---|---|
| Reading | 1.3, 2.1, 2.3, 3.5, 4.2, 4.3 | • Recognises and interprets enterprise procedures, manuals and specifications to determine important information |
| Writing | 2.3, 4.2, 4.3 | • Uses clear, specific and industry-related terminology to develop network documentation and update workplace records and in written communications with customers |
| Oral Communication | 1.1-1.3, 1.5, 4.3 | • Liaises with appropriate personnel about technical requirements using specific and relevant language<br>• Uses listening and questioning techniques to confirm understanding |
| Numeracy | 2.1, 3.2 | • Evaluates and reviews technical data and makes calculations to verify connectivity and configuration |
| Navigate the world of work | 1.1, 1.2, 2.2, 2.3, 3.1, 3.5, 4.1-4.3 | • Takes personal responsibility for adherence to legal and regulatory responsibilities relevant to own work, and draws attention to any issues that may affect self or others<br>• Recognises and follows organisational protocols and meets expectations associated with own role |
| Interact with others | 1.1-1.3,1.5 | • Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction<br>• Selects and uses appropriate conventions and protocols when communicating with customers and co-workers in a range of work contexts |
| Get the work done | 1.3, 1.4, 2.1, 2.2, 3.1-3.5, 4.2 | • Determines job priorities and works logically and systematically to undertake clearly defined and familiar tasks<br>• Implements actions according to a predetermined plan, making slight adjustments if necessary, and addressing some unexpected issues<br>• Takes responsibility for routine decision-making by selecting from a range of predetermined options in routine situations, identifying and taking some situational factors into account<br>• Diagnoses and implements standard solutions to unexpected situations based on safety requirements and specified work outcomes<br>• Understands purposes and specific functions of common digital systems and uses them effectively to complete routine tasks |

# Assessment Requirements for ICTTEN425 Design, install and configure a customer smart technology network

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- determine job requirements by referring to documentation and through discussion with appropriate people
- design a smart technology network that uses advanced networking techniques
- install a smart technology network according to design specification
- configure network devices to meet design functionality
- document smart technology network design, installation and configuration.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline enterprise work health and safety (WHS) procedures
- summarise network design concepts including:
  - business requirements
  - network topologies
  - physical and financial constraints
  - security
  - wired or wireless options
- explain network requirements:
  - applications
  - lifecycle
  - manageability
  - quality of service

© Commonwealth of Australia, 2025 Future Skills Organisation

- summarise open systems interconnect (OSI) layered communication model
- summarise the following areas of troubleshooting including:
  - impact of network failure
  - maintenance troubleshooting
  - different problem-solving methodologies.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a site where design and installation of a smart technology network may be conducted
- tools, equipment and materials currently used in industry
- relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN426 Design network projects

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to plan, design, construct and manage access, building or core telecommunications networks.

It applies to individuals working as technical officers, communications workers or engineers, from private and public organisations who plan, design and manage access, building and core network technologies for a service provider.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Analyse different types of network technologies | 1.1 Review available network technologies and compare them for application to the expansion or augmentation of network services<br>1.2 Examine various techniques for access networks to provide service to green fields, brown fields and rehabilitation projects<br>1.3 Examine various techniques for building and core networks to provide for new service, capacity expansion and equipment recovery projects |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.4 Determine the type of network by accessing and using network information sources<br>1.5 Produce a brief on how network architecture components relate to the larger network and their impact on the work<br>1.6 Develop an installation activity schedule to minimise workplace disruption and according to relevant regulation and standards<br>1.7 Evaluate equipment type and technologies to be considered to determine availability and compatibility with existing network equipment |
| 2. Apply deployment and construction practices for network technologies | 2.1 Review conduit and jointing chamber standards and practices for the access network<br>2.2 Examine standards, practices and requirements for locating telecommunications infrastructure in the access network<br>2.3 Examine standards, practices and requirements for locating and standing racks and cabinets and supporting infrastructure<br>2.4 Examine capacity and practices for cabling and patching of twisted pair, coax and fibre distribution frames |
| 3. Review network standards and prepare draft design | 3.1 Review client's network deployment rules and apply to a network design<br>3.2 Produce preliminary plan or design on deployment of the network that maintains integrity of access, building or core networks<br>3.3 Establishing a solution for unforeseen problems through discussions with appropriate personnel, with consideration to job specifications, safety and enterprise procedures to establish a solution<br>3.4 Review plan to ensure it complies with all applicable standards and codes required when working on network, and where appropriate make adjustments<br>3.5 Produce final design including recommendations agreed with customer |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Reading | 1.4, 1.6, 3.3 | • Recognises and interprets technical and non-technical documentation to incorporate important information in designs |
| Writing | 1.5, 1.6, 3.1, 3.2, 3.4, 3.5 | • Uses clear, specific and industry-related terminology to document technical requirements and procedures |
| Oral Communication | 3.3 | • Liaises with appropriate personnel about technical and operational requirements using specific and relevant language<br>• Uses listening and questioning techniques to confirm understanding |
| Navigate the world of work | 2.1-2.4, 3.1, 3.3, 3.4 | • Takes personal responsibility for adherence to legal and regulatory responsibilities and practices relevant to own work<br>• Recognises and follows organisational procedures protocols and meets expectations associated with own role |
| Interacts with others | 3.3 | • Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction |
| Get the work done | 1.1-1.3, 1.7, 3.3 | • Determines job priorities and works logically and systematically to undertake clearly defined and familiar tasks<br>• Implements actions according to a predetermined plan, making slight adjustments if necessary and addressing some unexpected issues<br>• Takes responsibility for routine decision-making by selecting from a range of predetermined options in routine situations, identifying and taking some situational factors into account<br>• Diagnoses and implements standard solutions to unexpected situations based on safety requirements and specified work outcomes<br>• Reflects on ways digital systems and tools are used to achieve work goals, and recognises strategic and operational applications |

# Assessment Requirements for ICTTEN426 Design network projects

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- identify the most suitable network technology to be deployed for a given requirement
- apply established planning, design or management techniques for project deployment
- produce a design, which is compliant to the techniques, rules and standards of the deployed network.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the following features of a telecommunications network:
  - architecture and geographical categorisations
  - information sources
  - technology and equipment
  - capacity and capability management
  - capacity limitation of various platforms
  - commercial considerations of access network deployment
  - compatibility issues of technology and equipment
  - currency of technology and equipment use
  - enterprise deployment rules and rational
  - exemption process criteria
  - major equipment components of a modern access architecture
  - monitoring techniques to manage the access network
  - network topologies

© Commonwealth of Australia, 2025 Future Skills Organisation

  - product capability and availability allowable within an access network
  - telecommunications access networks issues and challenges
  - telecommunications legislation, acts and regulations
- identify and describe key features of common telecommunications networks.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- network planning, design and other site-related documentation
- equipment specifications
- live network of training facilities with simulated network organisational guidelines
- relevant standards and practices documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN427 Conduct site surveys to identify carrier installation requirements

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to implement design processes, develop solutions, and merge technological development and product implementation in access, building and core networks.

It applies to individuals working as technical staff on projects within a carrier network for carrier, commercial or industrial installations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Obtain access to work site | 1.1 Notify appropriate personnel, if necessary, to arrange site access, discuss installation requirements and identify carrier network systems<br>1.2 Assess site-specific safety requirements and enterprise work health and safety (WHS) processes and procedures<br>1.3 Use network information systems to obtain planning data |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| 2. Identify existing infrastructure | 2.1 Confirm details of installation with stakeholders<br>2.2 Verify site conditions and building construction<br>2.3 Locate and record existing facilities and systems<br>2.4 Confirm installation locations and identify barriers to planned network extension<br>2.5 Integrate existing network and floor plans into documentation where available |
| 3. Integrate existing infrastructure into design brief | 3.1 Review existing plans, drawings and databases against the design brief<br>3.2 Calculate capacity of existing facilities against proposed usage to ensure appropriate design decisions for new installation<br>3.3 Incorporate all data into new installation design<br>3.4 Mark up plans and prepare report on new installation design<br>3.5 Develop contingency plans for anticipated constraints |
| 4. Review design for compliance with standards and legislation | 4.1 Examine standards, practices and requirements for locating telecommunications infrastructure in the access network<br>4.2 Review installation design to ensure compliance with requirements of federal, state and local regulations, relevant legislation, codes and standards<br>4.3 Initiate any special studies or investigations necessary for completion of the project |
| 5. Complete required reports and documentation | 5.1 Complete required documents promptly and according to planning parameters<br>5.2 Obtain carrier confirmation from documented requirements<br>5.3 Distribute design documentation to stakeholders promptly<br>5.4 Obtain project plan sign-off from carrier |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Reading | 1.3, 2.2-2.5, 3.1, 3.5, 4.2, 5.2 | • Recognises and interprets a wide variety of technical and non-technical documentation |
| Writing | 1.1, 2.1, 2.3, 3.3, 3.4, 4.1, 4.3, 5.1, 5.2, 5.4 | • Uses clear, specific and industry-related terminology to document technical requirements and procedures |
| Oral Communication | 1.3, 2.1, 2.4, 4.3, 5.2 | • Participates in verbal exchanges with customers and team members about technical and operational requirements using specific and relevant language<br>• Uses listening and questioning techniques to confirm understanding |
| Numeracy | 3.2 | • Analyses numerical information to interpret site-specific data |
| Navigate the world of work | 1.2, 4.1, 4.2, 5.1 | • Takes personal responsibility for adherence to legal and regulatory responsibilities relevant to own work |
| Interact with others | 2.1, 4.3, 5.2, 5.4 | • Selects and uses appropriate conventions and protocols when communicating with customers and co-workers in a range of work contexts |
| Get the work done | 1.1-1.3, 2.2-2.5, 3.3, 3.5, 4.3, 5.2-5.4 | • Determines job priorities and works logically and systematically to undertake clearly defined and familiar tasks and plan necessary resources<br>• Implements actions according to a predetermined plan, making slight adjustments if necessary and addressing some unexpected issues<br>• Takes responsibility for routine decision-making by selecting from a range of predetermined options in routine situations, identifying and taking some situational factors into account<br>• Diagnoses and implements standard solutions to unexpected situations based on safety requirements and specified work outcomes<br>• Recognises and initiates approaches to enhance work practices, taking present and future needs and barriers to plan completion into account<br>• Reflects on ways digital systems and tools are used to achieve work goals, and recognises strategic and operational applications |

# Assessment Requirements for ICTTEN427 Conduct site surveys to identify carrier installation requirements

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- evaluate existing infrastructure on an installation site
- integrate existing infrastructure into an installation design
- develop design specifications for an installation project
- engage stakeholders and carriers in design approval process.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and explain the impact of relevant legislation, codes of practice and other formal agreements that impact communications work
- describe access networks in Australia and state how it influences development of projects
- identify costs associated with carrier installations and determine estimates and operating budgets for an installation
- identify network performance information required to produce a network design
- specify current, new and emerging technologies to be considered for a communications design, including barriers that may have an impact
- define project management and its purpose and explain associated databases and project management software programs used
- explain economic and political influences and trends that impact communications installations for public and commercial enterprises
- describe a network plan and its components
- explain the purpose of having authorities and delegations required when costing and estimating financials for projects

© Commonwealth of Australia, 2025 Future Skills Organisation

- explain the impact of local and international economic conditions on telecommunications installations and infrastructure, and typical challenges and limits facing technology today and on future needs
- describe the process and documentation required to collate and write project briefs, reports and project charters
- identify specific work health and safety requirements relating to site conditions and activities, including manufacturer's requirements for safe operation of equipment to be incorporated into project documentation.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a network planning area, systems and deployment rules and standards
- relevant databases, licensing requirements and other site related procedures
- a location and scenario suitable to conduct a site survey.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN428 Prepare design drawings and specification for telecommunications installations

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the performance outcomes, skills and knowledge required to prepare design drawings and specification for a telecommunications installation.

It applies to technical staff who are responsible for communicating installation requirements for installations, for access, building and core network installations within the Carrier Network for either carrier, commercial or industrial installations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Gather information on existing and proposed installation | 1.1 Confirm equipment installation requirements from the design brief and client<br>1.2 Inspect site to confirm plans where possible<br>1.3 Review existing plans, drawings and databases against the design brief |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| 2. Determine installation options | 2.1 Assess available installation options against client requirements and relevant legislation, codes, regulations and standards<br>2.2 Establish and assess cost of options against client's budget<br>2.3 Select most suitable option based on function, cost, standards and client deployment rules |
| 3. Prepare suitable drawings | 3.1 Prepare clear and accurate installation drawings indicating proposed facilities and services<br>3.2 Provide drawings to relevant parties and file copies for later reference according to company policies |
| 4. Prepare project specifications | 4.1 Prepare detailed design drawings for network installation<br>4.2 Prepare drawings to include scheduled and non-scheduled codes to facilitate costing |
| 5. Verify specifications with client | 5.1 Verify prepared documentation with client<br>5.2 Obtain authorisation and approval from client to proceed according to company policy<br>5.3 Issue design to the field with authority to construct |

# Foundation Skills

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1-1.3, 2.1-2.3 | • Reads and interprets plans, specifications, and other documentation from a variety of sources and consolidates information to determine requirements |
| Writing | 4.1, 4.2, 5.1-5.3 | • Prepares, edits and proofreads plans and documents to ensure clarity of meaning, and accuracy and consistency of information<br>• Documents outcomes and changes to plans using industry-relevant terminology and recognised plan symbols<br>• Develops procedural material for a specific audience using clear and detailed language to convey explicit information, requirements and recommendations |
| Oral Communication | 1.1, 5.1 | • Presents complex information in formal situations using clear and convincing language, tone and pace appropriate for audience and purpose |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Numeracy | 2.2, 2.3, 4.2 | • Applies financial modelling skills to identify, analyse and evaluate budgetary information, time durations and human resource allocations and costs |
| Navigate the world of work | 2.1, 5.2 | • Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements |
| Interact with others | 5.2, 5.3 | • Selects and uses appropriate conventions and protocols when communicating with clients and co-workers in a range of work contexts<br>• Uses a range of strategies to establish a sense of connection and build rapport with clients and co-workers |
| Get the work done | 1.2, 1.3, 2.1-2.3, 4.1, 5.3 | • Takes responsibility for planning, sequencing and prioritising tasks and own workload for efficiency and effective outcomes<br>• Makes routine decisions and implements standard procedures for routine tasks, using formal decision-making processes for more complex and non-routine situations<br>• Addresses less predictable problems and initiates standard procedures in response, applying problem-solving processes in determining a solution<br>• Uses familiar digital technologies and systems to access information, search and enter data, present information and communicate with others, cognisant of data security and safety |

# Assessment Requirements for ICTTEN428 Prepare design drawings and specification for telecommunications installations

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- determine installation options
- produce schematics and plan drawings
- access and interpret database and knowledge systems for network information
- produce design drawings and specifications
- verify specifications with client.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise carrier network practices, procedures and systems, including databases and deployment rules relating to telecommunications designs
- identify and apply legislation, codes of practice and other formal agreements (including schedule of rates and contract requirements) that impact work activity
- describe manufacturer's requirements for safe operation of equipment
- identify and document specific work health and safety (WHS) requirements relating to the activity and site conditions
- describe typical issues and challenges that occur on site
- establish and describe the various components of telecommunications plans, drawings and specifications.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- special purpose tools, equipment and materials
- sites where network installation may be conducted
- equipment currently used in industry
- relevant regulations and company policies
- cabling specifications that impact network installation activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN429 Estimate and quote for carrier telecommunications equipment installations

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to prepare detailed estimates and quotes, including updating schematic drawings and specifications for carrier telecommunications equipment installations.

It applies to technical staff who provide estimates and quotes to clients for indoor and outdoor installation within a carrier network for commercial or industrial communications installations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Confirm and update schematic drawings and specifications | 1.1 Review existing specifications and drawings for completeness<br>1.2 Prepare additional drawings and specifications for installation if required<br>1.3 Compare drawings with design brief to confirm requirements |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.4 Confirm all cable and locations with carrier |
| 2. Price labour, materials and other relevant items and establish availability | 2.1 Obtain quotations and delivery dates from suppliers<br>2.2 Use schedule of rates for scheduled items<br>2.3 Obtain quotes and supply dates for all non-scheduled items or activities<br>2.4 Estimate labour costs based on company practices<br>2.5 Check pricing documentation to ensure supply proposal matches carrier specification for material, quality and performance |
| 3. Estimate labour, materials and other relevant item requirements | 3.1 Prepare estimations allowing for contingencies during installation and relevant legislation, codes, regulations and standards<br>3.2 Ensure estimates will return a profit on installation where appropriate |
| 4. Prepare and confirm quote with carrier | 4.1 Prepare a project installation quote that meets carrier requirements<br>4.2 Negotiate changes and variations to meet carrier and company needs |
| 5. Establish carrier's financial arrangements | 5.1 Obtain carrier's approval for project design drawings and estimate<br>5.2 Issue design drawings and specifications for authority to construct |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.2, 2.1-2.5 | • Analyses and consolidates information and data from a range of sources, against defined criteria and requirements, and checks for accuracy and completeness |
| Writing | 1.2, 1.3, 2.1, 3.1, 3.2, 4.1, 5.1, 5.2 | • Documents outcomes and changes to plans using industry-relevant terminology and recognised plan symbols<br>• Accurately records and completes organisational plans, specifications and correspondence using clear language and correct spelling, grammar and industry |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| | | terminology |
| Oral Communication | 1.4, 2.1, 4.2, 5.1 | • Uses collaborative and inclusive techniques including active listening and questioning and reading of verbal and non-verbal signals to convey and clarify information and confirm understanding<br>• Presents complex information in formal situations using clear and convincing language, tone and pace appropriate for the audience and purpose |
| Numeracy | 2.1-2.5, 3.1, 3.2 | • Applies financial modelling skills to identify, analyse and evaluate budgetary information, time durations and human resource allocations<br>• Performs mathematical calculations to analyse labour, costs and quantities to accurately process quotations |
| Navigate the world of work | 2.4, 3.1, 4.1 | • Ensures knowledge of legislative requirements and products is kept up-to-date to provide accurate information<br>• Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements |
| Interact with others | 1.4, 4.2, 5.1, 5.2 | • Selects and uses appropriate conventions and protocols when communicating with clients and co-workers in a range of work contexts<br>• Uses a range of strategies to establish a sense of connection and build rapport with clients and co-workers |
| Get the work done | 1.1-1.4, 2.1-2.5, 3.1, 5.2 | • Takes responsibility for planning, sequencing and prioritising tasks and own workload for efficiency and effective outcomes<br>• Makes decisions and implements standard procedures for routine tasks, using formal decision-making processes for more complex and non-routine situations<br>• Addresses less predictable problems and initiates standard procedures in response, applying problem-solving processes in determining a solution<br>• Uses familiar digital technologies and systems to access information, enter data, present information and communicate with others, cognisant of data security and safety |

# Assessment Requirements for ICTTEN429 Estimate and quote for carrier telecommunications equipment installations

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- prepare detailed estimates
- update schematic drawings and specifications for telecommunications equipment installations including:
  - materials
  - labour costs
- negotiate material availability and pricing for carrier equipment and network installations with contractors
- document detailed quotes for installations that allow for changes and variations
- prepare and confirm quote and financial arrangements with carrier.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- compare and contrast features of carrier telecommunications equipment
- identify and summarise application of legislation, codes of practice and other formal agreements that impact the work activity
- analyse and document the manufacturer's requirements for safe operation of equipment
- describe processes and techniques required to prepare plans, estimate and quote for installations
- identify and apply specific work health and safety (WHS) requirements relating to design and site conditions
- identify and remedy typical issues and challenges of dealing with carriers
- explore allocations to be included in the design specifications and quotation

© Commonwealth of Australia, 2025 Future Skills Organisation

- determine common contingencies to consider in a specification or quotation.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- special purpose tools, equipment and materials
- sites on which estimates and quotes may be conducted
- relevant databases and licensing requirements
- site-related documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN430 Design infrastructure for telecommunications network installations

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to design supporting infrastructure for telecommunications network installations; for carrier grade switching, transmission and access equipment and associated media, power and monitoring equipment and alarm systems, fibre distribution hubs (FDHs), and remote power feeds.

It applies to field officers, design technicians or technical supervisors from carriers, contractors or other service providers working with switching, transmission and radio networks and the various transmission paths including cable, optical fibre, radio, microwave and satellite.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare for design of infrastructure work | 1.1 Obtain relevant legislation, codes, regulations and standards for compliance when conducting work |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.2 Notify client to arrange site access and obtain plans and specifications<br>1.3 Conduct a site survey to verify infrastructure design requirements can be met<br>1.4 Identify site hazards and notify appropriate personnel to make site safe<br>1.5 Develop a design activity schedule to minimise workplace disruption and according to relevant regulation and standards<br>1.6 Discuss material supplies, safety equipment, resources, tools and test equipment with the construction group so they are available when required for installation for safe work practice |
| 2. Design network equipment infrastructure | 2.1 Prepare infrastructure designs according to electrical safety and work health and safety (WHS) and environmental requirements after consultation with operational staff<br>2.2 Design metal superstructure to house equipment according to manufacturer's specifications<br>2.3 Design cable pathways, including cable distribution frames and support materials, according to specifications |
| 3. Design power infrastructure | 3.1 Design power supply and earthing according to specifications and standard electrical practices<br>3.2 Design battery and rectifier equipment for project according to manufacturer's and WHS requirements<br>3.3 Design high Ohmeric distribution (HOD) and associated power distribution systems |
| 4. Design DC power distribution | 4.1 Design power distribution work to meet electrical safety requirements and certifications<br>4.2 Monitor electrical work to ensure compliance with installation plan<br>4.3 Identify and rectify faults where possible or escalate according to enterprise policy |
| 5. Restore site and complete documentation | 5.1 Attach infrastructure labels and designations according to enterprise requirements<br>5.2 Complete inspection sheets and declare asset ready for next stage of installation using appropriate sign off documentation<br>5.3 Clean up and prepare site in readiness for next installation phase<br>5.4 Notify carrier and obtain sign-off |

© Commonwealth of Australia, 2025 Future Skills Organisation

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.3 | • Analyses and consolidates information and data from a range of sources, against defined criteria and requirements, and checks for accuracy and completeness |
| Writing | 1.2, 1.4, 2.1-2.3, 3.1-3.3, 4.1, 5.1, 5.2, 5.4 | • Prepares and produces diagrammatic models and associated documents that convey design parameters<br>• Develops procedural material for a specific audience using clear and detailed language to convey explicit information, requirements and recommendations |
| Oral Communication | 1.2, 1.4, 1.6, 5.4 | • Uses collaborative and inclusive techniques including active listening and questioning and reading of verbal and non-verbal signals to convey and clarify information and confirm understanding |
| Numeracy | 1.5, 2.2-2.4, 3.1-3.3, 4.1 | • Applies design modelling skills to identify, analyse and evaluate budgetary information, time durations and human resource allocations<br>• Performs mathematical calculations to analyse and design telecommunications architecture, labour, costs and material quantities |
| Navigate the world of work | 1.4-1.6, 2.1-2.3, 3.1-3.3, 4.1-4.3, 5.1, 5.2 | • Accepts responsibility and ownership for the task and makes decisions on completion parameters and the need of coordination with others<br>• Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements<br>• Identifies and acts on issues that contravene relevant policies, procedures and legal requirements |
| Interact with others | 1.2, 1.6, 5.4 | • Selects and uses appropriate conventions and protocols when communicating with clients and co-workers in a range of work contexts<br>• Uses a range of strategies to establish a sense of connection and build rapport with clients and co-workers |
| Get the work | 1.1, 1.3-1.5, 2.1-2.7, 3.1, 3.2, 4.1-4.3, 5.1, | • Accepts responsibility for planning and sequencing complex tasks and workload, negotiating key aspects |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| done | 5.3, 5.4 | with others, taking into account capabilities, efficiencies and effectiveness<br>• Monitors progress of plans and schedules and reviews and changes them to meet new demands and priorities<br>• Makes routine decisions and implements standard procedures for routine tasks, using formal decision-making processes for more complex and non-routine situations<br>• Addresses less predictable problems and initiates standard procedures in response, applying problem-solving processes in determining a solution |

# Assessment Requirements for ICTTEN430 Design infrastructure for telecommunications network installations

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- determine potential earthing locations, cable routes, cables trays, data cabinets, telecommunication enclosures, distributors
- design metal superstructure
- design protective earth and functional earth installations
- design power infrastructure
- design, monitor and rectify faults in DC power distribution
- design locations and facilities for access network infrastructure.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- evaluate capabilities and performance of cabling types, connectors and cabling structures for given design parameters
- explore common carrier telecommunications applications and related equipment and infrastructure suited to a design
- determine the most appropriate connections to carrier infrastructure or equipment
- identify and recognise compliance requirements of current legislation relating to installation of telecommunications equipment and connection to carrier services
- evaluate environmental impacts including options for green information and communications technology (ICT) installations for network topologies, interfaces and interconnect solutions
- define work health and safety (WHS) requirements for the design to ensure a safe installation plan including:
  - confined spaces

© Commonwealth of Australia, 2025 Future Skills Organisation

  - electrical safety
  - working at heights
  - manual handling and lifting
  - materials handling
  - physical hazards
- evaluate and summarise network and transmission supplies and equipment required for a design
- determine power requirements and electrical safety for a specific design
- specify warranty information for equipment supplies and contractor work guarantees
- devise an appropriate survey to determine design criteria for a given site
- explore and evaluate the nature of tools and equipment required for installation of the design
- consider power distribution work requirements and the impact on the design.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- special purpose tools, equipment and materials
- site where installation of supporting infrastructure may be conducted
- plant, tools and equipment currently used in industry
- relevant regulatory and equipment documentation that impact work activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN431 Design a dense wavelength division multiplexing system

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the performance outcomes, skills and knowledge required to design a dense wavelength division multiplexing (DWDM) system in optical networks.

It applies to telecommunications technical staff who design systems for installation of long haul or metropolitan area DWDM equipment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Obtain access to worksite safely and with authority from site owner | 1.1 Obtain and review DWDM installation brief<br>1.2 Determine site access requirements<br>1.3 Notify parties if necessary to arrange site access and discuss DWDM installation requirements<br>1.4 Assess site-specific safety requirements and enterprise work health and safety (WHS) processes and procedures |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| 2. Prepare to install design DWDM units | 2.1 Survey location for DWDM installation and scope installation parameters<br>2.2 Identify suitable location for DWDM equipment racks<br>2.3 Determine number and location of shelves and cards in racks<br>2.4 Determine capacity of optical distribution frames (ODFs), patching and network management system (NMS) connections for the installation<br>2.5 Determine power feed options |
| 3. Design DWDM units and associated cabling | 3.1 Design DWDM racks, including locations and layout<br>3.2 Examine standards, practices and requirements for designing DWDM systems<br>3.3 Design DWDM shelf and card positions from customer and manufacturer documents<br>3.4 Design supporting patch panel and jumpering schemes<br>3.5 Include appropriate ancillary equipment and connections in design specifications<br>3.6 Prepare detailed design drawings for racks, shelves and cards from manufacturer and carrier documents<br>3.7 Prepare detailed design drawings for patching, jumpering and power feeds from manufacturer and carrier documents |
| 4. Review design for compliance with standards and legislation | 4.1 Confirm DWDM installation design meets the brief<br>4.2 Review installation design to ensure compliance with requirements of federal, state and local regulations, relevant legislation, codes and standards |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.4, 3.2, 3.3, 3.6, 3.7, 4.1, 4.2 | • Critically analyses complex documentation from a variety of sources and consolidates information relating to specific criteria to determine design |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| | | requirements |
| Writing | 1.3, 3.1, 3.3-3.7 | • Prepares and produces dynamic material for a specific audience using clear and detailed language to convey explicit information, requirements and recommendations<br>• Produces plans using industry-relevant terminology and recognised industry symbols |
| Oral Communication | 1.3 | • Uses collaborative and inclusive techniques, including active listening and questioning and reading of verbal and non-verbal signals, to convey and clarify information and confirm understanding |
| Numeracy | 2.3-2.5, 3.1, 3.3, 3.4 | • Uses highly-developed numeracy skills to interpret complex information, perform calculations and record outcomes for designs |
| Navigate the world of work | 1.4, 3.2, 4.2 | • Works independently or with others to make decisions to achieve organisation outcomes<br>• Takes full responsibility for following policies, procedures and legislative requirements, and identifies organisational implications of new legislation or regulation |
| Interact with others | 1.3, 4.1 | • Implements strategies for a diverse range of colleagues and clients to build rapport and foster strong relationships |
| Get the work done | 1.1, 1.2, 1.4, 2.1-2.5, 3.1, 3.3, 3.6, 3.7, 4.1 | • Accepts responsibility for planning and sequencing complex tasks and workload, negotiating key aspects with others taking into account capabilities, efficiencies and effectiveness<br>• Makes critical decisions quickly and intuitively in complex situations, taking into consideration a range of variables<br>• Applies systematic and analytical decision-making processes for complex and non-routine situations<br>• Responds intuitively to problems requiring immediate resolution, drawing on past experiences to focus on the cause of a problem<br>• Uses and investigates new digital technologies and applications to manage and manipulate data and communicate effectively with others, in a secure and stable digital environment |

# Assessment Requirements for ICTTEN431 Design a dense wavelength division multiplexing system

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- design a dense wavelength division multiplexing (DWDM) system and associated cabling according to plans and specifications
- design DWDM power and ground connections
- complete and confirm installation design report.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- recognise principles of operation of a DWDM
- recognise electrostatic discharge and apply work practices to minimise damage to equipment
- recognise and describe the function and types of optical fibre connectors and characteristics of optical fibre
- describe specific work health and safety (WHS) requirements that impact the safe inspection of optical connectors
- recognise and apply principles of safe measurement of optical power for laser transmission systems
- describe tools and ancillary equipment commonly used for DWDM systems
- recognise and describe common power wiring faults.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- special purpose tools, equipment and materials
- a suitable site for DWDM equipment installation
- tools and equipment required for installation
- a range of optical fibres to suit the installation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN501 Provide consultancy and technical support in the customer premises equipment sector

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to provide advice to clients wishing to install or upgrade telecommunications equipment on their premises.

It applies to individuals who help organisations deploy converging technologies integrating data, wireless, optical and internet protocol (IP) networks within a customer premises in domestic, commercial or industrial installations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Plan to provide consultancy and technical support in the CPE sector | 1.1 Obtain consultancy requirements from client<br>1.2 Establish relationship with industry experts to maintain currency with latest industry innovations in the customer premises' equipment (CPE) sector<br>1.3 Access sources of product and technical information relating to change and innovation |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.4 Access and evaluate latest data relating to change and innovation in the CPE sector for company use within an appropriate timeframe |
| 2. Assess customer needs | 2.1 Develop knowledge and understanding of the client's business to provide an accurate solution according to requirements<br>2.2 Investigate communication requirements including networks, based on business needs and demands<br>2.3 Ascertain client's physical and financial parameters<br>2.4 Present reports and recommendations within client's timeframes |
| 3. Provide consultancy and expert advice | 3.1 Provide timely and accurate expert consultancy and advice to company staff and clients<br>3.2 Provide communication solutions that meet client's requirements and relevant legislation, codes, regulations and standards<br>3.3 Provide alternative solutions for clients where their needs cannot be better met in an innovative way<br>3.4 Provide a report on advice and solutions that match both the physical and financial demands of the client<br>3.5 Consult with client for an agreed solution |
| 4. Control and manage product and technical information | 4.1 Provide all relevant personnel with the latest product and technical information<br>4.2 Monitor the information flow process to ensure appropriate personnel have access to the latest data<br>4.3 Provide the client with final consultancy reports and recommendations |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.4, 3.2 | • Recognises and interprets technical and regulatory specifications and related documentation to determine job requirements |
| Writing | 3.1, 3.2, 3.4, 3.5 | • Prepares specific expert information which conveys clear recommendations and uses terminology |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| | | appropriate to present to relevant personnel |
| Oral Communication | 3.1, 3.2, 3.5 | • Liaises with customers to ensure requirements are properly understood and can be achieved within established timeframes<br>• Uses listening and questioning skills to confirm understanding of requirements |
| Numeracy | 3.4 | • Interprets numerical information and applies mathematical calculations for dimensioning, cost and financial considerations |
| Navigate the world of work | 2.1, 3.2 | • Develops understanding related to current role using a range of formal and informal opportunities to develop knowledge skills and insight<br>• Keeps up-to-date with relevant legislation and regulations and considers implications of these when providing solutions in the workplace |
| Interact with others | 1.1, 1.2, 2.4, 4.1-4.3 | • Considers purpose and possible actions to be taken as a result of any work related communication<br>• Selects and uses communication conventions and protocols to suit purpose and audience<br>• Recognises importance of building rapport to establish effective working relationships |
| Get the work done | 1.3, 1.4, 2.2, 2.3, 3.3 | • Understands key principles and concepts underpinning design and operation of digital systems and tools<br>• Takes responsibility for planning and organising site access arrangements and sequencing own workload, identifying ways of combining elements for greater efficiency<br>• Recognises potential of new and alternative approaches to enhance work practices and outcomes, and accepts the need to consider change<br>• Makes decisions quickly and intuitively in familiar situations requiring immediate attention, drawing on past experience to identify key variables and determine the best course of action<br>• When dealing with complex issues, may use intuition to identify the general problem area, switching to analytical processes to clarify goals and key issues, and using lateral thinking processes to generate possible communications solutions |

# Assessment Requirements for ICTTEN501 Provide consultancy and technical support in the customer premises equipment sector

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- provide consultancy advice related to a full range of customer premises' equipment (CPE) products including:
  - product models and equipment types
  - peripherals
  - facilities, including network facilities
  - system features
- provide alternative solutions where customer's needs cannot be met precisely
- prepare clear and concise reports to customers complete with recommendations and supporting data, including full financial considerations
- provide regular updates to both company personnel and clients as to the latest product and technical information.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise common customer telecommunications applications and related equipment
- outline connections to carrier infrastructure or equipment
- identify and describe current legislation relating to installation of telecommunications equipment and connection to carrier services
- explain the purpose of enterprise operations and policies
- summarise internet protocol (IP) networks
- outline new and emerging telecommunications technologies
- define 'customer premises' equipment.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a site with network or computer layout documentation and premises plans
- network components
- equipment specifications
- organisational guidelines
- business plan or model
- relevant legislation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN502 Design a telecommunications project

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge to scope requirements, assess land site suitability, arrange site acquisition, and produce building design plans for a telecommunications building project.

It applies to individuals working for private and public organisations who combine technical design and organisational skills to apply planning principles for provisioning of the various building projects and technologies within a telecommunications network to meet future customer demands.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Scope design options | 1.1 Determine the nature, purpose and type of new facilities in the proposed project from project specifications obtained from planners<br>1.2 Analyse project brief to scope requirements of the project and consider design options with consideration to legislation governing carriers in Australia |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.3 Evaluate design requirements to determine optimal site selection for the project to house facilities<br>1.4 Arrange an environmental impact study (EIS) to be conducted on the selected site with project requirements to assess suitability of the site |
| 2. Evaluate and arrange land acquisition | 2.1 Evaluate findings of the EIS to determine suitability of the land for the project<br>2.2 Prepare a justification report on a favourable EIS and consult affected property owners to establish a base for negotiation<br>2.3 Determine potential for land acquisition or purchase from analysis of previously gathered data and EIS findings and ensure compliance with regulations and legislation |
| 3. Analyse area and select design option | 3.1 Analyse physical attributes of the area, possible environmental impacts and previously collected data to prepare design options<br>3.2 Prepare field sketch according to enterprise requirements and develop solutions to any obvious physical impediment to construction<br>3.3 Produce design options for the area that are viable for the enterprise and recommend a preferred option with justifications<br>3.4 Evaluate selection of preferred option to ensure enterprise business strategy outcomes and policies are satisfied |
| 4. Notify interested parties | 4.1 Assess resources available for project implementation to ensure works are within the enterprise's schedule<br>4.2 Notify interested parties of the type, extent and duration of proposed works according to enterprise policy<br>4.3 Obtain all required written permission from interested parties and forward to those who will carry out the job |
| 5. Produce design plan and documentation | 5.1 Prepare design plan to enterprise requirements including relevant geographical and topological information<br>5.2 Indicate location and specification of works and network equipment accurately and clearly<br>5.3 Specify resources needed to undertake the project<br>5.4 Update enterprise information systems according to enterprise guidelines and industry practice<br>5.5 Produce a complete design report and present to management for approval |

© Commonwealth of Australia, 2025 Future Skills Organisation

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1-1.3, 2.1, 2.3, 3.2, 3.4, 4.2, 5.4 | • Identifies, analyses and evaluates complex text to determine legislative and business requirements to assist with project planning |
| Writing | 2.2, 3.2, 3.3, 4.2, 5.1-5.5 | • Prepares written reports and workplace documentation that communicate complex information clearly and effectively |
| Oral Communication | 2.2, 4.2, 5.2, 5.3 | • Clearly articulates requirements to internal and external personnel on technical and operational matters using language appropriate to audience and environment<br>• Employs listening and questioning techniques to confirm understanding |
| Navigate the world of work | 1.2, 2.3 | • Keeps up-to-date with legislation and regulations affecting work and considers implications of these when negotiating and planning work |
| Get the work done | 1.1, 1.4, 3.1, 3.4, 4.1, 4.3 | • Understands key principles and concepts underpinning design and operation of digital systems and tools, and applies these as required<br>• Applies formal processes when planning tasks, producing plans with logically sequenced steps, reflecting the needs of others<br>• Implements actions according to a predetermined plan, making adjustments if necessary<br>• Makes decisions quickly and intuitively in familiar situations requiring immediate attention, drawing on past experience to identify key variables and determine the best course of action<br>• Uses analytical processes to decide on a course of action, establishing criteria for deciding between options and seeking input and advice from others before taking action when necessary |

# Assessment Requirements for ICTTEN502 Design a telecommunications project

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- scope design options
- recommend acquisition of land
- prepare justification report including evaluation of environmental impact study (EIS) findings
- produce design options
- prepare completed building design plan for a telecommunications project.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain access networks
- describe building codes and regulations relating to telecommunications installations
- appraise computer aided design (CAD) software packages used for telecommunications designs
- define core networks and specify the foundation design principles
- describe the Environmental Protection Act and its impact on designing a telecommunications project
- explain implications of heritage listings on a site
- summarise information found in EISs
- explain network performance and capacity
- outline networks planning and procedures
- explain site surveys
- describe acts and regulations attributed to telecommunications.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- sites on which projects may be designed
- CAD drawing facilities
- relevant databases, legislative requirements and other site and project related documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN503 Design an electronic system for a telecommunications network

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to design, and confirm specifications and compatibility for additional telecommunications network equipment.

It applies to individuals working as field officers, technicians or technical supervisors for carriers, contractors or other service providers who assess the need for additional equipment, including voice over internet protocol (VoIP), biometric identification, radio frequency identification (RFID) and security system equipment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Evaluate system needs | 1.1 Determine need for additional electronic equipment from telecommunications project plan<br>1.2 Specify purpose of equipment and ascertain need for additional network equipment with customer |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| 2. Analyse network and select design option | 2.1 Analyse possible impacts on network and network service requirements<br>2.2 Generate options for system design that are realistic for the enterprise and network<br>2.3 Evaluate and select preferred option, based on enterprise business strategy outcomes, service policy and compliance with relevant legislation<br>2.4 Discuss and confirm selected option with customer |
| 3. Assess system compatibility | 3.1 Assess compatibility of each equipment unit and intended use with other installed units, from system plans, equipment manuals, installation environment and industry knowledge<br>3.2 Modify design accordingly<br>3.3 Provide customer with design and obtain sign-off |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 2.3, 3.1 | • Identifies, analyses and evaluates information to determine legislative and technical requirements to assist with project planning |
| Writing | 1.2, 3.2 | • Prepares written reports and workplace documentation that communicates complex information clearly and effectively |
| Oral Communication | 1.2, 2.4 | • Liaises with customers and technical staff to ensure requirements are properly understood<br>• Employs listening and questioning techniques to confirm understanding |
| Navigate the world of work | 2.3 | • Keeps up-to-date with relevant legislation and considers implications of these when planning work |
| Interact with others | 3.3 | • Selects and uses appropriate conventions and protocols when communicating with customers, and in a range of work contexts |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Get the work done | 2.1-2.3, 3.1 | • May invest time in developing and shaping several options before making a final choice, using a combination of lateral and analytical thinking to tailor and strengthen an idea to suit needs, resources and constraints<br>• Uses formal and informal processes to monitor implementation of solutions, and reflects on outcomes<br>• Understands key principles and concepts underpinning design and operation of digital systems and tools, and applies these as required<br>• Applies formal processes when planning tasks, producing plans with logically sequenced steps, reflecting the needs of others<br>• Implements actions according to a predetermined plan, making adjustments if necessary<br>• Makes decisions quickly and intuitively in familiar situations requiring immediate attention, drawing on past experience to identify key variables and determine the best course of action<br>• Uses analytical processes to decide on a course of action, establishing criteria for deciding between options, and seeking input and advice from others before taking action when necessary |

# Assessment Requirements for ICTTEN503 Design an electronic system for a telecommunications network

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- evaluate system need for additional electronic equipment and design options
- analyse network and design systems
- assess system compatibility.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- review electrical and optical properties of telecommunications systems
- outline integration, compatibility and interoperability of equipment
- summarise legislation and licensing relevant to installation of telecommunications equipment including spectrum allocation
- define power requirements and electrical safety issues associated with electronic system design
- outline transmission type and signals that may be encountered.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- telecommunications network where additional equipment design may be conducted
- relevant regulatory and equipment documentation that impacts electronic system design.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN504 Acceptance test new systems and equipment

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to ensure new system readiness by inspecting and testing equipment to confirm compliance and performance.

It applies to individuals working as field officers, technicians or technical supervisors for carriers, contractors or other service providers.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare to conduct acceptance testing | 1.1 Obtain installation and commissioning documents and planning specifications from appropriate personnel to ensure the installed system is as planned and specified<br>1.2 Visually inspect new installation and verify compliance of the system against relevant legislation, codes, regulations and standards<br>1.3 Select and obtain required test equipment for suitability of acceptance testing<br>1.4 Prepare acceptance schedule and test criteria in consultation with |

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | appropriate personnel |
| 2. Conduct acceptance testing | 2.1 Undertake and analyse performance tests safely to ensure measurements meet with predetermined specifications and approved operating margins<br>2.2 Verify performance levels to within tolerance specifications<br>2.3 Test protection mechanisms to ensure performance criteria meets the specified standard<br>2.4 Test alarms for satisfactory operation<br>2.5 Refer identified problems to appropriate personnel for remedial action<br>2.6 Record all acceptance test procedures and results |
| 3. Complete administrative tasks | 3.1 Complete acceptance documentation including recommendations<br>3.2 Notify appropriate personnel and obtain sign-off |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.2, 2.1, 2.2 | • Identifies, analyses and evaluates information to determine regulatory and technical requirements to assist with project planning |
| Writing | 1.4, 2.6, 3.1 | • Prepares written reports and workplace documentation that communicates complex information clearly and effectively |
| Oral Communication | 1.4 | • Liaises with appropriate personnel and customers to ensure requirements are properly understood<br>• Participates in verbal exchanges employing listening and questioning techniques to confirm understanding |
| Numeracy | 2.1, 2.2 | • Uses mathematical formulae to calculate measurements, analyse results and make adjustments to equipment and settings |
| Navigate the world of work | 1.2 | • Keeps up-to-date with relevant legislation and considers implications of this when planning work, with specific reference to safety |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Interact with others | 1.1, 1.4, 2.5, 3.2 | • Selects and uses appropriate conventions and protocols when communicating with stakeholders in a range of work contexts<br>• Collaborates and cooperates with others to achieve required outcomes |
| Get the work done | 1.1, 1.3, 2.3-2.5 | • Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context to identify relevant information, test strategies and resources<br>• Understands key principles and concepts underpinning design and operation of digital systems and tools, and applies these as required<br>• Implements actions according to a predetermined plan, making adjustments if necessary<br>• Makes decisions quickly and intuitively in familiar situations requiring immediate attention, drawing on past experience to identify key variables and determine the best course of action<br>• Uses analytical processes to decide on a course of action, establishing criteria for deciding between options, and seeking input and advice from others before taking action when necessary |

# Assessment Requirements for ICTTEN504 Acceptance test new systems and equipment

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- inspect new installation and verify compliance against installation plans
- prepare acceptance schedule and test criteria
- undertake relevant acceptance tests and analysis
- comply with specified performance criteria, related work health and safety (WHS) requirements and work practices.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline cabling, terminations and supporting structures that may be encountered in the system under inspection
- explain common performance levels and standards
- explain electrical and or optical properties to be measured
- consider WHS issues that impact testing systems and equipment
- evaluate typical network topologies, switching, routing and transmission techniques
- evaluate transmission type and signals that may be encountered
- explore various types of test equipment suitable for testing to be performed.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

© Commonwealth of Australia, 2025 Future Skills Organisation

- sites where acceptance tests may be conducted
- testing equipment currently used in industry
- relevant regulatory and equipment documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN505 Commission telecommunications network equipment

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to check plans, obtain and properly handle equipment and supplies, undertake tests, and complete administrative tasks.

It applies to individuals working as field officers, technicians or technical supervisors for carriers, contractors or other service providers

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare for commissioning procedures | 1.1 Prepare for work following work health and safety (WHS) requirements<br>1.2 Organise resources based on existing and potential site hazards<br>1.3 Contact network operations personnel for site access and network specifications<br>1.4 Determine the type and complexity of the network equipment from specifications |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.5 Establish commissioning dates and confirm with all parties<br>1.6 Determine commissioning parameters according to specification, and establish planned outage if required<br>1.7 Obtain test equipment and check for suitability and accuracy<br>1.8 Produce a preliminary commissioning plan according to manufacturer's instructions and company guidelines for discussion with the customer<br>1.9 Inform affected customers of impending action and likely timing and impact by the work |
| 2. Organise planned outages if necessary | 2.1 Negotiate outage times with appropriate groups and affected customers to minimise any disruptions<br>2.2 Develop contingency plans if required and arrange for emergency communications<br>2.3 Notify alarm management centre of action planned<br>2.4 Obtain authority to proceed from relevant control centre and notify customers affected by the outage |
| 3. Complete installation procedures of network equipment | 3.1 Install applications programmes and management data according to specification to complete installation procedures<br>3.2 Complete all hardware connections according to commissioning instructions<br>3.3 Undertake all specified performance tests to ensure operation meets all prescribed parameters and specifications as detailed in the original design brief<br>3.4 Undertake tests to verify compatibility between the hardware and software<br>3.5 Correct performance defects or bring to the attention of designers for corrective action |
| 4. Complete commissioning procedures with network management | 4.1 Test alarms in conjunction with network management and operational groups to maintain network integrity<br>4.2 Simulate traffic tests through the new installation to emulate a live network<br>4.3 Test installed specific equipment features and operations administration maintenance system according to instructions<br>4.4 Diagnose, repair or escalate faults detected to the appropriate area when fault cannot be clearly diagnosed or repaired<br>4.5 Initiate vendor-related tests where required |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| 5. Finalise commissioning tasks | 5.1 Complete administrative tasks as required by enterprise<br>5.2 Undertake operational staff training where required<br>5.3 Restore site to customer's satisfaction<br>5.4 Notify customer and obtain sign-off |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Learning | 5.2 | • Accepts new learning challenges, undertaking further training when required to contribute to ongoing organisational improvement |
| Reading | 1.1, 1.4, 1.6, 1.8, 3.1-3.3, 4.3 | • Identifies, analyses and evaluates information to determine regulatory and technical requirements to assist with project planning |
| Writing | 1.3, 1.5, 1.8, 1.9, 2.1-2.4, 5.1 | • Prepares written reports and workplace documentation that communicates complex information clearly and effectively |
| Oral Communication | 1.3, 1.5, 1.9, 2.1-2.4 | • Liaises with appropriate technical personnel and customers to ensure requirements are properly understood<br>• Employs listening and questioning techniques to confirm understanding |
| Numeracy | 3.3, 3.4, 4.1, 4.3 | • Uses mathematical formulae to make calculations and interpret test equipment settings and readings |
| Navigate the world of work | 1.1 | • Keeps up-to-date with relevant legislation and considers implications of this when planning work, with specific reference to safety |
| Interact with others | 2.4, 5.4 | • Selects and uses communication conventions and protocols to suit purpose and audience |
| Get the work done | 1.2, 1.4, 1.5, 1.7, 2.2, 3.1- 3.5, 4.1, 4.2-4.5, 5.1, 5.3 | • Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context to identify relevant information, test strategies and resources<br>• Understands key principles and concepts underpinning |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| | | design and operation of digital systems and tools and applies these as required<br>• Implements actions according to a predetermined plan, making adjustments if necessary<br>• Makes decisions quickly and intuitively in familiar situations requiring immediate attention, drawing on past experience to identify key variables and determine the best course of action<br>• Uses analytical processes to decide on a course of action, establishing criteria for deciding between options and seeking input and advice from others before taking action when necessary |

# Assessment Requirements for ICTTEN505 Commission telecommunications network equipment

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- interact with enterprise personnel, customers and other contractors, keeping a customer focus and consideration of customer needs
- produce an outage management plan and contingency plan
- negotiate network activity and timing of commissioning
- commission networking equipment to plan or specification
- implement test plan, and interpret and analyse results against expected outcomes
- test alarms and alarm regime
- analyse faults, problems and anomalies and provide solutions
- comply with all related work health and safety (WHS) requirements and work practices.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline electrical and/or optical properties to be measured
- evaluate a range of networking equipment and their operation
- consider legislation and licensing that govern installation of telecommunications equipment
- define spectrum allocation
- outline network operation procedures
- summarise power requirements and electrical safety
- describe transmission types and signals that may be encountered in telecommunications networks
- summarise the various tests and test equipment required for commissioning.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- sites on which installation and commissioning procedures can be conducted
- relevant regulatory and equipment documentation impacting commissioning
- testing equipment currently used in industry.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN506 Integrate new systems and equipment into the telecommunications network

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to follow predetermined procedures to ensure operability of the system while minimising impact on affected customers.

It applies to individuals working as field officers, technicians or technical supervisors, for telecommunications carriers, contractors or other service providers, who install new, additional and replacement equipment in telecommunications systems and networks, including support and administrative infrastructures for integration of new and emerging internet protocol (IP) based technologies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Plan integration strategy | 1.1 Determine nature and scope of the integration activity of systems from appropriate personnel<br>1.2 Prepare an integration management plan in agreement with |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | appropriate personnel<br>1.3 Obtain outage management plan if available, otherwise prepare a contingency plan to ensure the system integration goes according to a plan<br>1.4 Identify affected systems, traffic and customers<br>1.5 Notify alarm management centre of action planned and obtain authority to proceed<br>1.6 Notify customers affected by the outage of time and likely duration |
| 2. Integrate and test new system in the network | 2.1 Plan and conduct activities over a set of integration phases safely and according to the integration management plan<br>2.2 Load operational software according to specification to ensure interoperability of new and existing system<br>2.3 Undertake tests by simulating network traffic and ensure test results are recorded and stored according to enterprise requirements<br>2.4 Analyse test results and ensure established parameters have all been met<br>2.5 Evaluate problems during the testing phase and rectify or escalate procedure<br>2.6 Analyse alarms for fault conditions in conjunction with the network management centre<br>2.7 Locate and detect faults within capability, or escalate according to enterprise policy<br>2.8 Check operations administrative maintenance system and alarms are connected according to instruction manual<br>2.9 Activate new alarms and deactivate old alarms |
| 3. Complete administrative tasks | 3.1 Complete integration records according to manufacturer's specification and enterprise policy and make recommendations for improvement for future planning<br>3.2 Notify appropriate personnel of project completion and obtain sign-off |

# Foundation Skills

# Assessment Requirements for ICTTEN506 Integrate new systems and equipment into the telecommunications network

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- develop a contingency plan
- implement an integration management plan
- test systems and equipment and associated features being integrated
- apply enterprise escalation and outage procedures
- negotiate procedures and activity on the network and timing of integration
- integrate new systems and equipment to plan and specifications.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise connections to carrier infrastructure or customer interface units (CIU)
- describe electrical and/or optical properties to be measured
- consider health and safety issues, including electrical, optical and electromagnetic radiation (EMR) when working with telecommunications networks
- describe telecommunication network equipment and emerging technology networks
- evaluate suitable tests and test equipment types
- explain typical performance parameters and faults that may be encountered in network equipment and related connection and transmission media.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- sites on which integration procedures can be conducted
- relevant regulatory and equipment documentation that impacts integration
- testing equipment currently used in industry
- capacity to simulate network traffic
- a network and equipment for integration
- equipment and systems manuals, specifications and enterprise policies.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN507 Cut over new and replacement network equipment

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to check plans, obtain equipment and supplies, initiate tests and complete administrative tasks.

It applies to individuals who may be field officers, technicians or technical supervisors for carriers, contractors or other service providers, who are involved in fast changeover of new and existing equipment in telecommunications networks, including digital switching and transmission, wireless and optical networks.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Plan cut over strategy | 1.1 Determine the nature and scope of cut over activity from appropriate personnel<br>1.2 Prepare a cut over management plan in agreement with appropriate personnel and in line with regulations and service obligations<br>1.3 Obtain outage management plan if available, otherwise prepare a |

# Assessment Requirements for ICTTEN507 Cut over new and replacement network equipment

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- develop and implement a cut over plan and an outage plan
- develop a contingency plan
- apply enterprise escalation and outage procedures
- cut over and test network equipment within an industry acceptable time period.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain electrical and optical properties to be measured
- determine appropriate legislation and licensing surrounding installation of telecommunications equipment
- summarise power requirements and electrical safety
- evaluate types of test equipment and testing procedures suitable for tests to be performed
- explain transmission hierarchy and switching principles
- outline transmission type and signals that may be encountered.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a network and equipment for cut over
- equipment currently used in industry

© Commonwealth of Australia, 2025 Future Skills Organisation

- systems manuals, specifications and enterprise policy.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN508 Locate, diagnose and rectify complex faults

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to identify faults in upstream or downstream services that may require involvement of third party providers.

It applies to individuals working as telecommunications officers, installers, maintenance staff, and manufacturer or equipment specialists. They must work closely with other personnel and rectify technical faults in a timely manner.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare to locate and rectify complex faults | 1.1 Prepare for given work according to relevant legislation, codes, regulations and standards<br>1.2 Notify client to arrange site access<br>1.3 Obtain and interpret results of any action taken by first fault repairer<br>1.4 Obtain fault history to establish any fault patterns |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.5 Obtain all available data on system equipment to assist with fault diagnosis<br>1.6 Develop strategies for identification and repair in discussion with other engineering and technical personnel<br>1.7 Obtain tools and test equipment relevant to the identified system type and fault<br>1.8 Set up equipment according to manufacturer's specifications and safe work practices and reconfigure as required |
| 2. Locate and diagnose faults | 2.1 Use methodical and safe work practices suitable for system and problem type to identify system fault<br>2.2 Isolate and test fault progressively to remove likely variables from assessment, and record test results<br>2.3 Refer faults that may involve third party services, if required<br>2.4 Diagnose fault in the shortest time possible with minimum inconvenience to other client activity<br>2.5 Provide regular progress reports to clients<br>2.6 Raise fault identification to a national support level within a specified timeframe, if required<br>2.7 Undertake guidance from national support in fault diagnosis as required<br>2.8 Negotiate any necessary system downtime with clients |
| 3. Rectify fault | 3.1 Determine options to rectify fault including any system downtime and present to client for decision<br>3.2 Rectify fault totally, partially or provide temporary solution<br>3.3 Replace or repair faulty parts or equipment according to service agreement<br>3.4 Reprogram equipment as required<br>3.5 Dismantle and remove any temporary service in a safe and efficient manner where appropriate<br>3.6 Perform repair under national support guidance as required<br>3.7 Perform routine checks to identify likelihood of further or likely problems<br>3.8 Rectify any further problems identified, or bring to the attention of the customer for decision on further action |
| 4. Clean up worksite and complete records | 4.1 Produce a report on fault diagnosis and rectification<br>4.2 Remove and dispose of waste and debris from worksite |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | according to environmental requirements<br>4.3 Ensure changes made to work area during fault repair are restored to client's satisfaction<br>4.4 Complete all records, and explain and justify faults and rectification action taken |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.3, 1.8, 3.3 | • Identifies, analyses and evaluates technical documentation including codes, standards and regulatory information |
| Writing | 1.2, 2.2, 2.5, 2.8, 3.8, 4.1, 4.4 | • Prepares clear and concise written reports and workplace documentation, incorporating technical language to communicate complex information clearly and effectively |
| Oral Communication | 1.2, 1.6, 2.5, 2.8, 3.8, 4.3 | • Liaises and negotiates with clients, repairers and technical staff using appropriate strategies to extract main ideas and information from oral texts regarding technical and operation matters<br>• Employs listening and questioning techniques to confirm understanding |
| Numeracy | 2.1, 2.2 | • Uses mathematical formulae to interpret technical data, such as specifications of equipment operations |
| Navigate the world of work | 1.1, 3.5, 4.2 | • Takes personal responsibility for adherence to legal and regulatory responsibilities and organisational polices and protocols relevant to own work |
| Interact with others | 2.6-2.8, 3.1, 3.8 | • Selects appropriate protocols and conventions for communicating with technical personnel and customers in a broad range of work contexts<br>• Collaborates with others to negotiate agreeable outcomes |
| Get the work done | 1.3-1.8, 2.1-2.4, 3.1-3.4, 3.6-3.8 | • Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context to identify and rectify technical faults |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| | | • Understands key principles and concepts underpinning design and operation of digital systems and tools, and applies these as required<br>• Implements actions according to a predetermined plan, making adjustments if necessary<br>• Makes decisions quickly and intuitively in familiar situations requiring immediate attention, drawing on past experience to identify key variables and determine the best course of action<br>• Uses analytical processes to decide on a course of action, establishing criteria for deciding between options, and seeking input and advice from others before taking action when necessary |

# Assessment Requirements for ICTTEN508 Locate, diagnose and rectify complex faults

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- methodically analyse fault details and diagnose potential faults
- conduct advanced tests to determine complex network faults
- isolate and locate faults logically
- rectify faults using appropriate organisational procedures and work health and safety (WHS) requirements
- comply with all related WHS requirements and work practices.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain fault escalation procedures
- describe the most appropriate fault-finding techniques and test equipment required
- identify fault types and rectification methods
- list safety requirements and standards
- define the function of service agreements
- outline types of networks and equipment including:
  - access
  - broadband deployment
  - cabling
  - customer premises' equipment (CPE)
  - internet protocol (IP) networks for enterprise and customer systems and installations
  - local area networks (LANs)
  - telephony

© Commonwealth of Australia, 2025 Future Skills Organisation

  - wide area networks (WANs)
- outline workplace environment and practices.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- sites on which fault diagnostics may be conducted
- testing equipment currently used in industry
- relevant regulatory and equipment documentation impacting complex fault repairs.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN509 Provide expert advice and support on complex faults

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to methodically diagnose complex faults, and organise repair or replacement of defective parts for customer premises' equipment (CPE).

It applies to individuals who work as telecommunications officers, installers, maintenance staff, and manufacturers or equipment specialists employed in an advisory and technical rectification role for commercial or residential installations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Establish background information | 1.1 Contact client to identify type of fault and occurrence<br>1.2 Obtain report of any action taken by first fault repairer and subsequent result<br>1.3 Analyse fault history to establish any fault patterns, including questioning personnel involved in previous fault repair if relevant<br>1.4 Develop strategies for identification and repair using advice from |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | other engineering and technical personnel<br>1.5 Refer to relevant legislation, codes, regulations and standards relating to repair<br>1.6 Inform customer of issues and possible solutions |
| 2. Undertake fault diagnostic | 2.1 Isolate fault progressively using a fault identification approach to remove likely variables from assessment<br>2.2 Identify fault in the shortest time possible or escalate to appropriate level<br>2.3 Seek back-up support from the product manufacturer when required |
| 3. Organise fault rectification | 3.1 Determine options to rectify fault, including any downtime, and present to customer for decision<br>3.2 Replace or repair defective parts or equipment according to service agreement<br>3.3 Reprogram equipment as required<br>3.4 Perform work safely, for both the repairer and customer<br>3.5 Dismantle and remove temporary service safely and efficiently, where appropriate<br>3.6 Provide on-site repair staff with clear and precise instructions on fault rectification where appropriate |
| 4. Document fault details | 4.1 Record details of fault and actions taken to find, repair and store for future reference<br>4.2 Advise product manufacturer of fault and repair details if applicable<br>4.3 Recommend changes to product or product model design where appropriate<br>4.4 Advise client and obtain sign-off |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance | Description |
|---|---|---|

© Commonwealth of Australia, 2025 Future Skills Organisation

| | **Criteria** | |
|---|---|---|
| Reading | 1.3, 3.2 | • Identifies, analyses and evaluates technical documentation including plans, codes, standards and regulatory information |
| Writing | 1.1, 1.4, 1.6, 2.3, 3.6, 4.1, 4.2 | • Prepares clear and concise written reports and workplace documentation incorporating technical language to communicate complex information clearly and effectively |
| Oral Communication | 1.1, 1.3, 1.4, 1.6, 2.3, 3.1, 3.6, 4.2-4.4 | • Participates in exchanges with internal and external personnel using appropriate strategies to extract main ideas and information from oral texts<br>• Employs listening and questioning techniques to confirm understanding |
| Numeracy | 2.1, 3.3 | • Uses mathematical formulae to interpret technical data and measurements relating to equipment operations |
| Navigate the world of work | 1.5, 3.4, 3.5 | • Takes personal responsibility for adherence to legal and regulatory responsibilities and organisational policies and protocols relevant to own work |
| Interact with others | 1.1, 1.4, 1.6, 2.3, 4.2, 4.4 | • Collaborates with others to achieve joint outcomes, playing an active role in negotiating positive outcomes<br>• Selects and uses appropriate conventions and protocols when communicating with customers and personnel in a range of work contexts |
| Get the work done | 1.2, 2.1, 2.2, 3.2, 3.3 | • Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context to identify and rectify technical faults<br>• Understands key principles and concepts underpinning design and operation of digital systems and tools, and applies these as required<br>• Implements actions according to a predetermined plan, making adjustments if necessary<br>• Makes decisions quickly and intuitively in familiar situations requiring immediate attention, drawing on past experience to identify key variables and determine the best course of action<br>• Uses analytical processes to decide on a course of action, establishing criteria for deciding between options, and seeking input and advice from others when necessary |

# Assessment Requirements for ICTTEN509 Provide expert advice and support on complex faults

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- methodically identify and rank likely causes of faults
- analyse and interpret test results
- apply enterprise escalation and outage procedures
- prioritise fault rectification in a timely manner and report progress
- organise repair of fault and conduct of tests to verify outcomes
- prepare documentation of fault:
  - nature
  - location
  - likely causes
  - repair methodology
  - recommendations relating to system redesign or specification.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain features and operating requirements of test equipment
- summarise information required to operate remote diagnostic equipment according to a test specification
- outline legislation, codes of practice and other formal agreements that impact the work activity
- explain manufacturer’s requirements for effective operation of equipment
- summarise specific work health and safety (WHS) requirements relating to the activity and site conditions

© Commonwealth of Australia, 2025 Future Skills Organisation

- outline test methods and performance requirements
- explain typical issues and challenges that occur on site.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- sites on which fault diagnostics may be conducted
- testing equipment currently used in industry
- relevant regulatory and equipment documentation impacting complex fault repairs.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN510 Undertake planned outage management

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to develop strategies for dealing with customers, operational staff and associated system restoration.

It applies to individuals working as network engineering staff involved with the management of planned outages resulting from the fast changeover of new and existing equipment in telecommunications networks, including digital switching and transmission, wireless and optical networks.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare for implementation of planned outage | 1.1 Determine requirements and purpose of the outage from the outage plan, obtained from relevant personnel<br>1.2 Analyse all relevant data to determine likely impact of the outage on clients and the network<br>1.3 Notify customer of outage work and disruption to service<br>1.4 Prepare for contingencies according to contingency plan, as |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | specified in the outage plan |
| 2. Implement planned outage | 2.1 Conduct and monitor outage work safely as prescribed, and implement contingency plan if required<br>2.2 Restore system to normal operational status and conduct performance tests of the system according to specifications<br>2.3 Analyse test results and certify system is operating to manufacturer's specifications<br>2.4 Notify relevant personnel of competed outage work and of service restoration |
| 3. Undertake administrative tasks | 3.1 Document problems that occurred during outage or restoration of service and report these as continuous improvement according to enterprise quality assurance policy<br>3.2 Complete required documentation and update records to reflect any changes made in the course of service restoration, according to enterprise policy |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.2, 1.4, 2.2, 2.3, 3.1, 3.2 | • Identifies, analyses and evaluates technical documentation and applies appropriate strategies to construct meaning from complex texts |
| Writing | 1.3, 2.4, 3.1, 3.2 | • Prepares clear and concise written reports and workplace documentation, incorporating technical language to communicate complex information clearly and effectively |
| Oral Communication | 1.1, 1.3, 2.4 | • Liaises and negotiates with customers and technical staff to ensure service level agreement requirements are known and can be met within timeframes<br>• Employs listening and questioning techniques to confirm understanding |
| Numeracy | 1.2, 2.3 | • Uses mathematical formulae to interpret technical data and make appropriate calculations to determine equipment calibrations |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Navigate the world of work | 2.1, 3.1, 3.2 | • Takes personal responsibility for adherence to organisational policies and protocols relevant to own work |
| Interact with others | 1.1, 1.3, 2.4 | • Selects and uses appropriate conventions and protocols when communicating with customers and personnel in a range of work contexts |
| Get the work done | 1.4, 2.1, 2.2 | • Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context to implement outage management plans and contingency plans<br>• Understands key principles and concepts underpinning design and operation of digital systems and tools, and applies these as required<br>• Makes decisions quickly and intuitively in familiar situations requiring immediate attention, drawing on past experience to identify key variables and determine the best course of action<br>• Uses analytical processes to decide on a course of action, establishing criteria for deciding between options |

# ICTTEN511 Administer a data communications network

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to establish and configure a data communications network, maintain systems and applications, administer user accounts and diagnose and isolate system faults.

It applies to individuals working as technical staff who administer a local area network (LAN) or wide area network (WAN). They may make use of enterprise procedures and flow charts, and third party test routines analysing performance and functionality of a live data communications network.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Install and configure network | 1.1 Prepare and confirm, with relevant personnel, the physical and logical structure of a LAN design to resolve hardware and software compatibility conflicts<br>1.2 Prepare file server and install network server software<br>1.3 Execute workstation boot procedures and verify network and |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | work station functionality<br>1.4 Document network physical connections and workstation characteristics |
| 2. Set up network facilities | 2.1 Configure set-up procedures for a network print server, network printer and a shared file system<br>2.2 Connect a bridge or router between two networks<br>2.3 Set up a gateway for a network<br>2.4 Set up a logical disk or volume structure |
| 3. Administer user accounts | 3.1 Create a user account and a user log script<br>3.2 Produce a document of network users for notification of their access rights and privileges<br>3.3 Add and delete users to maintain an up-to-date user list<br>3.4 Establish disk quotas for users<br>3.5 Develop common user security procedures and set up user profiles |
| 4. Install common applications | 4.1 Install and configure an application in client-server mode<br>4.2 Establish security and multiple access to an application<br>4.3 Set up and configure an email client and browser for the client |
| 5. Install and configure systems applications | 5.1 Configure a backup system for redundancy, according to customer policy<br>5.2 Administer disk fault tolerance and redundancy techniques |
| 6. Maintain system integrity | 6.1 Implement system integrity and system monitoring techniques to provide a reliable customer data network<br>6.2 Use diagnostic software to detect and isolate system faults<br>6.3 Produce a report on network performance and fault occurrence for the customer, with recommendations for improving the integrity of the data communications network |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

© Commonwealth of Australia, 2025 Future Skills Organisation

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 5.1 | • Identifies, analyses and evaluates technical documentation, such as software and hardware manuals and specifications and relevant enterprise policy and documentation |
| Writing | 1.1, 1.4, 3.1-3.3, 3.5, 6.3 | • Prepares clear and concise written reports and workplace documentation, incorporating technical language, to communicate complex information clearly and effectively |
| Oral Communications | 1.1 | • Establishes and maintains complex and effective communications in a broad range of contexts |
| Numeracy | 1.3, 3.4, 6.1 | • Analyses and synthesises highly embedded mathematical information while testing and analysing results |
| Get the work done | 1.1-1.3, 2.1-2.4, 3.1, 3.4, 3.5, 4.1-4.3, 5.1, 5.2, 6.1, 6.2 | • Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context to organise and implement testing and contingency plans<br>• Uses digital technologies and systems to enter, store and present data, and diagnose faults<br>• Uses intuition, analysis and lateral thinking processes to make decisions about complex issues |

# Assessment Requirements for ICTTEN511 Administer a data communications network

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- establish and configure a data communications network
- set up and maintain systems, facilities, applications, and software
- administer user accounts
- diagnose and isolate system faults.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- determine features and operating requirements of data communications software and hardware for network systems
- outline manufacturer's requirements of testing software and equipment
- summarise test methods and performance requirements
- describe typical issues and challenges that occur when administering a data communications network.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- sites where communications network and systems user accounts can be administered
- equipment currently used in industry
- relevant regulations and company policies impacting communications network activities.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to design and implement infrastructure required to enable enterprises to use voice over internet protocol (VoIP) and other packet-based services using converging network technologies.

It applies to individuals who combine significant technical expertise with a range of analytical, research and planning skills to develop and tailor internet protocol (IP) convergence solutions for particular business needs.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Plan and design VoIP infrastructure to meet business requirements | 1.1 Ascertain end-user requirements in consultation with client<br>1.2 Select VoIP infrastructure in line with business and end-user requirements, within budget limitations<br>1.3 Select protocols for converged networks<br>1.4 Select hardware, software, network and security requirements |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | according to agreed business and end-user specifications<br>1.5 Investigate factors affecting bandwidth and calculate bandwidth usage for various codecs, including considerations of overhead, connection quality and connection speeds |
| 2. Install and configure VoIP infrastructure to meet business requirements | 2.1 Implement telephone number mapping (ENUM), number portability, end-point addressing, path selection, calling classes and overlapping number ranges<br>2.2 Install, configure and test gatekeepers<br>2.3 Install and test convergent terminal equipment and software<br>2.4 Install software, and configure and test VoIP services<br>2.5 Configure security access levels to safeguard data, making use of appropriate tools |
| 3. Configure UC network | 3.1 Obtain topology and components of UC network<br>3.2 Analyse potential of IP multimedia subsystem (IMS) network architecture to enable convergence of voice, video and data applications and various mobile network technologies over IP based layer<br>3.3 Incorporate use of a communications server to provide real-time multimedia communications<br>3.4 Select common video conferencing codecs according to standards and practices<br>3.5 Select voice and video conferencing hardware<br>3.6 Implement IP-private branch exchange (PBX) functionalities in the UC network |
| 4. Test and evaluate performance of convergent networks | 4.1 Develop possible network congestion solutions for common network congestions to meet the specified quality of service (QoS)<br>4.2 Provide solutions for problems with contacting emergency services<br>4.3 Analyse network traffic and resolve problems using packet sniffer, monitoring software and hardware solutions<br>4.4 Troubleshoot convergent communications over wireless networks<br>4.5 Analyse types and effects of attacks, including man-in-the-middle attacks<br>4.6 Plan ways to counteract denial of service (DoS) and distributed DoS (DDoS) attacks<br>4.7 Predict the impact of virtual local area network (VLAN) |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | hopping, media access control (MAC) address movements, additions and changes on network |
| 5. Test and verify security access levels | 5.1 Analyse types of intrusion detection<br>5.2 Monitor and evaluate capability and reliability of security systems<br>5.3 Make system alterations to ensure protection against known and potential threats<br>5.4 Verify and test user settings conform to security policies<br>5.5 Back-up, upgrade and scan systems to minimise attacks |
| 6. Complete documentation and sign-off procedures | 6.1 Complete required records and notify client<br>6.2 Remove installation waste and debris from worksite and dispose of according to environmental requirements to maintain safe worksite conditions<br>6.3 Reinstate site according to client and company requirements |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 3.4 | • Identifies, analyses and evaluates standards to determine information and communications technology (ICT) requirements |
| Writing | 6.1 | • Prepares clear and concise workplace documentation incorporating technical language to communicate complex information clearly and effectively |
| Numeracy | 1.2, 1.5 | • Uses mathematical formulae and calculations to estimate project costs and bandwidth requirements |
| Navigate the world of work | 6.2, 6.3 | • Takes personal responsibility for adherence to legal and regulatory responsibilities and organisational policies and protocols relevant to own work |
| Interact with others | 1.1, 6.1 | • Selects and uses appropriate conventions and protocols when communicating with customers in a range of work contexts |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Get the work done | 1.2-1.5, 2.1-2.4, | • Develops plans for complex, high impact activities with strategic implications<br>• Implements actions according to a predetermined plan, making adjustments if necessary and addressing unexpected issues<br>• Selects and uses digital technologies and systems to achieve work goals and enhance work processes<br>• Demonstrates a sophisticated understanding of principles, concepts, language and practices associated with the digital world<br>• Uses systematic, analytical processes in complex, non-routine situations, setting goals, gathering relevant information and identifying and evaluating options against agreed criteria |

# Assessment Requirements for ICTTEN512 Design and implement an enterprise voice over

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- design and implement infrastructure for enterprise voice over internet protocol (VoIP) and unified communications (UC) systems to meet business requirements using converged networks
- evaluate network traffic protocols and bandwidth considerations
- configure a UC network
- assess performance of convergent networks
- test and verify security access levels.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- compare session initiation protocol (SIP), H.323 protocol and media gateway control protocol (MGCP) or media gateway control (Megaco)
- define latency, jitter and wander, and implement methods for reducing or eliminating them using jitter buffer, quality of service (QoS), traffic shaping and virtual local area networks (VLANs)
- describe the format of a SIP uniform resource identifier (URI)
- evaluate and implement SIP trunking to connect enterprise internet protocol (IP)-based communications systems over long distances
- identify common G.7xx codes and describe the impact of compression on voice quality
- define components of SIP
- examine functions of signalling protocols for converged networks
- summarise the following:
  - the client business domain, business function and organisation

© Commonwealth of Australia, 2025 Future Skills Organisation

- current and emerging industry accepted hardware and software products
- current and emerging transmission technologies and protocols
- networking technologies.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a live network
- networked computers
- network design documentation
- equipment specifications
- network components.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN513 Install, configure and test a local area network switch

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to undertake local area network (LAN) switch installation, configuration and testing in field work. It also applies to switching protocols and diagnostics required for integrating new and converging functionalities to the network.

It applies to individuals, employed by telecommunications companies and information communications technology (ICT) networking provisioning companies, who carry out installation, maintenance and upgrade of ICT networks.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare to install the network switch | 1.1 Prepare for installation in line with site-specific safety requirements and enterprise work health and safety (WHS) processes and procedures<br>1.2 Notify customer to arrange site access |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.3 Document the topology of the LAN<br>1.4 Obtain current and future network capacity predictions according to current and future business requirements from the appropriate person<br>1.5 Specify the number and type of switch required, with reference to future network requirements<br>1.6 Specify requirements for network management and security, as prescribed by organisational policy<br>1.7 Select the switch and switch operating system software version with appropriate features according to required specifications |
| 2. Install and configure the network switch | 2.1 Assemble, rack mount and connect switch and peripherals according to manufacturer's requirements<br>2.2 Connect user to access points using cable that meets appropriate standard<br>2.3 Establish a valid network connection with other network devices<br>2.4 Configure a network internet protocol (IP) address for the switch<br>2.5 Install or configure simple network management protocol (SNMP) agent software, on each switch, to collect network traffic data for the management information base (MIB) from that segment of the network and relay it to the management console<br>2.6 Install and configure SNMP management console software on a computer designated to be the network manager's main console, to collect network traffic data from the switch acting as agents<br>2.7 Manually configure user access ports of the switch for speed and full or half-duplex operation |
| 3. Test the network switch and reconfigure the network | 3.1 Test the switch and other network devices according to manufacturer's requirements and organisational guidelines<br>3.2 Test to ensure connectivity across the network<br>3.3 Modify the network to verify SNMP management software<br>3.4 Make adjustments to the network, depending on test and troubleshooting results |
| 4. Complete documentation and clean worksite | 4.1 Tabulate test results and complete all user reports<br>4.2 Complete report and notify client of network status<br>4.3 Clean up and restore worksite to client's satisfaction<br>4.4 Secure sign-off from appropriate person |

© Commonwealth of Australia, 2025 Future Skills Organisation

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.6, 1.7, 2.1, 2.2, 3.1 | • Organises, evaluates and critiques information from a range of policy, technical and instructional material |
| Writing | 1.3, 4.1, 4.2 | • Prepares clear and concise workplace documentation incorporating technical language to communicate complex information clearly and effectively |
| Oral Communication | 1.2, 1.4, 4.2 | • Uses active listening, observational and questioning techniques to identify different perspectives and confirm, clarify or revise understanding |
| Numeracy | 2.7 | • Uses mathematical formulas and calculations to take test measurements, interpret results and evaluate performance and interoperability of network |
| Navigate the world of work | 1.1, 4.3 | • Takes personal responsibility for adherence to legal and regulatory responsibilities relevant to own work |
| Interact with others | 4.2-4.4 | • Selects and uses appropriate conventions and protocols when communicating with customers |
| Get the work done | 1.5, 1.7, 2.1-2.4, 2.7, 3.1-3.4 | • Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context for complex, high-impact activities with strategic implications<br>• Selects and uses digital technologies and systems to achieve work goals and enhance work processes<br>• Implements actions according to a predetermined plan, making adjustments if necessary and addressing unexpected issues<br>• Uses analytical and lateral thinking techniques for identifying issues, generating and evaluating possible solutions |

# Assessment Requirements for ICTTEN513 Install, configure and test a local area network switch

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- plan and prepare for the local area network (LAN) switch installation task
- select a LAN switch to meet client business specifications
- install switches without the network losing connectivity or failing
- install and test switch that ensures interoperability within the network
- use a range of switch configurations
- apply solutions to a variety of switch-related problems
- report on status of completed installation
- seek sign-off from customer.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe advantages and disadvantages of switches over hubs
- identify and evaluate the impact of pertinent sections of the Australian Computer Society Code of Ethics in relation to network switches
- describe common network cable types and connectors
- summarise common network topologies
- explain differences between standard and intelligent (i.e. configurable) switches, and between switches and hubs
- outline the importance of client documentation prepared when installing networks
- explain how to provide the network with redundant paths for reliability and how routers and switches manage these paths.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a site where switch installation can be conducted
- field measurement equipment currently used in industry
- relevant switch specifications, technical requirements for a network, switch, cabling, networked (LAN) computers, workstations, servers and a wide area network (WAN) service point of presence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN514 Install, configure and test a server

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to undertake work on a server as part of an upgrade to an existing network or during the implementation of a new network.

It applies to individuals, employed by telecommunications and information communications technology (ICT) networking provisioning companies, who carry out installation, maintenance and upgrade of ICT networks.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

# Assessment Requirements for ICTTEN514 Install, configure and test a server

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- analyse server and network operational issues
- apply user applications and relate to user needs when configuring a server
- create technical and user documentation
- install and configure server
- test server and reconfigure network
- troubleshoot server and network failures.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the Australian Computer Society Code of Ethics
- describe the following aspects of a common network:
  - cable types and connectors
  - topologies
- explain compatibility issues and resolution procedures
- summarise desktop applications and operating systems
- outline documentation requirements for networks
- describe typical enterprise communication and training systems for staff involved in deployment
- outline features of:
  - current network operating systems (NOS)
  - current server applications compatibility issues and resolution procedures
- outline implementation and configuration of servers

© Commonwealth of Australia, 2025 Future Skills Organisation

- explain system back-up procedures.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a site where server installation may be conducted
- relevant server specifications
- cabling
- networked local area network (LAN) computers
- server diagnostic software
- switch
- technical requirements for a network
- wide area network (WAN) service point of presence
- workstations
- relevant regulatory documentation impacting installation activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN515 Dimension and design a radio frequency identification system

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to carry out installation, maintenance and upgrade of information and communication technology (ICT) networks.

