Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general ICT industry, and include access to:

- a personal computer
- relevant organisational guidelines
- relevant documentation

© Commonwealth of Australia, 2025 Future Skills Organisation

- a site where routine ICT client support may be demonstrated.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTICT210 Operate database applications

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to operate database applications and create and develop simple relational databases using pre-existing data.

It applies to individuals who provide administrative support working under direct supervision or with limited responsibility within a wide range of industry occupations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

General ICT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Create database	1.1 Open a database application and design a two-table, simple relational database incorporating basic design principles 1.2 Develop a table with fields and attributes according to database usage, as well as user requirements 1.3 Create a primary key and establish an index for each table 1.4 Modify table layout and field attributes as required 1.5 Create a relationship between the two tables 1.6 Add and modify data in a table according to information

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	requirements 1.7 Add and delete records as required 1.8 Save and close down database to storage area
2. Customise basic settings	2.1 Adjust page layout to meet user requirements 2.2 Open and view different toolbars 2.3 Format font as appropriate for the purpose of the database entries
3. Create reports	3.1 Design reports to present data in a logical sequence 3.2 Modify reports to include or exclude additional requirements 3.3 Distribute reports to appropriate person in a suitable format
4. Create forms	4.1 Use a wizard to create a simple form 4.2 Open existing database and modify records through a simple form 4.3 Rearrange objects within the form to accommodate information requirements
5. Retrieve information	5.1 Access existing database and locate required records 5.2 Create simple query and retrieve required information 5.3 Develop query with multiple criteria and retrieve required information 5.4 Select data and display appropriately

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 5.1	• Identifies and analyses a wide range of hard copy and on-line forms, reports and other end-user documentation to identify end-user needs and data
Writing	1.2, 3.1, 3.2, 4.1, 4.3, 5.2, 5.3	• Uses database related terminology and protocols when designing tables, queries, reports and forms

© Commonwealth of Australia, 2025 Future Skills Organisation

		• Uses clear plain English appropriate for end-users when labelling fields within reports and forms
Oral Communication	1.2, 3.3	• Uses simple, relevant language, effective questioning, and active listening techniques to clarify user requirements, confirm understanding and when liaising with the appropriate person
Numeracy	5.3	• Identifies and comprehends the specific numeric data needed, and uses logical functions, mathematical symbols and applies the order of operations in calculations when developing queries
Interact with others	3.3	• Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role
Get the work done	1.1-1.8, 2.1-2.3, 3.1,3.2, 4.1-4.3, 5.1-5.4	• Plans a range of routine tasks and aims to achieve them efficiently • Takes responsibility for routine, low-impact decisions within familiar situations • Begins to identify and implement standard solutions for a number of routine problems • Understands the purpose and specific functions of common digital tools used in work contexts • Follows routine procedures for using digital technology to enter, store and retrieve information directly relevant to role

Assessment Requirements for ICTICT210 Operate database applications

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- design and develop a simple database using a standard database package
- add data
- create and use a query with multiple criteria
- create and modify reports and forms.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline basic database design principles
- discuss the purposes of forms, reports and queries for retrieving and displaying information
- outline the reasons for relationships between tables (cardinality)
- describe the purpose, use and function of database software.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general information and communications technology (ICT) industry and include access to:

- a PC and printer
- database software currently used in industry
- documents detailing organisational style guide and policy

© Commonwealth of Australia, 2025 Future Skills Organisation

- documents or information containing data suitable for creating a database.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTICT211 Identify and use basic current industry specific technologies

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to engage in basic ongoing review and research of industry specific technologies in order to identify and apply these technologies or techniques to improve aspects of an organisation's activities.

It applies to individuals who work under minimal supervision and are responsible for ensuring that the quality of the business process is maintained at the highest level possible, through the appropriate application of industry specific technologies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

General ICT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to use basic industry specific technologies	1.1 Identify technologies specific to an industry sector 1.2 Acquire and use the industry specific technologies 1.3 Identify, classify and use industry specific technologies for the benefit of the organisation
2. Use basic industry	2.1 Conduct testing of industry specific technologies

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
specific technologies to assist in solving organisational problems	2.2 Use features and functions of industry specific technologies within an organisational context 2.3 Demonstrate depth of knowledge of enabling technologies to an accepted industry standard 2.4 Access and use sources of information relating to the industry specific technologies
3. Evaluate performance of basic industry specific technology	3.1 Evaluate industry specific technologies for performance, usability and benefit to the organisation 3.2 Determine environmental considerations involved when using the technology 3.3 Seek feedback from users where appropriate

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	1.1-1.3, 2.3, 2.4	• Investigates, evaluates and applies information from a range of complex and technical texts to expand own knowledge and identify industry specific technologies that will benefit the organisation
Reading	1.1, 1.3, 2.1, 2.4, 3.2, 3.3	• Identifies and interprets technical online and hard copy documentation containing complex terminology and diagrams to identify industry specific technologies that will benefit the organisation, and to determine environmental considerations
Oral Communication	1.1-1.3, 2.4, 3.1-3.3	• Elicits information and feedback by using effective listening and questioning techniques to identify and evaluate industry specific technologies • Uses clear, easy-to-understand language, and translates industry specific terminology into plain English where necessary
Navigate the world of work	2.3, 3.2	• Recognises organisational expectations and follows explicit protocols and procedures
Get the work done	1.1-.3, 2.1-2.4, 3.1	• Determines priorities and sequences the steps involved in clearly defined familiar tasks, and

© Commonwealth of Australia, 2025 Future Skills Organisation

		identifies and assembles the resources required • Demonstrates the purposes, specific functions and key features of common digital systems and tools, and operates them effectively to complete routine tasks

Unit Mapping Information

Code and title current version	**Code and title previous version**	**Comments**	**Equivalence status**

Assessment Requirements for ICTICT211 Identify and use basic current industry specific technologies

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify basic new and emerging industry specific technologies and techniques
- use basic features and functions of identified industry specific technologies to an industry standard.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline current technology trends and directions in information and communications technology (ICT), and specifically of the major industry technology standards used in the specified area
- outline vendor product directions
- describe current industry hardware and software products, with broad knowledge of general features and capabilities, and their application
- outline information gathering techniques.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general ICT industry, and include access to:

- a site where industry specific technologies may be used
- industry specific technologies currently used in industry
- documents detailing work health and safety (WHS) standards, environmental guidelines and organisational requirements.

ICTICT212 Incorporate Indigenous needs and perspectives into ICT environment

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to identify and use current information and communications technology (ICT) within Indigenous communities and to research and discuss alternative ICT solutions that meet the specific needs of Indigenous learners.

It applies to individuals who work with Indigenous people and communities under a level of supervision and use a range of specialised technical knowledge and knowledge of Indigenous learning styles and systems to provide advice.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Note: delivery and assessment against this unit of competency must comply with Indigenous community protocols and guidelines, and be supported by Elders or custodians of Country.

Unit Sector

General ICT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify the use of ICT systems in the Indigenous	1.1 Identify local community organisations, including Indigenous community organisations and other relevant

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
community	Indigenous and related agencies, that use ICT 1.2 Determine specific Indigenous learning styles, knowledge systems and relevant legislation that impact on the use of ICT in an Indigenous community 1.3 Identify the most common communication technologies, software applications and hardware solutions used in the local community 1.4 Identify the use of ICT in local community organisations, including Indigenous community organisations and other relevant bodies
2. Identify and use specific ICT resources relevant to Indigenous people	2.1 Identify a range of methods of accessing Indigenous and non-Indigenous electronic resources for research and learning 2.2 Identify and access relevant Indigenous and ICT websites and other online resources 2.3 Following community consultation, discuss and compare the relevance of a range of Indigenous websites to Indigenous communities
3. Identify appropriate ICT resources to meet the needs of Indigenous people and communities	3.1 Use the most common local communication technologies, software applications and hardware solutions 3.2 Research and identify possible alternative communication technologies, software applications and hardware solutions 3.3 Discuss most appropriate ICT resources with local Indigenous community, to meet Indigenous individual and community needs

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 2.2, 3.2	• Recognises and interprets both hard copy and on-line texts from both Indigenous and non-Indigenous sources to obtain information about the use of ICT in Indigenous communities
Oral	1.1-1.4, 2.1-2.3,	• Uses effective questioning and active listening techniques to elicit information

© Commonwealth of Australia, 2025 Future Skills Organisation

Communication	3.2, 3.3	• Uses specific language and applies appropriate communication skills to ensure satisfactory interactions with Indigenous community members • Participates in a verbal exchange of ideas/solutions and uses detailed and clear language to clarify and present information
Get the work done	1.3, 2.1, 2.2, 3.1	• Begins to identify and assemble resources required to undertake the role • Understands the purposes, specific functions and key features of common digital systems and tools, and operates them effectively to complete routine tasks

Unit Mapping Information

Code and title current version	**Code and title previous version**	**Comments**	**Equivalent status**

Assessment Requirements for ICTICT212 Incorporate Indigenous needs and perspectives into ICT environment

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify common communication technologies, software applications and hardware solutions used in the local Indigenous community
- identify specific Indigenous customs and practices that impact on the use of information and communications technology (ICT) within the community
- use current communication technologies, software applications and hardware solutions
- consult with relevant Indigenous community members and develop alternative ICT solutions.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- provide a summary of operating system, hardware and software products
- discuss ergonomic principles to avoid back, wrist and eye strain
- discuss work health and safety (WHS) principles and responsibilities relating to ICT specific to Indigenous community customs and practices
- identify important indigenous cultural communications attributes.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general ICT industry, and include access to:

- a PC
- relevant hardware components

© Commonwealth of Australia, 2025 Future Skills Organisation

- WHS standards and organisational policies and procedures
- relevant software applications
- common communication technologies.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTICT302 Install and optimise operating system software

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit defines the skills and knowledge required to install, configure and optimise operating system (OS) software to meet business and client needs.

It applies to individuals who may work under supervision and support others using well developed skills in creating solutions through analysis and evaluation of information.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

General ICT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Determine function of operating system	1.1 Identify and demonstrate understanding of the purposes of operating system 1.2 Distinguish between batch system, real-time system and multi-tasking system 1.3 Compare and contrast different operating systems and their features 1.4 Identify and demonstrate knowledge of the basic functions of operating system, including file system, memory

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	management, process scheduling 1.5 Identify and demonstrate management of virtual memory
2. Obtain operating system	2.1 Contact operating system vendors to obtain technical specifications and system requirements 2.2 Identify process and steps required to install and configure the operating system using installation components 2.3 Document adjustment recommendations and provide to appropriate person 2.4 Determine and apply knowledge of licensing, hardware and security requirements
3. Install, configure and optimise operating system	3.1 Install, configure and test operating system using installation components and boot-utility options 3.2 Use the relevant operating system user interface to correctly configure the installation 3.3 Optimise the system to meet organisational requirements 3.4 Document the system according to organisational requirements 3.5 Install the operating system with minimal disruption to client or users
4. Provide instruction to meet new software requirements	4.1 Provide one-to-one instruction about changes to the client or users as required 4.2 Obtain client evaluation about new system to ensure requirements are met, using appropriate feedback mechanism

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3-1.5, 2.1, 2.2, 2.4, 3.1, 3.2, 4.2	• Identifies, analyses and evaluates a range of on-line and hard-copy text containing complex, OS specific terminology, and applies the information to the selection, installation, configuration and optimisation of operating systems

© Commonwealth of Australia, 2025 Future Skills Organisation

		• Interprets and comprehends a large range of syntax, diagrams, icons, symbols, text, numbers and letters necessary to install and configure operating systems
Writing	2.3, 3.4	• Uses the correct spelling and grammar, clear plain English and systems related text to document recommendations and processes, and develop feedback tools
Oral Communication	2.1, 3.5, 4.1, 4.2	• Elicits and evaluates information using OS related terminology and effective listening and questioning techniques • Uses simple and relevant language to liaise with clients, present information and obtain feedback
Navigate the world of work	2.4	• Takes some personal responsibility for adherence to legal and regulatory requirements, and seeks clarification when required
Get the work done	1.1-1.5, 2.1, 2.2, 3.1-3.3, 3.5	• Takes responsibility for planning and organising own workload, identifying ways of sequencing and combining elements for greater efficiency and considering how to link with the work of others • Understands the purposes, specific functions and key features of common digital systems and tools, and operates them effectively to complete routine tasks

Unit Mapping Information

Code and title current version	**Code and title previous version**	**Comments**	**Equivalence status**

Assessment Requirements for ICTICT302 Install and optimise operating system software

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- install, configure and test an operating system to improve system performance with minimum disruption to clients.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- compare current industry accepted hardware and software products
- outline functions and features of operating systems used by the organisation
- explain the installation and configuration of systems software
- explain the architecture of current technical systems
- outline the deployment of current organisational systems
- list organisational requirements for operating system (OS) software
- explain prerequisites for system software installation
- outline set-up and configuration procedures
- list software packages supported by the organisation
- describe system’s current functionality
- list system’s diagnostic software
- outline vendor specifications and requirements for installation.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general information and communications technology (ICT) industry, and include access to:

- a personal computer where installation may be performed
- OS software and technical documentation
- organisational documentation.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTICT303 Connect internal hardware components

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to acquire, install, configure and evaluate system hardware components according to client and user requirements.

It applies to individuals who work with a degree of self-sufficiency and provide support in a range of information and communications technology (ICT) work areas and activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

General ICT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify, categorise and distinguish between the different types of internal hardware components	1.1 Identify and categorise the different internal hardware components 1.2 Define the purpose and characteristics of the different internal hardware component categories 1.3 Distinguish between different types of devices within each internal hardware component category
2. Determine components required	2.1 Identify and clarify user internal hardware component requirements according to organisational guidelines

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	2.2 Organise and record user component requirements, pass on to appropriate person for evaluation and vendor selection
3. Obtain components	3.1 Contact vendors to obtain technical specifications for the proposed components 3.2 Assess options and provide recommendations to the appropriate person for final analysis 3.3 Obtain components to prepare for installation
4. Install components	4.1 Develop plans, with prioritised tasks and contingency arrangements, for the installation of selected components with minimum disruption to clients 4.2 Liaise with appropriate person to obtain approval for the plans 4.3 Install and configure components according to plan, installation procedures and organisational requirements 4.4 Test components for error-free performance, using available technology 4.5 Identify and resolve identified problems 4.6 Test and enhance system performance, using knowledge of the system, to meet organisational benchmarks 4.7 Document the installation and configuration process according to organisation guidelines
5. Evaluate modified system	5.1 Collect client or user feedback and analyse against client requirements 5.2 Correct identified shortcomings in the system and record actions

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	2.1, 3.2, 4.3, 5.1	• Identifies, interprets and evaluates online and hard copy documentation containing complex ICT related terminology, acronyms and concepts

© Commonwealth of Australia, 2025 Future Skills Organisation

Writing	2.2, 3.2, 4.1, 4.7	• Uses correct spelling, grammar and plain English together with the ICT specific terminology and diagrams to convey recommendations and requirements, and complete organisational documentation
Oral Communication	1.1, 2.2, 3.1-3.3, 4.1, 4.2, 5.1	• Converts highly technical language and terminology into plain English to communicate ideas and plans, and gather feedback from clients • Uses effective listening and questioning techniques and technical terminology to elicit information and make the correct component selection
Navigate the world of work	2.1, 4.3	• Recognises and follows explicit protocols and meets expectations associated with own role
Get the work done	1.1, 1.3, 2.1, 2.2, 3.2, 3.3, 4.1, 4.4-4.6, 5.1, 5.2	• Initiates standard procedures when responding to familiar problems within immediate context • Recognises some general design and operating principles of digital tools and uses these to help when modifying systems and when troubleshooting • Takes responsibility for planning and organising own workload, identifying ways of sequencing and combining elements for greater efficiency

Unit Mapping Information

Code and title current version	**Code and title previous version**	**Comments**	**Equivalence status**

Assessment Requirements for ICTICT303 Connect internal hardware components

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify and categorise the different types of internal hardware components
- modify system's hardware to meet client requirements
- plan modification of and connect internal hardware components according to vendor and technical specifications
- install components across a variety of situations and account for unexpected contingencies
- evaluate the system on completion.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe areas of the operating system relevant to configuration and testing
- compare current industry accepted hardware and software products
- outline environmental considerations in e-waste disposal
- outline organisational guidelines and organisational requirements with regard to safety, recycling and component installation
- outline system's diagnostic software and current functionality
- interpret vendor specifications and requirements for component installation.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general information and communications technology (ICT) industry, and include access to:

© Commonwealth of Australia, 2025 Future Skills Organisation

- a personal computer and internal hardware components for installation
- current industry standard performance testing software
- documents detailing organisational guidelines and requirements
- technical manuals and tools.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTICT304 Implement system software changes

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to implement system software changes and to hand over the modified system to the client's operational area.

It applies to individuals working in support roles who are required to update operating systems on client computers with the latest technology fixes, working under minimum supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

General ICT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Determine system changes required	1.1 Determine and record required changes to system 1.2 Ensure documentary evidence exists to support changes and evaluate changes required 1.3 Complete documentation required according to maintenance methodologies 1.4 Clarify and confirm nature of the changes with the client 1.5 Obtain technical data from reliable sources and request

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	other resources that may be required to complete the changes
2. Carry out system changes	2.1 Plan the procedure to effect intended changes 2.2 Consult with colleagues and users involved in the proposed changes and agree a mutually acceptable timeline and method of implementation 2.3 Copy initialisation or configuration files prior to implementation 2.4 Create a roll-back path in the event of failure 2.5 Ensure changes required in software are made according to project or organisational guidelines 2.6 Test and verify that the changes have been made according to implementation guides and organisational standards
3. Present changes to client	3.1 Demonstrate changes to the client and explain the impact of these changes 3.2 Work towards making these changes acceptable to the client if changes are rejected, or making further modifications if required 3.3 Update documentation and repositories according to standards and update modifications made to the change management system
4. Perform handover to client	4.1 Update documentation and client procedures to reflect changes made 4.2 Secure sign-off of acceptance documents by client 4.3 Facilitate handover of modified system to client's operational area

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.5	• Identifies and interprets hard copy, online and computer generated text, numerical and diagrammatic information with systems

© Commonwealth of Australia, 2025 Future Skills Organisation

		software specific terminology • Reviews a range of organisational documentation to identify relevant information relating to the requirements of both the job role and organisation
Writing	1.1, 1.3, 3.3, 4.1	• Uses correct spelling and grammar, plain English and, when necessary, systems related text and terminology to complete documentation and update client procedures
Oral Communication	1.1, 1.2, 1.4, 1.5, 2.1, 2.2, 3.1, 3.2, 4.2, 4.3	• Uses effective listening and questioning techniques and systems related terminology to elicit information about the systems and determine the job requirements • Converts highly technical language and terminology to plain English to communicate changes to, and gather feedback from, the client(s)
Navigate the world of work	2.5, 2.6, 3.3	• Recognises and follows explicit protocols and meets expectations associated with own role
Get the work done	1.1, 2.1-2.4, 2.6, 3.2, 3.3, 4.3	• Initiates standard procedures when responding to familiar problems within immediate context • Recognises some general design and operating principles of digital tools and uses these to help when modifying systems and when troubleshooting • Takes responsibility for planning and organising own workload, identifying ways of sequencing and combining elements for greater efficiency

Assessment Requirements for ICTICT304 Implement system software changes

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- evaluate, document and implement changes to the system with minimum disruption to the system and client users
- hand over the project to the client with instructions and updated documentation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and describe business scheduling requirements
- identify change control procedures
- describe client business domain
- discuss current industry accepted hardware and software products
- discuss emerging standards for data and voice communications
- outline the system's current functionality
- discuss the features of the system under modification
- outline the organisational policy and procedures with regard to system changes
- recognise vendor software services with regard to system changes.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general information and communications technology (ICT) industry, and include access to:

© Commonwealth of Australia, 2025 Future Skills Organisation

- a computer
- system software currently used in industry
- technical manuals and tools.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTICT306 Migrate to new technology

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to research, acquire, evaluate and apply new technology to improve the organisation’s performance.

This unit applies to individuals who have achieved a degree of autonomy as information and communications technology (ICT) users and support staff engaged in ongoing review and research to identify and apply new technology or techniques to improve aspects of the organisation's activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

General ICT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to use new technology	1.1 Review organisation’s goals and activities 1.2 Research new operational technologies that will advance the organisation’s goals and activities 1.3 Prepare evaluation checklist 1.4 Evaluate and select the most appropriate technologies 1.5 Acquire selected technology

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.6 Identify and use new or upgraded equipment where appropriate for the benefit of the organisation
2. Use technology to assist in solving organisational problems	2.1 Conduct testing of new or upgraded equipment 2.2 Use features and functions of new or upgraded equipment and software within the organisation 2.3 Access and use sources of information relating to new or upgraded equipment
3. Evaluate new or upgraded technology performance	3.1 Evaluate new or upgraded equipment for performance and usability against work health and safety (WHS) standards and evaluation criteria 3.2 Determine environmental considerations for new or upgraded equipment 3.3 Seek feedback from users, where appropriate 3.4 Document new technology in a method consistent with organisational guidelines

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	1.1, 1.3, 1.4, 2.3	• Investigates, evaluates and applies information from a range of complex and technical texts to expand own knowledge and identify new technologies that will benefit the organisation
Reading	1.2, 1.4, 2.3, 3.1-3.3	• Identifies and interprets technical online and hard copy documentation containing complex terminology and diagrams to identify new technologies that will benefit the organisation, and to determine organisational, WHS and environmental considerations
Writing	1.3, 3.3, 3.4	• Uses appropriate language and document structure to clarify evaluation criteria and enhance objectivity when developing checklists • Uses correct grammar, sentence structure and, as much as possible, plain English in all documentation

© Commonwealth of Australia, 2025 Future Skills Organisation

		developed • Uses appropriate questioning strategies, avoiding loaded or leading questions, when developing feedback gathering documentation
Oral Communication	1.1, 1.2, 1.4, 2.3, 3.3	• Elicits information and feedback by using effective listening and questioning techniques, and language appropriate to the audience and subject matter to identify and evaluate new technologies • Uses clear, easy-to-understand language, translating technical terminology into plain English when talking to users
Navigate the world of work	3.1	• Appreciates the implications of legal and regulatory responsibilities related to own work and is beginning to recognise some general legal principles across work contexts
Get the work done	1.3, 1.4-1.6, 2.1, 2.2, 3.2	• Takes responsibility for planning and organising own workload, identifying ways of sequencing and combining elements for efficiency • Understands the purposes, specific functions and key features of common digital systems and tools • Tests and operates common digital tools and systems to effectively complete routine tasks • Takes responsibility for the outcomes of routine decisions related directly to own role

Assessment Requirements for ICTICT306 Migrate to new technology

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify new and emerging technology in information and communications technology (ICT)
- test and evaluate new equipment for the benefit of the organisation
- use features and functions of new technologies, including software and equipment.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss current technology trends and directions in ICT including:
  - hardware
  - new developments
  - new protocols
  - services
  - software
- describe the general features and capabilities of current industry hardware and software products
- outline information gathering techniques
- outline vendor product directions relating to specified technology.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general ICT industry, and include access to:

- a site where new technology may be used
- new equipment and software currently used in industry
- documents detailing work health and safely (WHS) standards, environmental guidelines and organisational requirements.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTICT401 Determine and confirm client business requirements

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to determine client business system requirements and verify the accuracy of the information gathered.

It applies to information and communications technology (ICT) personnel who are required to analyse client expectations and needs, and recommend business system changes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

General ICT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Determine context of business need or problem	1.1 Establish the business problem to be investigated, including determining system boundaries, scope and the development methodology to be used 1.2 Choose information gathering method and develop questions appropriate to business problem 1.3 Develop objectives and identify expected outcomes to be achieved 1.4 Document the business problem

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.5 Submit documentation to appropriate person for substantiation
2. Gather information	2.1 Use chosen information gathering method to identify clients of the system and problems they encounter 2.2 Record client responses 2.3 Analyse gathered information to identify new system requirements and establish problem specifications 2.4 Document system requirements and problems 2.5 Analyse physical requirements and identify changes required to implement new systems
3. Confirm system specifications	3.1 Check documentation to ensure it meets client business needs 3.2 Submit documentation to the client for verification of accuracy and approval 3.3 Make changes to the documentation as necessary and indicated by the client 3.4 Submit documentation to client for final approval or sign-off

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 2.3, 2.5, 3.1	• Identifies, analyses and evaluates information from a variety of sources containing complex systems related terminology to determine system performance requirements and establish solutions
Writing	1.2-1.4, 2.2, 2.4, 3.3	• Uses the correct spelling and grammar, plain English and, when necessary, systems related text and terminology to develop information gathering tools and document recommendations
Oral Communication	1.1, 2.1, 2.5, 3.2, 3.4	• Uses plain English, effective listening and questioning techniques and, where necessary, systems related terminology to elicit information

© Commonwealth of Australia, 2025 Future Skills Organisation

		• Uses plain English and relevant terminology to liaise with clients, present information and obtain feedback
Get the work done	1.1-1.3, 2.1, 2.3, 2.5	• Takes responsibility for planning and organising own workload, identifying ways of sequencing and combining elements so work is undertaken methodically • Recognises and takes responsibility for addressing predictable and some less predictable problems in familiar work contexts • Understands the purposes, specific functions and key features of common digital systems and tools to provide current advice on systems and data gathering products

Assessment Requirements for ICTICT401 Determine and confirm client business requirements

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- use investigative techniques to obtain information and document the business system problem
- produce a clear statement of business expectations and needs, including critical business requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe a variety of data gathering techniques
- describe areas related to the client business in detail
- interpret functional organisational charts
- outline physical requirements of the client's business, taking into account current system functionality, geography, environment, client user and cost constraints
- describe products related to data capture
- discuss the role of stakeholders and the degree of stakeholder involvement.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general information and communications technology (ICT) industry, and include access to:

- current business needs
- a client expectations brief

© Commonwealth of Australia, 2025 Future Skills Organisation

- business objectives
- systems, data gathering and appropriate software products.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTICT405 Develop detailed technical design

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to assist in the development of a detailed technical design.

It applies to individuals performing systems design tasks who are required to review and update technical design documents.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

General ICT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Assist in selecting technical design features	1.1 Select and revise design model based on iteration and design changes 1.2 Incorporate outstanding design points according to acceptance criteria 1.3 Distribute reports identifying changes and implications to appropriate person for review
2. Contribute to design review	2.1 Compare design against requirements and fix as necessary

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	2.2 Confirm design with appropriate person 2.3 Use feedback mechanisms to gather information on design changes from client 2.4 Incorporate design changes where required
3. Contribute to development of program specifications	3.1 Implement modules by incremental development techniques 3.2 Identify user authority for each module 3.3 Prepare detailed specifications of module implementation for each module that will not be incrementally built 3.4 Prepare documentation according to requirements of the project

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 2.1, 2.3	• Identifies, analyses and evaluates a range of online and hard copy text containing complex systems design terminology, syntax and diagrams, and applies the information to the task
Writing	1.1, 1.2, 2.3, 2.4, 3.3, 3.4	• Uses correct spelling and grammar, plain English, systems design related terminology and diagrams to obtain feedback, document recommendations and prepare final project specifications
Oral Communication	1.1, 1.3, 2.2, 2.3	• Elicits and evaluates information using project related terminology and effective listening and questioning techniques • Uses plain English and, where necessary, project related terminology to liaise with clients, present information and obtain feedback
Interact with Others	1.3, 2.2, 2.3	• Selects and uses appropriate conventions and protocols when communicating with clients and co-workers in a range of work contexts • Uses a range of strategies to establish a sense of connection and build rapport with clients and co workers

© Commonwealth of Australia, 2025 Future Skills Organisation

Get the work done	1.1-1.3, 2.1, 2.4, 3.1-3.3	• Uses familiar digital systems and tools to incorporate required changes to model • Applies formal processes when developing strategic initiatives, and plans tasks with logically sequenced steps • Initiates standard procedures when responding to familiar problems within immediate context • Uses familiar digital technologies and systems to access information, search and enter data and code, present information and communicate with others, cognisant of data security and safety

Assessment Requirements for ICTICT405 Develop detailed technical design

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- define the client business domain and client's critical business functions and processes
- design and prepare a clear and best-fit technical design for a set project, incorporating:
  - changes to design model based on user requirements
  - detailed specification of modules
- produce updated documentation to reflect changes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain various life cycle options
- describe design fundamentals and refinement
- discuss design quality metrics.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general information and communications technology (ICT) industry, and include access to:

- requirements model
- business requirements
- project deliverables
- acceptance criteria

© Commonwealth of Australia, 2025 Future Skills Organisation

- current ICT blueprint.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTICT408 Create technical documentation

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to create technical documentation that is clear to the target audience and easy to navigate.

It applies to individuals working as technical writers, designers, developers and support staff who are required to produce technical support documents of their work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

General ICT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify and analyse documentation requirements and client needs	1.1 Consult with client to identify documentation requirements 1.2 Interpret and evaluate documentation requirements and confirm details with client 1.3 Investigate industry and documentation standards for requirements 1.4 Define and document the scope of work to be produced 1.5 Consult with client to validate and confirm the scope of work

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
2. Design documentation	2.1 Identify information requirements with reference to layout and document structure 2.2 Create document templates and style guides consistent with information requirements 2.3 Conduct a review of the system in order to understand its functionality 2.4 Extract content that meets information requirements according to copyright restrictions 2.5 Develop the structure of the technical documentation, giving focus to the flow of information, style, tone and content format 2.6 Validate the technical documentation structure with the client
3. Develop documentation	3.1 Write technical documentation based on the template and scope of work using the information gathered 3.2 Translate technical terminology into plain English where appropriate 3.3 Apply content format and style according to documentation standards and templates
4. Evaluate and edit documentation	4.1 Submit technical documentation to appropriate person for review 4.2 Gather and analyse feedback 4.3 Incorporate alterations into the technical documentation 4.4 Edit the technical documentation for technical and grammatical accuracy
5. Prepare documentation for publication	5.1 Check that the completed technical documentation meets client requirements and scope of work 5.2 Submit the technical documentation to appropriate person for approval 5.3 Prepare the technical documentation for publication and distribution using appropriate channels

© Commonwealth of Australia, 2025 Future Skills Organisation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 1.3, 2.3, 2.4, 4.2, 4.4, 5.1	• Identifies and evaluates organisational documentation and standards, and a range of online and hard copy text containing technical project related terminology and diagrams, then applies the information to the development of appropriate technical documentation • Interprets and comprehends a large range of diagrams, icons, and computer generated text
Writing	1.4, 2.2, 2.5, 3.1-3.3, 4.3, 4.4, 5.3	• Uses correct spelling and grammar, plain English and specific terminology relevant to the project • Uses organisational naming conventions, terminology, style and format to develop technical documents to organisational standards
Oral communication	1.1, 1.3-1.5, 2.1, 2.3, 2.6, 4.1, 4.2	• Elicits and evaluates information using effective listening and questioning techniques • Uses simple and relevant language to confirm understanding of requirements, present information and obtain feedback
Interact with others	5.2	• Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role
Navigate the world of work	1.3, 2.4	• Appreciates the implications of legal and regulatory responsibilities related to own work and is beginning to recognise some general legal principles applicable across work contexts
Get the work done	1.4, 2.1, 2.2, 2.5, 3.3, 4.2	• Takes responsibility for planning and organising own workload, identifying ways of sequencing and combining elements for greater efficiency • Uses familiar digital systems and tools to access, organise, analyse and display information relevant to role • Automatically implements standard procedures for routine decisions

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Requirements for ICTICT408 Create technical documentation

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- establish customer needs
- design and develop technical documentation, such as system, procedures, training material and user guides, incorporating appropriate standards
- update document with client feedback
- prepare documentation for publication.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe content features, such as clarity and readability
- outline the principles of document design, web design and usability
- explain the functions and features of templates and style guides
- explain instructional design principles
- list organisational policies, procedures and standards that cover document design.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general information and communications technology (ICT) industry, and include access to:

- technical specifications
- documentation standards

© Commonwealth of Australia, 2025 Future Skills Organisation

- organisational resources and documentation
- information about system, platform, network or application being documented
- relevant standards
- appropriate word processing software.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTICT424 Address cyber security requirements

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Application

This unit describes the skills and knowledge required to determine the cyber security requirements of an organisation and use a range of resources to protect valuable assets.

This unit applies to individuals who are required to participate in the identification and implementation of cyber security controls.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

General ICT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Analyse cyber security requirements	1.1 Identify and document valuable assets to create register of valuable assets 1.2 Perform threat and risk assessment on valuable assets register to identify and document cyber security requirements 1.3 Review current cyber security controls against the cyber security requirements to identify cyber security gaps
2. Select and implement cyber security controls	2.1 Identify cyber security controls which address cyber security gaps

© Commonwealth of Australia, 2025 Future Skills Organisation

	2.2 Determine specific cyber security controls to address cyber security gaps against the organisation's risk appetite 2.3 Seek feedback from organisational representative and agree on cyber security controls to implement 2.4 Implement, test and document agreed cyber security controls to address cyber security gaps 2.5 Seek feedback from organisational representative to identify discrepancies between cyber security controls and cyber security requirements
3. Maintain and improve security controls	3.1 Determine currency of valuable assets register to identify new valuable assets and changed threats and risks 3.2 Identify, determine, and agree on cyber security controls to address new cyber security gaps 3.3 Implement and document new and modified cyber security controls to address cyber security gaps

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	**Description**
Learning	• Identifies, plans and implements strategies to manage gaps in cyber security knowledge
Reading	• Analyses and consolidates information and data from sources, against defined criteria and requirements, and checks for accuracy and completeness • Recognises and interprets textual information to determine specific information about security incidents
Writing	• Develops material for a specific audience, using clear and detailed language in order to convey explicit information
Oral Communication	• Articulates information clearly, using specific and relevant language suitable to audience to convey recommendations and provide verbal reports • Uses listening and questioning techniques to confirm understanding
Numeracy	• Extracts and evaluates the mathematical information embedded in a range of tasks and texts
Navigate the world of work	• Accepts responsibility and ownership for the task and makes decisions on completion parameters and the need for coordination with others • Takes personal responsibility for following explicit and implicit

© Commonwealth of Australia, 2025 Future Skills Organisation

	policies, procedures and legislative requirements
Interact with others	• Selects form, channel and mode of communication for a specific purpose relevant to own role
Get the work done	• Plans strategic priorities and outcomes within a flexible, efficient and effective context, in a diverse environment exposed to competing demands • Gathers and analyses data, and seeks feedback, to improve plans and processes • Makes decisions in a complex and diverse environment, using input from a range of sources • Explores and incubates new ideas through unconstrained analysis and critical thinking, to develop and improve the organisation's controls

Assessment Requirements for ICTICT424 Address cyber security requirements

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit; including evidence of the ability to:

- For two difference cyber security requirements:
  - analyse cyber security requirements to protect valuable assets
  - determine threats and risks based on current controls and requirements
  - identify and apply controls to protect valuable assets
  - identify improvements to cyber security controls
  -

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

- Common cyber security threats and risks
- Common cyber security controls, key features, and associated advantages and disadvantages
- Cyber security control implementation processes and procedures
- Industry standards relevant to cyber security
- Testing procedures and processes
- Legislative and regulatory requirements relevant to cyber security
- Approaches to performing cyber security threat and risk assessment
-

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in an ICT working environment or workplace. This includes access to:

© Commonwealth of Australia, 2025 Future Skills Organisation

- Organisational representative
- Organisational cyber security requirements
- Specifications of existing cyber security controls
- Information on organisational assets, both valuable and non-valuable
- Software required for performing cyber security threat and risk assessments

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

ICTICT426 Identify and evaluate emerging technologies and practices

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Application

This unit describes the skills and knowledge required to identify emerging technologies and practices in the ICT sector and evaluate their potential impact on organisational practices.

It applies to individuals who work across a wide range of information technology (IT) areas, including technical support, network administration, web technologies, software applications and digital media technologies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

General ICT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify emerging technologies and practices in IT	1.1 Access sources of information on emerging technologies and practices in the IT industry 1.2 Identify and document emerging technologies and practices relevant to organisational context
2. Evaluate the impact of emerging technologies	2.1 Evaluate features and functions of emerging technologies and practices to determine advantages and disadvantages

© Commonwealth of Australia, 2025 Future Skills Organisation

and practices	relevant to organisational context 2.2 Assess and document potential impacts of emerging technologies and practices on current organisational technologies and practices 2.3 Seek and obtain feedback from organisational representative on assessment of impact of emerging technologies and practices and incorporate feedback into report
3. Develop strategies to prepare for emerging technologies and practices	3.1 Develop and document strategies to prepare organisation for impacts of emerging technology and practices 3.2 Identify and document changes to organisational technologies and practices required based on strategies to determine organisational response 3.3 Seek and obtain feedback from organisational representative on strategy and organisational response from organisation and incorporate feedback into strategy and organisational response

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	**Description**
Learning	• Investigates, evaluates and applies information from a range of complex and technical texts to expand own knowledge and to identify current and emerging technology, trends and practices that are likely to impact the organisation • Considers the reliability of an information source against criteria including the author's background, the intended audience and purpose, and the date of publication • Identifies reputable sources of information from which to gather resources and information
Reading	• Identifies and interprets technical documentation containing complex terminology and diagrams to identify current and emerging technologies
Oral Communication	• Uses clear, easy-to-understand language, translating industry-specific terminology into plain English when necessary
Navigate the world of work	• Recognises opportunities to enhance personal professional development • Takes personal responsibility for adherence to legal and regulatory responsibilities relevant to own work context

© Commonwealth of Australia, 2025 Future Skills Organisation

Interact with others	• Discusses ideas and complex information on issues and developments in the IT industry
Get the work done	• Recognises some general design and operating principles of digital tools

Assessment Requirements for ICTICT426 Identify and evaluate emerging technologies and practices

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit; including evidence of the ability to:

- Describe and evaluate purpose, features, attributes and potential applications of:
  - three emerging technologies
  - three emerging practices in the ICT sector
- Develop a strategy to respond to each of the three emerging technologies and three emerging practices, including:
  - potential organisational opportunities and threats resulting from the emerging technology and practice
  - likely impact on current organisational technologies and practices
  - objectives of the organisation in responding to the emerging technology or practice
  - changes required in order to achieve intended objectives of the organisation
  - considerations for how to implement the changes required
  -

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

- Research approaches for emerging technologies and practices in the ICT sector and their potential impact on current technologies and practices
- Technology implementation planning methods
- Organisational technologies and practices

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in an ICT working environment or workplace. This includes access to:

- Organisational representative

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

ICTICT428 Select cloud storage solutions

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Application

This unit describes the skills and knowledge required to select cloud storage solutions based on the analysis of organisational requirements. It includes the development of implementation strategies to ensure that the organisation is prepared for the implementation of the selected cloud storage solutions.

This unit applies to individuals who undertake the evaluation of organisational data storage requirements and plan the implementation for the organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

General ICT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Determine requirements for a cloud storage solution	1.1 Review organisational data storage requirements and guidelines, and industry standards to determine need for cloud storage solutions within scope of own responsibilities 1.2 Identify and evaluate cloud storage options with respect to organisational data storage requirements 1.3 Identify data and security risks to evaluate cloud storage

© Commonwealth of Australia, 2025 Future Skills Organisation

	options for organisations
2. Develop an implementation plan for implementing cloud storage solutions	2.1 Select cloud storage options to satisfy organisational data storage requirements 2.2 Identify potential providers of cloud storage solutions and evaluate providers with respect to organisational data storage requirements 2.3 Develop and document an implementation plan for the cloud storage solution aligned to the organisation data storage requirements within scope of own responsibilities

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	**Description**
Reading	• Draws on a broad range of strategies to build and maintain understanding throughout complex texts • Organises, evaluates and critiques ideas, and information, from a wide range of complex texts
Writing	• Generates complex written texts, demonstrating control over a broad range of writing styles and purposes
Numeracy	• Analyses and synthesises highly-embedded mathematical information, in a broad range of tasks and texts • Extracts numerical information to calculate cloud storage and performance requirements and costs
Navigate the world of work	• Develops, and implements, strategies that ensure that the organisational and regulatory requirements are met • Monitors and reviews the organisation’s requirements and adherence to legislative requirements, in order to implement and manage change
Get the work done	• Plans strategic priorities and outcomes within a flexible, efficient and effective context, in a diverse environment exposed to competing demands • Gathers and analyses data, and seeks feedback, to improve plans and processes • Makes high-impact decisions in a complex and diverse environment, using input from a range of sources

Assessment Requirements for ICTICT428 Select cloud storage solutions

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit; including evidence of the ability to:

- Determine the cloud storage needs of an organisation within the scope of own responsibilities including the identification of three cloud storage options through considering the following:
    - data
    - security
    - performance
    - usability
    - and broader organisational benefits and detriments
- Review service level agreements (SLAs) for the three identified cloud storage options to identify hidden costs, ownership of data, disaster recovery and rights to retrieval, availability and performance, security standards and audit rights, data storage location and dispute mediation processes in the identification of potential cloud service providers
- Evaluate the performance and usability of the three cloud storage options
- Develop and document one cloud storage implementation plan for an organisation including the evaluation and selection of cloud storage solutions

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

- Key requirements of an ICT implementation plan
- Business types that may have cloud storage requirements
- Current trends and directions in information and communications technology (ICT), and the major industry technology standards used in cloud storage options
- Advantages and disadvantages of cloud storage options and providers
- Major themes relating to data and cyber security and their application within the organisational environment

© Commonwealth of Australia, 2025 Future Skills Organisation

- Current industry hardware and software products and their general features, capabilities and application as relevant to cloud storage options
- Characteristics relating to cloud storage that must be included in service level agreements
- Costs and organisational impacts relevant to a cloud storage strategy
- SLA terms related to service availability and performance

Assessment Conditions

Skills must be demonstrated in a workplace or simulated environment where conditions are typical of those in an ICT working environment or ICT workplace. This includes:

- A site where cloud storage technologies may be used
- Organisational data storage requirements and guidelines relating to the storage of information
- Cloud storage options currently used in industry
- Service level agreements (SLA) documentation relevant to cloud storage providers
- Standards, guidelines, and organisational requirements relating to work health and safety (WHS) and sustainability

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

ICTICT503 Validate quality and completeness of system design specifications

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to check the system design specifications against outcomes and quality standards.

It applies to individuals working as system designers who are required to validate system design specifications to ensure that they meet the required organisational audit standards.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

General ICT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Determine audit criteria	1.1 Investigate the system or product for which the quality audit is being performed to understand its functionality 1.2 Determine the objectives to be achieved by the quality audit 1.3 Determine the scope of the quality audit 1.4 Develop a list of audit criteria and quality benchmarks 1.5 Develop a metric to classify the audit criteria 1.6 Determine the audit technique or methodology to be

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	followed 1.7 Examine and detail the resources available to carry out the audit 1.8 Document the objectives, scope, criteria, technique and resources in an audit plan
2. Audit aspects of the final system	2.1 Use the audit criteria to collect evidence about the functionality and quality of the final system, including documentation 2.2 Use a checklist to monitor audit progress 2.3 Document audit outcomes as the audit progresses
3. Review and confirm contract and specifications	3.1 Review system contract against audit outcomes 3.2 Compare system functionality against audit outcomes and system contract 3.3 Identify items of non-compliance where audit outcomes do not meet performance targets or fall short of contract requirements 3.4 Review system procedures for corrective action 3.5 Document items of non-compliance and proposed corrective action

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 1.7, 3.1-3.3	• Interprets, analyses and evaluates text with complex terminology, diagrams, code, syntax, icons and symbols to: evaluate current system functionality, determine audit objectives, scope and criteria, and review audit findings
Writing	1.4, 1.5, 1.7, 1.8, 2.2, 2.3, 3.5	• Uses plain English, appropriate grammatical structures and terminology, diagrams and flow charts, numerical information, and formatting and document structure relevant to the job role and organisation to develop an audit plan and document

© Commonwealth of Australia, 2025 Future Skills Organisation

		audit results
Oral Communication	1.1-1.3, 1.7, 2.1, 3.1, 3.4	• Uses effective listening and open questioning techniques to obtain information and elicit the view and opinions of others • Uses appropriate questioning strategies, avoiding loaded or leading questions, when collecting evidence • Uses specific and complex system/product terminology when applicable, translating complex terms into plain English as required by the audience
Numeracy	1.2-1.5, 3.1-3.4	• Interprets and analyses numerical and financial information, and applies mathematical calculations and financial functions related to performance and financial metrics developed
Navigate the world of work	1.4	• Recognises and follows explicit and implicit protocols, and meets expectations associated with own role
Get the work done	1.1-1.7, 3.2-3.4	• Applies formal processes when planning more complex tasks, producing plans with logically sequenced steps and reflecting some awareness of resource constraints • Demonstrates a sophisticated understanding of principles, concepts, language and practices associated with the digital world and uses these to troubleshoot • Uses analytical processes in a variety of situations, setting goals, gathering relevant information and identifying and evaluating options against agreed criteria

Assessment Requirements for ICTICT503 Validate quality and completeness of system design specifications

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- determine audit criteria
- conduct an audit
- review system procedures for non-compliance
- propose corrective actions.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline acceptance criteria
- translate detailed design principles and specification standards
- discuss fault tolerance technologies
- describe the process of quality audits
- discuss quality levels, both generally and as required by the organisation.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general information and communications technology (ICT) industry, and include access to:

- audit tools
- documentation guidelines
- relevant standards and benchmarks

© Commonwealth of Australia, 2025 Future Skills Organisation

- service level agreement (SLA)
- archive policies
- acceptance criteria
- ICT security specifications
- live system, including database, system files and designed interface
- technical specifications of system.

Assessors must satisfy NVR/AQTF assessor requirements.

Links

ICTICT505 Determine acceptable developers for projects

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to ensure that development projects are contracted to developers who are able to accomplish the task within the mutually agreed parameters of the project.

It applies to individuals who manage a range of information and communications technology (ICT) projects, including software development, hardware procurement and implementation, network analysis and deployment, and web and/or system development.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

General ICT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Specify development requirements	1.1 Prepare and document clear specifications for the project 1.2 Submit specifications to appropriate person for sign-off and authority to contract developers 1.3 Prepare request for tender document if appropriate, using specifications 1.4 Prepare and document agreed selection guidelines

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
2. Identify potential developers	2.1 Investigate potential developers in line with organisational guidelines 2.2 Request development quotes from potential developers 2.3 Assess submitted quotes against selection guidelines and make a shortlist of potential developers, where appropriate
3. Select a potential developer	3.1 Assess the capability of developers to do the project work 3.2 Confirm that potential developers understand the scope of the work to be undertaken 3.3 Conduct a due diligence check where appropriate and assess the quality of developers 3.4 Select appropriate developers using selection criteria 3.5 Inform developers of their selection according to organisational guidelines
4. Sign off the selection process	4.1 Prepare contract for signing according to enterprise procedures 4.2 Sign contract and prepare developers to commence work according to contract

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	2.1, 2.3, 3.1, 3.3	• Interprets and evaluates a range of documentation containing ICT specific terminology and budgetary information to obtain information relating to project requirements and to identify and select developers
Writing	1.1, 1.3, 1.4, 2.3, 3.5, 4.1	• Uses correct spelling and grammar, clear plain English, task related terminology, and a formal document structure, format and style appropriate to the audience and organisation
Oral Communication	1.2, 2.1, 2.2, 3.1-3.3, 3.5, 4.2	• Assumes a formal manner and uses effective listening and questioning techniques to clarify project requirements and elicit information about

© Commonwealth of Australia, 2025 Future Skills Organisation

		the capacity, capability and qualifications of developers
Numeracy	1.1, 2.3, 4.1	• Interprets and analyses numerical and budgetary information, and applies mathematical calculations to manage timelines and budgets
Navigate the world of work	2.1, 3.5, 4.1	• Keeps up to date on changes to legislation or regulations relevant to own rights and responsibilities, and considers implications of these when negotiating, planning and undertaking work • Understands how own role meshes with others and contributes to broader work goals
Interact with others	1.2	• Actively identifies the requirements of important communication exchanges, selecting appropriate channels, format, tone and content to suit purpose and audience
Get the work done	1.1, 1.3, 1.4, 2.1, 2.3, 3.1, 3.3, 3.4, 4.1	• Uses a combination of formal logical planning processes and an increasingly intuitive understanding of context to identify relevant information and risks • Uses systematic, analytical processes in complex situations, gathering relevant information and identifying and evaluating options against a pre-determined set of criteria • Considers the strategic and operational potential of digital trends to achieve work goals, enhance work processes, create opportunities and reduce risks

Assessment Requirements for ICTICT505 Determine acceptable developers for projects

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- specify requirements for a project
- prepare information for tender document and document selection criteria
- seek suitable developer candidates
- select suitable developers
- prepare and implement contracts procedure.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the processes and procedures relating to business liaison
- summarise business negotiation and interview techniques
- outline the process for tendering and writing tenders
- outline the principles and features for preparing contracts
- identify and describe the state and federal legislative requirements and industry standards that relate to:
  - due diligence
  - codes of practice
  - ethics
  - industry and e-commerce standards
  - contracts.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general information and communications technology (ICT) industry, and include access to:

- a business plan
- procurement policies
- selection policies.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTICT506 Implement process re-engineering strategies

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to consider a variety of potential process re-engineering strategies and to make appropriate selections for implementation in an organisation.

It applies to individuals who are senior information and communications technology (ICT) staff required to implement system redesign, and administer and manage ICT support in small-to-medium enterprises (SMEs).

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

General ICT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Develop process re-engineering strategies	1.1 Research and determine target process for re-engineering action 1.2 Develop process re-engineering plan 1.3 Determine and document strategic importance of process 1.4 Establish and document performance standards and benchmarks for new process

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.5 Seek feedback and suggestions from client on proposed process re-engineering
2. Implement process re-engineering strategies	2.1 Compare suggestions with process re-engineering plan to determine suitability for business requirements 2.2 Incorporate suggestions where appropriate 2.3 Implement new process into business structure and leave sufficient scope for changing capacity or upgrades
3. Monitor organisational context	3.1 Monitor new process to measure performance levels 3.2 Determine and document benefits of the new process to the business 3.3 Identify and document training needs for staff 3.4 Analyse cultural and political impact of the new process 3.5 Document new process and disseminate information to appropriate person

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2-1.4, 2.1, 3.2, 3.4	• Identifies, analyses and evaluates complex online and hard copy documentation containing specific terminology, diagrams and numerical information to develop process re-engineering strategies and determine the benefits and impact of the process on the business
Writing	1.2-1.5, 2.2, 3.2, 3.3, 3.5	• Uses plain English, appropriate grammatical structures and terminology, diagrams and flow charts, numerical information, and formatting and document structure relevant to the job role and organisation
Oral Communication	1.1, 1.5, 2.3, 3.1, 3.3, 3.5	• Articulates implementation requirements and strategies clearly, using appropriate tone, style, body language and reflective responses • Uses effective listening and questioning techniques to elicit feedback and to ensure understanding of the implementation process has occurred

© Commonwealth of Australia, 2025 Future Skills Organisation

Numeracy	1.4, 3.1	• Interprets and analyses numerical and budgetary information, and applies mathematical calculations to evaluate the benefits of the process re-engineering on the business
Navigate the world of work	1.4, 2.1, 3.5	• Contributes to roles and responsibilities of self and others • Modifies or develops organisational policies and procedures to comply with legislative requirements and organisation goals
Interact with others	1.5, 3.3-3.5	• Selects, implements and seeks to improve protocols governing communications to clients and co-workers in a range of work contexts • Elicits feedback and provides feedback to others in order to improve self or workgroup behaviours
Get the work done	1.1-1.4, 2.1-2.3, 3.1-3.5	• Accepts responsibility for planning and sequencing complex tasks and workload, negotiating key aspects with others and taking into account capabilities, efficiencies and effectiveness • Monitors progress of plans and schedules, and reviews and changes them to meet new demands and priorities • Applies systematic and analytical decision making processes for complex and non-routine situations • Investigates new and innovative ideas as a means to continuously improve work practices and processes through consultation and formal and analytical thinking • Uses and investigates new digital technologies and applications to manage and manipulate data and communicate effectively with others in a secure and stable digital environment

Assessment Requirements for ICTICT506 Implement process re-engineering strategies

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop and document a re-engineering process that supports organisational objectives
- take into consideration the complex interdependencies between organisational and external drivers
- implement a re-engineering process
- monitor and analyse the impact of the process in the organisation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss business case preparation process and how it can be applied to developing organisational strategies
- identify and summarise relevant laws and standards as they apply to process re-engineering strategies, including:
  - benchmarks
  - copyright
  - intellectual property
  - ethics
  - cultural and political diversity
- outline the impact that new processes may have on an organisation
- outline procedures relating to consulting internally and externally.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general information and communications technology (ICT) industry, and include access to:

- a process re-engineering plan
- analysis software
- e-business models
- modelling software
- an organisational strategy
- an organisational structure and culture
- a personal computer (PC)
- stakeholder analysis.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTICT508 Evaluate vendor products and equipment

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to evaluate and test a range of vendor products and equipment against a client's business requirements.

It applies to individuals in a range of information and communications technology (ICT) areas who are required to assess hardware and software products.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

General ICT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Establish business requirements	1.1 Identify and prioritise business requirements 1.2 Identify conflicting or overlapping business requirements 1.3 Specify budget and available resources 1.4 Validate business requirements, budget and resource needs with client
2. Identify vendor products and equipment	2.1 Investigate a representative range of vendor products and equipment

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	2.2 Identify and document interdependencies 2.3 Specify and document technical alternatives available to the business 2.4 Determine and document availability of products and equipment 2.5 Ensure vendor products and equipment meet Australian or other standards
3. Test vendor products and services	3.1 Develop valid and reliable test regime with appropriate measurements 3.2 Establish test environment, including calibrated measuring equipment 3.3 Undertake testing of products or equipment and document results 3.4 Undertake revised testing where initial tests are inconclusive or where alternative product configuration may meet business requirements
4. Evaluate vendor products, services and equipment	4.1 Rate vendor products for quality, performance and support 4.2 Rate vendor products for fit with client needs 4.3 Establish product limitations, performance, integration capabilities and costs, and compare with established business requirements 4.4 Prepare cost-benefit analysis
5. Prepare evaluation report	5.1 Document product information in order of preference 5.2 Recommend preferred product, including the reasoning behind recommendations 5.3 Prepare a report containing solution details 5.4 Submit report to client for approval

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

© Commonwealth of Australia, 2025 Future Skills Organisation

Reading	1.1-1.3, 2.1, 2.2, 2.4, 2.5, 4.1, 4.2	• Identifies, analyses and evaluates highly technical documents, diagrams, business strategies and statistical and financial information
Writing	1.3, 1.4, 2.2-2.4, 5.1, 5.3	• Integrates information and ideas from a number of sources using specialised and cohesive language and formal document structures
Oral Communication	1.1, 1.2, 1.4, 2.1-2.4, 5.4	• Elicits and evaluates information using effective listening and open questioning techniques • Uses simple and relevant language to obtain information, confirm understanding, liaise with the client and obtain feedback
Numeracy	1.1, 1.3, 1.4, 4.3, 4.4, 5.2, 5.3	• Interprets and analyses a range of statistical and financial data relating to products, equipment and integration costs • Uses a range of software tools to apply statistical and financial functions, and prepare a cost-benefit analysis
Navigate the world of work	2.5	• Appreciates the legal and regulatory responsibilities related to own work and recognises some legal principles across work contexts
Interact with others	5.4	• Actively identifies the requirements of important communication exchanges, selecting appropriate channels, format, tone and content to suit purpose and audience
Get the work done	1.1-1.3, 2.1- 2.4, 3.1-3.4, 4.1-4.3	• Develops plans to manage relatively complex non-routine tasks with an awareness of how they may contribute to longer term operational and strategic goals • Uses systematic, analytical processes in complex non-routine situations, setting goals, gathering relevant information and identifying and evaluating options against agreed criteria • Actively identifies systems, devices and applications with potential to meet current and/or future needs

Assessment Requirements for ICTICT508 Evaluate vendor products and equipment

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- establish business requirements
- evaluate a range of vendor products and equipment against requirements
- test and select the most appropriate products
- document the selected items and selection rationale.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the relevance and application of the following for evaluating and selecting products:
  - code of ethics
  - international standards
  - vendor products
  - client business domain
  - copyright and intellectual property
  - general features and capabilities of current industry accepted hardware and software products
- discuss current and future technical systems considerations required by business
- discuss the features and function of relevant hardware components and software products, and the interaction between them.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general information and communications technology (ICT) industry, and include access to:

- client functional requirements
- hardware and software specifications from vendors
- test procedures and activities.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTICT517 Match ICT needs with the strategic direction of the organisation

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Application

This unit describes the skills and knowledge required to ensure information and communications technology (ICT) products and systems match the strategic direction of the organisation.

It applies to individuals whose responsibilities may include improving, evaluating, acquiring, maintaining and supporting ICT for organisations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

General ICT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Evaluate current strategic plan and propose changes	1.1 Analyse and document current strategic plan of organisation against industry environment and organisational objectives 1.2 Determine and document current state of ICT systems and practices in organisation 1.3 Compare strategic plan objectives and current state of ICT to determine ICT gaps, improvement opportunities, and proposed

© Commonwealth of Australia, 2025 Future Skills Organisation

	changes 1.4 Report on proposed changes, gaps and improvement opportunities to superior
2. Evaluate effect of changes	2.1 Evaluate impact of proposed changes to ICT systems and products against strategic objectives of organisation 2.2 Evaluate the difficulty of implementing proposed changes to ICT systems and products 2.3 Prioritise proposed changes to refine opportunities and assist in scheduling implementation 2.4 Document evaluation process and provide to superior for feedback
3. Plan implementation of changes	3.1 Develop action plan to implement proposed changes including prioritised schedule and consistency with organisational policy and procedures 3.2 Detail standards, targets and implementation methods in action plan 3.3 Provide action plan to superior for feedback and approval

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	**Description**
Reading	• Reviews, analyses and evaluates complex online and hard copy documentation containing ICT specific terminology, diagrams and numerical information to determine ICT gaps and improvement opportunities
Writing	• Uses plain English, together with vocabulary, grammatical structures, terminology, diagrams, numerical information, formatting and structure relevant to the job role and organisation
Oral Communication	• Uses plain English, translating technical terminology when necessary, to communicate with a range of personnel and determine objectives, articulate ideas and requirements, and develop plans • Elicits information using effective listening and questioning techniques
Numeracy	• Interprets numerical data and applies mathematical calculations to assess the financial implications of introducing changes
Navigate the	• Accepts responsibility and ownership for the task and makes decisions

© Commonwealth of Australia, 2025 Future Skills Organisation

world of work	according to organisational needs and the need for coordination with others • Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements
Interact with others	• Selects and uses appropriate conventions and protocols when communicating with clients and colleagues in a range of work contexts • Recognises and accommodates basic differences and priorities of others • Cooperates with others and contributes to work practices where joint outcomes are expected and deadlines are to be met
Get the work done	• Accepts responsibility for planning and sequencing complex tasks and workload, negotiating key aspects with others and taking into account capabilities, efficiencies and effectiveness • Applies systematic and analytical decision making processes for complex and non-routine situations • Investigates new and innovative ideas as a means to continuously improve work practices and processes through consultation and formal and analytical thinking • Uses and investigates new digital technologies and applications to manage and manipulate data and communicate effectively with others in a secure and stable digital environment

Assessment Requirements for ICTICT517 Match ICT needs with the strategic direction of the organisation

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit; including evidence of the ability to:

- For one organisation:
  - interpret a strategic plan and objectives of the organisation
  - evaluate the current state of ICT in the organisation
  - identify possible gaps and opportunities in ICT and evaluate organisational impact with reference to the strategic plan and the objectives
  - determine and prioritise proposed changes to meet organisational needs
  - evaluate the difficulty of implementing proposed changes
  - develop an action plan for implementation

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

- Key sections of an action plan for ICT implementation projects
- Methods of evaluation and planning approaches to technical problems and strategic objectives
- Methods of evaluation of competing and complementary internal and external ICT systems and products
- Current and emerging system and product trends and directions

Assessment Conditions

Skills must be demonstrated in a workplace or simulated environment where conditions are typical of those in an ICT working environment or ICT workplace. This includes:

- A site where ICT needs and strategic directions of the organisation are coordinated
- Detailed information relating to a strategic organisation plan, objectives, and direction

© Commonwealth of Australia, 2025 Future Skills Organisation

- Organisational policies and procedures relating to the implementation of ICT changes
- Individual superior in the organisation
- Information on current ICT systems and practices in the organisation including operating systems, hardware, and security

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

ICTICT608 Interact with clients on a business level

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to interact with clients at a management level.

It applies to individuals working as management personnel in a range of information and communications technology (ICT) areas who are responsible for maintaining client relationships.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

General ICT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Review client's business domain	1.1 Research organisational service standards, values and culture to understand the organisational environment 1.2 Investigate and document the goods and services provided by the organisation 1.3 Review current service level agreements (SLAs) if appropriate
2. Develop new business	2.1 Research client service needs and preferred level of service

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
with client	2.2 Research opportunities for new business with client 2.3 Develop draft proposals to cover these new initiatives
3. Negotiate new business initiatives	3.1 Conduct a session with the client to present the new opportunities 3.2 Present proposals to the client in a clear, concise and comprehensive manner 3.3 Present proposed cost and timeframes to the client 3.4 Negotiate terms with the client and record alterations if required 3.5 Clarify areas of uncertainty or disagreement 3.6 Document agreement negotiated with the client
4. Monitor, adjust and implement procedures to maintain client focus	4.1 Assess progress in achieving new client initiatives 4.2 Gather client feedback to improve the proposals 4.3 Adjust service provided to the client based on client feedback and in line with organisational guidelines 4.4 Document changes to new provisions

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 2.1, 2.2, 4.1, 4.2	• Identifies, analyses and evaluates a range of complex information to identify relevant and key information
Writing	2.3, 3.6, 4.4	• Uses plain English, appropriate grammatical structures and specialised terminology, diagrams and flow charts, logical document structures and formatting relevant to the job role and organisation to record document proposals and agreements
Oral Communication	1.1-1.3, 2.1, 2.2, 3.1-3.5, 4.1, 4.2	• Uses open questioning and effective listening techniques to elicit information, clarify requirements and conduct effective negotiations • Uses appropriate vocabulary, grammatical structure,

© Commonwealth of Australia, 2025 Future Skills Organisation

		voice tone, body language and reflective responses to build business relationships and present proposals
Numeracy	1.2, 1.3, 2.3, 3.3-3.5, 4.3, 4.4	• Interprets numerical information and applies mathematical calculations and financial functions relating to time durations and projected costs
Navigate the world of work	1.3, 4.3	• Recognises and responds to both explicit and implicit protocols within familiar work contexts and appreciates the importance of identifying and responding to organisational procedures
Interact with others	3.1, 3.2, 3.4	• Invests considerable time and energy in building and maintaining effective working relationships within and beyond immediate work context, recognising and intuitively responding to the subtle and complex mix of factors at play in every interaction
Get the work done	1.1, 1.2, 2.1-2.3, 4.1	• Takes responsibility for defining key aspects of own workload, balancing own needs and priorities with new opportunities • Makes decisions quickly and intuitively in familiar situations requiring immediate attention, drawing on past experience to identify key variables, consider possible implications of different courses of action and determine the best course of action • Demonstrates a sophisticated understanding of principles, concepts, language and practices associated with the digital world • Demonstrates a sophisticated understanding of expectations, social protocols and online etiquette, intuitively selecting the appropriate channel, content and tone for diverse purposes and audiences

Assessment Requirements for ICTICT608 Interact with clients on a business level

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- assemble a proposal for a new business initiative
- develop a strong awareness of the clients business
- present and negotiate a proposal with the client
- formulate and implement new business
- monitor and maintain client relationship and requirements of service.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss business practices relevant to understanding client needs, including:
  - change management
  - information gathering techniques
  - planning process, including development of information and communications technology (ICT) business solutions
  - preparation of reports
- identify current industry accepted hardware and software products relevant to client services and support, including:
  - general features and capabilities
  - vendor product directions
- identify and interpret legal principles of commercial contracts and service level agreements (SLAs)
- interpret organisational policies, plans and procedures, including contracting
- summarise the concepts of negotiation and the process for building business relationships.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general ICT industry, and include access to:

- organisational policies, procedures and SLAs for the ICT industry
- contexts for negotiating agreements and contracts
- current ICT hardware and software products.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTICT801 Lead research into identifying new marketplace opportunities

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to lead the research, evaluation and recommendation of new organisational initiatives, based on perceived marketplace opportunities.

It applies to individuals who work as strategic business analysts in medium to large organisations in senior roles, who lead new business initiatives and transformation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

General ICT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Direct the research into the organisation's business domain	1.1 Research the sectors in the relevant industry for trends that may yield viable business opportunities 1.2 Research business initiatives undertaken by competitor organisations, to address the same or similar opportunities, and analyse the resources required to undertake such initiatives or project opportunities 1.3 Identify the strategies for realising identified business

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	initiatives, including sub-contracting of suitable elements, where applicable 1.4 Research the legal, environmental and social implications of the identified initiatives
2. Evaluate the new business initiatives	2.1 Initiate, and oversee, the market research for potentially viable, identified business opportunities 2.2 Gauge the likely impacts of candidate initiatives on the business enterprise, including specific legal, financial and transformational implications 2.3 Critically evaluate the delivery strategies for anticipated products, or services, stemming from candidate initiatives
3. Explore the feasibility of the new initiatives	3.1 Formulate the selection criteria, based on the strategic business objectives 3.2 Facilitate a feasibility study, including a cost benefit analysis 3.3 Select the most feasible option against the selection criteria 3.4 Recommend the preferred initiative

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.3, 1.4, 2.1, 3.3	• Identifies, analyses, and critically evaluates complex textual information, to identify industry trends and business initiatives
Writing	2.1, 3.1, 3.4	• Integrates information and ideas from a number of sources, utilising the appropriate analysis tools, diagrams, specialised and cohesive language, and formal document structures, to develop criteria and reports
Oral Communication	1.1, 1.2, 1.3, 1.4, 2.1, 2.2, 2.3, 3.2, 3.4	• Elicits the view and opinions of others, and obtains information, by using effective listening and open questioning techniques • Participates in a verbal exchange of ideas/solutions, and uses detailed and clear

© Commonwealth of Australia, 2025 Future Skills Organisation

		language, to clarify and present information, and to facilitate a feasibility study • Uses the appropriate tone, style, body language and reflective responses, when clarifying information to present recommendations
Numeracy	1.2, 1.3, 2.1, 2.2, 3.1, 3.2, 3.3	• Uses a range of statistical and financial calculations and functions, the appropriate software tools, and correct document structure, to analyse market research results and to conduct a feasibility study, and a cost benefit analysis
Navigate the world of work	1.4, 2.2	• Understands own legal rights and responsibilities, and extends the understanding of legal implications across work contexts
Get the work done	1.1, 1.2, 1.3, 2.1, 2.3, 3.1, 3.2, 3.3	• Recognises the critical importance of clarifying, focusing and aligning goals, and expectations, and uses the process to build ownership of, and broad commitment to, achieving outcomes • Takes responsibility for high-impact decisions in complex situations, involving many variables and constraints • Keeps abreast of new ideas and possibilities beyond own context, borrowing, adapting, combining, and redesigning ideas, for own purposes, or using as a provocation to rethink current approaches

Assessment Requirements for ICTICT801 Lead research into identifying new marketplace opportunities

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- conduct research into the trends for a specified industry sector, and identify potential business opportunities
- undertake market research and analysis, and report on the viability and related implications, of a selected business opportunity
- develop and present a feasibility report, including a cost benefit analysis that justifies the recommendations for a proposed new business initiative.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- formulate various analysis methods and tools, including:
  - affinity diagrams
  - competition matrix
  - decision trees
  - mind maps
  - risk assessment
  - strengths, weaknesses, opportunities and threats (SWOT) analysis
  - value chain
- review and outline, contract and procurement methods
- summarise possible social implications, both internal and external, to the organisation as a result of the introduction of new market opportunities
- research government and non-government governing bodies in the relevant industry

© Commonwealth of Australia, 2025 Future Skills Organisation

- review legal, ethical, and security issues relating to the research of competitive business opportunities, including the laws related to patents and copyright
- outline the organisational structure, policies and procedures
- review the relevant government legislation that affects business operation.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general information and communications technology (ICT) industry, and include access to:

- appropriate resources, to allow research to be conducted into industry trends (this may include access to commercial research house libraries via a memorandum of understanding or other arrangements)
- the opportunity to conduct meaningful market research on potential business opportunities
- simulated, or real, executive-level management teams for the presentation of proposals and feedback.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTICT803 Endorse business plan components for a new initiative

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to endorse a business plan for a new initiative, including the marketing, operations, organisational and financial plans within a medium to large organisation.

It applies to individuals who work in high-level management positions and lead the analysis, implementation and management of emerging, and converging, information and communications technology (ICT), as they are integrated into the business process to support the organisational strategic goals of medium to large organisations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

General ICT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Endorse a marketing plan for ICT business	1.1 Ensure that internal and external environmental issues are addressed 1.2 Critically review the feasibility of target market projections 1.3 Endorse the selection of advertising and promotional

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	strategies
2. Endorse the operation plan	2.1 Review and verify, the scope of the business operation plan 2.2 Ensure that the business plan complies with business needs 2.3 Endorse the criteria for quality processes against the organisational standards
3. Endorse the organisational plan	3.1 Critically analyse and review the organisation's structure 3.2 Ensure that the organisational structure meets the organisation's strategic plans and directions
4. Endorse the financial plan	4.1 Endorse the financial strategy for the new initiative 4.2 Evaluate the expected cash-flow projections 4.3 Critically analyse and evaluate the effects of financial decisions on the ability of the organisation to meet planned outcomes 4.4 Ensure financial risk-management procedures are followed according to organisational requirements 4.5 Ensure early detection and remedial action plans, for deviations in budget objectives and projections

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.3, 2.1, 2.2, 2.3, 3.1, 3.2, 4.1, 4.2, 4.3, 4.4	• Identifies, critically analyses and evaluates complex textual information, to evaluate the effectiveness of business plans
Writing	1.3, 2.3, 3.2, 4.1, 4.3, 4.4, 4.5	• Selects the document structure, language, grammar and terminology, to suit the specific subject matter and audience when evaluating, providing feedback, and endorsing business plans
Oral Communication	1.1-1.3, 2.1-2.3, 3.1-3.2, 4.1-4.5	• Obtains information by using effective listening and probing, open questioning techniques • Uses grammatical structures, specialised language, and the appropriate tone, pitch and

© Commonwealth of Australia, 2025 Future Skills Organisation

		body language to achieve precise meaning, when articulating requirements and providing feedback
Numeracy	1.2, 2.1, 2.2, 3.2, 4.1, 4.2, 4.3, 4.4, 4.5	• Uses a range of statistical, mathematical and financial calculations, formulae and functions, together with appropriate software tools, to interpret numerical data relating to the market, operational and financial plans, and risk analysis
Navigate the world of work	3.2, 4.4	• Takes responsibility to respond to explicit and implicit conventions within familiar work contexts, and appreciates the importance of identifying, and responding to, protocols in new situations
Get the work done	1.1, 2.1, 2.2, 3.1, 4.3, 4.4, 4.5	• Recognises the critical importance of clarifying, focusing and aligning goals, and expectations, and uses the process to build ownership of, and broad commitment to, achieving outcomes • Takes responsibility for high-impact decisions in complex situations involving many variables and constraints • May use formal analytical and lateral thinking techniques for identifying issues, generating and evaluating possible solutions • Demonstrates a sophisticated understanding of the principles, concepts, language and practices associated with the digital world, and endorses new technologies

Assessment Requirements for ICTICT803 Endorse business plan components for a new initiative

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- verify the strategy aligning information and communications technology (ICT) services with organisational goals
- direct a critical risk analysis, including security, for ICT assets
- verify that the risk assessment procedures are implemented
- verify that the contingency plans for business continuity are established
- evaluate the warning systems, and direct an ongoing process that includes regular or programmed reviews of the risk profile
- verify that security products are being utilised
- verify organisational security policy is being implemented
- direct the development of a strategy to ensure that quality expectations are being met
- endorse the main components of the business plan.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- research and summarise, risk management principles and guidelines
- review business continuity issues for the organisation
- explore the organisation’s industry and current functionality, including the existing data and information systems
- describe the organisation's internal and external dependencies, and interdependencies
- review and summarise the organisational policies and procedures, including the risk-management strategy
- discuss past and current internal, external and industry disruptions

© Commonwealth of Australia, 2025 Future Skills Organisation

- outline the relevant legislation and regulations that impact on business continuity, including:
  - workplace health and safety (WHS)
  - environment
  - duty of care
  - contracts
  - business and company law
  - freedom of information
  - industrial relations
  - privacy and confidentiality
  - due diligence
  - records management.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general ICT industry, and include access to:

- relevant strategic-level enterprise documentation, including:
  - planning
  - financial
  - ICT infrastructure documentation
- legislative policies.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTICT808 Direct the development of a knowledge management strategy for a business

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to evaluate existing knowledge management processes, identify barriers to capturing knowledge, and to develop new strategies.

It applies to individuals who work in senior management positions and lead the analysis, implementation and management of emerging, and converging, information and communications technology (ICT), as they are integrated into the business process to support the organisational strategic goals.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

General ICT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Critically analyse existing knowledge management systems	1.1 Critically evaluate the existing arrangements ,for the capture and use of business knowledge, from internal and external sources 1.2 Differentiate between knowledge management and information management systems within the organisation

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.3 Ensure that the effectiveness of existing procedures and systems is evaluated in terms of meeting the needs of clients, organisational aims, objectives and standards 1.4 Identify the need for improvements in the organisation's strategic use of knowledge
2. Evaluate the knowledge management options	2.1 Investigate the barriers to capturing knowledge within the organisation 2.2 Review evaluations and recommendations regarding the knowledge management software, with respect to its usefulness and likeliness to benefit the organisation 2.3 Review the investigations into incentives and reward systems to support knowledge management 2.4 Ensure that the required processes for maintaining an integrated knowledge management system are considered 2.5 Facilitate the development of a business case to determine the viability of selected options, and recommend a way forward for the organisation
3. Develop a knowledge-management strategy	3.1 Develop the knowledge management business strategy, in consultation with senior staff, for the capture and use of organisational knowledge 3.2 Ensure that business processes are designed to support knowledge management, according to the organisational needs and budget 3.3 Ensure that the technology requirements for the implementation of the strategy, are costed and included in the organisational budget cycle 3.4 Ensure that processes for the periodic review of knowledge management metrics within the business are in place, to maintain ongoing effectiveness and continuous improvement 3.5 Ensure that the knowledge management strategy meets the organisational requirements identified in the overall business plan, and business strategy

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

© Commonwealth of Australia, 2025 Future Skills Organisation

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.3, 1.4, 2.1, 2.2, 2.3, 3.1, 3.3, 3.4, 3.5	• Identifies and reviews a wide variety of complex textual information, sourced from organisational documentation, electronic meeting places, communities of practice, the organisational knowledge bank and ICT vendors
Writing	2.5, 3.1	• Selects a formal document structure, organisational style and format, and subject-specific language, grammar and terminology, to develop organisational documentation
Oral Communication	1.1-1.4, 2.1-2.5, 3.1-3.5	• Uses effective listening and open questioning techniques, to elicit the view and opinions of others, and to obtain information • Participates in a verbal exchange of ideas and solutions, and uses detailed and clear language to clarify and present information, according to the audience • Uses the correct grammatical structures, specialised language, appropriate tone, pitch and body language, to achieve precise meaning when articulating requirements
Numeracy	1.1, 1.3, 2.1, 2.5, 3.1, 3.2, 3.3, 3.4, 3.5	• Uses a range of mathematical and financial calculations and functions, together with the appropriate software tools, to interpret and develop numerical and financial reports, relating to costing and budgets
Navigate the world of work	1.3, 3.5	• Monitors adherence to organisational policies and procedures, and considers own role in terms of a contribution to the broader goals of the work environment
Get the work done	1.1, 1.2, 1.3, 1.4, 2.1, 2.2, 2.3, 2.4, 2.5, 3.3, 3.4, 3.5	• Uses a mix of intuitive and formal processes to identify key information and issues, evaluate alternative strategies, anticipate consequences and consider implementation issues, and contingencies • Takes responsibility for high-impact decisions in complex situations involving many variables and constraints • May use formal analytical and lateral thinking techniques for identifying issues, generating and evaluating possible solutions • Plays with possibilities as an integral part of work, identifying principles, concepts and

Assessment Requirements for ICTICT808 Direct the development of a knowledge management strategy for a business

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- critically analyse and document, the effectiveness of existing knowledge management systems
- research the knowledge management options in the marketplace
- recommend an approach that meets the organisational needs
- develop a knowledge management strategy.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise management concepts, processes and trends
- review and interpret relevant organisational policies, and legislation, that affect business operations
- research and summarise, both internal and external sources of information
- recognise the legal, ethical and security issues relating to knowledge management
- explain organisational change-management theory and methods
- discuss records management and database-management principles as they relate to knowledge management, particularly metadata.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general information and communications technology industry (ICT), and include access to:

© Commonwealth of Australia, 2025 Future Skills Organisation

- a workplace of sufficient complexity, to enable the required level of analysis to be carried out in relation to:
  - current business processes
  - existing knowledge management systems
  - the organisational culture
- relevant enterprise strategic documentation, including:
  - strategic planning
  - financial
  - ICT infrastructure
- organisational objectives and policies.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTICT809 Facilitate business analysis

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to direct internal and external information and communications technology (ICT) services within a medium to large organisation.

It applies to individuals who work in high-level management positions in medium to large organisations and direct the strategic planning, risk management, and security of the internal and external ICT infrastructure of their organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

General ICT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Facilitate the elicitation of stakeholder business requirements for enhancements	1.1 Review the business requirements documentation, and ensure that it is complete and according to enterprise standards 1.2 Ensure that the proposed project benefits align with strategic directions 1.3 Determine the scope, complexity, deliverables, and time lines of the business process enhancements to be undertaken

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
2. Prioritise the enhancements that add value to business operations	2.1 Research the business operations necessary to analyse the business domain 2.2 Negotiate the requirements definition with stakeholders 2.3 Develop a process for addressing change requests in a dynamic environment
3. Provide the interface between technical and business stakeholders	3.1 Facilitate the selection of a modelling tool for a business system 3.2 Facilitate the selection of information-gathering tools 3.3 Ensure that the requirements-analysis content addresses the project objectives 3.4 Participate in the development of a technical specification

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.3, 3.1, 3.2, 3.3, 3.4	• Identifies, analyses and evaluates complex textual information, to obtain information relevant to enterprise resource planning and management
Writing	2.3, 3.4	• Integrates information and ideas from a number of sources, utilising appropriate ICT modelling tools, specialised and cohesive language, and document structures, to meet the varied requirements of the enterprise and stakeholders
Oral Communication	1.1, 1.2, 1.3, 2.1, 2.2, 3.1, 3.2, 3.3, 3.4	• Elicits the view and opinions of others, and obtains information by listening and questioning • Participates in a verbal exchange of ideas/solutions, and uses detailed and clear language, to clarify and present information, according to the requirements and audience • Articulates requirements and strategies clearly, using the appropriate tone, style, body language, and reflective responses, to build business relationships

© Commonwealth of Australia, 2025 Future Skills Organisation

Numeracy	1.1, 1.2, 1.3, 3.4	• Uses a range of statistical and financial calculations and functions, to interpret and compile data relating to market analysis and budgetary requirements
Navigate the world of work	1.2	• Takes full responsibility for considering own role in terms of a contribution to the broader goals of the work environment
Get the work done	1.1, 1.2, 1.3, 2.1, 2.3, 3.1, 3.2, 3.4	• Develops flexible plans for complex, high-impact activities with strategic implications • Takes responsibility for high-impact decisions in complex situations, involving many variables and constraints • Keeps abreast of innovations and good practice beyond own context, borrowing, adapting, combining and redesigning for own purposes, or using as a provocation, to rethink current approaches • Demonstrates a sophisticated understanding of the principles, concepts, language and practices associated with the digital world, and uses these to troubleshoot, and understands the uses and potential of new technologies

Unit Mapping Information

Assessment Requirements for ICTICT809 Facilitate business analysis

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- facilitate a strategy to align information and communications technology (ICT) services, with the organisational goals
- lead the development of a strategy for risk assessment, including security for ICT assets, and ensure that the measures required to mitigate risk are applied
- produce contingency plans for business continuity
- ensure warning systems, and an ongoing process that includes regular or programmed reviews of the risk profile
- lead the development of a strategy for the implementation of the appropriate processes and procedures, to ensure that quality expectations are met.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise AS/NZS ISO 31000:2009 "risk management requirements"
- explain application of security products
- review business continuity issues for the organisation
- review the organisation’s industry and current functionality, including the existing data and information systems
- review the organisation's internal and external dependencies, and interdependencies
- outline the organisational policies and procedures, including the risk management strategy
- review and outline documented industry disruptions.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general ICT industry, and include access to:

- relevant strategic level enterprise documentation, including:
  - planning
  - financial
  - ICT infrastructure
- standards, codes of practice, legislation and regulations.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTICT811 Manage an information architecture project

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge to develop and test an information architecture prototype that meets organisational requirements.

It applies to individuals who work in high-level management positions and lead the analysis, implementation and management of emerging, and converging, information and communications technology (ICT) as they are integrated into the business process to support organisational strategic goals.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

General ICT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Define the content needs	1.1 Research the strategic intent of the website, or system, from the business requirements and client expectations 1.2 Provide direction in order to develop the information requirements, based on the business and client requirements 1.3 Synthesise the required information, and group it into business schemes related to the business structure 1.4 Direct the determination of content requirements for each

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	process
2. Contribute to the description of the system and transmission media	2.1 Consult with network and system specialists 2.2 Critically analyse the features of the physical environment, to interface with the information system architecture 2.3 Estimate the traffic content and volumes, based on the business requirements
3. Supervise the development of content structure and navigation plan	3.1 Organise the information into related topics 3.2 Ensure that the information hierarchy is in a valid sequence 3.3 Provide direction for clear, valid and intuitive labelling 3.4 Review and commit to the feasibility of architecture design 3.5 Develop the acceptance criteria
4. Implement the navigation system development	4.1 Coordinate the fit of navigational systems with the business requirements 4.2 Supervise the development of navigational search subsystems 4.3 Lead the development of consistent, and logical, labelling systems
5. Finalise the testing and accept the information architecture model	5.1 Lead the construction of an information architecture prototype 5.2 Ensure that a broad sample of business clients are engaged 5.3 Ensure that the site content meets the business needs 5.4 Lead the testing of the information architecture prototype, to test that it operates on the chosen system, and transmission media 5.5 Supervise the user-acceptance test

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

© Commonwealth of Australia, 2025 Future Skills Organisation

Reading	1.1, 1.3, 1.4, 2.2, 2.3, 3.1, 3.2, 3.4, 4.1, 5.3, 5.4	• Organises, evaluates and critiques ideas, and information, from a wide range of complex texts • Draws on a broad range of strategies, to build and maintain understanding throughout complex texts
Writing	1.2, 1.3, 2.3, 3.2, 3.3, 3.5	• Selects the structure, language, grammar and terminology to suit the specific subject matter and audience, in order to develop a wide variety of documentation and directions, including direction for the content requirements, information hierarchy, navigational search subsystems, labelling systems and user-acceptance test
Oral Communication	1.1-1.4, 2.1, 3.3, 3.4, 4.1, 4.2, 4.3, 5.1, 5.4, 5.5	• Uses effective listening and probing, open questioning techniques to elicit the view and opinions of others, and to obtain information • Employs plain English to convey complex and abstract concepts, and information • Articulates requirements and strategies clearly, in a courteous manner, using the appropriate pitch, tone, body language and reflective responses
Navigate the world of work	1.1, 1.2, 1.3, 2.3, 3.3	• Takes a lead role in the development of organisational goals, roles and responsibilities
Get the work done	1.1, 1.3, 1.4, 2.2, 3.1, 3.2, 3.4, 4.1, 4.2, 4.3, 5.1, 5.4	• Develops flexible plans for complex, high-impact activities with strategic implications • Takes responsibility for high-impact decisions in complex situations, involving many variables and constraints • Keeps abreast of innovations and good practice beyond own context, borrowing, adapting, combining and redesigning for own purposes, or using as a provocation to rethink current approaches • Demonstrates a sophisticated understanding of the principles, concepts, language and practices associated with the digital world, and uses these to troubleshoot, and understands the uses and potential of new technologies

Assessment Requirements for ICTICT811 Manage an information architecture project

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify the strategic and business intent of the website or system
- conduct business meetings, applying effective communication techniques
- research and determine the essential requirements of a product, applying quality management principles
- describe the features of the website or system
- develop the navigation system
- construct an information architecture prototype
- test the prototype with the operating system and the transition media
- supervise the user acceptance test.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- examine the equity and diversity principles relevant to information architecture projects
- research and critique organisational policies and procedures, as they apply to the project
- determine and outline the public sector legislation, codes of practice and other formal agreements, that directly impact on the business operations
- evaluate the components of telecommunications networks
- research and synthesise the workplace, and industry environment, as it applies to information architecture.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general information and communications technology (ICT) industry, and include access to:

- the computer system and a web-host workplace

Assessors must satisfy NVR/AQTF assessor requirements.

ICTICT812 Develop a business intelligence framework

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge to evaluate the business intelligence (BI) requirements of an organisation, and to select the correct methodologies to develop a BI solution.

It applies to individuals who work in high-level management positions and lead the analysis, implementation and management of emerging, and converging, information and communications technology (ICT) as they are integrated into the business process, to support the organisational strategic goals of medium to large organisations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

General ICT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Elicit the business intelligence requirements	1.1 Articulate the benefits of business intelligence 1.2 Select the appropriate system development methodology, through the analysis of a range of options 1.3 Critically evaluate the impact of business intelligence on the enterprise

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.4 Select the appropriate business model for a data repository 1.5 Adopt a metadata standard for the enterprise 1.6 Establish the appropriate data analysis techniques
2. Direct the business intelligence data manipulation	2.1 Identify the data sources and scope 2.2 Evaluate and endorse the selected data-manipulation methods 2.3 Critically review, and commit to, the feasibility of the architecture design 2.4 Develop the acceptance criteria 2.5 Endorse the selected data-modelling techniques and processes 2.6 Endorse a load balancing algorithm for optimum processing 2.7 Sign off the design specifications
3. Endorse the business intelligence solution architecture	3.1 Ensure that the data-warehousing management techniques and processes are according to the specifications 3.2 Lead the scoping of logical data models 3.3 Supervise the selection of middleware tools 3.4 Critically review, and commit to, a searchable data repository solution
4. Finalise the testing and accept the framework	4.1 Finalise the physical data model 4.2 Complete testing of the overall model 4.3 Test the security 4.4 Test the integrity 4.5 Perform a user-acceptance test

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 1.3, 1.6, 2.1, 2.3,	• Organises, evaluates and critiques ideas, and information, from a wide range of complex

© Commonwealth of Australia, 2025 Future Skills Organisation

	2.5, 2.6, 2.7, 3.1, 3.2, 3.3, 3.4, 4.1	texts • Draws on a broad range of strategies to build and maintain understanding throughout complex texts
Writing	1.1, 1.3, 1.6, 2.4, 2.7, 4.1, 4.5	• Integrates information and ideas from a number of sources, utilising the appropriate BI software tools, specialised and cohesive language, and appropriate document structures, to meet the varied requirements of the organisation and the task
Oral Communication	1.1, 2.1, 2.2, 2.3, 2.5, 2.6, 3.2, 3.3, 3.4, 4.5	• Elicits information and ideas using plain English, translating BI specific terminology when necessary, and using effective listening and questioning techniques • Uses specific and complex BI terminology, to liaise with team members, review and endorse methodology and monitor the project • Articulates the requirements and methodologies clearly, using the appropriate tone, style, body language and reflective responses
Numeracy	1.1, 1.3, 1.4, 1.6, 2.3, 2.4, 2.5, 2.6, 2.7, 3.2, 3.4, 4.1, 4.2, 4.5	• Uses a range of complex statistical, mathematical and financial calculations, formulae and functions together with the appropriate BI software tools, in the development of a BI framework
Get the work done	1.1, 1.2, 1.3, 1.4, 1.5, 1.6, 2.1, 2.2, 2.3, 2.4, 2.5, 2.6, 3.2, 3.3, 4.2, 4.3, 4.5	• Demonstrates a sophisticated understanding of the principles, concepts, language and practices associated with the digital world, and uses these to develop a BI framework • Recognises the critical importance of clarifying, focusing and aligning goals, and expectations, using the process to build ownership of, and broad commitment to, achieving outcomes • Takes responsibility for high-impact decision in complex situations, involving many variables and constraints

Assessment Requirements for ICTICT812 Develop a business intelligence framework

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- research and critically analyse the business intelligence requirements
- review, analyse and direct, business intelligence data manipulation
- review, critically analyse and endorse, the proposed business intelligence solution architecture
- initiate and contrast the tests required for the intelligence framework, for final acceptance.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- evaluate the application of system development methodologies and other technical considerations including:
  - managing and using metadata
  - data modelling
  - data warehousing/back-end software alternatives
  - business analytics
  - business intelligence tools
- analyse the organisational policies and procedures, as they apply to the business intelligence frameworks
- discuss behaviour theories as they apply to business intelligence, including:
  - responsibility and achievement
  - affiliation management
  - motivation
- appraise and evaluate, the business intelligence (BI) procedures

© Commonwealth of Australia, 2025 Future Skills Organisation

- interpret the workplace and industry environmental conditions, as they apply to business intelligence.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general information and communications technology (ICT) industry, and include access to:

- a business intelligence focus
- relevant enterprise documentation, including human resource (HR) and quality management policies.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTICT813 Manage ICT services

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to apply the principles of service quality management and to develop a code of practice for information and communications technology (ICT) service management.

It applies to individuals who work in senior management positions and manage a wide range of ICT projects, and lead the analysis, implementation and management of emerging, and converging, ICTs as they are integrated into the business process to support organisational strategic goals.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

General ICT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to manage ICT services	1.1 Identify the quality requirement principles to provide ICT service provision, according to the business needs and expectations 1.2 Research and critically analyse, the appropriate service processes 1.3 Analyse continual improvement processes, to align and

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	realign, the ICT services to business needs
2. Develop the quality requirements for ICT service management	2.1 Identify the specific quality requirements to improve the service management processes 2.2 Align ICT services with the business, applying service management concepts 2.3 Develop the strategies for the control, delivery and support of ICT services
3. Develop a code of practice for ICT service management	3.1 Research and critically analyse, best practice processes 3.2 Document best practice processes for ICT service management 3.3 Implement the identified best practice processes 3.4 Evaluate, monitor and improve ICT service management

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.3, 2.1, 3.1, 3.4	• Identifies, analyses and critically evaluates, complex online and hard copy documentation containing service-management and technology-specific terminology, in order to research, develop, monitor and improve, a quality service management process
Writing	2.2, 2.3, 3.2, 3.4	• Uses plain English, the appropriate grammatical structures and terminology, diagrams and flow charts, and the formatting, and document structure, relevant to the subject matter and audience, to develop strategies and best practice processes
Oral Communication	1.1-1.3, 2.1-2.3, 3.1, 3.3, 3.4	• Expresses research and resource requirements clearly, and directs discussions to elicit information, and the views and opinions of others, by using effective listening and open, questioning techniques • Articulates requirements and methodologies clearly, using the appropriate tone, style, body language and reflective responses
Get the work	1.1-1.3, 2.1-2.3,	• Considers the strategic and operational potential of

© Commonwealth of Australia, 2025 Future Skills Organisation

done	3.1, 3.4	digital technology to achieve work goals, enhance work processes, create opportunities and reduce risks • Draws on a broad understanding of the context and uses a combination of analysis and intuition, to decide whether an idea is worth developing and implementing • Develops plans for complex high-impact activities with strategic implications • Recognises and addresses complex problems involving multiple variables

Assessment Requirements for ICTICT813 Manage ICT services

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- research and critically analyse the provision of quality information and communications technology (ICT) services
- review, then develop and implement, procedures and processes to improve the quality of ICT service management
- critically review, evaluate, monitor and improve the ICT service management.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- review and appraise ICT service management concepts and processes
- research and critically review, the quality assurance procedures in ICT services
- discriminate and summarise, industry best practice processes in ICT services
- summarise and contrast, the technical terminology relevant to service management.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general ICT industry, and include access to:

- a current service organisational chart
- current service logs and procedures
- an organisational mission statement.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTICT814 Develop cloud computing strategies for a business

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to develop a cloud computing strategy for establishing cloud computing services as a key business enabler.

It applies to senior management, including strategic business analysts and chief information officers.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

General ICT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Analyse the existing business ICT system assets	1.1 Review the business assets and identify the most appropriate for possible cloud deployment 1.2 Evaluate each asset's risk tolerance to the business, for possible cloud deployment
2. Select the most suitable deployment and/or delivery model for each asset	2.1 Map each asset to potential cloud deployment models 2.2 Review and select the most relevant delivery model for each asset 2.3 Document the security risks to the business as a result of

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	using the identified deployment and delivery models
3. Develop a cloud implementation strategy	3.1 Develop a cloud implementation plan, incorporating the most appropriate deployment and delivery models, in line with the enterprise requirements 3.2 Develop a costing for the technology requirements of the implementation proposal 3.3 Develop processes for the periodic review of the cloud service metrics, associated with the implementation proposal

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.2	• Organises, evaluates and critiques ideas and information from a range of complex texts
Writing	2.1, 2.3, 3.1	• Prepares documentation expressing ideas, explores complex issues and is constructed logically, succinctly and accurately
Numeracy	3.2	• Analyses and synthesises highly embedded mathematical information in a broad range of tasks and texts
Navigate the world of work	3.1	• Develops and implements strategies that ensures that the organisational policies, procedures and regulatory requirements are being met
Get the work done	3.1, 3.3	• Plans strategic priorities and outcomes within a flexible, efficient and effective context, in a diverse environment exposed to competing demands • Identifies the key factors that impact on decisions and their outcomes, drawing on experience, competing priorities, and decision-making strategies, where appropriate • Uses digital technologies to manage business operations and actively investigates new technologies, for strategic and operational purposes

Assessment Requirements for ICTICT814 Develop cloud computing strategies for a business

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- analyse and document, the effectiveness of existing cloud computing deployment and delivery models
- research the cloud computing options in the marketplace
- develop a cloud computing implementation strategy that meets the enterprise needs.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- research and synthesise information to determine and document current business processes, and cloud service sources
- define and employ coaching, mentoring and teamwork skills to ensure the support of cloud computing strategies as an ongoing initiative
- investigate and analyse cloud computing concepts, processes and trends
- synthesise the relevant enterprise policies and legislation that affect business operations, specifically privacy legislation
- discriminate between the legal, ethical and security issues relating to cloud computing
- evaluate organisational change-management theory and methods
- determine the risk tolerance issues, as they relate to the development of cloud computing strategies
- investigate and critically analyse, the methods of deploying cloud technology strategies
- investigate and critically analyse, the security issues relevant to a business.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general information and communications technology (ICT) industry, and include access to:

- a workplace of sufficient complexity, to enable the required level of analysis to be carried out in relation to current business processes, and possible future cloud computing solutions
- relevant enterprise strategic documentation, including:
  - strategic planning
  - financial
  - ICT infrastructure
- enterprise objectives and policies.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTICT815 Manage automated ICT system applications using enterprise wide operating system

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the performance outcomes, skills and knowledge required to apply the enterprise wide operating system to system automation in a distributed computing environment as used in telecommunications applications.

It applies to telecommunication engineers who manage automated systems within a telecommunications network including databases, files systems and user administration.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

General ICT

Elements and Performance Criteria

Elements *Elements describe the essential outcomes.*	**Performance Criteria** *Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Operate an enterprise wide operating system	1.1 Modify boot options by operating an enterprise wide operating system 1.2 Shutdown a networked operating system using system commands with qualifiers 1.3 Manage files using file management commands and wildcards and creating disk partitions and other media file systems

© Commonwealth of Australia, 2025 Future Skills Organisation

	1.4 Mount and unmount file systems using system commands 1.5 Verify the integrity of file systems using system utilities 1.6 Configure telecommunication applications by using system commands with special permission modes 1.7 Critically analyse, evaluate and apply the enterprise wide operating system features to a given telecommunications multi-user application using distributed computing
2. Apply system functions	2.1 Use the command line interface to interact with shells and commands to the telecommunications application on distributed computing 2.2 Manage files by applying regular expressions with system functions 2.3 Send text files and output streams through text utilities using commands 2.4 Evaluate and apply enterprise wide operating system functions to a telecommunications application on distributed computing to create menu options
3. Manage user login environment and customisation	3.1 Manage user and group accounts to the telecommunications application on distributed computing 3.2 Change user and group profiles to allowed security access level using commands 3.3 Scan log files for activity using commands 3.4 Configure the user environment for setting user and global profiles 3.5 Record the configuration settings
4. Manage system level functions	4.1 Automate scheduling using the system ‘cron’ command 4.2 Critically analyse the need for backup strategy in a telecommunications network application 4.3 Plan a backup strategy to maintain redundancy of the system 4.4 Configure the system to perform scheduled backing up the file system to various media 4.5 Verify integrity of backup operations by restoring system using backup files 4.6 Configure system log files for administration and security needs 4.7 Manage a print server and print files to provide customer service

© Commonwealth of Australia, 2025 Future Skills Organisation

	4.8 Document the configuration backup schedules and system logs
5. Complete evaluation and configuration documentation	5.1 Produce a project evaluation report on the application of Unix features to a given telecommunications multi-user application using distributed computing with recommendations on improvements to the system 5.2 Produce a report on the management and configuration of user applications and system level functions

Foundation Skills

This section describes language, literacy and numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	**Performance Criteria**	**Description**
Reading	1.7, 2.4, 3.3, 4.2	• Evaluates and critiques ideas and information from a range of complex texts
Writing	2.4, 3.5, 4.2, 4.8, 5.1, 5.2	• Generates complex written texts demonstrating sophisticated writing skills
Oral Communication	4.2, 5.1, 5.2	• Presents complex and effective spoken communication in a broad range of contexts
Numeracy	1.6, 3.4, 3.5, 4.2, 4.4, 4.6	• Applies a wide range of highly developed mathematical and problem solving strategies and techniques to a wide range of contexts
Get the work done	1.1-1.7, 2.1-2.4, 3.1-3.4, 4.1-4.7, 5.2	• Plans strategic priorities and outcomes within a flexible, efficient and effective context in a diverse environment exposed to competing demands • Makes high impact decisions in a complex and diverse environment, using input from a range of sources • Identifies key factors that impact on decisions and their outcomes, drawing on experience, competing priorities, and decision making strategies where appropriate • Explores and incubates new and innovative ideas through unconstrained analysis and critical thinking to develop and improve the organisations goals • Uses digital technologies to manage business operations and actively investigates new

Assessment Requirements for ICTICT815 Manage automated ICT system applications using enterprise wide operating system

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- manage ICT system functions using a enterprise wide operating system
- analyse system functions based on data
- produce a report on the evaluation of the system
- document recommendations for improvement

Knowledge Evidence

Evidence of the ability to:

- analyse an automated systems
- critique communication and multi user telecommunications systems
- appraise distributed computing
- appraise encoding and programming techniques
- analyse and report on network security
- describe networking infrastructure
- describe realisation of software simulation
- apply enterprise wide operating system commands.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the Telecommunications -Information Technology field of work and include access to:

- a telecommunications operations site
- unix based system to manage automated functions
- special purpose tools, equipment, materials
- industry software packages.

ICTICT516 Test telecommunications network using virtual instruments

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to apply simulation testing techniques to telecommunication systems.

It applies to technical staff who work with optical communication systems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – IT Use

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan simulation of hardware instruments	1.1 Arrange access to site according to required procedure 1.2 Determine specific applications for virtual instruments in telecommunication systems 1.3 Determine features of virtual instruments applicable to telecommunication systems, including limitations of virtual instruments 1.4 Select a range of simple and complex virtual instruments applicable to

© Commonwealth of Australia, 2025 Future Skills Organisation

	telecommunication systems
2. Perform simulation techniques	2.1 Perform measurements on telecommunication systems using simple virtual instruments 2.2 Simulate and display properties of a modulated signal with software generated instruments following enterprise work health and safety (WHS) processes and procedures 2.3 Simulate and display a data signal transmitted through a band-limited channel 2.4 Control virtual instruments using data bus operation
3. Analyse simulation measurements	3.1 Determine conversion processes used in virtual instruments 3.2 Document potential effect of a simulation algorithm on readings taken 3.3 Analyse measurements in context of conversion process and simulation algorithm
4. Report measurement results	4.1 Prepare report on measurement results 4.2 Submit report to supervisor

Foundation Skills

This section describes language, literacy and numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	**Performance Criteria**	**Description**
Reading	1.1, 1.2, 1.3, 3.3	• Draws on a range of strategies to research and understand complex texts • Analyses and consolidates test results and data from a range of sources, against defined criteria and requirements
Writing	1.1, 3.2, 4.1, 4.2	• Demonstrates sophisticated writing skills by selecting appropriate conventions and stylistic devices to express precise meaning
Oral Communication	1.1, 4.2	• Establishes effective spoken communication in a range of contexts
Numeracy	1.3, 2.1-2.4, 3.1-3.3, 4.1	• Selects and applies a wide range of mathematical and problem solving techniques in a broad range of contexts • Uses a wide range of formal mathematical language and representation to communicate mathematically

© Commonwealth of Australia, 2025 Future Skills Organisation

Navigate the world of work	1.1, 2.2	• Takes full responsibility for following policies, procedures and legislative requirements and identifies organisational implications of new legislation or regulation
Get the work done	1.1-1.4, 2.1-2.4, 3.1, 3.3	• Accepts responsibility for planning and sequencing complex tasks and workload, negotiating key aspects with others, taking into account capabilities, efficiencies and effectiveness • Applies systematic and analytical decision-making processes for complex and non-routine situations • Responds intuitively to problems requiring immediate resolution, drawing on past experiences to focus on the cause • Uses and investigates new digital technologies and applications for testing, managing and manipulating data and communications effectively, in a secure and stable digital environment

Assessment Requirements for ICTICT516 Test telecommunications network using virtual instruments

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- interpret and use equipment and system manuals and specifications
- use latest virtual instrument test equipment
- simulate signals and systems using complex virtual instruments
- analyse and report on results of simulation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the applications of virtual instruments
- explain current and emerging developments in relation to virtual instruments
- describe instrumentation principles and practices
- identify internet support services
- outline modulation methods, AM, FM and digital formats
- name sampling and data conversion processes
- explain virtual instrument features and benefits.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the Telecommunications – Information Technology use field of work and include access to:

- internet sites

© Commonwealth of Australia, 2025 Future Skills Organisation

- electronic workbench or similar software
- virtual instrument applications and media
- a workplace conducting operations involving virtual instruments, with support from a competent supervisor or mentor
- telecommunications equipment suitable for integrating projects
- industry software packages (where applicable).

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTNPL401 Apply business acumen to network planning

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to consider business drivers in a decision-making process for network planning and investment. It prepares individuals for entry into planning and design for network additions and implementations to accommodate network growth and new technologies within the industry.

It applies to individuals with a range of telecommunications skills and extensive knowledge of core and access network capabilities of the service provider.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Network Planning

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Analyse forecasts using customer demand	1.1 Gather and organise information concerning customer service and usage data to determine customer demand 1.2 Determine trends in customer demands in specific customer operating environments and markets 1.3 Assess key measures of capacity and customer demand for forecast

© Commonwealth of Australia, 2025 Future Skills Organisation

2. Build models to develop business cases	2.1 Construct a model to represent key options to formulate strategic proposals in network planning 2.2 Determine rights of carriers and service providers in installing facilities under Commonwealth legislation 2.3 Produce a strategic network plan using key variables, and communicate them to intended audience 2.4 Apply business case methodology to determine key economic measures and risks to business success 2.5 Evaluate business value and options to recommend appropriate planning strategy
3. Apply financial analysis	3.1 Use a financial investment tool relevant to the business environment to determine financial viability of the planning project 3.2 Apply key economic measures in an analysis process and develop business strategy 3.3 Determine relevant level of financial analysis required to optimise network planning
4. Analyse demographic trends for strategy development	4.1 Gather demographic data and determine impact of demographic diversity on planning strategies 4.2 Analyse data and produce demographic trends for use in strategy developments in network planning
5. Assess technology implementation	5.1 Determine unit costs associated with technologies and products by using lifecycle of technologies 5.2 Research what different technology bases can deliver and circumstances and locations in which they should be successfully deployed
6. Evaluate network deployment architecture	6.1 Evaluate network deployment architecture using network deployment rules and reasoning behind architecture rules 6.2 Produce a business model of network planning, applying commercial considerations and exemption process

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

© Commonwealth of Australia, 2025 Future Skills Organisation

Reading	1.1, 2.2, 2.5, 4.1, 5.2, 6.1	• Identifies and evaluates text to determine key information and specific requirements and responsibilities
Writing	1.2, 2.1, 2.3, 2.4, 3.1, 3.2, 6.2	• Develops material for a specific audience using clear and detailed language • Uses expected forms and conventions to present required information
Oral Communication	2.3	• Articulates specific information using an appropriate tone and vocabulary for intended audience
Numeracy	1.1-1.3, 2.1, 2.4, 3.1-3.3, 4.1, 4.2, 5.1, 6.1, 6.2	• Interprets numerical information and applies mathematical calculations relating to time durations and financial consequences • Applies different financial models to the planning process and highlights benefits and drawbacks of different strategies
Navigate the world of work	2.2	• Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements
Interact with others	2.3	• Uses a range of strategies to establish a sense of connection and build rapport with clients and co-workers • Selects and uses appropriate conventions and protocols when communicating with clients and co-workers in a range of work contexts
Get the work done	1.1-1.3, 2.1, 2.2, 2.4, 2.5, 3.1-3.3, 4.1, 4.2, 5.2, 6.1, 6.2	• Takes responsibility for planning, sequencing and prioritising tasks and own workload for efficiency and effective outcomes • Makes routine decisions and implements standard procedures for routine tasks, using formal decision-making processes for more complex and non-routine situations • Addresses less predictable problems and initiates standard procedures in response, applying problem-solving processes in determining a solution

Assessment Requirements for ICTNPL401 Apply business acumen to network planning

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- analyse forecasts using customer demand
- build accurate models to develop business cases, applying financial analysis
- analyse demographic trends for strategy development
- assess technology implementation
- communicate with customers
- evaluate network deployment architecture.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain different forms of business modelling
- identify commercial considerations, including:
  - capital expenditure (CAPEX)
  - operational expenditure (OPEX)
  - product revenue and demand versus network cost
  - return on investment (RoI)
  - time to market
- identify role of demographics in the planning process
- outline emerging technologies of telecommunications
- identify financial investment tools:
  - cost-benefit analysis
  - investment management system

© Commonwealth of Australia, 2025 Future Skills Organisation

  - net present value (NPV)
- identify financial models
- explain forecasting of trends
- identify and explain relevant legislation as it applies to:
  - Australian competition and consumer affairs
  - telecommunications industry regulatory accounting
  - universal services obligations
- describe network planning processes.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the Telecommunications – Network Planning field of work and include access to:

- network planning data
- relevant databases
- business and financial models
- systems and deployment rules and relevant legislation
- planning processes and regulatory frameworks.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTNPL402 Plan the deployment of access network architectures

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to plan deployment of network architecture when conducting access network telecommunications work.

It applies to individuals with a range of telecommunications skills and extensive knowledge of core and access network capabilities of the service provider. It prepares individuals for entry into planning and design for network additions and implementations to accommodate network growth and new technologies within the industry.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Network Planning

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Scope the project	1.1 Prepare for work according to site specific safety requirements and enterprise work health and safety (WHS) processes and procedures 1.2 Determine type of access network by accessing and using network information sources 1.3 Produce a brief on how access network architecture components relate to the larger network and their impact on the work

© Commonwealth of Australia, 2025 Future Skills Organisation

	1.4 Evaluate equipment type and technologies to be considered, to determine availability and compatibility with existing network equipment 1.5 Obtain resources and equipment needed for the work according to enterprise procedures and check for correct operation and safety 1.6 Assess capacity limitations of various platforms in the context of the work to ensure maximum network performance 1.7 Determine product capability and calculate allowable capacity of the access network to allow for network growth
2. Produce deployment plan for an Access Network	2.1 Conduct planning work using current equipment components and complying with access network deployment rules and exemption process criteria 2.2 Produce a preliminary plan on deployment of the network that maintains integrity of the access network 2.3 Discuss unexpected situations with appropriate personnel, with consideration to job specifications, safety and enterprise procedures to establish a solution 2.4 Review plan to ensure it complies with all standards and codes required when working on network access, and where appropriate make adjustments
3. Complete work and report its impact on network access	3.1 Produce final deployment plan including recommendations agreed with customer 3.2 Provide a report on network monitoring techniques used to manage the network to ensure it is performing at optimum level

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	**Performance Criteria**	**Description**
Reading	1.1, 1.2, 1.4-1.7, 2.1, 2.4	• Identifies and evaluates written and visual text in specialised workplace documentation to determine key information and specific requirements
Writing	1.3, 2.2, 3.2	• Develops material for a specific audience using clear and detailed language and expected forms and conventions

© Commonwealth of Australia, 2025 Future Skills Organisation

Oral Communication	1.6, 1.7, 2.3, 3.1, 3.2	• Articulates specific information using an appropriate tone and vocabulary for the intended audience
Numeracy	1.6, 1.7, 3.1, 3.2	• Employs mathematical calculations to determine features and limitations of different networks
Navigate the world of work	1.1, 1.5, 2.1, 2.3, 2.4	• Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements • Identifies and acts on issues that contravene relevant policies, procedures and legal requirements
Interact with others	2.3	• Selects and uses appropriate conventions and protocols when communicating with clients and co-workers in a range of work contexts • Uses a range of strategies to establish a sense of connection and build rapport with clients and co-workers
Get the work done	1.1-1.7, 2.1, 3.1	• Takes responsibility for planning, sequencing and prioritising tasks and own workload for efficiency and effective outcomes • Makes routine decisions and implements standard procedures for routine tasks, using formal decision-making processes for more complex and non-routine situations • Addresses less predictable problems and initiates standard procedures in response, applying problem-solving processes in determining a solution

Assessment Requirements for ICTNPL402 Plan the deployment of access network architectures

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- gather data appropriately within information sources and evaluate how the data relates to the access architecture
- source current major equipment and technologies used in an access network and detail their compatibilities
- accurately plan deployment of an access network architecture, including deployment rules, capacity and capability management and monitoring techniques
- complete work within a timeframe typically expected of the discipline, work function and industrial environment.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the features of an access network, including:
  - architectures and geographical categorisation
  - information sources
  - technology and equipment
- define capacity and capability management
- identify capacity limitation of various platforms
- describe commercial considerations of access network deployment
- identify compatibility issues of technology and equipment
- explain currency of technology and equipment use
- summarise enterprise deployment rules and rationale

© Commonwealth of Australia, 2025 Future Skills Organisation

- identify exemption process criteria
- identify major equipment components of a modern access architecture
- describe monitoring techniques to manage the access network
- outline network topologies
- identify product capability and availability allowable within an access network
- outline telecommunications access networks issues and challenges.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the Telecommunications – Network Planning field of work and include access to:

- network design documentation and other site-related documentation
- equipment specifications
- live network or training facilities
- organisational guidelines
- networked computers
- networked telecommunications components.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTNPL403 Evaluate the capability of access networks

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to gather information on the types of access networks and evaluate their capability to meet present and future demands, including evaluation and comparison of competing access network technologies.

It applies to individuals with a range of telecommunications skills and extensive knowledge of core and access network capabilities of the service provider. It prepares individuals for entry into planning and design for network additions and implementations to accommodate network growth and new technologies within the industry.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Network Planning

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Scope the project	1.1 Prepare for given work according to site-specific safety requirements and enterprise work health and safety (WHS) processes and procedures 1.2 Determine types of access networks currently deployed by accessing

© Commonwealth of Australia, 2025 Future Skills Organisation

	and using network information sources 1.3 Determine nature, quantity, architecture and condition of existing network equipment and their attributes 1.4 Produce a brief on deployment scope of current access networks, including geographical limitations and their contribution to the larger network
2. Assess capability and technologies of current and future access networks	2.1 Produce layout of the topology of identified types of access networks with network elements clearly indicated 2.2 Evaluate equipment type and technologies of the access network to determine compatibility with existing network equipment and interoperability with other networks 2.3 Assess current and future capability and limitations of the network to ensure potential growth of the network 2.4 Determine future offerings of product and services outlining product offerings allowable over each network
3. Document capability evaluation	3.1 Assess capability of current access networks to deliver products and services to customers 3.2 Recommend preferred solutions for network growth with future capabilities

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	**Performance Criteria**	**Description**
Reading	1.1-1.4, 2.2-2.4, 3.1	• Identifies and evaluates written and visual text in specialised workplace documentation to determine key information and specific requirements
Writing	1.4, 2.1, 3.2	• Develops material for a specific audience using clear and detailed language and expected forms and conventions
Oral Communication	1.3, 1.4, 3.2	• Articulates technical information using an appropriate tone and vocabulary for intended audience
Numeracy	1.4, 2.1, 2.2	• Employs mathematical calculations to determine features and limitations of different networks and equipment

© Commonwealth of Australia, 2025 Future Skills Organisation

Navigate the world of work	1.1	• Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements
Interact with others	3.2	• Selects and uses appropriate conventions and protocols when communicating with clients and co-workers in a range of work contexts
Get the work done	1.1-1.3, 2.2-2.4, 3.1, 3.2	• Takes responsibility for planning, sequencing and prioritising tasks and own workload for efficiency and effective outcomes • Makes routine decisions and implements standard procedures for routine tasks, using formal decision-making processes for more complex and non-routine situations • Addresses less predictable problems and initiates standard procedures in response, applying problem-solving processes in determining a solution

Assessment Requirements for ICTNPL403 Evaluate the capability of access networks

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- evaluate capability and limitations of the various access network technologies for present and future needs
- determine and source equipment that will be used across the spectrum of access network technologies
- outline product offerings allowable across all competing access network technologies.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify access networks from information sources
- explain access networks in terms of:
  - common attributes and features
  - typical access network technologies and topologies
- explain how to assess capability and limitations of a network including:
  - its contribution to the boarder network; and,
  - its capacity to deliver customer products and services
- outline typical problems and challenges that arise from working with access network technologies
- explain the basis on which various network technologies are selected.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the Telecommunications – Network Planning field of work and include access to:

- network design documentation and other site related documentation
- equipment specifications
- live network or training facilities
- organisational guidelines
- networked computers
- networked telecommunications components.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTNPL404 Evaluate the planning requirements for provisioning a telecommunications building facility

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to evaluate building service capability to meet present and future demands for a building facility housing telecommunications equipment, including gathering information and evaluating allowable types of building services, power systems, air conditioning, fire safety services, energy use and alarm systems within each technology.

It applies to individuals with a range of telecommunications skills and extensive knowledge of core and access network capabilities of the service provider. It prepares individuals for entry into planning and design for network additions and implementations to accommodate network growth and new technologies within the industry.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Network Planning

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Scope the	1.1 Prepare for given work according to relevant legislation, codes, regulations and standards including work health and safety (WHS) processes

© Commonwealth of Australia, 2025 Future Skills Organisation

project	and procedures 1.2 Obtain building plans and specifications from planning section 1.3 Determine type of facility and building services required to house telecommunications network equipment and plant to efficiently support the network 1.4 Determine the purpose of the main areas or rooms in the network building and note special requirements to support safe operation of the facility 1.5 Verify who is responsible for planning, provisioning, maintaining and operation of a facility
2. Evaluate power requirements	2.1 Assess how functions of the main power and building services support network equipment and the impact if building services are not provided correctly or fail 2.2 Produce a schematic diagram of the relationship of electrical components in an end-to-end power and building services system 2.3 Assess different types of power sources likely to supply network equipment and determine benefits or deficiencies 2.4 Determine how resiliency is built into provisioning of a reliable power supply and how different levels of reliability can be achieved 2.5 Evaluate the impact of energy use and energy loads in the facility and determine how energy use can be minimised
3. Evaluate requirements of air conditioning services	3.1 Assess the main types of air conditioning components or plant available and their suitability to building requirements, and draw a schematic diagram of proposed layout 3.2 Determine how different equipment rack heat dissipation and size of a load can affect cooling needs 3.3 Evaluate how deployment of network equipment and other supporting infrastructure can affect performance and loading of the installed air conditioner
4. Evaluate requirements of fire safety services	4.1 Assess type, functions and components of fire service protection systems for fire and smoke required in a network facility for the safety and protection of people and assets 4.2 Use the building plan to locate fire systems to be deployed to comply with fire regulations 4.3 Evaluate effect equipment deployments may have on fire services and its ability to protect the site and maintain regulatory obligations

© Commonwealth of Australia, 2025 Future Skills Organisation

5. Evaluate requirements of alarm systems	5.1 Determine alarm requirements from the building plan and specifications 5.2 Assess if basic monitoring is to be used with system or plant interrogation capabilities to produce an integrated alarm system for the facility 5.3 Determine where alarm systems are monitored and actioned and the personnel responsible 5.4 Evaluate what systems are used to connect power and building services output alarms, and the software requirements needed to allow interrogation
6. Produce evaluation document	6.1 Assess requirements for each building service needed to support the facility, allowing for projection of future network growth and building expansion 6.2 Produce an evaluation document on planning requirements for proposed provisioning including identified services to support the building facility

Foundation Skills

This section describes the Foundation Skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3, 2.3, 2.4, 4.1, 4.2, 5.1-5.3, 6.1	• Identifies and evaluates complex written and visual text in specialised workplace documentation to determine key information and specific requirements
Writing	1.2, 1.5, 2.2, 3.1, 5.3, 6.1, 6.2	• Develops material for a specific audience using clear and detailed language and visuals employing expected forms and conventions
Oral Communication	1.2, 1.5, 5.3	• Articulates technical information using an appropriate tone and vocabulary for the intended audience
Numeracy	2.2-2.5, 3.1-3.3, 4.3, 5.1, 5.4, 6.1, 6.2	• Employs mathematical calculations to determine capabilities and limitations of different systems
Navigate the world of work	1.1	• Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements
Get the work done	1.1-1.5, 2.1, 2.3-2.5, 3.1-3.3, 4.1, 4.3, 5.2-5.4, 6.1	• Takes responsibility for planning, sequencing and prioritising tasks and own workload for efficiency and effective outcomes

© Commonwealth of Australia, 2025 Future Skills Organisation

		• Makes routine decisions and implements standard procedures for routine tasks, using formal decision-making processes for more complex and non-routine situations • Addresses less predictable problems and initiates standard procedures in response, applying problem-solving processes in determining a solution

Assessment Requirements for ICTNPL404 Evaluate the planning requirements for provisioning a telecommunications building facility

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- evaluate facilities used for housing network equipment and how they may be used for provisioning
- produce documentation that correctly associates responsibilities to planning, provisioning, maintenance and operation of a building facility
- evaluate planning requirements for telecommunications building facilities
- determine equipment for air conditioning systems and power supplies into building facilities
- determine requirements for energy use, alarm and fire safety services.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline these aspects of network planning:
  - alarm monitoring and hierarchy of responsibility
  - capacity of air conditioning system on a given load
  - different building services supported at a network site
- describe basic monitoring and plant interrogation capabilities
- outline complexities of various levels of alarm as applied to building facilities
- identify general types of facilities within building housing network equipment
- outline services and equipment, including:
  - types of air conditioning

© Commonwealth of Australia, 2025 Future Skills Organisation

  - types of fire safety services
  - types of power sources
  - equipment deployments on fire safety services
  - main energy loads associated in a facility
- identify regulatory obligations in relation to fire safety services
- identify software systems needed to allow alarm interrogation (outputs).

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the Telecommunications – Network Planning field of work and include access to:

- building facilities where planning requirements for provisioning may be conducted
- relevant regulatory and organisational procedures
- documentation that impacts work.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTNPL405 Develop provisioning of telecommunications building works project

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to develop provisioning of building services, including gathering information on the role of power and building services, equipment and infrastructure deployments, building standards, building services capacity and building works programs to evaluate allowable types of building services.

It applies to individuals with a range of telecommunications skills and extensive knowledge of core and access network capabilities of the service provider. It prepares individuals for entry into planning and design for network additions and implementations to accommodate network growth and new technologies within the industry.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Network Planning

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Scope the project	1.1 Prepare for given work according to relevant legislation, codes, regulations and standards, including work health and safety (WHS)

© Commonwealth of Australia, 2025 Future Skills Organisation

	processes and procedures 1.2 Determine the main role power and building services perform in a network facility and note their effect on network reliability and performance 1.3 Assess the provisioning process required to identify, plan and implement power and building services for equipment deployment plans
2. Assess equipment and infrastructure deployments	2.1 Evaluate available capacity from power and cooling plant to support the effect on floor loading, power and heat load from equipment deployments 2.2 Determine different levels of reliability performance standards applicable to specific equipment deployment needs 2.3 Develop a process to plan or implement a power and building services upgrade compatible to the network equipment requirements 2.4 Assess options available to manage capacity growth in a facility and the effect of potential single points of failure in an end-to-end power and building services system
3. Develop building works programs	3.1 Develop short- and long-term works programs for building projects that include minor upgrades to large installations 3.2 Determine triggers that may require a power and building services capacity or reliability upgrade 3.3 Prioritise projects based on customer demand and business needs
4. Assess provisioning of building services	4.1 Assess the possible effect on current and future use of a building or space when provisioning power and building services 4.2 Produce cost estimates including constraints for provisioning of a power and building services upgrade

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	**Performance Criteria**	**Description**
Reading	1.1-1.3	• Identifies and evaluates complex written and visual text in specialised workplace documentation to determine key information and specific requirements

Assessment Requirements for ICTNPL405 Develop provisioning of telecommunications building works project

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- assess capacity and suitability of available power and building services for telecommunications building works
- develop a process to implement a power and building services upgrade
- develop short- and long-term works projects for equipment and infrastructure deployments
- produce accurate cost estimates for provisioning.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the process to assess capacity and suitability of available power and building services
- outline the following features of a building works project:
  - correlation between building service systems to network equipment requirements
  - different levels of reliability performance standards, applicable to specific equipment deployment needs
  - information required to assess effect on floor loading, power and heat load from equipment deployments
  - main regulatory standards
  - role of power and building services, capacity and standards
- establish the source of budget cost estimates
- define the specific short and long term works programs

© Commonwealth of Australia, 2025 Future Skills Organisation

- identify typical issues and challenges that occur in telecommunications building service systems and how these may be addressed
- outline the process for power and building services upgrades.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the Telecommunications – Network Planning field of work and include access to:

- building facilities where a telecommunications network project may be conducted
- relevant regulatory, organisational procedures
- documentation impacting work.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTNPL406 Evaluate core network architectures

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to assess roles and evaluate benefits of competing core network architectures. Core networks use convergent internet protocol (IP) based technologies with conventional technologies.

It applies to individuals with a range of telecommunications skills and extensive knowledge of core and access network capabilities of the service provider, and prepares them for entry level planning and design for network additions and implementations to accommodate network growth and new technologies within the industry.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Network Planning

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Evaluate basic IP network architecture	1.1 Produce a layout of the topology of an IP network showing network elements and application of the 7-layer open system interconnect (OSI) model 1.2 Determine purpose of routers and switches and use of routing protocols

© Commonwealth of Australia, 2025 Future Skills Organisation

	1.3 Determine different types of generic resiliency and redundancy that can be applied in network architectures and when they should be applied 1.4 Evaluate benefits of IP networks compared to circuit-based networks and the impact on modern telecommunications networks
2. Evaluate synchronous digital hierarchy (SDH) transport architectures	2.1 Produce a layout of the topology of SDH transport networks showing structure and role of rings in the networks 2.2 Determine purpose of SDH switching and its function within the transport architecture 2.3 Assess key capacity and distance limitations in SDH networks 2.4 Assess resiliency and redundancy techniques that can be used within SDH transport networks 2.5 Evaluate compatibility of SDH transport architectures with other transport architectures
3. Evaluate broadband architectures	3.1 Produce a layout of the topology structure of the asymmetrical digital subscriber line (ADSL) edge network and the hybrid fibre coaxial (HFC) cable edge network in providing broadband access to customer 3.2 Determine purpose of point-to-point protocol (PPP) and function of the digital subscriber line access multiplexer (DSLAM), broadband remote access server (BRAS) and layer2 network protocol network server (LNS) in the ADSL network 3.3 Assess arrangement of carrier channels connecting the HFC cable customer 3.4 Determine the function of the CMTS and the purpose of DOCSIS, and key capabilities of its different versions in the HFC network 3.5 Assess resiliency considerations for ADSL and HFC cable network architectures 3.6 Evaluate benefits of providing cable broadband access to wireless broadband from a network security aspect
4. Evaluate data architectures	4.1 Produce a layout of the topology of key structures of a data network showing the IP network and multiprotocol label switching (MPLS) structures 4.2 Determine the purpose of internal and external routing protocols in an IP network outlining reasons for the creation of a virtual private network (VPN) 4.3 Determine the purpose of label distribution protocol (LDP) in an MPLS network 4.4 Assess resiliency and redundancy techniques that can be used

© Commonwealth of Australia, 2025 Future Skills Organisation

	within data networks 4.5 Evaluate compatibility of IP and MPLS networking
5. Evaluate metropolitan ethernet architectures	5.1 Produce a layout of the topology structure of a metropolitan ethernet network showing optimum siting of the ethernet switch 5.2 Determine types and limitations of the varieties of ethernet transmission 5.3 Assess scaling limitations of ethernet networks 5.4 Assess resiliency and redundancy techniques that can be used within metropolitan ethernet networks 5.5 Evaluate the need for creation of virtual local area networks (VLAN) in metropolitan ethernet architecture for improved performance
6. Evaluate voice architectures	6.1 Produce a layout of the topology of a voice over internet protocol (VoIP) network and a wireless voice network showing the network elements 6.2 Determine the function of local exchange and transit exchange switches in the public switched telephone network (PSTN) 6.3 Determine the function of a secure broadband connection (SBC) and the purpose of session initiation protocol (SIP) in wireless networking 6.4 Assess resiliency and redundancy techniques that can be applied in design of voice networks 6.5 Evaluate benefits of VoIP networks compared to circuit based networks and the impact on modern telecommunications networks
7. Evaluate media and content architectures	7.1 Determine structure, elements and purpose of hosting networks in data centres and a content distribution network 7.2 Evaluate the impact of high speed broadband for wide deployment of media and content architectures
8. Prepare evaluation report	8.1 Assess compatibility and interoperability of competing core network architectures 8.2 Prepare an evaluation report outlining core network solutions using emerging technologies

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Assessment Requirements for ICTNPL406 Evaluate core network architectures

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- determine first three layers of the open system interconnect (OSI) model
- determine the role of switches and routers in the core network and different types of routing protocols
- evaluate synchronous digital hierarchy (SDH) switching and transmission and its ability to create resiliency in the network through various redundant configurations
- evaluate benefits, purpose and structure of ADSL networks and other broadband products
- determine and compare data networks with specific reference to internet protocol (IP) and multiprotocol label switching (MPLS)
- evaluate the most important routing protocols of internal and external MPLS and the resilience built into them
- evaluate limitations of an ethernet network and how VLAN can be incorporated in them
- compare various voice protocols
- determine the purpose of various hosting in data centres and media and distribution platforms.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the following features of core network architectures:
  - client business domain, business function and organisation
  - networking technologies
  - theoretical concepts of three or more current industry network development and design methodologies

© Commonwealth of Australia, 2025 Future Skills Organisation

  - transmission technologies and protocols
- outline MPLS and IP architectures across a core network environment
- outline current industry-accepted hardware and software products
- identify and describe relevant protocols, such as routing information protocol (RIP), enhanced interior gateway routing protocol (EIGRP), open shortest path first (OSPF), and border gateway protocol (BGP) operations
- identify VLANs and VPN tunnels and describe how they may be implemented in an ethernet/MPLS environment.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the Telecommunications – Network Planning field of work and include access to:

- network design documentation
- site-related documentation
- equipment specifications
- live network or training facilities
- organisational guidelines
- networked computers
- networked telecommunications components.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTNPL407 Plan the deployment of core network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to plan deployment of core network for a telecommunications service provider, including use and consideration of core network deployment data, technology, equipment, capacity management and network management information sources. Core networks use convergent internet protocol (IP) based technologies with conventional technologies.

It applies to individuals with a range of telecommunications skills and extensive knowledge of core and access network capabilities of the service provider. It prepares individuals for entry into planning and design for network additions and implementations to accommodate network growth and new technologies within the industry.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Network planning

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Scope the project	1.1 Prepare for work according to site-specific safety requirements and enterprise work health and safety (WHS) processes and procedures 1.2 Determine the type of core network by accessing and using network

© Commonwealth of Australia, 2025 Future Skills Organisation

	information sources 1.3 Produce a brief showing how core network architecture components relate to the larger network and their impact on the work 1.4 Evaluate equipment type and technologies to be considered to determine availability and compatibility with existing network equipment 1.5 Obtain resources and equipment needed for the work according to enterprise procedures and check for correct operation and safety 1.6 Assess capacity limitation of platforms in context of the work to ensure maximum network performance 1.7 Determine product capability and calculate allowable capacity of the core network to allow for network growth
2. Produce deployment plan for a core network	2.1 Assess demand for the core network using key geographic, demographic, forecast and bandwidth data 2.2 Identify key parameters of the core network to be measured for capacity management 2.3 Produce a preliminary deployment plan for the core network using architectural principles and assessed demand to maintain integrity of the core network 2.4 Assess additional planning requirements for voice over internet protocol (VoIP) and wireless voice networks from voice networks, and for hosting and content distribution networks from media and content networks 2.5 Create a financial business case for deployment of the core network based on assessed demand to justify a return on investment (RoI) and operational costs 2.6 Discuss unexpected situations with appropriate personnel, with consideration to job specifications, safety and enterprise procedures to establish a solution
3. Complete work and report its impact on network performance	3.1 Produce final deployment plan including recommendations agreed with customer 3.2 Provide a report on network monitoring techniques used to manage the network to ensure the network is performing at optimum level

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance	Description

© Commonwealth of Australia, 2025 Future Skills Organisation

	Criteria	
Reading	1.1-1.3, 1.5, 2.1-2.4	• Analyses and evaluates complex written and visual text in specialised workplace documentation to determine key information and specific requirements
Writing	1.3, 2.6, 3.1, 3.2	• Develops material for a specific audience using clear and detailed language and visuals employing expected forms and conventions
Oral Communication	2.6, 3.1, 3.2	• Articulates technical information using an appropriate tone and vocabulary for the intended audience • Listens and responds to different viewpoints and elicits opinions of others through considered questioning
Numeracy	1.6, 1.7, 2.1, 2.3, 2.4	• Employs mathematical calculations to interpret capabilities and limitations of different systems and future configurations
Navigate the world of work	1.1, 1.5, 2.6	• Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements
Interact with others	2.6	• Uses a range of strategies to establish a sense of connection and build rapport with clients and co-workers • Selects and uses appropriate conventions and protocols when communicating with clients and co-workers in a range of work contexts
Get the work done	1.1, 1.3-1.7, 2.1, 2.2, 2.4, 2.5	• Takes responsibility for planning, sequencing and prioritising tasks and own workload for efficiency and effective outcomes • Makes routine decisions and implements standard procedures for routine tasks, using formal decision-making processes for more complex and non-routine situations • Addresses less predictable problems and initiates standard procedures in response, applying problem solving processes in determining a solution

Assessment Requirements for ICTNPL407 Plan the deployment of core network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- gather data from information sources efficiently and evaluate how the data relates to the core network
- source major equipment and technologies accurately to be used in a core network and detail their compatibilities
- prepare a business case for deployment of a core network
- produce a deployment plan for a core network including monitoring techniques and recommendations for the customer.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify multiprotocol label switching (MPLS) and internet protocol (IP) architectures across a core network environment
- outline different protocols such as routing information protocol (RIP), enhanced interior gateway routing protocol (EIGRP), open shortest path first (OSPF), and border gateway protocol (BGP) operations
- identify virtual local area networks (VLAN) and virtual private network (VPN) tunnels and explain how they are implemented in an ethernet and MPLS environment
- outline the following features of core network architectures:
  - client business domain, business function and organisation
  - current industry-accepted hardware and software products
  - networking technologies incorporating substantial depth in some areas
  - transmission technologies and protocols

© Commonwealth of Australia, 2025 Future Skills Organisation

- theoretical concepts of three or more current industry network development and design methodologies.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the Telecommunications – Network Planning field of work and include access to:

- network design documentation
- other site-related documentation
- equipment specifications
- live network or training facilities
- organisational guidelines
- networked computers
- networked telecommunications components.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTNPL408 Produce planning specifications for end-to-end service delivery

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to gather information on the types of end-to-end services and product delivery and evaluate their capability to meet present and future demands.

It applies to individuals with a range of telecommunications skills and extensive knowledge of core and access network capabilities of the service provider. It prepares individuals for entry into planning and design for network additions and implementations to accommodate network growth and new technologies within the industry.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Network Planning

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Scope the project	1.1 Prepare for given work according to site specific safety requirements and enterprise work health and safety (WHS) processes and procedures 1.2 Determine types of currently deployed end-to-end service

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	delivery networks by accessing and using network information sources 1.3 Produce a brief on how end-to-end service delivery network elements relate to the larger network and their impact on the work
2. Assess capacity and capability of a specific project	2.1 Determine the nature, quantity, architecture and condition of existing end-to-end service delivery network elements and attributes that contribute to determining planning specifications 2.2 Assess capacity and capability limitations of an existing end-to-end service delivery network project by accessing network information sources and conducting site visits 2.3 Assess capacity and capability limitations of a building facility project that contribute to determining planning specifications
3. Assess capacity and capability of product and service delivery	3.1 Determine types of currently deployed products and services by accessing sales and marketing information databases 3.2 Produce a brief evaluating capability and technology of current product and services to meet demands and their relationship to the larger network 3.3 Evaluate emerging technologies that contribute to determining planning specifications for demands of future products and services
4. Produce planning briefs	4.1 Produce a brief on the planning specifications of an end-to-end service delivery network and a building facility project for the planning department to determine current and future network demands 4.2 Produce a brief on products and services planning requirements for sales and marketing to determine provisioning of future demands

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 2.2, 2.3, 3.3	• Analyses and evaluates complex written and visual text in specialised workplace documentation to determine key information and specific requirements

© Commonwealth of Australia, 2025 Future Skills Organisation

		• Evaluates complex text to determine legislative, regulatory and project requirements
Writing	1.3, 2.1, 2.2, 3.2, 4.1, 4.2	• Develops material for a specific audience using clear and detailed language employing expected forms and conventions
Oral Communication	2.1, 2.2, 3.2, 4.1, 4.2	• Articulates technical information using appropriate tone and vocabulary for the intended audience
Numeracy	2.3, 3.1	• Employs mathematical calculations to compare capabilities and limitations of different systems and future configurations
Navigate the world of work	1.1	• Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements
Get the work done	1.1, 1.2, 2.1-2.3, 3.1, 3.3	• Takes responsibility for planning, sequencing and prioritising tasks and own workload for efficiency and effective outcomes • Makes routine decisions and implements standard procedures for routine tasks, using formal decision-making processes for more complex and non-routine situations • Addresses less predictable problems and initiates standard procedures in response, applying problem-solving processes in determining a solution • Uses familiar digital technologies and systems to access information, search and enter data and code, present information and communicate with others, cognisant of data security and safety

Assessment Requirements for ICTNPL408 Produce planning specifications for end-to-end service delivery

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- access relevant network information databases to determine the types of end-to-end services and products
- conduct site evaluation assessment accurately
- evaluate capacity and capability of end-to-end services to meet current and future demands
- assess limitations of current end-to-end services and produce specifications to meet future demands
- assess limitations of current building facility and services and produce specifications to meet future demands
- summarise and produce planning briefs to network, sales and marketing planning sections.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify emerging technologies, trends and products available overseas that will be in demand in the Australian market
- describe information required to prepare and review limits of:
  - broadband networks
  - data networks
  - facilities and environmental issues
  - fixed access transmission network
  - media and content

© Commonwealth of Australia, 2025 Future Skills Organisation

  - regional and metropolitan network
  - voice networks
  - wireless network
- outline the following aspects of network planning:
  - basic network design including routing and redundancy
  - levels of reliability performance standards applicable to specific equipment deployment needs
  - standards and regulations
- describe the distribution structure of networks including:
  - access
  - backbone
  - edge
- outline current equipment and product types to meet future service obligations.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the Telecommunications – Network Planning field of work and include access to:

- a network planning area with systems and deployment rules and standards
- end-to-end services and products databases
- relevant workplace procedures
- product and manufacturing specifications
- codes of practice and standards
- manuals and reference materials.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTNPL409 Apply knowledge of regulation and legislation for the telecommunications industry

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to assess the impact of deregulation, competition, economic conditions, regulations and legislation on enterprise-specific policies and procedures and its subsequent incorporation into the planning process.

It applies to individuals with a range of telecommunications skills and extensive knowledge of core and access network capabilities of the service provider. It prepares individuals for entry into planning and design for network additions and implementations to accommodate network growth and new technologies within the industry.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Network Planning

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Evaluate economic and political influences	1.1 Research the impact of deregulation and competition in the telecommunications industry on planning priorities of competing service providers in Australia due to the different federal government policies

© Commonwealth of Australia, 2025 Future Skills Organisation

	1.2 Assess the influence of local and international economic conditions on the growth of the industry that would impact on the planning justification for a new network 1.3 Evaluate and produce a report on the economic and political influences on public and commercial enterprises providing services in a competitive telecommunications market of fast changing technologies
2. Evaluate impact of key regulations and legislation	2.1 Access all legislation governing carriers in Australia to determine the rights of carriers and service providers in installing facilities under Commonwealth legislation 2.2 Use the Telecommunications Industry Regulatory Accounting Framework (RAF) to determine the method used by the Australian Competition and Consumer Commission (ACCC) in enforcing competitive provisions between service providers 2.3 Evaluate the impact on planning of services by the obligation placed by Universal Service Obligation (USO) on service providers to ensure services are reasonably accessible to all people in Australia on an equitable basis 2.4 Produce a summary report evaluating the impact of the legislation on the planning process of access networks and plan strategies to facilitate network planning
3. Apply internal financial compliance	3.1 Use an enterprise-specific investment management system (IMS) to create on the spot reports for performance measurement of an existing planning project against the business plan 3.2 Produce a report of planning work activities incorporating enterprise-specific policies and procedures underpinned by regulatory and compliance obligations

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	**Performance Criteria**	**Description**
Reading	1.1, 1.2-1.3, 2.1-2.4, 3.1, 3.2	• Analyses and evaluates complex written and visual text in specialised workplace documentation to determine key information and specific requirements • Evaluates complex text to determine legislative, regulatory and project requirements

© Commonwealth of Australia, 2025 Future Skills Organisation

Writing	1.2, 1.3, 2.2-2.4, 3.1, 3.2	• Develops complex material for a specific audience using clear and detailed language employing expected forms and conventions • Prepares reports which incorporate evaluation of information and specialised and cohesive language
Navigate the world of work	1.1, 1.2, 2.1, 2.2, 3.2	• Ensures knowledge of legislative requirements and products is kept up to date in order to provide accurate information • Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements • Identifies and acts on issues that contravene relevant policies, procedures and legal requirements
Get the work done	1.1-1.3, 2.1-2.4, 3.1	• Takes responsibility for planning, sequencing and prioritising tasks and own workload for efficiency and effective outcomes • Makes routine decisions and implements standard procedures for routine tasks, using formal decision making processes for more complex and non-routine situations • Contributes to continuous improvement of current work practices by applying basic principles of analytical and lateral thinking • Uses familiar digital technologies and systems to access information, search and enter data and code, present information and communicate with others, cognisant of data security and safety

Assessment Requirements for ICTNPL409 Apply knowledge of regulation and legislation for the telecommunications industry

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- produce a comprehensive evaluation report on economic and political influences on the telecommunications industry in Australia
- produce a comprehensive evaluation report on the impact of key regulation and legislation on the telecommunications industry
- produce an accurate summary report evaluating the impact of the legislation on the planning process of access networks.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the impact of deregulation on the telecommunications industry
- outline the investment management system
- identify and describe the purpose and implementation of relevant telecommunications legislation
- identify and describe the impact of market forces on telecommunications
- outline procedures for developing plans for telecommunications systems
- outline the telecommunications industry, framework and networks.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the Telecommunications – Network Planning field of work and include access to:

- relevant legislation
- planning processes
- Telecommunications Industry Regulatory Accounting Framework (RAF) planning tools
- enterprise-specific investment management system (IMS)
- relevant databases
- licensing requirements
- other related procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTNPL410 Plan the telecommunications access network for an estate

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to plan access networks delivering voice, data and video services to customers, and involves the collation and evaluation of data relating to network shortfalls and projected usage, leading to the development of solutions and ultimately network plans for an estate.

It applies to individuals with a range of telecommunications skills and extensive knowledge of core and access network capabilities of the service provider. It prepares individuals for entry into planning and design for network additions and implementations to accommodate network growth and new technologies within the industry.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Network Planning

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Gather data on network usage	1.1 Determine the type of access network by accessing and using

© Commonwealth of Australia, 2025 Future Skills Organisation

for planning activity	network information sources 1.2 Collect planning data using network information sources to determine network trends 1.3 Evaluate new and emerging technologies to determine availability and compatibility with existing network equipment 1.4 Access relevant legislation and associated regulatory and operational codes
2. Evaluate need for network growth	2.1 Evaluate capacity of the existing network to absorb planned growth 2.2 Identify need and likely timing of necessary network increments 2.3 Assess new or alternate technologies to rectify network shortfall 2.4 Identify barriers relating to planned network extensions impacting planning the network realisation 2.5 Assess the impact of not meeting network shortfall needs and long term ramifications on the business
3. Develop solution and network plan to address network shortfall	3.1 Review overall planning parameters prior to commencement of the planning process to produce forecasts for specific network area and cost-benefit analysis 3.2 Establish the optimum solution to address network shortfall with justification for the proposal 3.3 Determine project details and ascertain preliminary costing and resource requirements 3.4 Determine availability of required technology or technology features within the specified timeframe 3.5 Produce a specific network plan with solution and recommendations for anticipated projects for approval according to enterprise procedures

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	**Performance Criteria**	**Description**
Reading	1.1-1.4, 2.1-2.5, 3.1, 3.3, 3.4	• Analyses and evaluates complex written and visual text in specialised workplace documentation to determine key information and specific requirements • Evaluates complex text to determine legislative,

© Commonwealth of Australia, 2025 Future Skills Organisation

		regulatory and project requirements
Writing	1.3, 2.3, 2.5, 3.2, 3.3, 3.5	• Develops complex material for a specific audience using clear and detailed language and visuals while employing expected forms and conventions • Prepares reports which incorporate evaluation of information and specialised and cohesive language
Oral Communication	2.3, 2.4, 3.2-3.5	• Clearly articulates requirements using language appropriate to audience and environment and participates in a verbal exchange of ideas and solutions
Numeracy	1.2, 2.1, 2.5, 3.1, 3.3, 3.4	• Interprets numerical information and applies basic mathematical calculations relating to time durations and budgetary information
Navigate the world of work	1.4	• Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements
Get the work done	1.2, 1.3, 2.1-2.5, 3.1, 3.2, 3.4	• Takes responsibility for planning, sequencing and prioritising tasks and own workload for efficiency and effective outcomes • Makes routine decisions and implements standard procedures for routine tasks, using formal decision-making processes for more complex and non-routine situations • Addresses less predictable problems and initiates standard procedures in response, applying problem-solving processes in determining a solution • Contributes to continuous improvement of current work practices by applying basic principles of analytical and lateral thinking

Assessment Requirements for ICTNPL410 Plan the telecommunications access network for an estate

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- implement planning processes including associated monitoring and control mechanisms
- develop effective solutions to address access network shortfalls that satisfy customer and enterprise needs
- develop network plans with consideration of appropriate technological developments and product implementation
- produce accurate forecasts for a specific network including cost-benefit analysis.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and summarise legislation affecting the telecommunications industry
- outline the features of an access network and the influence on:
  - cost estimates and operating budgets according to enterprise policy
  - telecommunications industry in Australia
- describe the theory of project management and associated databases and project management software programs
- describe the process and features of planning for an access network on an estate
- determine the economic and political influences on public and commercial enterprises
- describe the financial authorities and delegations associated with an access network plan
- define the influence of the local and international economic conditions on the telecommunications industry
- describe the typical challenges and limits facing technology today and the consideration of future needs

© Commonwealth of Australia, 2025 Future Skills Organisation

- describe the process of collating and writing project briefs, reports and project charters.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the Telecommunications – Network Planning field of work and include access to:

- a network planning area systems and deployment
- rules and standards
- relevant databases
- licensing requirements and other site related procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTNPL411 Apply compliance requirements to telecommunications work

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to satisfy the regulatory environment in the planning, design and installation of telecommunications equipment and infrastructure.

It applies to individuals with the organisational, economic and regulation skills to enable them to plan and design the access network infrastructure of private and/or carrier service providers. These individuals may be responsible for small projects or parts of larger projects and for the operation and engineering of the enterprise and telecommunications network in general.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Network Planning

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Evaluate design for activities subject to standards, regulations, codes of practice and	1.1 Research the range of activities subject to regulations, standards, legislation and codes of practice for their design 1.2 Examine organisational procedures developed to deal with these requirements.

© Commonwealth of Australia, 2025 Future Skills Organisation

legislation	1.3 Examine construction requirements for each activity and determine any applicable regulations, codes or practices, 1.4 Access knowledge bases, authorities and records for areas and activities covered by these requirements, 1.5 Examine public records for planning restrictions that may impact the design and construction of a telecommunications network
2. Evaluate design for activities that require approval to enter land or premises	2.1 Determine the rights of entry and notifications necessary to enter property for the purpose of designing telecommunications facilities 2.2 Examine what courses of action are available in case of dispute 2.3 Access legislation governing carriers and service providers in Australia to determine the rights of carriers and service providers in installing facilities under Commonwealth legislation 2.4 Determine activities that must be undertaken during survey and construction to meet the various requirements
3. Examine processes necessary to facilitate completion of a design to meet the relevant regulatory environments	3.1 Discuss with governing authorities, consultants and other industry experts the steps necessary to meet the legislative requirements of a designer and constructor of the network infrastructure design 3.2 Initiate studies and information gathering activities to develop a design which is compliant to the requirements 3.3 Produce a report of work activities incorporating enterprise-specific policies and procedures underpinned by regulatory and compliance obligations 3.4 Compare the newly developed solutions to meet regulatory environments with financial plans to meet budgetary requirements for the design project
4. Complete legally binding agreements and document all procedures	4.1 Gather all reports and studies to support the design and construction activities and incorporate with final design 4.2 Diarise all activities for evidence of compliance with requirements in case of future actions 4.3 Ask relevant parties to sign legally binding documentation to fulfil obligations to access land or premises as required 4.4 Examine what alternative courses of action are available in case of dispute prior to or after an agreement is signed by all parties

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

© Commonwealth of Australia, 2025 Future Skills Organisation

Skill	**Performance Criteria**	**Description**
Reading	1.1-1.5, 2.1, 2.3, 3.2, 4.1, 4.4	• Selects, synthesises and critically evaluates complex and often technically complex texts, and integrates prior knowledge to improve understanding
Writing	1.1, 3.2, 3.3, 4.1, 4.2	• Integrates information and ideas from a range of sources, and documents these in a form appropriate to audience and context
Oral Communication	3.1, 3.2, 4.3	• Articulates clearly using specific and relevant language suitable to audience to convey requirements and listening and questioning techniques to confirm understanding
Numeracy	1.1, 1.3, 1.4, 3.1, 3.2, 3.4, 4.1, 4.2	• Collects, organises, interprets and communicates mathematical concepts embedded in data and information
Navigate the world of work	1.1-1.5, 2.1, 2.3,	• Recognises and responds appropriately within a complex regulatory environment and identifies issues that may have legal implications • Independently accesses a range of resources to acquire knowledge
Interact with others	2.2, 3.1, 4.3, 4.4	• Actively seeks a range of perspectives as part of work role • Anticipates possible sources of conflict, develops conflict resolution strategies and reflects on effectiveness of dispute resolution processes and actions.
Get the work done	1.1-1.5, 2.1-2.4, 3.1-3.4, 4.1-4.4	• Researches, plans, and manages complex tasks taking into account current and new technology, facilities and features when developing options • Analyses the impact of financial, regulatory, policy, procedures and other factors in planning, and utilises sophisticated problem-solving skills to assess conditions

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Requirements for ICTNPL411 Apply compliance requirements to telecommunications work

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- produce a detailed report from a design, identifying acts and codes of practice for each aspect of a project
- produce a report detailing common construction practices to mitigate the environmental impact of the project
- produce a summary report detailing a designer's and constructor's obligations regarding land access under the telecommunications act and code of practice.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise regulations, standards, legislation and codes of practice relevant to the telecommunications industry
- describe the impact of the following on telecommunications systems and installations:
  - Environmental Protection Authority and legislation
  - waterways and their responsibilities
  - national, state and council regulations
  - National Parks and Wildlife acts
  - ports authority
  - rail authority and their requirements
  - power distribution authority and requirements
  - roads authority
  - footpath allocations

© Commonwealth of Australia, 2025 Future Skills Organisation

- describe technical compliance requirements for the following:
  - separations and depth of cover
  - earth potential rise (EPR)
  - low frequency induction (LFI)
- describe the framework for the telecommunications industry including its various networks

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the Telecommunications – Network Planning field of work and include access to:

- relevant legislation
- planning processes and telecommunications industry Regulatory Accounting Framework (RAF)
- planning tools
- enterprise-specific investment management system (IMS)
- relevant databases
- licensing requirements
- relevant procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTNPL501 Develop planning strategies for core network design

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to develop specifications for core networks to be used by network designers.

It applies to technical officers or engineers from private and public organisations working in a network planning team, who combine technical skills with broader organisational skills to plan the various core network technologies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Network Planning

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Evaluate core network requirements and infrastructure capability	1.1 Estimate likely growth in core network use by analysing forecasting market intelligence data on customer demand 1.2 Analyse current traffic and growth trends in edge and backbone networks to forecast traffic growth and capacity demand for the core network 1.3 Compare available capacity, capability and parameters of current core

© Commonwealth of Australia, 2025 Future Skills Organisation

	infrastructure deployment against researched demand data to identify infrastructure shortfalls 1.4 Quantify network requirements for any upgrades or network augmentation 1.5 Determine relevant standards and regulatory requirements to be considered in core network planning 1.6 Formulate justification to proceed by analysing business requirements and benefits to the business
2. Prepare strategic plan and scoping document	2.1 Determine appropriate technologies and network elements for core network deployment, including new or alternative solutions to meet business requirements 2.2 Select commercially viable technology compatible with the existing network to deploy with existing and future network 2.3 Prepare a planning document, and supporting documentation with recommendations, that complies with deployment standards and regulatory requirements 2.4 Provide estimated costs and schedule for a planning solution
3. Produce project brief	3.1 Evaluate and summarise project scope into required briefing format with supporting documentation, that complies with core network deployment rules 3.2 Plan project delivery to suit business requirements and practical limitations 3.3 Produce core networks specifications with approvals and present to the design section to produce detailed design specifications

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	**Performance Criteria**	**Description**
Reading	1.1-1.3, 1.5, 1.6, 2.1-2.3	• Analyses and evaluates complex written and visual text in specialised workplace documentation to determine key information and specific requirements • Evaluates complex text to determine legislative, regulatory and project requirements
Writing	1.1-1.3, 1.6, 2.3, 2.4, 3.1-3.3	• Develops complex material for a specific

© Commonwealth of Australia, 2025 Future Skills Organisation

		audience using clear and detailed language and visuals while employing expected forms and conventions • Prepares reports which incorporate evaluation of information and specialised and cohesive language
Oral Communication	1.5, 2.3	• Clearly articulates requirements using language appropriate to audience and environment and participates in a verbal exchange of ideas and solutions
Numeracy	1.1-1.4, 1.6, 2.1, 2.2, 2.4	• Interprets numerical information and applies mathematical calculations relating to time durations and budgetary information • Analyses numerical information to measure usage and calculates metric measurements, quantities/ratios and financial data using appropriate tools
Navigate the world of work	1.5, 2.3	• Ensures knowledge of legislative requirements and products is kept up-to-date to provide accurate information • Takes full responsibility for following policies, procedures and legislative requirements, and identifies organisational implications of new legislation or regulations
Interact with others	3.3	• Implements strategies for a diverse range of colleagues and clients to build rapport and foster strong relationships
Get the work done	1.1, 1.2, 1.5, 1.6, 2.1, 2.2, 2.4, 3.2	• Accepts responsibility for planning and sequencing complex tasks and workload, negotiating key aspects with others, taking into account capabilities, efficiencies and effectiveness • Monitors progress of plans and schedules and reviews and changes them to meet new demands and priorities • Makes critical decisions quickly and intuitively in complex situations, taking into consideration a range of variables, including outcomes of previous decisions • Applies systematic and analytical decision-making processes for complex and non-routine situations

Assessment Requirements for ICTNPL501 Develop planning strategies for core network design

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- use data to accurately interpret growth patterns and develop options for core network designs which satisfy customer and enterprise financial goals
- develop a network plan which is current with emerging technologies
- produce specifications and costing
- document a project brief with accompanying project implementation documentation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the capability and limitations of the various core network technologies for present and future needs
- outline the following specific features of core network design:
  - elements and architecture of core networks
  - limits of a core network
  - typical core network technologies
- identify and describe elements and architectures of the various core technologies
- explain key technologies that make up the core network
- outline the following general features of core network design:
  - distribution structure of networks including backbone, core and edge
  - levels of reliability performance standards applicable to specific equipment deployment needs
  - network design including routing and redundancy

© Commonwealth of Australia, 2025 Future Skills Organisation

- standards and regulations.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the Telecommunications – Network Planning field of work and include access to:

- computer aided design (CAD)
- computer networks
- data for network planning
- network equipment deployment plans
- planning models
- relevant standards and regulations.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTNPL502 Develop planning strategies for access network design

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to develop specifications for access networks to be used by network designers, and involves gathering information on anticipated demand and business requirements for the access network to determine design criteria to meet current and future needs.

It applies to individuals with a high level of specialist technical skills and knowledge in telecommunications and IT networks using internet protocol (IP) systems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Network Planning

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Evaluate access network requirements and infrastructure capability	1.1 Estimate likely growth in access network use by analysing forecasting market intelligence data on customer demand 1.2 Compare available capacity and capability of current access infrastructure deployment against researched demand data to identify infrastructure and product shortfalls

© Commonwealth of Australia, 2025 Future Skills Organisation

	1.3 Quantify network requirements for upgrades or network augmentation to increase capacity and capability of existing network 1.4 Determine relevant standards, business and regulatory requirements to be considered in access network planning 1.5 Formulate justification to proceed by analysing business requirements and benefits to the business
2. Prepare strategic plan and scoping document	2.1 Determine appropriate technologies, network elements and equipment for access network deployment, including new or alternative solutions to meet business requirements 2.2 Select commercially viable technology compatible with the existing network to deploy with existing and future network 2.3 Prepare planning document and supporting documentation with recommendations that complies with deployment standards and regulatory requirements 2.4 Provide estimated costs and schedule for a planning solution
3. Produce project brief	3.1 Evaluate and summarise project scope into the required briefing format with relevant supporting documentation for a project brief that complies with access network deployment rules 3.2 Plan project delivery to suit business requirements and practical limitations 3.3 Produce access networks specifications with approvals and present to the design section to produce detailed design specifications

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	**Performance Criteria**	**Description**
Learning	2.1	• Employs a range of approaches and investigative techniques to consider present and future needs of the network and to overcome obstacles
Reading	1.1, 1.2, 1.4, 2.1, 2.2, 2.3, 3.1, 3.2	• Analyses and evaluates complex written and visual text in specialised workplace documentation to determine key information and specific requirements • Evaluates complex text to determine legislative, regulatory and project requirements

© Commonwealth of Australia, 2025 Future Skills Organisation

Writing	1.2, 1.5, 2.3, 3.1-3.3	• Develops complex material for a specific audience using clear and detailed language and visuals while employing expected forms and conventions • Prepares reports which incorporate evaluation of information and specialised and cohesive language
Oral Communication	1.4, 2.2, 3.1, 3.3	• Clearly articulates requirements using language appropriate to audience and environment, and participates in a verbal exchange of ideas and solutions
Numeracy	1.1-1.3, 1.5, 2.4	• Interprets numerical information and applies mathematical calculations relating to time durations and budgetary information • Analyses numerical information to measure usage and calculates metric measurements, quantities/ratios and financial data using appropriate tools
Navigate the world of work	1.4, 2.3	• Ensures knowledge of legislative requirements and products is kept up-to-date to provide accurate information • Takes full responsibility for following policies, procedures and legislative requirements and identifies organisational implications of new legislation or regulation
Get the work done	1.1, 1.2, 1.4, 1.5, 2.1-2.4, 3.1, 3.2	• Accepts responsibility for planning and sequencing complex tasks and workload, negotiating key aspects with others, taking into account capabilities, efficiencies and effectiveness • Monitors progress of plans and schedules, and reviews and changes them to meet new demands and priorities • Responds intuitively to problems requiring immediate resolution, drawing on past experiences to focus on the cause of a problem rather than the symptom • Applies systematic and analytical decision making processes for complex and non-routine situations

Assessment Requirements for ICTNPL502 Develop planning strategies for access network design

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- interpret growth patterns using available data
- develop options for access network design which satisfy customer and enterprise financial goals
- develop a clearly documented network plan, within specifications and including merging technological development and product implementation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain capability and limitations of the various access network technologies
- identify current equipment to meet future service obligations
- outline the role of the following specific features of network planning:
  - broadband networks
  - data networks
  - elements and architecture of the various access networks and their technologies
  - facilities and environmental issues
  - limits of a fixed access transmission network
  - media and content
  - regional and metropolitan network
  - typical access network technologies
  - voice networks
  - wireless network

© Commonwealth of Australia, 2025 Future Skills Organisation

- explain distribution structure of networks, including backbone, access and edge
- identify key technologies that make up the access network
- outline the following general features of network planning:
  - levels of reliability performance standards, applicable to specific equipment deployment needs
  - network design including routing and redundancy
  - standards and regulations
- describe typical problems and challenges with the capability and limitations of the various access networks.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the Telecommunications – Network Planning field of work and include access to:

ICTNPL503 Apply service measures and demand forecasting to products and services planning

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to analyse customer bases and market demands, and use forecasting tools to predict customer demands for new products and services.

It applies to technical staff moving into planning and management positions with a high level of specialist technical skills and knowledge in telecommunications and IT networks using internet protocol (IP) systems for small projects, or parts of larger projects.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Network Planning

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Analyse customer base	1.1 Establish reasons for forecasting in network planning, and factors that influence forecasting 1.2 Collate data from appropriate organisations involved in planning initiatives for planning delivery of products and services

© Commonwealth of Australia, 2025 Future Skills Organisation

	1.3 Establish market segmentation to improve marketing effectiveness on new technology adoption 1.4 Analyse market segments of customers, based on geography and demographics, for a new service or product and predict adoption rates
2. Evaluate current utilisation	2.1 Evaluate current service usage of the network and determine current traffic load 2.2 Evaluate current network occupancy and determine any spare capacity
3. Predict future customer base	3.1 Evaluate expected customer growth and segment mix in a defined geographical area, and assess impact on network planning 3.2 Use a forecasting model and predict customer demand for new technology products and services
4. Use property market and development data to produce plans	4.1 Develop strategic plans on infrastructure planning using planning authority data for development and redevelopments 4.2 Produce a plan for future development projects using property market data
5. Predict future service requirements	5.1 Create a customer service plan to maintain valuable customer relationships and strengthen business 5.2 Measure customer service results using key factors that provide an indicator for customer service quality 5.3 Use forecasting tools to predict future service demand and requirements for emerging technology services of Next Generation Networks (NGN)
6. Produce network forecast and documentation	6.1 Produce geographically-based network growth forecasts utilising change in customer base, changes to property market and future service predications 6.2 Produce and present documentation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	**Performance Criteria**	**Description**
Reading	1.1, 1.3, 1.4, 2.1, 2.2, 3.1, 4.1, 5.1, 5.2,	• Analyses and evaluates complex written and visual text in specialised workplace documentation to determine key information and

© Commonwealth of Australia, 2025 Future Skills Organisation

	6.1	specific requirements • Evaluates complex text to determine legislative, regulatory and project requirements
Writing	1.2-1.4, 4.1, 4.2, 5.1, 6.1, 6.2	• Develops complex material for a specific audience using clear and detailed language and visuals while employing expected forms and conventions • Prepares reports which incorporate evaluation of information and specialised and cohesive language
Oral Communication	1.1-1.4, 4.1, 5.1, 6.2	• Clearly articulates requirements using language appropriate to audience and environment and participates in a verbal exchange of ideas and solutions
Numeracy	1.2, 1.4, 2.1, 2.2, 3.1, 3.2, 4.1, 4.2, 5.2, 5.3	• Interprets numerical information and applies appropriate formula relating to time durations, budgetary information and different data • Analyses numerical information to measure present and predicted usage and calculates metric measurements, quantities/ratios and financial data using appropriate tools
Interact with others	5.1, 5.2	• Selects, implements and seeks to improve protocols governing communications to clients and co-workers in a range of work contexts • Implements strategies for a diverse range of colleagues and clients to build rapport and foster strong relationships
Get the work done	1.1, 1.3, 1.4, 2.1, 2.2, 4.1, 5.1, 5.3, 6.1	• Accepts responsibility for planning and sequencing complex tasks and workload, negotiating key aspects with others taking into account capabilities, efficiencies and effectiveness • Makes critical decisions quickly and intuitively in complex situations, taking into consideration a range of variables, including outcomes of previous decisions

© Commonwealth of Australia, 2025 Future Skills Organisation

		• Applies systematic and analytical decision-making processes for complex and non-routine situations • Investigates new and innovative ideas as a means to continuously improve, work practices and processes through consultation, formal and analytical thinking

Assessment Requirements for ICTNPL503 Apply service measures and demand forecasting to products and services planning

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- interpret accurately the growth patterns and development options which satisfy customer and enterprise financial goals
- predict future customer base and service requirements
- produce comprehensive network growth forecasts, utilising changes to customer base, property market and future service predictions.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain different levels of reliability performance standards applicable to specific equipment deployment needs
- identify and explain emerging technologies that affect this industry
- identify factors that can affect forecasting demand
- identify and apply forecasting models and forecasting tools
- explain market segmentations
- explain network designs and new products and services
- explain next generation network (NGN) services
- identify planning authorities
- describe planning initiatives
- describe the process to prepare and review customer bases
- identify different service measures.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the Telecommunications – Network Planning field of work and include access to:

- data from organisations involved in planning initiatives
- a range of software currently used in industry
- relevant regulations
- specifications that impact service measures and forecasting activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTNPL504 Develop planning strategies for building environment design

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to develop planning strategies for the design phase to meet present and future demands, and involves gathering information on network capability, anticipated network deployment demand and scoping design requirements to produce building planning specifications.

It applies to individuals with a high level of specialist technical skills and knowledge in telecommunications and IT networks using internet protocol (IP) systems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Network Planning

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Evaluate building environment requirements	1.1 Utilise network equipment deployment plans to convert network equipment specifications into building requirements data 1.2 Determine planned and forecast network equipment deployment locations and quantities to prioritise tasks 1.3 Formulate justification to proceed by analysing business

© Commonwealth of Australia, 2025 Future Skills Organisation

	requirements and benefits to the business 1.4 Analyse current building capacities or capabilities against planned deployment data to determine building environment shortfalls or additional needs 1.5 Determine minimum needs required to address identified building services shortfalls, upgrades or changes 1.6 Identify relevant standards, business and regulatory requirements that are essential for building plan compliance
2. Scope building design requirements	2.1 Quantify building requirements from known needs to determine if any standard deliverables can be used 2.2 Assess if requirements can be met using new or alternative solutions 2.3 Provide estimated costs and schedule to determine a planning solution 2.4 Prepare a scoping document and supporting documentation with recommendations that complies with deployment standards and regulatory requirements
3. Produce project brief	3.1 Prepare a project scope in required briefing format to present to the design section 3.2 Plan project delivery to meet any business timing and funding constraints 3.3 Produce building planning specifications with approvals and present to the building design section to be used for detailed design or construction specifications

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	**Performance Criteria**	**Description**
Reading	1.1-1.5, 1.6, 2.2, 2.4	• Analyses and evaluates complex written and visual text in specialised workplace documentation to determine key information and specific requirements • Evaluates complex text to determine legislative, regulatory and project requirements
Writing	1.3, 2.4, 3.1-3.3	• Develops complex material for a specific audience

Assessment Requirements for ICTNPL504 Develop planning strategies for building environment design

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- assess building environment requirements to provide network capability for current and forecast demand including consideration of merging technological development and product implementation
- prepare and present a detailed scoping document with solutions, costing and project scheduling recommendations
- meet forecast network capability needs and regulatory requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and discuss capability and limitations of the various network technologies to meet present and future needs
- describe different costing and funding models
- outline the process to review limits of a building's facilities and services
- identify network equipment requirements and use to derive building's specifications
- identify network building design
- identify and apply relevant regulations and standards
- discuss typical problems and challenges that describe the limitations of the various building projects work
- identify ways to remain abreast of current building requirements to meet future service obligations.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the Telecommunications – Network Planning field of work and include access to:

- computer aided design (CAD)
- computer networks
- data for network planning
- network equipment deployment plans
- planning models
- relevant standards and regulations.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTNPL601 Plan the development and growth of the telecommunications network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to analyse and evaluate forecast data to plan development and growth of the telecommunications network.

It applies to individuals with a high level of specialist technical skills and knowledge in optical telecommunications and IT networks using internet protocol (IP) systems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Network Planning

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Gather data related to existing and projected network usage	1.1 Access market intelligence for information on customer demand on the network and likely growth in network use 1.2 Obtain demand data to plan for potential network traffic quantity and flow 1.3 Access information relating to new and emerging technologies, facilities and features, and their specific applications

© Commonwealth of Australia, 2025 Future Skills Organisation

	1.4 Access relevant legislation and associated operational codes and analyse impact on planning processes
2. Assess need for network growth	2.1 Evaluate capacity of existing network to absorb planned growth using network capacity usage and traffic measurements 2.2 Plan likely timing of necessary network increments to minimise impact on the network 2.3 Assess use of new or alternate technologies to meet forecast growth
3. Develop network plans	3.1 Assess overall planning parameters including approved business plan prior to commencement of planning process 3.2 Analyse gathered information and produce a project plan with specifications to meet network growth 3.3 Conduct appropriate investment study including cost benefit analysis, where required, with consideration of barriers that may affect project plan 3.4 Produce a network plan with detailed specifications and seek approval according to enterprise procedures

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	**Performance Criteria**	**Description**
Reading	1.1-1.4, 2.3, 3.1, 3.3	• Analyses and evaluates complex written and visual text in specialised workplace documentation to determine key information and specific requirements • Evaluates complex text to determine legislative, regulatory and project requirements, and their potential impact on the project
Writing	3.1, 3.2, 3.4	• Develops complex material for a specific audience using clear and detailed language and visuals while employing expected forms and conventions • Prepares reports which incorporate evaluation of information and specialised and cohesive language
Oral	1.1, 1.3	• Clearly articulates requirements using language appropriate to audience and environment, and

© Commonwealth of Australia, 2025 Future Skills Organisation

Communication		participates in a verbal exchange of ideas and solutions
Numeracy	2.1, 2.2, 3.1, 3.2, 3.4	• Interprets numerical information and applies appropriate mathematical formulas to calculate different future possibilities • Analyses data to measure present and predicted usage and assess different scenarios
Navigate the world of work	1.4	• Ensures knowledge of legislative requirements and products is kept up-to-date to provide accurate information • Develops and implements strategies that ensures organisational policies, procedures and regulatory requirements are being met
Get the work done	1.1-1.4, 2.1, 2.3, 3.1-3.3	• Plans strategic priorities and outcomes within a flexible, efficient and effective context in a diverse environment exposed to competing demands • Gathers and analyses data and seeks feedback to improve plans and processes • Makes high-impact decisions in a complex and diverse environment, using input from a range of sources • Addresses complex problems involving multiple variables, using formal analytical, lateral thinking techniques experience and knowledge to focus in on the root cause • Uses digital technologies to manage business operations and actively investigates new technologies for strategic and operational purposes

Assessment Requirements for ICTNPL601 Plan the development and growth of the telecommunications network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- gather comprehensive data related to existing and projected network usage
- accurately assess need for network growth
- develop detailed network plans.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the following general processes of network growth:
  - cost estimates and operating budgets according to enterprise policy
  - project management theory, associated databases and project management software programs
  - telecommunications industry in Australia
- outline economic and political influences on public and commercial enterprises
- outline economic and political influences on public and commercial enterprises
- identify relevant financial authorities and delegations
- outline the influence of local and international economic conditions on the telecommunications industry
- describe typical challenges and limits facing technology today and consideration of future needs
- identify relevant legislation
- explain the process for collating and writing project briefs, reports and project charters.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the Telecommunications – Network Planning field of work and include access to:

- data from organisations involved in planning initiatives
- a range of software currently used in industry
- relevant regulations
- specifications that impact forecasting activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTNPL602 Forecast service demand

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to develop forecasts for demand for telecommunications services and includes assessing activities that may change service demand and capacity requirements.

It applies to individuals with a high level of specialist technical skills and knowledge in optical telecommunications and IT networks using internet protocol (IP) systems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Network Planning

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Gather forecast intelligence	1.1. Access market intelligence for information on customer demand on the network and likely growth in network use 1.2 Obtain demand data to assess potential network traffic quantity and flow 1.3 Access information relating to new and emerging technologies, facilities and features, and their specific applications to evaluate market trends in new technology implementation

© Commonwealth of Australia, 2025 Future Skills Organisation

	1.4 Obtain data from network analysis to determine the state of the existing network using customer complaint reports and network fault incidence rate
2. Produce forecast service demand information	2.1 Analyse and process all collated data and prepare to the format required for forecasting activity 2.2 Select and configure a suitable software forecasting tool to process collated data 2.3 Evaluate collated data to generate forecasts of service demand using information in reference to new developments 2.4 Compile forecast figures and report according to enterprise policy
3. Review forecasts and update systems records	3.1 Review forecasts according to enterprise policy 3.2 Ensure forecasts consider new developments in the area and technological changes where appropriate 3.3 Maintain updated systems records with information received from each installation amendment activity

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	**Performance Criteria**	**Description**
Reading	1.1-1.4, 2.1, 2.4, 3.1, 3.2	• Analyses and evaluates complex written and numerical text in specialised documentation to determine key information and specific requirements • Evaluates complex text to determine legislative, regulatory and project requirements and their potential impact on the project
Writing	2.4, 3.3	• Develops complex material for a specific audience using clear, detailed language and visuals while employing expected forms and conventions • Prepares reports which incorporate evaluation of information, and specialised and cohesive language
Oral Communication	1.1, 1.3	• Elicits views and opinions of others and obtains information by listening and questioning
Numeracy	1.4, 2.1-2.4, 3.3	• Interprets numerical information and applies

© Commonwealth of Australia, 2025 Future Skills Organisation

		appropriate mathematical formulas to calculate different future possibilities • Analyses data to measure present and predicted usage and assess different scenarios
Navigate the world of work	2.4, 3.1	• Monitors and reviews organisation's policies, procedures and adherence to legislative requirements to implement and manage change
Get the work done	1.1-1.4, 2.1-2.3, 3.2	• Plans strategic priorities and outcomes within a flexible, efficient and effective context in a diverse environment exposed to competing demands • Gathers and analyses data and seeks feedback to improve plans and processes • Addresses complex problems involving multiple variables, using formal analytical, lateral thinking techniques experience and knowledge to focus in on the root cause • Uses digital technologies to manage business operations and actively investigates new technologies for strategic and operational purposes

Assessment Requirements for ICTNPL602 Forecast service demand

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- collect accurate data vital to development of traffic and service variation
- generate relevant forecasts in relation to traffic and service variation using appropriate forecasting techniques
- accurately review forecasts relevant to specific planning periods.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and describe common telecommunications measurement quantities
- identify network and transmission equipment and describe their capabilities
- outline network topologies and common access and transmission hierarchies
- explain the configuration and use of software forecasting tools
- outline different forecasting techniques and sources of data to aid forecasting
- describe sources of market intelligence
- identify and describe new and emerging technologies
- outline typical customer applications and usage levels.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the Telecommunications – Network Planning field of work and include access to:

© Commonwealth of Australia, 2025 Future Skills Organisation

- data from organisations involved in planning initiatives
- a range of current software
- relevant regulations
- specifications that impact forecasting activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTNPL603 Undertake network performance analysis

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to undertake and manage monitoring, analysis and improvement of network performance, and involves analysing problems and organising repairs as well as coordinating software and hardware upgrades.

It applies to individuals with a high level of specialist technical skills and knowledge in optical telecommunications and IT networks using internet protocol (IP) systems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Network planning

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Analyse network performance to determine service levels	1.1 Establish network type and quality of service (QoS) standard levels required, in conjunction with equipment suppliers and customer opinion, to determine the benchmark for network performance standards 1.2 Analyse trend analysis data and statistical data to assess level and type of network degradation

© Commonwealth of Australia, 2025 Future Skills Organisation

	1.3 Conduct performance tests according to established performance checklist to systematically evaluate QoS levels using appropriate performance analysis tools 1.4 Analyse test results and determine QoS levels and network problems 1.5 Establish restoration times in the event of service breakdown 1.6 Determine, organise and allocate resources necessary to monitor service levels
2. Monitor integrity of the network	2.1 Monitor alarm panels and verify message retrieval system on an ongoing basis to maintain network integrity 2.2 Undertake real time analysis of data from all sources to determine network health
3. Manage delivery of quality service	3.1 Conduct monitoring activities to maintain QoS levels and network integrity 3.2 Analyse trouble reports and performance data including customer feedback on a regular basis as an indicator of network performance 3.3 Analyse drive test data as an input to performance and optimise the network to improve network level of service
4. Analyse problems and organise repair	4.1 Analyse performance results regularly and initiate investigations when performance levels are below specified standards and recommend network changes 4.2 Analyse causes of problems by testing specific network components 4.3 Isolate problems where possible and escalate repair according to enterprise policy 4.4 Undertake evaluation testing after repair to ensure the problem has been rectified
5. Coordinate upgrade of software and hardware	5.1 Develop strategies to affect changes according to recommendations and produce a plan to coordinate activities 5.2 Produce a cost estimate of proposed change and submit a cost-benefit study for approval 5.3 Confirm shortcomings in hardware and software and negotiate with planners for network modifications 5.4 Evaluate modifications to ensure network compatibility and use of appropriate protocols providing QoS in the network 5.5 Produce a plan for software and hardware changes to be initiated with minimum network downtime and customer impact 5.6 Undertake tests following upgrade to ensure the level of performance planned as a result of the upgrade has been achieved 5.7 Produce documentation including configuration details and tests results and submit to network planner

© Commonwealth of Australia, 2025 Future Skills Organisation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 1.6, 2.2, 3.1-3.3, 4.1	• Analyses and evaluates complex written and numerical text in specialised documentation to determine key information and specific requirements • Evaluates complex text to determine a plan to meet current and future needs
Writing	1.1, 1.6, 4.1, 5.1-5.3, 5.5, 5.7	• Develops complex material for a specific audience using clear and detailed language and visuals while employing expected forms and conventions • Prepares reports which incorporate evaluation of information, recommendations and specialised and cohesive language
Oral Communication	1.1, 1.6, 3.2, 4.1, 5.3	• Elicits views and opinions of others and obtains information by listening and questioning
Numeracy	1.2-1.5, 2.2, 3.2, 4.1, 5.2	• Interprets numerical information and applies appropriate mathematical formulas to calculate different future possibilities • Analyses data to measure present and predicted usage and assess different scenarios
Navigate the world of work	1.3, 4.3	• Develops and implements strategies that ensure organisational policies, procedures and regulatory requirements are being met • Ensures knowledge of legislative requirements and products is kept up-to-date to provide accurate information
Interact with others	1.1, 1.6, 3.2, 4.1, 5.3, 5.7	• Selects, implements and manipulates communications systems, processes and practices for maximum impact • Uses a variety of relevant communication tools and strategies in building and maintaining effective working relationships • Influences and fosters a collaborative culture facilitating a sense of commitment and

© Commonwealth of Australia, 2025 Future Skills Organisation

		workplace cohesion
Get the work done	1.1-1.6, 2.1, 2.2, 3.1-3.3, 4.1-4.4, 5.1, 5.3, 5.4, 5.6	• Plans strategic priorities and outcomes within a flexible, efficient and effective context in a diverse environment exposed to competing demands • Gathers and analyses data and seeks feedback to improve plans and processes • Makes high-impact decisions in a complex and diverse environment, using input from a range of sources • Addresses complex problems involving multiple variables, using formal analytical, lateral thinking techniques experience and knowledge to focus in on the root cause • Uses digital technologies to manage business operations and actively investigates new technologies for strategic and operational purposes

Assessment Requirements for ICTNPL603 Undertake network performance analysis

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- interpret current network performance data accurately
- monitor integrity of the network
- manage delivery of quality service efficiently
- conduct accurate performance tests using appropriate performance analysis tools
- analyse problems and organise repair applying escalation procedures, if required, within service assurance guidelines
- coordinate upgrade of software and hardware efficiently.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the process for cost estimation
- outline the following aspects of customer interaction:
  - customer policies
  - expectancies
  - service level agreements
- explain the following features of the network:
  - alarms
  - compatibility and interoperability
  - operations
  - performance analysis methodologies
  - performance analysis tools

© Commonwealth of Australia, 2025 Future Skills Organisation

  - performance tests
  - planning and design principles
- explain protocols providing QoS
- describe QoS standard levels
- describe software and hardware upgrades
- outline the following technologies and architectures:
  - switching network
  - transmission network
- describe technologies for the customer network.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the Telecommunications – Network Planning field of work and include access to:

- a site where network performance analysis may be conducted
- data from organisations involved in planning initiatives
- a range of current software
- relevant regulations
- specifications that impact service measures
- forecasting activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTNWK305 Install and manage network protocols

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to install and manage network protocols in a networking environment.

It applies to individuals with competent information and communications technology (ICT) skills, working as network administrators who are required to ensure that appropriate protocols have been installed in networks to allow user functionality and maintenance.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Networking

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Install and manage network protocols	1.1 Select, test and validate appropriate network protocol services 1.2 Design a network addressing system, with subnet and host IDs, including appropriate devices 1.3 Configure hosts and workstations to use IP addresses either manually or through automatic allocation of addresses, such as found with dynamic host configuration protocol (DHCP)
2. Identify network	2.1 Review a range of well-known network protocol applications

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
protocol applications	2.2 Evaluate client user requirement and recommend network protocol services 2.3 Apply internet protocol (IP) addressing scheme according to approved policy and procedures

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	2.2, 2.3	• Recognises and interprets textual information, including technical manuals, to establish the job requirements
Writing	2.2	• Uses specific and relevant language to document new file systems, user access and disaster recovery procedures
Oral Communications	2.2	• Articulates clearly using specific and relevant language suitable to audience to convey requirements • Uses listening and questioning techniques to confirm understanding
Navigate the world of work	2.3	• Complies with explicit organisational policies and procedures • Ensures knowledge of legislative requirements and products is kept up to date
Get the work done	1.1-1.3, 2.1	• Takes responsibility for planning and organising own workload, identifying ways of sequencing and combining elements for greater efficiency, and considering how to link with the work of others • Understands the purposes, specific functions and key features of common digital systems and tools, and operates them effectively to complete routine tasks • Initiates standard procedures when developing and refining configuration protocols

Assessment Requirements for ICTNWK305 Install and manage network protocols

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- configure, test and validate network protocols in order to facilitate interconnectivity
- install and manage network protocols in a network, and troubleshoot problems.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the client business domain, including client organisation structure and business functionality
- list current communications technologies and their associated protocols
- outline current industry accepted hardware and software products, and general features and capabilities
- summarise network protocols currently in use in the organisation and industry, including:
  - transmission control protocol
  - internet protocol (TCP/IP)
  - OSI models
- clarify the vendor product range and development directions
- describe how network protocols transcend organisational size and network complexity.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the network industry, and include access to:

© Commonwealth of Australia, 2025 Future Skills Organisation

- a live network
- application software and operating system
- appropriate learning and assessment support when required
- networked computers
- organisational guidelines
- technical documentation and installation manuals
- vendor software.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTNWK409 Create scripts for networking

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to undertake scripted programming tasks for networking related activities.

It applies to individuals with competent technical skills employed in network or systems administration roles.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Networking

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Develop algorithms to represent solutions to a given problem	1.1 Consult with client and key stakeholders to identify the problem and associated script requirements 1.2 Employ abbreviated software development cycle to script creation 1.3 Develop an algorithm to solve the problem and meet client requirements 1.4 Develop an algorithm which takes account of expected possible situations

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.5 Develop an algorithm which is guaranteed to end 1.6 Use structure, sequence, selection and iteration
2. Create code	2.1 Select appropriate scripting language 2.2 Demonstrate understanding and application of basic language syntax rules and best practices 2.3 Select and use language data types, operators and expressions to create clear and concise code 2.4 Use techniques of selection, iteration and sequence to control script execution flow 2.5 Use techniques for sequential file input and output to retrieve and store information 2.6 Obtain and use user input to affect the operation of the script 2.7 Apply internal document principles to created code 2.8 Follow organisational guidelines for developing maintainable code when creating scripts 2.9 Adhere to coding standards when creating scripts
3. Use operating system tools	3.1 Use searching and sorting tools to select information from the logging output of operating system (OS) 3.2 Implement controls to ensure that where significant events occur, script creates and maintains a log of operations via operating system logging mechanism 3.3 Register and run scripts with OS scheduling facility
4. Test and debug code	4.1 Engineer, document and conduct simple tests to confirm code meets design specification 4.2 Identify areas that are not covered or are covered incorrectly in the script 4.3 Take action to ensure that code complies with security policy 4.4 Take action to ensure that code operates with proper permissions 4.5 Use script debugging techniques suitable for use with scripting language to detect and resolve errors of syntactical, logical and design origin
5. Document script	5.1 Create technical-level documentation

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	5.2 Create user-level documentation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	2.8, 2.9, 4.3	• Recognises and interprets technical material, organisational policy and regulatory information to determine job requirements
Writing	2.7, 3.2, 4.1, 5.1, 5.2	• Prepares user, peer and technical documentation that communicates complex information clearly and effectively
Oral Communication	1.1, 2.6	• Uses listening and questioning skills to confirm understanding for requirements, participates in a verbal exchange of ideas/solutions and uses appropriate, detailed and clear language to address key personnel and to disseminate information
Navigate the world of work	2.8, 2.9, 4.3	• Recognises and follows explicit protocols and meets expectations associated with own role
Numeracy	1.3-1.5, 2.3	• Creates complex algorithms to calculate and process data for code creation
Get the work done	1.2, 2.1-2.5, 2.8, 3.1-3.3, 4.1, 4.2, 4.4, 4.5	• Uses logical planning processes and an increasingly intuitive understanding of context to identify relevant information to plan business requirements • Reflects on the ways in which digital systems and tools are used, or could be used, to achieve work goals and begins to recognise strategic and operational applications • Understands the key principles and concepts underpinning the design and operation of digital systems and tools, and applies these when troubleshooting existing technology • Seeks advice and feedback from client when making decisions • Applies formal problem solving processes when tackling an unfamiliar problem, breaking complex

© Commonwealth of Australia, 2025 Future Skills Organisation

		issues into manageable parts and identifying and evaluating options

Assessment Requirements for ICTNWK409 Create scripts for networking

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop an algorithmic statement of a solution for a set process
- design, document, construct and test a small single purpose operating system (OS) utility application in response to a problem description
- create scripted programs that access information stored in files on the system and use system utility programs to sort or find information within these files
- validate and record script results.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise the principles of algorithm design
- identify and describe operating system components and processes, including:
  - command line interface
  - log files
  - program scheduling utilities
  - development methodologies
  - tools and utilities
  - testing methods
- explain debugging for a variety of scripting scenarios
- outline programming structured control constructs: sequence, selection and iteration
- summarise scripting techniques and language syntax.

ICTNWK410 Install hardware to a network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to plan, manage and install new hardware components in a network.

It applies to individuals employed in technical information and communications technology (ICT) support roles, such as network administrators, who support network hardware in a peer-to-peer or client-server networked environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Networking

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Determine network hardware requirements	1.1 Assess client network hardware and cabling requirements, considering compatibility with existing application software and operating system 1.2 Analyse requirements against local area network (LAN), wide area network (WAN), wireless networks, and mobile equipment access design limitations and organisational guidelines 1.3 Evaluate client requirements according to organisational guidelines, corporate purchasing procedures, licensing

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	arrangements and budget
2. Obtain network hardware	2.1 Contact vendors and obtain technical specifications 2.2 Evaluate or test hardware according to client requirements and organisational guidelines 2.3 Document recommendations and provide copies to appropriate person 2.4 Determine and document licensing requirements and security issues 2.5 Acquire hardware according to recommendations and organisational procedures 2.6 Organise cabling infrastructure where required
3. Install network hardware	3.1 Conduct installation with minimal disruption to clients 3.2 Install hardware according to appropriate installation procedures 3.3 Configure and test the installation to ensure that it meets client needs
4. Provide instruction and support for installed products	4.1 Determine and document client instructions and needs 4.2 Provide one-to-one or group instruction to client and users as required 4.3 Obtain client evaluation and feedback to ensure that client requirements have been met

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 2.2, 2.5	• Recognises and interprets licensing and security issues, technical information and organisational procedures to determine job requirements
Writing	2.4, 4.1	• Prepares information which incorporates evaluation of information and specialised and cohesive language in a format and style appropriate to a specific audience

© Commonwealth of Australia, 2025 Future Skills Organisation

Oral Communication	2.1, 2.3, 4.1-4.3	• Uses listening and questioning skills to confirm understanding for requirements • Participates in regular verbal exchanges and uses appropriate, detailed and clear language to address key personnel and to disseminate information
Numeracy	1.3	• Uses mathematical formulas and calculations to estimate and plan costs according to business budgets
Navigate the world of work	1.2, 1.3, 2.4, 2.5	• Appreciates the implications of legal and regulatory responsibilities related to own work
Get the work done	1.1-1.3, 2.2, 2.5, 2.6, 3.1- 3.3	• Determines job priorities, resources and equipment, and works logically and systematically to maintain the continuity of network operations and business functions during network installation tasks • Understands the purposes, specific functions and key features of common digital systems and tools, and operates them effectively to complete routine tasks • Recognises and responds to predictable routine problems related to own role in the immediate work context • Automatically implements standard procedures for routine decisions

Assessment Requirements for ICTNWK410 Install hardware to a network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- evaluate client user requirements and hardware installation
- install a range of network hardware by planning, managing and supporting the installation of new components in a network, according to organisational policies and procedures.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise current industry, data and voice networking, security products, devices and procedures, including:
  - current industry accepted network protocols
  - organisational contracting procedures and responsibilities
  - system diagnostic software
- outline current industry accepted network hardware and software products
- explain hardware and software installation procedures
- describe local area network (LAN) capabilities and characteristics, such as network type, internet protocol (IP) addressing, switch or hub operation
- describe various features of network connections, including types of cables, cabling distance limitations and wireless connections
- outline operating systems sufficient to enable basic installation
- summarise set-up and configuration procedures
- describe software packages supported by the organisation.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the network industry, and include access to:

- vendor hardware and software components
- application software and operating system
- hardware maintenance tools
- a live network
- networked computers
- organisational guidelines
- technical documentation and installation manuals.

Assessors must satisfy NVR/AQTF assessor requirements.

ELEMENT	PERFORMANCE CRITERIA
	guidelines, corporate purchasing procedures and budget
2. Obtain deployment software to automate deployment	2.1 Evaluate deployment software according to client requirements and organisational guidelines 2.2 Contact vendors and obtain technical specifications, including support arrangements and licensing 2.3 Acquire software and licences according to organisational procedures 2.4 Store software licences and manuals according to organisational guidelines
3. Automate installation of operating system via network	3.1 Plan and deploy operating system according to appropriate vendor installation procedures, with minimal disruption to network and clients 3.2 Configure and test installation to ensure that it meets client needs and vendor specifications 3.3 Install updates and patches
4. Automate installation of software packages via network	4.1 Plan and deploy software packages according to appropriate vendor installation procedures, with minimal disruption to network and clients 4.2 Configure and test installation to ensure that it meets client needs and vendor specifications 4.3 Install updates and patches
5. Test and sign off	5.1 Test installed operating system and software for error-free performance, identifying and resolving problems 5.2 Determine and document security and licensing issues 5.3 Obtain client evaluation and feedback to ensure that client requirements have been met

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.4, 2.1, 2.3, 2.4,	• Recognises and interprets technical, licensing

© Commonwealth of Australia, 2025 Future Skills Organisation

	3.1, 3.2, 4.1, 4.2	and organisational information to determine business requirements
Writing	1.3, 5.2	• Develops material for a specific audience, using clear and detailed language in order to convey explicit information
Oral Communication	2.2, 5.3	• Uses active listening, observational and questioning techniques in order to identify information and confirm, clarify or revise understanding • Uses specific and relevant language to obtain information to determine job requirements
Numeracy	1.4	• Uses mathematical formulas and calculations to estimate and plan costs according to business budgets
Navigate the world of work	1.1, 1.3, 1.4, 2.1-2.4, 5.2	• Appreciates the implications of legal and regulatory responsibilities related to own work
Get the work done	1.1-1.4, 2.1, 2.3, 2.4, 3.1-3.3, 4.1-4.3, 5.1	• Determines job priorities, resources and equipment, and works logically and systematically • Understands the purposes, specific functions and key features of common digital systems and tools, and operates them effectively to complete routine tasks • Uses analytical processes to respond to deployment and configuration issues in the immediate work context • Automatically implements standard procedures for routine decisions

Assessment Requirements for ICTNWK411 Deploy software to networked computers

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify client software requirements
- plan and deploy automatic installation of operating system and software
- configure and test installation, ensuring client needs are met.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise network protocols and operating systems, including:
  - transmission control protocols (TCP)
  - internet protocols (IPs)
  - network applications
- describe organisational contracting procedures and responsibilities
- outline software licensing requirements and documentation
- explain current industry standards related to software deployment, including:
  - deployment software configuration
  - configuration of automated deployment processes
  - operating system deployment
  - software package deployment
  - troubleshooting deployment processes.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the network industry, and include access to:

- a site or prototype where deployment processes may be implemented
- a live network
- software tools to support implementation of deployment processes
- technical documentation and installation manuals
- organisational guidelines.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTNWK416 Build security into virtual private networks

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to build security into a virtual private network (VPN).

It applies to individuals with competent information and communications technology (ICT) skills and who are working in the network area and are required to ensure that VPNs contain required security.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Networking

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Configure router to provide for network security monitoring and management	1.1 Create and apply audit rules consistent with policies, standards, protocols and management systems 1.2 Configure router to provide appropriate level of asset security and monitoring of security consistent with commercial and business requirements 1.3 Monitor and manage system to assess the level of security and attempts to breach security of framework components 1.4 Employ appropriate hardware and software to monitor and

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	address security issues and provide VPN solutions
2. Secure a site-to-site VPN	2.1 Configure internet key exchange (IKE) and internet protocol security (IPSec) 2.2 Configure site-to-site IPSec VPN using pre-shared keys 2.3 Configure site-to-site IPSec VPN using digital certificates
3. Secure a remote access VPN	3.1 Configure a VPN server 3.2 Install and administer a router management console 3.3 Develop documentation on current system settings and framework components, and file securely for future reference

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1	• Gathers, interprets and analyses current industry rules from a range of sources and identifies relevant and key information
Writing	1.1, 3.3	• Prepares workplace documentation that incorporates an evaluation of information and specialised and cohesive language in a format and style appropriate to a specific audience
Navigate the world of work	1.1	• Recognises and follows explicit and implicit protocols, and meets expectations associated with own role
Get the work done	1.2-1.4, 2.1-2.3, 3.1-3.3	• Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context to identify relevant information and risks • Understands the importance of secure information in relation to own work and takes personal responsibility for identifying and managing risk • Understands the purposes, specific functions and key features of common digital systems and tools, and operates them effectively to complete routine tasks • Initiates standard procedures when responding to

Assessment Requirements for ICTNWK416 Build security into virtual private networks

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- configure a router to provide the required security
- implement and maintain security functionality for a virtual private network (VPN), including:
  - site to site VPN
  - remote access VPN
- produce security documentation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the characteristics of a VPN system, including:
  - site to site
  - remote access systems
  - network protocols and operating systems relevant to VPN, including its features, issues and functions
- describe the security requirements for a VPN, including:
  - auditing and penetration testing techniques
  - configuration of routers and switches
  - security protocols, standards and data encryption
  - processes and techniques related to security perimeters and their functions
  - security threats, including eavesdropping, data interception, data corruption and data falsification

© Commonwealth of Australia, 2025 Future Skills Organisation

    - transmission control protocol or internet protocol (TCP/IP) protocols and applications audit and intrusion detection systems
    - authentication issues
- recognise and describe the differences between common networks, including:
    - local area network (LAN)
    - wireless local area network (WLAN)
    - wide area networks (WAN)
- identify and describe organisational issues surrounding:
    - security cryptography
    - screened subnets
    - virus detection software.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the network industry, and include access to:

- network technical requirements
- network infrastructure, including servers and security hardware and software.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTNWK417 Build an enterprise wireless network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to build an enterprise, community or mesh wireless network within and outside buildings.

It applies to individuals with excellent task management, interpersonal and information and communications technology (ICT) skills working in senior design roles in the networking area, who are required to develop complex wireless networks for organisations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Networking

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Confirm client requirements and network equipment required	1.1 Identify and clarify organisational requirements of the client 1.2 Evaluate client requirements along with business needs in order to translate into technical requirements 1.3 Review existing network design documentation to ensure it is authorised, current and complete 1.4 Identify network topology 1.5 Identify the components required to be installed to meet the

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	technical requirements 1.6 Contact vendors and service suppliers to obtain specifications and availability of identified components 1.7 Ensure preliminary work is completed within the required timeframe
2. Prepare for installation	2.1 Ensure client and users are aware of date and time of installation 2.2 Gather, prepare and check installation and safety equipment 2.3 Assess on-site safety arrangements for installers and users
3. Select, install and configure access points and other wireless devices	3.1 Select appropriate hardware based on identified components 3.2 Install and configure hardware to provide wireless access to network 3.3 Ensure connections are secured against intrusion or data access by unauthorised persons, are safe for users, and are protected from the environment 3.4 Configure security, monitoring, logging and quality of service features consistent with standards and protocols 3.5 Ensure test equipment is calibrated 3.6 Test wireless network systems performance and verify that it meets enterprise requirements and is consistent with standards and protocols
4. Select, install and configure antennas	4.1 Select appropriate antennas based on design plan 4.2 Safely install and configure antennas to provide wireless access to network 4.3 Measure and assess signal strength within and outside building 4.4 Resolve and report radio frequency interference issues
5. Select, install and configure antennas	5.1 Identify possible security threats to assets 5.2 Configure client server and helper security devices 5.3 Configure associations and filters
6. Train users	6.1 Provide training for users to establish and manage network connections 6.2 Resolve pairing and log-on difficulties for users 6.3 Inform users of wireless network etiquette and traffic

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	capacity issues 6.4 Advise users of help desk contact details
7. Monitor and administer wireless network	7.1 Monitor wireless network performance using diagnostic tools, including appropriate software 7.2 Debug networking issues to maintain trouble-free wireless connection 7.3 Document current settings and store securely, consistent with commercial and business requirements
8. Finalise build process	8.1 Review network for performance issues, planned maintenance or upgrade requirements 8.2 Report to client with network documentation and recommendations for performance issues 8.3 File documentation according to organisational guidelines

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 1.3, 1.5, 3.4, 3.6, 4.1, 8.3	• Gathers, interprets and analyses information from a range of sources and identifies relevant and key information
Writing	4.4, 7.3	• Prepares workplace documentation that incorporates an evaluation of information and specialised language in a format and style appropriate to a specific audience
Oral Communication	1.1, 1.2, 1.6, 2.1, 4.4, 6.1, 6.3, 6.4, 8.2	• Uses active listening and observational and questioning techniques to identify information and confirm, clarify or revise understanding • Articulates requirements and strategies clearly and distinctively, using technical language appropriate to audience and environment
Numeracy	3.5, 4.3	• Interprets numerical information to calibrate equipment and measure and assess signal strength

© Commonwealth of Australia, 2025 Future Skills Organisation

Navigate the world of work	8.3	• Complies with explicit organisational policies and procedures
Interact with others	6.1, 6.3, 6.4, 8.2	• Recognises and applies the protocols governing what to communicate, with whom and how in a range of different contexts
Get the work done	1.4, 1.5, 1.7, 2.2, 2.3, 3.1-3.6, 4.1, 4.2, 4.4, 5.1-5.3, 6.2, 7.1-7.3, 8.1, 8.3	• Uses a combination of formal, logical planning processes to ensure work is completed according to time constraints and an increasingly intuitive understanding of context to identify relevant information and risks • Understands the importance of secure information in relation to own work and takes personal responsibility for identifying and managing risk • Understands the purposes, specific functions and key features of common digital systems and tools, and operates them effectively to complete routine tasks • Initiates standard procedures when solving a broad range of ICT problems • Uses familiar digital systems and tools to access, organise, analyse and store information

Assessment Requirements for ICTNWK417 Build an enterprise wireless network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- confirm client organisational and business requirements
- determine hardware and software requirements
- prepare for safe installation
- select, install and configure required wireless hardware
- train users
- test, monitor, and administer the installation
- finalise installation and prepare required documents documentation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- Identify and describe current wireless local area network (WLAN) and wireless area network (WAN) solutions, including:
  - audit and intrusion detection systems
  - auditing and penetration testing techniques
  - bandwidth and quality of service
  - factors affecting signal quality
  - layer 2 and layer 3 design issues
  - suitability for small office home office (SOHO) and enterprise local area networks (LANs)
  - transmission control protocols or internet protocols (TCPs/IPs) and applications
  - wireless topologies

© Commonwealth of Australia, 2025 Future Skills Organisation

- describe the common features of security threats and how to develop a security strategy, including:
  - security protocols
  - standards
  - data encryption
- identify and describe common network protocols and operating systems.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the network industry, and include access to:

- technical requirements
- network infrastructure, including wireless hardware and software.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTNWK419 Identify and use current virtualisation technologies

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to use virtualisation technology, according to the industry standards for reviewing and demonstrating work processes, skills and techniques to ensure that the quality of the entire business process is maintained at the highest level possible through the appropriate application of virtualisation technology.

This unit applies to individuals engaged in ongoing review and research who review, and maintain, business processes at the highest level possible.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Networking

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to use virtualisation technologies	1.1 Identify the enterprise requirements, and determine the need for desktop virtualisation software 1.2 Identify the virtualisation vendors and the different types of virtualisation technology that they offer 1.3 Identify, review and select the desktop virtualisation software, where appropriate

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.4 Select suitable desktop virtualisation software
2. Use desktop virtualisation software to assist in solving organisational problems	2.1 Test the desktop virtualisation software 2.2 Use the features and functions of desktop virtualisation software in an organisational context, in line with environmental factors 2.3 Demonstrate an in-depth of knowledge of desktop virtualisation technologies, to an accepted industry standard 2.4 Access and use, the sources of information relating to desktop virtualisation technology
3. Evaluate the desktop virtualisation software performance	3.1 Review the effect of desktop virtualisation software on benefits to the enterprise 3.2 Seek feedback from users, where appropriate, and update the desktop

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.3, 1.4, 2.4, 3.1	• Critically analyses documentation from a variety of sources and records, and consolidates information, to determine requirements
Writing	3.2	• Writes, edits and proofreads documents to ensure clarity of meaning, and the accuracy and consistency of information
Oral Communication	3.2	• Uses specific and relevant language to clearly describe and explain, a range of technical, operational and business-related matters, with internal and external personnel
Navigate the world of work	1.1, 2.2	• Identifies, and acts on, issues that contravene relevant policies, procedures and legal requirements • Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements
Interact with	3.2	• Selects and uses, the appropriate conventions and protocols when communicating with clients and

© Commonwealth of Australia, 2025 Future Skills Organisation

others		co-workers, in a range of work contexts
Get the work done	1.1-1.4, 2.1, 2.2, 2.3, 3.1	• Takes responsibility for planning, sequencing and prioritising tasks and own workload, for efficiency and effective outcomes • Makes routine decisions and implements standard procedures for routine tasks, using formal decision-making processes, for more complex and non-routine situations • Contributes to the continuous improvement of current work practices, by applying basic principles of analytical and lateral thinking

Unit Mapping Information

Assessment Requirements for ICTNWK419 Identify and use current virtualisation technologies

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify current new, and emerging, virtualisation technology
- identify and use, the features and functions of industry-specific virtualisation technologies
- review and evaluate the virtualisation software.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe current technology trends, and directions, in information and communications technology (ICT), specifically in the major industry technology standards used in virtualisation technology
- recognise the vendor product directions relating to virtualisation technology
- outline current industry hardware and software products, and their general features, capabilities and application
- recognise information-gathering techniques
- describe the environmental and sustainability policies of the workplace
- identify the features of virtualisation technology
- recognise how to test, and evaluate, virtualisation technology
- locate the appropriate sources of information regarding virtualisation technology.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the network industry, and include access to:

© Commonwealth of Australia, 2025 Future Skills Organisation

- a site where industry-specific technologies may be used
- industry-specific technologies currently used in the industry
- documents detailing work health and safety (WHS) standards, environmental guidelines, and enterprise requirements
- the virtualisation software.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTNWK420 Install and configure virtual machines

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Application

This unit describes the skills and knowledge required to select and implement virtualisation solutions to meet organisational needs in an information and communications technology (ICT) environment.

It applies to individuals who work in the network area of organisations and are responsible for the virtualisation of desktop and server operating systems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Networking

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify options and select virtualisation solution	1.1 Research and determine government and industry guidelines and policies for use of desktop and server virtualisation 1.2 Determine and document current and future requirements of organisations based on guidelines, policies and organisational structure 1.3 Identify benefits and detriments of virtualisation of desktop and server environments relevant to needs of organisation 1.4 Identify available features of current virtualisation software

© Commonwealth of Australia, 2025 Future Skills Organisation

	relevant to needs of organisation 1.5 Select virtualisation solutions based on current and future needs of organisation 1.6 Seek and obtain feedback on selected virtualisation solution from organisation and incorporate feedback into selected virtualisation solutions
2. Prepare for, install and configure virtualisation technology	2.1 Identify, clarify and document technical requirements of organisation relating to virtualisation technologies including virtual machines, virtual networks, and virtualisation software 2.2 Identify and document hardware, software, network, and infrastructure components required to be installed and configured to meet technical requirements 2.3 Seek and obtain feedback on technical requirements and documented components from organisation and incorporate feedback into technical requirements and documented components 2.4 Install and configure software to provide support for virtualisation of desktop and server operating systems according to technical requirements 2.5 Configure virtualisation software application features to accommodate required functionality according to organisational needs
3. Install, configure and test virtual machines	3.1 Install and configure virtual machines according to technical requirements 3.2 Install and configure virtual networks according to technical requirements 3.3 Test functionality of installed virtual machines and virtual networks against technical requirements and rectify errors

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	**Description**
Reading	• Recognises and interprets industry and government guidelines to determine organisational requirements
Oral Communication	• Elicits information and organisational needs by using listening and questioning techniques

© Commonwealth of Australia, 2025 Future Skills Organisation

Navigate the world of work	• Complies with explicit organisational policies and procedures
Get the work done	• Determines job priorities, resources and equipment, and works logically and systematically to undertake clearly defined and familiar tasks • Takes responsibility for routine decision making by selecting from a range of predetermined options in routine situations, identifying and taking some situational factors into account • Initiates standard procedures when adapting configuration procedures, depending on differing operational contingencies, risk situations and environments • Understands key principles and concepts underpinning the design and operation of digital systems and tools, and applies these when troubleshooting existing technology and when seeking to understand the potential impact of new technology • In familiar contexts, responds promptly and intuitively to problems involving virtualised machine environments requiring immediate attention

Assessment Requirements for ICTNWK420 Install and configure virtual machines

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit; including evidence of the ability to:

- Identify one virtualisation solution for the organisation including the identification of applicable guidelines or policies, benefits and detriments and currently available software
- Interpret organisational needs to determine technical requirements of virtualisation solution once
- Install and configure virtualisation software to accommodate organisational needs once
- Install, configure, and test the functionality of two virtual machines, including evidence of the ability to:
  - backup virtual machine state on shutdown
  - restore virtual machine state on start up
  - backup and restore a virtual hard drive and software configuration files for virtual machine
- Configure and test the functionality of a virtual network for the two virtual machines, including the ability to:
  - configure internet protocol (IP) addresses to match selected network configuration
  - configure virtual network as host only, bridged, and network address translation (NAT) configurations
  - configure services to operate under current network configuration

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

- Government and industry policies and guidelines related to virtualisation
- Technologies and processes relating to virtualisation
- Tools and software applications for virtual machine management
- Configuration of software applications required to manage virtual machines

© Commonwealth of Australia, 2025 Future Skills Organisation

- Configuration requirements for the integration of virtual machines into an existing network design

Assessment Conditions

Skills must be demonstrated in a workplace or simulated environment where conditions are typical of those in an ICT working environment or ICT workplace. This includes:

- Site or prototype where virtual machine environments are to be implemented
- Information relating to organisational policies and procedures and structures
- Current and future user needs relating to desktop and server environments
- Network technical requirements
- Networked computers
- Individual user to clarify and confirm requirements
- Software to support implementation of virtual machines.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

ICTNWK421 Install, configure and test network security

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Application

This unit describes the skills and knowledge required to install, configure and test network security in an organisational environment.