It applies to individuals employed by telecommunications and ICT networking provisioning companies specialising in radio frequency identification (RFID) technology. These individuals might work on upgrades to existing systems or be involved in implementation of new logistical or security networks using RFID technology according to design specifications.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare to dimension and design an RFID system | 1.1 Obtain the client's business requirements of the intended RFID system to effectively inform the new design<br>1.2 Research RFID technologies, their functionalities and different implementations of configurations<br>1.3 Select suitable software and hardware types to ensure the |

# Assessment Requirements for ICTTEN515 Dimension and design a radio frequency identification system

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- adapt radio frequency identification (RFID) technologies to a specified plan and design
- evaluate RFID client specifications against accepted industry practices
- include RFID architecture across a secure environment
- integrate RFID information into business applications
- produce design information in configuring the network with internet protocol (IP) addressing
- produce information that can be shared between businesses
- make recommendations and offer optimum design solutions.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise the business process design
- summarise the client's business operations, business function and organisation
- outline compatibility issues with existing system and resolution procedures
- explain configuration of IP networks
- describe desktop applications and operating systems as required
- explain the linkage between operational processes
- summarise network protocols and operating systems
- outline network topologies
- summarise radio spectrum and RFID frequencies
- explain radio frequency (RF) interference
- describe general characteristics of RFID architecture

© Commonwealth of Australia, 2025 Future Skills Organisation

- provide a detailed summary of RFID hardware and software
- outline RFID technologies incorporating substantial depth in network operating systems, protocols, interrogators and sensors, wireless technologies and cabling standards
- demonstrate RFID product knowledge
- summarise security protocols, standards and data encryption.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a suitable telecommunications site
- client's functional requirements
- RFID equipment specifications
- database software
- simulation software
- organisational guidelines
- network or computer layout documentation and premises plans.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.2, 2.1, 4.2 | • Organises, evaluates and critiques workplace documentation from a range of complex texts |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Writing | 1.5, 2.6, 3.4, 4.3 | • Prepares clear and concise workplace documentation including reports and design solutions incorporating technical language to communicate complex information clearly and effectively |
| Oral communication | 1.4 | • Uses active listening, observational and questioning techniques to identify different perspectives and confirm, clarify or revise understanding |
| Numeracy | 3.2 | • Uses mathematical formulas and calculations to interpret business costs and evaluate possible technical design solutions |
| Interact with others | 1.1, 1.2, 1.4, 1.5, 4.1, 4.3, 4.4 | • Recognises and applies protocols governing what to communicate, with whom and how in context of own work<br>• Selects appropriate communication protocols and conventions in a broad range of work contexts |
| Get the work done | 1.3, 2.1-2.5, 3.1, 3.3 | • Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context for complex, high-impact activities with strategic implications<br>• Demonstrates a sophisticated understanding of principles, concepts, language and practices associated with the digital world and uses these to understand uses and potential of technology<br>• Implements actions according to a predetermined plan, making adjustments if necessary and addressing unexpected issues<br>• Considers strategic and operational potential of digital trends to achieve work goals, enhance work processes and enhance solutions<br>• Uses formal, analytical and lateral thinking techniques for identifying issues, generating and evaluating possible solutions |

# Assessment Requirements for ICTTEN516 Produce technical solutions from business specifications

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- adapt technologies for required technical solutions
- use site design software and hardware
- evaluate client specifications against accepted industry practices
- develop technical solutions from business specifications
- document information that can be shared between businesses
- apply design concepts to business solutions
- document technical reports
- make recommendations and offer optimum design solutions.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the client business domain, business function and organisation
- explain compatibility issues and resolution procedures
- outline configuration of internet protocol (IP) networks
- describe common desktop applications and operating systems
- explain how to document technical specifications
- summarise security protocols, standards and data encryption
- explain the role of the following technologies in business systems:
  - network topologies
  - network protocols and operating systems
  - radio frequency (RF) networks
  - optical networks

© Commonwealth of Australia, 2025 Future Skills Organisation

- mobile cellular networks
- core networks
- access networks
- radio frequency identification.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- client functional requirements
- business specifications
- database software
- simulation software
- organisational guidelines
- network and computer layouts
- site design software and hardware
- information on a range of ICT business solutions.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN517 Plan a wireless mesh network

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to design a scalable wireless access network using mesh technology for growing communities to provide users with secure wireless roaming beyond traditional wireless local area network (LAN) boundaries, and which are readily deployed in areas that lack wired backhaul.

It applies to individuals who have proficient technical skills such as planning and field officers from private and public organisations who undertake work on wireless networking or radio communications equipment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Research wireless mesh networks and formulate the system architecture | 1.1 Confirm, with regulatory spectrum management authority, the specific regulations regarding radio characteristics<br>1.2 Contact customer to determine wireless mesh network design specifications<br>1.3 Evaluate the use of frequency bands for operation of the wireless |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | mesh networks (WMN)<br>1.4 Evaluate and select wireless technology, internet protocol (IP) version and mesh routing protocol to satisfy design criteria<br>1.5 Specify and source hardware and software requirements |
| 2. Prepare a detailed plan for the mesh network | 2.1 Evaluate the maximum line of sight distances achievable between backbone nodes and between mesh nodes<br>2.2 Plan sites where mesh nodes will be located and plot to scale on a map<br>2.3 Estimate quantity and length of the links required between mesh nodes to ensure design is within specifications<br>2.4 Design backbone links in mesh topology for scalability of future deployments<br>2.5 Select location of the internet gateway for the network<br>2.6 Allocate operating frequencies at mesh nodes, backbone nodes and wireless access points for optimum network performance with minimal interference from adjacent network routers |
| 3. Plan IP addresses and subnet mask | 3.1 Produce an addressing scheme and allocate IP addresses and subnet mask to mesh nodes, backbone nodes and access points<br>3.2 Produce a configuration scheme to secure network |
| 4. Document the mesh network | 4.1 Document plans and drawings for the mesh network<br>4.2 Produce an installation plan for building the mesh network<br>4.3 Following installation, configuration and testing of the mesh network, incorporate 'as built' amendments, if appropriate |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.3, 1.4, 2.1, 4.1 | • Critically analyses plans and other documentation from a variety of sources, and consolidates information to evaluate requirements |
| Writing | 1.5, 3.2, 4.1, 4.2 | • Prepares clear and concise workplace documentation |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| | | including reports and design solutions incorporating technical language to communicate complex information clearly and effectively |
| Numeracy | 2.1-2.4 | • Performs calculations, interprets results and evaluates different types of technical data for design solutions |
| Oral Communication | 1.1, 1.2 | • Uses active listening, observational and questioning techniques to identify different perspectives and confirm, clarify or revise understanding |
| Interact with others | 1.1, 1.2 | • Recognises and applies protocols governing what to communicate, with whom and how, in own work context |
| Get the work done | 1.3-1.5, 2.1, 2.2, 2.4-2.6, 3.1, 4.3 | • Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context for complex, high-impact activities with strategic implications<br>• Selects and uses digital technologies and systems to achieve work goals and enhance work processes<br>• Implements actions according to a predetermined plan, making adjustments if necessary and addressing unexpected issues<br>• May use formal, analytical and lateral thinking techniques for identifying issues, generating and evaluating possible solutions |

# Assessment Requirements for ICTTEN517 Plan a wireless mesh network

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- evaluate and select wireless technology and mesh routing protocol
- plan a wireless mesh network from a project brief
- produce an internet protocol (IP) addressing scheme
- prepare an installation plan.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- evaluate antenna gain and polarisation
- outline cable loss
- conduct calculations for effective isotropic radiated power (EIRP)
- calculate line of site radio range
- explain decibels and related units
- summarise IP addressing and subnet masks
- explain network security and firewalls
- outline a range of network topologies
- summarise radio frequency (RF) bands
- explain routing protocols
- clarify transmission control protocol (TCP)-IP protocols
- explain wireless networking hardware, access points, wireless routers and gateway
- explain wireless protocols.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- sites where planning a wireless mesh network may be conducted
- design criteria and other site-related documentation
- equipment specifications and technical documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN601 Undertake qualification testing of new or enhanced equipment and systems

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to inspect and test international telecommunications network equipment not previously installed in an Australian network. It involves assessing its suitability and compliance with local regulations and conditions for the carrier or asset owner.

It applies to individuals working as field officers, technicians or technical supervisors for carriers, contractors or other service providers, who verify compliance of new equipment or systems with Australian standards.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Ensure conformity of international design to Australian standards | 1.1 Assess original international design to verify compliance with relevant Australian legislation, codes, regulations and standards<br>1.2 Reconfigure international design in consultation with customer<br>1.3 Rewrite design specifications to include configuration |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | amendments |
| 2. Plan and establish test regime | 2.1 Plan type and number of tests to ensure full trial of new or enhanced design and greatest coverage for minimal tests<br>2.2 Plan and establish test environment to ensure total validity of chosen tests<br>2.3 Design test regime of proposed system to test impact on existing systems<br>2.4 Confirm test regime in consultation with planners and verify test equipment meets required standards |
| 3. Undertake tests | 3.1 Conduct and document tests including live system tests in logical and sequential order to planned test regime<br>3.2 Negotiate problems experienced during tests with system experts or designers to plan contingency activity according to enterprise policy<br>3.3 Prepare and submit trouble reports according to enterprise policy |
| 4. Analyse test results | 4.1 Analyse test results against design specifications and planned outcomes<br>4.2 Prepare a report referring major deficiencies to designers with recommendations for design change<br>4.3 Analyse minor variances, plan solutions and document changes to specifications |
| 5. Retest design changes | 5.1 Implement design and specification changes and conduct further tests as required<br>5.2 Analyse test results to verify compliance with updated design specifications<br>5.3 Document results of tests according to enterprise policy |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Reading | 1.1, 3.2, 3.3, 4.1, 5.3 | • Organises, evaluates and critiques technical specifications, legislative, regulatory and policy requirements |
| Writing | 1.3, 3.1, 3.3, 4.2, 4.3, 5.3 | • Prepares clear and concise workplace documentation including reports incorporating technical language to communicate recommendations clearly and effectively |
| Oral Communication | 1.2, 2.4 | • Uses active listening, observational and questioning techniques to identify different perspectives and confirm, clarify or revise understanding |
| Numeracy | 4.1, 5.2 | • Uses mathematical formulae to make calculations and necessary calibration changes by interpreting test results |
| Navigate the world of work | 1.1, 3.2, 3.3, 5.3 | • Adheres to organisational procedures and protocols and legal and regulatory responsibilities, and considers these when planning and undertaking work |
| Interact with others | 2.4, 3.2 | • Collaborates with others to achieve joint outcomes, playing an active role in negotiating positive outcomes<br>• Selects and uses appropriate conventions and protocols when communicating with personnel in a range of work contexts |
| Get the work done | 2.1-2.3, 3.1, 3.2, 4.3, 5.1 | • Takes responsibility for own workload, negotiating some key aspects with others<br>• Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context for complex, high impact activities with strategic implications<br>• Uses sophisticated understanding of principles, concepts, language and practices associated with the digital world to identify uses and potential of new technologies<br>• Implements actions according to a predetermined plan, making adjustments if necessary<br>• Uses formal, analytical and lateral thinking techniques for identifying issues, and generating and evaluating possible solutions |

# Assessment Requirements for ICTTEN601 Undertake qualification testing of new or enhanced equipment and systems

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- apply Australian standards to international designs
- identify customer's specific requirements
- configure and set up test regimes
- identify and conduct tests, including live system tests, and interpret and analyse results
- approach problem diagnosis systematically, eliminating causes
- re-test design changes
- prepare report, including deficiencies, analysis and recommendations.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the Australian standards applicable to system and equipment compliance
- outline necessary connections to carrier infrastructure or equipment
- evaluate the system design requiring testing
- explain network and equipment tests required for compliance
- outline common network architectures
- explain relevant international standards.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

© Commonwealth of Australia, 2025 Future Skills Organisation

- a test site where qualification testing of equipment and systems may be conducted
- equipment currently used in industry
- relevant Australian and international standards, codes, design specifications, manuals and reference materials.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN602 Undertake system administration

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to maintain the integrity of network support systems and software, for both system platforms and applications of computer systems, including local area networks (LAN) and wide area networks (WAN).

It applies to individuals, working as system administration support officers for service providers and large organisations, who manage and administer networks and make recommendations for improved customer support.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Undertake proactive maintenance of system | 1.1 Prepare methodology to undertake platform database optimisation and administration effectively<br>1.2 Produce a cost-benefit analysis of database optimisation schedule to evaluate the effective return on investment (RoI) benefit to the organisation<br>1.3 Produce training instructions for new users on methodology to |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | ensure effective database optimisation and administration<br>1.4 Interrogate and monitor system platforms to determine error logs, aging time on processes, database checks and system loadings<br>1.5 Notify appropriate personnel of problems and provide advice and guidance on likely solutions<br>1.6 Conduct system measurements from a user perspective on response times, and initiate investigations on problems where specifications are not being met<br>1.7 Assess availability of data storage space and initiate appropriate action where required<br>1.8 Develop procedures for system backup and restoration, review for efficiency of operation and amend where required |
| 2. Provide application support to system users | 2.1 Produce a set of procedures for formal meetings with users on a regular basis for effectiveness to discuss user issues and provide support<br>2.2 Set up a user support network to provide responsive system administration to users on an ongoing basis as critical issues arise |
| 3. Create and delete user accounts | 3.1 Create a hierarchical user profiling system to manage user accounts effectively according to enterprise policy<br>3.2 Establish and monitor security procedures relating to access according to policy<br>3.3 Assess grounds for deletion of user accounts and determine necessary action |
| 4. Undertake special investigations | 4.1 Evaluate requests for investigation to determine detail of action required<br>4.2 Prepare activity plan including timelines, specific goals, investigative team and resources required to conduct an investigation<br>4.3 Conduct investigation methodically according to plan and record findings<br>4.4 Analyse findings and prepare and forward reports, including recommendations to the requesting body |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

© Commonwealth of Australia, 2025 Future Skills Organisation

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 3.1, 3.2, 4.4 | • Organises, evaluates and interprets technical specifications and related documentation from a range of complex texts |
| Writing | 1.2, 1.3, 1.8, 2.1, 4.2-4.4 | • Prepares clear and concise workplace documentation including training instructions<br>• Produces reports on system administration and investigations, incorporating technical language, to communicate complex information clearly and effectively |
| Oral Communication | 1.5 | • Provides verbal instructions and guidance using specific and relevant language suitable to audience<br>• Employs listening and questioning techniques to confirm understanding |
| Numeracy | 1.2, 1.6 | • Uses mathematical formulae to make statistical calculations about traffic predictions<br>• Uses mathematical formulae to complete cost-benefit analysis |
| Get the work done | 1.1, 1.4-1.7, 2.2, 3.1-3.3, 4.1-4.3 | • Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context for complex, high-impact activities with strategic implications<br>• Considers the strategic and operational potential of digital technologies to achieve work goals, enhance work processes and enhance solutions<br>• Uses digital systems and tools to enter, store and monitor data<br>• Recognises and addresses some unfamiliar problems of increasing complexity within own scope<br>• Uses formal processes to monitor implementation of solutions and reflect on outcomes |

# Assessment Requirements for ICTTEN602 Undertake system administration

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- prepare a methodology for system maintenance
- produce cost-benefit analysis and training for database optimisation and administration
- review development of training instructions
- conduct system measurements
- develop support processes for system users
- manage user accounts and security procedures
- investigate potential system administration problems and make recommendations.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise back-up systems
- demonstrate a deep knowledge of computer systems
- outline meeting procedures
- outline the common methodology for system administration
- summarise optimisation and administration of a database
- provide a summary of telecommunications monitoring tools
- explain the process for investigation requests and actions
- outline user account security and profiling system.

# ICTTEN603 Undertake network traffic management

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to monitor, analyse and improve network performance for the purpose of effectively managing traffic flow in telecommunications networks.

It applies to individuals working as field officers, technicians or technical supervisors for carriers, contractors or other service providers, who manage network traffic and make recommendations for capacity planning switching and transmission networks.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Evaluate network capacity and traffic problems | 1.1 Interrogate network alarms to identify areas of route and circuit unavailability<br>1.2 Assess planned and unplanned outages to determine network unavailability and verify restoration times<br>1.3 Interrogate system to identify traffic status using network management system |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.4 Analyse system alert to identify real and potential traffic problems<br>1.5 Analyse customer complaints and traffic measurement data to identify network problems<br>1.6 Activate and deactivate semi-permanent controls active in the network on a regular basis to simulate irregular traffic |
| 2. Develop strategies to overcome network traffic problems | 2.1 Conduct traffic measurements across all identified routes<br>2.2 Analyse results including historical data to make assessment of traffic volume requirements<br>2.3 Determine specific thresholds, loading and grading levels to alter traffic flows<br>2.4 Liaise with personnel to determine amendments to plan, based on funding parameters and budgeted levels<br>2.5 Develop strategies, based on traffic analysis and patterns, to control traffic and prevent congestion or other traffic problems<br>2.6 Develop strategies for recovery where traffic congestion occurs<br>2.7 Develop contingency plans to allow for problems during network changes |
| 3. Apply short and long term solutions | 3.1 Implement software changes according to planned strategy<br>3.2 Develop short-term ad hoc solutions where only a temporary solution is required<br>3.3 Ensure reversal action can be initiated in cases of temporary solutions<br>3.4 Implement contingency plan where required<br>3.5 Undertake monitoring of changes and take measurements to assess outcomes of variations<br>3.6 Prepare a report based on analysis of measurements for appropriate personnel with recommendations for further changes or actions<br>3.7 Review and monitor strategies regularly and initiate corrective action where required |
| 4. Detect and take action on potential traffic congestion | 4.1 Measure and analyse traffic loads to assess potential congestion problems and determine possible impact<br>4.2 Control traffic flow to prevent processor overloads<br>4.3 Evaluate potential traffic increases for impact on the network and develop contingencies to control traffic flow if required |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| 5. Provide traffic indicators for capacity planning | 5.1 Predict future potential traffic trends and requirements using data on current and historical traffic patterns<br>5.2 Identify potential network traffic problems and make recommendations to network planners<br>5.3 Complete reports with recommendations and forward to enterprise planners and account managers |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.5, 2.2, 5.1 | • Organises, evaluates and interprets technical specifications and related documentation from a range of complex texts |
| Writing | 2.5-2.7, 3.6, 5.3 | • Prepares clear and concise workplace documentation, including reports and recommendations incorporating technical language, to communicate complex information clearly and effectively |
| Oral Communication | 2.4 | • Participates in verbal exchanges using specific and relevant language suitable to audience<br>• Employs listening and questioning techniques to confirm understanding |
| Numeracy | 1.5, 2.1-2.4, 3.5, 4.1, 5.1 | • Uses mathematical formulas to interpret data and make projections about traffic flow<br>• Uses mathematical formulae to estimate and plan project costs within business budgets |
| Interact with others | 2.4, 5.2, 5.3 | • Collaborates with others to achieve joint outcomes<br>• Selects and uses appropriate conventions and protocols when communicating with personnel in a range of work contexts |
| Get the work done | 1.1-1.4, 1.6, 2.5-2.7, 3.1-3.4, 3.7, 4.2, 4.3 | • Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context for complex, high-impact activities with strategic implications<br>• Approaches problem-solving in diverse ways, recognising that there is no single formula that applies |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| | | in all situations<br>• Uses formal processes to monitor implementation of solutions and reflect on outcomes<br>• Uses digital systems and tools to enter, store and analyse data |

# Assessment Requirements for ICTTEN603 Undertake network traffic management

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- implement a contingency plan
- conduct traffic measurements
- develop contingencies to control traffic flow
- identify potential network traffic problems and make recommendations
- provide information for capacity planning.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain customer policies and service level agreements
- outline network management planning principles
- summarise traffic blocking, congestion and dimensioning principles
- explain traffic engineering
- summarise traffic patterns
- outline transmission type and signals that may be encountered
- clarify typical network topologies, switching, routing and transmission techniques
- summarise various network management systems suitable for conducting traffic evaluations.

© Commonwealth of Australia, 2025 Future Skills Organisation

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a network and equipment for traffic monitoring and management
- equipment and systems manuals, specifications and enterprise policy.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN604 Coordinate fault rectification and restoration of service following network outages

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to identify, analyse and resolve service faults by coordinating fault rectification. It describes strategies for dealing with customers, operational staff and associated system restoration.

It applies to individuals who have high-level technical skills and appropriate authority to coordinate activities of maintenance personnel and oversee compliance issues associated with service level agreements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare for restoration of client services | 1.1 Evaluate relevant data to determine the nature of the fault and extent of the outage<br>1.2 Assess impact of the fault on network and clients, and establish priority of actions to be taken<br>1.3 Analyse alarm and other network data and record details |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | according to contractual agreements and enterprise policy<br>1.4 Prepare an action plan to manage fault rectification and restoration to minimise impact on the network and affected customer<br>1.5 Provide a central point for all rectification and restoration activity and information, to coordinate action and progress<br>1.6 Prioritise service restoration based on assessment of contractual arrangements, including service level agreements with clients<br>1.7 Negotiate with client's account manager regarding repair arrangements where service level agreements cannot be met |
| 2. Implement action plan for fault rectification and service restoration | 2.1 Notify all relevant personnel and departments involved in the outage, according to enterprise policy<br>2.2 Isolate affected alarms and monitor all associated alarms to confirm no additional problems occur<br>2.3 Locate and rectify fault, following action plan backed up by contingency plan according to enterprise policy<br>2.4 Manage repair activity with appropriate technical support and adjust resource allocations or escalate if required to ensure effective restoration of network services within a specified timeline<br>2.5 Reset alarms and restore services to normal network configuration<br>2.6 Test and monitor network activity on recovery to certify effective fault clearance and service restoration |
| 3. Finalise administrative tasks | 3.1 Complete administrative tasks according to enterprise instructions<br>3.2 Notify customers of fault rectification and service restoration according to service level agreement |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.3, 1.6, 2.1, 2.3, 3.1, 3.2 | • Organises, evaluates and interprets technical readings, instructional material and workplace documentation from |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| | | a range of complex texts |
| Writing | 1.3, 1.4, 3.1 | • Prepares clear and concise workplace documentation, including reports and recommendations, incorporating technical language to communicate complex information clearly and effectively |
| Numeracy | 1.1, 1.3 | • Analyses and synthesises highly embedded mathematical information |
| Interact with others | 1.7, 2.4 | • Demonstrates understanding of what to communicate, with whom and how, in a broad range of work contexts<br>• Collaborates and cooperates with others to achieve joint outcomes |
| Get the work done | 1.2, 1.4-1.6,<br>2.2-2.6 | • Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context for complex, high-impact activities with strategic implications<br>• Uses digital systems and tools to enter, store and monitor data, and for communication purposes<br>• Uses formal, analytical and lateral thinking techniques for identifying issues, generating and evaluating possible solutions<br>• Uses formal processes to monitor implementation of solutions and reflect on outcomes |

# Assessment Requirements for ICTTEN604 Coordinate fault rectification and restoration of service following network outages

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- prepare an action plan to manage fault rectification and service restoration
- coordinate implementation of action plan and manage repair activities
- apply escalation procedures
- finalise the administrative and notification processes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline alarm conditions and areas of the network or service they impact
- clarify connections to carrier infrastructure or equipment
- summarise customer care and service level agreements and policies
- outline electrical and optical principles underpinning telecommunications
- summarise escalation procedures and list appropriate tier level contacts
- summarise legislation and licensing requirements surrounding installation of telecommunications equipment
- describe network and transmission equipment faults
- outline work health and safety (WHS) requirements and work practices relevant to fault rectification
- explain power requirements and electrical safety
- outline protection switching
- list telecommunications applications and related equipment
- provide a detailed list of relevant test equipment
- outline transmission hierarchy and switching principles

© Commonwealth of Australia, 2025 Future Skills Organisation

- summarise typical performance parameters and faults that may be encountered.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- sites where fault rectification and restoration of service may be conducted
- testing equipment currently used in industry
- manufacturer's and enterprise documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN605 Implement planned network changes with minimal impact to the customer

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to effectively upgrade network equipment, increase network capacity, install new network elements and change existing network elements. It involves control of planned routine maintenance activities on the network.

It applies to individuals with high-level technical skills, working for service providers, asset owners and contractors, who coordinate activities of maintenance personnel and address compliance issues associated with service level agreements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare for network changes plan | 1.1 Obtain relevant legislation, codes, regulations and standards for compliance when conducting work<br>1.2 Evaluate work order with relevant personnel and identify likely effects, on the network and impact on customers, of the planned |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | changes<br>1.3 Develop network engineering strategies including management of outages with involvement of the network operations centre (NOC)<br>1.4 Prepare and produce a network changes plan for approval according to enterprise practice |
| 2. Implement and test network changes prior to customer utilisation | 2.1 Implement network changes according to network engineering strategies following work health and safety (WHS) and environmental requirements with minimal impact to customer traffic<br>2.2 Conduct integration testing of newly installed equipment to ensure interoperability with existing equipment and network<br>2.3 Conduct performance test to assess network changes as stated in manufacturer's specifications and enterprise acceptance testing procedures<br>2.4 Analyse test results and rectify problems or escalate according to enterprise procedures<br>2.5 Initiate quality assurance procedures to ensure confidence in quality of processes according to enterprise policy<br>2.6 Prepare reports for the appropriate area within the enterprise |
| 3. Enable functionality of network changes to customer | 3.1 Monitor network stability prior to connecting customer traffic and take action to rectify any problems<br>3.2 Enable full functionality of network changes to customer according to the network changes plan, and monitor network to ensure continued stability<br>3.3 Prepare appropriate documentation according to enterprise requirements |
| 4. Assess and report on implementation of network changes | 4.1 Use monitoring data to evaluate performance of the network changes and impact to customers according to network engineering strategies and customer requirements<br>4.2 Document implementation of planned network changes and recommend any further improvements as part of the enterprise's quality assurance system |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

© Commonwealth of Australia, 2025 Future Skills Organisation

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 2.3-2.5, 3.2, 3.3, 4.1 | • Organises, evaluates and interprets equipment and system manuals and specifications, and relevant enterprise policy and documentation |
| Writing | 1.4, 2.6, 3.3, 4.2 | • Prepares clear and concise workplace documentation including reports and recommendations incorporating technical language to communicate complex information clearly and effectively |
| Oral Communication | 1.2 | • Uses active listening, observational and questioning techniques to identify different perspectives and confirm, clarify or revise understanding |
| Navigate the world of work | 2.1, 2.5, 4.2 | • Considers and adheres to organisational procedures and protocols and legal and regulatory responsibilities when planning and undertaking work<br>• Seeks to improve policies and procedures to better meet organisational goals |
| Get the work done | 1.1-1.3, 2.2-2.5, 3.1, 3.2, 4.1 | • Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context for complex, high-impact activities with strategic implications<br>• Uses digital systems and tools to enter, store and analyse data<br>• Considers strategic and operational potential of digital trends to achieve work goals, and enhance work processes and solutions<br>• May use formal, analytical and lateral thinking techniques for identifying issues, generating and evaluating possible solutions and escalating issues to others when appropriate |

# Assessment Requirements for ICTTEN605 Implement planned network changes with minimal impact to the customer

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- evaluate planned network changes, including impact on customer
- develop network engineering strategies to manage outages
- implement network changes
- conduct integration testing, analyse results and rectify faults
- enable full functionality of network changes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline compatibility and interoperability of system types
- explain factors affecting network stability
- identify and describe the function of network hardware
- summarise internet protocol (IP) based networks
- outline legislation and licensing requirements relevant to work activity
- provide a detailed summary of optical networks
- explain quality assurance procedures
- identify and describe the function of network software
- evaluate the test equipment suitable for tests to be made, and describe calibration procedures
- outline types of customer networks.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- sites where network changes may be conducted
- testing equipment currently used in industry
- systems manuals, specifications and enterprise policy.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN606 Manage a common channel signalling network

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to combine technical and organisational assistance to provide signalling facilities to interconnect telecommunications over trunked networks.

It applies to individuals who may be responsible for small projects or parts of larger projects to provide a reliable service to customers and who work as technical officers or engineers for private and public organisations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Analyse signalling and digital path alarms and clear network faults | 1.1 Obtain relevant legislation, codes, regulations and standards to prepare for the task<br>1.2 Activate alarm management system to produce a trouble report and verify common channel signalling (CCS) and data faults or problems<br>1.3 Investigate cause of alarm and analyse results to determine |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | appropriate repair action and allocate resources<br>1.4 Monitor repair and restoration procedures to ensure commitment to specified timelines and initiate escalation procedures as appropriate and according to enterprise procedures<br>1.5 Reset alarms on completion of repair and monitor subsequent alarms to ensure no re-occurrence of the problem |
| 2. Monitor integrity of data received on equipment ports | 2.1 Activate alarm screens and monitor port times on a regular basis to ensure procedures are running<br>2.2 Clear port blockage and problems on completion of planned works and log in appropriate database<br>2.3 Monitor repair and restoration procedures to ensure commitment to specified timelines and initiate escalation procedures as appropriate and according to enterprise procedures |
| 3. Monitor and acceptance test repair | 3.1 Verify network stabilisation throughout repair and monitor repair action to ensure minimal impact on the overall network<br>3.2 Undertake acceptance testing according to prescribed operating procedures<br>3.3 Monitor network stability on completion and refer problems to appropriate area for action<br>3.4 Block alarms for out-of-service circuits |
| 4. Coordinate CCS relationships | 4.1 Log requests for relationship change and follow up problems with appropriate support staff<br>4.2 Monitor network stability and manage loading of data until the process is completed<br>4.3 Update models and enterprise systems |
| 5. Coordinate CCS rearrangements | 5.1 Log requests for rearrangement scenarios and verify feasibility of the rearrangement<br>5.2 Enter details of rearrangement in appropriate system and update system records<br>5.3 Monitor completed work for accuracy and network stability on completion<br>5.4 Produce a copy of documentation for future reference |

© Commonwealth of Australia, 2025 Future Skills Organisation

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.2, 1.4, 2.3, 3.2 | • Organises, evaluates and interprets information from equipment and system manuals, specifications and relevant enterprise documentation |
| Writing | 2.2, 4.1, 5.1, 5.2 | • Prepares clear and concise workplace documentation, including reports and recommendations, incorporating technical language to communicate complex information clearly and effectively |
| Numeracy | 1.2, 1.3 | • Extracts and evaluates mathematical data embedded in a range of technical information |
| Navigate the world of work | 1.5, 2.3 | • Considers and adheres to organisational procedures and protocols and legal and regulatory responsibilities when planning and undertaking work |
| Interact with others | 3.3, 4.1 | • Selects and uses appropriate conventions and protocols when communicating with personnel in a range of work contexts |
| Get the work done | 1.1-1.5, 2.1, 2.2, 3.1-3.4, 4.2, 4.3, 5.3, 5.4 | • Sequences and schedules complex activities, monitors implementation and manages relevant communication<br>• Uses analytical processes to decide on a course of action, establishing criteria for deciding between options and seeking input and advice from others, if necessary<br>• Uses formal processes to monitor implementation of solutions and reflect on outcomes<br>• Uses digital systems and tools to enter, store and analyse data |

# Assessment Requirements for ICTTEN606 Manage a common channel signalling network

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- identify and implement repair action within service assurance guidelines
- analyse and interpret alarms including common channel signalling (CCS) and digital path
- apply enterprise fault management priorities and escalation procedures
- resolve problems in a methodical and logical manner
- conduct appropriate tests and interpret results.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain acceptance tests
- summarise alarm set-ups
- explain principles of the following aspects of common channel signalling (CCS):
  - architecture
  - protocols
  - signalling
  - testing
- describe CCS data and signalling pathways
- explain repair and restoration procedures
- outline switching network equipment operation.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a site with CCS network
- tests and equipment currently used in industry
- relevant legislation, codes, regulations and standards.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN607 Analyse and organise repair of highly complex telecommunications network faults

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to identify faults across all network types, with collaboration from the network operations centre (NOC), and resolve any problems.

It applies to individuals working as network engineers, telecommunications officers, installers, maintenance staff and manufacturers or equipment specialists. It also applies to NOC staff in advisory roles and technical rectification roles.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Research fault background | 1.1 Analyse current, relevant data and previous actions taken by other personnel<br>1.2 Research areas of similarity to network fault<br>1.3 Develop commercial and technical strategies with equipment vendor and NOC for diagnosing the fault |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.4 Address and discuss all work health and safety (WHS) issues with relevant personnel<br>1.5 Obtain appropriate clearance and access to network equipment, software and firmware codes where they apply |
| 2. Diagnose fault | 2.1 Apply a methodical approach to isolate and diagnose the problem<br>2.2 Simulate fault in a workshop or laboratory environment if possible<br>2.3 Seek support from the vendor while investigation progresses<br>2.4 Instruct on-site technical staff to run appropriate tests and analyse results<br>2.5 Diagnose network fault using established methodical strategies in a timely fashion without undue disruption to other services<br>2.6 Develop a plan to rectify the fault |
| 3. Organise fault rectification | 3.1 Recommend fault rectification plan to the NOC, including any outages, seek approval and adjust plans accordingly<br>3.2 Instruct on-site repairers with clear and methodical instructions on how to proceed in rectifying the fault<br>3.3 Organise replacement or repair of faulty equipment with appropriate advice from vendors and manufacturers<br>3.4 Reconfigure replaced or repaired equipment and test rectified fault to ensure required performance<br>3.5 Notify NOC, affected customers and on-site staff of fault rectification |
| 4. Report and document fault details and rectification | 4.1 Notify vendors of repair details and recommend changes to equipment design where appropriate<br>4.2 Conduct cause and effect studies and forward results to the appropriate area for necessary action<br>4.3 Complete all administrative tasks and prepare a report including deficiencies, analysis and recommendations |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

© Commonwealth of Australia, 2025 Future Skills Organisation

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.2 | • Organises, evaluates and interprets technical specifications and standards from a range of complex texts |
| Writing | 2.6, 3.1, 4.2, 4.3 | • Prepares clear and concise workplace documentation, including training instructions and reports, incorporating technical language to communicate complex information clearly and effectively |
| Oral Communication | 2.3, 2.4, 3.1, 3.2, 3.5, 4.1 | • Clearly articulates requirements using language, tone and pace appropriate to audience and environment<br>• Uses active listening, observational and questioning techniques to identify different perspectives and confirm, clarify or revise understanding |
| Numeracy | 1.1 | • Extracts and evaluates technical data, including equipment specifications |
| Interact with others | 1.3, 2.3, 3.5, 4.1, 4.2 | • Selects and uses appropriate conventions and protocols when communicating with customers, vendors or technical personnel in a range of work contexts |
| Get the work done | 1.3, 1.4, 2.1, 2.2, 2.5, 3.3, 3.4 | • Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context for complex, high-impact activities with strategic implications<br>• Demonstrates a sophisticated understanding of principles, concepts, language and practices associated with the digital world and uses these to troubleshoot and diagnose issues<br>• Uses systematic, analytical processes in complex, non-routine situations, setting goals, gathering relevant information and identifying and evaluating options against agreed criteria<br>• Uses formal, analytical and lateral thinking techniques for diagnosing issues, generating and evaluating possible solutions and escalating issues to others when appropriate |

# Assessment Requirements for ICTTEN607 Analyse and organise repair of highly complex telecommunications network faults

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- diagnose network faults using established methodical strategies without undue disruption to other services
- recommend fault rectification plan to the network operations centre (NOC)
- instruct on-site repairers
- facilitate replacement or repair of faulty equipment with appropriate advice from vendors and manufacturers
- facilitate final testing of rectified faults to ensure required performance
- prepare report including deficiencies, analysis and recommendations.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise fault escalation procedures
- explain fault-finding techniques and use of test equipment
- outline fault types and rectification
- outline the operation of integrated packet optical transport networks (P-OTNs)
- explain the use of International Telecommunication Union (ITU) ITU-T G.709 standard
- explain network protocols
- outline safety requirements and standards
- explain service agreements
- explain synchronous digital hierarchy (SDH)
- summarise transmission control protocol (TCP)-internet protocol (IP)
- summarise the following types of networks and equipment:

© Commonwealth of Australia, 2025 Future Skills Organisation

- access
- broadband deployment
- cabling
- customer premises' equipment (CPE)
- IP networks for enterprise and customer systems and installations
- local area networks (LAN)
- telephony
- wide area networks (WAN).

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a site where highly complex network faults may be demonstrated and analysed without jeopardising live traffic
- equipment currently used in industry
- design specifications and manufacturer's manuals and reference materials.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN608 Verify new software and hardware releases

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to authenticate compliance and compatibility of software and hardware to an existing system for new software and hardware releases for an existing system or new infrastructure for convergence to Next Generation Networks (NGN).

It applies to individuals with high-level technical skills who make use of software test routines and test hardware for performance to manufacturer's and design specifications.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Plan testing of new software releases | 1.1 Obtain manuals, specifications and instructions associated with new releases and identify areas of uncertainty for confirmation with the vendor<br>1.2 Plan the testing environment of the software release and likely impact with network management centre<br>1.3 Determine resources required to assist with the test, and |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | negotiate their availability<br>1.4 Determine and plan outage and notify network management centre as required<br>1.5 Notify customers of impact on the network during the test<br>1.6 Develop contingency plans to cater for likely problems during the test, including health and safety issues |
| 2. Test software and hardware units | 2.1 Load new software and conduct tests using appropriate test equipment according to vendor specifications<br>2.2 Evaluate test results to assess functionality and features of software and hardware according to vendor documentation<br>2.3 Test compatibility with existing network and take corrective action with vendor as required<br>2.4 Implement contingency plans in conjunction with network management if integrity of the network is compromised by the new release |
| 3. Undertake administrative work | 3.1 Document test results and store according to enterprise policy<br>3.2 Discuss ongoing or likely problems with the vendor and initiate follow-up arrangements to ensure a permanent solution<br>3.3 Provide clearance for software and hardware release to be put in service in the system, according to enterprise procedures |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 2.1, 2.2, 3.1, 3.3 | • Organises, evaluates and interprets technical documentation including software and hardware manuals, specifications and relevant enterprise policy and documentation |
| Writing | 1.4-1.6, 3.1, 3.3 | • Prepares clear and concise workplace documentation, including reports and recommendations, incorporating technical language to communicate complex information clearly and effectively |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Oral Communication | 1.3-1.5, 3.2 | • Clearly articulates requirements and likely challenges when engaging with enterprise personnel, customers and contractors using relevant language suitable to diverse audiences and employs listening and questioning techniques to confirm understanding |
| Numeracy | 2.2 | • Extracts and evaluates technical data, including equipment specifications during testing phase |
| Navigate the world of work | 3.1, 3.3 | • Adheres to organisational procedures and protocols when planning and undertaking work |
| Interact with others | 1.1, 1.2, 1.5, 3.2 | • Selects and uses appropriate conventions and protocols when communicating with customers, vendors or technical personnel in a range of work contexts<br>• Collaborates and cooperates with others to achieve joint outcomes |
| Get the work done | 1.1-1.4, 2.1, 2.3, 2.4 | • Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context for complex, high-impact activities with strategic implications<br>• Uses advanced features of digital systems and tools to enter, store, test and analyse data<br>• Uses systematic, analytical processes in complex, non-routine situations, setting goals, gathering relevant information and identifying and evaluating options against agreed criteria<br>• Uses formal, analytical and lateral thinking techniques for diagnosing problems, and generating and evaluating possible solutions |

# Assessment Requirements for ICTTEN608 Verify new software and hardware releases

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- develop a plan for testing new software releases, including functionality and performance under load conditions
- develop a contingency plan recognising potential causes of problems and their impact on service levels
- test compatibility of software and hardware with existing system
- analyse impact of integration of new hardware and software release on the network and make recommendations for improvement.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain features and operating requirements of testing routines and equipment, key performance indicators (KPIs) and service level agreements
- explain information required to operate software and hardware according to a test specification
- outline manufacturer’s requirements for operation of equipment
- summarise specific organisational requirements relating to the activity and site conditions
- clarify system maintenance and upgrade procedures, codes of practice and other formal agreements impacting the work activity
- explain test methods, performance and integration requirements
- summarise typical issues and challenges that occur with new software and hardware releases.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a system to verify compliance and compatibility of software and hardware
- test equipment currently used in industry
- systems manuals, vendor specifications and enterprise policy.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN609 Produce and evaluate architecture designs for convergent cellular mobile networks

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to specify design of the required mobile cellular general packet radio service (GPRS), third-generation (3G) and fourth-generation (4G) network architectures.

It applies to individuals with high-level technical skills who design and operate mobile wireless systems that meet the industry implementation of wireless convergence in telecommunications.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Plan and prepare for design of cellular mobile networks | 1.1 Analyse requirements of the mobile network<br>1.2 Examine technical characteristics of the GPRS systems<br>1.3 Develop network architecture for a GPRS network, in addition to the circuit-switched domain of 2G (Generation)<br>1.4 Review 3G structure and identify network requirements to |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | provide a wide variety of services ranging from voice and paging services to interactive multimedia, including teleconferencing and internet access<br>1.5 Examine technical characteristics, data rates, operating frequencies and multiplexing schemes of the 3G system<br>1.6 Establish positioning and types of antennas, terminals, processors, required protocols and architecture, based on technical specifications and requirements |
| 2. Design a GPRS (2.5G) cellular network | 2.1 Investigate how 2.5G GPRS overlays the GSM network to transmit and receive transmission control protocol (TCP) and/or internet protocol (IP) based data to and from GPRS mobile devices |
| 3. Design a 3G cellular network | 3.1 Develop network architecture for a 3G network and explain functions of the network elements<br>3.2 Integrate a 3G network with a wireless local area network (WLAN) |
| 4. Research and evaluate design features of proposed 4G cellular network | 4.1 Investigate how a fully IP-based 4G system will provide an end-to-end IP integrated solution for voice, data and streamed multimedia to end-users roaming anytime and anywhere<br>4.2 Investigate access schemes of a 4G network<br>4.3 Investigate the implication for Internet Protocol version 6 (IPv6) in relation to 4G support of a greater number of IP-based wireless devices with applications for improved multicast, security and route minimisation capabilities<br>4.4 Investigate use of advanced antenna systems to enable 4G with high rate, high reliability and long range communications |
| 5. Produce reports for architectural design for cellular networks | 5.1 Present a report on the impact of competing technologies on each other and get consensus on concepts<br>5.2 Investigate potential interoperability and global roaming issues that may be faced by GSM, 2.5G, 3G and 4G cellular technologies |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance | Description |
|---|---|---|

© Commonwealth of Australia, 2025 Future Skills Organisation

| | **Criteria** | |
|---|---|---|
| Reading | 1.1, 4.1-4.4, 4.6, 5.2 | • Comprehends and evaluates technical specifications to plan and prepare for complex cellular design work |
| Writing | 1.3, 5.1 | • Prepares clear and concise workplace documentation, including reports and recommendations, incorporating technical language to communicate complex information clearly and effectively |
| Oral Communication | 5.1 | • Uses specific and relevant language to clearly articulate technological issues |
| Numeracy | 1.5 | • Extracts and evaluates technical data, including equipment specifications during testing phase |
| Get the work done | 1.1-1.6, 2.1, 3.1, 3.2, 4.1-4.4, 5.2 | • Plans strategic priorities and outcomes within a flexible, efficient and effective context in a diverse environment exposed to competing demands<br>• Considers strategic and operational potential of digital trends to achieve work goals, enhance work processes and create opportunities<br>• Uses systematic, analytical processes in complex, non-routine situations, setting goals, gathering relevant information, and identifying and evaluating options against agreed criteria<br>• Uses formal, analytical and lateral thinking techniques for diagnosing problems and generating and evaluating possible solutions |

# Assessment Requirements for ICTTEN609 Produce and evaluate architecture designs for convergent cellular mobile networks

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- provide a detailed summary of the client's business domain when designing network
- provide a detailed summary of current industry-accepted network hardware and software products and their general features and capabilities, when designing a general packet radio service (GPRS) (2.5G) and 3G network
- design viable GPRS (2.5G) and 3G network solutions to meet particular business needs
- research design features of 4G cellular networks.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline general features and capabilities of current industry security products, devices and procedures
- provide detailed information regarding global system for mobile (GSM), GPRS (2.5G) and 3G network design
- provide a detailed summary of current industry-accepted cellular mobile network protocols
- summarise technical characteristics of GPRS systems including:
  - capability classes and multi-slot classes
  - coding schemes
  - data rates
  - management systems when evaluating roaming features
  - operating frequencies and modulation schemes

© Commonwealth of Australia, 2025 Future Skills Organisation

    - remote user issues when establishing siting and types of antennas, terminals, processors, required protocols and GPRS (2.5G) and 3G network architecture, based on technical specifications and user requirements
- explain concepts of three or more current industry network development and design methodologies used when designing networks.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- cellular mobile network structures
- client requirements
- expected traffic volume
- information on a range of IT business solutions
- technical specifications
- vendors and vendor offerings and pricing.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN610 Design and configure an IP-MPLS network with virtual private network tunnelling

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to design an internet protocol-multiprotocol label switching (IP-MPLS) network, examine MLPS data flow and configure virtual private network (VPN) tunnelling.

It applies to individuals with excellent technical skills including designers and installers of Next Generation Networks (NGN). These IP networks provide fast internet, voice over internet protocol (VoIP) and internet protocol TV (IPTV) services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Plan and design IP-MPLS network to meet business requirements | 1.1 Determine IP-MPLS network design requirements in consultation with enterprise customer<br>1.2 Optimise factors affecting design<br>1.3 Use label stacking to route MPLS packets in the network to build of MPLS services |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.4 Dimension layer-3 generation of core backbone to allow MPLS IP-VPN to provide MPLS convergence services<br>1.5 Use MPLS control plane to set up wavelengths<br>1.6 Produce design topology of a MPLS network to include location and types of edge label switch routers (LSR) and core LSRs in agreement with enterprise customer |
| 2. Configure MPLS network and verify traffic engineering (TE) considerations | 2.1 Configure edge and core LSRs to provide secure methods of transporting IP packets in the MPLS network using layer 2 protocols<br>2.2 Configure LSRs to provide toll bypass for convergence of voice and data over IP network<br>2.3 Classify traffic in MPLS terms and configure edge LSR to sort traffic into forward equivalent classes (FECs)<br>2.4 Install and remove two standardised signalling protocols for managing traffic engineering (TE) of MPLS paths<br>2.5 Configure MPLS-TE to provide routing on diverse paths to avoid congestion and guarantee bandwidth services |
| 3. Configure VPN and provide a virtual private LAN service (VPLS) | 3.1 Configure a MPLS VPN tunnel for a customer network to provide multipoint-to-multipoint VPN connectivity<br>3.2 Build a content hosting server into a MPLS based VPN to produce a media network<br>3.3 Use virtual private LAN services (VPLS) as a VPN method for wide area network (WAN) multipoint-to-multipoint ethernet connectivity spanning multiple metropolitan areas<br>3.4 Produce VPLS topology using an internet protocol IP-MPLS cloud with provider edge (PE) routers connecting VPLS domains associated with an enterprise customer |
| 4. Complete documentation | 4.1 Produce a final design plan including network elements, configuration details and recommendations for design changes<br>4.2 Notify customer and obtain sign-off |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance | Description |
|---|---|---|

# Assessment Requirements for ICTTEN610 Design and configure an IP-MPLS network with virtual private network tunnelling

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- plan and design a multiprotocol label switching (MPLS) network that meets business requirements
- configure and test the MPLS network according to specified guidelines
- produce design topology of a MPLS network
- produce a final design plan including network elements, configuration details and recommendations for design changes
- implement secure virtual private network (VPN) tunnelling.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explore current industry-accepted hardware and software products used in an IP-MPLS network
- explain MPLS IP-VPN network operating systems including:
  - transmission technologies
  - protocols
- describe the effect of the customer's business domain, function and organisation on customer requirements and network equipment.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering of work and include access to:

- a live network and networked computers
- network design documentation, equipment specifications and organisational guidelines
- network components, routers, switches and multi-layer switches.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN611 Produce an ICT network architecture design

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to compile and evaluate business specifications from a client, and produce a set of architecture design solutions to cater for present and future forecast demands.

It applies to individuals working in the field who carry out design and implementation of technical solutions of information communications technology (ICT) networks, employed by telecommunications and information technology networking provisioning companies specialising in integrating converging and emerging technologies of ICT networks.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare to produce ICT architecture design | 1.1 Obtain the client's business specifications and business requirements from appropriate person<br>1.2 Review specifications and requirements to identify the type of ICT network and network specifications required<br>1.3 Consult with key stakeholders to identify their requirements |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.4 Assess business problems, opportunities and objectives, and confirm details with appropriate person |
| 2. Produce preliminary ICT network architecture design | 2.1 Ascertain technical requirements, including hardware, software and network elements according to specifications<br>2.2 Select software solutions to suit business platform<br>2.3 Develop preliminary physical network diagrams as a preface to architecture blueprint<br>2.4 Produce a document on the possible impact of the network design on the business requirements |
| 3. Evaluate preliminary design and likely performance using forecast demands | 3.1 Predict forecast traffic demands, and impact on network design, from current and future demand requirements<br>3.2 Benchmark design using expected performance parameters<br>3.3 Review design's likely performance profile<br>3.4 Determine costs involved with a range of supplier products<br>3.5 Produce an evaluation report on predicted performance and costs of the network architecture design, addressing business specifications and recommendations |
| 4. Finalise network design and obtain approval | 4.1 Review benchmarks, requirements and final design proposed<br>4.2 Determine support and training requirements needed<br>4.3 Obtain latest technical specifications and pricing by contacting possible vendors<br>4.4 Document network design and present documentation to appropriate person for approval<br>4.5 Obtain sign off on final business solution |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.2, 2.1, 4.1 | • Organises, evaluates and interprets technical documentation and relevant enterprise policy and documentation |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Writing | 2.3, 2.4, 3.5, 4.4 | • Prepares clear and concise workplace documentation, including diagrammatic material, incorporating technical language to communicate complex information clearly and effectively |
| Oral Communication | 1.1, 1.3, 1.4 | • Participates in verbal exchanges using clear language and active listening, observational and questioning techniques to confirm, clarify or revise understanding |
| Numeracy | 3.4, 3.5 | • Interprets numerical information according to business requirements and specifications to evaluate possible technical design scenarios within budgetary constraints |
| Interact with others | 1.3, 4.3-4.5 | • Selects and uses appropriate conventions and protocols when communicating with stakeholders in a range of work contexts |
| Get the work done | 1.4, 2.2, 3.1-3.3, 4.2 | • Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context for complex, high-impact activities with strategic implications<br>• Demonstrates a sophisticated understanding of principles, concepts, language and practices associated with the digital world and uses this to propose solutions<br>• Uses systematic, analytical processes in complex, non-routine situations, setting goals, gathering relevant information, and identifying and evaluating options against agreed criteria<br>• Uses formal, analytical and lateral thinking techniques for diagnosing problems and generating and evaluating possible solutions |

# Assessment Requirements for ICTTEN611 Produce an ICT network architecture design

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- adapt technologies to specified technical solutions
- use site design software and hardware
- evaluate client specifications against accepted industry practices
- produce technical designs from business specifications
- analyse feedback from client and make proposal adjustments
- apply design concepts to business solutions
- produce technical reports
- make recommendations and offer optimum design solutions.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise principles of the following technologies:
  - access networks
  - core networks
  - information communications technologies (ICT) network topologies
  - mobile cellular networks
  - network protocols and operating systems
  - optical networks and principles
  - radio frequency (RF) technologies and principles
  - radio frequency identification (RFID) hardware and software
- explain what is meant in the ICT sector by business processes

© Commonwealth of Australia, 2025 Future Skills Organisation

- explain compatibility issues and resolution procedures
- summarise configuration of internet protocol (IP) networks
- outline desktop applications and operating systems
- summarise security protocols, standards and data encryption.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a site for design work
- client functional requirements
- business specifications
- database software
- simulation software
- organisational guidelines
- a network or computer layout
- site design software and hardware
- information on a range of ICT business solutions.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN612 Design and manage internet protocol TV in a service provider network

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to design a multiprotocol label switching (MPLS) network for internet protocol TV (IPTV) and manage delivery of IPTV services. This includes core and access networks for the service provider.

It applies to individuals with outstanding technical skills, including designers and installers of Next Generation Networks (NGN), IP networks providing fast internet, voice over internet protocol (VoIP), IPTV and internet TV services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Produce and evaluate design requirements for an IPTV network | 1.1 Analyse major video models and the impact video challenges have on design of an IPTV network<br>1.2 Evaluate IPTV against other competing TV broadcast technologies to determine optimum design approach<br>1.3 Produce the topology of an IPTV network, showing network architecture from IPTV standards' bodies and determine design requirements |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.4 Plan dimensioning of network parameters for multicast and unicast video delivery over broadband in a service provider network |
| 2. Design an IPTV network for video on demand (VoD) delivery | 2.1 Design the content delivery system (CDS) to cache IPTV content in each major metropolitan area for broadcast or streaming VoD models to eliminate performance variability introduced by internet transport or core peering relationships<br>2.2 Design a video network to provide VoD loads with network solutions using VoD design requirements<br>2.3 Design a VoD application to meet bandwidth requirements and quality of service (QoS) requirements for commercial viability of IPTV network |
| 3. Design and configure an MPLS IPTV network to meet business requirements | 3.1 Determine IP-MPLS network design requirements<br>3.2 Investigate factors that affect design considerations and ways they can be minimised<br>3.3 Produce the design topology of a MPLS network to provide secure methods of transporting IP packets using layer 2 protocols<br>3.4 Design a MPLS layer over the IP networking structure, to combine efficiency of multicast protocols with traffic engineering (TE) facilities to enable fast packet forwarding for real time video streaming applications |
| 4. Manage delivery of IPTV services | 4.1 Determine operational processes required to support IPTV by operators<br>4.2 Produce a plan of the management and customer support model, including strategies dealing with delivery of VoD issues<br>4.3 Produce a plan of a video network using video delivery strategies to deliver optimum average revenue per user (ARPU) to serve the demographic of an area and the nature of an operator’s business<br>4.4 Manage and monitor video across the network using a management tool |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance | Description |
|---|---|---|

© Commonwealth of Australia, 2025 Future Skills Organisation

| | **Criteria** | |
|---|---|---|
| Reading | 1.3 | • Organises, evaluates and interprets standards documentation to properly evaluate design requirements |
| Writing | 1.3, 3.3, 4.2, 4.3 | • Prepares clear and concise workplace documentation, including diagrammatic material, incorporating technical language to communicate complex information clearly and effectively |
| Numeracy | 4.3 | • Undertakes a cost-benefit analysis of services based on the nature of the operator's business and the demographic area served |
| Get the work done | 1.1-1.4, 2.1-2.3, 3.1,-3.4, 4.1-4.4 | • Uses a mix of intuitive and formal processes to identify key information and issues, evaluate alternative strategies, anticipate consequences and consider implementation issues and contingencies<br>• Experiments with possibilities of new systems, devices and applications before conducting a more sophisticated analysis of benefits and costs<br>• Uses digital tools to access and organise complex data and analyse multiple sources of information for strategic purposes<br>• Uses formal, analytical and lateral thinking techniques for identifying issues, generating and evaluating possible solutions |

# Assessment Requirements for ICTTEN612 Design and manage internet protocol TV in a service provider network

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- produce and evaluate design requirements for an internet protocol TV (IPTV) network
- design IPTV network for voice on demand (VoD) delivery
- design and configure a multiprotocol label switching (MPLS) IPTV network to meet business requirements
- manage delivery of IPTV services.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- evaluate competing video delivery over broadband networks
- explore current industry-accepted IPTV hardware and software products
- summarise networking technologies including:
  - network operating systems
  - internet protocol (IP) networks
  - MPLS networks
- explain IPTV transmission technologies and protocols.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

© Commonwealth of Australia, 2025 Future Skills Organisation

- protocols, configuration documents, management tools and standards
- network and demographic trends, and customer demand data.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN801 Plan a transmission network

## Modification History

| Release | Comments |
|---|---|
| Version 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to analyse requirements and plan a new or upgraded telecommunication transmission network or convergence to Next Generation Networks (NGN).

It applies to individuals with high-level technical skills working as technical officers, supervisors and engineers working with optical, dense wavelength division multiplexing (DWDM), fibre networks and wireless networks.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Scope the project | 1.1 Obtain and interpret relevant legislation, codes, regulations and standards including work health and safety (WHS) and environmental requirements for the given work<br>1.2 Obtain project brief from appropriate person<br>1.3 Evaluate potential transmission options and select most suitable type of transmission network that meets criteria outlined |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | in project brief<br>1.4 Analyse limitations of transmission path characteristics and develop solutions for transmission impairments<br>1.5 Produce a report outlining reasons for selection of a transmission network, together with a shortlist of suitable equipment vendors and products<br>1.6 Obtain traffic load from network information sources or forecasts, and then dimension the proposed network service<br>1.7 Produce brief on relationship between transmission network architecture components and overall network, and their impact on the work<br>1.8 Evaluate equipment type and technologies to determine availability, cost and compatibility with existing network equipment<br>1.9 Determine resources and equipment needed for work according to enterprise procedures and check for correct operation and safety<br>1.10 Assess capacity limitation of various platforms in context of the work to optimise maximum network performance<br>1.11 Determine product capability and calculate allowable capacity of transmission network to allow for network growth |
| 2. Produce link budget | 2.1 Critically analyse transmission system using equipment and vendor's specifications to produce a link budget and assess resulting margin<br>2.2 Document results of link budget analysis |
| 3. Produce deployment plan for transmission network | 3.1 Conduct planning work using current equipment components and complying with transmission network deployment rules and exemption process criteria<br>3.2 Produce preliminary plan on network deployment that maintains transmission network integrity<br>3.3 Establish a solution to unexpected situations through discussion with appropriate personnel, with consideration to job specifications, safety and enterprise procedures<br>3.4 Review plan to ensure it complies with all standards and codes required when working on network access, and make adjustments where appropriate |
| 4. Complete work | 4.1 Produce final deployment plan including recommendations agreed with customer<br>4.2 Provide report on network management and performance |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | monitoring system to be incorporated in the transmission network to ensure network is performing at optimum level |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.9, 3.4 | • Organises, evaluates and interprets complex technical and non-technical information including legislative, enterprise and policy documentation |
| Writing | 1.5, 1.7, 2.2, 3.2, 3.4, 4.1, 4.2 | • Prepares clear and concise workplace documentation, including reports and recommendations, incorporating technical language to communicate complex information clearly and effectively |
| Oral Communication | 1.2 | • Uses highly developed listening, observational and questioning skills to understand project scope and clarify and explore meaning |
| Numeracy | 1.8, 1.11, 2.1 | • Interprets numerical information to determine business costs and undertake link budget calculations, interpret results and evaluate different types of technical data |
| Navigate the world of work | 1.1, 1.9, 3.3, 3.4 | • Monitors adherence to organisational policies and protocols and legal and regulatory requirements of self and others |
| Interact with others | 1.6, 3.3 | • Selects and uses appropriate conventions and protocols when communicating with stakeholders in various work contexts<br>• Collaborates with others to achieve joint outcomes, taking the lead in identifying all issues and facilitating agreement |
| Get the work done | 1.3, 1.4, 1.8, 1.9, 1.10, 1.11, 2.1, 3.1, 3.3 | • Uses combination of formal, logical planning processes and an increasingly intuitive understanding of context for complex, high impact activities with strategic implications<br>• Demonstrates a sophisticated understanding of principles, concepts, language and practices associated with the digital world and uses these to understand uses and potential of technology<br>• Implements actions according to a predetermined plan, |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| | | making adjustments if necessary<br>• Takes responsibility for high-impact decisions in complex situations involving many variables and constraints<br>• Uses formal analytical and lateral thinking techniques for identifying issues, generating and evaluating possible solutions |

# Assessment Requirements for ICTTEN801 Plan a transmission network

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- evaluate potential transmission options and select most suitable type of transmission network
- analyse effect of transmission path characteristics on transmission systems
- develop solutions for transmission impairments
- select appropriate testing regimes for transmission technologies
- determine key multiplexing features of transmission technologies
- develop transmission network work plan.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline impact of relevant legislation, codes, regulations and standards involved with planning networks
- explain alternating current and transmission line theory
- compare emerging telecommunications switching and transmission technologies
- define network capacity and capability management
- outline capacity limitation of various platforms
- explain commercial considerations of Access Network deployment
- outline common switching and transmission support services
- explore compatibility issues for new technologies and equipment
- evaluate currency of technology and equipment under consideration
- explain data transmission
- summarise digital multiplexing techniques and hierarchies

© Commonwealth of Australia, 2025 Future Skills Organisation

- clarify enterprise deployment rules
- explain exemption process criteria
- outline network topologies
- formulate product capability and availability that are allowable within a transmission network
- establish aspects of telecommunications when planning a network, including:
  - alarm management
  - bearers
  - performance monitoring systems
  - transmission:
  - architectures and geographical categorisation
  - information sources
  - technology and equipment
- determine a cost analysis for a planned network.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the Telecommunications – Telecommunications Networks Engineering field of work and include access to:

- a site to plan transmission network
- equipment and system manuals and specifications
- legislation and documentation to plan a transmission network.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTTEN802 Manage alignment of systems with product and technology strategy

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to develop a technology roadmap and interface management system to align and integrate systems with a product and technology strategy.

It applies to individuals with technical and task management skills who measure network performance according to manufacturer's design specifications.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Develop technology roadmap | 1.1 Critically analyse market research information and determine customer needs within product and technology strategy from a technology roadmap<br>1.2 Evaluate enterprise and technology issues which will affect design of the system, and translate them into system requirements<br>1.3 Evaluate program, product and technology needs that affect |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | definition of the system life-cycle<br>1.4 Develop systems integration, verification and validation plans from the design requirements<br>1.5 Develop and communicate key aspects on implementation of the technology roadmap to stakeholders and customers |
| 2. Develop interface management of system elements | 2.1 Determine system element interfaces and sources of complexity for interface management of the system<br>2.2 Develop a process and appropriate techniques to be adopted for interface management of system elements<br>2.3 Create a control process of system element interfaces of the management system<br>2.4 Liaise and arbitrate conflicts in the interfaces definition process |
| 3. Implement systems integration | 3.1 Evaluate suitability of system integration, verification and validation plans for the product and technology strategy of the technology road map for a consumer product<br>3.2 Develop systems integration, verification and validation plans for complex systems, including method and timing for each activity<br>3.3 Manage system integration plan and diagnose complex faults<br>3.4 Document fault conditions, report to appropriate person and follow up corrective actions<br>3.5 Prepare evidence for customer acceptance and certification of the system integration management plan for consumer product<br>3.6 Plan and manage a transition to operational activity of product |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1-1.4, 3.1 | • Organises, evaluates and interprets technical documentation, software and hardware manuals, specifications and relevant enterprise policy |
| Writing | 1.4, 3.2, 3.4, 3.5 | • Prepares clear and concise workplace documentation, including diagrammatic material incorporating |

# Assessment Requirements for ICTTEN802 Manage alignment of systems with product and technology strategy

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- plan implementation and testing of new system requirements, including system functionality and performance under load conditions
- manage interface elements of a new system
- implement systems integration
- recognise potential causes of problems and service level impact
- analyse impact of integration of system changes on network
- prepare documentation for customer acceptance and certification of system integration.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise technology issues for a specified enterprise
- explain integration, verification and validation plans
- summarise interface management systems
- outline legislation, codes of practice and other formal agreements directly impacting system integration
- summarise specific work health and safety (WHS) requirements that impact activity in terms of safety of self and the general public
- explain system element interfaces
- summarise system integration solutions techniques
- explain system life cycles
- define technology roadmaps.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the Telecommunications – Telecommunications Networks Engineering field of work and include access to:

- a site where alignment of computer support systems with a product and technology strategy may be conducted
- software tools currently used in industry
- vendor products, specifications, equipment and enterprise policy required for the activity.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTTEN803 Translate domain and solution architectures into platform requirements and designs

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to develop, deploy, manage and optimise the entire solution life cycle via translation for an existing or new infrastructure of Next Generation Technology (NGN).

It applies to individuals with highly developed technical skills who use design software and simulation to test system performance to a manufacturer's or design specification.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Develop system design requirements | 1.1 Produce system requirements specifications for a complex project involving enterprise and technology issues using the simplest possible technology and making the system modular<br>1.2 Resolve and negotiate requirement conflicts to establish a complete and consistent requirement set<br>1.3 Produce and develop acceptance criteria for requirements |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.4 Design a requirements management plan with categorisations, structures and sources of complexity<br>1.5 Develop a process to manage requirements, enabling users to influence future improvements |
| 2. Produce system design based on requirements | 2.1 Evaluate strengths and weaknesses of relevant technologies in context of the design requirement and needs for systems integration<br>2.2 Create range of alternative interdisciplinary concepts and assess their attributes<br>2.3 Plan for incorporation of later life-cycle design attributes while developing design requirements<br>2.4 Devise a system design strategy and approach, using tools and techniques to conduct functional analysis<br>2.5 Produce a set of parameters to track critical aspects of the design<br>2.6 Use documentation, modelling and simulation tools and techniques to represent a system or system element<br>2.7 Use complex simulations to evaluate design concepts for a system or system element<br>2.8 Produce a report to evaluate and advise on risks, suitability and limitations of models and simulations<br>2.9 Identify underlying domain-specific issues, strategy and approach to be adopted for ensuring system robustness<br>2.10 Produce a robust design using domain-specific strategy and approach for platform requirements and designs |
| 3. Verify solution design and traceability | 3.1 Align specific aspects of the design to original intent<br>3.2 Verify and track specific aspects of current design against original intent throughout the supply chain<br>3.3 Compare verification requirements with system requirements<br>3.4 Use change control and configuration management to implement remedial actions and change control for inconsistencies |

# Foundation Skills

# Assessment Requirements for ICTTEN803 Translate domain and solution architectures into platform requirements and designs

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- develop system design requirements
- evaluate design concepts for system or system element using complex simulations
- produce a system design using domain specific strategy to platform requirements and design
- use functional analysis tools
- verify solution design and traceability.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain complex simulation techniques
- summarise current enterprise platforms and designs
- outline design of management plans
- explain domain and solution architectures
- determine and summarise technological issues for a specified enterprise
- outline information required to simulate computer system elements according to a test specification
- explain interdisciplinary concepts and attributes
- explain life cycle design attributes
- contrast remedial actions and select control for inconsistencies
- explain solution design and traceability
- provide a detailed summary of tools required to conduct functional analysis.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the Telecommunications – Telecommunications Networks Engineering field of work and include access to:

- a site where development, deployment, management and optimisation of domain and solution architectures into platform requirements and designs can be undertaken
- documentation, modelling and simulation tools currently used in industry
- tests and equipment currently used in industry.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTTEN804 Manage end to end architectural solutions across multiple domains

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to analyse business options and design for network infrastructure service providers and implement end-to-end architectural solutions.

It applies to individuals with excellent technical, communication and planning skills working in project management roles with authority to direct installation activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Evaluate tools and techniques for architectural design | 1.1 Apply principles of architectural design within the life cycle of application software<br>1.2 Develop a process to apply appropriate tools and techniques for architectural design of end-to-end solutions<br>1.3 Evaluate and select appropriate analysis and selection techniques to develop a partition between discipline technologies and derive discipline-specific requirements |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| 2. Analyse design options for optimal solutions | 2.1 Critically analyse business options to support architectural design trade-offs for an optimal design solution<br>2.2 Develop alternative architectural designs traceable to the requirements<br>2.3 Evaluate a range of architectural solutions and justify selection of the optimum solution |
| 3. Develop interface requirements for effective solutions across multiple domains | 3.1 Evaluate system element interfaces and sources of complexity for interface management of the system across multiple domains<br>3.2 Develop a process and appropriate techniques to be adopted for the interface management of system elements for end-to-end architectural solutions<br>3.3 Produce a control process for system element interfaces of the management system<br>3.4 Liaise and arbitrate between stakeholders where there are conflicts in the definition of interfaces |
| 4. Manage end-to-end systems integration | 4.1 Evaluate suitability of system integration, verification and validation plans for end-to-end architectural solutions across multiple domains<br>4.2 Develop systems integration, verification and validation plans for complex systems to ensure a viable integration process<br>4.3 Manage system integration plan and diagnose complex faults<br>4.4 Document fault conditions, report to appropriate person and follow up corrective actions<br>4.5 Prepare evidence for customer acceptance and certification of the system integration management plan<br>4.6 Plan and manage a transition to operational activity for the end-to-end solution |
| 5. Incorporate components of an architecture from a third party | 5.1 Negotiate with vendor for acceptable vendor agreements and agreed roles and responsibilities of each party<br>5.2 Manage vendor within a clearly defined process for dealing with defects and scope changes<br>5.3 Plan beyond delivery of specific elements and establish requirements for ongoing maintenance and support from vendor |
| 6. Manage requirements for the architecture solution | 6.1 Negotiate minimum component costs with vendors and analyse vendor component costs as part of assessment for the appropriateness of vendor’s quote |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 6.2 Manage vendor selection process to provide high-quality solutions within appropriate costings |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 2.1 | • Organises, evaluates and interprets a range of complex documentation to evaluate product and technology needs |

# Assessment Requirements for ICTTEN804 Manage end to end architectural solutions across multiple domains

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- evaluate tools and techniques for architectural design
- analyse design options for optimal solutions
- develop interface requirements for effective solutions across multiple domains
- manage end-to-end systems integration
- incorporate components of a third party architecture
- manage requirements for the architecture solution.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- provide a detailed summary of architectural design tools
- explain interface management
- outline management of end-to-end system integration
- summarise new end-to-end architecture design solutions
- explain solutions for business options across multiple domains
- outline system integration solution techniques
- summarise system interfaces
- explain validation plans
- explain importance of vendors' agreements with specific reference to roles and responsibilities of each party
- identify and quantify components’ costs.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the Telecommunications – Telecommunications Networks Engineering field of work and include access to:

- a site where architecture solutions across multiple domains can be managed
- simulation software tools currently used in industry
- vendor products, specifications, equipment and enterprise policy required for the activity.

Assessors must satisfy NVR/AQTF assessor requirements.

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 3.1 | • Organises, evaluates and interprets a range of complex documentation such as software and hardware manuals |
| Writing | 1.1, 1.5, 3.2, 3.4, 3.5, 4.1 | • Prepares clear and concise workplace documentation, including recommendations, incorporating technical language to communicate complex information clearly and effectively |
| Oral Communication | 2.4 | • Participates in verbal exchanges using tone and language appropriate to audience and environment |
| Interact with others | 2.4, 3.4, 4.1 | • Selects and uses appropriate conventions and protocols when communicating with stakeholders in a range of work contexts<br>• Collaborates and negotiates to achieve agreeable outcomes in potentially contentious situations |
| Get the work done | 1.2-1.4, 2.1-2.3, 3.1, 3.3, 3.4, 3.6, 4.2-4.4 | • Operates from a broad conceptual plan, developing operational detail in stages, regularly reviewing priorities and performance during implementation, identifying and addressing issues<br>• Demonstrates a sophisticated understanding of principles, concepts, language and practices associated with the digital world and uses this to prepare proposals<br>• Takes responsibility for high-impact decisions in complex situations involving many variables and constraints<br>• Uses formal analytical and lateral thinking techniques to resolve domain, technology and logistics problems<br>• Monitors outcomes of decisions, considering results from a range of perspectives and identifying key concepts and principles and their impact on customers and enterprise |

# Assessment Requirements for ICTTEN805 Manage solution architecture and impacts in line with organisational processes

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- prepare an architecture plan exploring a range of alternative solutions
- develop interface requirements for effective solutions across multiple architectures
- manage solution architecture systems integration
- analyse impact of proposed project solutions on customers and enterprise
- prepare evidence for customer acceptance and certification of system integration management plan
- produce final project management requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and define features and operating requirements of complex systems, key performance indicators (KPIs) and service level agreements
- outline information required to define solution architecture and impacts in line with organisational processes
- summarise interdisciplinary concepts across multiple architectures
- outline issues and challenges occurring with system changes
- explain legislation, codes of practice and other formal agreements directly impacting system integration
- summarise manufacturer’s requirements for operation of systems equipment
- identify and critique relevant organisational policies and procedures
- outline performance and integration requirements
- summarise solutions architecture alternatives

© Commonwealth of Australia, 2025 Future Skills Organisation

- summarise specific work health and safety (WHS) requirements that impact activity in terms of safety of self and the public
- outline system element interfaces for solution architecture
- explain system integration plans
- explain validation plans.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the Telecommunications – Telecommunications Networks Engineering field of work and include access to:

- a site where development and management of solution architecture systems integration across multiple architectures may be conducted
- software tools currently used in industry
- vendor products, specifications, equipment and enterprise policy required for the activity.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTTEN806 Manage application layer solutions

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to develop, evaluate, manage, deploy and maintain application layer solutions for new solutions or existing network telecommunications service.

It applies to individuals with highly developed technical skills working as network engineering staff or senior technical officers with appropriate project management roles and authority to direct activities of installation staff, manufacturers and vendors.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications networks engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Develop application layer solutions | 1.1 Produce requirements for applications layer solutions for delivery of new applications layer solutions to customers using forecasting demand data<br>1.2 Prepare a plan for an organisational change control process and integration of new solutions within a complete network infrastructure |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.3 Produce a test management schedule for the testing process of application product<br>1.4 Translate complex design and architecture requirements to traceable application characteristics according to design requirements<br>1.5 Develop application architecture solution specifications using an industry process according to design requirements<br>1.6 Develop application software resource profiling and select suitable vendor for negotiations<br>1.7 Translate complex requirements into software packaging<br>1.8 Produce software deployment mapping and version control to ensure complete integration and compatibility of application solution with existing system<br>1.9 Complete configuration management and provide complex input network design requirements |
| 2. Critically analyse test results of application layer solutions | 2.1 Use design document and integration document software to replicate issues exhibited in test environment<br>2.2 Certify software solution compatibility and compliance to requirements using a web-based test management tool (quality centre) to conduct performance evaluation tests<br>2.3 Critically analyse test reports to evaluate load balancing and network security issues in test environment<br>2.4 Resolve complex issues in interface to isolate defects |
| 3. Manage deployment of application layer solutions | 3.1 Plan and prepare evidence for customer acceptance and certification<br>3.2 Plan and manage transition to operation activities required for transition to operation of integrated application layer solution<br>3.3 Prepare installation failures procedure to make changes while maintaining service levels<br>3.4 Manage change implementation plan to maintain system stability |
| 4. Maintain currency of application layer solutions | 4.1 Manage ongoing monitoring activities to prolong new applications layer solution life cycle for cost-effective business reasons<br>4.2 Produce tuning activities to make efficient use of resources<br>4.3 Analyse current demands for resources to derive forecasts and future requirements |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 4.4 Produce a capacity plan predicting infrastructure resource needs to achieve agreed service levels |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.4, 1.5, 2.3 | • Organises, evaluates and interprets a range of complex technical documentation including software and hardware manuals |
| Writing | 1.2, 1.3, 1.8, 3.3, 4.4 | • Prepares clear and concise workplace documentation including complex plans incorporating technical language to communicate complex information clearly and effectively |
| Numeracy | 1.1, 2.3, 4.1 | • Analyses and synthesises highly embedded mathematical information in a broad range of tasks and texts |
| Get the work done | 1.4-1.6, 1.8, 1.9, 2.1-2.4, 3.1, 3.2, 3.4, 4.1-4.4 | • Operates from a broad conceptual plan, developing operational detail in stages, regularly reviewing priorities and performance during implementation, and identifying and addressing issues<br>• Demonstrates a sophisticated understanding of principles, concepts, language and practices associated with the digital world and uses this to devise solutions<br>• Uses a broad range of strategies to store, access and organise virtual information, recognising design choices will influence what information is retrieved and how it may be interpreted and used<br>• Takes responsibility for high-impact decisions in complex situations involving many variables and constraints<br>• Uses formal analytical and lateral thinking techniques to resolve logistics problems<br>• Monitors outcomes of decisions, considering results from a range of perspectives and identifying key concepts and principles and their impact on customers and enterprise |

# Assessment Requirements for ICTTEN806 Manage application layer solutions

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- produce a test management schedule for testing process of application product
- develop application architecture solution specifications using an industry process
- produce software deployment mapping and version control
- analyse test results of application layer solutions
- prepare evidence for customer acceptance and certification
- prepare an installation failures procedure
- manage ongoing monitoring activities
- produce tuning activities
- produce a capacity plan predicting infrastructure resource needs.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain installation failure procedures
- summarise legislation, codes of practice and other formal agreements that directly impact activity
- explain important tenets of managing change
- explain new applications layer solutions
- define software and hardware resources required by an application layer
- outline specific workplace health and safety (WHS) requirements that impact activity in terms of safety of self and the public
- outline system integration techniques
- explain test management scheduling

© Commonwealth of Australia, 2025 Future Skills Organisation

- summarise tuning activities to maintain currency
- explain use of forecasting demand data
- explain use and purpose of test management tools.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the Telecommunications – Telecommunications Networks Engineering field of work and include access to:

- a site where management of application layer solutions may be conducted

# Assessment Requirements for ICTTEN807 Manage voice, data and internet protocol network solutions

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- produce a test management schedule
- develop network architecture solution specifications
- develop software and hardware resource profiling and select suitable vendor for negotiations
- undertake configuration management of voice, data and internet protocol (IP) network, and provide complex input network design requirements
- analyse test reports to evaluate load balancing and network security issues
- plan and prepare evidence for customer acceptance
- prepare installation failures procedure
- produce tuning activities to enable efficiencies
- produce capacity plan predicting infrastructure resource needs.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise installation failure procedures
- investigate change management strategies relevant to introduction of new technologies
- explain new IP network solutions
- identify and contrast software and hardware resources relevant to project
- explain system integration techniques
- explain test management scheduling
- provide detailed summary of tuning activities necessary to maintain currency
- explain use of forecasting demand data

© Commonwealth of Australia, 2025 Future Skills Organisation

- identify and contrast various test management tools.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the Telecommunications – Telecommunications Networks Engineering field of work and include access to:

- a site where management of voice, data and IP network solutions can be undertaken
- software and hardware resources suitable for developing, deploying and managing voice, data and IP network solutions
- tests and equipment currently used in industry.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTTEN808 Manage network testing strategies

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to plan and manage a test regime for evaluation of application software for a telecommunications network.

It applies to individuals with high-level technical skills working as network engineers or senior technical staff within project management roles.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Plan test effort and develop test strategy for an application software | 1.1 Critically analyse functionalities of an application software from the system design document and create test strategy for new telecommunications product line<br>1.2 Produce steps for test strategy, including attributes of each step according to enterprise policy<br>1.3 Produce test strategy for evaluating suitability of application software for integration into telecommunications network<br>1.4 Critically analyse test strategy and identify types of risks that |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | would hinder test performance or reality |
| 2. Plan test strategy for regime | 2.1 Produce phases of a test cycle for a test regime according to system design document<br>2.2 Assess a range of tests required to evaluate performance and functionality of application software and determine tests required to suit the test regime<br>2.3 Evaluate features of testing tool and debuggers and select an appropriate tool to test software application and detect faults<br>2.4 Evaluate elements of test plan that cover testing functionality of the application software |
| 3. Design test plan and produce test reviews | 3.1 Determine forecast time, effort and cost for low and medium intensity projects to perform testing<br>3.2 Develop a test case or test scenario with prerequisite states based on requirements to generate expected test results for test plan<br>3.3 Produce test plan for specific phases based on requirements of project specifications for the application software<br>3.4 Produce test reporting associated with particular test phases within test plan<br>3.5 Critically analyse test reports and evaluate impact of test plan on the testing environment<br>3.6 Manage progress of test plan to minimise risks associated with testing and ensure test compliance with test requirements<br>3.7 Report any detected defects to product evaluation personnel, and prepare a strategy to manage defects |
| 4. Manage test traceability | 4.1 Create a traceability matrix to correlate relationship between marketing requirements and detailed requirements of software product to matching parts of design, test plan and test cases<br>4.2 Critically analyse testing metrics produced by test tool to manage tracking of defects and plan process improvements based on the metrics<br>4.3 Produce an evaluation report from traceability matrix to manage defects or failures from the test plan |

© Commonwealth of Australia, 2025 Future Skills Organisation

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.2, 2.1, 3.5 | • Organises, evaluates and critiques ideas and information from a wide range of complex texts |
| Writing | 1.1, 1.2, 1.3, 3.3, 3.7, 4.3 | • Prepares clear and concise workplace documentation including reports and recommendations incorporating technical language to communicate complex information clearly and effectively |
| Numeracy | 3.1, 3.5, 4.2 | • Uses numerical information to interpret and evaluate different types of technical data, take measurements and determine cost-effective outcomes |
| Navigate the world of work | 1.2 | • Adheres to organisational procedures and protocols |
| Interact with others | 3.7 | • Selects and uses appropriate conventions and protocols when communicating with technical personnel in a range of work contexts |
| Get the work done | 1.1-1.4, 2.1-2.4, 3.1-3.4, 3.6, 4.1, 4.2 | • Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context for complex, high impact activities with strategic implications<br>• Demonstrates a sophisticated understanding of principles, concepts, language and practices associated with the digital world and uses this to devise strategies<br>• Implements actions according to a predetermined plan, making adjustments as necessary<br>• Takes responsibility for high-impact decisions in complex situations involving many variables and constraints<br>• May use formal analytical and lateral thinking techniques resolving software, hardware and logistics problems |

# Assessment Requirements for ICTTEN808 Manage network testing strategies

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- produce steps in developing test strategy
- produce test strategy for evaluating suitability of application software
- design test plan and produce test reviews
- develop a test case or test scenario
- produce a test plan for specific phases
- produce test reporting associated with particular test phases within test plan
- create traceability matrix
- produce an evaluation report from the traceability matrix to manage defects or failures from the test plan.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain applications software features and functionalities
- summarise configuration of software testing tools
- outline creation of a traceability matrix
- provide detailed summary of different elements of test plans and risks associated with implementation
- outline features of testing tools and debuggers
- explain identification of types of risks
- consider legislation, codes of practice and other formal agreements that directly impact testing
- explain how to manage software defects

© Commonwealth of Australia, 2025 Future Skills Organisation

- summarise management of test traceability
- outline phases of test cycles
- outline production of test reviews
- consider specific workplace health and safety (WHS) requirements that impact activity in terms of safety of self and the public
- explain relevant steps in developing test strategy
- outline testing procedures and testing cycles for various system applications.
-

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the Telecommunications – Telecommunications Networks Engineering field of work and include access to:

- a site where planning and management of a test regime for evaluation of application software may be conducted
- software tools currently used in industry
- vendor products, specifications, equipment and enterprise policy required for the activity.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTTEN809 Analyse business specifications to produce technical solutions

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to apply technical solutions in network designs for telecommunications and ICT networking provisioning companies specialising in integrating converging and emerging technologies of ICT networks.