It applies to individuals who are involved in the installation, configuration, and testing of network security for networks of any size in job roles including network administrator, penetration tester, and security consultant.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Networking

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Assess network security threats and vulnerabilities	1.1 Review current system security against organisational asset security requirements to identify security threats and vulnerabilities 1.2 Analyse network, software, hardware and system security threats and vulnerabilities to prioritise deficiencies to be addressed 1.3 Make recommendations to management to address security deficiencies according to organisational asset security

© Commonwealth of Australia, 2025 Future Skills Organisation

	requirements
2. Implement countermeasures for identified threats and vulnerabilities	2.1 Implement required level of perimeter security to meet organisational asset security requirements and according to identified threats and vulnerabilities 2.2 Assess and implement server and network hardening techniques and measures 2.3 Implement secure authentication and user account controls to secure data integrity and transmission
3. Test and verify functionality and performance of countermeasures implemented	3.1 Design function and performance test items to verify key functions and performance of countermeasures 3.2 Conduct function and performance tests to modify and debug countermeasures 3.3 Develop documentation on the current system settings and file according to organisational guidelines
4. Maintain and improve network security	4.1 Review logs and audit reports to identify and record security incidents, intrusions and attempts 4.2 Carry out spot checks and audits to ensure that procedures are not being bypassed 4.3 Document newly discovered security threats vulnerabilities and recommendations in a report for presentation to superior to gain approval recommendations to be implemented

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	**Description**
Reading	• Recognises and interprets textual information to determine specific information about security incidents
Writing	• Accurately records test results and develops material for a specific audience, using clear and detailed language in order to convey explicit information
Oral Communication	• Articulates information clearly, using specific and relevant language suitable to audience to convey recommendations and provide verbal reports • Uses listening and questioning techniques to confirm understanding

© Commonwealth of Australia, 2025 Future Skills Organisation

Numeracy	• Extracts and evaluates the mathematical information embedded in tasks and texts
Get the work done	• Determines job priorities, resources and equipment, and works logically and systematically to undertake clearly defined and familiar tasks • Understands the purposes, specific functions and key features of common digital systems and tools, and operates them effectively to complete routine tasks • Recognises and responds to predictable routine problems related to own role in the immediate work context, including detecting intrusion and debugging the system when required

Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit; including evidence of the ability to:

- With respect to one network:
  - identify and analyse network security threats and vulnerabilities
  - make recommendations to management to address network security deficiencies and fulfil organisational asset security requirements
  - implement perimeter security, network hardening measures and authentication and user account controls according to identified deficiencies and organisational asset security requirements
  - design and conduct testing to verify the key function and performance measures of network security
  - debug network security according to test results
  - review logs and audit reports to identify and record five security incidents, intrusions and attempts
  - undertake three spot checks and audits to ensure that procedures are not being bypassed
  -

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

- Security requirements of the organisation, including:
  - organisational structure and functions
  - features and capabilities of networking technologies
  - privacy issues and privacy legislation
  - security information sources
  - risk analysis

© Commonwealth of Australia, 2025 Future Skills Organisation

- Virtual private network (VPN) issues, including bandwidth and dynamic security environment
- Configuration of routers and switches
- Current hardware and software security products, including general features and capabilities
- Function and operation of VPN concepts including encryption, firewalls, packet tunnelling, and authentication
- Network protocols and operating systems
- Security perimeters and functions
- Security protocols, standards and data encryption
- Security threats including eavesdropping, data interception, data corruption and data falsification
- Types of VPNs including site-to-site and user-to-site internet traffic and extranets
- Systems and procedures related to:
  - audit and intrusion detection systems
  - auditing and penetration testing techniques
  - cryptography
  - local area network (LAN), wireless local area network (WLAN) and wide area network (WAN)
  - screened subnets
  - transmission control protocol, internet protocol (TCPs/IPs), and applications
  - virus detection software

Assessment Conditions

Skills must be demonstrated in a workplace or simulated environment where conditions are typical of those in an ICT working environment or ICT workplace. This includes:

- Site where secure network installation, configuration, and monitoring may be conducted
- Network security documentation
- Organisational asset security requirements and information on organisational structure and functions
- Equipment specifications
- Network components
- Testing software
- Individual manager in the organisation
- Firewalls (hardware and software)
- Live network
- Networked (LAN) computers
- WAN service point of presence

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

ICTNWK502 Implement secure encryption technologies

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to ensure secure file encryption is selected, implemented and monitored on a computer network or local environment.

It applies to individuals working as information and communications technology (ICT) professionals who may select, implement and monitor a secure encryption environment in any size enterprise.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Networking

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Determine encryption methods	1.1 Analyse enterprise data security requirements 1.2 Create a new or review an existing security plan to determine appropriate encryption methods 1.3 Review a range of encryption technologies and rank the most appropriate options 1.4 Assess the costs associated with each encryption option 1.5 Document encryption options and costs, and forward to

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	appropriate person for decision
2. Implement encryption	2.1 Apply encryption technologies to the enterprise system 2.2 Analyse effect of encryption technologies on user roles and responsibilities 2.3 Inform user of new encryption technologies and the effect it has on their responsibilities
3. Monitor encryption	3.1 Analyse implementation of the encryption technologies, confirming function and performance 3.2 Review help desk records for problems concerning implementation and take appropriate action 3.3 Review system logs for encryption issues and compromises 3.4 Document encryption issues and compromises, and notify appropriate person

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 3.2	• Gathers, interprets and analyses technical data to determine security requirements and help desk records to interpret technical compromises
Writing	1.1, 1.3, 1.5, 3.4	• Prepares workplace documentation that incorporates an evaluation of technical information and specialised and cohesive language in a format and style appropriate to a specific audience
Oral Communication	2.3, 3.4	• Articulates requirements and responsibilities clearly and distinctively, using technical language appropriate to audience and environment
Numeracy	1.4	• Uses mathematical formulas and calculations to undertake a cost-benefit analysis
Navigate the world of work	1.1	• Recognises and follows explicit and implicit protocols, and meets expectations associated with own role
Interact with	1.5	• Selects the appropriate form, channel and mode of

© Commonwealth of Australia, 2025 Future Skills Organisation

others		communication for a specific purpose relevant to own role
Get the work done	1.3, 2.1, 2.2, 3.1-3.3	• Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context to determine data security threats, risks and countermeasures • Manages and maintains data securely and actively monitors technology, notifying others if security becomes compromised • Understands the purposes, specific functions and key features of common digital systems and tools, and operates them effectively to complete routine tasks • Initiates standard procedures when responding to familiar problems to troubleshoot, debug and correct connectivity and security issues

Assessment Requirements for ICTNWK502 Implement secure encryption technologies

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- analyse enterprise data security requirements
- create or review existing security plan to determine the appropriate encryption methods
- rank and document appropriate encryption methods
- implement encryption systems and inform users of any impacts
- monitor and document encryption issues and compromises, and notify appropriate person.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain certificate related infrastructure (certificate authorities, registration authorities, repository services)
- summarise common asymmetric key algorithms and their usage
- explain common symmetric key algorithms and their usage, such as:
  - advanced encryption standard (AES)
  - data encryption standard (DES)
  - triple data encryption algorithm (triple DES)
  - Blowfish
- explain encryption strength
- summarise various encryption types, including public key, secret key, hash key
- summarise the functions and features of:
  - access control permissions
  - digital signatures
  - symmetric encryption, asymmetric encryption and one-way encryption

© Commonwealth of Australia, 2025 Future Skills Organisation

  - timestamps
- explain one-way message digests, such as message digest algorithm 5 (MD5) and secure hash algorithm (SHA)
- explain public key infrastructure (PKI), pretty good privacy (PGP) and GNU Privacy Guard (GnuPG)
- outline replay security
- outline possible sources of security threats, including eavesdropping, data interception, data corruption, data falsification and authentication issues
- explain transmission control protocol or internet protocol (TCP/IP) protocols and applications
- summarise security problems and challenges that arise from organisational issues
- outline wired equivalent privacy (WEP), Wi-Fi protected access (WPA) and Wi-Fi protected access 2 (WPA2).

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the network industry, and include access to:

- a site where encryption installation may be conducted
- a live network
- servers
- encryption software
- encryption tools.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTNWK503 Install and maintain valid authentication processes

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to design, develop, install and maintain authentication processes to reduce the vulnerability of the system.

It applies to individuals working as middle managers such as information security managers, network engineers or security analysts, who are responsible for implementing and monitoring the organisational security management system.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Networking

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Determine authentication requirements	1.1 Determine user and enterprise security requirements with reference to enterprise security plan 1.2 Identify and analyse authentication options according to user and enterprise requirements 1.3 Select the most appropriate authentication and authorisation processes
2. Configure	2.1 Create an authentication realm and reuse as required to

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
authentication software or tools	protect different areas of server 2.2 Add users and authorisation rules to new realm according to business needs 2.3 Describe user attributes and user attribute set-up 2.4 Set up an authentication filter and authorisation parameters on the appropriate server according to business requirements
3. Apply authentication methods	3.1 Develop or obtain authentication protocols as required 3.2 Develop and distribute related methods to users according to business need 3.3 Brief user on authentication system and their responsibilities according to enterprise security plan 3.4 Apply authentication system to network and user according to system product requirements 3.5 Record and store permission and configuration information in a secure central location
4. Monitor authentication system	4.1 Review the authentication system according to user and enterprise security and quality of service requirements 4.2 Ensure ongoing security monitoring, using incident management and reporting processes, according to enterprise security plan 4.3 Adjust authentication system if required

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 3.3, 4.2	• Gathers, interprets and analyses technical data to determine requirements according to user and enterprise plans
Writing	2.3, 3.1, 3.2, 3.5	• Prepares workplace documentation that incorporates an evaluation of technical information and specialised and cohesive language in a format and style appropriate for a specific audience

© Commonwealth of Australia, 2025 Future Skills Organisation

Oral Communication	1.2, 3.1-3.3, 4.2	• Uses active listening, observational and questioning techniques in order to identify information and confirm, clarify or revise understanding • Initiates and contributes to a range of formal and informal conversations relevant to role, responding, clarifying, explaining and expanding on information as required
Navigate the world of work	1.1, 3.3	• Recognises and follows explicit and implicit protocols, and meets expectations associated with own role
Get the work done	1.1, 1.3, 2.1, 2.2, 2.4, 3.4, 3.5, 4.1-4.3	• Reflects on the ways in which digital systems and tools are used or could be used to achieve work goals and begins to recognise strategic and operational applications • Uses digital technologies and systems safely and securely when implementing and monitoring a system with a growing awareness of the permanence and transparency of all activities • Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context to plan control methods and systems processes • When dealing with complex issues such as authentication failure and security incidents may use intuition to identify the general problem area, switching to analytical processes to clarify goals and key issues and using lateral thinking processes to generate possible solutions • Makes decisions in relatively complex situations, taking a range of factors into consideration

Assessment Requirements for ICTNWK503 Install and maintain valid authentication processes

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- design and deploy authentications solutions to the business technology environment and business needs
- configure authentication software or tools
- monitor and test authentication process after implementation
- ensure authentication solutions are current.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise the problems and challenges dealing with organisational authentication issues, including resource accounting through authentication
- discuss common virtual private network (VPN) issues, including:
  - quality of service (QoS) considerations
  - bandwidth
  - dynamic security environment
  - function and operation of VPN concepts
- outline authentication adaptors
- summarise biometric authentication adaptors
- summarise digital certificates, such as VeriSign, X.509, and SSL
- explain the function and operation of authentication controls including:
  - passwords
  - personal identification numbers (PINs)
  - smart cards

© Commonwealth of Australia, 2025 Future Skills Organisation

  - biometric devices
  - other authentication protocols
- outline network authentication services, such as Kerberos and NT LAN Manager (NTLM)
- summarise the features of common password protocols, such as:
  - challenge handshake authentication protocol (CHAP)
  - challenge phrases
  - password authentication protocol (PAP)
  - remote authentication dial-in user service (RADIUS) authentication
- describe the principles of security tokens.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the network industry, and include access to:

- a site or prototype where network authentication may be implemented and managed
- network support tools currently used in industry
- organisational security policies related to authentication
- manufacturers recommendations
- current authentication standards, including biometric authentication adaptors.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTNWK509 Design and implement a security perimeter for ICT networks

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to build a high performance, high security, failure resistant security perimeter, for an enterprise information and communications technology (ICT) network.

It applies to individuals with excellent ICT expertise who are working as middle managers, including information security managers, network engineers, network technicians and security analysts.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Networking

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan and design firewall solution	1.1 Determine level and nature of security needed to meet enterprise requirements 1.2 Identify security threats 1.3 Research available perimeter security options 1.4 Design security perimeter to meet identified enterprise

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	requirements
2. Configure perimeter to secure network	2.1 Deploy perimeter devices according to design 2.2 Configure perimeter topology 2.3 Configure basic functionality of devices to allow access 2.4 Configure advanced functions
3. Plan, design and configure network devices to provide secure fallover and redundancy	3.1 Back up device configuration 3.2 Design and configure perimeter to enable continuity of service during upgrade of devices 3.3 Design and configure perimeter to enable continuity of service in the event of device failure
4. Plan, design and configure a VPN solution	4.1 Configure perimeter for site-to-site virtual private networks (VPNs) 4.2 Configure perimeter as a remote access VPN server 4.3 Configure perimeter to allow VPN tunnel forwarding 4.4 Diagnose and resolve VPN connectivity issues
5. Test and verify design performance	5.1 Test functionality of basic features 5.2 Test functionality of advanced features 5.3 Perform penetration testing to verify that the perimeter meets security requirements 5.4 Monitor perimeter device performance 5.5 Monitor security breaches 5.6 Document test results and report to appropriate person

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.3, 1.4	• Gathers, interprets and analyses technical and enterprise information to determine requirements according to client needs

© Commonwealth of Australia, 2025 Future Skills Organisation

Writing	1.4, 3.2, 3.3, 5.6	• Uses factual information and industry related terminology to convey complex technical information, and notes security breaches for client records to clients on technical, operational and business related matters
Oral Communication	1.1, 5.6	• Uses active listening, observational and questioning techniques in order to identify information and confirm, clarify or revise understanding • Reports test results clearly and distinctively, using technical language appropriate to audience and environment
Numeracy	2.3, 2.4, 3.2, 3.3, 4.1-4.3, 5.3	• Selects from and applies an expanding range of mathematical and problem solving strategies to design and configure advanced features of perimeter devices and an integrated VPN solution
Get the work done	1.1, 1.2, 2.1-2.4, 3.1-3.3, 4.1-4.4, 5.1- 5.5	• Reflects on the ways in which digital systems and tools are used or could be used to achieve work goals, and begins to recognise strategic and operational applications • Uses digital technologies and systems safely and securely when implementing and monitoring a system, with a growing awareness of the permanence and transparency of all activities • Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context to plan, prioritise and monitor own work, and coordinate processes in liaison with others • Makes decisions in relatively complex situations, taking a range of factors into consideration • When dealing with complex issues, may use intuition to identify the general problem area, switching to analytical processes to meet security requirements and resolve other technical problems

Assessment Requirements for ICTNWK509 Design and implement a security perimeter for ICT networks

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify threats to perimeter security
- develop design for a secure perimeter
- deploy perimeter to meet security requirements
- design and configure advanced features of perimeter devices to provide additional services
- design and configure an integrated VPN solution
- conduct exhaustive testing of perimeter.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and describe emerging security issues and the need for security policies
- describe the security perimeter issues related to networks, including:
  - auditing and penetration testing techniques
  - capabilities of software and hardware perimeter solutions
  - logging analysis techniques
  - organisational network infrastructure
  - security technologies according to perimeter design
  - weaknesses of installed perimeter design.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the network industry, and include access to:

- site or prototype where perimeter security may be implemented and managed
- perimeter devices
- organisational security requirements.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTNWK516 Determine best-fit topology for a local network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to determine the most appropriate way of networking computers to meet user needs and business requirements.

It applies to individuals in senior networking roles who are required to plan the most appropriate topology for a proposed network.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Networking

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Determine user needs	1.1 Identify the different segments of the proposed network based on business requirements 1.2 Determine segment needs, using network functional analysis 1.3 Estimate traffic content and volumes based on business requirements 1.4 Develop a prioritised organisational network functional matrix

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
2. Develop local area network specification	2.1 Determine the resource requirements for each network segment on the basis of functional analysis 2.2 Analyse features of the physical environment for the effect on network design 2.3 Conduct a costing process for possible topology options 2.4 Consider topology options with reference to available resources and network functional matrix 2.5 Select and document appropriate network topology based on business requirements and functional analysis

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3, 2.5	• Interprets textual information obtained from a range of sources and determines how content may be applied to organisational requirements
Writing	2.5	• Develops material for a specific audience, using clear and detailed language to convey explicit information, requirements and recommendations
Numeracy	1.3, 2.1, 2.3, 2.4	• Interprets numerical information and applies mathematical calculations to determine resource expenditure within predetermined constraints • Interprets numerical data to estimate traffic needs
Get the work done	1.1, 1.2, 1.4, 2.1, 2.2, 2.4, 2.5	• Demonstrates a sophisticated understanding of principles, concepts, language and practices associated with the digital world • Uses digital tools to access and organise complex data and analyse multiple sources of information for strategic purposes • May operate from a broad conceptual plan, developing the operational detail in stages, regularly reviewing priorities and performance during implementation, and identifying and addressing issues

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Requirements for ICTNWK516 Determine best-fit topology for a local network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- analyse business or organisational needs
- identify the most appropriate local area network (LAN), virtual private network (VPN) or wireless local area network (WLAN) topology
- document recommendations.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise the typical network topologies for the following:
  - large and small LANs
  - wide area networks (WANs)
  - VPNs
  - virtual local area networks (VLANs)
  - WLANs
- identify and describe the typical components of a local network, including:
  - adaptor cards
  - bridges
  - Ethernet hardware
  - gateways
  - hubs
  - routers
- describe the software and programming requirements of a local network, including:

© Commonwealth of Australia, 2025 Future Skills Organisation

  - security protocols
  - transmission control protocol or internet protocol (TCP/IP)
- describe the business consideration for establishing a local network including:
  - growth projections and capacity planning
  - costs and queuing constraints
  - high and low speed links
  - redundancy paths
  - response time and reliability requirements
  - scope of operation
  - traffic flow patterns
  - traffic load
  - application requirements of users
- outline of installation requirements for local area networks:
  - cabling, particularly unshielded twisted pair (UTP), shielded twisted pair (STP) or optic fibre
  - characteristics and relative strengths and weaknesses of LAN network topologies
  - features and capabilities of current industry accepted hardware and software products
  - features of line sharing protocols.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the network industry, and include access to:

- business requirements
- equipment specifications
- organisational and industry costing.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTNWK517 Determine best-fit topology for a wide area network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to identify the best way computers and local area networks (LANs) can be connected to make a wide area network (WAN).

It applies to individuals with excellent planning and information and communications technology (ICT) skills in networking areas who are required to research and recommend the most appropriate topology for a WAN.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Networking

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify WAN needs	1.1 Identify the different LAN, wireless local area network (WLAN) or virtual private network (VPN) segments of the proposed WAN 1.2 Determine segment needs using functional analysis 1.3 Estimate traffic content and volumes according to expected organisational usage, by examining telecommunications infrastructure

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.4 Develop an organisational WAN functional matrix
2. Create WAN specification	2.1 Determine resource requirements for each LAN, WLAN or VPN segment on the basis of functional analysis 2.2 Consider and report how features of the physical environment affect WAN design 2.3 Choose a WAN service appropriate to the amount and type of traffic expected to access the WAN 2.4 Include redundant links in the proposed WAN connectivity for link backup purposes, in case the main link is disrupted 2.5 Document appropriate WAN service

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Writing	2.2, 2.5	• Develops material for a specific audience, using clear and detailed language to convey explicit information, requirements and recommendations
Numeracy	1.3, 1.4	• Undertakes complex functional calculus to develop a WAN functional matrix • Interprets numerical data to estimate traffic needs and calculate business expenses
Get the work done	1.1-1.3, 2.1-2.4	• Demonstrates a sophisticated understanding of principles, concepts, language and practices associated with the digital world • Uses digital tools to access and organise complex data and analyse multiple sources of information for strategic purposes • May operate from a broad conceptual plan, developing the operational detail in stages, regularly reviewing priorities and performance during implementation, and identifying and addressing issues with reference to resource constraints

Assessment Requirements for ICTNWK517 Determine best-fit topology for a wide area network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- consider budget constraints and business needs
- identify the configuration for connecting a local area network (LAN), wireless local area network (WLAN) or virtual private network (VPN) into a wide area network (WAN)
- document the configuration.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise the typical network topologies for the following networks:
  - large and small LANs
  - WANs
  - VPNs
  - virtual local area networks (VLANs)
  - WLANs
- identify and describe the typical components and technologies required for a WAN, including:
  - concepts and types of modems
  - internet protocol (IP) addressing
  - packet switching
  - routed or routable protocols, including IP, IPX and AppleTalk
  - router operations, including double data rate (DDR)
  - routing protocols, including routing information protocol (RIP), enhanced interior gateway routing protocol (EIGRP) and open shortest path first (OSPF)

© Commonwealth of Australia, 2025 Future Skills Organisation

  - transmission control protocols or internet protocols (TCPs/IPs)
  - relationship of asynchronous and synchronous communication
  - use of microwave and satellite communication in networking
- describe the business consideration for establishing a WAN, including:
  - constraints and costs
  - features of telecommunications infrastructure, including the difference between digital and analogue networks
  - growth projections and capacity planning
  - high or low speed links
  - protocols
  - redundancy paths
  - response time and reliability requirements
  - scope of operation
  - security
  - traffic flow patterns
  - traffic load
  - users and the applications expected.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the network industry, and include access to:

- design documents relating to LANs to be incorporated into the WAN
- equipment specifications
- vendor product catalogues and costs.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTNWK518 Design an enterprise wireless local area network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to conduct an internal and outdoor site survey, and design a complex wireless local area network (WLAN).

It applies to individuals working in the networking area who are required to evaluate client requirements and design an appropriate WLAN.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Networking

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Document current network configuration	1.1 Obtain details of current network layout and parameters 1.2 Hold consultations with key stakeholders 1.3 Document the current network configuration, network topology and links to carrier
2. Research client needs	2.1 Identify the client's current needs 2.2 Determine future needs 2.3 Document current and future needs according to

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	organisational requirements
3. Implement site survey	3.1 Select the appropriate diagnostic tools and measurement processes 3.2 Select test equipment and ensure calibration 3.3 Undertake site survey with minimum disruption to client and ensure safe working environment for users and survey personnel 3.4 Record physical infrastructure, building use, aesthetics and other issues that will impact on future network performance and acceptance by the client 3.5 Record radio frequency interference issues, sources and possible resolution 3.6 Document results of site survey
4. Develop specifications for upgrade of wireless network	4.1 Document the current network performance equipment and capacity for the expanded network 4.2 Assess interference issues relating to existing radio frequency, topographic barriers, climate, obstacles, transmission distances and construction materials 4.3 Assess optimum location and position of access points, repeaters, routers and other equipment 4.4 Develop cabling plans and repeater links, including power requirements 4.5 Determine frequency to be used based on client and user requirements
5. Model network	5.1 Determine appropriate test and modelling routines 5.2 Determine estimated network traffic and planned growth 5.3 Test planned network using modelling tools and techniques 5.4 Document outcome of tests and revise design where required
6. Determine components for network	6.1 Select and test vendor products and equipment where appropriate 6.2 Consult others, including emerging industry bodies, for sustainable compatibility, economic running costs and user connectivity access 6.3 Finalise components list for suitability and vendor claims

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	6.4 Prepare implementation plans
7. Present design to client	7.1 Present the design in a clear and logical fashion 7.2 Provide advice to client on reasons for design choice 7.3 Inform the client of design limitations, performance expectations and possible unanticipated outcomes, including security threats 7.4 Obtain feedback from client 7.5 Undertake modifications to design if required 7.6 Complete final design documentation and seek client endorsement

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	2.3, 3.2, 7.4	• Recognises and interprets legislative, organisational and technical material to determine job requirements
Writing	1.3, 2.3, 3.4-3.6, 4.1, 4.4, 5.4, 6.3, 7.5, 7.6	• Develops a broad range of technical material and creates records for a specific audience, using clear and detailed language to convey explicit information, requirements and recommendations
Oral Communication	1.2, 6.2, 7.2-7.4, 7.6	• Uses listening and questioning skills to confirm understanding for requirements and participates in a verbal exchange of ideas/solutions • Uses appropriate, detailed and clear language to address stakeholders, users and industry bodies to disseminate information
Numeracy	3.2, 5.2, 6.2	• Interprets numerical data to estimate and project traffic needs, undertake a cost benefit analysis and accurately calibrate equipment
Navigate the world of work	3.3	• Understands own legal rights and responsibilities and is extending understanding of general legal principles applicable across

© Commonwealth of Australia, 2025 Future Skills Organisation

		work contexts
Interact with others	7.1	• Actively identifies the requirements of important communication exchanges, selecting appropriate channels, format, tone and content to suit purpose and audience
Get the work done	1.1, 2.1, 2.2, 3.1-3.3, 3.5, 4.2-4.5, 5.1, 5.3, 6.1, 6.4	• Demonstrates a sophisticated understanding of principles, concepts, language and practices associated with the digital world • Uses digital tools to access and organise complex data and analyse multiple sources of information for strategic purposes • May operate from a broad conceptual plan, developing the operational detail in stages, regularly reviewing priorities and performance during implementation, and identifying and addressing issues • Takes responsibility for high-impact decisions in complex situations involving many variables and constraints • Uses nuanced understanding of context to recognise anomalies and subtle deviations to normal expectations, focussing attention on critical issues and variables

Assessment Requirements for ICTNWK518 Design an enterprise wireless local area network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- assess wireless network performance requirements for the client
- measure and diagnose wireless working environment
- produce wireless models and network specifications appropriate to client requirements
- produce wireless network designs and component lists
- document the design and obtain client approval.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and describe wireless network survey techniques, including:
  - audit and intrusion detection systems
  - auditing and penetration testing techniques
  - bandwidth and quality of service
  - factors affecting signal quality
- outline the key technical considerations for designing a wireless network, including:
  - features of antenna design
  - layer 2 and layer 3 design issues
  - impact of radio frequency
  - problems associated with topography and obstacles in radio transmission path
  - wireless topologies
  - wireless local area networks (WLAN) and wireless metropolitan access network (WMAN) solutions

© Commonwealth of Australia, 2025 Future Skills Organisation

- outline the key client organisation considerations when designing a wireless network, including:
  - small office home office (SOHO) and enterprise local area networks (LANs)
  - transmission control protocols or internet protocols (TCP/IP) and applications
  - wireless security strategies
  - security threats
- outline the software consideration when designing a wireless network, including:
  - network protocols and operating systems
  - security protocols, standards and data encryption.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the network industry, and include access to:

- network infrastructure, including wireless hardware and software
- network technical requirements
- real or simulated wireless networks
- appropriate diagnostic equipment and standards.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTNWK520 Design ICT system security controls

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to design the security controls that ensure an information and communications technology (ICT) system is both physically and legally secure.

It applies to individuals in a range of ICT areas who are required to guarantee the security of ICT systems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Networking

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Review organisational security policy and procedures	1.1 Review business environment to identify existing requirements 1.2 Determine organisational goals for legal and security requirements 1.3 Verify security needs in a policy document 1.4 Determine legislative impact on business domain 1.5 Gather and document objective evidence on current security

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	threats 1.6 Identify options for using internal and external expertise 1.7 Establish and document a standard methodology for performing security tests
2. Develop security plan	2.1 Investigate theoretical attacks and threats on the business 2.2 Evaluate risks and threats associated with the investigation 2.3 Prioritise assessment results and write security policy 2.4 Document information related to attacks, threats, risks and controls in a security plan 2.5 Review the security strategy with security approved key stakeholders 2.6 Integrate approved changes into business plan and ensure compliance with statutory requirements
3. Design controls to be incorporated into system	3.1 Implement controls in a procedurally organised manner to ensure minimum risk of security breach in line with organisational guidelines 3.2 Monitor each phase of the implementation to determine the impact on the business 3.3 Take corrective action on system implementation breakdown 3.4 Record implementation process 3.5 Evaluate corrective actions for risk 3.6 Plan risk assessment review process 3.7 Take action to ensure confidentiality throughout all phases of design

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.5, 3.1	• Recognises and interprets legislative, organisational and technical material to determine

© Commonwealth of Australia, 2025 Future Skills Organisation

		job requirements
Writing	1.3, 1.5, 1.7, 2.3, 2.4, 2.6, 3.4	• Develops a broad range of business reports for a specific audience, using clear and detailed language to convey explicit information, requirements and recommendations
Oral Communication	2.5	• Uses appropriate, detailed and clear language to address personnel and disseminate information in a group environment • Uses listening and questioning skills to confirm understanding for requirements, and participates in a verbal exchange of ideas/solutions
Navigate the world of work	1.2, 1.4, 2.6	• Keeps abreast of legislative or regulatory requirements relevant to own role and considers implications of any changes when planning and undertaking work
Get the work done	1.5, 1.6, 2.1-2.3, 3.1-3.3, 3.5-3.7	• Demonstrates a sophisticated understanding of principles, concepts, language and practices associated with the digital world • Is acutely aware of the importance of understanding, monitoring and controlling access to digitally stored and transmitted information • May operate from a broad conceptual plan, developing the operational detail in stages, regularly reviewing priorities and performance during implementation, and identifying and addressing issues • Monitors outcomes of decisions, considering results from a range of perspectives and identifying key concepts and principles that may be adaptable in the future

Assessment Requirements for ICTNWK520 Design ICT system security controls

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- review organisational security policies and procedures
- establish realistic security procedures
- design security plan and controls for a system
- develop a security control strategy
- oversee the implementation and evaluation of the strategy.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe communications security, including human organisational interactions
- describe how to conduct an information security risk assessment
- identify and summarise internet security technologies and processes, including:
  - firewalls
  - physical security
  - security testing methods for performing security tests
  - wireless security
  - security threats
  - the impact of security policies, plans and strategies
  - general features of specific security technology
  - risk assessment
- describe current industry accepted security processes, including general features and capabilities of software and hardware solutions

© Commonwealth of Australia, 2025 Future Skills Organisation

- outline the legal and ethical standards expected when considering security controls, including:
  - ethics in information and communications technology (ICT)
  - privacy issues
  - legislation
- summarise the need for developing organisational guidelines, processes, policies and procedures.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the network industry, and include access to:

- ICT security assurance specifications
- probability, frequency and severity of direct and indirect harm, loss or misuse of the ICT system
- risk analysis tools and methodologies
- an ICT environment in which there are security risks
- legislation, regulations and standards relating to security
- existing organisational security policies
- organisational expertise.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTNWK529 Install and manage complex ICT networks

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to install and manage enterprise-wide information and communications technology (ICT) networks.

It applies to individuals with excellent ICT skills who are working as senior networking staff responsible for the sustainability of an organisation by using virtualisation technologies in complex computing environments of medium- to-large companies to provide network services and resources.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Networking

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan and design a complex network to meet business requirements	1.1 Review network design, business requirements and latest vendor technical specifications for network components 1.2 Research options available for providing the network functionality required 1.3 Plan network implementation to provide network services and resources to meet business requirements

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
2. Design and implement a security strategy	2.1 Analyse requirements for internal and external security 2.2 Design security strategy to meet requirements 2.3 Implement security strategy 2.4 Undertake ongoing monitoring of the viability and reliability of network security, through testing and use of technical tools 2.5 Continually monitor internal and external network access for security breaches
3. Install and configure a complex network to meet business requirements	3.1 Check and install cabling and associated components according to industry standards 3.2 Install and configure servers, routers, switches or other devices to provide internet protocol (IP) addressing and routing 3.3 Install and configure servers, routers, switches or other devices to provide name resolution 3.4 Install and configure servers, routers, switches or other devices to provide network services 3.5 Install and configure remote access services 3.6 Install and configure devices to provide data management services
4. Provide integrated network services across a complex network	4.1 Integrate multiple network services across network 4.2 Analyse and resolve interoperability issues 4.3 Optimise performance 4.4 Rectify security conflicts arising from integrating services
5. Plan, design and implement voice and video business communications system	5.1 Install software and configure and test voice over internet protocol (VoIP) and videoconferencing services 5.2 Incorporate the use of a communications server to provide real-time multimedia communications 5.3 Select common voice and videoconferencing codecs according to standards and practices
6. Manage and support a complex network	6.1 Identify and evaluate appropriate network management tools to assist in the administration of the complex network 6.2 Select and install network management tools according to industry and organisational standards 6.3 Set and monitor alerts and logs

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	6.4 Capture and analyse network performance data 6.5 Implement automated server updates 6.6 Implement desktop management policies 6.7 Implement automated virus checking 6.8 Use remote management tools
7. Test network functionality and obtain sign-off	7.1 Test network functionality and record results 7.2 Record results of network functionality test 7.3 Complete network documentation according to organisational standards

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 6.6	• Recognises and interprets technical and organisational documentation to determine and confirm job requirements
Writing	2.2, 7.1-7.3	• Develops a broad range of material, including recording test results for a specific audience using clear and detailed language to convey explicit information, requirements and recommendations
Oral Communication	2.1	• Uses listening and questioning skills to confirm understanding for requirements, and participates in a verbal exchange of ideas/solutions
Numeracy	6.4	• Interprets numerical data when taking measurements and evaluating the performance and interoperability of network services
Navigate the world of work	3.1, 5.3, 6.2, 7.3	• Recognises and responds to both explicit and implicit protocols within familiar work contexts and appreciates the importance of identifying and responding to protocols in new situations
Get the work done	1.1, 1.3, 2.3-2.5, 3.1-3.6, 4.1-4.4,	• Considers the strategic and operational potential of digital trends to achieve work goals, enhance work processes, create opportunities and

© Commonwealth of Australia, 2025 Future Skills Organisation

	5.1-5.3, 6.1-6.8, 7.1	enhance or reduce risks • Actively identifies, creates and utilises linkages to enhance knowledge sharing, idea creation, individual and collective engagement, and work outcomes • Uses a broad range of strategies to store, access and organise virtual information, recognising that design choices will influence what information is retrieved and how it may be interpreted and used • Is acutely aware of the importance of understanding, monitoring and controlling access to digitally stored and transmitted information • May operate from a broad conceptual plan, developing the operational detail in stages, regularly reviewing priorities and performance during implementation, and identifying and addressing issues • Uses nuanced understanding of context to recognise anomalies in a network environment and subtle deviations to normal expectations, focussing attention and remedying problems as they arise

Assessment Requirements for ICTNWK529 Install and manage complex ICT networks

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- design and implement a complex network that involves integrating multiple network services to meet business requirements
- design and implement an appropriate security strategy for a complex network
- monitor and test the performance of aspects of the solution
- provide ongoing management and support of the network.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe firewall configurations and their application
- summarise internet protocol (IP) addressing and network configuration
- summarise and apply the following aspects of a network:
  - infrastructure
  - load balancing for applications
  - security
  - server operating systems
  - service configuration, including:
    - domain name system (DNS)
    - dynamic host configuration protocol (DHCP)
    - file transfer protocol (FTP)
    - network time protocol (NTP)
    - server messages block (SMB)

© Commonwealth of Australia, 2025 Future Skills Organisation

  - mail
  - proxy
  - web
  - service management
- identify and describe troubleshooting tools and techniques, including network diagnostic utilities
- outline the purpose of user authentication and directory services
- describe voice over internet protocol (VoIP)
- describe virtual private network (VPN).

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the network industry, and include access to:

- network design and business requirements documents
- a complex network or hardware and software required to build a network involving multiple servers, multiple physical locations (or simulation of) and a combination of network services.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTNWK531 Configure an internet gateway

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to connect network hardware devices, mainly personal computers (PCs), to an internet gateway.

It applies to individuals who are middle managers, network engineers, technical specialists or security analysts with excellent information communications and technology (ICT) skills who plan and implement networks, determine security threats and are involved in business budgeting.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Networking

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Confirm client requirements and network equipment	1.1 Confirm and validate client requirements 1.2 Determine scope of internet services with reference to client requirements 1.3 Identify and install both hardware and software components 1.4 Verify equipment specifications and availability of components

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
2. Review security issues	2.1 Assess security features of internet gateways with reference to architecture and security plan 2.2 Review security measures with the internet service provider (ISP) with reference to firewalls and other measures as required 2.3 Brief users on the security plan with reference to internet use and hazard possibilities
3. Install and configure gateway products and equipment	3.1 Identify and select installation and configuration options 3.2 Install and configure gateway products and equipment as required by technical guidelines 3.3 Plan and execute tests with reference to client requirements and network impact 3.4 Analyse error reports and make changes as required
4. Configure and test node	4.1 Assign node to specific gateway as required by network architecture and client requirements 4.2 Determine connection type and configure with reference to network architecture and client requirements 4.3 Ensure node software and hardware are configured as required according to vendor specifications and client requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 1.4, 2.1, 3.2-3.4, 4.1-4.3	• Recognises and interprets technical documentation, equipment manuals and specifications to determine and confirm job requirements
Oral Communication	1.1, 1.2, 2.2, 2.3, 3.3, 4.1-4.3	• Uses highly developed listening, observational and questioning skills to understand others' perspectives and clarify, explore and extend meaning • Establishes and maintains complex and effective spoken communication to convey and clarify a range of complex information to relevant personnel

© Commonwealth of Australia, 2025 Future Skills Organisation

Navigate the world of work	2.3, 3.2	• Monitors adherence to legal and regulatory rights and responsibilities for self and possibly others
Get the work done	1.2-1.4, 2.1, 2.2, 3.1-3.3, 4.1-4.3	• Considers the strategic and operational potential of digital trends to achieve work goals, enhance work processes, create opportunities and enhance or reduce risks • Uses a broad range of strategies to store, access and organise virtual information, recognising that design choices will influence what information is retrieved and how it may be interpreted and used • Is acutely aware of the importance of understanding, monitoring and controlling access to digitally stored and transmitted information • May operate from a broad conceptual plan, developing the operational detail in stages, regularly reviewing priorities and performance during implementation, and identifying and addressing issues • Uses nuanced understanding of context to recognise anomalies in a network environment and subtle deviations to normal expectations, focussing attention and solving problems as they arise

Assessment Requirements for ICTNWK531 Configure an internet gateway

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- determine client requirements and network specifications
- determine security measures and brief users
- connect network hardware devices to an internet gateway
- configure and test gateway products
- configure and test node according to vendor specifications and client requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and describe current browser software
- explain domain name server (DNS) resolution
- outline the features and functions of:
  - network architecture
  - bridges as required
  - desktop operating systems
  - hubs
  - network gateways
  - network operating systems:
  - routers
  - switches
- describe the security issues that may impact on an internet gateway
- describe common security solutions and strategies

© Commonwealth of Australia, 2025 Future Skills Organisation

- identify and describe the principle function of current gateway software.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the network industry, and include access to:

- a network and internet where gateway products may be installed and configured
- use of hardware and software currently used in industry
- client requirements documentation
- vendor specifications.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTNWK536 Plan, implement and test enterprise communication solutions

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Application

This unit describes the skills and knowledge required to manage the deployment and administration of enterprise communication solutions. It includes email and remote access email, web portal or content management solution, and enterprise collaboration tools.

It applies to individuals working as information and communications technology (ICT) professionals who configure and deploy software to supply email, collaboration and messaging services to meet the needs of enterprise users.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Networking

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan for enterprise communication solutions	1.1 Research and identify enterprise communication solutions to meet organisational requirements 1.2 Evaluate and compare enterprise communication solutions against organisational requirements 1.3 Select enterprise communication solutions to address

© Commonwealth of Australia, 2025 Future Skills Organisation

	organisational requirements 1.4 Acquire enterprise communication solutions in accordance with organisational requirements 1.5 Consult with stakeholders to develop implementation plan addressing the organisational requirements
2. Implement enterprise communication solutions	2.1 Implement and configure enterprise communication solutions in accordance with implementation plan 2.2 Determine if implementation of enterprise communication solutions meets implementation plan and organisational requirements and modify implementation to address variance
3. Test and monitor implementation of enterprise communication solutions	3.1 Test enterprise communication solutions to determine if enterprise communication solutions are operating correctly according to system specifications 3.2 Monitor and analyse performance and logs of enterprise communication solutions to determine if organisational requirements are met 3.3 Modify enterprise communication solutions to address instances where organisational requirements are not met

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	**Description**
Reading	• Gathers, interprets and analyses technical documentation to test and implement enterprise tools successfully
Numeracy	• Selects and interprets mathematical information that may be partly embedded in a range of familiar and less familiar tasks to evaluate performance and interoperability of communication services
Get the work done	• Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context to plan, design and implement a communications solution • Reflects on the ways in which digital systems and tools are used, or could be used, to achieve work goals and begins to recognise strategic and operational applications • Uses specialised software to ensure an enterprise can engage with geographically distributed team members • Initiates standard procedures when responding to a predictable range

Assessment Requirements for ICTNWK536 Plan, implement and test enterprise communication solutions

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit; including evidence of the ability to:

- Plan, implement and test enterprise communication solutions including:
  - one email system including:
    - preparing existing networks
    - configuring users, mailboxes, address lists, distribution lists, user constraints, remote email access, message integrity and antispam controls, antivirus controls and anti-phishing controls
  - one content management system including:
    - planning namespace and server roles
    - configuring access, security, network infrastructure and customisations
    - providing high availability and disaster recovery
  - one collaboration tool including:
    - planning namespace and server roles
    - configuring access, security, network infrastructure and customisations
    - providing high availability and disaster recovery
    -

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

- Key requirements of an ICT implementation plan
- Features and purpose of an email server application
- Features and purpose of organisational collaboration tools
- Features and purpose of web portal or content management software
- Testing processes
- Key principles of data protection, including:

© Commonwealth of Australia, 2025 Future Skills Organisation

  - backup and restoration
  - firewall configuration
  - security and authentication practices
- Important features of network administration, including:
  - load balancing for applications
  - server and directory administration
  - infrastructure
  - web server administration
  -

Assessment Conditions

Skills must be demonstrated in a workplace or simulated environment where conditions are typical of those in an ICT working environment or ICT workplace. This includes:

- Site where server applications can be installed
- Networked servers
- Organisational requirements for email solution, remote access to email, content management system, and collaboration tools.
- Details relating to enterprise email requirements including users, mailboxes, address lists, distribution lists, and user constraints
- Antivirus, antispam, and anti-phishing controls
- Enterprise collaboration software
- Workstations
- Switch
- Wide area network (WAN) service point of presence
- Individual stakeholders to consult

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

ICTNWK603 Plan, configure and test advanced internetwork routing solutions

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge necessary to plan, configure and support advanced internet protocol (IP) addressing and routing when implementing scalable and secure routers connected to local area networks (LANs) and wide area networks (WANs). The unit also covers configuration of secure routing solutions to support branch offices and mobile workers.

It applies to individuals with advanced information and communications technology (ICT) skills who are working in a variety of roles, including network specialists, network engineers, network infrastructure engineers, senior network administrators, network and systems managers, ICT security specialists, security engineers, communications engineers and communications managers.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Networking

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan, configure and test a complex network-routing protocol	1.1 Determine network resources required for implementing a complex distance-vector routing protocol solution, a multi-area link-state routing protocol solution and an exterior routing

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
solution	protocol solution on a network 1.2 Produce separate protocol implementation plans and verification plans for each routing solution 1.3 Configure and test the routing protocol solution 1.4 Document results of the routing protocol solution implementation and verification plans for each solution
2. Plan, configure and test an internet protocol version 6- (IPv6) based network solution	2.1 Determine network resources needed for implementing IPv6 on a network 2.2 Produce an implementation plan and a verification plan for an IPv6-based network solution 2.3 Configure IPv6 routing and IPv6 interoperation with IPv4 2.4 Verify and test the IPv6 solution and make amendments if necessary 2.5 Document results of IPv6 implementation and verification plans
3. Plan, configure and test an IPv4 or IPv6-based network redistribution solution	3.1 Produce an IPv4 or IPv6 redistribution implementation plan and verification plan, based on the outcomes of a network redistribution analysis 3.2 Configure and verify the redistribution solution for the network 3.3 Document results of redistribution, implementation and verification plans 3.4 Analyse the differences between implementing an IPv4 and an IPv6 redistribution solution
4. Plan, configure and test a layer 3 path control solution	4.1 Produce a layer 3 path control implementation plan and a verification plan based on the outcomes of a network redistribution analysis 4.2 Configure and verify layer 3 path control for the network 4.3 Implement basic teleworker and branch services 4.4 Evaluate and compare broadband technologies and VPN technologies in terms of access and data transfer rate as solutions for secure broadband network

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1	• Recognises and interprets complex technical information to determine and confirm job requirements
Writing	1.2, 1.4, 2.2, 2.5, 3.1, 3.3, 4.1	• Develops a broad range of material including operational, technical and project management documentation for a specific audience, using clear and detailed language to convey explicit information, requirements and recommendations
Get the work done	1.1, 1.3, 2.1, 2.3, 2.4, 3.1, 3.2, 3.4, 4.1-4.4	• Considers the strategic and operational potential of digital trends to achieve work goals, enhance work processes, create opportunities and enhance or reduce risks • Uses a broad range of strategies to store, access and organise virtual information, recognising that design choices will influence what information is retrieved and how it may be interpreted and used • Is acutely aware of the importance of understanding, monitoring and controlling access to digitally stored and transmitted information • May operate from a broad conceptual plan to identify functional, performance and management features associated with the operation of complex networks • Uses nuanced understanding of context to solve problems in complex and dynamic environments with demanding service levels

Unit Mapping Information

Assessment Requirements for ICTNWK603 Plan, configure and test advanced internetwork routing solutions

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- plan, configure and support advanced routed network infrastructure
- use network tools
- plan and analyse redistribution solutions
- produce and configure layer 3 path control implementation plan
- provide solutions to static and dynamic routing issues together with optimisation strategies.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain broadband technologies relevant to advanced internetworking routing solutions
- summarise business justifications for having integrated and unified enterprise networks
- outline emerging viable business and social technologies
- clarify external developments or factors that affect network design
- summarise IPv4 and IPv6 technologies and solutions
- outline maintenance and management tools and practices suitable for complex networks to achieve availability and resilience
- summarise network topologies
- explain regulations, standards and certifications relevant to advanced internetworking routing solutions
- explain risk management strategies and practices suitable for a complex network environment
- outline routing tables, protocols and operational processes

© Commonwealth of Australia, 2025 Future Skills Organisation

- summarise routing technologies for an enterprise environment
- summarise security for enterprise networks
- explain security standards and technologies for network environments
- outline the benefits of formal or structured approaches to network management
- summarise virtual private network (VPN) technologies.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the networking industry, and include access to:

- a site where network installation may be conducted
- router hardware and software
- organisational guidelines
- computers
- local area network (LAN) and wide area network (WAN) systems.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTNWK604 Plan and configure advanced internetwork switching solutions

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to plan, configure and support advanced enterprise switching. The unit also covers secure integration of virtual local area networks (VLANs), wireless local area networks (WLANs), voice and video into campus networks.

It applies to individuals with advanced information and communications technology (ICT) skills who are working in a variety of roles, including network specialists, network engineers, network infrastructure engineers, senior network administrators, network and systems managers, ICT security specialists, security engineers, communications engineers and communications managers.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan, configure and test a VLAN-based solution	1.1 Determine network resources required for implementing a VLAN-based solution for a given network design and requirements 1.2 Produce an implementation plan and a verification plan for

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	the VLAN-based network solution 1.3 Configure and verify switch-to-switch connectivity, loop prevention and access ports for the VLAN-based solution using network tools 1.4 Document results of the VLAN implementation and verification plans
2. Plan, configure and test a secure layer 2 network solution and a switch-based layer 3 services solution	2.1 Determine network resources required for implementing a secure layer 2 network solution and a switch-based layer 3 solution against vulnerabilities with organisational security policies 2.2 Produce an implementation plan and a verification plan for each of the layer 2 and layer 3 network solution 2.3 Configure and verify a private VLAN and features for port security and general switch security for the layer 2 network solution, using network tools 2.4 Configure and verify routing interfaces and layer 3 security for the switch-based layer 3 network solution, using network tools 2.5 Document results of security implementation and verification plans for each of the layer 2 and the layer 3 network solution
3. Prepare infrastructure to support advanced services	3.1 Implement a wireless extension of a layer 2 solution 3.2 Implement a support solution for a voice over internet protocol (VoIP) and a video application
4. Plan, configure and test high-availability networks using multilayer switches solution	4.1 Determine network resources needed for implementing high-availability solution for a given network design and requirements 4.2 Produce an implementation plan and a verification plan for the high-availability network, using multilayer switches 4.3 Configure, verify and manage first hop redundancy protocols (FHRP) 4.4 Implement switch supervisor redundancy and use network tools to verify the high-availability solution 4.5 Document results of high-availability implementation and verification plans

ICTNWK605 Design and configure secure integrated wireless systems

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to use appropriate tools, equipment, software and protocols to produce a verified radio frequency (RF) design plan for a wireless local area network (WLAN) and to design, configure and troubleshoot secure integrated wireless systems.

It applies to individuals with advanced information and communications technology (ICT) skills who are working as wireless network installers, wireless network support specialists and wireless network engineers.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Networking

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan and conduct a site survey for setting up a wireless network	1.1 Assess client requirements to plan for selecting appropriate WLAN technology and network elements 1.2 Evaluate existing network infrastructure and produce a wireless network topology to determine upgrade or new installation requirements

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.3 Prepare basic RF deployment considerations related to site survey design of data or voice over WLAN applications 1.4 Produce a survey model, including deployment characteristics to meet client requirements 1.5 Produce a spectral analysis predictive layer 1 site survey verified by a physical site survey 1.6 Analyse the survey results produced with an RF network design for a secure wireless network 1.7 Conduct an RF field trial for final evaluation of network topology and network element placements
2. Prepare design specifications and plan for secure enterprise WLANs	2.1 Prepare for work according to relevant legislation, workplace health and safety (WHS), codes, regulations and standards 2.2 Produce design specifications and layout for wireless network, using spread spectrum technology for enhanced network security 2.3 Review design plans to ensure sound WLAN RF principles and compliance with wireless regulatory bodies, standards and certifications
3. Configure and test a controller-based WLAN	3.1 Produce a controller-based wireless architecture from a possible range of industry-based wireless network architectures 3.2 Configure and test a WLAN controller and access points, using controller-based AP discovery and association to enable roaming facilities 3.3 Configure the basics of a stand-alone access point 3.4 Configure and test client operating system WLAN configuration and install vendor specific software and utilities where applicable
4. Configure and test WLAN security	4.1 Review the general framework of wireless security and security components for securing the WLAN 4.2 Configure and test identification assignments to network elements 4.3 Configure and test authentication methods, using different sources of authentication 4.4 Configure and test encryption methods to comply with network security policies

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
5. Conduct WLAN maintenance and troubleshooting	5.1 Evaluate WLAN troubleshooting methods for controllers, access points and client methodologies 5.2 Use networking tools to maintain and troubleshoot network 5.3 Transfer device configurations and operating system (OS), using maintenance tools and commands

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.6, 2.3, 4.4	• Recognises and interprets complex technical documentation to determine and confirm job requirements
Writing	1.1, 1.4, 1.5, 2.2	• Develops a broad range of materials, including design and technical specifications, for a specific audience, using clear and detailed language to convey explicit information, requirements and recommendations
Numeracy	3.2, 3.4, 4.2-4.4	• Interprets numerical data and undertakes measurements to evaluate performance and interoperability of network
Navigate the world of work	2.1, 2.3, 4.4	• Monitors adherence to legal and regulatory rights and responsibilities for self and possibly others
Interact with others	1.1, 1.4	• Identifies and uses appropriate communication conventions and protocols when liaising with internal and external stakeholders on technical, operational and business-related matters
Get the work done	1.1-1.3, 1.5-1.7, 2.2, 3.1-3.4, 4.1-4.4, 5.1- 5.3	• Demonstrates a sophisticated understanding of principles, concepts, language and practices associated with the digital world and uses these to troubleshoot and understand the uses and potential of new technology • Uses a broad range of strategies to store, access and organise virtual information, recognising that design choices will influence what information is retrieved and how it may be interpreted and used

© Commonwealth of Australia, 2025 Future Skills Organisation

		• Is acutely aware of the importance of understanding, monitoring and controlling access to digitally stored and transmitted information • May operate from a broad conceptual plan, coordinating the process with others to identify functional, performance and management features associated with the operation of complex switched networks • Uses understanding of context to troubleshoot and debug WAN issues, adapt configuration procedures to network requirements and reconfigure, depending on differing operational contingencies, risk situations and environments

Assessment Requirements for ICTNWK605 Design and configure secure integrated wireless systems

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- plan and conduct a wireless local area network (WLAN) site survey
- produce design specifications and layout of wireless network
- configure and test a controller-based WLAN
- test wireless security configurations
- maintain a WLAN.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain authentication and encryption methods
- summarise configuration, verification and troubleshooting procedures regarding:
  - router-operation
  - routing virtual local area network (VLAN) switching
  - inter-switching communications
- outline configuration of WLAN securities
- clarify current wireless regulations, standards and certifications
- summarise internetwork operating system (IOS) and internet protocol (IP) networking models
- explain radio frequency (RF) and WLAN technology and network design
- outline RF propagation and implementation issues
- explain spread spectrum technologies
- summarise wireless network topologies and elements
- outline wireless networking protocols

© Commonwealth of Australia, 2025 Future Skills Organisation

- describe WLAN devices, their specification and use
- summarise WLAN radio frequencies characteristics and their measuring techniques.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the networking industry, and include access to:

- a site where network installation may be conducted
- hardware and software
- organisational guidelines
- computers
- stand-alone and lightweight WLAN controllers and access point (AP)
- hardware and software WLAN site survey tools.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTNWK606 Implement voice applications over secure wireless networks

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to use network tools, equipment, software and protocols to design and integrate voice over wireless local area network (VoWLAN) services into the wireless local area network (WLAN), and to implement into the wireless network quality of service (QoS), multi-protocol label switching (MPLS), and high bandwidth applications.

It applies to individuals with excellent information communications and technology (ICT) skills who are working as wireless help desk technicians, wireless network support specialists and wireless network engineers.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Networking

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Specify requirements for voice over wireless architecture	1.1 Analyse voice requirements for use over a wireless network 1.2 Specify wireless requirements for voice applications for design considerations

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.3 Verify network for voice readiness and suitability
2. Design the implementation of secure VoWLAN	2.1 Configure wireless client devices 2.2 Design and configure the WLAN for VoWLAN with security configurations 2.3 Design and configure infrastructure devices 2.4 Devise structured troubleshooting methodology for VoWLAN implementation
3. Design and implement QoS for wireless applications	3.1 Plan general design considerations for wired QoS 3.2 Design wireless QoS deployment schemes 3.3 Configure WLAN equipment for QoS
4. Design, implement and test multicast over wireless environment	4.1 Evaluate general multicast concepts 4.2 Analyse the implications for multicast in 802.11 4.3 Configure multicast requirements for a wireless network 4.4 Devise structured troubleshooting methodology for multicast in a WLAN environment
5. Plan and scope the wireless network for video and high-bandwidth applications	5.1 Design and implement QoS for latency-sensitive applications 5.2 Analyse the requirement for video applications over 802.11n WLAN 5.3 Calculate and predict bandwidth requirements for video applications over the wireless network 5.4 Analyse the impact of the WLAN interconnectivity for devices on QoS for devices or the wired side

Assessment Requirements for ICTNWK606 Implement voice applications over secure wireless networks

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- analyse and specify voice over wireless architecture requirements
- design and implement voice applications over wireless local area network (WLAN)
- implement a quality of service (QoS) for wireless applications
- use network tools to configure and test wireless infrastructure and applications
- plan and scope the wireless network bandwidth.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the configuration, verification and troubleshoot procedures required to undertake:
  - router operation and routing
  - virtual local area network (VLAN) switching and inter-switching communications
- summarise iDevice operating system (iOS) and internet protocol (IP) networking models
- outline video and high-bandwidth applications and requirements
- explain voice applications and protocols
- clarify voice over wireless local area network (VoWLAN) technologies
- describe the following aspects of wireless networks:
  - current regulations, standards and certifications
  - deployment schemes
  - network security technology
  - network topologies and elements
  - networking protocols

© Commonwealth of Australia, 2025 Future Skills Organisation

- summarise WLAN devices and their specification and use.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the networking industry, and include access to:

- a site where network installation may be conducted
- hardware and software
- organisational guidelines
- computers
- stand-alone and lightweight WLAN controllers and AP
- hardware and software LAN/WLAN voice technologies.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTNWK610 Design and build integrated VoIP networks

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to use appropriate tools, equipment, software and protocols to design and build an internet protocol (IP) based integrated voice network for small-to-medium enterprises.

It applies to individuals with advanced information and communications technology (ICT) skills who are working as voice over internet protocol (VoIP) network support specialists, VoIP network engineers and VoIP systems installers.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Networking

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan design concepts of a voice network for specified voice quality	1.1 Determine the design requirements of an IP-based voice network, including the choice of network elements 1.2 Evaluate the various applications of real-time protocols and of signalling protocols for an appropriate gateway 1.3 Design a site numbering plan, including digit manipulation and path selection process

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.4 Plan and assign calling privileges as required 1.5 Predict VoIP call flow and potential impact on voice quality considerations and network performance
2. Design, configure implement and test voice protocols and interoperation of VoIP communications network	2.1 Produce the design layout of the voice network according to the design requirements 2.2 Design and configure a gateway and a gatekeeper to using H.323 protocol suite for dial plan resolution and call admission control for the network 2.3 Configure and test the use of real-time protocols, call management protocols and gateway signalling protocol in the network design 2.4 Analyse the function and interoperation of gatekeepers within an IP communications network
3. Design, configure and test a VoIP IP-to-IP call system	3.1 Analyse the IP-to-IP gateway features and functionality requirements for a given network design requirement 3.2 Configure the gatekeeper to support an IP-to-IP gateway 3.3 Configure and test the IP-to-IP gateway to provide address hiding, protocol and media interworking, and call admission control implementations 3.4 Produce test results and evaluate against design requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 2.1, 3.1, 3.4	• Recognises and interprets complex technical information to determine and adhere to design requirements
Writing	1.3, 2.1, 3.4	• Develops a broad range of material including test results, planning and design documentation for a specific audience using clear and detailed language in order to convey explicit information, requirements and recommendations
Numeracy	1.3, 1.5, 2.3, 3.3, 3.4	• Interprets numerical data in the planning phase and undertakes measurements to evaluate performance and

© Commonwealth of Australia, 2025 Future Skills Organisation

		interoperability of network
Get the work done	1.1, 1.2, 1.4, 1.5, 2.2-2.4, 3.1-3.3	• Demonstrates a sophisticated understanding of principles, concepts, language and practices associated with the digital world and uses these to troubleshoot and understand the uses and potential of new technology • Uses a broad range of strategies to store, access and organise virtual information, recognising that design choices will influence what information is retrieved and how it may be interpreted and used • Is acutely aware of the importance of understanding, monitoring and controlling access to digitally stored and transmitted information • Uses a mix of intuitive and formal processes to identify key information and issues, evaluate alternative strategies, anticipate consequences and consider implementation issues and contingencies • May use formal analytical and lateral thinking techniques for identifying issues and generating and evaluating possible solutions

Assessment Requirements for ICTNWK610 Design and build integrated VoIP networks

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- determine requirements and produce a concepts design of a voice over internet protocol (VoIP) network
- produce a design layout
- configure and test voice gateways
- design site numbering plan, dial plans and priorities
- use networking and network management tools
- configure and test real-time protocols, call management protocols and gateway signalling protocol in the network elements
- implement voice systems and applications.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain codecs and their protocols for use
- summarise configuration, verification and troubleshooting procedures to undertake basic router operation and routing switch with VLANs and inter-switching communications
- outline design considerations and deployment schemes
- explain gateway technologies
- summarise internetwork operating system (IOS) and internet protocol (IP) networking models
- outline procedures and techniques for implementing local area network/wide area network (LAN/WAN) topologies
- explain network topologies, architectures and elements
- identify and describe networking standards and protocols

© Commonwealth of Australia, 2025 Future Skills Organisation

- outline voice applications and protocols
- explain VoIP technologies.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the networking industry, and include access to:

- a site where network installation may be conducted
- hardware and software
- organisational guidelines
- computers
- stand-alone and lightweight wireless local area network (WLAN) controllers and access point (AP)
- hardware and software local area network LAN/WLAN voice technologies.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTNWK611 Configure call processing network elements for secure VoIP networks

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to use tools, equipment, software and protocols to install or upgrade call processing network elements for secure and reliable internet protocol (IP)-based communications networks.

It applies to individuals with advanced information communications technology (ICT) skills who are working as advanced voice over internet protocol (VoIP) network support specialists, VoIP network engineers and VoIP systems installers.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Networking

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan to implement enterprise IP communications	1.1 Produce design considerations for planning and implementing IP-based voice communications networks 1.2 Produce a solutions plan to meet business expectations 1.3 Select the required resources to effectively install or upgrade voice management servers

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.4 Perform, test and evaluate the installation or upgrade of voice call management software against the solutions plan
2. Plan, configure and test call processing network elements for a single-site deployment	2.1 Produce a topology of the voice network and plan the location of the call processing network elements to best support the business requirements 2.2 Install and test voice servers to support user requirements, third-party session initiation protocol (SIP) phones and lightweight directory access protocol (LDAP) integration 2.3 Install and configure local area network (LAN) switches to support IP phones 2.4 Configure and test voice gateways according to gateway requirements to allow for internal calls and external calls and provide voice features 2.5 Configure and test the integration of voice servers with other media systems 2.6 Test and evaluate final configuration against the design requirements
3. Manage security and privacy of IP voice network	3.1 Produce design and installation templates for bulk deployment across the enterprise 3.2 Research and implement the use of a network support model to manage the performance and security of the IP voice network 3.3 Design and conduct simple security deployment scenarios to test the integrity and security of the voice network

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.4, 2.4, 2.6, 3.2	• Recognises and interprets complex technical information to determine and adhere to design requirements
Writing	1.1, 1.2, 2.1, 3.1	• Develops a broad range of material, including planning documentation, design and installation templates for a specific audience using clear and detailed language to

© Commonwealth of Australia, 2025 Future Skills Organisation

		convey explicit information, requirements and recommendations
Numeracy	1.3, 1.4, 2.2, 2.4-2.6	• Interprets numerical data in planning phase and undertakes measurements to evaluate performance and interoperability of network • Uses mathematical formulas and calculations to estimate and plan resource requirements
Get the work done	1.1, 1.3, 1.4, 2.1-2.6, 3.2	• Demonstrates a sophisticated understanding of principles, concepts, language and practices associated with the digital world, and uses these to troubleshoot and understand the uses and potential of new technology • Uses a broad range of strategies to store, access and organise virtual information, recognising that design choices will influence what information is retrieved and how it may be interpreted and used • Is acutely aware of the importance of understanding, monitoring and controlling access to digitally stored and transmitted information • Uses a mix of intuitive and formal processes to identify key information and issues, evaluate alternative strategies, anticipate consequences and consider implementation issues and contingencies • May use formal analytical and lateral thinking techniques for identifying issues and generating and evaluating possible solutions

Assessment Requirements for ICTNWK611 Configure call processing network elements for secure VoIP networks

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- produce design plan and requirements of call processing network elements
- configure and test voice gateways and local area network (LAN) switches
- evaluate voice call manager server requirements and design voice call systems and applications
- implement voice systems and applications on voice call manager
- manage security of voice network.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise call processing network element technology
- outline codecs and their protocols for use
- explain configuration, verification and troubleshoot procedures to undertake:
  - basic router operation and routing
  - switch with virtual local area network (VLANs) and inter-switching communications
- summarise design considerations and deployment schemes
- explain interoperability of legacy private branch exchange (PBX) to internet protocol (IP) voice communications
- outline internetwork operating system (IOS) and IP networking and network support models
- summarise LAN and wide area network (WAN) implementations
- outline network topologies, architectures and elements
- summarise network, signalling and call management protocols

© Commonwealth of Australia, 2025 Future Skills Organisation

- outline networking standards and protocols
- summarise security deployment scenarios
- explain voice applications and protocols
- outline voice over internet protocol (VoIP) technologies.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the networking industry, and include access to:

- site where network installation may be conducted
- hardware and software
- organisational guidelines
- computers
- stand-alone and lightweight WLAN controllers and access points (AP)
- hardware and software LAN/WLAN voice technologies.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTNWK612 Plan and manage troubleshooting advanced integrated IP networks

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to plan, manage and implement troubleshooting and monitoring strategies to ensure reliability and performance on advanced integrated internet protocol (IP) networks.

It applies to individuals with advanced information and communications technology (ICT) skills who are working as advanced support engineers, network support specialists and ICT network engineers.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Networking

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan the strategies for troubleshooting and monitoring the performance of advanced integrated IP networks	1.1 Develop a plan to monitor and manage the IP network to optimise its performance and reliability 1.2 Plan the isolation of network segments for troubleshooting procedures 1.3 Plan the testing sequences and scenarios of network

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	infrastructure 1.4 Select appropriate network testing and monitoring tools, and software application to suit the specific network troubleshooting and monitoring sequence
2. Manage and monitor troubleshooting strategies for complex enterprise networks	2.1 Manage and monitor strategies for network monitoring structure 2.2 Produce a routine internetwork operating system (IOS) device maintenance plan to include monitoring of routing protocols and router configurations 2.3 Isolate sub-optimal internetwork operations at the appropriate open systems interconnection (OSI) model layer 2.4 Produce a plan for troubleshooting and monitoring security issues related to IOS services for mission critical applications 2.5 Produce a plan for troubleshooting and monitoring internet protocol version 6 (IPv6) and version 4 (IPv4) interoperability
3. Implement test plans for advanced network solutions	3.1 Test switch-to-switch connectivity, access ports and loop prevention for the virtual local area network (VLAN) based solution 3.2 Test private VLANs 3.3 Test switch virtual interfaces (SVI) 3.4 Test switch support of advanced services 3.5 Troubleshoot switch configuration

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2-1.4, 2.2, 2.4, 2.5	• Organises, evaluates and critiques ideas and information from a range of complex texts
Writing	1.1, 2.2, 2.4, 2.5	• Develops a broad range of material, including troubleshooting plans for a specific audience, using clear and detailed language to convey explicit information, requirements and recommendations

© Commonwealth of Australia, 2025 Future Skills Organisation

Numeracy	3.1-3.4	• Interprets numerical data when testing plans for advanced network solutions, including taking measurements to evaluate performance and interoperability of network
Get the work done	1.2-1.4, 2.1-2.5, 3.1-3.4	• Demonstrates a sophisticated understanding of principles, concepts, language and practices associated with the digital world and uses these to troubleshoot and understand the uses and potential of new technology • Is acutely aware of the importance of understanding, monitoring and controlling access to digitally stored and transmitted information • Uses a mix of intuitive and formal processes to identify key information and issues, evaluate alternative strategies, anticipate consequences and consider implementation issues and contingencies • When dealing with complex issues, may use intuition to identify the general problem area, switching to analytical processes to generate possible solutions depending on differing operational contingencies, risk situations and environments

Assessment Requirements for ICTNWK612 Plan and manage troubleshooting advanced integrated IP networks

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- plan and monitor internet protocol (IP) networks for performance and reliability
- evaluate, design and implement a troubleshooting structured plan
- use network testing and monitoring tools
- produce a maintenance plan for monitoring routing protocols and configurations
- implement tests of advanced network solutions.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise advanced network solutions
- explain configuration, verification and troubleshoot procedures to undertake:
  - router operation and routing
  - virtual local area networks (VLANs) switching and inter-switching communications
- outline deployment schemes
- explain iDevice operating system (iOS) and IP networking models
- explain IOS services
- explain IP network topologies, architectures and elements
- identify and describe network testing and monitoring tools
- outline networking standards and protocols
- summarise threat mitigation strategies
- outline VLAN technologies.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the networking industry, and include access to:

- a site where complex network installation may be conducted
- hardware and software
- organisational guidelines
- computers
- local area network (LAN) and wide area network (WAN) systems, including voice and video hardware and software.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTNWK613 Develop plans to manage structured troubleshooting process of enterprise networks

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to manage the maintenance of a complex integrated enterprise network to ensure availability and performance standard.

It applies to individuals with advanced information and communications technology (ICT) skills who are working in a wide range of roles including network specialists, network engineers, network infrastructure engineers, senior network administrators, network and systems managers, ICT security specialists, security engineers, communications engineers and communications managers.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Networking

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan the strategies for structured troubleshooting and monitoring of enterprise networks	1.1 Develop strategies to monitor and manage an enterprise network to ensure availability and performance standard 1.2 Conduct equipment and skills audits as required 1.3 Evaluate the business value of service level agreements (SLAs), formal maintenance plans and monitoring procedures

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	against best practices for maintenance and fault procedures 1.4 Assign functional responsibilities to stakeholders according to the maintenance plan 1.5 Select and use appropriate network fault management tools and monitor and improve network performance
2. Manage and monitor structured troubleshooting strategies for complex enterprise networks	2.1 Implement structured network maintenance management processes and procedures in line with enterprise design plans and policies for ensuring high network reliability 2.2 Undertake risk assessment evaluation and rank threats for minimal impact 2.3 Develop and implement disaster recovery strategies for reliable contingencies and business continuity in a complex routing environment 2.4 Measure and analyse performance against an agreed baseline
3. Conduct structured network troubleshooting strategies	3.1 Analyse and troubleshoot layer 2 and 3 switch configuration to ensure the availability and resilience of a switched environment 3.2 Implement effective control of broadcast and multicast traffic in a switched environment 3.3 Analyse and troubleshoot scalable network layer connectivity with routing data structures and routing functions 3.4 Analyse and troubleshoot enterprise intra and internetwork routing protocols, architectures and processes 3.5 Analyse and troubleshoot route redistribution operations in inter-autonomous system routing architectures and processes 3.6 Test and manage internet protocol version 6 (IPv6) and version 4 (IPv4) addressing schema and verify internal and external internet protocol (IP) address translation standards 3.7 Analyse and troubleshoot communication filtering techniques, automated address allocation systems and IPv6 operational issues in the context of enterprise routing protocols 3.8 Analyse and troubleshoot wireless network configuration issues 3.9 Analyse and resolve network performance issues in an integrated voice or video network

© Commonwealth of Australia, 2025 Future Skills Organisation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.3, 1.4, 2.1	• Identifies, analyses and evaluates complex text to determine all technical, regulatory and business requirements
Writing	1.1, 2.2, 2.3	• Develops a broad range of operational material for a specific audience, using clear and detailed language to convey explicit information, requirements and recommendations
Oral Communication	1.4	• Initiates and contributes to a range of complex conversations about technical concepts and issues relevant to personnel, responding, clarifying, explaining and expanding on information as required
Numeracy	1.2, 1.3, 2.4	• Interprets numerical data when testing plans for advanced network solutions, including taking measurements to evaluate performance and interoperability of network
Navigate the world of work	2.1	• Recognises protocols and policies that must be respected and maintained
Get the work done	1.1, 1.3-1.5, 2.1-2.4, 3.1-3.9	• Recognises the critical importance of clarifying, focussing and aligning goals and expectations, and may use the process to build ownership of and broad commitment to achieving outcomes • Demonstrates a sophisticated understanding of principles, concepts, language and practices associated with the digital world and uses these to troubleshoot and understand the uses and potential of new technology • Is acutely aware of the importance of understanding, monitoring and controlling access to digitally stored and transmitted information • When dealing with complex issues, may use intuition to identify the general problem area, switching to analytical processes to generate possible solutions, depending on differing operational contingencies, risk situations and environments

Assessment Requirements for ICTNWK613 Develop plans to manage structured troubleshooting process of enterprise networks

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- analyse, document and troubleshoot a given complex network using industry methodologies and resources
- develop monitoring and management plans
- use networking and network fault management tools
- evaluate risk assessments and minimise threats on enterprise networks.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline benefits of a formal or structured approach to network management
- explain disaster recovery strategies
- summarise emerging viable business and social technologies
- outline enterprise network technologies, design plans and policies
- summarise enterprise network topologies, architectures and elements
- outline external developments or factors that affect network design
- explain internet protocol version 4 (IPv4) and internet protocol version 6 (IPv6) addressing configurations
- outline maintenance and fault procedures
- explain maintenance and management tools and practices suitable for complex networks
- outline networking standards and protocols
- summarise risk management strategies and practices suitable for a complex network environment
- clarify routing and routed protocols

© Commonwealth of Australia, 2025 Future Skills Organisation

- outline routing and switching technologies for an enterprise environment
- summarise security for enterprise networks
- outline security standards and technologies for network environments
- explain service level agreements (SLAs)
- describe the value and process of conducting a skills audit
- explain troubleshooting and threat mitigation strategies.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the networking industry, and include access to:

- a location where the network configuration can be implemented
- routers and switches with appropriate operating systems
- computers
- suitable testing and analysis tools.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTNWK615 Design and configure desktop virtualisation

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to design, and configure, the desktop virtualisation technologies needed to support an enterprise virtualisation business solution.

It applies to senior networking staff responsible for increasing the sustainability of an enterprise.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Networking

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare the design specifications and plan to implement enterprise desktop environments	1.1 Research the available desktop virtualisation software vendors 1.2 Evaluate the desktop virtualisation environment 1.3 Analyse and compare, the features and components of desktop virtualisation environment 1.4 Identify the desktop-specific design objectives, requirements and limitations 1.5 Document the design infrastructure, according to the

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	enterprise requirements 1.6 Plan implementation and deployment, using the recommended design
2. Implement and configure the desktop virtualisation infrastructure and services	2.1 Assess the desktop virtualisation software and analyse its relevance to the enterprise requirements 2.2 Install and configure the desktop virtualisation environment 2.3 Implement specific features and functions, in order to provide suitable solutions to identified problems 2.4 Implement and manage the testing process 2.5 Apply desktop virtualisation technologies, to an accepted industry standard
3. Implement the application virtualisation	3.1 Plan the implementation and deployment of the application virtualisation software 3.2 Configure and test the application virtualisation system's components 3.3 Maintain, update and tune, the system's components

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3, 2.1	• Organises, evaluates and critiques ideas, and information, from a wide range of complex texts
Writing	1.5, 3.1	• Demonstrates sophisticated writing skills by selecting the appropriate conventions and stylistic devices, to express the precise meaning
Navigate the world of work	1.5, 2.1, 2.5	• Works autonomously, making high-level decisions to achieve, and improve, organisational goals • Develops and implements strategies that ensure that organisational policies, procedures and regulatory requirements are being met
Get the work done	1.2-1.4, 1.6, 2.2-2.5, 3.2, 3.3	• Plans strategic priorities and outcomes within a flexible, efficient and effective context, in a diverse environment exposed to competing demands

© Commonwealth of Australia, 2025 Future Skills Organisation

		• Makes high-impact decisions in a complex and diverse environment, using input from a range of sources • Identifies the key factors that impact on decisions and their outcomes, drawing on experience, competing priorities, and decision- making strategies, where appropriate • Uses digital technologies to manage business operations, and actively investigates new technologies for strategic and operational purposes

Assessment Requirements for ICTNWK615 Design and configure desktop virtualisation

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- design, configure and manage the implementation of the virtualised enterprise desktop environment
- analyse and critically evaluate, the features and functions of the virtualised enterprise desktop environment
- plan, configure and maintain, the application virtualisation software.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- research current government and industry policies, and guidelines, relating to the development of efficient and reliable, information and communications technology (ICT) environments
- research the current technologies and processes designed to produce an efficient and reliable ICT environment
- determine the structure, functions and business organisation of the client
- identify and apply, the available tools and software applications required to manage the virtual desktop environment
- formulate the configuration of software applications required to manage the virtual desktop environment
- formulate the configuration required to integrate virtual machines into the existing network design.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the network industry, and include access to:

- a site where industry-specific technologies may be used
- industry-specific technologies currently used in the industry
- documents detailing workplace health and safety (WHS) standards, environmental guidelines and enterprise requirements.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTOPN403 Prepare activity plans and specifications for a fibre to the x installation

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to prepare the activity plans and specifications required by field technical staff to deploy a fibre to the x (FTTx) installation for optical access networks.

It applies to individuals who work in a supervisory capacity within a team environment. They are technically skilled and integral to the delivery of a very high speed broadband through the access network for the National Broadband Network (NBN) initiative.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Optical Networks

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for FTTx planning tasks	1.1 Obtain relevant legislation, codes, regulations and standards for compliance when conducting work 1.2 Scope work by obtaining project plan from appropriate personnel and arrange for site access to comply with security arrangements

© Commonwealth of Australia, 2025 Future Skills Organisation

	1.3 Notify appropriate personnel of identified safety hazards at the worksite 1.4 Obtain tools and safety equipment and material to perform tasks safely and efficiently 1.5 Select and use required protective equipment and make site safe and secure for installation work 1.6 Identify and select plant and machinery for installation work activities
2. Plan FTTx activities and develop specifications	2.1 Follow work health and safety (WHS) and environmental requirements for given work and identify and avoid other services 2.2 Inspect proposed cable route visually according to cable plan and identify barriers to the cable installation 2.3 Modify cable plan, if required, and notify appropriate personnel 2.4 Prepare installation activities for FTTx provisioning according to project plan 2.5 Prepare installation specifications according to safe work practices and manufacturer's instructions to include optical fibre cable size, distribution area (DA), distribution joint including lead-in multiport serving area (DLMSA), enclosures, location of optical network terminations (ONT), location and type of fibre distribution hub (FDH) and optical splitter provisioning 2.6 Verify cable length from customer access network fibre centre to end-user ONT is within 20 km operating limit 2.7 Consult with appropriate personnel to confirm project scope, installation requirements and installation specifications according to project plan
3. Complete documentation and obtain sign-off	3.1 Complete and present updated planning activities documentation to authorised personnel 3.2 Complete and provide updated specification documentation to vendors for supply of material and resources 3.3 Submit documentation to appropriate person for approval and sign-off

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

© Commonwealth of Australia, 2025 Future Skills Organisation

Reading	1.1, 2.2, 2.5, 2.7	• Interprets textual information from relevant sources to plan, identify all job requirements and adhere to procedures and standards
Writing	1.2, 1.3, 2.3, 2.7, 3.1, 3.2	• Accurately completes relevant reports and documentation using clear and technically specific language and numerical data
Oral Communication	1.2, 1.3, 2.3, 2.6, 2.7, 3.1	• Uses listening and questioning skills to confirm understanding of requirements, participates in a verbal exchange of ideas and solutions and uses appropriate, detailed and clear language to address key personnel and customers
Numeracy	2.6	• Uses simple mathematical equations to determine equipment and installation requirements
Navigate the world of work	1.1, 1.3-1.5, 2.1, 2.5	• Understands nature and purpose of own role and associated responsibilities and how it contributes to the work of others in the immediate work context • Takes personal responsibility for adherence to legal and regulatory responsibilities relevant to own work context with specific reference to workplace safety
Interact with others	3.1-3.3	• Selects appropriate form, channel and mode of communication for a specific purpose relevant to own role
Get the work done	1.2, 1.4-1.6, 2.2, 2.4, 2.6, 2.7	• Takes responsibility for own workload, negotiating some key aspects with others • Develops plans to manage relatively complex, non-routine tasks with an awareness of how they may contribute to longer term operational and strategic goals • Makes decisions in relatively complex situations, taking a range of constraints into account • Recognises and takes responsibility for addressing predictable and some less predictable problems in familiar work contexts • Reflects on ways digital systems and tools are used, or could be used to achieve work goals and begins to recognise strategic as well as operational applications

Assessment Requirements for ICTOPN403 Prepare activity plans and specifications for a fibre to the x installation

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- determine the scope of the installation
- visually inspect proposed cable route
- prepare installation activities for fibre to x (FTTx) provisioning
- prepare and document FTTx designs and specifications and submit for approvals
- comply with all related work health and safety (WHS) requirements and work practices.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline properties of passive optical devices, including splitters and couplers
- identify FTTx installation equipment, including tools and safety equipment
- explain FTTx specifications
- outline legislative privacy, safety and environmental requirements including:
  - WHS requirements relating to handling of optical fibre and using laser optical sources
  - other personal safety issues
  - plant and equipment safety to be used in installation plans
  - discussion of manufacturer’s requirements for safe operation of equipment
- summarise operation of optical transmitters and receivers
- identify organisational policy and procedures relevant to this work
- discuss propagation of light in optical communication systems
- summarise the role of optical transmitters and receivers in optical communication systems
- explain the concept of wavelength division multiplexing (WDM)

© Commonwealth of Australia, 2025 Future Skills Organisation

- discuss the importance of a knowledge of site engineering
- describe typical issues and challenges in preparing an activity plan for a site
- demonstrate a knowledge of the workplace and industry environment and their relationship to this work.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the Telecommunications \-– Optical Networks field of work and include access to:

- vendor product information and installation guides
- relevant regulatory and equipment documentation impacting installation activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTOPN501 Plan and configure dense wavelength division multiplexing systems

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to prepare activity plans and specifications required to deploy a dense wavelength division multiplexing (DWDM) optical network suitable for a metropolitan area network (MAN) or long haul applications.

It applies to individuals who work as members of a team and use high-level communication and technical skills to provide services in Next Generation Networks (NGN) using emerging technologies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Optical Networks

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for DWDM planning activities	1.1 Obtain relevant legislation, codes, regulations and standards for compliance when conducting work 1.2 Scope the work by obtaining project plan from appropriate personnel and arrange for site access to comply with security arrangements

© Commonwealth of Australia, 2025 Future Skills Organisation

	1.3 Notify appropriate personnel of identified safety hazards at the worksite
2. Plan DWDM installation activities and develop specifications	2.1 Follow work health and safety (WHS) and environmental requirements for given work and identify and avoid other services 2.2 Identify tools, safety equipment, plant and machinery for installation work activities 2.3 Conduct physical inspections of proposed DWDM sites and verify backbone dark fibre is accessible and available according to cabling plan 2.4 Verify proposed backbone and customer fibre cable routes to splicing cabinet and fibre patch panel, and identify barriers to cable installation 2.5 Verify proposed power cabling route from distribution board and circuit breakers, and identify barriers to cable installation 2.6 Modify cable plan if required and notify appropriate personnel 2.7 Prepare fibre installation specifications and power cable and grounding specifications according to cabling plan and safe work practices and manufacturer's instructions 2.8 Verify proposed location of associated hardware racks, cabinets and ironwork, and confirm access to enterprise local area network (LAN)
3. Prepare DWDM shelf configuration and specifications according to customer requirements	3.1 Prepare a configuration document including configuration plans and specifications for the installation team 3.2 Specify location of DWDM shelves or racks and the shelf interconnection fibre cabling layout according to cabling plan 3.3 Specify individual DWDM units and circuit card types required to suit customer requirements
4. Plan preliminary optical tests	4.1 Verify backbone fibres at patch panel and conduct bidirectional optical time domain reflectometer (OTDR) test and record measurement results and OTDR images 4.2 Conduct bidirectional optical loss test set (OLTS) measurement of insertion loss on backbone fibres from patch panel to patch panel at adjacent sites and record measurement results
5. Complete documentation and obtain sign-off	5.1 Provide results of optical measurements to design team 5.2 Complete and provide updated specification documentation to installation team 5.3 Submit documentation to appropriate person for approval and sign-off

© Commonwealth of Australia, 2025 Future Skills Organisation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 2.1, 2.3, 2.7, 3.2	• Interprets textual information from relevant sources to identify and plan for all job requirements and to adhere to procedures and standards
Writing	1.2, 1.3, 2.6, 3.1, 4.1, 4.2, 5.1, 5.2	• Accurately completes relevant reports and documentation using clear and technically specific language, numerical data and diagrammatic information
Oral Communication	1.2, 1.3, 2.6, 5.1	• Uses listening and questioning skills to confirm understanding for requirements, participates in a verbal exchange of ideas and solutions and uses appropriate, detailed and clear language to address key personnel, contractors, vendors and clients
Numeracy	2.7, 4.1, 4.2, 5.1	• Uses mathematical equations to evaluate technical data to calculate required settings and make adjustments
Navigate the world of work	1.1, 2.1, 2.7	• Understands how own role meshes with others and contributes to broader work goals • Monitors adherence to legal and regulatory rights and responsibilities with specific reference to safe industry practices
Interact with others	5.3	• Actively identifies requirements of important communication exchanges, selecting appropriate channels, format, tone and content to suit purpose and audience and monitoring impact
Get the work done	1.1, 1.2, 2.2-2.5, 2.8, 3.2, 3.3, 4.1, 4.2	• Develops plans to manage relatively complex, non-routine tasks with an awareness of how they may contribute to longer term operational and strategic goals • Makes a range of critical and non-critical decisions in relatively complex situations, taking a range of constraints into account • Demonstrates a sophisticated understanding of principles, concepts, language and practices associated with the digital world

Assessment Requirements for ICTOPN501 Plan and configure dense wavelength division multiplexing systems

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- plan and develop all required dense wavelength division multiplexing (DWDM) installation activities according to all work health and safety (WHS) and job specifications
- prepare all DWDM shelf configurations and specifications
- plan preliminary optical tests
- complete project and acceptance documentations and submit for approval.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain configuration of DWDM shelf
- summarise principles of DWDM operations
- manage risk of electrostatic discharge
- summarise features and operating requirements of the following test equipment:
  - hand-held optical power meter
  - optical spectrum analyser
  - optical time domain reflectometer (OTDR)
  - transmission test set
- describe functions of an optical add drop multiplexer
- explain the role of the following in planning and configuration of DWDM systems internet protocol (IP) addressing:
  - subnet mask
  - dynamic host configuration protocol (DHCP)

© Commonwealth of Australia, 2025 Future Skills Organisation

  - default gateway
- explain International Telecommunications Union (ITU) wavelength grid for DWDM
- identify optical fibre connector types and discuss their characteristics
- identify optical fibre types and discuss their characteristics
- explain path protection and protection switching
- summarise physical optical loopbacks and software loopbacks used to assist with testing DWDM systems
- identify protocols used on optical DWDM systems
- discuss the use of ring topologies and linear network topologies in DWDM system cable routes
- explain specific work health and safety (WHS) requirements that impact safe inspection of optical connectors and safe measurement of optical power from laser transmission systems.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the Telecommunications – Optical Networks field of work and include access to:

- test equipment currently used in industry
- manufacturer’s technical documentation
- relevant regulations and specifications.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTOPN502 Perform acceptance and commissioning tests on optical network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to conduct acceptance tests and commissioning tests on optical networks, including the optical portion of broadband hybrid fibre coaxial (HFC) networks, fibre to the x (FTTx) passive optical networks (PONs) and metropolitan and long haul dense wavelength division multiplexing (DWDM) networks.

It applies to individuals who work as members of a team and use high-level communication and technical skills to provide services in Next Generation Networks (NGN) using emerging technologies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Optical Networks

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to conduct	1.1 Obtain installation and commissioning documents and planning specifications from appropriate personnel to ensure installed optical

Assessment Requirements for ICTOPN502 Perform acceptance and commissioning tests on optical network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- verify ‘as built’ installation against installation plans
- undertake acceptance and commissioning tests and analysis against specified installation and commissioning documents
- complete and submit all acceptance documentation incorporating test procedures, results and recommendations
- comply with all related work health and safety (WHS) requirements and work practices.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify cabling, terminations and supporting structures that may be encountered in the system under inspection
- outline common performance levels and standards
- describe electrical and optical properties to be measured
- explain health and safety issues appropriate to the work environment under inspection
- summarise typical network topologies, switching, routing and transmission techniques
- discuss transmission type and signals that may be encountered
- identify various test equipment types suitable for tests to be made.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the Telecommunications – Optical Networks field of work and include access to:

- testing equipment currently used in industry
- relevant regulatory and equipment documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTOPN503 Plan for an optical system upgrade and cut over

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to plan the activities of a major upgrade of optical systems from specifications provided by the planning and design section or its equivalent. Major upgrades in enterprise networks or a telecommunications service provider's network involve cut over activities to integrate additional work into the existing network.

It applies to individuals who work as members of a team and use high-level communication and technical skills to provide services in Next Generation Networks (NGN) using emerging technologies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Optical Networks

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Gather information to prepare upgrade activity plan	1.1 Obtain relevant legislation, codes, regulations and standards for compliance when conducting work 1.2 Obtain design specifications from the planning and design section to

© Commonwealth of Australia, 2025 Future Skills Organisation

	determine scope and nature of the upgrade 1.3 Analyse the design specification and design plan, and determine accuracy of the design plan to site installation and requirements with customer 1.4 Determine network equipment types and obtain installation details from manufacturer 1.5 Prepare an equipment and component list and source vendors for procurement
2. Prepare upgrade activity plans	2.1 Prepare a detailed installation plan of the upgrade for the installer 2.2 Prepare a detailed installation procedure to carry out the upgrade to minimise impact to customer 2.3 Prepare pre-installation optical tests on existing equipment to determine benchmarks and performance levels prior to the upgrade 2.4 Prepare post-installation optical tests on upgrade to ensure upgraded system is achieving desired results 2.5 Prepare monitoring schedule to progressively assess upgrade progress 2.6 Prepare contingency plan for backing out if upgrade is not progressing according to schedule and disruptions to customer are excessive 2.7 Prepare cut over procedures
3. Complete documentation	3.1 Update documentation 3.2 Submit planning activity document for approval

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	**Performance Criteria**	**Description**
Reading	1.1, 1.3	• Interprets textual information from relevant sources to identify and plan for all job requirements and adhere to procedures and standards
Writing	1.5, 2.1, 2.2, 2.5-2.7, 3.1-3.2,	• Accurately completes relevant reports and documentation using clear and technically specific language, numerical data and

© Commonwealth of Australia, 2025 Future Skills Organisation

		diagrammatic information
Oral Communication	1.2	• Uses listening and questioning skills to confirm understanding of requirements, participates in a verbal exchange of ideas and solutions and uses appropriate, detailed and clear language to address key personnel
Numeracy	2.3, 2.4, 2.6	• Uses mathematical equations to evaluate technical data • Uses basic arithmetic to determine work schedules
Navigate the world of work	1.1	• Understands how own role meshes with others and contributes to broader work goals • Monitors adherence to legal and regulatory rights and responsibilities with specific reference to safe industry practices
Interact with others	3.1, 3.2	• Actively identifies requirements of important communication exchanges, selecting appropriate channels, format, tone and content to suit purpose and audience and monitoring impact
Get the work done	1.1-1.5, 2.1-2.7	• Develops plans to manage relatively complex, non-routine tasks with an awareness of how they may contribute to longer term operational and strategic goals • Takes responsibility for high-impact decisions in complex situations involving many variables and constraints • Demonstrates a sophisticated understanding of principles, concepts, language and practices associated with the digital world and uses these to troubleshoot and understand uses and potential of new technology • When dealing with complex issues, may use intuition to identify the general problem area, switching to analytical processes to clarify goals and key issues and using lateral thinking processes to generate possible solutions

Assessment Requirements for ICTOPN503 Plan for an optical system upgrade and cut over

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- prepare upgrade plan incorporating the following:
  - a detailed installation plan and installation procedures
  - pre-installation and post-installation test methods and results
  - a monitoring schedule to assess progress of the upgrade
  - a contingency plan.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain alarms and backup systems that apply to optical networks
- describe escalation and outage procedures
- explain network management systems
- outline fundamentals of telecommunications networks and equipment
- summarise telecommunications monitoring tools
- outline telecommunications test equipment and test setups
- evaluate telecommunications wiring practices
- explain upgrade and post-upgrade routines.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the Telecommunications – Optical Networks field of work and include access to:

- a site where upgrade and cut over may be planned
- equipment, software, test and monitoring equipment currently used in industry
- relevant regulatory, equipment, enterprise and vendor documentation that impacts work activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTOPN504 Test and commission a dense wavelength division multiplexing transmission system

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to test and commission optical transmission systems using dense wavelength division multiplexing (DWDM) technology.

It applies to individuals who work with telecommunications carriers, service providers, public utilities and broadcasting companies. They combine technical optical communications skills with broader organisational and administrative skills in a range of commercial contexts and environments.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Optical Networks

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to commission DWDM transmission	1.1 Implement hazard risk control measures 1.2 Review system specifications and technical data by identifying system operating parameters

© Commonwealth of Australia, 2025 Future Skills Organisation

system	1.3 Obtain and check tools and test equipment needed for the work 1.4 Verify all necessary equipment is installed, and circuit cards and filler cards are correctly located and seated 1.5 Check interconnecting fibres to optical multiplexers and shelves are intact and correctly routed 1.6 Establish communication between computer and DWDM shelf 1.7 Upload latest software release to each DWDM shelf in the network
2. Commission DWDM transmission system	2.1 Connect an optical test set and a physical optical loopback to the system, and select protocol compatible with DWDM hardware 2.2 Check connection status and that test set data is passing correctly 2.3 Monitor quality of received signal by setting performance monitoring (PM) features and retrieve PM counts 2.4 Verify no errors are counted by the test set during a long term stability test while customer input signal is set to the worst case (minimum) power level 2.5 Verify no alarms are generated during long term stability test period 2.6 Dispose of antistatic packaging to minimise environmental impact
3. Complete test and commissioning documentation	3.1 Finalise documentation on commissioning test results 3.2 Present results to appropriate person according to established procedures

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	**Performance Criteria**	**Description**
Reading	1.2, 3.2	• Interprets textual information from relevant sources to identify and plan for all job requirements and adhere to procedures and standards
Writing	3.1, 3.2	• Accurately completes relevant reports and documentation using clear and technically specific language and numerical data
Oral Communication	3.2, 3.2	• Uses listening and questioning skills to confirm understanding for requirements, participates in a verbal exchange of ideas and solutions, and uses

© Commonwealth of Australia, 2025 Future Skills Organisation

		appropriate, detailed and clear language to address key personnel and clients
Numeracy	1.2, 2.3	• Uses mathematical equations to evaluate technical data and interpret results
Navigate the world of work	2.6, 3.2	• Takes full responsibility for following policies, procedures and legislative requirements, and identifies organisational implications of new legislation or regulation
Get the work done	1.1, 1.3-1.7, 2.1-2.6	• Accepts responsibility for planning and sequencing complex tasks and workload, negotiating key aspects with others taking into account capabilities, efficiencies and effectiveness • Monitors progress of plans and schedules and reviews and changes them to meet new demands and priorities

Assessment Requirements for ICTOPN504 Test and commission a dense wavelength division multiplexing transmission system

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- plan and coordinate commissioning
- test and commission dense wavelength division multiplexing (DWDM) transmission system
- complete commissioning documentation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain possible causes of alarms in long term stability test
- summarise principles of operation of DWDM
- explain standard electrostatic discharge precautions
- outline features and operating requirements of test equipment including:
  - a hand-held optical power meter
  - a transmission test set
  - an optical spectrum analyser
- describe functions of an optical add drop multiplexer
- explain how to set up the following:
  - internet protocol (IP) addressing
  - subnet mask
  - dynamic host configuration protocol (DHCP)
  - default gateway

© Commonwealth of Australia, 2025 Future Skills Organisation

- summarise the International Telecommunications Union (ITU) wavelength grid for DWDM
- identify optical fibre connector types and characteristics
- identify optical fibre types and characteristics
- explain path protection and protection switching
- summarise physical optical loopbacks and software loopbacks
- describe protocols used on optical DWDM systems
- summarise ring topologies and linear network topologies
- outline specific health and safety requirements that impact the safe inspection of optical connectors and the safe measurement of optical power from laser transmission systems.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the Telecommunications – Optical Networks field of work and include access to:

- test equipment currently used in industry
- manufacturer's technical documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTOPN505 Test the performance of specialised optical devices

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to use specialised equipment for integration into existing optical networks or part of an upgrade for higher bandwidths required by services and applications of Next Generation Networks (NGN).

It applies to individuals who design and plan networks using emerging technologies and who work with telecommunications carriers, service providers, public utilities and broadcasting companies. They combine technical optical communications skills with broader organisational and administrative skills in a range of commercial contexts and environments.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Optical Networks

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to test specialised optical devices	1.1 Obtain relevant legislation, codes, regulations and standards and follow work health and safety (WHS) and environmental requirements for the given work 1.2 Work safely according to relevant safety legislation and company work

© Commonwealth of Australia, 2025 Future Skills Organisation

	practices, identifying hazards and using personal protective equipment 1.3 Determine type of optical device using the design plan and obtain manufacturer's specifications for testing 1.4 Determine test procedures and test equipment required to evaluate optical device suitability
2. Test specialised optical device	2.1 Set up test layout according to safe industry practice and connect specialised optical device into the test set-up 2.2 Undertake a test regime to determine performance characteristics of specialised optical device 2.3 Analyse test results to determine suitability and compatibility of optical device for integration into the network
3. Document performance of specialised optical device	3.1 Prepare evaluation report with recommendations on suitability of the specialised optical device 3.2 Present test results and evaluation report to appropriate person with copies filed for later reference according to organisation's policies

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	**Performance Criteria**	**Description**
Reading	1.1-1.3, 2.3, 3.2	• Interprets textual information from relevant sources to identify and plan for all job requirements and adhere to procedures and standards
Writing	3.1, 3.2	• Accurately completes standard reports and documentation using clear and technically specific language and numerical data
Oral Communication	3.2	• Uses listening and questioning skills to confirm understanding for technical and operational requirements, participates in a verbal exchange of ideas and solutions, and uses appropriate, detailed and clear language to address key internal and external personnel and clients
Numeracy	2.2, 2.3	• Uses mathematical formulae to evaluate technical data and interpret results
Navigate the	1.1, 1.2, 2.1, 3.2	• Works independently with a strong sense of responsibility and ownership of goals,

© Commonwealth of Australia, 2025 Future Skills Organisation

world of world		plans, decisions and outcomes • Monitors adherence to legal and regulatory rights and responsibilities with specific reference to safe industry practices
Interact with others	3.2	• Actively identifies requirements of important communication exchanges, selecting appropriate channels, format, tone and content to suit purpose and audience and monitoring impact
Get the work done	1.1, 1.3, 1.4, 2.2	• Accepts responsibility for planning and sequencing complex tasks and workload, negotiating key aspects with others taking into account capabilities, efficiencies and effectiveness • Takes responsibility for high impact decisions in complex situations involving many variables and constraints • Actively identifies systems, devices and applications with potential to meet current and/or future needs • When dealing with complex issues, may use intuition to identify the general problem area, switching to analytical processes to clarify goals and key issues, using lateral thinking processes to generate possible solutions

Assessment Requirements for ICTOPN505 Test the performance of specialised optical devices

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- plan and coordinate test activities and equipment
- test specialised optical devices and determine suitability for integration into a network
- analyse test results
- report and make recommendations on suitability for integration
- comply with all work health and safety (WHS) requirements and work practices.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain what an amplified spontaneous emission (ASE) source test shows
- summarise attenuation characteristics of optical fibres
- outline the principles of operation for dense wavelength division multiplexing (DWDM)
- identify features and operating requirements of test equipment including:
  - a hand-held optical power meter
  - an optical spectrum analyser
  - a transmission test set
- outline dispersion characteristics of various fibres
- describe dispersion compensation devices
- explain standard electrostatic discharge precautions
- outline functions of an optical add-drop multiplexer (OADM) and reconfigurable optical add-drop multiplexer (ROADM)
- explain gain equalisation

© Commonwealth of Australia, 2025 Future Skills Organisation

- summarise the International Telecommunications Union (ITU) wavelength grid for DWDM
- describe the measurement of dispersion
- explain optical amplifier operation
- name optical fibre connector types and describe their characteristics
- list optical fibre types and describe their characteristics
- explain ‘optical return loss’ (ORL)
- clarify path protection and protection switching
- explain polarisation dependent loss (PDL)
- identify protocols used on optical DWDM systems
- explain reflectance in optical systems
- summarise ring topologies and linear network topologies
- explain specific work health and safety (WHS) requirements that impact the safe inspection of optical connectors and the safe measurement of optical power from laser transmission systems
- discuss tuneable laser sources and their characteristics.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the Telecommunications – Optical Networks field of work and include access to:

- test equipment currently used in industry
- manufacturer’s technical documentation, legislation, codes and standards.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTOPN506 Analyse and integrate specialised optical devices in the network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to analyse and integrate specialised optical devices into existing optical networks to support higher bandwidths associated with Next Generation Networks (NGN).

It applies to individuals who work for telecommunications carriers, service providers or other private and public organisations, who have experience in optical transmission. They combine technical expertise with a range of analytical, research and planning skills to develop integration solutions for particular business needs.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Optical Networks

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Analyse specialised optical device and prepare for integration in the	1.1 Obtain relevant legislation, codes, regulations and standards and follow work health and safety (WHS) and environmental requirements for the project work 1.2 Work safely according to relevant safety legislation and company

© Commonwealth of Australia, 2025 Future Skills Organisation

network	work practices, identifying hazards and using personal protective equipment 1.3 Obtain plans and drawings of existing optical network from appropriate person and review potential locations for suitability of integrating additional hardware 1.4 Analyse and evaluate a range of integration options using device specifications which satisfy the customer's network requirements 1.5 Prepare and submit the business case for adopting recommended integration solution 1.6 Prepare design plan with interconnection details to existing system and installation options and seek approval to proceed from customer 1.7 Undertake an impact risk assessment of the hardware integration with the network operations centre (NOC) and prepare for contingencies using contingency plan
2. Integrate specialised optical device in the network	2.1 Install and integrate specialised optical devices into existing network according to design plan 2.2 Test the network and evaluate results to verify optical network performance with integrated specialised optical devices in operation
3. Document integration of the specialised optical device in dense wavelength division multiplexing (DWDM) network	3.1 Produce an updated design plan and submit to customer with copies filed for later reference according to organisation's policies 3.2 Prepare an evaluation report on network performance with specialised optical devices with recommendations for future enhancements 3.3 Notify NOC of job completion and obtain sign-off from appropriate person

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	**Performance Criteria**	**Description**
Reading	1.1, 1.2, 1.4, 1.7, 2.1, 3.1	• Interprets textual information from relevant sources to identify and plan for all job requirements and adhere to procedures and standards

ICTOPN601 Manage optical ethernet transmission

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to manage an ethernet optical transmission system. It includes analysis of fault conditions that may occur.

It applies to individuals who work as members of a team with carrier telecommunications networks using optical technologies. Individuals in these roles are excellent communicators and skilled technicians.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Optical Networks

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan to test optical ethernet link	1.1 Make worksite safe by identifying existing and potential site hazards 1.2 Determine the technical environment and network components 1.3 Report on infrastructure to ensure link is designed to meet performance requirements

© Commonwealth of Australia, 2025 Future Skills Organisation

2. Specify architecture requirements	2.1 Follow site specific safety requirements and enterprise work health and safety (WHS) procedures 2.2 Determine architecture components 2.3 Determine functions and framework for the system to operate across network boundaries, taking into account performance criteria
3. Manage optical ethernet link	3.1 Conduct work in context of appropriate tests 3.2 Analyse test results 3.3 Provide a report on test results and compare with expected outcomes 3.4 Document test results and refer to appropriate person

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	**Performance Criteria**	**Description**
Reading	2.1, 2.3, 3.2	• Interprets textual information from relevant sources to identify and plan for all job requirements and adhere to procedures and standards
Writing	1.3, 3.3, 3.4	• Accurately completes standard reports and documentation using clear and technically specific language and numerical data
Oral Communication	1.3	• Uses listening and questioning skills to confirm understanding of technical and operational requirements • Participates in a verbal exchange of ideas and solutions and uses appropriate, detailed and clear language to address internal and external personnel and clients
Numeracy	3.2	• Uses mathematical formulae to evaluate technical data and interpret results
Navigate the world of work	1.1, 2.1, 3.1	• Works independently within parameters with a strong sense of responsibility and ownership of goals, plans, decisions and outcomes • Monitors adherence to legal and regulatory

© Commonwealth of Australia, 2025 Future Skills Organisation

		rights and responsibilities with specific reference to safe industry practices
Interact with others	3.4	• Actively identifies requirements of important communication exchanges, selecting appropriate channels, format, tone and content to suit purpose and audience and monitoring impact
Get the work done	1.2, 2.2, 2.3	• Sequences and schedules complex activities, monitors implementation and manages relevant communication • Takes responsibility for high-impact decisions in complex situations involving many variables and constraints • Actively identifies systems, devices and applications with potential to meet current and/or future needs

Assessment Requirements for ICTOPN601 Manage optical ethernet transmission

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- identify test performance parameters
- plan the test from performance requirements
- select and perform a testing regime on ethernet optical transmissions
- analyse and document test results
- comply with all work health and safety (WHS) requirements and work practices.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe intricacies of optical ethernet systems including:
  - application in optical systems
  - system architecture
  - function and framework within a telecommunications environment
  - organisational policies and procedures
  - appropriate testing techniques and analysis
- explain specific work health and safety (WHS) requirements relating to:
  - handling of optical fibre
  - personal safety issues
  - use of laser light sources.

ICTOPN602 Manage dense wavelength division multiplexing transmission system

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to manage a dense wavelength division multiplexing (DWDM) transmission system using graphical user interface (GUI) management software.

It applies to individuals who use high-level technical skills and network management software to manage network operations. It is often carried out at a central Network Operations Centre (NOC).

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Optical Networks

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to manage transmission system	1.1 Determine networking issues and requirements from appropriate person 1.2 Install network management software according to vendor instructions, including access, security and administration

© Commonwealth of Australia, 2025 Future Skills Organisation

	1.3 Create a customised representation of the enterprise's network topology 1.4 Set and configure thresholds for performance monitoring 1.5 Prepare a plan to integrate the DWDM management system into a broader network management system where applicable
2. Manage transmission system	2.1 Manage network using appropriate communications links 2.2 Monitor network for faults and performance and produce a fault and performance report
3. Use network management to report on the overall state of transmission system	3.1 Analyse performance monitoring data and alarm data 3.2 Prepare report and make recommendations based on analysis 3.3 Report on network degradation over a period of time

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 3.1	• Interprets textual information from relevant sources to identify and plan for all job requirements and adhere to procedures and standards
Writing	2.2, 3.2, 3.3	• Accurately completes standard reports and documentation using clear and technically specific language, numerical data and diagrammatic information
Oral Communication	1.1, 1.2, 3.3	• Uses listening and questioning skills to confirm technical and operational requirements and participates in a verbal exchange of ideas and solutions and uses appropriate, detailed and clear language to address key personnel and clients
Numeracy	1.4, 3.1	• Uses mathematical equations to evaluate technical data and determine acceptable monitoring levels
Get the work done	1.1-1.5, 2.1, 2.2	• Sequences and schedules complex activities, monitors implementation and manages relevant communication • Takes responsibility for high-impact decisions in complex situations involving many variables and constraints • Uses nuanced understanding of context to recognise

© Commonwealth of Australia, 2025 Future Skills Organisation

		anomalies and subtle deviations to normal expectations, focusing attention on critical issues and variables • Uses a broad range of features within applications to improve personal productivity including optimising software functions for specific purposes

Assessment Requirements for ICTOPN602 Manage dense wavelength division multiplexing transmission system

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- determine network parameters and set up performance monitoring
- manage network using appropriate software and tools
- monitor network for faults and performance
- produce fault and performance report
- analyse performance monitoring and alarm data
- prepare report with recommendations based on analysis.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss workplace and industry environment relevant to dense wavelength division multiplexing (DWDM)
- outline optical communications principles
- explain DWDM technology, its operation and testing principles
- summarise simple network management protocol (SNMP)
- explain organisational policies and procedures relevant to the DWDM
- determine appropriate report formats and communications tools required to make recommendations on performance and network degradation.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the Telecommunications – Optical Networks field of work and include access to:

- DWDM system and test equipment currently used in industry
- relevant equipment manuals, software manuals and other procedural documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTOPN603 Design a dense wavelength division multiplexing system

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to design a high-capacity dense wavelength division multiplexing (DWDM) optical network suitable for a metropolitan area network (MAN) or long haul applications.

It applies to individuals who are skilled technicians and excellent communicators who use optical technologies for the deployment of high capacity networks. The work involves link budget design and providing specification details for configuration and commissioning teams.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Optical Networks

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to produce a DWDM system design	1.1 Obtain the planning document from appropriate person and determine site details 1.2 Obtain the service type and number of channels required between customer traffic sources and destinations and the type of protection

© Commonwealth of Australia, 2025 Future Skills Organisation

	required 1.3 Obtain specifications of optical fibre between sites 1.4 Determine fibre loss between sites
2. Calculate link budget for each wavelength path	2.1 Use vendor's engineering design rules, specifications and data to calculate link budget and link margin for each DWDM wavelength and path 2.2 Evaluate link budget and assess calculated margin and make recommendations for improvement if warranted 2.3 Analyse specifications of installed optical fibre and determine if dispersion will limit the maximum traffic data rate 2.4 Generate options for system design that are realistic for the enterprise and network 2.5 Evaluate and select preferred option based on enterprise business strategy outcomes, service policy and compliance with relevant legislation 2.6 Discuss and confirm selected option with customer
3. Prepare detailed configuration documents for the DWDM system	3.1 Outline detailed requirements of the DWDM system for configuration document 3.2 Prepare a configuration document according to customer's traffic needs 3.3 Prepare an internet protocol (IP) address allocation for all DWDM shelves and associated routers and gateways 3.4 Submit documentation to appropriate person for approval and sign off
4. Investigate upgrade options using emerging technologies	4.1 Investigate option of using a reconfigurable optical add-drop multiplexer (ROADM) and make recommendations outlining benefits 4.2 Investigate feasibility of a future upgrade up to 100 Gbps system using optical transport network (OTN) - DWDM technology

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	**Performance Criteria**	**Description**

© Commonwealth of Australia, 2025 Future Skills Organisation

Reading	2.1, 2.3, 2.5	• Interprets textual information from relevant sources to identify and plan for all job requirements and adhere to procedures and standards
Writing	1.1, 2.2, 2.4, 3.1, 3.2, 3.4, 4.1	• Accurately prepares project briefs, technical documentation and reports using clear and technically specific language, numerical data and diagrammatic information
Oral Communication	1.1, 2.2, 2.6, 4.1	• Uses listening and questioning skills to confirm technical and operational requirements and participates in a verbal exchange of ideas and solutions and uses appropriate, detailed and clear language to address installation personnel, vendors, customers and contractors
Numeracy	1.4, 2.1, 2.2, 2.3	• Uses mathematical equations to evaluate all relevant technical data
Navigate the world of work	2.5	• Monitors adherence to legal and regulatory rights and responsibilities
Interact with others	3.4	• Actively identifies requirements of important communication exchanges, selecting appropriate channels, format, tone and content to suit purpose and audience and monitoring impact
Get the work done	1.1-1.4, 2.2, 2.4, 2.5, 3.3, 4.1, 4.2	• Understands key principles and concepts underpinning the design and operation of digital systems and tools and applies these when seeking to understand the potential of new technology • Takes responsibility for defining key aspects of workload, balancing own needs and priorities with job requirements • Takes responsibility for high-impact decision in complex situations involving many variables and constraints • Recognises and addresses complex problems involving multiple variables

Assessment Requirements for ICTOPN603 Design a dense wavelength division multiplexing system

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- determine fibre loss between sites
- calculate link budget and link margin
- prepare dense wavelength division multiplexing (DWDM) shelf configuration and specifications
- produce configuration documentation
- investigate an emerging DWDM technology.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the configuration of DWDM shelf
- outline operation principles of DWDM
- clarify electrostatic discharge
- identify features and operating requirements of test equipment including:
  - an optical time domain reflectometer (OTDR)
  - a hand-held optical power meter
  - a transmission test set
  - an optical spectrum analyser
- describe functions of an optical add-drop multiplexer (OADM)
- summarise functions of reconfigurable optical add-drop multiplexer (ROADM)
- explain internet protocol (IP) addressing, subnet mask, dynamic host configuration protocol (DHCP) and default gateway

© Commonwealth of Australia, 2025 Future Skills Organisation

- summarise International Telecommunications Union (ITU) wavelength grid for DWDM
- explain laser stability
- identify dispersion compensation devices
- describe the importance of a link budget and calculate a link margins
- identify optical fibre connector types and characteristics
- identify optical fibre types and characteristics
- discuss path protection and protection switching
- explain physical optical loopbacks and software loopbacks
- summarise traditional protocols and emerging Optical Transport Network (OTN) technologies used on optical DWDM systems
- describe ring topologies and linear network topologies
- explain specific work health and safety (WHS) requirements that impact the safe inspection of optical connectors and the safe measurement of optical power from laser transmission systems.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the Telecommunications – Optical Networks field of work and include access to:

- manufacturer’s technical documentation
- relevant regulations
- system specifications.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTOPN604 Analyse optical transmission systems

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to verify the characteristics of Next Generation Networks (NGN) to ensure they will support the new modulation requirements of the equipment.

It applies to individuals who are experienced technicians from telecommunications carriers, service providers, or other private and public organisations, who have experience in the optical transmission area.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Optical Networks

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to conduct characterisation tests on existing optical network	1.1 Obtain relevant legislation, codes, regulations and standards and follow work health and safety (WHS) and environmental requirements for the given work 1.2 Identify hazards and work safely according to relevant safety legislation and company work practices using personal protective equipment

© Commonwealth of Australia, 2025 Future Skills Organisation

	1.3 Construct test procedures for each test to be conducted 1.4 Notify customer and arrange for site access
2. Conduct link characterisation tests and analyse existing optical network	2.1 Perform optical tests to characterise existing fibre link 2.2 Analyse results of optical tests, and determine extent and nature of future upgrades based on the tests
3. Document analysis of optical network with recommendations	3.1 Produce final drawings and plans of proposed upgrade requirements for optical transmission and submit to project manager according to enterprise policy 3.2 Prepare report on measured performance of the network and recommendations on future upgrades

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	**Performance Criteria**	**Description**
Reading	1.1, 3.1	• Interprets textual information from relevant sources to identify and plan for all job requirements and adhere to procedures and standards
Writing	1.2, 1.4, 3.1, 3.2	• Accurately prepares standard documentation using clear and technically specific language, numerical data, drawings and plans
Oral Communication	1.4	• Uses listening and questioning skills to confirm technical and operational requirements and participates in a verbal exchange of ideas and solutions and uses appropriate, detailed and clear language to address team members, supervisors and customers
Numeracy	2.2	• Uses mathematical equations to evaluate all relevant technical data
Navigate the world of work	1.1, 1.2, 3.1	• Takes personal responsibility for adherence to legal and regulatory responsibilities relevant to own work, with specific reference to workplace safety • Understands main tasks, responsibilities

© Commonwealth of Australia, 2025 Future Skills Organisation

		and boundaries of own work
Get the work done	1.3, 2.1, 2.2	• Develops plans to manage relatively complex, non-routine tasks with an awareness of how they may contribute to longer term operational and strategic goals • Makes a range of critical and non-critical decisions in relatively complex situations, taking a range of constraints into account • Recognises and addresses complex problems involving multiple variables • Actively identifies systems, devices and applications with potential to meet current and/or future needs

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) should be included.

Measurements that must be conducted include:	• optical time-domain reflectometer (OTDR) testing from both ends • optical loss test set (OLTS) • optical return loss (ORL) • chromatic dispersion (CD) • polarisation mode dispersion (PMD) • non-linearity (four wave mixing) • optical signal-to-noise ratio (OSNR)

Assessment Requirements for ICTOPN604 Analyse optical transmission systems

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- conduct optical transmission measurements
- analyse complex optical measurement results
- liaise with the customer as required.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list and describe legislative and regulatory frameworks that govern optical transmission systems
- list and describe work health and safety (WHS) and environmental issues associated with optical transmission systems
- describe attenuation characteristics of optical fibres
- summarise the chromatic dispersion (CD) test
- explain principles of operation of dense wavelength division multiplexing (DWDM)
- discuss dispersion and outline dispersion characteristics of various fibres and devices used for compensation
- discuss precautions required to minimise electrostatic discharge
- identify features and operating requirements of test equipment including:
  - a hand-held optical power meter
  - an optical spectrum analyser
  - a transmission test set

© Commonwealth of Australia, 2025 Future Skills Organisation

- identify functions of an optical add-drop multiplexer (OADM) and reconfigurable optical add-drop multiplexer (ROADM)
- explain gain equalisation
- describe the insertion loss test
- summarise the International Telecommunications Union (ITU) wavelength grid for DWDM
- discuss measurement of dispersion
- summarise methods to reduce dispersion
- discuss optical amplifier operation
- identify optical fibre connector types and characteristics
- identify optical fibre types and characteristics
- summarise the optical return loss (ORL) test
- outline the optical signal-to-noise ratio (OSNR) test
- discuss the optical time domain reflectometer (OTDR) test
- clarify path protection and protection switching
- explain performance qualification of 40 Gbit/s and 100 Gbit/s transceivers
- summarise the polarisation mode dispersion (PMD) test
- outline protocols used on optical DWDM systems
- explain reflectance in fibre optic systems
- discuss ring topologies and linear network topologies
- explain specific work health and safety (WHS) requirements and environmental constraints that impact safe inspection of optical connectors and safe measurement of optical power from laser transmission systems.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the Telecommunications – Optical Networks field of work and include access to:

- test equipment currently used in industry
- test equipment and manufacturer’s technical documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTPMG202 Plan, organise and undertake work activities

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to plan, organise and undertake work activities in a telecommunications environment, including voice, video and data networks in domestic, commercial or industrial installations.

It applies to individuals who plan, organise and undertake work on client premises and who may be part of a project team responsible for cabling equipment deployment in network infrastructure, such as broadband provisioning, wireless mobile and data networks.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – project management

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to undertake work activities	1.1 Prepare work requirements from job request or work orders and confirm with appropriate parties, including client and other appropriate parties and/or by site inspection 1.2 Apply and monitor work health and safety (WHS) standards, statutory requirements, relevant legislation, codes, regulations and

© Commonwealth of Australia, 2025 Future Skills Organisation

	standards, and enterprise procedures throughout work procedure 1.3 Procure resources required to satisfy job plan for compliance with job specifications 1.4 Coordinate requirements, including requests for equipment isolation, with others involved or affected by the work according to enterprise requirements
2. Coordinate and undertake work	2.1 Coordinate work activities with appropriate parties according to enterprise procedures, and job and environmental requirements 2.2 Undertake and monitor tasks to comply with plans, work requirements and enterprise procedures
3. Complete work	3.1 Finalise work and restore worksite according to enterprise procedures and job requirements 3.2 Notify appropriate parties of work completion according to enterprise procedures and job requirements 3.3 Complete job records, costing data and necessary reports according to enterprise procedures

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	**Performance criteria**	**Description**
Reading	1.2, 2.1, 2.2, 3.1	• Recognises and interprets visual and written text in a variety of forms to determine key information and job requirements
Writing	1.1, 1.3, 1.4, 2.1, 3.2, 3.3	• Develops material for a specific audience using clear and detailed language to convey explicit information
Oral Communication	1.1-1.4, 2.1, 3.2	• Explains information using relevant language suitable for specific audiences
Numeracy	3.3	• Uses basic mathematical calculations to determine job requirements and costs
Navigate the world of work	1.2, 1.4, 2.1, 2.2, 3.1-3.3	• Recognises and follows explicit and implicit protocols and meets expectations associated with own role • Takes personal responsibility for adherence to legal and regulatory responsibilities relevant to own

© Commonwealth of Australia, 2025 Future Skills Organisation

		work context with specific reference to workplace safety
Get the work done	1.1, 1.3, 1.4, 2.1	• Plans a range of routine tasks, accepting goals and aiming to achieve them efficiently • Implements standard procedures for routine decisions • Recognises and takes responsibility for addressing predictable and some less predictable problems in familiar work contexts • Understands the purpose and specific functions of common digital tools used in some work contexts

Unit Mapping Information

Assessment Requirements for ICTPMG202 Plan, organise and undertake work activities

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- plan and prepare for work activities
- coordinate and undertake work activities, applying all related work health and safety (WHS) requirements and work practices
- complete all documents and reports for work activities according to organisation procedures
- demonstrate alignment with job request and consideration of client needs.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify appropriate tools, plant, equipment and materials required to do the work
- describe enterprise permit procedures and recording procedures
- identify and describe WHS requirements for work activities
- identify relevant engineering and design practices and procedures
- identify relevant statutory requirements
- explain the team communication process and goals
- list personal time management techniques
- outline work planning and organisation theory.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – project management field of work and include access to:

- sites on which work may be conducted
- equipment currently used in industry
- relevant regulatory and organisational procedures and equipment documentation that impact on the work undertaken.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTPMG402 Schedule installation of customer premises equipment

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge to effectively schedule the installation of customer premises equipment (CPE), including planning, provisioning and monitoring of customer premises installations.

It applies to individuals with a range of telecommunications skills, involves a degree of autonomy and may include limited supervision of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – project management

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan installation project	1.1 Obtain relevant legislation, codes, regulations and standards, and follow work health and safety (WHS) and environmental requirements for given work 1.2 Plan work schedules for relevant parties to provision services and

© Commonwealth of Australia, 2025 Future Skills Organisation

	deliverables in correct sequence for satisfactory project completion within specified timeframe 1.3 Order materials in advance of needs to avoid work delays 1.4 Negotiate provision and connection of required network capacity and facilities with network provider 1.5 Determine customer equipment types and quantities, and organise timing of delivery according to work schedule timeframe 1.6 Determine essential criteria for selecting labour resources to satisfy regulatory, enterprise and customer requirements 1.7 Calculate installation workloads to complete task within specified timeframe
2. Provision resources for installation project	2.1 Arrange for connection of network services to customer equipment 2.2 Coordinate logistics associated with delivery of material to site according to installation timeframe 2.3 Allocate labour to installation as determined in planning stage 2.4 Ensure that all installation personnel are advised of installation and customer requirements
3. Monitor and adjust resource allocations	3.1 Adjust labour resources as necessary to meet budget and completion timeframe 3.2 Monitor work progress against project schedules and budgets

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Reading	1.1, 1.5, 1.6	• Analyses and interprets various textual material to determine key information, requirements and responsibilities • Researches relevant codes and standards to ensure latest requirements, regulations and standards are adhered to
Writing	1.2, 1.4, 1.5, 1.6, 2.1, 2.2, 2.4	• Develops material for a specific audience using clear and detailed language to convey explicit information
Oral Communication	1.4, 1.5, 1.6, 2.1, 2.2, 2.3, 2.4	• Explains information using relevant language suitable for specific audiences
Numeracy	1.7, 2.2, 2.3, 3.2	• Uses mathematical calculations to determine staffing and logistical requirements and to plan

© Commonwealth of Australia, 2025 Future Skills Organisation

		for the future
Navigate the world of work	1.1, 1.6	• Recognises and follows explicit and implicit protocols and meets expectations associated with own role • Takes personal responsibility for adherence to legal and regulatory responsibilities relevant to own work context with specific reference to workplace safety
Get the work done	1.1, 1.2, 1.3, 1.5, 1.6, 1.7, 2.1, 2.2, 2.3, 3.1, 3.2	• Applies formal processes when planning more complex tasks, producing plans with logically sequenced steps, and reflecting some awareness of time and resources constraints • Implements standard decisions for routine tasks • Initiates standard procedures when responding to familiar problems within the immediate context • Recognises general design and operating principles of digital tools and uses this information when planning the installation of new technologies

Assessment Requirements for ICTPMG402 Schedule installation of customer premises equipment

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- access relevant information and plan an installation project
- schedule work for the installation team according to the plan
- organise supply of materials in a timely manner
- arrange for connection of network services
- monitor and apply contingencies if required.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss the importance and requirements of Australian Communications and Media Authority (ACMA) licensing
- outline the use of computers and application of software programs used in the telecommunications industry
- outline industry cabling practices
- identify work health and safety (WHS) procedures
- outline the stages of project management including:
  - phases of project management
  - roles and responsibilities within project management
  - project reporting
- identify telecommunications components and assemblies
- identify telecommunications customer premises equipment (CPE).

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – project management field of work and include access to:

- a work site where scheduling may be conducted
- relevant hardware and software.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTPMG403 Manage the delivery of network infrastructure

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to manage the delivery of network infrastructure, including scoping the project, developing a project brief, managing the project and directing the activities of installation staff, building workers, contractors, manufacturers and vendors.

It applies to individuals who work in appropriate project management roles associated with access and core networks, including switching and transmission via optical fibre, radio, microwave and satellite.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – project management

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Scope network infrastructure requirements	1.1 Determine requirements of project from client and approved network plan 1.2 Assess current access network conditions to determine existing

© Commonwealth of Australia, 2025 Future Skills Organisation

	network capacity and capability 1.3 Analyse site survey data and geographical information where necessary to assess suitability of site to design requirements 1.4 Assess risk of barriers to plan realisation to ensure delivery of network infrastructure project is achievable 1.5 Analyse impact on planning of relevant legislation and associated operational codes 1.6 Produce scoping document with consideration to new technology or technology features required in project
2. Develop project brief	2.1 Develop planning options considering current and new technology, facilities, features, and present and future needs 2.2 Conduct cost-benefit studies to guide decision making processes according to sound business practice 2.3 Discuss project brief with client, as required, and obtain approval of planning options 2.4 Produce planning specifications relating to location, route, area, product and/or platform 2.5 Estimate timing, costing and operating budget according to enterprise policy 2.6 Prepare final project brief and present to operational staff for implementation
3. Manage project	3.1 Define roles and responsibilities of stakeholders within terms of project 3.2 Establish reporting and communications line to ensure project is effectively managed 3.3 Review and continually monitor progress of project against deliverables and timelines, and invoke contingencies if required 3.4 Complete project documents in line with enterprise standards and guidelines

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	**Performance Criteria**	**Description**

© Commonwealth of Australia, 2025 Future Skills Organisation

Reading	1.1, 1.3, 1.5, 1.6, 3.3, 3.4	• Interprets and comprehends visual and written content in a variety of forms to determine key information, requirements and responsibilities • Researches relevant codes and standards to ensure latest requirements, regulations and standards are adhered to
Writing	1.6, 2.1, 2.3-2.6, 3.2, 3.4	• Develops accurate technical documents for a specific audience using clear and specific instructions and data in a format and sequence that convey explicit information
Oral Communication	2.3, 2.6, 3.1, 3.2	• Elicits the views and opinions of others using listening and questioning skills • Clearly articulates information using relevant language with a level of negotiation
Numeracy	1.3, 2.2, 2.4, 2.5, 3.3	• Uses mathematical equations to estimate and cost numerical information • Uses financial analysis skills to identify potentially misleading information, review financial outcomes and develop material based on verified data
Navigate the world of work	1.5, 2.5, 3.4	• Monitors adherence to legal and regulatory rights and responsibilities, and organisational policies and procedures, and considers own role in terms of its contribution to the broader goals of the work environment
Interact with others	2.6	• Selects the appropriate form, channel and mode of communication for a specific purpose
Get the work done	1.1-1.4, 1.6, 2.1, 2.4, 2.5, 3.1-3.3	• Plans a range of routine tasks, accepting stated goals and aiming to achieve them efficiently • Takes responsibility for the outcomes of routine decisions related directly to own role • Recognises and anticipates an increasing range of familiar problems, their symptom and causes, actively looking for early warning signs and implementing contingency plans • Reflects on the ways in which digital systems and tools are used or could be used to achieve work goals, and begins to recognise strategic and operational applications

Assessment Requirements for ICTPMG403 Manage the delivery of network infrastructure

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- determine scope of network infrastructure requirements
- accurately analyse and document considerations in project specifications and the impact of legislative and environmental conditions on the project plan
- prepare a project brief outlining specifications, timeframes, costing and operating budget
- manage the delivery of network infrastructure to completion.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline Australian Communications and Media Authority (ACMA) licensing requirements
- explain common client telecommunications applications and related equipment
- identify correct computer operation
- describe the workplace and industry environment
- outline industry cabling practices
- explain leasing versus purchase options
- identify legislative and environmental impacts, including options for green information and communications technology (ICT) installations
- outline network and transmission equipment, network topologies, interfaces and interconnect solutions
- describe work health and safety (WHS) procedures
- identify performance parameters and typical faults in equipment and related connection and transmission media, and various test equipment types
- explain the process of project management
- identify telecommunications components and assemblies

© Commonwealth of Australia, 2025 Future Skills Organisation

- identify warranty information and contractor work guarantees.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – project management field of work and include access to:

- sites on which projects may be conducted
- relevant databases, legislative requirements and other project related documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTPMG502 Develop customer premises equipment installation project plans

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to plan installation of customer premises equipment (CPE).

It applies to individuals who have a high level of specialist technical skills and knowledge in telecommunications and IT networks using internet protocol (IP) systems, and who may supervise others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – project management

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Assess project requirements	1.1 Discuss and clarify project deliverables with customer using available documentation 1.2 Determine the type of CPE installation project proposed 1.3 Evaluate access, work health and safety (WHS) and environmental

© Commonwealth of Australia, 2025 Future Skills Organisation

	issues and include in job specification 1.4 Quantify and source equipment required 1.5 Estimate costs using organisational costing guidelines
2. Prepare detailed system design and configuration	2.1 Capture data necessary to project design brief 2.2 Negotiate system specifications based on project requirements with customer and sales staff 2.3 Translate available data into detailed system design and configuration 2.4 Verify deliverables with customer
3. Detail project and quality plans	3.1 Develop project plan to meet customer's needs with detailed task list, resource needs and timeframes 3.2 Develop contingency plans to meet problems that may arise 3.3 Produce a quality plan, incorporating process flow charts 3.4 Verify plans with customer and appropriate personnel

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	**Performance Criteria**	**Description**
Reading	1.1-1.3	• Analyses and interprets a variety of textual information to determine key information, requirements and project deliverables
Writing	1.1, 1.3, 2.2, 2.4, 3.1, 3.3, 3.4	• Develops accurate technical documents and diagrams for a specific audience using clear and detailed language to convey explicit information
Oral Communication	1.1, 2.2, 2.4, 3.4	• Clearly articulates information using relevant language suitable for specific audiences and checks for understanding
Numeracy	1.4, 1.5, 3.1, 3.3	• Uses mathematical calculations to determine costs and timelines • Produces flow charts and other diagrams that capture job specifications
Navigate the world of work	1.3, 1.5	• Monitors adherence to legal and regulatory rights and responsibilities and organisational policies and procedures, with specific reference to workplace

© Commonwealth of Australia, 2025 Future Skills Organisation

		safety • Considers own role in terms of its contribution to the broader goals of the work environment
Get the work done	1.2-1.4, 2.1, 2.3, 3.2	• Plans a range of routine tasks, accepting stated goals and aiming to achieve them efficiently • Takes responsibility for the outcomes of routine decisions related directly to own role • Recognises and anticipates an increasing range of familiar problems, their symptom and causes, actively looking for early warning signs and implementing contingency plans • Reflects on the ways in which digital systems and tools are used or could be used to achieve work goals, and begins to recognise strategic and operational applications

Assessment Requirements for ICTPMG502 Develop customer premises equipment installation project plans

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- assess the equipment and performance requirements for a project on customer premises
- prepare detailed system design and configuration to customer requirements
- develop project and quality plans for the installation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and discuss the advantages of cabling types, structures and connectors
- describe the common customer telecommunications applications and related equipment
- explain the key advantages of connections to carrier infrastructure or equipment
- identify and summarise the current legislation relating to installation of telecommunications equipment and connection to carrier services
- explain environmental impacts, including options for green information and communications technology (ICT) installations
- identify and determine cost-effective solutions in installations, including the advantages of leasing and purchasing
- describe the attributes of network and transmission equipment
- explain network topologies, interface and interconnect solutions
- explain work health and safety (WHS) requirements for installations in terms of:
  - electrical safety
  - materials handling
  - physical hazards

© Commonwealth of Australia, 2025 Future Skills Organisation

  - confined spaces
  - heights
  - lifting
- calculate the power requirements for the installation plan
- describe typical performance parameters and typical faults that may be encountered in customer equipment and related connection and transmission media
- identify warranty information for equipment supplies and contractor work guarantees.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – project management field of work and include access to:

- a site on which customer premises equipment (CPE) installation can be planned
- relevant documentation, data, technical manuals and other site related documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTPMG503 Prepare a project brief

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to prepare a brief for realising a telecommunications project, including costing, vendor and technology choices, scheduling and resourcing.

It applies to individuals who may work under limited supervision and have responsibility to provide guidance or to delegate aspects of tasks to others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – project management

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan project brief	1.1 Contact client to obtain project details and approved network plan 1.2 Assess current network conditions 1.3 Analyse site survey data and geographical information to initiate studies if required

© Commonwealth of Australia, 2025 Future Skills Organisation

	1.4 Assess barriers to plan realisation 1.5 Analyse impact of relevant legislation, codes, regulations and standards on planning processes
2. Develop preliminary project brief	2.1 Develop project specifications, including new technology, according to client requirements 2.2 Draft sketch plan according to enterprise practice for area in question 2.3 Clarify project brief with client as required 2.4 Present final report with option for approval before proceeding with project brief
3. Assess tenders	3.1 Follow process for seeking quotes or issuing tenders for completion of project 3.2 Assess quotes or tenders against project criteria and any proposed variations 3.3 Examine detailed project costing estimates to ensure that budget parameters are attained 3.4 Assess competitive tenders with consideration to meet specified timeframes 3.5 Obtain tender approval from client
4. Monitor contract progress and completion	4.1 Monitor contract activity with progress against specifications 4.2 Establish and maintain regular liaison with project manager and site supervisor 4.3 Discuss contract problems or difficulties with project manager and contractor as required 4.4 Negotiate and implement contract variations 4.5 Prepare project completion advice in conjunction with project manager, installation manager and operational staff 4.6 Undertake quality audit of project and submit any recommendations for improvement according to enterprise procedures 4.7 Prepare final report on project outcomes and achievement 4.8 Present report to client and obtain sign off

Foundation Skills

Skill	Performance Criteria	Description
Reading	1.2, 1.4, 1.5, 3.2-3.4, 4.1, 4.6	• Draws on a broad range of strategies to build and maintain understanding throughout complex texts • Identifies relevant information and extrapolates content to determine project impact, provide recommendations and confirm requirements
Writing	1.1, 2.1-2.4, 3.1, 3.5, 4.2-4.7	• Generates complex written texts, demonstrating control over a broad range of writing styles and purposes • Demonstrates sophisticated writing skills by selecting appropriate conventions and stylistic devices to express precise meaning
Oral Communication	1.1, 2.3, 2.4, 3.5, 4.2-4.6	• Clearly articulates information using relevant language suitable for specific audiences and checks for understanding • Participates in a verbal exchange of ideas and solutions and uses detailed and clear language to clarify and present information according to requirements and audience
Numeracy	1.3, 2.1, 2.2, 3.2-3.4, 4.1, 4.6	• Uses highly developed numeracy skills to interpret complex financial information and perform difficult calculations • Performs mathematical calculations to analyse labour, costs and quantities, and accurately process costs and estimates
Navigate the world of work	1.5, 3.1, 4.6	• Considers legal requirements and organisational policies and procedures relevant to own role
Interact with others	2.4, 4.8	• Selects, implements and seeks to improve protocols governing communications to clients and co-workers in a range of work contexts • Implements strategies for a diverse range of colleagues and clients to build rapport and foster strong relationships
Get the work done	1.2-1.4, 2.1, 3.2, 3.4, 4.1, 4.6	• Accepts responsibility for planning and sequencing complex tasks and workload, negotiating key aspects with others and taking into account capabilities, efficiencies and effectiveness • Develops plans to manage relatively complex, non-routine tasks • Responds intuitively to problems requiring immediate resolution, drawing on past experiences to focus on the cause of a problem rather than the

Assessment Requirements for ICTPMG503 Prepare a project brief

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- develop a project brief for a telecommunications project
- analyse and document considerations in project specifications
- apply legislative and environmental conditions to project brief development
- appropriately assess tenders
- monitor contract work to completion.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the key aspects of common client telecommunications applications and related equipment
- discuss the telecommunications workplace and industry environment, and how it affects project design
- describe leasing versus purchase options
- identify legislative and environmental impacts, including options for green information and communications technology (ICT) installations
- identify and discuss the key features of network and transmission equipment
- discuss a variety of network topologies, interface and interconnect solutions
- describe the performance parameters and typical faults in equipment and related connection and transmission media, and various test equipment types
- identify the key features of warranty information and contractor work guarantees.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – project management field of work and include access to:

- sites on which projects may be conducted
- relevant databases, legislative requirements and other site and project related documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTPMG504 Prepare project specifications

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to develop specifications for a telecommunications project, including switching, transmission and radio networks, and the various transmission paths including cable, optical fibre, radio, microwave and satellite.

It applies to individuals who have a high level of specialist technical skills and knowledge in telecommunications and IT networks using internet protocol (IP) systems and who may supervise others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – project management

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for project estimate	1.1 Analyse project design obtained from appropriate personnel to determine project requirements according to project plan 1.2 Verify project requirements with clients and project team

© Commonwealth of Australia, 2025 Future Skills Organisation

	1.3 Ascertain impact of time restraints on estimate 1.4 Analyse impact of relevant legislation, codes, regulations and standards on planning processes 1.5 Establish availability of all appropriate data and documentation to allow for completion of work
2. Estimate resource requirements	2.1 Conduct site inspection to verify design details and project context 2.2 Produce estimate of type, quantity and schedule of resources required for project from project plans 2.3 Prioritise sequence of work appropriate to enterprise needs 2.4 Calculate contractor and employee labour hours required according to project requirements, industrial awards and enterprise policies 2.5 Record estimates of materials, equipment and labour hours according to enterprise guidelines
3. Calculate costing details	3.1 Estimate amount and type of resources required for successful completion of project, including risk management and contingencies 3.2 Calculate costs for resources from current information, following standard costing procedures 3.3 Produce detailed record of all required resources and costing details for project specifications
4. Prepare detailed project plan	4.1 Prepare detailed plan, including specifications for materials, equipment, resources, locations and network routes 4.2 Forward plan and specifications to appropriate personnel for project implementation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	**Performance Criteria**	**Description**
Reading	1.1, 1.4	• Analyses and interprets text in a variety of forms to determine key information and design requirements
Writing	1.2, 1.5, 2.5, 3.2, 3.3, 4.1	• Records and presents information according to enterprise requirements • Develops accurate technical documents and diagrams using language and structure appropriate to the audience and requirements

© Commonwealth of Australia, 2025 Future Skills Organisation

Oral Communication	1.2, 1.5, 2.1	• Conveys information using language suitable for specific audiences • Uses listening and questioning skills to clarify understanding
Numeracy	1.3, 2.2-2.5, 3.1-3.3	• Performs mathematical calculations to analyse labour, costs and quantities to accurately process costs and estimates • Applies financial modelling skills to identify, analyse and evaluate budgetary information, time durations and human resource allocations
Navigate the world of work	1.4, 2.4, 2.5	• Considers legal requirements and organisational policies and procedures when planning and implementing a project
Interact with others	2.4, 4.2	• Selects the appropriate form, channel and mode of communication for a specific purpose
Get the work done	1.1, 1.3, 1.5, 2.1-2.4, 3.1	• Accepts responsibility for planning and sequencing complex tasks and workload, negotiating key aspects with others and taking into account capabilities, efficiencies and effectiveness • Responds intuitively to problems requiring immediate resolution, drawing on past experiences to focus on the cause of a problem rather than the symptom • Uses problem solving skills to analyse and evaluate effective solutions

Assessment Requirements for ICTPMG504 Prepare project specifications

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- analyse project design to determine specification options
- prepare estimates and calculate the cost of resources for a telecommunications project
- prepare detailed project plan, including specifications for resources and network routes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain common client telecommunications applications and related equipment
- describe cost effective solutions employed in planning
- describe and apply drafting techniques
- explain the workplace and industry environment
- describe the impact of legislative and environmental impacts, including options for green information and communications technology (ICT) installations
- identify and evaluate the benefits of different network and transmission equipment
- identify and evaluate the benefits of different network topologies and interface and interconnect solutions
- identify the possible implications for a planned design on health and safety
- identify and describe various warranty information and contractor work guarantees.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – project management field of work and include access to:

- sites on which projects may be conducted
- relevant databases, legislative requirements and other site and project related documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTPMG610 Develop a project management plan

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge to develop a plan for a telecommunications project, including assessing project requirements and planning for all stages to completion and final documentation.

It applies to individuals who are likely to have responsibility for the provision of installations, maintenance, upgrades and new services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – project management

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare project management plan	1.1 Evaluate and assess project brief and related documents 1.2 Produce document on project tasks and associated timelines, including installation processes and test requirements 1.3 Assess and produce document on resource requirements to assist allocation of appropriate resources

© Commonwealth of Australia, 2025 Future Skills Organisation

	1.4 Produce training plan assessing training needs and associated timelines for efficient project implementation 1.5 Determine and document budgetary requirements 1.6 Discuss roles of all identified parties associated with project to ensure their involvement 1.7 Produce project verification document, including monitoring and control processes, and review processes such as quality audits 1.8 Consult with all relevant parties prior to finalising draft plan and make changes as appropriate
2. Develop and evaluate management plan	2.1 Produce preliminary plan for consultation, including identified factors that may impact on realisation of project and observance of relevant legislation, codes, regulation and standards 2.2 Consult with client and clarify any amendments 2.3 Develop final plan with recommendations
3. Finalise documentation	3.1 Produce and document final plan to include implementation details and training needs 3.2 Present plan to client and obtain sign off

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	**Performance Criteria**	**Description**
Reading	1.1, 1.3, 1.5, 1.6, 2.1-2.3, 3.1	• Analyses and interprets textual information in a variety of forms to determine key information, requirements and project design
Writing	1.2-1.5, 1.7, 1.8, 2.1-2.3, 3.1	• Uses factual and technically specific language to document a range of requirements • Uses appropriate formats and structures to present information logically for different audiences, and revises documents based on feedback and outcomes
Oral Communication	1.5, 1.6, 1.8, 2.2, 3.2	• Uses listening and questioning techniques to elicit the opinions of others and confirm understanding

© Commonwealth of Australia, 2025 Future Skills Organisation

		• Influences discussions using selective language, tone and gestures to clearly articulate information and requirements
Numeracy	1.3, 1.5	• Performs highly developed mathematical calculations to analyse labour, costs and quantities to accurately process quotations and estimates
Navigate the world of work	2.1	• Takes personal responsibility for adherence to legal and regulatory responsibilities relevant to own work context • Recognises and follows explicit and implicit protocols and meets expectations associated with own role
Interact with others	1.6, 2.2, 3.2	• Collaborates with others, sharing information to build strong work groups and avoids behaviours that are not conducive to a productive environment • Implements strategies for a diverse range of colleagues and clients to build rapport and foster strong relationships
Get the work done	1.1-1.5, 1.7, 2.1, 2.3, 3.1, 3.2	• Reflects on the ways in which digital systems and tools are used or could be used to achieve work goals, and begins to recognise strategic and operational applications • Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context to identify relevant project requirements and priorities • Makes critical decisions quickly and intuitively in complex situations, taking into consideration a range of variables including the outcomes of previous decisions • Recognises and addresses some unfamiliar problems of increasing complexity within own scope, recognising when to seek the advice of others

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Requirements for ICTPMG610 Develop a project management plan

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- determine the project attributes and specifications
- prepare a coherent draft project management plan
- consult on and revise a project management plan
- document final project management plan and obtain sign off.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the key attributes of common telecommunications applications and related equipment
- identify and evaluate the connections to carrier infrastructure or equipment
- identify current legislation relating to the design of installation of telecommunications equipment and connection to carrier services
- evaluate the advantages of leasing and purchase options to assist in delivering cost effective solutions
- identify and evaluate network and transmission equipment
- outline network topologies, and interface and interconnect solutions
- outline work health and safety (WHS) issues that need to be built into a plan, with consideration of:
  - electrical safety
  - materials handling
  - physical hazards
  - confined spaces
  - heights

© Commonwealth of Australia, 2025 Future Skills Organisation

    - lifting
- describe and evaluate the power requirements and electrical safety aspects of the installation plan
- describe typical performance parameters and typical faults that may be encountered in client equipment and related connection and transmission media
- identify various test equipment types suitable for tests to be made
- identify warranty information for equipment supplies and contractor work guarantees.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – project management field of work and include access to:

- a telecommunications operations site with relevant technology and infrastructure
- relevant databases, legislative requirements and other project related documentation
- organisational documentation relating to equipment, warranties, leasing, contracts and audits.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTPMG611 Prepare a detailed design brief

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to prepare a detailed design brief to realise a building and equipment provisioning project, including costing, vendor and technology choices, scheduling and resourcing.

It applies to individuals with a high level of specialist technical skills and knowledge in optical telecommunications and IT networks using internet protocol (IP) systems for a new installation or upgrade of capacity or technology for an existing network or subsystem for convergence to next generation networks (NGN).

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – project management

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Evaluate design requirements	1.1 Consult relevant legislation, codes, regulations and standards that impact on project 1.2 Determine need for enhancement to new or existing telecommunications network from telecommunications project plan

© Commonwealth of Australia, 2025 Future Skills Organisation

	and associated project brief 1.3 Determine specific purpose and type of network growth and enhancement using collated data from other relevant sources 1.4 Consult client regarding enterprise criteria and determine timeframe for design plan 1.5 Establish and organise design resource requirements
2. Evaluate information to prepare design drawings	2.1 Obtain site access through consultation with affected property owners where project impacts on private property 2.2 Collect field data and propose ways to manage physical impediments that may affect building construction work 2.3 Verify existing equipment, equipment layouts and building services to plan for network growth 2.4 Ascertain impact of relevant heritage, environmental and other governmental legislation, and initiate action or organise consultative processes to gain approvals according to enterprise policy 2.5 Prepare design drawing according to enterprise requirements
3. Select design option	3.1 Analyse proposed network needs to determine set of realistic design options 3.2 Evaluate and select preferred design option according to approved enterprise criteria and discuss selected option with client 3.3 Assess system compatibility and make modifications to design
4. Prepare design plan	4.1 Prepare detailed design plan, including relevant geographical and topological information, equipment and material and cost estimates 4.2 Discuss final designs with planners and project management, and obtain approval to proceed 4.3 Produce final detailed design brief with drawings, material requirements, and testing and maintenance plans for operational staff to follow

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	**Performance Criteria**	**Description**
Reading	1.1-1.3, 2.4	• Analyses and interprets technical text in a variety of forms to determine key information,

Assessment Requirements for ICTPMG611 Prepare a detailed design brief

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- assess the implications of legislation, regulations and standards on project design
- analyse the network and enterprise needs to determine design options
- consult widely to ensure design represents client requirements
- prepare a design brief for building and equipment design provisioning
- prepare detailed design documentation to enable realisation of design.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain common client telecommunications applications and related equipment
- identify and critique connections to carrier infrastructure or equipment
- describe cost-effective solutions in planning
- identify and explore current legislation relating to installation of telecommunications equipment and connection to carrier services
- review the range of client premises equipment (CPE)
- outline environmental impacts and options for green information and communications technology (ICT) installations
- review network and transmission equipment
- explain network topologies, and interface and interconnection solutions
- outline work health and safety (WHS) issues that are required to be included in the design brief for:
  - electrical safety
  - materials handling
  - physical hazards

© Commonwealth of Australia, 2025 Future Skills Organisation

  - confined spaces
  - heights
  - lifting
- review the power requirements and electrical safety of the project
- explain technology of next generation networks (NGN)
- identify test equipment types.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – project management field of work and include access to:

- sites on which projects may be designed
- relevant databases, legislative requirements and other project related documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTPMG801 Manage a telecommunications workplace

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to fulfil workplace management responsibilities at a managerial and supervisory level in a telecommunications business environment.

It applies to individuals who combine technical skills with management skills to manage technical staff in an advanced technological environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – project management

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Support human resources activities	1.1 Assist and advise on recruitment action and induction of new staff 1.2 Monitor staff training needs and implement technical training activities for staff 1.3 Provide information and advice to relevant personnel 1.4 Review and advise on work health and safety (WHS) and security in workplace

© Commonwealth of Australia, 2025 Future Skills Organisation

2. Manage conflict in workplace	2.1 Assess conflict situation 2.2 Determine ways to resolve conflict with conflicting parties 2.3 Apply decision making procedures to business model for conflict resolution
3. Apply quality management systems and processes in workplace	3.1 Document essential requirements of product using quality management approach 3.2 Assess relationship between client and owner to identify process to achieve agreement on measurable quality features 3.3 Analyse quality investigation for improvement by involving individuals, groups and managers
4. Monitor work practices to ensure business objectives will be met	4.1 Develop strategies, using management characteristics to meet business objectives 4.2 Analyse individual management objectives applicable to workplace 4.3 Produce business model representing activities of sound management plan for telecommunications workplace
5. Determine human factors when managing people and groups	5.1 Establish consultation processes between management and staff to resolve grievances 5.2 Analyse interpersonal skills required of managers and team leaders using identified communications channels 5.3 Conduct performance reviews and take appropriate action
6. Perform work using self-organisation principles	6.1 Evaluate methods of improving own productivity and perform a self-appraisal 6.2 Evaluate effectiveness of information processing methods used in workplace, applying time management techniques 6.3 Produce report to communicate information efficiently and effectively in workplace
7. Apply effective communication techniques to business meetings	7.1 Research levels, directions and effectiveness of channels used when communicating in business 7.2 Develop plan for managing business meetings in workplace

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

© Commonwealth of Australia, 2025 Future Skills Organisation

Skill	Performance Criteria	Description
Learning	6.1	• Uses investigative techniques to expand on existing knowledge and experience
Reading	1.4, 3.1, 4.2, 7.1	• Analyses and interprets textual information from a variety of sources to determine key information and requirements
Writing	1.1-1.4, 3.3, 4.1-4.3, 5.1, 5.3, 6.3, 7.2	• Develops material using an appropriate format containing clear, instructional and informative language to communicate specific information
Oral Communication	1.1, 1.3, 1.4, 3.3, 5.3	• Facilitates discussions by using listening and questioning techniques and appropriate tone to confirm understanding and obtain information • Clearly articulates information using tone, pace and language appropriate for the audience
Navigate the world of work	1.4	• Considers own role in terms of its contribution to the broader goals of the work environment • Monitors and reviews the organisation's policies, procedures and adherence to legislative requirements to implement and manage change
Interact with others	3.3, 5.2, 6.1	• Invests considerable time and energy in building and maintaining effective working relationships within and beyond the immediate work context, recognising and intuitively responding to the subtle and complex mix of factors at play in every interaction • Sets time aside for self-reflection, recognising personal strength and limitations, and exploring beliefs and assumptions about own behaviour and that of others • Recognises potential for conflict in working with others and seeks to develop organisational processes to deal with conflict
Get the work done	1.2, 2.1-2.3, 3.2, 4.1-4.3, 5.1, 5.3, 6.2	• Recognises the critical importance of clarifying, focusing and aligning goals and expectations, and uses the process to build ownership of and broad commitment to

© Commonwealth of Australia, 2025 Future Skills Organisation

		achieving outcomes • Takes responsibility for high impact decisions in complex situations involving many variables and constraints • Uses formal analytical and lateral thinking techniques for identifying issues, and generating and evaluating possible solutions • Articulates and challenges the values, beliefs and assumptions that shape thinking and routinely reframes and redefines problems to get new perspectives and generate new ideas • Uses digital technologies to manage business operations and actively investigates new technologies for strategic and operational purposes

Assessment Requirements for ICTPMG801 Manage a telecommunications workplace

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- determine the human factors that need to be analysed when managing people and groups
- conduct business meetings, applying effective communication techniques
- determine essential requirements of a product, applying quality management principles
- monitor and implement training for staff
- resolve problems and conflicts professionally in a business environment
- support a human resources management program.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- evaluate equity and diversity legislation and underlying principles
- critique a range of organisational procedures and policies relating to human resources management
- assess work health and safety (WHS) requirements and contrast with legislation and regulations
- outline behaviour theories relevant to managing staff in a workplace
- summarise the effect of public sector legislation, codes of practice and other formal agreements that directly impact on business operations
- establish the technical aspects of telecommunications networks that impact directly on human resources management
- formulate strategies to manage the workplace and industry environment.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – project management field of work and include access to:

- a telecommunications workplace
- relevant enterprise documentation, including human resources and quality management policies.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTPMG802 Manage a telecommunications project

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to produce a plan, develop risk management strategies, prepare budgets, plan for contingencies, develop procedures for commissioning the project and archive project documentation.

It applies to individuals who implement specified projects for an installation or upgrade of the telecommunications network.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – project management

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to manage project	1.1 Develop project proposal, including specific project management processes from specifications and/or contracts 1.2 Document role of major stakeholders and implications for project 1.3 Develop risk management strategy and present to stakeholders for agreement

© Commonwealth of Australia, 2025 Future Skills Organisation

	1.4 Check for technical compliance of project with relevant standards 1.5 Select project management computer software 1.6 Conduct skills audit of personnel and identify additional training requirements
2. Apply project management processes	2.1 Determine participants' responsibilities using critical path method (CPM) to draw network diagram 2.2 Sequence and coordinate activities required for specific project 2.3 Determine critical path to optimise timing of project deliverables 2.4 Assess viability of project estimates by preparing budget 2.5 Perform risk analysis to determine factors that may hinder project deliverables 2.6 Assess progress of project with contingencies to manage risks 2.7 Determine any updates and recommendations in agreement with client 2.8 Determine if contract variations are required and make changes
3. Complete work and document activities	3.1 Make provision for commissioning and project completion 3.2 Produce final documentation with recommendations and present to client 3.3 Document and archive project documentation 3.4 Obtain sign off

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	**Performance Criteria**	**Description**
Reading	1.1,1.4-1.6, 2.1, 2.5, 2.6, 2.8, 3.2	• Analyses, interprets and compares a variety of textual material to determine key information and requirements
Writing	1.1, 1.3, 1.6, 2.2, 2.5, 2.7, 2.8, 3.2, 3.3, 3.4	• Produces technical documents using a cohesive format to clearly and logically convey a range of information and data
Oral Communication	1.3, 2.7, 3.2	• Facilitates discussions using listening and questioning techniques to confirm understanding and obtain required information

© Commonwealth of Australia, 2025 Future Skills Organisation

		• Clearly articulates information using relevant language and techniques to obtain a mutually acceptable result
Numeracy	2.2, 2.4	• Applies knowledge of mathematical formulas to estimate monetary requirements against a project plan and calculate required timelines against tasks
Navigate the world of work	1.4	• Monitors adherence to relevant standards, policies and procedures and considers own role in terms of its contribution to the broader goals of the work environment
Interact with others	1.3, 3.2	• Tailors every communication to achieve its purpose, demonstrating a sophisticated understanding of the needs, interests, issues and priorities of each audience
Get the work done	1.1, 1.3, 1.5, 1.6, 2.1-2.7, 3.1, 3.3, 3.4	• Recognises and anticipates an increasing range of familiar problems, their symptoms and causes, actively looking for early warning signs and implementing contingency plans • Takes responsibility for high impact decisions in complex situations involving many variables and constraints • Operates from a broad conceptual plan, developing the operational detail in stages, regularly reviewing priorities and performance during implementation, identifying and addressing issues and reallocating resources • Defines benefits, costs, risks and feasibility from a broad range of perspectives, and thinks laterally to redesign aspects to address potential issues • Understands the purposes, specific functions and key features of common digital systems and tools, and operates them effectively to complete routine tasks, adapting some functions to improve personal efficiency

Assessment Requirements for ICTPMG802 Manage a telecommunications project

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- prepare and apply a project management process to a telecommunications project using project management software
- develop a comprehensive plan to manage a telecommunications project with a risk management strategy, budget and contingencies
- complete work and project documentation accurately.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- critically analyse organisational project management policies and procedures
- assess safety management processes and procedures in a workplace environment including:
  - personal protective equipment conforming to industry and work health and safety (WHS) standards
  - precautions required to minimise, control or eliminate hazards that may exist during work activities
- evaluate the impact of relevant legislation, codes, regulations and standards on the management of a communications project
- assess the workplace and industry environment and its impact on project development to implementation, including:
  - commissioning procedures

© Commonwealth of Australia, 2025 Future Skills Organisation

  - industrial issues
  - roles and responsibilities
  - skills audit
- evaluate the telecommunication systems and their impact on a project
- define the role that site engineering has on the development of a project management plan
- evaluate project management processes and the software packages available to assist management.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – project management field of work and include access to:

- a telecommunications site
- computers and relevant computer software
- relevant legislation, codes, regulations and standards.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTPMG803 Undertake a telecommunications project

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to research and plan a telecommunications project covering an extensive range of complexities and technologies.

It applies to telecommunications technical staff who undertake complex projects requiring high levels of planning and management, and combine technical and work health and safety (WHS) skills in planning and management work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – project management

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section*
1. Prepare for telecommunications project	1.1 Obtain project plan from authorised personnel to identify nature of project and project specifications 1.2 Verify location of proposed project work according to appropriate plans 1.3 Critically analyse project specifications and research emerging telecommunications technology that may benefit project

© Commonwealth of Australia, 2025 Future Skills Organisation

	1.4 Consult authorised personnel to finalise project specifications and obtain agreement 1.5 Source project resources required, including those for safe work practice 1.6 Prepare contingency plans, including any risks that could impact on project 1.7 Develop project implementation plan according to standards with minimal workplace disruption, and obtain agreement from authorised personnel 1.8 Notify authorised personnel of possible network outage where required
2. Carry out telecommunications project work	2.1 Follow work health and safety (WHS) and environmental requirements according to plan and manufacturer's specifications 2.2 Inform appropriate personnel of existing and potential hazards on worksite 2.3 Perform project work phases according to agreed plan and accepted work practice 2.4 Implement project planning principles, including risks that may impact on project 2.5 Monitor project to completion to ensure that it is progressing according to plan and risks are minimised 2.6 Report on implementation phases
3. Clean up worksite and complete documentation	3.1 Remove and dispose of project waste and debris from worksite according to environmental requirements 3.2 Restore changes made to work area to client's satisfaction 3.3 Complete all project documents and present to client 3.4 Declare asset ready for commissioning and integration if required 3.5 Notify client and obtain sign off

Foundation Skills

This section describes the Foundation Skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

© Commonwealth of Australia, 2025 Future Skills Organisation

Reading	1.1-1.3, 1.7, 2.1	• Organises, evaluates and critiques ideas and information from a wide range of complex texts • Draws on a broad range of strategies to build and maintain understanding throughout complex texts
Writing	1.4, 1.6-1.8, 2.2, 2.6, 3.3-3.5	• Demonstrates sophisticated writing skills by selecting appropriate conventions and stylistic devices to express precise meaning • Prepares documentation expressing ideas, explores complex issues and is constructed logically, succinctly and accurately
Oral Communication	1.1, 1.2, 1.4, 1.7, 1.8, 2.2, 2.6, 3.2, 3.4, 3.5	• Determines and confirms client requirements using collaborative and inclusive techniques including active listening and questioning • Reads verbal and non-verbal signals to convey and clarify information and to confirm understanding
Numeracy	1.5-1.7	• Analyses and synthesises highly embedded mathematical information in a broad range of tasks and texts
Navigate the world of work	1.7, 2.1, 3.1	• Develops and implements strategies that ensure organisational policies, procedures and regulatory requirements are being met
Interact with others	1.1, 1.2, 1.4, 1.8, 2.2, 2.3, 2.5, 3.2-3.5	• Develops and implements communications strategies with internal and external persons to build rapport • Influences and fosters a collaborative culture, facilitating a sense of commitment and workplace cohesion • Shares knowledge, information and experience openly as an integral part of the working relationship • Understands diversity and seeks to integrate diversity into the work context for managing change, making decisions and achieving shared outcomes
Get the work done	1.1, 1.2, 1.5-1.7, 2.1-2.5, 3.1, 3.2, 3.4	• Plans strategic priorities and outcomes within a flexible, efficient and effective context in a diverse environment exposed to competing demands • Gathers and analyses data and seeks feedback to improve plans and processes • Makes high impact decisions in a complex and diverse environment, using input from a range of sources • Addresses complex problems involving multiple variables, using formal analytical and lateral thinking techniques, experience and knowledge to focus on the root cause • Explores and incubates new and innovative ideas through unconstrained analysis and critical thinking

© Commonwealth of Australia, 2025 Future Skills Organisation

		• Uses digital technologies to manage business operations

Assessment Requirements for ICTPMG803 Undertake a telecommunications project

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- research and critically analyse the deliverables for a telecommunications project
- consult with relevant personnel to elicit and confirm project outcomes
- prepare plans for implementation, address contingencies and manage risk
- implement and monitor telecommunications project work and report progress to relevant personnel
- ensure project is completed in accordance with environmental and client requirements
- document the project outcomes and obtain client sign off.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- evaluate organisational project management policies and procedures in relation to project development
- critically analyse the operation of transmitters and receivers
- explore the management of safety on projects and setting project policies and procedures for:
  - personal protective equipment conforming to industry and work health and safety (WHS) standards
  - precautions required to minimise, control or eliminate hazards that may exist during work activities
- evaluate the impact of relevant legislation, codes, regulations and standards on the project

© Commonwealth of Australia, 2025 Future Skills Organisation

- explore the telecommunications system principles and operational procedures that contribute to project development, including:
  - personnel involved
  - project specifications
  - project resources
- evaluate the workplace and industry environment and its impact on development of the project.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – project management field of work and include access to:

- a telecommunications operations site on which a project can be carried out
- computers and relevant computer software
- relevant legislation, codes, regulations and standards.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTPMG804 Evaluate and use telecommunications management networks

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to analyse, evaluate and monitor business performance using telecommunications management network (TMN) systems in the management of open systems in communications networks.

It applies to individuals who have a very high level of technical management skills and knowledge in telecommunications networks and systems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – project management

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to evaluate and use telecommunications management network	1.1 Research and evaluate network management architectures in common carrier and extended models 1.2 Evaluate features and functionality of Standards Committee International Telecommunications Union (ITU-T) TMN architecture and network models 1.3 Research and evaluate techniques for collecting management

© Commonwealth of Australia, 2025 Future Skills Organisation

	information from network nodes using interrupts and polling 1.4 Analyse configuration management problems and produce assessment report on solutions by integrated network management systems
2. Analyse fault management and accountability procedures	2.1 Evaluate effectiveness of fault management processes from beginning to resolution, including automation of fault management 2.2 Analyse reasons for alarm correlation with process analysis and apply fault identification to network problems
3. Plan for reliability and survivability	3.1 Research and produce a report on quality of service (QoS) in a telecommunications context, including relevant international standards and range and type of possible monitoring parameters for QoS 3.2 Analyse reasons for service levels in telecommunications context 3.3 Perform linear and exponential trend analysis on real or simulated data for single monitoring parameter 3.4 Research and assess reliability and survivability in telecommunications context with reference to disaster and security management policies and procedures 3.5 Develop disaster recovery plan for telecommunications network
4. Research and report network management techniques	4.1 Research how accounting records are generated and used for both voice and data networks 4.2 Analyse process of generating bills from accounting records, configuration and client information 4.3 Research and report on network management techniques and standards used for internet 4.4 Research and report on standards used in simple network management protocol (SNMP) network management model and global system for mobiles (GSM) network 4.5 Analyse network management functions over CNET network simulation or similar data network and produce report on findings

Foundation Skills

This section describes the Foundation Skills incorporated in the performance criteria that are required for competent performance.

© Commonwealth of Australia, 2025 Future Skills Organisation

Skill	Performance Criteria	Description
Reading	1.1-1.3, 3.1, 3.4, 4.1, 4.3-4.5	• Analyses and interprets text to determine key information and applications • Interprets textual and numerical information in a variety of forms, and applies the knowledge gained to evaluate methodologies
Writing	1.2-1.4, 2.1, 2.2, 3.1-3.5, 4.2-4.5	• Produces accurate technical documents for a specific audience using clear and detailed language and visuals to convey explicit information • Prepares information that incorporates evaluation of information and specialised and cohesive language in a format and style appropriate for a specific audience
Oral Communication	3.1, 4.3, 4.4	• Clearly articulates information using relevant language and persuasive techniques suitable for specific audiences
Numeracy	3.3, 4.1, 4.2	• Applies mathematical techniques to analyse and report on technical requirements and implications
Get the work done	1.1-1.4, 2.1, 2.2, 3.1-3.5, 4.1-4.5	• Gathers and analyses data and seeks feedback to improve plans and processes • Makes high impact decisions in a complex and diverse environment, using input from a range of sources • Identifies key factors that impact on decisions and their outcomes, drawing on experience, competing priorities and decision making strategies where appropriate • Explores and incubates new and innovative ideas through unconstrained analysis and critical thinking • Uses digital technologies to manage business operations and actively investigates new technologies for strategic and operational purposes

Assessment Requirements for ICTPMG804 Evaluate and use telecommunications management networks

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- research and evaluate the architectural features and functions of network management systems
- research and report on the following:
  - the major features, configuration and functions of management systems
  - fault management and accountability procedures
  - the major features and functions of quality of service (QoS) agreements
  - network management techniques
- analyse the major features of planning for reliability and survivability.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- evaluate administrative network management systems
- review business models and business processes used in telecommunications management networks
- investigate enterprise solutions for a given situation
- evaluate operations network management systems
- determine organisational policies and procedures that relate to management systems
- evaluate the impact of the workplace and industry environment on the use of a telecommunications management system.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – project management field of work and include access to:

- a telecommunications operations site with a network management system
- networked computers with relevant software.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTPRG301 Apply introductory programming techniques

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to create simple applications or games.

It applies to individuals with responsibility for creating applications or games and includes creating code, using programming standards, testing, and debugging.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Programming and software development

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Apply language syntax and layout	1.1 Apply basic language syntax rules 1.2 Use language data types, operators, and expressions to create a clear and concise code 1.3 Apply the variables and variable scope 1.4 Use the library functions in a program 1.5 Use commenting to create a clear meaning to the code
2. Apply control	2.1 Apply the language syntax for sequence, selection and iteration

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
structures	constructs 2.2 Use logical operators to create expressions for use in selection and iteration constructs
3. Code using standard algorithms	3.1 Develop algorithms that use the sequence, selection and iteration constructs 3.2 Create and use arrays 3.3 Code the standard sequential access algorithms, for reading and writing text files, including end-of-file detection loops 3.4 Apply string manipulation
4. Test the code	4.1 Use debugging techniques to trace code execution and examine the variable contents to detect, and correct, errors 4.2 Create and conduct simple tests, to confirm that the code meets the design specification 4.3 Document the tests performed and results achieved
5. Create an application or game	5.1 Design an algorithm in response to basic program specifications 5.2 Develop the application or game to meet the program specification 5.3 Test and confirm that the application, or game, meets the initial specifications

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Writing	1.2, 1.5, 4.3	• Prepares workplace documentation, according to organisational formats and protocols • Creates program code using the correct syntax
Numeracy	2.2, 3.1, 5.1	• Uses mathematical formulae to ensure that the program specifications are met
Get the work done	1.1, 1.2, 1.3, 1.4, 1.5, 2.1, 2.2, 3.1, 3.2, 3.3,	• Takes responsibility for planning, sequencing and prioritising tasks and own workload, for efficiency and effective outcomes

© Commonwealth of Australia, 2025 Future Skills Organisation

	3.4, 4.1, 4.2, 5.2, 5.3	• Uses problem-solving techniques to analyse the required outcomes, in order to determine the correct program code • Uses a formal decision-making process, identifying and evaluating several choices against a limited set of criteria, when selecting syntax • Evaluates the effectiveness of decisions in terms of how well they meet stated design specifications • Uses the features of digital tools to complete complex tasks

Assessment Requirements for ICTPRG301 Apply introductory programming techniques

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- apply programming language syntax, sequence, selection and iteration control structures to the development of an application, or game
- produce an application, or game, that is designed and built from the program specifications
- confirm that the created application, or game, meets the original program specifications, and obtain user sign-off for the completed program.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and describe common games programming languages, their syntax, and command structure
- describe the development of small-sized applications or games.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the programming and software development industry, and include access to:

- the requirement documents
- the site documents
- software development tools currently used in industry, such as a compiler
- an independent development environment (IDE).

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessors must satisfy NVR/AQTF assessor requirements.

ICTPRG430 Apply introductory object-oriented language skills

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Application

This unit describes the performance outcomes, skills and knowledge required to undertake introductory programming tasks using an object-oriented programming language including tool usage, documentation, debugging, and testing techniques.

It applies to individuals who are programmers in a variety of fields and who are required to produce simple programs in object-oriented languages.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Programming and software development

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Determine application design	1.1 Review and clarify user requirements with user 1.2 Plan and determine application design specifications to satisfy user requirements
2. Implement the application design	2.1 Develop application according to application design and organisational code conventions 2.2 Document application according to organisational documentation conventions

© Commonwealth of Australia, 2025 Future Skills Organisation

3. Test the application	3.1 Develop tests to determine that application logic and syntax satisfies user requirements and application specifications, and modify application to meet user requirements and application specifications 3.2 Document tests according to organisational documentation conventions
4. Hand over the application to the user	4.1 Review application against user requirements to ensure user requirements are satisfied 4.2 Present application to user and obtain user acceptance

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	**Description**
Reading	• Evaluates, and integrates, information and ideas to construct meaning and selects, and applies reading strategies in relation to design specifications, coding standards, and coding- language documentation
Writing	• Communicates relationships between ideas and information, in a style appropriate to the audience and purpose, and selects the vocabulary, grammatical structures and conventions appropriate to the text, in relation to coding, recording outcomes, and documenting activities
Numeracy	• Selects from, and flexibly applies, mathematical and problem-solving strategies and techniques, in a programming context • Uses formal written mathematical language and representation, in the context of programming
Navigate the world of work	• Recognises and follows, explicit and implicit standard and meets expectations associated with own role when developing code that is compliant with standards and guidelines
Get the work done	• Uses a formal decision-making process, identifying and evaluating several choices against a limited set of criteria, when selecting language data types, operators and expressions • Evaluates the effectiveness of decisions, in terms of how well they meet the stated design specifications • Uses analytical processes to decide on a course of action when debugging • Utilises features within applications in order to develop software programs • Recognises, and uses language and symbols, when applying the coding syntax

© Commonwealth of Australia, 2025 Future Skills Organisation

	• Actively identifies systems, devices and applications with the potential to meet current and future needs regarding programming

Assessment Requirements for ICTPRG430 Apply introductory object-oriented language skills

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit; including evidence of the ability to:

- Select and use three language data types, three operators and three expressions
- Use correct language syntax for one sequence, one selection and two iteration constructs
- Use a modular approach to implement the logic for one object operation
- Implement a class that uses arrays of primitive data types twice.
- Read from and write to one text file
- Implement two classes that each contain four instance variables
- Implement one class that contains two options for object construction
- Implement one class that uses user-defined object aggregation
- Implement polymorphism once for code extensibility
- Use one debugging tool
- Apply code and documentation conventions that specify at least 3 aspects, according to organisational requirements
- Perform and document two unit test cases
-

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

- Processes and techniques related to object-oriented programming, including the concepts and language
- Syntax language rules, data types structures
- Primitive instance variables
- Class variables
- Small-size application development processes
- Polymorphism and inheritance

© Commonwealth of Australia, 2025 Future Skills Organisation

- Debugging and testing approaches and techniques
- Constructors
- Object aggregation
- Sequence, selection and iteration constructs
- Organisational documentation
-

Assessment Conditions

Skills must be demonstrated in a workplace or simulated environment where conditions are typical of those in an ICT working environment or workplace. This includes:

- Integrated development environment
- Applications relevant to software development
- Organisational code and documentation conventions
- User requirements
- Individual user to consult

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

ICTPRG531 Prepare for application development using current methods

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Application

This unit describes the skills and knowledge required to carry out application development using current methods.

It applies to ICT workers and individuals who are programmers in a variety of job roles.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Programming and software development

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Determine application development requirements	1.1 Review detailed organisational requirements and application requirements to select tool sets 1.2 Develop prioritised plan using series of recursive and iterative stages of build to satisfy organisational and application requirements 1.3 Identify and formally allocate responsibilities for features to developers to implement prioritised plan 1.4 Plan and document endorsement of reviews, administration

© Commonwealth of Australia, 2025 Future Skills Organisation

	schedules, and development milestones
2. Determine the work metrics	2.1 Set development goals in consultation with user 2.2 Seek and secure agreement on, and adherence to, single common notation with user 2.3 Determine tools, features and techniques for development environment 2.4 Plan, develop, document and facilitate version and change-control methods 2.5 Plan for and facilitate training and exposure for user via chosen development method
3. Implement the administration method	3.1 Determine and reach agreement on specifications with user 3.2 Confirm dates for established milestones with user and secure written agreement 3.3 Administer and maintain time-recording and management methodologies

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	**Description**
Reading	• Interprets, and critically analyses, complex texts and applies the appropriate strategies to construct meaning from complex technical documents
Writing	• Displays a knowledge of structure and layout, employing a broad vocabulary, grammatical structure and the conventions appropriate to text, when developing documentation
Oral communication	• Demonstrates flexibility in spoken texts by choosing the appropriate structures and strategies • Applies appropriate strategies to extract the main ideas from oral texts when liaising with stakeholders, facilitating training and informing parties on the administration method
Interact with others	• Recognises and applies, the protocols governing what to communicate, with whom, and how, when liaising with stakeholders, facilitating training and informing parties on administration methods • Recognises the importance of joint ownership of the process, and outcomes, and tries to identify common ground, shared goals, and agreement on the best course of action

© Commonwealth of Australia, 2025 Future Skills Organisation

Get the work done	• Sequences and schedules complex activities, monitors implementation, and manages relevant communication, when implementing a prioritised plan and database, scheduling timelines, allocating responsibilities, and establishing goals and methods • Makes a range of critical and non-critical decisions in relatively complex situations, taking a range of constraints into account • Uses analytical processes to decide on a course of action, establishing the criteria for deciding between options • Demonstrates a sophisticated understanding of principles, concepts, language and practices associated with the digital world, and uses these to troubleshoot and understand, the uses and potential of new technology

Assessment Requirements for ICTPRG531 Prepare for application development using current methods

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit; including evidence of the ability to:

- Prepare once for application development using current methods, including the ability to:
  - determine the organisational requirements including selecting and using a tool set, implementing and incorporating a physical database, and identifying the schedule of modules
  - determine the work metrics including development goals, features and techniques most appropriate to the development environment
  - facilitate, plan, develop and document the version and change-control methods
  - facilitate training and exposure for users via chosen method
  - determine and secure agreement as to specifications and milestones
  - inform the production-system parties and secure written acknowledgment
  - administer and maintain time-recording and management
  -

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

- Commonly used and industry-accepted prototyping tools
- Programming languages commonly used for application development
- Quality assurance practices required for software development
- Iterative software development methodologies
- Training development and facilitation approaches
-

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Skills must be demonstrated in a workplace or simulated environment where conditions are typical of those in an ICT working environment or ICT workplace. This includes:

- Integrated development environment
- Physical database
- Detailed user requirements
- Prototyping software
- Individuals users including to enable training facilitation
- Application requirements document, including the model and scope

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

ICTPRG532 Apply advanced object-oriented language skills

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Application

This unit describes the skills and knowledge required to undertake advanced programming tasks using object-oriented programming languages in the development of large-sized applications.

It applies to individuals who are programmers producing complex object-oriented programming in the development of large-sized applications.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Programming and software development

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan application implementation	1.1 Plan implementation of application according to system specifications 1.2 Present implementation plan to user and negotiate to reach agreement
2. Implement the application design	2.1 Prepare version control system according to implementation plan 2.2 Develop application according to implementation plan, system

© Commonwealth of Australia, 2025 Future Skills Organisation

	specifications and organisational code conventions 2.3 Document application according to organisational documentation conventions
3. Test the application	3.1 Develop tests to determine application logic and syntax satisfies system specifications 3.2 Perform testing on application to determine application satisfies system specifications and address variances 3.3 Document tests according to organisational documentation conventions
4. Hand over the application to the user	4.1 Review application against system specifications and address variances 4.2 Present the application to the user and obtain user acceptance

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	**Description**
Reading	• Interprets and critically analyses complex texts and applies appropriate strategies to construct meaning from complex standards and guidelines documents
Writing	• Displays knowledge of structure and layout, employing broad vocabulary, grammatical structure and conventions appropriate to text when creating program documentation and documenting tests and test results • Communicates complex relationships between ideas and information, matching the style of writing to the purpose and audience, and displays a knowledge of structure and layout, employing a broad vocabulary, grammatical structure, and the conventions appropriate to text
Numeracy	• Selects from, and applies, an expanding range of mathematical and problem-solving strategies
Get the work done	• Accepts responsibility for planning and sequencing complex tasks and workload, taking into account capabilities, efficiencies and effectiveness • Uses systematic, analytical processes in complex, non-routine situations, setting goals, gathering relevant information, and identifying and evaluating options against agreed criteria • Uses analytical processes to decide on a course of action, establishing

© Commonwealth of Australia, 2025 Future Skills Organisation

	criteria for deciding between options • Understands key principles and concepts underpinning the design and operation of digital systems and tools

Assessment Requirements for ICTPRG532 Apply advanced object-oriented language skills

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit; including evidence of the ability to:

- Plan, implement, test, and handover one application, using two object-oriented languages, including the ability to:
  - implement nested classes
  - design and implement dynamic data structures including a doubly linked list and a binary tree
  - design and implement a data structure utilising a hash function
  - compare three sorting algorithms
  - select and implement a sorting algorithm and a comparator
  - compare three search algorithms
  - select and implement a search algorithm
  - implement two inter-process communication mechanisms
  - select and implement a search algorithm
  - implement a graphical user interface with:
    - drag and drop
    - help files
    - 2D graphics
  - utilise an architectural framework and third party library
  - implement a client-server application including data transfers
  - create tests and debug an application
  - document code
  - utilise a version control system for code and documentation management
  -

© Commonwealth of Australia, 2025 Future Skills Organisation

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

- Architectural framework for web-enabled application development
- Inter-process communication mechanisms
- Development methodologies for large-size applications
- Testing techniques as applied to distributed application development
- Design patterns
- Graphical user interface design principles
- Client-server model
- Dynamic data structures and associated space and time complexities
- Hash functions and data structures using hash functions and associated space and time complexities
- Sorting algorithms and associated time complexities
- Search algorithms and associated time complexities
- Programming language features and syntax
-

Assessment Conditions

Skills must be demonstrated in a workplace or simulated environment where conditions are typical of those in an ICT working environment or ICT workplace. This includes:

- Database management system (DBMS)
- Networked computers
- Integrated development environment
- Debugging tools
- System specifications including problem descriptions
- Organisational code conventions
- Organisational documentation conventions
- Individual user
- Access to third party libraries and related documentation
- Access to architectural frameworks and related documentation
- Access to version control system

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

ICTPRO501 Develop training, marketing and sales resources for telecommunications products

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to develop documentation and training material, providing product-specific technical information resources for use by technical, sales and training personnel within an organisation.

It applies to individuals with responsibilities for professional development on product-specific material who may be technical or semi-technical staff involved in sales and marketing of new and emerging technologies in next generation networks (NGN). The training resources, including web resources, are likely to be for new products using emerging technologies, supplied by the service provider.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – product skills and advice

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*

© Commonwealth of Australia, 2025 Future Skills Organisation

1. Prepare information and formats for training, marketing and sales resources	1.1 Identify target audience, product type, resources type, format and purpose to be developed 1.2 Locate enterprise resources relating to telecommunications product information and technical data suitable for training, such as marketing and sales materials, manufacturer's documentation and sites for suitable resources 1.3 Research range of formats for resources and materials to meet requirements of identified audience 1.4 Determine specifications for resource material and confirm with client for approval
2. Develop resources and obtain approvals	2.1 Produce draft training, marketing and sales resources in consultation with relevant user groups and training resource designers 2.2 Check that resources are for latest product available for sales and marketing 2.3 Produce clear and accurate training manuals and user guides 2.4 Confirm accuracy of information with appropriate technical staff prior to publication or production, and obtain approvals
3. Monitor distribution and maintenance of resources	3.1 Develop schedule for distribution of resources consistent with product or facility release and list of users 3.2 Seek feedback on content and presentation from users and make improvements as required

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	**Performance Criteria**	**Description**
Reading	1.1-1.4, 2.2, 2.4, 3.2	• Critically organises, evaluates and applies content from a range of structurally complex texts including client briefs, product and technical information and interpretation of feedback from users
Writing	1.3, 1.4, 2.1,	• Generates complex written texts appropriate for a specific audience, demonstrating control over a

© Commonwealth of Australia, 2025 Future Skills Organisation

	2.3, 3.1, 3.2	broad range of writing styles and purposes
Oral Communication	1.1, 1.4, 2.1, 2.4, 3.2	• Establishes and maintains complex and effective rapport with clients and colleagues, with a depth of understanding that includes multiple and unstated meanings
Navigate the world of work	1.4, 2.4	• Recognises and follows explicit and implicit protocols in relation to liaison with clients and staff • Ensures knowledge of legislative requirements and products is kept up to date to provide accurate information
Get the work done	1.1-1.4, 2.1, 2.2, 3.2	• Uses a mix of intuitive and formal processes to identify key information and issues, evaluate alternative strategies, anticipate consequences and consider implementation issues and contingencies in relation to resource production • Makes a range of critical and non-critical decisions in relatively complex situations, taking a range of constraints into account when determining content and format requirements • Adopts content and presentation proposals suggested by others and finds ways to make them work in practice • Reflects on the ways in which digital systems and tools are used or could be used to develop resources, and begins to recognise strategic as well as operational applications

Assessment Requirements for ICTPRO501 Develop training, marketing and sales resources for telecommunications products

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- interpret and use equipment and system manuals, specifications, relevant enterprise policy and documentation
- develop product training, marketing and sales resources for different knowledge and skill levels and applications
- evaluate web based training, marketing and sales resources
- implement improvements based on feedback
- provide a range of resource types, including print based and web based.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- evaluate common client telecommunications applications and related equipment
- investigate work health and safety (WHS) and regulatory requirements relevant to training and marketing
- investigate and compare specific product knowledge and reference documents relevant to products for inclusion in appropriate resources
- define relevant technical terminology
- outline the steps in the process of developing product resources.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – product skills and advice field of work and include access to:

- a workplace where technical information may be developed and distributed to technical, sales and training staff
- relevant product technical information, databases, legislative requirements and other site and project related documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTRFN201 Install a satellite antenna

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to assemble, connect, align and test equipment according to plans, specifications and site specific requirements.

It applies to individuals who work on single and multiple dwellings, commercial buildings, telecommunications structures and at ground level to enable signals from geostationary communications satellites. Installations might be new or existing, stand alone or be a part of a site with multiple antennas.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Unit Sector

Telecommunications – radio frequency networks

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for work on satellite antenna	1.1 Prepare for installation, applying all relevant legislation, codes, regulations and standards, and identify any safety issues 1.2 Organise resources to be available on site

© Commonwealth of Australia, 2025 Future Skills Organisation

	1.3 Contact client to arrange access to site and notify about possible outage 1.4 Organise tools and equipment and ensure they are in safe working order and adjusted to manufacturer's specifications 1.5 Obtain details of satellite to be acquired and precise details of satellite antenna location 1.6 Determine azimuth and elevation for satellite receiving antenna 1.7 Determine polarisation angle of satellite receiving antenna feedhorn 1.8 Determine suitable position to mount antenna with agreement from client
2. Assemble and mount satellite antenna and cables	2.1 Assemble satellite antenna on site according to plans, specifications and enterprise guidelines using safe industry practices 2.2 Connect coaxial cable to antenna and install lightning protection devices 2.3 Mount satellite antenna on to installed mounting arrangements and set initial antenna azimuth, elevation and polarisation
3. Test and align antenna system	3.1 Connect installed antenna system to satellite receiver or test equipment and make final adjustments to azimuth, elevation and polarisation to optimise signal level and quality 3.2 Conduct performance tests according to manufacturer's specifications and enterprise guidelines 3.3 Interpret test results, compare with manufacturer's design specifications and make adjustments
4. Complete administrative duties	4.1 Record test results and complete appropriate records 4.2 Secure and clean up site to original condition in environmentally safe manner 4.3 Notify client of work completion and obtain sign off

Foundation Skills

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

© Commonwealth of Australia, 2025 Future Skills Organisation

Reading	1.4, 2.1, 3.2, 3.3	• Recognises and interprets textual information from relevant sources to determine specifications, enterprise guidelines and plans
Writing	1.3, 1.8, 4.1, 4.3	• Uses clear, specific and industry related terminology to complete and update workplace documentation and in written communications with clients
Oral Communication	1.3, 1.8, 4.3	• Uses specific and relevant language to clearly articulate operational and site matters • Uses questioning and listening techniques to determine the views and opinions of others
Numeracy	1.6, 1.7	• Analyses numerical information to measure angles, evaluate technical data, interpret results and take measurements
Navigate the world of work	1.1, 1.4, 2.1, 4.2	• Takes personal responsibility for adherence to legal and regulatory requirements, with specific reference to safe industry practices • Understands the main tasks, responsibilities and boundaries of own work
Get the work done	1.2, 1.4, 1.5, 1.8, 2.1-2.3, 3.1-3.3	• Determines job priorities, sequences the steps involved in clearly defined and familiar tasks, and identifies and assembles the resources and access required • Takes responsibility for routine decision making by selecting from a range of predetermined options in routine situations, identifying and taking situational factors into account • Identifies and implements standard solutions for routine problems

Assessment Requirements for ICTRFN201 Install a satellite antenna

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- prepare the site and obtain resources in preparation for installation
- determine satellite type and orientation
- assemble, install, align and test a satellite antenna according to plans and specifications, and site specific safety requirements
- conduct performance tests according to manufacturer's specifications and enterprise guidelines.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the following features of a satellite antenna:
  - directivity
  - operation of parabolic reflector and feedhorn
  - optimum placement
  - pattern
  - polarisation
- discuss bit error ratio (BER)
- summarise coaxial cable types and properties
- discuss electromagnetic waves with reference to:
  - absorption by trees and buildings
  - effect of weather on absorption
  - awareness of exposure to electromagnetic radiation (EMR)

© Commonwealth of Australia, 2025 Future Skills Organisation

- outline legislation, codes of practice and other formal agreements that directly impact on antenna installation
- explain modulation:
  - bandwidth
  - individual spectrum shape of digital satellite television signals
- discuss modulation error ratio (MER)
- outline radio frequency (RF) spectrum terminology related to bands used for satellite broadcasting (C, S, L, Ku, Ka bands)
- outline satellite antenna product knowledge
- summarise signal level expressed in dBuV units
- explain specific work health and safety (WHS) requirements that impact on the installation of satellite antenna equipment.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications – radio frequency networks field of work and include access to:

- a suitable site for satellite antenna installation
- a range of antennas and cables currently used in industry
- a range of general tools and test equipment required for satellite antenna installation and testing.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for ICTRFN202 Install a terrestrial antenna

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- organise the site and obtain relevant resources in preparation for installation
- assemble, install, align and test a terrestrial antenna according to plans and specifications, and site specific safety requirements
- conduct performance tests according to manufacturer's specifications and enterprise guidelines.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the following features of an antenna:
  - directivity
  - front to back ratio
  - optimum placement
  - pattern
  - polarisation
- discuss bit error ratio (BER)
- summarise coaxial cable types and properties
- discuss electromagnetic waves including:
  - absorption by trees and buildings
  - awareness of exposure to electromagnetic radiation (EMR)
  - reflection

© Commonwealth of Australia, 2025 Future Skills Organisation

- outline legislation, codes of practice and other formal agreements that directly impact on antenna installation
- explain modulation including:
  - bandwidth
  - individual spectrum shape of analog and digital television signals and digital audio broadcasting plus (DAB+) digital radio signals
- discuss modulation error ratio (MER)
- outline radio frequency (RF) spectrum including:
  - Australian DAB+ digital radio channel frequencies
  - Australian television ultra high frequency (UHF) and very high frequency (VHF) channel plan (digital and analog)
  - terminology related to bands used for broadcasting (Bands I , II, III, IV and V)
- explain signal level expressed in dBuV units
- discuss specific work health and safety (WHS) requirements that impact on the installation of terrestrial antenna equipment
- summarise television antenna product knowledge.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications – radio frequency networks field of work and include access to:

- a suitable site for satellite antenna installation
- a range of antennas and cables currently used in industry
- a range of general and test equipment required for satellite antenna installation and testing.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTRFN301 Install a radio communications antenna and feedline

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to install and test a communications antenna and feedline on a range of fixed or mobile structures

It applies to individuals working as telecommunications and radio communications technicians who operate within cellular, radio broadband and digital TV reception applications. Installations may be new or existing, standalone or part of a site with multiple antennas.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Unit Sector

Telecommunications – radio frequency networks

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan assembly of antenna system	1.1 Arrange access to site according to required procedure 1.2 Apply all relevant legislation, codes, regulations and standards in planning process

© Commonwealth of Australia, 2025 Future Skills Organisation

	1.3 Obtain relevant antenna specifications, requirements and radio communication site management book (RCSMB) from appropriate personnel 1.4 Organise appropriate installation personnel to be available on site 1.5 Assess relevant hazard levels from RCSMB and take appropriate preventative action according to prescribed safety requirements 1.6 Identify other antennas at site location and notify those who may be affected by outages 1.7 Inspect antenna system and feedline for physical damage before further work is performed 1.8 Organise tools and equipment and ensure they are in safe working order and adjusted to manufacturer's specifications
2. Assemble, mount and align antenna and prepare feedline	2.1 Follow site specific safety requirements and enterprise work health and safety (WHS) processes and procedures 2.2 Assemble antenna system in safe manner according to manufacturer's instructions 2.3 Mount antenna with correct azimuth and polarisation according to manufacturer's instructions and work practices 2.4 Install radome to antenna if provided 2.5 Install lightning protection systems according to plans and specifications 2.6 Align antenna in horizontal and vertical planes to maximise signal
3. Test antenna installation and document test results	3.1 Conduct performance tests in safe manner according to manufacturer's specifications and instructions 3.2 Record, interpret and compare test results with manufacturer's data or design specifications 3.3 Confirm correct overall operation of antenna system
4. Complete administrative tasks and clean up site	4.1 Complete and store appropriate records and test results according to enterprise policy 4.2 Label radio frequency (RF) transmitter equipment and feedlines according to legislation 4.3 Notify all affected by outage that normal operation can resume 4.4 Clean, pack and store all tools and test equipment, and organise transport in suitable protective casing where appropriate 4.5 Restore any changes made to worksite to client's satisfaction and obtain sign off

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.8, 2.2, 2.5, 3.1, 4.1	• Recognises and interprets textual information from relevant sources to determine specifications, enterprise guidelines, policy and instructional material
Writing	1.4, 1.6, 3.2, 4.1-4.3	• Uses clear, specific and industry related terminology to complete and update workplace documentation and in written communications with clients
Oral Communication	1.3, 1.4, 1.6, 4.3	• Uses specific and relevant language to clearly articulate operational and site matters and appropriate tone for successful negotiations • Uses questioning and listening techniques to determine the view and opinions of others
Numeracy	2.6, 3.1, 3.2	• Analyses numerical information to evaluate technical data and interpret results, take measurements and correctly calibrate equipment
Navigate the world of work	1.5, 2.1-2.3, 4.2	• Takes personal responsibility for adherence to legal and regulatory requirements with specific reference to safe industry practices • Understands the main tasks, responsibilities and boundaries of own work
Get the work done	1.1, 1.6-1.8, 2.3-2.5, 3.1, 3.3, 4.1, 4.4, 4.5	• Determines job priorities, sequences the steps involved in clearly defined and familiar tasks, and identifies and assembles the resources and access required • Takes responsibility for routine decision making by selecting from a range of predetermined options in routine situations, identifying and taking situational factors into account • Identifies and implements standard solutions for typical installation challenges • Follows routine procedures for using digital technology to enter, store and retrieve information directly relevant to own enterprise policy

Assessment Requirements for ICTRFN301 Install a radio communications antenna and feedline

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- determine installation requirements and ensure site inspection activities are conducted prior to installation
- conduct installation of a communications antenna according to plans and specifications
- assess hazard levels at a radio frequency (RF) site and apply knowledge of safety precautions for self, fellow workers and the public
- mount an antenna, connect a transmission line and physically align an antenna
- use appropriate test equipment to perform a return loss sweep measurement or a measurement of forward and reflected power on at least two different antenna systems.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline current industry practice for antenna installation including:
  - earthing
  - lightning protection
- describe the procedures and equipment required for:
  - antenna sweep testing to measure return loss
  - measurement of distance to fault
  - measurement of feedline insertion loss
  - measurement of forward and reflected RF power
- summarise features of instrument and equipment test methods and performance requirements

© Commonwealth of Australia, 2025 Future Skills Organisation

- outline legislation, codes of practice and other formal agreements that directly impact on operation and testing of radio communications antennas and equipment
- identify the general components and installation of antennas and feedlines
- discuss the application of RF and electromagnetic radiation (EMR) standards and specific work health and safety (WHS) requirements
- discuss the impact on the use and testing of radio communications instruments and equipment
- identify the types of antennas that can withstand extreme environments
- summarise typical issues and challenges that occur in telecommunications antenna installations.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications – radio frequency networks field of work and include access to:

- a site for antenna installation
- a range of antennas and feedlines currently used in industry
- a range of general tools and test equipment required for antenna installation and testing.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTRFN302 Install mobile telecommunications in motor vehicles

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to fit radio transceivers and cellular mobile phone handsets with powered docking cradles and to install peripheral components such as external antenna, microphone, loudspeaker, mobile data terminals and global positioning systems (GPS) in domestic, commercial or industrial motor vehicles.

It applies to individuals working as installers and technicians who liaise with clients to determine all technical requirements and interpret all regulatory and legislative requirements appropriately.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – radio frequency networks

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan for installation of mobile telecommunications in motor vehicles	1.1 Obtain relevant legislation, codes, regulations and standards and follow work health and safety (WHS) and environmental requirements for given work 1.2 Obtain mobile telecommunications equipment and manufacturer's

© Commonwealth of Australia, 2025 Future Skills Organisation

	installation documentation 1.3 Determine critical automotive electrical systems that need to be considered during installation process to prevent any damage to vehicle system 1.4 Verify installation requirements from client and advise client of issues affecting performance 1.5 Obtain tools and test equipment required for safe work practices
2. Install mobile equipment	2.1 Attach primary mobile telecommunications equipment to vehicle using fixing and fastening hardware, clear of air bag deployment and according to client, vehicle and equipment manufacturer and WHS requirements 2.2 Wire primary mobile telecommunications equipment to vehicle electrical system using industry wiring practices without impacting on other electrical systems 2.3 Attach and wire peripheral mobile telecommunications equipment and components of installation to client’s and manufacturer's requirements 2.4 Replace any existing fittings or vehicle components removed during installation and restore to original condition 2.5 Test completed installation to verify that operation of critical automotive electrical systems have not been affected, and rectify if required
3. Complete installation	3.1 Restore vehicle and worksite to client's satisfaction by disposing of waste materials according to environmental requirements 3.2 Note and document any damage that may have occurred during installation and report according to enterprise procedures 3.3 Instruct client on operation of installed equipment 3.4 Complete all administrative tasks and file according to enterprise requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	2.1, 2.3, 3.2,	• Recognises and interprets textual information from relevant sources to determine job specifications and

© Commonwealth of Australia, 2025 Future Skills Organisation

	3.4	regulatory and legislative requirements
Writing	1.4, 3.2	• Uses clear, specific and industry related terminology to complete and update workplace documentation and in written communications with clients
Oral Communication	1.4, 3.3	• Uses specific and relevant language to clearly articulate technical information and appropriate tone for successful negotiations • Uses questioning and listening techniques to determine the understanding of others
Numeracy	2.2, 2.3, 2.5	• Performs calculations appropriate for measuring and estimating materials and for testing installations
Navigate the world of work	1.1, 2.1, 3.2	• Takes personal responsibility for adherence to legal and regulatory requirements, with specific reference to safe industry practices • Understands the nature and purpose of own role and associated responsibilities, and how it contributes to the work of others in the immediate work context
Get the work done	1.1-1.3, 1.5, 2.1-2.5, 3.4	• Determines job priorities, sequences the steps involved in clearly defined and familiar tasks, and identifies and assembles the resources and access required • Takes responsibility for routine decision making by selecting from a range of predetermined options in routine situations, identifying and taking situational factors into account • Identifies and implements standard solutions for typical installation challenges • Reflects on outcomes and identifies what worked and where things could be done differently in the future

Assessment Requirements for ICTRFN302 Install mobile telecommunications in motor vehicles

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- obtain installation parameters and compliance requirements in preparation for installation
- install cable loom, wiring mobile and peripheral equipment
- test the equipment to verify correct installation and operation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline customer service principles, particularly dealing with clients face to face
- discuss electrical fundamentals
- summarise electromagnetic radiation (EMR)
- discuss enterprise or service-specific knowledge of products and services supplied
- outline objectives and methods of training for product use for client education
- summarise work health and safety (WHS) principles and enterprise-specific job safety analysis (JSA) requirements
- provide an overview of mobile radio and cellular radio product range and connection methods
- summarise pre-installation enterprise-specific requirements
- explain the following aspects of radio frequency (RF):
  - principles
  - safety
  - theory
- explain return path technology

© Commonwealth of Australia, 2025 Future Skills Organisation

- discuss telephony principles to support return path awareness
- summarise test set ups for final testing
- outline vehicle electrical, electronics and computer-managed systems.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications – radio frequency networks field of work and include access to:

- vehicles and sites at which installation may be conducted
- testing equipment currently used in industry
- relevant regulatory and equipment documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTRFN303 Install WiMAX customer premises equipment broadband wireless access equipment

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to connect, set up and test Worldwide Interoperability for Microwave Access (WiMAX) customer premises equipment (CPE) in homes and commercial premises.

It applies to individuals working as technicians who connect indoor units to a customer network.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – radio frequency networks

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for WiMAX equipment installation	1.1 Arrange access to site according to required procedure 1.2 Verify customer requirements, type of WiMAX CPE equipment and location of proposed installation according to plans obtained from authorised personnel

© Commonwealth of Australia, 2025 Future Skills Organisation

	1.3 Prepare tools, equipment and CPE required for installation
2. Install outdoor unit and antenna	2.1 Make worksite safe by identifying existing and potential hazards 2.2 Comply with relevant legislation, codes, regulations and standards, work health and safety (WHS) and environmental requirements 2.3 Mount outdoor unit according to manufacturer's specifications and enterprise plans 2.4 Connect outdoor unit to indoor unit using specified cable 2.5 Position antenna towards distant WiMAX base station for preliminary orientation 2.6 Align unit for maximum signal strength using received signal strength indication (RSSI) display 2.7 Record installation and alignment details 2.8 Connect indoor unit and accessories to customer equipment
3. Test performance of installation	3.1 Test WiMAX CPE according to manufacturer's procedures 3.2 Check operating environment does not degrade test results 3.3 Evaluate test results to verify operational performance with customer
4. Restore site and complete documentation	4.1 Restore worksite to customer's satisfaction 4.2 Complete reports on installation 4.3 Notify customer and obtain sign off

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.3, 3.1	• Recognises and interprets textual information from relevant sources to determine job specifications and regulatory and legislative requirements
Writing	2.7, 4.2, 4.3	• Uses clear, specific and industry related terminology to complete and update workplace documentation and in written communications with customers

© Commonwealth of Australia, 2025 Future Skills Organisation

Numeracy	2.6, 3.3	• Analyses numerical information to interpret technical data
Oral Communication	1.2, 4.3	• Uses specific and relevant language to clearly articulate technical information • Uses appropriate tone and listening techniques to determine the understanding of others
Navigate the world of work	2.1, 2.2	• Takes personal responsibility for adherence to legal and regulatory requirements, with specific reference to safe industry practices • Understands the nature and purpose of own role and associated responsibilities
Get the work done	1.1-1.3, 2.3-2.6, 2.8, 3.1, 3.2, 4.1	• Determines job priorities and sequences the steps involved in clearly defined and familiar tasks, and identifies and assembles the resources and access required • Takes responsibility for routine decision making by selecting from a range of predetermined options in routine situations, identifying and taking some situational factors into account • Identifies and implements standard solutions for typical installation challenges • Reflects on outcomes and identifies what worked and where things could be done differently in the future

Assessment Requirements for ICTRFN303 Install WiMAX customer premises equipment broadband wireless access equipment

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- ensure that the site access, resources and installation requirements are confirmed prior to installation
- install and test Worldwide Interoperability for Microwave Access (WiMAX) customer premises equipment (CPE) outdoor units
- install indoor unit and connect to customer network
- reinstate site, document and complete installation reports.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the wireless standard ‘WiMAX’ including:
  - general characteristics of WiMAX networks e.g. mobile broadband and internet access
  - applications of WiMAX technology
  - terminology associated with WiMAX technologies
  - range and function of gateway devices
  - protocols IEEE 802.16 and IEEE 802.11
- identify and discuss the relevant legislation, codes, regulations and standards, work health and safety (WHS) and environmental requirements
- explain the impact of location on microwave propagation and losses.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications – radio frequency networks field of work and include access to:

- sites on which WiMAX installations can be conducted
- tools and equipment required for installation
- relevant regulatory and equipment documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTRFN304 Construct and test a radio communications device

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to plan, build and review a radio communications transmitting or receiving device.

It applies to individuals working as radio maintenance technicians, radio installers and radio repairers who use specialist equipment and work within regulatory and legislative frameworks.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – radio frequency networks

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to construct radio communications device	1.1 Prepare for construction, applying all relevant legislation, codes, regulations and standards, and identify any safety issues 1.2 Determine details of radio communications device to be constructed from project specifications 1.3 Produce wiring diagram, component list and block diagram of radio

© Commonwealth of Australia, 2025 Future Skills Organisation

	communications device to prepare for construction and testing of device 1.4 Draw up plans showing method of construction and enclosure details 1.5 Designate suitable test points along signal flow paths on circuit diagram for testing of functional blocks 1.6 Produce test setups to evaluate performance of radio communications device 1.7 Obtain tools and test equipment
2. Construct and test radio communications device	2.1 Assemble radio communications device according to circuit diagram and layout drawing 2.2 Test performance and operation of individual functional blocks and overall radio communications device according to test regime 2.3 Transmit or receive signals to evaluate qualitative performance through radio communications device
3. Complete documentation and clean up worksite	3.1 Document results of test procedures and compare with initial project specifications 3.2 Finalise project report and make recommendations for improvement to radio communications device 3.3 Remove waste from worksite according to environmental requirements and restore site to safe condition

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2	• Recognises and interprets textual information from relevant sources to determine job specifications and regulatory and legislative requirements
Writing	1.3-1.5, 3.1, 3.2	• Uses clear, technically specific language, appropriate formatting and diagrammatic information to complete and update workplace documentation
Numeracy	2.3	• Analyses numerical information when undertaking test measurements, interpreting results and evaluating performance

© Commonwealth of Australia, 2025 Future Skills Organisation

Navigate the world of work	1.1, 3.3	• Takes personal responsibility for adherence to legal and regulatory requirements, with specific reference to safe industry practices • Understands the nature and purpose of own role and associated responsibilities
Get the work done	1.1, 1.6, 1.7, 2.1, 2.2, 3.2	• Determines job priorities, sequences the steps involved in clearly defined and familiar tasks, and identifies and assembles the equipment, resources and access required • Takes responsibility for routine decision making by selecting from a range of predetermined options in routine situations, identifying and taking situational factors into account • Identifies and implements standard solutions when troubleshooting and managing contingencies to adapt assembly and review procedures • Reviews outcomes and identifies technical improvements that could be made

Assessment Requirements for ICTRFN304 Construct and test a radio communications device

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- plan and prepare for construction of a radio communications device
- prepare a wiring diagram and component list
- construct a radio communications device
- test a radio communications device.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain electrical symbols and circuit diagrams
- summarise the general principles of radio communications and radio propagation
- identify and outline the characteristics of:
  - radio communications components
  - device pinouts
  - part numbers
  - polarities
  - ratings
- summarise the operation and characteristics of:
  - amplifiers
  - demodulators
  - mixers
  - modulators

© Commonwealth of Australia, 2025 Future Skills Organisation

  - oscillators
- explain the principles of modulation.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications – radio frequency networks field of work and include access to:

- sites where radio communications devices may be constructed and tested
- test instruments currently used in industry
- relevant regulatory and equipment documentation that impacts on work activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTRFN305 Operate and maintain radio communications technical instruments and field equipment

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to take measurements, find faults, undertake minor repairs and commission new instruments and equipment.