It applies to individuals working as telecommunication officers in service and provision work who carry out design and implementation of technical solutions of information communication technology (ICT) networks.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare to critically analyse business specifications | 1.1 Research application of a suitable business model for telecommunication service provisioning that meets agreed customer requirements<br>1.2 Obtain business requirements and business specifications to provide data for the model |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.3 Determine business drivers and requirements of key stakeholders and customers, both internal and external<br>1.4 Evaluate business objectives and customer requirements for input into the model |
| 2. Produce technical solutions to meet business imperatives | 2.1 Research tools and templates for analysing business models and provide reports on technical design and specifications<br>2.2 Develop technical solutions for customer in response to drivers and business requirements<br>2.3 Evaluate costs involved in implementing ICT technical solutions for customer<br>2.4 Produce cost benefit analysis to assess viability and optimum timing for deploying the technical solution for maximum return on investment (ROI)<br>2.5 Investigate a range of vendor products to determine most suitable to meet technical requirements and customer needs<br>2.6 Produce a report documenting technical solutions addressing business specifications and recommendations against customer requirements |
| 3. Evaluate impact of technical requirements on the business | 3.1 Review and assess business constraints, opportunities and objectives<br>3.2 Determine technical requirements according to input-output, interface, process flow or quality requirements<br>3.3 Critically analyse hardware, software and network requirements to suit the business plan<br>3.4 Build business platform based on IT/ICT technical solutions<br>3.5 Investigate processes in need of being changed by a business solution<br>3.6 Document impact of technical requirements on the business |
| 4. Document and validate agreed solutions | 4.1 Submit technical requirements and solution overview to management for feedback<br>4.2 Analyse feedback and incorporate change as required<br>4.3 Document changes and distribute final business solution to internal and external stakeholders |

© Commonwealth of Australia, 2025 Future Skills Organisation

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.4, 2.1, 3.1-3.3, 4.2 | • Organises, evaluates and critiques information from a wide range of complex texts |
| Writing | 1.3, 2.4, 2.6, 3.6, 4.2, 4.3 | • Generates complex written texts, demonstrating control over a broad range of writing styles and purposes |
| Oral Communication | 1.3, 4.2 | • Establishes and maintains complex and effective spoken communication in a broad range of contexts<br>• Displays depth of understanding of complex oral texts which include multiple and unstated meanings |
| Numeracy | 2.3, 2.4 | • Uses mathematical formulas and calculations to estimate and plan project costs and evaluate cost-benefits of completed project |
| Interact with others | 4.1, 4.3 | • Selects and uses appropriate conventions and protocols when communicating with stakeholders in a range of work contexts |
| Get the work done | 1.2, 2.1, 2.2, 2.5, 3.2-3.4 | • Monitors workload in terms of personal and stakeholder goals and outcomes, adjusting or renegotiating priorities and plans as required<br>• Develops plans for complex, high-impact activities with strategic implications that involve a diverse range of stakeholders<br>• Implements actions according to a predetermined plan, making adjustments if necessary and addressing unexpected issues<br>• Considers strategic and operational potential of digital trends to achieve work goals, and enhance work processes and solutions<br>• Uses formal analytical and lateral thinking techniques for identifying issues, generating and evaluating possible solutions<br>• Uses formal decision-making processes as scaffolding for thinking, seeking input, advice and feedback from others as required |

# Assessment Requirements for ICTTEN809 Analyse business specifications to produce technical solutions

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- research and critically analyse client specifications against accepted industry practices
- produce technical solutions from business specifications
- analyse feedback from client and make adjustments to proposal
- apply design concepts to business solutions
- produce technical reports regarding design of the solution
- make recommendations and offer optimum design solutions
- produce an evaluation document on impact of technical requirements on the business.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline business models and tools
- summarise business processes
- explain client business domain, business function and organisation
- explain compatibility issues and resolution procedures
- explain configuration of internet protocol (IP) networks
- establish customer and business liaison protocols
- summarise desktop applications and operating systems
- provide a detailed explanation of documenting technical specifications
- explain linkage between processes
- summarise security protocols, standards and data encryption
- outline technologies:
  - access networks

© Commonwealth of Australia, 2025 Future Skills Organisation

- core networks
- information and communications technology (ICT) network topologies
- mobile cellular networks
- network protocols and operating systems
- optical networks and principles
- radio frequency (RF) networks and principles.

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the Telecommunications – Telecommunications Networks Engineering field of work and include access to:

- client functional requirements
- business specifications
- database software
- simulation software
- organisational guidelines
- network and computer layout
- site design software and hardware
- information on a range of ICT business solutions.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTTEN810 Investigate the application of cloud networks in telecommunications switching

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to develop strategies to accommodate shortfalls in capacity and functionality for a switching network. It also covers how to develop solutions for network growth using emerging technologies, including cloud computing.

It applies to individuals with excellent technical and strategic management skills working as telecommunications planning engineers and senior technical staff.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Evaluate current physical network infrastructure | 1.1 Analyse scalability, functionality, cost, security and energy consumption of existing physical network infrastructure<br>1.2 Report on shortfalls and risks of existing physical infrastructure in accommodating network growth and increased functionality<br>1.3 Investigate capacity and functionality shortfalls of existing physical infrastructure to highlight limitations of the existing |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | switching network<br>1.4 Document estimated costs and issues associated with meeting capacity and functionality shortfalls using existing physical infrastructure |
| 2. Investigate the application of cloud networks | 2.1 Analyse trends in cloud networks (infrastructure-as-a-service), technologies and multiprotocol label switching (MPLS) architectures against rapid changes in the landscape<br>2.2 Determine applicability of cloud networks (infrastructure-as-a-service) to meet capacity and functionality requirements of the network<br>2.3 Assess risks in using cloud networks to meet capacity and functionality requirements of the network<br>2.4 Evaluate a range of cloud network solutions and justify selection of an optimum network switching solution<br>2.5 Develop solution elements using a series of small project elements<br>2.6 Produce a cloud network alternative solution to emulate the existing core network of a service provider |
| 3. Analyse the impact of the cloud network solution for system integration and across business domains | 3.1 Prepare a plan for organisational change control processes and integration of cloud network solutions within a complete network infrastructure<br>3.2 Prepare a test scenario and produce a test management schedule for the testing process of system elements and interfaces using simulation<br>3.3 Use integration document software to replicate issues exhibited in test environment<br>3.4 Certify cloud network solution compatibility and compliance to requirements using the web-based test management tool (quality centre) to conduct performance evaluation tests<br>3.5 Analyse test reports to evaluate load balancing and network security issues in test environment<br>3.6 Document and resolve conflicts detected in simulation testing |
| 4. Develop a business case for implementation of a cloud network | 4.1 Prepare a cost-benefit analysis of the cloud network solution as a business case to evaluate the return on investment (RoI)<br>4.2 Investigate staging of the solution and timing implementation of project elements as a scenario for real life implementation<br>4.3 Research and report on key features of cloud network |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | implementation in a business case study |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 2.1, 3.5, 4.3 | • Researches, evaluates and interprets complex technical documentation, such as software and hardware manuals and design specifications |
| Writing | 1.2, 1.4, 3.1, 3.2, 3.6, 4.1, 4.3 | • Prepares clear and concise workplace documentation, including reports and recommendations incorporating technical language, to communicate complex information |
| Numeracy | 1.1, 1.3, 1.4, 3.5, 4.1 | • Uses numerical information to interpret results, evaluate different types of technical data, take measurements and determine cost-effective outcomes for RoI |
| Get the work done | 1.1, 1.3, 1.4, 2.1-2.5, 3.1-3.4, 3.6, 4.2 | • Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context for complex, high-impact activities with strategic implications<br>• Implements actions according to a predetermined plan, making adjustments if necessary<br>• Takes responsibility for high-impact decisions in complex situations involving many variables and constraints<br>• Uses formal, analytical and lateral thinking techniques to resolve problems or to generate ideas<br>• Actively identifies digital systems, devices and applications with potential to meet current and/or future needs<br>• Uses main features and functions of digital tools to complete work tasks |

# Assessment Requirements for ICTTEN810 Investigate the application of cloud networks in telecommunications switching

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- evaluate the current physical network infrastructure's capacity and functionality shortfalls
- investigate application of cloud networks and plan architectural design
- develop components of cloud networking solution for meeting capacity and functionality requirements of the network
- assess risks in using cloud networks to meet capacity and functionality requirements of the network
- analyse impact of integration of cloud network solution on network
- prepare a test plan with test scenario and produce a test management schedule
- use integration document and software test management tools to replicate issues exhibited in test environment
- certify cloud network solution compatibility and compliance
- prepare a cost-benefit analysis of the cloud network solution
- develop a business case for implementation of a cloud network.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- analyse components of infrastructure-as-a-service solutions
- summarise existing digital switching technology in service provider's core network
- outline information required to develop architectural solutions
- explain *integration document software*
- explain new cloud network technologies
- provide a detailed summary of cloud networking transmission, transmitter and receiver architecture and their associated infrastructure

© Commonwealth of Australia, 2025 Future Skills Organisation

- outline performance and integration requirements
- prepare and/or interpret technical documentation
- outline protocols as used on multiprotocol label switching (MPLS) and infrastructure-as-a-service
- provide a detailed explanation of network components and their functions
- explain specific organisational requirements relating to computer systems
- summarise typical issues and challenges that occur with system changes.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a site where the application of cloud networks in telecommunications switching may be investigated
- software tools currently used in industry
- vendor products, specifications, equipment and enterprise policy required for the activity.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN811 Evaluate and apply network security

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to evaluate security of information communications technology (ICT) networks, using converging switching and transmission technologies in local area networks (LAN) and wide area networks (WAN), broadband networks, internet protocol TV (IPTV) and virtual networks.

It applies to individuals with excellent communication and IT skills working as telecommunications engineers.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Analyse operation of the internet | 1.1 Evaluate the interrelationship of IP to open systems interconnect (OSI) seven layer model and the impact on network topologies and network elements<br>1.2 Assess media access control (MAC) and IP addressing, and their application in security<br>1.3 Report on transmission control protocol/internet protocol |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | (TCP/IP) operations and use of transport protocols for transmitting data over the network<br>1.4 Examine various types of routing protocols and the implications on security<br>1.5 Analyse forms of label switching as applied to data packets<br>1.6 Use software to simulate least-cost algorithms |
| 2. Analyse internetwork protocols | 2.1 Compare connection-oriented and connection-less networks in internetworking applications<br>2.2 Research design parameters used in networks<br>2.3 Produce a report on IP multi-casting protocols and systems, including IP frame fields of data frames |
| 3. Research and report internetwork operations | 3.1 Analyse protocol considerations of voice over internet protocol (VoIP)<br>3.2 Research protocols G723.1, G729 and G729A standards and evaluate their application in internetworking<br>3.3 Determine the format of JPEG and GIF files as applied to still pictures<br>3.4 Determine the format of MPEG-2 and H.32x series multimedia protocols for motion pictures<br>3.5 Evaluate features of different of multi-service protocols and of different email system protocols in networking operations<br>3.6 Produce a report on features different web-based protocols used in internetworking operations |
| 4. Analyse features and types of network security | 4.1 Analyse procedures and processes used for security attacks and use of protection mechanisms<br>4.2 Research conventional encryption algorithms and determine possible locations of encryption devices<br>4.3 Produce a report on conventional encryption key distribution problems and how message authentication and verification is achieved<br>4.4 Research one-way hashing and secure hashing functions<br>4.5 Produce a report on digital signature standard (DSS) principles, including public key cryptography algorithms for network security |
| 5. Research features of public key authentication and email network | 5.1 Research public key authentication using Kerberos<br>5.2 Analyse how electronic mail security is achieved using pretty good privacy (PGP) |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| security protocols | 5.3 Research and report on internet protocol security (IPSec)<br>5.4 Produce a report on encapsulating security payload (ESP), including internet key management processes |
| 6. Research features of web, network management and system security | 6.1 Analyse how web threats and attacks occur in an IP network and determine system intruders and threats<br>6.2 Research operation of transaction protocols<br>6.3 Evaluate processes used for selection and protection of system passwords<br>6.4 Evaluate system threats and methods used to counteract the threats<br>6.5 Produce a report on anti-virus protection strategies, including firewall design principles, types and configurations |
| 7. Document evaluation report | 7.1 Present a final report to include research and evaluation of network security management principles and network application in the workplace with enhancement recommendations |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 2.2, 3.2, 4.1, 4.2, 4.4, 5.1, 5.3, 6.2-6.4 | • Researches, evaluates and interprets complex technical documentation, such as technical standards |
| Writing | 1.3, 2.3, 3.6, 4.3, 4.5, 5.3, 5.4, 6.5 | • Prepares clear and concise workplace documentation, including reports and recommendations incorporating technical language, to communicate complex information clearly and effectively |
| Numeracy | 1.6, 4.2, 4.5 | • Uses mathematical subtlety and a clear set of steps to solve public-key encryption and least-cost algorithms |
| Interact with others | 7.1 | • Selects and uses appropriate conventions and protocols to communicate findings to stakeholders in a range of work contexts |
| Get the work done | 1.1-1.6, 2.1, 2.3, 3.1-3.5, 4.1, 4.2, 4.4, | • Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context for complex, high-impact activities with strategic |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| | 5.1, 5.2, 6.1, 6.3, 6.4 | implications<br>• Implements actions according to a predetermined plan, making adjustments if necessary<br>• Takes responsibility for high-impact decisions in complex situations involving many variables and constraints<br>• Uses formal, analytical and lateral thinking techniques to resolve problems or generate ideas<br>• Actively identifies digital systems, devices and applications with potential to meet current and/or future needs<br>• Uses main features and functions of digital tools to complete work tasks |

# Assessment Requirements for ICTTEN811 Evaluate and apply network security

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- investigate and report on protocols used for data transmission over IP networks
- investigate and report on network security in terms of internet protocols, digital signature standard (DSS) principles and asymmetric key cryptography on IP networks
- research and report features of web, network management and system security management in IP networks
- recommend enhancements to security management in IP networks.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain administrative network management systems
- evaluate algorithms used in IP network security
- specify the purpose of cryptography in security systems
- explain encapsulation and encryption in data transmission
- describe examples of enterprise solutions
- explain firewalls
- outline common network topologies
- summarise operations network management systems
- explain routing theory
- explain and give examples of system threats
- outline transaction protocols.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a telecommunications operations site
- a mentor or supervisor appropriately experienced in relevant telecommunications technology and infrastructure
- networked computers and relevant software.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN812 Evaluate and apply digital signal processing to communications system

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to analyse, apply and simulate operation of digital signal processing (DSP) to signals in a telecommunications system.

It applies to individuals with excellent information technology (IT) and design skills working as field officers. They develop solutions in modern applications, such as internet protocol TV (IPTV), digital TV, fast broadband and internet applications.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1 Apply DSP design criteria to telecommunications system | 1.1 Review DSP criteria applied to signal processing<br>1.2 Perform frequency domain analysis on telecommunications signals<br>1.3 Apply digital processing techniques to DSP baseband communications signals used in digital systems<br>1.4 Generate output of a comb filter in digital filtering application |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | using convolution theorem and autocorrelation |
| 2 Determine linear time invariant (LTI) system properties | 2.1 Simulate telecommunication entities using simulation software functions<br>2.2 Perform calculations to find numerical approximations of the continuous-time convolution process<br>2.3 Simulate echo cancellation by applying simulation software using adaptive DSP algorithms and an inverse filtering method |
| 3 Analyse digital telecommunication signals processing | 3.1 Analyse the result of digitally passing a signal through a first-order recursive discrete-time filter<br>3.2 Determine frequency response of a simple continuous-time system using Fourier transform<br>3.3 Analyse amplitude modulated signals using Fourier transform |
| 4 Analyse time and frequency forms of signals by applying simulation of signal processing | 4.1 Program a simulated software application to represent a comb filter with a signal applied from a telecommunications system<br>4.2 Produce a report analysing simulated output results and relevance of a DSP filter to a telecommunications system |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1 | • Researches, evaluates and interprets complex technical documentation |
| Writing | 4.2 | • Prepares clear and concise workplace documentation including reports that incorporate technical language to communicate complex information clearly and effectively |
| Numeracy | 1.2, 1.4, 2.2, 2.3, 3.1-3.3 | • Performs a range of complex, algorithmic calculations and analyses<br>• Analyses and synthesises highly embedded mathematical information in a broad range of tasks and texts |
| Get the work done | 1.1-1.4, 2.1, 2.3, 3.1-3.3, 4.1 | • Uses a mix of intuitive and formal processes to identify key information and issues, evaluate alternative strategies, anticipate consequences and consider |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| | | implementation issues and contingencies<br>• Takes responsibility for high-impact decisions in complex situations involving many variables and constraints<br>• Uses advanced features and functions of digital tools to complete work tasks |

# Assessment Requirements for ICTTEN812 Evaluate and apply digital signal processing to communications system

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- apply digital signal processing (DSP) criteria to a telecommunications system
- evaluate linear time invariant (LTI) system properties
- analyse digital and amplitude modulated signals using DSP methods and principles
- demonstrate an awareness of radio frequency issues relevant to DSP processes
- report on finding of analysis and use of DSP in a telecommunications system.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise digital communications systems
- explain Fourier transforms
- explain linear time invariant (LTI)
- explain various modulation methods, amplitude (AM), frequency (FM), phase (PM) and digital formats
- explain organisational policy and procedures for digital signal processing
- outline common non-compliance issues and responses.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a telecommunications operations site

© Commonwealth of Australia, 2025 Future Skills Organisation

- digital communication systems
- simulation software
- telecommunications test equipment currently used in industry.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN813 Produce engineering solutions using numerical computations and simulation

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to design and evaluate systems and networks to resolve specialised telecommunications network problems.

It applies to individuals who analyse, calculate and solve complex mathematical engineering problems for advanced telecommunication systems requiring numerical simulation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Use advanced engineering mathematics for a range of complex engineering solutions | 1.1 Solve mathematical functions using complex trigonometric ratios<br>1.2 Solve mathematical functions using manipulation of matrices and determinants to perform standard calculations<br>1.3 Solve trigonometric functions using operations on complex numbers |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.4 Solve complex functions using integral and differential calculus<br>1.5 Solve mathematical functions using ordinary differential equations (ODE)<br>1.6 Solve mathematical equations using Laplace transforms<br>1.7 Solve mathematical problems using algorithmic control structures<br>1.8 Use software simulations where possible to produce simulated calculations for a range of engineering solutions<br>1.9 Analyse results from the simulated solution and compare to the derived solutions to adjust any variables in the calculation process |
| 2. Design a simulation control system with queues | 2.1 Design a simple control system using simulation software<br>2.2 Design a queuing system using simulation software<br>2.3 Design a stochastic system using simulation software<br>2.4 Document and present all numerical software simulations for the engineering problems |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Writing | 2.4 | • Prepares clear and concise workplace documentation that incorporates technical language to communicate complex information clearly and effectively |
| Numeracy | 1.1-1.9 | • Uses a range of advanced mathematical skills to perform a variety of complex engineering solutions and interpret complex measurement data |
| Get the work done | 1.8, 2.1-2.3 | • Uses a mix of intuitive and formal processes to identify key information and issues, evaluate alternative strategies, anticipate consequences and consider implementation issues and contingencies<br>• Takes responsibility for high-impact decisions in complex situations involving many variables and constraints<br>• Uses main features and functions of digital tools to |

# Assessment Requirements for ICTTEN813 Produce engineering solutions using numerical computations and simulation

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- solve a range of complex mathematical functions related to telecommunications engineering
- use software systems to produce simulations of mathematical solutions
- analyse results of software simulations
- design telecommunications systems using software simulations
- document and present software solutions for engineering problems.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- analyse and manipulate functions using symbolic and numerical software, including operations of entering and manipulating polynomials in suitable software and then substitution of values and graphing
- analyse and manipulate matrices and determinants, numerically with and without symbolic and numerical software
- design and debug programs using algorithmic control structures and output results to the screen, a graph and a file
- analyse and manipulate complex numbers numerically and with symbolic software
- determine and manipulate equations using advanced calculus operations of differentiation and integration numerically and with symbolic software
- determine and manipulate equations of the type called ordinary differential equations (ODE) met in telecommunications engineering applications numerically and with symbolic software

© Commonwealth of Australia, 2025 Future Skills Organisation

- determine and manipulate Laplace transforms met in telecommunications engineering applications numerically and with symbolic software
- design a simulation control system and simulate queues using software.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- networked computers
- simulation software
- relevant documentation
- a range of industry scenarios or workplace examples.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN814 Manage development and application of testing artefacts

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to plan and manage a test regime by developing testing artefacts to evaluate application software for a telecommunications network.

It applies to individuals working as network engineers or senior technical staff within project management roles, and includes technologies in mobile phones, wireless modems, set top boxes, media centres, web applications and content servers using application software to provide a telecommunications service.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Plan the test effort and develop test strategy for software testing | 1.1 Critically analyse functionalities of an application software from the system design document and create a test strategy for a new telecommunications product line<br>1.2 Produce steps in developing test strategy and attributes of each |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | step, according to enterprise policy<br>1.3 Produce a test strategy to evaluate suitability of application software for integration into the telecommunications network<br>1.4 Assess a range of tests required to evaluate performance and functionality of application software and determine tests required to suit the test regime<br>1.5 Evaluate features of testing tool and debuggers, and select an appropriate tool to test the software application and detect faults<br>1.6 Produce a test plan based on requirements of the project specifications, and identify testing artefacts required for model-based software testing |
| 2. Plan the development of testing artefacts | 2.1 Develop software testing strategies for uncovering evidence of defects in software systems as part of the quality assurance process<br>2.2 Produce a test dependency model of the relationship between the test regime and test levels in software testing for referencing and validation<br>2.3 Critically analyse software testing requirements to determine domain testing and application testing artefacts requirements to validate the software product |
| 3. Develop and manage testing artefacts | 3.1 Create reusable domain artefacts to detect early defects in domain testing<br>3.2 Modify domain test artefacts by binding variability to create application test artefacts to detect defects in product line applications<br>3.3 Produce test reporting associated with test cycle phases within the test plan<br>3.4 Critically analyse test reports and evaluate the impact of the test plan with testing artefacts on the testing environment<br>3.5 Manage progress of the test plan to minimise risks associated with testing and ensure the test complies with test requirements<br>3.6 Report detected defects to product evaluation personnel and prepare a strategy to manage defects<br>3.7 Critically analyse testing metrics produced by the test tool to manage tracking of defects, and use metrics to plan process improvements<br>3.8 Produce an evaluation report from the traceability matrix to manage defects or failures from the test plan |

© Commonwealth of Australia, 2025 Future Skills Organisation

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.2, 1.6, 2.3, 3.3, 3.4 | • Organises, evaluates and critiques ideas and information from a wide range of complex texts |
| Writing | 1.3, 1.6, 3.3, 3.6, 3.8 | • Prepares clear and concise workplace documentation, including reports and recommendations incorporating technical language, to communicate complex information |
| Numeracy | 3.4, 3.7 | • Uses numerical information to interpret and evaluate different types of technical data and take measurements |
| Interact with others | 3.6 | • Selects and uses appropriate conventions and protocols when communicating with technical personnel in a range of work contexts |
| Get the work done | 1.1-1.5, 2.1-2.3, 3.1, 3.5 | • Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context for complex, high-impact activities with strategic implications<br>• Demonstrates a sophisticated understanding of principles, concepts, language and practices associated with the digital world and uses this to devise strategies<br>• Implements actions according to a predetermined plan, making adjustments if necessary<br>• Takes responsibility for high-impact decisions in complex situations involving many variables and constraints<br>• Uses formal, analytical and lateral thinking techniques for resolving software, hardware and logistics problems |

# Assessment Requirements for ICTTEN814 Manage development and application of testing artefacts

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- produce steps in developing test strategy
- produce a test strategy to evaluate suitability of application software
- develop software testing strategies for uncovering evidence of defects in software systems
- create reusable domain artefacts to detect early defects in domain testing
- produce test reporting associated with phases of a test cycle within the test plan
- produce an evaluation report from the traceability matrix.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline applications' software features and functionalities
- specify the configuration of software testing tools
- define *software artefact* and explain the process for testing artefacts
- summarise creation of the traceability matrix
- summarise steps in developing the test strategy and specify various tests that may be applied
- outline domain and application testing
- explain essential elements of test plans
- evaluate features of testing tools and debuggers
- explain the identification of types of risks
- outline the management of:
  - software defects
  - test traceability

© Commonwealth of Australia, 2025 Future Skills Organisation

- explain phases of test cycles
- summarise production of test reviews
- outline steps in developing a test strategy
- explain testing procedures.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a site where testing artefacts can be developed and applied
- software tools currently used in industry
- vendor products, specifications, equipment and enterprise policy required for the activity.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN815 Manage project requirements and process implementations

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to analyse forecast data, develop specifications and resource requirements, and plan implementation of the process solution for products and services.

It applies to individuals with excellent planning and organising skills, working as network engineering staff or senior technical officers within project management roles, who have authority to direct activities of implementation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Manage forecast service demand requirements | 1.1 Develop a project plan to review forecasting data and generate planning forecasts using forecasting tools<br>1.2 Critically analyse and review forecasts according to enterprise policy and produce forecast figures considering new developments in the area and technological changes where appropriate |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| 2. Manage network development growth requirements | 2.1 Critically analyse market intelligence on customer demand and demand data to plan for potential network traffic quantity and flow<br>2.2 Assess overall planning parameters, including approved business plan prior to commencing the planning process<br>2.3 Critically analyse gathered information and produce a project plan with specifications to meet network growth |
| 3. Manage project resource requirements | 3.1 Assess resource requirements to manage the project from the scoping phase through to project completion<br>3.2 Critically analyse outcomes of the project deliverables to determine effectiveness of the project process |
| 4. Develop process solutions | 4.1 Produce requirements for process solutions for delivery of product and services to customers using forecasting demand data<br>4.2 Prepare a plan for the organisational change control process and integration of new solutions within a complete network infrastructure<br>4.3 Produce a test management schedule for the testing process of the product solution<br>4.4 Develop solution specifications using industry process according to design requirements<br>4.5 Develop software and hardware resource profiling and select a suitable vendor for negotiations<br>4.6 Complete configuration management and provide complex input design requirements |
| 5. Critically analyse test results for process solutions | 5.1 Use design document and integration document software to replicate issues exhibited in test environment<br>5.2 Certify software solution compatibility and compliance with requirements using web-based test management tool to conduct performance evaluation tests<br>5.3 Critically analyse test reports to evaluate compatibility and security issues in a test environment<br>5.4 Resolve complex issues in interface to isolate defects |
| 6. Manage process implementation | 6.1 Plan and prepare evidence for customer acceptance and certification<br>6.2 Plan and manage transition to operation activities required for transition to operation of integrated IP solution<br>6.3 Prepare an installation failures procedure to make changes while |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | maintaining service levels<br>6.4 Manage the change implementation plan to maintain system stability |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.2, 2.1-2.3, 3.2, 4.4, 5.3 | • Organises, evaluates and critiques ideas and information from a wide range of complex texts |
| Writing | 1.1, 1.2, 2.3, 4.1-4.4, 6.1, 6.3 | • Demonstrates sophisticated writing skills by selecting appropriate conventions and stylistic devices to express precise meaning |
| Numeracy | 1.2, 2.1, 3.1, 4.1, 5.3 | • Analyses and synthesises highly embedded mathematical information in statistical data to apply forecasting techniques and assess planning parameters |
| Get the work done | 1.1, 2.2, 3.1, 4.5, 4.6, 5.1, 5.2, 5.4, 6.1, 6.2, 6.4 | • Operates from a broad conceptual plan, developing operational detail in stages, regularly reviewing priorities and performance during implementation, and identifying and addressing issues<br>• Demonstrates a sophisticated understanding of the potential of new technology including principles, concepts, language and practices associated with the digital world<br>• Takes responsibility for high-impact decisions in complex situations involving many variables and constraints<br>• Uses formal, analytical and lateral thinking techniques to manage unexpected changes in demand requirements<br>• Monitors outcomes of decisions, considering results from a range of perspectives, and identifying key concepts and principles and their impact on customers and enterprise |

# Assessment Requirements for ICTTEN815 Manage project requirements and process implementations

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- manage forecast service demand requirements
- manage network development growth requirements
- manage project resource requirements
- develop process solutions following critical analysis of test results.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- evaluate principles of managing change and implications for managing a project
- summarise customer applications and usage levels
- outline forecasting tools and techniques, and specify data that contributes to forecasting
- explore various industry processes that impact project management strategy
- outline integration of new solutions
- explain market intelligence and its value to forecasting and project assessment
- explore various types of data used to evaluate demand
- summarise performance evaluation
- provide a detailed summary of planning procedures
- describe the limitations of compatibility on the integration of telecommunications solutions
- evaluate products and services embedded in a project
- define project management and evaluate a project management plan
- explain test management.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- forecast data and tools involved in planning
- a range of software and hardware currently used in industry
- relevant regulations and specifications that impact forecasting activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTTEN816 Scope project requirements and process solutions

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to develop scope management strategies and plans, in line with business requirements and organisational strategies, for the delivery of products and services.

It applies to individuals with excellent planning and problem-solving skills, working as network engineering staff or senior technical officers within project management roles. They work with new and emerging technologies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – Telecommunications Networks Engineering

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Conduct project scope definition activities | 1.1 Develop and confirm procedures for project authorisation with an appropriate authority for commitment of resources and effort<br>1.2 Establish agreement of desired project outcomes with relevant stakeholders<br>1.3 Develop scope management plan to determine scoping requirements |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| 2. Define and plan scoping project requirements and process solutions | 2.1 Critically analyse needs in consultation with client and relevant stakeholders to verify project scope<br>2.2 Prepare project specifications with project objectives, deliverables, constraints, exclusions, assumptions and principal work activities for delivery of products and services<br>2.3 Determine and agree measurable project outcomes and benefits to enable quantified evaluation of program performance<br>2.4 Develop and communicate scope definition, scope management strategies and plans to stakeholders, and seek agreement<br>2.5 Align program scope to business requirements and organisational strategy |
| 3. Manage scoping process | 3.1 Conduct regular program reviews to measure project performance and ensure stated program, business and strategic objectives are met<br>3.2 Establish and maintain the change management system to form the basis of ongoing scope management<br>3.3 Conduct reviews of scope changes and take action to ensure project and program objectives are achieved or modified<br>3.4 Measure project outcomes against defined program scope and aligned strategic objectives<br>3.5 Communicate results of program outcomes to appropriate authority<br>3.6 Manage the impact of scope changes within established time, cost and quality constraints according to change control procedures and to meet project objectives<br>3.7 Review the project planning process and document recommendations for improvements to future projects |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 3.4 | • Organises, evaluates and interprets a range of complex documentation, including project plans |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Writing | 1.3, 2.2, 2.4, 3.7 | • Prepares clear and concise workplace documentation, including project briefs and reports incorporating technical language, to communicate complex information clearly and effectively |
| Oral Communication | 1.1, 1.2, 2.1, 2.3, 2.4 | • Uses highly developed listening, observational and questioning skills to understand others' perspectives, and clarify and explore meaning<br>• Clearly articulates requirements using language appropriate to audience and environment |
| Numeracy | 3.4, 3.6 | • Analyses and synthesises mathematical information to assess project parameters, including budget requirements and limitations |
| Interact with others | 1.2, 2.1, 3.5 | • Selects and uses appropriate conventions and protocols when communicating with stakeholders in a range of work contexts<br>• Collaborates with others to achieve joint outcomes, playing an active role in facilitating agreement |
| Get the work done | 2.2, 2.3, 2.5, 3.1-3.3, 3.6, 3.7 | • Operates from a broad conceptual plan, developing operational detail in stages, regularly reviewing priorities and performance during implementation, and identifying and addressing issues<br>• Monitors outcomes of process and decisions made, considering results from a range of perspectives and identifying key concepts and principles that may be adaptable to future situations<br>• Takes responsibility for high-impact decisions in complex situations involving many variables and constraints<br>• Uses formal, analytical and lateral thinking techniques to resolve problems such as unexpected variations to requirements and control proposed changes in scope<br>• Monitors outcomes of decisions, considering results from a range of perspectives and identifying key concepts and principles and their impact on customers and enterprise |

# Assessment Requirements for ICTTEN816 Scope project requirements and process solutions

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- prepare project specifications with project objectives
- develop scope management plan
- develop scope management strategies
- conduct regular program reviews
- measure project outcomes
- manage the impact of scope changes within established budget and timeline.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- examine a range of products, services and solutions as they apply to various project outcomes
- explore various stakeholders and relevant levels of authorisation required for the duration of a project
- explain project life-cycle and the significance of scope management
- outline scope management plans, methodologies, techniques and tools
- summarise typical challenges and issues encountered in project scope management and options for addressing them
- identify and explore various project performance indicators and how project performance can be measured
- evaluate various vendor products and solutions.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

# ICTWEB201 Use social media tools for collaboration and engagement

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to establish a social networking presence, using social media tools and applications. It includes the requirement to review, compare, and use different types of social networking tools and applications.

It applies to information and communications technology (ICT) personnel who need to develop a social networking web presence for a small or large office environment, using social media tools and applications.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Web

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Describe the different types of social media tools and applications | 1.1 Explain the characteristics of the term ‘social media’<br>1.2 Identify different types of social-media tools and applications<br>1.3 Illustrate some of the issues associated with the use of social media tools and applications |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| 2. Compare different types of social media tools and applications | 2.1 Select one social media type to review<br>2.2 Review the most popular tools, and applications, within that social media type<br>2.3 Itemise the benefits across a range of the most popular tools and applications<br>2.4 Select the most appropriate social media tool or application |
| 3. Set up and use, popular social media tools and applications | 3.1 Identify the social media tools and applications available for possible implementation<br>3.2 Initiate the preferred social media tools, and applications, for use<br>3.3 Establish the social media interface, using text and file content<br>3.4 Initiate social networking interaction<br>3.5 Test and evaluate tools, and applications, for ease of use<br>3.6 Present the findings |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.2, 2.2 | • Extract the relevant information from technical and organisational documents |
| Writing | 1.1, 2.2, 2.3, 3.3, 3.4, 3.6 | • Develop the content in a manner that supports and conveys information, using the appropriate structures and specialised language |
| Navigate the world of work | 1.3 | • Understands legal and ethical responsibilities, regarding the use of social media tools |
| Get the work done | 2.1, 2.2, 2.4, 3.1, 3.2, 3.5, 3.6 | • Makes routine decisions and implements standard procedures for routine tasks<br>• Understands the purposes, specific functions, and the key features of common digital systems and tools, and operates them effectively to complete routine tasks |

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Requirements for ICTWEB201 Use social media tools for collaboration and engagement

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- identify different types of social media tools and applications, and the issues associated with their use
- access the internet, set up a social networking presence and upload and link a wide variety of files
- use and evaluate social media tools and applications.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list basic technical terminology in relation to social networking, social media applications, and tools
- outline basic methods of uploading images, text files, portable document format (PDF) files, audio files, video files, and link the associated files
- state the features, and functions, of social media applications
- list import and export software functions
- explain how to link documents
- explain the process of tagging, in order to facilitate collaborative folksonomy
- list social media applications and procedures, for connecting to social networking sites
- identify and describe, input and output devices
- describe, and use, really simple syndication (RSS) feeds to connect a social network.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the website technologies field of work, and include access to:

- a personal computer (PC) and printer
- the internet
- social-media tools and applications
- online instructional documents.

Assessors must satisfy NVR/AQTF assessor requirements.

# Assessment Requirements for ICTWEB301 Create a simple markup language document

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- review document requirements, and select the appropriate language
- create and save a markup language document
- validate the document
- use a markup language, without the automated generation of code.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and describe, markup languages and their associated standards
- list the features and limitations of a range of available browsers
- explain web accessibility.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the website technologies field of work, and include access to:

- the organisational style guide or policy
- the document specification
- a text editor
- a range of browsers
- the internet, to validate the markup.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTWEB302 Build simple websites using commercial programs

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to use web authoring tools to create, modify and test, simple web pages and websites.

It applies to individuals with responsibility for creating and maintaining simple websites.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Web

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Identify the authoring requirements | 1.1 Select the preferred web authoring tool, according to the client requirements<br>1.2 Set preferences for the web authoring tool, including the site file transfer protocol client |
| 2. Create and save the files | 2.1 Create files, and save them, in the correct location or directory<br>2.2 Navigate the web authoring tool environment, or workspace<br>2.3 Access and use, a range of features in the web authoring tool |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 2.4 Maintain a suitable directory structure for the site<br>2.5 Save in the appropriate directory structure<br>2.6 Upload files to the appropriate folder on the server |
| 3. Add content to the web pages | 3.1 Insert and format text content, according to the client requirements<br>3.2 Insert images, data tables, and simple forms<br>3.3 Access the markup language and make basic modifications to the code |
| 4. Create simple navigation | 4.1 Create a site map in order to plan navigation<br>4.2 Create links between pages to reflect content structure, using both text and images |
| 5. Test the website | 5.1 Test the elements of the website's content across a number of different browsers, and browser versions, to ensure the consistency of presentation and performance<br>5.2 Test that the website meets the client requirements |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 3.1 | • Evaluates a range of technical specifications and other information, to determine the most appropriate solutions to meet client needs and requirements |
| Writing | 2.1, 3.1, 3.3, 4.1 | • Uses software, and the appropriate technical language, to create files |
| Navigate the world of work | 3.1 | • Understands own role and responsibility to comply with specific client requirements |
| Interact with others | 1.1, 3.1, 5.2 | • Initiates a connection with others through verbal, or nonverbal communication, responding as appropriate |
| Get the work done | 1.1, 1.2, 2.1, 2.2, 2.3, 2.4, 2.5, 2.6, 3.1, 3.2, | • Takes responsibility for planning, sequencing and prioritising tasks within own workload, for efficiency and |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| | 3.3, 4.1, 4.2, 5.1, 5.2 | effective outcomes<br>• Makes some critical and non-critical decisions within mostly familiar situations, to develop and test, functional websites that meet client needs<br>• Understands the purposes, specific functions, and the key features of common digital systems and tools, and operates them effectively to complete routine tasks |

# Assessment Requirements for ICTWEB302 Build simple websites using commercial programs

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- select, and use, a web authoring tool to create web pages in accordance with client requirements
- insert the text and image elements into a web page
- modify the existing markup
- test web page content for consistency
- upload the files to the server.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the Australian Computer Society Code of Ethics
- list the workp health and safety (WHS) requirements relevant to the information and communications technology (ICT) industry
- identify the web authoring tools used for web page design
- provide an overview of website publishing and markup languages
- explain sustainability concepts, including energy and resource conservation
- describe the function of a file transfer protocol (FTP)
- list common browsers used for accessing the web.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the website technologies field of work, and include access to:

- computer hardware and software
- web authoring tools
- the web servers
- the website
- storage media
- FTP client software
- the server security password, and access procedures.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTWEB303 Produce digital images for the web

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the performance outcomes, skills and knowledge required to produce, and manipulate, images suitable for use in website development.

This unit applies to individuals with responsibility for creating graphics for a web environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Web

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Determine the client requirements | 1.1 Access and interpret the client brief to determine client needs<br>1.2 Analyse client needs with regard to image content, quality and size |
| 2. Source the images | 2.1 Research the appropriate sources of images, to meet a range of needs<br>2.2 Source the images appropriate to meet the needs, taking into consideration copyright restrictions |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| 3. Manipulate the images | 3.1 Select the appropriate industry-standard, image-editing software for the purpose<br>3.2 Create backups of the assets to be used<br>3.3 Use features of the image-editing software, to create a range of effects appropriate to client needs and web application<br>3.4 Edit, resize, and slice images for use in web applications, as required to meet client needs |
| 4. Save the images | 4.1 Save the images, maintaining their individual effects<br>4.2 Save the images in formats appropriate for use in web applications, and to client needs<br>4.3 Save the images in the appropriate directory structure |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.2, 2.1, 2.2, 3.1 | • Investigates and evaluates technical information, software and organisation documents, to determine work requirements, appropriate web applications and solutions |
| Writing | 3.2-3.4, 4.1-4.3 | • Uses specific software and technical language to create, format, review, save, and access web-based images |
| Navigate the world of work | 1.1, 2.1 | • Understands own role and responsibility, in order to comply with specific client and legislative requirements |
| Get the work done | 1.1, 1.2, 2.1, 2.2, 3.1-3.4, 4.1-4.3 | • Takes responsibility for planning, sequencing, and prioritising tasks within own workload, for efficiency and effective outcomes<br>• Makes some critical and non-critical decisions within mostly familiar situations, to develop and test functional websites that meet client needs<br>• Understands the purposes, specific functions, and the key features of common digital systems and tools, and operates them effectively to complete routine tasks |

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Requirements for ICTWEB303 Produce digital images for the web

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- analyse the client's needs
- undertake research to source the images
- manipulate and produce images for use in website development, to meet the requirements of the brief
- save the images in appropriate format.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and describe, the industry standards and the copyright legislation relevant to digital images
- explain sustainability concepts appropriate to the ICT industry
- describe digital image formats and their application
- identify and summarise, common digital image editing software.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the website technologies field of work, and include access to:

- image manipulation software, hardware and storage devices currently used in industry
- the client brief

© Commonwealth of Australia, 2025 Future Skills Organisation

- the sources of the images, and opportunities to review digital images prepared for a website
- the organisational policy and procedures.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTWEB401 Design a website to meet technical requirements

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to design a website to specifications, within a particular technical and human interface environment.

This unit applies to individuals who are responsible for analysis, documentation and design, including identifying the technical and human computer interface requirements that drive design.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Web

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Define the technical environment | 1.1 Identify the business requirements<br>1.2 Identify the appropriate standards required to develop the site<br>1.3 Identify the appropriate hardware and software required |
| 2. Define the human computer interface | 2.1 Conduct a user analysis, in order to determine a user profile and user needs<br>2.2 Determine the user content, and requirements |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 2.3 Determine the appropriate design principles for the site<br>2.4 Identify the appropriate operating system |
| 3. Determine the site hierarchy | 3.1 Identify the hierarchy of pages<br>3.2 Ensure that the content is logical and accessible to the user<br>3.3 Ensure that navigation between pages is consistent and clear |
| 4. Integrate the design components | 4.1 Apply the appropriate information hierarchy to the site design<br>4.2 Ensure that the design principles are appropriate to the business, and to the user<br>4.3 Ensure that the process flow is developed in a logical and simple manner<br>4.4 Test the site against user needs<br>4.5 Complete and document the design structure |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1-1.3, 2.1-2.4, 3.1-3.3 | • Interprets, analyses, and syntheses, technical and organisational information to inform decision-making, to construct and validate solutions, and to produce responses to pre-determined requirements and work tasks |
| Writing | 2.2, 3.2, 3.3, 4.5 | • Develops content in a manner that supports and conveys information, using the appropriate structures, templates, software, and specialised language<br>• Produces a logically sequenced text to convey exact procedural requirements and specific, and concise, instructions/meaning |
| Navigate the world of work | 1.2 | • Takes personal responsibility for adherence to the standards of industry bodies, where related to own work context |
| Interact with others | 2.1, 2.2, 4.2 | • Selects the appropriate communication protocols and conventions, when conferring with clients to elicit information, and to determine specific needs and |

# Assessment Requirements for ICTWEB401 Design a website to meet technical requirements

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- identify and select, the appropriate tools and procedures required to develop a website
- conduct a user analysis to identify the website, or design structure, required
- define the user interface
- determine the site hierarchy
- test the website, to ensure that it meets the standards required by the user.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the basic aspects of information architecture
- describe the business process design
- outline copyright and intellectual property requirements
- provide an overview of the customer, and business, liaison
- detail e-business sites and corporate strategy
- describe the implications of technology connectivity
- explain the procedures for documenting technical specifications
- discuss the relevant standards relating to website design
- compare website design methods, and standard website structures
- recognise and define, common operating systems
- recognise and operate, common computer hardware.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the website technologies field of work, and include access to the:

- analysis software
- customer relationship model
- e-business website
- requirements documentation
- site server
- site server software
- web servers
- relevant standards, and copyright information.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTWEB402 Confirm accessibility of websites for people with special needs

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to ensure that a website is accessible to users with auditory, visual, mobility, and cognitive impairments, and those people who use assistive technology.

It applies to individuals who use analysis and technical skills, to build and test websites.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Web

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Identify the accessibility standards | 1.1 Research and identify, specific user groups with particular accessibility requirements<br>1.2 Identify general legislated and industry accessibility standards, and requirements, to understand the wider context of accessibility<br>1.3 Identify web development standards, and prioritise application<br>1.4 Consolidate specific and general standards, and requirements, into an accessibility checklist for application to website related |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | work |
| 2. Test for website accessibility | 2.1 Select and prepare, the appropriate automatic testing tools and software<br>2.2 Run the automatic testing tools and make document changes, based on the results<br>2.3 Ensure that the text equivalent for every non-text element is present in the website, where feasible<br>2.4 Verify that information conveyed with colour is also available without colour<br>2.5 Identify any changes in the natural language of a document text<br>2.6 Check and ensure, that the document can be read without style sheets<br>2.7 Check and ensure that the priorities identified in the analysis of web development standards are met and completed<br>2.8 Test the site with different user groups, to ensure that the site transforms successfully and maintains accessibility |
| 3. Test the pages | 3.1 Check and ensure that the pages are not dependent on colour, and can operate in a monochrome environment<br>3.2 Check and ensure that the pages are logical and accessible, in a text-only environment<br>3.3 Verify that the pages operate on a text-to-speech browser<br>3.4 Ensure that the accessibility of the website is signed off by the appropriate person, as meeting the web-development standards |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1-1.3, 2.1-2.8 | • Identifies, analyses, and evaluates complex texts to determine work requirements |
| Writing | 1.4, 2.1, 2.2, 2.4-2.8, 3.1-3.4 | • Uses specific software and technical language to format, review, and amend web-based documents and diagrams<br>• Generates checklists that include accessibility |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| | | standards criteria and other specific requirements |
| Oral Communication | 2.8 | • Participates in verbal exchanges with stakeholders, using listening and questioning to elicit information and to share viewpoints |
| Navigate the world of work | 1.2, 1.3 | • Takes personal responsibility for adherence to the regulatory and legislative standards related to own work context |
| Interact with others | 3.4 | • Selects and uses the appropriate conventions and protocols, to communicate with others in a specific work context |
| Get the work done | 1.4, 2.1, 2.2, 2.7, 2.8, 3.1, 3.2, 3.3, 3.4 | • Accepts responsibility and the ownership of tasks, and makes decisions on completion parameters, and the need for consultation and coordination with others<br>• Plans, sequences and prioritises tasks, and own workload, for efficiency and effective outcomes<br>• Understands the purposes, specific functions and the key features of common digital systems, tools and software, and operates them effectively to complete a series of diagnostic tests, and tasks, that meet prioritised web development standards for accessibility |

# Assessment Requirements for ICTWEB402 Confirm accessibility of websites for people with special needs

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- identify accessibility standards
- test a website for accessibility using a range of tools and tests
- check website documents and other web components for accessibility issues
- test web pages for accessibility.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and describe the relevant legislation, regulations and codes of practice, relating to access and equity
- describe the computing and programming standards that apply to access and equity
- describe the access and equity issues of web page design, in relation to:
  - customer and business liaison approaches, and processes
  - electronic commerce modelling language
  - government, advocacy group, and user group liaison
- discuss the application of privacy principles to website development, user access and user usage
- describe technical performance measurement principles
- describe the Web Accessibility Initiative (WAI)
- explain the importance of website accessibility, security, and equity legislation
- compare website design methods and standard website structures
- explain website security
- explain workload metrics

© Commonwealth of Australia, 2025 Future Skills Organisation

- list World Wide Web Consortium (W3C) standards.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the website technologies field of work, and include access to:

- a live website
- the requirements documentation
- the customer-relationship model
- automatic accessibility measuring tools
- organisational requirements and relevant standards.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTWEB403 Transfer content to a website using commercial packages

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to transfer content, from a remote location to a web server, using a range of commercial information and communications technology (ICT) products. The objective is the successful upload of new, or revised, information on a website.

It applies to individuals who are required to update websites.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Web

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Configure the file transfer protocol client | 1.1 Review and select the file transfer protocol (FTP) client, based on features and functions<br>1.2 Ensure that the file transfer protocol client is suitable for the technical environment<br>1.3 Enter client details, including the user identity (ID), password and the host name or ID, into profile fields to create a permanent |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | profile<br>1.4 Choose settings such as auto-detect, save profile, and password, depending on organisational security and privacy policy, and the organisational guidelines<br>1.5 Test and verify, the configuration by connecting to the web-hosting server |
| 2. Plan and prepare for the data transfer | 2.1 Prepare the data content, and back it up on the local computer or server<br>2.2 Identify data as compressed, or uncompressed, with the tools available on the server to manage uploaded data<br>2.3 Ensure that the files are in an appropriate form for recognition and interaction by the operating system<br>2.4 Ensure that the receiving directory structure is applicable for the data to be uploaded |
| 3. Establish the connection to server | 3.1 Log on to remote server using administrative, guest or anonymous accounts<br>3.2 Proceed through the security layers, based on organisational guidelines<br>3.3 Initiate the file transfer protocol client program and locate the destination directory |
| 4. Transfer the data to a remote server | 4.1 Select files to be transferred and choose the mode, American Standard Code for Information Interchange (ASCII), or binary<br>4.2 Run the antivirus software on the downloaded files<br>4.3 Move, rename, copy, and delete files on the server as necessary, and as permissions allow<br>4.4 Store and order files, according to requirements and file extensions<br>4.5 Conduct appropriate steps for downloaded files, such as translation, decompression, or de-archival of the files for use<br>4.6 Confirm the data transfer and content functionality, and close the connection |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

© Commonwealth of Australia, 2025 Future Skills Organisation

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.4, 1.5, 2.1-2.4, 3.2, 4.1-4.6 | • Accesses and evaluates technical information, standards, and data, to ensure alignment between work requirements, implementation protocols and specified outcomes |
| Writing | 1.3-1.5, 2.1-2.4, 3.1-3.3, 4.1, 4.3-4.5 | • Uses specific standards, software and technical language to create, update, enter and verify data and information, according to work requirements, implementation protocols, and specified outcomes |
| Navigate the world of work | 1.4, 3.2, 4.3, 4.4 | • Takes personal responsibility for adherence to legislative requirements and the organisational policies and guidelines, related to own work context |
| Get the work done | 1.1, 1.2, 1.3, 1.4, 1.5, 2.1, 2.2, 2.3, 2.4, 3.1, 3.2, 3.3, 4.1, 4.2, 4.3, 4.4, 4.5, 4.6 | • Plans, sequences and prioritises tasks and own workload, for efficiency and effective outcomes<br>• Understands the purposes, specific functions and the key features of common digital systems, tools and software, and operates them effectively, to complete a series of sequential tasks required to prepare, and transfer, data successfully to a website |

# Assessment Requirements for ICTWEB403 Transfer content to a website using commercial packages

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- configure a file transfer protocol (FTP) client
- prepare the content to be transferred
- connect to the server
- transfer the content.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the process of transferring content to a website including:
  - the FTP server and the client software
  - internet protocols
  - security issues
  - server access security procedures
  - server operating systems
  - website server architecture (e.g. Linux, Windows, Unix)
- outline the range of organisational policies, and procedures, that impact on web site development
- identify and describe the legislation, regulations, and codes of practice as they relate to web design, including:
  - codes of ethics
  - privacy
  - copyright
  - intellectual property.

© Commonwealth of Australia, 2025 Future Skills Organisation

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the website technologies field of work, and include access to the:

- web servers
- e-business website
- FTP client software
- server security password, and access procedures.

Assessors must satisfy NVR/AQTF assessor requirements.

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | links, multimedia links, and back-end software<br>4.6 Provide a timely and appropriate response to the client |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.2-1.3, 2.1-2.9, 3.1 | • Examines, constructs, organises and validates relationships between discrete, and interrelated, data and information |
| Writing | 1.5, 2.2, 2.2, 2.9, 3.1, 3.2, 3.4, 3.5, 4.1-4.6 | • Designs and develops, the procedural documents that convey critical performance information to end users<br>• Modifies documents using on-going analysis of performance data and feedback<br>• Prepares a well structure and cohesive document, that presents analysis of evidence and actions utilising the appropriate format, technical language, correct spelling and grammar |
| Numeracy | 1.3, 1.5, 2.1, 3.1, 3.2, 3.5, 4.1, 4.4 | • Assigns a numerical value to performance requirements, and uses measurement data to inform decisions, track performance, and establish actions to be taken in relation to the required work task |
| Navigate the world of work | 2.2, 2.4, 2.9, 3.2, 4.4 | • Takes personal responsibility for following, explicit and implicit, organisational policies relevant to own work<br>• Implements revisions to existing policies and procedures, or initiates new policies, relating to website use and performance for others |
| Interact with others | 4.6 | • Selects and uses appropriate conventions and protocols, to communicate with others in a specific work context |
| Get the work done | 1.1, 1.3, 1.4, 2.1, 2.3, 2.4, 2.5, 2.6, 2.7, 2.8, 2.9, 3.1, 3.3, 3.4, 4.1, 4.2, 4.3, 4.5 | • Determines job specifications and requirements, and performs clearly defined tasks in a logical, systematic sequence<br>• Uses analytical thinking and diagnostic processes<br>• Understands the purposes, specific functions, and key features of common digital systems, tools and software, and operates them effectively |

# Assessment Requirements for ICTWEB404 Maintain website performance

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- review and establish, website performance benchmarks
- ensure that the website meets specifications
- identify and rectify faults, where the performance is not met
- implement scheduled and non-scheduled maintenance
- effectively monitor, and tune, website performance.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the process of maintaining a website performance including:
  - security issues
  - website server architecture (e.g. Linux, Windows, Unix)
  - website security protocols
  - workload (web traffic) metrics
- outline the business process design methodologies
- identify and describe legislation, regulations, and codes of practice as they relate to web performance, including:
  - codes of ethics
  - privacy
  - copyright
  - intellectual property.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the website technologies field of work, and include access to:

- web servers and websites
- the technical requirements
- web traffic diagnostic tools, including timing tools to gauge website response times
- the appropriate learning and assessment support, when required
- the relevant organisational policies and procedures.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTWEB405 Monitor traffic and compile website traffic reports

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to monitor website traffic and to compile traffic reports as specified.

It applies to individuals who are required to maintain websites.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Web

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Select web traffic monitoring tools | 1.1 Identify and analyse the available site-analysis software, according to organisational requirements, and the website architecture<br>1.2 Choose and install the most suitable site-analysis software or internet service provider, according to the vendor requirements<br>1.3 Identify the required report options, according to organisational requirements and the website architecture<br>1.4 Develop a traffic monitoring program |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| 2. Monitor web traffic | 2.1 Specify the required traffic reports, according to information requirements<br>2.2 Generate the required traffic reports<br>2.3 Analyse the reports, to identify improvements to the server and to site performance<br>2.4 Apply forecasting methodologies to predict traffic peaks |
| 3. Make recommendations for improvements | 3.1 Recommend any changes in hardware and software<br>3.2 Implement the changes, as directed<br>3.3 Continue the traffic monitoring program, as required |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.3, 2.1, 2.3 | • Identify, analyse and evaluate, a range of organisational documents and technical information |
| Writing | 1.4, 2.1-2.3, 3.1 | • Constructs a data collection tool, incorporating the timelines and information to be collected<br>• Prepares a technical report, using the appropriate punctuation, language and layout, in order to convey the results and recommendations of investigations |
| Numeracy | 1.3, 1.4, 2.3, 2.4 | • Evaluates and presents, numerical and statistical data, to inform decisions and actions |
| Navigate the world of work | 1.1, 1.3, 2.1 | • Takes personal responsibility for following explicit and implicit organisational requirements, relevant to own work |
| Interact with others | 3.1, 3.2 | • Selects and uses the appropriate conventions and protocols, when communicating in a range of familiar work contexts |
| Get the work done | 1.1, 1.2, 1.4, 2.2, 2.4, 3.1, 3.2, 3.3 | • Determines job specifications and requirements, and performs clearly defined tasks in a logical, systematic sequence<br>• Uses analytical thinking and diagnostic processes, to monitor the web server and site performance, and to |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| | | suggest improvements<br>• Understands the purposes, specific functions, and key features of common digital systems, tools and software, and operates them effectively to monitor website traffic to meet requirements |

# Assessment Requirements for ICTWEB405 Monitor traffic and compile website traffic reports

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- select and install the site-analysis software, or an internet service provider (ISP)
- monitor website traffic
- generate and analyse traffic reports
- recommend and implement changes, as required.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the problems and challenges that arise with an organisation web site related to:
  - data queues and bottlenecks
  - website security
  - website copyright and intellectual property requirements
- identify and describe legislation, regulations, and the codes of practice as they relate to monitoring website traffic, including:
  - codes of ethics
  - privacy
- describe the process of monitoring website traffic, including:
  - functionality of network device drivers
  - functionality of network operating systems
  - queuing systems
  - website architecture
  - workload metrics

© Commonwealth of Australia, 2025 Future Skills Organisation

  - server design and functionality
- outline the features and functionality of commercially available:
  - log file analysis software
  - traffic tracking software
  - network device drivers
  - network operating systems
  - queuing systems.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the website technologies field of work, and include access to:

- analysis software
- the e-business website
- a web server

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTWEB406 Create website testing procedures

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to design and implement procedures, which measure the performance of a website, and compare these procedures to the initial design specifications.

It applies to individuals who may use significant judgement in planning, design, evaluation, technical or leadership and communications functions in frontline technical support roles.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Web

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Document and define the performance criteria | 1.1 Review the performance specifications and determine the benchmark criteria<br>1.2 Validate and document the performance functions<br>1.3 Select the measurement methodology, and test it on the website<br>1.4 Validate each performance function separately<br>1.5 Record and document the metric tools, using the appropriate |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | methodology<br>1.6 Prepare the performance benchmarks, and seek agreement on the criteria with the client |
| 2. Validate the performance measures | 2.1 Develop inspection and test plans, in order to validate performance measures throughout the performance cycle<br>2.2 Test the performance functions, and record the results, according to technical documentation standards<br>2.3 Compare the results of performance function testing to benchmark<br>2.4 Redesign functions that do not meet the appropriate performance benchmarks<br>2.5 Re-implement functions that have been redesigned during performance testing<br>2.6 Document the benchmarks and obtain sign-off |
| 3. Obtain sign-off | 3.1 Validate and document, performance standards and benchmarks<br>3.2 Submit the methodology and function testing document, and results, to the client for approval<br>3.3 Review client comments and make changes, as appropriate<br>3.4 Obtain sign-off for the website testing procedure |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1-1.6, 2.1-2.5, 3.1, 3.3 | • Evaluates, integrates, and confirms the authenticity of the data and information, to reach an understanding of the contextual and procedural nature of business solutions |
| Writing | 1.2, 1.5, 1.6, 2.1, 2.2, 2.6, 3.1-3.3, 3.4 | • Develops and documents benchmark standards, performance plans, measurements, and detailed results, and recommendations for client approval<br>• Uses the appropriate formats and writing principles, in accordance with technical standards and organisational |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| | | conventions |
| Oral Communication | 1.6, 2.6, 3.2-3.4 | • Participates in complex verbal exchanges with clients that require active listening and responses to questions, to elicit relevant and specific information, and to obtain feedback, and consensus |
| Numeracy | 1.1-1.6, 2.1-2.6, 3.1 | • Measures and evaluates performance, against established baseline numerical values |
| Navigate the world of work | 2.2, 2.6 | • Takes personal responsibility for following explicit, and implicit, organisational requirements relevant to own work |
| Interact with others | 1.6, 3.2, 3.4 | • Selects and uses, the appropriate conventions and protocols, when communicating in a range of familiar work contexts |
| Get the work done | 1.3, 1.4, 2.1, 2.2, 2.3, 2.4, 2.5, 3.1, 3.2, 3.3 | • Uses analytical thinking, systematic decision- making and diagnostic processes, to determine, implement and evaluate, testing and validation processes<br>• Understands the purposes, specific functions and the key features of common digital systems, tools and software, and operates them effectively, to perform testing procedures to meet requirements |

# Assessment Requirements for ICTWEB406 Create website testing procedures

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- identify the critical functions to be tested
- develop the appropriate metrics for each function, and assign the benchmarked performance standards
- test each performance function, and compare against the appropriate benchmarks
- validate the performance of the site against technical requirements
- document the results, to establish performance benchmarks for subsequent development of the site.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and describe the legislation, regulations, codes of practice, and standards as they relate to web testing, including:
  - codes of ethics
  - privacy
  - copyright
  - intellectual property
  - naming
  - documentation
- describe the client business domain, including client organisation structure and business functionality
- identify current industry-accepted hardware and software products

© Commonwealth of Australia, 2025 Future Skills Organisation

- outline the desktop applications and operating systems, as required by organisational guidelines
- describe queuing systems, workload metrics, and user request classes
- describe the key features, and use of, a standard generalised markup language (SGML) and its associated standards
- explain standard web-testing procedures and optimisation tools
- outline website design methodologies and standard website structures.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the website technologies field of work, and include access to:

- analysis software
- the e-business website
- industry standards, and organisational guidelines
- site design and technical requirements documentation
- site-development software and tools.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTWEB407 Conduct operational acceptance tests of websites

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to provide high-level assurance, that websites can be effectively and efficiently provisioned and deployed live, in a systematic manner.

It applies to individuals employed as web designers and web developers who are involved in testing the effectiveness of websites.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Web

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare the test | 1.1 Establish and document, the testing framework and schedule<br>1.2 Determine the processes and functions to be tested, and assign the quantitative and qualitative performance benchmarks to each process and function<br>1.3 Benchmark and document the page templates, style guides and expected traffic loads |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.4 Determine and document the test methodology<br>1.5 Assemble and brief, the testing panel on the conduct of the test<br>1.6 Develop user and installation manuals, according to the target audience's understanding and needs |
| 2. Test individual pages | 2.1 Test the pages, against style guides and templates<br>2.2 Test the pages, for consistency in structure and content<br>2.3 Apply the automatic testing software<br>2.4 Document page gross statistics of confirmed results of tests |
| 3. Test page relationships against the business requirements | 3.1 Test the installation, and the examples listed in instruction manual<br>3.2 Test page navigability using a variety of browsers<br>3.3 Test the ease of use and functionality against the requirements<br>3.4 Test software interface points, against the business and technical requirements<br>3.5 Test site security and privacy against the business requirements<br>3.6 Test the response time against the business requirements<br>3.7 Conduct load simulation testing, using single and multiple independent browsers, or automated load testing tools |
| 4. Apply and document further tests | 4.1 Test the website's ability to handle concurrent access<br>4.2 Test conformance to the applicable privacy, accessibility, and acceptable usage policy standards<br>4.3 Apply the automatic testing software<br>4.4 Collect, collate and document the results from the sample user, and data from the automated test |
| 5. Evaluate the test results | 5.1 Consolidate and compare the results to the benchmarks<br>5.2 Identify results that fail to meet the benchmarks, and conduct a site remedial iteration<br>5.3 Record and document the test results as the site performance baseline, against which further development or updating can be measured<br>5.4 Provide evaluation feedback to the appropriate person<br>5.5 Ensure that the appropriate person signs off on the site, prior to the 'go live' date |

© Commonwealth of Australia, 2025 Future Skills Organisation

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1-1.4, 2.1-2.3, 3.1-3.7, 4.1, 4.2, 5.1, 5.2 | • Examines, constructs, organises and validates relationships, between both discrete and interrelated data and information |
| Writing | 1.6, 2.4, 4.4, 5.1-5.5 | • Produces a concise formal document that conveys technical information and procedures, utilising the appropriate format, technical language, correct spelling and grammar<br>• Uses specific software and technical language to create, format, review, save and access documents |
| Oral Communication | 1.5, 5.4, 5.5 | • Conveys information by participating in verbal exchanges including listening, questioning and discussing, data and information with a group of people in order to elicit an understanding of, and obtain a consistency of approach to, work requirements<br>• Uses clear and detailed verbal language in order to convey explicit information, and to elicit approval for proposed solutions and activities |
| Numeracy | 1.2, 2.4, 5.1, 5.3 | • Determines analyses and presents, numerical and statistical, data to inform the decisions and actions to be taken to achieve pre-determined outcomes |
| Navigate the world of work | 3.4, 3.5, 3.6, 4.2, | • Ensures compliance of the product against business requirements and against the protocols |
| Get the work done | 1.1-1.6, 2.1-2.4, 3.1-3.7, 4.1-4.4, 5.1-5.5 | • Sequences and schedules complex activities, monitors implementation, and manages relevant communication<br>• Develops options, resolves issues, designs and implements tests, to ascertain the functionality of solutions prior to full implementation<br>• Utilises a combination of lateral and analytical thinking, to design, and refine, ideas to suit needs, resources and constraints<br>• Uses a range of digitally-based technologies and the software packages and hardware required for creating, and refining, websites |

# Assessment Requirements for ICTWEB407 Conduct operational acceptance tests of websites

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- prepare an operational acceptance test that measures the independent and integrated structural content, and the technical components, of the site
- apply automatic testing software and collect, collate and document the results or tests
- evaluate and provide feedback on the test results.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the client business domain
- describe the structure, function and business organisation of the client, including the business-process design
- identify the organisational policies and procedures that cover routine work processes, and the use of:
  - web optimising tools
  - web monitoring tools
  - web testing procedures
- describe technical performance measurement
- explain website accessibility and equity principles
- outline website structures, design and testing methodologies, and standards
- describe common website security issues and the methods employed to mitigate risk
- list and describe, common testing software and the metrics used
- identify and describe, the application of common website testing software.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the website technologies field of work, and include access to:

- special purpose tools, equipment and materials including:
  - web servers
  - the e-business website
  - the site server
- relevant industry software packages, including site server software and analysis software
- the organisational requirements documentation, customer relationship model, website manuals and instructions.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTWEB408 Ensure basic website security

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to provide basic website server, and protocol security appropriate to the level required by an organisation.

It applies to individuals employed as web maintenance staff who are required to ensure that a website meets basic security requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Web

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Determine business security requirements | 1.1 Identify the level of security required based on the business, and the commercial intent of the website<br>1.2 Identify whether password protection is needed for the site, or part of the site<br>1.3 Decide on minimum or maximum password protection solutions, based on the business requirements |
| 2. Ensure web server | 2.1 Ensure that the web server password is obscure and |

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- identify the level of security required by the business for the website
- implement password protection solutions, for the website and the server
- install and maintain, an intrusion detection system
- implement protocol security.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the client business domain, including the client organisation structure and business functionality
- identify current industry-accepted hardware and software products
- outline desktop applications and operating systems, as required
- describe firewall functionality
- describe hypertext transfer protocol (HTTP) and disk and executing monitor tools (daemons)
- outline the range of security protocols, including:
  - secure socket layer (SSL)
  - point-to-point network tunnelling protocol (PPTP)
  - layer 2 tunnelling protocol (L2TP)
- define security patches
- explain specific purpose security computers, acting as bastion hosts
- explain web-server operating systems.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the website technologies field of work, and include access to:

- special purpose tools, equipment, materials
- industry software packages
- a basic website and web servers
- the organisational requirements documentation
- website manuals and instructions.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTWEB409 Develop cascading style sheets

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0 |

## Application

This unit describes the skills and knowledge required to develop cascading style sheets (CSS) that are attached to a markup language document, in order to externally define, and control, styles to enhance and achieve commonality between web documents.

It applies to individuals who are required to layout and ensure consistency of appearance between web pages.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Web

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Format, style and lay out the elements on a web page | 1.1 Obtain user requirements<br>1.2 Style the elements of a web page using CSS<br>1.3 Apply CSS to multiple pages in a website<br>1.4 Position the document elements using CSS |
| 2. Test and validate the web pages | 2.1 Test the website in various browsers |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 2.2 Validate CSS against industry standards<br>2.3 Report the test results to the appropriate person |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1-1.3, 2.1, 2.2 | • Identifies, interprets and uses information from technical and business documents to complete a work task |
| Writing | 1.1-1.4, 2.3 | • Uses specific software and technical language to create, format, review, save and access web- based documents, diagrams and images |
| Oral Communication | 1.1, 2.3 | • Identifies work outcomes through open-ended questioning, active listening, paraphrasing and summarising<br>• Uses clear and detailed verbal language in order to convey explicit information |
| Numeracy | 1.2-1.4 | • Extracts and evaluates the mathematical information embedded in a range of tasks and texts<br>• Takes measurements and performs calculations for website layout |
| Navigate the world of work | 1.1, 2.2 | • Completes work to user requirements and industry standards |
| Get the work done | 1.1-1.4, 2.1-2.3 | • Sequences and schedules complex activities within the specified timeframe, monitors implementation, and manages relevant communication<br>• Analyses documentation in order to apply and obtain desired results, and to resolve problems<br>• Utilises a combination of lateral and analytical thinking, to design and refine solutions that are adaptable to different contexts<br>• Uses a range of digitally-based technologies, and the software packages and hardware required |

# Assessment Requirements for ICTWEB409 Develop cascading style sheets

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0 |

## Performance Evidence

Evidence of the ability to:

- develop a website style and format, using cascading style sheets (CSS), to user requirements
- lay out page elements, using CSS
- test web pages in a variety of browsers
- validate the CSS against industry standards.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss standard web and CSS design principles
- identify and describe the application of the following to CSS:
  - hypertext transfer protocol (HTTP)
  - hypertext mark-up language (HTML)
  - extensible hypertext mark-up language (XHTML)
  - industry standards for web design
- recognise a range of internet browsers.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the website technologies field of work and, include access to:

© Commonwealth of Australia, 2025 Future Skills Organisation

- special purpose tools, equipment and materials
- industry software packages
- a computer
- a variety of web browsers
- the organisational requirements documentation including:
  - an aesthetic presentation brief
  - website manuals
  - HTML documents
- the internet, for access to the World Wide Web Consortium (W3C).

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTWEB410 Apply web authoring tool to convert client data for websites

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0 |

## Application

This unit describes the skills and knowledge required to use web development software to create website content. The unit is designed to use a web-authoring tool to convert text and images to the appropriate web protocols.

It applies to individuals employed as web developers who are responsible for developing websites using client data.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Web

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Create the files | 1.1 Create files and save, in the correct location and directory<br>1.2 Insert and format text content, according to the business requirements<br>1.3 Insert and optimise images, as required |
| 2. Create the formatting | 2.1 Create basic external cascading style sheets (CSS) |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| templates | 2.2 Define styles for the required tags, according to the business requirements<br>2.3 Link CSS to the files, and display formatting |
| 3. Define library items | 3.1 Identify items that recur on several pages, and include in the library<br>3.2 Format selected items, according to CSS definition<br>3.3 Check the tags of selected items<br>3.4 Create and clearly name, the selected library items<br>3.5 Update the items contained in the library, according to the business requirements |
| 4. Develop the templates | 4.1 Create and save file as template, and link with CSS<br>4.2 Format the template and create, and name, editable regions<br>4.3 Place the generic image icons in a page, as required by the business image<br>4.4 Save and modify the templates |
| 5. Identify the authoring requirements | 5.1 Select the preferred web authoring tool, according to the business requirements<br>5.2 Set the preferences for the web-authoring tool, including the site file transfer protocol (FTP) client<br>5.3 Customise and navigate, the web author tool environment or workspace, to meet individual requirements<br>5.4 Select buttons and tools, both opened and closed, to access the full range of features<br>5.5 Define and name the site and root folder |
| 6. Create simple forms | 6.1 Add form elements to the page<br>6.2 Set the form element properties for each form element<br>6.3 Insert additional fields, as required for the processing form<br>6.4 Identify the availability, and location, of the common gateway interface (CGI) script<br>6.5 Connect the form to a script in a server CGI bin<br>6.6 Test the form to ensure that there are no errors |
| 7. Create simple navigation | 7.1 Create the site map in order to plan navigation<br>7.2 Create the links between pages to reflect the content structure, |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | using both text and images<br>7.3 Check the links in multiple browsers for errors<br>7.4 Check the website content across a number of different browsers, and browser versions, to ensure consistency of presentation, performance and accessibility |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.2, 3.1, 3.2, 3.5, 5.1-5.5 | • Identifies, and interprets, information from technical and business documentation to complete a work tasks, according to the business requirements and technical specifications |
| Writing | 1.1-1.3, 2.1-2.3, 3.2, 3.4, 3.5, 4.1-4.4, 5.2-5.5, 6.1-6.5, 7.1-7.3 | • Uses specific software and technical language to create, format, review, save and access web based documents, templates, diagrams and images<br>• Electronically enters data and information that meet business requirements, and adheres to the technical requirements and specifications |
| Navigate the world of work | 1.1, 2.2, 3.5, 5.1 | • Completes tasks in accordance with the specified business requirements |
| Get the work done | 1.1-1.3, 2.1-2.3, 3.1-3.5, 4.1-4.4, 5.1-5.5, 6.1-6.6, 7.1-7.4 | • Prioritises and monitors own work<br>• Solves operational problems, as they arise<br>• Analyses the business requirements and interprets the technical aspects of implementation<br>• Designs simple forms<br>• Operates software applications, selects the appropriate authoring tools to meet the required specifications, and writes and maintains, the hypertext markup language (HTML) |

# Assessment Requirements for ICTWEB410 Apply web authoring tool to convert client data for websites

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- develop web content, using authoring tools to meet the business requirements
- create cascading style sheets (CSS)
- define library items
- create templates
- use authoring tools to create cross-browser web documents
- create forms
- create navigation tools.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and describe, the client business domain
- identify and describe the legislation, regulations, codes of practice and standards, as they relate to websites
- outline the accessibility guidelines regarding web-authoring tools
- explain the standard generalised markup language (SGML), and describe the associated standards
- describe standard web and CSS design principles and structures.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the website technologies field of work, and include access to:

- special purpose tools, equipment and materials
- industry software packages
- the website, where content may be developed
- site authoring software and tools
- the business expectations brief
- the appropriate standards, and current legislation.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTWEB411 Produce basic client-side script for dynamic web pages

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0 |

## Application

This unit describes the skills and knowledge required to develop interactive and engaging websites, using a range of features from various, appropriate languages.

It applies to individuals working in web development environments who are required to produce client-side scripts as a common means of creating interactive websites. These scripts offer an effective simple means of enabling websites to provide greater interaction with clients.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Web

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Analyse the requirements for web documents | 1.1 Determine the necessary dynamic functionality of the web document<br>1.2 Determine the appropriate language to achieve that functionality<br>1.3 Determine the web document requirements |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| 2. Design and produce web documents | 2.1 Design the web document, and embedded scripts to achieve the required functionality<br>2.2 Write a simple hypertext markup language (HTML), considering accessibility<br>2.3 Write embedded scripts |
| 3. Test the scripts and debug | 3.1 Test the web document against the required functionality, and reiterate until correct<br>3.2 Complete the documentation and submit it to the appropriate person for their approval |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.3 | • Recognises and interprets textual information in various information and communications technology (ICT) languages, in order to determine the dynamic functionality of the web document |
| Writing | 1.1, 1.3, 2.1, 2.2, 2.3, 3.2 | • Develops material for a specific audience, using detailed ICT language, to convey explicit information |
| Oral Communication | 1.1, 1.3 | • Articulates clearly, using the specific language suitable to technical, operational and business audiences, to convey requirements and listening, and questioning, techniques to confirm understanding |
| Get the work done | 1.1-1.3, 2.1-2.3, 3.1-3.2 | • Plans approach to work based on internet protocols, and the analysis of business needs and requirements<br>• Sequences, schedules and prioritises own work activities<br>• Resolves issues, including design and functionality conflicts, debugging and handling errors, and implements tests to ascertain the functionality of solutions, prior to full implementation<br>• Utilises a combination of lateral and analytical thinking, and practice, to design and validate the reliability, and efficacy of web documents |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| | | • Uses a range of digitally-based technologies, software packages, and hardware to view the active elements or objects across different platforms, and to design, and produce, web documents |

# Unit Mapping Information

# Assessment Requirements for ICTWEB411 Produce basic client-side script for dynamic web pages

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- determine the dynamic functionality and requirements of web documents
- select the appropriate language
- design web documents with embedded script
- produce dynamic web page documents
- test and debug, the web document functionality
- document and gain client approval.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss the basic principles behind open platform programming
- describe client-side scripting and its application to dynamic web page design, including:
  - events and event handlers
  - internet operation related to servers and clients
  - internet protocols
  - standard generalised markup language (SGML)
  - associated standards
- identify and outline, security restrictions on servers
- describe the difference between server-side and client-side scripting
- describe the standards associated with programming documentation.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the website technologies field of work, and include access to:

- special purpose tools
- equipment and materials
- industry software packages
- the web server
- the client requirements
- the security policy
- functionality and scope requirements.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTWEB412 Produce interactive web animation

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to create interactive animated enhancements, to advertisements and web pages.

It applies to individuals working as web designers who generate and apply advertisements for website clients, create animations to enhance a web page message and produce fully animated websites.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Web

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Analyse project requirements | 1.1 Determine the necessary dynamic functionality of the animation to be included inside the web document<br>1.2 Determine the appropriate language to achieve that functionality<br>1.3 Determine web document requirements<br>1.4 Research and evaluate, current requirements for online |

# Assessment Requirements for ICTWEB412 Produce interactive web animation

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- determine the requirements for the animation
- design the interactive animations requirements
- create animations for web pages and advertising applications
- publish the animations to the web environment.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline web animation programming concepts, including:
  - acceptable formats for importing assets
  - component libraries
  - cross-browser issues
  - importing and exporting libraries
  - inserting the published work to a hypertext markup language (HTML), or extensible hypertext markup language (XHTML) page
  - internet-animation player statistics
  - masking
  - movements and automated movements
  - publishing the finished work to an acceptable web format
  - shape animation and manipulation
  - symbols
  - text manipulation

© Commonwealth of Australia, 2025 Future Skills Organisation

  - transparencies
- explain programming control structures, object-oriented programming, including:
  - buttons
  - scripting to go to uniform resource locators (URLs)
  - scripting to jump to different parts of the animation
  - scripting using the programming language
- summarise internet technology, including selecting the right scripting type to reach a maximum determined audience
- outline the principles of the analysis of web parameters, and the design of suitable animations, for advertisements and website enhancements
- explain the methods and attributes of animation, and how it enhances the website to entice buyers.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the website technologies field of work, and include access to:

- a development environment
- the internet
- browsers
- the appropriate web design software.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTWEB413 Optimise search engines

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to create and implement, good internet-marketing practices using search engine optimisation (SEO) techniques, including introducing web pages to search engines, and monitoring search engine performance.

It applies to individuals who make recommendations and monitor keyword enhancements, search engine marketing (SEM) and social network marketing (SNM).

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Web

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Analyse internet-marketing requirements | 1.1 Determine the main business of the website, and the keywords currently used on each page<br>1.2 Create a keyword suggestion list for the website, using online tools<br>1.3 Analyse the best keywords for macro and sub-keywords<br>1.4 Create recommendations for improved optimisation for image search optimisation (ISO), keyword density on web pages, and |

# Assessment Requirements for ICTWEB413 Optimise search engines

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- analyse internet marketing requirements
- prepare and implement, an internet search engine marketing strategy
- monitor search engine performance
- make recommendations for:
  - keyword enhancements
  - search engine marketing (SEM)
  - social network marketing (SNM).

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe internet marketing methods and best practices, including:
  - search terms
  - keywords
  - keyword density
  - search engine ranking
  - search engine methods of assessing search engine optimisation (SEO)
  - back links
  - social network media in the context of SEO
- analyse and interpret, the internet marketing strategy of a website.

© Commonwealth of Australia, 2025 Future Skills Organisation

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in website technologies field of work, and include access to the:

- website files
- file transfer protocol (FTP)
- internet
- profiling tools
- social network marketing logins.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTWEB414 Design simple web page layouts

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to scope web page requirements, and to create and implement designs.

It applies to individuals working as web designers and web developers, who apply a wide range of knowledge and skills for basic web development.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Web

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Identify main layout sections from design specification | 1.1 Identify the required sections of the web page<br>1.2 Create the web page structure |
| 2. Layout the web page to match design specification | 2.1 Position document elements<br>2.2 Style web page elements to match the design specifications |
| 3. Test and validate the | 3.1 Test the website in various browsers |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| layout | 3.2 Validate the web pages against industry standards |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Learning | 1.1 | • Identifies and explores, the connections between ideas and methodologies to extend the understanding of requirements |
| Reading | 2.2, 3.2 | • Recognises and interprets textual information, in order to determine and adhere to, requirements |
| Writing | 1.1 | • Develops clear and well-organised material for a specific audience, using precise language to convey explicit information, and requirements |
| Oral Communication | 1.1 | • Clearly articulates requirements, using the language appropriate to the audience and environment, and participates in a verbal exchange of ideas/solutions |
| Numeracy | 1.2, 2.1 | • Takes measurements, and performs calculations for the web page layout |
| Navigate the world of work | 3.2 | • Identifies and acts on issues that contravene the relevant industry standards |
| Get the work done | 1.2, 2.1, 2.2, 3.1, 3.2 | • Takes responsibility for planning, sequencing, and prioritising tasks and own workload, for efficiency and effective outcomes<br>• Addresses less predictable problems, and initiates standard procedures in response to these problems, applying problem-solving processes in determining a solution<br>• Uses familiar digital technologies and systems to access information, search and enter data, and code, present information and communicate with others, cognisant of data security and safety |

# Assessment Requirements for ICTWEB414 Design simple web page layouts

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- develop a website according to design specifications
- lay out page elements
- test the web pages in a variety of browsers
- validate the web pages, against industry standards.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise standard web and web scripting design principles
- define and explain the application of the following for website development:
  - cascading style sheets (CSS)
  - the hypertext transfer protocol (HTTP)
  - a markup language, such as hypertext markup language (HTML), or extensible hypertext markup language (XHTML)
  - World Wide Web Consortium (W3C) standards.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the website technologies field of work, and include access to:

- a computer

© Commonwealth of Australia, 2025 Future Skills Organisation

- an aesthetic presentation brief
- a variety of browsers
- the internet, to validate against the W3C.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTWEB415 Produce server-side script for dynamic web pages

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to produce server-side scripts for dynamic web pages, using a range of relevant features from different but appropriate languages.