It applies to individuals with proficient technical skills including field officers from regulatory authorities or other private and public organisations. In this role, individuals must comply with radio communications transmitter licensing requirements, operator certificates for maritime and aeronautical services, work health and safety (WHS) and electromagnetic radiation (EMR) licensing requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – radio frequency networks

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for use of instruments and field equipment	1.1 Plan and prepare work according to site procedures, operating environment and relevant legislation, codes, regulations and standards 1.2 Select measurements required to meet performance outcomes

© Commonwealth of Australia, 2025 Future Skills Organisation

	1.3 Read, interpret and use equipment and system manuals, specifications and relevant organisational policy to determine work requirements 1.4 Select and ensure equipment for work activities is ready for operation 1.5 Determine, address and report potential risks, hazards and environmental issues 1.6 Adhere to relevant emergency procedures, policy guidelines and WHS procedures to ensure safety of personnel and plant
2. Test instruments and field equipment	2.1 Perform safety checks according to instrument and equipment manual and organisational procedures 2.2 Confirm equipment is calibrated and calibration label is within approved timeframes 2.3 Select appropriate traceable calibrated equipment where measurements are required to be traceable according to national standards 2.4 Label and report damaged or unsafe instruments and field equipment, and send for service 2.5 Update operational log books
3. Operate instruments and field equipment	3.1 Optimise instrument and equipment settings for particular measurement or analysis 3.2 Perform measurements with optimum precision given field and technical constraints 3.3 Assess data for accuracy and precision against quality control information, known standards and references within measurement uncertainty
4. Maintain instruments and field equipment	4.1 Use fault finding techniques to verify and rectify faults 4.2 Perform preventative maintenance within limits of authorisation and report equipment wear and faults 4.3 Replace defective parts and make adjustments according to equipment specifications 4.4 Seek expert help from appropriate colleagues where problems are encountered 4.5 Update maintenance and calibration records according to organisational procedures
5. Commission new instruments and equipment	5.1 Arrange commissioning procedures with manufacturer's agent 5.2 Unpack, check and assemble instruments and equipment according to manufacturer's warranty requirements

© Commonwealth of Australia, 2025 Future Skills Organisation

	5.3 Check instrument and equipment performance against specifications prior to acceptance of item 5.4 Prepare operating instructions and make available to relevant personnel

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3, 3.3, 4.3, 5.2, 5.3	• Recognises and interprets information from relevant sources to determine technical specifications and regulatory and legislative requirements
Writing	1.5, 2.4, 2.5, 4.2, 4.5, 5.1, 5.4	• Uses clear, specific and industry related terminology to complete and update workplace documentation and in written communications with relevant internal and external personnel
Oral Communication	1.5, 4.2, 4.4, 5.1	• Uses specific and relevant language and appropriate tone to clearly articulate technical, operational and legal information to internal and external personnel • Uses listening techniques to determine the understanding of others
Numeracy	3.2, 3.3, 5.3	• Analyses numerical information when undertaking test measurements, interpreting results, calibrating equipment and evaluating performance
Navigate the world of work	1.1, 1.6, 2.1, 2.3, 4.5	• Takes personal responsibility for adherence to legal and regulatory requirements, with specific reference to the safety of self, other personnel and the plant • Understands the nature and purpose of own role and associated responsibilities
Get the work done	1.1, 1.2, 1.4, 2.2, 2.4, 3.1, 4.1-4.3, 5.2	• Determines job priorities, sequences the steps involved in clearly defined and familiar tasks, and identifies and assembles the instruments, equipment and other resources required • Takes responsibility for routine decision making by selecting from a range of predetermined options in routine situations, identifying and

© Commonwealth of Australia, 2025 Future Skills Organisation

		taking situational factors into account • Identifies and implements standard solutions for typical equipment and instrument faults • Reflects on outcomes and identifies what worked and where things could be done differently in the future

Unit Mapping Information

Assessment Requirements for ICTRFN305 Operate and maintain radio communications technical instruments and field equipment

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- obtain read and interpret radio communications instrument operating documentation
- prepare, operate and maintain radio communications instruments and field equipment appropriate to a radio communications environment
- comply with site risk control, work health and safety (WHS), environmental, quality and communication requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise the features and operating requirements of calibrated equipment and test equipment including:
  - digital radio communications measuring equipment
  - radio frequency (RF) termination
  - spectrum analyser
  - power meter
  - modulation analyser
- outline features of instrument and equipment test methods and performance requirements
- explain legislation, codes of practice and other formal agreements that directly impact on operation and testing of radio communications instruments and equipment
- outline manufacturer’s requirements for operation and testing of radio communications equipment and calibrated equipment
- summarise measurements according to test specifications

© Commonwealth of Australia, 2025 Future Skills Organisation

- list radio communications instruments and equipment
- list and describe the common WHS requirements that impact on the use and testing of radio communications instruments and equipment
- discuss typical issues and challenges that occur with radio communications instruments and field equipment.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications – radio frequency networks field of work and include access to:

- sites on which instruments and field equipment can be operated
- field measurement equipment currently used in industry
- relevant instrument and equipment manuals and other procedural documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTRFN402 Select antenna system for radio communications

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to interpret industry practices and theories, and select appropriate antenna equipment for small projects or parts of larger projects to a job specification.

It applies to individuals working alone or responsible for a technical team within regulatory authorities or other private and public organisations where they combine technical radio communications skills with broader organisational and administrative skills.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – radio frequency networks

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to select antenna system	1.1 Establish extent of project from design brief or specification within team environment 1.2 Obtain and review plans and drawings of existing or proposed installation site

© Commonwealth of Australia, 2025 Future Skills Organisation

	1.3 Determine whether antenna system hardware requires secure hut or shelter 1.4 Determine antenna requirements and antenna feedline requirements from design brief or specifications, and research available commercial products 1.5 Determine earthing components to meet regulatory and earthing requirements of antenna system 1.6 Prepare antenna feedline route to comply with job specifications and regulatory requirements 1.7 Identify installation options, and assess against performance requirements and client requirements
2. Select antenna system	2.1 Evaluate potential antenna system solutions that satisfy required performance, budgetary and regulatory requirements, and are suitable for installation in specified environment 2.2 Make recommendations and select optimum antenna system
3. Document antenna system *selection*	3.1 Document calculations, final specifications and reasons for selection of antenna system 3.2 Prepare final report, including documentation and drawings of selected antenna system, and distribute to appropriate persons in accordance with enterprise policies and procedures

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.4, 1.6, 2.1, 3.2	• Examines and interprets plans, specifications and data from relevant sources to determine all technical requirements
Writing	3.1, 3.2	• Uses clear, specific and industry related terminology in appropriate formats to complete and update workplace documentation
Numeracy	1.4, 2.1, 2.2	• Evaluates and reviews numerical information when evaluating budgetary considerations, test results and technical data, and when converting values to ratios
Interact with others	1.1, 2.2, 3.2	• Collaborates with others as part of familiar routine activities and contributes to specific activities requiring joint responsibility and accountability

© Commonwealth of Australia, 2025 Future Skills Organisation

		• Understands what to communicate to relevant personnel in routine work situations
Get the work done	1.2, 1.3, 1.5-1.7, 2.1, 2.2	• Determines job priorities and works logically and systematically to undertake clearly defined and familiar tasks • Identifies and assembles the instruments, equipment and other resources required to competently undertake the job • Uses formal decision making processes with support to clarify goals in more complex, non-routine situations • Gathers information and identifies and evaluates choices against a limited set of criteria • Applies formal problem solving processes, breaking difficult issues into manageable parts and identifying relevant options for action

Assessment Requirements for ICTRFN402 Select antenna system for radio communications

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- identify the antenna installation parameters
- select an antenna system required to meet the parameters
- determine the feedline installation from design and specifications
- document the recommendations for the antenna system selection
- comply with specifications and regulatory requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the principles of antenna wave propagation and the impact on antenna array design
- describe the principles of transmission line design and operation, and the impact on antenna design and installation including:
  - allowable loss in dB
  - characteristic impedance
  - mechanical characteristics
  - method of securing
  - radio frequency (RF) connector type
  - weatherproofing.
- describe the process for selecting an antenna design based on the application and performance requirements
- identify and describe a range of antenna systems

© Commonwealth of Australia, 2025 Future Skills Organisation

- summarise specific issues related to antenna installations and the creation of particular radiation patterns
- identify and describe the regulatory and industry standards relevant to antenna installations.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications – radio frequency networks field of work and include access to:

- antenna resources such as manufacturers' data sheets, specifications and catalogues
- transmission line resources such as manufacturers' data sheets, specifications and catalogues.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTRFN403 Test and repair cellular network equipment

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to analyse cell performance and perform diagnostic tests and repairs on sub-elements and subsystems within cellular networks.

It applies to individuals working as field officers and technicians who may be responsible under supervision for small projects or parts of larger projects and for the coordination of projects in sites remote from the organisational headquarters.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – radio frequency networks

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to test cellular network equipment	1.1 Produce alarm list from cellular network subsystem that shows faults or disturbances 1.2 Reset sub-element according to manufacturer's specifications 1.3 Clear or block alarms and adjust alarm thresholds according to manufacturer's specifications
2. Test cellular network	2.1 Test parameters influencing cell performance and record

© Commonwealth of Australia, 2025 Future Skills Organisation

sub-element equipment	performance for a range of field settings 2.2 Test, record and report sub-element performance according to manufacturer's specifications 2.3 Run diagnostic test on sub-element 2.4 Swap working or executing sub-element with spare or idle unit to allow software upgrades 2.5 Swap working or executing sub-element with spare or idle sub-element to allow replacement of hardware
3. Rectify faults in cellular network equipment subsystems	3.1 Locate faulty sub-element within subsystem and identify fault 3.2 Identify faulty parts or equipment and replace or repair according to service agreement 3.3 Record fault details and rectification summary 3.4 Hand over and sign off with client

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	**Performance Criteria**	**Description**
Reading	1.2, 1.3, 2.2	• Recognises and interprets information from relevant sources to determine technical specifications
Writing	1.1, 2.1, 2.2, 3.3, 3.4	• Uses clear, specific and industry related terminology to complete and update workplace documentation and in written communications with clients
Oral Communication	3.4	• Liaises with internal and external personnel about technical requirements using specific and relevant language • Uses listening and questioning techniques to confirm understanding
Numeracy	2.1-2.3	• Evaluates and reviews numerical information when interpreting measurements
Get the work done	1.2, 1.3, 2.1-2.5, 3.1, 3.2	• Determines job priorities and works logically and systematically to undertake clearly defined and familiar tasks • Implements actions according to a predetermined plan, making slight adjustments if necessary and

© Commonwealth of Australia, 2025 Future Skills Organisation

		addressing some unexpected issues • Takes responsibility for routine decision making by selecting from a range of predetermined options in routine situations, identifying and taking situational factors into account • Diagnoses and implements standard solutions to network problems • Understands the purposes and specific functions of common digital systems and uses them effectively to complete routine tasks

Unit Mapping Information

Assessment Requirements for ICTRFN403 Test and repair cellular network equipment

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- prepare the cellular network alarm system
- produce an alarm list and use this to locate faults
- test cellular network parameters and performance
- measure output power received around a cell
- run diagnostic tests on sub-elements and subsystems
- locate and repair faulty sub-elements and subsystems.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain anti-static protection and its importance and potential effect on cellular network equipment
- summarise cellular antenna installation procedures
- outline electrical concepts and measurements required for cellular network repairs
- explain electromagnetic radiation (EMR) and mitigation
- list the common network components and describe their basic functions
- provide an overview of:
  - the progression of generations of cellular networks
  - features and operating requirements of test equipment
- outline procedures for repairs and swap activities
- summarise test operation of cellular network equipment
- list and describe the tests required for network components

© Commonwealth of Australia, 2025 Future Skills Organisation

- describe the importance of voltage levels and polarity
- describe the precautions and actions required to minimise, control or eliminate hazards related to cellular network equipment installations.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications – radio frequency networks field of work and include access to:

- a site for mobile phone network tests and measurements
- performance testing software
- relevant legislation and documentation to test and repair network equipment.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTRFN404 Undertake radio communications signals monitoring

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to check radio communications signals for interference management, investigation, licence conditions intelligence and frequency occupancy purposes with discretion to determine appropriate action according to relevant legislation and regulations.

It applies to individuals working as field officers from regulatory authorities or other private and public organisations. They combine technical skills with broader organisational and administrative skills to monitor and action non-compliance of radio communications.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Unit Sector

Telecommunications – radio frequency networks

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for radio communications	1.1 Prepare for given work according to relevant legislation, codes, regulations and standards, including work health and safety (WHS) issues and possible hazards

© Commonwealth of Australia, 2025 Future Skills Organisation

signals monitoring	1.2 Identify specific triggers that lead to need for monitoring activities 1.3 Determine monitoring coordinates as result of client complaint 1.4 Determine extent and nature of communications problem through desktop research and relevant information 1.5 Enter necessary details into appropriate work management system
2. Plan and organise monitoring activities	2.1 Determine monitoring activities and responsibilities according to organisational requirements 2.2 Determine procedures, timeframes, resources and equipment requirements for self and others according to organisational and task requirements 2.3 Obtain resources and equipment and prepare according to organisational and task requirements 2.4 Identify communication strategies to make clients aware of their obligations under relevant legislation, codes, regulations and standards according to organisational policies and procedures 2.5 Update and review procedural and information guides as required 2.6 Implement risk management strategies as required according to set procedures and timelines
3. Undertake monitoring	3.1 Carry out monitoring activities according to organisational and legislative requirements, including WHS 3.2 Use and maintain resources and equipment according to organisational and task requirements 3.3 Identify and confirm communications and/or interference problems 3.4 Locate position and source of communications and/or interference problems 3.5 Identify organisation responsible for communications and/or interference problems 3.6 Undertake compliance analysis of unlicensed, unauthorised and non-standard equipment if appropriate 3.7 Provide advice to operational and technical subordinate officers according to organisational policies and procedures as required
4. Act on non-compliance	4.1 Provide information to client and take action as result of failure to achieve compliance according to organisational guidelines and legislative requirements based on seriousness of possible breach 4.2 Identify contraventions of compliance requirements and report recommended action according to organisational policies and procedures 4.3 Refer serious or complex situations for advice or resolution according to organisational policies and procedures

© Commonwealth of Australia, 2025 Future Skills Organisation

	4.4 Use relevant collection methods to gain information and evidence about elements of each offence to be prosecuted and provide according to legislation, procedures and rules of evidence 4.5 Conduct and fulfil court attendance requirements in compliance with organisational guidelines as required 4.6 Ensure case is finalised according to court outcomes and organisational guidelines
5. Provide reports and information	5.1 Interpret requirements of relevant legislation and provide information and advice on technical and operational matters 5.2 Advise clients affected by outcomes within limits of privacy legislation 5.3 Maintain records and prepare and provide reports according to organisational requirements 5.4 Update any compliance management systems with relevant findings and outcomes

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	**Performance Criteria**	**Description**
Reading	1.4, 3.5, 4.4, 5.1	• Analyses and consolidates information and data from a range of sources, against defined criteria and requirements, and checks for accuracy and completeness
Writing	1.5, 2.5, 3.7, 4.1, 4.2, 5.2-5.4	• Accurately records and completes organisational documents and correspondence using clear language and correct spelling, grammar and terminology
Oral Communication	1.4, 3.7, 4.2, 5.2	• Uses collaborative and inclusive techniques, including active listening and questioning and reading of verbal and non-verbal signals, to convey and clarify information and to confirm understanding
Numeracy	2.2	• Applies numerical modelling skills to identify, analyse and evaluate budgetary information, time durations and human resource allocations
Navigate the world	1.1, 2.1-2.5, 3.1, 3.2,	• Accepts responsibility and ownership for the task and makes decisions on completion

© Commonwealth of Australia, 2025 Future Skills Organisation

of work	3.5-3.7, 4.1-4.6, 5.1-5.3	parameters and the need for coordination with others • Ensures knowledge of legislative requirements and products is kept up to date to provide accurate information • Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements • Identifies and acts on issues that contravene relevant policies, procedures and legal requirements
Interact with others	1.2, 2.4, 3.3, 3.7, 4.2-4.5	• Selects and uses appropriate conventions and protocols when communicating with clients and co-workers in a range of work contexts • Uses a range of strategies to establish a sense of connection and build rapport with clients and co-workers • Recognises and accommodates basic differences and priorities of others • Cooperates with others and contributes to work practices where joint outcomes are expected and deadlines are to be met • Identifies and explores differences in a diverse range of people in the work context and makes adjustments to communication in recognition of these differences • Recognises behaviours and triggers that contribute to conflict and implements strategies to moderate conflict
Get the work done	1.1-1.4, 2.1-2.5, 3.1-3.7, 4.1-4.6, 5.1, 5.3	• Takes responsibility for planning, sequencing and prioritising tasks and own workload for efficiency and effective outcomes • Makes routine decisions and implements standard procedures for routine tasks, using formal decision making processes for more complex and non-routine situations • Addresses less predictable problems and initiates standard procedures in response, applying problem solving processes in determining a solution • Contributes to continuous improvement of current work practices by applying basic principles of analytical and lateral thinking • Uses familiar digital technologies and systems to access information, search and enter data and code, present information and

© Commonwealth of Australia, 2025 Future Skills Organisation

		communicate with others, cognisant of data security and safety

Unit Mapping Information

Assessment Requirements for ICTRFN404 Undertake radio communications signals monitoring

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- comply with site risk control, work health and safety (WHS), environmental, quality and communication requirements
- apply knowledge of appropriate procedures and techniques for conducting radio communications signals monitoring
- perform efficient and effective preparation and monitoring appropriate to a communications environment site
- calibrate, maintain and commission instruments and field equipment
- monitor communications under general direction in a range of different contexts
- respond effectively to different challenges and operational requirements for monitoring, including coping with difficulties, irregularities and breakdowns in routine.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and summarise the legislation, codes of practice and other formal agreements that directly impact on monitoring of radio communications signals including:
  - specifics of what constitutes an offence
  - responses for non-compliance
  - environmental requirements
  - privacy issues
- outline specific WHS requirements that impact on monitoring in terms of safety of self and public safety including:
  - radio frequency (RF) personal protective equipment

© Commonwealth of Australia, 2025 Future Skills Organisation

  - electromagnetic radiation (EMR) at RF transmission sites
  - building site induction requirements
  - environmental conditions
- explain specific monitoring procedures for radio communications and relevant organisational policies and procedures
- summarise characteristics of different environments and workplaces where monitoring takes place
- explain radio communications systems used in the relevant work context
- outline specific issues related to antenna performance including:
  - directivity
  - gain
  - height
- summarise the effects of cable attenuation and impedance mismatch
- outline the effects of ionosphere including:
  - high frequency (HF) propagation
  - warning, fadeout and solar flares
  - ionospheric prediction service (IPS)
- explain modulation methods, AM, FM and digital formats
- explain field strength surveys and EMR measurements
- outline the propagation properties of the terrain
- describe the legal process for prosecuting a complaint and undertaking attendance at court
- describe the process and use of direction finding equipment for HF, very high frequency (VHF), ultra high frequency (UHF) and microwave technologies.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications – radio frequency networks field of work and include access to:

- sites on which monitoring may be conducted
- monitoring and testing equipment currently used in industry
- relevant regulatory and equipment documentation that impacts on monitoring activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTRFN405 Install radio communications base station equipment

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skill and knowledge required to operate transmitters, receivers, feedline, multicoupling, data and voice equipment to connect a station in the very high frequency (VHF), ultra high frequency (UHF) or microwave bands.

It applies to individuals working as field officers from private or public organisations. They combine technical radio communications skills with organisational and administrative skills in a range of commercial and community contexts.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – radio frequency networks

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to install radio communications base station equipment	1.1 Assess available installation options against client requirements and relevant legislation, codes, regulations and standards 1.2 Arrange access to site according to required procedure 1.3 Confirm equipment locations

© Commonwealth of Australia, 2025 Future Skills Organisation

	1.4 Confirm base station equipment listings and manufacturer's and enterprise documents against installation brief 1.5 Review installation briefs in consultation with designers or manufacturers 1.6 Adjust tools and equipment to manufacturer's specification
2. Install equipment and terminate voice and data cables, power cables and radio frequency (RF) cables	2.1 Observe anti-static precautions when handling circuit cards and conduct all work in manner that is safe to self, fellow workers and the public 2.2 Install racks, frames and shelves as required for data and voice frequency (VF) interface equipment, transmitter and receiver 2.3 Position equipment and install according to manufacturer's specifications and design detail 2.4 Label equipment, distribution frames and blocks according to enterprise policy 2.5 Strip cables and terminate conductors according to manufacturer's specifications 2.6 Clean optical fibre connectors using appropriate cleaning techniques 2.7 Connect network termination unit (NTU) cables to data and VF interface unit via distribution frame 2.8 Connect data and VF cables to radio equipment 2.9 Connect digital and analog alarm inputs and outputs to supervisory, control and data acquisition (SCADA) controller 2.10 Connect power cables to rectifier, battery rack, circuit breakers and equipment according to manufacturer's and enterprise documents 2.11 Use computer or handheld device to program internal software in data and VF interface equipment, and transmitter and receiver 2.12 Interconnect multicoupling equipment to antenna feedline and transmitter and receiver units 2.13 Mount lightning protection equipment and earth wire according to specification
3. Connect receiver and transmitter multicoupling equipment to antenna feedline	3.1 Perform distance to fault measurement on antenna feedline 3.2 Perform return loss measurement of overall antenna system at transmitter and receiver connector points 3.3 Record test results
4. Finalise installation and complete	4.1 Complete preliminary tests to verify transmitter and receiver operation prior to commissioning 4.2 Complete installation report, test results and administrative tasks and

© Commonwealth of Australia, 2025 Future Skills Organisation

preliminary tests and administrative tasks	forward to appropriate person according to enterprise policy 4.3 Dispose of packaging according to accepted environmental conditions 4.4 Notify appropriate person that base station is ready for commissioning and integration

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	**Performance Criteria**	**Description**
Reading	1.1, 1.2, 1.4, 1.6, 2.3-2.5, 2.10, 2.13, 4.3	• Recognises and interprets enterprise, regulatory and technical information from relevant sources to determine all specifications and frameworks
Writing	1.3, 2.4, 3.3, 4.2, 4.4	• Uses clear, specific and industry related terminology to complete and update workplace documentation and in written communications with clients
Oral Communication	1.3, 1.5, 4.4	• Liaises with internal and external personnel about technical requirements using specific and relevant language • Uses listening and questioning techniques to confirm understanding
Numeracy	3.1, 3.2	• Evaluates and interprets technical data according to predetermined specifications and uses mathematical formulas to solve problems
Navigate the world of work	1.1, 2.1	• Takes personal responsibility for adherence to legal and regulatory requirements with specific reference to safety • Understands the nature and purpose of own role and associated responsibilities
Get the work done	1.2, 1.6, 2.2, 2.3, 2.5-2.13, 4.1-4.3	• Determines job priorities of self and others, and works logically and systematically to undertake clearly defined and familiar tasks • Implements actions according to a predetermined plan, making slight adjustments if necessary and addressing some unexpected issues • Takes responsibility for routine decision making by selecting from a range of predetermined options in routine situations, identifying and taking situational factors into account

© Commonwealth of Australia, 2025 Future Skills Organisation

		• Diagnoses faults in different situations and implements standard solutions to network problems • Understands the purposes and specific functions of common digital systems and uses them effectively to complete routine tasks

Assessment Requirements for ICTRFN405 Install radio communications base station equipment

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- assess the client and installation requirements
- ensure relevant regulations and standards will be applied
- install radio communications base station equipment
- perform distance to fault measurement on feedline
- perform return loss measurement on feedline
- document and complete installation report.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the following:
  - anti-static precautions
  - radio frequency (RF) radiation hazard awareness
  - network termination unit
  - radio transmitter system
  - radio receiver system
  - multicoupler
  - supervisory, control and data acquisition (SCADA) system inputs and outputs
- outline the operation and purpose of testing equipment
- interpret the meaning of various test results
- identify network element and system specifications

© Commonwealth of Australia, 2025 Future Skills Organisation

- outline the principles and performance testing and fault finding techniques of telecommunications networks
- describe the practices and procedures for installation of radio communications equipment for the following:
  - fibre optic connector cleaning techniques
  - computer software installations to various devices
- identify and describe the appropriate test equipment to undertake performance and fault-finding techniques in telecommunications networks including:
  - distance to fault measurement
  - return loss measurement
  - terminate data and voice and RF cable.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications – radio frequency networks field of work and include access to:

- sites on which base station installation can be conducted
- tools and equipment required for installation
- technical specifications, organisational documentation and requirements for installation and testing.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTRFN501 Test cellular handset enhancements and international roaming agreements

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to conduct and analyse the results of testing a subscriber's cellular phone service in a public land mobile network (PLMN) overseas and make recommendations accordingly.

It applies to individuals who work as technical officers and supervisors. They are proficient in the use of specialised testing equipment, are effective communicators and operate with a high degree of autonomy.

No licensing, legislative or certification requirements apply at the time of publication.

Unit Sector

Telecommunications – radio frequency networks

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to conduct roaming tests	1.1 Obtain relevant legislation, codes, regulations and standards for compliance when conducting work 1.2 Identify need for tests from service provider mobile network deployment taskforce 1.3 Develop enterprise test procedure according to roaming arrangements and manufacturer test regime

© Commonwealth of Australia, 2025 Future Skills Organisation

	1.4 Arrange access to location where tests are to be conducted according to required procedure 1.5 Select resources needed to conduct tests, complying with roaming arrangements 1.6 Confirm details of international roaming partners and agreements with partner mobile operators 1.7 Advise network operations centre of test details and test schedule
2. Conduct tests and analyse test results	2.1 Conduct tests according to enterprise test procedure 2.2 Analyse recorded test results for roaming compliance and functionality of subscriber identity module (SIM) card and phone enhancements
3. Document results	3.1 Document details of roaming tests, SIM card validity and functionality of phone enhancements, and make recommendations to appropriate person 3.2 Report non-compliance to appropriate person for investigation with international roaming partners and mobile phone manufacturer

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	**Performance Criteria**	**Description**
Reading	1.2, 1.3, 2.1	• Recognises and interprets enterprise, regulatory and technical information from relevant sources to determine all specifications and frameworks
Writing	1.3, 1.6, 1.7, 3.1, 3.2	• Uses clear, specific and industry related terminology to complete and update workplace documentation and in written communications to relevant personnel
Oral Communication	1.2, 1.6, 1.7, 3.1, 3.2	• Provides advice and guidance using relevant language with enterprise personnel, international roaming partners and clients to maintain a client focus and consider client needs • Uses listening and questioning techniques to

© Commonwealth of Australia, 2025 Future Skills Organisation

		confirm understanding
Numeracy	2.1, 2.2	• Performs mathematical calculations to check, analyse and confirm results of system tests
Navigate the world of work	1.1	• Takes personal responsibility for adherence to legal and regulatory requirements
Get the work done	1.1, 1.4, 1.5, 2.1, 2.2	• Determines job priorities, resources and equipment. and works logically and systematically to undertake clearly defined and familiar tasks • Implements actions according to a predetermined plan, making slight adjustments if necessary and addressing some unexpected issues • Takes responsibility for routine decision making by selecting from a range of predetermined options in routine situations, identifying and taking situational factors into account • Responds to typical challenges in different situations and implements standard solutions • Uses and investigates new digital technologies and applications to manage and manipulate data, and communicate effectively with others, in a secure and stable digital environment • Uses experiences to evaluate and identify improvements for future work

Assessment Requirements for ICTRFN501 Test cellular handset enhancements and international roaming agreements

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- collect and collate relevant information in preparation for roaming tests
- conduct tests on international roaming capability and functionality of handset enhancements
- analyse results of testing
- make recommendations based on test results.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise the features and operating requirements of specialised roaming test equipment
- outline information required to operate equipment according to a test specification
- explain legislation, codes of practice and other formal agreements that impact on the work activity
- outline manufacturer’s requirements for safe operation of equipment
- summarise mobile phone network standards and specifications
- explain specific work health and safety (WHS) requirements relating to the activity and site conditions
- describe the testing and analysis process and procedures for cellular handsets.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications – radio frequency networks field of work and include access to:

- a site where tests on handsets and international roaming agreements may be conducted
- testing equipment currently used in industry
- equipment, system manuals, specifications and relevant enterprise policy and documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTRFN502 Test and measure cellular phone and network equipment performance

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to analyse test results and recommend modifications to the network.

It applies to individuals working as field officers and supervisors from telecommunications carriers, service providers, contractors and other public or private organisations who perform measurements during equipment upgrades or during commissioning, acceptance testing and routine maintenance on cellular network equipment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – radio frequency networks

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to test cellular phone and network equipment	1.1 Obtain and follow relevant legislation, codes, regulations and standards 1.2 Scope work by obtaining work details from appropriate personnel and arrange for site access to comply with security

© Commonwealth of Australia, 2025 Future Skills Organisation

	arrangements 1.3 Evaluate manufacturer's technical documentation and network procedures to plan test schedule for cellular network 1.4 Verify calibration of test equipment to ensure that tested cellular equipment is compliant 1.5 Prepare cellular equipment for testing according to manufacturer's test procedure 1.6 Notify operational staff of test and measurement schedule to ensure minimal impact on cellular network
2. Test and measure cellular phone and network equipment	2.1 Work safely following work health and safety (WHS) and environmental requirements for given work, identifying hazards and using personal protective equipment 2.2 Configure network equipment for testing and set options to record test results 2.3 Block or mask alarms that may be triggered and interfere with test program 2.4 Run performance measurement software with options set and record test results 2.5 Re-establish alarms and normal operational status at conclusion of tests, and notify appropriate personnel of completion of test schedule
3. Analyse measurement and prepare evaluation report	3.1 Analyse results of performance tests and measurements and determine performance level of cellular equipment and compatibility with network 3.2 Prepare evaluation report, making recommendations on network modifications or changes to configurations settings for improved quality of service 3.3 Present test results and evaluation report to appropriate personnel according to enterprise policy

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3, 1.5, 3.3	• Recognises and interprets regulatory and technical information from relevant sources to determine all

© Commonwealth of Australia, 2025 Future Skills Organisation

		specifications and frameworks
Writing	1.6, 2.4, 2.5, 3.2	• Uses clear, specific and industry related terminology to complete and update workplace documentation and when presenting information to work associates, supervisors, team members and clients
Oral Communication	1.2, 1.6, 2.5, 3.3	• Liaises with internal and external personnel about technical requirements using specific and relevant language • Uses listening and questioning techniques to confirm understanding
Numeracy	3.1	• Evaluates and interprets technical data and results according to predetermined specifications
Navigate the world of work	2.1	• Understands the nature and purpose of own role and associated responsibilities • Takes personal responsibility for adherence to legal and regulatory requirements, with specific reference to safety
Get the work done	1.1-1.5, 2.2-2.5, 3.1	• Determines job priorities and works logically and systematically to undertake clearly defined and familiar tasks • Understands the purposes and specific functions of common digital systems and uses them effectively to complete routine tasks • Takes responsibility for routine decision making by selecting from a range of predetermined options in routine situations, identifying and taking some situational factors into account • Diagnoses faults in different situations, adapts procedures and modifies activities depending on operational contingencies, risk situations and environments • Implements actions according to a predetermined plan, making slight adjustments if necessary and addressing some unexpected issues

Assessment Requirements for ICTRFN502 Test and measure cellular phone and network equipment performance

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- plan and coordinate test activities and equipment
- test cellular phone and network equipment according to test procedure
- analyse test results
- report and make recommendations on performance.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise the features and operating requirements of cellular test equipment, including the digital cellular test set, spectrum analyser and radio frequency (RF) power meter
- explain network components, their functions and approved specifications
- provide detailed information about transmission lines, transmitter and receiver architecture and associated cellular network
- provide detailed information about cellular antenna and feedlines, and their impact on mobile spectrum interference
- explain testing network components
- outline the types of adjustments that need to be made when measuring cellular transmission
- summarise the types of networks that will influence the transmission on the radio path and/or the transmission line.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications – radio frequency networks field of work and include access to:

- sites on which cellular network testing may be conducted
- test equipment currently used in industry
- manufacturer's and enterprise technical documentation
- relevant regulations and standards.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTRFN503 Evaluate and analyse radio frequency signal coverage plots

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to combine technical radio communications skills with organisational and administrative skills to generate and evaluate coverage maps in a range of commercial and community contexts for radio and television broadcasting, radio base station coverage, and point-to-point links.

It applies to individuals who are technically proficient and who work for regulatory authorities and private and public organisations. They may be responsible for small projects or parts of larger projects, and for the coordination and direction of small technical groups.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – radio frequency networks

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan and prepare for coverage	1.1 Prepare for given work according to relevant legislation, work health and safety (WHS), codes, regulations and standards

© Commonwealth of Australia, 2025 Future Skills Organisation

prediction	1.2 Arrange access to site according to required procedure 1.3 Establish type of coverage required 1.4 Determine specifications and minimum acceptable signal level or timing signal delay within coverage area 1.5 Use prediction software specific to enterprise 1.6 Verify mapping coordinate system to be used 1.7 Create custom antenna pattern files representative of expected antenna type for type of coverage required
2. Load data into software program and create coverage plot	2.1 Select and load system parameters 2.2 Select and load antenna elements or antenna pattern files 2.3 Select suitable propagation model settings applicable to study 2.4 Load appropriate clutter properties 2.5 Create coverage plot using appropriate plot options settings
3. Analyse coverage plot outcomes	3.1 Evaluate initial coverage plot against initial specifications 3.2 Adjust system parameters and antenna elements until coverage plot is within specifications 3.3 Compare measured signal strength at various locations with predicted values 3.4 Use measured data to correct and fine tune model 3.5 Evaluate range of possible solutions and make appropriate recommendations to ensure transmission meets operational requirements
4. Complete documentation	4.1 Tabulate results 4.2 Prepare report with final recommendations

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.4	• Recognises and interprets regulatory and technical information from relevant sources to determine all specifications and frameworks

© Commonwealth of Australia, 2025 Future Skills Organisation

Writing	3.5, 4.1, 4.2	• Uses clear, specific and industry related terminology to complete and update workplace documentation and when presenting recommendations to relevant personnel
Oral Communication	1.2, 1.6, 3.5	• Liaises with internal and external personnel about technical, operational and commercial matters using specific and relevant language • Uses listening and questioning techniques to confirm understanding
Numeracy	1.4, 3.3, 3.4	• Evaluates and interprets technical data to convert measurements and comprehend results
Navigate the world of work	1.1	• Takes personal responsibility for adherence to legal and regulatory requirements with specific reference to safety
Get the work done	1.2, 1.3, 1.5-1.7, 2.1-2.5, 3.1, 3.2, 3.5	• Determines job priorities and works logically and systematically to undertake clearly defined and familiar tasks • Understands the ways in which digital systems and tools are used and recognises all operational applications • Takes responsibility for routine decision making by selecting from a range of predetermined options in routine situations, identifying and taking situational factors into account • Diagnoses faults in different situations, adapts procedures and modifies activities depending on operational contingencies, risk situations and environments • Implements actions according to a predetermined plan, making slight adjustments if necessary and addressing some unexpected issues

Assessment Requirements for ICTRFN503 Evaluate and analyse radio frequency signal coverage plots

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- plan and coordinate activities to produce coverage plots using appropriate software settings
- generate:
  - a radio frequency (RF) signal coverage plot
  - a path profile for a point-to-point link
- evaluate, analyse and make recommendations on antenna installation specifications.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain antenna and propagation theory
- explain antenna array theory
- summarise various mapping coordinate systems and their datums
- outline propagation models and their limitations in various environments
- outline specific issues related to antenna installations and the creation of particular radiation patterns.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications – radio frequency networks field of work and include access to:

© Commonwealth of Australia, 2025 Future Skills Organisation

- a computer facility on which coverage plots and paths may be generated
- propagation prediction software
- a digital terrain database.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTRFN601 Monitor the capacity of and recommend changes to the cellular mobile network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to evaluate, analyse and make recommendations at the system design level on antenna installation specifications.

It applies to individuals working as technical officers and engineers who undertake mobile network performance measurements and report on mobile capacity enhancement to senior management.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – radio frequency networks

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Monitor capacity of cellular mobile network	1.1 Monitor traffic levels from network management system 1.2 Use approved enterprise plans to identify planned network growth 1.3 Obtain client forecast data from marketing 1.4 Apply identified data against capacity trigger criteria

© Commonwealth of Australia, 2025 Future Skills Organisation

	1.5 Determine coverage and cell parameters
2. Make recommendations relating to capacity changes	2.1 Identify requirements for additional capacity 2.2 Recommend changes or additions to frequency parameters and submit to planning personnel 2.3 Assess capacity of transmission path, switch resources and recommend improvements, noting transmission medium 2.4 Manipulate traffic through switch parameter settings as a means of relieving traffic congestion 2.5 Determine cost of proposed changes and undertake studies of appropriate return on investment (RoI)
3. Assess capacity changes	3.1 Organise tests and studies to ensure that increased capacity adequately caters for traffic flow 3.2 Make recommendations for further change to network should increased capacity not meet need

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	**Performance Criteria**	**Description**
Reading	1.2	• Recognises and interprets technical information from relevant sources to determine all specifications and frameworks
Writing	2.2, 2.3, 3.2	• Uses clear, specific and industry related terminology to complete and update workplace documentation and when presenting recommendations to relevant personnel
Oral Communication	3.2	• Liaises with internal and external personnel about technical and operational matters using specific and relevant language and listening • Uses questioning techniques to confirm understanding
Numeracy	1.4, 2.3, 2.5	• Undertakes mathematical calculations to project costs and calculate returns on investments • Uses advanced mathematics methods to manipulate complex numerical data
Get the work done	1.1, 1.3-1.5,	• Determines job priorities and works logically and

© Commonwealth of Australia, 2025 Future Skills Organisation

	2.1, 2.3, 2.4, 3.1	systematically to undertake clearly defined and familiar tasks • Understands the ways in which digital systems and tools are used and recognises all operational applications • Takes responsibility for decision making by selecting from a range of predetermined options in routine situations, identifying and taking some situational factors into account • Diagnoses faults in different situations, adapts procedures and modifies activities depending on operational contingencies, risk situations and environments • Implements actions according to a predetermined plan, making slight adjustments if necessary and addressing some unexpected issues

Assessment Requirements for ICTRFN601 Monitor the capacity of and recommend changes to the cellular mobile network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- source and analyse relevant data to prepare a plan indicating growth potential and recommendations for meeting growth within timeframes
- use tools and software packages for forecasting and measurement
- identify site or channel capacity, relevant network growth and forecasting growth.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain blocking, non-blocking and grade of service
- explain Erlang B measurements
- summarise features and operating requirements of test equipment
- outline field measurements for cell traffic capacity
- explain the information required to:
  - analyse and interpret statistical data as applied to teletraffic measurement
  - prepare and conduct a capacity measurement
- summarise legislation, codes of practice and other formal agreements that directly impact on radio communications site transmission
- outline the following including:
  - transmission lines
  - transmitter and receiver architecture and their impact on radio communications traffic
- outline switching architecture with specific reference to space and time switching

© Commonwealth of Australia, 2025 Future Skills Organisation

- outline the types of adjustments that need to be made to procedures to meet the requirements of particular sites and environmental conditions
- explain typical issues and challenges that occur in telecommunications cellular capacity design and how these may be addressed.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications – radio frequency networks field of work and include access to:

- sites with cellular mobile network
- capacity monitoring data and equipment.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTRFN602 Produce and evaluate architecture designs for WiMAX networks

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to specify the design of Worldwide Interoperability for Microwave Access (WiMAX) network architecture.

It applies to individuals working as information and communication technologies (ICT) technicians, designing and operating WiMAX networks in wireless core and access networks. Wireless convergence technology in telecommunications particularly applies to the deployment of fast wireless broadband access.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – radio frequency networks

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to produce architecture designs for	1.1 Review WiMAX specification 802.16 protocol structure for point-to-point (backhaul) and point-to-multipoint (end user) topologies, and identify requirements of network

© Commonwealth of Australia, 2025 Future Skills Organisation

wireless broadband	1.2 Assess technical characteristics and functions of network elements in WiMAX network 1.3 Evaluate advantages of modulation techniques used in wireless access technologies 1.4 Compare characteristics and operating principles of multiplexing techniques used at physical layer of wireless access technologies
2. Design architectures for proposed fixed and mobile WiMAX network	2.1 Develop proposed network topology for fixed (802.16d) WiMAX network, showing relationship of network elements 2.2 Develop proposed network topology for mobile (802.16e) WiMAX network showing relationship of network elements 2.3 Evaluate design considerations between fixed and mobile WiMAX network and produce design specifications 2.4 Determine appropriate multiple-antenna system in WiMAX design by considering their benefits 2.5 Produce report on architecture design for WiMAX network
3. Evaluate network management products	3.1 Research, analyse and evaluate current network management products 3.2 Produce evaluation report on effectiveness of network management products that could be used to manage WiMAX network elements
4. Produce network designs for possible implementation	4.1 Compare WiMAX with other competing wireless technologies and their interoperability 4.2 Investigate inclusion of wireless fidelity (wi-fi) in the design architectures as complementary technology 4.3 Use latest technical specifications and pricing to evaluate range of architecture design solutions 4.4 Determine support and training requirements needed 4.5 Produce implementation document on WiMAX architecture configurations and designs, and present to appropriate person for approval

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

© Commonwealth of Australia, 2025 Future Skills Organisation

Reading	1.1, 3.1	• Recognises and analyses complex technical information to evaluate a broad range of features of current security issues and best practice in security, equipment and procedures
Writing	2.1-2.3, 2.5, 3.2, 4.3, 4.5	• Uses clear, specific and industry related terminology to complete and update workplace documentation and when presenting recommendations to relevant personnel
Oral Communication	4.3, 4.5	• Liaises with personnel about technical, operational and commercial matters using specific and relevant language • Uses listening and questioning techniques to confirm understanding
Numeracy	4.3	• Performs mathematical calculations to analyse pricing data and statistics
Get the work done	1.2-1.4, 2.4, 4.1 4.2	• Determines job priorities and works logically and systematically to undertake clearly defined and familiar tasks • Demonstrates a sophisticated understanding of principles, concepts, language and practices associated with the digital world and understands the potential of new technology • Uses systematic, analytical processes in complex situations, gathering relevant information and identifying and evaluating options against predetermined criteria • Diagnoses faults in different situations, adapts procedures and modifies activities depending on operational contingencies, risk situations and environments • Responds intuitively to problems requiring immediate resolution, drawing on past experiences to focus on the cause of a problem rather than the symptom

Assessment Requirements for ICTRFN602 Produce and evaluate architecture designs for WiMAX networks

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- review and assess the Worldwide Interoperability for Microwave Access (WiMAX) communication architecture, hardware, protocols and networking systems for a new design
- integrate other wireless technologies
- analyse and evaluate competing wireless technologies
- design viable WiMAX network solutions
- assess network performance.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the client business domain
- explain current industry accepted network hardware and software products and their general features and capabilities
- explain the design implications of the following:
  - current industry accepted WiMAX network protocols
  - remote user issues
  - management systems
  - WiMAX network design
  - WiMAX network traffic evaluation
- explain current industry security products, devices and procedures and their general features and capabilities

© Commonwealth of Australia, 2025 Future Skills Organisation

- outline theoretical concepts of current industry network development and design methodologies.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications – radio frequency networks field of work and include access to:

- IEEE 802.16 standards for WiMAX
- client requirements
- technical specifications
- expected traffic volume
- vendors and vendor offerings and pricing
- information on a range of IT business solutions
- future organisational business processes
- a budget for architecture designs for WiMAX networks.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTRFN801 Produce a radio link budget

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to analyse technical performance of fixed and mobile radio systems, and plan and calculate link budgets.

It applies to individuals working as telecommunications engineers who take responsibility for establishing layout of a digital radio system to minimise transmission loss and optimise system performance.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Radio Frequency Networks

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Critically analyse suitability of radio systems	1.1 Critically analyse spectral efficiency of functional elements of mobile radio systems for determining optimal frequency utilisation 1.2 Critically analyse features of radio systems to evaluate effectiveness of a particular application 1.3 Compare features and specifications of antennas used in radio systems to assist with radio link budget 1.4 Report on suitability of radio systems, including

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	recommendations to improve network performance
2. Calculate a radio link budget	2.1 Calculate path loss using variables in appropriate propagation models for a power link budget 2.2 Evaluate power link budget against allowable power margin specifications 2.3 Evaluate modulation types and spectral efficiency 2.4 Confirm radio power link budget achieves specified reliability
3. Complete evaluation and planning documentations	3.1 Complete an evaluation report on performance of radio systems with recommendations on system improvements 3.2 Document processes used to determine optimal power link budget for a radio system

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Writing	1.4, 3.1, 3.2	• Uses clear, specific and industry-related terminology to complete and update specific workplace documentation and when presenting recommendations to relevant personnel
Oral Communication	1.4	• Liaises with personnel about technical, operational and commercial matters using specific and relevant language, using listening and questioning techniques to confirm understanding
Numeracy	2.1, 2.2, 2.4	• Analyses, synthesises and performs calculations using highly embedded mathematical information in a broad range of tasks and texts
Get the work done	1.1-1.3, 2.1-2.3	• Determines job priorities and works logically and systematically to undertake clearly defined and familiar tasks • Demonstrates a sophisticated understanding of principles, concepts, language and practices associated with the digital world and understands potential of new technology • Uses systematic, analytical processes in complex

© Commonwealth of Australia, 2025 Future Skills Organisation

		situations, gathering relevant information and identifying and evaluating options against predetermined criteria • Diagnoses faults in different situations, adapts procedures and modifies activities depending on operational contingencies, risk situations and environments

Assessment Requirements for ICTRFN801 Produce a radio link budget

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- analyse signal degradation characteristics of radio paths and calculate power budgets for various distances and antenna heights versus transmitted power
- research constraints imposed by mobile phone frequency allocations and simulate carrier to interference radiation patterns around a cell site
- create evaluation report on radio system performance
- document processes used to determine power link budget.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain high frequency (HF), very high frequency (VHF), ultra high frequency (UHF) and microwave receiving techniques
- summarise modulation methods:
  - AM
  - FM
  - digital
- outline multiplexing systems
- summarise operation of transmitters and receivers
- explain organisational policies and procedures
- summarise personal safety issues
- explain propagation methods
- summarise radio communications systems
- weigh factors affecting radio frequency (RF) path loss

© Commonwealth of Australia, 2025 Future Skills Organisation

- summarise RF technologies.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the Telecommunications – Radio Frequency Networks industry and include access to:

- a telecommunications operations site
- mobile telephony devices and equipment
- networked computers and relevant software.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTRFN802 Analyse a cellular mobile network system

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to study the detailed architecture and operation of individual cellular mobile elements and develop a plan to integrate emerging cellular technologies.

It applies to individuals working as telecommunications engineers or senior technical officers as they prepare to upgrade to next generation mobile networks.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – radio frequency networks

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Research mobile network systems and interfaces to interconnected networks	1.1 Analyse interfaces between cellular mobile network and clients, including public switched telephone network (PSTN) and internet to validate interoperability of individual systems 1.2 Research latest generation of mobile radio systems and develop plan for integration of emerging cellular technologies to meet future

© Commonwealth of Australia, 2025 Future Skills Organisation

	demands and client expectations
2. Analyse constraints imposed by frequency spectrum allocations	2.1 Analyse techniques to increase system capacity for fixed spectrum bandwidth 2.2 Plan frequency allocation for cellular network from derived specifications 2.3 Develop simulation that plots carrier to interference radiation pattern for given cell geometry in reflective environment
3. Analyse operations of major subsystems of cellular network	3.1 Evaluate major subsystem functions of cellular network and analyse subsystem components to determine capability for upgrades 3.2 Research and report how major subsystems interface to other network subsystems 3.3 Simulate transmission path for cellular network
4. Analyse system capability	4.1 Simulate traffic flow measurements in microcellular environment 4.2 Produce analytical report on cellular mobile convergence with plan for cellular mobile system integration to existing networks

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	**Performance Criteria**	**Description**
Reading	1.2, 3.2	• Interprets complex technical information in a variety of forms and applies the knowledge gained to evaluate different types of technical data and compare with theoretical values and approved specifications
Writing	1.2, 3.2, 4.2	• Uses clear, specific and industry related terminology to complete and update specific workplace documentation and when presenting recommendations to relevant personnel
Oral Communication	3.2	• Liaises with personnel about technical and operational issues using specific and relevant language • Uses listening and questioning techniques to confirm understanding
Numeracy	2.2, 3.3, 4.1	• Interprets the results of complex numerical measurements

© Commonwealth of Australia, 2025 Future Skills Organisation

Get the work done	1.1, 2.1-2.3, 3.1, 3.3, 4.1	• Operates from a broad conceptual plan, developing the operational detail in stages, regularly reviewing priorities and performance during implementation, and identifying and addressing issues as the work progresses • Demonstrates a sophisticated understanding of principles, concepts, language and practices associated with the digital world and understands the potential of new technology • Uses systematic, analytical processes in complex situations, gathering relevant information and identifying and evaluating options against predetermined criteria • Undertakes testing procedures in different situations, adapts procedures and modifies activities depending on operational contingencies, risk situations and environments • Uses digital technologies to manage business operations and actively investigates new technologies for strategic and operational purposes

Assessment Requirements for ICTRFN802 Analyse a cellular mobile network system

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- plan a frequency allocation for a cellular network
- analyse techniques to increase system capacity for a fixed spectrum bandwidth
- develop a plan for integration of emerging cellular technologies
- analyse the interfaces between a mobile network and clients
- research and report the interfacing of major subsystems to other network subsystems
- produce an analytical report on cellular mobile convergence with a plan for cellular mobile system integration to existing networks.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- evaluate allocations and bandwidth requirements of cellular systems
- investigate efficiency and system capacity given the spectrum allocation, number of channels required and grade of service
- describe equipment subsystem diagnosis and repair procedures
- summarise features and differences between major frequency bands and their allocation of licences
- compare features and operating requirements of cellular test equipment
- outline key features of cellular mobile radio systems
- summarise major element functions of a mobile radio system
- explain major frequency bands and their allocation of licences
- describe a microcellular system
- explain minimising latency

© Commonwealth of Australia, 2025 Future Skills Organisation

- outline network components and their functions
- provide a detailed summary of transmission lines, transmitter and receiver architecture
- summarise radio spectrum in use, specifying restrictions and characteristics
- describe radio frequency (RF) and electromagnetic energy (EME) hazards
- investigate and evaluate antenna performance and mobile components, and their impact on mobile spectrum interference
- explain spectrum efficiency
- describe system configuration procedures
- outline testing network components
- summarise the types of adjustments that need to be made when measuring cellular transmission
- outline the types of networks that will influence the transmission on the radio path and/or transmission line.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications – radio frequency networks field of work and include access to:

- sites on which cellular network analysis, research and simulation may be conducted
- test equipment currently used in industry
- manufacturer's and enterprise technical documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTRFN803 Analyse a satellite communications system

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required for a new installation project, an upgrade of capacity or technology in an existing network or as a result of convergence to next generation networks (NGN).

It applies to individuals working as supervisors and engineers, who plan, design and implement satellite communications systems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – radio frequency networks

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Research satellite communication systems	1.1 Research satellite applications with various orbit types for assessing their spatial positioning for specific purposes 1.2 Analyse and report on architecture, major subsystems and critical components in communication systems of recently launched commercial satellite

© Commonwealth of Australia, 2025 Future Skills Organisation

	1.3 Research and report on multiple access techniques and their typical applications
2. Analyse uplink and downlink variables	2.1 Determine uplink and downlink criteria that impact on carrier to noise ratio 2.2 Determine up/down link criteria that impact on baseband signal to noise ratio 2.3 Determine critical parameters of a satellite system 2.4 Research common types of baseband signal processing, and their spectral and noise improvement parameters for determining criteria for link budget evaluations
3. Conduct link budget analysis	3.1 Produce satellite link budget and calculate link margin for satellite system with specified modulation types 3.2 Analyse relationship between bit error ratio (BER) for given energy per bit per noise power density (Eb/No) and forward error correction (FEC) parameter for determining operational performance of link
4. Analyse properties of geostationary satellites	4.1 Calculate look angles for geostationary satellite from any receiving location 4.2 Research and report on frequency re-use in conjunction with polarisation selection and use of spot beams 4.3 Analyse and specify major features of very small aperture terminal (VSAT) systems, and calculate link reliability in high rainfall regions

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	**Performance Criteria**	**Description**
Reading	1.1-1.3, 2.4, 4.2	• Interprets complex technical information in a variety of forms and applies the knowledge gained to solve complex problems by making informed judgements and assumptions
Writing	1.2, 1.3, 3.1, 4.2	• Uses clear, specific and industry related terminology to prepare detailed reports containing recommendations for relevant personnel

© Commonwealth of Australia, 2025 Future Skills Organisation

Numeracy	2.4, 3.1, 3.2, 4.1, 4.3	• Uses and applies knowledge about space and shape, including angle properties, when analysing variables • Determines link budgets by selecting antennae size, power requirements, link availability and bit error rate (BER) by solving complex mathematical formulas
Get the work done	1.2, 2.1-2.3, 3.1, 3.2, 4.1, 4.3	• Gathers and analyses data and seeks feedback to improve plans and processes • Makes high impact decisions in a complex and diverse environment, using input from a range of sources • Identifies key factors that impact on decisions and their outcomes, drawing on experience, competing priorities and decision making strategies where appropriate • Operates from a broad conceptual plan, developing the operational detail in stages, regularly reviewing priorities and performance during implementation, and identifying and addressing issues as the work progresses • Addresses complex problems involving multiple variables, using formal analytical, lateral thinking techniques, experience and knowledge to focus on the root cause • Takes responsibility for high impact decisions in complex situations involving many variables and constraints

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Requirements for ICTRFN803 Analyse a satellite communications system

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- analyse satellite communications system architecture
- produce a satellite link budget and calculate link margin for a range of digital modulation types
- calculate the look angles for a geostationary satellite from any receiving location
- analyse and specify the major features of very small aperture terminal (VSAT) systems.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and perform antenna calculations including:
  - gain
  - beamwidth
  - polarisation
  - effective isotropic radiated power (EIRP)
- define bit error rate (BER) and how it affects satellite communications
- outline carrier and noise ratio
- explain constellation and eye diagrams
- outline distance to satellite and typical delays
- summarise frequency spectrum (satellite bands)
- explain gain-to-noise-temperature G/T ratio
- outline geostationary orbit
- explain link budget calculation

© Commonwealth of Australia, 2025 Future Skills Organisation

- explain look angle calculations
- describe low earth orbiting (LEO) satellites
- evaluate the following modulation types suitable for satellite communications:
  - n-FSK:
    - 2FSK
    - 4FSK
  - n-PSK:
    - 2PSK
    - 4PSK
    - 8PSK
    - 16PSK
  - n-QAM:
    - 16 QAM
    - 256QAM
- define spread spectrum techniques including:
  - direct sequence
  - frequency hopping.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications – radio frequency networks field of work and include access to:

- a site on which satellite analysis may be conducted
- data, calculators and appropriate software tools.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTSAD501 Model data objects

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to understand business operations, identify entities and data, diagrammatically represent their relationships, and prepare a data model.

It applies individuals who have a broad range of analytical, technical and communication skills and who work within broad but established parameters.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Systems analysis and design

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify entities and relationships	1.1 Analyse business data to understand operations 1.2 Identify boundaries of the system 1.3 Identify entities, attributes, data types and relationships of data 1.4 Review business rules to determine impact 1.5 Document relationships in an entity relationship diagram

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
2. Develop normalisation	2.1 Identify suitable business data 2.2 Undertake normalisation of business data and document results 2.3 Compare normalisation results with entity relationship diagram 2.4 Reconcile differences between data
3. Validate model	3.1 Validate data model with client 3.2 Resolve issues or recommendations 3.3 Document completed data model 3.4 Submit to client for final approval

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.4, 2.3, 2.4	• Critically analyses complex documentation from a variety of sources and consolidates information relating to specific criteria to determine requirements
Writing	1.5, 2.2, 2.4, 3.3, 3.4	• Prepares and produces diagrammatic models and associated documents that convey complex relationships between data • Documents outcomes and changes to discussions, using industry relevant terminology and recognised symbols
Oral Communication	3.1-3.4	• Participates in verbal exchanges by listening and questioning clients to elicit information, resolve issues, and obtain final product and work outcome approval
Interact with others	3.1, 3.2, 3.4	• Selects, implements and seeks to improve protocols governing communications to clients and co-workers in a range of work contexts • Elicits feedback and provides feedback to others
Get the work done	1.1-1.4, 2.1, 3.2, 3.3	• Accepts responsibility for planning and sequencing complex tasks and workload, negotiating key aspects with others and taking into account capabilities, efficiencies and effectiveness • Applies systematic and analytical decision making

© Commonwealth of Australia, 2025 Future Skills Organisation

		processes for complex and non-routine situations • Uses and investigates new digital technologies and applications to manage and manipulate data and communicate effectively with others, in a secure and stable digital environment

Assessment Requirements for ICTSAD501 Model data objects

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- document client business requirements
- construct an entity relationship diagram
- construct and document a data model
- normalise the model
- validate the model.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- fully describe:
  - database identifiers and their impact on database usability
  - normalisation rules and processes
  - type hierarchies, including sub-types, super-types and root-types related to development of structured data types
  - validation procedures and processes
- describe the function and features of:
  - an approach to data modelling, such as the entity-relationship model
  - keys, e.g. unique keys, composite keys, primary keys and primary index
  - time stamps related to the use of keys
  - user defined types, structured types, reference types and user defined functions
  - data types and their application
- summarise the particular business domain.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems analysis and design field of work, and include access to:

- client's business requirements
- special purpose tools, equipment and materials
- industry software packages
- computer aided software engineering (CASE) tools
- entity relationship diagrams.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTSAD502 Model data processes

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to gather process data and business information in order to model data processes within an organisation.

It applies to individuals who can apply a broad range of technical knowledge and skills within the context of a complex project.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Systems analysis and design

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Develop scope of model	1.1 Identify relevant data processes and sources of information 1.2 Identify information gathering method and modelling methodology to be used 1.3 Document modelling information gathered 1.4 Validate modelling information with client
2. Gather process data	2.1 Identify business functions and collect process data using chosen method

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	2.2 Identify external events, procedures and results 2.3 Identify processes and required decomposition
3. Develop and validate data model	3.1 Model process data according to modelling methodology 3.2 Validate process model with client to determine inaccuracies 3.3 Incorporate identified changes, as required 3.4 Review business rules to determine impact on process models and change as required 3.5 Validate completed process models with client

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 2.3, 3.4	• Critically analyses complex documentation from a variety of sources and consolidates information relating to specific criteria to determine requirements
Writing	1.3, 1.4, 3.3-3.5	• Prepares and produces diagrammatic models and associated documents that convey complex relationships between data
Oral Communication	1.4, 3.2, 3.5	• Determines and confirms client requirements using collaborative and inclusive techniques, including active listening and questioning, and reading of verbal and non-verbal signals to convey and clarify information and confirm understanding
Interact with others	1.4, 3.2, 3.5	• Implements strategies for a diverse range of colleagues and clients to build rapport and foster strong relationships
Get the work done	1.1, 1.2, 2.1-2.3, 3.1, 3.4	• Accepts responsibility for planning and sequencing complex tasks and workload, negotiating key aspects with others and taking into account capabilities, efficiencies and effectiveness • Applies systematic and analytical decision making processes for complex and non-routine situations • Uses and investigates new digital technologies and applications to manage and manipulate data, and

Assessment Requirements for ICTSAD502 Model data processes

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify data processes that represent the client's business reality
- model data processes according to industry and organisation standards
- complete documentation of the data model.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss modelling rules and conventions with reference to naming processes and events
- outline features and functions of process mappers
- explain features of data analysis, particularly in determining process flows
- describe processes and techniques, using logical design concepts related to designing process models.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems analysis and design field of work, and include access to:

- client’s business requirements
- special purpose tools and equipment
- industry software packages.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTSAD503 Minimise risk of new technologies to business solutions

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to identify and plan to minimise the business and technological risks associated with business solutions that utilise new technologies.

It applies to individuals who are responsible for performing complex technical analysis to provide solutions to complex problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Systems analysis and design

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Establish the risk context	1.1 Review organisational and technical environment and proposed business solution 1.2 Identify scale, importance and complexity of project risks 1.3 Establish acceptable and unacceptable levels of risk and consequences for the solution

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.4 Identify the impact of risks against the business environment 1.5 Determine and document proposed actions to insure against identified generic risks
2. Conduct risk analysis	2.1 Conduct a risk analysis to determine the likelihood of risks identified 2.2 Rank risk factors according to the impact and likelihood of occurrence 2.3 Develop contingency plans to mitigate identified risks 2.4 Document risk analysis and contingencies in a risk management plan 2.5 Implement risk management plans and undertake awareness training to inform stakeholders
3. Monitor risks	3.1 Establish feedback channels to warn of unforeseen and identified risks 3.2 Conduct regular reviews to identify new risks and update established risks 3.3 Document changes to risk management plans as appropriate

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 2.1, 3.2	• Critically analyses complex documentation from a variety of sources and consolidates information relating to specific criteria to determine requirements
Writing	1.5, 2.1, 2.3, 2.4, 3.3	• Prepares documentation that expresses ideas, explores complex issues and is constructed logically, succinctly and accurately
Navigate the world of work	1.4	• Seeks to improve policies and procedures to better meet organisational goals and mitigate risk
Interact with others	2.5, 3.1, 3.2	• Selects, implements and seeks to improve protocols governing communications to clients and co-workers in a range of work contexts

© Commonwealth of Australia, 2025 Future Skills Organisation

		• Elicits feedback and provides feedback to others
Get the work done	1.2-1.5, 2.1-2.5	• Accepts responsibility for planning and sequencing complex tasks and workload, negotiating key aspects with others and taking into account capabilities, efficiencies and effectiveness • Applies systematic and analytical decision making processes for complex and non-routine situations • Investigates new and innovative ideas as a means to continuously improve work practices and processes through consultation, and formal and analytical thinking • Uses and investigates new digital technologies and applications to manage and manipulate data and communicate effectively with others, in a secure and stable digital environment

Assessment Requirements for ICTSAD503 Minimise risk of new technologies to business solutions

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop procedures that identify where risk occurs
- identify measures to be taken to treat the risk
- document a risk management plan
- implement risk management plan
- establish a risk review procedure.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline business process design
- explain business supply chain
- describe copyright and intellectual property relating to new technologies
- identify and describe how business sites fit into corporate strategy
- explain the purpose of user analysis and customer relationship management software
- describe risk management process and planning strategies.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems analysis and design field of work, and include access to:

- analysis software

© Commonwealth of Australia, 2025 Future Skills Organisation

- business website
- customer relationship model
- requirements documentation
- site server and software
- updated or new technology
- user analysis
- web servers.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTSAD506 Produce a feasibility report

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to recommend the preferred scenario from a range of feasible options offered to the client.

It applies to individuals who are responsible for researching, planning and designing solutions for complex information and communications technology (ICT) projects.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Systems analysis and design

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Confirm client requirements	1.1 Confirm client requirements to determine project scope and the problem context or opportunity faced by the business 1.2 Review documented client requirements, project scope, related problems and sources of information 1.3 Confirm requirements and scope with the client
2. Examine and review alternatives	2.1 Ensure that future client requirements are considered 2.2 Research and document feasible solutions for client

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	requirements 2.3 Ensure that the feasibility of each solution has been assessed, including constraints
3. Prepare and publish feasibility report	3.1 Prepare a feasibility report 3.2 Ensure that the completed feasibility report covers client requirements, project scope and analysis of alternative scenarios 3.3 Confirm the recommendation of the preferred scenario 3.4 Present feasibility report to appropriate person for project approval

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.2, 3.2	• Critically analyses complex documentation from a variety of sources and consolidates information relating to specific criteria to determine requirements
Writing	2.2, 3.1	• Writes, edits and proofreads reports to ensure clarity of meaning, and accuracy and consistency of information • Accurately records and completes organisational documents and correspondence using clear language and correct spelling, grammar and terminology
Oral Communication	1.1, 1.3, 3.3, 3.4	• Uses collaborative and inclusive techniques, including active listening and questioning, and reading of verbal and non-verbal signals to convey and clarify information and to confirm understanding
Interact with others	1.1, 1.3, 2.1, 3.4	• Selects, implements and seeks to improve protocols governing communications to clients and co-workers in a range of work contexts • Elicits feedback and provides feedback to others • Recognises the diversity in people and manages this diversity to improve workplace relations and practices
Get the work done	2.1-2.3, 3.1-3.3	• Accepts responsibility for planning and sequencing complex tasks and workload, negotiating key aspects with others and taking into account capabilities, efficiencies and effectiveness

© Commonwealth of Australia, 2025 Future Skills Organisation

		• Monitors progress of plans and schedules, and reviews and changes them to meet new demands and priorities • Investigates new and innovative ideas as a means to continuously improve work practices and processes through consultation, and formal and analytical thinking

Assessment Requirements for ICTSAD506 Produce a feasibility report

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- review documentation and confirm client requirements for the project
- confirm the scope with the client
- document alternative solutions for the project
- prepare a feasibility report ensuring it meets client requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the client business domain and list the client requirements
- describe the role of stakeholders and the degree of stakeholder involvement in developing a feasibility report
- list the system's current functionality and improvement options
- outline TWO or more current industry systems development methodologies.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems analysis and design field of work, and include access to:

- contributions to a feasibility report
- client requirements
- report writing template
- client expectations brief

© Commonwealth of Australia, 2025 Future Skills Organisation

- information on a range of information and communications technology (ICT) business solutions
- future organisational business processes
- budgets for scenarios
- outcomes of the business analysis process
- financial modelling
- business context
- use of special purpose tools, equipment, materials and industry software packages.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTSAD602 Conduct knowledge audits

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to conduct a knowledge management audit.

It applies to individuals in senior management positions who are responsible for high-level analysis of organisational strategies and practices.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Systems analysis and design

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Conduct a knowledge needs analysis	1.1 Identify current and future directions of the business 1.2 Identify knowledge and skills required to support the current business activities 1.3 Identify knowledge and skills required to support future business directions
2. Analyse the knowledge inventory	2.1 Produce knowledge questionnaires to request information from staff about corporate knowledge

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	2.2 Identify explicit knowledge currently resident in data sources, such as policies, procedures, databases and libraries, and record its location 2.3 Identify the accessibility, aim and integrity of the knowledge 2.4 Identify the frequency of update of this knowledge, its previous versions, and its backup status 2.5 Identify implicit knowledge currently resident in informal sources and organisational knowledge
3. Chart the knowledge flow	3.1 Examine how knowledge flows from one data store to another within the organisation, and how this flow is facilitated or impeded by policies, such as access control or records management policies 3.2 Examine the procedures that facilitate the flow of knowledge within the organisation and their ease of use 3.3 Identify the corporate and individual attitudes to knowledge within the organisation
4. Produce a knowledge audit report	4.1 Analyse the results of the knowledge audit 4.2 Document findings and present to the appropriate person

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	2.2, 2.4, 2.5, 3.2, 4.1	• Critically analyses complex documentation from a variety of sources and consolidates information relating to specific criteria to determine requirements
Writing	2.1, 4.2	• Writes, edits and proofreads documents to ensure clarity of meaning, and accuracy and consistency of information • Prepares documentation that expresses ideas, explores complex issues, and is constructed logically, succinctly and accurately
Navigate the world of work	2.2, 3.1-3.3	• Takes a lead role in the development of organisational goals, roles and responsibilities • Develops and implements strategies that ensure organisational policies, procedures and regulatory requirements are met

© Commonwealth of Australia, 2025 Future Skills Organisation

		• Monitors and reviews the organisation's policies, procedures and adherence to legislative requirements in order to implement and manage change
Interact with others	3.3, 4.2	• Selects, implements and manipulates communications systems, processes and practices for maximum impact • Develops and implements communications strategies with internal and external persons in order to build rapport • Influences and fosters a collaborative culture, facilitating a sense of commitment and workplace cohesion
Get the work done	1.1-1.3, 2.3-2.5, 3.1, 3.3, 4.1	• Plans strategic priorities and outcomes within a flexible, efficient and effective context, in a diverse environment exposed to competing demands • Gathers and analyses data and seeks feedback to improve plans and processes • Makes high-impact decisions in a complex and diverse environment, using input from a range of sources • Explores and incubates new and innovative ideas through unconstrained analysis and critical thinking to develop and improve the organisation's goals

Assessment Requirements for ICTSAD602 Conduct knowledge audits

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- document the identified explicit and implicit knowledge in an organisation
- establish and record the knowledge required to meet current needs
- establish and record the forecast knowledge required to meet future needs.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain how the organisation’s business, policies, procedures and structure influence corporate knowledge
- describe the difference between implicit and explicit knowledge
- analyse and identify concepts of risk management planning and processes
- explain the requirements for the design and development of questionnaires and the procedures for analysis of completed questionnaires
- explain the reporting mechanisms that influence a knowledge audit
- describe the key tools and models of project management.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems analysis and design field of work, and include access to:

- an organisation
- data sources and staff

© Commonwealth of Australia, 2025 Future Skills Organisation

- relevant tools, equipment and materials
- relevant industry software.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTSAD604 Manage and communicate ICT solutions

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to manage and communicate requirements for new information and communications technology (ICT) systems to a broad and diverse audience.

This unit applies to individuals who require high-level management, business and technical skills to manage complex analysis within the information and communications technology (ICT) industry, often as part of business critical ICT projects.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Systems analysis and design

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Manage identified client ICT requirements and scope of solution	1.1 Establish baseline client ICT requirements and change control processes to track changes to requirements and solution scope 1.2 Resolve issues and conflicts that emerge during final stages of identifying and analysing requirements 1.3 Determine how requirements will be presented for review 1.4 Secure approval of requirements from those stakeholders who

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	have the appropriate authority
2. Manage requirement relationships and dependencies	2.1 Examine and organise the set of requirements and record the dependencies and relationships for each 2.2 Perform impact analysis to assess or evaluate the impact of a change 2.3 Deploy requirements management tools as necessary
3. Maintain requirements for re-use	3.1 Identify requirements that the organisation will use in the long term 3.2 Name and define requirements available for future re-use
4. Prepare requirements package	4.1 Decide which formats are appropriate for a particular project and its stakeholders 4.2 Prepare requirements package according to organisational need

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 2.1, 2.2	• Critically analyses complex documentation from a variety of sources and consolidates information relating to specific criteria to determine requirements
Writing	1.4, 2.1, 3.2, 4.2, 5.1, 5.2	• Writes, edits and proofreads documents to ensure clarity of meaning, and accuracy and consistency of information • Prepares documentation and correspondence using clear language, correct spelling and terminology, and ensuring accuracy of information
Oral Communication	1.4, 5.1, 5.2	• Uses collaborative and inclusive techniques, including active listening and questioning, and reading of verbal and non-verbal signals to convey and clarify information and to confirm understanding
Navigate the world of work	4.2, 5.2	• Works autonomously, making high-level decisions to achieve and improve organisational goals • Develops and implements strategies that ensure organisational policies and procedures are being met

© Commonwealth of Australia, 2025 Future Skills Organisation

Interact with others	1.2, 1.4, 5.1, 5.2	• Selects, implements and manipulates communications systems, processes and practices for maximum impact • Influences and fosters a collaborative culture, facilitating a sense of commitment and workplace cohesion • Shares knowledge, information and experience openly as an integral part of the working relationship • Recognises potential for conflict and, working with others, seeks to develop organisational processes to deal with conflict
Get the work done	1.1-1.3, 2.1-2.3, 3.1, 3.2, 4.1	• Plans strategic priorities and outcomes within a flexible, efficient and effective context, in a diverse environment exposed to competing demands • Gathers and analyses data and seeks feedback to improve plans and processes • Identifies key factors that impact on decisions and their outcomes, drawing on experience, competing priorities, and decision making strategies where appropriate • Explores and incubates new and innovative ideas through unconstrained analysis and critical thinking to develop and improve the organisation's goals

Assessment Requirements for ICTSAD604 Manage and communicate ICT solutions

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- establish processes to:
  - trace requirements
  - control and track changes to requirements
  - scope solutions
- manage requirement relationships
- package and communicate requirements according to what is appropriate for a project or stakeholder group.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain conflict resolution and issue management techniques to handle possible changes to solution scope
- outline requirements management and traceability processes
- list and apply techniques for managing version control and configuration.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems analysis and design field of work, and include access to:

- a simulated or workplace project in a medium-to-large enterprise

© Commonwealth of Australia, 2025 Future Skills Organisation

- observation of the candidate carrying out business analysis work
- reports and plans prepared for the projects
- a portfolio of the project work to be undertaken.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTSAD605 Elicit ICT requirements

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the outcomes, skills and knowledge required to undertake and engage stakeholders in the key task of defining information and communications technology (ICT) requirements.

This unit applies to individuals required to ensure that requirements elicited are complete, clear, correct and consistent, and can serve as a solid foundation for the solution to the business needs.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Systems analysis and design

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for elicitation	1.1 Define the specific activities and the planned dates for a particular elicitation activity 1.2 Build a detailed schedule 1.3 Communicate the plan to affected parties
2. Conduct elicitation	2.1 Conduct elicitation activity

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
activity	2.2 Monitor captured requirements against business objectives to prevent scope creep 2.3 Capture and document requirements attributes 2.4 Update process metrics as the basis for future planning
3. Document elicitation results	3.1 Record elicitation outcomes in the appropriate form 3.2 Present elicitation outcomes to stakeholders and obtain agreement
4. Confirm elicitation results	4.1 Review the documented outputs with the stakeholders 4.2 Confirm that own understanding reflects stakeholder intentions and preferences

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	2.3, 4.1	• Analyses and consolidates information and data from a range of sources against defined criteria and requirements, and checks for accuracy and completeness
Writing	1.1, 1.3, 2.3, 2.4, 3.1, 3.2	• Accurately records information and prepares correspondence and documentation using clear language and organisational formats and protocols • Records outcomes of discussions
Oral Communication	1.3, 2.1, 3.2, 4.1, 4.2	• Determines and confirms stakeholder requirements, using collaborative and inclusive techniques, including active listening and questioning, and reading of verbal and non-verbal signals to convey and clarify information and to confirm understanding
Interact with others	1.3, 2.1, 3.2, 4.2	• Selects, implements and manipulates communications systems, processes and practices for maximum impact • Develops and implements communications strategies with internal and external persons in order to build rapport
Get the work	1.1, 1.2, 2.2, 2.4, 4.2	• Plans strategic priorities and outcomes within a flexible, efficient and effective context, in a diverse

© Commonwealth of Australia, 2025 Future Skills Organisation

done		environment exposed to competing demands • Gathers and analyses data and seeks feedback to improve processes • Explores and incubates new and innovative ideas through unconstrained analysis and critical thinking to develop and improve the organisation's goals

Assessment Requirements for ICTSAD605 Elicit ICT requirements

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- construct and implement requirements for elicitation activities
- select and apply elicitation techniques that are appropriate to the situation
- document requirements and obtain stakeholder sign-off.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain conflict resolution and issue management techniques
- provide an overview of negotiation and consensus strategies
- summarise techniques to elicit and manage the gathering of requirements
- formulate risk management strategies with regard to requirements gathering, staff management and proposed systems
- outline scope management and change control processes
- describe version control and configuration management approaches.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems analysis and design field of work, and include access to:

- appropriate policies
- current business analysis tools
- appropriate legislation

© Commonwealth of Australia, 2025 Future Skills Organisation

- reports and plans prepared for the projects
- a portfolio of the project work to be undertaken.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTSAS201 Maintain inventories for equipment, software and documentation

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to record and store details of software, hardware and technical documentation.

It applies to frontline technical support personnel who maintain equipment, software and related technical documentation in a small to large office environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Systems administration and support

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Document and update inventory	1.1 Maintain hardware inventory that creates a profile or description of each piece of equipment 1.2 Maintain software inventory and update licences as required, particularly when upgrading software 1.3 Record and organise storage of user documentation or technical manuals

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
2. Store technical documentation	2.1 Store hardware, software and equipment that is not in use, according to technical manuals 2.2 Ensure technical documentation is stored securely 2.3 Access and disseminate technical documentation as required

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.3, 2.2, 2.3	• Accesses and interprets textual information from a range of sources to record, manage and maintain information
Writing	1.1, 1.2, 1.3, 2,2	• Records organisation, software and client technical information, and sequences writing to produce cohesive text for reference
Oral Communication	1.3, 2.1	• Participates in verbal exchanges of basic ideas that elicit views, opinions and feedback from others
Navigate the world of work	1.2-1.3, 2.1-2.3	• Understands roles and responsibilities for task and makes basic decisions on work completion parameters
Get the work done	1.1-1.3, 2.1-2.3	• Plans and implements routine tasks and workload, making limited decisions on sequencing, timing and collaboration, and seeking assistance in setting priorities • Understands the purposes, specific functions and key features of common digital systems and tools, and operates them effectively to complete routine tasks

Assessment Requirements for ICTSAS201 Maintain inventories for equipment, software and documentation

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- update and maintain software, equipment and technical documentation inventory, according to identified storage and retrieval policy and procedures
- comply with software licensing requirements, according to vendor specifications
- access and update inventories.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and describe technical documentation processes
- describe common software licensing requirements
- describe inventory principles and procedures
- explain current industry practices related to storage of hardware, software and technical documentation.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work and include access to:

- personal computer, equipment and materials
- industry and inventory management software packages
- organisational documentation
- enterprise intranet.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessors must satisfy NVR/AQTF assessor requirements.

ICTSAS202 Apply problem-solving techniques to routine ICT malfunctions

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to apply problem-solving techniques to determine the origin of a routine malfunction and plan for its resolution.

It applies to individuals who work under supervision to provide frontline technical support, diagnose technical problems and determine potential solutions. These are key components of this support role.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Systems administration and support

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify routine problems	1.1 Identify hardware, software, user or procedural problem areas to appropriate person in the organisation 1.2 Define and determine problem to be investigated 1.3 Identify and document current conditions of the hardware, software, user or problem

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
2. Research solutions to routine problems	2.1 Identify potential solutions to problem 2.2 Develop, document, rank and present recommendations about possible solutions to appropriate person for decision
3. Recommend solutions to problems	3.1 Plan implementation of solutions 3.2 Plan evaluation of implemented solutions 3.3 Document recommended solution and submit to appropriate person for confirmation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 2.1-2.2, 3.1-3.3	• Interprets familiar textual information from a range of sources to identify misleading information, compare technical specifications, and identify solutions to new and emerging issues
Writing	1.3, 2.2, 3.3	• Develops materials and resources using simple vocabulary to record information in a sequential manner for client engagement as well as internal reference
Oral Communication	1.1, 2.2	• Participates in verbal exchanges of familiar ideas using questioning and active listening to elicit information and feedback from others
Navigate the world of work	1.1- 1.3, 2.1, 2.2, 3.1-3.3	• Understands roles and responsibilities for task and makes basic decisions on work completion parameters
Interact with others	1.3, 2.2	• Identifies and takes steps to follow accepted communication practices and protocols
Get the work done	1.1-1.3, 2.1, 2.2, 3.1-3.3	• Plans and implements routine tasks, aiming to complete them efficiently • Initiates standard diagnostic procedures when responding to familiar and unfamiliar problems within immediate context, and seeks input from others when problems remain unresolved • Understands the purposes, specific functions and key

© Commonwealth of Australia, 2025 Future Skills Organisation

		features of common digital systems and tools, and operates them effectively to complete routine tasks

Assessment Requirements for ICTSAS202 Apply problem-solving techniques to routine ICT malfunctions

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- determine the root cause of a routine malfunction
- identify solutions
- produce documentation that recommends solutions to problems
- follow established procedures
- refer unresolved problems to support persons.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify current industry hardware and software products and services
- identify current industry maintenance, service and helpdesk practices, processes and procedures
- identify current operating systems
- identify current industry standard diagnostic tools
- describe common computer malfunctions and resolutions.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work and include access to:

- a workstation and industry software packages
- detailed information relating to organisational processes and procedures

© Commonwealth of Australia, 2025 Future Skills Organisation

- information on a range of Information and Communications
- Technology (ICT) business solutions.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTSAS203 Connect hardware peripherals

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to connect hardware peripherals according to instructions.

It applies to individuals employed in an information and communications technology (ICT) support role who are required to solve technical hardware and software incompatibility conflicts and problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Systems administration and support

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Confirm client requirements	1.1 Identify and confirm peripheral requirements of client according to organisational standards 1.2 Document client requirements and peripherals needed, and report findings to the appropriate person according to organisational standards 1.3 Verify client requirements with appropriate person according to organisational standards and reporting procedures

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.4 Take action to ensure client support expectations are covered by vendor warranty and support services
2. Obtain required peripherals	2.1 Obtain peripherals under instruction from appropriate person 2.2 Enter details of peripherals into equipment inventory according to organisational standards 2.3 Validate that contents of delivered components and physical contents match the packing list and resolve discrepancies if necessary 2.4 Store peripherals according to vendors guidelines
3. Connect hardware peripherals	3.1 Verify timeframe for installation schedule with client 3.2 Remove old peripherals with minimal disruption to clients if they are to be replaced, taking into account environmental considerations and work health and safety (WHS) standards 3.3 Connect new peripherals with minimum disruption to clients, taking into account operating system procedures 3.4 Configure computer to accept new peripherals 3.5 Test hardware peripherals and confirm client satisfaction, paying particular attention to possible effect on other systems and making adjustments as required

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.4, 2.1-2.4, 3.1-3.5	• Interprets textual information from a range of sources to identify and adhere to requirements
Writing	1.2, 1.3, 1.4, 2.1	• Develops materials and resources using simple vocabulary to convey and record information and inventory, according to client and vendor requirements
Oral Communication	1.2, 1.3, 1.4, 2.1, 3.1, 3.5	• Participates in verbal exchanges of familiar ideas and information using questioning and active listening to elicit views, opinions and feedback from others
Navigate the	1.1, 1.3, 1.4, 2.1-2.4,	• Understands roles and responsibilities for task and makes basic decisions on work completion parameters

© Commonwealth of Australia, 2025 Future Skills Organisation

world of work	3.2-3.5	in accordance with organisational requirements, WHS standards and environmental considerations
Interact with others	1.1-1.4, 2.1, 3.1	• Identifies and takes steps to follow accepted communication practices and protocols
Get the work done	1.1-1.4, 2.1-2.4, 3.1-3.5	• Plans and implements routine tasks, aiming to achieve them efficiently • Responds to predictable routine problems and implements standard or logical solutions • Understands the purposes, specific functions and key features of common digital systems and tools, and operates them effectively to complete routine tasks

Unit Mapping Information

Assessment Requirements for ICTSAS203 Connect hardware peripherals

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- connect several different types of hardware peripherals to the system safely and according to vendor instructions with a minimum of downtime, using known routines and procedures
- locate, interpret and use vendor documentation related to connection and storage of hardware peripherals
- test the operation of newly installed hardware peripherals and confirm client satisfaction
- follow work health and safety policies and procedures.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the commonly used computer operating systems
- identify help desk and maintenance practices
- describe common peripheral devices
- summarise WHS procedures for electrical equipment
- list the system components and describe their interconnectivity
- identify current industry accepted hardware and software products
- describe procedures relevant to maintaining inventory
- list the organisational guidelines and standards that impact on service support including:
  - external suppliers and vendors
  - internal and external communications
  - internet access
  - security of information and data

© Commonwealth of Australia, 2025 Future Skills Organisation

- identify common principles for environmentally sustainable business practices.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work and include access to:

- sites with a representative range of workstations, hardware peripherals, internet connections and cabling
- software to be installed, interconnected and configured
- hardware and software currently used in industry
- technical documentation, including organisational hardware blueprint and vendor support.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTSAS204 Record client support requirements

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to record, prioritise and escalate client support requests.

It applies to frontline technical support individuals who provide information and communications technology (ICT) client support in a small or large office environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Systems administration and support

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Log requests for support	1.1 Record client support requests and requirements according to organisational standards 1.2 Review client support history and details 1.3 Check the information and request for accuracy and urgency according to organisational standards
2. Prioritise support requests with appropriate	2.1 Identify guidelines for prioritising or rating client requests 2.2 Prioritise client request based on its criticality or effect on

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
personnel	business
3. Record support request	3.1 Document support request according to organisational requirements 3.2 Refer requests to appropriate person or department for assistance

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1- 1.3, 2.1, 2.2	• Interprets familiar textual information from a range of sources to identify and review practices and determine that appropriate standards have been maintained
Writing	1.1, 3.1, 3.2	• Develops materials and resources using simple vocabulary to accurately convey and record client information according to requirements and standards
Navigate the world of work	1.1-1.3, 2.1-2.2, 3.1-3.2	• Understands roles and responsibilities for task and makes basic decisions on work completion parameters in accordance with organisational standards
Interact with others	3.2	• Identifies and takes steps to follow accepted communication practices and protocols
Get the work done	1.1-1.3, 2.1-2.2, 3.1-3.2	• Plans and implements routine tasks, aiming to achieve them efficiently • Makes low-impact decisions within familiar situations, based on a range of predefined or routine solutions, and evaluates the effectiveness of the outcome • Understands the purposes, specific functions and key features of common digital systems and tools, and operates them effectively to complete routine tasks

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Requirements for ICTSAS204 Record client support requirements

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- log and record calls according to organisational policy and procedures
- prioritise and escalate client support requests according to organisational policy and procedures.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify a range of software and hardware diagnostic tools
- describe organisational procedures for escalating issues
- describe maintenance procedures
- identify business scheduling requirements
- describe current business practices to prepare reports
- identify organisational procedures to rate and prioritise client requests
- identify roles and responsibilities of the information and communications technology (ICT) division.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work and include access to:

- sites where logging and client support may be recorded and prioritised
- client support history records

© Commonwealth of Australia, 2025 Future Skills Organisation

- organisational policy and procedures related to:
  - critical process
  - escalation procedures
  - logging procedures
  - prioritising client requests.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTSAS205 Maintain ICT system integrity

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to protect and secure stand-alone or networked client server environments.

It applies to technical support individuals who are required to maintain workflow and quality processes in a small or large office environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Systems administration and support

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Carry out system backup	1.1 Create and review organisational backup schedule 1.2 Determine storage media and hardware for backups 1.3 Ensure backups are carried out according to the schedule 1.4 Label and store backups according to organisational standards 1.5 Maintain records of backups
2. Restore system backup	2.1 Determine and test restoration procedures according to

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	organisational standards 2.2 Restore data under instruction from an appropriate person 2.3 Restore data according to organisational standards 2.4 Document and report on backup results
3. Maintain virus protection	3.1 Maintain and update virus protection software according to operating system in use 3.2 Carry out virus scanning and report detected viruses to appropriate person 3.3 Remove viruses and update scanning software
4. Follow copyright procedures and record software licences where appropriate	4.1 Identify copyright procedures for licensed software used by the organisation 4.2 Maintain records of licence number and location 4.3 Monitor operation and use of licensed software where applicable 4.4 Check personal computers and networks to ensure software compliance 4.5 Report licensing anomalies related to software to an appropriate person

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.5, 2.1-2.3, 3.1-3.3, 4.1-4.5	• Interprets familiar textual information from a range of sources to identify and review practices and determine that appropriate standards have been maintained • Researches and interprets information to identify, monitor and evaluate technical information and maintain appropriate standards
Writing	1.4, 1.5, 2.4, 4.2, 4.5	• Develops materials and resources using simple vocabulary to record information in a sequential manner, adhering to standards for client engagement as well as internal reference

© Commonwealth of Australia, 2025 Future Skills Organisation

Navigate the world of work	1.1-1.5, 2.1-2.4, 3.1-3.3, 4.1-4.5	• Understands roles and responsibilities for task and makes basic decisions on work completion parameters in accordance with organisational standards
Interact with others	2.2, 4.5	• Identifies and takes steps to follow accepted communication practices and protocols
Get the work done	1.1-1.5, 2.1-2.4, 3.1-3.3, 4.1-4.5	• Plans and implements routine tasks, aiming to achieve them efficiently • Makes low-impact decisions within familiar situations, based on a range of predefined or routine solutions, and evaluates the effectiveness of the outcome • Understands the purposes, specific functions and key features of common digital systems and tools, and operates them effectively to complete routine tasks

Assessment Requirements for ICTSAS205 Maintain ICT system integrity

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- protect and secure stand-alone or networked client server environments and operating systems according to system maintenance procedures
- complete file backup according to organisational standards
- recover, delete and archive according to backup and recovery procedure
- check computers and networks for compliance with licensing requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify organisational standards regarding:
  - backup and recovery procedures and operations
  - labelling and storage of backups
- describe current industry accepted hardware and software products
- describe current viruses and protection methods
- identify common diagnostic tools
- identify inventory procedures
- identify maintenance procedures
- describe storage and retrieval guidelines
- explain system performance
- identify software copyright and General Public Licence (GPL) or copyright responsibilities.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work and include access to:

- sites with a representative range of stand-alone and networked client server environments
- antivirus software
- technical records and documentation.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTSAS206 Detect and protect from spam and destructive software

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to reduce the risk of a computer's operation being affected by spam or destructive software.

It applies to technical support individuals who, while working under a level of supervision, have responsibility to exercise the discretion required to protect and secure equipment and software in a small or large office environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Systems administration and support

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Detect and remove destructive software	1.1 Identify common types of destructive software 1.2 Select and install virus protection compatible with the operating system in use 1.3 Investigate other advanced systems of protection for further options

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.4 Install software updates on a regular basis 1.5 Configure software security settings to prevent destructive software from infecting computer 1.6 Run or schedule to run virus protection software on a regular basis 1.7 Report detected destructive software to appropriate person and remove the destructive software
2. Identify and take action to stop spam	2.1 Identify common types of spam 2.2 Take appropriate action in regard to spam 2.3 Configure and use a spam filter 2.4 Report spam to appropriate person

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.5, 2.1-2.3	• Researches and interprets information to identify misleading information and compare technical specifications, and identify solutions to new and emerging issues to maintain system
Writing	1.7, 2.4	• Uses simple vocabulary to report information in a familiar sequential manner to the appropriate personnel
Oral Communication	1.7	• Presents factual information in a clear manner, using specific and appropriate language
Interact with others	1.7	• Identifies and takes steps to follow accepted communication practices and protocols
Get the work done	1.1-1.7, 2.1-2.4	• Plans and implements routine tasks, aiming to achieve them efficiently • Initiates standard diagnostic procedures when responding to familiar and unfamiliar problems within immediate context, and seeks input from others when problems remain unresolved • Understands the purposes, specific functions and key

© Commonwealth of Australia, 2025 Future Skills Organisation

		features of common digital systems and tools, and operates them effectively to complete routine tasks

Assessment Requirements for ICTSAS206 Detect and protect from spam and destructive software

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- install virus protection software and updates
- schedule virus protection software to run on a regular basis
- remove common destructive software
- identify common spam types and take appropriate action.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe spam and virus intrusions and identify appropriate remedial actions
- identify the types of protective applications used against viruses and spam
- identify the operating systems supported by the organisation
- identify the common components of computer hardware that may be affected by spam.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work and include access to:

- sites with a representative range of computer hardware, application software and operating systems
- current antivirus and anti-spam software
- technical records, vendor documentation, enterprise procedures and guidelines.

ICTSAS207 Protect and secure information assets

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to ensure information assets are protected from improper access and appropriate actions are taken to secure assets in the event that they are threatened.

It applies to individuals who, while working under a level of supervision, have responsibility in a frontline technical support capacity to exercise in a small or large office environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Systems administration and support

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify assets and threats	1.1 Identify types of information assets in the organisation 1.2 Identify mechanisms by which information assets are accessed, transmitted and stored 1.3 Establish nature of threats to information assets and determine effect that loss or damage may have to the organisation
2. Secure assets	2.1 Identify actions, mechanisms and strategies to protect

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	information assets 2.2 Secure assets within scope of authority 2.3 Report issues to appropriate person and other issues where they are outside scope of authority
3. Mitigate or prevent damage to assets	3.1 Identify signs and evidence that information assets are threatened or undergoing loss or damage 3.2 Provide first level response to reduce effects, mitigate damage and protect evidence 3.3 Report incident, effects and actions to appropriate person

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 2.2, 2.3, 3.1	• Researches and interprets text to identify misleading information and compare technical specifications, and identify solutions to new and emerging issues to maintain system
Writing	2.3, 3.3	• Uses simple vocabulary to report textual information in a sequential manner to the appropriate personnel
Oral Communication	2.3	• Presents factual information in a clear manner, using specific and appropriate language
Navigate the world of work	1.1-1.3, 2.1-2.3, 3.1-3.3	• Understands roles and responsibilities for task and makes basic decisions on work completion parameters in accordance with organisational standards
Interact with others	2.2, 2.3	• Identifies and takes steps to follow accepted communication practices and protocols
Get the work done	1.1-1.3, 2.1-2.3, 3.1-3.3	• Plans and implements routine tasks, aiming to achieve them efficiently • Initiates standard diagnostic procedures when responding to familiar and unfamiliar problems within immediate context, and seeks input from others when problems remain unresolved • Understands the purposes, specific functions and key

Assessment Requirements for ICTSAS207 Protect and secure information assets

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify the organisation's information assets and the ways in which these assets are used
- establish potential threats to information assets and analyse the effects these threats would have on the organisation
- implement measures to secure assets, and mitigate or prevent damage, according to organisational requirements
- discuss details of security threats and issues relating to information assets with appropriate persons
- report issues or incidents according to organisational requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify information assets and key sources of information assets
- identify the types of security responses available to secure assets
- identify assets supported by the organisation
- describe general information and communications technology (ICT) hardware and security implications
- identify the organisation’s security procedures.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work and include access to:

- a site with computer hardware and office environments representing a range of workplaces
- appropriate software systems
- organisational information assets
- technical records, documentation and enterprise procedures.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTSAS208 Maintain ICT equipment and consumables

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to maintain the operation of basic computer hardware and peripherals, including the replacement of consumables.

It applies to technical support individuals who, while working under a level of supervision, perform mainly routine tasks within an office environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Systems administration and support

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Clean equipment	1.1 Access and verify cleaning supplies for usability on the selected equipment 1.2 Record maintenance actions undertaken according to organisational procedures 1.3 Clean equipment according to manufacturer specifications and organisational manuals 1.4 Ensure basic work health and safety (WHS) principles and

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	guidelines are followed
2. Replace and maintain consumables and supplies	2.1 Access consumables from storage points and record usage information according to organisational procedures 2.2 Replace consumables when needed and log the action undertaken 2.3 Dispose of consumables following environmental guidelines 2.4 Test equipment to ensure it is in working order at set time periods and according to organisational procedures
3. Maintain equipment	3.1 Establish which equipment requires maintenance 3.2 Maintain equipment according to organisational guidelines and manufacturer specifications 3.3 Document maintenance procedures performed according to organisational guidelines 3.4 Exercise care to prevent interruption of business activities during maintenance procedures 3.5 Store unused equipment devices according to manufacturer specifications and organisational guidelines

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.4, 2.1-2.4, 3.1, 3.2, 3.5	• Integrates and evaluates a range of textual information to maintain effective methods and appropriate standards
Writing	1.2, 2.1, 2.2, 3.3	• Uses simple vocabulary to record information in a sequential manner for internal reference
Oral Communication	3.4	• Uses listening and questioning techniques to clarify schedules while maintaining business standards
Numeracy	2.4, 3.4	• Recognises and applies familiar measurements relating to time durations
Navigate the world of work	1.1-1.4, 2,1-2.4, 3.1-3.5	• Understands roles and responsibilities for task and makes basic decisions on work completion parameters

© Commonwealth of Australia, 2025 Future Skills Organisation

		in accordance with organisational procedures, WHS and environmental guidelines
Get the work done	1.1-1.4, 2.1-2.4, 3.1-3.5	• Plans and implements routine tasks, aiming to achieve them efficiently • Makes low-impact decisions within familiar situations, based on a range of predefined or routine solutions, and evaluates the effectiveness of the outcome • Understands the purposes, specific functions and key features of common digital systems and tools, and operates them effectively to complete routine tasks

Assessment Requirements for ICTSAS208 Maintain ICT equipment and consumables

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- clean equipment following manufacturer specifications and work health and safety (WHS) policy and procedures
- replace and dispose of consumables according to regulations and organisational policy
- test and maintain equipment in working order, following WHS procedures
- record activities and actions appropriately.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify current industry accepted hardware and software, and manufacturer maintenance guides
- describe organisational systems related to storage and retrieval of information and equipment
- identify workplace health and safety principles and responsibilities, including ergonomics, work periods and breaks, and conservation techniques
- identify chemical storage, control and disposal procedures.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work, and include access to:

- a site at which equipment maintenance may be carried out

© Commonwealth of Australia, 2025 Future Skills Organisation

- equipment currently used in industry
- relevant equipment documentation that may affect maintenance activities.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTSAS209 Connect and use a home based local wireless network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to install, configure and secure devices to a small home based local network.

It applies to individuals who, while working under a level of supervision, have responsibility in a frontline technical support capacity.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Systems administration and support

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Confirm requirements for home office wireless network	1.1 Document client requirements and confirm with appropriate person 1.2 Identify available documentation and technical support options 1.3 Identify the digital devices to be connected to the network and confirm wireless network component requirements 1.4 Take action to ensure client support expectations are covered by vendor warranty and support services

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.5 Ensure required work health and safety (WHS) standards are incorporated as part of the installation process
2. Prepare for installation	2.1 Obtain digital devices and wireless network components 2.2 Validate that contents of delivered components and physical contents match the packing list and resolve discrepancies if necessary 2.3 Determine internet service provider (ISP) connection properties
3. Install and configure the wireless router and adapters	3.1 Install the wireless router 3.2 Configure the wireless router using the router configuration properties 3.3 Install the wireless adapters 3.4 Configure the wireless fidelity (Wi-Fi) system
4. Secure the wireless system	4.1 Set the security components of the system 4.2 Test the security components 4.3 Review any updated documentation regarding security issues and the components used

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	1.2, 1.3, 2.1, 3.1-3.4, 4.3	• Identifies and uses basic knowledge of industry hardware and software appropriate to the environment • Identifies and uses new or upgraded technology skills to enhance learning
Reading	1.2-1.5, 2.1-2.3, 3.1-3.4, 4.1-4.3	• Interprets a range of texts to evaluate and integrate strategies to maintain effective methods that adhere to client requirements and standards
Writing	1.1	• Uses simple vocabulary to record information in a sequential manner that adheres to client requirements and for internal reference
Oral	1.1, 1.4	• Uses listening and questioning techniques to confirm

© Commonwealth of Australia, 2025 Future Skills Organisation

Communication		requirements
Navigate the world of work	1.1-1.5, 2.1-2.3, 3.1-3.4, 4.1-4.3	• Understands roles and responsibilities for task and makes basic decisions on work completion parameters in accordance with client requirements and WHS standards
Interact with others	1.1, 1.2, 1.4, 2.2	• Identifies and takes steps to follow accepted communication practices and protocols
Get the work done	1.1-1.5, 2.1-2.3, 3.1-3.4, 4.1-4.3	• Plans and implements routine tasks aiming to achieve them efficiently • Makes low-impact decisions within familiar situations, based on a range of predefined or routine solutions and evaluates the effectiveness of the outcome • Understands the purposes, specific functions and key features of common digital systems and tools, and operates them effectively to complete routine tasks

Assessment Requirements for ICTSAS209 Connect and use a home based local wireless network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- determine suitable wireless fidelity (Wi-Fi) requirements for small home office style settings
- connect and integrate Wi-Fi components into a small office system safely
- install and configure wireless routers and adapters as part of a Wi-Fi system
- secure components of a Wi-Fi system.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify computer component installation procedures
- describe current industry accepted Wi-Fi network products
- describe Wi-Fi installation requirements
- identify and describe common Wi-Fi systems and Wi-Fi security considerations
- identify internet service provider (ISP) connection protocols
- identify and describe relevant work health and safety (WHS) procedures for electrical equipment
- identify wireless network components.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work, and include access to:

© Commonwealth of Australia, 2025 Future Skills Organisation

- the internet to enable configuration procedures
- Wi-Fi equipment currently used in industry
- technical support to support the Wi-Fi installation
- technical documentation.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTSAS303 Care for computer hardware

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to manage the maintenance and location of hardware.

It applies to frontline technical support individuals who work under a level of supervision but have some responsibility to maintain organisational hardware.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Systems administration and support

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Establish safe work practices	1.1 Determine, record and apply relevant legal requirements and work health and safety (WHS) standards to the installation and maintenance of computer hardware 1.2 Determine, record and apply requirements specified by hardware manufacturers 1.3 Determine, record and apply safe work practices, taking into account legal and manufacturer requirements

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
2. Establish location requirements for hardware and peripherals	2.1 Determine and apply suitable environmental conditions for hardware and peripherals 2.2 Determine and apply system protection devices where appropriate 2.3 Determine and apply requirements when moving hardware 2.4 Determine and apply suitable storage principles for hardware and associated peripherals and media
3. Establish maintenance practices	3.1 Determine maintenance requirements specified by the equipment manufacturer 3.2 Produce maintenance schedules 3.3 Perform diagnostic functions, including replacing suspect components with other serviceable components and reloading associated software 3.4 Determine whether unserviceable components are replaceable through warranty, replacement or upgrade 3.5 Perform diagnostic functions using the operating system and third party diagnostic tools
4. Determine appropriate hardware quality standards	4.1 Consider and apply business requirements in respect of hardware matters 4.2 Determine and apply quality standards to the selection of appropriate hardware and associated peripherals

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 2.1-2.4, 3.1, 3.4, 4.1, 4.2	• Researches and interprets a range of texts to identify requirements and standards, compare technical specifications, and identify solutions to new and emerging issues to maintain the environment
Writing	1.1-1.3, 3.2	• Uses simple vocabulary to record key information in a sequential manner to maintain the appropriate standards and for internal reference

© Commonwealth of Australia, 2025 Future Skills Organisation

Oral Communication	3.5	• Presents factual information in a clear manner, using specific and appropriate language
Numeracy	3.2, 4.1	• Recognises and applies familiar measurements relating to time durations and uses mathematical calculations to measure and calculate amounts
Navigate the world of work	1.1-1.3, 4.1, 4.2	• Takes some personal responsibility for adherence to legal and regulatory requirements by establishing safe work practices
Get the work done	All	• Plans and implements routine tasks and workload, making limited decisions on sequencing, timing and collaboration, and seeks assistance in setting priorities • Makes low-impact decisions within familiar situations, based on a range of predefined or routine solutions and evaluates the effectiveness of the outcome • Responds to predictable routine problems and implements standard or logical solutions • Identifies ideas for other applications and considers them in current contexts • Uses digital technology for basic reading, recording and searching information, and communications, following routine procedures and security requirements

Assessment Requirements for ICTSAS303 Care for computer hardware

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- perform diagnostic functions by replacing components, reloading software and using operating system and other diagnostic tools
- establish location requirements for system hardware and associated peripheral devices
- follow safe work practices
- determine maintenance requirements and establish maintenance schedule
- apply appropriate quality standards to computer hardware and peripherals.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the range of quality levels in current common hardware
- describe the importance of maintenance
- describe workplace health and safety principles specific to working with mains-powered equipment
- identify and describe the potential environmental effects of common types of hardware
- identify common security issues that impact on computer hardware
- identify the software related to hardware operations
- identify common system hardware and associated peripherals functions.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work and include access to:

- computer hardware, software and diagnostic tools
- warranty records and reports
- maintenance schedules
- vendor documentation
- safe work practices.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTSAS304 Provide basic system administration

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to implement components of systems backup, restore, security and licensing in a stand-alone or client server environment.

It applies to individuals who, while working under limited supervision, have responsibility in a frontline technical support capacity to exercise discretion and judgement, using appropriate knowledge to provide assistance.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Systems administration and support

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Record security access	1.1 Obtain client access requirements and clearance levels according to organisational requirements 1.2 Issue computer or network user account and password details to client 1.3 Provide security documentation and access to client 1.4 Record user account and security access details to maintain

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	system integrity and assist later auditing
2. Record software licences	2.1 Determine what licensed software is used within the organisation 2.2 Maintain records of licence number and location 2.3 Check personal computers and network for illegal software 2.4 Report illegal software to appropriate person
3. Carry out system backup	3.1 Create or review organisational backup schedule 3.2 Complete file backups according to schedule 3.3 Label and store backups according to organisational requirements 3.4 Maintain record of backups
4. Restore system backup	4.1 Determine and test restore procedures according to organisational guidelines 4.2 Complete a restore under supervision of an appropriate person 4.3 Record completed restore according to organisational guidelines
5. Apply security access controls	5.1 Document security access as per clearance guidelines set by management 5.2 Maintain a security access register in line with organisational guidelines to record which client or groups have access to which resources 5.3 Identify the security controls on the file system provided by the operating system 5.4 Apply effective access control on files and directories

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 2.1, 4.1, 5.1, 5.3	• Interprets and evaluates a range of textual information to maintain effective methods while adhering to appropriate standards

© Commonwealth of Australia, 2025 Future Skills Organisation

Writing	1.2, 1.4, 2.2, 2.4, 3.4, 4.3, 5.1, 5.2	• Records detailed information incorporating both factual and professional language that adheres to organisational standards
Oral Communication	1.2, 2.4, 4.2	• Provides information using language appropriate to environment and audience • Uses listening and questioning techniques to confirm understanding
Numeracy	1.4, 2.2, 3.3, 3.4, 4.1-4.3, 5.1-5.4	• Extracts and evaluates the mathematical information embedded in a range of tasks and texts to maintain records for internal reference
Navigate the world of work	1.1-1.4, 2.1-2.4	• Appreciates the implications of legal and regulatory responsibilities related to own work, and is beginning to recognise some general legal principles applicable in relation to security access and software
Interact with others	2.4, 4.2	• Selects the appropriate form, channel and mode of communication when reporting illegal software use • Contributes to specific activities requiring joint responsibility and accountability when completing a restore under supervision
Get the work done	All	• Takes responsibility for planning and organising own work, identifying ways of sequencing and combining elements for greater efficiency, and considering how to link with the work of others • Implements actions as per plan, making slight adjustments if necessary • Selects from a range of pre-determined options in routine situations, identifying and taking some situational factors into account • Monitors and controls access to digitally stored and transmitted information

Assessment Requirements for ICTSAS304 Provide basic system administration

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- perform a systems backup, restore and maintain correct usage according to licensing agreements in a stand-alone or client server environment
- maintain software licence records and check for copyright compliance within the system
- maintain security access records and apply access controls on network resources.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe common backup procedures
- identify and outline operating systems used by the organisation
- describe the organisational security procedures
- identify organisational standards to:
  - carry out backup and restore operations
  - label and store backups
  - record security and software details
- describe the selection, functions and features of appropriate diagnostic tools
- identify software copyright responsibilities
- identify the system's current functionality.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work and include access to:

- operating systems
- software licence records
- technical records and documentation
- organisational backup and restore procedures
- organisational security guidelines.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTSAS305 Provide ICT advice to clients

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to provide information and communications technology (ICT) advice and support to clients, including the communication of comprehensive technical information.

It applies to frontline technical support individuals who work under a level of supervision but have responsibility for providing technical support.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Systems administration and support

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Review client support issues	1.1 Check for new problems logged by client 1.2 Check previous logs for similar problems or requests from client 1.3 Investigate and document support issues affecting client 1.4 Notify client of the results of investigation and provide advice and support on findings

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.5 Obtain client feedback and make changes
2. Provide advice on software, hardware or network	2.1 Confirm software, hardware or network requirements with client 2.2 Investigate and document a solution 2.3 Document additional requirements identified in the investigation and refer them to the client 2.4 Obtain approval from client to implement the solution 2.5 Investigate and document amount of technical support client may require 2.6 Discuss and agree level of technical support identified with client 2.7 Arrange time with client when support will take place 2.8 Provide technical support as part of group or one-to-one instruction to the client 2.9 Provide manuals and help documentation to client
3. Obtain client feedback	3.1 Create an appropriate evaluation or feedback form or other mechanism to gather feedback about solution and support provided 3.2 Provide client with instructions on how to complete form or use other means of providing feedback 3.3 Distribute evaluation or feedback to client 3.4 Review feedback from client to identify areas for improvement

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3 , 1.5, 2.2, 2.5, 3.4	• Interprets and evaluates information to compare technical specifications, identify areas of improvement and recognise solutions to new and emerging issues
Writing	1.3-1.5, 2.2, 2.3, 2.5,	• Uses written vocabulary, grammatical structures and conventions to accurately convey instructions and

© Commonwealth of Australia, 2025 Future Skills Organisation

	2.9, 3.1-3.4	record complex information
Oral Communication	1.2, 1.4, 1.5, 2.1, 2.4-2.8	• Participates in verbal exchange of ideas/solutions using detailed and clear language to contribute information for discussion and confirm client requirements • Varies content, structure, style, tone and vocabulary to suit the needs of audiences
Interact with others	1.4, 1.5, 2.1, 2.3, 2.4, 2.6-2.9, 3.2, 3.3	• Participates in routine conversations directly relevant to role, responding and contributing in appropriate ways when providing advice to clients and receiving feedback • Shares information and resources, offers assistance voluntarily and provides feedback on others' work when providing client support
Get the work done	1-1-1.3, 1.5, 2.2-2.5, 2.7, 3.1-3.4	• Plans a range of routine, and some non-routine, tasks, accepting stated goals and aiming to achieve them efficiently when obtaining feedback from client • Implements actions as per plan, making slight adjustments if necessary, and addressing some unexpected issues • Selects from a range of predetermined options in routine situations, identifying and taking some situational factors into account • Applies formal problem solving processes when tackling an unfamiliar problem, breaking complex issues into manageable parts and identifying and evaluating several options for action • Understands key principles and concepts that underpin the design and operation of digital systems and tools

Assessment Requirements for ICTSAS305 Provide ICT advice to clients

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- investigate client support requests and provide a documented solution after consultation with client
- convey comprehensive technical information to clients in a clear, concise, jargon-free and coherent manner
- use technical manuals and ‘help’ documentation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and describe the available in-house and vendor support
- explain contract and service agreements with vendors
- identify features of different types of hardware supported by the organisation
- identify sources of information relevant to the provision of services and support
- identify operating system:
  - functions and basic features
  - supported by the organisation
- identify and describe security and network guidelines and procedures
- identify the advanced features of software, including the functions and support provided by the organisation.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work and include access to:

- peers and supervisors for obtaining information
- relevant information sources
- technical records and documentation.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTSAS308 Run standard diagnostic tests

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Application

This unit describes the skills and knowledge required to troubleshoot problems, identify and implement preventative maintenance techniques, and conduct diagnostic tests on a range of platforms.

It applies to individuals who, while working under a level of supervision, have responsibility to action tasks in a frontline technical support capacity.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Systems administration and support

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify common symptoms and preventative maintenance techniques for ICT software and hardware	1.1 Plan troubleshooting processes for ICT software and hardware to guide the resolution of common ICT problems based on requirements for ICT testing and maintenance 1.2 Determine and document common symptoms of ICT problems for ICT software and hardware to increase troubleshooting process efficiency and focus 1.3 Identify and select testing and preventative maintenance

© Commonwealth of Australia, 2025 Future Skills Organisation

	techniques taking into consideration the common symptoms of ICT problems to complete planning troubleshooting processes
2. Operate system diagnostics	2.1 Run the system diagnostic program according to specifications to identify required modifications in line with requirements for ICT testing and maintenance 2.2 Modify the system configuration as indicated by the diagnostic program to address symptoms 2.3 Carry out preventative maintenance techniques to address common symptoms of ICT problems
3. Monitor and remove system viruses	3.1 Scan system to check and maintain virus protection 3.2 Report identified viruses and proposed actions to superior to gain approval 3.3 Implement approved actions to remove detected virus infections using software tools and procedures and by restoring backups 3.4 Document virus symptoms and removal information to keep a record of actions for future application

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	**Description**
Reading	• Interprets textual information to identify issues and solutions to maintain the standards
Writing	• Records key information to note output of investigations, and sequences writing to produce cohesive text for reference
Oral Communication	• Presents factual information in a clear manner, using specific language
Interact with others	• Selects and uses appropriate strategies to establish and maintain spoken communication in familiar and some unfamiliar contexts • Derives meaning from oral texts in familiar and some unfamiliar contexts
Get the work done	• Takes responsibility for planning, sequencing and prioritising tasks and own workload for efficiency and effective outcomes • Makes routine decisions and implements standard procedures for routine tasks, using formal decision making processes for more complex and non-routine situations

© Commonwealth of Australia, 2025 Future Skills Organisation

	• Applies problem solving processes, breaking complex issues into manageable parts and identifying and evaluating options for action • Understands key principles and concepts that underpin the design, application and operation of digital systems and tools

Assessment Requirements for ICTSAS308 Run standard diagnostic tests

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit; including evidence of the ability to:

- Identify and document six ICT problems and corresponding testing and preventative maintenance techniques to provide for troubleshooting process planning
- Implement preventative maintenance techniques to address three common symptoms of problems associated with each of the following:
  - desktop application
  - operating system
  - laptop
  - mobile device
  - printer
- Identify and address three virus infections using a system diagnostic program
-

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

- Impact of organisational structure, diagnostic testing procedures and guidelines, and software specifications on conducting diagnostic testing
- Hardware and software diagnostic tools, including products that manage:
  - backup procedures
  - configuration procedures
  - hardware maintenance
  - security
- Common symptoms of problems associated with:
  - desktop applications
  - operating systems

© Commonwealth of Australia, 2025 Future Skills Organisation

  - laptops
  - mobile devices
  - printers
- Preventative maintenance techniques relevant to maintaining hardware and software applications
- Common diagnostic testing approaches
-

Assessment Conditions

Skills must be demonstrated in a workplace or simulated environment typical of those in an ICT working environment.

- Hardware and software diagnostic tools and specifications
- System with virus protection software installed
- Tools, equipment, materials, software packages
- ICT documentation including details of current architecture, operating system, software applications, and hardware
- Requirements relating to ICT maintenance and testing
- Individual superior in the organisation

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

ICTSAS409 Manage risks involving ICT systems and technology

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to implement procedures that identify, analyse, evaluate and monitor risks involving information and communications technology (ICT) systems and technology. This includes the development and management of contingency plans.

It applies to individuals who provide high level technical skills and knowledge, and systematic approaches to manage risk in ICT systems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Systems administration and support

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Establish risk context	1.1 Review and document organisational and technical environment 1.2 Establish and document risk boundaries according to business operating and strategic environment
2. Identify risk factors	2.1 Develop or acquire a measurement scale for project risk, which

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	includes importance, complexity, time and resources required 2.2 Identify project risks based on the measurement scale developed and document according to business requirements 2.3 Identify business impact of changes and document according to current and future business directions
3. Implement contingency plans	3.1 Classify each risk and create contingency plans that address how the risk will be monitored and overcome, if possible 3.2 Identify measurable benchmarks to track the treatment of risks to the new system 3.3 Identify risk management intervention points according to benchmarked performance tolerances 3.4 Demonstrate use of phased implementation and piloting to reduce risk factors
4. Monitor, update and report risk profile	4.1 Conduct regular risk updates to add new risks and remove old ones 4.2 Update contingency plans when appropriate to incorporate new information 4.3 Conduct risk reviews at major project milestones and document outcomes 4.4 Establish feedback processes to provide warning of potential new risks according to business requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1	• Compares and contrasts complex technical information and numerical data from different sources to determine requirements and complete necessary actions
Writing	1.1, 1.2, 2.1-2.3, 3.1, 4.2, 4.3	• Develops material using specific and technical language, and organises content in a manner that supports the purpose of the document
Oral	4.1, 4.3, 4.4	• Obtains information by listening and questioning, and participates in verbal exchanges with stakeholders

© Commonwealth of Australia, 2025 Future Skills Organisation

Communication		using clear and accurate language to express requirements and present information
Numeracy	2.1-2.3, 3.2, 3.3, 4.2	• Uses mathematical equations to calculate and compare numerical data against benchmarks to determine required actions • Creates or uses measurement scales to rate and prioritise risk
Interact with others	4.1, 4.3, 4.4	• Selects and uses appropriate conventions and protocols when communicating with stakeholders in a range of work contexts
Get the work done	1.1, 1.2, 2.1-2.3, 3.1-3.4, 4.1-4.4	• Takes responsibility for planning, sequencing and prioritising tasks and own workload for efficiency and effective outcomes • Uses formal analytical thinking techniques for identifying issues and generating possible solutions, seeking input from others as required

Assessment Requirements for ICTSAS409 Manage risks involving ICT systems and technology

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify and document where risk occurs
- develop and implement measures to mitigate or obviate risk
- set up procedures for regular risk management
- monitor, review and report risk profile

Note: Evidence must be provided for at least TWO information and communications technology (ICT) environments.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- analyse and discuss risk management strategies and issues
- outline key features of regulation, standards and codes of practice relevant to risk management including:
  - ethics
  - copyright and intellectual property
  - privacy legislation
- identify and describe guidelines required for updating technology
- describe the business supply chain for the ICT industry
- summarise user analysis and the client relationship management (CRM) systems
- describe business process design principles in relation to risk management.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work and include access to:

- special purpose tools, equipment and materials
- industry software packages
- analysis software
- business website
- networks
- requirements documentation
- risk management plan
- site server
- site server software
- software applications
- updated or new technology
- user analysis
- web servers.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTSAS502 Establish and maintain client user liaison

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to establish and maintain client user liaison in an information and communications technology (ICT) environment, post support implementation. This occurs after the business critical functions have been determined.

It applies to individuals who are responsible for system and business analysis and administration, and liaising with clients to ensure that their requirements are fully met.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Systems administration and support

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Determine support areas	1.1 Identify and record information communications technology used in the organisational unit 1.2 Identify stakeholders of the system 1.3 Identify organisational structure, culture and politics related to support requirements 1.4 Determine the level of support required by each organisational

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	unit
2. Develop support procedures	2.1 Contact organisational units as required to verify support needs 2.2 Establish procedures for providing required support, including method of contact, frequency of meetings and reporting 2.3 Document agreed procedures or service level agreement (SLA)
3. Assign support personnel	3.1 Identify ICT skills required to assist each organisational unit with support activities 3.2 Assign personnel according to human resource processes 3.3 Verify availability of selected personnel 3.4 Provide support using agreed procedures 3.5 Obtain feedback from appropriate persons on a regular basis

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 3.1	• Comprehends textual information and numerical data to determine and adhere to required actions
Writing	1.1, 2.1, 2.3, 3.3, 3.5	• Records key information in the required format and layout, and develops material to a specific audience using clear and detailed language to convey explicit information, requirements and recommendations
Oral Communication	2.1, 3.3, 3.5	• Uses appropriate language, tone and pace to interact effectively with others, and listening and questioning techniques to obtain feedback relevant to the task
Navigate the world of work	3.2, 3.4	• Takes full responsibility for following policies, procedures and legislative requirements, and identifies organisational implications of new legislation or regulation • Seeks to improve policies and procedures to better meet organisational goals
Interact with others	2.1, 3.2, 3.3, 3.5	• Implements strategies for a diverse range of colleagues and clients to build rapport and foster strong relationships

© Commonwealth of Australia, 2025 Future Skills Organisation

		• Influences and fosters a collaborative culture, and facilitates a sense of commitment and workplace cohesion
Get the work done	1.4, 2.1, 2.2, 3.4, 3.5	• Plans strategic priorities and outcomes within a flexible, efficient and effective context in a diverse environment exposed to competing demands • Gathers and analyses data and seeks feedback to improve plans and processes • Addresses complex problems involving multiple variables, using formal analytical, lateral thinking techniques, experience and knowledge to focus in on the root cause

Assessment Requirements for ICTSAS502 Establish and maintain client user liaison

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- establish and maintain client liaison
- establish and document procedures for providing required support
- identify information and communications technology (ICT) skill requirements
- assign appropriate support personnel.

Note: Evidence must be provided in at least TWO ICT environments.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- specify adequate response times for providing services
- analyse the role of stakeholders in the organisation, and their level of dependence on ICT infrastructure
- explain the capabilities of a range of ICT devices
- research and evaluate current industry accepted hardware and software products
- identify and describe equipment that is vital in supplying business critical services, including:
  - internet file transaction security for client accounts
  - web server for e-business
- describe in detail the areas related to the organisation’s services and the ICT system functionality required to supply the essential and desirable services to the organisation
- describe the quality assurance practices relating to the supplied service and service level agreements (SLAs)
- analyse the role of ICT in the client's business domain
- identify and describe server types to provide:
  - application

© Commonwealth of Australia, 2025 Future Skills Organisation

- backup
- email
- firewall
- proxy
- web.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work, and include access to:

- special purpose tools, equipment and materials
- industry software packages
- agreed procedures or SLAs
- documented support requirements
- technical records and documentation.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTSAS505 Review and update disaster recovery and contingency plans

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to analyse the impact of the system on the organisation and carry out risk analysis, disaster recovery and contingency planning.

It applies to individuals who apply a wide range of higher level technical skills and systematic problem solving approaches in information and communications technology (ICT) related areas.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Systems administration and support

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Evaluate impact of system on business continuity	1.1 Identify business critical functions and the security environment from documentation and from discussion with business area and project team 1.2 Identify critical data and software from documentation 1.3 Assess potential impact of business risk and threats on ICT systems

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.4 Identify and evaluate statutory requirements, commercial requirements and contingency possibilities according to specifications and cost constraints
2. Evaluate threats to system	2.1 Identify threats to the system, considering security analysis and internal and external business environment 2.2 Evaluate risk minimisation alternatives against specifications and cost constraints
3. Formulate prevention and recovery strategy	3.1 Evaluate prevention and recovery options to support critical business functions against business specifications and cost constraints 3.2 Review current operational procedures to ensure adequate risk safeguards and contingency plans are in place 3.3 Submit disaster recovery and prevention strategy to appropriate person for approval
4. Develop disaster recovery plan to support strategy	4.1 Identify and document resources required for disaster recovery according to specifications and cost constraints 4.2 Identify and document processes required for disaster strategy according to project standards 4.3 Identify cut-over criteria before initiating disaster plan 4.4 Document disaster recovery plan and submit to appropriate person for review and sign-off

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.4, 3.2, 4.1, 4.3	• Researches and analyses textual information and technical data/specifications from a range of documentation and sources to inform the development of contingency plans
Writing	3.3, 4.1,4.2, 4.4	• Uses clear and accurate language and formats appropriate to the task to convey explicit technical information, systems data requirements and recommendations

© Commonwealth of Australia, 2025 Future Skills Organisation

Oral Communication	1.1	• Participates in a verbal exchange of ideas and elicits the view and opinions of others by listening and questioning
Numeracy	1.2, 1.4, 4.4	• Accurately interprets, analyses and documents numerical, financial and technical system data
Navigate the world of work	1.4, 2.1, 3.2, 4.2	• Develops and implements strategies to ensure organisational policies, procedures and regulatory requirements are met • Monitors and reviews the organisations policies, procedures and adherence to legislative requirements to implement and manage change
Interact with others	1.1, 3.3, 4.4	• Uses relevant communication tools and strategies in building and maintaining effective working relationships • Influences and fosters a collaborative culture that facilitates a sense of commitment and workplace cohesion
Get the work done	1.1, 1.3, 1.4, 2.1, 2.2, 3.1, 3.2	• Plans strategic priorities and outcomes within a flexible, efficient and effective context in a diverse environment exposed to competing demands • Gathers and analyses data and seeks feedback to improve plans and processes • Addresses complex problems involving multiple variables, using formal analytical, lateral thinking techniques, experience and knowledge to focus in on the root cause

Assessment Requirements for ICTSAS505 Review and update disaster recovery and contingency plans

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop a contingency plan that identifies threats and minimises down time for business critical functions
- develop clear and specific directions on how to handle serious down time
- coordinate, plan and articulate flexible logistics requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- compare and contrast backup methodologies
- explain the business planning process relevant to the development of information and communication technology (ICT) business solutions
- analyse the client business domain
- evaluate disaster recovery plan strategies and components, including:
  - physical security
  - system failure, accident or sabotage (hackers)
  - denial of service
  - virus attack
  - cyber attack
  - telecommunications failure
  - contingency arrangements
- interpret and analyse key workplace health and safety, legislative and organisational requirements relevant to the task
- evaluate the organisation’s current systems functionality and systems engineering.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work, and include access to:

- vulnerability assessment and general definition of requirements
- acceptance test plan
- business impact analysis
- information technology security assurance specifications
- relevant statutory documentation.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTSAS512 Review and manage delivery of maintenance services

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to review and manage the delivery of maintenance services.

It applies to individuals with managerial experience and responsibility for supervising individuals working under their direct or indirect supervision.

No licensing, legislative, or certification requirements apply to this unit at the time of publication.

Unit Sector

Systems administration and support

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Review service standards	1.1 Review service level agreements (SLAs) 1.2 Identify actual fault reporting and restoration performance, and compare with SLAs to ensure they meet requirements 1.3 Record areas of discrepancy
2. Review infrastructure	2.1 Identify internal support and maintenance options 2.2 Undertake a review of infrastructure

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	2.3 Record areas of discrepancy
3. Determine and implement solutions	3.1 Compare service standards and infrastructure discrepancies, and identify gaps in existing service 3.2 Document discrepancies identified 3.3 Determine cost effective solutions and impact 3.4 Implement solutions
4. Organise reviews	4.1 Determine guidelines for regular reviews with stakeholders 4.2 Undertake reviews as per agreed guidelines 4.3 Document review process and submit to the stakeholder 4.4 Ensure effective reporting procedures are in place and used

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 3.1	• Evaluates textual and numerical information from a range of documentation to inform maintenance requirements and solutions
Writing	1.3, 2.1, 2.3, 3.2, 4.1, 4.3	• Uses clear and precise language and document formats appropriate to the task to convey explicit information and instructions
Numeracy	3.3	• Calculates and compares whole numbers and decimals to estimate projected costs against budgets
Navigate the world of work	3.4, 4.2, 4.4	• Works independently and collectively in making decisions to achieve organisation outcomes in maintenance service delivery
Get the work done	1.2, 2.1, 2.2, 3.1, 3.3, 3.4, 4.1-4.4	• Accepts responsibility for planning, prioritising and sequencing complex tasks and workload • Uses problem solving techniques to analyse required outcomes in order to manage maintenance-service delivery

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Requirements for ICTSAS512 Review and manage delivery of maintenance services

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- analyse and report on faults and restoration performance
- comply with service level agreement (SLA)
- review infrastructure and document discrepancies
- analyse and prioritise requests according to business requirements
- implement cost effective solutions and evaluate impact.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe and explain business scheduling requirements
- discuss capacity planning and change-control procedures
- compare and contrast current industry accepted hardware and software products, including their general features and capabilities
- outline key features of the client business domain
- evaluate help desk and maintenance practices
- analyse the role of stakeholders and the degree of stakeholder involvement
- describe the system's current functionality and the features and functions of system under modification.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work, and include access to:

- special purpose tools, equipment and materials
- industry software packages
- sites on which review of maintenance-services delivery may be conducted
- established ICT service infrastructure
- SLAs and business guidelines.

Assessor must satisfy NVR/AQTF assessor requirements.

ICTSAS517 Use network tools

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to use tools to assist in managing a network effectively.

It applies to individuals who apply technical and specialised knowledge to monitor security and resolve issues for the network.

No licensing, legislative, or certification requirements apply to this unit at the time of publication.

Unit Sector

Systems administration and support

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Use command line tools	1.1 Analyse command-line environment 1.2 Differentiate command-line and graphical user interface (GUI) systems 1.3 Identify command-line tools 1.4 Apply command-line tools in GUI environment
2. Use hardware tools	2.1 Identify appropriate hardware tools and their function 2.2 Review work health and safety (WHS) requirements for tool

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	use 2.3 Manage network using hardware tools 2.4 Analyse test results
3. Use software tools	3.1 Identify appropriate software tools for network security 3.2 Determine areas of vulnerability 3.3 Classify function of each tool 3.4 Manage network using software tools 3.5 Analyse test results

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 2.1, 2.2, 3.1	• Identifies and interprets textual information and numerical data from a range of sources to determine necessary actions
Writing	1.3	• Records textual and numerical data in format specific to requirements
Numeracy	3.5	• Uses mathematical equations to calculate numerical data and compare test outcomes
Get the work done	1.1-1.3, 2.1, 2.3, 2.4, 3.1-3.5	• Accepts responsibility for planning, prioritising and sequencing complex tasks and workload • Uses problem solving techniques to analyse required outcomes and manage the network • Uses digital technologies to manage network operations

Assessment Requirements for ICTSAS517 Use network tools

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- to manage a network effectively
- identify and use appropriate hardware and software tools:
- monitor network performance
- identify network threats
- isolate security breaches.

Note: Evidence must be provided on at least TWO networks or occasions.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe available network tools
- explain processes and techniques related to using network tools
- analyse key features of the range of attacks that affect network security
- discuss key problems and challenges relating to network security.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work, and include access to:

- special purpose tools, equipment and materials
- hardware and software tools
- security diagnostic software
- maintenance procedures
- network system.

ICTSAS518 Install and upgrade operating systems

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to maintain, install new and upgrade existing operating systems (OS) in a medium to large organisation.

It applies to individuals who apply technical and specialised knowledge to undertake complex support operations.

No licensing, legislative, or certification requirements apply to this unit at the time of publication.

Unit Sector

Systems administration and support

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Determine organisational help desk procedures	1.1 Review organisation’s technical support procedures 1.2 Interrogate help desk system 1.3 Liaise with client
2. Install or upgrade a desktop OS	2.1 Install an OS 2.2 Upgrade an existing OS 2.3 Research and implement automated OS installation techniques

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	and procedures 2.4 Migrate files
3. Manage and troubleshoot resource access	3.1 Configure local resources access 3.2 Configure sharing of local resources 3.3 Assign access rights to shared resources
4. Configure and troubleshoot hardware devices and drivers	4.1 Determine and resolve problems with hardware resources 4.2 Research and install appropriate device drivers 4.3 Configure hardware resources 4.4 Configure device drivers
5. Configure and troubleshoot the desktop and user environments	5.1 Construct profiles for users 5.2 Organise shortcuts 5.3 Arrange screen management

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.3, 3.1-3.3, 4.2	• Interprets and analyses a range of textual information and numerical data from a range of technical sources to determine necessary actions
Writing	1.3	• Uses clear and precise information and numerical data in appropriate formats to convey information to clients/users
Oral Communication	1.3	• Uses clear and accurate language to convey technical information to clients/users
Numeracy	1.1, 2.3, 4.2	• Interprets and applies numerical data in source materials relevant to the activity
Interact with others	1.3	• Identifies and uses appropriate conventions and protocols when communicating with clients
Get the work	1.2, 2.1-2.4, 3.1-3.3,	• Accepts responsibility for planning, prioritising and sequencing complex tasks and workload

© Commonwealth of Australia, 2025 Future Skills Organisation

done	4.1-4.4, 5.1-5.3	• Uses problem solving techniques to analyse required outcomes to manage client operating systems • Uses digital technologies to manage information and communications technology (ICT) operations

Unit Mapping Information

Assessment Requirements for ICTSAS518 Install and upgrade operating systems

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- determine organisation operating systems (OS) requirements
- install or upgrade OS
- customise OS to user requirements
- manage and configure hardware devices
- manage and configure desktop.

Note: Evidence must be provided for at least TWO operating systems.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain procedures and techniques involved in the installation and upgrade of OS
- explain procedures and principals involved in unattended OS installation
- describe OS configuration issues that may arise with hardware and desktop environments.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work, and include access to:

- special purpose tools, equipment and materials
- industry software packages
- stand-alone or networked personal computers
- appropriate OS installation compact disk or recovery boot disks
- drivers for connected devices

© Commonwealth of Australia, 2025 Future Skills Organisation

- helpdesk system
- OS service packs.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTSAS519 Perform systems tests

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Application

This unit describes the skills and knowledge required to ensure that the properties of an entire system are tested and proved adequate before handover to the user for final acceptance testing.

It applies to individuals employed in a range of information and communications technology (ICT) work environments who apply specialised and technical knowledge and systematic approaches to testing, fault finding and problem solving.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Systems administration and support

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for test	1.1 Determine acceptance criteria from system specifications 1.2 Determine and document software life cycle according to system specifications and contact in operations 1.3 Define test plan from acceptance criteria, software life cycle, system specifications and in compliance with organisational testing and acceptance processes 1.4 Notify contact in operations of scheduled tests to understand

© Commonwealth of Australia, 2025 Future Skills Organisation

	implications for operations and modify schedule to minimise implications for operations 1.5 Develop test scripts for online test and test run for batch test according to test plan 1.6 Prepare test environment and select test tools according to test plan 1.7 Prepare test logs and result sheets according to test plan 1.8 Conduct walk-through with superior to review expected results against acceptance criteria and incorporate feedback
2. Conduct test	2.1 Create clean test environment and initialise test environment according to test plan 2.2 Run test scripts and document results according to organisational testing and acceptance processes and test plan 2.3 Finalise test environment and document completed tests according to test plan and test logs and result sheets. 2.4 Compare and document actual results to expected results for each system unit and complete result sheets
3. Analyse and classify results	3.1 Analyse test results against acceptance criteria to identify variances 3.2 Summarise and classify test results to prepare report highlighting critical and urgent variances 3.3 Notify contact in operations of test completion to communicate implications 3.4 Obtain and incorporate feedback from superior on test results report to finalise report

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	**Description**
Reading	• Interprets and analyses a range of textual information and numerical data to determine necessary actions
Writing	• Uses clear language to record and report technical information, and checks for accuracy at all times • Uses writing style and documentation formats appropriate to the task
Oral	• Uses clear and accurate language to provide and obtain information

© Commonwealth of Australia, 2025 Future Skills Organisation

Communication	relevant to the task
Numeracy	• Uses mathematical equations to calculate technical data • Accurately records, analyses and documents numerical and technical system data
Navigate the world of work	• Takes full responsibility for following policies, procedures and legislative requirements
Interact with others	• Influences and fosters a collaborative culture and facilitates a sense of commitment and workplace cohesion • Uses communication tools and strategies to build and maintain effective working relationships
Get the work done	• Plans strategic priorities and outcomes within a flexible, efficient and effective context in a diverse environment exposed to competing demands • Gathers and analyses data and seeks feedback to improve plans and processes • Applies systematic and analytical decision making processes for complex and non-routine situations • Addresses complex problems involving multiple variables, using formal analytical, lateral thinking techniques, experience and knowledge to focus in on the root cause

Unit Mapping Information

Code and title current version	**Code and title previous version**	**Comments**	**Equivalence status**
ICTSAS519 Perform systems tests	ICTSAS503 Perform systems tests	Edits to performance criteria to clarify intent. Updates to assessment requirements.	Equivalent unit

Assessment Requirements for ICTSAS519 Perform systems tests

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit; including evidence of the ability to:

- Perform two system tests on a system including:
  - develop acceptance criteria
  - develop test plans
  - prepare and initialise a clean test environment
  - test the operation and consistency of the total system prior to delivery according to system specifications, including testing:
    - performance
    - security
    - configuration sensitivity
    - start-up and recovery from failure modes
  - analyse and report test results
  - obtain and act on feedback coming from test results
  -

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

- Key features and processes of automated test tools
- Typical procedures for system testing and acceptance
- Implications for organisational operations of system testing activities
- Software life cycles
- Test planning and scheduling
- Test script development
- Test environment preparation

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Skills must be demonstrated in a workplace or simulated environment where the conditions are typical of those in an ICT working environment or workplace. This includes:

- Relevant industry software packages
- Documentation of system requirements and design
- Organisational testing and acceptance processes
- Individual contact in operations in the organisation
- Superior in the organisation
- Hardware and environments for system test use
- System or application suitable for testing

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

ICTSAS520 Develop detailed test plans

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Application

This unit describes the skills and knowledge required to plan for testing information and communications technology (ICT) systems including software, systems administration, networking, and web development, by collating documentation of conditions and expected results sufficiently to allow for thorough system testing.

It applies to individuals who use technical and specialised knowledge and systematic approaches in performing or organising others to complete complex technical testing operations.

No licensing, legislative, or certification requirements apply to this unit at the time of publication.

Unit Sector

Systems administration and support

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare test environment and stakeholders	1.1 Determine structure of system and user accounts to understand test environment from system specifications 1.2 Develop and document draft test plan according to organisational testing procedures and system specifications 1.3 Notify stakeholders of test objectives and test schedule

© Commonwealth of Australia, 2025 Future Skills Organisation

	according to organisational testing procedures 1.4 Notify contact in operations of scheduled test and incorporate feedback to ensure preparedness and common understanding of implications and dependencies
2. Prepare test data and schedule	2.1 Gather test schedules according to organisational testing procedures 2.2 Correlate schedules with related functionality according to organisational testing procedures 2.3 Check testing schedule prior to validation according to organisational testing procedures 2.4 Prepare test according to the test plan and document expected results 2.5 Register test plan and initiate log entries according to organisational testing procedures
3. Complete test plan and acceptance processes	3.1 Validate test and acceptance processes with stakeholders 3.2 Finalise test plan and ensure documentation is compliant with organisational testing procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	**Description**
Reading	• Analyses and evaluates textual and numerical information from a range of documentation to determine required action
Writing	• Uses clear and precise language and document formats appropriate to the audience and task to convey explicit information and instructions
Oral Communication	• Uses clear and accurate language, and inclusive and collaborative techniques to convey information to a range of personnel
Interact with others	• Identifies and uses appropriate conventions and protocols when communicating with colleagues and others
Get the work done	• Accepts responsibility for planning, prioritising and sequencing complex tasks and workload • Applies systematic and analytical decision making processes for complex and non-routine situations • Uses digital technologies to manage ICT operations

Assessment Requirements for ICTSAS520 Develop detailed test plans

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit; including evidence of the ability to:

- For two systems:
  - interpret software specifications to plan for system testing
  - develop a comprehensive test plan that includes:
    - test approach including activities
    - test conditions and cases to be applied
    - test objectives
    - acceptance processes
    - data to be processed
    - automated testing coverage
    - expected results
    - dependencies
    - quality benchmarks
  - gain acceptance of test objectives and test schedule from stakeholders and contact in operations
  -

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

- Systems relevant to testing requirements
- System specifications analysis
- Implications of testing processes for organisation
- Quality benchmarks for comparison
- Testing approaches and processes and associated advantages and disadvantages in different scenarios

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Skills must be demonstrated in a workplace or simulated environment where the conditions are typical of those in an ICT working environment or workplace. This includes:

- Testing software package
- System engineering management plan
- Test and evaluation program plan
- System suitable for testing and associated documentation including system specifications
- User account details
- Individual stakeholders
- Individual contact in operations in the organisation
- Organisational testing procedures including acceptable test approaches, log entry requirements and quality benchmarks.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

ICTSAS522 Manage the testing process

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Application

This unit describes the skills and knowledge required to effectively manage and administer the end-to-end testing process, including test definition, execution and reporting.

It applies to experienced individuals who work autonomously in performing or organising others to undertake testing of systems and applications.

No licensing, legislative, or certification requirements apply to this unit at the time of publication.

Unit Sector

Systems administration and support

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Determine test scope and schedule	1.1 Determine testing requirements and objectives based on system requirements and acceptance criteria 1.2 Develop test plans based on system and testing requirements and objectives 1.3 Develop testing timelines and allocate resources according to organisational requirements and objectives 1.4 Document test schedules according to test procedures and provide to superior

© Commonwealth of Australia, 2025 Future Skills Organisation

	1.5 Obtain feedback from superior on test requirements, objectives, and schedule and incorporate required changes
2. Manage test procedures	2.1 Insert code into the test environment 2.2 Allocate personnel to testing procedures and manage work to ensure test procedures are carried out according to requirements and objectives 2.3 Administer alterations to the code if errors are detected 2.4 Integrate code into production environment 2.5 Administer full system test to ensure suitability of the system
3. Review the completeness and accuracy of the system	3.1 Record, prioritise, and investigate discrepancies and corrections according to organisational testing procedures 3.2 Brief superior on test results and agree required actions 3.3 Schedule required code changes based on test results 3.4 Evaluate results of system test against acceptance criteria to determine acceptability of system

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	**Description**
Reading	• Compares and evaluates textual information and numerical data and specifications from documentation to inform testing requirements
Writing	• Uses technically specific language and a range of writing styles to articulate requirements • Uses appropriate formats and structures to present information logically for different audiences and revises documents based on feedback and outcomes
Oral Communication	• Explains technical requirements and plans to relevant personnel, using clear and precise language and listening and questioning skills to confirm understanding
Interact with others	• Identifies and uses appropriate conventions and protocols when communicating with colleagues and others
Get the work done	• Develops plans to manage relatively complex routine and non-routine tasks with an awareness of how they might contribute to broader strategy and goals • Uses problem solving techniques to analyse required outcomes in

© Commonwealth of Australia, 2025 Future Skills Organisation

	order to manage the testing process • Uses digital technologies to manage operations

Assessment Requirements for ICTSAS522 Manage the testing process

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit; including evidence of the ability to:

- Develop one test schedule including plan, timeline, objectives and reporting arrangements
- Manage the testing process including allocating personnel to testing procedures on one occasion
- Review the system based on test results, brief organisational representative or line manager on outcomes and evaluate the results to determine acceptability on one occasion
- Identify, prioritise, schedule and evaluate required code changes based on test results on one occasion

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

- Testing techniques and automated test tools and associated key features and processes
- Typical testing procedures, standards and requirements
- Key system requirements and features
- Resource allocation and scheduling approaches and methodologies
- System testing evaluation methodologies

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in an ICT working environment or workplace. This includes access to:

- Automated testing tools
- System requirements and acceptance criteria
- Organisational testing procedures and standards
- Project procedures and timeframe

© Commonwealth of Australia, 2025 Future Skills Organisation

- Individual organisational representative or line manager
- Individual personnel carrying out test procedures
- Test hardware and environments; test and production
- System or application suitable for testing

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

ICTSMB401 Set up and operate a contractor business

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to own, operate and manage a small scale contractor business with employees that install telecommunications services.

It applies to individuals who operate their own contracting business delivering and installing telecommunications services to major service providers.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Unit Sector

Telecommunications – small and micro business

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Set up business operation	1.1 Develop business plan for small business operation according to business planning guidelines 1.2 Follow statutory and legal requirements to register business 1.3 Mitigate liabilities by obtaining adequate business insurance 1.4 Provide and maintain vehicle through purchase, lease or hire purchase, including managing fringe benefits tax (FBT) liabilities

© Commonwealth of Australia, 2025 Future Skills Organisation

	according to business plan
2. Provide client service	2.1 Develop and maintain client base to support business plan 2.2 Analyse and determine client expectations in relation to industry standards 2.3 Provide client service that meets client expectations according to enterprise standards 2.4 Monitor and evaluate performance on installations completed against industry standards
3. Perform small business financial management tasks	3.1 Record income and expenditure using bookkeeping tools and software according to normal accounting standards 3.2 Construct small business financial balance sheet using banking records or supply information to accountant according to normal accounting standards 3.3 Calculate small business taxation and superannuation requirements or supply information to accountant according to normal accounting standards 3.4 Complete a business activity statement (BAS) or supply data to accountant according to normal accounting standards
4. Cost and quote installation	4.1 Establish extent of work to be completed through professional and personable discussions with client 4.2 Complete job specification for quote with cost estimates of time required to complete work 4.3 Estimate and include cost of materials using supplier quoted prices 4.4 Determine and include margin for profit and ongoing costs for installation according to business plan 4.5 Check finalised quote for accuracy 4.6 Submit quote to client within agreed timeframe

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	**Performance Criteria**	**Description**
Reading	1.1-1.4, 2.2, 2.4,	• Evaluates and integrates facts and ideas to construct meaning from a prescribed and limited

© Commonwealth of Australia, 2025 Future Skills Organisation

	3.4, 4.3, 4.5	range of text types, including relevant regulatory, taxation and insurance information
Writing	1.1, 2.1, 2.3, 2.4, 3.4, 4.2, 4.6	• Conveys intended meaning on familiar topics for a limited range of purposes and audiences
Oral Communication	2.3, 2.4, 4.1	• Selects and uses appropriate strategies to establish and maintain spoken communication in familiar and some unfamiliar contexts, particularly in relation to clients, employees and government officers
Numeracy	1.1, 1.3, 1.4, 2.2, 2.4, 3.1-3.4, 4.1-4.6	• Selects from and uses a variety of mathematical and problem solving strategies in a range of familiar and some less familiar contexts, including preparation of quotes and calculation of profit margins • Extracts and evaluates the mathematical information embedded in a range of tasks and texts, including interpretation of financial information
Navigate the world of work	1.2, 2.3	• Takes personal responsibility for adherence to legal and regulatory responsibilities relevant to business registration • Recognises and follows protocols in relation to enterprise standards and meets client expectations associated with role
Get the work done	1.1, 1.3, 1.4, 2.1-2.4, 3.1, 3.2, 4.1	• Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context to develop a business plan • Implements actions as per plan, making slight adjustments if necessary, and addressing some unexpected issues • Makes a range of critical and non-critical decisions in relation to mitigating liabilities and providing client service, taking a range of constraints into account • Uses analytical processes to decide on a course of action, establishing criteria for deciding between options when developing client solutions • Uses a broad range of features within bookkeeping tools and applications to improve personal productivity, optimising software functions for specific purposes

Assessment Requirements for ICTSMB401 Set up and operate a contractor business

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- produce a business plan and set up a business
- define and meet client needs
- perform simple financial management tasks including maintaining simple financial records, and completing business activity statement (BAS), fringe benefits tax (FBT) and insurance documentation
- quote for installation jobs that cover all aspects of costing.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- specify business registration and licensing requirements
- identify and describe Commonwealth, state, territory and local government legislative requirements relating to business operations including:
  - anti-discrimination
  - environmental issues
  - equal employment opportunity
  - industrial relations
  - work health and safety (WHS)
  - taxation requirements
- analyse costs associated with running a business
- identify the current tax rates
- identify relevant industry codes of practice and evaluate their impact on the business
- identify relevant industry standards in relation to:

© Commonwealth of Australia, 2025 Future Skills Organisation

  - materials and labour costs
  - rates of pay
- identify common business liabilities
- evaluate several sources of advice and specialist services
- identify sources of information about regulatory, taxation and insurance requirements and issues.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – small and micro business field of work and include access to:

- Australian Taxation Office guides
- industry standards labour rates
- general office bookkeeping procedures
- client service guides
- material suppliers
- financial management record keeping software.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTSMB402 Operate a contractor business with employees

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes skills and knowledge required to operate a contracting business in a competitive installation environment. This includes recruiting and managing employees as well as promoting the business and maintaining business compliance.

It applies to individuals who operate or are establishing an installation business employing support staff or installers. It may also apply to a business that uses subcontractors.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Unit Sector

Telecommunications – small and micro business

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Recruit employees	1.1 Define and document employee roles 1.2 Locate and tap sources of employees 1.3 Evaluate and select candidates for employment based on documented employee roles

© Commonwealth of Australia, 2025 Future Skills Organisation

	1.4 Provide induction to employees
2. Manage employees	2.1 Assign work to employees in line with employee roles 2.2 Develop strategy for retention of employees with rewards and incentives 2.3 Apply payroll operation 2.4 Maintain and manage employee on-costs using manual or computer based system 2.5 Monitor and evaluate employee performance against business policies and standards
3. Promote the business	3.1 Identify growth opportunities for the business 3.2 Design and develop advertising material to stimulate growth of the business, including evaluating process for establishing website 3.3 Research availability of network to promote the business
4. Maintain compliance	4.1 Research and identify compliance requirements for the business 4.2 Develop and implement procedures to ensure compliance 4.3 Implement system to monitor compliance 4.4 Implement actions to improve compliance performance

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	**Performance Criteria**	**Description**
Reading	1.2, 1.3, 2.1, 2.5, 3.1-3.3, 4.1	• Evaluates and integrates facts and ideas to construct meaning from a range of text types
Writing	1.1, 1.4, 2.2, 2.3, 2.5, 3.2, 3.3, 4.1, 4.2	• Communicates relationships between ideas and information in a style appropriate to the audience and purpose including business plans, advertising materials, job descriptions and business procedures
Oral Communication	1.2-1.4, 2.1, 2.5, 4.2-4.4	• Listens to others carefully and critically and demonstrates flexibility in spoken texts by choosing appropriate structures and strategies in a range of contexts such as engagement with clients, employees and contractors

© Commonwealth of Australia, 2025 Future Skills Organisation

Numeracy	2.3, 2.4	• Selects from and uses a variety of mathematical and problem solving strategies in a range of familiar and some less familiar contexts, including checking financial information
Get the work done	1.4, 2,1, 2.5, 3.1, 3.2, 4.2-4.4	• Uses a formal decision making process when selecting staff and monitoring their performance, setting or clarifying goals, gathering information, and identifying and evaluating several choices against a limited set of criteria • Uses analytical processes to decide on a course of action, establishing criteria for deciding between options in relation to identifying growth opportunities • Understands and explicitly applies some basic principles of analytical and lateral thinking when developing promotional material and developing and implementing a compliance system • Accepts responsibility for planning and sequencing complex tasks and workload, negotiating key aspects with others and taking into account capabilities, efficiencies and effectiveness • Makes critical decisions quickly and intuitively in complex situations, taking into consideration a range of variables including the outcomes of previous decisions • Applies systematic and analytical decision making processes for complex and non-routine situations

Assessment Requirements for ICTSMB402 Operate a contractor business with employees

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- recruit employees and document roles
- maintain payroll management records
- allocate work and supervise employees
- identify business growth opportunities
- develop promotional materials
- identify business compliance requirements
- develop compliance processes
- monitor compliance

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- interpret Commonwealth, state, territory and local government legislative requirements relating to contract business operation, including those relating to:
  - anti-discrimination
  - the environment
  - equal employment opportunity
  - industrial relations
  - work health and safety (WHS)
- outline and evaluate the common methods of marketing relevant to a contractor business
- identify and interpret compliance requirements within the limits of an installation service business
- identify sources of advice and specialist services.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – small and micro business field of work and include access to:

- resources and references, including Australian Taxation Office guides, human resource texts, recruitment guides and compliance legislation codes and practices
- performance management tools
- financial management record-keeping software.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTSUS402 Install and test power saving hardware

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to install and test power saving components in servers, motherboards and other networking equipment.

It applies to individuals in the information and communications technology (ICT) industry who operate with a degree of autonomy, but who may also supervise the work of others when necessary.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – sustainability

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan to install and test power saving hardware	1.1 Arrange access to site according to required procedure 1.2 Assess extent of system implementation using feasibility report and organisational guidelines 1.3 Produce report to meet client and organisational requirements

© Commonwealth of Australia, 2025 Future Skills Organisation

	1.4 Liaise with appropriate person to obtain approval for plans with recommendations 1.5 Determine and source power saving hardware components according to agreed plan
2. Install, test and evaluate power saving hardware	2.1 Install and configure components according to work health and safety (WHS) and environmental requirements, plan, and manufacturer's and industry standards 2.2 Resolve identified problems 2.3 Test and enhance system performance to meet organisational requirements
3. Complete documentation and clean up worksite	3.1 Produce evaluation report on actual cost and benefits of implementing power saving hardware in organisation 3.2 Provide support manual for client 3.3 Record all test results and records for client 3.4 Restore any changes made to worksite to client's satisfaction and obtain sign off

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	**Performance Criteria**	**Description**
Reading	1.1, 1.2, 1.5, 2.1, 2.3	• Identifies, analyses and evaluates complex text to determine legislative, regulatory, technical and business requirements, and to confirm requirements
Writing	1.3, 1.4, 3.1-3.3	• Prepares reports, design solutions and recommendations that convey an understanding of outcomes and alternatives, and uses terminology appropriate to present to relevant personnel
Oral Communication	1.4	• Articulates clearly using specific language suitable for technical, operational and business audiences to convey requirements • Uses listening and questioning techniques to confirm understanding
Numeracy	3.1	• Analyses numerical information to assess cost

© Commonwealth of Australia, 2025 Future Skills Organisation

		and benefits of power saving hardware
Navigate the world of work	1.1, 1.2, 2.1, 2.3	• Recognises and responds to both explicit and implicit organisational procedures and protocols, and legislative and regulatory requirements
Interact with others	3.4	• Selects appropriate communication protocols in a range of work contexts
Get the work done	1.1, 1.5, 2.1-2.3	• Develops plans for complex activities with strategic implications • Systematically gathers and analyses all relevant information and evaluates options to make informed decisions • Uses a range of digitally based technology and applications to access and filter data, and extract, organise, integrate and share relevant information in effective ways • Recognises and takes responsibility for addressing predictable and some less predictable problems in familiar work contexts

Unit Mapping Information

Assessment Requirements for ICTSUS402 Install and test power saving hardware

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- determine and meet client requirements for installation and testing of power saving hardware
- plan and connect the hardware components according to vendor and technical specifications.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe systems diagnostic features
- outline business processes
- summarise client business domain, business function and organisation
- discuss compatibility issues and resolution procedures
- describe the process of configuration of internet protocol (IP) networks
- identify current industry accepted hardware products
- describe the major components of client and business liaison
- explain how to document technical specifications
- discuss linkage between processes
- identify set up and configuration procedures
- outline technologies such as:
  - areas of the hardware relevant to configuration and testing
  - installation procedures
  - power saving hardware functionality

© Commonwealth of Australia, 2025 Future Skills Organisation

- explain vendor specifications and requirements for component installation.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – sustainability field of work and include access to:

- a site on which energy saving solutions can be implemented
- power saving hardware currently used in industry
- relevant documentation, feasibility studies, equipment manuals and other site-related documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for ICTSUS403 Install and test power management software

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- clarify and meet client requirements for installation and testing of power management software
- plan and connect the software components according to vendor and technical specifications across a variety of situations.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify areas of the hardware relevant to configuration and testing
- explain current industry-accepted software products, with general features and capabilities
- summarise appropriate installation procedures
- outline work health and safety (WHS) requirements in relation to work safety, environmental factors and ergonomic considerations
- explain power saving software functionality
- describe set up and configuration procedures
- discuss systems diagnostic features
- explain vendor specifications and requirements for component installation.

ICTSUS404 Install thin client applications for power over ethernet

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to set up energy and cost efficient installations to meet sustainability targets by remotely feeding power over ethernet (PoE).

It applies to individuals with a range of telecommunication skills who install and configure thin client applications to enable PoE on a low powered workstation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – sustainability

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan to install thin client applications	1.1 Assess extent of applications to be implemented using feasibility report and organisational guidelines 1.2 Highlight issues associated with adoption of Web 2.0 applications 1.3 Produce implementation plan and present to client 1.4 Liaise with appropriate person to obtain approval for plans with any

© Commonwealth of Australia, 2025 Future Skills Organisation

	recommendations 1.5 Notify client for site access
2. Evaluate appropriate applications	2.1 Develop criteria for Web 2.0 applications to satisfy enterprise needs 2.2 Test and evaluate Web 2.0 applications according to agreed criteria 2.3 Present findings to client with recommendations on Web 2.0 applications
3. Install hardware components and applications	3.1 Follow work health and safety (WHS) and environmental requirements according to plan and manufacturer's specifications 3.2 Develop implementation plans with prioritised tasks and contingency arrangements for minimum disruption to client 3.3 Install hardware components and thin client software needed for work according to network and organisational requirements 3.4 Bench test performance of applications 3.5 Resolve identified problems
4. Complete work and document activities	4.1 Document installation and integration process according to organisational guidelines 4.2 Provide user documentation 4.3 Notify client and obtain sign off

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	**Performance Criteria**	**Description**
Reading	1.1, 2.2, 3.1, 3.3, 4.1	• Identifies, analyses and evaluates technical installation manuals and other text to determine regulatory and technical requirements
Writing	1.3, 1.5, 2.1, 2.3, 3.2, 4.1-4.3	• Prepares reports and design solutions in required formats that convey an understanding of outcomes and alternatives and uses terminology appropriate to present to relevant personnel
Oral Communication	1.3-1.5, 2.3, 4.3	• Articulates clearly using specific language suitable for technical, operational and business audiences to convey requirements • Uses listening and questioning techniques to

© Commonwealth of Australia, 2025 Future Skills Organisation

		confirm understanding
Navigate the world of work	1.1, 3.1, 3.3, 4.1	• Recognises and responds to both explicit and implicit organisational procedures and protocols, and legislative and regulatory requirements
Interact with others	2.3, 4.3	• Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role
Get the work done	1.1, 1.2, 2.1, 2.2, 3.3-3.5	• Develops plans to manage relatively complex, non-routine tasks with an awareness of how they may contribute to longer term operational and strategic goals • Takes responsibility for own workload, negotiating some key aspects with others • Systematically gathers and analyses all relevant information and evaluates options to make informed decisions • Understands key principles and concepts underpinning the design and operation of digital systems and tools, and applies these when troubleshooting existing technology and when seeking to understand the potential of new technology • Recognises and takes responsibility for addressing predictable and some less predictable problems in familiar work contexts

Assessment Requirements for ICTSUS404 Install thin client applications for power over ethernet

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- determine and meet client requirements for thin client applications
- install and configure components according to vendor and technical specifications.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline why businesses use thin technologies
- explain client business domain, business function and organisation
- summarise compatibility issues and resolution procedures
- explain the configuration of internet protocol (IP) networks
- discuss the importance of client and business liaison
- explain how to document technical specifications
- summarise linkage between processes
- explain set up and configuration procedures
- discuss systems diagnostic features
- explain Web 2.0 including:
  - applications and functionality
  - areas of the Web 2.0 relevant to configuration and testing
  - current industry accepted Web 2.0 products
  - vendor specifications and requirements for Web 2.0 applications
  - Web 2.0 application procedures.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – sustainability field of work and include access to:

- a site on which remote power feeding applications can be implemented
- relevant documentation, feasibility studies and equipment manuals.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTSUS501 Implement server virtualisation for a sustainable ICT system

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to install and integrate a virtual server in a network to replace multiple physical servers, reducing power requirements of individual servers and meeting sustainability targets.

It applies to individuals with a high level of specialist technical skills and knowledge in telecommunications and information and communications technology (ICT) networks using internet protocol (IP) systems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – sustainability

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan to implement server virtualisation	1.1 Assess extent of virtualisation to be implemented using feasibility report and organisational guidelines 1.2 Analyse existing server infrastructure use 1.3 Research and analyse alternative virtualisation scenarios, including

© Commonwealth of Australia, 2025 Future Skills Organisation

	risk analysis and relative comparisons of each consideration 1.4 Provide brief report to appropriate person of proposed preferred plan and describe resources required 1.5 Liaise with appropriate person to obtain approval for plans with any recommendations
2. Design virtual server specification	2.1 Confirm network operating system, server applications and server design with client 2.2 Determine product and vendor architecture and equipment specifications 2.3 Determine technology and resources within business requirements and budget
3. Install virtual server	3.1 Follow work health and safety (WHS) and environmental requirements according to plan and manufacturer's specifications 3.2 Notify client for site access 3.3 Create detailed task list specifying stages and sequence of work required 3.4 Review hardware and software to ensure compatibility 3.5 Install required operating system, additional tools or third party software as specified in design 3.6 Patch operating system and applications to ensure maximum security and reliability
4. Integrate and test virtual server	4.1 Determine tests to ensure virtual server integration 4.2 Develop test plan, referring to resources and network impact 4.3 Run system tests according to test plan and record outcomes 4.4 Analyse error report and make changes as required 4.5 Test required changes or additions 4.6 Validate changes or additions against specifications
5. Complete work and document activities	5.1 Document installation and integration process according to organisational guidelines 5.2 Provide user documentation 5.3 Notify client and obtain sign off

© Commonwealth of Australia, 2025 Future Skills Organisation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3, 3.5, 4.3, 4.6, 5.1	• Identifies, analyses and evaluates technical installation manuals and other text to determine regulatory and technical requirements
Writing	1.4, 1.5, 2.1, 3.2, 3.3, 4.2, 4.3, 5.1-5.3	• Prepares reports and design solutions in required formats for diverse audiences that convey an understanding of outcomes and alternatives, and uses terminology appropriate to present to relevant personnel
Oral Communication	1.5, 2.1, 3.2, 5.3	• Articulates clearly using specific language suitable for technical, operational and business audiences to convey requirements • Uses listening and questioning techniques to confirm understanding
Numeracy	2.3	• Calculates equipment costs with reference to budgetary constraints
Navigate the world of work	1.1, 3.1	• Recognises and responds to both explicit and implicit organisational procedures and protocols, and legislative and regulatory requirements, with specific reference to safety
Interact with others	5.3	• Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role
Get the work done	1.1-1.3, 2.2, 2.3, 3.3-3.6, 4.1-4.6	• Develops plans to manage relatively complex, non-routine tasks with an awareness of how they may contribute to longer term operational and strategic goals • Takes responsibility for own workload, negotiating some key aspects with others • Systematically gathers and analyses all relevant information and evaluates options to make informed decisions • Understands key principles and concepts underpinning the design and operation of digital systems and tools, and applies these when troubleshooting existing technology and when seeking to understand the potential of new technology • Uses analytical processes to decide on a course of

Assessment Requirements for ICTSUS501 Implement server virtualisation for a sustainable ICT system

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- communicate with clients for business purposes
- determine and meet client requirements for installation and testing a virtual server
- install, integrate and test virtualisation components according to vendor and technical specifications.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain client business domain, business function and organisation
- summarise compatibility issues and resolution procedures
- describe configuration of internet protocol (IP) networks
- identify current industry-accepted products
- describe the process of documenting technical specifications
- outline linkage between processes
- discuss systems diagnostic features
- summarise the following technologies:
  - power supply requirements and management
  - registered random access memory (RAM)
  - server design and network architecture
  - set up and configuration procedures
  - single and multiple processors
  - vendor specifications and requirements for software installation

© Commonwealth of Australia, 2025 Future Skills Organisation

- virtual server functionality.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – sustainability field of work and include access to:

- a site and equipment on which servers can be virtualised
- server virtualisation currently used in industry
- relevant documentation, feasibility studies, equipment manuals and other site-related documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTSUS601 Integrate sustainability in ICT planning and design projects

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to integrate sustainability concepts and policies into information and communications technology (ICT) planning and design projects. These projects typically involve upgrades of equipment hardware and software or new installations of next generation networks (NGN) using emerging technologies.

It applies to individuals who have high level specialist technical skills and knowledge in optical communications and IT networks using internet protocol (IP) systems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – sustainability

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to integrate sustainability into planning and	1.1 Evaluate suitable ICT projects into which sustainability can be integrated 1.2 Negotiate with stakeholders to establish extent to which

© Commonwealth of Australia, 2025 Future Skills Organisation

design stages of ICT project	sustainability is to be integrated 1.3 Research and identify suitable technology solutions applicable to project 1.4 Gather power consumption data on ICT equipment required for energy audit based on agreed standard
2. Devise strategies for incorporating sustainability into ICT project	2.1 Determine and oversee implementation of short term technology solutions to achieve reduction of power consumption 2.2 Initiate and progress sustainable management principles that result in reduced environmental impact 2.3 Establish, regularly review and improve key performance indicators (KPI) on sustainability performance 2.4 Incorporate innovative planning and design rules for ICT projects that foster sustainability and environmental best practice
3. Analyse energy audit data	3.1 Identify energy usage within scope of ICT project and provide detailed report 3.2 Estimate potential energy savings and payback periods for recommended actions 3.3 Estimate carbon dioxide (CO^2) emissions for nominated project 3.4 Evaluate estimated CO^2 emissions with comparable benchmarks 3.5 Make recommendations in order of priority and give estimates of implementation costs on integration of sustainability for other ICT projects

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	**Performance Criteria**	**Description**
Reading	1.4, 2.3	• Gathers, interprets and analyses a range of complex textual information from a range of sources and identifies relevant and key information
Writing	1.2, 3.1, 3.5	• Records technical requirements and procedures for diverse audiences using precise language and specialised terminology to convey an understanding of outcomes and alternatives

© Commonwealth of Australia, 2025 Future Skills Organisation

Oral Communication	1.1, 1.2	• Clearly articulates and validates policy and strategy benefits for project requirements using specific language suitable for different audiences to convey requirements • Uses listening and questioning techniques to confirm understanding • Effectively negotiates contracts with suppliers
Numeracy	2.3, 3.1-3.5	• Uses complex mathematical formulae to estimate CO^2 emissions, analyse and confirm capacity requirements and plan budgetary and workforce needs
Get the work done	1.1, 1.3, 1.4, 2.1, 2.3, 2.4, 3.1-3.3, 3.5	• Develops plans to manage relatively complex, non-routine tasks with an awareness of how they may contribute to longer term operational and strategic goals • Takes responsibility for own workload, negotiating some key aspects with others • Systematically gathers and analyses all relevant information and evaluates options to make informed decisions • Reflects on the ways in which digital systems and tools are used or could be used to achieve work goals, and recognises strategic and operational applications • Uses analytical processes to decide on a course of action, establishing criteria for deciding between options

Assessment Requirements for ICTSUS601 Integrate sustainability in ICT planning and design projects

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- plan and integrate sustainability into information and communications technology (ICT) projects by devising strategies to conserve resources
- analyse energy audit data on enterprise resource consumption
- develop and monitor policies for review and improvements, benchmarking against industry best practice and attempting new approaches continuously over time.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss best practice approaches relevant to own work area
- explain environmental or sustainability legislation, regulations and codes of practice applicable to the industry and organisation
- discuss and explain work health and safety (WHS) implications for new policy
- explain how to estimate CO^2 emissions
- summarise ICT power consumption calculations
- discuss policy development processes and practices
- summarise power consumption audit methodology
- identify principles, practices and available tools and techniques of sustainability management relevant to the telecommunications industry
- describe quality assurance systems relevant to own organisation
- summarise systems and procedures to aid in the achievement of workplace sustainability.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – sustainability field of work and include access to:

- sites on which planning, design and integration of sustainability may be carried out
- relevant legislation, standards, guidelines, reports and equipment specifications and drawings
- a range of workplace documentation, personnel, information and resources including:
  - compliance obligations
  - organisational plans.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTSUS602 Establish a business case for sustainability and competitive advantage in ICT projects

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to seek business advantages by developing innovative and sustainable solutions in information and communications technology (ICT) project plans.

It applies to individuals who prepare planning, cost-benefit analysis and return on investment for the implementation of sustainable schemes at the enterprise level and who work with high-level specialist training skills and knowledge in optical telecommunications and IT networks using internet protocol (IP) systems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – sustainability

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare information for establishing a	1.1 Evaluate proposed ICT project to determine scope and potential of sustainability integration

Assessment Requirements for ICTSUS602 Establish a business case for sustainability and competitive advantage in ICT projects

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- demonstrate a measurable improvement of a business through the implementation of a chosen strategy using benchmark indicators
- communicate effectively with stakeholders on approaches to sustainability improvements, development and implementation, and contribute to resolution of disputes among stakeholders
- use software systems for recording and filing documentation, measuring current usage, and interpreting all visual data and information
- identify improvements and benchmarks against industry best practice by continuously reviewing and improving policies over time.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise best practice approaches relevant to sustainability
- discuss environmental and sustainability legislation, regulations and codes of practice applicable to the industry and organisation
- describe equal employment opportunity, equity and diversity principles and work health and safety (WHS) implications of policy being developed
- explain policy development processes and practices
- outline principles, practices and available tools and techniques of sustainability management relevant to the information and communications technology (ICT) industry
- elucidate quality assurance systems relevant to own organisation
- discuss relevant industry competency

© Commonwealth of Australia, 2025 Future Skills Organisation

- evaluate relevant organisational policies, procedures and protocols as they relate to sustainability
- summarise relevant systems and procedures to aid in the achievement of workplace sustainability
- explain how to calculate ICT power consumption
- discuss energy consumption and energy audit methodology
- summarise the environmental impacts of products, processes, systems and services.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – sustainability field of work and include access to:

- sites on which preparation of a business case for introducing or improving sustainability in an ICT project may be carried out
- relevant legislation, standards, guidelines, reports, and equipment specifications and drawings
- a range of workplace documentation and personnel information and resources, such as compliance obligations, organisational plans and work responsibilities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTSUS804 Use ICT to improve sustainability outcomes

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to use ICT tools and technologies to improve sustainability outcomes for a range of industries through monitoring and reporting on greenhouse gas emissions.

It applies to individuals with a high level of autonomy who are excellent communicators with telecommunications and systems skills and management abilities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Sustainability

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Design and manage a sustainability audit	1.1 Use audit tool that reflects criteria of benchmark, nature of risks, relevant information and data types, evaluation of performance and legislative requirements 1.2 Define scope, objectives and benchmarks for audit in consultation with relevant stakeholders 1.3 Document requirements for audit resources, timing, schedule and responsibilities consistent with industry best practice and

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	relevant standards 1.4 Ensure collection strategies are objective and systematic, and that information and data is valid and reliable 1.5 Report outcomes clearly and concisely, including benefits to be achieved by adoption of audit recommendations
2. Monitor energy consumption and emissions	2.1 Analyse requirements of National Greenhouse and Energy Reporting System (NGERS) and other relevant legislation and industry standards in relation to a range of industries and needs of specific organisations 2.2 Identify links with functional areas and environmental management systems to ensure comprehensive information and data collection 2.3 Determine hardware and software required for collecting, collating, analysing and reporting emissions-related information and data 2.4 Factor requirement for an external audit into the monitoring proposal 2.5 Critically evaluate energy consumption and emissions data 2.6 Develop improvement strategies based on review of data 2.7 Use industry best practice as quality benchmark
3. Develop ICT solutions to improve sustainability outcomes	3.1 Research and analyse mitigation and adaptation strategies appropriate for a range of industries 3.2 Benchmark and document performance expectations in consultation with relevant stakeholders 3.3 Develop and document technical specifications including hardware, software, networking, interface and security and hazard management requirements 3.4 Determine timelines, resources and costs for implementation and ongoing monitoring and maintenance 3.5 Analyse impact of ICT solution in relation to performance benchmarks 3.6 Analyse opportunities and develop recommendations to improve sustainability of enterprise products, services and processes 3.7 Present report for client sign-off

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 2.1, 2.2, 2.5-2.7, 3.3	• Identifies, analyses and evaluates complex textual information to inform sustainability solutions
Writing	1.2, 1.3, 1.5, 2.4, 2.6, 3.2, 3.3, 3.6, 3.7	• Produces detailed reports and related documentation and develops recommendations using precise language and specialised terminology to convey understanding of outcomes
Oral Communication	1.2, 1.5, 3.2, 3.7	• Articulates clearly using specific language suitable to client and stakeholder audiences to convey requirements, and uses listening and questioning techniques to confirm understanding
Numeracy	1.1, 2.5, 3.4	• Uses mathematical formulae to plan budgetary requirements and evaluate timelines for solution implementation and ongoing monitoring requirements • Interprets complex energy consumption and emissions data to identify workplace improvements
Navigate the world of work	1.1, 1.3, 2.1	• Recognises and responds to both explicit and implicit organisational procedures and protocols and legislative/regulatory requirements
Get the work done	1.1-1.4, 2.2, 2.3	• Develops flexible plans for complex, high impact activities with strategic implications involving diverse stakeholders with potentially competing demands • Takes responsibility for defining key aspects of own workload, balancing own needs and priorities with those of the work group • Systematically gathers and analyses all relevant information and evaluates options to make high-impact and informed decisions • Considers strategic and operational potential of digital trends to achieve work goals, enhance work processes, create opportunities and reduce risks

Assessment Requirements for ICTSUS804 Use ICT to improve sustainability outcomes

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- audit and critically analyse patterns of energy use
- develop monitoring and reporting systems that comply with regulatory requirements
- develop a workable implementation strategy
- formulate solutions to improve sustainability outcomes
- develop benchmarks for reviewing and improving performance.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain auditing sustainability processes and practices
- discuss corporate social responsibility
- describe development processes and practices
- clarify hazard identification and control
- explain industry standards
- discuss the legislative framework underpinning sustainability
- summarise principles, practices and available tools and techniques of sustainability management relevant to a range of industries
- outline relevant international business and organisational standards
- discuss sustainability from a local, national and international perspective
- summarise sustainability including ecological, economic and social issues
- discuss technical performance measurements.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the Telecommunications – Sustainability industry and include access to:

- relevant reports, legislation, regulations and standards
- suitable hardware, software, resources and equipment
- internet connection with suitable bandwidth
- relevant documentation including manufacturers' technical specifications.

Assessors must satisfy NVR/AQTF assessor requirements.

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to improve energy conservation and energy efficiency in information and communications technology (ICT) operations and to encourage changing user behaviour.

It applies to individuals who work in a managerial capacity with a high degree of autonomy and high level of responsibility with excellent communication skills, high level technical management abilities and a broad knowledge of the design of system networks. In this role, individuals research and analyse network management databases, plan changes, diagnose and fix network problems, and report outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – sustainability

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Critically analyse organisation's	1.1 Audit and assess level and type of use across range of ICT devices, infrastructure and software 1.2 Audit and establish baselines of ICT energy consumption and other

© Commonwealth of Australia, 2025 Future Skills Organisation

ICT assets energy footprint	elements contributing to organisation's carbon footprint 1.3 Assess ICT usage in relation to its contribution to organisation's business goals and priorities 1.4 Determine critical issues for organisation relevant to ICT usage and carbon footprint 1.5 Assess current ICT usage in relation to sustainable asset management 1.6 Apply industry best practice where appropriate
2. Develop ICT sustainability strategies and policy	2.1 Include goals for reduction of sustainability impacts and equipment life cycle management approaches in organisational policy 2.2 Check policy scope is consistent with industry standards and benchmarks, and amend where necessary 2.3 Ensure policy reflects organisation's commitment to sustainability as integral part of business planning and business opportunity 2.4 Consult with stakeholders as integral part of policy development, implementation and review processes 2.5 Recommend policy options based on effectiveness, timeframes and cost 2.6 Develop and produce strategies for implementation, monitoring, review and audit as part of policy documentation
3. Formulate technical and behavioural solutions to improve ICT sustainability	3.1 Determine and document hardware, software, network and interface requirements of solutions 3.2 Develop strategies to improve sustainability outcomes, including energy efficiency and alternative energy sources 3.3 Develop guidelines for improving sustainability through asset management 3.4 Document requirements, resource allocations, training needs, hazard controls and implementation timelines for selected strategies, and obtain sign off from relevant stakeholders
4. Monitor and evaluate sustainability data	4.1 Develop criteria for measuring performance improvement 4.2 Identify trends that may indicate need for remedial action and use to promote continuous improvement of performance 4.3 Modify policy and technical solutions in response to data analysis, to ensure improvements are made 4.4 Determine scope, frequency and method of monitoring and reporting in consultation with stakeholders 4.5 Review data to ensure compliance with management of sustainability and legislative requirements 4.6 Document findings and present to stakeholders

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.4, 2.2, 2.3, 2.6, 3.2, 4.2, 4.3, 4.5	• Identifies, analyses and evaluates complex textual information from a range of sources and identifies relevant and key information
Writing	1.2, 2.1, 2.4-2.6, 3.1-3.4, 4.1, 4.3, 4.4, 4.6	• Produces detailed well-structured reports and related documentation, and develops recommendations using precise language and specialised terminology to convey an understanding of outcomes
Oral Communication	2.4, 3.4, 4.4, 4.6	• Articulates clearly using specific language suitable for clients and stakeholder audiences to convey requirements • Uses listening and questioning techniques to confirm understanding
Numeracy	2.5, 3.4	• Uses mathematical formulae to determine resource requirements and evaluate workable timelines
Navigate the world of work	2.1-2.3, 4.5	• Recognises and responds to both explicit and implicit organisational procedures and protocols, and legislative and regulatory requirements
Interact with others	4.6	• Demonstrates sophisticated control over oral, visual and/or written formats, drawing on a diverse range of communication practices to achieve goals
Get the work done	1.1-1.6, 2.1, 2.6, 3.1-3.4, 4.1-4.3	• Develops flexible plans for complex, high impact activities, with strategic implications that involve a diverse range of stakeholders with potentially competing demands • Takes responsibility for defining key aspects of own workload, balancing own needs and priorities with those of the work group • Systematically gathers and analyses all relevant information and evaluates options to make high-impact and informed decisions • Considers the strategic and operational potential of digital trends to achieve work goals, enhance work processes, create opportunities and reduce risks • Uses formal analytical and lateral thinking techniques for identifying issues, and generating and

Assessment Requirements for ICTSUS805 Manage improvements in ICT sustainability

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- analyse patterns of information and communications technology (ICT) use
- develop policy that complies with regulatory requirements
- develop a workable implementation strategy
- formulate solutions to reduce ICT based emissions
- develop measurable criteria for reviewing improvement.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss energy efficiency and alternative energy sources
- assess the risks, hazards and controls associated with sustainable improvements in ICT
- outline industry standards
- explain the following aspects of IT:
  - hardware
  - interfacing
  - networking
  - software
- describe the legislative framework underpinning sustainability
- explain policy development processes and practices
- summarise principles, practices and available tools and techniques of sustainability management in the ICT industry
- outline relevant International Organization for Standardization (ISO) standards

© Commonwealth of Australia, 2025 Future Skills Organisation

- discuss sustainability from a local, national and international perspective
- summarise sustainability including ecological, economic and social issues.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – sustainability field of work and include access to:

- relevant government and scientific reports
- conference papers
- vendor white papers
- resources, tools and networking equipment
- suitable hardware and software
- suitable bandwidth for internet connections
- relevant legislation and regulations
- manufacturers' technical specifications
- relevant ISO standards.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTSUS806 Lead applied research in ICT sustainability

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to plan, conduct and report on applied research to influence strategic practices on information and communications technology (ICT) sustainability and outcomes within an organisational context. The unit also covers constructing an applied research strategy, using a range of applied research techniques, and analysing and presenting findings.

It applies to individuals who are in a leadership capacity and excellent innovators and communicators, with a very high level of technical management skills and knowledge of telecommunications networks and systems. In this role, individuals must be able to undertake detailed research, analysis and evaluation. Outcomes and solutions must be presented with clarity.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – sustainability

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Provide	1.1 Provide vision for applied research strategy to meet sustainability

direction for development of applied research strategy for ICT sustainability	requirements of identified research purpose 1.2 Clarify and confirm applied research purpose and needs of target group 1.3 Facilitate development of policies and procedures in relation to conducting applied research for enterprise 1.4 Guide development of mechanisms for collecting and maintaining data in systematic manner 1.5 Review factors affecting reliability and validity of data 1.6 Review relevant research ethics and codes of conduct
2. Control use of range of applied research techniques and resources	2.1 Review and evaluate range of applied research methods and theories, and data collection techniques 2.2 Guide selection of appropriate methods to gather and analyse data on sustainability relevant to research project 2.3 Authorise access to appropriate sources of information relevant to research project 2.4 Select sustainable management principles that will have most sustainable impact on project 2.5 Ensure relevance of research through integrity of data collected and analysis tools used
3. Promote findings	3.1 Ensure accuracy of data and research details, and adherence to any legal requirements 3.2 Evaluate relevance of collated and analysed data against original applied research strategy 3.3 Evaluate impact of findings 3.4 Recommend implementation strategies 3.5 Ensure documentation and presentation of research findings is in clear and logical manner consistent with audience needs 3.6 Identify need for and appropriate approach to further research 3.7 Promote research findings and approach to further research

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.5, 1.6, 2.1-2.3, 2.5, 3.1-3.3	• Identifies, analyses and evaluates complex information and formal documentation, including legislative frameworks and technical solutions
Writing	1.2, 2.3, 3.4, 3.5, 3.7	• Produces complex, detailed and well-structured reports, procedures and related technical documentation using specific language and specialised terminology to convey an understanding of outcomes
Oral Communication	1.2, 2.3, 3.4, 3.5, 3.7	• Articulates clearly and creatively, using specific language suitable for clients and stakeholder audiences to convey requirements • Uses listening and questioning techniques to confirm understanding
Numeracy	1.4, 1.5, 2.2, 3.2	• Uses mathematical formulae to determine CO^2 emissions and carbon footprint • Performs complex statistical analysis
Navigate the world of work	1.6, 3.1	• Recognises and responds to both explicit and implicit organisational procedures and protocols • Monitors adherence to legal and regulatory rights and responsibilities for self and possibly for others
Get the work done	1.1-1.5, 2.1, 2.2, 2.4, 2.5, 3.1-3.5	• Develops flexible plans for complex, high impact activities with strategic implications that involve a diverse range of stakeholders with potentially competing demands • Takes responsibility for defining key aspects of own workload, balancing own needs and priorities with those of the work group • Systematically gathers and analyses all relevant information and evaluates options to make high-impact and informed decisions • Considers the strategic and operational potential of digital trends to achieve work goals, enhance work processes, create opportunities and reduce risks • Uses a broad range of strategies to store, access and organise virtual information, recognising that design choices will influence what information is

Assessment Requirements for ICTSUS806 Lead applied research in ICT sustainability

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- direct the formulation of a research proposal or plan that includes:
  - specific research questions on sustainability
  - valid population or sample size
  - description of the geographical, cultural, social or institutional context within which the research will be carried out
  - a full description of the data collection methods
  - analysis of the limitations to research design
- manage the design of an applied research project using appropriate tools and techniques
- design a research report with analysis of data, and valid and reliable findings
- evaluate relevance of the research results
- conduct research using recognised research techniques.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise environmental and sustainability legislation, regulations and codes of practice applicable to the industry and organisation
- explain audit methodology on information and communications technology (ICT) energy, waste, product life cycles and CO^2 emissions
- discuss principles, practices and available tools and techniques of sustainability management relevant to the telecommunications industry
- describe communication processes and methods

© Commonwealth of Australia, 2025 Future Skills Organisation

- explain data collection methods
- summarise legislation, regulations, policies, procedures and guidelines relating to handling or storing data, including privacy and freedom of information
- describe presentation techniques
- outline reporting methods
- discuss research ethics and codes of conduct
- summarise research tools and methods
- discuss selection of appropriate applied research techniques
- outline leadership strategies relevant to a research environment.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – sustainability field of work and include access to:

- a research activity that relates to an actual workplace or simulated context and topic
- a range of tools and techniques appropriate to the given situations and research topic.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTSUS807 Conduct and manage a life cycle assessment for sustainability

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to conduct a life cycle assessment (LCA) to investigate and evaluate the human health and environmental impacts arising from the provision of a product, process or service.

It applies to individuals who are excellent communicators with a very high level of technical management skills and knowledge of telecommunications networks and systems. In this role, individuals must be able to undertake detailed research, analysis and evaluation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – sustainability

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Define and scope project goal	1.1 Access appropriate sources of information relevant to LCA project 1.2 Define goal of project 1.3 Specify information needed to inform decision makers

© Commonwealth of Australia, 2025 Future Skills Organisation

	1.4 Determine required level of specificity 1.5 Determine data organisation and display of results 1.6 Define scope of study 1.7 Determine ground rules for performing the work
2. Conduct life cycle inventory (LCI)	2.1 Generate life cycle flow diagram 2.2 Develop data collection plan for LCI 2.3 Collect actual data 2.4 Evaluate and document LCI results
3. Conduct life cycle impact assessment (LCIA)	3.1 Select and define impact categories 3.2 Classify LCI results to impact categories 3.3 Model LCI impacts within impact categories using science based conversion factors 3.4 Normalise potential impacts in ways that can be compared 3.5 Assign impact categories by grouping into one or more sets to facilitate interpretation of results 3.6 Assign weighting factors to emphasise most important potential impacts
4. Interpret and evaluate results from LCI and LCIA and communicate them	4.1 Identify significant issues based on LCI and LCIA 4.2 Evaluate completeness check, consistency check and sensitivity check 4.3 Make recommendations for improving product, process or service life cycle
5. Report results of LCA study	5.1 Document results of LCA study 5.2 Finalise report with conclusion, and make recommendations as a result of LCA study

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	**Performance Criteria**	**Description**
Reading	1.1, 1.2, 2.4, 4.2	• Identifies, analyses and evaluates a range of

Assessment Requirements for ICTSUS807 Conduct and manage a life cycle assessment for sustainability

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- scope and define the goals of a unique life cycle assessment (LCA) for sustainability
- produce a life cycle inventory (LCI) using relevant software and data collection strategies
- use life cycle assessment and other software for researching and interpreting charts, flowcharts, graphs and other visual data and information
- evaluate LCI and life cycle impact assessment (LCIA) results, using completeness, consistency and sensitivity checks
- make best practice recommendations based on the results of the LCA study.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline best practice approaches relevant to own work area
- summarise environmental and sustainability legislation, regulations and codes of practice applicable to the industry and organisation
- outline the need to consider equal opportunity, equity and diversity principles and work health and safety (WHS) when conducting sensitivity checks for policy development
- outline policy development processes and practices
- explain principles, practices and available tools and techniques of sustainability management relevant to the telecommunications industry
- outline quality assurance systems relevant to own organisation
- discuss relevant organisational policies, procedures and protocols
- explain relevant systems and procedures to aid in the achievement of workplace sustainability

© Commonwealth of Australia, 2025 Future Skills Organisation

- explain ICT power consumption calculations
- explain power consumption and energy audit methodology
- discuss estimating CO^2 emissions
- summarise environmental impacts of products, processes, systems and services.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – sustainability field of work and include access to:

- sites on which planning, design and integration of sustainability may be carried out
- relevant legislation, standards, guidelines, reports and equipment specifications and drawings
- a range of workplace documentation and personnel information and resources (such as compliance obligations, organisational plans and work responsibilities).

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTCR201 Use rigging practices and systems on telecommunications network structures

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to perform rigging work during system installations for telecommunications radio structures.

It applies to individuals who are usually highly skilled verbal and non-verbal communicators working in a team environment. They must be appropriately licensed to complete high risk work and be able to safely use all required equipment.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Unit Sector

Telecommunications – telecommunications rigging installation

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare rigging systems	1.1 Prepare for work according to relevant legislation, codes, regulations and standards 1.2 Arrange access to site and confirm client requirements 1.3 Inform appropriate personnel of existing and potential site hazards

© Commonwealth of Australia, 2025 Future Skills Organisation

	1.4 Select tools and safety equipment required for safe rigging practice 1.5 Use rigging systems in telecommunications environment according to specifications 1.6 Identify proposed position of equipment to be mounted on telecommunications radio structures according to specifications and industry practice 1.7 Estimate safe working loads for rigging systems and equipment according to specifications 1.8 Select and inspect rigging equipment to ensure it is fit for purpose according to specifications
2. Set up and carry out rigging work on telecommunications radio structures	2.1 Set up rigging and dogging equipment following safe working practices and procedures according to all relevant work health and safety (WHS) legislation 2.2 Operate rigging equipment and install telecommunications antenna and associated equipment according to specifications 2.3 Use internationally recognised communication signals and protocols with crane drivers and helicopter crews according to the Crane Association Crane Safety Manual for Operators/Users
3. De-rig and complete documentation	3.1 De-rig and lower rigging equipment according to specifications 3.2 Restore site to client expectations following completion of installation according to industry practice 3.3 Complete documentation and notify client for sign off

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	**Performance Criteria**	**Description**
Reading	1.1, 1.5-1.8, 2.1, 2.2, 3.1	• Interprets textual information from relevant sources to identify equipment suitability and adhere to procedures and standards
Writing	3.3	• Legibly completes relevant reports and documentation using clear and technically specific language
Oral	1.2, 1.3, 2.3, 3.3	• Uses listening and questioning skills to confirm understanding for requirements, participates in a

© Commonwealth of Australia, 2025 Future Skills Organisation

Communication		verbal exchange of ideas and solutions, and uses appropriate, detailed and clear language to address key personnel and disseminate information
Numeracy	1.7, 3.1	• Uses mathematical formulae to estimate weights to make equipment adjustments
Navigate the world of work	1.1, 1.3, 1.5-1.8, 2.1-2.3, 3.1, 3.2	• Takes personal responsibility for adherence to legal and regulatory requirements, standards and specifications, and industry practices relevant to a rigging context, and draws attention to any issues that may affect self or others • Recognises and follows explicit and implicit protocols and meets expectations associated with own role in relation to communication signals
Interact with others	2.3, 1.3	• Cooperates with others as part of familiar routine activities, and contributes to specific activities requiring joint responsibility and accountability when reporting site hazards and communicating with crane drivers and helicopter pilots
Get the work done	1.1-1.8, 2.1-2.3, 3.1-3.3	• Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of the rigging context to identify relevant information and risks, and to identify and evaluate alternative strategies and resources • Uses systematic, analytical processes in rigging situations, setting goals, gathering relevant information, and identifying and evaluating options for selection of tools and safety equipment, and selection, positioning and safe loading of rigging equipment • Recognises and addresses some unfamiliar problems of increasing complexity within own scope, recognising when to seek the expertise of others in relation to selection and safe use of tools and equipment, identification of site hazards and site restoration

Assessment Requirements for ICTTCR201 Use rigging practices and systems on telecommunications network structures

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- apply work health and safety (WHS) requirements and work practices associated with rigging
- carry out basic dogging skills
- carry out basic rigging skills
- use specialised hand or power tools and equipment normally used in rigging.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the features and operating requirements of rigging equipment
- explain hypothermia symptoms and methods of prevention and treatment
- discuss licensing and regulatory issues applying to rigging practices and systems on telecommunications radio structures
- summarise knowledge of meteorology and weather prediction
- describe remote-area first aid
- explain:
  - electromagnetic radiation (EMR) safety practices
  - optical fibre-cabling and equipment safety practices
  - personal protective equipment for rigging projects
  - requirements of WHS legislation, relevant regulations, and applicable site and company WHS procedures
  - rigging practices and systems to telecommunications radio structures
  - working-at-heights safety practices.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – telecommunications rigging installation field of work and include access to special purpose tools, equipment and materials.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTCR202 Use operational safety in a telecommunications rigging environment

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to use fall arrest, fall guarding and fall restraint when working at heights in a telecommunications rigging environment for standard telecommunications structures.

It applies to individuals who are usually highly skilled communicators working in a team environment. They must be appropriately licensed to complete high-risk work and be able to safely use all required equipment.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Unit Sector

Telecommunications – telecommunications rigging installation

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to use operational safety in telecommunications	1.1 Prepare for given work according to relevant legislation, codes, regulations and standards, and applicable to fall arrest, fall guarding and fall restraint systems

© Commonwealth of Australia, 2025 Future Skills Organisation

rigging environment	1.2 Select tools and safety equipment required for safe rigging practice
2. Assess hazards associated with wearing safety equipment	2.1 Inform appropriate personnel of potential faults and non-compliances in personal equipment 2.2 Inform appropriate personnel of primary hazards associated with use of safety harness and associated equipment and control strategies
3. Check and fit safety harness	3.1 Use correct safety harness fitting method 3.2 Confirm that lanyard is appropriate for task and check lanyard and harness for faults according to manufacturer's specifications and workplace procedures 3.3 Fit safety harness according to manufacturer's instructions
4. Use a safety harness in telecommunications environment	4.1 Minimise risks to self and others while using safety harness and lanyards using identified safety principles associated with effective fall arrest, fall guarding and fall restraint systems 4.2 Confirm safety of possible hook-on points and select optimum hook-on points 4.3 Attach and detach lanyards in safe manner to and from anchor points
5. Verify rescue plan to be activated in event of a fall	5.1 Confirm rescue plan is in place with work supervisor 5.2 Notify individuals of their roles in rescue plan 5.3 Provide report to supervisor on application of operational safety in rigging practice in telecommunications environment

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	**Performance Criteria**	**Description**
Reading	1.1, 3.2, 3.3	• Interprets textual information from relevant sources to identify equipment suitability and adhere to procedures and standards
Writing	2.1, 2.2, 5.1-5.3	• Legibly completes relevant reports and documentation using clear and technically specific language
Oral Communication	2.1, 5.1, 5.2	• Uses listening and questioning skills to confirm understanding of requirements, participates in a verbal exchange of ideas and solutions, and uses

© Commonwealth of Australia, 2025 Future Skills Organisation

		appropriate, detailed and clear language to address key personnel and disseminate information
Numeracy	1.2, 3.2	• Performs basic mathematical calculations to compare and measure equipment requirements
Navigate the world of work	1.1, 3.1-3.3, 4.1	• Takes personal responsibility for adherence to relevant legislation, codes, regulations and standards relevant to own work context, and draws attention to any issues that may affect self or others • Understands the nature and purpose of own role and associated responsibilities when using harness and lanyard, and how role contributes to the work of others in the immediate work context • Recognises and follows protocols relating to manufacturer's instructions and safety principles and practices regarding fitting and use of harness and lanyards
Interact with others	5.1-5.3	• Understands what to communicate, with whom and how in routine work situations, and is learning how to identify the requirements of less familiar contexts
Get the work done	1.1, 1.2, 2.1, 2.2, 3.2, 4.2, 4.3	• Plans a range of routine and some non-routine tasks, accepting stated goals and aiming to achieve them efficiently and safely • Selects from a range of pre-determined options in routine situations, identifying and taking some situational factors into account in relation to hazard identification and safe work practices • Recognises and takes responsibility for addressing predictable and some less predictable problems in familiar work contexts • Initiates standard procedures when responding to familiar problems within immediate context

Assessment Requirements for ICTTCR202 Use operational safety in a telecommunications rigging environment

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- apply all work health and safety (WHS) requirements and work practices associated with fall arrest, fall guarding and fall restraint when working at heights in a telecommunications rigging environment.
- check and fit a safety harness according to industry practice
- use a safety harness where a fall hazard exists at height in a telecommunications context
- produce a rescue plan to be activated in the event of a fall.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline electromagnetic radiation (EMR) safety practices
- discuss fall arrest, fall guarding and fall restraint when working at heights in a telecommunications rigging environment
- list features and operating requirements of rigging equipment
- identify government legislation, regulations, and by-laws relating to rigging works including:
  - applicable site and company WHS procedures
  - WHS legislation
  - relevant codes of practice
  - subsequent amendments in regards to fall arrest, fall guarding and fall restraint when working at heights in a telecommunications rigging environment
- describe hazards associated with wearing a safety harness and associated equipment

© Commonwealth of Australia, 2025 Future Skills Organisation

- summarise licensing and regulatory issues applying to rigging practices and systems on telecommunications radio structures
- discuss optical fibre cabling and equipment safety practices
- identify personal protective equipment for rigging projects
- describe the rescue plan to be activated in the event of a fall
- outline risks present when working on telecommunications radio structures
- explain safe rigging practices and systems to telecommunications radio structures
- describe suspension trauma
- summarise working-at-heights safety practices
- identify workplace operational procedures.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – telecommunications rigging installation field of work and include access to special purpose tools, equipment and materials.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTCR203 Use safe rigging practices to climb and perform rescues on telecommunications network structures

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to assess risk, use rigging equipment, and climb and perform rescues on standard telecommunications network structures.

It applies to technical staff who work in a team environment and who use rigging on telecommunications radio structures and may make use of rigging plant and equipment, fall arrest, fall guarding and fall constraint.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Unit Sector

Telecommunications – telecommunications rigging installation

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to use safe rigging practices	1.1 Notify appropriate personnel and take necessary precautions to minimise, control or eliminate hazards that may exist during work activities 1.2 Prepare for given work according to minimum approach distances for hazards on telecommunications network structures, as prescribed in relevant legislation, codes, regulations and

© Commonwealth of Australia, 2025 Future Skills Organisation

	standards
2. Assess status and condition of telecommunications network structures and identify climbing route	2.1 Inspect and assess status and condition of telecommunications structures, according to industry practice 2.2 Plot optimum climbing route to avoid hazards and ensure most effective use of selected equipment, according to manufacturer's instructions and industry practice
3. Prepare climbing equipment	3.1 Select climbing equipment in keeping with structures to be climbed, according to industry practice 3.2 Inspect climbing equipment for damage, according to specifications and industry practice
4. Climb telecommunications network structures	4.1 Use safe climbing practices when ascending telecommunications network structures according to work health and safety (WHS) practices 4.2 Maintain permanent attachment when more than three metres from ground, adhering to safety requirements 4.3 Maintain three points of contact at all times, according to industry practice 4.4 Manage ropes to avoid entanglement or fouling on structure 4.5 Maintain safe working and minimum approach distances from hazards on telecommunications network structures at all times, according to standards and regulations
5. Use climbing and working fall arrest systems	5.1 Perform transfers to and from climbing system and working system using fall prevention practices, according to industry practice 5.2 Use working fall arrest system, according to specifications
6. Perform rescues	6.1 Perform rescues according to situation, industry practice and local instruction 6.2 Ascertain and seek required medical treatment according to enterprise standards 6.3 Report accidents or incidents according to company procedures and local instructions

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

© Commonwealth of Australia, 2025 Future Skills Organisation

Skill	Performance Criteria	Description
Reading	1.2, 2.2, 3.2, 4.1, 4.5, 5.1, 5.2	• Interprets textual information from relevant sources to identify equipment suitability and adhere to procedures and standards
Writing	1.1, 6.3	• Accurately completes relevant reports and documentation using clear and technically specific language and diagrammatic information
Oral Communication	1.1, 6.1, 6.3	• Uses listening and questioning skills to confirm understanding for requirements, and participates in a verbal exchange of ideas and solutions • Uses appropriate, detailed and clear language to address key personnel and to disseminate information
Numeracy	1.2, 4.2, 4.3, 4.5	• Uses mathematical formulae to calculate ratios and scale, make adjustments to equipment and interpret methodological information
Navigate the world of work	1.2, 2.1, 2.2, 3.1, 3.2, 4.1-4.5, 5.1, 5.2, 6.1, 6.3	• Takes personal responsibility for adherence to legal and regulatory requirements, standards, manufacturer's instructions and industry practice relevant to own work context, and draws attention to any issues that may affect self or others in relation to climbing and performing rescues
Get the work done	1.2, 2.1, 2.2, 3.1, 3.2, 4.4, 6.2	• Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of the climbing and rescue context to identify relevant information and risks, and to identify and evaluate alternative strategies and resources • Makes a range of critical and non-critical decisions regarding route, equipment and need for medical treatment in relatively complex climbing and rescue situations, taking a range of constraints into account • Recognises and takes responsibility for addressing predictable and some less predictable safety problems in familiar work contexts

© Commonwealth of Australia, 2025 Future Skills Organisation

		• Initiates standard procedures when responding to familiar problems within immediate context • Applies formal problem-solving processes when selecting equipment and managing ropes, breaking complex issues into manageable parts and identifying and evaluating several options for action

Assessment Requirements for ICTTCR203 Use safe rigging practices to climb and perform rescues on telecommunications network structures

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- use safe rigging practices according to all work health and safety (WHS) legislative requirements, regulations and standards
- assess the status and condition of the telecommunications structure to be climbed and plot a climbing route according to industry practice
- select climbing equipment and climb a telecommunications network structure
- work safely using climbing and working fall arrest systems
- perform rescues from telecommunications network structures to industry standards.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss falls, including:
  - fall factors according to the Guidelines for the Prevention of Falls
  - fall prevention
  - fall types according to Australian Standards and regulations
- list features and operating requirements of rigging equipment
- summarise optical fibre cabling and equipment safety practices
- identify personal protective equipment for rigging projects
- summarise, in relation to radio frequency (RF) electromagnetic radiation (EMR):
  - associated risks
  - methods of detecting

© Commonwealth of Australia, 2025
Future Skills Organisation

  - need to verify and maintain the EMR hazard management plan against an on-site situation
  - preparing for work at a telecommunications site with potential EMR hazards
  - reporting EMR hazards safety practices
  - sources and types of RF EMR
- discuss rescue methods and practices relevant to the rigging environment
- outline safe rigging principles
- describe suspension trauma, including:
  - cause
  - effect
  - prevention
  - treatment
- discuss, in relation to a safety harness:
  - hazards associated with wearing a safety harness
  - how to check, fit and use a safety harness
  - the types and application of different safety harnesses
- explain licensing and regulatory issues applying to rigging practices and systems on telecommunications radio structures
- outline risks present when working on telecommunications radio structures
- clarify specific WHS issues that affect rigging, including:
  - relevant regulations, and applicable site and company WHS procedures
  - rigging practices and systems for telecommunications radio structures
  - safe climbing practices, including maintaining three points of contact while climbing
  - safe working and minimum approach distances for hazards on telecommunications network structures, according to standards and regulations
  - safety requirements when working at heights according to WHS legislation.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – telecommunications rigging installation field of work and include access to special purpose tools, equipment and materials.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTCR301 Build a telecommunications radio structure

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to build a foundation, and assemble and mount a telecommunications radio structure.

It applies to individuals who have a dual specialist classification as rigger installers and who may install radio structures for Worldwide Interoperability for Microwave Access (WiMAX) wireless broadband access networks, antenna installation for radio and television broadcasting, and cellular mobile communications.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Pre-requisite Unit

ICTTCR201 Use rigging practices and systems on telecommunications network structures

ICTTCR202 Use operational safety in a telecommunications rigging environment

ICTTCR203 Use safe rigging practices to climb and perform rescues on telecommunications network structures

Unit Sector

Telecommunications – telecommunications rigging installation

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential	*Performance criteria describe the performance needed to*

© Commonwealth of Australia, 2025 Future Skills Organisation

outcomes	*demonstrate achievement of the element.*
1. Prepare materials and secure site	1.1 Notify appropriate personnel and take necessary precautions to minimise, control or eliminate hazards that may exist during work activities 1.2 Determine nature and location of structure from construction design plans, relevant legislation, codes, regulations and standards 1.3 Determine materials, tools and equipment required from construction design plans 1.4 Check steel for assembly against construction design plans to ensure no parts are missing 1.5 Secure and clean site according to site security instructions for public safety
2. Construct foundations for radio structure	2.1 Locate other services according to industry practice, and arrange for relocation of services if required 2.2 Oversee excavation of foundation according to engineering specifications, and construction of foundations according to construction design plans 2.3 Install earthing according to construction design plans, enterprise work health and safety (WHS) guidelines and industry practice 2.4 Provide samples of concrete for analysis according to enterprise guidelines and manufacturer's specifications, relevant standards and regulations
3. Assemble and mount telecommunications radio structure	3.1 Select area free of interference and close to construction site suitable for structure assembly 3.2 Assemble radio structure in sections on ground according to engineering specifications, using personal protective equipment and following safety guidelines 3.3 Mount and secure preassembled sections to tower construction according to plans, specifications and enterprise WHS guidelines 3.4 Maintain vertical positioning of structure within twist tolerances during construction phase 3.5 Secure and tension guy wires according to construction design plans, enterprise WHS guidelines and industry practice
4. Complete administrative duties	4.1 Update original design plan with approved amendments and return to design section 4.2 Secure and clean up site to original condition in environmentally safe manner 4.3 Notify client and obtain sign off

© Commonwealth of Australia, 2025 Future Skills Organisation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2-1.5, 2.2-2.4, 3.2, 3.3, 3.5	• Interprets textual information from relevant sources to plan, identify all job requirements and adhere to procedures and standards
Writing	1.1, 4.1, 4.3	• Accurately completes relevant reports and documentation, using clear and technically specific language and diagrammatic information
Oral Communication	1.1, 2.1, 4.3	• Uses listening and questioning skills to confirm understanding of requirements, and participates in a verbal exchange of ideas and solutions • Uses appropriate, detailed and clear language to disseminate information
Numeracy	1.2, 2.2, 3.2-3.5	• Interprets numerical information and measures, and calculates ratios and scale
Navigate the world of work	1.2, 1.5, 2.1-2.4, 3.2-3.5	• Takes personal responsibility for adherence to legal and regulatory requirements, standards, manufacturer's guidelines and industry practice relevant to own work context, and draws attention to any issues that may affect self or others when preparing for and implementing building activities
Get the work done	1.1-1.5, 2.1-2.4, 3.1, 4.2	• Applies formal problem solving processes when tackling an unfamiliar problem in relation to equipment and logistics, breaking complex issues into manageable parts and identifying and evaluating several options for action • Takes responsibility for planning and organising own workload, identifying ways of sequencing and combining elements for greater efficiency, and considering how to link with the work of others • Applies formal processes when preparing for building, producing plans with logically sequenced steps, and reflecting awareness of

© Commonwealth of Australia, 2025 Future Skills Organisation

		time and resource constraints and the needs of others in the immediate vicinity • Implements actions as per plan, making slight adjustments if necessary and addressing unexpected issues • Makes a range of critical and non-critical decisions in relatively complex building situations, taking a range of constraints into account in relation to equipment, tools and materials

Unit Mapping Information

Assessment Requirements for ICTTCR301 Build a telecommunications radio structure

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- undertake pre-construction checks to ensure a safe working environment
- construct foundations according to engineering specifications
- select site for hoisting equipment, ensuring location is safe for the operator and the construction
- preassemble the structure at ground level, ensuring completion of each assembled component
- assemble and mount a telecommunications radio structure, including temporary and permanent guy anchors
- install functional and protective earthing systems, following security and safety procedures.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise the impact that weather conditions impose on the constructions and installation of telecommunications structures
- describe the safety risks associated with the installation of telecommunications equipment in remote areas including:
  - hypothermia symptoms and methods of prevention and treatment
  - electromagnetic radiation (EMR) safety practices
  - personal protective equipment for rigging projects
  - working-at-heights safety practices
- discuss the features and operating requirements of:

© Commonwealth of Australia, 2025 Future Skills Organisation

  - construction equipment
  - rigging equipment
- identify the information required to build a telecommunications radio structure
- describe rigging practices and systems for telecommunications radio structures
- list legislation, codes of practice and other formal agreements that impact on the work activity
- summarise licensing and regulatory issues applying to rigging practices and systems on telecommunications radio structures
- describe manufacturer's requirements for safe operation of equipment
- discuss the following work health and safety (WHS) requirements:
  - WHS legislation and regulations
  - company procedures relating to the activity and site conditions
- discuss typical issues and challenges that can occur on an installation site.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – telecommunications rigging installation field of work and include access to special purpose tools, equipment and materials.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTCR302 Install radio plant and equipment on telecommunications structures

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to install basic telecommunications radio plant and equipment on standard telecommunications structures.