It applies to individuals working as web designers who apply a wide range of knowledge and skills across different information and communications technology (ICT) environments to support small to medium enterprises (SMEs) that require broader, rather than more specialised, ICT support.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Web

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Analyse the requirements for web documents requiring server-side dynamic interaction | 1.1 Determine the necessary dynamic functionality of the web document<br>1.2 Determine the appropriate language, to achieve that functionality<br>1.3 Determine web document requirements |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| 2. Design server-side scripts | 2.1 Design the web document and server-side code, to interact with an external data source<br>2.2 Design the web document and server-side code, to allow an administrator to insert, update, and delete entries to the external data source<br>2.3 Implement security features in the web document |
| 3. Produce the web documents | 3.1 Write the extensible hypertext markup language (XHTML), considering accessibility<br>3.2 Write server-side scripts to current XHTML standards |
| 4. Test the scripts and debug | 4.1 Test the web document against required the functionality and reiterate until correct<br>4.2 Complete the documentation and submit it to the appropriate person for their approval |
| 5. Set up security | 5.1 Determine the necessary permissions to prevent error messages displaying to the public<br>5.2 Configure server software to minimise potential database attacks |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.3 | • Identifies, analyses and evaluates workplace instructions and technical documentation, to determine all business requirements |
| Writing | 2.2, 2.3, 3.1, 3.2, 4.2 | • Develops clear and well-organised material for a specific audience, using precise language to convey explicit information requirements and recommendations |
| Oral Communication | 1.1, 1.3 | • Clearly articulates requirements using the language appropriate to the audience, and participates in a verbal exchange of ideas/solutions |
| Navigate the | 3.2 | • Identifies and complies with the current standards |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| world of work | | |
| Interact with others | 4.2 | • Uses a range of strategies to establish a sense of connection, and to build rapport, with clients and co-workers |
| Get the work done | 1.2, 2.1, 2.2, 2.3, 4.1, 5.1, 5.2 | • Takes responsibility for planning, sequencing and prioritising tasks and own workload, for efficiency and effective outcomes<br>• Makes routine decisions and implements standard procedures for routine tasks, using formal decision-making processes for more complex and non-routine situations<br>• Uses familiar digital technologies and systems to access information, search and enter, data and code, present information and communicate with others, cognisant of data security and safety |

# Assessment Requirements for ICTWEB415 Produce server-side script for dynamic web pages

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- create dynamic web pages according to all job requirements, using server-side scripting to retrieve information from a web-hosted database
- create scripts for:
  - the quick upload of data to web-hosted databases
  - inserting, updating, and deleting data from a web server database
  - encoding passwords
  - uploading and retrieving images
  - managing sessions, and creating a secure login.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain server-side technologies, and the relevant web scripting languages
- discuss server-side web analysis and design parameters
- summarise and apply, programming control structures and object-oriented programming
- outline web-programming concepts including:
  - the hypertext transfer protocol (HTTP)
  - stateless programming
  - session management
  - authentication and web security.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the website technologies field of work, and include access to the:

- client requirements
- functionality and scope requirements
- security policy
- database server
- internet and server
- software development environment
- web browsers.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTWEB416 Customise content management system

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to create and integrate, a website into an open-source content management system.

It applies to individuals working as web developers who apply a wide range of knowledge and skills, across ICT, to support small to medium enterprises (SMEs) that require broader, rather than more specialised, ICT support.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Web

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Analyse the specifications and requirements | 1.1 Determine the required functionality of the website<br>1.2 Determine the appropriate server-side language that will be used to produce the website<br>1.3 Determine the content structure and navigation of the website<br>1.4 Determine the pre-existing restraints that need to be considered when developing a website solution |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| 2. Research the requirements | 2.1 Research the appropriate solutions, based on website requirements, including the programming language, content management system (CMS), licensing structure and hosting structure<br>2.2 Research the techniques, plug-ins and additions to the existing content management system, in order to allow the solution to fulfil the needs determined while analysing website requirements |
| 3. Create a content-management system powered website | 3.1 Install and configure the chosen CMS<br>3.2 Insert and manage, the website content<br>3.3 Install and implement the appropriate techniques, and plug-ins |
| 4. Validate and evaluate the final website | 4.1 Validate the final website markup against current website standards<br>4.2 Validate the content management system performance in different browsers, checking compatibility, and core content management system functionality |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Learning | 1.1, 1.2, 1.4, 2.1, 2.2 | • Researches, analyses and validates information to determine the best solution for client requirements, and builds on prior knowledge to extend understanding |
| Reading | 1.1, 1.2, 2.1, 2.2 | • Identifies, analyses and evaluates industry standards, workplace instructions, online and other technical documentation, to determine all business requirements |
| Writing | 3.2 | • Develops clear and well-organised material for a specific audience, using precise language to convey explicit information requirements, and recommendations |
| Oral Communication | 1.1, 1.2 | • Clearly articulates requirements, using language appropriate to the audience and participates in a verbal exchange of ideas/solutions |
| Navigate the | 2.1 | • Takes personal responsibility for following explicit and implicit requirements for licencing policies, |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| world of work | | procedures and regulatory requirements |
| Get the work done | 1.1-1.4, 2.1-2.2, 3.1-3.3, 4.1, 4.2 | • Takes responsibility for planning, sequencing and prioritising tasks and own workload, for efficiency and effective outcomes<br>• Makes routine decisions and implements standard procedures for routine tasks, using formal decision-making processes for more complex and non-routine situations<br>• Addresses less predictable problems, and initiates standard procedures in response to these problems, applying problem-solving processes in determining solutions<br>• Uses familiar digital technologies and systems to access information, search and enter, data and code, present information and communicate with others, cognisant of data security and safety |

# Assessment Requirements for ICTWEB416 Customise content management system

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- research and evaluate client requirements
- create a content management system (CMS) powered website using an open-source solution
- validate the CMS against the standards set by the World Wide Web Consortium (W3C).

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- define "content management system" and describe its purpose
- explain markup language and its associated standards
- outline server-side language and security techniques
- discuss web accessibility
- evaluate a content management system (front and backend) in commonly used browsers
- outline W3C standards and their application to website development.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the website technologies field of work, and include access to:

- the client requirements, and content
- a text editor
- a range of browsers

© Commonwealth of Australia, 2025 Future Skills Organisation

- the internet for research and code validation.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTWEB417 Integrate social web technologies

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to successfully develop and integrate social networking code into new and existing websites.

It applies to individuals working as web developers who apply a wide range of knowledge and skills across a range of general information and communications technology (ICT) environments and support small to medium enterprises (SMEs) that require broader, rather than more specialised, ICT support.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Web

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Analyse the specifications and requirements | 1.1 Evaluate different popular social networking websites<br>1.2 Discuss the benefits of social networking in websites<br>1.3 Discuss the negative aspects of social networking<br>1.4 Define goals, based on the client requirements, for successful social networking integration |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| 2. Develop the code and documentation | 2.1 Develop the guidelines for implementing social networking in a website<br>2.2 Develop the code to integrate a social networking website, into a pre-existing website<br>2.3 Use the pre-existing scripts and tools, to integrate a social networking website into a pre-existing website |
| 3. Validate the integration | 3.1 Validate social networking integration<br>3.2 Validate the performance of the social networking integration in different browsers, checking compatibility and display |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.4, 2.3, 3.2 | • Analyses and consolidates information and data, from a range of sources, against the defined criteria and requirements, and checks for accuracy and completeness |
| Writing | 1.4, 2.1, 2.2 | • Develops clear and well-organised material for a specific audience, using precise language to convey explicit information requirements and recommendations |
| Oral Communication | 1.2, 1.3 | • Determines and confirms client requirements using collaborative and inclusive techniques, including active listening and questioning, and reading of verbal and non-verbal signals, to convey and clarify information and to confirm understanding |
| Interact with others | 1.2, 1.3 | • Selects and uses the appropriate conventions and protocols, when communicating with clients in a range of work contexts |
| Get the work done | 1.1, 1.4, 2.1-2.3, 3.1, 3.2 | • Takes responsibility for planning, sequencing and prioritising tasks, and own workload, for efficiency and effective outcomes<br>• Makes routine decisions, and implements standard procedures for routine tasks, using formal decision-making processes for more complex and non-routine |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |

# Assessment Requirements for ICTWEB417 Integrate social web technologies

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- analyse requirements for the integration of a social networking website into a pre-existing website
- determine the content management functionality, against current programming and security standards
- select an appropriate social networking platform
- develop and implement, social networking integration codes into an existing website
- validate frontend code markup, against the standards set by the World Wide Web Consortium (W3C).

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the markup language and its associated standards
- summarise server-side language
- describe the advantages and disadvantages, of integrating social networking into web sites.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the website technologies field of work, and include access to:

- client requirements

# ICTWEB418 Use development software and ICT tools to build a basic website

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to build a basic website, consistent with the design, technical requirements and expectations, of a client's business, using current industry software and tools.

It applies to individuals working as web developers who use a wide range of knowledge and skills across a range of general information and communications technology (ICT) environments, and support small to medium enterprises (SMEs) that require broader, rather than more specialised, ICT support.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Web

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Select and analyse the website structure and development tools | 1.1 Analyse the business specification, and select the appropriate software<br>1.2 Identify the website's technical needs, and select the appropriate software tools |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.3 Identify the site's structure and navigation flow, and demonstrate an understanding of functionality<br>1.4 Review the design documentation, and integrate the design work with the site's structure and navigation, according to web development standards |
| 2. Begin site construction | 2.1 Take action to ensure user input during website construction<br>2.2 Validate the existing information and basic content, when incorporating data on the website<br>2.3 Apply consistent design specifications to all aspects of the website<br>2.4 Gather feedback from the user on web design, content, accessibility and structure, using the appropriate feedback mechanism |
| 3. Complete and validate the website construction and content | 3.1 Undertake an evaluation of the website, against the technical requirements and the design specification<br>3.2 Test each function, and, process of the website<br>3.3 Conduct navigation tests and hypertext markup language (HTML) compliance with website standards<br>3.4 Stress test the website to meet the design criteria and user load<br>3.5 Record testing results to ensure that the website meets user requirements<br>3.6 Obtain the sign-off and approval of the user |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.2, 1.4, 3.1 | • Critically analyses complex documentation from a variety of sources, and consolidates information relating to specific criteria to determine requirements |
| Writing | 2.1, 2.4, 3.5, 3.6 | • Prepares and produces dynamic material for a specific audience, using clear and detailed language in order to convey explicit information, requirements and recommendations |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Oral Communication | 2.1, 2.4, 3.6 | • Uses collaborative and inclusive techniques, including active listening and questioning, and reading of verbal and non-verbal signals, to convey and clarify information, and to confirm understanding |
| Navigate the world of work | 1.4, 3.3 | • Accepts responsibility and ownership for the task, and makes decisions on completion parameters, and the need for coordination with others<br>• Takes personal responsibility for following explicit and implicit policies, procedures and standards |
| Interact with others | 2.1, 2.4, 3.5, 3.6 | • Selects and uses appropriate conventions and protocols, when communicating with clients in a range of work contexts<br>• Uses a range of strategies, to establish a sense of connection, and to build rapport with clients and co-workers<br>• Elicits and provides feedback to others |
| Get the work done | 1.1-1.4, 2.2, 2.3, 3.1-3.4 | • Takes responsibility for planning, sequencing, and prioritising tasks and own workload, for efficiency and effective outcomes<br>• Makes routine decisions and implements standard procedures for routine tasks, using formal decision-making processes for more complex and non-routine situations<br>• Addresses less predictable problems and initiates standard procedures in response to these problems, applying problem-solving processes in determining a solution<br>• Uses familiar digital technologies and systems, to access information, search and enter data, and code, present information and communicate with others, cognisant of data security and safety |

# Assessment Requirements for ICTWEB418 Use development software and ICT tools to build a basic website

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- conduct an assessment of, and document the specifications relating to, the client's website needs
- build a basic website according to client specifications
- validate the final web design against the client's requirements
- confirm and obtain client sign off.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline a basic knowledge of:
  - design principles
  - the issues around accessibility and equity principles, when building for diverse users
- identify and describe the software, and tools, that are used in website development
- outline the general principles of the standard generalised markup language (SGML), and associated documentation standards
- outline the principles of website design
- describe the technical attributes specific to the web
- describe and apply, the types of code used in the generation of web sites.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the website technologies field of work, and include access to:

- basic website specifications and guidelines
- the website development software and tools
- an internet server
- organisational and industry standards.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTWEB419 Develop guidelines for uploading information to a website

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to support the effective operation of a website, by establishing content upload guidelines and procedures, in the context of site policies.

It applies to individuals who work in website maintenance roles who are required to ensure that a website remains operational.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Web

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Develop site policies | 1.1 Develop and disseminate policies on acceptable usage, security, privacy and copyright issues, based on technical security and privacy requirements<br>1.2 Develop and disseminate, roles and responsibilities for updating and loading content, and removing redundant information<br>1.3 Document and disseminate information about the nature of |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | content able to be updated and loaded<br>1.4 Establish the upload documentation, and disseminate the processes and procedures for the updating, loading or removal of content on the site<br>1.5 Implement automatic and routine, updating and archiving procedures |
| 2. Establish the updating and loading procedures | 2.1 Allocate, and make available to contributors, directory space to update and load new site content<br>2.2 Identify and make available for use, authoring guides and resources, based on cascading style sheets (CSS) and business style guides<br>2.3 Develop and make available, new content templates to be applied by authors for use based on CSS parameters<br>2.4 Allocate and monitor server permissions<br>2.5 Identify preferred file transfer protocol (FTP) client based on best fit with the technical environment, and make available for use<br>2.6 Customise the FTP client to meet requirements<br>2.7 Identify and develop authoring support tools, such as help files and links<br>2.8 Disseminate authoring support tools, such as help files and links, as necessary |
| 3. Document the guidelines | 3.1 Develop documentation for loading information, taking into consideration security and privacy<br>3.2 Document and make available, links to recommended support tools<br>3.3 Automate the details of recent updates and loading of information, and document on the site |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1-1.3, 2.2, 2.5 | • Critically analyses complex documentation from a variety of sources, and consolidates information, relating |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| | | to specific criteria to determine requirements |
| Writing | 1.1-1.5, 2.3, 2.7, 3.1-3.3 | • Develops procedural material for a specific audience, using clear and detailed language, in order to convey explicit information, requirements and recommendations |
| Navigate the world of work | 1.1, 1.2, 1.5, 3.1 | • Modifies or develops organisational policies and procedures, to comply with legislative requirements and organisation goals<br>• Contributes to roles and responsibilities, of self and others |
| Interact with others | 1.1-1.4, 2.1, 2.4, 2.8, 3.2 | • Selects and uses, the appropriate conventions and protocols when communicating with clients and co-workers, in a range of work contexts<br>• Uses a range of strategies to establish a sense of connection, and to build rapport with clients and co-workers<br>• Cooperates with others, and contributes to work practices, where joint outcomes are expected, and deadlines are to be met<br>• Identifies and explores, differences in a diverse range of people in the work context, and makes adjustments to communication in recognition of these differences |
| Get the work done | 1.1-1.5, 2.1, 2.2, 2.4-2.7, 3.3 | • Takes responsibility for planning, sequencing and prioritising tasks and own workload, for efficiency and effective outcomes<br>• Contributes to the continuous improvement of current work practices, by applying basic principles of analytical and lateral thinking<br>• Uses familiar digital technologies and systems to access information, search and enter data, present information and communicate with others, cognisant of data security and safety |

# Assessment Requirements for ICTWEB419 Develop guidelines for uploading information to a website

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- develop a policy for uploading and removing website content that:
  - ensures that the policy reflects the strategic intent of the site, while maintaining site security and privacy standards
  - adheres to quality standards for the updating process and data
  - ensures that updates occur in a secure and convenient manner
  - develops updating and loading procedures for website content
  - reviews guidelines for uploading content to websites.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline copyright and intellectual property issues
- summarise the information architecture
- identify and describe, internet protocols
- outline the procedures for disseminating and documenting technical specifications
- clarify the website's architecture and business process design, and how e-business sites may fit into corporate strategy.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the website technologies field of work, and include access to:

© Commonwealth of Australia, 2025 Future Skills Organisation

- the servers
- an e-business website
- the file transfer protocol (FTP) software
- the organisational documentation, requirements and guidelines.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTWEB420 Write content for web pages

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to write concise, and clear, content for web pages on behalf of a client.

It applies to individuals who are proficient communicators in the web development field.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Web

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare to develop content for the site | 1.1 Identify customer information needs, with reference to the audience, site functionality and client requirements<br>1.2 Confirm site purpose and functionality, with reference to client specification<br>1.3 Select content channels and format as part of client requirements<br>1.4 Obtain the templates and style guides<br>1.5 Identify the content and analyse with reference to audience |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | needs, maintenance requirements, information architecture, and site design and functionality<br>1.6 Negotiate any alterations to site design, as required by the content and by client requirements |
| 2. Write the site content | 2.1 Create the content according to content and client requirements<br>2.2 Establish that the content is easily and conveniently, accessible and visible, and that information is clear, understandable, and logical<br>2.3 Edit the content with reference to audience needs, site functionality, content and client requirements |
| 3. Upload the content | 3.1 Log into the server site, using either the administrative or anonymous file transfer protocol in preparation for upload<br>3.2 Launch the transfer file transfer protocol (FTP) client, and navigate to the destination directory, either graphically or by using a command line interface<br>3.3 Store and order the files according to logical design and user needs, using an accepted file extension scheme<br>3.4 Demonstrate the operation in closed contention mode |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1-1.6, 2.1-2.3, 3.1-3.3 | • Reads and interprets specifications, computer program interface and other documentation, from a variety of sources, and consolidates information, to determine requirements |
| Writing | 1.2, 1.6, 2.1, 2.3, 3.1-3.3 | • Writes, edits and proofreads documents for internet use, to ensure clarity of meaning, and accuracy and consistency of information |
| Oral Communication | 1.1, 1.2, 1.6 | • Determines and confirms client requirements, using collaborative and inclusive techniques, including active listening and questioning, and reading of verbal and non-verbal signals, to convey and clarify information, and to confirm understanding |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Get the work done | 1.1, 1.3-1.5, 2.2, 2.3, 3.1-3.4 | • Takes responsibility for planning, sequencing, and prioritising tasks and own workload, for efficiency and effective outcomes<br>• Makes routine decisions, and implements standard procedures for routine tasks, using formal decision-making processes for more complex and non-routine situations<br>• Uses familiar digital technologies and systems to access information, search and enter, data and code, present information, and communicate with others, cognisant of data security and safety |

# Assessment Requirements for ICTWEB420 Write content for web pages

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- write content for web pages that recognises cultural differences and diversity, in developing website content
- upload content for a website
- remove content on a website.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline content features, including clarity, ease of viewing and readability
- explain copyright and intellectual property legislation, relating to web page content
- summarise the document design, web design and usability
- discuss the functions and features of:
  - micro-content elements, such as headings, highlighted words and link text
  - style guides, such as cascading style sheets (CSS)
- explain the information architecture
- summarise the instructional design principles
- outline the obligations of merchants and service providers
- outline the organisational requirements relating to web page content and user diversity
- explain privacy requirements relating to web page content.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the website technologies field of work, and include access to:

- copy edit resources
- culturally reviewed content
- style guides and templates
- the website specifications
- word-processing and web development software
- the organisational documentation, and industry requirements.
-

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTWEB421 Ensure website content meets technical protocols and standards

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to ensure content for a website is in accordance with customer specifications, and is compatible with the appropriate technical and infrastructure protocols.

It applies to individuals working in the web development area who are required to populate websites according to clear benchmarks.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Web

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Confirm that content meets the required standards | 1.1 Take action to ensure that text-based content meets client needs, and the required style standards<br>1.2 Confirm that the multimedia-based content meets the business design standards, or the overall look of the website<br>1.3 Check that the mix between multimedia and text-based content, provides the required level of interaction identified in the |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | project brief<br>1.4 Test that the content conforms to client expectations and the technology |
| 2. Confirm that the technology supports the content | 2.1 Take action to ensure that the protocols required for multimedia content are available<br>2.2 Check and confirm, that the bandwidth required to support the content is available<br>2.3 Check and confirm, that the servers support the content and levels of interaction<br>2.4 Check and confirm, that the plug-ins required to support content are made available<br>2.5 Test and confirm, that compression techniques support delivery of content |
| 3. Test the content | 3.1 Test and confirm that content displays as intended and according to business requirements in target browsers<br>3.2 Test with beta users that content encourages interaction and content interaction performs as intended and record results<br>3.3 Test and confirm that plug-ins download with a minimum of steps, complication and time<br>3.4 Test that interactive tools are available and provide the expected results |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.2, 1.3, 1.4, 2.2, 3.1 | • Identifies and analyses, online information and client specifications, to ensure that all business requirements are met |
| Writing | 3.2 | • Documents outcomes of tests using industry relevant terminology and recognised symbols |
| Oral Communication | 1.1 | • Clearly articulates requirements, using the language appropriate to the audience, and participates in a verbal exchange of ideas/solutions |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Numeracy | 3.3 | • Uses basic mathematical formula to time technological processes |
| Navigate the world of work | 1.1, 1.2, 3.1 | • Takes personal responsibility for following explicit and implicit policies, procedures and specifications |
| Interact with others | 1.1, 1.2, 3.2 | • Elicits feedback and provides feedback to others, in order to improve work practices and processes<br>• Selects and uses the appropriate conventions and protocols, when communicating with clients and co-workers in a range of work contexts |
| Get the work done | 1.1, 1.4, 2.1-2.5, 3.1-3.4 | • Takes responsibility for planning, sequencing and prioritising tasks and own workload, for efficiency and effective outcomes<br>• Makes routine decisions and implements standard procedures for routine tasks, using formal decision-making processes for more complex and non-routine situations<br>• Uses familiar digital technologies and systems to access information, search and enter, data and code, present information, and communicate with others, cognisant of data security and safety |

# Assessment Requirements for ICTWEB421 Ensure website content meets technical protocols and standards

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- carry out checks and tests, for a mix of content for a website, to ensure that it meets specifications and standards
- check and use, correct streaming and compression techniques
- manage the file transfer protocols (FTPs)
- test and confirm, content functionality and operability.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the applicability of copyright, privacy and intellectual property to website development
- explain common software compression algorithms, and associated technologies
- summarise the file transfer protocol (FTP) software protocols
- identify and summarise internet protocols
- explain the server access security principles and procedures
- outline the server operating systems
- summarise streaming technologies.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the website technologies field of work and, include access to:

© Commonwealth of Australia, 2025 Future Skills Organisation

- documents detailing organisational style guide or policies
- a personal computer, on which software installation may be performed
- compression and streaming software
- an internet connection
- a live network
- network components, hardware and software
- networked computers
- a server, and workstation hardware and software
- style guides, and the design brief
- technical documentation and installation manuals
- software currently used in industry
- vendor hardware and software components.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTWEB422 Ensure website access and useability

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to apply the principles of accessibility and equity in the context of website development.

It applies to individuals who are proficient communicators and who provide frontline technical support for ensuring that websites are accessible to end users.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Web

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Design a site user test | 1.1 Establish the usability test methods<br>1.2 Identify critical business functions<br>1.3 Identify the full range of users<br>1.4 Confirm user expectations through market analysis, business intelligence and customer feedback<br>1.5 Establish the performance potential of the business, from the business requirements or other approved sources |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.6 Establish the performance measurement and success criteria, to measure actual performance against user expectations<br>1.7 Test the site when ready and record the outcomes |
| 2. Conduct the user test | 2.1 Document the process performance indicators and benchmarks, and disseminate them to a sample group of users<br>2.2 Assemble a full representative range of users and preferred technologies, to test site features and functions, based on the business specification<br>2.3 Ensure maximum user satisfaction, through ease of navigation controls and design<br>2.4 Ensure that user and legal, accessibility, privacy and equity requirements and expectations are met |
| 3. Evaluate the user test | 3.1 Collate site performance results and measure them against performance indicators and benchmarks, based on user expectations<br>3.2 Identify performance shortfalls, and ensure that acceptable performance solutions are developed according to business requirements<br>3.3 Establish an evaluation feedback mechanism and provide to users |
| 4. Document the results | 4.1 Identify solutions to the problems encountered during the testing phase<br>4.2 Discuss problems with developers and ensure that the solutions are continuously refined<br>4.3 Ensure that the proposed solutions meet business requirements and user expectations<br>4.4 Document the final solutions in line with organisational guidelines, and distribute to the appropriate person |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Reading | 1.2, 1.3, 1.4, 1.5, 2.2, 3.1, 3.2, 4.3, 4.4 | • Analyses and consolidates information and data from a range of sources, against the defined criteria and requirements, and checks for accuracy and completeness |
| Writing | 1.5, 1.6, 1.7, 2.1, 3.1, 3.2, 3.3, 4.4 | • Accurately records information and prepares correspondence, and documentation, using clear language, and organisational formats and protocols |
| Oral Communication | 1.4, 1.5, 4.2, 4.3 | • Uses listening and questioning skills to confirm understanding for requirements, participates in a verbal exchange of ideas/solutions, and uses appropriate, detailed and clear language, to address key personnel and website users |
| Numeracy | 3.1, 3.2 | • Performs mathematical calculations to analyse test and performance data, and statistics |
| Navigate the world of work | 2.2, 2.4, 4.4 | • Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements |
| Interact with others | 2.1-2.3, 3.3, 4.4 | • Selects and uses appropriate conventions and protocols, when communicating with clients and co-workers in a range of work contexts<br>• Elicits feedback and provides feedback to others, while testing usability |
| Get the work done | 1.1-1.7, 2.1-2.3, 3.1, 3.2, 4.1-4.3 | • Takes responsibility for planning, sequencing and prioritising tasks and own workload, for efficiency and effective outcomes<br>• Addresses less predictable problems, and initiates standard procedures in response to these problems, applying problem-solving processes in determining solutions<br>• Uses familiar digital technologies and systems to access information, search and enter data, and code, present information and communicate with others, cognisant of data security and safety |

# Assessment Requirements for ICTWEB422 Ensure website access and useability

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- research user needs
- design a valid usability test, and set benchmark metrics
- facilitate the test process and document the results
- document and propose solutions, to meet user needs and the current, and future, needs of the business.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the principles of accessibility and equity, in the context of website development
- outline the technical performance measurement of a typical web site
- describe common user testing principles and techniques
- outline the following important considerations for a website:
  - architecture
  - privacy
  - security
- describe workload metrics, and explain the implications for website design
- describe the website design as it applies to:
  - business process
  - customer and business liaison
  - electronic commerce modelling language
- outline the organisational policies and procedures relating to website functionality.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the website technologies field of work, and include access to:

- analysis software
- the e-business website
- the organisational policy and procedures
- the requirements documentation
- a site server
- site server software
- web servers.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTWEB423 Ensure dynamic website security

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to ensure, and maintain, the security of a dynamic commercial website.

It applies to individuals working as website developers responsible for security of dynamic websites, who are proficient communicators and can analyse technical data capably and with efficiency.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Web

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Undertake the risk assessment | 1.1 Identify the functionality and features of the website, and confirm these with the client<br>1.2 Identify security threats, with reference to the functionality of the site and organisational security policy, legislation and standards<br>1.3 Complete a risk analysis to prioritise the security threats, and identify system vulnerabilities |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.4 Identify resource and budget constraints, and validate with the client as required<br>1.5 Source the appropriate products, security services and equipment, according to enterprise purchasing policies |
| 2. Secure the operating systems | 2.1 Identify operating system (OS) and cross-platform vulnerabilities<br>2.2 Make the appropriate scripting or configuration adjustments, with reference to the functionality of the site and the security policy<br>2.3 Identify and rectify weaknesses specific to the OS |
| 3. Secure the site server | 3.1 Configure the web server securely, with reference to the required functionality and the security policy<br>3.2 Review and analyse, server-side scripting with reference to the required functionality and the security policy<br>3.3 Install firewalls as required<br>3.4 Establish access control permissions to the server and database |
| 4. Secure data transactions | 4.1 Identify data transactions, with reference to the functionality and features of the website<br>4.2 Identify and apply, the channel protocols related to the requirements<br>4.3 Install and configure, the payment systems |
| 5. Monitor and document the security framework | 5.1 Develop a program of selective independent audits and penetration tests<br>5.2 Determine the performance benchmarks<br>5.3 Implement audit and test programs, and record, analyse and report the results<br>5.4 Make security framework changes based on the test results<br>5.5 Develop the site-security plan, with reference to the security policy and requirements<br>5.6 Develop and distribute, related policy and procedures to the client |

© Commonwealth of Australia, 2025 Future Skills Organisation

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.3-1.5, 2.1, 2.3, 3.2, 4.1, 4.2, 5.4 | • Reads and interprets plans, specifications, computer program interface, and other documentation from a variety of sources, and consolidates information to determine requirements |
| Writing | 1.1, 1.3, 1.4, 2.2, 3.3, 4.3, 5.1, 5.2, 5.3, 5.5, 5.6 | • Makes adjustments to software scripting, and creates procedural and related workplace documentation, for a specific audience, using clear and detailed language in order to convey explicit information |
| Oral Communication | 1.1, 1.3, 1.4, 5.3, 5.6 | • Uses listening and questioning skills to confirm understanding for technical, operational and business requirements, participates in a verbal exchange of ideas/solutions, and uses appropriate, detailed and clear language to address the client |
| Numeracy | 1.4, 1.5, 4.3 | • Undertakes numerical analyses during testing, and calculates, and evaluates system results and performance |
| Navigate the world of work | 1.2, 1.5, 3.1, 3.2, 5.5 | • Accepts responsibility and ownership of tasks, and makes decisions on completion parameters, and the need for coordination with others<br>• Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements |
| Interact with others | 1.1, 1.4, 5.6 | • Selects and uses, the appropriate conventions and protocols, when communicating with clients and co-workers in a range of work contexts |
| Get the work done | 1.1-1.5, 2.2, 2.3, 3.2-3.4, 4.3, 5.1-5.5 | • Takes responsibility for planning, sequencing and prioritising tasks and own workload, for efficiency and effective outcomes<br>• Makes routine decisions and implements standard procedures for routine tasks, using formal decision-making processes for more complex and non-routine situations<br>• Addresses less predictable problems and initiates standard procedures in response to these problems, applying problem-solving processes in determining a solution<br>• Uses familiar digital technologies and systems to access information, search and enter, data and code, |

# Assessment Requirements for ICTWEB423 Ensure dynamic website security

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- determine the client security framework, and its requirements
- identify any potential security threats to a website, and document the risk and performance benchmarks
- develop and implement, strategies to secure a dynamic website.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise the Australian Computer Society Code of Ethics
- explain a client business domain, its structure, function and organisation, including the organisational issues surrounding security
- identify and outline the legislation, regulations, and codes of practice pertinent to website information, including:
  - copyright
  - intellectual property
  - privacy
  - ethics
- outline current industry-accepted hardware and software products
- describe desktop applications and operating systems (OS), as they relate to website security
- explain the functions and features of:
  - automated intrusion detection software
  - authentication and access control

© Commonwealth of Australia, 2025 Future Skills Organisation

    - common stored account payment systems
    - cryptography
    - common gateway interface (CGI) scripts
    - generic secure protocols
    - stored-value payment systems
- explain the implications of network address translation (NAT), related to:
    - securing internal, internet protocol (IP) addresses
    - buffer overruns and stack smashing
    - operating system deficiencies
    - the protocol stack for internet communications
    - physical web server security, particularly remote
- describe the advantages, and disadvantages, of using a range of security features
- identify and describe, host security threats.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the website technologies field of work, and include access to:

- a dynamic website
- a security plan
- the user requirements
- all relevant legislation, standards and organisational requirements.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTWEB424 Evaluate and select a web hosting service

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to determine a client's current and future internet service providers (ISPs) needs.

It applies to individuals working in information and communications technology (ICT) who take responsibility for comparing and evaluating internet service provider (ISP) services, and are technically adept and proficient communicators, with a broad knowledge of internet technologies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Web

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Select the ISP | 1.1 Review comparable characteristics of a range of hosting services<br>1.2 Review the client usage, and ensure that email and mailing list services are flexible enough, to meet current and future business needs<br>1.3 Review the support service standards, to ensure that they meet |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | the business needs<br>1.4 Ensure that the ISP hosting service has sufficient data capacity to cover partial outages<br>1.5 Determine the availability of security technologies<br>1.6 Determine the availability of scripting languages<br>1.7 Evaluate optional server applications for advanced web business functions<br>1.8 Confirm the client selection criteria, and select the ISP hosting service that best matches the criteria |
| 2. Ensure guarantee of a permanent online presence | 2.1 Establish that the web-hosting service has systems in place to monitor server performance and availability<br>2.2 Negotiate the escalation procedures and performance standards with the ISP<br>2.3 Establish that the security and backup procedures are articulated, and that they meet business needs |
| 3. Ensure that the web host meets the technical requirements | 3.1 Take action to ensure that the operating system supports the preferred business development software, applications, extensions and databases<br>3.2 Establish that the web-host servers support dynamic websites, using the preferred business technologies<br>3.3 Establish that the web host provides current, and future, disk space requirements<br>3.4 Establish that site-analysis reports are available, and are flexible enough to meet business needs<br>3.5 Establish that security systems and payment technologies, meet business and customer expectations, and requirements |
| 4. Benchmark performance and test it against specified criteria | 4.1 Test the performance of the ISP during on and off peak times, and record the outcomes<br>4.2 Establish that email and mailing services have backup procedures in place, and are protected from damage, erasure or unwanted damage<br>4.3 Take action to ensure that the support services perform according to business needs |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1-1.8, 2.1, 3.1 | • Reads and interprets specifications, the computer program interface, and documentation from a variety of sources, and consolidates information to determine requirements |
| Writing | 2.1-2.3, 3.5, 4.1 | • Prepares documentation expressing ideas, explores complex issues, and is constructed logically, succinctly and accurately |
| Oral Communication | 2.2, 2.3 | • Uses listening and questioning skills to confirm understanding for all business requirements, participates in a verbal exchange of ideas/solutions, and uses appropriate, detailed and clear language to address client and ISP personnel |
| Numeracy | 1.4 | • Uses mathematical formulas to estimate data storage requirements |
| Interact with others | 2.2, 2.3 | • Selects and uses, the appropriate conventions and protocols, when communicating with clients and co-workers in a range of work contexts |
| Get the work done | 1.1, 1.2, 1.4, 1.8, 2.1-2.3, 3.1-3.5, 4.1-4.3 | • Takes responsibility for planning, sequencing and prioritising tasks and own workload, for efficiency and effective outcomes<br>• Makes routine decisions and implements standard procedures for routine tasks, using formal decision-making processes for more complex and non-routine situations<br>• Addresses less predictable problems and initiates standard procedures in response to these problems, applying problem-solving processes in determining a solution<br>• Uses familiar digital technologies and systems to access information, search and enter, data and code, present information, and communicate with others, cognisant of data security and safety |

# Assessment Requirements for ICTWEB424 Evaluate and select a web hosting service

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- assess client needs for the current and future needs of the business
- select an internet service provider (ISP)
- evaluate the web hosting service by ensuring that:
  - the price meets the client's budgetary requirements
  - the security and technical requirements of the business are met
- comply with the client benchmarks, and test
- monitor the performance of the ISP during on and off peak times.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline different web hosting service provision options, and their scalability
- discuss internet security issues
- explain the operating systems used by ISPs
- summarise performance expectations from customers and end users
- outline server technologies
- summarise web hosting services, and performance benchmarks.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the website technologies field of work, and include access to:

- hosting plans, prices and service agreements
- the current technology underpinning the ISP, and the services offered
- a business plan, outlining the future directions for the business.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTWEB425 Apply structured query language to extract and manipulate data

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to produce structured query language (SQL) statements to work with server-side scripts, enabling web designers to interact with web server databases.

It applies to individuals who are employed as web designers responsible for creating server-side interaction with dynamic web pages, using SQL as a means of communicating with the database.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Web

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Identify SQL requirements from the specification documentation | 1.1 Determine the information to be used from the database<br>1.2 Identify the tables that hold this information<br>1.3 Identify the primary keys in these tables<br>1.4 Identify the relationships between these tables, including |

# Assessment Requirements for ICTWEB425 Apply structured query language to extract and manipulate data

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- identify structured query language (SQL) requirements
- create the databases and tables
- generate queries for one or more tables, to provide the required data
- add, modify and delete records from the database tables
- test and verify SQL statements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the features and application of the following aggregate functions:
  - MIN
  - MAX
  - SUM
  - AVG
  - COUNT
  - COUNT(*)
- explain the features and application of the following clause functions:
  - GROUP BY
  - HAVING
  - ORDER BY
  - dates and times
  - SQL data types

© Commonwealth of Australia, 2025 Future Skills Organisation

- numbers
- text
- SQL syntax:
- SELECT
- FROM
- WHERE
- LIKE
- DISTINCT
- CREATE
- ALTER TABLE
- INSERT INTO
- UPDATE
- DELETE
- DROP

- describe the principles of "combining and/or condition" in SQL statements and Boolean operators:
  - IN and BETWEEN conditional operators
  - mathematical operators
  - table joins (relationships).

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the website technologies field of work, and include access to:

- a development environment
- a database server.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTWEB429 Create a markup language document to specification

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to use a text editor to design, create and save web pages to a given specification, rather than using an authoring tool.

It applies to individuals working as web designers and developers who interpret client briefs, generate a framework for internet information, and are resourceful in their application of technology in using a markup language.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Web

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Analyse the specifications and requirements | 1.1 Determine the uses and audience of the document<br>1.2 Determine the appropriate markup language, based on the document's uses and audience, and current industry best practice<br>1.3 Determine the document structure |
| 2. Create the document | 2.1 Create and assign the basic elements of the document, taking |

# Assessment Requirements for ICTWEB429 Create a markup language document to specification

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- design, create and save a document using a markup language, without using an automated code generation program
- use a text editor for generating the markup language code for use on common web browsers
- validate the markup document against the standards set by the World Wide Web Consortium (W3C).

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- recognise and outline the use of markup languages including:
  - dynamic hypertext markup language (DHTML)
  - hypertext markup language (HTML)
  - standard generalised markup language (SGML)
  - virtual reality modelling language (VRML)
  - extensible hypertext markup language (XHTML)
  - extensible markup language (XML)
- identify and describe, standards applicable to a markup language
- summarise the range of available web browsers and their accessibility
- identify and describe, the issues of accessibility.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the website technologies field of work, and include access to:

- an organisational style guide or policy
- all user requirements
- a text editor
- a range of browsers
- the internet, to validate the markup.

Assessors must satisfy NVR/AQTF assessor requirements.

# Assessment Requirements for ICTWEB501 Build a dynamic website

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- analyse the technical requirements for a dynamic web site
- produce software design specifications
- create a website, using efficient and effective code to meet the technical requirements, and test and document a website against the requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise the principles of analysis and design
- outline programming control and design structures, and object-oriented programming
- explain web programming concepts, including:
  - authentication and web security
  - hypertext transfer protocol (HTTP)
  - session management
  - stateless programming.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the website technologies field of work, and include access to:

- a development environment

# Assessment Requirements for ICTWEB502 Create dynamic web pages

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- produce dynamic web pages that include both client and server-side dynamic content
- create efficient and effective code to meet technical requirements
- test the website and code in a variety of web browsers.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain web-programming concepts, including:
  - authentication and web security
  - hypertext transfer protocol (HTTP)
  - session management
  - stateless programming
- identify and describe internet technologies including:
  - programming control structures
  - object-oriented programming
- recognise and outline various web browsers.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the website technologies field of work, and include access to:

© Commonwealth of Australia, 2025 Future Skills Organisation

- a development environment
- a server
- a database server
- browsers.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTWEB503 Create web-based programs

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to develop web applications.

It applies to individuals who work as web developers and have well-honed technical skills to take responsibility for implementing code required to create web applications.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Web

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Determine the hypertext transfer protocol (HTTP) and its implications when developing web applications | 1.1 Identify the hypertext transfer protocol (HTTP) required<br>1.2 Recognise the limitations HTTP has when developing web applications<br>1.3 Identify the advantages of HTTP in developing web applications |
| 2. Implement session management | 2.1 Create the code to handle session management<br>2.2 Create the code that retains the user’s interaction with the |

# Assessment Requirements for ICTWEB503 Create web-based programs

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- recognise the hypertext transfer protocol (HTTP), and its limitations
- implement session management
- develop web applications that track user data
- document web applications.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the principles of web analysis and design
- explain programming control structures and object-oriented programming
- summarise web programming concepts including:
  - authentication and web security
  - hypertext transfer protocol (HTTP)
  - session management
  - stateless programming.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the website technologies field of work, and include access to:

- a website development environment

# ICTWEB504 Build a document using eXtensible markup language

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to design, and build, a valid extensible markup language (XML) document to suit a specified requirement.

It applies to individuals working in development roles in a variety of information technology areas who are technically proficient in the use of XML documents.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Web

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Plan the process | 1.1 Review the specified requirements<br>1.2 Produce a plan to analyse the specified requirements<br>1.3 Plan the design, and build, of valid XML documentation, allowing for iterative development |
| 2. Analyse the specified requirements | 2.1 Determine and document the purpose, expectations and functionality of the XML document |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 2.2 Determine the hardware, software and tools needed to design the document<br>2.3 Determine the requirements for the document<br>2.4 Determine the appropriate design methodologies, including using the software engineering life cycle |
| 3. Design and develop the document | 3.1 Decide on document type definition (DTD), if required<br>3.2 Define the required entities, elements and their attributes<br>3.3 Produce the document, following the appropriate standards and declaring DTD, required entities, elements and their attributes, including associated graphics or sounds |
| 4. Test the document | 4.1 Test the document off-line against the specifications, and confirm the document's validity<br>4.2 Test, where appropriate, the document online against the specifications, and with a representative audience<br>4.3 Analyse the test results and confirm the document’s validity |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 3.3, 4.1, 4.2, 4.3 | • Critically analyses specifications and other documentation from a variety of sources, and consolidates information, to determine requirements |
| Writing | 1.2, 1.3, 2.1, 2.2, 3.3 | • Prepares documentation expressing ideas, explores complex issues, and is constructed logically, succinctly and accurately<br>• Writes and edits computer code and technical data, to ensure syntax and accuracy |
| Navigate the world of work | 3.3 | • Takes full responsibility for following policies, procedures and industry standards |
| Interact with others | 4.2 | • Selects, implements, and seeks to improve protocols governing communications to clients and co-workers, in a range of work contexts |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Get the work done | 1.1, 1.2, 2.1-2.4, 3.1-3.3, 4.1-4.3 | • Accepts responsibility for planning and sequencing complex tasks and workload, negotiating key aspects with others and taking into account capabilities, efficiencies and effectiveness<br>• Applies systematic and analytical decision-making processes for complex and non-routine situations<br>• Uses and investigates new digital technologies and applications, to manage and manipulate data, and communicate effectively with others, in a secure and stable digital environment |

# Assessment Requirements for ICTWEB504 Build a document using eXtensible markup language

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- review the specifications, and plan the design of an extensible markup language (XML) document
- determine specific requirements
- produce a valid XML document, following the appropriate standards
- test an XML document
- evaluate the test results.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain business process and information modelling
- describe markup language
- explain unified-modelling language
- describe the hardware and software implications for XML programming
- identify and summarise, the various standards that will impact on XML programming.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the website technologies field of work, and include access to:

- the client or business requirements
- an XML parser or suitable web browser

© Commonwealth of Australia, 2025 Future Skills Organisation

- a XML authoring tool.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTWEB505 Develop complex web page layouts

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to design and create a web page layout, to suit a range of devices and a variety of browsers, to industry standards.

It applies to individuals who work as web designers and web developers, have a highly developed understanding of design principles and apply technical skills proficiently, according to unique specifications.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Web

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Build a web page according to the design prototype | 1.1 Identify the main sections of the web page layout<br>1.2 Create the web page structure<br>1.3 Position web page elements to achieve the design specification |
| 2. Ensure web page is validated and tested in major browsers | 2.1 Validate the cascading style sheet (CSS) against industry standards<br>2.2 Correct browser incompatibilities, using the most robust |

# Assessment Requirements for ICTWEB505 Develop complex web page layouts

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- develop a complex website layout
- layout page elements to suit a variety of devices
- test web pages in a variety of browsers
- validate the pages against industry standards.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the principles of web site design
- describe and apply the following in web site design:
  - hypertext markup language (HTML) and extensible hypertext markup language (XHTML)
  - cascading style sheet (CSS)
  - hypertext transfer protocol (HTTP)
  - techniques to correct browser incompatibilities
- outline World Wide Web Consortium (W3C) standards, and explain their application to web design.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the website technologies field of work, and include access to:

© Commonwealth of Australia, 2025 Future Skills Organisation

- a computer
- an aesthetic presentation brief
- a variety of browsers
- the internet, to validate web pages against the W3C.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTWEB506 Develop complex cascading style sheets

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to develop complex cascading style sheets (CSS) that are attached to a markup language document.

It applies to individuals working as web designers and developers who are involved in the layout and appearance of web pages, and have a highly developed understanding of design principles, and software languages, and can apply protocols and standards proficiently.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Web

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Determine the requirements and develop CSS | 1.1 Obtain user requirements for style<br>1.2 Develop CSS to match user requirements |
| 2. Use advanced CSS techniques to create web pages | 2.1 Style the elements of a web page, using advanced CSS techniques<br>2.2 Position the document elements, using advanced CSS |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 2.3 Apply the style sheets to multiple pages in a website |
| 3. Ensure web page and CSS are validated and tested in all major browsers | 3.1 Validate CSS against industry standards<br>3.2 Test the website in various browsers<br>3.3 Rectify browser differences to ensure that the website is accessible |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.2, 2.3, 3.1 | • Identifies and analyses technical, workplace, and industry information, to ensure that all the job requirements are met |
| Writing | 1.1, 1.2, 2.1-2.3 | • Develops clear and well-organised technical material for specific audiences, using technical language to convey explicit information |
| Oral Communication | 1.1 | • Uses listening and questioning techniques to clarify job specifications with the client |
| Numeracy | 2.2 | • Takes measurements and performs calculations for the web page layout |
| Navigate the world of work | 3.1 | • Takes full responsibility for following policies, procedures and industry standards |
| Get the work done | 1.2, 2.1, 2.3, 3.2, 3.3 | • Accepts responsibility for planning and sequencing complex tasks and workload, negotiating key aspects with others, and taking into account capabilities, efficiencies and effectiveness<br>• Applies systematic and analytical decision-making processes for complex and non-routine situations<br>• Uses and investigates new digital technologies, and applications, to manage and manipulate data, and communicate effectively with others, in a secure and stable digital environment |

# Assessment Requirements for ICTWEB506 Develop complex cascading style sheets

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- develop a complex website, styled and formatted, using cascading style sheets (CSS), according to user requirements
- create a complex page layout using CSS
- test the web pages in a variety of browsers
- validate CSS against industry standards.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the principles of website design
- describe hypertext transfer protocol (HTTP) protocol and its application to CSS
- outline and apply, hypertext markup language (HTML) and extensible hypertext markup language (XHTML)
- outline CSS rules and how they affect document styling, and layout
- explain World Wide Web Consortium (W3C) standards, as they apply to website design
- identify and apply, techniques to correct browser incompatibilities.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the website technologies field of work, and include access to:

- a computer

© Commonwealth of Australia, 2025 Future Skills Organisation

- an aesthetic presentation brief
- HTML documents to have CSS applied to them
- the internet to validate the CSS against the W3C
- a variety of browsers.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTWEB507 Customise a complex ICT content management system

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to create, and customise, an information and communications technology (ICT) content management system (CMS) powered website using an open source, to meet client requirements.

It applies to individuals working as web developers who have a detailed knowledge of markup languages and their associated standards, and are proficient in server-side language and security techniques. Individuals in this role also have high-level understanding of server functionality.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Web

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Analyse the specifications and requirements | 1.1 Determine the required functionality of the website, as per the client requirements<br>1.2 Determine the appropriate server-side language and hosting environment |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.3 Determine additional functionality that the CMS will not be able to handle 'out of the box'<br>1.4 Determine the functional requirements of the client's additional functionality<br>1.5 Determine any pre-existing restraints that need to be considered when developing the website solution |
| 2. Develop customisation | 2.1 Plan and outline, the requirements of the additional functionality<br>2.2 Create and develop plug-in, extension or new functionality to the CMS to meet client requirements |
| 3. Create a CMS powered website | 3.1 Install and configure, the chosen content management system<br>3.2 Install and integrate, the new CMS functionality |
| 4. Validate and evaluate | 4.1 Validate the final website markup against the current website standards<br>4.2 Validate CMS performance in different browsers, checking compatibility and core CMS functionality<br>4.3 Validate the developed additional functionality against the client requirements |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.2, 1.3, 3.1, 3.2, 4.3 | • Critically analyses complex specifications, computer program manuals, and other documentation from a variety of sources and, consolidates information, to determine requirements |
| Writing | 2.1, 2.2, 3.1, 3.2 | • Prepares documentation expressing ideas, explores complex issues and is constructed logically, succinctly and accurately<br>• Writes and edits computer code, and technical data, to ensure syntax and accuracy |
| Oral | 1.1, 4.3 | • Uses listening and questioning techniques to determine client requirements, and clearly articulates ideas and |

# Assessment Requirements for ICTWEB507 Customise a complex ICT content management system

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- create a content management system (CMS) powered website, using an open source with additional custom functionality that is not available ‘out of the box’, that meets client requirements
- perform basic content manipulation tasks in commonly used browsers
- evaluate content management additional functionality against current programming and security standards
- customise functionality into a pre-existing core CMS, to fulfil client requirements by programming
- validate the front-end code markup against standards set by the World Wide Web Consortium (W3C).

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- analyse and describe, a range of content management systems and their respective functionality
- explain markup language and their associated standards
- outline server functionality in relation to the client and business requirements
- describe and apply, server-side language and security techniques
- explain the importance of web accessibility.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the website technologies field of work, and include access to:

- the client requirements, and content
- a text editor
- a range of browsers
- the internet for research, validation of code and programming documentation.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTWEB508 Develop website information architecture

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to develop information architecture for a complex website that meets current, and future, business requirements.

It applies to individuals working as highly skilled web developers and designers who are responsible for the navigation and hierarchy of a websites. They liaise with clients to adapt e-business into their corporate strategy, have high-level knowledge of technical languages and design principles.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Web

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Identify content needs | 1.1 Identify the strategic intent of the website from the business requirements and client expectations<br>1.2 Develop information requirements based on the website's intent, intended audiences, types of client interactions, and the long and short-term goals for the site<br>1.3 Identify the required information, and group into business |

# Assessment Requirements for ICTWEB508 Develop website information architecture

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- identify the strategic business requirements for the website
- develop and design, the information architecture for a complex website
- develop a site map, outlining the navigation hierarchy of a complex website
- test the access path to all sections of the website, and obtain client approval.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe how e-business sites fit into a corporate strategy
- outline the importance of client and business liaison
- summarise the purpose and function of cascading style sheets (CSS)
- describe the use of hypertext markup language (HTML), extensible hypertext markup language (XHTML) and hypertext transfer protocol (HTTP), in web design
- outline the implications of technology connectivity and documentation of technical specifications
- summarise World Wide Web Consortium (W3C) standards
- explain the website architecture and business process design, and the linkages between processes
- outline the importance of website accessibility.

© Commonwealth of Australia, 2025 Future Skills Organisation

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the website technologies field of work, and include access to:

- a web server
- the requirement specifications
- an integrated development environment (IDE), capable of creating web pages and server-side code
- current web development technology.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTWEB509 Use site server tools for transaction management

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to use site server tools to build, host, track, and monitor transactions on an e-business site.

It applies to individuals who work in a web environment and who are responsible for using site server tools to maintain the integrity of an e-business site, and have a detailed technical knowledge, and highly-developed analysis and interpretation skills.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Web

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Confirm and document the task requirements | 1.1 Confirm task requirements, features and functionality of the site with the client, as required<br>1.2 Confirm the platform or software related to the business systems<br>1.3 Confirm the integration requirements of site with client<br>1.4 Confirm standards relevant to the task and the site functionality |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.5 Document the current and proposed configuration<br>1.6 Document and validate client task requirements, performance criteria and scope of work with the client<br>1.7 Confirm the available resources and budget with the client |
| 2. Select the tools | 2.1 Identify relevant site server tools with reference to requirements<br>2.2 Review and evaluate the tools with reference to the task requirements and the required site functionality<br>2.3 Load and configure the server tools according to the vendor guidelines and client requirements<br>2.4 Use server tools to test the equipment |
| 3. Use the tools | 3.1 Use server tools to maintain or update relevant functionality<br>3.2 Coordinate and implement the procedures<br>3.3 Use server tools, according to the vendor guidelines to achieve the relevant task requirements |
| 4. Review the server tools and task requirements | 4.1 Monitor, analyse and evaluate the organisational procedures<br>4.2 Review the site server configuration related to client task requirements and make adjustments to the configuration<br>4.3 Review the server tools, according to the client task requirements<br>4.4 Use site-analysis software to validate server outcomes<br>4.5 Create and use reports, and other documentation, for the purposes of record keeping and auditing |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.3, 1.4, 2.1, 2.2, 2.3, 3.2, 3.3, 4.1, 4.2, 4.3 | • Critically analyses complex documentation from a variety of sources, and consolidates information, relating to specific criteria to determine the requirements |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Writing | 1.1, 1.3, 1.5, 1.6, 1.7, 3.1, 4.2, 4.5 | • Develops clear and well-organised reports and related workplace documentation, and correspondence, for specific audiences, using the appropriate language to convey explicit information |
| Oral Communication | 1.1, 1.3, 1.6, 1.7 | • Articulates complex information clearly, using specific and relevant language suitable to the audience, to convey requirements, and uses listening and questioning techniques to confirm understanding |
| Numeracy | 1.7 | • Accommodates business requirements by interpreting budgetary constraints, and undertakes mathematical calculations with reference to the available resources |
| Navigate the world of work | 1.4, 3.2, 4.1 | • Takes full responsibility for following policies, procedures, legislative requirements and industry standards<br>• Modifies or develops organisational policies and procedures, to comply with industry standards and organisation goals |
| Interact with others | 1.1, 1.3, 1.6, 1.7, 3.2, 4.3 | • Selects, implements and seeks to improve protocols governing communications, to clients and co-workers, in a range of work contexts<br>• Collaborates with others, sharing information in order to build strong relationships |
| Get the work done | 1.1-1.4, 1.6, 2.1-2.4, 3.1-3.3, 4.1, 4.2, 4.4 | • Accepts responsibility for planning and sequencing complex tasks and workload, negotiating key aspects with others, taking into account capabilities, efficiencies and effectiveness<br>• Monitors progress of plans and schedules, and reviews, and changes them, to meet new demands and priorities<br>• Applies systematic and analytical decision-making processes, for complex and non-routine situations<br>• Uses and investigates new digital technologies and applications, to manage and manipulate data, and to communicate effectively with others, in a secure and stable digital environment |

# Assessment Requirements for ICTWEB509 Use site server tools for transaction management

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- confirm and document the clients requirements
- select and use the appropriate website server tools, to maintain the expected business performance and technical standards, in an e-business environment
- build, maintain and monitor the transactions on an e-business site
- review the procedures and task requirements, for an e-business site.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- select and describe, the devices required for a business site
- summarise functions and features of tools relevant to:
- firewalls and proxy servers as required
- hypertext transfer protocol (HTTP) servers
- search engines
- outline the security measures required for the site
- explain the tools and products required for site construction
- summarise the role of protocols related to the features and to functionality
- explain the site-building considerations, in relation to a new versus an established business.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the website technologies field of work, and include access to:

- the server hardware
- site server tools currently used in industry
- an existing e-business website
- the business expectations brief
- the appropriate standards and current legislation.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTWEB510 Analyse information and assign meta tags

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to analyse material and assign meta tags to ensure the accurate and consistent retrieval of information by users.

It applies to individuals in a range of information and communications technology (ICT) areas that use various techniques and software to create, update and enhance meta tags according to industry guidelines and client specifications.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Web

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Identify the requirements for meta tags | 1.1 Identify the scope and uses of material from the previous and current business, and the stakeholder requirements process<br>1.2 Determine the appropriate type and structure of meta tags, taking into account identified client needs, requirements and expectations<br>1.3 Identify and incorporate, new or contemporary client requirements, and expectations |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| 2. Analyse the material | 2.1 Use the analysis and the description tools, standards, precedents and techniques that are appropriate, given the nature of the material<br>2.2 Ensure that the analysis of the subject content of the material reflects expected client usage requirements<br>2.3 Clearly distinguish significant information from minor information<br>2.4 Ensure that the concepts derived from the analysis of the material are appropriate to the business requirements, and the intended use |
| 3. Create meta tags | 3.1 Develop meta tags using appropriate software<br>3.2 Ensure that meta tags represent the concepts appropriately, depending on the overall purpose, and intended use, of the material<br>3.3 Ensure that the meta tags conform to general conventions and to the business rules<br>3.4 Develop the reference structure of descriptors, where required, to display relationships to assist clients<br>3.5 Enhance the meta tags to meet identified client needs |
| 4. Test and monitor meta tagging practices and procedures | 4.1 Test meta tagging of material and make changes, if necessary<br>4.2 Regularly review meta tagging practices and procedures, to ensure that client needs are being met<br>4.3 Regularly review industry developments in meta tagging and take the appropriate action to improve practices<br>4.4 Check meta tags regularly for internal consistency and compliance with the established structure, rules and authorities |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1-1.3, 2.1-2.4, 3.2, 3.5, 4.2-4.4 | • Reads and interprets plans, specifications, computer program data, and other documentation from a variety of sources, and consolidates information to determine |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| | | requirements |
| Writing | 3.1, 3.4, 3.5, 4.1, 4.3 | • Prepares documentation expressing ideas, explores complex issues, and is constructed logically, succinctly and accurately<br>• Writes and edits, computer code and technical data, ensuring the correct syntax and accuracy |
| Navigate the world of work | 3.3, 4.2, 4.3, 4.4 | • Takes full responsibility for following policies, procedures, industry standards and legislative requirements, and identifies the organisational implications of new regulations |
| Get the work done | 1.1-1.3, 2.1-2.4, 3.2-3.4, 4.1, 4.2 | • Accepts responsibility for planning and sequencing complex tasks and workload, negotiating key aspects with others and taking into account capabilities, efficiencies and effectiveness<br>• Monitors progress of plans and schedules, and reviews, and changes them to meet new demands and priorities<br>• Applies systematic and analytical decision-making processes for complex and non-routine situations<br>• Uses and investigates new digital technologies and applications, to manage and manipulate data, and to communicate effectively with others, in a secure and stable digital environment |

# Assessment Requirements for ICTWEB510 Analyse information and assign meta tags

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- analyse and identify the meta tag requirements
- use software to create and test meta tags
- update meta tags in line with the client needs and/or industry developments.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the business conventions and rules for applying meta tags
- summarise the client business domain
- outline data modelling
- explain database management system (DBMS) fundamentals
- summarise the decision support systems
- summarise document indexing and search engines
- outline the functions and features of databases
- summarise metadata standards, including Dublin Core and simple hypertext markup language (HTML) ontology extensions
- describe how reference structure of descriptors can assist clients.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the website technologies field of work, and include access to:

# ICTWEB511 Implement quality assurance process for websites

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to develop and conduct planned and systematic actions required to provide confidence that websites conform to relevant standards and fulfil client expectations.

It applies to individuals in the web field of work that use highly-developed communication, analysis and technical skills to determine intelligent strategies for ongoing website improvement.

Check the Implementation Guide Companion Volume for details about licensing, legislative or certification requirements.

## Unit Sector

Web

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Establish standards | 1.1 Identify appropriate regulatory, accessibility, industry and organisational compliance standards<br>1.2 Develop, quantify, document and disseminate measurable performance standards, from those standards, for all documents<br>1.3 Establish centralised, distributed or combined quality assurance methodology |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.4 Determine specification from which website was developed<br>1.5 Establish guidelines for controlling, updating and loading new content on to website |
| 2. Apply standards and track performance | 2.1 Apply all processes as integral part of website development process<br>2.2 Validate site, updates and new content against performance standards, using wide variety of browsers and tools<br>2.3 Document and disseminate results<br>2.4 Provide feedback to web authors, users and administrators on routine and regular basis |
| 3. Develop and apply continuous improvement process | 3.1 Provide performance standards feedback to developers, maintainers and administrators<br>3.2 Identify below-average or unacceptable performance standards and apply appropriate measures to improve performance<br>3.3 Provide channels for interaction, feedback and suggestions from site users, administrators, developers and maintainers<br>3.4 Respond appropriately to interaction, feedback and suggestions<br>3.5 Develop procedures to identify whether feedback and suggestions are applied and acted on<br>3.6 Conduct regular benchmark reviews based on improved performance and disseminate revised benchmarks |
| 4. Document quality assurance practices | 4.1 Document quality assurance procedures and processes<br>4.2 Document quality assurance results<br>4.3 Document and control changes to procedures, processes and results |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.4, 2.1, 2.2, 3.2, 3.6 | • Critically analyses complex documentation from a variety of sources and consolidates information relating to specific criteria to determine requirements |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Writing | 1.2, 1.3, 1.5, 2.3, 2.4, 3.1, 3.3-3.6, 4.1, 4.2, 4.3 | • Develops procedural material for a specific audience using clear and detailed language to convey explicit information, requirements and recommendations<br>• Accurately records information and prepares correspondence and documentation using clear language and organisational formats and protocols |
| Oral Communication | 2.3, 2.4, 3.1, 3.2, 3.3, 3.6 | • Articulates requirements and strategies via an open line of communication using language appropriate to audience and environment |
| Numeracy | 1.2 | • Analyses data to quantify response times and time lines when determining performance standards |
| Navigate the world of work | 1.1, 1.2, 1.5, 2.1, 3.2, 4.1, 4.3 | • Takes full responsibility for following policies, procedures and legislative requirements, and identifies the organisational implications of new legislation or regulation<br>• Modifies or develops organisational policies and procedures to comply with legislative requirements and organisational goals<br>• Seeks to improve policies and procedures to better meet organisational goals |
| Interact with others | 1.2, 2.3, 2.4, 3.1, 3.3, 3.4, 3.6 | • Selects, implements and seeks to improve protocols governing communications to clients and co-workers in a range of work contexts<br>• Implements strategies for a diverse range of colleagues and clients to build rapport and foster strong relationships<br>• Elicits feedback and provides feedback to others |
| Get the work done | 1.3-1.5, 2.2, 2.3, 3.4-3.6 | • Accepts responsibility for planning and sequencing complex tasks and workload, negotiating key aspects with others and taking into account capabilities, efficiencies and effectiveness<br>• Monitors progress of plans and schedules, and reviews and changes them to meet new demands and priorities<br>• Applies systematic and analytical decision-making processes for complex and non-routine situations<br>• Investigates new and innovative ideas as a means to continuously improve work practices and processes through consultation and formal analytical thinking |

# Assessment Requirements for ICTWEB511 Implement quality assurance process for websites

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- identify, establish and implement appropriate quality assurance standards for the website
- evaluate existing processes and procedures
- develop and implement a continuous improvement process
- develop quantitative standards and performance benchmarks
- document quality assurance standards.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise business process design, and customer and business liaison
- outline copyright and intellectual property relating to websites
- explain provisions of privacy legislation relating to websites
- clarify website accessibility and equity legislation
- outline website architecture and website security
- explain workload metrics and technical performance measurement.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the website technologies field of work, and include access to:

- web servers

© Commonwealth of Australia, 2025 Future Skills Organisation

- an e-business website
- analysis software
- automatic testing software
- documentation for appropriate regulatory, industry compliance and accessibility standards.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTWEB512 Administer business websites and servers

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to lead a strategic review, prepare a security plan and prepare for future growth of business websites and servers.

It applies to individuals working as multimedia developers, web strategists or project managers who provide technical advice, guidance and leadership when resolving specified problems. In some cases, they may have responsibility for the work output of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Web

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Maintain business website and contents | 1.1 Establish personnel policy and procedures for managing access and changes to aspects of business website<br>1.2 Design and start training program for teaching staff how to use procedures and policies as well as making changes to business website<br>1.3 Evaluate and test site-analysis software on non-live server to verify features and functions are safe for use on live server |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.4 Generate site summary reports in line with organisational quality management program or guidelines<br>1.5 Review reports found to have generated security flaws<br>1.6 Check links for functionality and ongoing relevance<br>1.7 Modify web pages according to changing business requirements and analysis of site summary report<br>1.8 Maintain and debug database information according to site and information requirements |
| 2. Maintain business security of website | 2.1 Establish security response procedure to control information placed on business website by developers, designers and end users<br>2.2 Develop security plan<br>2.3 Test site security according to organisational requirements of security plan<br>2.4 Maintain site security using information from security vendors and technical media outlets |
| 3. Monitor business website performance | 3.1 Select server analysis tools with reference to organisational requirements and range of functionalities requiring monitoring<br>3.2 Determine business website load metrics and performance indicators in line with organisational requirements<br>3.3 Measure business website server performance with server analysis tools<br>3.4 Identify and document business options for performance improvement<br>3.5 Submit website server performance reports to client |
| 4. Undertake capacity planning | 4.1 Determine future peak volumes by measuring page usage and volume access<br>4.2 Develop upgrade program to deal with increasing load and performance issues<br>4.3 Set performance benchmarks to take into consideration possible future scenarios for each load metric<br>4.4 Determine options for upgrade path for equipment needs based on research and business website performance growth forecasting |

© Commonwealth of Australia, 2025 Future Skills Organisation

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.2-1.8, 2.3, 2.4, 3.1, 3.2, 3.4, 4.4 | • Critically analyses complex documentation from a variety of sources and consolidates information relating to specific criteria to determine requirements |
| Writing | 1.1, 1.2, 1.4, 1.7, 1.8, 2.1, 2.2, 3.4, 3.5, 4.2, 4.3 | • Accurately records and completes organisational documents and correspondence using clear language and correct spelling, grammar and terminology<br>• Writes, edits and proofreads documents to ensure clarity of meaning, and accuracy and consistency of information |
| Oral Communication | 1.2, 3.5 | • Facilitates training programs for staff by conveying requirements using clear and specific language<br>• Uses collaborative and inclusive techniques including active listening and questioning and reading of verbal and non-verbal signals to convey and clarify information and to confirm understanding |
| Numeracy | 3.2, 3.3, 4.1, 4.3 | • Performs mathematical calculations to check, analyse and confirm results of system tests |
| Navigate the world of work | 1.1, 1.4, 2.1, 3.1 | • Takes full responsibility for following policies, procedures and legislative requirements, and identifies organisational implications of new legislation or regulation<br>• Contributes to roles and responsibilities of self and others<br>• Modifies or develops organisational policies and procedures to comply with legislative requirements and organisational goals<br>• Seeks to improve policies and procedures to better meet organisational goals |
| Interact with others | 3.5 | • Implements strategies for a diverse range of colleagues and clients to build rapport and foster strong relationships |
| Get the work done | 1.1-1.3, 1.6-1.8, 2.1-2.4, 3.1-3.3, 4.2-4.4 | • Accepts responsibility for planning and sequencing complex tasks and workload, negotiating key aspects with others and taking into account capabilities, efficiencies and effectiveness<br>• Monitors progress of plans and schedules and reviews and changes them to meet new demands and priorities<br>• Applies systematic and analytical decision-making |

# Assessment Requirements for ICTWEB512 Administer business websites and servers

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- evaluate and test site-analysis software
- test and maintain website security
- design and implement a staff website maintenance training program
- monitor website performance
- develop an upgrade program to cater for business website performance growth
- prepare documentation for:
  - security plan
  - training program
  - website server performance reports
- upgrade program.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the notion of bottlenecks in data flow and methods for correction
- outline electronic commerce modelling language (ECML)
- summarise queuing systems
- explain standard generalised markup language (SGML) and associated standards
- summarise user request classes
- outline the principles of website architecture
- summarise website security issues
- explain workload metrics.

© Commonwealth of Australia, 2025 Future Skills Organisation

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the website technologies field of work, and include access to:

- site servers and web servers where tasks may be performed
- a business website
- site server and analysis software currently used in industry
- requirements and business planning documentation.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTWEB515 Implement and use web services

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to support web services for building distributed applications.

It applies to individuals working as software developers who have specialised skills in the consumption of web services, related communications protocols and the associated extensible markup language (XML) technologies, used in web services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Web

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Use XML to provide information | 1.1 Create XML data structures from various data sources<br>1.2 Manipulate XML data structures, using a common application programming interface (API)<br>1.3 Use namespaces to scope elements from multiple XML documents<br>1.4 Validate XML data structures, using a schema |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.5 Map, and transform, an XML document from one schema to another |
| 2. Use WSDL to promote a web service | 2.1 Understand the purpose of the web service description language (WSDL)<br>2.2 Identify the three main elements that comprise WSDL<br>2.3 Build a WSDL file<br>2.4 Provide web access to a WSDL file, via a uniform resource locator (URL) |
| 3. Use UDDI to locate and retrieve information about a public web service | 3.1 Identify the purpose of universal description, discovery and integration (UDDI)<br>3.2 Understand the differences between public, extra-enterprise and intra-enterprise, UDDI registry deployments<br>3.3 Locate, and retrieve information, about a public web service using UDDI<br>3.4 Identify the relationship between WSDL and UDDI |
| 4. Access the web services using SOAP | 4.1 Identify the purpose of simple object access protocol (SOAP)<br>4.2 Determine the relationship between UDDI and SOAP<br>4.3 Identify the basic structure and processing of a SOAP message<br>4.4 Retrieve an XML document from a public web service, using SOAP |
| 5. Implement a web service | 5.1 Outline a basic web service architecture<br>5.2 Implement, test and publish a web service<br>5.3 Incorporate and test a web service into an application |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.3-1.5, 2.2, 3.1, 3.3, 3.4, 4.1-4.3 | • Reads and interprets specifications, computer program data, and other documentation, from a variety of sources, and consolidates information to determine requirements |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Writing | 1.1-1.5, 2.3, 2.4, 4.3, 4.4, 5.1, 5.2 | • Develops clear and well-organised specifications, and related workplace documentation, for specific audiences using the appropriate language to convey explicit information |
| Navigate the world of work | 2.1, 3.2, 4.2 | • Ensures that knowledge of computing technologies is kept up to date in order to provide, and carry out, activities |
| Get the work done | 1.2, 2.1, 2.4, 3.3, 4.4, 5.1-5.3 | • Accepts responsibility for planning and sequencing complex tasks and workload, negotiating key aspects with others, and taking into account capabilities, efficiencies and effectiveness<br>• Makes critical decisions quickly and intuitively in complex situations, taking into consideration a range of variables, including the outcomes of previous decisions<br>• Applies systematic and analytical decision-making processes, for complex and non-routine situations<br>• Uses and investigates new digital technologies and applications, to manage and manipulate data, and to communicate effectively with others, in a secure and stable digital environment |

# Unit Mapping Information

| **Code and title current version** | **Code and title previous version** | **Comments** | **Equivalence status** |

# Assessment Requirements for ICTWEB515 Implement and use web services

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- transform data from relational or other native data sources, into an extensible markup language (XML)
- validate an XML document, using a predefined schema
- provide access to the business functionality via a web service description language (WSDL) file
- locate a public web service business function, and include it in a website, using universal description, discovery and integration (UDDI), and a simple object access protocol (SOAP)
- implement a web service according to the business requirements, specifications, and industry standards.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise integrated development environments
- summarise web development technologies
- outline the web service architecture
- describe the importance of XML language and data structures.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the website technologies field of work, and include access to:

- the web service business requirement specifications
- industry standards published by the World Wide Web Consortium (W3C)
- platform-specific documentation and help files, describing the syntax and use of proprietary technologies
- a simulated development environment, incorporating the following elements:
  - a relational database server
  - the integrated development environment (IDE), including related frameworks, APIs and associated proprietary classes, required to implement web services and their enabling technologies
  - a web server
  - web browsers
  - XML editors
  - XPath testing utilities.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTWEB516 Research and apply emerging web technology trends

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to keep up-to-date and apply emerging web technologies.

It applies to individuals who have an understanding of internet technology, are highly skilled technicians, and have high-level knowledge of the principles of analysis and design.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Web

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Identify emerging web technology trends and their uses | 1.1 Review new developments in web technology<br>1.2 Identify the appropriate web technology to meet the needs of the web application |
| 2. Implement new web technology trends in a portfolio | 2.1 Create the code to apply the web technology<br>2.2 Test the web application in a variety of browsers, and rectify any problems that arise |

© Commonwealth of Australia, 2025 Future Skills Organisation

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.2 | • Critically analyses complex information from a variety of sources, and consolidates information, relating to specific criteria to determine the requirements |
| Writing | 2.1 | • Writes and edits, computer code and technical data, ensuring the correct syntax and accuracy |
| Get the work done | 1.2, 2.2 | • Accepts responsibility for planning and sequencing complex tasks and workload, negotiating key aspects with others while taking into account capabilities, efficiencies and effectiveness<br>• Investigates new and innovative ideas as a means to improve work practices and processes<br>• Uses and investigates new digital technologies and applications, to manage and manipulate data, and to communicate effectively with others in a secure, and stable, digital environment |

# Assessment Requirements for ICTWEB516 Research and apply emerging web technology trends

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- research, investigate, and apply emerging web technology trends to a web application.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the principles of the internet and the technologies that underpin its existence
- summarise the key principles of analysis and design
- outline programming control structures and object-oriented programming
- explain web programming concepts, including:
  - the hypertext transfer protocol (HTTP)
  - stateless programming
  - session management
  - authentication and web security
  - client-side programming
- explain the latest web technology trends, and their application, to a client
- evaluate a web application, using trends in web technology
- identify the sources of information regarding new and emerging, trends and technologies.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the website technologies field of work, and include access to:

- a development environment
- a server
- a database server
- the internet
- browsers.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTWHS201 Provide telecommunications services safely on roofs

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge to engage in safe work practices when installing or repairing telecommunications equipment on roof structures.

It applies to individuals employed as technicians and installers who are required to safely install or repair telecommunications equipment on roof structures. It includes planning, risk assessment and implementing control measures while undertaking telecommunications installation or repairs.

No licensing, legislative or certification requirements apply to this unit at the time of publication

## Unit Sector

Telecommunications – Occupational Health and Safety

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Follow workplace procedures for hazard identification and risk control | 1.1 Notify customer and arrange site access<br>1.2 Recognise and report hazards in the work area to designated personnel according to workplace procedures<br>1.3 Follow work health and safety (WHS) legislative requirements, workplace procedures and work instructions to control risks |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.4 Comply with safe work practices for working safely on roofs and adhere to workplace environmental requirements throughout the work<br>1.5 Implement duty of care requirements to provide a safe working environment<br>1.6 Complete job safety analysis (JSA) sheets according to work requirements, including hazard identification and risk assessment<br>1.7 Use and maintain personal protective equipment and personal safety equipment according to work requirements and apply fall protection and personal safety requirements according to regulatory requirements |
| 2. Prepare for work on rooftop | 2.1 Assess scope of work according to workplace procedures, relevant legislation, codes, regulations and standards and relevant job information details<br>2.2 Inspect site to determine layout and equipment requirements according to work order<br>2.3 Select materials, tools and equipment, including personal protective equipment, and check for serviceability<br>2.4 Inspect and install fall protection and perimeter protection equipment, ensuring adequacy for work and conformance to regulatory requirements<br>2.5 Install roof safety system according to workplace and regulatory requirements<br>2.6 Select and install appropriate signage and barricades |
| 3. Perform telecommunications work on rooftop | 3.1 Inspect access from ground to work area ensuring it is safe and according to regulatory requirements<br>3.2 Estimate total weight of material to be raised to rooftop to carry out the work<br>3.3 Determine and use the safest lifting method to bring materials and equipment to rooftop according to regulatory requirements.<br>3.4 Secure test equipment, hardware and tools safely on rooftop and distribute weight to eliminate risk of damage to roof cover<br>3.5 Inspect safety system periodically for compliance with regulations according to workplace procedures and report faults<br>3.6 Monitor risk control measures to ensure they are effective and appropriate to the task and work environment<br>3.7 Reassess risk control measures as required, according to changed work practices or site conditions and make alterations within scope of authority |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| 4. Complete activities and documentations | 4.1 Dismantle safety system according to prescribed sequence and remove from worksite<br>4.2 Clear work area and dispose of materials or recycle according to state and territory legislation and workplace procedures<br>4.3 Clean, check and maintain tools and equipment according to manufacturer's recommendations and workplace procedures<br>4.4 Complete documentation according to workplace requirements and notify customer for sign off |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 2.6 | • Interprets textual information from sources to identify relevant safety signs |
| Writing | 1.2, 1.6, 4.4 | • Prepares documentation and correspondence using clear language, correct spelling and terminology in the preparation of reports, JSA, SWMS and other reports |
| Oral Communication | 1.1, 1.2, 4.4 | • Uses clear language and concepts, and tone and pace appropriate for the audience and purpose |
| Numeracy | 3.2 | • Performs mathematical calculations to estimate, interpret and confirm safe roof loading |
| Navigate the world of work | 1.3-1.5, 1.7, 2.1, 2.4, 2.5, 3.1, 3.3, 3.6, 3.7, 4.1-4.3 | • Complies with explicit policies and procedures.<br>• Explores and implements, where identified, the implicit expectations of policies and procedures |
| Interact with others | 1.1, 1.2, 4.4 | • Identifies and takes steps to follow accepted communication practices and protocols<br>• Uses a limited range of accepted practices for communicating in a work environment |
| Get the work done | 1.1, 1.2, 1.4-1.7, 2.1-2.6, 3.1-3.4, 3.6, 3.7, 4.1-4.4 | • Plans and implements routine tasks and workload making limited decisions on sequencing, timing and collaboration, and seeks assistance in setting priorities<br>• Responds to predictable routine problems, |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| | | implementing standard or logical solutions |

# Unit Mapping Information

# Assessment Requirements for ICTWHS201 Provide telecommunications services safely on roofs

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- locate, interpret and apply relevant information, standards and specifications for working safely on roofs
- apply safety requirements throughout the work sequence, including the use of personal protective equipment
- provide for erection, maintenance and dismantling of the fall and perimeter protection requirements for the site
- carry out a risk assessment ensuring:
  - correct identification of risks and safety requirements
  - correct selection and use of appropriate processes, tools and equipment
  - completion of all work to specification
  - compliance with regulations, standards and organisational quality procedures and processes
  - open communication and the ability to work effectively and safely with others.

Note: As a minimum, given the plans and specifications for the roof working area of a corner, extending at least 4 metres in either direction and greater than 1.8 m high, incorporating harnesses and harness fixing points for safe personal and stores access to the roof, stores and equipment locations

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the purpose of job safety analysis (JSA) and safe work method statements
- identify the various hazards associated with working on roofs
- identify levels of responsibility when operating in a hazardous situation
- specify workplace procedures relating to working on roofs

© Commonwealth of Australia, 2025 Future Skills Organisation

- describe the hierarchy of control in a workplace health and safety environment in the context of:
  - hazards
  - risk
  - control
- list and describe common workplace practices that impact health and safety
- explain ‘duty of care’ and its relevance to workplace health and safety
- list and describe the use of safety personal protective equipment (PPE) and equipment used for working on roofs
- describe safe lifting methods
- explain reporting methods for safe work practices
- explain the nature of work undertaken on roofs
- list and apply processes of providing for safe working practices
- identify and comply with relevant statutory and regulatory authority requirements related to working safely on roofs
- identify and use roof safety equipment and systems and considerations to facilitate working safely on roofs
- apply SI system of measurement for measurement.

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the Telecommunications – Occupational Health and Safety field of work and include access to:

- site on roof where operations may be conducted
- induction procedure and requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe working practices and addressing hazards and emergencies
- relevant regulations, standards specifications and manuals, including industry related systems information.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTWHS202 Work safely in a radio frequency electromagnetic radiation environment

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the performance outcomes, skills and knowledge required to use organisational risk control procedures when working with a risk of exposure to radio frequency (RF) electromagnetic radiation (EMR) hazards.

The unit applies to site maintenance staff, technicians and installers who install or maintain equipment at installations that are sources of RF EMR.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

## Unit Sector

Telecommunications – work health and safety

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare to work in RF EMR environment | 1.1 Identify characteristics of RF EMR and situations that can lead to exposure to RF EMR hazards<br>1.2 Identify potential effects of RF EMR on human body and contributing factors that affect it<br>1.3 Research relevant regulations and standards that apply to |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | working with and controlling RF EMR hazards<br>1.4 Obtain and review RF EMR information required for work environment |
| 2. Assess RF EMR risks | 2.1 Assess potential RF EMR hazards in telecommunications work environment<br>2.2 Estimate likely field strength pattern of potential RF EMR hazard |
| 3. Control RF EMR risks | 3.1 Explain typical organisational controls to manage and control identified RF EMR hazards<br>3.2 Choose and apply appropriate RF EMR controls<br>3.3 Report EMR exposure that exceeds acceptable levels according to organisational work health and safety (WHS) requirements |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1-1.4, 2.1, 2.2, 3.1 | • Uses a number of reading strategies to identify and interpret relevant information within familiar text types |
| Writing | 3.3 | • Prepares organisational WHS documentation using clear language, correct spelling and terminology |
| Oral Communication | 3.3 | • Uses clear language and concepts, and tone and pace appropriate for the audience and purpose |
| Numeracy | 2.2 | • Performs mathematical calculations to estimate, interpret and compare RF signal strength |
| Navigate the world of work | 1.3, 1.4, 3.1-3.3 | • Understands responsibility to comply with legal and regulatory requirements |
| Interact with others | 3.3 | • Identifies and takes steps to follow accepted communication practices and protocols |
| Get the work done | 1.1-1.4, 2.1, 3.1, 3.2 | • Follows clearly defined instructions and sequencing, and monitors own progress for the task, seeking assistance when necessary |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| | | • Makes low-impact decisions within familiar situations, based on a range of predefined or routine solutions<br>• Responds to predictable routine problems and implements standard or logical solutions |

# Assessment Requirements for ICTWHS202 Work safely in a radio frequency electromagnetic radiation environment

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of the ability to:

- identify the effect of radio frequency (RF) electromagnetic radiation (EMR) on the human body
- locate, interpret and apply relevant information, standards and specifications for working safely with RF EMR
- identify organisational controls for exposure to RF EMR, including lock-out procedures and the use of personal protective equipment
- identify risks and safety requirements and record in a job safety analysis (JSA) sheet or safe work method statement (SWMS) or similar record sheet
- select and use appropriate processes, tools and equipment to minimise RF EMR risk
- comply with regulations, standards and organisational procedures and processes
- communicate and work effectively and safely with others.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the characteristics of RF EMR and sources of RF EMR, and state their effect on the human body
- describe the nature of work undertaken close to sources of RF EMR and identify the associated risks and hazards
- identify and summarise the regulations and standards that govern the generation of RF and EMR
- identify the relevant statutory and regulatory requirements relating to working safely with RF EMR
- describe the organisational control processes for managing exposure to RF EMR.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications – work health and safety field of work and include access to:

- induction procedures and requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- relevant regulations, standards, specifications and manuals, including industry related systems information.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTWHS203 Work safely near power infrastructure

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge to conduct telecommunications operations near substantial safety hazards. It includes safety hazard management at heights near electrical distribution infrastructure, radiation devices or other services in confined spaces.