It applies to technical staff who install basic telecommunications radio plant and equipment on telecommunications structures and use rigging plant and equipment, fall arrest, fall guarding and fall constraint.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Pre-requisite Unit

ICTTCR201 Use rigging practices and systems on telecommunications network structures

ICTTCR202 Use operational safety in a telecommunications rigging environment

ICTTCR203 Use safe rigging practices to climb and perform rescues on telecommunications network structures

Unit Sector

Telecommunications – telecommunications rigging installation

Elements and Performance Criteria

Elements	Performance Criteria
Elements	*Performance criteria describe the performance needed to demonstrate*

describe the essential outcomes	*achievement of the element.*
1. Prepare for installation of radio plant	1.1 Prepare for given work according to relevant legislation, codes, regulations and standards 1.2 Arrange access to site and discuss client requirements 1.3 Inform appropriate personnel of existing and potential site hazards 1.4 Select tools and safety equipment required for safe rigging practice 1.5 Develop installation plans in agreement with client or site supervisor 1.6 Procure materials and verify delivery against inventory according to industry practice
2. Install plant and equipment	2.1 Set up rigging equipment for safe and effective use according to specifications 2.2 Install telecommunications radio equipment and feeders according to specifications and industry practice following work health and safety (WHS) and environmental requirements 2.3 Maintain installation progress documentation according to company and client requirements
3. Assist with testing and fault finding	3.1 Assist with testing of telecommunications radio equipment mounted on telecommunications structures 3.2 Identify and locate faults by interpreting test results and rectify according to industry practice 3.3 Document test results according to specifications and client requirements
4. Clean up site and complete documentation	4.1 De-rig and lower rigging equipment according to specifications 4.2 Restore site to client expectations following completion of installation, according to industry practice 4.3 Complete documentation and notify client for sign off

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	**Performance Criteria**	**Description**

© Commonwealth of Australia, 2025 Future Skills Organisation

Reading	1.1, 1.6, 2.1, 2.2, 3.2, 3.3, 4.1, 4.3	• Interprets texts from relevant sources to plan installations, identify job requirements and adhere to procedures and standards
Writing	1.3, 1.5, 2.3, 3.3, 4.3	• Uses correct terminology, spelling and grammar when advising others of requirements • Develops and completes relevant reports and documentation using clear and technically specific language, and correctly recording numerical data and diagrammatic information
Oral Communication	1.2, 1.3, 1.5, 1.6, 4.3	• Uses listening and questioning skills to confirm understanding of requirements • Participates in a verbal exchange of ideas and solutions and uses appropriate, detailed and clear language to address key personnel and client, and to disseminate information
Numeracy	1.5, 1.6, 2.1, 2.2, 3.2	• Uses mathematical formulae to take accurate measurements and to interpret technical data, and when purchasing supplies and creating supply lists
Navigate the world of work	1.1, 1.6, 2.1-2.3, 3.2, 3.3, 4.1, 4.2	• Takes personal responsibility for adherence to legal and regulatory requirements, standards, specifications and industry practice relevant to own work context, and draws attention to any issues that may affect self or others in relation to radio installations, de-rigging and site restoration
Get the work done	1.1-1.6, 3.1, 3.2	• Plans and implements a range of routine and some non-routine radio installation tasks, accepting stated goals and aiming to achieve them efficiently and safely • Uses systematic, analytical processes when assisting with testing, setting goals, gathering relevant information, and identifying and evaluating options against agreed criteria • Recognises and anticipates an increasing range of familiar problems, their symptoms and causes, actively looking for early warning signs and implementing contingency plans

Assessment Requirements for ICTTCR302 Install radio plant and equipment on telecommunications structures

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- install basic telecommunications radio plant and equipment according to job specifications and all work health and safety (WHS) legislation, regulations, standards and environmental requirements
- assist with testing and fault-finding basic telecommunications radio plant and equipment mounted on telecommunications structures
- use effective communications skills related to:
  - dogging
  - work associates
  - supervisors
  - team members
  - enterprise documentation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline antenna principles
- outline the features and operating requirements of rigging equipment
- discuss relevant regulations and typical issues and challenges that may occur on site
- explain rigging practices and systems in relation to telecommunications radio structures, and related licensing and regulatory issues
- discuss the main principles of:
  - electromagnetic radiation (EMR) safety practices
  - optical fibre cabling and equipment safety practices

© Commonwealth of Australia, 2025 Future Skills Organisation

  - working-at-heights safety practices
- summarise specific WHS requirements relating to the activity and site conditions, including:
  - basic survival skills
  - company WHS procedures
  - hypothermia
  - remote area first aid.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – telecommunications rigging installation field of work and include access to special purpose tools, equipment and materials.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTCR303 Protect against electromagnetic radiation and systems hazards when working on telecomms radio sites

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to protect personnel against electromagnetic radiation (EMR) and system hazards when working on standard telecommunications structures with radio sites.

This unit applies to technical staff who work on telecommunications radio sites and may make use of rigging plant and equipment, fall arrest, fall guarding and fall constraints on standard telecommunications structures.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide or the relevant regulator for details of licensing, legislative or certification requirements.

Unit Sector

Telecommunications – telecommunications rigging installation

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for work at telecommunications site with potential	1.1 Prepare for given work using safe working practices and procedures according to WHS legislation, codes, regulations and standards 1.2 Assess potential sources of radio frequency (RF) EMR, allowing

© Commonwealth of Australia, 2025 Future Skills Organisation

EMR hazards	permissible public and occupational EMR exposure limits according to Australian Radiation Protection and Nuclear Safety Agency (ARPANSA) 1.3 Verify methods for determining EMR levels, and strategies for eliminating, minimising or isolating on-site EMR hazards according to industry practice 1.4 Confirm work objectives and specifications of equipment to be installed, according to design drawings, installation plans and equipment manufacturer's specifications 1.5 Select equipment and personal protective equipment required to support the EMR hazard management plan according to company policy
2. Plan and carry out EMR hazard management plan in relation to on-site situation	2.1 Produce EMR hazard management plan according to company policy 2.2 Consult with client to confirm EMR hazard management plan and update if required 2.3 Communicate agreed EMR hazard management plan to all personnel on site
3. Monitor EMR hazard management plan	3.1 Maintain ongoing communication to all personnel regarding amendments to EMR hazard management plan according to company policy 3.2 Ensure that personal radiation monitor (Radman) is worn according to manufacturer's instructions and industry practice

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	**Performance Criteria**	**Description**
Reading	1.1, 1.2, 1.4, 1.5, 3.2	• Interprets textual information from relevant sources to plan, identify job requirements and adhere to procedures and standards
Writing	2.1, 2.2, 3.1	• Uses correct terminology, spelling and grammar when advising others of requirements • Produces and completes relevant reports and documentation using clear and technically specific language, and accurately records numerical data and diagrammatic information

© Commonwealth of Australia, 2025 Future Skills Organisation

Oral Communication	1.4, 2.2, 2.3, 3.1	• Uses listening and questioning skills to confirm understanding of requirements • Participates in a verbal exchange of ideas and solutions, and uses appropriate, detailed and clear language to address key personnel and client and to disseminate information
Numeracy	1.4	• Interprets numerical information and applies to specifications
Navigate the world of work	1.1-1.5, 2.1, 3.1, 3.2	• Takes personal responsibility for adherence to legal and regulatory requirements, standards, specifications, industry practice and company policy relevant to own work context, and draws attention to any issues that may affect self or others
Get the work done	1.1-1.5	• Uses systematic, analytical processes in relation to assessing potential hazards, setting goals, gathering relevant information, and identifying and evaluating options against agreed criteria • Applies formal problem solving processes when adapting rigging activities and requirements to particular sites and conditions, breaking complex issues into manageable parts and identifying and evaluating several options for action

Assessment Requirements for ICTTCR303 Protect against electromagnetic radiation and systems hazards when working on telecomms radio sites

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- produce and maintain the electromagnetic radiation (EMR) hazard-management plan for an on-site situation
- carry out work according to the EMR hazard management plan, job specifications and all work health and safety (WHS) regulations and standards.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the principles of EMR propagation from antenna
- identify features and operating requirements of rigging equipment
- outline licensing and regulatory issues applying to rigging practices and systems on telecommunications radio structures
- describe remote area first aid
- describe rigging practices and systems to telecommunications radio structures
- summarise EMR including:
  - sources and types of radio frequency EMR
  - associated risks
  - risk assessment and mitigation strategies
  - methods of detecting and reporting EMR hazards
  - potential dangers of overexposure
  - safety practices and devices
- outline optical fibre cabling and equipment safety practices

© Commonwealth of Australia, 2025
Future Skills Organisation

- outline the relevant requirements of WHS legislation, relevant regulations, and applicable site and company WHS procedures
- describe working-at-heights safety practices.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – telecommunications rigging installation field of work and include access to special purpose tools, equipment and materials.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN203 Install and configure a home or small office network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required for entry level networking support to establish a small office or home office (SOHO) internet connected PC network.

It applies to individuals who may work as an installer or network technician configuring small networks with simple internet protocol (IP) addressing schemes that share a limited range of resources.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for installation of home or small office network	1.1 Prepare for given work confirming site-specific work health and safety (WHS) and environmental requirements with appropriate personnel 1.2 Identify safety hazards and implement risk control measures in consultation with appropriate personnel 1.3 Determine nature and scope of the network and network resources from job briefs or appropriate personnel

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.4 Select and obtain personal computer system and network device requirements according to enterprise procedures 1.5 Obtain operating instructions, manuals, hardware and software testing methodologies 1.6 Consult appropriate personnel to ensure task is coordinated effectively with others involved at the worksite
2. Install and troubleshoot home or small office network	2.1 Set up personal computer systems according to manufacturer's specifications and enterprise procedures 2.2 Set up, configure and share network resources between network devices 2.3 Determine network addressing scheme for network connectivity and confirm using calculations 2.4 Troubleshoot network and internet connectivity according to manufacturer's specifications and enterprise procedures 2.5 Identify security threats and initiate control measures according to enterprise procedures
3. Complete and document network installation	3.1 Restore worksite to safe condition according to established safety procedures 3.2 Record and store essential installation information according to enterprise procedures 3.3 Notify appropriate personnel of completion of the task according to enterprise procedures 3.4 Notify appropriate personnel and obtain sign-off

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Writing	3.2, 3.4	• Completes workplace documentation accurately using appropriate form and vocabulary for intended audience
Oral Communication	3.3, 3.4	• Conveys specific messages efficiently and uses an appropriate tone and vocabulary for intended audience

© Commonwealth of Australia, 2025 Future Skills Organisation

Numeracy	2.3	• Confirms decisions using basic calculations and predictions
Navigate the world of work	1.1-1.4, 2.4, 2.5, 3.1-3.3	• Follows legislative requirements and organisational protocols, policies and procedures relevant to own role
Interact with others	1.1-1.3, 1.6	• Collaborates and cooperates with others to achieve specific outcomes
Get the work done	1.4, 1.5, 2.1-2.5	• Prioritises and plans work to meet organisational requirements and client expectations • Recognises and anticipates a range of problems, actively looking for early warning signs and implementing contingency plans when appropriate

Unit Mapping Information

Assessment Requirements for ICTTEN203 Install and configure a home or small office network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- implement work health and safety (WHS) workplace procedures and practices
- plan installation of an internet connected network with advice and approvals of relevant personnel
- set up and configure wired and wireless networks with simple addressing schemes
- troubleshoot network and internet connectivity
- set up resource sharing
- deploy simple firewall network security
- obtain sign-off with relevant personnel.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline correct usage of tools and equipment
- describe enterprise WHS procedures
- outline basic computer systems and network operating systems
- describe computer networking principles (wired and wireless)
- outline network addressing systems (basic)
- explain network services and associated network models and protocols
- outline network security management
- outline troubleshooting procedures.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications network engineering field of work and include access to:

- a site where installation of a small office home office network may be conducted
- tools, equipment and materials currently used in the industry
- relevant workplace procedures, specifications and reference materials.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN204 Install and configure a small to medium business network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to establish and support a small to medium business network capable of providing wide area network (WAN) connectivity and common web internet services.

It applies to individuals who may be working as a small to medium enterprise (SME) internet protocol (IP) network installer, network technician or SME network support person.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications networks engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for installation of small to medium enterprise network	1.1 Prepare for given work, confirming site-specific work health and safety (WHS) and environmental requirements with appropriate personnel 1.2 Identify safety hazards and implement risk control measures in consultation with appropriate personnel

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.3 Determine nature and scope of business network and network resources from job briefs or appropriate personnel 1.4 Select and obtain computer system and network device requirements according to enterprise procedures 1.5 Obtain operating instructions, manuals, hardware and software testing methodologies 1.6 Consult appropriate personnel to ensure the task is coordinated effectively with others involved at worksite
2. Install and configure small to medium enterprise network	2.1 Set up wired infrastructure according to manufacturer's specifications and enterprise procedures 2.2 Set up and configure resource sharing on a network server 2.3 Install WAN connection and ISP services and configure according to enterprise procedures 2.4 Troubleshoot network and internet connectivity according to manufacturer's specifications and enterprise procedures 2.5 Implement data back-up and disaster recovery measures according to enterprise procedures
3. Complete and document network installation	3.1 Restore worksite to safe condition according to established safety procedures 3.2 Record and store essential installation information according to enterprise procedures 3.3 Notify appropriate personnel of completion of the task according to enterprise procedures 3.4 Notify customer and obtain sign-off

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

Assessment Requirements for ICTTEN204 Install and configure a small to medium business network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- implement work health and safety (WHS) workplace procedures and practices
- plan installation of a network that uses subnet addressing and provides internet service provider (ISP) services
- set up and configure wired infrastructure
- troubleshoot local network and wide area network (WAN) connectivity and services
- configure resource sharing on a network server
- provide network data back-up and disaster recovery.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify correct usage of tools and equipment
- outline data back-up services and procedures
- describe enterprise WHS procedures
- define ISP services
- outline network device configuration
- describe network models and topologies
- define subnet addressing
- outline troubleshooting procedures
- describe WAN services and ISP responsibilities.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications network engineering field of work and include access to:

- a site where installation of a small to medium business network may be conducted
- tools, equipment and materials currently used in industry
- relevant workplace procedures
- product and manufacturing specifications and reference materials.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN205 Build and maintain a secure network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to build a simple and secure wired local area network (LAN) or wide area network (WAN) using a range of client server applications and services.

It applies to individuals who may work in job roles such as an installer of internet protocol (IP) networks, a WAN and LAN network technician or a WAN and LAN network support person.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to build LAN or WAN	1.1 Prepare for given work confirming site-specific work health and safety (WHS) and environmental requirements, with appropriate personnel 1.2 Identify safety hazards and implement risk control measures in consultation with appropriate personnel 1.3 Determine network design specification from job briefs or

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	appropriate personnel 1.4 Determine network addressing scheme for network connectivity and confirm using calculations 1.5 Select and obtain network hardware according to established procedures 1.6 Obtain operating instructions, manuals, hardware and software testing methodologies 1.7 Consult appropriate personnel to ensure the task is coordinated effectively with others involved at the worksite
2. Build and verify network	2.1 Establish connections between network hardware according to manufacturer's specifications and established procedures 2.2 Verify network routing and switching to conform to network design specification 2.3 Set up, configure and share network resources between network devices
3. Monitor network performance and troubleshoot network	3.1 Monitor network traffic and assess performance metrics against manufacturer's specifications and established procedures 3.2 Identify security threats and initiate control measures according to enterprise procedures 3.3 Troubleshoot network and internet connectivity according to manufacturer's specifications and enterprise procedures
4. Complete and document network build	4.1 Restore worksite to safe condition according to established safety procedures 4.2 Record and store network schematics and network addressing scheme 4.3 Notify appropriate personnel of completion of the task 4.4 Notify customer and obtain sign-off

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Assessment Requirements for ICTTEN205 Build and maintain a secure network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- effectively implement work health and safety (WHS) workplace procedures and practices
- develop a network addressing scheme
- determine required network components to build the network
- plan, build, configure, test and analyse performance of a network
- troubleshoot network problems.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe enterprise WHS procedures
- explain internet and computer network communication
- outline network addressing schemes including open systems interconnect (OSI) and transmission control protocol (TCP)/IP model
- describe planning the cabling of ethernet networks
- define the seven layer OSI model
- identify correct tool and equipment usage
- identify troubleshooting procedures.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications network engineering field of work and include access to:

© Commonwealth of Australia, 2025 Future Skills Organisation

- a site where building and maintenance of secure network may be conducted
- tools, equipment and materials currently used in industry
- relevant workplace procedures
- product and manufacturing specifications and reference material.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN206 Operate new media software packages

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to produce a media design through selection and appraisal of media software tools, assessment and manipulation of software functions and the use and creation of graphics and editing media files.

It applies to individuals who want an introduction to the use of media software packages and may eventually lead to employment in graphic design, industrial design, or production of promotional and marketing media material.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify relevant new media software and supporting hardware to meet design brief	1.1 Perform media work in a safe manner to comply with work health and safety (WHS) criteria and accepted industry practice 1.2 Identify basic requirements of media design brief, including user environment from customer specifications 1.3 Research and review new media software and hardware available to realise design requirements

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.4 Select a new media software program to meet design brief requirements 1.5 Identify relevant new media hardware to support design brief requirements 1.6 Select, re-encode and transcode relevant file formats to process and modify digital media files to suit user application
2. Develop a new media graphic design	2.1 Review design brief to ensure customer requirements are well interpreted 2.2 Procure or create suitable graphics, video or sound to meet requirements of design brief 2.3 Manipulate graphics, video or sound using freely available software tools for evaluating capabilities and limitations of different software packages 2.4 Produce a media design according to customer specifications, and save new media files using designated file formats
3. Review new media design	3.1 Evaluate media design for creative, dramatic and technical quality, file size, and data suitability to meet the brief 3.2 Test and run graphics, video and sound of media design as part of a multimedia presentation, and present designs in the appropriate format

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 1.3, 1.4, 1.5, 2.1	• Interprets workplace documents and confirms specifications are met
Numeracy	2.3, 3.1	• Calculates dimensions and measurements to meet job specifications
Navigate the world of work	1.1	• Follows legislative requirements and organisational protocols, policies and procedures relevant to own role

© Commonwealth of Australia, 2025 Future Skills Organisation

Get the work done	1.3, 1.4, 1.6, 2.2, 2.3, 2.4, 3.1, 3.2	• Prioritises and plans work to meet organisational expectations, legislative requirements and client expectations • Recognises and anticipates a range of problems, actively looking for early warning signs and implementing contingency plans when appropriate • Evaluates features of digital tools against set criteria to inform decisions about suitability • Uses digital technologies and systems to enter, manipulate and store data

Unit Mapping Information

Assessment Requirements for ICTTEN206 Operate new media software packages

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- evaluate new media software
- manipulate files effectively
- produce an effective media design using two new media software packages
- evaluate a design
- test and run a design.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain functions and features of two new media applications
- define graphic design and stylistic language conventions
- identify software tools to develop, edit and test design
- outline principles of:
  - digital imaging and file formats
  - file management
  - transfer systems
  - video and sound file formats
  - visual design principles
- outline vendor product directions in new media hardware and software
- describe visualisation and interpreting creative information, scripts (text) and images.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications network engineering field of work and include access to:

- work stations with appropriate software tools
- media capable PCs
- peripheral media equipment with HD capability
- LAN with media server
- internet access.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN207 Install and test internet protocol devices in convergence networks

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required for entry-level installations and testing for internet protocol (IP) based telecommunications networking, using convergent technologies to deliver services of Next Generation Networks (NGN).

It applies to technicians and cable installers who install and maintain IP-based equipment for customer and service providers for NGN services, including internet protocol TV (IPTV), IP security, digital home networks, IP-based cable access TV (CATV), IP core and access networks, home automation, interactive TV, radio frequency identification (RFID), biometric recognition systems, mesh networks, smart grids and cloud computing.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Gather information to prepare for installation of IP device	1.1 Obtain work health and safety (WHS) requirements and environmental requirements for a given work area, and clarify with appropriate personnel

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.2 Identify safety hazards and notify appropriate personnel 1.3 Obtain identified operating instructions, manuals, and hardware and software testing methodologies 1.4 Obtain documentation on a range of IP devices that can be networked according to the open system interconnection (OSI) reference model in networking 1.5 Obtain the range of required IP devices to be connected to the network and identify the IP-based telecommunications application that will be provided
2. Prepare for installation of IP device	2.1 Select IP device for installation that can be integrated into existing network 2.2 Obtain appropriate hardware, software, network protocols, peripheral devices and media types and connectors for configuration process 2.3 Draw physical topology of the device connection to network and seek approval from appropriate personnel 2.4 Obtain configuration details to start setting up device
3. Configure and test IP device	3.1 Determine network addressing scheme for mapping network connectivity and verify by calculations 3.2 Assign a valid static IP address to device 3.3 Use network commands to determine and verify the media access control (MAC) address, the IP address and network performance of the device 3.4 Determine security threats and initiate security solutions to prevent security breaches according to enterprise procedures
4. Complete and document network installation	4.1 Restore worksite to safe condition according to established safety procedures 4.2 Record and store essential installation information according to enterprise procedures 4.3 Notify appropriate person of task completion according to enterprise procedures
5. Test wireless link	5.1 Select types of wireless connections used in telecommunications 5.2 Set up a wireless link to connect two wireless devices, following safe work practices 5.3 Transmit data over the link and verify accuracy of received data

© Commonwealth of Australia, 2025 Future Skills Organisation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3-1.5, 3.3, 3.1	• Evaluates information and products from a variety of sources to ensure appropriateness to client needs
Writing	2.3, 3.2, 3.3, 4.2, 4.3, 5.3	• Develops accurate and industry specific drawings • Writes computer code and commands and records technical data, ensuring correct syntax and accuracy
Oral Communication	4.3	• Uses clear language and concepts, and tone and pace appropriate for audience and purpose
Numeracy	3.1	• Performs basic mathematical calculations to compare and verify connectivity
Navigate the world of work	1.1, 3.4, 4.1-4.3, 5.2	• Understands roles and responsibilities for task and makes basic decisions on work and completion parameters • Ensures knowledge of WHS requirements • Recognises organisational expectations and follows explicit protocols and procedures • Seeks clarification when required
Interact with others	1.1, 1.2, 2.4	• Follows instructions regarding what and how to communicate, following predetermined scripts • Initiates a connection with others through verbal, or nonverbal communication responding as appropriate
Get the work done	1.2-1.5, 2.1-2.4, 3.1-3.4, 4.1, 5.1-5.3	• Plans and implements routine tasks and workload, making limited decisions on sequencing, timing and collaboration, and seeks assistance in setting priorities • Makes low-impact decisions within familiar situations, based on a range of predefined or routine solutions and evaluates outcome effectiveness • Responds to predictable routine problems and implements standard or logical solutions • Uses digital technology for basic reading, recording and searching information, and for communications following routine procedures and security requirements

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Requirements for ICTTEN207 Install and test internet protocol devices in convergence networks

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- prepare for installation of internet protocol (IP) device connected to a network
- set up and configure IP device with simple addressing schemes
- test and secure device against security threats
- produce essential installation information
- follow work health and safety (WHS) workplace procedures and practices
- test wireless link.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe principles of computer networking and identify common types and protocols used
- describe IP-based telecommunications and importance of network configuration including:
  - IP addressing
  - IP devices
- identify and describe the purpose of common hardware and software used in IP communications
- identify and summarise organisational policies and procedures relating to installation and testing of internet protocol devices
- describe common procedures for basic testing and troubleshooting an IP device
- describe procedures for assigning networking protocols
- explain the purpose for internet security and describe common configurations

© Commonwealth of Australia, 2025 Future Skills Organisation

- describe various basic wireless technologies and their application in communications
- describe environmental factors requiring management on telecommunications equipment
- identify and describe WHS requirements and personal safety issues relating to installation and testing of internet protocol devices
- define open system interconnection (OSI) and explain various levels involved
- identify common types of peripheral devices used in network communications systems
- calculate using the binary system
- describe common computer commands used to verify and manage IP and network performance
- identify common security threats attributed to networks and specify solutions to combat these threats
- identify common wireless technologies used in communications.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications network engineering field of work and include access to:

- a small network with IP devices
- tools, equipment, materials and documentation required for installing and testing IP devices
- relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to install supporting infrastructure for telecommunications equipment and associated hardware equipment.

It applies to field officers, installation technicians or technical supervisors from carriers, contractors or other service providers who install switching, transmission and radio networks and the various transmission paths – including cable, optical fibre, radio, microwave and satellite.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for installation infrastructure work	1.1 Obtain relevant legislation, codes, regulations and standards for compliance when conducting work 1.2 Notify customer to arrange site access and obtain installation plan and specifications

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.3 Conduct site survey to verify infrastructure installation requirements can be met 1.4 Identify site hazards and notify appropriate personnel to make site safe 1.5 Notify customer of alterations required to installation design and make recommendations for possible solutions 1.6 Obtain approval for alterations and update installation plan 1.7 Develop installation activity schedule to minimise workplace disruption and according to relevant regulations and standards 1.8 Obtain material supplies, safety equipment, resources, tools and test equipment so it is available when required for installation for safe work practice
2. Build network equipment infrastructure	2.1 Prepare for given work according to work health and safety (WHS) and environmental requirements 2.2 Build metal superstructure to house equipment according to manufacturer's specifications and to safety and electrical standards 2.3 Build ducts and tray ways for signal and data cabling and optical cables according to plan and specification after consultation with operational staff 2.4 Build busbars or power cabling infrastructure as specified on the plan 2.5 Install cable distribution frames according to plan and manufacturer's specifications 2.6 Install earthing to all metal infrastructures according to specifications
3. Install power infrastructure	3.1 Install batteries and rectifiers and connect according to manufacturer's and WHS requirements 3.2 Test and monitor battery discharge levels and obtain replacement batteries under warranty where required
4. Supervise DC power distribution	4.1 Coordinate and arrange for power distribution work to be performed by qualified personnel to meet electrical safety requirements and certifications 4.2 Monitor electrical work to ensure compliance with installation plan 4.3 Identify and rectify faults where possible or escalate according to enterprise policy
5. Restore site and	5.1 Attach infrastructure labels and designations according to

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
complete documentation	enterprise requirements 5.2 Complete inspection sheets and declare asset ready for next stage of installation using appropriate sign-off documentation 5.3 Clean up and prepare site in readiness for next installation phase 5.4 Notify customer and obtain sign-off

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3, 2.1-2.6, 3.1, 4.1, 4.2	• Interprets and applies textual information from plans, specifications, legislation and regulatory documents to building and construction
Writing	1.3, 1.5-1.7, 5.1, 5.2, 5.4	• Documents outcomes and changes to plans using industry relevant terminology and recognised plan symbols • Prepares documentation for outcomes of tests and inspections for reporting to clients and others
Oral Communication	1.2, 1.4-1.6, 2.3, 5.4	• Uses active listening skills and oral exchange when discussing and clarifying installation parameters and providing feedback to clients • Actively engages with others to communicate work requirements and activities
Numeracy	2.2-2.6, 3.2	• Takes measurements and uses them for work layout and construction • Makes calculations appropriate to measuring and estimating materials for construction
Navigate the world of work	1.1, 1.7, 2.1, 2.2, 3.1, 4.1, 4.3, 5.1	• Accepts responsibility and ownership for the task and makes decisions on completion parameters and the need of coordination with others • Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements
Interact with others	1.2, 1.4-1.6, 2.3, 3.2, 4.1	• Selects and uses appropriate conventions and protocols when communicating to clients and co- workers in a range of work contexts

© Commonwealth of Australia, 2025 Future Skills Organisation

		• Complies with work instructions and contributes to work group discussions using accepted conventions
Get the work done	1.1, 1.3, 1.4, 1.7, 1.8, 2.2-2.6, 3.1, 3.2, 4.1-4.3, 5.2, 5.3	• Takes responsibility for planning, sequencing and prioritising tasks and workload for efficiency and effective outcomes • Makes routine decisions and implements standard procedures for routine tasks, using formal decision-making processes for more complex and non-routine situations

Assessment Requirements for ICTTEN301 Provide infrastructure for telecommunications network equipment

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- identify potential earthing locations, cable routes, cables trays, data cabinets, telecommunication enclosures and distributors
- build metal superstructure
- install protective earth and functional earth installations
- install power infrastructure
- supervise DC power distribution
- discuss and inform the customer on the progress of works and obtain sign off when completed.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and describe cabling types, connectors and cabling structures
- recognise common customer telecommunications applications and related equipment
- demonstrate connections to carrier infrastructure or equipment
- recognise and describe current legislation relating to installation of telecommunications equipment and connection to carrier services
- describe environmental impact of cabling works, including options for green ICT installations
- describe network topologies, interface and interconnect solutions
- recognise and describe work health and safety (WHS) requirements for:
  - working in confined spaces
  - electrical safety

© Commonwealth of Australia, 2025 Future Skills Organisation

  - working at heights
  - lifting
  - materials handling
  - other physical hazards
- outline network and transmission equipment and their application
- describe power requirements and electrical safety as they apply to the network environment
- recognise warranty information for equipment supplies and contractor work guarantees.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the Telecommunications networks engineering field of work and include access to:

- a site where installation of supporting infrastructure may be conducted
- plant, tools and equipment currently used in industry
- relevant regulatory and equipment documentation that impact work activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN307 Repair and replace telecommunications network hardware

Modification History

Release	Comments
Release 2	This version released with ICT Information and Communications Technology Training Package Version 5.0.
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to fix and reinstate equipment in switching, transmission and fixed and mobile radio networks; including the various transmission path components, such as cable, optical fibre, radio, microwave and satellite.

It applies to individuals working as field officers, technicians or technical supervisors for carriers, or other service providers. It also applies to work performed under direction of the Network Operations Centre (NOC), where control of the network is coordinated.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for hardware repair and replacement	1.1 Obtain relevant legislation, codes, regulations and standards for the given work 1.2 Discuss and record details of hardware to be repaired or replaced, and proposed work schedule with the appropriate person at NOC 1.3 Work safely according to relevant safety legislation and company work practices, identifying hazards and using personal protective equipment 1.4 Obtain appropriate replacement hardware and associated documentation 1.5 Inspect network and determine need for repair task 1.6 Obtain tools and check they are in good working order 1.7 Undertake an impact risk assessment of the hardware replacement with the NOC, and prepare for contingencies using contingency plan
2. Rectify fault by replacing hardware	2.1 Replace equipment as instructed by the NOC following anti-static precautions in the case of sensitive electronic equipment and work health and safety (WHS) and environmental requirements 2.2 Inform NOC if problems occur with hardware replacement so escalation may commence and contingency plan initiated 2.3 Test replacement hardware to ensure satisfactory functionality
3. Clean up worksite and complete administrative work	3.1 Remove waste and debris from worksite and dispose of according to environmental requirements and restore work area to NOC satisfaction 3.2 Recover faulty equipment and return to appropriate point for disposal or refurbishment 3.3 Complete documentation, update fault records and make recommendations according to the enterprise quality assurance system 3.4 Notify appropriate person at the NOC of job completion and obtain sign-off

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

© Commonwealth of Australia, 2025 Future Skills Organisation

Skill	Description
Reading	• Recognises and interprets technical, regulatory and enterprise documentation
Writing	• Uses clear, specific and industry-related terminology to complete and update workplace documentation
Oral Communication	• Liaises with a range of personnel about technical and operational requirements using specific and relevant language • Uses listening and questioning techniques to confirm understanding
Numeracy	• Uses a core group of mathematical formulas involving power, voltage, current and the resistance, capacitance or inductance of various components
Navigate the world of work	• Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements
Get the work done	• Determines job priorities, resources and equipment, and works logically and systematically to undertake clearly defined and familiar tasks • Implements actions according to a predetermined plan, making adjustments if necessary • Takes responsibility for routine decision-making by selecting from a range of predetermined options in routine situations, identifying and taking some situational factors into account • Initiates standard procedures when responding to familiar faults within immediate context • Understands purpose and some specific functions of common digital tools used in work contexts

Assessment Requirements for ICTTEN307 Repair and replace telecommunications network hardware

Modification History

Release	Comments
Release 2	This version released with ICT Information and Communications Technology Training Package Version 5.0.
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to perform the items listed on two occasions:

- rectify fault as instructed by Network Operations Centre (NOC), following work health and safety (WHS) requirements and anti-static precautions
- replace telecommunications hardware within service assurance guidelines according to enterprise procedures
- update fault records database according to enterprise procedures
- liaise with appropriate personnel in the NOC for information and reporting purposes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

- application of direct current (DC) and alternating current (AC) electrical principles
- static electricity and its importance in testing and working with telecommunications equipment
- variety of possible symptoms and their impact on an operational network caused by faulty network elements
- test results and network element or system specifications
- operation and purpose of testing equipment

© Commonwealth of Australia, 2025 Future Skills Organisation

- common telecommunications hardware and network structures
- performance testing and fault-finding techniques of telecommunications networks
- systematic and logical fault-finding
- types of power sources used in telecommunications networks
- appropriate test equipment used to undertake fault finding procedures.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a suitable site to replace telecommunications network hardware
- a range of hardware currently used in industry
- a range of general and test equipment required for testing telecommunications network hardware.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN310 Remove and replace electronic circuit boards in carrier equipment

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package version 3.0.

Application

This unit describes the skills and knowledge required to remove and replace electronic circuit boards and associated equipment in switching, transmission, fixed, mobile radio, access and site environmental management networks, including the various transmission path components.

It applies to linesworkers, technicians or technical supervisors working for carriers, or other service providers. It also applies to work, which may be performed under direction of the relevant authority.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications networks engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for hardware replacement	1.1 Obtain repair/replacement brief, relevant legislation, codes, regulations and standards for the job 1.2 Discuss and record details of hardware to be removed or replaced, and proposed work schedule with the relevant authority 1.3 Inspect network and determine the scope of the repair task

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.4 Work safely according to relevant safety legislation and client practices 1.5 Obtain appropriate new or replacement hardware and associated installation documentation 1.6 Obtain tools and check they are in good working order 1.7 Undertake an impact risk assessment of the hardware replacement with the relevant authority and prepare a contingency plan
2. Replace hardware	2.1 Notify relevant authority of any building or equipment cabinet alarms that might be activated by accessing site 2.2 Verify serial/part numbers of replacement card 2.3 Determine card suite, rack, shelf and slot location 2.4 Remove and replace connecting cables and card as required 2.5 Replace electronic equipment, as instructed by the relevant authority, following relevant anti-static precautions 2.6 Complete associated jumpering or cabling as required 2.7 Request relevant authority or integration team to activate the card 2.8 Escalate any hardware replacement problems with the relevant authority and implement contingency plan 2.9 Restore pressurisation systems as required
3. Clean up worksite and complete required documentation	3.1 Remove and dispose of waste and debris from worksite, according to environmental requirements, and restore work area 3.2 Recover faulty equipment and return to appropriate point for disposal or refurbishment 3.3 Complete documentation, update fault records and make recommendations according to the client practices 3.4 Notify relevant authority of job completion and obtain sign-off

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance	Description

© Commonwealth of Australia, 2025 Future Skills Organisation

	Criteria	
Reading	1.1, 1.2, 1.3, 1.4, 1.5, 2.1, 2.2, 2.3, 3.3	• Recognises and interprets technical, regulatory and enterprise documentation
Writing	1.2, 1.3, 1.7, 2.1, 3.3, 3.4	• Uses clear, specific and industry-related terminology to complete and update workplace documentation
Oral Communication	1.2, 1.7, 2.1, 2.7, 2.8, 3.4	• Liaises with a range of personnel about technical and operational requirements using specific and relevant language • Uses listening and questioning techniques to confirm understanding
Numeracy	1.2, 1.5, 2.2, 2.6, 3.3	• Uses mathematical formulae to calculate power, voltage, current and the resistance, capacitance or inductance of various components
Navigate the world of work	1.1, 1.4, 2.5, 3.1, 3.2, 3.3	• Complies with policies, procedures and legislative requirements relevant to own role
Interact with others	1.2, 1.7, 2.1, 2.7, 2.8, 3.4	• Uses appropriate practices and protocols to communicate effectively with a range of personnel
Get the work done	1.1, 1.3, 1.5, 1.6, 1.7, 2.1, 2.3, 2.4, 2.6, 2.7, 2.8, 2.9, 3.1, 3.2, 3.3, 3.4	• Plans, sequences and carries out tasks to meet required outcomes • Analyses task requirements to made routine decisions, taking some situational factors into account • Anticipates potential problems and prepares contingency plans • Follows required procedures when responding to problems • Understands purpose and some specific functions of common digital tools used in work contexts

Assessment Requirements for ICTTEN310 Remove and replace electronic circuit boards in carrier equipment

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 3.0.

Performance Evidence

Evidence of the ability to:

- interpret, discuss and confirm required work
- obtain documentation, equipment and hardware for required work
- notify relevant personnel of alarms that could be activated in the access and restoration of equipment cabinets and enclosures
- prepare a contingency plan to use if card replacement is unsuccessful, in consultation with relevant personnel
- remove and replace circuit boards as instructed by relevant authority, following work health and safety (WHS) requirements and anti-static precautions
- replace telecommunications hardware according to client practices
- follow required practices or contingency plan if hardware replacement is unsuccessful
- update fault records and complete required documentation
- restore site to required condition
- liaise with personnel from relevant authority for information and reporting purposes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain application of direct current (DC) and alternating current (AC) electrical principles to the removal and replacement of circuit boards
- describe static electricity and its impact on electronic circuit boards in telecommunications equipment
- outline performance testing and fault finding techniques of telecommunications networks
- describe the purpose and operation of common testing equipment

© Commonwealth of Australia, 2025 Future Skills Organisation

- describe the behaviour of faulty network elements including symptoms and impact on network
- summarise common telecommunications hardware and network structures
- list types of power sources used in telecommunications networks.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a suitable site to replace telecommunications network hardware
- a range of hardware currently used in industry
- a range of general and test equipment required for testing telecommunications network hardware.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN402 Estimate and quote for customer telecommunications equipment installation

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to assess and estimate costs for all types of customer cabling needs.

It applies to individuals who undertake successful negotiations with customers and suppliers, and who update schematic drawings and specifications.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Confirm and update schematic drawings and specifications	1.1 Obtain existing specifications and drawings and prepare additional or new schematic drawings and specifications for installation if required 1.2 Confirm all fittings, cable types and equipment locations with customer
2. Price labour, materials and other relevant items	2.1 Obtain quotations and delivery dates from suppliers to ensure

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
and establish availability	fair comparisons across suppliers 2.2 Estimate labour costs based on company or industry labour rates and conditions 2.3 Check pricing documentation to ensure supply proposal matches customer specification for material, quality and performance
3. Estimate labour, materials and other relevant item requirements	3.1 Prepare estimations allowing for contingencies during installation and relevant legislation, codes, regulations and standards 3.2 Calculate costs using standard unit measures where relevant 3.3 Ensure estimates will return a profit on installation where appropriate
4. Prepare and confirm quote with customer	4.1 Prepare an equipment installation quote that meets customer requirements 4.2 Negotiate changes and variations to meet customer and company needs
5. Establish customer's financial arrangements	5.1 Obtain customer’s approval of purchase arrangements and method of payment 5.2 Complete finance company negotiations successfully, where required, and obtain customer’s agreement

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 2.3	• Recognises and interprets technical documentation such as equipment manuals and specifications and other drawings to determine job requirements
Writing	1.1, 1.2, 3.1, 4.1, 4.2, 5.1, 5.2	• Uses clear, specific and industry-related terminology to produce and update workplace documentation
Oral Communication	1.2, 4.2, 5.1, 5.2	• Participates in an oral exchange with customers and suppliers, requiring some negotiation and liaison on technical and operational matters
Numeracy	2.2, 3.1-3.3	• Uses mathematical formulae to measure equipment

© Commonwealth of Australia, 2025 Future Skills Organisation

		requirements and accurately calculate equipment costs
Navigate the world of work	3.1	• Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements
Get the work done	1.1, 2.1, 5.2	• Determines job priorities, resources and equipment, and works logically and systematically to undertake clearly defined and familiar tasks in a safe manner • Implements actions according to a predetermined plan, making slight adjustments if necessary • Takes responsibility for routine decision-making by selecting from a range of predetermined options in routine situations, and identifying and taking some situational factors into account • Initiates standard procedures when responding to familiar equipment and logistics problems within immediate context

Unit Mapping Information

Code and title current version	**Code and title previous version**	**Comments**	**Equivalence status**
ICTTEN402 Estimate and quote for customer telecommunications equipment installation	ICTTEN4003B Estimate and quote for customer telecommunications equipment installation	Updated to meet Standards for Training Packages.	Equivalent unit

Assessment Requirements for ICTTEN402 Estimate and quote for customer telecommunications equipment installation

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- determine customer equipment requirements
- prepare detailed estimates, updated schematic drawings and specifications, including material and labour costs for telecommunications equipment installations
- negotiate with contractors on material availability and pricing for customer equipment installations
- complete detailed quotes for installations that allow for variations
- negotiate and confirm variations to quote and financial arrangements with customer.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe features of customer telecommunications equipment
- outline legislation, codes of practice and other formal agreements that impact the work activity
- explain processes and techniques required to prepare plans, estimate and quote for installations
- describe specific work health and safety (WHS) issues that may impact a quotation for customer equipment installation
- outline typical issues and challenges that occur when negotiating with customers.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- sites on which estimates and quotes may be conducted
- relevant databases, licensing requirements and other site- related documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN403 Assign a transmission path

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to allocate channel capacity to a customer or customer group based on details provided in a service request.

It applies to individuals working as technical officers or engineers for private and public organisations. They combine technical skills with organisational skills to assess customer requirements and allocate a transmission medium to provide access to the customer.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Collect data to evaluate capability of transmission path	1.1 Determine service details from service request 1.2 Use transmission medium plans to locate customer position relative to the access network provisioning 1.3 Evaluate existing transmission mediums in close proximity to assess their capability to deliver service to customer 1.4 Specify equipment to be used on the service from service request

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.5 Specify line interface type to be used, according to enterprise guidelines
2. Allocate transmission medium for service	2.1 Select appropriate transmission medium to deliver service to customer's premises 2.2 Record information about transmission medium between customer's premises and exchange or network terminal point 2.3 Verify service delivery point interface at exchange or network terminal point is compatible with required system 2.4 Conduct appropriate allocation process to assign new services and send completed allocation information to appropriate field staff to verify physical allocation before providing service
3. Maintain transmission medium records	3.1 Advise relevant personnel of impending bearer shortages to facilitate future planning allocation 3.2 Update plans and databases to record all details

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.5	• Recognises and interprets technical documentation to determine job requirements
Writing	1.4, 1.5, 2.2, 2.3, 3.1, 3.2	• Uses clear, specific and industry-related terminology to record and notate workplace documentation
Oral Communication	1.4, 1.5, 2.3, 3.1	• Uses listening and questioning skills to confirm understanding of requirements and participates in a verbal exchange with technical staff, subject matter experts and manufacturers • Uses appropriate, detailed and clear language to address key personnel and disseminate information
Numeracy	2.4	• Makes calculations to determine capacity requirements
Interact with others	2.4	• Actively identifies requirements of important communication exchanges, selecting appropriate channels, format, tone and content to suit purpose and

© Commonwealth of Australia, 2025 Future Skills Organisation

		audience
Get the work done	1.3, 2.4, 3.2	• Determines job priorities, resources and equipment, and works logically and systematically to undertake clearly defined and familiar tasks • Implements actions according to a predetermined plan, making slight adjustments if necessary • Takes responsibility for routine decision-making by selecting from a range of predetermined options in routine situations, identifying and taking some situational factors into account • Understands purpose and specific functions of common digital tools used in work contexts

Unit Mapping Information

Code and title current version	**Code and title previous version**	**Comments**	**Equivalence status**
ICTTEN403 Assign a transmission path	ICTTEN4040A Assign a transmission path	Updated to meet Standards for Training Packages.	Equivalent unit

Assessment Requirements for ICTTEN403 Assign a transmission path

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- assess transmission needs for a transmission path according to service request
- select suitable equipment to provide new services
- communicate effectively with stakeholders to meet customer needs
- assess future needs.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- review common customer telecommunications applications and related equipment
- investigate core networks using emerging and converging technologies
- explain current legislation relating to installation of telecommunications equipment and connection to carrier services
- evaluate customer access options and their technical support systems
- describe multiplexing principles and transmission hierarchies
- summarise network and transmission equipment
- outline network topologies, interfaces and interconnect solutions.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- sites where transmission paths can be allocated

© Commonwealth of Australia, 2025 Future Skills Organisation

- a computer networking facility
- relevant regulatory and equipment documentation
- equipment currently used in industry.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN404 Install and configure a wireless mesh network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to connect and test wireless networking equipment or radio communications equipment.

It applies to individuals working as technicians and technical officers for private and public organisations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Configure wireless mesh nodes and wireless access points	1.1 Determine internet protocol (IP) addressing schemes from design plan, obtained from appropriate personnel 1.2 Confirm compatibility of factory installed firmware in wireless routers with mesh routing requirements – otherwise install upgrade firmware 1.3 Configure wireless router settings and wireless fidelity (WiFi) for wireless access point settings for inclusion in mesh network 1.4 Connect mesh node and access node back-to-back via a straight

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	LAN cable according to design plan
2. Connect separate mesh networks via backbone	2.1 Configure routing software on mesh and backbone nodes to enable mesh traffic to reach backbone 2.2 Connect mesh node and backbone node back-to-back via a straight LAN cable 2.3 Configure gateway server and gateway node and add required services to network
3. Test connectivity within mesh network	3.1 Assemble all wireless mesh routers with configuration sheets attached, and power up routers 3.2 Connect PC to a wireless mesh router and confirm an IP address is provided automatically by dynamic host configuration protocol (DHCP) 3.3 Confirm connectivity to mesh nodes and the gateway by pinging individual IP addresses, and rectify faulty nodes if required
4. Test network connectivity via wireless backbone	4.1 Install mesh nodes according to design plan 4.2 Install and align directional antennas on wireless backbone path according to installation instructions and work health and safety (WHS) procedures 4.3 Confirm connectivity between mesh clusters at either end of wireless backbone
5. Clean up worksite and complete administrative work	5.1 Remove waste from worksite, dispose of according to environmental requirements and restore work area to customer's satisfaction 5.2 Update documentation records and make recommendations according to enterprise policy 5.3 Notify customer of job completion and obtain sign-off

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	4.2, 5.2	• Recognises and interprets technical documentation to

© Commonwealth of Australia, 2025 Future Skills Organisation

		determine job requirements
Writing	5.2, 5.3	• Uses clear, specific and industry-related terminology to produce and update workplace documentation in predetermined formats
Numeracy	1.3, 2.3	• Performs calculations to interpret results and evaluate different types of technical data and configure system performance
Navigate the world of work	4.2, 5.1, 5.2	• Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements relevant to own work context
Interact with others	1.1, 5.3	• Selects appropriate form, channel and mode of communication when liaising with customers, vendors and installation personnel on technical and operational matters
Get the work done	1.2, 1.3, 1.4, 2.1, 2.2, 2.3, 3.1, 3.2, 3.3, 4.1, 4.2, 4.3	• Understands key principles and concepts underpinning design and operation of digital systems and tools and applies these when troubleshooting existing technology and when seeking to understand the potential of new technology • Determines job priorities, resources and equipment, and works logically and systematically to undertake clearly defined and familiar tasks • Implements actions according to a predetermined plan, making adjustments if necessary • Takes responsibility for routine decision-making by selecting from a range of predetermined options in routine situations, identifying and taking situational factors into account • When dealing with complex issues, may use intuition to identify problems, switching to analytical processes to modify activities depending on operational contingencies, risk situations and environments to generate possible solutions

Assessment Requirements for ICTTEN404 Install and configure a wireless mesh network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- configure wireless mesh nodes
- install wireless mesh nodes, access point nodes and gateway
- test nodes for connectivity.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain requirements for 802.11 wireless protocols
- describe allocation of internet protocol (IP) addresses and subnet masks
- summarise antenna gain and polarisation
- outline cable loss
- explain calculation of effective isotropic radiated power (EIRP)
- explain calculation of line of site radio range
- explain decibels and related units
- outline network topologies
- describe radio frequency (RF) bands
- summarise routing protocols
- outline transmission control protocols(TCP)-IP describe wireless networking hardware, access points, wireless routers and gateway.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- sites on which configuring and installing wireless mesh network may be conducted
- technical documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN406 Effect changes to existing customer premises equipment systems and equipment

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to effect changes to existing customer premises' equipment (CPE), systems and products, through producing plans, carrying out alterations and testing new work.

It applies to individuals who may be working as linespeople, line installers and technicians for telecommunications carriers, contractors, other service providers or private providers who upgrade or modify customer equipment and systems.

No licensing, legislative or certification requirements apply to this unit at the time of publication

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare requirements for alteration	1.1 Arrange site access according to required procedure and comply with site security arrangements and relevant legislation, codes, regulations and standards 1.2 Assess facilities and capacity to ensure requirements can be met 1.3 Evaluate existing system availability and access to accommodate

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	proposed changes 1.4 Notify appropriate personnel of identified safety hazards at worksite 1.5 Evaluate compatibility of existing and proposed systems and equipment before proceeding with planned changes 1.6 Negotiate planned system outages and outage time with the customer
2. Document specifications and plans for alteration	2.1 Produce an amendment plan of systems alterations to assess suitability with existing system 2.2 Produce specifications for alteration requirements according to customer requirements 2.3 Select materials and tools and equipment compatible with upgrade activity
3. Install additional equipment and program system feature changes	3.1 Produce an activity plan for minimal disruption of alterations to ongoing client activity 3.2 Carry out all alterations in a safe manner according to relevant standards and regulations and manufacturer's specifications 3.3 Test new work in isolation and when integrated with existing systems to confirm compatibility of alterations with existing network
4. Update plans and records	4.1 Update all plans and documents to show installed systems accurately and clearly 4.2 Complete documentation for customer support
5. Restore site to required condition	5.1 Remove waste and debris from worksite and dispose of according to environmental requirements to maintain safe worksite conditions 5.2 Recover obsolete equipment and return to customer or disposal of as agreed with customer 5.3 Notify customer of job completion and obtain sign-off

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

© Commonwealth of Australia, 2025 Future Skills Organisation

Skill	Performance Criteria	Description
Writing	2.1, 2.2, 3.1, 4.1, 4.2, 5.3	• Completes workplace documentation accurately using appropriate form and vocabulary for intended audience
Oral Communication	1.4, 5.3	• Conveys specific messages efficiently and uses an appropriate tone and vocabulary for intended audience
Navigate the world of work	1.1, 3.2, 5.1, 5.2	• Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements relevant to own work context
Interact with others	1.4, 1.6, 5.2	• Selects appropriate form, channel and mode of communication when liaising with customers and personnel on technical and operational matters
Get the work done	1.1, 1.3, 1.5, 2.1, 2.2, 3.1, 3.3	• Prioritises and plans work to meet deadlines and client expectations • Uses digital technologies and systems to complete required tasks

Assessment Requirements for ICTTEN406 Effect changes to existing customer premises equipment systems and equipment

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- identify customer's needs
- develop plans and drawings to give effect to planned changes to systems and equipment
- alter system and equipment including physical and programming change according to work health and safety (WHS) regulations and relevant standards
- identify, conduct and interpret tests appropriate to the change
- notify customer and relevant personnel of progress.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline legislation, codes of practice and other formal agreements that impact changes to customer equipment and systems
- identify manufacturer's requirements for safe operation of equipment
- define network addressing
- consider specific WHS requirements relating to customer premises' equipment
- establish types of customer premises' equipment (CPE) that may require upgrade
- describe typical issues and challenges that occur on site
- identify vendor products.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications network engineering field of work and include access to:

- systems and equipment to effect changes
- appropriate manuals and specifications
- relevant enterprise policies.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN407 Cut over customer premises equipment major upgrades

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to cut over major equipment and network upgrades in customer premises, and test and rectify problems.

It applies to individuals working at a supervisory level who may be in charge of installation and maintenance teams responsible for new installations and upgrades of telecommunications customer premises equipment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for cut over	1.1 Obtain relevant legislation, codes, regulations and standards for compliance when conducting work 1.2 Notify customer for site access, security arrangements and location details of customer equipment for major upgrade 1.3 Identify site hazards and notify appropriate personnel to make site safe

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.4 Prepare cut over plan and seek approval from customer 1.5 Complete functional testing of new systems and equipment prior to cut over to minimise system downtime 1.6 Notify network carrier of cut over details to prevent unnecessary alarm call-outs and reports 1.7 Organise system back-up with support personnel
2. Cut over system and equipment into service	2.1 Conduct cut over works for major system upgrade according to cut over plan with minimal disruption to customer service according to work health and safety (WHS) and environmental requirements 2.2 Conduct tests according to technical manuals and specifications to complete installation task 2.3 Analyse test results to verify system compatibility and interoperability with existing system 2.4 Rectify any problems, if required
3. Finalise work and clean up worksite	3.1 Complete documentation containing installation details and test records 3.2 Amend site records to show existing equipment layout 3.3 Organise customer training in the new or modified system 3.4 Clean up and restore site to customer satisfaction 3.5 Collect and dispose of waste material and debris according to environmental requirements 3.6 Notify customer of job completion to obtain sign-off and present with a copy of documentation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Writing	1.4, 3.1, 3.2, 3.6	• Completes workplace documentation accurately using appropriate form and vocabulary for intended audience
Oral Communication	1.2, 1.3, 1.6, 3.6	• Conveys specific messages efficiently and uses an appropriate tone and vocabulary for intended audience

© Commonwealth of Australia, 2025 Future Skills Organisation

Numeracy	2.3	• Interprets numerical information to assist decision-making
Navigate the world of work	1.1-1.3, 2.1, 2.2, 3.4, 3.5	• Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements relevant to own work context
Interact with others	1.4, 1.7, 3.3	• Selects appropriate form, channel and mode of communication when liaising with customers and personnel on technical and operational matters
Get the work done	1.4, 1.5, 1.7, 2.1, 2.2, 2.4, 3.3	• Considers a range of complex factors when planning and completing tasks to ensure work is completed accurately and safely • Applies problem-solving processes to determine solutions for less predictable problems • Recognises and anticipates a range of problems, actively looking for early warning signs and implementing contingency plans when appropriate • Uses digital technologies and systems to complete required tasks

Assessment Requirements for ICTTEN407 Cut over customer premises equipment major upgrades

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- develop and implement an effective cut over plan
- identify and organise resources including customer resources and access as necessary to complete cut over
- conduct cut over and relevant tests according to work health and safety (WHS) and environmental requirements
- interpret test results to identify and resolve problems
- finalise administrative tasks and initiate training.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline cut over procedures
- define customer premises' equipment CPE
- illustrate features and operating requirements of test equipment
- outline information required to operate equipment according to a test specification
- outline legislation, codes of practice and other formal agreements that impact the work activity
- explain manufacturer's requirements for safe operation of equipment
- describe specific work health and safety (WHS) requirements relating to activity and site conditions
- explain test methods and performance requirements
- describe typical issues and challenges that occur on site.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications network engineering field of work and include access to:

- a site where cut over can be conducted
- plant, tools and equipment currently used in the industry
- relevant regulatory and equipment documentation impacting work activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN408 Complete equipment and software upgrades

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to upgrade telecommunications equipment and software in service provider networks and customer premises, and may apply to switching, transmission, radio, and computer networks using cable, optical fibre, radio, microwave and satellite transmission.

It applies to individuals who supervise installation and maintenance teams involved in new installations or maintenance, upgrades and cut overs of emerging technologies in IP-based telecommunications networks.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for upgrade activity	1.1 Obtain relevant legislation, codes, regulations and standards for compliance when conducting work 1.2 Contact customer for site access, security arrangements and location details of equipment for upgrade 1.3 Identify site hazards and notify appropriate personnel to make

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	site safe 1.4 Prepare an upgrade plan against work order and seek approval from customer 1.5 Organise system back-up from support personnel 1.6 Obtain tools and test equipment and check for accuracy and safety 1.7 Allocate specific tasks according to the skill mix of staff involved 1.8 Run test plan on current equipment and identify and rectify problems in consultation with planners 1.9 Complete functional testing of new systems and equipment prior to upgrade to minimise system downtime 1.10 Analyse test results to predict compatibility and interoperability issues of equipment and systems prior to the upgrade work
2. Undertake upgrade	2.1 Implement upgrade according to design specification, following work health and safety (WHS) and environmental requirements 2.2 Follow procedures for upgrade of network in sequential order as defined in instruction manuals 2.3 Monitor progress of upgrade periodically to ensure plans in relation to time and duration are being met 2.4 Notify planner of problems encountered with detail of the impact on the upgrade plan 2.5 Abort upgrade and implement contingency plan if upgrade plan cannot be realised without major disruption to network 2.6 Monitor system response during upgrade and take action according to instructions provided
3. Test upgrade for acceptance	3.1 Undertake tests according to predetermined test plan 3.2 Analyse test results and verify against specified performance levels 3.3 Escalate problems encountered according to enterprise policy 3.4 Invoke reversion procedure to pre-upgrade state, if directed by planners, according to enterprise policy 3.5 Record upgrade test results and provide to network management group 3.6 Run post-upgrade routines according to documented

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	procedures
4. Monitor post-upgrade performance	4.1 Conduct ongoing tests to ensure success of upgrade 4.2 Monitor relevant alarms to measure impact of upgrade 4.3 Review customer complaints to assess impact of upgrade on customer satisfaction
5. Finalise administrative work and clean up worksite	5.1 Complete relevant work documentation and administrative tasks according to enterprise policy 5.2 Amend site records to show upgraded equipment layout 5.3 Organise customer training in the new or modified system 5.4 Clean up and restore site to customer satisfaction 5.5 Collect and dispose of waste material and debris according to environmental requirements 5.6 Declare asset ready for use 5.7 Notify customer of upgrade job completion to obtain sign-off of work order and present with a copy of documentation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	2.1, 2.2, 2.6, 4.3	• Interprets and analyses complex technical information
Writing	1.4, 3.5, 5.1, 5.2, 5.7	• Employs appropriate vocabulary and tone to convey specific information to different audiences
Oral Communication	1.2, 2.4, 5.7	• Conveys specific messages efficiently and uses an appropriate tone and vocabulary for intended audience
Numeracy	1.10, 3.2, 3.5	• Performs calculations to analyse data and records results in required format
Navigate the world of work	1.1-1.3, 1.5, 1.6, 2.1, 2.2, 3.3, 3.4, 3.6, 5.1, 5.4, 5.5	• Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements relevant to own work context
Interact with	1.4, 1.5, 1.7, 1.8,	• Selects appropriate form, channel and mode of

© Commonwealth of Australia, 2025 Future Skills Organisation

others	2.4, 5.4	communication when liaising with customers and personnel on technical and operational matters
Get the work done	1.7-1.10, 2.3, 2.5, 2.6, 3.1-3.6, 4.1, 4.2, 5.3, 5.6	• Organises, plans and sequences own workload and schedules work activities of others • Applies problem-solving processes and reviews impact to ensure solutions or contingency plans are effective • Uses digital technologies and systems to complete work tasks

Unit Mapping Information

Assessment Requirements for ICTTEN408 Complete equipment and software upgrades

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- analyse implications of hardware and software upgrade on remainder of the network
- identify components of the upgrade process
- prepare an upgrade plan and organise system back-up
- run test plan and analyse test results
- implement upgrade according to work health and safety requirements
- monitor progress of upgrade periodically using both vendor- and enterprise-specific monitoring tools
- implement contingency plan when required, and analyse alarms and alarm conditions
- escalate unresolved problems and review customer complaints to assess impact of upgrade
- make necessary arrangements with the customer for site access and training.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain alarms used to monitor operation of computer software systems
- explain use of back-up systems
- illustrate common upgrades and post-upgrade routines
- describe escalation and outage procedures
- investigate network management systems
- outline telecommunications networks and equipment
- identify telecommunications monitoring tools
- describe telecommunications test equipment and test set-ups
- describe telecommunications wiring practices.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a site where upgrade may be conducted
- equipment, software, test and monitoring equipment currently used in industry
- relevant regulatory, equipment, enterprise and vendor documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN409 Commission an electronic system

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to commission an electronic system with applications, including cellular telemetry, voice over IP (VoIP), radio frequency identification (RFID), supervisory control and data acquisition (SCADA) networks and SCADA security, telephony, data, video, IP television (IPTV) and multimedia.

It applies to individuals who may work as field officers and technicians employed by telecommunications carriers, service providers or contractors.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to commission electronic system	1.1 Prepare for work following work health and safety (WHS) requirements 1.2 Organise resources based on existing and potential site hazards 1.3 Contact customer or network operations personnel for site access and network specifications 1.4 Determine function and requirements of electronic system from

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	specifications 1.5 Identify potential security threats and vulnerability where remote monitoring and control via public telecommunications network or internet are used, and report to appropriate personnel 1.6 Verify installed electronic system and associated cabling conform to specifications, and assess compatibility of system units 1.7 Establish commissioning dates with all parties and establish planned outage 1.8 Check suitability and calibration status of test equipment 1.9 Produce a preliminary commissioning plan according to manufacturer's instructions and enterprise guidelines for discussion with the customer
2. Organise planned outages	2.1 Negotiate outage times with appropriate groups and affected customers to minimise disruptions 2.2 Arrange for emergency communications based on contingency plans 2.3 Notify alarm management centre of planned action 2.4 Obtain authority to proceed from relevant control centre and notify customers affected by the outage
3. Perform commissioning procedures	3.1 Configure electronic system parameters and install software according to manufacturer’s specifications and customer requirements 3.2 Conduct tests according to manufacturer’s specifications and industry practice 3.3 Conduct cut over according to project design and industry practice in consultation with appropriate personnel 3.4 Conduct a security audit, including remote threat analysis in applications where the public telecommunications network or internet is linked to the overall electronic system
4. Finalise commissioning	4.1 Record configuration information and update relevant databases according to enterprise and network guidelines 4.2 Notify appropriate person of commissioning results and work completion 4.3 Complete administrative tasks according to industry practice and enterprise guidelines

© Commonwealth of Australia, 2025 Future Skills Organisation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.4	• Interprets complex information to determine job requirements
Writing	1.9, 4.1	• Completes technical workplace documentation using vocabulary and form appropriate to intended audience
Navigate the world of work	1.1, 1.5-1.7, 4.1, 4.3	• Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements relevant to own work context
Interact with others	1.3, 1.5, 1.6, 2.1, 2.3, 2.4, 4.2	• Collaborates and negotiates with others to achieve specific goals • Selects appropriate form, channel and mode of communication when liaising with customers and personnel on technical and operational matters
Get the work done	1.2, 1.4, 1.7, 1.8, 1.9, 2.2, 3.1-3.4	• Considers a range of complex factors when completing set tasks to ensure work is completed accurately and safely • Recognises and anticipates a range of problems, actively looking for early warning signs and implementing contingency plans when appropriate • Uses digital technologies and systems to complete required tasks

Assessment Requirements for ICTTEN409 Commission an electronic system

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- effectively negotiate arrangements for commissioning
- accurately configure electronic equipment and system parameters
- commission electronic system according to specifications and following work health and safety (WHS) requirements
- deal with faults and problems and provide solutions
- identify potential security threats and vulnerability.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain acceptance testing
- formulate a commissioning procedure and commissioning tests for an electronic system
- identify electrical and optical properties to be measured
- evaluate an extensive range of networking equipment
- outline legislation and licensing associated with installation of telecommunications equipment
- outline network operation procedures
- explain power requirements and electrical safety
- explain setup and operation of test equipment applicable to a wide range of measurements
- outline transmission type and signals that may be encountered.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- sites on which installation and commissioning procedures may be conducted
- relevant regulatory and equipment documentation
- testing equipment currently used in industry.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN410 Locate, diagnose and rectify faults

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to locate, diagnose and rectify faults in telecommunications networks.

It applies to individuals who may work as telecommunications officers, communications cablers, or installers of customer premises' equipment, for optical and radio frequency (RF) equipment, multimedia and IP networks.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan to locate and rectify fault	1.1 Prepare for given work according to relevant legislation, work health and safety (WHS) regulations, codes, standards and identified hazards 1.2 Arrange site access according to required procedure 1.3 Obtain information on the nature of fault from the customer 1.4 Obtain suitable testing tools and equipment and specify personal

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	protective equipment 1.5 Conduct fault-finding using methodical and safe practices suitable for system and problem type
2. Locate and diagnose fault	2.1 Conduct appropriate test to identify type of fault 2.2 Isolate fault progressively to remove likely variables from assessment 2.3 Locate fault without undue interruptions to customer activity, in the shortest possible time 2.4 Notify customer of findings
3. Rectify fault	3.1 Determine options to rectify fault, and present options to customer 3.2 Advise customer of costs of any repair not covered by service agreement 3.3 Rectify fault if in agreement with client 3.4 Conduct work in a manner which is safe for repairer and customer 3.5 Refer any unresolved faults to other parties for resolution or escalation if required
4. Complete documentation and clean up worksite	4.1 Advise customer of successful fault clearance and secure sign-off 4.2 Complete all records 4.3 Complete reports to justify fault diagnosis and rectification methodology, if required 4.4 Remove all waste and debris from worksite and dispose of them according to environmental requirements 4.5 Restore any changes made to worksite during fault repair to the customers satisfaction

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

© Commonwealth of Australia, 2025 Future Skills Organisation

Writing	4.1, 4.2, 4.3	• Completes technical workplace documentation using appropriate language and form to meet specific purpose
Oral Communication	1.3, 2.4, 3.2	• Articulates specific requirements clearly and checks understanding • Uses questioning and active listening to obtain required information
Numeracy	2.1	• Interprets numerical data from network tests
Navigate the world of work	1.1, 1.2, 3.4, 4.4, 4.5	• Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements relevant to own work context
Interact with others	1.3, 3.1, 3.3, 3.5, 4.1	• Selects appropriate form, channel and mode of communication when liaising with customers and personnel on technical and operational matters
Get the work done	1.2, 1.4, 1.5, 2.1, 2.2, 2.3, 3.1, 3.3	• Plans and implements tasks in line with organisational expectations, legislative requirements and work role • Recognises and anticipates a range of problems, actively looking for early warning signs and implementing contingency plans when appropriate • Uses digital technologies and systems to complete required tasks

Assessment Requirements for ICTTEN410 Locate, diagnose and rectify faults

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- effectively identify different faults
- establish context and background information, and determine and rank likely causes of fault
- obtain suitable tools and equipment and apply simple checks, tests and fault-finding methodology
- apply recommended means to rectify fault
- comply with all related work health and safety (WHS) requirements and work practices
- ensure customer and relevant personnel are informed of progress.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- evaluate various fault-finding techniques for different networking situations
- specify and evaluate test equipment used for fault finding
- specify safety standards required when testing different types of systems
- outline common network faults and their rectification
- explain the value of specific regulatory and other documentation required when testing and reporting on test results.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- an appropriate site
- test and related equipment currently used in industry
- relevant technical specifications and requirements
- regulatory and site-related documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN411 Monitor, analyse and action telecommunications network alarms

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to diagnose problems, restore a network, normalise an alarm system and examine the impact on a network.

It applies to individuals who are proficient communicators, excellent trouble-shooters and who have a clear understanding of network alarm systems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan response to network alarm	1.1 Determine alarm severity and specific network elements affected from presentation of alarm 1.2 Assess likely impact to client and network of the alarm 1.3 Notify the network operating centre (NOC) and other relevant parties of alarm condition 1.4 Prioritise actioning of alarms according to existing service level

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	agreement obligations and enterprise policy 1.5 Assess impact of any outage issues and major customers affected 1.6 Provide information to and seek advice from other relevant parties in identifying the problem and cause of the alarm condition 1.7 Diagnose likely cause of alarm condition using established methodical strategies 1.8 Escalate diagnosis to higher level fault clearance unit according to enterprise policy where necessary
2. Arrange rectification of network problem	2.1 Implement enterprise policy relating to outages as required 2.2 Rectify network problems when appropriate capability and time constraints can be met 2.3 Enact escalation procedures according to enterprise policy 2.4 Make all alarm data and diagnosis available to other areas with responsibility and jurisdiction for network restoration 2.5 Provide clear and concise instructions to field staff to facilitate all repair efforts 2.6 Monitor progress of the network repair effort 2.7 Apply enterprise policy in relation to alarms requiring no further action
3. Complete alarm clearance tasks	3.1 Reset alarms following network restoration 3.2 Notify all relevant parties of problem rectification 3.3 Undertake appropriate cause and effect studies to prevent re-occurrence of problem 3.4 Complete administrative tasks and recommend any changes required by the enterprise quality assurance system

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.4, 1.8, 2.1, 2.3,	• Recognises and interprets complex technical data and procedures to determine job requirements

© Commonwealth of Australia, 2025 Future Skills Organisation

	2.7, 3.4	
Writing	1.3, 2.5, 3.2, 3.4	• Uses clear, specific and industry-related terminology to produce and update workplace documentation
Oral Communication	1.3, 2.5, 3.2	• Articulates requirements clearly and concisely to provide advice and guidance to others and to liaise with technical personnel working across different levels and in different contexts • Uses well-developed listening and questioning techniques to confirm understanding
Numeracy	1.1	• Uses mathematical formulae to interpret numerical data
Interact with others	1.6, 2.4	• Actively identifies requirements of important communication exchanges, selecting appropriate channels, format, tone and content to suit purpose and audience
Get the work done	1.1, 1.2, 1.4, 1.5, 1.7, 1.8, 2.1, 2.2, 2.6, 3.1, 3.3, 3.4	• Understands key principles and concepts underpinning the design and operation of digital systems and tools, and applies these when troubleshooting existing technology and when seeking to understand the potential of new technology • Works logically and systematically to monitor, analyse and action job priorities • Implements actions according to a predetermined plan, making adjustments if necessary • Makes decisions quickly and intuitively in familiar situations requiring immediate attention, drawing on past experience to identify key variables and determine the best course of action • Uses analytical processes to decide on a course of action, establishing criteria for deciding between options and seeking input and advice from others when necessary

Assessment Requirements for ICTTEN411 Monitor, analyse and action telecommunications network alarms

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- monitor and analyse a range of network alarms including use of fault history and ranking of likely causes
- ensure customers and relevant personnel are appropriately notified of network status
- undertake and monitor network repairs
- plan and coordinate actioning of network alarms.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- define purpose of escalation policies and procedures for network alarm systems
- describe installed telecommunications systems and equipment
- explain principles and use of path protection
- outline key components of a telecommunications network
- evaluate commonly used test equipment and test procedures
- outline typical problems and challenges that arise in Network Operations Centres (NOCs) and in the field
- describe typical systems and procedures for monitoring alarms.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

© Commonwealth of Australia, 2025 Future Skills Organisation

- sites on which local and remote monitoring and analysis of network alarms may be conducted
- manufacturer's technical documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN412 Undertake routine maintenance of the telecommunications network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to perform routine maintenance of network plant and equipment in various telecommunications switching and transmission environments, including wide area networks (WAN), virtual private networks (VPN) and core networks, using wireless, optical, broadband and Next Generation Networking (NGN) technologies.

It applies to individuals working as field officers or technicians from carriers, contractors and other service providers.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan routine maintenance	1.1 Obtain relevant legislation, codes, regulations and standards for the given work 1.2 Determine network elements requiring maintenance, and maintenance details from manufacturer's equipment manual

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.3 Notify the Network Operations Centre (NOC) of proposed maintenance schedule and maintenance details to minimise disruption to the network 1.4 Assess potential impact of proposed maintenance on customers and network, and plan for possible outage or deferral of maintenance 1.5 Obtain necessary tools, test equipment and resources to undertake maintenance 1.6 Produce a written schedule of planned routine maintenance 1.7 Negotiate schedules and access with the customer, and find out where equipment to be maintained is located on customer premises 1.8 Ascertain and record network stability to determine network performance
2. Undertake planned maintenance	2.1 Conduct routine maintenance tasks following work health and safety (WHS) and environmental requirements, and record results 2.2 Escalate unresolved faults according to established enterprise procedure 2.3 Test network equipment for required performance following routine maintenance 2.4 Check operation of associated network equipment to ensure the maintenance did not generate other faults or alarms
3. Report on routine maintenance and document results	3.1 Notify all relevant parties of results of the routine maintenance 3.2 Update routine maintenance logs and record other additional work for inclusion in the next cycle of maintenance 3.3 Complete administrative tasks and recommend any changes as required by the enterprise quality assurance system 3.4 Notify NOC of job completion and obtain sign-off

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 2.2, 3.3	• Recognises and interprets plans, specifications, complex technical data and procedures to determine

Assessment Requirements for ICTTEN412 Undertake routine maintenance of the telecommunications network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- plan a detailed routine maintenance schedule
- conduct and record routine maintenance activities procedures and techniques
- test network equipment and analyse results
- carry out works in compliance with site risk controls, work health and safety (WHS), environmental, quality and communication requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe computer systems required to facilitate a routine maintenance check of a telecommunications network
- explain the operation of network alarm systems
- describe the function and purpose of network management systems
- outline key components of a telecommunications network equipment and architecture, and their function including:
  - switching
  - mobile communications
  - satellite
  - transmission
  - antennas
  - radio frequency
  - basic telephony

© Commonwealth of Australia, 2025 Future Skills Organisation

- identify and specify telecommunications test equipment, test configurations, and analysis of results for a range of telecommunications network problems
- describe WHS risks associated with routine maintenance tasks
- explain telecommunications wiring practices
- explain the use of a scheduler
- describe the importance of customer relations when dealing with clients, in particular, obligations and expectations of the technician
- describe the operation, application and characteristics of digital logic integrated circuits and installation packages
- outline the importance of enterprise policies and procedures for:
  - escalation of issues
  - enterprise information systems

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- sites on which routine maintenance may be conducted
- maintenance tools and test instruments currently used in industry
- relevant regulatory and equipment documentation impacting maintenance activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN413 Undertake remote diagnosis and repair of network faults

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to undertake fault diagnostic and repair strategies for working with remote network equipment.

It applies to individuals working as field technicians, remotely accessing the network and the Network Operation Centre (NOC) which controls the coordination of remote network activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Diagnose remote faults	1.1 Install remote access software on notebook computers 1.2 Verify network fault by analysing relevant data 1.3 Investigate context and background information relevant to the network fault 1.4 Source appropriate documentation and test equipment relevant to

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	the network fault 1.5 Conduct appropriate tests and analyse results 1.6 Diagnose network faults using established methodical strategies in a timely fashion without disruption to other services
2. Plan remote repair	2.1 Assess involvement level of the NOC in planning the repair 2.2 Plan for any necessary outages and notify customers 2.3 Develop repair strategies to clear fault 2.4 Develop a strategy for rerouting customer traffic if applicable 2.5 Advise on-site personnel of required work and clearly communicate the repair strategy
3. Repair fault	3.1 Initiate remote repair strategies to reconfigure or repair remote equipment in a manner safe to self, fellow workers, network equipment and public 3.2 Inform customers of repair progress where fault has caused degradation of service or outage 3.3 Escalate unresolved faults according to established enterprise procedure 3.4 Test remote repair for required performance 3.5 Assess ongoing network performance and the likelihood of further problems
4. Report remote diagnosis and repair and document results	4.1 Notify all relevant parties of results of remote diagnosis and repair 4.2 Record details relating to any outage according to enterprise procedures 4.3 Complete all relevant documentation and recommend any changes required by the enterprise quality assurance system

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

© Commonwealth of Australia, 2025 Future Skills Organisation

Reading	1.2, 1.3, 3.3, 4.2, 4.3	• Recognises and interprets complex technical data, procedures, equipment, system manuals and specifications
Writing	2.2-2.5, 3.2, 4.1-4.3	• Uses clear, specific and industry-related terminology to produce and update workplace documentation and make recommendations
Oral Communication	2.2, 2.5, 3.2, 4.1	• Articulates clearly and concisely to provide advice and guidance to technical personnel working across different levels and in different contexts • Uses well-developed listening and questioning techniques to confirm understanding
Numeracy	1.2, 1.5	• Interprets a wide variety of numerical readings and data
Navigate the world of work	3.1, 3.3, 4.2	• Takes personal responsibility for adherence to legal and regulatory responsibilities, and enterprise policies and procedures relevant to own work • Alerts others of issues that may affect self or others, with specific reference to safety
Interact with others	2.2, 3.2, 4.1	• Selects and uses appropriate conventions and protocols when communicating with customers and technical staff in a range of work contexts
Get the work done	1.1, 1.3-1.6, 2.1-2.3, 3.1, 3.3-3.5, 4.3	• Understands key principles and concepts underpinning design and operation of digital systems and tools, and applies these when troubleshooting existing technology • Works logically and systematically to monitor, analyse and action job priorities • Implements actions according to a predetermined plan, making adjustments if necessary • Makes decisions quickly and intuitively in familiar situations requiring immediate attention, drawing on past experience to identify key variables and determine the best course of action • Uses analytical processes to decide on a course of action, establishing criteria for deciding between options and seeking input and advice from others when escalating difficulties

Assessment Requirements for ICTTEN413 Undertake remote diagnosis and repair of network faults

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- communicate effectively with relevant parties, using appropriate technical and non-technical language
- diagnose and identify faults, including using fault history and ranking likely causes
- plan and coordinate repair of network faults
- apply enterprise escalation and outage procedures following related work health and safety (WHS) requirements and work practices
- ensure customers and others are kept notified of works progress.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe telecommunications systems and equipment and technologies likely to be encountered in remote networks
- explain principles and use of path protection
- outline key components of a telecommunications network
- describe test equipment and test procedures required for determining network faults
- evaluate test results and specify solutions
- explain typical problems and challenges that arise in Network Operations Centres (NOCs) and in the field.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- sites on which remote diagnosis and repair of network may be conducted
- test equipment currently used in industry
- manufacturer's technical documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN414 Repair telecommunication system faults

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to examine a customer report or a maintenance schedule, and diagnose faults which may be in optical, computer, radio, satellite, security or radio frequency identification (RFID) systems found in customer and service provider access networks.

It applies to individuals working as field officers, technicians or technical supervisors from carriers, contractors or other service providers.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for equipment repairs	1.1 Obtain relevant legislation, codes, regulations and compliance standards for conducting work 1.2 Identify hazards, make worksite safe according to relevant safety legislation and company work practices and use personal protective equipment 1.3 Notify customer and other appropriate personnel of work, and

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	arrange for site access and security where required 1.4 Obtain fault details to determine type of system fault 1.5 Determine the type of repair required according to enterprise guidelines, site requirements and type of equipment, and arrange for additional technical support as appropriate 1.6 Confirm if warranties and service agreements covering identified repairs exist 1.7 Obtain tools and necessary hardware and ensure replacement parts and material is delivered to the worksite at the required time
2. Repair fault	2.1 Follow work health and safety (WHS) and environmental requirements when carrying out repair or replacement tasks 2.2 Notify appropriate personnel of service disruption and remove network equipment from service 2.3 Diagnose the fault and carry out repair work on equipment according to manufacturer's or enterprise procedures 2.4 Test equipment to manufacturer's specifications following repairs and return to live operation for testing overall performance
3. Complete repair work documentation and administrative tasks	3.1 Notify customer and other appropriate personnel of completion of repair work according to enterprise guidelines 3.2 Record any changes to equipment and store according to enterprise guidelines 3.3 Dispose of waste and debris from worksite according to environmental requirements and enterprise guidelines 3.4 Complete administrative tasks and make recommendations for improvements under quality assurance system

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.5, 1.6, 2.3, 3.1, 3.3, 3.4	• Recognises and interprets complex technical documentation and standards to determine job requirements

© Commonwealth of Australia, 2025 Future Skills Organisation

Writing	1.3, 2.2, 3.1, 3.2, 3.4	• Uses clear, specific and industry-related terminology to produce and update workplace documentation
Oral Communication	1.3, 2.2, 3.1	• Provides information using language appropriate to audience and context • Uses well-developed listening and questioning techniques to confirm understanding
Numeracy	1.5	• Uses mathematical formulae to interpret numerical data including equipment specifications
Navigate the world of work	1.2, 2.1, 3.3	• Takes personal responsibility for adherence to legal and regulatory responsibilities relevant to own work context
Interact with others	1.3, 2.2, 3.1	• Selects and uses appropriate conventions and protocols when communicating with customers and technical staff in a range of work contexts
Get the work done	1.1, 1.3-1.5, 1.7, 2.3, 2.4	• Understands key principles and concepts underpinning design and operation of digital systems and tools, and applies these when troubleshooting existing technology • Works logically and systematically to monitor, analyse and action job priorities • Implements actions according to a predetermined plan, making adjustments if necessary • Makes decisions quickly and intuitively in familiar situations requiring immediate attention, drawing on past experience to identify key variables and determine the best course of action • Initiates standard procedures when responding to familiar problems within immediate context

Assessment Requirements for ICTTEN414 Repair telecommunication system faults

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- communicate effectively with customers and other personnel, using appropriate technical and non-technical language to ensure understanding
- diagnose and identify faults methodically, using fault history and recognition of likely causes
- repair telecommunication equipment according to manufacturer's or enterprise procedures, applying related work health and safety (WHS) requirements and work practices
- test equipment following repairs and put back into commission
- communicate with personnel and customers during and upon completion of works.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe anti-static procedures required to protect equipment under repair
- outline enterprise policies and procedures
- summarise fault diagnosis techniques
- describe general fault-finding techniques and test equipment
- outline work health and safety (WHS) requirements and work practices
- identify commonly used and emerging products
- explain safety requirements and standards
- summarise telecommunications network and equipment fault types and rectification
- describe telecommunications network and equipment types
- provide a detailed explanation of test equipment.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- sites on which diagnosis and repair of communication equipment may be conducted
- test equipment currently used in industry
- manufacturer's technical documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN415 Install and configure internet protocol TV in a home network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to arrange a secure internet protocol (IP) network for a customer.

It applies to individuals who install Next Generation Networks (NGNs). These IP networks provide fast internet, voice over internet protocol (VoIP), IPTV and internet TV services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to implement IPTV in a home network	1.1 Obtain and clarify work health and safety (WHS) requirements and risk control measures and procedures for a given work area, with appropriate personnel 1.2 Evaluate existing customer home network equipment for operational status
2. Design IPTV integration to a home	2.1 Prepare a configuration layout integrating IPTV to existing customer network using IPTV network elements to provide optimum

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
network to meet customer requirements	video delivery service 2.2 Select IPTV network elements to provide optimum video delivery service 2.3 Obtain configuration instructions for network elements 2.4 Design connection plan to integrate customer network elements and optimise system performance 2.5 Identify any connection problems and amend design plan
3. Implement IPTV design plan to a home network	3.1 Interconnect network elements according to design plan using manufacturer's instructions and IP addressing schemes 3.2 Configure and test network elements to provide integrated IPTV to the existing system 3.3 Provide a free-to-air (FTA) connection over digital video broadcasting – terrestrial (DVB-T) to complement the IPTV service 3.4 Set up customer specific operations as required 3.5 Configure security measures in an IPTV network to protect against security threats 3.6 Troubleshoot home network according to manufacturer's specifications and escalate unresolvable items to the service provider
4. Complete and document network installation	4.1 Restore worksite to safe condition, according to established safety procedures 4.2 Record and store essential installation information 4.3 Notify appropriate personnel of completion of the task and obtain sign-off

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 3.1	• Recognises and interprets complex technical specifications and related information
Writing	1.1, 2.4, 2.5, 4.2, 4.3	• Uses clear, specific and industry-related terminology to produce plans and update workplace documentation

© Commonwealth of Australia, 2025 Future Skills Organisation

Oral Communication	4.3	• Articulates clearly and concisely to provide advice and guidance to customers and personnel • Uses well-developed listening and questioning techniques to confirm understanding
Navigate the world of work	1.1, 4.1	• Takes personal responsibility for adherence to organisational procedures and protocols, and legal and regulatory responsibilities relevant to own work
Get the work done	1.1, 1.2, 2.1-2.3, 2.5, 3.1-3.6	• Understands key principles and concepts underpinning design and operation of digital systems and tools, and applies these when troubleshooting existing technology • Works logically and systematically to monitor, analyse and action job priorities • Implements actions according to a predetermined plan, making adjustments if necessary • Makes decisions quickly and intuitively in familiar situations requiring immediate attention, drawing on past experience to identify key variables and determine the best course of action • Uses analytical processes to resolve a predictable range of network problems, establishing criteria for deciding between options and seeking input and advice from others when escalating difficulties

Unit Mapping Information

Assessment Requirements for ICTTEN415 Install and configure internet protocol TV in a home network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- create and follow implementation plans for internet protocol television (IPTV)
- install relevant network hardware and software
- configure and test IPTV network according to specified guidelines
- integrate IPTV to existing network
- produce appropriate documentation
- implement secure network.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain competing video delivery over broadband networks
- outline current industry-accepted hardware and software products
- summarise IPTV configurations
- clarify IPTV protocols and encoding techniques
- summarise networking technologies, incorporating substantial depth in network operating systems and IP networks
- outline transmission technologies and protocols
- summarise video compression formats
- describe the common issue that affects home network performance.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a site where installation and configuration of an IPTV network may be conducted
- equipment currently used in industry
- information on different protocols
- relevant technical information, legislative requirements and other site and project-related documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN416 Install, configure and test an internet protocol network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to select network elements to meet client business specifications, ensure interoperability within the network, apply network topologies, protocols and security issues, and troubleshoot when required.

It applies to individuals who carry out installation, maintenance and upgrade of information and communications technology (ICT) networks, and are employed by telecommunications or information technology networking provisioning companies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to install IP network	1.1 Prepare for given work according to relevant legislation, work health and safety (WHS) regulations, codes and standards 1.2 Arrange site access according to required procedure 1.3 Review existing network design documentation to ensure it is current and complete

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.4 Select components and network elements required to be installed to meet the technical requirements 1.5 Contact vendors and service suppliers to obtain specifications and availability of identified components 1.6 Develop plans, with prioritised tasks and contingency arrangements, for installation of components with minimum disruption to client 1.7 Liaise with appropriate person to obtain approval for the plans, including security clearance and timing
2. Install and configure IP network	2.1 Install and configure server hardware and software according to organisational and industry standards, following plans 2.2 Install and configure computer, other hardware and software, according to organisational and industry standards and plans 2.3 Install and configure other software required for the network to operate with security and integrity according to the plan
3. Test and reconfigure IP network	3.1 Test installed software and hardware, utilising available technical tools, to ensure all components are functioning as expected 3.2 Test the network to ensure it is functioning according to specifications 3.3 Resolve problems identified in the modified network
4. Complete documentation and clean worksite	4.1 Complete hardware and asset recording document in line with organisational requirements 4.2 Document installation, boot-up and configuration procedures according to organisational requirements 4.3 Tabulate test results and complete all user reports 4.4 Complete client report and notify of network status 4.5 Clean up and restore worksite to client's satisfaction 4.6 Secure sign-off from appropriate person

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance	Description

© Commonwealth of Australia, 2025 Future Skills Organisation

	Criteria	
Reading	1.1-1.3, 2.1-2.3, 3.2, 4.1, 4.2	• Recognises and interprets technical, legislative and operational documentation to determine job requirements
Writing	1.5-1.7, 4.1-4.4	• Uses clear, specific and industry-related terminology to produce and update workplace documentation in predetermined formats
Oral Communication	1.5, 1.7, 4.4	• Clearly liaises with internal and external personnel on technical, operational and business related matters • Uses listening and questioning skills to confirm understanding for requirements
Numeracy	3.1-3.3	• Makes calculations required to take test measurements, interpret results and evaluate performance and interoperability of network
Navigate the world of work	1.1, 4.5	• Takes personal responsibility for adherence to legal and regulatory responsibilities relevant to own work context • Recognises and follows explicit and implicit protocols and meets expectations associated with own role
Interact with others	4.5, 4.6	• Cooperates with others as part of familiar routine activities and contributes to specific activities requiring joint responsibility and accountability
Get the work done	1.2, 1.4, 1.6, 2.1-2.3, 3.1-3.3, 4.5	• Understands key principles and concepts underpinning design and operation of digital systems and tools, and applies these as required • Works logically and systematically to monitor, analyse and action job priorities • Implements actions according to a predetermined plan, making adjustments if necessary • Makes decisions quickly and intuitively in familiar situations requiring immediate attention, drawing on past experience to identify key variables and determine the best course of action • Recognises and anticipates an increasing range of familiar problems, their symptoms and causes, depending on differing operational contingencies, risk situations and environments

Assessment Requirements for ICTTEN416 Install, configure and test an internet protocol network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- plan and prepare for the IP network installation task
- select network elements to meet client's business specifications
- install, configure and test network elements to ensure interoperability within the network
- apply network topologies, protocols and security issues
- apply solutions to defined network problems.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain client's business domain, business function and organisation
- describe current industry-accepted hardware and software products
- outline data and voice transmission technologies and protocols
- summarise networking technologies, incorporating substantial depth in some areas
- explain router-based network architectures.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a site where network installation may be conducted
- field measurement equipment currently used in industry

© Commonwealth of Australia, 2025 Future Skills Organisation

- network design documentation
- equipment specifications
- network components
- hardware and software
- a live network
- organisational guidelines
- networked (LAN) computers
- a wide area network (WAN) service point of presence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN417 Install, configure and test a router

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to undertake router installation and configuration, as part of an upgrade in an existing network or the implementation of a new network.

It applies to individuals who carry out installation, maintenance and upgrade of information and communication technologies (ICT) networks.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications networks engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to install router	1.1 Prepare for given work according to relevant legislation, work health and safety (WHS) regulations, codes and standards 1.2 Arrange site access according to required procedure 1.3 Ascertain network topology from technical requirements 1.4 Determine the internet protocol (IP) addressing scheme for the network topology

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.5 Evaluate network management and security requirements, with reference to current and future requirements 1.6 Select a router with appropriate features according to technical requirements 1.7 Choose cables, wireless application protocol (WAP), wide area network (WAN) connectors and other peripherals according to network and router specification, and WAN protocols
2. Install and configure router	2.1 Assemble router and peripherals according to manufacturer's requirements, enterprise guidelines and protocols 2.2 Connect communications cables and WAN connectors to the router and network 2.3 Configure router according to manufacturer's instructions and technical requirements, taking into account interoperability requirements with network components
3. Test router and reconfigure network	3.1 Test the router for connectivity across the network and for routing protocol functions 3.2 Adapt or modify predetermined router configuration, depending on outcome of tests 3.3 Review router in line with organisational requirements 3.4 Test router and peripherals according to manufacturer's instructions and technical requirements 3.5 Test hardware and router to ensure full functionality and interoperability 3.6 Reconfigure additional hardware as required 3.7 Make adjustments to network depending on test results
4. Complete documentation and clean worksite	4.1 Tabulate test results and complete all user reports 4.2 Complete report and notify client of network status 4.3 Clean up and restore worksite to client's satisfaction 4.4 Secure sign-off from appropriate person

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

© Commonwealth of Australia, 2025 Future Skills Organisation

Skill	**Performance Criteria**	**Description**
Reading	1.1-1.3, 2.1, 2.3, 3.2, 3.3	• Recognises and interprets technical, legislative and operational documentation to determine job requirements
Writing	3.4, 4.1, 4.2	• Uses clear, specific and industry-related terminology to produce and update workplace documentation in predetermined formats
Oral Communication	4.2	• Clearly liaises with internal and external personnel on technical, operational and business related matters • Uses listening and questioning skills to confirm understanding for requirements
Numeracy	2.3, 3.1, 3.2, 3.4-3.7	• Undertakes test measurements, interprets results and evaluates performance and interoperability of network
Navigate the world of work	1.1, 4.3	• Takes personal responsibility for adherence to legal and regulatory responsibilities relevant to own work • Recognises and follows explicit and implicit protocols and meets expectations associated with own role
Interact with others	4.4	• Cooperates with others as part of familiar routine activities and contributes to specific activities requiring joint responsibility and accountability
Get the work done	1.2-1.7, 2.1-2.3, 3.1-3.7	• Understands key principles and concepts underpinning design and operation of digital systems and tools, and applies these as required • Takes responsibility for own workload, negotiating some key aspects with others • Implements actions according to a predetermined plan, making adjustments if necessary • Makes decisions quickly and intuitively in familiar situations requiring immediate attention, drawing on past experience to identify key variables and determine the best course of action • Recognises and anticipates an increasing range of familiar problems, their symptoms and causes, depending on differing operational contingencies, risk situations and environments

Assessment Requirements for ICTTEN417 Install, configure and test a router

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- plan and prepare for router installation task
- select router to meet client's business specifications
- install and test the router ensuring interoperability within the network, and applying router principles and technologies
- report on status of completed installation and seek sign-off and customer satisfaction
- use routers
- apply solutions to defined routing problems.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and outline codes of practice for computing
- explain the effect of a router on delimiting broadcast traffic and on conserving bandwidth
- explain how dynamic routing algorithms or protocols create and maintain routing tables
- explain how to provide the network with redundant paths for reliability, and the way routers manage these paths
- summarise the following aspects of routers including:
  - basic router commands
  - configuration
  - clock rate
  - password protection of router
  - routing protocol
  - dynamic routing

© Commonwealth of Australia, 2025 Future Skills Organisation

  - firewalls
  - functions
  - routing protocols and how they operate
  - tables
- describe router-based network architectures
- explain the use of routing tables in intelligent packet routing and switching.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a site where router installation may be conducted
- field measurement equipment currently used in industry
- relevant router specifications
- technical requirements for a network
- router
- cabling
- networked (LAN) computers
- wide area network (WAN) service point of presence
- relevant equipment and organisational documentation.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTTEN418 Install and test a radio frequency identification system

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required for installation of either a new logistical or security network or upgrade of an existing system.

It applies to individuals who integrate new and converging functionalities to information and communications technology (ICT) networks. They are employed by telecommunications and information technology networking provisioning companies specialising in radio frequency identification (RFID) technology.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to install specified RFID system	1.1 Prepare for given work according to relevant legislation, work health and safety (WHS) regulations, codes, and standards 1.2 Arrange site access according to required procedure 1.3 Choose the most suitable RFID system based on specifications and in consultation with appropriate person

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.4 Evaluate options for equipment installation siting and antenna positioning to include effects of electromagnetic interference and shielding 1.5 Investigate causes of interference with RFID systems 1.6 Specify network element requirements for the installation and any training requirements for clients 1.7 Create a deployment plan including down times and advise the user group 1.8 Obtain all components and devices required for the RFID system
2. Install specified RFID system and resolve any faults	2.1 Install interrogators or readers according to given plan 2.2 Install tags and document correct procedures for locating and orienting tags 2.3 Install and undertake network configuration activities using relevant operating system and application upgrades to integrate RFID system into the overall network 2.4 Troubleshoot problems between interrogators or readers, tags and networks, including tuning for optimum performance and rectify any faults
3. Test RFID installation according to specification and standards	3.1 Test system installation according to design specifications and standards including optimum placement of tags, data transmission completeness and record outcomes 3.2 Carry out any changes 3.3 Validate changes or additions against specifications 3.4 Document the test results
4. Complete documentation in compliance with customer requirements and clean worksite	4.1 Complete all documentation for users according to the design and customer requirements 4.2 Complete report and notify client of network status and standards applying to the installation 4.3 Clean up and restore worksite to client's satisfaction 4.4 Secure sign-off from appropriate person

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

© Commonwealth of Australia, 2025 Future Skills Organisation

Skill	**Performance Criteria**	**Description**
Reading	1.1-1.3, 2.1, 3.3, 4.1	• Recognises and interprets technical, legislative and operational documentation to determine job requirements
Writing	1.6,1.7, 2.2, 3.4, 4.1, 4.2	• Uses clear, specific and industry-related terminology to produce and update workplace documentation, including user and training documentation in required formats
Oral Communication	1.3, 1.6, 1.7	• Clearly liaises with internal and external personnel on technical, operational and business related matters • Uses listening and questioning skills to confirm understanding for requirements
Numeracy	3.1	• Undertakes test measurements, interprets results and evaluates performance and interoperability of RFID system
Navigate the world of work	1.1, 4.3	• Takes personal responsibility for adherence to legal and regulatory responsibilities relevant to own work • Recognises and follows explicit and implicit protocols and meets expectations associated with own role
Interact with others	4.4	• Cooperates with others as part of familiar, routine activities and contributes to specific activities requiring joint responsibility and accountability
Get the work done	1.2-1.5, 1.8, 2.1-2.4, 3.1, 3.2	• Understands key principles and concepts underpinning design and operation of digital systems and tools, and applies these as required • Takes responsibility for own workload, negotiating some key aspects with others • Implements actions according to a predetermined plan, making adjustments if necessary • Makes decisions quickly and intuitively in familiar situations requiring immediate attention, drawing on past experience to identify key variables and determine the best course of action • Recognises and anticipates an increasing range of familiar problems, their symptoms and causes, depending on differing operational contingencies, risk situations and environments

Assessment Requirements for ICTTEN418 Install and test a radio frequency identification system

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- plan installation
- use basic research skills for adapting radio frequency identification (RFID) technologies to specified plan and design
- implement and verify RFID operations
- implement RFID architecture across a secure environment
- encode RFID tags and attach to items
- integrate RFID information into business applications
- configure network with IP addressing
- cable and test RFID network
- create technical and user documentation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the client business domain, business function and organisation
- describe common network cable types and connectors
- summarise compatibility issues and resolution procedures
- describe configuration of internet protocol (IP) networks
- describe current industry-accepted hardware and software products used in RFID systems
- explain desktop applications and operating systems as required
- summarise enterprise communication and training systems in relation to training and advising staff involved in deployment
- summarise network topologies

© Commonwealth of Australia, 2025 Future Skills Organisation

- outline RFID technologies including:
  - network operating systems
  - protocols
  - interrogators and sensors
  - wireless technologies
  - cabling standards.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a site where RFID installation may be conducted
- field measurement equipment currently used in industry
- relevant network element specifications
- technical requirements for an RFID network
- cabling
- networked (LAN) computers
- workstations
- RFID diagnostic software
- wide area network (WAN) service point of presence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN419 Implement and troubleshoot enterprise routers and switches

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to determine customer needs, use information communication technologies (ICT) to meet network requirements, rectify equipment errors and create appropriate workplace documentation.

It applies to individuals working as installers of internet protocol (IP) networks, enterprise network technicians, network administrators and other network support personnel.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Prepare for implementation of network routers and switches	1.1 Prepare for given job according to work health and safety (WHS) and environmental requirements with appropriate personnel 1.2 Identify safety hazards and implement risk control measures in consultation with appropriate personnel 1.3 Determine nature and scope of network routers, network switches and network resources from job briefs or appropriate

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	personnel 1.4 Select and obtain network services and network application requirements according to enterprise procedures 1.5 Obtain identified operating instructions, manuals, hardware and software testing methodologies 1.6 Consult appropriate personnel to ensure the task is coordinated effectively with others involved at the worksite
2 Implement network switches and routers	2.1 Configure routers and switches according to manufacturer's specifications and enterprise procedures 2.2 Determine network addressing scheme for network connectivity, and verify using calculations 2.3 Activate, and verify wide area network (WAN) links provide network connectivity 2.4 Enable network services and network applications to the network to complete network connectivity process 2.5 Set up traffic access and filtering according to enterprise procedures
3 Troubleshoot network switches and routers	3.1 Monitor network performance and isolate faults using diagnostic and analysis tools 3.2 Troubleshoot network and internet connectivity according to manufacturer's specifications and enterprise procedures
4 Document configuration and troubleshooting records	4.1 Restore work-site to safe condition according to established safety procedures 4.2 Record and store essential implementation information according to enterprise procedures 4.3 Notify appropriate personnel of completion of the task according to enterprise procedures

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

© Commonwealth of Australia, 2025 Future Skills Organisation

Reading	1.1, 1.3, 1.4, 2.1, 2.5, 3.2, 4.2, 4.3	• Recognises and interprets technical, legislative and operational documentation to determine job requirements
Writing	1.1, 1.2, 4.2, 4.3	• Uses clear, specific and industry-related terminology to produce and update workplace documentation and in communications with relevant personnel
Oral Communication	1.1-1.3, 4.3	• Clearly liaises with personnel on technical matters • Uses listening and questioning skills to confirm understanding for requirements
Numeracy	2.2	• Interprets technical data and performs calculations to verify information
Navigate the world of work	1.1, 1.2, 4.1	• Takes personal responsibility for adherence to legal and regulatory responsibilities relevant to own work, and draws attention to any issues that may affect self or others • Recognises and follows explicit and implicit protocols and meets expectations associated with own role
Interact with others	1.6	• Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction
Get the work done	1.4, 1.5, 2.1-2.5, 3.1, 3.2	• Understands key principles and concepts underpinning design and operation of digital systems and tools, and applies these as required including troubleshooting common network problems • Takes responsibility for planning and organising own workload, identifying ways of sequencing and combining elements for greater efficiency • Implements actions according to a predetermined plan, making adjustments if necessary • Makes decisions quickly and intuitively in familiar situations requiring immediate attention, drawing on past experience to identify key variables and determine the best course of action • Recognises and anticipates an increasing range of unexpected problems, their symptoms and causes on the basis of safety and specified work outcomes

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- determine customer networking requirements
- configure routers and switches using hierarchical addressing over virtual local area networks (VLANs) to meet network link requirements
- enable and control access to network services and applications across the network
- diagnose and rectify network hardware and device configuration faults
- document configuration information, fault-finding history and remediation action.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise access control lists
- give examples of characteristics of a typical enterprise including:
  - features and applications
  - work health and safety (WHS) procedures
  - record keeping procedures
  - switching and routing protocols and strategies:
    - hierarchical addressing
    - multilayer switching
    - routing protocols
    - VLAN routing
- summarise implementation of enterprise wide area networks (WAN) links
- explain network diagnostic and troubleshooting techniques
- describe network modelling

© Commonwealth of Australia, 2025 Future Skills Organisation

- specify how to configure and activate network access and security measures
- describe the process of configuring switches and routers to enable local area networks (LAN) and WAN links
- describe the connection process for enterprise networks using WAN services and applications
- describe the purpose of maintaining enterprise network documentation
- summarise the process and importance of troubleshooting network faults and implementing recovery actions
- describe the use of a hierarchical internet protocol (IP) network address scheme
- select and use tools and equipment to analyse enterprise networks.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a network facility and workstations
- operating instructions, installation documents and manuals
- hardware and software testing tools currently used in industry.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN420 Design, install and configure an internetwork

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to determine customer needs, create appropriate workplace documentation, connect and organise an internetwork according to design specifications, resolving technical problems as they arise.