It applies to field officers who work with cables on elevated work platforms, in confined spaces and on roofs and other structures near power lines. It does NOT include work on public electricity assets.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

## Unit Sector

Telecommunications – Occupational Health and Safety

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Conduct risk assessment | 1.1 Confirm work instructions with appropriate personnel and seek clarification if required<br>1.2 Select work health and safety (WHS) legislation, policy and procedures and technical standards relevant to the work and work site |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.3 Assess risks from electrical, radiation, gas and other services in or adjacent to the worksite<br>1.4 Assess safety of the worksite, other services and support structures using appropriate monitoring equipment<br>1.5 Complete a job safety analysis (JSA) or similar risk assessment record listing potential safety hazards associated with site and work requirements, and report safety hazards to relevant personnel<br>1.6 Obtain and confirm permits from relevant authorities within scope of personal authority or seek assistance from appropriate authority<br>1.7 Assess potential emergency situations relevant to the site<br>1.8 Note earthing arrangements for telecommunications infrastructure and any other services that impinge on the worksite |
| 2. Develop hazard management plan | 2.1 Propose strategies to manage potential safety hazards<br>2.2 Communicate hazard management strategies and confirm with co-workers<br>2.3 Establish and confirm safety procedures to ensure management of emergency situations<br>2.4 Obtain safety equipment and personal protective equipment<br>2.5 Delineate safe work zones and limits of approach to other services<br>2.6 Arrange road safety and traffic control measures<br>2.7 Implement safe strategies for working at heights and in confined spaces |
| 3. # Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.2, 1.6 | • Reads and interprets documentation from a variety of sources and consolidates information to determine safety requirements |
| Writing | 1.5, 2.1, 2.3 | • Accurately records and completes organisational safety documents and correspondence using clear language and correct spelling, grammar and terminology |
| Oral Communication | 1.1, 1.5, 2.3 | • Uses clear language, concepts, tone and pace appropriate for the audience to communicate safety outcomes |
| Navigate the world of work | 1.2, 1.6, 2.7, 3.4-3.8 | • Understands rights and responsibilities and complies with legal and regulatory requirements<br>• Complies with explicit policies and procedures<br>• Explores and implements implicit expectations of policies and procedures |
| Interact with others | 1.1, 1.5, 2.3 | • Uses a limited range of accepted practices for communicating in a work environment |
| Get the work done | 1.2-1.4, 1.7, 1.8, 2.1, 2.3-2.7, 3.1-3.4, 3.8 | • Plans and implements routine tasks and workload making limited decisions on sequencing, timing and collaboration, seeks assistance in setting priorities<br>• Responds to predictable routine problems, implementing standard or logical solutions |

# Assessment Requirements for ICTWHS203 Work safely near power infrastructure

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of ability to:

- conduct a risk assessment for a telecommunications site near power infrastructure
- develop a simple hazard management plan
- assess the requirements for working at heights and working in confined spaces
- apply safety precautions while working at heights or in confined spaces near power infrastructure.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe appropriate electrical safety and technical knowledge relating to the type of work, operating plant or vehicle near power lines (safe system of work according to the relevant electrical regulations and Acts)
- identify environmental control processes:
  - disposal and handling of hazardous and dangerous substances
  - noise pollution
  - waste disposal
- identify main components of work health and safety (WHS) legislation, regulations and codes of practice that affect the work function
- identify and explain the principles of WHS including legislation and standards
- describe ways WHS is managed in the workplace, and activities required under WHS legislation, including:
  - hazard identification
  - hazards that exist in the workplace

© Commonwealth of Australia, 2025 Future Skills Organisation

  - WHS instruction
  - preferred order of ways to control risks (known as the hierarchy of control)
  - risk assessment and control
  - sound knowledge of operating safely at heights
  - training and provision of WHS information
- identify workplace environmental and WHS procedures relevant to the work being undertaken, including:
  - designation of personnel responsible for WHS
  - requirement for employee participation in WHS management
  - standard meanings of WHS symbols found on signs and labels in the workplace
  - raising WHS issues
  - recognising and reporting on hazards
  - responding to accidents, fires and emergencies
  - work operations to control risks
- identify common road and pedestrian safety control measures appropriate to the worksite.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the Telecommunications – Occupational Health and Safety field of work and include access to:

- telecommunications site near power infrastructure
- relevant WHS legislation, regulations and codes of practice
- enterprise WHS policies and procedures
- personal protective equipment.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTWHS204 Follow work health and safety and environmental policy and procedures

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to follow safe working practices and environmental policy in the management of a telecommunications workplace.

It applies to telecommunications staff working under supervision in a technical environment and includes school based workers, entry-level workers, trainees and apprentices, and field officers deploying broadband access networks using optical technologies and other work on live systems.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

## Unit Sector

Telecommunications – work health and safety

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1 Identify work health and safety (WHS) legislative requirements | 1.1 Locate WHS legislative requirements relevant to own work, role and responsibilities<br>1.2 Explain own responsibilities in relation to duty of care<br>1.3 Identify the relationship between legislative requirements and |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | safe work practices |
| 2 Identify construction hazards and control measures | 2.1 Identify basic principles of risk management<br>2.2 Identify common construction hazards<br>2.3 Identify measures for controlling hazards and risks |
| 3 Follow workplace procedures for hazard identification and risk control | 3.1 Recognise and report hazards in work area to designated personnel according to workplace procedures<br>3.2 Follow WHS legislative requirements, workplace procedures and work instructions to control risks<br>3.3 Comply with safe work practices<br>3.4 Implement duty of care requirements<br>3.5 Complete job safety analysis (JSA) sheets or safe work method statement (SWMS) according to work requirements, including hazard identification and risk assessment<br>3.6 Use and complete checks of personal protective equipment according to work requirements<br>3.7 Assess and test for harmful gases associated with workplace |
| 4 Follow safety requirements for working with optical fibre equipment | 4.1 Identify and use safe work practices when handling optical fibre, lasers and optical connectors according to the relevant Australian Standards<br>4.2 Identify and use safe working practices when handling and disposing of chemical waste |
| 5 Identify and implement WHS communication and reporting processes | 5.1 Apply WHS communication processes, information and documentation<br>5.2 Identify designated WHS personnel<br>5.3 Comply with safety signs and symbols<br>5.4 Identify procedures and relevant authorities for reporting emergencies, incidents and injuries |
| 6 Follow WHS incident response procedures | 6.1 Follow general procedures for responding to incidents and emergencies<br>6.2 Identify procedures for accessing first aid<br>6.3 Select and use relevant personal protective equipment<br>6.4 Explain and apply workplace procedures for fire safety |
| 7 Contribute to management of WHS | 7.1 Raise WHS issues with designated personnel according to workplace procedures and relevant WHS legislation |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 7.2 Contribute to participative arrangements for WHS management in workplace, within organisational procedures and scope of responsibilities and competencies |
| 8 Contribute to management of workplace environmental issues | 8.1 Raise environmental issues with designated personnel according to workplace procedures and relevant environmental requirements and legislation<br>8.2 Contribute to participative arrangements for environmental management in workplace, within organisational procedures and scope of responsibilities and competencies<br>8.3 Record and report all WHS issues, risks and hazards to designated personnel |
| 9 Identify and respond appropriately to asbestos containing materials (ACM) hazards | 9.1 Identify asbestos containing materials (ACM) hazards or their likelihood<br>9.2 Respond to asbestos containing materials hazards or their likelihood<br>9.3 Report identified or suspected asbestos containing materials hazards to designated personnel according to workplace procedures |
| 10 Identify minor traffic management | 10.1 Assess traffic safety requirement of general location with respect to regulatory and enterprise requirements<br>10.2 Identify safe work zone around vehicle and work space using traffic cones and signs according to regulatory requirements<br>10.3 Identify changed traffic conditions and act in accordance |
| 11 Recognise and respond appropriately to confined space | 11.1 Identify confined space in accordance with regulatory or enterprise guidelines that can only be entered by personnel with specialist training<br>11.2 Refer identified confined space to appropriate personnel |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1-1.3, 4.1, 5.4, 6.1-6.4 | • Analyses and consolidates information and data from a range of sources, against |

# Assessment Requirements for ICTWHS204 Follow work health and safety and environmental policy and procedures

## Modification History

| Release | Comments |
|---|---|
| Release 2 | This version first released with ICT Information and Communications Technology Training Package Version 3.1.<br><br>Release created to correct numbering in performance criteria. |
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of the ability to:

- identify and apply the work health and safety (WHS) legislative and safety requirements for construction work
- identify the range of common construction hazards and procedures for the assessment of risk and application of the hierarchy of control
- apply WHS communication processes, information and documentation
- contribute to the WHS committees and support representatives
- recognise the common safety signs and symbols
- identify and apply procedures for reporting hazards, incidents and injuries
- identify and apply the general procedures for responding to incidents and emergencies, including evacuation, first aid, fire safety equipment and personal protective equipment
- recognise and report hazards to designated personnel
- follow workplace procedures necessary to control risks in the workplace
- recognise the safe handling procedures for optical fibres and laser sources.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

© Commonwealth of Australia, 2025 Future Skills Organisation

- describe the relevant Commonwealth, state and territory WHS legislation, regulations, codes of practice, and industry standards and guidance notes relevant to own workplace, role and responsibilities
- describe the differences between Commonwealth, state and territory WHS legislation and regulations
- identify and describe the common construction hazards
- identify different types of asbestos containing materials (ACM) (via photographs) and common sources of asbestos containing materials (ACM) found in the work environment and describe the controls required to mitigate risk
- identify the general construction work activities that require licences, tickets or certificates of competency
- identify and discuss the information and documentation used to maintain and inform on safe work practices
- explain the purpose of environmental control processes for the following:
  - air quality management
  - disposal and handling of hazardous and dangerous substances
  - noise pollution
  - safe disposal of fibre offcuts
  - stormwater and materials spillage
  - waste disposal
- describe the WHS responsibilities and rights of duty holders and workplace parties under environmental and WHS legislation, regulations and codes of practice, including:
  - persons in control of construction work and/or projects
  - employers and self-employed persons
  - persons in control of a business or undertaking (PCBU) and officers
  - supervisors
  - employees and workers
  - designers
  - inspectors
  - manufacturers and suppliers
- describe how individuals engage and participate in WHS activities in the workplace
- list the safety implications of working with optical fibres and equipment including:
  - hazards relating to handling of optical fibre and laser light source in the workplace
  - injuries that may occur:
    - damage to retina from lasers
    - damage to lungs from inhalation of fibre offcuts and particles
    - needle stick injury from fibres and offcuts
  - laser warning signs and labels relating to optical fibre components and equipment
  - safety requirements when handling and working with:
    - devices
    - laser light sources

© Commonwealth of Australia, 2025 Future Skills Organisation

    - optical fibre connectors
    - optical fibres
    - patchcords
- state the personal responsibilities in complying with safe work practices including those relating to:
    - housekeeping
    - identification of hazards
    - preventing bullying or harassment
    - smoking
    - use of amenities
    - use of drugs and alcohol
- discuss the principles of risk management (including hazard identification, risk assessment and control) for construction work
- state ways in which WHS is managed in the workplace, and activities required under WHS legislation including:
    - hazard identification
    - hazards that exist in the workplace
    - WHS instruction
    - preferred order of ways to control risks (known as the hierarchy of control)
    - risk assessment and controls
    - role of WHS committees and representatives
    - training and provision of WHS information
    - types of common personal protective equipment and fire safety equipment
    - types of WHS information and documentation
- describe the workplace environmental and WHS procedures relevant to various types of work being undertaken, including procedures for:
    - designated personnel responsible for WHS
    - employee and worker participation in WHS management
    - general first aid response requirements
    - general workers compensation and injury management
- describe the procedure for recognising, reporting and responding to WHS for:
    - accidents
    - dangerous occurrences
    - emergencies
    - hazards
    - incidents
    - injuries
    - fires
    - near misses
    - evacuation procedures

© Commonwealth of Australia, 2025 Future Skills Organisation

- identify and describe the function of WHS communications processes within an organisation
- discuss the purpose and process for completing job safety analysis or safe work method statements
- describe the meaning of WHS symbols found on signs and labels in the workplace
- describe the work operations to control risks
- explain the process of traffic control for a single vehicle
- describe the risks associated with confined spaces and harmful gasses, and explain the appropriate responses.

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications – work health and safety field of work and include access to:

- relevant WHS legislation, regulations and codes of practice
- WHS implementation resources, such as sample forms, signs and procedures
- enterprise WHS policies and procedures
- personal protective equipment
- first aid equipment
- fire safety equipment
- relevant work areas for identification of hazards and control measures
- optic fibre cabling and equipment.

Note: Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Refer to the ICT Implementation Guide Companion Volume for recommended assessor details.

# ICTWOR201 Work effectively in telecommunications technology

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to recognise the various sectors of the telecommunications industry and to perform individual work and work with others in telecommunications technology.

It applies to individuals who may undertake a range of simple tasks under close supervision and whose range of technical skills and knowledge is limited.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – workplace effectiveness

## Elements and Performance Criteria

| **Elements**<br>*Elements describe the essential outcomes* | **Performance Criteria**<br>*Performance criteria describe the performance needed to demonstrate achievement of the element.* |
|---|---|
| 1. Plan skills development | 1.1 Obtain and update specific information on the various sectors of the telecommunications industry<br>1.2 Seek advice on future career directions from appropriate people<br>1.3 Identify possible career directions in industry or organisation for personal advancement<br>1.4 Conduct self-assessment of personal skills against job role to identify skills gap and plan for further skills development |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | |
|---|---|
| | 1.5 Determine appropriate methods to acquire additional skills<br>1.6 Prepare portfolio of evidence to support the skills development plan<br>1.7 Identify and apply methods for maintaining currency of industry developments |
| 2. Organise personal work priorities | 2.1 Ensure that employment terms and conditions are accessed and understood<br>2.2 Ensure that work goals and objectives are understood, negotiated and agreed according to organisational requirements<br>2.3 Identify, access sources of information relevant to technical and regulatory requirements and apply to work<br>2.4 Assess and prioritise workload to ensure tasks are completed within identified timeframes<br>2.5 Monitor and adjust personal work performance to ensure achievement of tasks |
| 3. Participate in a team | 3.1 Consult team members to identify team purpose, roles, responsibilities, goals, plans and objectives<br>3.2 Develop strategies to support the team and seek assistance from team members when necessary to prevent conflict within the team<br>3.3 Give and receive feedback to assist in meeting team and organisation goals<br>3.4 Communicate unresolved issues to appropriate personnel to ensure action is taken in response to these matters |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Learning | 1.3, 1.4, 1.5, 1.7, 2.5 | • Employs a range of approaches and investigative techniques to source the knowledge required to establish, plan, manage and evaluate skill development |
| Reading | 1.1, 2.1, 2.3 | • Recognises and interprets text to determine key information and specific requirements and responsibilities |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Writing | 1.6 | • Develops material for a specific audience using clear and detailed language in order to convey explicit information, requirements and recommendations |
| Oral Communication | 1.2, 3.1, 3.3, 3.4 | • Participates in a verbal exchange of ideas and elicits the view and opinions of others by listening and questioning |
| Navigate the world of work | 2.1, 2.2, 3.3 | • Takes steps to develop skills, obtain qualifications and/or experience relevant to current or desired work role<br>• Attempts to follow directions on the scope of responsibility within the role and begins to recognise when to involve others |
| Interact with others | 1.2, 3.1, 3.2, 3.3 | • Cooperates with team as part of familiar routine activities, and contributes to specific activities requiring joint responsibility and accountability<br>• Seeks support from team when preventing conflict |
| Get the work done | 1.3-.6, 2.2, 2.4, 2.5 | • Plans routine tasks with familiar goals and outcomes, taking some limited responsibility for decisions regarding sequencing and timing |

# Unit Mapping Information

# Assessment Requirements for ICTWOR201 Work effectively in telecommunications technology

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of the ability to:

- develop a career portfolio or similar information
- obtain information on the relevant telecommunications industry sectors including employment conditions
- prepare work schedule, prioritising urgent requests
- actively participate in a team.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline different roles that people may play within a telecommunications team, how this impacts on the way a team works and what it might achieve
- identify the terms and conditions of employment common to the telecommunications industry
- identify legislation, codes of practice and other formal agreements that impact on the work activity
- identify the various sectors of the telecommunications industry
- identify organisational policies, plans and procedures
- describe skills development in career planning terms
- identify sources of advice on career planning and skill development
- outline specific work health and safety (WHS) requirements relating to the activity and site conditions
- identify types of evidence and ways of creating portfolios of evidence
- outline typical issues and challenges that occur when working in teams.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the Telecommunications – Workplace effectiveness field of work and include access to:

- a telecommunications technology team
- examples of resumes and career planning resources
- relevant documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTWOR301 Organise resources

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to organise resources for a telecommunications project in a client environment, including preparing and evaluating tenders, organising equipment and labour resources, and client training.

It applies to individuals who may be involved in assessing installation requirements, planning and performing installations, testing installed equipment and fault finding. It involves a degree of autonomy and may include limited supervision of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – workplace effectiveness

## Elements and Performance Criteria

| Elements | Performance Criteria |
|---|---|
| *Elements describe the essential outcomes* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Organise for third party supply | 1.1 Develop specifications and company criteria for material supply and purchasing, and include in appropriate tender documents<br>1.2 Prepare tender documents according to company policy<br>1.3 Identify likely material suppliers and invite to tender and supply |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | |
|---|---|
| | 1.4 Evaluate and accept tenders as appropriate to company policy<br>1.5 Negotiate price and conditions of purchase to company guidelines and satisfaction |
| 2. Organise supply of equipment and material | 2.1 Develop specifications detailing types and quantities of equipment and material<br>2.2 Notify supplier to deliver equipment and material to designated location within specified timeframe |
| 3. Organise client training | 3.1 Ascertain detail of training required from client and establish timeframe for client training<br>3.2 Determine and organise resources to undertake level of training required |
| 4. Assess and organise labour resources | 4.1 Produce estimate of total labour resources required, using standard installation times and allowing for contingencies<br>4.2 Determine required labour skills to meet resource allocation for planned activities<br>4.3 Establish workforce with required numbers and skills of staff to meet demand<br>4.4 Notify workforce of job requirements including work health and safety (WHS) considerations, and organise priorities to ensure agreed timeframe with client is met |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| **Skill** | **Performance Criteria** | **Description** |
|---|---|---|
| Reading | 1.3, 1.4 | • Recognises and interprets written and visual text to determine key information and specific requirements and responsibilities |
| Writing | 1.1-1.3, 1.5, 2.1, 2.2, 3.1, 4.4 | • Develops material for a specific audience, using clear and detailed language to convey explicit information, requirements and recommendations |
| Oral Communication | 1.3, 1.5, 2.3, 3.1, 4.1 | • Participates in a verbal exchange of ideas and elicits the view and opinions of others by listening and questioning |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Numeracy | 1.1, 1.4, 1.5, 2.1, 3.1, 4.1-4.3 | • Uses mathematical skills to estimate materials and resource requirements |
| Navigate the world of work | 1.4, 1.5 | • Recognises and follows company policies and guidelines when evaluating and selecting tenders and negotiating price and conditions |
| Get the work done | All | • Applies formal processes when planning material and labour supply and client training tasks, producing plans with logically sequenced steps, reflecting some awareness of time and resource constraints and the needs of others in the immediate vicinity<br>• Initiates standard procedures when responding to familiar problems within labour supply context |

# Assessment Requirements for ICTWOR301 Organise resources

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of the ability to:

- accurately develop tenders for customer premises equipment (CPE) products, equipment, peripherals and associated equipment
- assess tenders and provide a clear report outlining all options, including recommendations with supporting reasons
- organise supply of equipment and material to designated location to meet specified timeframe
- identify labour needs and organise labour to meet installation schedules
- determine client training needs.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline appropriate engineering and design practices and procedures
- identify appropriate tools, equipment and materials required to do the work
- identify enterprise permit procedures and recording procedures
- identify the work health and safety (WHS) practices
- outline work planning and organisation theory
- identify relevant plant and equipment operations
- identify relevant statutory requirements
- explain time management techniques.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – workplace effectiveness field of work and include access to:

- a site for organising resources
- enterprise and site-related documentation
- regulatory, supplier and equipment documentation than impacts on activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTWOR302 Organise material supply

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the, skills and knowledge required to organise material supplies for a telecommunications project, including preparing and evaluating tenders from third party suppliers.

It applies to individuals who may be involved in assessing installation requirements, planning and performing installations, testing installed equipment and fault finding. It involves a degree of autonomy and may include limited supervision of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – workplace effectiveness

## Elements and Performance Criteria

| Elements | Performance Criteria |
|---|---|
| *Elements describe the essential outcomes* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Determine material needs | 1.1 Assess material needs from design plans and comply with relevant legislation, codes, regulations and standards<br>1.2 Check availability of required materials within existing stock<br>1.3 Assess availability of material from preferred suppliers |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | |
|---|---|
| 2. Prepare and evaluate tenders | 2.1 Develop specifications and criteria for material supply and purchasing<br>2.2 Prepare tender documents and invite quotes from material suppliers according to enterprise policy<br>2.3 Evaluate tenders and ensure they are detailed in accordance with enterprise procedures |
| 3. Organise delivery of equipment and material to site | 3.1 Select types and quantities of equipment available from existing stocks and pack for distribution<br>3.2 Arrange delivery of equipment and material within specified timeframe<br>3.3 Organise third party supply according to agreed timeframe and supply agreements |
| 4. Undertake administrative tasks | 4.1 Record warranty details and distribute to relevant parties as required<br>4.2 Issue relevant financial documents according to enterprise policy<br>4.3 Record materials received in asset register according to enterprise procedures<br>4.4 Complete administrative requirements according to enterprise procedures |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| **Skill** | **Performance Criteria** | **Description** |
|---|---|---|
| Reading | 1.1-1.3, 2.3 | • Recognises and interprets written and visual text to determine key information and specific requirements and responsibilities |
| Writing | 2.1, 2.2, 3.2, 3.3, 4.1, 4.4 | • Develops material for a specific audience using clear and detailed language to convey explicit information, requirements and recommendations<br>• Employs the expected writing and formatting conventions to meet the expectations of a specific audience |
| Oral Communication | 2.2, 3.2, 3.3, 4.1 | • Participates in a verbal exchange of ideas and elicits the view and opinions of others by listening and questioning |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Numeracy | 1.1, 2.2, 2.3, 3.1, 4.2, 4.3 | • Uses mathematical skills to estimate materials and resource requirements |
| Navigate the world of work | 1.1, 4.2-4.4 | • Takes personal responsibility for adherence to relevant legislation, codes, regulations and standards, and enterprise policies and procedures |
| Get the work done | 1.1-1.3, 2.1-2.3, 3.1-3.3 | • Plans purchasing and supply of materials and equipment, accepting stated goals and aiming to achieve them efficiently<br>• Implements actions in relation to supply and delivery as per plan, making slight adjustments if necessary, and addressing some unexpected issues<br>• Uses a formal decision making process, setting or clarifying goals, gathering information, and identifying and evaluating several choices against a limited set of criteria in relation to assessing needs, selecting materials and equipment, and evaluating tenders |

# Assessment Requirements for ICTWOR302 Organise material supply

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of the ability to:

- accurately apply the tender process according to both enterprise and legislative requirements
- comply with all related work health and safety (WHS) requirements and work practices
- determine material needs:
  - from design plans
  - from relevant databases
  - beyond current holdings
- organise supply of equipment and material to site
- record materials received on asset register.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify appropriate engineering and design practices and procedures
- outline enterprise permit and recording procedures
- describe WHS practices
- outline work planning and organisational theory
- describe relevant plant and equipment operations
- identify relevant statutory requirements
- identify time management techniques
- identify tools, equipment and materials required to do the work.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – workplace effectiveness field of work and include access to:

- a site for ordering materials
- relevant regulatory, enterprise, supplier and equipment documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTWOR303 Schedule resources

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to undertake scheduling of resources for a new installation or upgrade of an existing system for all telecommunications applications including telephony, data, video and multimedia.

It applies to individuals who may be involved in assessing installation requirements, planning and performing installations, testing installed equipment and fault finding. It involves a degree of autonomy and may include limited supervision of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – workplace effectiveness

## Elements and Performance Criteria

| Elements | Performance Criteria |
|---|---|
| *Elements describe the essential outcomes* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Scope project resources | 1.1 Collate and analyse design and estimation documents from appropriate personnel for resource needs and deadlines, complying with relevant legislation, codes, regulations and standards<br>1.2 Consult interested parties for input to schedule |
| 2. Schedule | 2.1 Coordinate resource requirements for project to match available |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | |
|---|---|
| resources for project | labour to quantity and type of work required<br>2.2 Schedule availability of resources to suit relevant interested parties and according to works schedules, including start and finish dates<br>2.3 Document and clearly communicate resources schedule to appropriate personnel for approval |
| 3. Monitor and coordinate resources schedule according to project progress | 3.1 Monitor and coordinate quantity, quality and timing of supply of each input and service according to progress of projects being undertaken<br>3.2 Reschedule resources based on priorities and report to appropriate person according to enterprise guidelines<br>3.3 Complete administrative tasks |

# Foundation Skills

*This section describes the Foundation Skills incorporated in the performance criteria that are required for competent performance.*

| **Skill** | **Performance Criteria** | **Description** |
|---|---|---|
| Reading | 1.1, 3.3 | • Recognises and interprets written and visual text to determine key information and specific requirements and responsibilities |
| Writing | 1.1, 1.2, 2.2, 2.3, 3.2, 3.3 | • Develops material for a specific audience using clear and detailed language to convey explicit information, requirements and recommendations |
| Oral Communication | 1.2, 2.3, 3.2 | • Participates in a verbal exchange of ideas and elicits the view and opinions of others by listening and questioning |
| Numeracy | 1.1, 2.1-2.3, 3.1, 3.2 | • Uses mathematical skills to estimate resource allocation and work schedules |
| Navigate the world of work | 1.1, 2.3, 3.2 | • Takes personal responsibility for adherence to legal and regulatory responsibilities relevant to scoping of project resources<br>• Recognises and follows explicit and implicit enterprise protocols regarding gaining approval for resources schedule and any rescheduling |
| Interact with others | 1.2 | • Understands what to communicate, with whom and how in consultations regarding input to schedule |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Get the work done | All | • Sequences and schedules complex activities, monitors implementation and manages relevant communication when scoping, scheduling, monitoring and coordinating resources schedule<br>• Uses systematic, analytical processes in matching labour supply to work required and monitoring progress, gathering relevant information and evaluating options against agreed criteria<br>• Recognises and takes responsibility for addressing predictable and less predictable problems when rescheduling according to priorities |

# Assessment Requirements for ICTWOR303 Schedule resources

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of the ability to:

- identify resource requirements from plans, equipment and system manuals, specifications and relevant enterprise policy
- plan and provision to meet key dates and milestones for:
  - appropriately skilled labour
  - volume and type of material
- monitor work progress, and coordinate and adjust resource requirements to meet client needs and cost parameters.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify appropriate engineering and design practices and procedures
- identify enterprise permit procedures and enterprise recording procedures
- identify relevant industrial awards and work health and safety (WHS) practices
- outline relevant plant and equipment operations
- identify relevant statutory requirements
- describe team communication processes and deadline setting
- explain time management techniques
- identify tools, equipment and materials required to do the work
- outline work planning and organisational theory.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – workplace effectiveness field of work and include access to:

- a suitable telecommunications operations site
- current equipment
- relevant enterprise and site related documentation
- relevant regulatory, supplier and equipment documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTWOR304 Manage spare parts

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to manage spare parts in all areas of telecommunications and includes maintenance of a database, stock control and dispatch.

It applies to individuals who may be involved in assessing installation requirements, planning and performing installations, testing installed equipment and fault finding. It involves a degree of autonomy and may include limited supervision of others.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

## Unit Sector

Telecommunications – workplace effectiveness

## Elements and Performance Criteria

| Elements | Performance Criteria |
|---|---|
| *Elements describe the essential outcomes* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Manage receipt and dispatch of spare parts | 1.1 Obtain relevant legislation, codes, regulations and standards, and follow work health and safety (WHS) and environmental requirements for given work<br>1.2 Identify hazards and make worksite safe according to relevant safety legislation and company work practices, and use personal |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | |
|---|---|
| | protective equipment<br>1.3 Unload, unpack and store incoming spare parts using appropriate methods and enterprise procedures, and check off delivered items on documentation<br>1.4 Package, label and relocate outgoing spare parts ready for dispatch using enterprise procedures<br>1.5 Update parts database to reflect current spare parts movements and holdings, following each dispatch or delivery, and complete any other administrative task required by enterprise |
| 2. Store spare parts | 2.1 Label spare parts using appropriate identification scheme and place in predefined storage locations<br>2.2 Observe antistatic precautions when handling equipment susceptible to damage by electrostatic discharge<br>2.3 Display, maintain and update material safety data sheets (MSDS) on site |
| 3. Manage stock flow | 3.1 Action spare parts requests by checking database for availability and location, and organise the dispatch<br>3.2 Monitor levels of spare parts stock by examining database reports against enterprise usage and replenishing stock when necessary<br>3.3 Investigate and keep records of alternative suppliers of spare parts to minimise impact of availability and cost issues with regular suppliers<br>3.4 Monitor spare parts with limited shelf life, and dispose of and replace when necessary<br>3.5 Audit spare parts holdings for ready supply of items to minimise disruptions to job completions<br>3.6 Update database from appropriate documentation each time a store’s transaction occurs to maintain validity of data |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| **Skill** | **Performance Criteria** | **Description** |
|---|---|---|
| Reading | 1.1, 1.5, 2.2, 3.1, 3.3, 3.4 | • Recognises and interprets written and visual text to determine key information, and specific requirements and responsibilities |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Writing | 1.3-1.5, 2.1, 2.3, 3.1, 3.3 | • Develops material for a specific audience, using clear and detailed language to convey explicit information, requirements and recommendations<br>• Uses expected writing conventions and forms |
| Oral Communication | 3.1 | • Participates in a verbal exchange of ideas and elicits the view and opinions of others by listening and questioning |
| Numeracy | 1.3-1.5, 3.2-3.5 | • Uses mathematical skills to estimate materials and evaluate and predict resource requirements |
| Navigate the world of work | 1.1-1.4, 2.1-2.3 | • Takes personal responsibility for adherence to legal and regulatory requirements relevant to spare parts work context, and draws attention to any issues that may affect self or others<br>• Recognises and follows explicit and implicit company and health and safety protocols, and meets expectations associated with own role |
| Get the work done | All | • Takes responsibility for planning and organising own workload, identifying ways of sequencing and combining elements for greater efficiency, when managing receipt and dispatch, storage and stock flow<br>• Uses systematic, analytical processes when monitoring and auditing, setting goals, gathering relevant information, and identifying and evaluating options against agreed criteria<br>• Initiates standard problem solving procedures when identifying hazards within immediate context<br>• Seeks to improve a future response through investigating alternative suppliers<br>• Uses database systems and tools to access, organise, analyse and display information relevant to role |

# Assessment Requirements for ICTWOR304 Manage spare parts

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of the ability to:

- safely apply spare parts management procedures
- efficiently arrange for storage and ordering of spare parts
- research alternative parts replacements
- accurately update spare parts management database.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain computer and database operation
- describe handling of:
  - chemicals and dangerous materials
  - sensitive electronic equipment using antistatic procedures and safeguards
- outline modern storage practices and identification of parts location
- outline work health and safety (WHS) procedures
- identify service level agreements
- describe stocktake and audit of spare parts holdings
- identify telecommunications components and assemblies.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – workplace effectiveness field of work and include access to:

© Commonwealth of Australia, 2025 Future Skills Organisation

- a site where work may be conducted
- current equipment
- a database for relevant regulations
- organisational procedures
- equipment documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTWOR305 Supervise worksite activities

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to supervise small-scale projects with a limited range of technical skills.

It applies to individuals who may be involved in assessing installation requirements, planning and performing installations, testing installed equipment and fault finding. It involves a degree of autonomy and may include limited supervision of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – workplace effectiveness

## Elements and Performance Criteria

| Elements | Performance Criteria |
|---|---|
| *Elements describe the essential outcomes* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare for worksite activities | 1.1 Clarify requirements of job with client and project personnel, and arrange access to site<br>1.2 Confirm resource requirements and allocate time and schedule activities with project manager following relevant legislation, codes, regulations and standards, site specific safety requirements and enterprise procedures |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | |
|---|---|
| | 1.3 Document or articulate worksite activities plan and verify with project manager<br>1.4 Source materials and equipment and place orders according to enterprise policy<br>1.5 Confirm external agency licences and approvals<br>1.6 Notify affected parties of works to be undertaken<br>1.7 Inform staff of their responsibilities on site |
| 2. Supervise and monitor worksite activities | 2.1 Direct and supervise staff in work activities, following plan<br>2.2 Account for staff, activities and resource usage<br>2.3 Recognise contingency situations and take corrective actions in consultation with project manager |
| 3. Perform administrative tasks | 3.1 Undertake administrative tasks<br>3.2 Prepare simple report and present to project manager |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| **Skill** | **Performance Criteria** | **Description** |
|---|---|---|
| Reading | 1.2, 1.4, 1.5, 3.1 | • Recognises and interprets text to determine key information and specific requirements and responsibilities |
| Writing | 1.1-1.3, 1.5-1.7, 2.1, 2.3, 3.1, 3.2 | • Develops material for a specific audience using clear and detailed language |
| Oral Communication | 1.1-1.3, 1.5-1.7, 2.1, 2.3, 3.2 | • Participates in a verbal exchange of ideas and elicits the views and opinions of others by listening and questioning |
| Numeracy | 1.2, 2.2 | • Uses mathematical skills to estimate materials and evaluate and predict resource requirements |
| Navigate the world of work | 1.2-1.5 | • Appreciates the implications of legal and regulatory responsibilities related to own work, and recognises some general legal principles applicable across work contexts<br>• Recognises and follows explicit and implicit |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| | | enterprise policies and protocols, and meets expectations associated with own role |
| Interact with others | 1.1-1.7, 2.1-2.3 | • Understands what to communicate, with whom and how when preparing, monitoring and supervising worksite activities<br>• Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction, influencing direction and taking a leadership role when supervising and monitoring activities<br>• Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context to identify relevant information and risks, and identify and evaluate alternative strategies and resources when preparing, supervising and monitoring worksite activities<br>• Recognises and takes responsibility for addressing predictable and less predictable problems in familiar work contexts |

# Assessment Requirements for ICTWOR305 Supervise worksite activities

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of the ability to:

- accurately plan work activities, prioritising and allocating tasks
- liaise effectively with client or project manager
- monitor work progress and reallocate resources to meet completion requirements
- supervise staff, ensuring compliance with work health and safety (WHS) and relevant regulations.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify appropriate tools, equipment and materials required for the work
- identify enterprise permit procedures and recording procedures
- describe WHS practices
- identify relevant plant and equipment operations
- identify relevant statutory requirements and industrial awards
- explain team communication processes
- describe typical worksite issues
- describe work planning and organisation theory.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – workplace effectiveness field of work and include access to:

© Commonwealth of Australia, 2025 Future Skills Organisation

- a telecommunications operations site
- equipment currently used in industry
- enterprise and site related documentation
- agency licences and relevant regulatory, supplier and equipment documentation that impacts on worksite activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTWOR306 Resolve technical enquiries using multiple information systems

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to remotely support the resolution of complex technical enquiries related to a product or service.

It applies to individuals in a call centre environment with a background in telecommunications and experience in client access networks and client infrastructure, including equipment and cabling, who use multiple information systems to both obtain and record client information.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – workplace effectiveness

## Elements and Performance Criteria

| Elements | Performance Criteria |
|---|---|
| *Elements describe the essential outcomes* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Initiate contact with client | 1.1 Apply all relevant legislation, codes, regulations and standards in resolution process<br>1.2 Receive and analyse enquiry to efficiently select initial course of action |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | |
|---|---|
| | 1.3 Engage effectively with client to confirm initial referral details and propose initial course of action |
| 2. Obtain information from multiple information systems | 2.1 Identify information needs and sources of this information<br>2.2 Log on to and navigate relevant information systems efficiently<br>2.3 Record details of informant and enquiry in information systems according to enterprise requirements<br>2.4 Identify and verify information relevant to enquiry and its resolution with informant |
| 3. Develop plan to resolve enquiry | 3.1 Review critical information with informant and apply technical expertise to develop options for resolving enquiry<br>3.2 Consider all inputs and recommend course of action, including escalation<br>3.3 Negotiate suitable course of action with informant<br>3.4 Record details of course of action as required by enterprise information systems |
| 4. Implement plan to resolve enquiry | 4.1 Confirm negotiated course of action with informant prior to initiating actions and seek agreement on schedule of actions for longer term resolutions<br>4.2 Identify and initiate actions to be taken by technical support operator, informant or other parties<br>4.3 Contact informant to confirm success of planned actions<br>4.4 Record outcomes of resolution as required by information systems |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| **Skill** | **Performance Criteria** | **Description** |
|---|---|---|
| Reading | 1.1, 1.2, 2.1, 2.2, 2.4, 3.1, 3.2, 4.2 | • Recognises and interprets text to determine key information and specific requirements and responsibilities |
| Writing | 1.3, 2.3, 2.4, 3.1, 3.3, 3.4, 4.1-4.4 | • Prepares specific information that conveys an understanding of outcomes and alternatives, and uses terminology appropriate to present to relevant personnel |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Oral Communication | 1.3, 2.4, 3.1, 3.3, 4.1-4.3 | • Participates in a verbal exchange of ideas and elicits the views and opinions of others by listening and questioning<br>• Articulates requirements and strategies clearly, distinctively and creatively, based on techniques and language appropriate to the audience and environment |
| Navigate the world of work | 1.1 | • Takes personal responsibility for adherence to legal and regulatory requirements relevant to own work context |
| Interact with others | 1.3, 2.4, 4.1, 4.3 | • Initiates and contributes to conversations with clients, responding, explaining, clarifying and expanding on ideas and information as required |
| Get the work done | 1.2, 1.3, 2.2, 2.3, 3.1-3.3, 4.4 | • Plans and implements client enquiry resolution, accepting stated goals and aiming to achieve them efficiently<br>• Selects from a range of pre-determined options when determining action to be taken by others, identifying and taking situational factors into account<br>• Applies formal problem solving processes when tackling an unfamiliar problem, breaking complex issues into manageable parts and identifying and evaluating several options for action<br>• Uses multiple digital information systems and tools to access, organise, analyse and display information relevant to role |

# Assessment Requirements for ICTWOR306 Resolve technical enquiries using multiple information systems

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of the ability to:

- apply efficient computer usage to efficiently navigate relevant systems for the required information
- use effective interpersonal skills to develop a plan of action to deal with the enquiry
- develop agreement to resolve the enquiry
- accurately document all dealings for future reference and follow up resolution effectively.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain a range of conflict resolution approaches
- identify database and spreadsheet concepts
- describe enterprise escalation policies and procedures
- identify enterprise information systems
- identify legislation, codes of practice and other formal agreements that directly impact on resolution processes
- outline typical issues and challenges that occur when dealing with clients in a telecommunications environment.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – workplace effectiveness field of work and include access to:

© Commonwealth of Australia, 2025 Future Skills Organisation

- a client contact centre
- current client contact technologies
- relevant regulatory and equipment documentation that impacts on work activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTWOR307 Collect and analyse technical information

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to investigate a technical situation involving the collection and analysis of information from a variety of sources, including interviews and database systems. The technical situation under investigation may be the result of a fault or failure of a product, service or process.

It applies to individuals who undertake investigations. It may involve a degree of autonomy and some accountability for the quality of outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunication – workplace effectiveness

## Elements and Performance Criteria

| Elements | Performance Criteria |
|---|---|
| *Elements describe the essential outcomes* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Obtain recorded information | 1.1 Apply all relevant legislation, codes, regulations and standards in analysis process<br>1.2 Verify situation to be investigated and identify appropriate sources of information for this situation<br>1.3 Obtain relevant information from computer systems and analyse |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | |
|---|---|
| | and record information |
| 2. Conduct simple interview | 2.1 Select interviewees with correct information about matter being investigated and select interview process to suit circumstances of interviewee<br>2.2 Prepare for interview by performing preliminary research<br>2.3 Develop interview questions to identify key points for effective interview<br>2.4 Inform interviewee how the information will be used and observe their right to privacy<br>2.5 Conduct interview using effective listening and questioning techniques, and focus interviewee on information relevant to matter being investigated<br>2.6 Record information obtained in interview |
| 3. Analyse information | 3.1 Analyse critical information by reviewing situation being investigated<br>3.2 Distinguish between factual information and assumptions, and make deductions based on factual critical information<br>3.3 Incorporate assumptions into reasoning process where it assists in forming valid inferences<br>3.4 Analyse inferences from those deductions and assumptions, and produce resolution of situation being investigated |
| 4. Implement outcomes of analysis | 4.1 Identify practical actions based on inferences arising from analysis process<br>4.2 Implement practical actions to resolve situation<br>4.3 Review outcomes of practical action by assessing their impact on situation |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| **Skill** | **Performance Criteria** | **Description** |
|---|---|---|
| Reading | 1.1, 1.2, 3.1, 3.2, 4.1 | • Recognises and evaluates text to determine key information and specific requirements and responsibilities |
| Writing | 1.2, 1.3, 2.1, 2.3, 2.5, | • Develops material for a specific audience using clear and detailed language |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| | 2.6, 3.1, 3.3, 3.4, 4.3 | • Records information in a sequential manner using clear and appropriate terminology for reference purposes |
| Oral Communication | 1.2, 2.1, 2.4, 2.5 | • Participates in a verbal exchange of ideas and elicits the view and opinions of others by listening and questioning, modifying the approach according to individual responses<br>• Presents expectations of workplace procedures, choosing language appropriate to the audience |
| Numeracy | 3.1, 3.2 | • Performs mathematical calculations to check, interpret and confirm results of analysis |
| Navigate the world of work | 1.1 | • Takes personal responsibility for adherence to legal and regulatory requirements relevant to the analysis process |
| Get the work done | All | • Takes responsibility for planning and organising the resolution process, identifying ways of sequencing and combining elements for greater efficiency, and considering how to link with the work of others<br>• Applies formal processes when planning analysis, producing plans with logically sequenced steps and reflecting some awareness of time and resource constraints and the needs of others<br>• Implements practical actions as per plan, making slight adjustments if necessary, and addressing some unexpected issues<br>• Uses a formal decision making process in analysing information, setting or clarifying goals, gathering information, and identifying and evaluating against a limited set of criteria<br>• Applies formal problem solving processes when tackling an unfamiliar problem, breaking complex issues into manageable parts and identifying and evaluating several options for action |

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Requirements for ICTWOR307 Collect and analyse technical information

## Modification History

| Release | Comments |
|---|---|
| Release 2 | This version first released with ICT Information and Communications Technology Training Package Version 3.1.<br><br>Release created to correct numbering in performance criteria. |
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of the ability to:

- apply keyboard skills and computer literacy to accurately use a database
- demonstrate appropriate listening, questioning and interviewing techniques
- develop an accurate record of interview
- integrate information from varied sources
- draw logical inferences from information gathered and make sound recommendations for action based on inferences.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe analytical techniques appropriate for information analysis, especially deductive reasoning
- explain conflict resolution approaches
- explain database and spreadsheet concepts and enterprise information systems
- explain information types and their sources
- identify sources of legislation, codes of practice and other formal agreements that directly impact on resolution processes
- describe listening, questioning and interviewing techniques

© Commonwealth of Australia, 2025 Future Skills Organisation

- identify privacy issues
- outline the influence of human factors on information analysis, including prejudice, biases and fallacies in reasoning
- describe typical issues and challenges that occur when dealing with clients.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – workplace effectiveness field of work and include access to:

- a client contact centre
- current client contact technologies
- interview and evidence recording equipment
- relevant regulatory and equipment documentation that impacts on work activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTWOR401 Undertake a civil site survey

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to assess a site for a telecommunications project, including gathering information about the site and the project, surveying the site and evaluating the suitability of the site for the work.

It applies to individuals who work as technical staff with a range of telecommunications skills, involves a degree of autonomy and may include limited supervision of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – workplace effectiveness

## Elements and Performance Criteria

| Elements | Performance Criteria |
|---|---|
| *Elements describe the essential outcomes* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Prepare for survey | 1.1 Discuss detailed requirements and arrange access to site with key stakeholders<br>1.2 Examine regulatory and statutory requirements associated with telecommunications project<br>1.3 Determine need for specialist studies for site |
| 2. Survey land, | 2.1 Survey existing buildings to assess capability of meeting changes |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | |
|---|---|
| buildings and facilities | required for project<br>2.2 Collect information through site survey<br>2.3 Determine environmental impact of development<br>2.4 Estimate impact of prevailing weather conditions on planned changes<br>2.5 Assess and document building options should new structure be necessary<br>2.6 Assess geographical nature of land and determine barriers to signalling |
| 3. Report findings and recommendations | 3.1 Outline survey findings and recommendations to accommodate project requirements on site<br>3.2 Develop options to meet planned changes and associated cost-benefit data<br>3.3 Complete report and forward to relevant stakeholders following relevant procedures |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance*

| **Skill** | **Performance Criteria** | **Description** |
|---|---|---|
| Reading | 1.2, 1.3, 2.3-2.5 | • Evaluates complex texts to determine key information, and specific requirements and responsibilities |
| Writing | 1.1, 2.1, 2.2, 2.4-2.6, 3.1-3.3 | • Develops written and complex diagrammatic material for a specific audience using appropriate forms and conventions<br>• Records information in a sequential manner using clear and appropriate terminology for reference purposes |
| Oral Communication | 1.1, 3.1, 3.3 | • Conveys details that incorporate evaluation of information and specialised and cohesive language in a format and style appropriate to a specific audience |
| Numeracy | 2.1, 2.2, 2.5, 2.6, 3.2 | • Uses complex mathematical equations to calculate accurately required measurements and diagrams |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Navigate the world of work | 1.2, 3.3 | • Keeps up to date on changes to legislation or regulations relevant to own rights and responsibilities, and considers implications of these when negotiating, planning and undertaking telecommunications project work<br>• Recognises and follows explicit and implicit protocols and meets expectations associated with own role in relation to communication with stakeholders |
| Get the work done | 1.1-1.3, 2.1-2.6 | • Sequences and schedules survey activities, monitors implementation and manages relevant communication with stakeholders<br>• Uses systematic, analytical processes in planning and implementing a survey, setting goals, gathering relevant information, and identifying and evaluating options against agreed criteria<br>• Uses analytical processes to decide on a course of action, establishing criteria for deciding between options in relation to new structures and planned changes |

# Assessment Requirements for ICTWOR401 Undertake a civil site survey

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of the ability to:

- negotiate with key stakeholders, enterprise personnel, clients, community representatives, specialists and other contractors on environmental and network needs
- accurately undertake a survey of environmental conditions, land, buildings and facilities for a telecommunications project
- apply legislative requirements to the project, including relevant operational codes, work health and safety (WHS) requirements and work practices
- report survey findings, outlining options and including recommendations with supporting reasons and coverage of existing and proposed needs.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the background information required to undertake a civil site survey
- explain basic meteorology and weather conditions
- describe the features and operating requirements of construction equipment
- describe geographical barriers to signalling
- identify legislation, codes of practice and other formal agreements that impact on the work activity
- describe licensing and regulatory issues applying to a civil site survey on telecommunications sites
- outline soil testing methods and requirements
- describe
  - civil site safety practices
  - personal protective equipment for civil survey projects

© Commonwealth of Australia, 2025 Future Skills Organisation

    - WHS requirements relating to surveys and site conditions
- outline typical issues and challenges that occur on site.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – workplace effectiveness field of work and include access to:

- a site for survey
- current equipment
- relevant regulatory and enterprise documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# ICTWOR402 Schedule equipment maintenance

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Application

This unit describes the skills and knowledge required to schedule maintenance of telecommunications equipment and networks on client premises and service provider networks.

It applies to individuals with a range of telecommunications skills, involves a degree of autonomy and may include limited supervision of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Telecommunications – workplace effectiveness

## Elements and Performance Criteria

| Elements | Performance Criteria |
|---|---|
| *Elements describe the essential outcomes* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Identify preventative maintenance program for clients | 1.1 Verify details of client system and equipment type to assess level of maintenance required<br>1.2 Determine type and extent of maintenance agreed and check against existing service level agreement with client<br>1.3 Contact client and agree on suitable time to carry out maintenance program |
| 2. Plan maintenance and | 2.1 Verify details of warranties and service agreements for |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | |
|---|---|
| fault clearance activity | client equipment and advise client of charging details where warranty or agreement does not exist<br>2.2 Negotiate and agree on commitments and responsibility with client<br>2.3 Organise work priorities so that maintenance staff are available to meet scheduled commitments |
| 3. Arrange allocation of labour resources | 3.1 Evaluate expertise and competencies of staff in relation to skills required to maintain equipment noted in service level agreement<br>3.2 Allocate staff member with appropriate skills and competency to task to minimise risk of failure<br>3.3 Advise designated repair officer of responsibilities, warranties and service agreements in conducting maintenance and fault repair<br>3.4 Prepare schedule of maintenance program and confirm with client |
| 4. Organise assistance to fault staff | 4.1 Provide additional resources if required<br>4.2 Arrange delivery of additional materials and parts<br>4.3 Escalate fault to appropriate level when it cannot be rectified in specified timeframe<br>4.4 Organise product manufacturer support as appropriate |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| **Skill** | **Performance Criteria** | **Description** |
|---|---|---|
| Reading | 1.1, 1.2, 2.1, 3.1 | • Recognises and evaluates text to determine key information and specific requirements and responsibilities |
| Writing | 1.1-1.3, 2.1-2.3, 3.1-3.4, 4.2-4.4 | • Develops material for a specific audience using clear and detailed language<br>• Records information in a sequential manner using clear and appropriate terminology for reference purposes |
| Oral | 1.1-1.3, 2.1-2.3, | • Articulates requirements and strategies clearly, distinctively and creatively, based on |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Communication | 3.1-3.4, 4.2-4.4 | techniques and language appropriate to the audience and environment<br>• Participates in a verbal exchange of ideas, and elicits the views and opinions of others by listening and questioning |
| Get the work done | All | • Sequences and schedules maintenance activities, monitors implementation and manages relevant communication<br>• Determines the best course of action when organising work priorities and allocating staff to tasks, with consideration of possible implications of different courses of action<br>• Uses analytical processes to decide on a course of action in relation to organising additional resources and logistics |

# Assessment Requirements for ICTWOR402 Schedule equipment maintenance

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Performance Evidence

Evidence of the ability to:

- plan and organise a preventive maintenance schedule according to vendor specified requirements and client agreements
- negotiate fault clearance arrangements with clients, applying related work health and safety (WHS) requirements and work practices
- plan and schedule fault clearance activity, allocating an appropriately skilled repair officer to rectify faults.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe electronic databases, spreadsheets and schedulers
- describe equipment to be maintained
- outline legislation, codes of practice and other formal agreements that impact on the work activity
- describe the process for the procurement of spare parts
- explain service level agreements
- outline specific WHS requirements relating to the activity and site conditions
- describe typical issues and challenges that occur on site
- outline vendor procedures.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – workplace effectiveness field of work and include access to:

- a site where equipment maintenance may be conducted
- enterprise and site-related documentation
- regulatory, enterprise, supplier and equipment documentation that impacts on work activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# BSBCMM101 Apply basic communication skills

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to develop basic communication skills in the workplace in particular gathering, conveying and receiving information together with completing assigned written information.

It applies to individuals working under direct supervision who are developing basic skills and knowledge of workplace communication in preparation for working in a broad range of settings

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Communication – Interpersonal Communication

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1 Identify workplace communication procedures | 1.1 Identify organisational communication requirements and workplace procedures with assistance from appropriate people<br>1.2 Identify appropriate lines of communication with supervisors and colleagues<br>1.3 Seek advice on the communication method/equipment most appropriate for the task |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| 2 Communicate in the workplace | 2.1 Use effective questioning, and active listening and speaking skills to gather and convey information<br>2.2 Use appropriate non-verbal behaviour at all times<br>2.3 Encourage, acknowledge and act upon constructive feedback |
| 3 Draft written information | 3.1 Identify relevant procedures and formats for written information<br>3.2 Draft and present assigned written information for approval, ensuring it is written clearly, concisely and within designated timeframes<br>3.3 Ensure written information meets required standards of style, format and detail<br>3.4 Seek assistance and/or feedback to aid communication skills development |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.2, 3.1 | • Reviews textual information to identify communication requirements and organisational procedures |
| Writing | 3.2, 3.3 | • Drafts simple texts using appropriate grammar, spelling and punctuation in accordance with organisational standards<br>• Proofreads own texts for accuracy and compliance with organisational requirements |
| Oral Communication | 1.1, 1.2, 1.3, 2.1, 2.2, 2.3, 3.2, 3.4 | • Asks questions and listens to gain information or confirm understanding<br>• Listens and follows instructions |
| Navigate the world of work | 1.1, 1.2, 3.1, 3.3, 3.4 | • Follows organisational policies and procedures and practices relevant to own role<br>• Develops skills required to carry out own role by seeking and acting on feedback |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Interact with others | 1.1, 1.2, 1.3, 2.1, 2.2, 2.3, 3.4 | • Follows instructions regarding what and how to communicate<br>• Seeks to cooperate with others to achieve results in immediate work context |
| Get the work done | 1.3, 2.3, 3.1, 3.2, 3.3 | • Follows clearly defined instructions, seeking assistance when necessary<br>• Uses digital technologies following instructions to enter and retrieve data |

# Assessment Requirements for BSBCMM101 Apply basic communication skills

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- gather information about procedures, methods and equipment requirements for workplace communication, with the assistance of others
- use appropriate verbal and non-verbal skills to seek and convey information in face-to-face situations
- draft routine written documents within designated timeframes and check that the documents meet organisational requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline organisational policies, plans and procedures related to the organisation’s standards or protocols for workplace communication
- describe different communication styles.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals using interpersonal communication skills in the workplace and include access to:

- office equipment
- business resources
- workplace policies and procedures relating to communication
- case studies and, where possible, real situations
- interaction with others.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessors must satisfy NVR/AQTF assessor requirements.

# BSBCRT401 Articulate, present and debate ideas

## Modification History

| Release | Comments |
|---|---|
| Release 2 | This version released with BSB Business Services Training Package Version 2.0<br><br>Version created to clarify assessment conditions |
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0 |

## Application

This unit describes the skills and knowledge required to articulate, present and debate ideas in a work or broader life context using creative techniques in order to provoke response, reaction and critical discussion.

This unit applies to individuals who contribute and present ideas that may be complex in nature and may relate to new products, services, processes or creative works using a degree of risk taking and storytelling.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

## Unit Sector

Creativity and Innovation – Creative Thinking

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Analyse ideas for communication to others | 1.1 Distil key themes, messages and positions to aid in clarity of thought and presentation |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.2 Reflect on different ways of communicating ideas for different purposes and to different people<br>1.3 Identify the enabling skills and attributes of individuals who can effectively participate in discussions about ideas |
| 2. Provoke response and reaction | 2.1 Explore and use different techniques to engage, fascinate and involve others in the process of communication and exchange<br>2.2 Explore the ways that storytelling can be used to communicate ideas<br>2.3 Create innovative approaches to different communication challenges<br>2.4 Be prepared to take risks in the way ideas are presented<br>2.5 Identify specific ways to provoke and encourage response in particular individuals or groups |
| 3. Debate and discuss ideas | 3.1 Present and argue substantiated positions on ideas<br>3.2 Be open to critical analysis of own ideas and to the ideas of others<br>3.3 Identify and participate in conversations that challenge and explore different concepts and approaches and generate new ideas<br>3.4 Respond to questions about ideas with confidence and relevant information<br>3.5 Reflect on and appraise the views of others, and use to refine ideas and to embrace new ideas |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Learning | 3.5 | • Considers opinions of others to improve and enhance own learning |
| Oral Communication | 2.1, 3.1, 3.2, 3.3, 3.4 | • Articulates ideas and requirements clearly and creatively using techniques appropriate to audience and environment<br>• Participates in a verbal exchange of ideas and elicits the view and opinions of others by listening and |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| | | questioning<br>• Uses a range of persuasive responses and makes comparisons which show an understanding of topics and concepts |
| Interact with others | 2.1, 2.2, 2.3 | • Demonstrates sophisticated control over oral, visual and/or written formats, drawing on a range of communication practices to achieve goals |
| Get the work done | 1.1, 1.2, 1.3, 2.1, 2.2, 2.3, 2.4, 2.5, 3.3, 3.5 | • Recognises opportunities to develop and apply new ideas and select ideas for implementation<br>• Considers key themes and ideas to be explored and identifies ways to respond to and use diverse perspectives<br>• Uses features and functions of digital tools and technologies to store and present information |

# Assessment Requirements for BSBCRT401 Articulate, present and debate ideas

## Modification History

| Release | Comments |
|---|---|
| Release 2 | This version released with BSB Business Services Training Package Version 2.0<br><br>Version created to clarify assessment conditions |
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0 |

## Performance Evidence

Evidence of the ability to:

- present ideas and information to a unfamiliar audience and environment that provoke interest and response
- reflect on and appraise the views of others
- participate actively and confidently in critical debate and discussion of ideas while responding to new and different communication situations
- investigate and evaluate creative and different ways of expressing and communicating ideas while making an opportunity pitch.

Note: if a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain different ways in which individuals receive and respond to ideas and information, and what influences their response
- identify the enabling skills and attributes of people needed to effectively discuss ideas
- describe the nature and role of risk taking in the presentation and debate of ideas
- explain the role of storytelling in communicating ideas and key storytelling techniques
- describe common techniques to tailor comments to particular audiences.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the creativity and innovation – critical thinking field of work and include access to opportunities to present, discuss and debate ideas with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# BSBCRT501 Originate and develop concepts

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to originate and develop concepts for products, programs, processes or services to an operational level.

It applies to individuals who develop concepts for any business or community activity or process, such as marketing and advertising campaigns, staff development programs, information technology and communication systems, radio and television programs, entertainment events, films, exhibitions and digital media products. Individuals operate with a high degree of autonomy, but collaborate with others to generate ideas and refine concepts to the point where they can be implemented.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

## Unit Sector

Creativity and Innovation – Creative Thinking

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1 Evaluate and explore needs and opportunities | 1.1 Research and evaluate existing information that informs new concept development<br>1.2 Where appropriate, identify and use gaps in current range of products, programs, processes or services as the catalyst for generating new ideas or concepts |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.3 Expand the potential of new ideas through exploration of opportunities beyond the obvious<br>1.4 Identify factors that could have an impact on ideas or concepts to be developed, including potential for commercialisation<br>1.5 Determine whether other players are filling identified gaps or investigating similar opportunities<br>1.6 Develop preliminary ideas on innovative and different ways to address needs and opportunities<br>1.7 In consultation with relevant stakeholders, agree on broad parameters for developing ideas and concepts to meet market requirements |
| 2 Develop a range of creative approaches | 2.1 Use a range of creative thinking techniques to generate innovative and creative concepts to address identified needs<br>2.2 Challenge, test and experiment with different concepts and ideas as part of a collaborative process<br>2.3 Evaluate concepts in terms of their suitability for the target audience or purpose, their feasibility and their commercial potential<br>2.4 Take account of social, ethical and environmental issues as concepts and ideas are generated and discussed<br>2.5 Identify resources required to achieve desired creative and innovative outcomes<br>2.6 Evaluate the effectiveness of different strategies for achieving desired outcomes<br>2.7 Select concepts or approaches that achieve required outcomes in an innovative and feasible way<br>2.8 Present proposed concepts or approaches in an appropriate format |
| 3 Refine concepts | 3.1 Ensure concept development process is open to ongoing refinement and testing<br>3.2 Seek input and feedback on concepts from relevant stakeholders<br>3.3 Seek specialist advice on creative and technical aspects of proposals as required<br>3.4 Compare concepts with best practice examples of similar products, programs, processes or services<br>3.5 Use a range of creative and practical criteria to determine the |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | advantages and disadvantages of different concepts<br>3.6 Evaluate constraints on the realisation of concepts or ideas<br>3.7 Refine proposals based on analysis and feedback |
| 4 Develop concepts to an operational level | 4.1 Use refined concepts as the basis for developing detailed implementation specifications<br>4.2 Present specifications to relevant parties for approval, funding or endorsement<br>4.3 Reflect on methodology used to generate concepts and ideas and note ways of improving this in the future |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Learning | 3.1, 3.7, 4.3 | • Reflects and evaluates methods used to develop concepts and seeks ways to improve<br>• Actively elicits the views and opinions of others to develop and refine ideas |
| Reading | 1.1-1.5, 2.3, 2.6, 3.4, 3.5, 3.6, 3.7, 4.1 | • Interprets and evaluates a range of complex information and considers how to develop and adopt ideas to deliver products or services at an operational level |
| Writing | 1.1-1.4, 1.6, 2.4-2.6, 2.8, 3.2-3.7, 4.1, 4.2 | • Documents findings and ideas using language and structure to suit the purpose<br>• Develops documents designed to gain feedback from others<br>• Prepares proposals and plans for relevant stakeholders incorporating appropriate vocabulary and grammatical structures |
| Oral Communication | 1.7, 2.2, 2.4, 3.2, 3.3, 4.2 | • Expresses thoughtful and challenging opinions using engaging language and non-verbal features<br>• Elicits views and information from others using a range of active listening and questioning techniques |
| Interact with | 1.7, 2.2, 2.4, 2.8, | • Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| others | 3.2, 3.3, 4.2 | interaction and influencing direction<br>• Selects and uses appropriate conventions and protocols when communicating with internal and external stakeholders to seek or share information |
| Get the work done | 1.1- 1.5, 2.1-2.7 , 3.1, 3.4-3.6, 4.2, 4.3 | • Plans and implements complex activities with multiple considerations, monitors implementation, and manages relevant feedback<br>• Uses systematic, analytical processes in complex, non-routine situations to gather required information, identify and evaluate possible concepts, and select the most appropriate concept for development<br>• Develops new and innovative ideas through exploration, analysis and critical thinking<br>• Monitors outcomes, considering results from a range of perspectives and identifying key concepts and principles that may be adaptable to future situations |

# Assessment Requirements for BSBCRT501 Originate and develop concepts

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- generate concepts and ideas that provide innovative solutions to identified issues
- evaluate and test concepts and ideas
- present ideas and information to others and reflect on responses
- develop at least two concepts, substantiated and supported with sufficient information to allow implementation to occur.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must :

- describe the broad context in which concepts are being developed
- outline cultural, social and environmental issues and impacts to be considered in developing new concepts
- identify issues and requirements to commercialise the concept
- outline practical and operational issues to be considered in a specific work or community context
- describe the range of broad practical and operational issues that determine whether a concept can be implemented
- identify techniques for generating creative ideas and solutions, and for translating these ideas into workable concepts.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the creativity and innovation – critical thinking field of work and include access to:

- a full range of background information required to evaluate the operational factors that will affect the implementation of concepts
- opportunities to collaborate with others throughout the concept development process.

Assessors must satisfy NVR/AQTF assessor requirements.

# BSBCUS201 Deliver a service to customers

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to deliver all aspects of customer service at an introductory level. It includes creating a relationship with customers, identifying their needs, delivering services or products and processing customer feedback.

It applies to individuals who perform a range of routine tasks in the workplace using a limited range of practical skills and fundamental knowledge of customer service in a defined context under direct supervision or with limited individual responsibility.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Stakeholder Relations – Customer Service

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1 Establish contact with customers | 1.1 Acknowledge and greet customer in a professional, courteous and concise manner according to organisational and legislative requirements<br>1.2 Maintain personal dress and presentation in line with organisational requirements<br>1.3 Communicate using appropriate interpersonal skills to facilitate accurate and relevant exchange of information |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.4 Maintain sensitivity to customer specific needs and any cultural, family and individual differences<br>1.5 Establish rapport/relationship with customer and express a genuine interest in customer needs/requirements |
| 2 Identify customer needs | 2.1 Use appropriate questioning and active listening to determine customer needs<br>2.2 Assess customer needs for urgency to identify priorities for service delivery<br>2.3 Provide customer with information about available options for meeting customer needs and assist customer to identify preferred option/s<br>2.4 Identify personal limitations in addressing customer needs and seek assistance from designated persons where required |
| 3 Deliver service to customers | 3.1 Provide prompt customer service to meet identified needs according to organisational requirements<br>3.2 Provide information regarding problems and delays, and follow-up within appropriate timeframes as necessary<br>3.3 Communicate with customers in a clear, concise and courteous manner<br>3.4 Identify opportunities to enhance the quality of service and products, and take action to improve the service whenever possible |
| 4 Process customer feedback | 4.1 Promptly recognise customer feedback and handle sensitively according to organisational and legislative requirements<br>4.2 Accurately record any feedback and communication between customers and the organisation according to organisational standards, policies and procedures and legislative requirements<br>4.3 Identify any unmet customer needs and discuss suitability of other products/services<br>4.4 Support customers to make contact with other services according to organisational policies and procedures |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

© Commonwealth of Australia, 2025 Future Skills Organisation

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.2, 3.1, 4.1, 4.2, 4.4 | • Understands requirements in organisational policy and procedure documents<br>• Interprets product and service information in a range of formats to provide customer advice |
| Writing | 4.2 | • Records customer information according to organisational requirements |
| Oral Communication | 1.1, 1.3, 1.4, 1.5, 2.1-2.4, 3.2, 3.3, 4.3 | • Provides information or advice using structure and language to suit the audience<br>• Asks questions and listens to gain information or confirm understanding |
| Navigate the world of work | 1.1, 1.2, 3.1, 4.1, 4.2, 4.4 | • Follows organisational procedures and practices relevant to own role |
| Interact with others | 1.1, 1.3-1.5, 2.1-2.4, 3.1, 3.2, 3.3, 4.1, 4.3, 4.4 | • Uses accepted communication practices to establish connections, build rapport and develop professional working relationships<br>• Adjusts personal communication style in response to the opinions, values and particular needs of others |
| Get the work done | 3.2, 3.4, 4.1- 4.3 | • Addresses routine problems in familiar work contexts<br>• Recognises opportunities to enhance work practices and outcomes |

# Assessment Requirements for BSBCUS201 Deliver a service to customers

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- greet customer and establish rapport/relationship in accordance with organisational requirements
- identify customer needs using appropriate interpersonal skills
- provide prompt service to address customer needs in accordance with organisational requirements
- identify and follow up opportunities to increase the quality of service and products
- respond to and record all customer feedback according to organisational standards, policies and procedures.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and briefly describe key provisions of relevant legislation from all forms of government that apply to provision of customer services
- identify and explain workplace organisational policies and procedures relating to customer service and the customer service process.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the customer service field of work and include access to:

- office equipment and technology
- workplace documents, organisational policies and procedures for customer service

© Commonwealth of Australia, 2025 Future Skills Organisation

- examples of customer complaints and feedback
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

# BSBCUS402 Address customer needs

## Modification History

| Release | Comments |
|---|---|
| Release 2 | This version released with BSB Business Services Training Package Version 2.0<br><br>Version created to clarify assessment conditions |
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to manage an ongoing relationship with a customer over a period of time. This includes helping customers articulate their needs and managing networks to ensure customer needs are addressed.

It applies to individuals who are expected to have detailed product knowledge in order to recommend customised solutions. In this role, individuals would be expected to apply organisational procedures and be aware of, and apply as appropriate, broader factors involving ethics, industry practice and relevant government policies and regulations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Stakeholder Relations – Customer Service

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1 Assist customer to articulate needs | 1.1 Ensure customer needs are fully explored, understood and agreed<br>1.2 Explain and match available services and products to customer |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | needs<br>1.3 Identify and communicate rights and responsibilities of customers to the customer as appropriate |
| 2 Satisfy complex customer needs | 2.1 Explain possibilities for meeting customer needs<br>2.2 Assist customers to evaluate service and/or product options to satisfy their needs<br>2.3 Determine and prioritise preferred actions<br>2.4 Identify potential areas of difficulty in customer service delivery and take appropriate actions in a positive manner |
| 3 Manage networks to ensure customer needs are addressed | 3.1 Establish effective regular communication with customers<br>3.2 Establish, maintain and expand relevant networks to ensure appropriate referral of customers to products and services from within and outside the organisation<br>3.3 Ensure procedures are in place to ensure that decisions about targeting of customer services are based on up-to-date information about the customer and the products and services available<br>3.4 Ensure procedures are put in place to ensure that referrals are based on the matching of the assessment of customer needs and availability of products and services<br>3.5 Maintain records of customer interaction in accordance with organisational procedures |

# Assessment Requirements for BSBCUS402 Address customer needs

## Modification History

| Release | Comments |
|---|---|
| Release 2 | This version released with BSB Business Services Training Package Version 2.0<br><br>Version created to clarify assessment conditions |
| Release 1 | This version first released with Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- communicate effectively with customers including
  - helping customers to articulate their needs and evaluate options
  - explaining products/services and how they match customer needs
  - establishing regular communication
  - explaining customer rights and responsibilities
- address customer's needs
- use organisational procedures to document customer satisfaction
- develop and maintain networks to support meeting customer needs
- identify potential difficulties in meeting customer needs and taking appropriate action.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain organisational procedures and standards for establishing and maintaining customer service relationships

© Commonwealth of Australia, 2025 Future Skills Organisation

- describe informed consent
- explain consumer rights and responsibilities
- describe ways to establish effective regular communication with customers
- outline details of products or services including with reference to:
  - possible alternative products and services
  - variations within a limited product and service range.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the customer service field of work and include access to:

- office equipment and resources
- business technology
- organisational policies, procedures, quality systems, manuals and guidelines for customer management
- examples of products/services and promotional strategies
- case studies and, where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# BSBDES401 Generate design solutions

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to generate design solutions in response to a particular design need.

It applies to individuals who generate concepts and solutions in response to a design challenge in any industry context. The starting point may be an open or closed brief; a spontaneous idea; modification of an existing product, service, process or system; or a point in an ongoing design process.

This unit builds on BSBDES201 Follow a design process, and places greater focus on research, concept generation and collaboration with others as key aspects of the design process.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Design – Design Process

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1 Define the design challenge | 1.1 Determine and evaluate user/client needs<br>1.2 Clarify specifications, parameters and constraints of the |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | design challenge in consultation with relevant stakeholders<br>1.3 Articulate essence of the design challenge in an appropriate format |
| 2 Undertake research to inform the design solution | 2.1 Source, evaluate and acknowledge information that may assist in responding to the design challenge<br>2.2 Consider historical, current and future perspectives and trends that might inform design solutions<br>2.3 Consider relevant social, economic, environmental, ethical and cultural issues that may impact design solutions<br>2.4 Analyse, distil and collate information to inform the development of the design solution |
| 3 Communicate and collaborate with others | 3.1 Establish and develop working relationships with key stakeholders<br>3.2 Seek and integrate input and ideas from others during design process<br>3.3 Inform key stakeholders about progress of the design and related implications<br>3.4 Negotiate and agree on any changed requirements or modifications |
| 4 Generate ideas and responses to the design challenge | 4.1 Reflect on and integrate ideas generated from research and consultation<br>4.2 Use a range of creative thinking techniques to generate different options and ideas<br>4.3 Apply relevant principles of functionality, ergonomics, aesthetics and sustainability to development of different options |
| 5 Select a design solution | 5.1 Develop and use a range of criteria to evaluate different options and ideas<br>5.2 Select a preferred solution based on agreed criteria and in consultation with relevant key stakeholders<br>5.3 Adjust and refine proposed design solution based on research, testing and reflection<br>5.4 Present proposed design solution with appropriate supporting documentation according to project requirements |

© Commonwealth of Australia, 2025 Future Skills Organisation

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.2, 2.1, 2.4 | • Researches, collates and analyses textual information from a wide range of sources |
| Writing | 1.2, 1.3, 2.1, 2.4, 5.1, 5.3, 5.4 | • Documents ideas, sources and concepts using appropriate formats and specific language<br>• Refines and edits work |
| Oral Communication | 1.2, 1.3, 3.2-3.4, 5.2, 5.4 | • Actively participates in verbal exchanges of ideas and elicits views and opinions of others by listening and questioning<br>• Clarifies, explains or presents information relating to design solution using clear and specific language appropriate to audience |
| Numeracy | 1.3, 4.3, 5.1, 5.4 | • Interprets numeric data and applies mathematical calculations relevant to design solution |
| Navigate the world of work | 2.3 | • Understands nature and purpose of own role and associated responsibilities and how it contributes to the work of others in immediate work context |
| Interact with others | 1.3, 3.1, 5.4 | • Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role<br>• Cooperates with others as part of familiar routine activities and contributes to specific activities requiring joint responsibility and accountability |
| Get the work done | 1.1, 2.1, 2.2, 2.4, 4.1-4.3, 5.1-5.3 | • Takes responsibility for planning and implementing tasks required to achieve outcomes, including those times when interaction with others is<br>• Systematically analyses and evaluates information to aid in decision making and problem solving<br>• Applies some basic principles of lateral thinking to generate new or innovative ideas |

# Assessment Requirements for BSBDES401 Generate design solutions

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- develop and document a design solution through research, reflection, and generation and refinement of ideas
- demonstrate effective collaboration with others in the design process.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the elements and principles of design and their application in the relevant design context
- describe key features of the wider industry, and the economic, social and historical context design solutions are being generated in
- discuss design trends and technologies including other designs and the work of other design practitioners in the relevant industry context
- identify sources of information that support the development of technical and other knowledge
- describe the materials, tools, equipment, techniques and processes used in the generation of design solutions in the relevant industry context.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the design process field of work and include access to:

- interaction with others to reflect the collaborative nature of the design process

© Commonwealth of Australia, 2025 Future Skills Organisation

- sources of information on design for the relevant industry context.

Assessors must satisfy NVR/AQTF assessor requirements.

# BSBDES402 Interpret and respond to a design brief

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to interpret and creatively respond to a design brief through the production of work.

It applies to individuals working in any industry or design context where work is prescribed by a commissioning agent/client in a brief. Individuals are required to integrate the creative, communication and planning processes that support effective response to a design brief.

Work is carried out independently, although guidance is available if required.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Design – Design Process

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1 Interpret design brief | 1.1 Correctly interpret the specifications of design brief<br>1.2 Establish and clarify user or client for the proposed product/service to inform design decisions<br>1.3 Identify and clarify specifications, parameters or constraints of design brief in consultation with relevant colleagues |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.4 Source and evaluate information pertinent to design brief |
| 2 Explore and develop design concept | 2.1 Generate ideas for design concept through research, exploration and experimentation<br>2.2 Develop initial design concept consistent with design brief parameters<br>2.3 Evaluate and explore options for refining concept to best meet design brief parameters<br>2.4 Refine options and select approach which best meets design brief requirements |
| 3 Liaise with client | 3.1 Agree on communication process and frequency of communication with client<br>3.2 Present concepts for work at appropriate stages during design process as required<br>3.3 Present and explore different options and creative ideas with client when appropriate<br>3.4 Proactively seek and act on client feedback<br>3.5 Reach agreement on concept for work which complies with design brief |
| 4 Plan production of work | 4.1 Assess specific design production risks<br>4.2 Identify all components required to produce a prototype<br>4.3 Assess technical requirements for production against specified guidelines<br>4.4 Identify and consult with support services required for production<br>4.5 Produce a prototype and evaluate against design brief requirements<br>4.6 Analyse prototype and determine any further adjustments to production requirements<br>4.7 Finalise production specifications supported by accurate and complete documentation |
| 5 Complete production of work | 5.1 Collect and/or organise required components for the work<br>5.2 Produce or monitor the production of work ensuring all parameters of design brief are met<br>5.3 Accurately document work progress in a format appropriate to the nature of the design and requirements of design brief |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 5.4 Seek client approval for work where appropriate |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.3, 1.4, 2.1, 4.3, 4.5 | • Analyses textual information to accurately interpret job specifications |
| Writing | 1.3, 3.2-3.5, 4.4, 4.5, 4.7, 5.3, 5.4 | • Uses specific industry-related terminology and appropriate formats to develop, document and amend workplace documentation |
| Oral Communication | 1.3, 3.1-3.5, 4.4, 5.4 | • Actively participates in verbal exchanges of ideas and elicits the views and opinions of others by listening and questioning<br>• Uses clear language to clarify, explain and present information |
| Numeracy | 1.1, 1.3, 4.5, 5.3 | • Interprets numeric data and applies mathematical calculations to produce prototype according to design specification |
| Interact with others | 1.3, 3.1-3.5, 4.4, 5.4 | • Actively identifies the requirements of important communication exchanges, selecting appropriate channels, format, tone and content to suit purpose and audience<br>• Collaborates and negotiates with others to achieve joint outcomes |
| Get the work done | 1.1, 1.2, 2.1-2.4, 3.2, 4.1-4.3, 4.6, 4.7, 5.1, 5.2 | • Takes responsibility for planning and implementing tasks required to achieve outcomes, including those times when interaction with others is<br>• Systematically analyses and evaluates information to aid in decision making and problem solving<br>• Applies some basic principles of lateral thinking to generate new or innovative ideas<br>• Understands and explicitly applies some basic principles of lateral thinking to generate new or innovative ideas |

# Assessment Requirements for BSBDES402 Interpret and respond to a design brief

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- articulate and document the process of developing own design practice by learning to develop new skills, ideas and a unique voice
- adjust work processes via peer feedback and self-evaluation
- identify work options and incorporate networking in career development.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list current and emerging designers in the relevant design discipline
- discuss current and emerging trends and technologies in the relevant design discipline, and the opportunities and challenges they represent
- identify professional development information and resources available to designers
- summarise sources of information relating to work opportunities and career planning.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the design process field of work and include access to materials, resources and equipment used in the development of technical and conceptual skills in the relevant design context.

Assessors must satisfy NVR/AQTF assessor requirements.

# BSBDES403 Develop and extend design skills and practice

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to develop and extend skills as a practising designer.

It applies to individuals who work as a designer, in any industry context, either independently or employed by an organisation.

Designers must continually refine, develop and evaluate their own conceptual and technical skills. Research, experimentation and collaboration are key factors in this process.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Design – Design Process

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1 Acquire and develop technical skills | 1.1 Plan strategies to ensure the development of appropriate technical skills in design practice<br>1.2 Plan and use opportunities to develop and assess technical skills<br>1.3 Identify and use practice, feedback, discussion and evaluation |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | opportunities to continuously improve technical skills<br>1.4 Develop and extend technical skills through testing capabilities of materials, tools and equipment<br>1.5 Identify and use relevant media to stimulate technical and professional development |
| 2 Develop conceptual skills and ideas | 2.1 Engage in ongoing experimentation and exploration of different ideas and techniques<br>2.2 Discuss ideas with others and apply knowledge gained to inform own work<br>2.3 Use work practice to gain experience in a range of genres and interpretations<br>2.4 Study the work of others to stimulate conceptual and technical skills development<br>2.5 Research and share ideas across a range of design disciplines<br>2.6 Identify and use a range of opportunities to develop own skills and keep informed about current design practice |
| 3 Develop own voice | 3.1 Explore and experiment with new ideas in making and/or interpreting design work<br>3.2 Explore and use technology, where appropriate, to develop own voice and expand practice<br>3.3 Demonstrate own voice through design project realisation implementation |
| 4 Evaluate own work | 4.1 Seek and apply constructive criticism from others to improve own work<br>4.2 Evaluate own work against planned strategy for own practice<br>4.3 Evaluate own work in the context of work by others to extend own practice<br>4.4 Adjust work processes and practice as necessary to improve technical, conceptual and commercial outcomes |
| 5 Research work opportunities | 5.1 Correctly identify sources of information relating to work opportunities for designers<br>5.2 Identify networks and promotional opportunities for designers which may be helpful in developing career opportunities<br>5.3 Incorporate research results and information into own work and career planning |

© Commonwealth of Australia, 2025 Future Skills Organisation

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Learning | 1.1-1.5, 2.2, 2.4, 2.6, 3.2, 4.1-4.3 | • Uses practical strategies to identify and implement improvements in own creative skills and technical design skills and practice |
| Reading | 1.5, 2.4, 2.5, 5.1-5.3 | • Researches and evaluates a variety of textual information from a wide range of sources |
| Writing | 2.5, 4.1, 5.3 | • Uses clear and specific language to document ideas, feedback and research results |
| Oral Communication | 1.3, 2.2, 2.5, 4.1 | • Participates in a range of verbal exchanges and presentations using appropriate tone and vocabulary to suit the audience<br>• Uses active listening and questioning techniques to clarify and confirm understanding |
| Navigate the world of work | 1.2, 1.3, 2.3, 4.1, 5.2 | • Recognises the importance of developing technical skills and of learning from feedback and self-reflection<br>• Begins to broaden areas of interest and focus, seeking new challenges and recognising that expertise can be adapted and applied in diverse contexts |
| Interact with others | 2.5, 4.1, 5.2 | • Begins to cultivate relationships with people with the knowledge, skills and influence to provide collaborative support |
| Get the work done | 1.1, 1.2, 1.4, 1.5, 2.1, 2.3, 2.6, 3.1-3.3, 4.2, 4.4, 5.1 | • Takes responsibility for planning and implementing tasks required to achieve outcomes, including those times when interaction with others is<br>• Systematically analyses and evaluates information to aid in decision making and problem solving<br>• Applies some basic principles of lateral thinking to generate new or innovative ideas<br>• Recognises the potential of new approaches to enhance work practices and outcomes<br>• Evaluates effectiveness of decisions on how well they meet stated goals<br>• Understands key principles and concepts underpinning the design and operation of digital systems and applies these when seeking to understand the potential of new technology |

# BSBDES501 Implement design solutions

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to take a design concept or solution to the implementation stage. The outcome of work could be a completed product, object, system or service, but is more likely to be a complete or partial prototype or model for the design. The focus of the unit is on a general knowledge of design techniques and processes, and practical application to a specific design context.

It applies to individuals who implement concepts and solutions in response to a design challenge in any industry context.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Design – Design Process

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1 Organise resources for realising the design solution | 1.1 Confirm the nature and scope of the proposed design solution<br>1.2 Research resources required for developing the design concept to implementation stage<br>1.3 Investigate different factors impacting the selection and use of resources<br>1.4 Select and prepare resources based on research and other |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | legislative or organisational requirements |
| 2 Test the design solution | 2.1 Experiment with a range of different techniques and processes to test the design solution<br>2.2 Evaluate, challenge and refine testing processes<br>2.3 Gain input and feedback from key stakeholders during testing<br>2.4 Accurately document outcomes of testing<br>2.5 Select final design solution based on outcomes of testing and input from others |
| 3 Develop prototype or model | 3.1 Create prototype or model based on agreed approaches<br>3.2 Select and organise materials, tools and equipment, where appropriate, according to chosen design solution<br>3.3 Expose model or prototype to quality checks and ongoing analysis, enhancement and refinement<br>3.4 Compare completed prototype or model against identified needs and other considerations and make adjustments as required |
| 4 Present prototype or model | 4.1 Identify key stakeholders design should be presented to<br>4.2 Select appropriate format for presentation based on nature of audience and design<br>4.3 Present prototype or model to optimise clarity, conciseness and appeal |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1-1.4, 3.4 | • Researches and accurately interprets textual information from a wide range of sources |
| Writing | 1.2, 1.3, 2.3, 2.4, 3.4, 4.3 | • Documents research, resource requirements and testing outcomes using appropriate language and formats |
| Oral Communication | 1.1, 2.3, 4.3 | • Participates in a range of verbal exchanges and presentations using appropriate tone and vocabulary to suit audience |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| | | • Uses active listening and questioning techniques to gain input and feedback |
| Numeracy | 1.1-1.3, 2.4, 2.5 | • Interprets and applies numeric information relevant to design solution<br>• Compares numerical data gathered from testing |
| Navigate the world of work | 1.4 | • Understands and adheres to organisational policies, procedures and legislative requirements during planning and implementation of design solution |
| Interact with others | 4.3 | • Recognises importance of taking audience, purpose and contextual factors into account when making decisions about what to communicate, with whom, why and how |
| Get the work done | 1.1-1.4, 2.1, 2.2, 2.5, 3.1-3.4, 4.1, 4.2 | • Sequences and schedules routine and complex activities, monitors implementation, and manages relevant communication<br>• Applies formal problem-solving processes when responding to unpredictable issues and challenges that arise during the testing process<br>• Makes a range of critical and non-critical decisions in relatively complex situations, taking client requirements and range of constraints into account<br>• Creates new or innovative ideas through exploration, analysis and critical thinking |

# Assessment Requirements for BSBDES501 Implement design solutions

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- undertake critical analysis, testing and development of a model, prototype or aspect of a design solution to meet an identified need
- present model to key stakeholders using the most appropriate best practice methods.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the elements and principles of design and their application in relevant design context
- describe key features of the wider industry, with the economic, social and historical context for the design solution
- discuss design trends and technologies including other designs and the work of other design practitioners in the relevant context
- summarise sources of information that support the development of technical and other knowledge
- describe the technical expertise, resources, materials, tools, equipment, techniques and industry processes required for the area the design solutions are being implemented in.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the design process field of work and include access to:

- other people to reflect the collaborative nature of the design process

© Commonwealth of Australia, 2025 Future Skills Organisation

- resources required to test a design solution in a given industry context including materials, tools, equipment and expertise.

Assessors must satisfy NVR/AQTF assessor requirements.

# BSBDES502 Establish, negotiate and refine a design brief

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to work proactively with a client or commissioning organisation to develop and negotiate a design brief.

It applies to individuals working in any industry or design context where the designer plays a key role in determining the scope and nature of work required. Establishment, negotiation and refinement of a design brief requires the integration of highly-developed creative thinking, communication and planning skills in a process that may not be linear. Adaptability and effective responses to change and new ideas are crucial.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Design – Design Process

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1 Establish design requirements | 1.1 Identify and make appropriate contact with relevant stakeholders for the design project, in addition to the client<br>1.2 Identify and source information and references relevant to the design project<br>1.3 Undertake critical analysis of sources and extract key information to inform the design project |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.4 Liaise with client and other key stakeholders to determine overall objectives and parameters for the design project<br>1.5 Proactively seek, review and act on information needed to inform constructive communication with client<br>1.6 Build trust and respect between self and client through effective communication and demonstration of professional integrity |
| 2 Develop and refine design brief | 2.1 Develop concepts and ideas for inclusion in design brief, taking account of overall objectives and parameters<br>2.2 Undertake own analysis of concept and challenge ideas and approaches taken to ensure responsiveness to project needs<br>2.3 Present ideas in an appropriate format/medium and seek feedback from key stakeholders<br>2.4 Use effective communication techniques to generate discussion, debate and critical analysis<br>2.5 Re-evaluate and refine options based on own analysis and discourse with others<br>2.6 Establish and agree on final nature and scope of design brief with client and accurately document details |
| 3 Negotiate terms and conditions | 3.1 Negotiate and agree terms and conditions of brief in accordance with relevant organisational and professional standards<br>3.2 Clarify, agree and document roles and responsibilities of those involved in the project<br>3.3 Confirm agreements in writing in accordance with organisational requirements<br>3.4 Identify the need for specialist advice when developing formal agreements or contracts, and seek appropriate assistance |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.2, 1.3, 2.2, 2.5 | • Identifies and interprets textual information from |

# Assessment Requirements for BSBDES502 Establish, negotiate and refine a design brief

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- develop and finalise at least TWO design briefs for a specific industry purpose
- demonstrate highly-developed interpersonal skills, self-evaluation techniques and the ability to seek expert advice when required.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss the legal issues that affect negotiations and contracts in the relevant work context
- explain the design process within the specific industry context/design discipline
- compare and contrast the scope, nature and potential variations that occur within design briefs relevant to a specific context
- identify sources of information to assist the development of design concepts within a specific industry context.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the design process field of work and include access to:

- appropriate equipment and media to communicate and present ideas and concepts
- sources of information relevant to industry context
- interaction with others to reflect the collaborative nature of the work, and communication and negotiation skills required.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessors must satisfy NVR/AQTF assessor requirements.

# BSBDES601 Manage design realisation

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to manage the process of taking a design from concept to final realisation or production. It has a strong focus on planning, implementation and monitoring skills, combined with a sound knowledge of design and production issues and challenges in a given context.

It applies to individuals working in any industry context or design discipline who take responsibility for turning design concept into reality – a product or service of value to the end-user. This person could be an individual designer-maker or a designer working as part of a larger design/production team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Design – Design Process

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1 Plan realisation of design | 1.1 Collect, analyse and maintain relevant information on the design<br>1.2 Discuss and agree on standards of work and monitoring requirements with appropriate stakeholders<br>1.3 Develop clear plan and schedule for design realisation, |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | including key roles and responsibilities linked to timelines and budget |
| 2 Implement and monitor realisation of design | 2.1 Organise and/or allocate resources to achieve realisation of design within required standards, timeframes and budget<br>2.2 Liaise with others involved in design realisation to ensure obligations and quality standards are met within time, budget and technical resources<br>2.3 Maintain accurate, relevant and complete documentation in accordance with agreed standards<br>2.4 Monitor process to ensure integrity of design is maintained at all times, including through the process of challenging and interrogating own design work<br>2.5 Promptly identify difficulties or problems that arise in relation to realisation of design and take action to rectify situation |
| 3 Liaise and negotiate with stakeholders | 3.1 Establish and maintain appropriate communication channels with relevant stakeholders<br>3.2 Proactively seek and provide information to facilitate effective design realisation<br>3.3 Adhere to agreed terms and conditions or negotiate appropriate changes in light of changed circumstances<br>3.4 Negotiate and agree on revisions with relevant parties in a professional manner, to enhance quality of outcome |
| 4 Complete design process | 4.1 Finalise design outcomes in accordance with terms and conditions<br>4.2 Seek feedback from key stakeholders on finished design and make final adjustments as agreed<br>4.3 Evaluate completed design in relation to own work and overall process, to inform future practice |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Reading | 1.1, 2.3 | • Collates and analyses textual information from a range of sources relevant to the design realisation |
| Writing | 2.3, 3.1, 3.2, 4.3 | • Produces documentation using appropriate structure, language and context to articulate own ideas and positions |
| Oral Communication | 1.2, 3.2-3.4, 4.2 | • Articulates clearly using specific language and appropriate tone to convey information<br>• Uses active questioning and listening techniques to confirm understanding |
| Numeracy | 1.3, 2.1 | • Interprets and uses numeric information in budgets and to determine work schedules |
| Navigate the world of work | 2.3, 3.3, 4.1 | • Works independently and collectively within broad parameters, with a strong sense of responsibility and ownership of plans, decisions and outcomes<br>• Adheres to organisational policies and procedures |
| Interact with others | 1.2, 2.2, 3.1, 3.2, 3.4 | • Recognises the importance of taking audience, purpose and contextual factors into account when making decisions about what to communicate, with whom, why and how<br>• Fosters a collaborative culture within own sphere of influence, facilitating a sense of cohesion and commitment |
| Get the work done | 1.1, 1.3, 2.1, 2.4, 2.5 | • Takes responsibility for planning and organising tasks to meet workplace deadlines, including those tasks that require liaison with other people<br>• Applies formal problem-solving processes when responding to unpredictable issues and challenges that arise during the design process<br>• Uses each experience to reflect on how variables impact outcomes to inform future practices |

# Assessment Requirements for BSBDES601 Manage design realisation

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- produce a design according to all brief requirements
- demonstrate highly-developed interpersonal and negotiation skills to deliver the finished product.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline key responsibilities of relevant personnel in this context
- describe best practices when dealing with setbacks in the production process
- explain production processes in a particular industry context or discipline including required materials, tools and equipment.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the design process field of work and include access to:

- resources, tools, materials and equipment required for realising a design in a specific context
- a design concept that the candidate can take to realisation stage
- other people to reflect the collaborative nature of the work.

Assessors must satisfy NVR/AQTF assessor requirements.

# BSBDES602 Research global design trends

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to research and critically evaluate global design trends. The focus is on research and analysis of information and ideas at a complex level, plus the evaluation and extension of the individual's professional skills.

It applies to individuals who need to maintain a current and comprehensive knowledge of global design trends to inform their own professional practice. Although predominantly for designers, this unit may also be relevant to those who work in related management, marketing and production areas.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Design – Design Process

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1 Research design trends | 1.1 Analyse and select formal and informal research strategies to source information on global design trends<br>1.2 Identify and explore new and alternative sources<br>1.3 Evaluate the credibility of information gathered and ensure research scope is sufficiently broad |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| 2 Analyse design trends to inform own practice | 2.1 Use information to challenge and extend own perspectives and ways of thinking<br>2.2 Examine and assess implications and consequences of design trends on own work<br>2.3 Use critical analysis to identify creative or commercial opportunities presented by emerging trends and technologies<br>2.4 Develop systems to identify and respond to future opportunities |
| 3 Develop and articulate positions and ideas | 3.1 Develop substantiated positions and ideas on global design trends<br>3.2 Generate informed discussion, debate and critical analysis with peers and colleagues<br>3.3 Use debate and feedback to challenge and refine own positions |
| 4 Extend own design skills | 4.1 Proactively identify and use opportunities presented by research to extend own design skills<br>4.2 Re-evaluate and refine approaches to work in the context of current and emerging trends<br>4.3 Use practice, discussion and ongoing evaluation to continuously improve skills |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Learning | 4.1-4.3 | • Plans and implements strategies to improve and extend own knowledge and skills |
| Reading | 1.1-1.3, 2.1, 2.2 | • Analyses and synthesises complex and varied information from a range of sources |
| Writing | 2.4 | • Documents methods for identifying future opportunities using vocabulary and structure appropriate to context and purpose |
| Oral Communication | 3.2, 3.3, 4.3 | • Elicits the views others by participating in critical discourse and debate on conceptual and technical |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| | | design trends<br>• Uses active listening techniques to gain input and feedback |
| Navigate the world of work | 2.3 | • Keeps abreast of trends and issues, appreciating the world of work is dynamic, with changing needs and priorities, and that career development is not a linear process that can be closely controlled |
| Get the work done | 1.1-1.3, 2.1-2.4, 3.1, 3.3, 4.2 | • Takes responsibility for planning and organising tasks required to conduct required research, including how to link with the work of others<br>• Keeps abreast of innovations and good practice beyond own context, borrowing, adapting, combining and redesigning for own purposes<br>• Uses reflection and feedback from others to evaluate outcomes to inform future practices<br>• Actively identifies digital systems, devices and applications with potential to meet current and/or future needs |

# Assessment Requirements for BSBDES602 Research global design trends

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- conduct research on a complex range of design issues, trends and ideas
- document the analysis, critique and synthesis of complex sources to develop own positions and ideas
- use opportunities to refine own design skills.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe broad global design trends that apply to all design disciplines
- discuss the business implications/consequences of adopting trends and emergent technologies
- compare and contrast different research methodologies and options
- outline sources of information on global design, design trends and broader references that may inform emerging and innovative design practice
- critique specific current and emerging design technologies and trends (at a global level) in at least one area of design.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the design process field of work and include access to a current and varied range of familiar and unfamiliar information sources.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessors must satisfy NVR/AQTF assessor requirements.

# BSBEBU401 Review and maintain a website

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to undertake data analysis, review website content, and update and maintain a website.

It applies to individuals who have knowledge of the relationship between a website and the core functions of an organisation. They also have working knowledge and skills to perform basic updates to website content. They may provide administrative support within an organisation or be other individuals who have been delegated this responsibility.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

## Unit Sector

Information and Communications Technology – E-Business

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1 Review website content and use | 1.1 Monitor and analyse customer and user feedback in accordance with organisational timelines<br>1.2 Analyse automatically collected website data and identify trends<br>1.3 Make recommendations on changes to website and its content in response to feedback and data analysis, and approve changes scheduled for implementation |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.4 Review cost implications of the recommended changes to determine their viability |
| 2 Update website | 2.1 Replace superseded and inaccurate information with current information and add additional material in accordance with organisational requirements<br>2.2 Follow protocols for ensuring the accuracy and authenticity of information<br>2.3 Remove services no longer available or required and add new ones in accordance with organisational requirements<br>2.4 Check offline information against that posted on the website and rectify any discrepancies in accordance with organisational timelines<br>2.5 Follow security procedures for updating the website |
| 3 Carry out non-technical site maintenance | 3.1 Analyse user feedback to confirm website faults are not user issues<br>3.2 Rectify faults and make improvements to website in response to user feedback approved by the organisation<br>3.3 Add new web pages and/or active links and remove redundant pages and links in accordance with organisational requirements<br>3.4 Make website changes in response to changes in marketing strategy, in accordance with organisational requirements and consideration of cost benefits |

# Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1-1.4, 2.1, 2.3-2.5, 3.1-3.4 | • Recognises text within job specifications and work processes related to the outcomes of the job |
| Writing | 1.3, 1.4, 2.1-2.5, 3.2-3.4 | • Records key information related to the outcomes of the job |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Oral Communication | 1.3, 3.2 | • Makes recommendations on changes to website content<br>• Analyses and responds to user feedback |
| Numeracy | 1.4 | • Uses basic numeracy skills to determine cost implications and viability |
| Navigate the world of work | 1.1-1.4, 2.1-2.5, 3.1-3.4 | • Accepts responsibility and ownership for the task and makes decisions on completion parameters and the need to coordinate with others<br>• Takes personal responsibility for following security procedures and meeting organisational requirements |
| Interact with others | 1.3, 3.2 | • Selects and uses appropriate conventions and protocols when communicating with clients and users in a range of work contexts |
| Get the work done | 1.1-1.4, 2.1-2.5, 3.1-3.4 | • Takes responsibility for planning, sequencing tasks for efficient and effective organisational outcomes<br>• Uses problem solving processes to identify and analyse technical issues<br>• Contributes to continuous improvement of website by applying basic principles of analytical thinking<br>• Understands the purposes, specific functions and key features of common digital systems and tools and operates them effectively to complete tasks in accordance with security requirements |

# Assessment Requirements for BSBEBU401 Review and maintain a website

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- analyse data to make recommendations about changes to website
- update web pages according to organisational requirements
- analyse data, identify and resolve faults, errors and/or complaints on website.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and review knowledge of key provisions of relevant legislation, regulations, and standards and codes of practice that may affect aspects of business operations
- explain basic principles of website design and maintenance
- outline online security issues.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the information and communications technology – e-business field of work. This includes access to:

networked computers

- computers and office equipment
- industry software packages
- documentation relating to analysis and strategies/policies for implementation.

Assessors must satisfy NVR/AQTF assessor requirements.

# BSBEBU501 Investigate and design e-business solutions

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to evaluate e-business models and strategies, as well as incorporate the results of these evaluations into the design of an e-business solution.

It applies to individuals who possess skills and knowledge in a specialist business area, as well as knowledge of software and other technologies. They apply these skills and knowledge in the evaluation, selection and implementation of new strategies for business, which incorporate e-business solutions. They may be responsible for overseeing these tasks along with technical or other knowledge experts.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

## Unit Sector

Information and Communications Technology – E-Business

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1 Investigate e-business opportunities | 1.1 Undertake a competitive analysis to determine the likely impact new capabilities will have on industry sectors and competitors<br>1.2 Complete and assess value chain analysis to identify processes |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | and relationships that may benefit from the adoption of e-business solutions<br>1.3 Identify threats and opportunities to e-business implementation and evaluate potential contributions to the business<br>1.4 Conduct resource analysis to identify cost and revenue implications in developing opportunities<br>1.5 Identify and evaluate legal and ethical issues relating to e-business opportunities |
| 2 Evaluate e-business models | 2.1 Identify and analyse business-to-business, business-to-consumer, intra-organisational e-business applications and e-business models<br>2.2 Rank compatible e-business models in terms of their strengths and weaknesses, considering resourcing, technical and security requirements of each<br>2.3 Assess cost implications of implementation of e-business models<br>2.4 Determine an e-business model most appropriate in relation to business plan |
| 3 Design an e-business | 3.1 Formulate purpose, objectives and values for the e-business<br>3.2 Identify target market, and value chain structure in accordance with chosen e-business model<br>3.3 Identify and obtain technical needs and expertise required to implement e-business model<br>3.4 Investigate and develop plan to address culture change issues to manage transition to an e-business |
| 4 Implement an e-business strategy | 4.1 Develop policies and guidelines to support customers, supply chain and staff to ensure successful implementation<br>4.2 Monitor performance of business goals and adjust policies and procedures to respond to changing needs of customers, staff and supply chain<br>4.3 Review e-business systems and models, seeking feedback from users and personnel responsible for e-business implementation<br>4.4 Incorporate evaluation results and feedback to improve future e-business strategies |

© Commonwealth of Australia, 2025 Future Skills Organisation

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1-1.5, 2.1-2.4, 3.2-3.4, 4.1-4.4 | • Interprets a range of textual information to evaluate opportunities, possible exemplars and technical considerations |
| Writing | 1.1-1.5, 2.1-2.4, 3.1-3.4, 4.1-4.4 | • Takes personal notes and develops workplace documentation that clarifies complex ideas using language and structure to suit context and audience |
| Oral Communication | 3.3, 4.3 | • Articulates information clearly using language and tone appropriate to audience and environment<br>• Uses active listening and questioning techniques to receive feedback and confirm understanding |
| Numeracy | 1.4, 2.2, 2.3 | • Analyses numerical information to determine resources required for job |
| Navigate the world of work | 1.1-1.5, 2.1-2.4, 3.1-3.4, 4.1-4.4 | • Develops and reviews organisational procedures to achieve broader workplace goals<br>• Monitors adherence to organisational procedures and legislative requirements |
| Interact with others | 3.3, 4.3 | • Selects and uses appropriate conventions and protocols when communicating with others in a range of work contexts |
| Get the work done | 1.5, 2.1-2.4, 3.1-3.4, 4.1-4.4 | • Takes responsibility for developing and implementing organisational processes that comply with legislative requirements and achieve required outcomes<br>• Systematically gathers and analyses all relevant information and evaluates options to solve problems or make decisions<br>• Considers the effectiveness of a solution in terms of how well it met stated goals, and seeks to make improvements<br>• Investigates new and innovative ideas as a means to continuously improve work practices and processes<br>• Uses digital technologies and systems safely, legally and ethically to access, store and share information |

# Assessment Requirements for BSBEBU501 Investigate and design e-business solutions

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- analyse and evaluate e-business opportunities involving new business models and not simply electronic versions of existing businesses
- provide supporting evidence for choice of e-business solution
- implement, monitor and evaluate an e-business solution.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the role of a value chain analysis when assessing potential e-business solutions
- identify relevant legislation, regulations, standards and codes of practice that may affect the implementation of the e-business solution
- list key features of a range of e-business models
- outline the policies and guidelines relating to the implementation of the e-business solution.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the information and communications technology – e-business field of work and include access to:

- office equipment and materials
- documentation relating to analysis and implementation
- relevant legislation, regulations and codes of practice.

# BSBFIM501 Manage budgets and financial plans

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to undertake financial management within a work team in an organisation. It includes planning and implementing financial management approaches, supporting team members whose role involves aspects of financial operations, monitoring and controlling finances and reviewing and evaluating effectiveness of financial management processes.

It applies to managers in a wide range of organisations and sectors who have responsibility for ensuring that work team financial resources are used effectively and are managed in line with financial objectives of the team and organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Finance - Financial Management

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1 Plan financial management approaches | 1.1 Access budget/financial plans for the work team<br>1.2 Clarify budget/financial plans with relevant personnel within the organisation to ensure that documented outcomes are achievable, accurate and comprehensible<br>1.3 Negotiate any changes required to be made to budget/financial |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | plans with relevant personnel within the organisation<br>1.4 Prepare contingency plans in the event that initial plans need to be varied |
| 2 Implement financial management approaches | 2.1 Disseminate relevant details of the agreed budget/financial plans to team members<br>2.2 Provide support to ensure that team members can competently perform required roles associated with the management of finances<br>2.3 Determine and access resources and systems to manage financial management processes within the work team |
| 3 Monitor and control finances | 3.1 Implement processes to monitor actual expenditure and to control costs across the work team<br>3.2 Monitor expenditure and costs on an agreed cyclical basis to identify cost variations and expenditure overruns<br>3.3 Implement, monitor and modify contingency plans as required to maintain financial objectives<br>3.4 Report on budget and expenditure in accordance with organisational protocols |
| 4 Review and evaluate financial management processes | 4.1 Collect and collate for analysis, data and information on the effectiveness of financial management processes within the work team<br>4.2 Analyse data and information on the effectiveness of financial management processes within the work team and identify, document and recommend any improvements to existing processes<br>4.3 Implement and monitor agreed improvements in line with financial objectives of the work team and the organisation |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.2, 2.1, 2.3, 3.1-3.4, 4.2, 4.3 | • Interprets and analyses information to determine activities required |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Writing | 1.1, 1.4, 4.1-4.3 | • Records information in correct forms and prepares materials which convey detailed and factual content in accordance with internal procedures |
| Oral Communication | 1.2, 1.3, 2.1-2.3 | • Presents information about financial issues and requirements to a range of audiences using structure and language to suit the audience<br>• Uses active listening and questioning to clarify information and to confirm understanding |
| Numeracy | 1.1-1.3, 2.1-2.3, 3.1-3.4, 4.1-4.3 | • Uses a wide range of mathematical calculations to analyse numeric information in budgets or financial plans |
| Navigate the world of work | 2.2, 3.3, 3.4, 4.3 | • Recognises, understands and adheres to organisational requirements in undertaking own work |
| Interact with others | 1.2, 1.3, 2.1, 2.2, 3.1, 2.3, 4.2, 4.3 | • Uses a range of strategies to connect, collaborate and cooperate with other work colleagues in activities requiring collective effort and diverse skills and knowledge |
| Get the work done | 1.1, 1.4, 2.3, 3.1-3.4, 4.1-4.3 | • Uses logical processes in planning, implementing and evaluating complex tasks and developing alternative strategies in achieving goals and timelines<br>• Uses a range of digital technologies to access, filter, compile, integrate and logically present complex information from multiple sources |

# Assessment Requirements for BSBFIM501 Manage budgets and financial plans

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- use financial skills to work with and interpret budgets, ageing summaries, cash flow, petty cash, Goods and Services Tax (GST), and profit and loss statements
- communicate with relevant people to clarify budget/financial plans, negotiate changes and disseminate information
- prepare, implement and modify financial contingency plans
- monitor expenditure and control costs
- support and monitor team members
- report on budget and expenditure
- review and make recommendations for improvements to financial processes
- meet record keeping requirements for the Australian Taxation Office (ATO) and for auditing purposes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe basic accounting principles
- identify and explain the relevant legislation and current requirements of the Australian Taxation Office, including the Goods and Services Tax (GST)
- explain the key requirements for financiall record keeping and auditing
- describe the principles and techniques involved in managing:
  - budgeting
  - cash flows
  - electronic spreadsheets

© Commonwealth of Australia, 2025 Future Skills Organisation

- GST
- ledgers and financial statements
- profit and loss statements.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the financial management field of work and include access to:

- resources and documentation used in the workplace
- workplace policies and procedures
- workplace budgets and financial plans
- business technology
- case studies and, where available, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

# BSBINN601 Lead and manage organisational change

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Application

This unit describes skills and knowledge required to determine strategic change requirements and opportunities; and to develop, implement and evaluate change management strategies.

It applies to managers with responsibilities that extend across the organisation or across significant parts of a large organisation. They may have a dedicated role in human resources management, human resources development, or work in a strategic policy or planning area.

The unit takes a structured approach to change management and applies to people with considerable work experience and organisational knowledge.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Creativity and innovation – innovation

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1 Identify change requirements and opportunities | 1.1 Identify strategic change needs through an analysis of organisational objectives<br>1.2 Review existing policies and practices against strategic objectives to identify where changes are required |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.3 Monitor the external environment to identify events or trends that impact on the achievement of organisational objectives<br>1.4 Identify major operational change requirements due to performance gaps, business opportunities or threats, or management decisions<br>1.5 Review and prioritise change requirements or opportunities with relevant managers<br>1.6 Consult stakeholders, specialists and experts to assist in the identification of major change requirements and opportunities |
| 2 Develop change management strategy | 2.1 Undertake cost-benefit analysis for high priority change requirements and opportunities<br>2.2 Undertake risk analysis and apply problem solving and innovation skills to identify barriers to change and agree and record mitigation strategies<br>2.3 Develop change management project plan<br>2.4 Obtain approvals from relevant authorities to confirm the change management process<br>2.5 Assign resources to the project and agree reporting protocols with relevant managers |
| 3 Implement change management strategy | 3.1 Develop communication or education plan, in consultation with relevant groups and individuals, to promote the benefits of the change to the organisation and to minimise loss<br>3.2 Arrange and manage activities to deliver the communication or education plans to relevant groups and individuals<br>3.3 Consult with relevant groups and individuals for input into the change process<br>3.4 Identify and respond to barriers to the change according to risk management plans<br>3.5 Action interventions and activities set out in project plan according to project timetable<br>3.6 Activate strategies for embedding the change<br>3.7 Conduct regular evaluation and review and modify project plan where appropriate to achieve change program objectives |

# Assessment Requirements for BSBINN601 Lead and manage organisational change

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- analyse and interpret information about the organisation's internal and external environment and consult with stakeholders to identify requirements and opportunities for changes that support organisational objectives
- prioritise opportunities for changes with input from managers
- develop a change management project plan for the priority changes incorporating resource requirements, risk management and timelines
- develop strategies to communicate or educate the changes and embed them
- obtain approvals and agree reporting protocols with relevant managers and implement the plan including addressing barriers to change
- review and evaluate the change management project plan and modify as needed to achieve objectives.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the change management process or cycle and strategies for communicating and embedding change
- explain how organisational behaviour and the external environment can impact on change strategies
- describe the components of a change management project plan
- list potential barriers to change and explain possible strategies to address barriers.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the creativity and innovation and include access to:

- workplace documentation and resources
- office equipment, materials and software packages
- case studies or, where available, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

# Assessment Requirements for BSBINN801 Lead innovative thinking and practice

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- use various techniques and tools to stimulate creative or innovative thinking
- research, review and critically analyse trends in thinking and emerging practices as they relate to an organisation's current thinking and practices
- develop own capacity to lead innovative thinking and practice in an organisational context
- complete a workplace project or case study to demonstrate a comprehensive understanding and application of key concepts, current theories and processes for introducing, communicating, promoting, supporting and sustaining innovative thinking and practices in an organisational context.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- compare and contrast current and past theories and thinking about innovation
- explain how theory and thinking on innovation and creativity can contribute to applied practice
- discuss the impact of leadership style on innovation in organisations, including how specific approaches may encourage or inhibit innovation
- discuss the relevance of organisational and industry context on innovation
- analyse the internal and external conditions or factors that impact on organisational innovation
- outline strategies for identifying, assessing and managing risks associated with innovation
- provide examples of innovation drivers in an organisation
- provide examples of innovation enablers in an organisation

© Commonwealth of Australia, 2025 Future Skills Organisation

- list and describe mechanisms at system or process level that can support innovative practices
- discuss typical challenges and barriers to innovation within an organisation and ways of overcoming these challenges and barriers.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the creativity and innovation field of work and include access to:

- workplace documentation and resources
- office equipment and materials
- case studies or, where available, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

# BSBIPR301 Comply with organisational requirements for protection and use of intellectual property

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to assist with the protection and lawful use of an organisation's intellectual property and to avoid intellectual property infringement. It focuses on supporting the maintenance of an organisation's policies and procedures for the protection of intellectual property and avoidance of intellectual property infringement.

It applies to individuals who operate in a broad range of work roles and contexts and whose role may include assisting the organisation to comply with intellectual property requirements for the protection and use of intellectual property.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Regulation, Licensing and Risk – Intellectual Property

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Identify organisational expectations for complying with intellectual property requirements | 1.1 Identify the various types of existing and potential intellectual property within the organisation<br>1.2 Identify and access the organisation's intellectual property policies, procedures and information<br>1.3 Identify own role in protecting the organisation's intellectual |

| | | |
|---|---|---|
| | | objectives |
| Numeracy | 1.4 | • Identifies and comprehends mathematical information in familiar texts to establish key performance indicators |
| Navigate the world of work | 1.1, 1.2, 1.3, 1.4, 2.1, 2.3 | • Understands how own role meshes with others and contributes to broader work goals<br>• Monitors adherence to organisational policies and procedures and considers own role in terms of its contribution to broader goals of the work environment |
| Interact with others | 1.2, 1.3, 2.2, 2.3, 3.2, 3.4, 3.5, 3.6 | • Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective outcomes<br>• Recognises the importance of taking audience, purpose and contextual factors into account when making decisions about what to communicate with whom, why and how |
| Get the work done | 1.1, 1.3, 1.4, 3.1, 3.2, 3.3, 3.4, 3.5, 3.6 | • Develops plans to manage relatively complex, non-routine tasks with an awareness of how they contribute to longer term operational and strategic goals<br>• Uses systematic, analytical processes in complex, non-routine situations, setting goals, gathering relevant information and identifying and evaluating options against agreed criteria<br>• Evaluates effectiveness of decisions in terms of how well they meet stated goals |

# Range of Conditions

*This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.*

| | |
|---|---|
| Organisation's standards and values must be identified by considering: | • explicitly stated values<br>• values that are implied by the way the organisation conducts its business. |

# Assessment Requirements for BSBMGT401 Show leadership in the workplace

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- identify the organisation's standards and values, whether stated or implied by the way the organisation conducts its business
- evaluate own behaviour and performance against these and adjust to achieve required standards
- develop and implement performance plans and key performance indicators (KPIs) to meet organisation's goals and objectives
- use established communication channels to raise questions about standards and values that may be damaging to the organisation
- ensure own behaviour and performance contributes to the integrity and credibility of the organisation
- facilitate processes to make decisions that are based on:
  - relevant information
  - examination of options and associated risks
  - input from relevant people
- communicate about making and implementing decisions including:
  - facilitating agreement on the preferred course of action and implementation plans
  - monitoring and feedback on the implementation and impact of decisions.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain how to identify an organisation's standards and values when they are:
  - stated

© Commonwealth of Australia, 2025 Future Skills Organisation

  - implied
- articulate organisational values and expectations of behaviour
- explain basic theory of group behaviour
- outline the organisation's process for raising questions about standards and values
- give examples of behaviours and performance that would typically be considered damaging to an organisation
- explain concepts including:
  - organisational values
  - role modelling
  - integrity and credibility
  - leadership.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

# BSBMGT608 Manage innovation and continuous improvement

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to sustain and develop an environment in which continuous improvement, innovation and learning are promoted and rewarded.

It applies to people with managerial responsibilities who aim to build a better and more effective work environment. Continuous improvement and innovation have links with the model of the learning organisation and people working at this level play an important role in building the culture, values and attitudes of the organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Management and Leadership – Management

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Review programs, systems and processes | 1.1 Establish strategies to monitor and evaluate performance and sustainability of key systems and processes<br>1.2 Undertake detailed analyses of supply chains, and operational, product and service delivery systems<br>1.3 Identify performance measures, and assessment tools and techniques, and evaluate their effectiveness<br>1.4 Analyse performance reports and variance from plans for key |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Learning | 3.6 | • Plans and implements strategies to review and improve own performance |
| Reading | 1.1-1.5, 2.5, 2.6, 3.2-3.5, 3.7 | • Analyses, evaluates and integrates facts and ideas to construct meaning from a range of text types |
| Writing | 1.1-1.5, 2.1, 2.5, 3.2, 3.3, 3.5, 3.6, 3.7, 3.8 | • Integrates information and ideas from a range of sources, utilising appropriate support materials<br>• Communicates complex relationships between ideas and information, matching style of writing to purpose and audience |
| Oral Communication | 1.6, 2.1-2.4, 3.1, 3.5, 3.8 | • Participates in a variety of spoken exchanges with co-workers and stakeholders when developing options and implementing the continuous improvement plan |
| Numeracy | 1.1-1.5, 2.5, 3.3 | • Selects and interprets mathematical information to analyse performance<br>• Performs calculations required to establish timeframes, cost-benefits and measures for continuous improvement and innovation processes |
| Navigate the world of work | 2.6 | • Adheres to organisational policies and procedures and considers own role in terms of its contribution to broader goals of the work environment |
| Interact with others | 1.6, 2.1-2.4, 3.1, 3.5, 3.8 | • Recognises the importance of taking audience, purpose and contextual factors into account when making decisions about what to communicate, with whom, why and how<br>• Recognises the importance of building rapport to establish positive and effective working relationships<br>• Collaborates with others to achieve joint outcomes, playing an active role in encouraging innovation and facilitating effective group interaction |
| Get the work done | 1.1, 1.2, 1.3, 1.5, 1.6, 2.3, 2.4, 2.5, 3.1, 3.2, 3.3, 3.4, 3.5, 3.7 | • Plans, organises, implements or reviews organisational strategies, systems and processes<br>• Applies problem-solving processes to identify risks, evaluate options and determine solutions<br>• Uses lateral and analytical thinking to evaluate options against needs, resources and constraints before making decisions<br>• Facilitates a climate in which creativity and innovation |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| | | are accepted as an integral part of achieving outcomes<br>• Recognises that the current way is only one way of doing something and explores possibilities that challenge current approaches<br>• Actively identifies systems, devices and applications with potential to meet current and or future needs, with the help of specialists |

# Assessment Requirements for BSBMGT608 Manage innovation and continuous improvement

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- analyse and evaluate systems and performance in key areas of the organisation and identify opportunities for improvement, seeking advice from experts as appropriate
- promote the value of creativity, innovation and sustainability and recognise successes
- support the testing and trialling of new ideas and undertake risk management and cost-benefit analysis for options
- plan for and implement improvements using organisation's processes for approvals, project management and change management
- facilitate effective contributions to and communications about continuous improvement and innovation
- capture insights, experiences and ideas for improvements and incorporate them into the organisation's knowledge management systems and future planning.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline cost-benefit analysis methods
- describe creativity and innovation theories and concepts
- list organisational learning principles
- identify quality management and continuous improvement theories
- describe relevant risk management concepts
- outline relevant sustainability practices.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

# BSBPMG517 Manage project risk

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to manage risks that may impact achievement of project objectives. It involves identifying, analysing, treating and monitoring project risks, and assessing risk management outcomes.

It applies to individuals responsible for managing and leading a project in an organisation, business, or as a consultant.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

## Unit Sector

Management and Leadership – Project Management

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Identify project risks | 1.1 Determine risk objectives and standards, with input from stakeholders<br>1.2 Establish project risk context to inform risk management processes<br>1.3 Identify project risks using valid and reliable risk identification methods<br>1.4. Classify project risks within agreed risk categories |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| 2. Analyse project risks | 2.1 Determine risk analysis classification criteria and apply to agreed risk ranking system<br>2.2 Use risk analysis processes, within delegated authority, to analyse and qualify risks, threats and opportunities<br>2.3 Determine risk priorities in agreement with project client and other stakeholders<br>2.4 Document risk analysis outcomes for inclusion in risk register and risk management plan |
| 3. Establish risk treatments and controls | 3.1 Identify and document existing risk controls<br>3.2 Consider and determine risk treatment options using agreed consultative methods<br>3.3 Record and implement agreed risk treatments<br>3.4 Update risk plans and allocate risk responsibilities to project team members |
| 4. Monitor and control project risks | 4.1 Establish regular risk review processes to maintain currency of risk plans<br>4.2 Regularly monitor risk environment to identify changed circumstances impacting project risks<br>4.3 Determine risk responses to changed environment<br>4.4 Implement agreed risk responses and modify plans to maintain currency of risk treatments and controls |
| 5. Assess risk management outcomes | 5.1 Review project outcomes to determine effectiveness of risk-management processes and procedures<br>5.2 Identify and document risk management issues and recommended improvements for application to future projects |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1-1.4, 2.1, 2.2, 3.1, 3.2, 4.2, 5.1, 5.2 | • Interprets and critically analyses complex texts from a range of sources and determines how content may be applied according to organisational requirements |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Writing | 1.3, 1.4, 2.1, 2.4, 3.1, 3.3, 3.4, 4.1, 4.3, 4.4, 5.2 | • Documents risks, risk analysis and risk controls using required formats and structure<br>• Modifies and updates workplace documentation according to requirements |
| Oral Communication | 1.1, 2.3, 3.4 | • Participates in verbal exchanges using clear language to provide and seek information<br>• Uses active listening and questioning techniques to confirm understanding |
| Numeracy | 1.3, 2.1, 2.3 | • Analyses numerical data to identify project risk levels and rank risks according to agreed system of classification |
| Navigate the world of work | 1.1, 2.2 | • Determines and adheres to organisational policies and standards<br>• Considers own role in terms of its contribution to broader goals of work environment |
| Interact with others | 1.1, 2.3, 3.4 | • Selects and uses appropriate conventions and protocols when communicating with internal and external stakeholders to seek or share information<br>• Actively identifies requirements of important communication exchanges, selecting appropriate channels, format and content to suit purpose and audience |
| Get the work done | 1.1-1.4, 2.1, 3.2, 4.1, 4.4, 5.1 | • Identifies and develops approaches to risk management and implements complex tasks to achieve outcomes<br>• Analyses information to make decisions, involving others when appropriate<br>• Uses formal and informal processes to monitor implementation of decisions and reflect on outcomes |

# Assessment Requirements for BSBPMG517 Manage project risk

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- conduct effective risk management for a project of sufficient complexity to demonstrate the full range of performance requirements
- apply risk management techniques, strategies and tools.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify project risks in a range of risk categories
- explain key components of a risk management plan
- outline industry sector risk classifications and relate these to different risk contexts
- summarise organisational and industry standard risk frameworks
- identify and describe characteristics, techniques and appropriate applications of quantitative and qualitative risk management techniques and approaches.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:

- workplace risk management documentation
- feedback from project stakeholders about how risks were managed.

Assessors must satisfy NVR/AQTF assessor requirements.

# Assessment Requirements for BSBPMG521 Manage project integration

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- work closely with others to integrate all project management functions across a project life cycle according to organisational objectives
- negotiate with internal and external stakeholders
- create accurate project management documentation
- make suggestions for improvements to managing project integration in the future.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise project governance models
- describe range of methodologies to break project objectives into achievable project deliverables
- outline role of project life cycle stages, phases and structures relevant to industry and project context
- identify and describe appropriate organisational documentation for recording strategies and goals for integration processes.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:

- project documentation
- case studies and, where possible, real situations

© Commonwealth of Australia, 2025 Future Skills Organisation

- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

# BSBPMG522 Undertake project work

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to undertake a straightforward project or a section of a larger project. It covers developing a project plan, administering and monitoring the project, finalising the project and reviewing the project to identify lessons learned for application to future projects.

This unit applies to individuals who play a significant role in ensuring a project meets timelines, quality standards, budgetary limits and other requirements set for the project.

The unit does not apply to specialist project managers. For specialist project managers, the other units of competency in the project management field (BSBPMG) will be applicable.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Management and Leadership – Project Management

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Define project | 1.1 Access project scope and other relevant documentation<br>1.2 Define project stakeholders<br>1.3 Seek clarification from delegating authority of issues related to |

# Assessment Requirements for BSBPMG522 Undertake project work

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- define the parameters of the project including:
  - project scope
  - project stakeholders, including own responsibilities
  - relationship of project to organisational objectives and other projects
  - reporting requirements
  - resource requirements
- use project management tools to develop and implement a project plan including:
  - deliverables
  - work breakdown
  - budget and allocation of resources
  - timelines
  - risk management
  - recordkeeping and reporting
- consult and communicate with relevant stakeholders to generate input and engagement in planning, implementing and reviewing the project
- provide support to team members to enable them to achieve deliverables and to transition them as appropriate at completion of the project
- finalise the project including documentation, sign-offs and reporting
- review and document the project outcomes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

© Commonwealth of Australia, 2025 Future Skills Organisation

- give examples of project management tools and how they contribute to a project
- outline types of documents and other sources of information commonly used in defining the parameters of a project
- explain processes for identifying and managing risk in a project
- outline the organisation's mission, goals, objectives and operations and how the project relates to them
- explain the organisation's procedures and processes that are relevant to managing a project including:
  - lines of authority and approvals
  - quality assurance
  - human resources
  - budgets and finance
  - recordkeeping
  - reporting
- outline the legislative and regulatory context of the organisation in relation to project work, including work health and safety (WHS) requirements.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

# Assessment Requirements for BSBSMB305 Comply with regulatory, taxation and insurance requirements for the micro business

## Modification History

| Release | Comments |
|---|---|
| Release 2 | This version released with BSB Business Services Training Package Version 2.0.<br>Version created to clarify intent of unit |
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- identify regulatory, taxation and insurance compliance requirements, and risk minimisation needs of the business
- identify, select and access sources of advice on compliance and risk minimisation procedures for the business
- complete a development and review of procedures for compliance and risk minimisation (with assistance from advisors).

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify micro business registration and licensing requirements
- list government legislative requirements relating to business operation
- categorise the nature of legal responsibility
- pinpoint relevant industry codes of practice
- list relevant WHS responsibilities and procedures
- name sources of advice and specialist services
- identify sources of information about regulatory, taxation and insurance requirements and issues
- outline taxation requirements.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- business technology including internet access for research
- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies or where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# Assessment Requirements for BSBSMB306 Plan a home based business

## Modification History

| Release | Comments |
|---|---|
| Release 2 | This version released with BSB Business Services Training Package Version 2.0.<br>Version created to clarify intent of unit |
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- identify practical requirements of running a home based business, including calculation of costs
- plan suitable workspace, including:
  - preparing concept plan for possible modifications to structure of building
  - obtaining relevant approvals from external sources
  - identifying and meeting required legislative requirements
- implement procedures and protocols to ensure home based business runs smoothly including:
  - creating work schedule
  - identifying and establishing contingency plans for areas of possible conflict.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list prohibitive factors in setting up a home based business
- list commonwealth, state/territory and local government legislative requirements relating to business operation, especially for work health and safety (WHS) and environmental issues
- outline constraints of home based businesses

© Commonwealth of Australia, 2025 Future Skills Organisation

- summarise relevant services and available infrastructure.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies or where possible, real situations.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# Assessment Requirements for BSBSMB401 Establish legal and risk management requirements of small business

## Modification History

| Release | Comments |
|---|---|
| Release 2 | This version released with BSB Business Services Training Package Version 2.0.<br><br>Version created to clarify intent of unit |
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- demonstrate a systematic approach to identifying, managing and meeting legal and regulatory requirements, specifically in regard to WHS, business registration and environmental requirements
- ensure compliance, by:
  - following taxation and industrial relations principles
  - updating and maintaining legal documents
  - investigating areas of non-compliance
  - monitoring provision of products and services
  - taking corrective action where necessary
- negotiate and arrange contracts, including:
  - seeking legal advice
  - investigating procurement rights
  - identifying options of leasing or ownership of business premises.
- Identify, assess and treat risks specific to the business including
  - prioritising risks with highest probability of occurrence and greatest negative impact on the business
  - identifying insurance requirements

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline business registration and licensing requirements
- identify all government legislative requirements relating to the specific business operation
- explain creation and termination of relevant legal contracts
- summarise relevant cultural differences and legal implications
- describe legal rights and obligations of alternative ownership structures
- outline necessary record keeping to meet minimum legal and taxation requirements
- summarise relevant consumer legislation and industry codes of practice
- outline the key steps in the risk management process
- explain relevant insurance requirements and products.

# Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- office equipment and resources
- business technology including internet access
- specialist software for analysis of data
- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies, or where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## Performance Evidence

Evidence of the ability to:

- develop strategies and procedures to successfully manage business operations, including:
  - developing an action plan
  - identifying risk management procedures
  - developing a quality system
  - implementing performance measures
  - utilising technologies to optimise business performance
- implement and monitor strategies and procedures developed, including:
  - analysing and correcting business problems
  - reviewing and adjusting the business plan
- record and research business improvements
- make appropriate adjustments to business operations as required.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise relevant industry codes of practice
- explain methods for implementing operation and revenue control systems
- summarise methods for monitoring performance and implementing improvements
- outline work health and safety (WHS) responsibilities and procedures for managing hazards
- identify relevant principles of risk management, including risk assessment
- clarify quality system principles and methods
- summarise relevant performance measures
- discuss role of innovation
- outline systems to manage staff, stock, expenditure, services and customer service
- identify technical or specialist skills relevant to business operations.

# Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- business equipment and resources
- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies or possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# BSBSMB407 Manage a small team

## Modification History

| Release | Comments |
|---|---|
| Release 2 | This version released with BSB Business Services Training Package Version 2.0.<br>Version created to clarify intent of unit |
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to select, induct, train and develop staff members to enhance business operations within the parameters of all relevant legislative requirements.

It applies to individuals who operate a small business that stands alone, or is part of a department within a larger organisation. Individuals in this role have a good knowledge of industrial relations and team management and use effective, responsive and supportive communication in workplace interactions.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Management and Leadership – Small and Micro Business

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Develop staffing plan | 1.1 Determine staffing requirements to allow the business to run effectively, in accordance with requirements outlined in the |

# Assessment Requirements for BSBSMB407 Manage a small team

## Modification History

| Release | Comments |
|---|---|
| Release 2 | This version released with BSB Business Services Training Package Version 2.0.<br>Version created to clarify intent of unit |
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- use the business plan to:
  - determine staffing requirements
  - coordinate skill-gap training where required
  - develop human resource policies and procedures
- develop job descriptions and selection criteria
- determine induction processes
- implement staff development program
- adhere to legal requirements and codes of practice
- develop staff records system
- conduct ongoing performance measures
- communicate effectively with staff members
- develop contingency plans
- develop strategies to review team performance
- monitor and review staff.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss all government legislative requirements relating to staffing the business operation

© Commonwealth of Australia, 2025 Future Skills Organisation

- explain work health and safety (WHS) responsibilities and procedures for managing hazards
- summarise relevant industry awards or enterprise agreements
- outline staff development pathways
- identify training course options for staff development
- summarise staff counselling, grievance and disciplinary procedures
- identify unfair dismissal legislation and procedures.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- business equipment and resources
- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies or where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# BSBSUS201 Participate in environmentally sustainable work practices

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to effectively measure current resource use and carry out improvements, including reducing the negative environmental impact of work practices.

It applies to individuals, working under supervision or guidance, who are required to follow workplace procedures and instructions, and work in an environmentally sustainable manner within scope of competency, authority and own level of responsibility.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Industry Capability – Sustainability

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Identify current resource use | 1.1 Identify workplace environmental and resource efficiency issues<br>1.2 Identify resources used in own work role<br>1.3 Document and measure current usage of resources using appropriate techniques<br>1.4 Record and file documentation measuring current usage, using |

# Assessment Requirements for BSBSUS201 Participate in environmentally sustainable work practices

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- locate and interpret a range of environment/sustainability legislation and procedural requirements
- participate in and support discussions for an improved resource efficiency process
- identify, document and measure usage of resources
- collaborate with team members on suggestions for improving workplace practices.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify environmental and resource hazards/risks as well as environmental or sustainability legislation, regulations and codes of practice applicable to own role
- outline sustainability requirements in the workplace
- identify reporting channels and procedures to report breaches and potential issues
- identify where to find environmental and resource efficiency systems and procedures.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the sustainability field of work and include access to:

- documentation, information and resources related to workplace environmental and resource efficiency issues
- office equipment and resources
- case studies and, where possible, real situations

# Assessment Requirements for BSBSUS301 Implement and monitor environmentally sustainable work practices

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- analyse information from a range of sources to identify current procedures, practices and compliance requirements in relation to environmental and resource sustainability
- consult and communicate with relevant stakeholders to seek input and encourage engagement with developing and implementing sustainability improvements, encourage feedback and suggestions and report on outcomes
- plan and organise work group activities to:
  - measure current resource usage
  - solve problems and generate ideas for improvements
  - evaluate and implement strategies to improve resource usage
  - plan, implement and integrate improvements into operations
  - meet environmental requirements
- apply continuous improvement approach to sustainability performance
- apply change management techniques to support sustainability performance.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify relevant internal and external sources of information and explain how they can be used to identify sustainability improvements
- explain the compliance requirements for the work area with reference to legislation, regulations, codes of practice and workplace procedures that relate to environmental and resource issues
- outline common environmental and energy efficiency issues within the industry

© Commonwealth of Australia, 2025 Future Skills Organisation

- give examples of benchmarks for environmental and resource sustainability that are relevant to the organisation
- outline organisational systems and procedures that relate to environmental and resource sustainability improvements including:
  - supply chain, procurement and purchasing
  - quality assurance
  - making recommendations and seeking approvals

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the sustainability field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

# Assessment Requirements for BSBSUS501 Develop workplace policy and procedures for sustainability

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- scope and develop organisational policies and procedures that comply with legislative requirements and support the organisation's sustainability goals covering at a minimum:
  - minimising resource use
  - resource efficiency
  - reducing toxic material and hazardous chemical use
  - employing life cycle management approaches
  - continuous improvement
- plan and implement sustainability policy and procedures including:
  - agreed outcomes
  - performance indicators
  - activities to be undertaken
  - assigned responsibilities
  - record keeping, review and improvement processes
- consult and communicate with relevant stakeholders to generate engagement with sustainability policy development, implementation and continuous improvement
- review and improve sustainability policies.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the environmental or sustainability legislation, regulations and codes of practice applicable to the organisation identify internal and external sources of information and explain how they can be used to plan and develop the organisation's sustainability policy

© Commonwealth of Australia, 2025 Future Skills Organisation

- explain policy development processes and practices
- outline organisational systems and procedures that relate to sustainability
- outline typical barriers to implementing policies and procedures in an organisation and possible strategies to address them.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the sustainability field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

# BSBWHS201 Contribute to health and safety of self and others

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to work in a manner that is healthy and safe in relation to self and others and to respond to emergency incidents. It covers following work health and safety (WHS) and emergency procedures and instructions, implementing WHS requirements and participating in WHS consultative processes.

It applies to individuals who require a basic knowledge of WHS to carry out work in a defined context under direct supervision or with some individual responsibility, in a range of industry and workplace contexts.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the Model WHS *Act* has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Work safely | 1.1 Follow provided safety procedures and instructions when |

# Assessment Requirements for BSBWHS201 Contribute to health and safety of self and others

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- follow all relevant procedures and instructions relating to work health and safety (WHS) and emergency incidents
- identify and report hazards to designated personnel
- contribute to WHS consultative processes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain workplace safety procedures and instructions including:
  - checking systems and equipment
  - conducting routine work operations
  - requirements for personal protective equipment (PPE)
  - how to report incidents and injuries
- explain emergency procedures including those for fires and incidents
- define the meaning of commonly used hazard signs and safety symbols
- summarise the duty holder responsibilities, as specified in WHS Acts, regulations and codes of practice, of:
  - self and fellow workers
  - persons conducting businesses or undertakings (PCBUs)
  - officers
  - others in the workplace
- explain the difference between hazards and risks

© Commonwealth of Australia, 2025 Future Skills Organisation

- describe typical WHS hazards that may be present in the workplace, the harm they can cause and how this harm occurs
- outline the process of hazard identification and risk reduction.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- relevant organisational policies, standard operating procedures and work instructions
- relevant Acts, regulations, codes of practice
- workplace tools, equipment and resources
- personal protective equipment appropriate to the role and work area.

Assessors must satisfy NVR/AQTF assessor requirements.

# BSBWHS304 Participate effectively in WHS communication and consultation processes

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to participate in work health and safety (WHS) communication and consultation processes.

It applies to individuals who participate in WHS communication and consultation processes as part of their work health and safety responsibilities, which are in addition to their main duties.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

## Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Contribute to | 1.1 Apply knowledge of WHS Acts, regulations, codes of practice, |

# Assessment Requirements for BSBWHS304 Participate effectively in WHS communication and consultation processes

## Modification History

| Release | Comments |
|---|---|
| Revision 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- participate in work health and safety (WHS) communication and consultation processes, including communicating WHS information to others
- raise WHS issues in meetings and follow up on outcomes
- take appropriate actions to remove barriers to communication and consultation processes
- support others to raise relevant WHS issues.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the purpose of organisational WHS policies, procedures, processes and systems
- outline the key requirements of relevant commonwealth and state/territory WHS Acts, regulations, codes of practice, standards and guidance material, and other relevant publications
- describe potential barriers to WHS consultation processes and how the barriers may be overcome
- explain the roles and responsibilities of WHS personnel
- describe how the consultation process influences and is related to workplace information management procedures, processes and systems
- describe methods to engage others with workplace procedures, and information sourcing and sharing.

© Commonwealth of Australia, 2025 Future Skills Organisation

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- organisational policies, standard operating procedures, procedures and plans with information on compliance requirements
- relevant Acts, regulations, codes of practice, licensing requirements, standards
- relevant WHS data files
- appropriate office equipment and resources.

Assessors must satisfy NVR/AQTF assessor requirements.

# BSBWHS403 Contribute to implementing and maintaining WHS consultation and participation processes

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to contribute to setting up, running and improving work health and safety (WHS) consultation and participation processes that are prescribed in legislation. It also covers contributing to communicating relevant information identifying and delivering related training and improving the consultation and participation processes.

This unit applies to individuals whose job role includes contributing to implementing and maintaining WHS consultation and participation processes in their work area and job role.

This unit applies to people who work in a broad range of WHS roles across all industries.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

# Assessment Requirements for BSBWHS403 Contribute to implementing and maintaining WHS consultation and participation processes

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- explain clearly and accurately to individuals and parties the legal roles, duties, rights and responsibilities of self and others regarding work health and safety (WHS) consultation and participation processes
- contribute, as appropriate to job role and work area, to:
  - setting up and running WHS consultation and participation processes to ensure that relevant individuals and parties understand and can participate in the processes
  - identifying training needs to support the WHS consultation and participation processes and providing learning opportunities, coaching and mentoring as appropriate to needs
  - communicating information and data about WHS consultation and participation processes
  - identifying barriers to effective WHS consultation and participation and developing, implementing and evaluating measures to remove the barriers.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe requirements under WHS legislation and organisational policies and procedures for consultation and participation processes and the individuals and parties who need to participate
- describe possible barriers to the implementation and effectiveness of WHS consultation and participation processes and strategies to remove them
- identify internal and external sources of WHS information and data and how to access them

© Commonwealth of Australia, 2025 Future Skills Organisation

- describe training requirements for individuals and parties necessary for effective WHS consultation and participation processes

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- office equipment and resources
- relevant Acts, regulations, codes of practice, standards and guidelines
- workplace documentation and personnel.

Assessors must satisfy NVR/AQTF assessor requirements.

# BSBWHS501 Ensure a safe workplace

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to establish, maintain and evaluate the organisation's work health and safety (WHS) policies, procedures and programs in the relevant work area, according to WHS legislative requirements. It takes a systems approach and addresses compliance with relevant legislative requirements.

This unit applies to managers working in a range of contexts who have, or are likely to have responsibility for WHS as part of their broader management role. It is relevant for people with obligations under WHS legislation, for example persons conducting a business or undertaking (PCBUs) or officers, as defined by relevant legislation.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| 1 Establish a WHS management system in a work area | 1.1 Locate, adapt, adopt and communicate WHS policies that clearly define the organisation's commitment to complying with WHS legislation<br>1.2 Identify duty holders and define WHS responsibilities for all workplace personnel in the work area according to WHS legislation, policies, procedures and programs<br>1.3 Identify and approve financial and human resources required by the WHS management system (WHSMS) |
| 2 Establish and maintain effective and compliant participation arrangements for managing WHS in a work area | 2.1 Work with workers and their representatives to set up and maintain participation arrangements according to relevant WHS legislation<br>2.2 Appropriately resolve issues raised through participation and consultation arrangements according to relevant WHS legislation<br>2.3 Promptly provide information about the outcomes of participation and consultation to workers and ensure it is easy for them to access and understand |
| 3 Establish and maintain procedures for effectively identifying hazards, and assessing and controlling risks in a work area | 3.1 Develop procedures for ongoing hazard identification, and assessment and control of associated risks<br>3.2 Include hazard identification at the planning, design and evaluation stages of any change in the workplace to ensure that new hazards are not created by the proposed changes and existing hazards are controlled<br>3.3 Develop and maintain procedures for selecting and implementing risk controls according to the hierarchy of control and WHS legislative requirements<br>3.4 Identify inadequacies in existing risk controls according to the hierarchy of control and WHS legislative requirements, and promptly provide resources to enable implementation of new measures<br>3.5 Identify requirements for expert WHS advice, and request this advice as required |
| 4 Evaluate and maintain a work area WHS management system | 4.1 Develop and provide a WHS induction and training program for all workers in a work area as part of the organisation's training program<br>4.2 Use a system for WHS record keeping to allow identification of patterns of occupational injury and disease in the organisation, and to maintain a record of WHS decisions made, including reasons for the decision<br>4.3 Measure and evaluate the WHSMS in line with the |

# Assessment Requirements for BSBWHS501 Ensure a safe workplace

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- establish, implement, maintain and evaluate a work health and safety (WHS) management system for a work area of an organisation in accordance with WHS legislation including policies, procedures and record keeping
- ensure organisational WHS compliance
- establish, implement, maintain and evaluate effective and compliant participation arrangements for managing WHS including identifying duty holders, identifying and approving the required resources and developing and implementing a training program
- establish, implement, maintain and evaluate procedures for effectively identifying hazards, and assessing and controlling risks using the hierarchy of risk control
- provide information and complete documentation for a WHS management system
- identify requirements for and request expert WHS advice.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and detail relevant WHS Acts, regulations and codes of practice
- specify relevant WHS organisational policies, procedures, programs and practices
- explain hazard identification and risk-management processes
- describe the hierarchy of risk control and how it is applied in the workplace
- specify in-house and WHS legislative reporting requirements.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- organisational WHS policies and procedures
- WHS legislation, regulations and codes of practice
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to conduct work health and safety (WHS) risk management processes.

It applies to individuals who manage WHS risks, based on the organisation's WHS management system (WHSMS), WHS information system (WHSIS) and risk-management approach (as covered in BSBWHS503 Contribute to the systematic management of WHS risk). These individuals will work in a range of WHS roles across all industries and apply a substantial knowledge base and well-developed skills in a wide variety of WHS contexts.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1 Access information and | 1.1 Identify sources of information and data |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| data on WHS hazards and risk management | 1.2 Obtain information and data to determine the nature and scope of hazards, the range of harms they may cause, and how these harms are caused<br>1.3 Obtain information and data to determine techniques, tools and processes to assess risk associated with identified hazards, and identify risk control options |
| 2 Prepare to manage WHS risks | 2.1 Apply knowledge of the organisation's WHSMS and WHSIS to identify WHS risk management requirements<br>2.2 Apply knowledge of WHS legislation to identify duty holders and legislative requirements for WHS risk management |
| 3 Develop and implement WHS risk-management processes | 3.1 Apply techniques, tools and processes to identify hazards, assess associated risks and identify risk control options<br>3.2 Apply knowledge of hazards and risks to select appropriate risk controls<br>3.3 Develop and implement a risk control plan and evaluate risk controls<br>3.4 Carry out hazard identification and risk management according to organisational and legal requirements |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.1, 1.2, 1.3 | • Organises, interprets evaluates and critiques ideas and information in relation to WHS risk management |
| Writing | 3.1, 3.2, 3.3, 3.4 | • Uses industry specific terminology and appropriate formats to draft and develop risk control plans and processes<br>• Records results of risk-management processes according to organisational requirements |
| Navigate the world of work | 2.1, 2.2, 3.4 | • Monitors adherence to legal, regulatory and organisational rights and responsibilities for self and others in relation to WHS risk management |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Interact with others | 3.1, 3.2, 3.3 | • Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction and taking a leadership role when required |
| Get the work done | 1.2, 1.3, 3.1, 3.2, 3.3 | • Uses logical planning processes, and an increasingly intuitive understanding of context, to identify relevant information and risks, and to identify and evaluate strategies and resources for risk management planning<br>• Sequences and schedules complex activities, monitors implementation, and manages relevant communication in relation to risk management planning<br>• Uses systematic, analytical processes in complex, non-routine situations, setting goals, gathering relevant information, identifying and evaluating options against agreed criteria<br>• Uses common digital systems and tools to locate and store information |

# Assessment Requirements for BSBWHS504 Manage WHS risks

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- access information and data on hazards and how to manage associated risks
- identify duty holders and legislative requirements for work health and safety (WHS) risk management
- use the organisation's WHS management system (WHSMS) and WHS information system (WHSIS) to conduct the following risk management processes:
  - identify hazards and potential hazards
  - assess the associated risks
  - identify control options
  - select suitable options
  - develop and implement a risk control plan
  - evaluate risk controls
- carry out hazard identification and risk management.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the basic principles of workplace incident, injury and disease causation
- explain the meanings of 'hazard' and 'risk' and how they differ
- identify formal and informal communication and consultation processes and key personnel related to communication
- describe how the characteristics and composition of the workforce impact on WHS risk and the management of WHS, including:
  - communication skills
  - cultural background and diversity

© Commonwealth of Australia, 2025 Future Skills Organisation

  - gender
  - labour market changes
  - language, literacy and numeracy levels of the workforce
  - structure and organisation of the workforce, including part-time, casual and contract workers; shift rosters and geographical location
  - workers with specific needs and limitations
  - workplace culture in relation to alcohol and other drug use
- identify internal and external sources of WHS information and data and how to access them
- explain the limitations of generic hazard identification and risk assessment checklists and risk ranking processes
- outline methods for providing evidence of compliance with WHS legislation
- describe the nature of workplace processes (work flow, planning and control) and hazards relevant to the workplace
- describe organisational culture as it impacts on the work team
- summarise organisational WHS policies, procedures, processes and systems
- list other functional areas that impact on the management of WHS
- outline the principles and practices of a systematic approach to managing WHS
- outline Commonwealth and state or territory WHS Acts, regulations, codes of practice, standards and guidance material and other publications relevant to the organisation
- outline risk management as a duty of persons conducting businesses or undertakings or officers under WHS legislation
- describe the roles and responsibilities of individuals and parties under WHS legislation
- outline standard industry controls for a range of hazards
- identify techniques, tools and processes for identifying health and safety hazards and assessing and controlling the associated risks, including:
  - hazard and risk checklists
  - hazard hunts
  - job safety analyses
  - manifests and registers, including for dangerous goods, hazardous chemicals and plant
  - safe work method statements
  - surveys using questionnaires, interviews and other survey techniques
  - workplace inspections and walk-throughs.

# Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- workplace policies and procedures
- office equipment and resources

© Commonwealth of Australia, 2025 Future Skills Organisation

- relevant Acts, regulations, codes of practice, standards and guidelines relating to risks found in the workplace
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

# Assessment Requirements for BSBWOR301 Organise personal work priorities and development

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- prepare a work plan according to organisational requirements and work objectives
- use business technology to schedule, prioritise and monitor completion of tasks in a work plan
- assess and prioritise own work load and deal with contingencies
- monitor and assess personal performance against job role requirements by seeking feedback from colleagues and clients
- identify personal development needs and access, complete and record skill development and learning.

Note: if a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline key provisions of legislation that relate to own work role
- describe goals, objectives or key performance indicators of own work role
- explain ways to elicit, analyse and interpret feedback when communicating with other people in the workplace
- explain the principles and techniques of goal setting, measuring performance, time management and personal assessment of learning and development needs
- explain signs and sources of stress and strategies to deal with stress in the workplace
- identify methods to identify and prioritise personal learning needs.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the industry capability - workplace effectiveness field of work and include access to:

- office equipment and resources
- work schedules and performance improvement plans
- workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

# Assessment Requirements for BSBWOR502 Lead and manage team effectiveness

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- use leadership techniques and strategies to facilitate team cohesion and work outcomes including:
  - encouraging and fostering shared understanding of purpose, roles and responsibilities
  - identifying and resolving problems
  - providing feedback to encourage, value and reward others
  - modelling desired behaviour and practices
- develop policies and procedures to ensure team members take responsibility for own work and assist others to undertake required roles and responsibilities
- establish processes to address issues and resolve performance issues
- support team to meet expected performance outcomes including providing formal and informal learning opportunities as needed
- develop performance plans with key performance indicators (KPIs), outputs and goals for individuals or the team which incorporate input from stakeholders
- communicate effectively with a range of stakeholders about team performance plans and team performance
- facilitate two-way flow of information between team and management relevant to team performance
- evaluate and take necessary corrective action regarding unresolved issues, concerns and problems raised by internal or external stakeholders.

Note: if a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain how group dynamics can support or hinder team performance

© Commonwealth of Australia, 2025 Future Skills Organisation

- outline strategies that can support team cohesion, participation and performance
- explain strategies for gaining consensus
- explain issue resolution strategies.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the industry capability - workplace effectiveness field of work and include access to:

- workplace documents
- case studies and, where possible, real situations
- office equipment and resources
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

# CPCCCM2007B Use explosive power tools

## Modification History

Minor changes made to range statement, including addition of photovoltaic (solar) panels

Equivalent to CPCCCM2007A

## Unit Descriptor

This unit of competency specifies the outcomes required to apply safe and effective operation of explosive power tools (EPT), used to fasten materials or fix fasteners to bases. It includes both direct action and indirect action explosive powered fastening tools.

## Application of the Unit

This unit of competency supports achievement of skills to safely and effectively use a range of EPT used in the construction industry.

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

| | |
|---|---|
| CPCCOHS2001A | Apply OHS requirements, policies and procedures in the construction industry |

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

| | |
|---|---|
| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |

© Commonwealth of Australia, 2025 Future Skills Organisation

# Elements and Performance Criteria

| | | | |
|---|---|---|---|
| 1 | Plan and prepare. | 1.1 | Work instructions, including plans, specifications, quality requirements and operational details, are obtained, confirmed and applied from relevant ***information*** for ***planning and preparation***. |
| | | 1.2 | ***Safety (OHS)*** requirements are followed in accordance with safety plans and policies. |
| | | 1.3 | Signage and barricade requirements are identified and implemented. |
| | | 1.4 | Plant, ***tools and equipment*** selected to carry out tasks are consistent with job requirements, checked for serviceability, and any faults are rectified or reported prior to commencement. |
| | | 1.5 | Material quantity requirements are calculated in accordance with plans and specifications. |
| | | 1.6 | ***Materials*** appropriate to work application are identified, obtained, prepared, safely handled and located ready for use. |
| | | 1.7 | ***Environmental requirements*** are identified for the project in accordance with environmental plans and ***statutory and regulatory authority*** obligations, and are applied. |
| 2 | Set out fasteners. | 2.1 | ***Minimum distances for set out*** from edge of substrate material are adhered to in accordance with legislation, regulations and codes of practice. |
| | | 2.2 | Material is located and temporarily held or fixed into designed position according to detailed drawings. |
| 3 | Use EPT. | 3.1 | EPT is checked for operation according to manufacturer specifications and safety (OHS) requirements for ***use of EPT***. |
| | | 3.2 | Fastener is selected according to requirements of job. |
| | | 3.3 | Charge is selected to assessed requirements for material, |

| | | | |
|---|---|---|---|
| | | | base and penetration. |
| | | 3.4 | ***Attachments*** and accessories are installed to EPT in accordance with manufacturer specifications and safety (OHS) requirements. |
| | | 3.5 | ***Fastener and charge*** in EPT are located to manufacturer specifications. |
| | | 3.6 | EPT operation is carried out and fastener is fixed into place in accordance with manufacturer recommendations, legislation, regulations and codes of practice. |
| | | 3.7 | Fastening penetration is checked and appropriate depth into material is applied. |
| | | 3.8 | Power regulating device is adjusted for conditions. |
| | | 3.9 | Misfire procedures are carried out according to manufacturer recommendations, legislation, regulations and codes of practice. |
| | | 3.10 | Temporary holding and fixings are removed without damage to material. |
| 4 | Secure and store equipment and charges. | 4.1 | Charges are stored in designated container in accordance with legislation, regulations and codes of practice and used charges are recorded. |
| | | 4.2 | Unused fasteners, the EPT and attachments are stored in a carry case in line with manufacturer recommendations. |
| | | 4.3 | Logbook is checked and maintenance recorded according to manufacturer recommendations. |
| 5 | Maintain EPT and kit. | 5.1 | Safety features of tools are checked for serviceability in accordance with manufacturer operating manual. |
| | | 5.2 | Tools are cleaned and lubricated to manufacturer recommendations. |
| | | 5.3 | Periodic maintenance service is carried out to manufacturer specifications. |
| | | 5.4 | Diminished stocks of charges and fasteners are |

| | | | |
|---|---|---|---|
| | | | replenished to designed effectiveness of EPT kit. |
| 6 | Clean up. | 6.1 | Work area is cleared and materials disposed of, reused or recycled in accordance with legislation, regulations, codes of practice and job specification. |
| | | 6.2 | Plant, tools and equipment are cleaned, checked, maintained and stored in accordance with manufacturer recommendations and standard work practices. |

# Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills

Required skills for this unit are:

- communication skills to:
  - determine requirements
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - follow instructions
  - read and interpret:
    - documentation from a variety of sources
    - drawings and specifications
  - report faults
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication, such as hand signals
  - written skills to record maintenance in logbook
- identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials
- numeracy skills to apply measurements and make calculations
- organisational skills, including the ability to plan and set out work
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technological skills to:
  - use a range of mobile technology, such as two-way radio and mobile phones
  - voice and hand signals to access and understand site-specific instructions.

© Commonwealth of Australia, 2025 Future Skills Organisation

### Required knowledge

Required knowledge for this unit is:

- construction terminology
- EPT materials
- EPT charges and fasteners
- equipment safety manuals and instructions
- job safety analysis (JSA) and safe work method statements
- material safety data sheets (MSDS)
- materials storage and environmentally friendly waste management
- plans, specifications and drawings
- processes for the calculation of material requirements
- quality requirements
- relevant Acts, regulations and codes of practice
- security and storage procedures for equipment and charges
- types, characteristics, uses and limitations of plant, tools and equipment
- workplace and equipment safety requirements.

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

| | |
|---|---|
| **Overview of assessment** | This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures. |
| **Critical aspects for assessment and evidence required to demonstrate competency in this unit** | A person who demonstrates competency in this unit must be able to provide evidence of the ability to:<br>• locate, interpret and apply relevant information, standards and specifications<br>• comply with site safety plan and OHS legislation, regulations and codes of practice applicable to workplace operations<br>• comply with organisational policies and |

© Commonwealth of Australia, 2025 Future Skills Organisation

procedures, including quality requirements
- safely and effectively use tools and equipment
- communicate and work effectively and safely with others
- fix metal or timber to a steel, concrete or masonry base on one project of each to job specifications, including:
  - completion of stripping and assembly of the tool
  - completing log of serviceability
  - maintaining and cleaning
  - selecting charges and fasteners applicable to base material and material being fixed
  - misfire procedures
  - using attachments
  - complying with storage and security regulations and OHS requirements for the working environment
  - selecting signage
  - test fire.

**Context of and specific resources for assessment**

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the mandatory task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities

© Commonwealth of Australia, 2025 Future Skills Organisation

must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

**Method of assessment**

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Information*** includes:

- diagrams or sketches
- instructions issued by authorised organisational or external personnel
- manufacturer specifications and instructions where specified
- memos
- MSDS
- organisation work specifications and requirements
- plans and specifications
- regulatory and legislative requirements pertaining to using EPT
- relevant Australian standards
- safe work procedures related to using EPT
- signage
- verbal or written and graphical instructions
- work bulletins
- work schedules.

***Planning and preparation*** include:

- work site inspection
- equipment defect identification
- assessment of conditions and hazards
- determination of work requirements.

***Safety (OHS)*** is to be in accordance with legislation, regulations, codes of practice, organisational safety policies and procedures, and project safety plan and may include:

- emergency procedures, including extinguishing fires, organisational first aid requirements and evacuation
- handling of materials
- hazard control
- hazardous materials and substances
- safe operating procedures, including the conduct of operational risk assessment and treatments associated with:
  - earth leakage boxes

© Commonwealth of Australia, 2025 Future Skills Organisation

- lighting
- photovoltaic (solar) panels
- power cables, including overhead service trays, cables and conduits
- restricted access barriers
- surrounding structures
- traffic control
- trip hazards
- work site visitors and the public
- working at heights
- working in confined spaces
- working in proximity to others
- working with dangerous materials

- organisational first aid
- personal protective clothing and equipment prescribed under legislation, regulations and workplace policies and practices
- use of firefighting equipment
- use of tools and equipment
- workplace environment and safety.

***Tools and equipment*** may include:

- direct action EPT
- indirect action EPT
- clamps and levels.

***Materials*** include:

- timber
- metals
- patented fasteners.

***Environmental requirements*** include:

- clean-up management
- noise and dust
- vibration
- waste management.

***Statutory and regulatory authorities*** include:

- federal, state and local authorities administering applicable Acts, regulations and codes of practice.

***Minimum distance for set out*** of

- regulated minimum distances
- bases, including concrete, masonry or steel.

© Commonwealth of Australia, 2025 Future Skills Organisation

fasteners is to be in accordance with:

***Use of EPT*** includes:

- stripping and assembling tools
- completing log of serviceability
- maintaining and cleaning tools
- selecting charges and fasteners applicable to the base material and material being fixed
- misfire procedures
- using attachments
- complying with storage and security regulations and OHS requirements for the working environment
- selecting signage
- test fire.

***Attachments*** include:

- channel, rebate and other manufacturer attachments.

***Fastener and charge*** include:

- firing a test shot with misfire procedures, complying with the regulated safety procedure for misfire.

# CPCCDE3014A Remove non-friable asbestos

## Modification History

New to CPC08

Replaces unit CPCCDE3012A Encapsulate and remove asbestos

Not equivalent

## Unit Descriptor

This unit of competency specifies the outcomes required to remove non-friable asbestos containing material (ACM). The unit includes preparing, containing and removing non-friable ACM, and includes knowledge of decontamination and disposal requirements.

## Application of the Unit

Site location for work may be either domestic or commercial, and may be a demolition site, a new work site or an existing structure being renovated, extended, restored or maintained. Project sites may be construction sites and may also include ships, soils in relation to the non-friable asbestos removal process, and fences.

## Licensing/Regulatory Information

Occupational licenses are required nationally.

Work must be completed according to relevant legislative, industry, customer and organisational requirements, including work health and safety (WHS) policies and procedures.

Regulatory mechanisms apply to this unit. This unit is required for all ACM removal workers engaged in the removal of non-friable ACM. Candidates are advised to check for regulatory requirements.

## Pre-Requisites

CPCCOHS1001A Work safely in the construction industry

# Employability Skills Information

This unit contains employability skills.

# Elements and Performance Criteria Pre-Content

| | |
|---|---|
| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |

# Elements and Performance Criteria

| | | | |
|---|---|---|---|
| 1 | Prepare for asbestos removal. | 1.1 | Work instructions and asbestos removal control plan (ARCP) are obtained and confirmed for preparation purposes. |
| | | 1.2 | ***Safety requirements*** and data gathered from an on-site assessment, an asbestos register where available, and other information sources are used to prepare for a safe and compliant removal process. |
| | | 1.3 | ***Tools, equipment*** and ***personal protective equipment*** (PPE) consistent with job requirements are selected to carry out tasks and checked for serviceability; and faults are rectified or reported prior to commencement. |
| | | 1.4 | ARCP is accessed according to legislative and company requirements, and understood. |
| 2 | Prepare asbestos removal area and removal site. | 2.1 | ***Non-friable asbestos containing materials*** to be removed are identified, referring to the asbestos register or following clarification by an approved competent person as required and according to ***workplace procedures***. |
| | | 2.2 | Signage and barricade requirements are identified and implemented to delineate the work area. |
| | | 2.3 | Decontamination procedure is tested according to workplace procedures. |
| | | 2.4 | Materials and equipment required for removal of ACM |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | | |
|---|---|---|---|
| | | | from ***project sites*** are identified, checked and prepared for operation. |
| | | 2.5 | Processes are undertaken to ensure the safety of the site, including deactivating or securing ***utilities*** where necessary prior to commencing work. |
| 3 | Isolate removal site. | 3.1 | ***Requirements to isolate the removal site*** safely are identified from the ARCP, and implemented according to legislative and company requirements. |
| | | 3.2 | Boundaries of asbestos removal site are designated according to ARCP requirements. |
| | | 3.3 | Occupants, neighbours and other affected parties are notified according to legislation and within limits of own responsibility and the code of practice. |
| 4 | Carry out asbestos removal process. | 4.1 | ***Asbestos is removed*** from work area and work site as specified by the supervisor and in the appropriate manner, ensuring the safe use of tools and according to ARCP, legislative and regulatory requirements, and codes of practice. |
| | | 4.2 | Removed ***asbestos is contained***, wrapped or otherwise sealed, and placed into removal bags or bins, sealed, labelled and, where loaded into a truck, the tray or skip is lined prior to removal of ACM from site according to regulatory requirements and company standards. |
| 5 | Carry out decontamination process. | 5.1 | Decontamination of the work area and tools is carried out according to workplace procedures, ARCP and regulatory requirements. |
| | | 5.2 | ***Decontamination of asbestos removal workers is carried out*** according to workplace procedures, ARCP and regulatory requirements. |
| | | 5.3 | Asbestos removal and decontamination equipment is removed from the area according to ARCP and regulatory requirements. |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | | |
|---|---|---|---|
| 6 | Clean up work site. | 6.1 | Work area is cleared and materials disposed of according to legislation, regulations, codes of practice and job specification. |
| | | 6.2 | Plant, tools and equipment are cleaned, decontaminated, checked, maintained, removed from the work area, and stored according to manufacturer recommendations and regulatory requirements. |
| 7 | Contribute to and use documentation in line with regulatory requirements. | 7.1 | Contribution is made within limits of own responsibility to the preparation and use of ***documentation*** for regulatory notification processes according to legislative and company requirements. |
| | | 7.2 | Steps are taken within limits of own responsibility to ensure clearance inspection requirements are met and clearance certificate is gained from a competent person or licensed asbestos assessor. |
| | | 7.3 | Contribution is made within limits of own responsibility to the preparation and use of an emergency plan according to legislative and company requirements. |

# Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills

- communication and appropriate level of language skills to:
  - determine requirements
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - follow instructions
  - read and apply:
    - documentation from a variety of sources
    - drawings and specifications
  - use language and concepts appropriate to cultural differences

© Commonwealth of Australia, 2025 Future Skills Organisation

- initiative and enterprise skills to:
  - evaluate own actions and make judgements about performance and necessary improvements
  - identify and report faults in tools, equipment and materials to appropriate personnel
- planning and organising skills to:
  - set out work
  - recognise procedures, follow instructions and contribute to workplace responsibilities, such as current environmental and safety systems and the ARCP
- teamwork skills to:
  - coordinate own work with others to action tasks
  - relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- self-management skills to:
  - work independently and in teams to read and interpret relevant documentation and to prepare for non-friable asbestos removal tasks according to the recommended safe work method and ARCP
  - set up the asbestos removal area and removal site according to the safe work method and ARCP
  - check, fit and use PPE, and hand and power tools safely
  - apply general WHS procedures for construction work, including:
    - identifying, avoiding and eliminating electrical hazards
    - working safely at heights and in confined spaces
    - applying safe work practices to the use of tools appropriate to ACM removal
    - handling hazardous materials safely
    - applying safe work methods for the removal of non-friable asbestos
- follow correct cleaning, decontamination and disposal procedures

**Required knowledge**

- range of materials manufactured using asbestos, the type of asbestos used in each material, and the usual applications associated with the material, together with an understanding of:
  - health effects caused by exposure to ACM and requirement for safe handling and removal
  - health impacts on the community and requirement for safe handling and disposal
- general WHS procedures for construction work as required, including identifying and mitigating risks
- health hazards associated with friable ACM and circumstances that may change the nature of ACM from non-friable to friable, such as:
  - weathering
  - wear and tear
  - application of tools and equipment
  - accidental damage

© Commonwealth of Australia, 2025 Future Skills Organisation

- licensing requirements for the use of specific equipment, such as excavators
- safe work methods for the removal of non-friable asbestos
- requirements of current legislation and standards relating to asbestos safety, and the decontamination, transport and disposal of asbestos waste
- general construction terminology
- handling requirements of differing types of asbestos materials
- hazards associated with removal processes
- work area procedures
- job safety analysis (JSA) and safe work method statements (SWMS) if required for construction
- safety data sheets (SDS)
- materials storage and hazardous waste management
- method of operation, and cleaning, use and maintenance requirements of equipment
- plans, drawings and specifications, asbestos registers and register amendments
- quality requirements relating to the removal of non-friable asbestos
- risk assessment processes and contingency planning relating to the removal of non-friable asbestos
- techniques associated with enclosing and removing asbestos
- types, characteristics, uses and limitations of plant and equipment involved in enclosing and removing asbestos
- workplace and equipment safety requirements
- purpose and application of documentation for notification; and use of ARCP and clearance inspections

# Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

| | |
|---|---|
| Overview of assessment | This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, providing that simulated or project-based assessment techniques fully replicate workplace conditions, materials, activities, responsibilities and procedures. |
| Critical aspects for assessment and evidence required to demonstrate competency in this unit | A person should demonstrate the ability to:<br>• obtain and apply work instructions for the safe and correct removal of non-friable asbestos<br>• set up the work area and test equipment for use in the removal process of non-friable asbestos<br>• isolate the site prior to removal, complying with regulatory requirements |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | |
|---|---|
| | • remove non-friable asbestos safely and comply with regulatory requirements<br>• contain the ACM and ensure its handling and disposal are safe and comply with requirements<br>• decontaminate self, work equipment, and the work site safely and correctly<br>• complete documentation that supports the removal process within limits of own responsibility. |
| Context of and specific resources for assessment | This unit is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.<br><br>Assessment of essential underpinning knowledge will usually be conducted in an off-site context.<br><br>Assessment is to comply with relevant regulatory or Australian standards' requirements.<br><br>Resource implications for assessment include:<br>• an induction procedure and requirement<br>• realistic tasks or simulated tasks covering the mandatory task requirements<br>• relevant specifications and work instructions<br>• tools and equipment appropriate to applying safe work practices<br>• support materials appropriate to activity<br>• workplace instructions relating to safe work practices and addressing hazards and emergencies<br>• research resources, including industry-related systems information<br>• safety data sheets.<br><br>Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support. |
| Method of assessment | Assessment methods must:<br>• satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package<br>• include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application<br>• reinforce the integration of employability skills with workplace tasks and job roles<br>• confirm that competency is verified and able to be transferred to other circumstances and environments. |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | |
|---|---|
| | Validity and sufficiency of evidence requires that:<br>• competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace<br>• where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge<br>• all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.<br>Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.<br>Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff. |

# Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

| | |
|---|---|
| ***Safety requirements*** will be specified from a range of sources that include: | • asbestos removal control plan<br>• company policies and procedures, including:<br>  • accessing toilets and other amenities<br>  • managing work hours to minimise risk from tiredness<br>  • working in heat and avoiding heat stress<br>• JSA<br>• legislation and regulations, including the Code of Practice for the Safe Removal of Asbestos<br>• operating manuals and specifications for materials and equipment<br>• SWMS<br>• asbestos register. |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | |
|---|---|
| ***Tools and equipment*** may require separate licensing for use and may include: | • high efficiency particulate air (HEPA) vacuum cleaners to comply with AS3544-1988 and AS4260-1997 as amended from time to time<br>• atomiser and water spray bottles (not pressurised)<br>• hoses and spray fittings<br>• barricades, including tape, para-webbing and fencing<br>• bars (crow and pinch)<br>• bolt cutters<br>• buckets<br>• cold chisels<br>• excavators<br>• hand drills (manual and low-speed only)<br>• fire extinguishers<br>• hammers<br>• hand tools (full kit)<br>• ladders conforming to construction regulations<br>• scaffolds<br>• scrapers<br>• shovels and spades<br>• staple guns. |
| ***Personal protective equipment*** will be specified to the requirements of the job and must include: | • protective clothing, such as:<br>  • disposable coveralls with fitted hood and cuffs<br>  • safety footwear (pull-on, not lace-up)<br>  • protective eyewear<br>  • disposable or protective gloves<br>• correct face fitting and use of respiratory protective equipment (RPE)<br>• respiratory protection required for the job, including class P1 and P2 face masks<br>• spare sets of PPE. |
| ***Materials*** may include: | • approved and branded plastic bags, including heavy-duty polythene bags (200 μm minimum thickness)<br>• duct tape<br>• foam infill spray<br>• acrylic paint to seal ACM<br>• polyvinyl alcohol (PVA) adhesive as spray to seal ACM<br>• rags or other material wipes (used once)<br>• signs<br>• 200 μm unused (not recycled) plastic sheeting or drop sheet. |
| ***Non-friable asbestos containing materials*** | • asbestos cement<br>• asbestos cement moulded guttering<br>• asbestos cement sheets |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | |
|---|---|
| may include:<br><br>Note:<br>• Non-friable asbestos is also known as bonded asbestos<br>• ACM notionally listed as non-friable may become friable due to weathering or damage | • asbestos tiles<br>• bitumastic felts and materials<br>• adhesives and glues<br>• compressed asbestos cement panels<br>• floor vinyl covering<br>• mortar<br>• resinous backing board<br>• sealant mastic<br>• tape. |
| ***Workplace procedures*** may include: | • environmental requirements, such as:<br>  • clean-up management<br>  • dust and noise management<br>  • notification to occupants, neighbours and other affected parties<br>  • sedimentation control<br>  • vibration management<br>  • waste management, including the safe disposal of ACM<br>• quality requirements, such as:<br>  • internal company quality policy and standards<br>  • manufacturer specifications<br>  • relevant regulations, including Australian standards<br>  • workplace operations and procedures. |
| ***Project sites*** may include: | • residential, commercial, industrial and public buildings<br>• plant, equipment and fire boards (e.g. friction plant and gaskets)<br>• demolition sites<br>• electricity supply authority or work site<br>• fences<br>• ships and other forms of transport<br>• sites for new building development. |
| ***Utilities*** may include: | • air conditioning<br>• electricity<br>• water services. |
| ***Requirements to isolate the removal site***: | • will reflect the nature of the site<br>• must comply with legislative requirements and the ARCP<br>• may include:<br>  • using barriers<br>  • using signage<br>  • ensuring occupants are aware of the need to stay away |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | |
|---|---|
| | from the removal site<br>• ensuring isolation has occurred by a licensed electrician and that this is documented. |
| ***Asbestos is removed*** in a manner that complies with legislative and company requirements, and may include: | • wet method (most preferred):<br>• saturate material by gently spraying with water and surfactant mixture (PVA in water ratio of 5:1)<br>• remove materials in sections with the minimum amount of cutting and separation and using hand tools as appropriate<br>• place removed sections in appropriate containers or packaging<br>• Note: The application of the wet asbestos removal method requires the disconnection of the building's power supply and use of a temporary power source fitted with earth leakage and residual current device (RCD)<br>• dry method (least preferred):<br>• to be used only where conditions prohibit use of the wet spray method, i.e. in the vicinity of electrical conductors<br>• fully encapsulate the work area with plastic sheeting<br>• use air respirators appropriate to the job<br>• ensure removal methods minimise the production of airborne material, for example the use of asbestos vacuum cleaners for shadow vacuuming **(Note:** domestic vacuum cleaners even fitted with a HEPA filter are unsuitable)<br>• place removed material immediately in appropriate containers and dampen with sprayed mist. |
| ***Asbestos is contained*** and sealed using a range of techniques, including: | • double-bagging<br>• using heavy-duty polythene bags (200 μm minimum thickness) labelled with an appropriate warning<br>• using drums or bins in good condition with well-fitting lids labelled with appropriate warning signage or labels.<br><br>**Note:** If too large for a bin or bag, a skip or vehicle tray may be used provided it is double-lined with heavy-duty thick plastic sheeting. When ACMs are loaded on a truck tray, the ACMs must be wetted down and then fully wrapped and sealed with a layer of 200 μm sheeting or bagged. Labelling must occur. |
| ***Decontamination of asbestos removal workers is carried out***: | • **using a range of techniques, including**:<br>• 'buddy' vacuum**i**ng<br>• decontamination unit for large non-friable removals in certain circumstances<br>• wet wiping. |
| ***Documentation*** may | • air-monitoring results, where necessary |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | |
|---|---|
| include: | • asbestos register<br>• notification to regulator of asbestos removal work<br>• clearance certificates<br>• asbestos removal control plans<br>• procedures for the WHS management system and the emergency plan<br>• equipment test reports<br>• health-monitoring program<br>• RPE face fits<br>• competency training certificates. |

# CPCCLDG3001A Licence to perform dogging

## Modification History

Not Applicable

## Unit Descriptor

**Unit descriptor** This unit specifies the outcomes required to perform slinging techniques, including the selection and inspection of lifting gear and/or the directing of the crane operator in the movement of the load when the load is out of view of the crane/ operator for licensing purposes.

## Application of the Unit

**Application of the unit**

This unit covers the scope of work to demonstrate competency in the application of slinging techniques, selection and inspection of lifting gear and/or the directing of the crane/ operator in the movement of the load.

This unit is based upon the National Standard for Licensing Persons Performing High Risk Work.

This unit in its current form meets state and territory licensing requirements. Any alteration will result in a unit which is not acceptable to regulators for the purpose of licensing.

## Licensing/Regulatory Information

| | 5.6. Defects are reported and recorded according to procedures and appropriate action is taken. |

# Required Skills and Knowledge

## REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

Required skills for this unit are:

- communication techniques in the workplace including whistles, hand signals and use of fixed channel two-way radios
- communication skills at a level sufficient to communicate with other site personnel
- calculate rated capacity of lifting equipment
- apply different methods for making temporary connections to loads using fibre and synthetic ropes
- ability to interpret rated capacity and working load limit tags
- hazard identification and control
- slinging techniques
- selection and inspection of lifting equipment
- directing crane operators in the moving of loads in a safe manner, using a slewing crane
- inspection and care of a wide range of lifting equipment to appropriate Australian Standards and/or manufacturer's specifications.

### Required knowledge

Required knowledge for this unit is:

- appropriate mathematical procedures for estimation and measurement of loads
- basic knowledge of types of cranes and their functions
- Commonwealth, state or territory OHS legislation, standards and codes of practice relevant to the full range of techniques for undertaking dogging activities
- load stability and safety factors in line with manufacturer's specifications
- types of lifting equipment and slinging techniques for use, and their limitations and performance in a wide range of conditions (including but not limited to slings, beams, accessories, clamps, work-boxes, bins and pallets)
- understanding of the hierarchy of control.

# Range Statement

## RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

| | |
|---|---|
| ***Site informationmay include but not be limited to*** | • local conditions such as access and egress<br>• work method statements. |
| ***Hazards*** may include but not limited to: | • ground stability (eg. ground condition, recently filled trenches, slopes)<br>• overhead hazards (e.g. power lines, service pipes, trees, buildings, etc)<br>• insufficient lighting<br>• traffic (e.g. pedestrians, vehicles, plant)<br>• weather (e.g. wind, lightning, storms)<br>• other specific hazards (e.g. trip hazards, heights, radio interference, etc). |
| ***Hazard prevention/control measures*** | The systematic process of eliminating or reducing the risk to personnel and property through the application of controls.<br>It includes the application of the hierarchy of controls, including:<br>1. elimination.<br>2. substitution.<br>3. isolation.<br>4. engineered control measures.<br>5. safe work practices.<br>6. personal protective equipment. |
| ***Appropriate standard*** s may include: | • codes of practice<br>• legislation<br>• Australian Standards<br>• manufacturer's specifications<br>• industry standards. |

# CPCCLRG3001A Licence to perform rigging basic level

## Modification History

Not Applicable

## Unit Descriptor

**Unit descriptor**

This unit specifies the outcomes required to perform basic rigging work associated with movement of plant and equipment, steel erections, hoists (including mast climbing hoists), placement of pre-cast concrete, safety nets and static lines, perimeter safety screens and shutters; and cantilever crane loading platforms for licensing purposes.

## Application of the Unit

**Application of the unit**

This unit requires the applicant to be able plan the work, select and inspect equipment, set up task, erect structures and plant and dismantle structures and plant.

This unit is based upon the National Standard for Licensing Persons Performing High Risk Work.

This unit in its current form meets state and territory licensing requirements. Any alteration will result in a unit which is not acceptable to regulators for the purpose of licensing.

This unit has a pre-requisite requirement. This requirement may be met by either the successful completion of the unit *CPCCLDG3001A Licence to perform dogging* or holding a valid licence for dogging.

## Licensing/Regulatory Information

**Employability skills** This unit contains employability skills.

# Elements and Performance Criteria Pre-Content

| | |
|---|---|
| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |

# Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| 1. Plan job. | 1.1. Task to be undertaken is assessed.<br>1.2. Potential workplace ***hazards*** are identified.<br>1.3. ***Hazard control measures*** are identified consistent with ***appropriate standards*** to ensure the safety of personnel and equipment.<br>1.4. Site information is obtained.<br>1.5. All ***forces and loads*** associated with erecting and dismantling ***structures*** and ***associated plant*** are considered in consultation with ***appropriate personnel***.<br>1.6. ***Rigging equipment*** and ***associated equipment*** are identified in consultation with appropriate personnel according to ***procedures*** and site information. |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.7. *Safety equipment* is identified. |
| | 1.8. Appropriate ***communication methods*** are identified with appropriate personnel. |
| 2. Select and inspect equipment. | 2.1. Rigging equipment and associated equipment are selected and inspected according to procedures and the appropriate standard. |
| | 2.2. Safety equipment is selected and inspected according to procedures. |
| | 2.3. All defective rigging equipment, associated equipment and safety equipment is isolated, reported and recorded according to procedures. |
| | 2.4. ***Communication equipment*** is selected and inspected for serviceability (where applicable. |
| 3. Set up task. | 3.1. Appropriate ***hazard prevention***/***control measures*** are applied to the work area according to procedures. |
| | 3.2. ***Ground suitability*** is inspected and checked (where appropriate). |
| | 3.3. Site information is reviewed, interpreted and communicated to appropriate personnel and ***appropriate personnel***. |
| | 3.4. All forces and loads associated with erecting and dismantling structures and associated plant are determined in consultation with appropriate personnel. |
| | 3.5. Safety equipment is fitted and worn correctly (where appropriate). |
| | 3.6. Rigging equipment and associated plant are positioned for work application and stability according to procedures. |
| | 3.7. Methods of applying ***temporary connections*** using fibre rope are applied according to procedures and the appropriate standard. |
| 4. Erect structures and plant. | 4.1. Structures and associated plant are erected according to procedures and site information. |
| | 4.2. Stability of structures and associated plant is maintained during erection according to procedures. |
| | 4.3. Work is conducted safely at heights including safe and effective use of safety equipment. |
| | 4.4. Appropriate communication methods and communication equipment, are used to co-ordinate the tasks. |
| | 4.5. Associated plant and rigging equipment is used |

|---|---|
| | according to procedures and the appropriate standard.<br>4.6. Temporary guys, ties, propping and shoring, including ***flexible steel wire rope***, and tubing, are connected where required.<br>4.7. Associated equipment is used in a safe and appropriate manner.<br>4.8. The completed task is inspected according to the appropriate standard.<br>4.9. Excess materials are removed from the work area (where applicable). |
| 5. Dismantle structures and plant. | 5.1. Structures and associated plant are dismantled according to procedures and the appropriate standard.<br>5.2. Work is conducted safely at heights including safe and effective use of safety equipment.<br>5.3. Stability of structures and associated plant is maintained during dismantling according to procedures.<br>5.4. Rigging equipment, associated equipment, safety equipment and associated plant are inspected for damage and defects.<br>5.5. All defective rigging equipment, associated equipment, associated plant and safety equipment are isolated reported and recorded according to procedures.<br>5.6. Rigging equipment and associated equipment are stored. according to procedures and the appropriate standard.<br>5.7. Hazard prevention/control measures are removed (where appropriate). |

# Required Skills and Knowledge

## REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

© Commonwealth of Australia, 2025 Future Skills Organisation

## REQUIRED SKILLS AND KNOWLEDGE

Required skills for this unit are:

- ability to calculate Safe Working Load (SWL) and Working Load Limit (WLL)
- ability to erect and dismantle, level, plumb and stabilise associated plant and structures
- ability to work safely at heights including the correct application of safety equipment.
- accurate interpretation of basic structural charts and structural plans (site information)
- applying methods for making temporary connections of ropes using fibre and synthetic types
- apply methods of splicing and whipping fibre and synthetic ropes
- correct application and use of all rigging and associated equipment
- risk assessment and hazard control strategies
- interpersonal and communication skills at a level sufficient to site/workplace requirements. This includes the relevant communication methods and equipment.
- verify problems and equipment faults and demonstrate appropriate response.

### Required knowledge

Required knowledge for this unit is:

- appropriate mathematical procedures for estimation and measurement of loads
- ability to interpret manufacturer's specifications for all plant and equipment use in rigging operations
- knowledge of principles relating to all plant, equipment and structural stability
- knowledge of the types and functions of rigging, safety and associated equipment including an understanding of their limitations.
- organisational and workplace standards, requirements, policies and procedures for rigging
- understanding of the hierarchy of hazard identification and control
- relevant Commonwealth, state or territory and local government OHS legislation, standards and codes of practice for undertaking rigging activities
- understanding of inspection and maintenance requirements of a wide range of appropriate plant and equipment in line with Australian Standards or manufacturer's specifications
- estimation of ground bearing pressures of the full range of soil types and associated ground conditions for setting up plant and equipment.

# Evidence Guide

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment**

Successful assessment of this unit meets the competency requirement of the National Standard for licensing Persons Performing High Risk Work.

State/Territory OHS regulators have mandated the use of Assessment Instruments and Instructions for Assessment endorsed by the national body responsible for OHS matters for the assessment of this unit.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- comply with OHS licensing legislation.
- effectively communicate and work safely with others in the work area.
- effectively conduct risk assessment and management procedures.
- effectively complete the following tasks:-
  - inspection of all plant and equipment, and
  - installation of a fall arrest system (Static line), and
  - use of a safety harness / fall arrest system, and
  - installation of crane loading platforms and
  - installation of a safety net, and
  - installation of a shutter and safety screen, and
  - demonstrated ability to work safely at heights, and
  - erection of structural steel, and
  - erection of precast panel, and
  - set up and operation of a winch for load movement, and
  - installation of a materials hoist, or
  - installation of a mast climber.
- effectively demonstrate the following knots,

Rigging equipment and associated equipment are stored according to procedures and the appropriate standard.<br>5.7. Hazard prevention/control measures are removed (where appropriate) |

# Required Skills and Knowledge

## REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

Required skills for this unit are:

- ability to calculate Safe Working Load (SWL) and Working Load Limit (WLL)

© Commonwealth of Australia, 2025 Future Skills Organisation

### REQUIRED SKILLS AND KNOWLEDGE

- ability to erect and dismantle, level, plumb and stabilise associated plant and structures
- ability to work safely at heights including the correct application of safety equipment.
- accurate interpretation of structural charts and structural plans (site information)
- correct application and use of all rigging and associated equipment
- risk assessment and hazard control strategies
- interpersonal and communication skills at a level sufficient to site/workplace requirements. This includes the relevant communication methods and equipment.
- verify problems and equipment faults and demonstrate appropriate response.

### Required knowledge

Required knowledge for this unit is:

- appropriate mathematical procedures for estimation and measurement of loads
- ability to interpret manufacturer's specifications for all plant and equipment use in rigging operations
- knowledge of principles relating to all plant, equipment and structural stability
- knowledge of the types and functions of rigging, safety and associated equipment including an understanding of their limitations
- organisational and workplace standards, requirements, policies and procedures for rigging
- understanding of the hierarchy of hazard identification and control
- relevant Commonwealth, state or territory and local government OHS legislation, standards and codes of practice for undertaking rigging activities
- understanding of inspection and maintenance requirements of a wide range of appropriate plant and equipment in line with Australian Standards or manufacturer's specifications
- estimation of ground bearing pressures of the full range of soil types and associated ground conditions for setting up plant and equipment.

# Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

| | |
|---|---|
| **Overview of assessment** | Successful assessment of this unit meets the competency requirement of the National Standard |

# Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

| | |
|---|---|
| ***Hazards*** may include but not limited to: | • ground stability (e.g. ground condition, recently filled trenches, slopes)<br>• overhead hazards (e.g. power lines, service pipes) (**NB**: Minimum clearance distance from powerlines or electrical equipment as determined by relevant state authority or electrical supply authority)<br>• traffic (e.g. pedestrians, vehicles, other plant)<br>• insufficient lighting<br>• environmental conditions (e.g. wind, lightning, storms)<br>• other specific hazards (e.g. dangerous materials). |
| ***Hazard control measures***: | Refers to the systematic process of eliminating or reducing the risk to personnel and property through the application of controls.<br><br>It includes the application of the hierarchy of control, the six-step preference of control measures to manage and control risk:<br><br>• elimination<br>• substitution<br>• isolation<br>• engineering control measures<br>• using safe work practices<br>• personal protective equipment. |

# CPCCLRG4001A Licence to perform rigging advanced level

## Modification History

Not Applicable

## Unit Descriptor

**Unit descriptor**

This unit specifies the outcomes required to perform rigging work at the advanced level, which includes all the outcomes for rigging work at the basic and intermediate levels, and also includes rigging of gin poles and shear legs, flying foxes and cable ways, guyed derricks and structures, and suspended scaffolds and fabricated hung scaffolds for licensing purposes.

## Application of the Unit

**Application of the unit**

This unit requires the applicant to be able plan the work, select and inspect equipment, set up task, erect structures and plant and dismantle structures and plant.

This unit is based upon the National Standard for Licensing Persons Performing High Risk Work.

This unit in its current form meets state and territory licensing requirements. Any alteration will result in a unit which is not acceptable to regulators for the purpose of licensing.

This unit has a pre-requisite requirement. This requirement may be met by either the successful completion of the unit *CPCCLRG3002A Licence to perform rigging intermediate level* or holding a valid licence for intermediate rigging.

# Required Skills and Knowledge

## REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

Required skills for this unit are:

- ability to calculate Safe Working Load (SWL) and Working Load Limit (WLL)
- ability to erect and dismantle, level, plumb and stabilise associated plant

© Commonwealth of Australia, 2025 Future Skills Organisation

### REQUIRED SKILLS AND KNOWLEDGE

- ability to work safely at heights including the correct application of safety equipment.
- accurate interpretation of structural charts and structural plans (Site information)
- applying methods for making temporary connections of ropes using fibre and synthetic types
- correct application and use of all rigging and associated equipment
- risk assessment and hazard control strategies
- interpersonal and communication skills at a level sufficient to site/workplace requirements. This includes the relevant communication methods and equipment.
- verify problems and equipment faults and demonstrate appropriate response.

### Required knowledge

Required knowledge for this unit is:

- appropriate mathematical procedures for estimation and measurement of loads
- ability to interpret manufacturer's specifications for all plant and equipment use in rigging operations
- knowledge of principles relating to all plant, equipment and structural stability
- knowledge of the types and functions of rigging, safety and associated equipment including an understanding of their limitations
- organisational and workplace standards, requirements, policies and procedures for rigging
- understanding of the hierarchy of hazard identification and control
- relevant Commonwealth, state or territory and local government OHS legislation, standards and codes of practice for undertaking rigging activities
- understanding of inspection and maintenance requirements of a wide range of appropriate plant and equipment in line with Australian Standards or manufacturer's specifications
- estimation of ground bearing pressures of the full range of soil types and associated ground conditions for setting up plant and equipment.

## Unit Descriptor

**Unit descriptor**

This unit of competency specifies the outcomes required to undertake Occupational Health and Safety (OHS) induction training within the construction industry.

It requires the ability to demonstrate personal awareness of OHS legislative requirements, and the basic principles of risk management and prevention of injury and illness in the construction industry.

Licensing requirements will apply to this unit of competency depending on the regulatory requirements of each jurisdiction.

## Application of the Unit

**Application of the unit**

This unit of competency supports the attainment of the basic OHS knowledge required prior to undertaking designated work tasks within any of the sectors within the construction industry. The unit relates directly to the general induction training program specified by the *National Code of Practice for Induction for Construction Work* (ASCC 2007).

| | 3.3. ***Safety signs and symbols*** are identified and explained.<br>3.4. Procedures and ***relevant authorities*** for reporting hazards, ***incidents*** and injuries are identified. |
| 4. Identify OHS incident response procedures. | 4.1. ***General procedures*** for responding to incidents and ***emergencies*** are identified and explained.<br>4.2. Procedures for accessing first aid are identified.<br>4.3. Requirements for the selection and use of relevant ***personal protective equipment*** are identified and demonstrated.<br>4.4. ***Fire safety equipment*** is identified and discussed. |

# Required Skills and Knowledge

## REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

Required skills for this unit are:

- communication skills to:
  - clarify OHS legislative requirements
  - verbally report construction hazards and risks
  - ask effective questions
  - relay information to others
  - discuss OHS issues and information
- comprehension skills to:
  - explain the basic OHS legislative requirements which will be applicable to own work
  - explain the meaning of safety signs and symbols
  - identify common construction hazards
  - discuss the basic principles of risk management.

### Required knowledge

Required knowledge for this unit is:

- applicable Commonwealth, State or Territory OHS legislation, regulations, standards, codes of practice and industry standards/guidance notes relevant to own

© Commonwealth of Australia, 2025 Future Skills Organisation

### REQUIRED SKILLS AND KNOWLEDGE

work, role and responsibilities

- basic principles of risk management and assessment for construction work
- common construction hazards
- common construction safety signage and its meanings
- general construction emergency response and evacuation procedures
- general construction work activities that require licenses, tickets or certificates of competency
- general first aid response requirements
- general procedures for raising OHS issues
- general procedures for reporting OHS hazards, accidents, incidents, emergencies, injuries, near misses and dangerous occurrences
- general procedures for responding to hazards, incidents and injuries
- general workers' compensation and injury management requirements
- OHS hierarchy of controls
- OHS responsibilities and rights of duty holders, including:
  - persons in control of construction work/projects
  - employers and self-employed persons
  - supervisors
  - employees
  - designers
  - inspectors
  - manufacturers and suppliers
- own responsibilities to comply with safe work practices relating to:
  - housekeeping
  - identification of hazards
  - preventing bullying or harassment
  - smoking
  - use of amenities
  - use of drugs and alcohol
- role of OHS committees and representatives
- types of common personal protective equipment and fire safety equipment
- types of OHS information and documentation.

# Evidence Guide

### EVIDENCE GUIDE

© Commonwealth of Australia, 2025 Future Skills Organisation

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence must confirm personal awareness of the following:

- applicable OHS legislative and safety requirements for construction work including duty of care
- the range of common construction hazards and procedures for the assessment of risk and application of the hierarchy of control
- OHS communication processes, information and documentation including the role of OHS committees and representatives, the meaning of common safety signs and symbols, and procedures for reporting hazards, incidents and injuries
- general procedures for responding to incidents and emergencies including evacuation, first aid, fire safety equipment and PPE.

**Context of and specific resources for assessment**

- Resources must be available to support the program including participant materials and other information or equipment related to the skills and knowledge covered by the program.
- It is recommended that the assessment tool designed specifically to support this unit of competency will provide consistency in assessment outcomes.
- Where applicable, physical resources should include equipment modified for people with disabilities
- Access must be provided to appropriate assessment support when required.
- Assessment processes and techniques must be culturally appropriate, and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed
- In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in such a

| | |
|---|---|
| | manner as is appropriate to the oracy, language and literacy levels of the operator, any cultural issues that may affect responses to the questions, and reflecting the requirements of the competency and the work being performed. |
| **Method of assessment** | Assessment methods may include more than one of the following:<br>• practical assessment<br>• oral questioning<br>• written test<br>• work-based activities<br>• simulated project based activity |

# Range Statement

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

| | |
|---|---|
| ***OHS legislative requirements*** relate to: | • Australian standards<br>• construction industry OHS standards and guidelines<br>• duty of care<br>• health and safety representatives, committees and supervisors<br>• licences, tickets or certificates of competency<br>• National Code of Practice for Induction Training for Construction Work<br>• national safety standards<br>• OHS and welfare Acts and regulations<br>• safety codes of practice. |
| ***Duty of care requirements*** relate to: | • legal responsibility under duty of care to do everything reasonably practicable to protect others from harm |

© Commonwealth of Australia, 2025 Future Skills Organisation

## RANGE STATEMENT

| | |
|---|---|
| | • own responsibilities to comply with safe work practices, including activities that require licences, tickets or certificates of competency<br>• relevant state OHS requirements, including employers and self-employed persons, persons in control of the work site, construction supervisors, designers, manufacturers and suppliers, construction workers, subcontractors and inspectors. |
| ***Safe work practices*** include: | • access to site amenities, such as drinking water and toilets<br>• general requirements for safe use of plant and equipment<br>• general requirements for use of personal protective equipment and clothing<br>• housekeeping to ensure a clean, tidy and safer work area<br>• no drugs and alcohol at work<br>• preventing bullying and harassment<br>• smoking in designated areas<br>• storage and removal of debris. |
| ***Risk*** relates to: | • likelihood of a hazard causing injury or harm. |
| ***Principles of risk management*** include: | • assessing the risks involved<br>• consulting and reporting ensuring the involvement of relevant workers<br>• controlling the hazard<br>• identifying hazards<br>• reviewing to identify change or improvement. |
| ***Hazard*** relates to: | • any thing (including an intrinsic property of a thing) or situation with the potential to cause injury or harm. |
| ***Common construction hazards*** include: | • confined spaces<br>• electrical safety<br>• excavations, including trenches<br>• falling objects<br>• hazardous substances and dangerous goods<br>• HIV and other infectious diseases<br>• hot and cold working environments<br>• manual handling<br>• noise<br>• plant and equipment |

© Commonwealth of Australia, 2025 Future Skills Organisation

## RANGE STATEMENT

| | |
|---|---|
| | • traffic and mobile plant<br>• unplanned collapse<br>• ultraviolet (UV) radiation<br>• working at heights. |
| ***Measures for controlling*** risk to eliminate or minimise hazards in accordance with the hierarchy of control include: | • elimination<br>• substitution<br>• isolation<br>• engineering control<br>• administrative control<br>• personal protective equipment. |
| ***OHS communication processes*** include: | • discussions with OHS representatives<br>• OHS meetings<br>• OHS notices, newsletters, bulletins and correspondence<br>• OHS participative arrangements<br>• processes for raising OHS issues<br>• toolbox talks<br>• workplace consultation relating to OHS issues and changes. |
| ***OHS information and documentation*** includes: | • accident and incident reports<br>• Acts and regulations<br>• Australian standards<br>• codes of practice<br>• construction documentation and plans<br>• emergency information contact<br>• evacuation plans<br>• guidance notes<br>• job safety analyses<br>• labels<br>• material safety data sheets (MSDS)<br>• proformas for reporting hazards, incidents and injuries<br>• reports of near misses and dangerous occurrences<br>• risk assessments<br>• safe work method statements<br>• safety meeting minutes<br>• site safety inspection reports. |
| ***Designated OHS personnel*** includes: | • first aid officers<br>• OHS committee members |

# CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry

## Modification History

Not Applicable

## Unit Descriptor

**Unit descriptor** This unit of competency specifies the outcomes required to carry out OHS requirements through safe work practices at any on or off-site construction workplace. It requires the performance of work in a safe manner through awareness of risks and work requirements, and the planning and performance of safe work practices with concern for personal safety and the safety of others.

## Application of the Unit

**Application of the unit** This unit of competency covers fundamental OHS necessary to undertake work tasks within any sector in the construction industry. It includes the identification of hazardous materials, including asbestos, and compliance with legislated work safety practices. It does not cover removal of asbestos, which is a licensed activity.

The unit relates directly to the general induction training program specified by the *National Code of Practice for Induction for Construction Work* (ASCC 2007) required to enter a construction work site. Completion of unit CPCCOHS1001A covers this requirement.

| ELEMENT | PERFORMANCE CRITERIA |
| --- | --- |
| | various ***types of fire*** and other emergencies are followed, including identification or use, if appropriate, of ***fire equipment*** within scope of responsibilities. |
| | 5.3. ***Emergency response and evacuation procedures*** are known, practised and carried out effectively when required. |
| | 5.4. Emergency first aid treatment of minor injuries is carried out correctly and details of any treatment administered are reported accurately to designated personnel as soon as possible. |

# Required Skills and Knowledge

## REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

Required skills for this unit are:

- ability to accurately recognise OHS hazards, including asbestos and take all opportunities to alleviate safety problems in a variety of construction work sites and environments
- capacity to deal calmly and effectively with any potential safety problems and work closely with other team members and supervisors to ensure safe working conditions are maintained
- communication skills to:
  - determine and report hazards and risks
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - follow instructions
  - read and interpret:
    - MSDS, JSA and safe work method statements
    - other relevant documentation
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication, such as hand signals
  - written skills to contribute to reports
- identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials

© Commonwealth of Australia, 2025 Future Skills Organisation

## REQUIRED SKILLS AND KNOWLEDGE

- organisational skills, including the ability to plan and set out work
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technological skills to:
  - use a range of mobile technology, such as two-way radio and mobile phones
  - voice and hand signals to access and understand site-specific instructions.

### Required knowledge

Required knowledge for this unit is:

- asbestos management code prevention of exposure
- basic first aid procedures
- common construction industry terminology
- common workplace safety hazards and risks and procedures for reporting these to designated personnel
- construction industry communications equipment and use
- construction industry health and safety signage
- emergency response and evacuation procedures
- JSA and safe work method statements
- MSDS
- OHS hierarchy of control and role of OHS committees and representatives
- relevant legislation, regulations and workplace requirements relating to OHS, including hazard reduction and personal safety, including duty of care responsibilities, workers' compensation and injury management requirements
- safe manual handling techniques
- safe work practices in normal working environment
- safety equipment, policies and requirements for working in confined spaces and at height, including on rooves
- tools and equipment prohibited for use near identified asbestos-containing materials (ACM)
- types of fires and basic firefighting equipment
- types, possible location and risks of ACM, including serpentine and amphibole groups, and their use in common building materials
- types, purpose and use of construction industry personal protective equipment and clothing
- workplace and equipment safety requirements.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Evidence Guide

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment**

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- correctly locate, interpret and apply relevant information, standards and specifications
- comply with a site safety plan, organisational policies, OHS regulations and state and territory legislation applicable to workplace operations, including quality requirements
- correctly identify ACM and policies and procedures for reporting this to designated personnel
- effectively communicate and work safely with others
- apply general procedures for responding to incidents and reporting hazards and injuries
- select and use firefighting equipment to extinguish a simulated mechanical fire
- evacuate a site through simulated response to an emergency, complying with workplace procedures.

**Context of and specific resources for assessment**

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the mandatory task requirements

© Commonwealth of Australia, 2025 Future Skills Organisation

## EVIDENCE GUIDE

- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

**Method of assessment**

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct,

### EVIDENCE GUIDE

| | |
|---|---|
| | indirect and supplementary evidence.<br><br>Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.<br><br>Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff. |

# Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Hazards*** include:

- chemical spills
- electrical safety work in confined spaces
- excavations, including trenches
- falling objects
- fires
- gases
- hazardous materials
- high or very low temperatures
- HIV and other infectious diseases
- liquids under pressure
- manual handling
- moving machinery and equipment
- noise, dust and vapours
- overhanging beams
- protrusions
- sharp equipment
- traffic
- ultraviolet (UV) radiation
- unplanned collapse

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| **3 Present evidence**. | 3.1 ***Rules of evidence***, procedures and ***protocols*** relevant to the jurisdiction involved are observed and adhered to throughout proceedings. |
| | 3.2 Personal presentation, manner and language are consistent with court protocols. |
| | 3.3 Evidence is admissible and presented in a clear, concise and unambiguous manner and complies with rules of evidence. |
| | 3.4 Specialist opinion within own level of qualification and expertise is provided on request in accordance with organisational procedures. |
| | 3.5 Outcomes of proceedings and associated documentation and evidence are noted, filed and stored in accordance with legislative requirements. |

# Required Skills and Knowledge

## REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge and their level required for this unit.

### Required skills

- adhere to court protocols and procedures
- check and review documentation for accuracy, spelling and grammar
- communicate effectively with people from different social, cultural and ethnic backgrounds and of varying physical and mental abilities
- communicate verbally and non-verbally in a clear and concise manner
- identify and comply with applicable legal and procedural requirements, including licensing requirements
- identify relevant and valid information as admissible evidence
- maintain, store and preserve evidence
- prepare documentation using appropriate structure and language
- read, analyse and interpret information
- record and accurately report information
- research, select and organise information
- select and use information technology appropriate to task
- store and preserve evidence
- use a range of business equipment and technology appropriate to meet task requirements.
- verify validity of information

© Commonwealth of Australia, 2025 Future Skills Organisation

### REQUIRED SKILLS AND KNOWLEDGE

- write reports using formal structure and language.

### Required knowledge

- briefing, documentation and preparation requirements
- court protocols and procedures relevant to the jurisdiction
- document and evidence management systems
- evidence preparation and presentation requirements
- general principles regarding the admissibility of evidence in courts
- organisation policies and procedures relating to own role and responsibilities and providing specialist opinion
- principles of effective communication
- privacy and confidentiality requirements
- procedures for handling and managing evidential exhibits
- relevant industry codes of practice and legislation including 'rules of evidence' and 'continuity of evidence'
- requirements for handling and managing evidential exhibits
- storage requirements for information that is susceptible to spoil or damage (film, computer tapes)
- techniques to verify and validate information.

# Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

| | |
|---|---|
| **Critical aspects for assessment and evidence required to demonstrate competency in this unit** | A person who demonstrates competency in this unit must be able to provide evidence of:<br>• sourcing, organising and confirming validity of information<br>• following up outcomes of proceedings and feedback, reviewing implications as the basis for appropriate actions to be implemented<br>• managing and storing evidence and material to ensure its preservation, and completing relevant documentation in compliance with applicable legislation and licensing requirements<br>• presenting evidence in a clear, concise and unambiguous manner and, as required, providing specialist opinion within |

# Range Statement

## RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Legislative requirements may relate to***:

- apprehension and powers of arrest
- Australian standards and quality assurance requirements
- counter-terrorism
- crowd control and control of persons under the influence of intoxicating substances
- force continuum, use of force guidelines
- general 'duty of care' responsibilities
- inspection of people and property, and search and seizure of goods
- licensing or certification requirements
- privacy and confidentiality
- relevant commonwealth, state, territory legislation, codes and national standards for:
  - anti-discrimination
  - cultural and ethnic diversity
  - environmental issues
  - equal employment opportunity
  - industrial relations
  - Occupational Health and Safety (OHS)
- relevant industry codes of practice
- trespass and the removal of persons
- use of restraints and weapons:
  - batons
  - firearms
  - handcuffs
  - spray.

***Organisational requirements may relate to***:

- access and equity policies, principles and practices
- business and performance plans
- client service standards
- code of conduct, code of ethics
- communication and reporting procedures
- complaint and dispute resolution procedures

© Commonwealth of Australia, 2025 Future Skills Organisation

- emergency and evacuation procedures
- employer and employee rights and responsibilities
- OHS policies, procedures and programs
- own role, responsibility and authority
- personal and professional development
- privacy and confidentiality of information
- quality assurance and continuous improvement processes and standards
- resource parameters and procedures
- roles, functions and responsibilities of security personnel
- storage and disposal of information.

***Evidence may include***:

- audio or video recordings
- charts
- documents
- drawings
- facts
- photographs or images
- physical items (eg specimens, samples)
- statements
- testimonies.

***Relevant information may relate to***:

- admissible evidence
- computer-based information
- data
- original and back-up video or audio tapes
- original, copy or negative film or photographs
- physical items
- precedents
- records of interview
- reports or documentation
- specimens and samples
- tape recordings
- witness statements.

***Evidence management may involve***:

- constant reviews during an investigation
- continuity of possession
- labelling
- protection and storing of evidence
- referral to prosecution organisations at any stage
- systematic recording such as dating and numbering
- using written or electronic database systems.

***Courts* may include**:

- criminal, coronial and civil
- district
- federal

© Commonwealth of Australia, 2025 Future Skills Organisation

- Human Rights and Equal Opportunity Commission
- Industrial Relations Commission
- Land and Environment Court
- local
- magistrates
- Royal Commissions
- supreme
- tribunals.

***Court arrangements* may relate to**:

- confirmation of evidence requirements
- date, location and time of proceedings
- documentation requirements.

***Relevant persons* may include**:

- clients
- colleagues
- judicial representatives
- legal representatives
- police
- supervisor.

***Documentation and exhibits* may relate to**:

- affidavits
- items of evidence
- media footage
- photographs
- radio and telephone records or logs
- reports
- reports of incidents
- transcripts of conversation.

***Rules of evidence* may involve**:

- admissibility
- contemporaneousness.

**Court *protocols* may relate to**:

- examination and cross-examination procedures
- forms of address
- general demeanour
- impartiality
- punctuality
- readiness of self and evidence
- respect for people and offices held
- standards of dress, physical appearance
- voice clarity and language.

**Unit sector** Security

# Competency field

**Competency field** Operations

© Commonwealth of Australia, 2025 Future Skills Organisation

# CPPSEC5003A Assess security risk management options

## Modification History

Not Applicable

## Unit Descriptor

**Unit descriptor**

This unit of competency specifies the outcomes required to assess options for the management of security risk in an organisational environment. It requires the ability to compare treatment options against identified security risks, rank suitable treatment options, and prepare and present recommended options and supporting analysis.

This unit may form part of the licensing requirements for persons engaged in risk assessment operations in those states and territories where these are regulated activities.

## Application of the Unit

**Application of the unit**

This unit of competency has application in those work roles involving the assessment of security risks in an organisational environment. Competency requires legal and operational knowledge applicable to relevant sectors of the security industry. The knowledge and skills described in this unit are to be applied within relevant legislative and organisational guidelines.

## Licensing/Regulatory Information

Refer to Unit Descriptor

## Pre-Requisites

# Employability Skills Information

**Employability skills** This unit contains employability skills.

# Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge section and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

# Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| **1 Determine security risk**. | 1.1 Applicable provisions of ***legislative*** and ***organisational requirements***, and ***relevant standards*** for assessment activities are identified and complied with. |
| | 1.2 Type and nature of ***security risks*** are determined based on an accurate and current assessment of the client's ***operating environment*** and core business operations. |
| | 1.3 Security risks are ranked in terms of degree of risk and linked to potentially suitable ***treatment options***. |
| | 1.4 Degree of risk is determined by an assessment of current and valid data. |
| **2 Identify and assess treatment options**. | 2.1 Treatment options are identified and confirmed to be commensurate with the identified type, ***nature and cause*** of security risk. |
| | 2.2 Treatment options applied in a similar context are researched and assessed for effectiveness against documented and ***verifiable evidence***. |
| | 2.3 ***Criteria*** for assessment of risks against treatment options are consistent with recognised industry practice and relevant standards. |
| | 2.4 Treatment options appropriate to the full range of potential security risks are selected and prioritised according to established criteria. |
| **3 Review and** | 3.1 A report outlining assessment findings and recommended treatment options is prepared and ***presented*** to relevant |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| **present findings**. | persons.<br>3.2 Analysis and recommendations are clear, coherent and consistent with ***terms of reference*** and supported by verifiable evidence.<br>3.3 Advice outlining possible consequences of not implementing recommended treatment options is included in the analysis.<br>3.4 Effective ***interpersonal techniques*** and presentation procedures are used to enhance understanding and acceptance of recommended treatment options. |

# Required Skills and Knowledge

## REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge and their level required for this unit.

### Required skills

- accurately determine identified risks and threats
- apply reasoning and logical analysis in assessment processes
- assess risks and threats
- coaching and mentoring to provide support to colleagues
- collate numerical data
- communicate in a clear and concise manner
- determine suitability of treatment option against security risk
- determine type and nature of security risks
- identify and assess assets
- prepare and present verbal and written reports
- prioritise tasks and organise schedules
- prioritise treatment options in terms of degree of security risk
- provide written communication to a standard required for compiling reports and summarising information
- relate to persons of different social and cultural backgrounds and varying physical and mental abilities
- research and analyse information
- source and access information
- use a variety of problem-solving techniques
- use business and information technology.

### Required knowledge

© Commonwealth of Australia, 2025 Future Skills Organisation

### REQUIRED SKILLS AND KNOWLEDGE

- applicable Australian standards, industry codes of practice and legislation including Occupational Health and Safety (OHS)
- basic understanding of insurance in terms of acceptable risks, premium ranges and liabilities
- client's operating environment and business operations
- concept of integrated security measures including physical security; information technology security, and security of personnel and information
- concept of litigation
- current security systems and technologies available expertise
- distinction between information and intelligence
- preparation of documentation and presentation procedures
- principles of basic statistics and numeracy
- principles of effective communication
- principles of AS/NZS 4360: 2004 Risk management and related guidelines
- privacy and confidentiality requirements
- relevant industry codes of practice
- relevant legislation and regulations including licensing requirements
- risk assessment techniques
- types of treatment options appropriate to the range of security risks and threats applicable to premises and businesses.

# Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

A person who demonstrates competency in this unit must be able to provide evidence of understanding and knowledge of the following:

- evaluating risks against developed criteria and selecting treatment options commensurate with the level and nature of potential risks based on the principles of AS/NZS 4360: 2004
- identifying the nature, cause and range of potential security risks to client based on an assessment of valid and relevant data
- preparing and presenting an analysis and options related to management of security risks and using effective interpersonal skills to enhance client understanding and acceptance of recommendations.

- organisational image
- political influences
- terms of reference
- timeframes.

***Presentation* may involve**:

- charts and statistical reports
- computer equipment including data projectors
- models
- real-time demonstration
- simulation
- the use of audio and video.

***Terms of reference* may relate to**:

- client expectations
- cost
- limitations and exclusions of access to information
- lines of authority
- operational environment
- roles and responsibilities
- scale of the assessment eg full-scale operation or limited to a particular section or operation of the company
- security and other clearances
- timeframe.

***Interpersonal techniques may involve***:

- active listening
- being non-judgemental
- being respectful and non-discriminatory
- constructive feedback
- control of tone of voice and body language
- culturally aware and sensitive use of language and concepts
- demonstrating flexibility and willingness to negotiate
- effective verbal and non-verbal communication
- maintaining professionalism
- providing sufficient time for questions and responses
- reflection and summarising
- two-way interaction
- use of plain English
- use of positive, confident and cooperative language.

## Unit Descriptor

**Unit descriptor**

This unit of competency specifies the outcomes required to plan and prepare for security risks. It requires the ability to develop a security risk management plan which incorporates suitable strategies for risk identification and treatment, and contingency arrangements compatible to identified risk.

This unit may form part of the licensing requirements for persons engaged in security operations in those states and territories where these are regulated activities.

## Application of the Unit

**Application of the unit**

This unit of competency has wide application in a range of managerial roles in the security industry. Work is performed under minimal supervision and competency requires a high level of judgement and decision-making. The knowledge and skills described in this unit are to be applied within relevant legislative and organisational guidelines.

## Licensing/Regulatory Information

# Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge section and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

# Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| **1 Evaluate security risks**. | 1.1 ***Security risks*** are identified and consequences interpreted in accordance with client, ***organisational*** and ***legislative requirements*** and ***relevant standards***.<br>1.2 Acceptable and unacceptable risks are clearly distinguished and confirmed.<br>1.3 High priority risks are emphasised and specified to ensure the development of appropriate ***controls***.<br>1.4 Existing controls are evaluated to determine impact on risk occurrence and required modifications identified. |
| **2 Develop action plans**. | 2.1 Action plans are developed identifying key tasks, activities and resources to achieve security risk management objectives.<br>2.2 ***Type of risk*** associated with security context is identified and appropriate controls incorporated into planning processes.<br>2.3 Communication and reporting arrangements for maintaining currency of action plans are established.<br>2.4 ***Contingency arrangements*** for actions are developed and incorporated into plans. |
| **3 Design treatment options**. | 3.1 Operating environment monitored to confirm potential and real risks, threats and required treatments.<br>3.2 ***Treatment options*** are selected in line with available organisational practices, and implications researched, clarified and approved by ***relevant persons***.<br>3.3 Feasible treatment options are documented and costed to ensure compatibility with nature of risk and client requirements. |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 3.4 Treatment options are linked to whole or part of security risks and verified with clients for suitability to security context. |
| | 3.5 ***Tests*** on treatment options are conducted to determine applicability in the field, and results statistically analysed to confirm effectiveness of treatments. |
| **4 Develop security risk management plan**. | 4.1 ***Management requirements*** are identified and accounted for in development of security risk management plan. |
| | 4.2 Procedures for monitoring and review of security risk management activities are developed to ensure continuous improvement. |
| | 4.3 Security risk management plan is developed incorporating all ***relevant information*** in line with appropriate ***format*** and relevant standards. |
| | 4.4 Plan is finalised and presented to client for review and approval in accordance with organisational procedures. |

# Required Skills and Knowledge

## REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge and their level required for this unit.

### Required skills

- access and use workplace information
- active listening
- adapt personal communication style to a variety of situations
- analyse and evaluate information and data
- coaching and mentoring to provide support to colleagues
- collate numerical data
- communicate in a clear and concise manner
- design treatment options and tests
- negotiation
- numeracy skills to calculate resources and costings
- planning
- reading to interpret complex information
- relate to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities
- solve problems to deal with complex and non routine difficulties
- use technology to research, analyse and report information

© Commonwealth of Australia, 2025 Future Skills Organisation

### REQUIRED SKILLS AND KNOWLEDGE

- writing to develop complex reports.

### Required knowledge

- applicable Occupational Health and Safety (OHS) licensing and legislative compliance requirements
- application of the hierarchy of control
- approved communication terminology and call signs
- available support agencies and the types of services offered
- basic methods for statistical analysis and presentation of statistical data
- difference between negative and positive language
- differences between written and spoken English
- how to read and use body language to gain confidence of others
- how to record information which may be used for legal purposes
- how to safeguard confidential information
- how to use business equipment to present information
- negotiation techniques
- OHS implications relating to use of guard dogs, apprehension or arrest of persons, use of firearms, use of restraints, handcuffs, batons and spray
- organisational standards for the presentation and maintenance of written information
- principles of AS/NZS 4360: 2004 Risk management
- risk management principles and practices
- sources of supply of security equipment or systems
- tactical response measures
- use of force guidelines.

# Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

| | |
|---|---|
| **Critical aspects for assessment and evidence required to demonstrate competency in this unit** | A person who demonstrates competency in this unit must be able to provide evidence of:<br>• identifying and evaluating security risks and control measures in compliance with client, organisational and legislative requirements<br>• designing and developing effective action plans which |

© Commonwealth of Australia, 2025 Future Skills Organisation

incorporate strategies for treating risks, contingency arrangements, key tasks and resources, and communication and reporting
- designing and testing risk treatment options which are compatible with nature of risk and client requirements, and conducting an analysis of the results to confirm effectiveness of treatments
- developing a comprehensive risk management plan in an appropriate format which incorporates a broad range of relevant information, considers implementation issues, and incorporates continuous improvement mechanisms based on the principles of AS/NZS 4360:2004.

**Context of and specific resources for assessment**

Context of assessment includes:

- a setting in the workplace or environment that simulates the conditions of performance described in the elements, performance criteria and range statement.

Resource implications for assessment include:

- access to a registered provider of assessment services
- access to a suitable venue and equipment
- access to plain English version of relevant statutes and procedures
- assessment instruments including personal planner and assessment record book
- work schedules, organisational policies and duty statements.

Reasonable adjustments must be made to assessment processes where required for people with disabilities. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

**Method of assessment**

This unit of competency should be assessed using questioning of underpinning knowledge and skills.

**Guidance information for assessment**

Assessment processes and techniques must be culturally appropriate and suitable to the language, literacy and numeracy capacity of the candidate and the competency being assessed. In all cases where practical assessment is used, it should be combined with targeted questioning to assess the underpinning knowledge.

Oral questioning or written assessment may be used to assess underpinning knowledge. In assessment situations where the candidate is offered a choice between oral questioning and written assessment, questions are to be identical.

Supplementary evidence may be obtained from relevant authenticated correspondence from existing supervisors, team leaders or specialist training staff.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Range Statement

## RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Security risks may relate to***:

- biological hazards
- chemical spills
- client contact
- electrical faults
- explosives
- financial viability
- injury to personnel
- noise, light, heat, smoke
- persons carrying weapons
- persons causing a public nuisance
- persons demonstrating suspicious behaviour
- persons suffering from emotional or physical distress
- persons under the influence of intoxicating substances
- persons with criminal intent
- persons, vehicles and equipment in unsuitable locations
- property or people
- security systems
- suspicious packages or substances
- systems or process failures
- terrorism
- violence or physical threats.

***Risk* relates to**:

- the chance of something happening that will have an impact on objectives.

***Organisational requirements may relate to***:

- client service standards
- implementation of OHS system
- policies for ensuring privacy and confidentiality of information
- procedures for archiving electronic and hard-copy records
- procedures for recording, storing and destroying information

© Commonwealth of Australia, 2025 Future Skills Organisation

- standard of language, literacy and numeracy required
- use of organisational equipment and resources.

***Legislative requirements may relate to***:

- anti-discrimination and diversity
- Australian standards, codes of practice and regulations
- award and enterprise agreements
- duty of care
- evidence collection
- licensing arrangements and certification requirements
- OHS issue resolution
- relevant commonwealth, state and territory OHS legislation, codes of practice and regulations
- roles and responsibilities of OHS representatives and committees
- trade practices
- use of force.

***Relevant standards***:

- must include AS/NZS 4360: 2004 Risk management
- may relate to:
  - AS2630-1983 Guide to the selection and application of intruder alarm systems for domestic and business premises
  - HB 167:2006 Security Risk Management
  - HB 436 Risk Management Guidelines - Companion to AS/NZS 4360
  - HB 231:2000 Information security risk management guidelines.

***Controls* may include**:

- communication
- deployment of specialist expertise or equipment
- development of procedures
- monitoring and surveillance
- physical attendance and security
- staff ratios and resource deployment
- training of personnel.

***Type of risk may be***:

- intermediate
- likely to occur
- major
- minor
- physical
- potentially avoidable
- potentially unavoidable
- property related
- unlikely to occur.

***Contingency***

- approvals and licenses

# CPPSEC5005A Implement security risk management plan

## Modification History

Not Applicable

## Unit Descriptor

**Unit descriptor**

This unit of competency specifies the outcomes required to facilitate implementation of a security risk management plan. It requires the ability to allocate roles and responsibilities, coordinate and monitor implementation procedures, and evaluate the effectiveness of treatment options.

This unit may form part of the licensing requirements for persons engaged in risk assessment operations in those states and territories where these are regulated activities.

## Application of the Unit

**Application of the unit**

This unit of competency has wide application in a range of managerial roles in the security industry. Work is performed under minimal supervision and competency requires a high level of judgement and decision-making. The knowledge and skills described in this unit are to be applied within relevant legislative and organisational guidelines.

## Licensing/Regulatory Information

# Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge section and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

# Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| **1 Organise functions and tasks**. | 1.1 Applicable provisions of ***legislative*** and ***organisational requirements***, and ***relevant standards*** for ***risk*** assessment activities are identified and complied with. |
| | 1.2 ***Roles and responsibilities*** associated with the implementation of the security risk management plan are clearly defined and articulated to ***relevant persons***. |
| | 1.3 ***Activities*** and targets are linked to achievement of milestones and outcomes in project action plans. |
| | 1.4 ***Resources***, ***equipment and materials*** to assist plan implementation are suitable to project purposes and available within specified timelines. |
| | 1.5 Information related to the implementation of the plan is accurately and promptly distributed using established communication channels. |
| | 1.6 Confidentiality requirements are confirmed and maintained in accordance with client and organisational requirements. |
| **2 Monitor risk context**. | 2.1 Emerging risks or threats to assets are monitored and assessed to maintain ongoing suitability of implemented security risk ***treatment options***. |
| | 2.2 Changes to operating environment are monitored and corrective measures determined and incorporated into the plan as required. |
| | 2.3 ***Targets and outcomes*** are regularly reviewed and evaluated to ensure achievement of ***project aims*** based on relevant standards. |
| | 2.4 Existence and occurrence of risks are accurately and |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | comprehensively documented providing an assessment of the type, nature and cause. |
| | 2.5 Application of contingencies and corrective measures are accurately documented. |
| **3 Review effectiveness of treatment options**. | 3.1 Long and short-term options are costed to ensure an accurate estimate of resources is allocated to support the plans. |
| | 3.2 Discrepancies between treatment options and risk incidence are monitored and addressed through appropriate modifications to plans. |
| | 3.3 Stages of implementation are identified and resources and options are coordinated to ensure access and availability. |
| | 3.4 Corrective measures are developed, tested and incorporated into the risk management plan. |
| | 3.5 Feedback on effectiveness of treatment options is sought and provided to relevant personnel. |

# Required Skills and Knowledge

## REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge and their level required for this unit.

### Required skills

- allocate work tasks and functions
- coaching and mentoring to provide support to colleagues
- collate and analyse numerical data
- communicate in a clear and concise manner
- delegate roles and responsibilities
- determine suitability of treatment option against security risk
- determine type and nature of security risks and threats
- manage projects
- monitor implementation procedures
- monitor risk context and identify emerging risks or threats to assets
- prepare and present verbal and written reports
- prioritise tasks and organise schedules
- prioritise treatment options in terms of degree of security risk
- provide written communication to a standard required for compiling reports and summarising information

© Commonwealth of Australia, 2025 Future Skills Organisation

### REQUIRED SKILLS AND KNOWLEDGE

- relate to persons of different social and cultural backgrounds and varying physical and mental abilities
- research and analyse data and information
- summarise information
- use a variety of problem-solving techniques
- use business equipment and technology.

### Required knowledge

- availability and capability of project management software
- concept of integrated security measures including physical security; information technology security, and security of personnel and information
- current security systems and technologies and available expertise
- operating environment and business operations
- preparation of documentation procedures
- principles of effective communication
- principles of AS/NZS 4360: 2004 Risk management and related guidelines
- privacy and confidentiality requirements
- process of security risk management
- relevant legislation and regulations including licensing requirements
- risk assessment techniques and processes
- sources of supply of security equipment and systems
- types of treatment options appropriate to the range of security risks and threats applicable to premises and businesses.

# Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

A person who demonstrates competency in this unit must be able to provide evidence of:

- monitoring emerging risks to ensure ongoing suitability of risk management plan based on principles of AS/NZS 4360: 2004
- efficient allocation of resources to support risk management plan
- effectively communicating designated roles, responsibilities and work schedules to security personnel

© Commonwealth of Australia, 2025 Future Skills Organisation

- preparing documentation and guidelines with a clear explanation of the incidence, nature and causes of risks and appropriate contingency arrangements
- systematically reviewing the effectiveness of treatment options and making appropriate modifications as required to address any discrepancies between treatment options and risk incidence.

**Context of and specific resources for assessment**

Context of assessment includes:

- a setting in the workplace or environment that simulates the conditions of performance described in the elements, performance criteria and range statement.

Resource implications for assessment include:

- access to a registered provider of assessment services
- access to a suitable venue and equipment
- access to plain English version of relevant statutes and procedures
- assessment instruments including personal planner and assessment record book
- work schedules, organisational policies and duty statements.

Reasonable adjustments must be made to assessment processes where required for people with disabilities. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

**Method of assessment**

This unit of competency should be assessed using questioning of underpinning knowledge and skills.

**Guidance information for assessment**

Assessment processes and techniques must be culturally appropriate and suitable to the language, literacy and numeracy capacity of the candidate and the competency being assessed. In all cases where practical assessment is used, it should be combined with targeted questioning to assess the underpinning knowledge.

Oral questioning or written assessment may be used to assess underpinning knowledge. In assessment situations where the candidate is offered a choice between oral questioning and written assessment, questions are to be identical.

Supplementary evidence may be obtained from relevant authenticated correspondence from existing supervisors, team leaders or specialist training staff.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Range Statement

## RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Legislative requirements may relate to***:

- apprehension and powers of arrest
- Australian standards and quality assurance requirements
- cabling
- counter-terrorism
- crowd control and control of persons under the influence of intoxicating substances
- Force continuum, use of force guidelines
- general 'duty of care' responsibilities
- inspection of people and property, and search and seizure of goods
- licensing or certification requirements
- privacy and confidentiality
- relevant commonwealth, state and territory legislation, codes and national standards for:
  - anti-discrimination
  - cultural and ethnic diversity
  - environmental issues
  - equal employment opportunity
  - industrial relations
  - Occupational Health and Safety (OHS)
- relevant industry codes of practice
- surveillance
- telecommunications
- trespass and the removal of persons
- use of listening and recording devices
- use of restraints and weapons:
  - batons
  - firearms
  - handcuffs
  - spray.

***Organisational requirements may***

- access and equity policies, principles and practices
- business and performance plans

© Commonwealth of Australia, 2025 Future Skills Organisation

***relate to***:

- client service standards
- code of conduct, code of ethics
- communication and reporting procedures
- complaint and dispute resolution procedures
- emergency and evacuation procedures
- employer and employee rights and responsibilities
- OHS policies, procedures and programs
- own role, responsibility and authority
- personal and professional development
- privacy and confidentiality of information
- quality assurance and continuous improvement processes and standards
- resource parameters and procedures
- roles, functions and responsibilities of security personnel
- storage and disposal of information.

***Relevant standards***:

- must include AS/NZS 4360: 2004 Risk management
- may relate to:
  - AS2630-1983 Guide to the selection and application of intruder alarm systems for domestic and business premises
  - HB 167:2006 Security Risk Management
  - HB 436 Risk Management Guidelines - Companion to AS/NZS 4360
  - HB 231:2000 Information security risk management guidelines.

***Risk* relates to**:

- the chance of something happening that will have an impact on objectives.

***Security risks may relate to***:

- biological hazards
- chemical spills
- client contact
- electrical faults
- explosives
- financial viability
- injury to personnel
- noise, light, heat, smoke
- persons carrying weapons
- persons causing a public nuisance
- persons demonstrating suspicious behaviour
- persons suffering from emotional or physical distress
- persons under the influence of intoxicating substances
- persons with criminal intent
- persons, vehicles and equipment in unsuitable locations

© Commonwealth of Australia, 2025 Future Skills Organisation

- property or people
- security systems
- suspicious packages or substances
- systems or process failures
- terrorism
- violence or physical threats.

***Roles and responsibilities may relate to***:

- administrative support
- backup operational role
- decision-making
- frontline role
- team leadership
- team membership.

***Relevant persons may include***:

- client
- colleagues
- human resources personnel
- management
- security personnel.

***Activities may include***:

- advising
- field work
- monitoring
- organising
- report preparation
- reporting.

***Resources, equipment and materials may relate to***:

- consumables
- equipment
- funding
- personnel
- time
- vehicles.

***Treatment options* may relate to**:

- controlled interruptions to normal operations
- exercises
- information collation and analysis
- simulations
- surveillance
- verification requirements.

***Targets and outcomes* may relate to**:

- client support times
- effective security risk management
- incident reports
- level of feedback from clients
- number of new sales
- police liaison

© Commonwealth of Australia, 2025 Future Skills Organisation

# CPPSEC5006A Determine strategy for the implementation of biometric technology

## Modification History

Not Applicable

## Unit Descriptor

**Unit descriptor**

This unit of competency specifies the outcomes required to determine requirements and processes for the strategic implementation of biometric technology in the workplace.

It requires the ability to determine security and biometric technology requirements, design treatment options and develop an implementation strategy for the integration of a biometrics system.

An understanding of the operating principles of biometric systems including software, hardware and acquisition devices is also required as well as the ability to interpret and apply effective principles and requirements relating to confidentiality, privacy and security in own work.

This unit may form part of the licensing requirements for persons engaged in security operations involving biometric technology in those states and territories where these are regulated activities.

## Application of the Unit

**Application of the unit**

This unit of competency has application in those roles involving determining requirements for biometric technology in the workplace to maintain security. Competency requires legal and operational knowledge applicable to relevant sectors of the security industry. The knowledge and skills described in this unit are to be applied within relevant legislative and organisational guidelines.

# Required Skills and Knowledge

## REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge and their level required for this unit.

### Required skills

- accurately and securely maintain records, reports and other workplace information
- analyse organisational security plans, goals, objectives and existing safeguards
- coaching and mentoring to provide support to colleagues
- comply with applicable confidentiality and privacy requirements
- comply with legislation, regulations, standards, codes of practice relevant to workplace biometric technology
- conduct and evaluate risk and threat assessments
- design effective treatment options
- determine biometric technology and system requirements, including single or multiple biometrics applications
- determine resources including personnel, tools and equipment
- determine security requirements
- make effective decisions
- plan for contingencies
- read and interpret technical information including plans, designs and specifications
- relate effectively to people from a range of social, cultural and ethnic backgrounds and varying physical and mental abilities
- research and analyse data and specifications
- resolve problems
- select and use equipment and technology appropriate to the work task
- undertake effective enrolment of biometric and biographical data
- use appropriate communication and interpersonal skills including negotiation
- written communication skills sufficient to complete relevant records and reports.

### Required knowledge

- accuracy metrics and ratios according to risk tolerance
- applicable commonwealth, state or territory legislation, regulations, standards and codes of practice relevant to the full range of processes relating to workplace biometric technology
- appropriate mathematical procedures for estimating, measuring and calculating
- biometric technology installation and implementation processes, procedures and requirements
- ergonomic and safe working practices and procedures
- established threshold levels and their impact on security
- feasibility and cost-benefit analysis techniques

© Commonwealth of Australia, 2025 Future Skills Organisation

### REQUIRED SKILLS AND KNOWLEDGE

- initial enrolment processes
- management of enrolment data
- operating systems and integration application requirements
- operational principles of information technology
- organisational procedures for recording, reporting and maintaining workplace information
- organisational security plans, goals and objectives
- organisational standards, requirements, policies and procedures for the use of biometric technology
- principles of cultural diversity and access and equity
- privacy and ethics issues associated with biometric technology
- product options for various biometric systems
- risk, threats and vulnerabilities associated with biometric technology
- security and risk assessment and management techniques and processes
- types, functions and parameters of biometric technology including software, hardware and acquisition devices
- workplace communication channels, protocols and procedures.

# Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

A person who demonstrates competency in this unit must be able to provide evidence of:

- accurately estimating resources to support implementation strategy and determining roles, responsibilities and work schedules
- complying with applicable legislation and codes of ethics applicable to privacy and client confidentiality
- complying with organisational policies and procedures, including OHS, relevant to biometric work tasks
- designing treatment options which are compatible with assessed risk and security requirements
- determining biometric technology requirements based on an accurate evaluation of existing security controls, assets, and potential risks and threats

© Commonwealth of Australia, 2025 Future Skills Organisation

- developing an effective strategy which incorporates the implementation of treatment options, contingency arrangements, and resources for the effective implementation of biometric technology in a workplace environment.

**Context of and specific resources for assessment**

Context of assessment includes:

- a setting in the workplace or environment that simulates the conditions of performance described in the elements, performance criteria and range statement.

Resource implications for assessment include:

- access to a registered provider of assessment services
- access to a suitable venue and equipment
- access to plain English version of relevant statutes and procedures
- assessment instruments including personal planner and assessment record book
- work schedules, organisational policies and duty statements.

Reasonable adjustments must be made to assessment processes where required for people with disabilities. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

**Method of assessment**

This unit of competency could be assessed using the following methods of assessment:

- observation of processes and procedures
- questioning of underpinning knowledge and skills.

**Guidance information for assessment**

Assessment processes and techniques must be culturally appropriate and suitable to the language, literacy and numeracy capacity of the candidate and the competency being assessed. In all cases where practical assessment is used, it should be combined with targeted questioning to assess the underpinning knowledge.

Oral questioning or written assessment may be used to assess underpinning knowledge. In assessment situations where the candidate is offered a choice between oral questioning and written assessment, questions are to be identical.

Supplementary evidence may be obtained from relevant authenticated correspondence from existing supervisors, team leaders or specialist training staff.

# Range Statement

## RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Occupational Health and Safety*** **(*OHS*) *requirements may relate to***:

- controlling and minimising risks
- correct manual handling including shifting, lifting and carrying
- elimination of hazardous materials and substances
- identifying hazards
- safe use and operation of equipment including
  - business technology
  - first aid equipment
  - fire safety equipment
  - personal protective clothing and equipment
  - safety equipment
- safety procedures for the protection of self and others.

***Legislative requirements may relate to***:

- Australian standards and quality assurance requirements
- award and enterprise agreements
- Compliance Policy Guidelines (CPGs)
- counter-terrorism
- general 'duty of care' responsibilities
- licensing or certification requirements
- privacy and confidentiality
- relevant commonwealth, state and territory legislation, codes and national standards for:
  - anti-discrimination
  - cultural and ethnic diversity
  - environmental issues
  - equal employment opportunity
  - industrial relations
  - OHS
- relevant industry codes of practice
- telecommunications.

***Organisational requirements may relate to***:

- access and equity policies, principles and practices
- business and performance plans
- client service standards

© Commonwealth of Australia, 2025 Future Skills Organisation

- code of conduct, code of ethics
- communication and reporting procedures
- complaint and dispute resolution procedures
- emergency and evacuation procedures
- employer and employee rights and responsibilities
- environmental management including waste disposal, recycling and re-use guidelines
- OHS policies, procedures and programs
- own role, responsibility and authority
- personal and professional development
- privacy and confidentiality of information
- quality assurance and continuous improvement processes and standards
- resource parameters and procedures
- roles, functions and responsibilities of security personnel
- standard operating procedures
- storage and disposal of information
- use and maintenance of equipment and systems.

***Biometric refers to***:

- a measurable physical characteristic or personal behavioural trait used to recognise the identity or verify the identity of an individual.

***Biometric technologies include***:

- facial recognition
- fingerprint recognition
- hand geometry
- iris recognition
- retina recognition
- signature recognition
- vein recognition
- voice recognition.

***Privacy legislation may include***:

- Commonwealth, State and Territory Privacy Acts
- national information privacy principles
- national privacy principles.

***Security safeguards may be***:

- administrative and include:
  - contingency plans (data back-up, disaster recovery, and emergency mode operation plans)
  - information access management (access authorisation, establishment and modification)
  - security awareness and training (awareness, virus protection, log-in success or failure, password management)
  - security incident procedures (report and response procedures)

- providing sufficient time for questions and responses
- reflection and summarising
- two-way interaction
- use of plain English
- use of positive, confident and cooperative language.

***Social and cultural differences* may relate to**:

- dress and personal presentation
- food
- language
- religion
- social conventions
- traditional practices
- values and beliefs.

***Options* may relate to**:

- enrolment advice
- motivation to verify
- tolerance for rejected attempts.

***Multiple* biometrics refers to**:

- a biometric system that integrates two ore more biometric technologies (facial and iris recognition, and multiple instances of a single biometric eg one, two or ten fingerprints).

***Biometric equipment and systems are***:

- automated systems able to capture a biometric sample from an individual person, extract biometric data from the sample, compare the data with one or more reference templates, determine the quality of a match, and indicate whether or not an identification or verification of identity has been achieved.

***Biometric equipment and systems may include***:

- acquisition devices:
  - cameras (video, infrared-enabled video, single-image)
  - chip or reader embedded in peripheral device
  - microphones
  - optical scanners
- biometric servers
- hardware
- interconnecting infrastructure
- software:
  - server-based authentication software for biometric authentication and logging
  - software associated with acquisition devices.

***Resource requirements may include***:

- computer systems (hardware, software and infrastructure)
- equipment
- funding
- personnel
- time

## Unit Descriptor

**Unit descriptor**

This unit of competency specifies the outcomes required to conduct an assessment of the application and operations of biometric technologies and systems in a workplace environment.

It requires the ability to determine security arrangements and requirements, measure and assess the operation, application and outcomes of biometric technologies and systems in terms of efficiency and effectiveness. It also involves the preparation and presentation of assessment results.

An understanding of the operating principles of biometric systems including software, hardware and acquisition devices, and principles of measurement and assessment are also required as well as the ability to interpret and apply effective principles and requirements relating to confidentiality, privacy and security in own work.

This unit may form part of the licensing requirements for persons engaged in security operations involving biometric technology in those states and territories where these are regulated activities.

## Application of the Unit

**Application of the unit**

This unit of competency has application in those roles involving the assessment of biometric technologies and systems in the workplace. Competency requires legal and operational knowledge applicable to relevant sectors of the security industry. The knowledge and skills described in this unit are to be applied within relevant legislative and organisational guidelines.

| **3 Complete assessment**. | 3.1 Assessment results are analysed, accurately documented and prepared in an ***appropriate format*** in accordance with organisational requirements. |
| | 3.2 Findings are presented to relevant persons in accordance with workplace procedures. |
| | 3.3 Findings are supported by verifiable evidence in accordance with organisational requirements. |
| | 3.4 Feedback is sought, received and used in a constructive manner. |
| | 3.5 Recommendations or identified opportunities for ***system improvements*** are forwarded to relevant persons to inform future practice. |
| | 3.6 ***Records and reports*** are completed and maintained in accordance with legislative and organisational requirements. |

# Required Skills and Knowledge

## REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge and their level required for this unit.

### Required skills

- accurately and securely maintain records, reports and other workplace information
- analyse organisational security plans, goals, objectives and existing safeguards
- assess data and information and identify errors or deficiencies
- assess the application, operation and outcomes of biometric technologies and systems
- coaching and mentoring to provide support to colleagues

© Commonwealth of Australia, 2025 Future Skills Organisation

## REQUIRED SKILLS AND KNOWLEDGE

- comply with applicable confidentiality and privacy requirements
- comply with legislation, regulations, standards, codes of practice relevant to workplace biometric systems
- conduct and evaluate risk and threat assessments
- conduct contingency planning
- design effective treatment options
- determine biometric technology and system requirements, including single or multiple biometric applications
- determine resource requirements including personnel, tools and equipment
- determine security requirements
- determine skills and training requirements
- make effective decisions
- read and interpret technical information including plans, designs and specifications
- relate effectively to people from a range of social, cultural and ethnic backgrounds and varying physical and mental abilities
- resolve problems
- select and use equipment and technology appropriate to the work task
- undertake effective enrolment of biometric and biographical data
- use appropriate communication and interpersonal skills including negotiation.
- written communication skills sufficient to complete relevant records and reports
- written communication skills sufficient to write assessment plan, document assessment results and complete relevant records and reports.

### Required knowledge

- accuracy metrics and ratios according to risk tolerance
- applicable commonwealth, state or territory legislation, regulations, standards and codes of practice relevant to the full range of processes relating to workplace biometric systems
- appropriate mathematical procedures for estimating, measuring and calculating
- assessment methods and techniques
- biometric technology and systems installation and implementation processes, procedures and requirements
- ergonomic and safe working practices and procedures
- established threshold levels and their impact on security
- feasibility and cost-benefit analysis techniques
- initial enrolment processes
- management of enrolment data
- operating systems and integration application requirements
- operational principles of information technology
- organisational procedures for recording, reporting and maintaining workplace information
- organisational security plans, goals and objectives

© Commonwealth of Australia, 2025 Future Skills Organisation

### REQUIRED SKILLS AND KNOWLEDGE

- organisational standards, requirements, policies and procedures for the use of biometric systems
- principles of cultural diversity and access and equity
- privacy and ethics issues associated with biometric systems
- problem identification and resolution procedures
- product options for various biometric systems
- risk, threats and vulnerabilities associated with biometric technology
- security and risk assessment and management techniques and processes
- types, functions and parameters of biometric systems including software, hardware and acquisition devices
- workplace communication channels, protocols and procedures.

# Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

| | |
|---|---|
| **Critical aspects for assessment and evidence required to demonstrate competency in this unit** | A person who demonstrates competency in this unit must be able to provide evidence of:<br>• complying with applicable legislation and codes of ethics applicable to privacy and client confidentiality<br>• complying with organisational policies and procedures, including OHS, relevant to biometric work tasks<br>• determining security requirements based on an accurate assessment of existing security controls, assets, and existing and potential risks and threats<br>• determining skill and training requirements to support the application of biometric technologies and systems<br>• efficiently and effectively assessing the application, operation and outcomes of biometric technologies and systems, including an accurate assessment of data and information<br>• establishing purpose and context of assessment and plan, organising and coordinating assessment activities<br>• preparing and presenting assessment findings, seeking and reviewing feedback, and recommending opportunities for improvement to inform future practices. |
| **Context of and specific** | Context of assessment includes: |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | |
|---|---|
| **resources for assessment** | • a setting in the workplace or environment that simulates the conditions of performance described in the elements, performance criteria and range statement.<br><br>Resource implications for assessment include:<br><br>• access to a registered provider of assessment services<br>• access to a suitable venue and equipment<br>• access to plain English version of relevant statutes and procedures<br>• assessment instruments including personal planner and assessment record book<br>• work schedules, organisational policies and duty statements.<br><br>Reasonable adjustments must be made to assessment processes where required for people with disabilities. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support. |
| **Method of assessment** | This unit of competency could be assessed using the following methods of assessment:<br><br>• observation of processes and procedures<br>• questioning of underpinning knowledge and skills. |
| **Guidance information for assessment** | Assessment processes and techniques must be culturally appropriate and suitable to the language, literacy and numeracy capacity of the candidate and the competency being assessed. In all cases where practical assessment is used, it should be combined with targeted questioning to assess the underpinning knowledge.<br><br>Oral questioning or written assessment may be used to assess underpinning knowledge. In assessment situations where the candidate is offered a choice between oral questioning and written assessment, questions are to be identical.<br><br>Supplementary evidence may be obtained from relevant authenticated correspondence from existing supervisors, team leaders or specialist training staff. |

# Range Statement

## RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work

© Commonwealth of Australia, 2025 Future Skills Organisation

situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Occupational Health and Safety* (*OHS*) *requirements may relate to***:

- controlling and minimising risks
- correct manual handling including shifting, lifting and carrying
- elimination of hazardous materials and substances
- identifying hazards
- safe use and operation of equipment including
  - business technology
  - first aid equipment
  - fire safety equipment
  - personal protective clothing and equipment
  - safety equipment
- safety procedures for the protection of self and others.

***Legislative requirements may relate to***:

- Australian standards and quality assurance requirements
- award and enterprise agreements
- Compliance Policy Guidelines (CPGs)
- counter-terrorism
- general 'duty of care' responsibilities
- licensing or certification requirements
- privacy and confidentiality
- relevant commonwealth, state and territory legislation, codes and national standards for:
  - anti-discrimination
  - cultural and ethnic diversity
  - environmental issues
  - equal employment opportunity
  - industrial relations
  - OHS
- relevant industry codes of practice
- telecommunications.

***Organisational requirements may relate to***:

- access and equity policies, principles and practices
- business and performance plans
- client service standards
- code of conduct, code of ethics
- communication and reporting procedures
- complaint and dispute resolution procedures
- emergency and evacuation procedures
- employer and employee rights and responsibilities
- environmental management including waste disposal, recycling and re-use guidelines

© Commonwealth of Australia, 2025 Future Skills Organisation

- OHS policies, procedures and programs
- own role, responsibility and authority
- personal and professional development
- privacy and confidentiality of information
- quality assurance and continuous improvement processes and standards
- resource parameters and procedures
- roles, functions and responsibilities of security personnel
- standard operating procedures
- storage and disposal of information
- use and maintenance of equipment and systems.

***Biometric refers to***:

- a measurable physical characteristic or personal behavioural trait used to recognise the identity or verify the identity of an individual.

***Biometric technologies include***:

- facial recognition
- fingerprint recognition
- hand geometry
- iris recognition
- retina recognition
- signature recognition
- vein recognition
- voice recognition.

***Biometric systems are***:

- automated systems able to capture a biometric sample from an individual person, extract biometric data from the sample, compare the data with one or more reference templates, determine the quality of a match, and indicate whether or not an identification or verification of identity has been achieved.

***Biometric systems may include***:

- acquisition devices
  - cameras (video, infrared-enabled video, single-image)
  - chip or reader embedded in peripheral device
  - microphones
  - optical scanners
- biometric servers
- hardware
- interconnecting infrastructure
- software
  - server-based authentication software for biometric authentication and logging
  - software associated with acquisition devices.

***Privacy legislation may include***:

- Commonwealth, State and Territory Privacy Acts
- national information privacy principles

© Commonwealth of Australia, 2025 Future Skills Organisation

- national privacy principles.

***Relevant persons* may include**:

- biometric technology specialists
- clients
- colleagues
- external consultants
- information technology specialists
- manager.

***Security requirements may be***:

- risk and threat assessments
  - auditability
  - authentication
  - integrity
  - privacy protection
  - recovery
- security objectives
  - auditability
  - authentication
  - integrity
  - privacy protection
  - recovery
- security safeguards
  - administrative (licensing, authorisations, contingency plans, information access management, security incident procedures, security management, security awareness and training)
  - physical (include measures to protect information systems, buildings and equipment from natural and environmental hazards and unauthorised intrusions)
  - technical (access control, audit control, transmission security).

***Assessment plan* may include**:

- enrolment requirements
- level of assessment
- measurement and testing details and methods
- necessary resources (eg number of tests)
- privacy and ethics requirements
- timelines.

***Communication may be***:

- face-to-face
- group interaction
- in Indigenous languages
- in languages other than English
- oral reporting
- participation in routine meetings

© Commonwealth of Australia, 2025 Future Skills Organisation

- reading independently
- recording of discussions
- speaking clearly and directly
- through the use of assistive technology
- via an interpreter
- visual or written
- writing to audience needs.

***Interpersonal techniques may involve***:

- active listening
- being non-judgemental
- being respectful and non-discriminatory
- constructive feedback
- control of tone of voice and body language
- culturally aware and sensitive use of language and concepts
- demonstrating flexibility and willingness to negotiate
- effective verbal and non-verbal communication
- maintaining professionalism
- providing sufficient time for questions and responses
- reflection and summarising
- two-way interaction
- use of plain English
- use of positive, confident and cooperative language.

***Social and cultural differences* may relate to**:

- dress and personal presentation
- food
- language
- religion
- social conventions
- traditional practices
- values and beliefs.

***Existing architecture* may include**:

- desktop PCs
- local area networks (LANs)
- mainframe systems
- servers
- websites
- wide area networks (WANs).

***Multiple* biometrics refers to**:

- a biometric system that integrates two ore more biometric technologies (facial and iris recognition, and multiple instances of a single biometric eg one, two or ten fingerprints).

***Appropriate format may include***:

- formats that cater for those with special needs for example, producing documents in large print.

© Commonwealth of Australia, 2025 Future Skills Organisation

| | |
|---|---|
| ***System improvements* may relate to**: | • backup systems<br>• changes to biometrics settings<br>• contingency plans<br>• threshold levels. |
| ***Records and reports***: | • may be:<br>  • computer-based<br>  • manual<br>  • other appropriate organisational communication system<br>• may detail:<br>  • applications of biometric technologies and systems<br>  • functional operations of biometric technologies and systems<br>  • resource requirements<br>  • risk and threat assessments<br>  • security arrangements and additional requirements. |

# FNSORG506 Prepare financial forecasts and projections

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with FNS Financial Services Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to plan a financial forecast or projection, identify assumptions and parameters, collect, consolidate and analyse data, make forecasts or projections, document results and obtain approval.

It applies to experienced individuals who use a range of specialist and managerial techniques to plan and carry out their work, and provide direction to others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Organisational skills

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1. Plan preparation timetable | 1.1 Identify all critical milestones to ensure financial forecasts and projections can be prepared within timeframes<br>1.2 Review business plans, financial forecasting and processing systems to identify timeframes and parameters, and any potential conflicts |
| 2. Identify assumptions and parameters | 2.1 Review business plans and exception reports to identify and resolve conflicts in assumptions |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 2.2 Review assumptions and parameters to ensure compliance with organisational policy and procedures<br>2.3 Analyse current and historical financial reports to establish trends, and examine external environment to gain objective overview |
| 3. Issue instructions and relevant aids for preparation of forecasts and projections | 3.1 Issue clear instructions that comply with organisational format to facilitate use and ensure consistent interpretation<br>3.2 Identify business types to enable selection of effective financial models, and provide training to users to ensure comprehensive understanding and effective use of models |
| 4. Collect, consolidate, model and analyse data | 4.1 Review data to ensure consistency with model used and document analysis results clearly<br>4.2 Collect reliable, valid, complete and comprehensive data<br>4.3 Process and consolidate data in logical structured format that enables ready analysis according to established timetable |
| 5. Document results and obtain approval | 5.1 Document results clearly in suitable format that meets needs of target users<br>5.2 Obtain all approvals in accordance with management objectives and financial and organisational policy, and distribute results within timetable |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.2, 2.1-2.3, 4.1-4.3, 5.2 | • Interprets, analyses and reviews a variety of structurally complex textual information for accuracy, consistency and compliance with legislation and organisational requirements |
| Writing | 2.1, 3.1, 3.2, 4.1-4.3, 5.1, 5.2 | • Produces analytical financial reports from an extensive range of data and modelling to clearly and accurately convey forecasts and projections in required formats<br>• Develops content using clear and detailed language organised in a manner that supports the purposes and audience of the document |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Oral Communication | 1.1, 1.2, 2.1, 2.2, 3.1, 3.2 | • Participates in verbal exchanges using careful listening and questioning techniques to elicit relevant information from others, and clear and direct language to convey instructions and confirm understanding<br>• Uses language, tone and pace appropriate to the audience and environment |
| Numeracy | 1.1, 2.1-2.3, 3.2, 4.1-4.3, 5.1 | • Collects, analyses and reviews relevant numerically expressed data, formulae and ratios from a range of sources<br>• Uses advanced mathematical skills to identify assumptions and inconsistencies, and complete accurate result analysis<br>• Performs calculations necessary to estimate timelines and prepare accurate timetables |
| Navigate the world of work | 2.2, 2.3, 3.2, 5.2 | • Takes full responsibility for understanding and complying with organisational policy and procedures regarding financial forecasts and projections<br>• Maintains and updates knowledge required to carry out work role |
| Interact with others | 3.2 | • Selects and uses appropriate conventions and protocols to gain and elicit information relevant to financial forecasts and projections |
| Get the work done | 1.1, 1.2, 2.1, 2.2, 3.1, 3.2, 4.1-4.3, 5.1, 5.2 | • Accepts responsibility for planning, sequencing and scheduling complex tasks and workload according to organisational requirements<br>• Applies systematic and analytical decision-making processes to make forecasts and projections in complex and non-routine situations<br>• Uses formal analytical thinking techniques to identify issues and generate possible solutions<br>• Uses the main features and functions of digital tools to complete work tasks, store data and access information |

# Assessment Requirements for FNSORG506 Prepare financial forecasts and projections

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with FNS Financial Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- comply with organisational policy and procedures that relate to the preparation of financial forecasts and projections
- apply standard accounting principles and techniques
- accurately identify assumptions and parameters of forecasts
- collect, consolidate, model and analyse data in a timely manner
- document forecasts and projections, and obtain approval where required.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe relevant financial industry codes of practice
- explain financial forecasting techniques, models and best practice
- identify key users or audience for financial forecasts and projections
- outline factors in the external environment that can impact on financial forecasts
- outline the relevance of historical financial reports to forecasting
- identify and interpret relevant organisational policy and procedures
- explain key requirements of relevant legislation and regulations that influence the financial services industry.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the organisational skills field of work and include access to:

© Commonwealth of Australia, 2025 Future Skills Organisation

- office equipment, technology, software and consumables
- an integrated financial software system and data
- organisational policy and procedures documentation.

Assessors must satisfy NVR/AQTF assessor requirements.

# HLTAID001 Provide cardiopulmonary resuscitation

## Modification History

| Release | Notes |
|---|---|
| Release 5 | Updated:<br>• assessor requirements statement<br>• foundation skills lead in statement<br>• licensing statement<br>• modification history to reflect 2012 standards<br>Equivalent outcome. |
| Release 4 | Updated mapping information. Changes to assessment requirements. Equivalent outcome. |
| Release 3 | Updated mapping information. Equivalent outcome. |
| Release 2 | Updated mapping information. Equivalent outcome. |
| Release 1 | This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages.<br>Significant changes to elements and performance criteria.<br>Revised evidence requirements, including volume and frequency of assessment. |

## Application

This unit describes the skills and knowledge required to perform cardiopulmonary resuscitation (CPR) in line with the Australian Resuscitation Council (ARC) Guidelines.

This unit applies to all workers who may be required to provide CPR, in a range of situations, including community and workplace settings.

*Specific licensing /regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.*

© Commonwealth of Australia, 2025 Future Skills Organisation

# Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements define the essential outcomes.* | *Performance criteria specify the level of performance needed to demonstrate achievement of the element.* |
| 1. Respond to an emergency situation | 1.1 Recognise an emergency situation<br>1.2 Identify, assess and minimise immediate hazards to health and safety of self and others<br>1.3 Assess the casualty and recognise the need for CPR<br>1.4 Seek assistance from emergency response services |
| 2. Perform CPR procedures | 2.1 Perform cardiopulmonary resuscitation in accordance with ARC guidelines<br>2.2 Display respectful behaviour towards casualty<br>2.3 Operate automated external defibrillator (AED) according to manufacturer's instructions |
| 3. Communicate details of the incident | 3.1 Accurately convey incident details to emergency response services<br>3.2 Report details of incident to workplace supervisor as appropriate<br>3.3 Maintain confidentiality of records and information in line with statutory and/or organisational policies |

# Foundation Skills

*The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Unit Mapping Information

# Assessment Requirements for HLTAID001 Provide cardiopulmonary resuscitation

## Modification History

| Release | Notes |
|---|---|
| Release 5 | Updated:<br>• assessor requirements statement<br>• foundation skills lead in statement<br>• licensing statement<br>• modification history to reflect 2012 standards<br>Equivalent outcome. |
| Release 4 | Updated mapping information. Changes to assessment requirements. Equivalent outcome. |
| Release 3 | Updated mapping information. Equivalent outcome. |
| Release 2 | Updated mapping information. Equivalent outcome. |
| Release 1 | This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages.<br>Significant changes to elements and performance criteria.<br>Revised evidence requirements, including volume and frequency of assessment. |

## Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has completed the following tasks in line with state/territory regulations, first aid codes of practice, Australian Resuscitation Council (ARC) guidelines and workplace procedures:

- Followed DRSABCD in line with ARC guidelines, including:
  - performed at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor

© Commonwealth of Australia, 2025 Future Skills Organisation

  - performed at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
  - responded appropriately in the event of regurgitation or vomiting
  - managed the unconscious breathing casualty
  - followed single rescue procedure, including the demonstration of a rotation of operators with minimal interruptions to compressions
  - followed the prompts of an automated external defibrillator (AED)
- Responded to at least one simulated first aid scenario contextualised to the candidate's workplace/community setting, including:
  - demonstrated safe manual handling techniques
  - provided an accurate verbal or written report of the incident

# Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- State/Territory regulations, first aid codes of practice and workplace procedures including:
  - ARC Guidelines relevant to the provision of CPR
  - safe work practices to minimise risks and potential hazards
  - infection control principles and procedures, including use of standard precautions
  - requirements for currency of skill and knowledge
- Legal, workplace and community considerations, including:
  - awareness of potential need for stress-management techniques and available support following an emergency situation
  - duty of care requirements
  - respectful behaviour towards a casualty
  - own skills and limitations
  - consent
  - privacy and confidentiality requirements
  - importance of debriefing
- Considerations when providing CPR, including:
  - airway obstruction due to body position
  - appropriate duration and cessation of CPR
  - appropriate use of an AED
  - chain of survival
  - standard precautions
- Basic anatomy and physiology relating to:
  - how to recognise a person is not breathing normally
  - chest

© Commonwealth of Australia, 2025 Future Skills Organisation

- response/consciousness
- upper airway and effect of positional change

# Assessment Conditions

Skills must be demonstrated working individually in an environment that provides realistic in-depth, industry-validated scenarios and simulations to assess candidates' skills and knowledge.

Assessment resources must include:

- adult and infant resuscitation manikins in line with ARC Guidelines for the purpose of assessment of CPR procedures
- AED training device
- workplace injury, trauma and/or illness record, or other appropriate workplace incident report form

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

### Assessor Requirements

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition hold current first aid certificate HLTAID003 or higher.

    - ARC Guidelines relevant to provision of CPR and first aid
    - safe work practices to minimise risks and potential hazards
    - Infection control principles and procedures, including use of standard precautions
    - requirements for currency of skill and knowledge
- legal, workplace and community considerations, including:
    - awareness of potential need for stress-management techniques and available support following an emergency situation
    - duty of care requirements
    - respectful behaviour towards a casualty
    - own skills and limitations
    - consent
    - privacy and confidentiality requirements
    - importance of debriefing
- considerations when providing basic emergency life support, including:
    - airway obstruction due to body position

© Commonwealth of Australia, 2025 Future Skills Organisation

  - appropriate duration and cessation of CPR
  - appropriate use of an AED
  - chain of survival
  - standard precautions
- principles and procedures for first aid management of the following scenarios:
  - allergic reaction
  - anaphylaxis
  - bleeding control
  - cardiac conditions, including chest pain
  - chocking and airway obstruction
  - respiratory distress, including asthma
  - shock
  - stroke
- basic anatomy and physiology relating to:
  - considerations in provision of first aid for specified conditions
  - chest
  - how to recognise a person is not breathing normally
  - response/consciousness
  - upper airway and effect of positional change

# Assessment Conditions

Skills must be demonstrated working individually in an environment that provides realistic in-depth, industry-validated scenarios and simulations to assess candidates' skills and knowledge.

Assessment resources must include:

- adult and infant resuscitation manikins in line with ARC Guidelines for the purpose of assessment of CPR procedures
- adrenaline auto-injector training device
- AED training device
- placebo bronchodilator and spacer device
- roller bandages
- triangular bandage
- workplace First Aid kit
- workplace injury, trauma and/or illness record, or other appropriate workplace incident report form
- wound dressing

© Commonwealth of Australia, 2025 Future Skills Organisation

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

### Assessor requirements

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition hold current first aid certificate HLTAID003 or higher.

# HLTAID003 Provide first aid

## Modification History

| Release | Comments |
|---|---|
| Release 6 | Updated:<br>• assessor requirements statement<br>• foundation skills lead in statement<br>• licensing statement<br>• modification history to reflect 2012 standards<br>Equivalent outcome. |
| Release 5 | Updated mapping information. Changes to assessment requirements. Equivalent outcome. |
| Release 4 | Updated mapping information. Equivalent outcome. |
| Release 3 | Updated mapping information. |
| Release 2 | Minor corrections to formatting to improve readability. Equivalent competency outcome. |
| Release 1 | This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages.<br>Significant changes to elements and performance criteria, changes to scope of unit. New evidence requirements for assessment.<br>Removal of prerequisite unit. |

## Application

This unit describes the skills and knowledge required to provide a first aid response to a casualty. The unit applies to all workers who may be required to provide a first aid response in a range of situations, including community and workplace settings.

*Specific licensing /regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.*

© Commonwealth of Australia, 2025 Future Skills Organisation

# Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements define the essential outcomes.* | *Performance criteria specify the level of performance needed to demonstrate achievement of the element.* |
| 1. Respond to an emergency situation | 1.1 Recognise an emergency situation<br>1.2 Identify, assess and manage immediate hazards to health and safety of self and others<br>1.3 Assess the casualty and recognise the need for first aid response<br>1.4 Assess the situation and seek assistance from emergency response services |
| 2. Apply appropriate first aid procedures | 2.1 Perform cardiopulmonary resuscitation (CPR) in accordance with Australian Resuscitation Council (ARC) guidelines<br>2.2 Provide first aid in accordance with established first aid principles<br>2.3 Display respectful behaviour towards casualty<br>2.4 Obtain consent from casualty where possible<br>2.5 Use available resources and equipment to make the casualty as comfortable as possible<br>2.6 Operate first aid equipment according to manufacturer's instructions<br>2.7 Monitor the casualty's condition and respond in accordance with first aid principles |
| 3. Communicate details of the incident | 3.1 Accurately convey incident details to emergency response services<br>3.2 Report details of incident to workplace supervisor as appropriate<br>3.3 Maintain confidentiality of records and information in line with statutory and/or organisational policies |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
| --- | --- |
| *Elements define the essential outcomes.* | *Performance criteria specify the level of performance needed to demonstrate achievement of the element.* |
| 4. Evaluate the incident and own performance | 4.1 Recognise the possible psychological impacts on self and other rescuers involved in critical incidents<br>4.2 Participate in debriefing to address individual needs |

# Foundation Skills

*The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

# Unit Mapping Information

No equivalent unit.

New evidence requirements for assessment.<br>Removal of prerequisite unit. |

## Performance Evidence

e candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has completed the following tasks in line with state/territory regulations, first aid codes of practice, Australian Resuscitation Council (ARC) guidelines and workplace procedures:

- Followed DRSABCD in line with ARC guidelines, including:

© Commonwealth of Australia, 2025 Future Skills Organisation

  - performed at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
  - performed at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
  - responded appropriately in the event of regurgitation or vomiting
  - managed the unconscious breathing casualty
  - followed single rescue procedure, including the demonstration of a rotation of operators with minimal interruptions to compressions
  - followed the prompts of an Automated External Defibrillator (AED)
- Responded to at least two simulated first aid scenarios contextualised to the candidate's workplace/community setting, including:
  - conducted a visual and verbal assessment of the casualty
  - demonstrated safe manual handling techniques
  - post-incident debrief and evaluation
  - provided an accurate verbal or written report of the incident
- Applied first aid procedures for the following:
  - allergic reaction
  - anaphylaxis
  - bleeding control
  - choking and airway obstruction
  - envenomation, using pressure immobilisation
  - fractures, sprains and strains, using arm slings, roller bandages or other appropriate immobilisation techniques
  - respiratory distress, including asthma
  - shock

# Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- State/Territory regulations, first aid codes of practice and workplace procedures including:
  - ARC Guidelines relevant to provision of CPR and first aid
  - safe work practices to minimise risks and potential hazards
  - infection control principles and procedures, including use of standard precautions
  - requirements for currency of skill and knowledge
- legal, workplace and community considerations including:
  - awareness of potential need for stress-management techniques and available support following an emergency situation
  - duty of care requirements

© Commonwealth of Australia, 2025 Future Skills Organisation

  - respectful behaviour towards a casualty
  - own skills and limitations
  - consent
  - privacy and confidentiality requirements
  - importance of debriefing
- considerations when providing first aid including:
  - airway obstruction due to body position
  - appropriate duration and cessation of CPR
  - appropriate use of an AED
  - chain of survival
  - standard precautions
  - how to conduct a visual and verbal assessment of the casualty
- principles and procedures for first aid management of the following scenarios:
  - abdominal injuries
  - allergic reaction
  - anaphylaxis
  - basic care of a wound
  - bleeding control
  - burns
  - cardiac conditions, including chest pain
  - choking and airway obstruction
  - crush injuries
  - diabetes
  - dislocations
  - drowning
  - envenomation
  - environmental impact, including hypothermia, hyperthermia, dehydration and heat stroke
  - eye and ear injuries
  - fractures
  - febrile convulsions
  - head, neck and spinal injuries
  - minor skin injuries
  - needle stick injuries
  - poisoning and toxic substances
  - respiratory distress, including asthma
  - seizures, including epilepsy
  - shock
  - soft tissue injuries, including strains and, sprains
  - stroke

© Commonwealth of Australia, 2025 Future Skills Organisation

  - unconsciousness
- basic anatomy and physiology relating to:
  - how to recognise a person is not breathing normally
  - chest
  - response/consciousness
  - upper airway and effect of positional change
  - considerations in provision of first aid for specified conditions

# Assessment Conditions

Skills must be demonstrated working individually in an environment that provides realistic in-depth, industry-validated scenarios and simulations to assess candidates' skills and knowledge.

Assessment resources must include:

- adult and infant resuscitation manikins in line with ARC Guidelines for the purpose of assessment of CPR procedures
- adrenaline auto-injector training device
- AED training device
- placebo bronchodilator and spacer device
- roller bandages
- triangular bandages
- workplace First Aid kit
- workplace injury, trauma and/or illness record, or other appropriate workplace incident report form for written reports
- wound dressings

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

### Assessor requirements

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

# ICPDMT321 Capture a digital image

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICP Printing and Graphic Arts Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to evaluate and use digital camera technology and alter and upload digital images.

It applies to individuals who may work in a team environment with some responsibility for producing quality outcomes based on requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Digital media technologies

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1 Assess digital camera qualities | 1.1 Camera software compatibility with hardware system is assessed and appropriate software is selected for job<br>1.2 Pixel resolution of camera is matched to required quality and resolution of outcome<br>1.3 RAM capacity of camera is checked to be sufficient for number of images required to be captured<br>1.4 Shutter speed, focal lengths and camera feature modes are assessed as suitable for quality and use of photographic images |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | required<br>1.5 Lithium batteries are handled and stored according to work health and safety (WHS) requirements |
| 2 Set up for image capture | 2.1 Camera is set up for image composition according to job specifications<br>2.2 Lighting is arranged according to job specifications<br>2.3 Light intensity is set for correct exposure |
| 3 Preview image | 3.1 Tone curves are adjusted according to job specifications<br>3.2 Neutral balance of image is arranged and adjusted<br>3.3 Adjustments to image composition and exposure are made |
| 4 Photograph and upload digital image | 4.1 Digital camera is loaded and operated according to manufacturer's and job specifications appropriate to quality of image to be photographed<br>4.2 File is uploaded on to relevant computer and image saved on hard disk<br>4.3 Photographic image files are created and stored on computer<br>4.4 Photographic images are enhanced, cropped and altered electronically to deliver required image<br>4.5 Photographic images are checked to ensure they meet job brief<br>4.6 Photographic images are delivered using required delivery mode |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 1.5, 2.1, 2.2, 3.1, 4.1, 4.5 | • Interprets textual information to determine and confirm job requirements |
| Writing | 4.3 | • Uses required conventions to name electronic files |
| Numeracy | 1.2-1.4, 2.3 | • Recognises mathematical data related to memory capacity<br>• Uses basic mathematical calculations to select |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| | | appropriate camera features related to shutter speed, focal length or pixel resolutions |
| Navigate the world of work | 1.5 | • Adheres to legislative requirements related to own role with specific reference to safety |
| Get the work done | 1.1-1.4, 2.1-2.3, 3.1-3.3, 4.1-4.6 | • Plans and implements tasks required to complete jobs according to specifications<br>• Assesses job requirements to make decisions related to camera settings and image outputs<br>• Analyses image quality problems and identifies and implements appropriate correction methods<br>• Understands the purposes, specific functions and key features of common digital systems and tools and operates them effectively to produce digital images |

# Unit Mapping Information

| **Code and title current version** | **Code and title previous version** | **Comments** | **Equivalence status** |
|---|---|---|---|
| ICPDMT321 Capture a digital image | ICPMM321C Capture a digital image | Updated to meet Standards for Training Packages | Equivalent unit |

# Assessment Requirements for ICPDMT321 Capture a digital image

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICP Printing and Graphic Arts Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- find and use information relevant to the task from various sources
- set up a digital camera correctly and safely
- use a digital camera to:
  - preview and capture THREE digital images
  - transfer images to a computer
  - use relevant software to produce final images that meet job requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and explain the key features of the digital camera that impact on the quality of the photographic image
- determine the safety requirements for handling and storing lithium batteries
- explain how to transfer and store images from a camera to a computer list and describe ways that photographic images can be altered or enhanced electronically
- explain why the required delivery mode is important when preparing a photographic image.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the digital media technologies field of work and include access to:

© Commonwealth of Australia, 2025 Future Skills Organisation

- a digital camera
- computer hardware and software
- photographic equipment and materials.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICPDMT346 Incorporate video into multimedia presentations

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICP Printing and Graphic Arts Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to edit and add video to multimedia presentations.

It applies to individuals who select and use appropriate software and hardware to produce digital video sequences to meet required outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Digital media technologies

## Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| *Elements describe the essential outcomes.* | *Performance criteria describe the performance needed to demonstrate achievement of the element.* |
| 1 Identify and describe formats of digital video | 1.1 Distinguishing features and uses of range of digital video software are determined<br>1.2 Current video software appropriate to range of given outcomes is selected<br>1.3 Limiting factors of computer hardware on video production for specified job are determined<br>1.4 Differences of image quality and image size required to deliver desired outcome are determined |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | 1.5 Data input, processing and output relevant to video are explained<br>1.6 Formats employed to create given computer video sequence for specified outcome are analysed |
| 2 Design digital video | 2.1 Appropriate digital video software for job is assessed and selected<br>2.2 Digital video editing software is used to combine video assets<br>2.3 Variations in video frame rates are controlled as required for job to be undertaken<br>2.4 Time stamping techniques are applied to video frames as required<br>2.5 Digital video is saved using appropriate file techniques |
| 3 Edit digital video | 3.1 Single and multiple video tracks are edited to achieve defined outcome<br>3.2 Multiple tracks of digital video are joined according to job specifications<br>3.3 Digital effects are employed to modify and integrate digital video tracks according to job specifications<br>3.4 Time encoding is applied to single and multiple edited digital video tracks according to job specifications<br>3.5 Video track is inserted into multimedia production sequence according to job specifications |
| 4 Present digital video sequence | 4.1 Digital video is tested and combined with other digital imaging, sound and/or animation to create multimedia sequence<br>4.2 Multimedia sequence including video is saved and presented to client |

# Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
|---|---|---|
| Reading | 2.1, 2.3, 2.4, 3.3-3.5 | • Interprets textual information to establish or confirm job requirements |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Oral Communication | 1.5 | • Uses clear technical terminology to provide information about video to others |
| Numeracy | 1.4, 2.3, 2.4, 3.4 | • Uses simple mathematical calculations to verify image quality and image size and to measure frame frequencies and track lengths |
| Interact with others | 4.2 | • Selects and uses appropriate communication methods and protocols when presenting information to clients |
| Get the work done | 1.1-1.4, 1.6, 2.1-2.5, 3.1-3.5, 4.1, 4.2 | • Plans and implements tasks required to complete jobs according to specifications<br>• Determines requirements and makes routine decisions directly related to completion of tasks<br>• Understands the purposes, functions and features of digital systems and tools used for video recording and editing, and uses them effectively to complete tasks |

# Unit Mapping Information

| **Code and title current version** | **Code and title previous version** | **Comments** | **Equivalence status** |
|---|---|---|---|
| ICPDMT346 Incorporate video into multimedia presentations | ICPMM346C Incorporate video into multimedia presentations | Updated to meet Standards for Training Packages | Equivalent unit |

# Assessment Requirements for ICPDMT346 Incorporate video into multimedia presentations

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICP Printing and Graphic Arts Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- design, compile, edit and present at least TWO multimedia sequences incorporating video including:
  - interpreting requirements from job specifications
  - selecting and using suitable software and hardware.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline important considerations when combining digital video with other digital imaging, sound and/or animation to create a multimedia sequence
- summarise the features of current video software programs, including the differences between the programs
- explain the limiting factors of video production on computers
- determine how the differences of image quality and image size are obtained
- describe the process used to combine video assets
- explain how variations in video frame rates are controlled
- explain why time stamping techniques are applied to video frames.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the digital media technologies field of work and include access to software, hardware and equipment and materials required for construction and editing of video files.

Assessors must satisfy NVR/AQTF assessor requirements.

# RIIHAN301D Operate elevating work platform

## Modification History

| Release | Comment |
|---|---|
| 1 | This unit replaces RIIHAN301B Operate elevating work platform |
| 2 | Editorial corrections; Amend reference to Licensing requirements in Unit Application |
| 3 | Required frequency and volume of evidence amended in Performance evidence.<br>Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm. |

## Application

This unit describes a participant's skills and knowledge required to operate an elevating work platform in the Resources and Infrastructure Industries.

This unit is appropriate for those working in operational roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories and Industry sectors. Relevant information must be sourced prior to application of the unit.

## Elements and Performance Criteria

| | |
|---|---|
| 1. Plan and prepare for operating an elevating work platform | 1.1 Access, interpret and apply elevating work platforms documentation and ensure the work activity is compliant<br>1.2 Obtain, read, interpret, clarify and confirm work requirements<br>1.3 Select and wear personal protective equipment appropriate for work activities<br>1.4 Identify and select any required tools and equipment, check for serviceability and rectify or report, verbally or in writing, any faults prior to commencement<br>1.5 Perform pre-start and post-start inspections/checks<br>1.6 Coordinate activities with others prior to commencement of, and during, the work activity |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | |
|---|---|
| | 1.7 Identify and address potential risks, hazards and environmental issues, and implement control measures<br>1.8 Obtain and interpret emergency procedures, and be prepared for fire/accident/emergency |
| 2. Conduct work activities from elevating work platform | 2.1 Stabilise elevating work platform<br>2.2 Place tools and equipment into bucket/platform<br>2.3 Use approved safety devices, ensure safety of personnel and surrounding site<br>2.4 Act on or report, verbally or in writing, monitoring systems and alarms<br>2.5 Recognise and respond to hazardous and emergency situations<br>2.6 Complete work and shut-down in accordance with agreed work plan |
| 3. Carry out operator maintenance | 3.1 Carry out work platform inspections and fault finding<br>3.2 Carry out routine operational servicing, lubrication and housekeeping tasks in accordance with manufacturer's instructions and site authorised procedures and practices<br>3.3 Carry out minor operator maintenance to manufacturer's instructions and site requirements<br>3.4 Process written records |
| 4. Clean up | 4.1 Clear work area and reuse, recycle or dispose of materials<br>4.2 Check, clean, maintain and store plant, tools and equipment |

# Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

# Assessment Requirements for RIIHAN301D Operate elevating work platform

## Modification History

| Release | Comment |
|---|---|
| 1 | This unit replaces RIIHAN301B Operate elevating work platform |
| 2 | Editorial corrections; Amend reference to Licensing requirements in Unit Application |
| 3 | Required frequency and volume of evidence amended in Performance evidence.<br>Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm. |

## Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- implements the requirements, procedures and techniques for the safe, effective and efficient completion of operating elevating work platforms including:
  - selecting and using the required plant, tools and equipment
  - planning and preparing for operating elevating work platforms
  - identifying, addressing and/or reporting, verbally or in writing monitoring systems and alarms
  - identifying and following procedures in emergency or hazardous situations
  - applying hand-eye coordination
- works effectively with others to undertake and complete the operation of elevating work platforms that meet all of the required outcomes including:
  - using a range of communication techniques and equipment to coordinate activities with others
  - maintaining written and verbal reporting requirements and procedures
- demonstrates completion of operating elevating work platforms that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:

© Commonwealth of Australia, 2025 Future Skills Organisation

- stabilising elevating work platform
- selecting safety devices and correctly ensuring safety of personnel and surrounding site
- completing work platform inspections and fault finding
- completing operational servicing, lubrication and housekeeping tasks
- disposing of environmentally sensitive oils, fluids and materials

# Knowledge Evidence

The candidate must demonstrate knowledge of the following when operating an elevating work platform:

- the appropriate National Certification Standards
- site and equipment safety requirements
- equipment characteristics, technical capabilities and limitations
- elevating work platform operational procedures
- basic geological and survey data related to elevating work platforms
- site environmental requirements and constraints related to elevating work platforms

# Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector's work environment;
- where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,

© Commonwealth of Australia, 2025 Future Skills Organisation

- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

| Industry sector | AQF** Level | Required assessor or Industry subject matter expert experience |
|---|---|---|
| Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction | 1 | 1 Year |
| | 2 | 2 Years |
| Drilling, Coal Mining and Extractive (Quarrying) | 3-6 | 3 Years |
| Metalliferous Mining and Civil Construction | 3-6 | 5 Years |
| Other sectors | Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation. | |

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level

# RIIWHS204D Work safely at heights

## Modification History

| Release | Comments |
|---|---|
| 1 | This unit replaces RIIOHS204A Work safely at heights. |
| 2 | Formatting corrections. |
| 3 | Inserted Application information. |
| 4 | Required frequency and volume of evidence amended in Performance evidence.<br>Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm. |

## Application

This unit describes a participant's skills and knowledge required to work safety at heights in the Resources and Infrastructure Industries.

This unit it appropriate for those working in operational roles where they are required to perform work at heights.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

*Note: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.*

## Elements and Performance Criteria

| | |
|---|---|
| 1. Identify work requirements | 1.1 Access, interpret and apply height safety procedures and ensure the work activity is compliant<br>1.2 Inspect site to determine layout and physical condition, condition of structures, prevailing weather conditions, equipment requirements and potential hazards |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | |
|---|---|
| | 1.3 Adhere to WHS requirements<br>1.4 Identify, select and check safety equipment for serviceability<br>1.5 Identify, manage and report potential risks and hazards |
| 2. Identify work procedures and instructions | 2.1 Consult with authorised personnel to select materials, tools and equipment and check for serviceability<br>2.2 Select, wear and care for personal protective equipment<br>2.3 Inspect/install fall protection and perimeter protection equipment<br>2.4 Identify approved methods of moving tools and equipment to work area and minimise potential hazards associated with tools at heights<br>2.5 Ensure safety system has been installed correctly<br>2.6 Select and install appropriate signs and barricades |
| 3. Access and install equipment | 3.1 Consult with authorised personnel to ensure anchor fall protection and associated equipment is correctly fitted and adjusted<br>3.2 Ensure all required equipment is installed<br>3.3 Use recommended methods to access work area for people, tools and equipment<br>3.4 Locate tools and materials to eliminate or minimise the risk of items being knocked down |
| 4. Perform work at heights | 4.1 Check access from ground to work area and ensure it is safe<br>4.2 Keep fall equipment in place and adjusted appropriately for movement during work<br>4.3 Undertake manual handling of materials and equipment<br>4.4 Locate materials and equipment ensuring that they are safely secured and distributed<br>4.5 Check safety system periodically for compliance<br>4.6 Monitor risk control measures to ensure that they are effective and appropriate<br>4.7 Reassess risk control measures, as required, in accordance with changed work practices and/or site conditions and undertake alterations |
| 5. Clean up work area | 5.1 Consult with authorised personnel to ensure safety system is dismantled and removed<br>5.2 Clear work area and dispose of or recycle materials<br>5.3 Clean, check, maintain and store tools and equipment |

# Assessment Requirements for RIIWHS204D Work safely at heights

## Modification History

| Release | Comments |
|---|---|
| 1 | This unit replaces RIIOHS204A Work safely at heights. |
| 2 | Formatting corrections. |
| 3 | Inserted Application information. |
| 4 | Required frequency and volume of evidence amended in Performance evidence.<br>Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm. |

## Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- demonstrates completion of working safely at heights that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
  - accessing, interpreting and applying technical and safety information for working at heights
  - assessing hazards and risk associated with working at heights and implement control methods
  - selecting wearing and caring for personal protective equipment
  - identifying required safety systems including fall protection and associated equipment
  - checking that fitting, adjusting and anchoring of fall protection and associated equipment is correct
  - performing work safely at heights

## Knowledge Evidence

The candidate must demonstrate knowledge of the following when working safely at heights:

- names and functions of equipment, components and materials

© Commonwealth of Australia, 2025 Future Skills Organisation

- complying with equipment manufacturer's instructions and specifications
- safe shifting and handling of tools and materials
- adhering to statutory and regulatory authority requirements
- the nature of work undertaken at heights
- complying with heights safety systems
- the processes of providing for safe working practices
- using safety equipment/systems and considerations to facilitate working safely at heights
- complying with safe work methods

# Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector's work environment;
- where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

| Industry sector | AQF** Level | Required assessor or Industry subject matter expert experience |
|---|---|---|
| Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction | 1 | 1 Year |
| | 2 | 2 Years |

© Commonwealth of Australia, 2025 Future Skills Organisation

| | | |
|---|---|---|
| Drilling, Coal Mining and Extractive (Quarrying) | 3-6 | 3 Years |
| Metalliferous Mining and Civil Construction | 3-6 | 5 Years |
| Other sectors | Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation. | |

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level

# TLID2010A Operate a forklift

## Modification History

Not Applicable

## Unit Descriptor

**Unit Descriptor**

This unit involves the skills and knowledge required to operate a forklift, including checking forklift condition, driving the forklift to fulfil operational requirements, monitoring site conditions, and monitoring and maintaining forklift performance. Assessment of this unit will usually be undertaken within a licensing examination conducted by, or under the authority of, the relevant state/territory OH&S authority. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

## Application of the Unit

**Application of the Unit**

Operation of a forklift must be carried out in compliance with the licence requirements and regulations of the relevant state/territory authority.

Operation of a forklift is performed under some supervision, generally within a team environment. It involves the application of routine equipment operation principles and procedures to maintain the safety and operation of a forklift in a variety of operational contexts.

## Licensing/Regulatory Information

Refer to Unit Descriptor

## Pre-Requisites

Not Applicable

# Employability Skills Information

**Employability Skills** This unit contains employability skills.

# Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

# Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| **1 Check forklift condition** | 1.1 Condition of forklift is checked for compliance with OH&S and workplace requirements for warning devices, manufacturers specifications and the nature of the load shifting task |
| | 1.2 Attachments are checked to ensure appropriate adjustment and operation |
| | 1.3 Mirrors and seats are adjusted for safe operation by the driver |
| | 1.4 Log books are checked and appropriate workplace documentation is completed in accordance with workplace requirements |
| **2 Drive the forklift** | 2.1 Forklift is started, steered, manoeuvred, positioned and stopped in accordance with regulations and manufacturers instructions |
| | 2.2 Engine power is managed to ensure efficiency and performance and to minimise engine and gear damage |
| | 2.3 Operational hazards are identified and/or anticipated and avoided or controlled through defensive driving and appropriate hazard control techniques |
| | 2.4 Forklift is driven in reverse, maintaining visibility and achieving accurate positioning |
| | 2.5 The forklift is parked, shut down and secured in accordance with manufacturers specifications, regulations and workplace procedures |
| **3 Operate a forklift to handle loads** | 3.1 The lifting task to be undertaken is appropriately planned and the correct lifting truck and attachments are selected |
| | 3.2 The load is lifted, carried, lowered and set down in accordance with OH&S legislation, manufacturers specifications and company procedures |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| **4 Monitor site conditions** | 4.1 When selecting the most efficient route, hazards and traffic flow are identified and appropriate adjustments are made |
| | 4.2 Site conditions are assessed to enable safe operations and to ensure no injury to people or damage to property, equipment, loads or facilities occurs |
| **5 Monitor and maintain forklift performance** | 5.1 Performance and efficiency of vehicle operation is monitored during use |
| | 5.2 Defective/irregular performance and malfunctions reported to relevant personnel |
| | 5.3 Forklift records are maintained/updated in accordance with workplace procedures and legislative requirements |

# Required Skills and Knowledge

## REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

**Required knowledge**:

- Relevant duty of care requirements pertaining to the operation of a forklift
- Relevant OH&S and environmental procedures and regulations
- Workplace operating procedures
- Forklift controls, instruments and indicators and their use
- Forklift handling procedures
- Procedures to be followed in the event of an operational emergency
- Engine power management and safe operating strategies
- Efficient driving techniques
- Operating hazards and related defensive driving and hazard control techniques
- Pre-operational checks carried out on forklift and related action
- Principles of stress management when driving a forklift
- Site layout and obstacles

**Required skills**:

- Communicate effectively with others when operating a forklift
- Read and interpret instructions, procedures, information and signs relevant to the operation of a forklift

© Commonwealth of Australia, 2025 Future Skills Organisation

**Required skills**:

- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the operation of a forklift
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when operating a forklift
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events when operating a forklift
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the operation of a forklift
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Identify points of balance and safe lifting positions on a range of loads when operating a forklift (including accessories)
- Monitor performance of forklift and its equipment and take appropriate action where required
- Ensure that a forklift and its equipment are maintained in terms of service schedule and standard operating procedures
- Check and replenish fluids and carry out lubrication processes in the course of work activities

# Evidence Guide

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

| | |
|---|---|
| **Critical aspects for assessment and evidence required to** | • The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the |

© Commonwealth of Australia, 2025 Future Skills Organisation

### EVIDENCE GUIDE

| | |
|---|---|
| **demonstrate competency in this unit** | requirements of the elements and performance criteria of this unit and include demonstration of applying:<br>• the underpinning knowledge and skills<br>• relevant legislation and workplace procedures<br>• other relevant aspects of the range statement |
| **Context of and specific resources for assessment** | • Performance is demonstrated consistently over a period of time and in a suitable range of contexts<br>• Resources for assessment include:<br>  • a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or<br>  • access to an appropriate range of relevant operational situations in the workplace<br>• In both real and simulated environments, access is required to:<br>  • relevant and appropriate materials and equipment, and<br>  • applicable documentation including workplace procedures, regulations, codes of practice and operation manuals |
| **Method of assessment** | • Assessment of this unit must be undertaken by a registered training organisation<br>• As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests<br>• Practical assessment must occur:<br>  • through activities in an appropriately simulated environment at the registered training organisation, and/or<br>  • in an appropriate range of situations in the workplace |

# Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

| | |
|---|---|
| Types of forklift may include: | • counterbalance trucks<br>• reach trucks<br>• pallet trucks |

© Commonwealth of Australia, 2025 Future Skills Organisation

## RANGE STATEMENT

| | |
|---|---|
| Operations may be carried out in typical forklift operational situations, including: | • operations conducted at day or night<br>• typical weather conditions<br>• on the open road<br>• on a private road or worksite<br>• while at a workplace |
| Customers may be: | • internal or external |
| Workplaces may comprise: | • large, medium or small worksites |
| Work may be conducted in: | • restricted spaces<br>• exposed conditions<br>• controlled or open environments |
| Loads to be shifted may require: | • special precautions |
| Loads to be shifted may be: | • irregularly shaped<br>• packaged or unpackaged<br>• labelled or unlabelled<br>• palleted or unpalleted |
| Hazards in the work area may include exposure to: | • chemicals<br>• dangerous or hazardous substances<br>• movements of equipment, goods and materials |
| Personnel in the work area may include: | • workplace personnel<br>• site visitors<br>• contractors<br>• official representatives |
| Forklift handling procedures may include: | • starting a forklift<br>• steering and manoeuvring a forklift<br>• accelerating and braking<br>• positioning and stopping a forklift<br>• reversing a forklift<br>• operating forklift controls, instruments and indicators<br>• using defensive driving techniques<br>• managing engine performance |
| Pre-operational checks may include: | • visual check of forklift<br>• checking and topping up of fluid levels<br>• checks of tyres<br>• checks of operation of forklift lights and indicators<br>• checks of brakes |
| Hazards may include (examples only): | • wet and iced operating surfaces<br>• oil on operating surface |

© Commonwealth of Australia, 2025 Future Skills Organisation

## RANGE STATEMENT

| | |
|---|---|
| | • faulty brakes<br>• workplace obstacles and other operational equipment and vehicles<br>• damaged loads and pallets<br>• other personnel in work area |
| Depending on the type of organisation concerned and the local terminology used, workplace procedures may include: | • company procedures<br>• enterprise procedures<br>• organisational procedures<br>• established procedures |
| Personal protection equipment may include: | • gloves<br>• safety headwear and footwear<br>• safety glasses<br>• two-way radios<br>• high visibility clothing |
| Information/documents may include: | • goods identification numbers and codes, including IMDG markings and HAZCHEM signs<br>• manifests, bar codes, picking slips, merchandise transfers, stock requisitions, goods and container identification<br>• Australian Standard 2359 - Industrial Truck Code<br>• manufacturers specifications for forklift and associated equipment<br>• operations and service record book or log<br>• workplace procedures and policies for the operation of forklifts<br>• supplier and/or client instructions<br>• ADG Code and material safety data sheets<br>• regulatory requirements concerning the use of forklifts<br>• award, enterprise bargaining agreement, other industrial arrangements<br>• standards and certification requirements<br>• quality assurance procedures<br>• emergency procedures |
| Applicable procedures and codes may include: | • relevant state/territory regulations pertaining to the operation of forklifts<br>• relevant codes and standards, including Australian Standard 2359 - Industrial Truck Code<br>• relevant state/territory OH&S legislation<br>• relevant state/territory fatigue management regulations<br>• relevant state/territory environmental protection legislation |

# TLID3035A Operate a boom type elevating work platform

## Modification History

Not Applicable

## Unit Descriptor

**Unit Descriptor**

This unit involves the skills and knowledge required to operate a boom type elevating work platform, including inspecting and testing the elevating work platform, assessing job requirements and work, planning work and setting up for lift, carrying out the elevation, implementing planned hazard control and strategies, and packing up the work platform after operations. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

## Application of the Unit

**Application of the Unit**

Work must be carried out in compliance with the licence/permit requirements and regulations of the relevant state/territory authorities pertaining to boom type elevating work platform operations.

Work is performed with limited or minimum supervision, and with limited accountability and responsibility for self and others in achieving the prescribed outcomes. It involves the application of routine principles and procedures to the operation of a boom type elevating work platform in a variety of operational contexts.

## Licensing/Regulatory Information

Refer to Unit Descriptor

# Employability Skills Information

**Employability Skills** This unit contains employability skills.

# Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

# Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| **1 Inspect and test elevating work platform** | 1.1 Work platform is visually inspected prior to operation for any evidence of damage, structural weakness or interference according to pre-operational safety check procedures |
| | 1.2 Routine pre-operational equipment checks are carried out in accordance with available checklists |
| | 1.3 Work platform log book is checked, service requirements are noted and maintenance personnel advised of any requirements |
| | 1.4 Elevating work platform is started in accordance with manufacturers guidelines and start-up procedures for operations and any abnormal noise or movement reported to an authorised person for corrective action |
| | 1.5 Start-up checks are conducted according to manufacturers specifications and company procedures to ensure work platform and equipment are operating correctly |
| | 1.6 Faults are corrected or are reported to an authorised person for corrective action according to company procedures |
| | 1.7 The operating and emergency controls are checked for correct operation in accordance with manufacturers specifications including use of the emergency decent device |
| | 1.8 Boom is lowered under simulated emergency conditions to check for operational effectiveness |
| | 1.9 Gear and accessories are checked and damaged or worn gear is segregated and reported to an authorised person for testing/repair/destruction |
| | 1.10 Results of inspections are recorded and reported according to company procedures |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| **2 Assess job requirements and work** | 2.1 Briefing, hand-over details, authorisations and clearances are received, interpreted and clarified in accordance with company and site procedures and legislative requirements |
| | 2.2 Work area is inspected and potential hazards are identified and appropriate elimination or control measures selected |
| | 2.3 Weight of load including personnel and equipment is correctly estimated to ensure job is within limits of work platform capacity |
| **3 Plan work and set up for lift** | 3.1 A work plan is developed and agreed with relevant workplace personnel to include hazard prevention/control measures and safety and emergency procedures in line with applicable Australian standards |
| | 3.2 A suitable firm and level standing is chosen and prepared for the location of the elevating work platform |
| | 3.3 Outriggers and stabilisers are correctly deployed and positioned in accordance with manufacturers instructions and appropriate Australian standards |
| | 3.4 Appropriate plates or packing are correctly used under the footplates as required to adequately distribute the loading |
| | 3.5 Ground is checked before and after packing is installed to ensure it is firm enough to bear the load |
| | 3.6 The job plan is developed to include hazard prevention/control measures and safety procedures in line with applicable Australian standards and to equipment manufacturers specifications |
| | 3.7 Work platform load chart is located and information on permissible loads, radii and heights taken into account in planning the job |
| | 3.8 The job plan takes into account job requirements and workplace rules and procedures |
| | 3.9 Job plan is discussed and confirmed with relevant personnel |
| | 3.10 Work gear and tools are properly stowed in the elevating work platform in accordance with Australian standards, company procedures and guides |
| **4 Carry out elevation** | 4.1 Configuration and operation of elevating work platform are checked as necessary to ensure safe lift |
| | 4.2 Operation of work platform is carried out in accordance with the job plan, the appropriate Australian standard and manufacturers specifications |
| **5 Planned hazard control and strategies are implemented** | 5.1 Load is constantly monitored to ensure safety of personnel, load and structural stability |
| | 5.2 Unplanned situations are responded to in line with company |

© Commonwealth of Australia, 2025 Future Skills Organisation

| ELEMENT | PERFORMANCE CRITERIA |
|---|---|
| | procedures in a manner that minimises risk to personnel and equipment |
| | 5.3 Required signals are correctly given, interpreted and followed in accordance with appropriate Australian standards |
| **6 Pack up work platform** | 6.1 The elevating work platform is shut down using the correct sequence of procedures in accordance with manufacturers instructions |
| | 6.2 Routine post-operational equipment checks are carried out in accordance with manufacturers instructions and available checklists and defects recorded and reported in line with company procedures |
| | 6.3 The elevating work platform is dismantled in accordance with the job plan, manufacturers instructions and relevant statutory regulations |
| | 6.4 The outriggers and stabilisers are secured and stowed in accordance with manufacturers instructions |
| | 6.5 The elevating work platform is correctly stowed and secured in accordance with manufacturers instructions and company procedures |

# Required Skills and Knowledge

## REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

**Required knowledge**:

- Relevant road rules, regulations, permit and licence requirements pertaining to boom type elevating work platform operation
- Relevant OH&S and environmental procedures and regulations
- Boom type elevating work platform applications, capacities, configurations, safety hazards and control mechanisms
- Workplace procedures concerning the operation of a boom type elevating work platform at a worksite
- Problems that may arise when operating a boom type elevating work platform and actions that should be taken to prevent or solve them
- Risks and hazards involved in the operation of a boom type elevating work platform and the associated action that can be taken to eliminate or minimise the risk/hazards concerned
- Focus of operation of work systems and equipment

© Commonwealth of Australia, 2025 Future Skills Organisation

**Required skills**:

- Communicate effectively with others when operating a boom type elevating work platform
- Read and interpret instructions, procedures, regulations, codes of practice and manuals relevant to the operation of a boom type elevating work platform
- Interpret and follow operational instructions
- Complete documentation related to the operation of a boom type elevating work platform
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when operating a boom type elevating work platform
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may occur when operating a boom type elevating work platform in accordance with regulatory requirements and workplace procedures
- Plan own work including predicting consequences and identifying improvements
- Prioritise and multi-task work
- Implement contingency plans for unanticipated situations that may arise when operating a boom type elevating work platform
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the operation of a boom type elevating work platform
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Identify and correctly use equipment, processes and procedures
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Monitor performance of equipment
- Service equipment in terms of maintenance schedule and standard operating procedures
- Check and replenish fluids and carry out lubrication processes in the course of work activities

© Commonwealth of Australia, 2025 Future Skills Organisation

# Evidence Guide

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
  - the underpinning knowledge and skills
  - relevant legislation and workplace procedures
  - other relevant aspects of the range statement

**Context of and specific resources for assessment**

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
  - relevant and appropriate materials and equipment, and
  - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

**Method of assessment**

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
  - through activities in an appropriately simulated environment at the registered training organisation, and/or
  - in an appropriate range of situations in the workplace

© Commonwealth of Australia, 2025 Future Skills Organisation

# Range Statement

## RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

| | |
|---|---|
| Operations may be conducted: | • by day or night<br>• in a variety of weather conditions |
| Environment may include movement of: | • equipment<br>• goods<br>• materials<br>• vehicular traffic |
| Customers may be: | • internal or external |
| Boom type elevating work platform may be involved in work in a range of industry sectors including: | • construction and demolition<br>• manufacturing<br>• waterfront<br>• mining<br>• primary industry<br>• utilities (electricity, gas, water)<br>• arboricultural<br>• swimming pool<br>• quarrying |
| Hazards may include: | • power lines<br>• noise, light, energy sources<br>• overhead service lines<br>• surrounding buildings, structures, facilities<br>• underground services<br>• obstructions<br>• uneven or unstable ground and recently filled trenches<br>• stationary and moving machinery and equipment<br>• hazardous or dangerous materials<br>• traffic hazards and congestion |
| Hazard management is consistent with: | • the principle of hierarchy of control with elimination, substitution, isolation and engineering control measures being selected before safe working practices and personal protective equipment |
| Consultative processes may involve: | • other employees and supervisors<br>• management<br>• union representatives<br>• clients<br>• industrial relations and OH&S specialists |

© Commonwealth of Australia, 2025 Future Skills Organisation

## RANGE STATEMENT

| | |
|---|---|
| | • other professional or technical staff |
| Requirements for access and/or lift may include: | • site restrictions and procedures<br>• authorities and permits<br>• hours of operation<br>• induction<br>• slings, chains, nets, brackets and other specialised lifting equipment<br>• noise restrictions<br>• personal protective equipment<br>• support trucks<br>• additional gear and equipment<br>• communications equipment |
| Personal protective equipment may include: | • gloves<br>• safety headwear and footwear<br>• sunscreen, sunglasses and safety glasses<br>• two-way radios<br>• high visibility clothing |
| Elevating platforms may include: | • mechanically operated equipment<br>• hydraulically operated equipment<br>• electrically operated equipment |
| Depending on the type of organisation concerned and the local terminology used, workplace procedures may include: | • company procedures<br>• enterprise procedures<br>• organisational procedures<br>• established procedures<br>• site procedures |
| Documentation/records may include: | • operations manuals<br>• Safe Working Load (SWL) and Working Load Limit (WLL)<br>• site plans<br>• induction documentation<br>• competency standards and training materials<br>• job specifications and procedures<br>• manufacturers specifications<br>• workplace operating procedures and policies<br>• supplier and/or client instructions<br>• communications technology equipment, oral, aural or signed communications<br>• personal and work area work procedures and practices<br>• conditions of service, legislation and industrial agreements including: |

# ICTSS00031 Application Development Specialist Skill Set

## Modification History

| Release | Comments |
|---|---|
| Release 2 | This version released with ICT Information and Communications Technology Training Package version 2.0<br><br>Release 2 created to update typographical error |
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Description

This skill set has been designed for individuals who wish to meet competency requirements for working as applications programmers and software development specialists.

## Pathways Information

This skill set provides credit towards ICT50715 Diploma of Software Development.

## Licensing/Regulatory Information

Not applicable.

## Skill Set Requirements

ICTPRG501 Apply advanced object-oriented language skills

ICTPRG505 Build advanced user interface

ICTPRG506 Design application architecture

ICTPRG507 Implement security for applications

ICTPRG523 Apply advanced programming skills in another language

## Target Group

This skill set is for persons who are able to work as application programmers and software developers.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Suggested words for Statement of Attainment

These units of competency from ICT Information and Communications Technology Training Package meet competency requirements for skills in working as a software development specialist.

# ICTSS00032 Basic Application Development Programmer Skill Set

## Modification History

| Release | Comments |
|---|---|
| Release 2 | This version released with ICT Information and Communications Technology Training Package version 2.0<br><br>Release 2 created to update typographical error |
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Description

This skill set has been designed for individuals who wish to meet competency requirements for working as basic applications programmers using a range of programming languages

## Pathways Information

This skill set provides credit towards ICT40515 Certificate IV in Programming.

## Licensing/Regulatory Information

Not applicable.

## Skill Set Requirements

ICTPRG406 Apply introductory object-oriented language skills

ICTPRG413 Use a library or pre-existing components

ICTPRG414 Apply introductory programming skills in another language

ICTPRG418 Apply intermediate programming skill in another language

ICTPRG527 Apply intermediate object-oriented language skill

## Target Group

This skill set is for persons who are able to work as basic application programmers.

# ICTSS00033 Basic Computer Hardware and System Troubleshooting Skill Set

## Modification History

| Release | Comments |
|---|---|
| Release 2 | This version released with ICT Information and Communications Technology Training Package version 2.0<br><br>Release 2 created to update typographical error |
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Description

This skill set has been designed for individuals who wish to meet competency requirements for troubleshooting basic computer hardware and system problems across a variety of industry sectors.

## Pathways Information

This skill set provides credit towards ICT20115 Certificate II in Information, Digital Media and Technology.

## Licensing/Regulatory Information

Not applicable.

## Skill Set Requirements

BSBWHS201 Contribute to health and safety of self and others

ICTICT201 Use computer operating systems and hardware

ICTSAS201 Maintain inventories for equipment, software and documentation

ICTSAS205 Maintain ICT system integrity

ICTSAS206 Detect and protect from spam and destructive software

ICTSAS207 Protect and secure information assets

© Commonwealth of Australia, 2025 Future Skills Organisation

ICTSAS208 Maintain ICT equipment and consumables

ICTSAS209 Connect and use a home based local wireless network

# Target Group

This skill set is for persons wanting to trouble shoot basic computer hardware and system problems, and work safely across a variety of industries.

# Suggested words for Statement of Attainment

These units of competency from ICT Information and Communications Technology and BSB Business Services Training Packages meet competency requirements for basic computer hardware and system troubleshooting.

© Commonwealth of Australia, 2025 Future Skills Organisation

# ICTSS00034 Basic Web Development Specialist Skill Set

## Modification History

| Release | Comments |
|---|---|
| Release 2 | This version released with ICT Information and Communications Technology Training Package version 2.0<br><br>Release 2 created to update typographical error |
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Description

This skill set provides the requirements to meet competency requirements for skills in reviewing, developing and maintaining a simple websites.

## Pathways Information

This skill set provides credit towards ICT30115 Certificate III in Information, Digital Media and Technology.

## Licensing/Regulatory Information

Not applicable.

## Skill Set Requirements

BSBEBU401 Review and maintain a website

ICTWEB302 Build simple websites using commercial programs

ICTWEB403 Transfer content to a website using commercial packages

## Target Group

This skill set is for persons wanting to develop and maintain a basic website.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Suggested words for Statement of Attainment

These units of competency from ICT Information and Communications Technology and BSB Business Services Training Packages meet competency requirements for skills in developing and maintaining a simple website.

# ICTSS00037 Certified Network Professional Specialist - Voice and Wireless Skill Set

## Modification History

| Release | Comments |
|---|---|
| Release 2 | This version released with ICT Information and Communications Technology Training Package version 2.0<br><br>Release 2 created to update typographical error |
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Description

This skill set has been designed for individuals who wish to meet competency requirements for skills in working as a network professional specialising in wireless and voice networks.

## Pathways Information

This skill set provides credit towards ICT60215 Advanced Diploma of Network Security.

## Licensing/Regulatory Information

Not applicable.

## Skill Set Requirements

ICTNWK605 Design and configure secure integrated wireless systems

ICTNWK606 Implement voice applications over secure wireless networks

ICTNWK607 Design and implement wireless network security

## Target Group

This skill set is for persons who are able to work as certified network professional specialists – voice and wireless.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Suggested words for Statement of Attainment

These units of competency from ICT Information and Communications Technology Training Package meet competency requirements for skills in working as a network professional specialising in voice and wireless networks.

© Commonwealth of Australia, 2025 Future Skills Organisation

# ICTSS00038 Certified Network Professional Specialist Skill Set

## Modification History

| Release | Comments |
|---|---|
| Release 2 | This version released with ICT Information and Communications Technology Training Package version 2.0<br><br>Release 2 created to update typographical error |

## Description

This skill set has been designed for individuals who wish to meet competency requirements for skills in working as a network specialist planning, configuring and troubleshooting network and internetwork solutions.

## Pathways Information

This skill set provides credit towards ICT60215 Advanced Diploma of Network Security.

## Licensing/Regulatory Information

Not applicable.

## Skill Set Requirements

ICTNWK603 Plan, configure and test advanced internetwork routing solutions

ICTNWK604 Plan and configure advanced internetwork switching solutions

ICTNWK612 Plan and manage troubleshooting advanced integrated IP networks

## Target Group

This skill set is for persons who are able to work as certified network professional specialists.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Suggested words for Statement of Attainment

These units of competency from ICT Information and Communications Technology Training Package meet competency requirements for skills in working as a network professional.

© Commonwealth of Australia, 2025 Future Skills Organisation

# ICTSS00039 Certified Networking Technician Skill Set

## Modification History

| Release | Comments |
|---|---|
| Release 2 | This version released with ICT Information and Communications Technology Training Package version 2.0<br><br>Release 2 created to update typographical error and update unit code |
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Description

This skill set has been designed for individuals who wish to meet competency requirements for skills in working as a technician specialising in small enterprise networks, wireless and installation and configuration of networking solutions.

## Pathways Information

This skill set provides credit towards ICT40415 Certificate IV in Information Technology Networking.

## Licensing/Regulatory Information

Not applicable.

## Skill Set Requirements

ICTNWK404 Install, operate and troubleshoot a small enterprise branch network

ICTNWK405 Build a small wireless local area network

ICTTEN417 Install, configure and test a router

## Target Group

This skill set is for persons who are able to work as certified network technicians.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Suggested words for Statement of Attainment

These units of competency from ICT Information and Communications Technology Training Package meet competency requirements for technical skills in networks.

# Suggested words for Statement of Attainment

These units of competency from ICT Information and Communications Technology and CUA Creative Arts and Culture Training Packages meet competency requirements for skills in developing visual components for websites.

© Commonwealth of Australia, 2025 Future Skills Organisation

# ICTSS00055 Website Administration Specialist Skill Set

## Modification History

| Release | Comments |
|---|---|
| Release 2 | This version released with ICT Information and Communications Technology Training Package version 2.0<br><br>Release 2 created to update typographical error |
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Description

This skill set has been designed for individuals who wish to meet competency requirements as a website administrator.

## Pathways Information

This skill set provides credit towards ICT40315 Certificate IV in Web-Based Technologies.

## Licensing/Regulatory Information

Not applicable.

## Skill Set Requirements

ICTNWK409 Create scripts for networking

ICTWEB404 Maintain website performance

ICTWEB405 Monitor traffic and compile website traffic reports

ICTWEB406 Create website testing procedures

ICTWEB407 Conduct operational acceptance tests of websites

ICTWEB408 Ensure basic website security

© Commonwealth of Australia, 2025 Future Skills Organisation

# Target Group

This skill set is for persons who are able to work as website administrators.

# Suggested words for Statement of Attainment

These units of competency from ICT Information and Communications Technology Training Package meet competency requirements for skills in working as a website administrator.

# ICTSS00056 Enterprise Desktop Virtualisation Specialist Skill Set

## Modification History

| Release | Comments |
|---|---|
| Release 2 | This version released with ICT Information and Communications Technology Training Package version 2.0<br><br>Release 2 created to update typographical error |
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Description

This skill set has been designed for individuals who wish to meet competency requirements as a professional desktop virtualisation technology specialists for business and enterprises.

## Pathways Information

This skill set provides credit towards ICT60215 Advanced Diploma of Network Security.

## Licensing/Regulatory Information

Not applicable.

## Skill Set Requirements

ICTICT609 Lead the evaluation and implementation of current industry-specific technologies

ICTNWK615 Design and configure desktop virtualisation

ICTNWK616 Manage security, privacy and compliance of cloud service deployment

ICTPRG602 Manage the development of technical solutions from business specifications

## Target Group

This skill set is for persons wanting to work as certified professional desktop virtualisation technology specialists.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Suggested words for Statement of Attainment

These units of competency from ICT Information and Communications Technology Training Package meet competency requirements for skills in working as a network professional specialising in desktop virtualisation technology.

© Commonwealth of Australia, 2025 Future Skills Organisation

# ICTSS00057 Enterprise Server Virtualisation Specialist Skill Set

## Modification History

| Release | Comments |
|---|---|
| Release 2 | This version released with ICT Information and Communications Technology Training Package version 2.0<br><br>Release 2 created to update typographical error |
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Description

This skill set has been designed for individuals who wish to meet competency requirements as a specialist professional in server and computer virtualisation technologies.

## Pathways Information

This skill set provides credit towards ICT50415 Diploma of Information Technology Networking.

## Licensing/Regulatory Information

Not applicable.

## Skill Set Requirements

ICTNWK524 Install and configure network access storage devices

ICTNWK525 Configure an enterprise virtual computing environment

ICTNWK527 Manage an enterprise virtual computing environment

ICTNWK533 Configure and manage advanced virtual computing environments

ICTNWK534 Monitor and troubleshoot virtual computing environments

ICTNWK535 Install an enterprise virtual computing environment

© Commonwealth of Australia, 2025 Future Skills Organisation

# Target Group

This skill set is for persons wanting to work as certified professional server virtualisation technology specialists.

# Suggested words for Statement of Attainment

These units of competency from ICT Information and Communications Technology Training Package meet competency requirements for skills in working as a network professional specialising in virtualisation technology.

# ICTSS00058 ACMA Advanced Cabler Registration Skill Set

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Description

This skill set covers the additional training required for an open registered cabler to install, maintain, test and certify copper, fibre and coaxial installations in customer premises in accordance with Australian Communications and Media Authority (ACMA) requirements.

## Pathways Information

This skill set provides credit towards ICT30515 Certificate III in Telecommunications Technology.

## Licensing/Regulatory Information

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

## Skill Set Requirements

ICTCBL301 Install, terminate and certify structured cabling installation

ICTCBL302 Install and terminate optical fibre cable on customer premises

ICTCBL303 Install and terminate coaxial cable

ICTCBL304 Perform cable and system test on customer premises

## Target Group

This skill set is for ACMA open registered cablers who need additional training to carry out specialist work.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Suggested words for Statement of Attainment

These units of competency contribute to the Australian Communications and Media Authority requirements for mandatory specialist cabling endorsement of an existing open registered cabler.

# Custom Content Section

Not applicable.

© Commonwealth of Australia, 2025 Future Skills Organisation

# ICTSS00059 Advanced ICT Sustainability Skill Set

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Description

This skill set addresses the skills and knowledge required in the installation of sustainable information and communications technology (ICT) networks using internet protocol convergence and virtualisation technologies.

## Pathways Information

This skill set provides credit towards ICT51015 Diploma of Telecommunications Engineering.

## Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

## Skill Set Requirements

ICTSUS404 Install thin client applications for power over ethernet

ICTSUS501 Implement server virtualisation for a sustainable ICT system

BSBSUS501 Develop workplace policy and procedures for sustainability

## Target Group

This skill set is targeted at existing workers in the telecommunications industry.

## Suggested words for Statement of Attainment

These units of competency meet industry requirements for installing sustainable information and communications technology (ICT) network equipment.

# ICTSS00060 Advanced Telecommunications Rigging Installation Skill Set

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Description

This skill set addresses the advanced level skills and knowledge required to install telecommunications network infrastructure on structures. It prepares individuals to work for carriers in the practical application of network equipment on structures.

## Pathways Information

This skill set provides credit towards ICT30315 Certificate III in Telecommunications Rigging Installation.

## Licensing/Regulatory Information

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

## Skill Set Requirements

ICTTCR201 Use rigging practices and systems on telecommunications network structures

ICTTCR202 Use operational safety in a telecommunications rigging environment

ICTTCR203 Use safe rigging practices to climb and perform rescues on telecommunications network structures

ICTTCR301 Build a telecommunications radio structure

ICTTCR302 Install radio plant and equipment on telecommunications structures

ICTTCR303 Protect against electromagnetic radiation and systems hazards when working on telecomms radio sites

ICTCBL208 Splice and terminate optical fibre cable for carriers and service providers

© Commonwealth of Australia, 2025 Future Skills Organisation

# Target Group

This skill set is designed for individuals who are experienced in basic rigging practices and the installation of telecommunications network infrastructure on structures.

# Suggested words for Statement of Attainment

These units of competency meet the industry requirements for advanced level skills in installing telecommunications network infrastructure on structures.

# Custom Content Section

Not applicable.

© Commonwealth of Australia, 2025 Future Skills Organisation

# ICTSS00061 Basic ICT Sustainability Skill Set

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Description

This skill set addresses the skills and knowledge required for the installation of information and communication technology (ICT) networks using technologies to reduce energy consumption.

## Pathways Information

This skill set provides credit towards ICT41215 Certificate IV in Telecommunications Engineering Technology.

## Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

## Skill Set Requirements

ICTSUS401 Install and test renewable energy system for ICT networks

ICTSUS402 Install and test power saving hardware

ICTSUS403 Install and test power management software

## Target Group

This skill set is targeted at existing workers in the telecommunications industry.

## Suggested words for Statement of Attainment

These units of competency meet industry requirements for work in the installation of ICT network equipment using technologies to reduce energy consumption.

# ICTSS00062 ACMA Open Cabler Registration Skill Set

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Description

This skill set addresses the skills and knowledge required to install, maintain and modify telecommunications customer cabling in domestic and commercial premises in accordance with Australian Communications and Media Authority (ACMA) requirements.

## Pathways Information

This skill set provides credit towards ICT30515 Certificate III in Telecommunications Technology.

## Licensing/Regulatory Information

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

## Skill Set Requirements

ICTCBL236 Install, maintain and modify customer premises communications cabling: ACMA Restricted Rule

ICTCBL237 Install, maintain and modify customer premises communications cabling: ACMA Open Rule

ICTTEN201 Use electrical skills in telecommunications work

ICTTEN202 Use hand and power tools

ICTWHS204 Follow work health and safety and environmental policy and procedures

ICTCMP202 Perform restricted customer premises broadband cabling work: ACMA Restricted Rule

© Commonwealth of Australia, 2025 Future Skills Organisation

# Target Group

This skill set is for new or existing workers in the telecommunications industry who wish to be employed as open registered cablers in accordance with ACMA requirements.

# Suggested words for Statement of Attainment

These units of competency contribute to the Australian Communications and Media Authority training requirements for open cabling registration.

# Custom Content Section

Not applicable.

# ICTSS00063 ACMA Restricted Cabler Registration Skill Set

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Description

This skill set addresses the skills and knowledge required to perform a restricted range of residential and small business cabling work in accordance with Australian Communications and Media Authority (ACMA) requirements.

## Pathways Information

This skill set provides credit towards ICT20315 Certificate III in Telecommunications Technology.

## Licensing/Regulatory Information

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

## Skill Set Requirements

ICTCBL236 Install, maintain and modify customer premises communications cabling: ACMA Restricted Rule

ICTCMP202 Perform restricted customer premises broadband cabling work: ACMA Restricted Rule

ICTTEN202 Use hand and power tools

ICTTEN201 Use electrical skills in telecommunications work

ICTWHS204 Follow work health and safety and environmental policy and procedures

## Target Group

This skill set is for new or existing workers in the telecommunications industry who wish to be employed as restricted registered cablers in accordance with ACMA requirements.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Suggested words for Statement of Attainment

These units of competency contribute to the Australian Communications and Media Authority training requirements for restricted cabling registration.

# ICTSS00064 Basic Telecommunications Rigging Installation Skill Set

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Description

This skill set addresses the skills and knowledge required to install telecommunications network infrastructure on structures.

## Pathways Information

This skill set provides credit towards ICT20315 Certificate II in Telecommunications Technology.

## Licensing/Regulatory Information

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

## Skill Set Requirements

ICTCBL208 Splice and terminate optical fibre cable for carriers and service providers

ICTRFN201 Install a satellite antenna

ICTTCR201 Use rigging practices and systems on telecommunications network structures

ICTTCR202 Use operational safety in a telecommunications rigging environment

ICTTCR203 Use safe rigging practices to climb and perform rescues on telecommunications network structures

ICTTEN207 Install and test internet protocol devices in convergence networks

© Commonwealth of Australia, 2025 Future Skills Organisation

# Target Group

This skill set is targeted at new or existing workers in the telecommunications industry who wish to develop basic skills in rigging.

# Suggested words for Statement of Attainment

These units of competency meet the industry requirements for installation of a limited range of telecommunications network infrastructure on structures.

# Custom Content Section

Not applicable.

# ICTSS00065 Civil Works – Installation of Pit and Pipe and FDH Skill Set

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Description

This skill set addresses the skills and knowledge required to work in National Broadband Network (NBN) construction roles.

## Pathways Information

This skill set provides credit towards the ICT20215 Certificate II in Telecommunications Network Build and Operate.

## Licensing/Regulatory Information

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

## Skill Set Requirements

CPCCOHS1001A Work safely in the construction industry

HLTAID001 Provide cardiopulmonary resuscitation

ICTCBL211 Install an above ground equipment enclosure

ICTCBL213 Construct underground telecommunications infrastructure

ICTPMG201 Prepare site for support installation

ICTTEN202 Use hand and power tools

ICTWHS204 Follow work health and safety and environmental policy and procedures

© Commonwealth of Australia, 2025 Future Skills Organisation

# Target Group

This skill set is for new of existing workers in the telecommunications industry who wish to work in NBN construction.

# Suggested words for Statement of Attainment

These units of competency meet industry requirements for the installation of pit and pipe and fibre distribution hub (FDH) cabinets.

# Custom Content Section

Not applicable.

# ICTSS00066 Commercial Digital Television Antenna Systems Installation Skill Set

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Description

This skill set addresses the skills and knowledge required to work within the digital reception sector of the telecommunication industry in commercial antenna installation. The more complex antenna installations include Master Antenna TV (MATV) and Communal Antenna TV (CATV) systems.

## Pathways Information

This skill set provides credit towards ICT30215 Certificate III in Telecommunications Digital Reception Technology.

## Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

## Skill Set Requirements

ICTCBL206 Alter services to existing cable system

ICTCBL306 Locate and identify cable system faults

ICTDRE303 Install a complex digital reception system

ICTWHS204 Follow work health and safety and environmental policy and procedures

ICTRFN401 Conduct radio frequency measurements

## Target Group

This skill set is for experienced personnel who may have undertaken the domestic antenna installation program, or similar, and wish to work in commercial antenna installation.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Suggested words for Statement of Attainment

These units of competency meet industry requirements for working in commercial antenna installation.

# Custom Content Section

Not applicable.

# ICTSS00067 Convergent Technology Skill Set

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Description

This skill set addresses the skills and knowledge required to use internet protocol (IP) technologies in the installation of information and communication technology (ICT) networks in homes and small to medium enterprises.

## Pathways Information

This skill set provides credit towards ICT41215 Certificate IV in Telecommunications Engineering Technology.

## Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

## Skill Set Requirements

ICTTEN404 Install and configure a wireless mesh network

ICTTEN415 Install and configure internet protocol TV in a home network

ICTTEN416 Install, configure and test an internet protocol network

ICTTEN418 Install and test a radio frequency identification system

ICTTEN425 Design, install and configure a customer smart technology network

## Target Group

This skill set is for personnel who require training in the installation of ICT networks.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Suggested words for Statement of Attainment

These units of competency meet industry requirements related to the installation of information and communication technology networks in homes and small to medium enterprises.

# Custom Content Section

Not applicable.

# ICTSS00068 Designer Skill Set

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Description

This skill set addresses the skills and knowledge required to design information and communications technology (ICT) access networks.

## Pathways Information

This skill set provides credit towards ICT41115 Certificate IV in Telecommunications Network Design.

## Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

## Skill Set Requirements

ICTBWN303 Install lead-in module and cable for fibre to the premises

ICTCBL213 Construct underground telecommunications infrastructure

ICTCBL310 Install aerial cable

ICTNPL402 Plan the deployment of access network architectures

ICTPMG504 Prepare project specifications

## Target Group

This skill set is for individuals, with limited experience in the telecommunications industry, who require training in network design.

## Suggested words for Statement of Attainment

These units of competency meet industry requirements for designing access networks.

# ICTSS00069 Domestic Digital Television Antenna Installation Skill Set

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Description

This skill set addresses the skills and knowledge required to work in the digital reception sector of the telecommunication industry installing basic terrestrial antenna systems in single dwelling installations.

## Pathways Information

This skill set provides credit towards ICT20315 Certificate II in Telecommunications Technology and the ICT30215 Certificate III in Telecommunications Digital Reception Technology.

## Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

## Skill Set Requirements

ICTCBL303 Install and terminate coaxial cable

ICTDRE301 Install digital reception equipment

ICTRFN202 Install a terrestrial antenna

ICTRFN401 Conduct radio frequency measurements

ICTTEN202 Use hand and power tools

ICTWHS204 Follow work health and safety and environmental policy and procedures

© Commonwealth of Australia, 2025 Future Skills Organisation

# Target Group

This skill set is for new or existing workers who wish to gain the skills and knowledge required to install and maintain terrestrial antenna systems and associated digital reception equipment.

# Suggested words for Statement of Attainment

These units of competency meet industry requirements for the installation and maintenance of antenna systems and associated digital reception equipment.

# Custom Content Section

# ICTSS00071 IP Convergence Installations for Home and SME Skill Set

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Description

This skill set addresses the skills and knowledge required to use internet protocol (IP) technologies in the installation and maintenance of secure telecommunication networks in homes and small to medium enterprises.

## Pathways Information

This skill set provides credit towards ICT20315 Certificate II in Telecommunications Technology.

## Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

## Skill Set Requirements

ICTTEN207 Install and test internet protocol devices in convergence networks

ICTTEN203 Install and configure a home or small office network

ICTTEN204 Install and configure a small to medium business network

ICTTEN205 Build and maintain a secure network

ICTTEN206 Operate new media software packages

## Target Group

This skill set is for individuals who wish to work in the installation of modern telecommunications networks.

© Commonwealth of Australia, 2025 Future Skills Organisation

# Suggested words for Statement of Attainment

These units of competency meet industry requirements for work in the installation and maintenance of secure telecommunications networks in homes and small to medium enterprises.

# ICTSS00074 Radio Technician Skill Set

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Description

This skill set addresses the skills and knowledge required to install, modify and maintain basic radio communications networks.

## Pathways Information

This skill set provides credits towards ICT41215 Certificate IV in Telecommunications Engineering Technology.

## Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

## Skill Set Requirements

ICTRFN301 Install a radio communications antenna and feedline

ICTRFN304 Construct and test a radio communications device

ICTTEN201 Use electrical skills in telecommunications work

ICTTEN302 Install telecommunications network equipment

ICTTEN410 Locate, diagnose and rectify faults

ICTTEN414 Repair telecommunication system faults

ICTWHS204 Follow work health and safety and environmental policy and procedures

## Target Group

This skill set is suitable for individuals with limited experience in the telecommunications industry who wish to specialise in radio communications.

© Commonwealth of Australia, 2025 Future Skills Organisation

## Suggested words for Statement of Attainment

These units of competency meet industry requirements for working in the installation, modification and maintenance of basic radio communications networks.

# ICTSS00076 Wireless LAN and IP Network Installation Skill Set

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 2.0. |

## Description

This skill set addresses the skills and knowledge required in the installation of a secure wireless local access network (LAN) and associated networking elements.

## Pathways Information

This skill set provides credit towards ICT41215 Certificate IV in Telecommunications Engineering Technology.

## Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

## Skill Set Requirements

ICTNWK406 Install, configure and test network security

ICTNWK417 Build an enterprise wireless network

ICTWHS202 Work safely in a radio frequency electromagnetic radiation environment

ICTTEN302 Install telecommunications network equipment

ICTTEN416 Install, configure and test an internet protocol network

ICTTEN417 Install, configure and test a router

## Target Group

This skill set is for those individuals who require further training in the installation of information and communication technology networks.

© Commonwealth of Australia, 2025 Future Skills Organisation

# ICTSS00077 Telecommunications Linesworker Copper Skill Set

## Modification History

**Modification History**

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 3.1. |

## Description

This skill set addresses the skills and knowledge required to install copper telecommunications cable. Each unit of competency includes relevant work, health and safety awareness training. Other health, safety and environment requirements, relevant to the role specified in this skill set, may be stipulated as part of workplace requirements.

## Pathways Information

This skill set provides credit towards the ICT20515 Certificate II in Telecommunications Network Build and Operate.

## Licensing/Regulatory Information

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

## Skill Set Requirements

ICTCBL211 Install an above ground equipment enclosure

ICTCBL213 Construct underground telecommunications infrastructure

ICTCBL214 Fix aerial cable

ICTCBL207 Haul underground cable

ICTCBL320 Jumper metallic conductor cable in the access network

ICTPMG201 Prepare site for support installation

© Commonwealth of Australia, 2025 Future Skills Organisation

# Target Group

This skill set is for entry level telecommunications workers.

# Suggested words for Statement of Attainment

These units of competency meet industry requirements for the installation of copper telecommunications cable.

# Custom Content Section

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 3.1. |

## Description

This skill set addresses the skills and knowledge required to joint copper telecommunications cable. Each unit of competency includes relevant work, health and safety awareness training. Other health, safety and environment requirements, relevant to the role specified in this skill set, may be stipulated as part of workplace requirements.

## Pathways Information

This skill set provides credit towards the ICT30415 Certificate III in Telecommunications Network Build and Operate.

## Licensing/Regulatory Information

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

## Skill Set Requirements

ICTCBL215 Joint metallic conductor cable in access network

ICTCBL317 Cut over metallic conductor cable in the access network

ICTCBL318 Install and cut over metallic conductor cable to access network cabinet

ICTCBL319 Rearrange large size copper cable

ICTTEN302 Install telecommunications network equipment

ICTTEN303 Locate, identify and rectify recurrent network faults

© Commonwealth of Australia, 2025 Future Skills Organisation

# Target Group

This skill set is for entry level telecommunications workers.

# Suggested words for Statement of Attainment

These units of competency meet industry requirements for the jointing of copper telecommunications cable.

# ICTSS00081 Technician Fibre Skill Set

## Modification History

| Release | Comments |
|---|---|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 3.1. |

## Description

This skill set addresses the skills and knowledge required to install, test and terminate telecommunications optical fibre cable. Each unit of competency includes relevant work, health and safety awareness training. Other health, safety and environment requirements, relevant to the role specified in this skill set, may be stipulated as part of workplace requirements.

## Pathways Information

This skill set provides credit towards the ICT30415 Certificate III in Telecommunications Network Build and Operate.

## Licensing/Regulatory Information

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

## Skill Set Requirements

ICTBWN304 Work safely with live fibre to test and commission a fibre to the x installation

ICTCBL302 Install and terminate optical fibre cable on customer premises

ICTTEN310 Remove and replace electronic circuit boards in carrier equipment

ICTTEN311 Inspect, clean and handle optical fibre cable and connectors

ICTTEN409 Commission an electronic system

ICTTEN416 Install, configure and test an internet protocol network

© Commonwealth of Australia, 2025 Future Skills Organisation

# Target Group

This skill set is for entry level telecommunications workers.

# Suggested words for Statement of Attainment

These units of competency meet industry requirements for working with telecommunications optical fibre cable.

# Custom Content Section

Not applicable.