It applies to individuals who design and install internet protocol (IP) networks including enterprise internetwork technicians, network administrators and network support personnel for large, medium and small office home office (SOHO) enterprises.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for design and installation of internetwork	1.1 Prepare for given work according to work health and safety (WHS) and environmental requirements with appropriate personnel 1.2 Identify safety hazards and implement risk control measures in consultation with appropriate personnel 1.3 Determine nature and scope of internetwork from job briefs and appropriate personnel

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.4 Obtain operating instructions, manuals, hardware and software testing methodologies 1.5 Consult appropriate personnel to ensure the task is coordinated effectively with others involved at the worksite
2. Design enterprise internetwork	2.1 Produce enterprise internetwork topology after considering technical requirements, physical and financial constraints and expansion projections 2.2 Determine network devices and network resources, according to enterprise procedures 2.3 Produce internetwork design including network security and router and switch configurations to meet design specifications and enterprise procedures
3. Install and configure designed internetwork	3.1 Install network hardware to network topology design plan according to enterprise procedures 3.2 Determine network addressing scheme for network connectivity, and verify using calculations 3.3 Configure routers and switches to perform logical connection of the internetwork 3.4 Conduct connectivity and performance tests to verify network installation meets design specification 3.5 Troubleshoot internetwork and internet connectivity according to manufacturer's specifications and enterprise procedures
4. Complete and document network design and installation	4.1 Restore worksite to safe condition according to established safety procedures 4.2 Record and store essential design and installation information according to enterprise procedures 4.3 Notify appropriate personnel of completion of the task according to enterprise procedures

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

© Commonwealth of Australia, 2025 Future Skills Organisation

Reading	1.1, 1.3, 2.2, 2.3, 3.1, 3.4, 3.5, 4.2, 4.3	• Recognises and interprets legislation, enterprise procedures, manuals and technical specifications to determine job requirements
Writing	2.1, 2.3, 4.2, 4.3	• Uses clear, specific and industry-related terminology to produce network documentation and maintain network records • Writes concisely when communicating with relevant personnel
Oral Communication	1.2, 4.3	• Negotiates with customers and peers to achieve design specifications • Uses listening and questioning skills to confirm understanding for requirements
Numeracy	3.2	• Interprets technical data and performs calculations to verify information
Navigate the world of work	1.1, 1.2, 2.2, 2.3, 3.1, 3.5, 4.1-4.3	• Takes personal responsibility for adherence to legal and regulatory responsibilities relevant to own work, and draws attention to any issues that may affect self or others • Recognises and follows organisational procedures protocols and meets expectations associated with own role
Interact with others	1.3, 1.5	• Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction
Get the work done	1.4, 2.1, 2.3, 3.1, 3.3-3.5	• Understands key principles and concepts underpinning design and operation of digital systems and tools, and applies these as required including troubleshooting common network problems according to helpdesk procedures • Takes responsibility for planning and organising own workload, identifying ways of sequencing and combining elements for greater efficiency • Implements actions according to a predetermined plan, making adjustments if necessary • Makes decisions quickly and intuitively in familiar situations requiring immediate attention, drawing on past experience to identify key variables and determine the best course of action • Recognises and anticipates an increasing range of unexpected problems, their symptoms and causes, on the basis of safety and specified work outcomes

Assessment Requirements for ICTTEN420 Design, install and configure an internetwork

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- determine customer requirements
- design internetwork that uses advanced routing and addressing techniques
- install internetwork according to design specification
- configure network devices to meet design functionality
- document internetwork design, installation and configuration.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe enterprise work health and safety (WHS) procedures
- summarise open systems interconnect (OSI) layered communication model
- outline network requirements including:
  - applications
  - lifecycle
  - manageability
  - quality of service
- clarify network design concepts including:
  - business requirements
  - network topologies
  - physical and financial constraints
  - security
  - wired or wireless options

© Commonwealth of Australia, 2025 Future Skills Organisation

- describe tool and equipment use
- outline troubleshooting components of this work including:
  - impact of network failure
  - maintenance
  - troubleshooting methodologies
- analyse impact of applications on traffic flow in the network
- describe network design methodologies used to design networks providing a range of services and applications found in larger networks
- define technical requirements, constraints and manageability issues for a given customer network
- identify and describe common tools and equipment used in internet work.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a site where design and installation of an internetwork network may be conducted
- tools, equipment and materials currently used in industry
- relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN421 Apply advanced routing protocols to network design

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to use software tools, equipment, software and protocols to configure and troubleshoot network routers.

It applies to individuals who work cooperatively with others, interpret technical information accurately and work proficiently with information communication technology (ICT). Installers of internet protocol (IP), small and medium sized enterprise (SME) network technicians, network administrators and network support personnel complete this type of work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan to apply routing protocols	1.1 Prepare for given work according to work health and safety (WHS) and environmental requirements with appropriate personnel 1.2 Identify safety hazards and implement risk control measures in consultation with appropriate personnel 1.3 Determine nature and scope of network and network routing

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	requirements from job briefs and appropriate personnel 1.4 Determine hardware and software diagnostic test methodologies and testing resources according to enterprise procedures 1.5 Obtain operating instructions, manuals, hardware and software testing methodologies 1.6 Consult appropriate personnel to ensure task is coordinated effectively with others involved at the worksite
2. Build and test advanced routing	2.1 Set up router interfaces according to manufacturer's specifications and established procedures 2.2 Implement advanced routing protocols to achieve network design requirements 2.3 Implement classless addressing across a network to perform logical connectivity, and confirm using calculations 2.4 Troubleshoot network routing according to manufacturer's specifications and established procedures 2.5 Identify security threats and initiate control measures according to enterprise procedures
3. Complete and document advanced router installation	3.1 Restore worksite to safe condition according to established safety procedures 3.2 Record and store essential installation information according to enterprise procedures 3.3 Notify appropriate personnel of completion of the task according to enterprise procedures

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3, 2.1, 2.4, 2.5, 3.2, 3.3	• Recognises and interprets enterprise procedures, manuals and specifications to determine job requirements

Assessment Requirements for ICTTEN421 Apply advanced routing protocols to network design

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- plan network routing requirements to meet design specification
- configure advanced protocols on network routers
- manage network addressing
- troubleshoot network
- install network security.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain distance vector routing protocols RIP v1 and v2
- outline dynamic routing
- summarise enterprise work health and safety (WHS) procedures
- outline hybrid routing protocols enhanced interior gateway routing protocol (EIGRP)
- explain link-state routing protocols open shortest path first (OSPF)
- explain routing and packet forwarding
- describe routing tables
- summarise scalable routing strategies variable length subnet masking (VSLM) and classless inter-domain routing (CIDR)
- outline security protocols using access lists
- clarify static routing
- explain the use of software tools and equipment.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a network facility and workstations
- tools, equipment and materials currently used in industry
- relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN422 Configure and troubleshoot advanced network switching

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to perform network switch configuration and troubleshooting. This unit applies to large networks involving wireless local area networks (WLANs), virtual local area networks (VLANs), interVLAN routing, remote access management and operating system management of network devices.

It applies to individuals who work cooperatively with others, interpret technical information accurately, and work proficiently with information communication technology (ICT). Installers of internet protocol (IP), enterprise network technicians, network administrators and network support personnel complete this type of work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to work on switched network	1.1 Prepare for given work according to work health and safety (WHS) and environmental requirements with appropriate personnel 1.2 Identify safety hazards and implement risk control measures in

ICTTEN423 Install and maintain a wide area network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to use appropriate tools, equipment, software and protocols to connect and support a wide area network (WAN).

It applies to individuals who work cooperatively with others, interpret technical information accurately and work proficiently with information communication technology (ICT). Installers of internet protocol (IP) networks, IP network technicians, network administrators and network support personnel complete this type of work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for installation and maintenance of network with WAN access	1.1 Prepare for given work according to work health and safety (WHS) and environmental requirements with appropriate personnel 1.2 Identify safety hazards and implement risk control measures in consultation with appropriate personnel 1.3 Determine network nature and scope from job briefs or appropriate personnel

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.4 Select and obtain network hardware, software, WAN protocol and technology requirements according to enterprise procedures 1.5 Obtain operating instructions, manuals, installation procedures, hardware and software testing methodologies and testing resources 1.6 Consult appropriate personnel to ensure task is coordinated effectively with others involved at the worksite
2. Install and maintain WAN accessible network	2.1 Determine network addressing scheme for network connectivity, and confirm using calculations 2.2 Identify security threats and initiate control measures according to enterprise procedures 2.3 Set up and configure network to provide WAN access according to manufacturer's specifications and enterprise procedures 2.4 Use hardware and software analysis and diagnostic methodologies to test network connectivity
3. Complete and document WAN network installation	3.1 Restore worksite to safe condition according to established safety procedures 3.2 Record and store essential installation information according to enterprise procedures 3.3 Notify appropriate personnel of completion of the task according to enterprise procedures

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3, 1.4, 2.2, 2.3, 3.2, 3.3	• Recognises and interprets enterprise procedures, manuals and specifications to determine job requirements

Assessment Requirements for ICTTEN423 Install and maintain a wide area network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- plan installation of a wide area network (WAN) accessible network
- select and apply WAN link protocols
- configure internet protocol (IP) addressing across WAN
- troubleshoot WAN communication issues
- install WAN access security measures.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline enterprise work health and safety (WHS) procedures
- explain IP addressing services and network scaling
- summarise methods of securing network services including access control lists
- explain Open Systems Interconnection (OSI) layered communication model
- outline requirements to provide teleworker network services
- describe correct usage of relevant tools and equipment
- outline WAN link protocols including:
  - frame relay
  - high-level data link control (HDLC)
  - link access procedure, balanced (LAPB)
  - point-to-point protocol (PPP)
- summarise WAN troubleshooting methodologies and analysis and diagnostic tools.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a site where installation and maintenance of a WAN may be conducted
- tools, equipment and materials currently used in industry
- relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN424 Install and configure internet protocol TV in a service provider network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to design and connect a multi-protocol label switching (MPLS) network for internet protocol TV (IPTV). This includes secure core and access networks for the service provider.

It applies to individuals who interpret technical information accurately and work proficiently with information communication technology (ICT). Technical staff installing an internet protocol (IP) service provider network for delivery of emerging technologies for IPTV using multicast (broadcast) and unicast video on demand (VoD) streaming complete this work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to implement IPTV service provider	1.1 Obtain and clarify work health and safety (WHS) requirements and risk control measures and procedures for a given work area with appropriate personnel 1.2 Use topology of an IPTV network and design plans to locate

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	network elements for video over broadband 1.3 Select network elements to provide optimum video delivery service 1.4 Obtain configuration instructions for network elements
2. Implement IPTV network to meet business requirements	2.1 Configure an IP-MPLS core network overlaying the IP network to deliver IPTV 2.2 Implement VoD application to meet bandwidth requirements and quality of service (QoS) requirements for commercial viability of IPTV network 2.3 Install and configure video service routers for content delivery system (CDS) applications to support TV streaming and internet streaming, with session shifting for follow-me or mobile video facility 2.4 Produce addressing scheme and protocols required for IP multicasting used in the IPTV network 2.5 Configure security measures in IPTV network to protect against security threats 2.6 Configure label switch routers (LSR) to provide secure methods of transporting IP packets using layer 2 protocols in an MPLS network 2.7 Configure MPLS-TE (traffic engineering) to provide routing on diverse paths to avoid congestion and guarantee bandwidth services 2.8 Troubleshoot network according to manufacturer's specifications and enterprise procedures
3. Build and configure CDN architecture network	3.1 Build content delivery network (CDN) architecture overlaying routing and switching architecture of an IP network to deliver internet TV to internet devices 3.2 Use routing and switching infrastructure to enable CDN share characteristics of each element to produce network functionality 3.3 Install and configure web cache communication protocol (WCCP) on router to redirect traffic flows in real-time to reduce transmission costs and download times
4. Complete and document network installation	4.1 Restore worksite to safe condition according to established safety procedures 4.2 Record and store essential installation information according to enterprise procedures 4.3 Notify appropriate personnel of completion of the task according

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	to enterprise procedures

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 2.8, 4.2, 4.3	• Recognises and interprets enterprise procedures, manuals and technical specifications to determine job requirements
Writing	4.2, 4.3	• Uses clear, specific and industry-related terminology to develop network documentation and maintain network records • Writes concisely when communicating with relevant personnel
Oral Communication	1.1, 4.3	• Liaises closely with personnel to determine specific installation and safety requirements • Uses listening and questioning skills to confirm understanding for requirements
Numeracy	2.4, 3.3	• Interprets technical data to produce IP addressing schemes and determine cost efficiencies
Navigate the world of work	1.1, 2.8, 4.1-4.3	• Takes personal responsibility for adherence to legal and regulatory responsibilities relevant to own work, and draws attention to any issues that may affect self or others • Recognises and follows organisational procedures and protocols and meets expectations associated with own role
Get the work done	1.2-1.4, 2.1, 3.1-3.3, 2.2-2.8	• Understands key principles and concepts underpinning design and operation of digital systems and tools, and applies these as required including using industry-standard troubleshooting • Takes responsibility for planning and organising own workload, identifying benchmarks and scope for projects

Assessment Requirements for ICTTEN424 Install and configure internet protocol TV in a service provider network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- install relevant network hardware and software
- configure and test internet protocol television (IPTV) network according to specified guidelines
- configure label switch routers (LSR) in an multi-protocol label switching (MPLS) network
- build and configure content delivery network (CDN) architecture network
- implement secure network.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain competing video delivery over broadband networks
- summarise current industry-accepted hardware and software products
- outline networking technologies incorporating detailed knowledge of network operating systems and IP networks
- describe transmission technologies and protocols including:
  - border gateway protocol (BGP)
  - enhanced interior gateway routing protocol (EIGRP)
  - flash
  - hypertext transfer protocol (HTTP)
  - internet group management protocol (IGMP)
  - open shortest path first (OSPF)
  - real time streaming protocol (RTSP)
  - routing information protocol (RIP)

© Commonwealth of Australia, 2025 Future Skills Organisation

- web cache communication protocol (WCCP) operations.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a site where installation and configuration of an IPTV network may be conducted
- equipment currently used in industry
- information on different protocols
- relevant technical information, legislative requirements and other site and project-related documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN425 Design, install and configure a customer smart technology network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to test and troubleshoot smart technology network installations.

It applies to individuals who design and install smart grid networks for domestic or industrial enterprises using internet protocol (IP) networking technology.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for design and installation of a smart technology network	1.1 Prepare for given work according to work health and safety (WHS) and environmental requirements with appropriate personnel from the enterprise 1.2 Identify safety hazards and implement risk control measures in consultation with appropriate personnel 1.3 Determine nature and scope of the smart technology network from customer specifications and appropriate personnel

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.4 Obtain operating instructions, manuals, hardware and software testing methodologies 1.5 Consult appropriate personnel to ensure task is coordinated effectively with others involved at the worksite
2. Design a customer smart technology network	2.1 Produce a smart technology network topology that is interoperable and scalable after considering customer requirements, technical specifications, physical and financial constraints and expansion projections 2.2 Determine network devices and network resources according to enterprise procedures 2.3 Produce smart technology network design including network security and network element configurations to meet design specifications and enterprise procedures
3. Install and configure a designed smart technology network	3.1 Install smart technology network hardware to topology design plan according to enterprise procedures 3.2 Determine network addressing scheme for network connectivity, and verify using calculations 3.3 Configure network elements to perform logical connection of smart technology network topology with required network security features 3.4 Conduct connectivity and performance tests to verify the network installation meets design specification 3.5 Troubleshoot smart technology network and internet connectivity according to manufacturer's specifications and enterprise procedures
4. Complete and document network design and installation	4.1 Restore worksite to safe condition according to established safety procedures 4.2 Record and store essential design and installation information according to enterprise procedures 4.3 Notify appropriate personnel of task completion according to enterprise procedures

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

© Commonwealth of Australia, 2025 Future Skills Organisation

Skill	**Performance Criteria**	**Description**
Reading	1.3, 2.1, 2.3, 3.5, 4.2, 4.3	• Recognises and interprets enterprise procedures, manuals and specifications to determine important information
Writing	2.3, 4.2, 4.3	• Uses clear, specific and industry-related terminology to develop network documentation and update workplace records and in written communications with customers
Oral Communication	1.1-1.3, 1.5, 4.3	• Liaises with appropriate personnel about technical requirements using specific and relevant language • Uses listening and questioning techniques to confirm understanding
Numeracy	2.1, 3.2	• Evaluates and reviews technical data and makes calculations to verify connectivity and configuration
Navigate the world of work	1.1, 1.2, 2.2, 2.3, 3.1, 3.5, 4.1-4.3	• Takes personal responsibility for adherence to legal and regulatory responsibilities relevant to own work, and draws attention to any issues that may affect self or others • Recognises and follows organisational protocols and meets expectations associated with own role
Interact with others	1.1-1.3,1.5	• Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction • Selects and uses appropriate conventions and protocols when communicating with customers and co-workers in a range of work contexts
Get the work done	1.3, 1.4, 2.1, 2.2, 3.1-3.5, 4.2	• Determines job priorities and works logically and systematically to undertake clearly defined and familiar tasks • Implements actions according to a predetermined plan, making slight adjustments if necessary, and addressing some unexpected issues • Takes responsibility for routine decision-making by selecting from a range of predetermined options in routine situations, identifying and taking some situational factors into account • Diagnoses and implements standard solutions to unexpected situations based on safety requirements and specified work outcomes • Understands purposes and specific functions of common digital systems and uses them effectively to complete routine tasks

Assessment Requirements for ICTTEN425 Design, install and configure a customer smart technology network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- determine job requirements by referring to documentation and through discussion with appropriate people
- design a smart technology network that uses advanced networking techniques
- install a smart technology network according to design specification
- configure network devices to meet design functionality
- document smart technology network design, installation and configuration.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline enterprise work health and safety (WHS) procedures
- summarise network design concepts including:
  - business requirements
  - network topologies
  - physical and financial constraints
  - security
  - wired or wireless options
- explain network requirements:
  - applications
  - lifecycle
  - manageability
  - quality of service

© Commonwealth of Australia, 2025 Future Skills Organisation

- summarise open systems interconnect (OSI) layered communication model
- summarise the following areas of troubleshooting including:
  - impact of network failure
  - maintenance troubleshooting
  - different problem-solving methodologies.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a site where design and installation of a smart technology network may be conducted
- tools, equipment and materials currently used in industry
- relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN426 Design network projects

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to plan, design, construct and manage access, building or core telecommunications networks.

It applies to individuals working as technical officers, communications workers or engineers, from private and public organisations who plan, design and manage access, building and core network technologies for a service provider.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Analyse different types of network technologies	1.1 Review available network technologies and compare them for application to the expansion or augmentation of network services 1.2 Examine various techniques for access networks to provide service to green fields, brown fields and rehabilitation projects 1.3 Examine various techniques for building and core networks to provide for new service, capacity expansion and equipment recovery projects

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.4 Determine the type of network by accessing and using network information sources 1.5 Produce a brief on how network architecture components relate to the larger network and their impact on the work 1.6 Develop an installation activity schedule to minimise workplace disruption and according to relevant regulation and standards 1.7 Evaluate equipment type and technologies to be considered to determine availability and compatibility with existing network equipment
2. Apply deployment and construction practices for network technologies	2.1 Review conduit and jointing chamber standards and practices for the access network 2.2 Examine standards, practices and requirements for locating telecommunications infrastructure in the access network 2.3 Examine standards, practices and requirements for locating and standing racks and cabinets and supporting infrastructure 2.4 Examine capacity and practices for cabling and patching of twisted pair, coax and fibre distribution frames
3. Review network standards and prepare draft design	3.1 Review client's network deployment rules and apply to a network design 3.2 Produce preliminary plan or design on deployment of the network that maintains integrity of access, building or core networks 3.3 Establishing a solution for unforeseen problems through discussions with appropriate personnel, with consideration to job specifications, safety and enterprise procedures to establish a solution 3.4 Review plan to ensure it complies with all applicable standards and codes required when working on network, and where appropriate make adjustments 3.5 Produce final design including recommendations agreed with customer

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

© Commonwealth of Australia, 2025 Future Skills Organisation

Reading	1.4, 1.6, 3.3	• Recognises and interprets technical and non-technical documentation to incorporate important information in designs
Writing	1.5, 1.6, 3.1, 3.2, 3.4, 3.5	• Uses clear, specific and industry-related terminology to document technical requirements and procedures
Oral Communication	3.3	• Liaises with appropriate personnel about technical and operational requirements using specific and relevant language • Uses listening and questioning techniques to confirm understanding
Navigate the world of work	2.1-2.4, 3.1, 3.3, 3.4	• Takes personal responsibility for adherence to legal and regulatory responsibilities and practices relevant to own work • Recognises and follows organisational procedures protocols and meets expectations associated with own role
Interacts with others	3.3	• Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction
Get the work done	1.1-1.3, 1.7, 3.3	• Determines job priorities and works logically and systematically to undertake clearly defined and familiar tasks • Implements actions according to a predetermined plan, making slight adjustments if necessary and addressing some unexpected issues • Takes responsibility for routine decision-making by selecting from a range of predetermined options in routine situations, identifying and taking some situational factors into account • Diagnoses and implements standard solutions to unexpected situations based on safety requirements and specified work outcomes • Reflects on ways digital systems and tools are used to achieve work goals, and recognises strategic and operational applications

Assessment Requirements for ICTTEN426 Design network projects

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- identify the most suitable network technology to be deployed for a given requirement
- apply established planning, design or management techniques for project deployment
- produce a design, which is compliant to the techniques, rules and standards of the deployed network.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the following features of a telecommunications network:
  - architecture and geographical categorisations
  - information sources
  - technology and equipment
  - capacity and capability management
  - capacity limitation of various platforms
  - commercial considerations of access network deployment
  - compatibility issues of technology and equipment
  - currency of technology and equipment use
  - enterprise deployment rules and rational
  - exemption process criteria
  - major equipment components of a modern access architecture
  - monitoring techniques to manage the access network
  - network topologies

© Commonwealth of Australia, 2025 Future Skills Organisation

  - product capability and availability allowable within an access network
  - telecommunications access networks issues and challenges
  - telecommunications legislation, acts and regulations
- identify and describe key features of common telecommunications networks.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- network planning, design and other site-related documentation
- equipment specifications
- live network of training facilities with simulated network organisational guidelines
- relevant standards and practices documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN427 Conduct site surveys to identify carrier installation requirements

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to implement design processes, develop solutions, and merge technological development and product implementation in access, building and core networks.

It applies to individuals working as technical staff on projects within a carrier network for carrier, commercial or industrial installations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Obtain access to work site	1.1 Notify appropriate personnel, if necessary, to arrange site access, discuss installation requirements and identify carrier network systems 1.2 Assess site-specific safety requirements and enterprise work health and safety (WHS) processes and procedures 1.3 Use network information systems to obtain planning data

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
2. Identify existing infrastructure	2.1 Confirm details of installation with stakeholders 2.2 Verify site conditions and building construction 2.3 Locate and record existing facilities and systems 2.4 Confirm installation locations and identify barriers to planned network extension 2.5 Integrate existing network and floor plans into documentation where available
3. Integrate existing infrastructure into design brief	3.1 Review existing plans, drawings and databases against the design brief 3.2 Calculate capacity of existing facilities against proposed usage to ensure appropriate design decisions for new installation 3.3 Incorporate all data into new installation design 3.4 Mark up plans and prepare report on new installation design 3.5 Develop contingency plans for anticipated constraints
4. Review design for compliance with standards and legislation	4.1 Examine standards, practices and requirements for locating telecommunications infrastructure in the access network 4.2 Review installation design to ensure compliance with requirements of federal, state and local regulations, relevant legislation, codes and standards 4.3 Initiate any special studies or investigations necessary for completion of the project
5. Complete required reports and documentation	5.1 Complete required documents promptly and according to planning parameters 5.2 Obtain carrier confirmation from documented requirements 5.3 Distribute design documentation to stakeholders promptly 5.4 Obtain project plan sign-off from carrier

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

© Commonwealth of Australia, 2025 Future Skills Organisation

Reading	1.3, 2.2-2.5, 3.1, 3.5, 4.2, 5.2	• Recognises and interprets a wide variety of technical and non-technical documentation
Writing	1.1, 2.1, 2.3, 3.3, 3.4, 4.1, 4.3, 5.1, 5.2, 5.4	• Uses clear, specific and industry-related terminology to document technical requirements and procedures
Oral Communication	1.3, 2.1, 2.4, 4.3, 5.2	• Participates in verbal exchanges with customers and team members about technical and operational requirements using specific and relevant language • Uses listening and questioning techniques to confirm understanding
Numeracy	3.2	• Analyses numerical information to interpret site-specific data
Navigate the world of work	1.2, 4.1, 4.2, 5.1	• Takes personal responsibility for adherence to legal and regulatory responsibilities relevant to own work
Interact with others	2.1, 4.3, 5.2, 5.4	• Selects and uses appropriate conventions and protocols when communicating with customers and co-workers in a range of work contexts
Get the work done	1.1-1.3, 2.2-2.5, 3.3, 3.5, 4.3, 5.2-5.4	• Determines job priorities and works logically and systematically to undertake clearly defined and familiar tasks and plan necessary resources • Implements actions according to a predetermined plan, making slight adjustments if necessary and addressing some unexpected issues • Takes responsibility for routine decision-making by selecting from a range of predetermined options in routine situations, identifying and taking some situational factors into account • Diagnoses and implements standard solutions to unexpected situations based on safety requirements and specified work outcomes • Recognises and initiates approaches to enhance work practices, taking present and future needs and barriers to plan completion into account • Reflects on ways digital systems and tools are used to achieve work goals, and recognises strategic and operational applications

Assessment Requirements for ICTTEN427 Conduct site surveys to identify carrier installation requirements

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- evaluate existing infrastructure on an installation site
- integrate existing infrastructure into an installation design
- develop design specifications for an installation project
- engage stakeholders and carriers in design approval process.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and explain the impact of relevant legislation, codes of practice and other formal agreements that impact communications work
- describe access networks in Australia and state how it influences development of projects
- identify costs associated with carrier installations and determine estimates and operating budgets for an installation
- identify network performance information required to produce a network design
- specify current, new and emerging technologies to be considered for a communications design, including barriers that may have an impact
- define project management and its purpose and explain associated databases and project management software programs used
- explain economic and political influences and trends that impact communications installations for public and commercial enterprises
- describe a network plan and its components
- explain the purpose of having authorities and delegations required when costing and estimating financials for projects

© Commonwealth of Australia, 2025 Future Skills Organisation

- explain the impact of local and international economic conditions on telecommunications installations and infrastructure, and typical challenges and limits facing technology today and on future needs
- describe the process and documentation required to collate and write project briefs, reports and project charters
- identify specific work health and safety requirements relating to site conditions and activities, including manufacturer's requirements for safe operation of equipment to be incorporated into project documentation.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a network planning area, systems and deployment rules and standards
- relevant databases, licensing requirements and other site related procedures
- a location and scenario suitable to conduct a site survey.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN429 Estimate and quote for carrier telecommunications equipment installations

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to prepare detailed estimates and quotes, including updating schematic drawings and specifications for carrier telecommunications equipment installations.

It applies to technical staff who provide estimates and quotes to clients for indoor and outdoor installation within a carrier network for commercial or industrial communications installations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Confirm and update schematic drawings and specifications	1.1 Review existing specifications and drawings for completeness 1.2 Prepare additional drawings and specifications for installation if required 1.3 Compare drawings with design brief to confirm requirements

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.4 Confirm all cable and locations with carrier
2. Price labour, materials and other relevant items and establish availability	2.1 Obtain quotations and delivery dates from suppliers 2.2 Use schedule of rates for scheduled items 2.3 Obtain quotes and supply dates for all non-scheduled items or activities 2.4 Estimate labour costs based on company practices 2.5 Check pricing documentation to ensure supply proposal matches carrier specification for material, quality and performance
3. Estimate labour, materials and other relevant item requirements	3.1 Prepare estimations allowing for contingencies during installation and relevant legislation, codes, regulations and standards 3.2 Ensure estimates will return a profit on installation where appropriate
4. Prepare and confirm quote with carrier	4.1 Prepare a project installation quote that meets carrier requirements 4.2 Negotiate changes and variations to meet carrier and company needs
5. Establish carrier’s financial arrangements	5.1 Obtain carrier's approval for project design drawings and estimate 5.2 Issue design drawings and specifications for authority to construct

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1-2.5	• Analyses and consolidates information and data from a range of sources, against defined criteria and requirements, and checks for accuracy and completeness
Writing	1.2, 1.3, 2.1, 3.1, 3.2, 4.1, 5.1, 5.2	• Documents outcomes and changes to plans using industry-relevant terminology and recognised plan symbols • Accurately records and completes organisational plans, specifications and correspondence using clear language and correct spelling, grammar and industry

© Commonwealth of Australia, 2025 Future Skills Organisation

		terminology
Oral Communication	1.4, 2.1, 4.2, 5.1	• Uses collaborative and inclusive techniques including active listening and questioning and reading of verbal and non-verbal signals to convey and clarify information and confirm understanding • Presents complex information in formal situations using clear and convincing language, tone and pace appropriate for the audience and purpose
Numeracy	2.1-2.5, 3.1, 3.2	• Applies financial modelling skills to identify, analyse and evaluate budgetary information, time durations and human resource allocations • Performs mathematical calculations to analyse labour, costs and quantities to accurately process quotations
Navigate the world of work	2.4, 3.1, 4.1	• Ensures knowledge of legislative requirements and products is kept up-to-date to provide accurate information • Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements
Interact with others	1.4, 4.2, 5.1, 5.2	• Selects and uses appropriate conventions and protocols when communicating with clients and co-workers in a range of work contexts • Uses a range of strategies to establish a sense of connection and build rapport with clients and co-workers
Get the work done	1.1-1.4, 2.1-2.5, 3.1, 5.2	• Takes responsibility for planning, sequencing and prioritising tasks and own workload for efficiency and effective outcomes • Makes decisions and implements standard procedures for routine tasks, using formal decision-making processes for more complex and non-routine situations • Addresses less predictable problems and initiates standard procedures in response, applying problem-solving processes in determining a solution • Uses familiar digital technologies and systems to access information, enter data, present information and communicate with others, cognisant of data security and safety

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Requirements for ICTTEN429 Estimate and quote for carrier telecommunications equipment installations

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- prepare detailed estimates
- update schematic drawings and specifications for telecommunications equipment installations including:
  - materials
  - labour costs
- negotiate material availability and pricing for carrier equipment and network installations with contractors
- document detailed quotes for installations that allow for changes and variations
- prepare and confirm quote and financial arrangements with carrier.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- compare and contrast features of carrier telecommunications equipment
- identify and summarise application of legislation, codes of practice and other formal agreements that impact the work activity
- analyse and document the manufacturer's requirements for safe operation of equipment
- describe processes and techniques required to prepare plans, estimate and quote for installations
- identify and apply specific work health and safety (WHS) requirements relating to design and site conditions
- identify and remedy typical issues and challenges of dealing with carriers
- explore allocations to be included in the design specifications and quotation

© Commonwealth of Australia, 2025 Future Skills Organisation

- determine common contingencies to consider in a specification or quotation.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- special purpose tools, equipment and materials
- sites on which estimates and quotes may be conducted
- relevant databases and licensing requirements
- site-related documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to design supporting infrastructure for telecommunications network installations; for carrier grade switching, transmission and access equipment and associated media, power and monitoring equipment and alarm systems, fibre distribution hubs (FDHs), and remote power feeds.

It applies to field officers, design technicians or technical supervisors from carriers, contractors or other service providers working with switching, transmission and radio networks and the various transmission paths including cable, optical fibre, radio, microwave and satellite.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for design of infrastructure work	1.1 Obtain relevant legislation, codes, regulations and standards for compliance when conducting work

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.2 Notify client to arrange site access and obtain plans and specifications 1.3 Conduct a site survey to verify infrastructure design requirements can be met 1.4 Identify site hazards and notify appropriate personnel to make site safe 1.5 Develop a design activity schedule to minimise workplace disruption and according to relevant regulation and standards 1.6 Discuss material supplies, safety equipment, resources, tools and test equipment with the construction group so they are available when required for installation for safe work practice
2. Design network equipment infrastructure	2.1 Prepare infrastructure designs according to electrical safety and work health and safety (WHS) and environmental requirements after consultation with operational staff 2.2 Design metal superstructure to house equipment according to manufacturer's specifications 2.3 Design cable pathways, including cable distribution frames and support materials, according to specifications
3. Design power infrastructure	3.1 Design power supply and earthing according to specifications and standard electrical practices 3.2 Design battery and rectifier equipment for project according to manufacturer's and WHS requirements 3.3 Design high Ohmeric distribution (HOD) and associated power distribution systems
4. Design DC power distribution	4.1 Design power distribution work to meet electrical safety requirements and certifications 4.2 Monitor electrical work to ensure compliance with installation plan 4.3 Identify and rectify faults where possible or escalate according to enterprise policy
5. Restore site and complete documentation	5.1 Attach infrastructure labels and designations according to enterprise requirements 5.2 Complete inspection sheets and declare asset ready for next stage of installation using appropriate sign off documentation 5.3 Clean up and prepare site in readiness for next installation phase 5.4 Notify carrier and obtain sign-off

© Commonwealth of Australia, 2025 Future Skills Organisation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3	• Analyses and consolidates information and data from a range of sources, against defined criteria and requirements, and checks for accuracy and completeness
Writing	1.2, 1.4, 2.1-2.3, 3.1-3.3, 4.1, 5.1, 5.2, 5.4	• Prepares and produces diagrammatic models and associated documents that convey design parameters • Develops procedural material for a specific audience using clear and detailed language to convey explicit information, requirements and recommendations
Oral Communication	1.2, 1.4, 1.6, 5.4	• Uses collaborative and inclusive techniques including active listening and questioning and reading of verbal and non-verbal signals to convey and clarify information and confirm understanding
Numeracy	1.5, 2.2-2.4, 3.1-3.3, 4.1	• Applies design modelling skills to identify, analyse and evaluate budgetary information, time durations and human resource allocations • Performs mathematical calculations to analyse and design telecommunications architecture, labour, costs and material quantities
Navigate the world of work	1.4-1.6, 2.1-2.3, 3.1-3.3, 4.1-4.3, 5.1, 5.2	• Accepts responsibility and ownership for the task and makes decisions on completion parameters and the need of coordination with others • Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements • Identifies and acts on issues that contravene relevant policies, procedures and legal requirements
Interact with others	1.2, 1.6, 5.4	• Selects and uses appropriate conventions and protocols when communicating with clients and co-workers in a range of work contexts • Uses a range of strategies to establish a sense of connection and build rapport with clients and co-workers
Get the work	1.1, 1.3-1.5, 2.1-2.7, 3.1, 3.2, 4.1-4.3, 5.1,	• Accepts responsibility for planning and sequencing complex tasks and workload, negotiating key aspects

© Commonwealth of Australia, 2025 Future Skills Organisation

done	5.3, 5.4	with others, taking into account capabilities, efficiencies and effectiveness • Monitors progress of plans and schedules and reviews and changes them to meet new demands and priorities • Makes routine decisions and implements standard procedures for routine tasks, using formal decision-making processes for more complex and non-routine situations • Addresses less predictable problems and initiates standard procedures in response, applying problem-solving processes in determining a solution

Assessment Requirements for ICTTEN430 Design infrastructure for telecommunications network installations

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- determine potential earthing locations, cable routes, cables trays, data cabinets, telecommunication enclosures, distributors
- design metal superstructure
- design protective earth and functional earth installations
- design power infrastructure
- design, monitor and rectify faults in DC power distribution
- design locations and facilities for access network infrastructure.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- evaluate capabilities and performance of cabling types, connectors and cabling structures for given design parameters
- explore common carrier telecommunications applications and related equipment and infrastructure suited to a design
- determine the most appropriate connections to carrier infrastructure or equipment
- identify and recognise compliance requirements of current legislation relating to installation of telecommunications equipment and connection to carrier services
- evaluate environmental impacts including options for green information and communications technology (ICT) installations for network topologies, interfaces and interconnect solutions
- define work health and safety (WHS) requirements for the design to ensure a safe installation plan including:
  - confined spaces

© Commonwealth of Australia, 2025 Future Skills Organisation

  - electrical safety
  - working at heights
  - manual handling and lifting
  - materials handling
  - physical hazards
- evaluate and summarise network and transmission supplies and equipment required for a design
- determine power requirements and electrical safety for a specific design
- specify warranty information for equipment supplies and contractor work guarantees
- devise an appropriate survey to determine design criteria for a given site
- explore and evaluate the nature of tools and equipment required for installation of the design
- consider power distribution work requirements and the impact on the design.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- special purpose tools, equipment and materials
- site where installation of supporting infrastructure may be conducted
- plant, tools and equipment currently used in industry
- relevant regulatory and equipment documentation that impact work activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN431 Design a dense wavelength division multiplexing system

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the performance outcomes, skills and knowledge required to design a dense wavelength division multiplexing (DWDM) system in optical networks.

It applies to telecommunications technical staff who design systems for installation of long haul or metropolitan area DWDM equipment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Obtain access to worksite safely and with authority from site owner	1.1 Obtain and review DWDM installation brief 1.2 Determine site access requirements 1.3 Notify parties if necessary to arrange site access and discuss DWDM installation requirements 1.4 Assess site-specific safety requirements and enterprise work health and safety (WHS) processes and procedures

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
2. Prepare to install design DWDM units	2.1 Survey location for DWDM installation and scope installation parameters 2.2 Identify suitable location for DWDM equipment racks 2.3 Determine number and location of shelves and cards in racks 2.4 Determine capacity of optical distribution frames (ODFs), patching and network management system (NMS) connections for the installation 2.5 Determine power feed options
3. Design DWDM units and associated cabling	3.1 Design DWDM racks, including locations and layout 3.2 Examine standards, practices and requirements for designing DWDM systems 3.3 Design DWDM shelf and card positions from customer and manufacturer documents 3.4 Design supporting patch panel and jumpering schemes 3.5 Include appropriate ancillary equipment and connections in design specifications 3.6 Prepare detailed design drawings for racks, shelves and cards from manufacturer and carrier documents 3.7 Prepare detailed design drawings for patching, jumpering and power feeds from manufacturer and carrier documents
4. Review design for compliance with standards and legislation	4.1 Confirm DWDM installation design meets the brief 4.2 Review installation design to ensure compliance with requirements of federal, state and local regulations, relevant legislation, codes and standards

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.4, 3.2, 3.3, 3.6, 3.7, 4.1, 4.2	• Critically analyses complex documentation from a variety of sources and consolidates information relating to specific criteria to determine design

© Commonwealth of Australia, 2025 Future Skills Organisation

		requirements
Writing	1.3, 3.1, 3.3-3.7	• Prepares and produces dynamic material for a specific audience using clear and detailed language to convey explicit information, requirements and recommendations • Produces plans using industry-relevant terminology and recognised industry symbols
Oral Communication	1.3	• Uses collaborative and inclusive techniques, including active listening and questioning and reading of verbal and non-verbal signals, to convey and clarify information and confirm understanding
Numeracy	2.3-2.5, 3.1, 3.3, 3.4	• Uses highly-developed numeracy skills to interpret complex information, perform calculations and record outcomes for designs
Navigate the world of work	1.4, 3.2, 4.2	• Works independently or with others to make decisions to achieve organisation outcomes • Takes full responsibility for following policies, procedures and legislative requirements, and identifies organisational implications of new legislation or regulation
Interact with others	1.3, 4.1	• Implements strategies for a diverse range of colleagues and clients to build rapport and foster strong relationships
Get the work done	1.1, 1.2, 1.4, 2.1-2.5, 3.1, 3.3, 3.6, 3.7, 4.1	• Accepts responsibility for planning and sequencing complex tasks and workload, negotiating key aspects with others taking into account capabilities, efficiencies and effectiveness • Makes critical decisions quickly and intuitively in complex situations, taking into consideration a range of variables • Applies systematic and analytical decision-making processes for complex and non-routine situations • Responds intuitively to problems requiring immediate resolution, drawing on past experiences to focus on the cause of a problem • Uses and investigates new digital technologies and applications to manage and manipulate data and communicate effectively with others, in a secure and stable digital environment

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Requirements for ICTTEN431 Design a dense wavelength division multiplexing system

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- design a dense wavelength division multiplexing (DWDM) system and associated cabling according to plans and specifications
- design DWDM power and ground connections
- complete and confirm installation design report.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- recognise principles of operation of a DWDM
- recognise electrostatic discharge and apply work practices to minimise damage to equipment
- recognise and describe the function and types of optical fibre connectors and characteristics of optical fibre
- describe specific work health and safety (WHS) requirements that impact the safe inspection of optical connectors
- recognise and apply principles of safe measurement of optical power for laser transmission systems
- describe tools and ancillary equipment commonly used for DWDM systems
- recognise and describe common power wiring faults.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- special purpose tools, equipment and materials
- a suitable site for DWDM equipment installation
- tools and equipment required for installation
- a range of optical fibres to suit the installation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN501 Provide consultancy and technical support in the customer premises equipment sector

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to provide advice to clients wishing to install or upgrade telecommunications equipment on their premises.

It applies to individuals who help organisations deploy converging technologies integrating data, wireless, optical and internet protocol (IP) networks within a customer premises in domestic, commercial or industrial installations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan to provide consultancy and technical support in the CPE sector	1.1 Obtain consultancy requirements from client 1.2 Establish relationship with industry experts to maintain currency with latest industry innovations in the customer premises' equipment (CPE) sector 1.3 Access sources of product and technical information relating to change and innovation

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.4 Access and evaluate latest data relating to change and innovation in the CPE sector for company use within an appropriate timeframe
2. Assess customer needs	2.1 Develop knowledge and understanding of the client's business to provide an accurate solution according to requirements 2.2 Investigate communication requirements including networks, based on business needs and demands 2.3 Ascertain client's physical and financial parameters 2.4 Present reports and recommendations within client's timeframes
3. Provide consultancy and expert advice	3.1 Provide timely and accurate expert consultancy and advice to company staff and clients 3.2 Provide communication solutions that meet client's requirements and relevant legislation, codes, regulations and standards 3.3 Provide alternative solutions for clients where their needs cannot be better met in an innovative way 3.4 Provide a report on advice and solutions that match both the physical and financial demands of the client 3.5 Consult with client for an agreed solution
4. Control and manage product and technical information	4.1 Provide all relevant personnel with the latest product and technical information 4.2 Monitor the information flow process to ensure appropriate personnel have access to the latest data 4.3 Provide the client with final consultancy reports and recommendations

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.4, 3.2	• Recognises and interprets technical and regulatory specifications and related documentation to determine job requirements
Writing	3.1, 3.2, 3.4, 3.5	• Prepares specific expert information which conveys clear recommendations and uses terminology

© Commonwealth of Australia, 2025 Future Skills Organisation

		appropriate to present to relevant personnel
Oral Communication	3.1, 3.2, 3.5	• Liaises with customers to ensure requirements are properly understood and can be achieved within established timeframes • Uses listening and questioning skills to confirm understanding of requirements
Numeracy	3.4	• Interprets numerical information and applies mathematical calculations for dimensioning, cost and financial considerations
Navigate the world of work	2.1, 3.2	• Develops understanding related to current role using a range of formal and informal opportunities to develop knowledge skills and insight • Keeps up-to-date with relevant legislation and regulations and considers implications of these when providing solutions in the workplace
Interact with others	1.1, 1.2, 2.4, 4.1-4.3	• Considers purpose and possible actions to be taken as a result of any work related communication • Selects and uses communication conventions and protocols to suit purpose and audience • Recognises importance of building rapport to establish effective working relationships
Get the work done	1.3, 1.4, 2.2, 2.3, 3.3	• Understands key principles and concepts underpinning design and operation of digital systems and tools • Takes responsibility for planning and organising site access arrangements and sequencing own workload, identifying ways of combining elements for greater efficiency • Recognises potential of new and alternative approaches to enhance work practices and outcomes, and accepts the need to consider change • Makes decisions quickly and intuitively in familiar situations requiring immediate attention, drawing on past experience to identify key variables and determine the best course of action • When dealing with complex issues, may use intuition to identify the general problem area, switching to analytical processes to clarify goals and key issues, and using lateral thinking processes to generate possible communications solutions

Assessment Requirements for ICTTEN501 Provide consultancy and technical support in the customer premises equipment sector

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- provide consultancy advice related to a full range of customer premises' equipment (CPE) products including:
  - product models and equipment types
  - peripherals
  - facilities, including network facilities
  - system features
- provide alternative solutions where customer's needs cannot be met precisely
- prepare clear and concise reports to customers complete with recommendations and supporting data, including full financial considerations
- provide regular updates to both company personnel and clients as to the latest product and technical information.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise common customer telecommunications applications and related equipment
- outline connections to carrier infrastructure or equipment
- identify and describe current legislation relating to installation of telecommunications equipment and connection to carrier services
- explain the purpose of enterprise operations and policies
- summarise internet protocol (IP) networks
- outline new and emerging telecommunications technologies
- define 'customer premises' equipment.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a site with network or computer layout documentation and premises plans
- network components
- equipment specifications
- organisational guidelines
- business plan or model
- relevant legislation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN502 Design a telecommunications project

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge to scope requirements, assess land site suitability, arrange site acquisition, and produce building design plans for a telecommunications building project.

It applies to individuals working for private and public organisations who combine technical design and organisational skills to apply planning principles for provisioning of the various building projects and technologies within a telecommunications network to meet future customer demands.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Scope design options	1.1 Determine the nature, purpose and type of new facilities in the proposed project from project specifications obtained from planners 1.2 Analyse project brief to scope requirements of the project and consider design options with consideration to legislation governing carriers in Australia

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.3 Evaluate design requirements to determine optimal site selection for the project to house facilities 1.4 Arrange an environmental impact study (EIS) to be conducted on the selected site with project requirements to assess suitability of the site
2. Evaluate and arrange land acquisition	2.1 Evaluate findings of the EIS to determine suitability of the land for the project 2.2 Prepare a justification report on a favourable EIS and consult affected property owners to establish a base for negotiation 2.3 Determine potential for land acquisition or purchase from analysis of previously gathered data and EIS findings and ensure compliance with regulations and legislation
3. Analyse area and select design option	3.1 Analyse physical attributes of the area, possible environmental impacts and previously collected data to prepare design options 3.2 Prepare field sketch according to enterprise requirements and develop solutions to any obvious physical impediment to construction 3.3 Produce design options for the area that are viable for the enterprise and recommend a preferred option with justifications 3.4 Evaluate selection of preferred option to ensure enterprise business strategy outcomes and policies are satisfied
4. Notify interested parties	4.1 Assess resources available for project implementation to ensure works are within the enterprise's schedule 4.2 Notify interested parties of the type, extent and duration of proposed works according to enterprise policy 4.3 Obtain all required written permission from interested parties and forward to those who will carry out the job
5. Produce design plan and documentation	5.1 Prepare design plan to enterprise requirements including relevant geographical and topological information 5.2 Indicate location and specification of works and network equipment accurately and clearly 5.3 Specify resources needed to undertake the project 5.4 Update enterprise information systems according to enterprise guidelines and industry practice 5.5 Produce a complete design report and present to management for approval

© Commonwealth of Australia, 2025 Future Skills Organisation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 2.1, 2.3, 3.2, 3.4, 4.2, 5.4	• Identifies, analyses and evaluates complex text to determine legislative and business requirements to assist with project planning
Writing	2.2, 3.2, 3.3, 4.2, 5.1-5.5	• Prepares written reports and workplace documentation that communicate complex information clearly and effectively
Oral Communication	2.2, 4.2, 5.2, 5.3	• Clearly articulates requirements to internal and external personnel on technical and operational matters using language appropriate to audience and environment • Employs listening and questioning techniques to confirm understanding
Navigate the world of work	1.2, 2.3	• Keeps up-to-date with legislation and regulations affecting work and considers implications of these when negotiating and planning work
Get the work done	1.1, 1.4, 3.1, 3.4, 4.1, 4.3	• Understands key principles and concepts underpinning design and operation of digital systems and tools, and applies these as required • Applies formal processes when planning tasks, producing plans with logically sequenced steps, reflecting the needs of others • Implements actions according to a predetermined plan, making adjustments if necessary • Makes decisions quickly and intuitively in familiar situations requiring immediate attention, drawing on past experience to identify key variables and determine the best course of action • Uses analytical processes to decide on a course of action, establishing criteria for deciding between options and seeking input and advice from others before taking action when necessary

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Requirements for ICTTEN502 Design a telecommunications project

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- scope design options
- recommend acquisition of land
- prepare justification report including evaluation of environmental impact study (EIS) findings
- produce design options
- prepare completed building design plan for a telecommunications project.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain access networks
- describe building codes and regulations relating to telecommunications installations
- appraise computer aided design (CAD) software packages used for telecommunications designs
- define core networks and specify the foundation design principles
- describe the Environmental Protection Act and its impact on designing a telecommunications project
- explain implications of heritage listings on a site
- summarise information found in EISs
- explain network performance and capacity
- outline networks planning and procedures
- explain site surveys
- describe acts and regulations attributed to telecommunications.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- sites on which projects may be designed
- CAD drawing facilities
- relevant databases, legislative requirements and other site and project related documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN503 Design an electronic system for a telecommunications network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to design, and confirm specifications and compatibility for additional telecommunications network equipment.

It applies to individuals working as field officers, technicians or technical supervisors for carriers, contractors or other service providers who assess the need for additional equipment, including voice over internet protocol (VoIP), biometric identification, radio frequency identification (RFID) and security system equipment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Evaluate system needs	1.1 Determine need for additional electronic equipment from telecommunications project plan 1.2 Specify purpose of equipment and ascertain need for additional network equipment with customer

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
2. Analyse network and select design option	2.1 Analyse possible impacts on network and network service requirements 2.2 Generate options for system design that are realistic for the enterprise and network 2.3 Evaluate and select preferred option, based on enterprise business strategy outcomes, service policy and compliance with relevant legislation 2.4 Discuss and confirm selected option with customer
3. Assess system compatibility	3.1 Assess compatibility of each equipment unit and intended use with other installed units, from system plans, equipment manuals, installation environment and industry knowledge 3.2 Modify design accordingly 3.3 Provide customer with design and obtain sign-off

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 2.3, 3.1	• Identifies, analyses and evaluates information to determine legislative and technical requirements to assist with project planning
Writing	1.2, 3.2	• Prepares written reports and workplace documentation that communicates complex information clearly and effectively
Oral Communication	1.2, 2.4	• Liaises with customers and technical staff to ensure requirements are properly understood • Employs listening and questioning techniques to confirm understanding
Navigate the world of work	2.3	• Keeps up-to-date with relevant legislation and considers implications of these when planning work
Interact with others	3.3	• Selects and uses appropriate conventions and protocols when communicating with customers, and in a range of work contexts

© Commonwealth of Australia, 2025 Future Skills Organisation

Get the work done	2.1-2.3, 3.1	• May invest time in developing and shaping several options before making a final choice, using a combination of lateral and analytical thinking to tailor and strengthen an idea to suit needs, resources and constraints • Uses formal and informal processes to monitor implementation of solutions, and reflects on outcomes • Understands key principles and concepts underpinning design and operation of digital systems and tools, and applies these as required • Applies formal processes when planning tasks, producing plans with logically sequenced steps, reflecting the needs of others • Implements actions according to a predetermined plan, making adjustments if necessary • Makes decisions quickly and intuitively in familiar situations requiring immediate attention, drawing on past experience to identify key variables and determine the best course of action • Uses analytical processes to decide on a course of action, establishing criteria for deciding between options, and seeking input and advice from others before taking action when necessary

Assessment Requirements for ICTTEN503 Design an electronic system for a telecommunications network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- evaluate system need for additional electronic equipment and design options
- analyse network and design systems
- assess system compatibility.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- review electrical and optical properties of telecommunications systems
- outline integration, compatibility and interoperability of equipment
- summarise legislation and licensing relevant to installation of telecommunications equipment including spectrum allocation
- define power requirements and electrical safety issues associated with electronic system design
- outline transmission type and signals that may be encountered.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- telecommunications network where additional equipment design may be conducted
- relevant regulatory and equipment documentation that impacts electronic system design.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN504 Acceptance test new systems and equipment

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to ensure new system readiness by inspecting and testing equipment to confirm compliance and performance.

It applies to individuals working as field officers, technicians or technical supervisors for carriers, contractors or other service providers.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to conduct acceptance testing	1.1 Obtain installation and commissioning documents and planning specifications from appropriate personnel to ensure the installed system is as planned and specified 1.2 Visually inspect new installation and verify compliance of the system against relevant legislation, codes, regulations and standards 1.3 Select and obtain required test equipment for suitability of acceptance testing 1.4 Prepare acceptance schedule and test criteria in consultation with

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	appropriate personnel
2. Conduct acceptance testing	2.1 Undertake and analyse performance tests safely to ensure measurements meet with predetermined specifications and approved operating margins 2.2 Verify performance levels to within tolerance specifications 2.3 Test protection mechanisms to ensure performance criteria meets the specified standard 2.4 Test alarms for satisfactory operation 2.5 Refer identified problems to appropriate personnel for remedial action 2.6 Record all acceptance test procedures and results
3. Complete administrative tasks	3.1 Complete acceptance documentation including recommendations 3.2 Notify appropriate personnel and obtain sign-off

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 2.1, 2.2	• Identifies, analyses and evaluates information to determine regulatory and technical requirements to assist with project planning
Writing	1.4, 2.6, 3.1	• Prepares written reports and workplace documentation that communicates complex information clearly and effectively
Oral Communication	1.4	• Liaises with appropriate personnel and customers to ensure requirements are properly understood • Participates in verbal exchanges employing listening and questioning techniques to confirm understanding
Numeracy	2.1, 2.2	• Uses mathematical formulae to calculate measurements, analyse results and make adjustments to equipment and settings
Navigate the world of work	1.2	• Keeps up-to-date with relevant legislation and considers implications of this when planning work, with specific reference to safety

© Commonwealth of Australia, 2025 Future Skills Organisation

Interact with others	1.1, 1.4, 2.5, 3.2	• Selects and uses appropriate conventions and protocols when communicating with stakeholders in a range of work contexts • Collaborates and cooperates with others to achieve required outcomes
Get the work done	1.1, 1.3, 2.3-2.5	• Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context to identify relevant information, test strategies and resources • Understands key principles and concepts underpinning design and operation of digital systems and tools, and applies these as required • Implements actions according to a predetermined plan, making adjustments if necessary • Makes decisions quickly and intuitively in familiar situations requiring immediate attention, drawing on past experience to identify key variables and determine the best course of action • Uses analytical processes to decide on a course of action, establishing criteria for deciding between options, and seeking input and advice from others before taking action when necessary

Unit Mapping Information

Assessment Requirements for ICTTEN504 Acceptance test new systems and equipment

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- inspect new installation and verify compliance against installation plans
- prepare acceptance schedule and test criteria
- undertake relevant acceptance tests and analysis
- comply with specified performance criteria, related work health and safety (WHS) requirements and work practices.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline cabling, terminations and supporting structures that may be encountered in the system under inspection
- explain common performance levels and standards
- explain electrical and or optical properties to be measured
- consider WHS issues that impact testing systems and equipment
- evaluate typical network topologies, switching, routing and transmission techniques
- evaluate transmission type and signals that may be encountered
- explore various types of test equipment suitable for testing to be performed.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

ICTTEN505 Commission telecommunications network equipment

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to check plans, obtain and properly handle equipment and supplies, undertake tests, and complete administrative tasks.

It applies to individuals working as field officers, technicians or technical supervisors for carriers, contractors or other service providers

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for commissioning procedures	1.1 Prepare for work following work health and safety (WHS) requirements 1.2 Organise resources based on existing and potential site hazards 1.3 Contact network operations personnel for site access and network specifications 1.4 Determine the type and complexity of the network equipment from specifications

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.5 Establish commissioning dates and confirm with all parties 1.6 Determine commissioning parameters according to specification, and establish planned outage if required 1.7 Obtain test equipment and check for suitability and accuracy 1.8 Produce a preliminary commissioning plan according to manufacturer's instructions and company guidelines for discussion with the customer 1.9 Inform affected customers of impending action and likely timing and impact by the work
2. Organise planned outages if necessary	2.1 Negotiate outage times with appropriate groups and affected customers to minimise any disruptions 2.2 Develop contingency plans if required and arrange for emergency communications 2.3 Notify alarm management centre of action planned 2.4 Obtain authority to proceed from relevant control centre and notify customers affected by the outage
3. Complete installation procedures of network equipment	3.1 Install applications programmes and management data according to specification to complete installation procedures 3.2 Complete all hardware connections according to commissioning instructions 3.3 Undertake all specified performance tests to ensure operation meets all prescribed parameters and specifications as detailed in the original design brief 3.4 Undertake tests to verify compatibility between the hardware and software 3.5 Correct performance defects or bring to the attention of designers for corrective action
4. Complete commissioning procedures with network management	4.1 Test alarms in conjunction with network management and operational groups to maintain network integrity 4.2 Simulate traffic tests through the new installation to emulate a live network 4.3 Test installed specific equipment features and operations administration maintenance system according to instructions 4.4 Diagnose, repair or escalate faults detected to the appropriate area when fault cannot be clearly diagnosed or repaired 4.5 Initiate vendor-related tests where required

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
5. Finalise commissioning tasks	5.1 Complete administrative tasks as required by enterprise 5.2 Undertake operational staff training where required 5.3 Restore site to customer's satisfaction 5.4 Notify customer and obtain sign-off

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	5.2	• Accepts new learning challenges, undertaking further training when required to contribute to ongoing organisational improvement
Reading	1.1, 1.4, 1.6, 1.8, 3.1-3.3, 4.3	• Identifies, analyses and evaluates information to determine regulatory and technical requirements to assist with project planning
Writing	1.3, 1.5, 1.8, 1.9, 2.1-2.4, 5.1	• Prepares written reports and workplace documentation that communicates complex information clearly and effectively
Oral Communication	1.3, 1.5, 1.9, 2.1-2.4	• Liaises with appropriate technical personnel and customers to ensure requirements are properly understood • Employs listening and questioning techniques to confirm understanding
Numeracy	3.3, 3.4, 4.1, 4.3	• Uses mathematical formulae to make calculations and interpret test equipment settings and readings
Navigate the world of work	1.1	• Keeps up-to-date with relevant legislation and considers implications of this when planning work, with specific reference to safety
Interact with others	2.4, 5.4	• Selects and uses communication conventions and protocols to suit purpose and audience
Get the work done	1.2, 1.4, 1.5, 1.7, 2.2, 3.1- 3.5, 4.1, 4.2-4.5, 5.1, 5.3	• Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context to identify relevant information, test strategies and resources • Understands key principles and concepts underpinning

© Commonwealth of Australia, 2025 Future Skills Organisation

		design and operation of digital systems and tools and applies these as required • Implements actions according to a predetermined plan, making adjustments if necessary • Makes decisions quickly and intuitively in familiar situations requiring immediate attention, drawing on past experience to identify key variables and determine the best course of action • Uses analytical processes to decide on a course of action, establishing criteria for deciding between options and seeking input and advice from others before taking action when necessary

Assessment Requirements for ICTTEN505 Commission telecommunications network equipment

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- interact with enterprise personnel, customers and other contractors, keeping a customer focus and consideration of customer needs
- produce an outage management plan and contingency plan
- negotiate network activity and timing of commissioning
- commission networking equipment to plan or specification
- implement test plan, and interpret and analyse results against expected outcomes
- test alarms and alarm regime
- analyse faults, problems and anomalies and provide solutions
- comply with all related work health and safety (WHS) requirements and work practices.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline electrical and/or optical properties to be measured
- evaluate a range of networking equipment and their operation
- consider legislation and licensing that govern installation of telecommunications equipment
- define spectrum allocation
- outline network operation procedures
- summarise power requirements and electrical safety
- describe transmission types and signals that may be encountered in telecommunications networks
- summarise the various tests and test equipment required for commissioning.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- sites on which installation and commissioning procedures can be conducted
- relevant regulatory and equipment documentation impacting commissioning
- testing equipment currently used in industry.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN506 Integrate new systems and equipment into the telecommunications network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to follow predetermined procedures to ensure operability of the system while minimising impact on affected customers.

It applies to individuals working as field officers, technicians or technical supervisors, for telecommunications carriers, contractors or other service providers, who install new, additional and replacement equipment in telecommunications systems and networks, including support and administrative infrastructures for integration of new and emerging internet protocol (IP) based technologies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan integration strategy	1.1 Determine nature and scope of the integration activity of systems from appropriate personnel 1.2 Prepare an integration management plan in agreement with

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	appropriate personnel 1.3 Obtain outage management plan if available, otherwise prepare a contingency plan to ensure the system integration goes according to a plan 1.4 Identify affected systems, traffic and customers 1.5 Notify alarm management centre of action planned and obtain authority to proceed 1.6 Notify customers affected by the outage of time and likely duration
2. Integrate and test new system in the network	2.1 Plan and conduct activities over a set of integration phases safely and according to the integration management plan 2.2 Load operational software according to specification to ensure interoperability of new and existing system 2.3 Undertake tests by simulating network traffic and ensure test results are recorded and stored according to enterprise requirements 2.4 Analyse test results and ensure established parameters have all been met 2.5 Evaluate problems during the testing phase and rectify or escalate procedure 2.6 Analyse alarms for fault conditions in conjunction with the network management centre 2.7 Locate and detect faults within capability, or escalate according to enterprise policy 2.8 Check operations administrative maintenance system and alarms are connected according to instruction manual 2.9 Activate new alarms and deactivate old alarms
3. Complete administrative tasks	3.1 Complete integration records according to manufacturer's specification and enterprise policy and make recommendations for improvement for future planning 3.2 Notify appropriate personnel of project completion and obtain sign-off

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Assessment Requirements for ICTTEN506 Integrate new systems and equipment into the telecommunications network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- develop a contingency plan
- implement an integration management plan
- test systems and equipment and associated features being integrated
- apply enterprise escalation and outage procedures
- negotiate procedures and activity on the network and timing of integration
- integrate new systems and equipment to plan and specifications.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise connections to carrier infrastructure or customer interface units (CIU)
- describe electrical and/or optical properties to be measured
- consider health and safety issues, including electrical, optical and electromagnetic radiation (EMR) when working with telecommunications networks
- describe telecommunication network equipment and emerging technology networks
- evaluate suitable tests and test equipment types
- explain typical performance parameters and faults that may be encountered in network equipment and related connection and transmission media.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- sites on which integration procedures can be conducted
- relevant regulatory and equipment documentation that impacts integration
- testing equipment currently used in industry
- capacity to simulate network traffic
- a network and equipment for integration
- equipment and systems manuals, specifications and enterprise policies.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN507 Cut over new and replacement network equipment

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to check plans, obtain equipment and supplies, initiate tests and complete administrative tasks.

It applies to individuals who may be field officers, technicians or technical supervisors for carriers, contractors or other service providers, who are involved in fast changeover of new and existing equipment in telecommunications networks, including digital switching and transmission, wireless and optical networks.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan cut over strategy	1.1 Determine the nature and scope of cut over activity from appropriate personnel 1.2 Prepare a cut over management plan in agreement with appropriate personnel and in line with regulations and service obligations 1.3 Obtain outage management plan if available, otherwise prepare a

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	contingency plan to ensure system integration proceeds according to plan 1.4 Notify alarm management centre of action planned and obtain authority to proceed 1.5 Notify customers affected by the outage of time and likely duration
2. Cut over and test equipment into service	2.1 Perform cut over activities in a safe manner with minimal interruption to service and according to the cut over management plan 2.2 Conduct tests specified in cut over plan, according to technical manuals and specifications 2.3 Record and assess test results and ensure problems identified during cut over are rectified or escalated according to enterprise procedures 2.4 Analyse alarms for fault conditions in conjunction with network management centre 2.5 Enact contingency plans in the event of major problems during cut over
3. Complete administrative tasks	3.1 Complete test result sheets and hand over to operational personnel according to enterprise requirements 3.2 Ensure site is cleaned and ready for operational staff 3.3 Complete work documentation and administrative tasks and forward to appropriate area according to enterprise policy 3.4 Notify appropriate personnel of project completion and obtain sign-off

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	2.1-2.3, 3.1, 3.3	• Identifies, analyses and evaluates equipment specifications, equipment readings and settings
Writing	1.1, 1.3, 2.3, 3.1, 3.3	• Prepares written reports and workplace documentation that communicate complex information clearly and

Assessment Requirements for ICTTEN507 Cut over new and replacement network equipment

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- develop and implement a cut over plan and an outage plan
- develop a contingency plan
- apply enterprise escalation and outage procedures
- cut over and test network equipment within an industry acceptable time period.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain electrical and optical properties to be measured
- determine appropriate legislation and licensing surrounding installation of telecommunications equipment
- summarise power requirements and electrical safety
- evaluate types of test equipment and testing procedures suitable for tests to be performed
- explain transmission hierarchy and switching principles
- outline transmission type and signals that may be encountered.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a network and equipment for cut over
- equipment currently used in industry

© Commonwealth of Australia, 2025 Future Skills Organisation

- systems manuals, specifications and enterprise policy.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN508 Locate, diagnose and rectify complex faults

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to identify faults in upstream or downstream services that may require involvement of third party providers.

It applies to individuals working as telecommunications officers, installers, maintenance staff, and manufacturer or equipment specialists. They must work closely with other personnel and rectify technical faults in a timely manner.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to locate and rectify complex faults	1.1 Prepare for given work according to relevant legislation, codes, regulations and standards 1.2 Notify client to arrange site access 1.3 Obtain and interpret results of any action taken by first fault repairer 1.4 Obtain fault history to establish any fault patterns

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.5 Obtain all available data on system equipment to assist with fault diagnosis 1.6 Develop strategies for identification and repair in discussion with other engineering and technical personnel 1.7 Obtain tools and test equipment relevant to the identified system type and fault 1.8 Set up equipment according to manufacturer's specifications and safe work practices and reconfigure as required
2. Locate and diagnose faults	2.1 Use methodical and safe work practices suitable for system and problem type to identify system fault 2.2 Isolate and test fault progressively to remove likely variables from assessment, and record test results 2.3 Refer faults that may involve third party services, if required 2.4 Diagnose fault in the shortest time possible with minimum inconvenience to other client activity 2.5 Provide regular progress reports to clients 2.6 Raise fault identification to a national support level within a specified timeframe, if required 2.7 Undertake guidance from national support in fault diagnosis as required 2.8 Negotiate any necessary system downtime with clients
3. Rectify fault	3.1 Determine options to rectify fault including any system downtime and present to client for decision 3.2 Rectify fault totally, partially or provide temporary solution 3.3 Replace or repair faulty parts or equipment according to service agreement 3.4 Reprogram equipment as required 3.5 Dismantle and remove any temporary service in a safe and efficient manner where appropriate 3.6 Perform repair under national support guidance as required 3.7 Perform routine checks to identify likelihood of further or likely problems 3.8 Rectify any further problems identified, or bring to the attention of the customer for decision on further action
4. Clean up worksite and complete records	4.1 Produce a report on fault diagnosis and rectification 4.2 Remove and dispose of waste and debris from worksite

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	according to environmental requirements 4.3 Ensure changes made to work area during fault repair are restored to client's satisfaction 4.4 Complete all records, and explain and justify faults and rectification action taken

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3, 1.8, 3.3	• Identifies, analyses and evaluates technical documentation including codes, standards and regulatory information
Writing	1.2, 2.2, 2.5, 2.8, 3.8, 4.1, 4.4	• Prepares clear and concise written reports and workplace documentation, incorporating technical language to communicate complex information clearly and effectively
Oral Communication	1.2, 1.6, 2.5, 2.8, 3.8, 4.3	• Liaises and negotiates with clients, repairers and technical staff using appropriate strategies to extract main ideas and information from oral texts regarding technical and operation matters • Employs listening and questioning techniques to confirm understanding
Numeracy	2.1, 2.2	• Uses mathematical formulae to interpret technical data, such as specifications of equipment operations
Navigate the world of work	1.1, 3.5, 4.2	• Takes personal responsibility for adherence to legal and regulatory responsibilities and organisational polices and protocols relevant to own work
Interact with others	2.6-2.8, 3.1, 3.8	• Selects appropriate protocols and conventions for communicating with technical personnel and customers in a broad range of work contexts • Collaborates with others to negotiate agreeable outcomes
Get the work done	1.3-1.8, 2.1-2.4, 3.1-3.4, 3.6-3.8	• Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context to identify and rectify technical faults

© Commonwealth of Australia, 2025 Future Skills Organisation

		• Understands key principles and concepts underpinning design and operation of digital systems and tools, and applies these as required • Implements actions according to a predetermined plan, making adjustments if necessary • Makes decisions quickly and intuitively in familiar situations requiring immediate attention, drawing on past experience to identify key variables and determine the best course of action • Uses analytical processes to decide on a course of action, establishing criteria for deciding between options, and seeking input and advice from others before taking action when necessary

Assessment Requirements for ICTTEN508 Locate, diagnose and rectify complex faults

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- methodically analyse fault details and diagnose potential faults
- conduct advanced tests to determine complex network faults
- isolate and locate faults logically
- rectify faults using appropriate organisational procedures and work health and safety (WHS) requirements
- comply with all related WHS requirements and work practices.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain fault escalation procedures
- describe the most appropriate fault-finding techniques and test equipment required
- identify fault types and rectification methods
- list safety requirements and standards
- define the function of service agreements
- outline types of networks and equipment including:
  - access
  - broadband deployment
  - cabling
  - customer premises' equipment (CPE)
  - internet protocol (IP) networks for enterprise and customer systems and installations
  - local area networks (LANs)
  - telephony

© Commonwealth of Australia, 2025 Future Skills Organisation

  - wide area networks (WANs)
- outline workplace environment and practices.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- sites on which fault diagnostics may be conducted
- testing equipment currently used in industry
- relevant regulatory and equipment documentation impacting complex fault repairs.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN509 Provide expert advice and support on complex faults

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to methodically diagnose complex faults, and organise repair or replacement of defective parts for customer premises' equipment (CPE).

It applies to individuals who work as telecommunications officers, installers, maintenance staff, and manufacturers or equipment specialists employed in an advisory and technical rectification role for commercial or residential installations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Establish background information	1.1 Contact client to identify type of fault and occurrence 1.2 Obtain report of any action taken by first fault repairer and subsequent result 1.3 Analyse fault history to establish any fault patterns, including questioning personnel involved in previous fault repair if relevant 1.4 Develop strategies for identification and repair using advice from

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	other engineering and technical personnel 1.5 Refer to relevant legislation, codes, regulations and standards relating to repair 1.6 Inform customer of issues and possible solutions
2. Undertake fault diagnostic	2.1 Isolate fault progressively using a fault identification approach to remove likely variables from assessment 2.2 Identify fault in the shortest time possible or escalate to appropriate level 2.3 Seek back-up support from the product manufacturer when required
3. Organise fault rectification	3.1 Determine options to rectify fault, including any downtime, and present to customer for decision 3.2 Replace or repair defective parts or equipment according to service agreement 3.3 Reprogram equipment as required 3.4 Perform work safely, for both the repairer and customer 3.5 Dismantle and remove temporary service safely and efficiently, where appropriate 3.6 Provide on-site repair staff with clear and precise instructions on fault rectification where appropriate
4. Document fault details	4.1 Record details of fault and actions taken to find, repair and store for future reference 4.2 Advise product manufacturer of fault and repair details if applicable 4.3 Recommend changes to product or product model design where appropriate 4.4 Advise client and obtain sign-off

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance	Description

© Commonwealth of Australia, 2025 Future Skills Organisation

	Criteria	
Reading	1.3, 3.2	• Identifies, analyses and evaluates technical documentation including plans, codes, standards and regulatory information
Writing	1.1, 1.4, 1.6, 2.3, 3.6, 4.1, 4.2	• Prepares clear and concise written reports and workplace documentation incorporating technical language to communicate complex information clearly and effectively
Oral Communication	1.1, 1.3, 1.4, 1.6, 2.3, 3.1, 3.6, 4.2-4.4	• Participates in exchanges with internal and external personnel using appropriate strategies to extract main ideas and information from oral texts • Employs listening and questioning techniques to confirm understanding
Numeracy	2.1, 3.3	• Uses mathematical formulae to interpret technical data and measurements relating to equipment operations
Navigate the world of work	1.5, 3.4, 3.5	• Takes personal responsibility for adherence to legal and regulatory responsibilities and organisational policies and protocols relevant to own work
Interact with others	1.1, 1.4, 1.6, 2.3, 4.2, 4.4	• Collaborates with others to achieve joint outcomes, playing an active role in negotiating positive outcomes • Selects and uses appropriate conventions and protocols when communicating with customers and personnel in a range of work contexts
Get the work done	1.2, 2.1, 2.2, 3.2, 3.3	• Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context to identify and rectify technical faults • Understands key principles and concepts underpinning design and operation of digital systems and tools, and applies these as required • Implements actions according to a predetermined plan, making adjustments if necessary • Makes decisions quickly and intuitively in familiar situations requiring immediate attention, drawing on past experience to identify key variables and determine the best course of action • Uses analytical processes to decide on a course of action, establishing criteria for deciding between options, and seeking input and advice from others when necessary

Assessment Requirements for ICTTEN509 Provide expert advice and support on complex faults

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- methodically identify and rank likely causes of faults
- analyse and interpret test results
- apply enterprise escalation and outage procedures
- prioritise fault rectification in a timely manner and report progress
- organise repair of fault and conduct of tests to verify outcomes
- prepare documentation of fault:
  - nature
  - location
  - likely causes
  - repair methodology
  - recommendations relating to system redesign or specification.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain features and operating requirements of test equipment
- summarise information required to operate remote diagnostic equipment according to a test specification
- outline legislation, codes of practice and other formal agreements that impact the work activity
- explain manufacturer’s requirements for effective operation of equipment
- summarise specific work health and safety (WHS) requirements relating to the activity and site conditions

© Commonwealth of Australia, 2025 Future Skills Organisation

- outline test methods and performance requirements
- explain typical issues and challenges that occur on site.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- sites on which fault diagnostics may be conducted
- testing equipment currently used in industry
- relevant regulatory and equipment documentation impacting complex fault repairs.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN510 Undertake planned outage management

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to develop strategies for dealing with customers, operational staff and associated system restoration.

It applies to individuals working as network engineering staff involved with the management of planned outages resulting from the fast changeover of new and existing equipment in telecommunications networks, including digital switching and transmission, wireless and optical networks.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for implementation of planned outage	1.1 Determine requirements and purpose of the outage from the outage plan, obtained from relevant personnel 1.2 Analyse all relevant data to determine likely impact of the outage on clients and the network 1.3 Notify customer of outage work and disruption to service 1.4 Prepare for contingencies according to contingency plan, as

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	specified in the outage plan
2. Implement planned outage	2.1 Conduct and monitor outage work safely as prescribed, and implement contingency plan if required 2.2 Restore system to normal operational status and conduct performance tests of the system according to specifications 2.3 Analyse test results and certify system is operating to manufacturer's specifications 2.4 Notify relevant personnel of competed outage work and of service restoration
3. Undertake administrative tasks	3.1 Document problems that occurred during outage or restoration of service and report these as continuous improvement according to enterprise quality assurance policy 3.2 Complete required documentation and update records to reflect any changes made in the course of service restoration, according to enterprise policy

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.4, 2.2, 2.3, 3.1, 3.2	• Identifies, analyses and evaluates technical documentation and applies appropriate strategies to construct meaning from complex texts
Writing	1.3, 2.4, 3.1, 3.2	• Prepares clear and concise written reports and workplace documentation, incorporating technical language to communicate complex information clearly and effectively
Oral Communication	1.1, 1.3, 2.4	• Liaises and negotiates with customers and technical staff to ensure service level agreement requirements are known and can be met within timeframes • Employs listening and questioning techniques to confirm understanding
Numeracy	1.2, 2.3	• Uses mathematical formulae to interpret technical data and make appropriate calculations to determine equipment calibrations

© Commonwealth of Australia, 2025 Future Skills Organisation

Navigate the world of work	2.1, 3.1, 3.2	• Takes personal responsibility for adherence to organisational policies and protocols relevant to own work
Interact with others	1.1, 1.3, 2.4	• Selects and uses appropriate conventions and protocols when communicating with customers and personnel in a range of work contexts
Get the work done	1.4, 2.1, 2.2	• Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context to implement outage management plans and contingency plans • Understands key principles and concepts underpinning design and operation of digital systems and tools, and applies these as required • Makes decisions quickly and intuitively in familiar situations requiring immediate attention, drawing on past experience to identify key variables and determine the best course of action • Uses analytical processes to decide on a course of action, establishing criteria for deciding between options

Assessment Requirements for ICTTEN510 Undertake planned outage management

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- implement outage plan
- comply with service assurance guidelines
- comply with work health and safety (WHS) requirements and work practices
- conduct performance tests to verify normal operation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain electrical and optical principles
- summarise legislation and licensing surrounding installation of telecommunications equipment
- outline power requirements and electrical safety
- summarise protection switching
- clarify telecommunications networks
- describe test equipment types suitable for tests to be undertaken
- explain transmission hierarchy and switching principles
- summarise transmission type and signals that may be encountered.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- sites on which outage management may be conducted
- testing equipment currently used in industry
- manufacturer's and enterprise equipment documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN511 Administer a data communications network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to establish and configure a data communications network, maintain systems and applications, administer user accounts and diagnose and isolate system faults.

It applies to individuals working as technical staff who administer a local area network (LAN) or wide area network (WAN). They may make use of enterprise procedures and flow charts, and third party test routines analysing performance and functionality of a live data communications network.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Install and configure network	1.1 Prepare and confirm, with relevant personnel, the physical and logical structure of a LAN design to resolve hardware and software compatibility conflicts 1.2 Prepare file server and install network server software 1.3 Execute workstation boot procedures and verify network and

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	work station functionality 1.4 Document network physical connections and workstation characteristics
2. Set up network facilities	2.1 Configure set-up procedures for a network print server, network printer and a shared file system 2.2 Connect a bridge or router between two networks 2.3 Set up a gateway for a network 2.4 Set up a logical disk or volume structure
3. Administer user accounts	3.1 Create a user account and a user log script 3.2 Produce a document of network users for notification of their access rights and privileges 3.3 Add and delete users to maintain an up-to-date user list 3.4 Establish disk quotas for users 3.5 Develop common user security procedures and set up user profiles
4. Install common applications	4.1 Install and configure an application in client-server mode 4.2 Establish security and multiple access to an application 4.3 Set up and configure an email client and browser for the client
5. Install and configure systems applications	5.1 Configure a backup system for redundancy, according to customer policy 5.2 Administer disk fault tolerance and redundancy techniques
6. Maintain system integrity	6.1 Implement system integrity and system monitoring techniques to provide a reliable customer data network 6.2 Use diagnostic software to detect and isolate system faults 6.3 Produce a report on network performance and fault occurrence for the customer, with recommendations for improving the integrity of the data communications network

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

© Commonwealth of Australia, 2025 Future Skills Organisation

Skill	Performance Criteria	Description
Reading	5.1	• Identifies, analyses and evaluates technical documentation, such as software and hardware manuals and specifications and relevant enterprise policy and documentation
Writing	1.1, 1.4, 3.1-3.3, 3.5, 6.3	• Prepares clear and concise written reports and workplace documentation, incorporating technical language, to communicate complex information clearly and effectively
Oral Communications	1.1	• Establishes and maintains complex and effective communications in a broad range of contexts
Numeracy	1.3, 3.4, 6.1	• Analyses and synthesises highly embedded mathematical information while testing and analysing results
Get the work done	1.1-1.3, 2.1-2.4, 3.1, 3.4, 3.5, 4.1-4.3, 5.1, 5.2, 6.1, 6.2	• Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context to organise and implement testing and contingency plans • Uses digital technologies and systems to enter, store and present data, and diagnose faults • Uses intuition, analysis and lateral thinking processes to make decisions about complex issues

Assessment Requirements for ICTTEN511 Administer a data communications network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- establish and configure a data communications network
- set up and maintain systems, facilities, applications, and software
- administer user accounts
- diagnose and isolate system faults.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- determine features and operating requirements of data communications software and hardware for network systems
- outline manufacturer's requirements of testing software and equipment
- summarise test methods and performance requirements
- describe typical issues and challenges that occur when administering a data communications network.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- sites where communications network and systems user accounts can be administered
- equipment currently used in industry
- relevant regulations and company policies impacting communications network activities.

ICTTEN512 Design and implement an enterprise voice over

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to design and implement infrastructure required to enable enterprises to use voice over internet protocol (VoIP) and other packet-based services using converging network technologies.

It applies to individuals who combine significant technical expertise with a range of analytical, research and planning skills to develop and tailor internet protocol (IP) convergence solutions for particular business needs.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan and design VoIP infrastructure to meet business requirements	1.1 Ascertain end-user requirements in consultation with client 1.2 Select VoIP infrastructure in line with business and end-user requirements, within budget limitations 1.3 Select protocols for converged networks 1.4 Select hardware, software, network and security requirements

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	according to agreed business and end-user specifications 1.5 Investigate factors affecting bandwidth and calculate bandwidth usage for various codecs, including considerations of overhead, connection quality and connection speeds
2. Install and configure VoIP infrastructure to meet business requirements	2.1 Implement telephone number mapping (ENUM), number portability, end-point addressing, path selection, calling classes and overlapping number ranges 2.2 Install, configure and test gatekeepers 2.3 Install and test convergent terminal equipment and software 2.4 Install software, and configure and test VoIP services 2.5 Configure security access levels to safeguard data, making use of appropriate tools
3. Configure UC network	3.1 Obtain topology and components of UC network 3.2 Analyse potential of IP multimedia subsystem (IMS) network architecture to enable convergence of voice, video and data applications and various mobile network technologies over IP based layer 3.3 Incorporate use of a communications server to provide real-time multimedia communications 3.4 Select common video conferencing codecs according to standards and practices 3.5 Select voice and video conferencing hardware 3.6 Implement IP-private branch exchange (PBX) functionalities in the UC network
4. Test and evaluate performance of convergent networks	4.1 Develop possible network congestion solutions for common network congestions to meet the specified quality of service (QoS) 4.2 Provide solutions for problems with contacting emergency services 4.3 Analyse network traffic and resolve problems using packet sniffer, monitoring software and hardware solutions 4.4 Troubleshoot convergent communications over wireless networks 4.5 Analyse types and effects of attacks, including man-in-the-middle attacks 4.6 Plan ways to counteract denial of service (DoS) and distributed DoS (DDoS) attacks 4.7 Predict the impact of virtual local area network (VLAN)

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	hopping, media access control (MAC) address movements, additions and changes on network
5. Test and verify security access levels	5.1 Analyse types of intrusion detection 5.2 Monitor and evaluate capability and reliability of security systems 5.3 Make system alterations to ensure protection against known and potential threats 5.4 Verify and test user settings conform to security policies 5.5 Back-up, upgrade and scan systems to minimise attacks
6. Complete documentation and sign-off procedures	6.1 Complete required records and notify client 6.2 Remove installation waste and debris from worksite and dispose of according to environmental requirements to maintain safe worksite conditions 6.3 Reinstate site according to client and company requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	3.4	• Identifies, analyses and evaluates standards to determine information and communications technology (ICT) requirements
Writing	6.1	• Prepares clear and concise workplace documentation incorporating technical language to communicate complex information clearly and effectively
Numeracy	1.2, 1.5	• Uses mathematical formulae and calculations to estimate project costs and bandwidth requirements
Navigate the world of work	6.2, 6.3	• Takes personal responsibility for adherence to legal and regulatory responsibilities and organisational policies and protocols relevant to own work
Interact with others	1.1, 6.1	• Selects and uses appropriate conventions and protocols when communicating with customers in a range of work contexts

© Commonwealth of Australia, 2025 Future Skills Organisation

Get the work done	1.2-1.5, 2.1-2.4,	• Develops plans for complex, high impact activities with strategic implications • Implements actions according to a predetermined plan, making adjustments if necessary and addressing unexpected issues • Selects and uses digital technologies and systems to achieve work goals and enhance work processes • Demonstrates a sophisticated understanding of principles, concepts, language and practices associated with the digital world • Uses systematic, analytical processes in complex, non-routine situations, setting goals, gathering relevant information and identifying and evaluating options against agreed criteria

Unit Mapping Information

Assessment Requirements for ICTTEN512 Design and implement an enterprise voice over

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- design and implement infrastructure for enterprise voice over internet protocol (VoIP) and unified communications (UC) systems to meet business requirements using converged networks
- evaluate network traffic protocols and bandwidth considerations
- configure a UC network
- assess performance of convergent networks
- test and verify security access levels.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- compare session initiation protocol (SIP), H.323 protocol and media gateway control protocol (MGCP) or media gateway control (Megaco)
- define latency, jitter and wander, and implement methods for reducing or eliminating them using jitter buffer, quality of service (QoS), traffic shaping and virtual local area networks (VLANs)
- describe the format of a SIP uniform resource identifier (URI)
- evaluate and implement SIP trunking to connect enterprise internet protocol (IP)-based communications systems over long distances
- identify common G.7xx codes and describe the impact of compression on voice quality
- define components of SIP
- examine functions of signalling protocols for converged networks
- summarise the following:
  - the client business domain, business function and organisation

© Commonwealth of Australia, 2025 Future Skills Organisation

- current and emerging industry accepted hardware and software products
- current and emerging transmission technologies and protocols
- networking technologies.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a live network
- networked computers
- network design documentation
- equipment specifications
- network components.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN513 Install, configure and test a local area network switch

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to undertake local area network (LAN) switch installation, configuration and testing in field work. It also applies to switching protocols and diagnostics required for integrating new and converging functionalities to the network.

It applies to individuals, employed by telecommunications companies and information communications technology (ICT) networking provisioning companies, who carry out installation, maintenance and upgrade of ICT networks.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to install the network switch	1.1 Prepare for installation in line with site-specific safety requirements and enterprise work health and safety (WHS) processes and procedures 1.2 Notify customer to arrange site access

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.3 Document the topology of the LAN 1.4 Obtain current and future network capacity predictions according to current and future business requirements from the appropriate person 1.5 Specify the number and type of switch required, with reference to future network requirements 1.6 Specify requirements for network management and security, as prescribed by organisational policy 1.7 Select the switch and switch operating system software version with appropriate features according to required specifications
2. Install and configure the network switch	2.1 Assemble, rack mount and connect switch and peripherals according to manufacturer's requirements 2.2 Connect user to access points using cable that meets appropriate standard 2.3 Establish a valid network connection with other network devices 2.4 Configure a network internet protocol (IP) address for the switch 2.5 Install or configure simple network management protocol (SNMP) agent software, on each switch, to collect network traffic data for the management information base (MIB) from that segment of the network and relay it to the management console 2.6 Install and configure SNMP management console software on a computer designated to be the network manager's main console, to collect network traffic data from the switch acting as agents 2.7 Manually configure user access ports of the switch for speed and full or half-duplex operation
3. Test the network switch and reconfigure the network	3.1 Test the switch and other network devices according to manufacturer's requirements and organisational guidelines 3.2 Test to ensure connectivity across the network 3.3 Modify the network to verify SNMP management software 3.4 Make adjustments to the network, depending on test and troubleshooting results
4. Complete documentation and clean worksite	4.1 Tabulate test results and complete all user reports 4.2 Complete report and notify client of network status 4.3 Clean up and restore worksite to client's satisfaction 4.4 Secure sign-off from appropriate person

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.6, 1.7, 2.1, 2.2, 3.1	• Organises, evaluates and critiques information from a range of policy, technical and instructional material
Writing	1.3, 4.1, 4.2	• Prepares clear and concise workplace documentation incorporating technical language to communicate complex information clearly and effectively
Oral Communication	1.2, 1.4, 4.2	• Uses active listening, observational and questioning techniques to identify different perspectives and confirm, clarify or revise understanding
Numeracy	2.7	• Uses mathematical formulas and calculations to take test measurements, interpret results and evaluate performance and interoperability of network
Navigate the world of work	1.1, 4.3	• Takes personal responsibility for adherence to legal and regulatory responsibilities relevant to own work
Interact with others	4.2-4.4	• Selects and uses appropriate conventions and protocols when communicating with customers
Get the work done	1.5, 1.7, 2.1-2.4, 2.7, 3.1-3.4	• Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context for complex, high-impact activities with strategic implications • Selects and uses digital technologies and systems to achieve work goals and enhance work processes • Implements actions according to a predetermined plan, making adjustments if necessary and addressing unexpected issues • Uses analytical and lateral thinking techniques for identifying issues, generating and evaluating possible solutions

Assessment Requirements for ICTTEN513 Install, configure and test a local area network switch

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- plan and prepare for the local area network (LAN) switch installation task
- select a LAN switch to meet client business specifications
- install switches without the network losing connectivity or failing
- install and test switch that ensures interoperability within the network
- use a range of switch configurations
- apply solutions to a variety of switch-related problems
- report on status of completed installation
- seek sign-off from customer.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe advantages and disadvantages of switches over hubs
- identify and evaluate the impact of pertinent sections of the Australian Computer Society Code of Ethics in relation to network switches
- describe common network cable types and connectors
- summarise common network topologies
- explain differences between standard and intelligent (i.e. configurable) switches, and between switches and hubs
- outline the importance of client documentation prepared when installing networks
- explain how to provide the network with redundant paths for reliability and how routers and switches manage these paths.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a site where switch installation can be conducted
- field measurement equipment currently used in industry
- relevant switch specifications, technical requirements for a network, switch, cabling, networked (LAN) computers, workstations, servers and a wide area network (WAN) service point of presence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN514 Install, configure and test a server

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to undertake work on a server as part of an upgrade to an existing network or during the implementation of a new network.

It applies to individuals, employed by telecommunications and information communications technology (ICT) networking provisioning companies, who carry out installation, maintenance and upgrade of ICT networks.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to install a server	1.1 Prepare for work in line with site-specific safety requirements and enterprise work health and safety (WHS) processes and procedures 1.2 Notify customer to arrange site access 1.3 Obtain server applications and features from appropriate personnel 1.4 Choose the most suitable server with reference to required server

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	application and server features 1.5 Choose the most suitable network operating system features with reference to required server solution and technical requirements 1.6 Provide alternative server solutions with reference to required server application and server features 1.7 Review required installation options 1.8 Analyse data migration requirements 1.9 Apply back-up and recovery requirements with reference to organisational policy 1.10 Analyse education and training requirements for support staff and in line with client requirements and relevant enterprise policies 1.11 Create and document a deployment plan 1.12 Advise user group of deployment and potential down times
2. Install and configure the server	2.1 Back up and restore local data in preparation for installation 2.2 Install and configure the server as required by technical requirements and functional specifications 2.3 Install and undertake configuration activities using relevant operating system and application upgrades 2.4 Reconnect and reconfigure relevant connectivity devices
3.Test server and reconfigure the network	3.1 Run system testing for benchmarking against client specification and requirements according to test plan, and record outcomes 3.2 Analyse the error report and make changes as required 3.3 Test required changes or additions 3.4 Validate changes or additions against specifications
4.Complete documentation and clean worksite	4.1 Make and document server configuration and operational changes 4.2 Tabulate test results and complete all documentation for users 4.3 Complete client report and notify of network status 4.4 Clean up and restore worksite to client’s satisfaction 4.5 Secure sign-off from appropriate person

© Commonwealth of Australia, 2025 Future Skills Organisation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.8-1.10, 2.2, 3.1, 3.4	• Organises, evaluates and critiques information from a range of enterprise policies, technical and instructional material
Writing	1.11, 3.1, 4.1	• Prepares clear and concise workplace documentation incorporating technical language to communicate complex information clearly and effectively
Oral Communication	1.2, 1.3, 4.3	• Clearly articulates requirements using language appropriate to audience and environment • Uses active listening, observational and questioning techniques to identify different perspectives and confirm, clarify or revise understanding
Numeracy	3.1-3.3, 4.2	• Make test measurements, interpret results and evaluate performance and interoperability of network
Navigate the world of work	1.1, 1.9, 1.10, 4.4	• Takes personal responsibility for adherence to legal and regulatory responsibilities and organisational policies and protocols relevant to own work
Interact with others	1.12, 4.2, 4.3, 4.5	• Selects and uses appropriate conventions and protocols when communicating with stakeholders in a range of work contexts • Considers purpose and possible actions to be taken as a result of any work-related communication • Recognises importance of taking audience, purpose and contextual factors into account when making decisions about what to communicate with whom and why
Get the work done	1.1, 1.4-1.6, 1.9, 2.1-2.4, 3.1-3.4, 4.1	• Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context for complex, high-impact activities with strategic implications • Implements actions according to a predetermined plan, making adjustments if necessary and addressing unexpected issues • Selects and uses digital technologies and systems to achieve work goals and enhance work processes • Uses formal analytical and lateral thinking techniques for identifying issues, generating and evaluating possible solutions

Assessment Requirements for ICTTEN514 Install, configure and test a server

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- analyse server and network operational issues
- apply user applications and relate to user needs when configuring a server
- create technical and user documentation
- install and configure server
- test server and reconfigure network
- troubleshoot server and network failures.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the Australian Computer Society Code of Ethics
- describe the following aspects of a common network:
  - cable types and connectors
  - topologies
- explain compatibility issues and resolution procedures
- summarise desktop applications and operating systems
- outline documentation requirements for networks
- describe typical enterprise communication and training systems for staff involved in deployment
- outline features of:
  - current network operating systems (NOS)
  - current server applications compatibility issues and resolution procedures
- outline implementation and configuration of servers

© Commonwealth of Australia, 2025 Future Skills Organisation

- explain system back-up procedures.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a site where server installation may be conducted
- relevant server specifications
- cabling
- networked local area network (LAN) computers
- server diagnostic software
- switch
- technical requirements for a network
- wide area network (WAN) service point of presence
- workstations
- relevant regulatory documentation impacting installation activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN515 Dimension and design a radio frequency identification system

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to carry out installation, maintenance and upgrade of information and communication technology (ICT) networks.

It applies to individuals employed by telecommunications and ICT networking provisioning companies specialising in radio frequency identification (RFID) technology. These individuals might work on upgrades to existing systems or be involved in implementation of new logistical or security networks using RFID technology according to design specifications.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to dimension and design an RFID system	1.1 Obtain the client's business requirements of the intended RFID system to effectively inform the new design 1.2 Research RFID technologies, their functionalities and different implementations of configurations 1.3 Select suitable software and hardware types to ensure the

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	proposed system is designed to meet business requirements 1.4 Conduct a survey of available interrogators or readers, tags and wireless units
2. Dimension and design RFID system	2.1 Select the most appropriate interrogators or readers for the given specification to ensure their compatibility with current network infrastructure, if applicable 2.2 Minimise interrogator to interrogator interference 2.3 Verify antenna geometry and footprint are consistent with the chosen design 2.4 Minimise sources of interference 2.5 Incorporate use of anti-collision protocols into the RFID design 2.6 Customise appropriate tag to client requirements 2.7 Predict performance for read distance, write distance and tag response time to confirm these conform with client requirements 2.8 Select optimal locations for an RFID tag to be placed on an item 2.9 Prepare a design proposal for the RFID system including specifications 2.10 Prepare a report containing design solutions and recommendations of preferred products, including justification for recommendations 2.11 Submit report to client for approval
3. Document specified design	3.1 Complete documentation according to client requirements 3.2 Inform client of standards applying to the design 3.3 Secure sign-off of RFID design from appropriate person

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2	• Organises, evaluates and critiques technical documentation from a range of complex texts

© Commonwealth of Australia, 2025 Future Skills Organisation

Writing	2.9, 2.10, 3.1	• Prepares clear and concise workplace documentation including reports and design solutions incorporating technical language to communicate complex information clearly and effectively
Oral Communication	1.1	• Uses active listening, observational and questioning techniques to identify different perspectives and confirm, clarify or revise understanding
Numeracy	1.2, 2.7, 2.9	• Uses mathematical formulae and geometric calculations to interpret and record technical specifications and evaluate possible design solutions
Interact with others	1.1, 2.11, 3.2, 3.3	• Selects appropriate communication protocols and conventions in a broad range of work contexts
Get the work done	1.3, 1.4, 2.1-2.6, 2.8	• Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context for complex, high-impact activities with strategic implications • Implements actions according to a predetermined plan, making adjustments if necessary and addressing unexpected issues • Selects and uses digital technologies and systems to achieve work goals and enhance work processes • Uses formal analytical and lateral thinking techniques for identifying issues, generating and evaluating possible solutions

Assessment Requirements for ICTTEN515 Dimension and design a radio frequency identification system

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- adapt radio frequency identification (RFID) technologies to a specified plan and design
- evaluate RFID client specifications against accepted industry practices
- include RFID architecture across a secure environment
- integrate RFID information into business applications
- produce design information in configuring the network with internet protocol (IP) addressing
- produce information that can be shared between businesses
- make recommendations and offer optimum design solutions.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise the business process design
- summarise the client's business operations, business function and organisation
- outline compatibility issues with existing system and resolution procedures
- explain configuration of IP networks
- describe desktop applications and operating systems as required
- explain the linkage between operational processes
- summarise network protocols and operating systems
- outline network topologies
- summarise radio spectrum and RFID frequencies
- explain radio frequency (RF) interference
- describe general characteristics of RFID architecture

© Commonwealth of Australia, 2025 Future Skills Organisation

- provide a detailed summary of RFID hardware and software
- outline RFID technologies incorporating substantial depth in network operating systems, protocols, interrogators and sensors, wireless technologies and cabling standards
- demonstrate RFID product knowledge
- summarise security protocols, standards and data encryption.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a suitable telecommunications site
- client's functional requirements
- RFID equipment specifications
- database software
- simulation software
- organisational guidelines
- network or computer layout documentation and premises plans.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN516 Produce technical solutions from business specifications

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to compile and evaluate business specifications from a client and produce viable business solutions.

It applies to individuals who carry out network design and implementation of practical technical solutions of information and communication technology (ICT) networks. They are employed by telecommunications and information technology networking provisioning companies specialising in integrating converging and emerging technologies of ICT networks.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to produce technical solutions from business specifications	1.1 Obtain business requirements and business specifications for the client from appropriate person 1.2 Research and identify the client's business model 1.3 Determine technical specifications for the business 1.4 Clarify and confirm the business problem and key stakeholders'

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	requirements with stakeholders
2. Evaluate the impact of the technical requirements	2.1 Review and assess business problems, opportunities and objectives 2.2 Determine technical requirements in respect of input and output, interface, process flow or quality requirements 2.3 Analyse hardware, software and network requirements 2.4 Build business platform based on software solutions 2.5 Investigate processes to be changed by the business solution 2.6 Produce an evaluation document on the impact of the technical requirements on the business
3. Produce technical business solutions	3.1 Develop technical solutions in response to problems and business requirements 3.2 Determine costs involved to implement the technical business solution 3.3 Investigate a range of supplier products to determine which one best meets technical requirements 3.4 Produce a report on the technical solutions addressing the business specifications and recommendations against business requirements
4. Document and validate agreed solutions	4.1 Forward technical requirements and solution overview to appropriate person for feedback 4.2 Analyse feedback and incorporate change as required 4.3 Document changes and distribute to appropriate person 4.4 Obtain sign-off on final business solution

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 2.1, 4.2	• Organises, evaluates and critiques workplace documentation from a range of complex texts

© Commonwealth of Australia, 2025 Future Skills Organisation

Writing	1.5, 2.6, 3.4, 4.3	• Prepares clear and concise workplace documentation including reports and design solutions incorporating technical language to communicate complex information clearly and effectively
Oral communication	1.4	• Uses active listening, observational and questioning techniques to identify different perspectives and confirm, clarify or revise understanding
Numeracy	3.2	• Uses mathematical formulas and calculations to interpret business costs and evaluate possible technical design solutions
Interact with others	1.1, 1.2, 1.4, 1.5, 4.1, 4.3, 4.4	• Recognises and applies protocols governing what to communicate, with whom and how in context of own work • Selects appropriate communication protocols and conventions in a broad range of work contexts
Get the work done	1.3, 2.1-2.5, 3.1, 3.3	• Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context for complex, high-impact activities with strategic implications • Demonstrates a sophisticated understanding of principles, concepts, language and practices associated with the digital world and uses these to understand uses and potential of technology • Implements actions according to a predetermined plan, making adjustments if necessary and addressing unexpected issues • Considers strategic and operational potential of digital trends to achieve work goals, enhance work processes and enhance solutions • Uses formal, analytical and lateral thinking techniques for identifying issues, generating and evaluating possible solutions

Assessment Requirements for ICTTEN516 Produce technical solutions from business specifications

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- adapt technologies for required technical solutions
- use site design software and hardware
- evaluate client specifications against accepted industry practices
- develop technical solutions from business specifications
- document information that can be shared between businesses
- apply design concepts to business solutions
- document technical reports
- make recommendations and offer optimum design solutions.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the client business domain, business function and organisation
- explain compatibility issues and resolution procedures
- outline configuration of internet protocol (IP) networks
- describe common desktop applications and operating systems
- explain how to document technical specifications
- summarise security protocols, standards and data encryption
- explain the role of the following technologies in business systems:
  - network topologies
  - network protocols and operating systems
  - radio frequency (RF) networks
  - optical networks

© Commonwealth of Australia, 2025 Future Skills Organisation

- mobile cellular networks
- core networks
- access networks
- radio frequency identification.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- client functional requirements
- business specifications
- database software
- simulation software
- organisational guidelines
- network and computer layouts
- site design software and hardware
- information on a range of ICT business solutions.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN517 Plan a wireless mesh network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to design a scalable wireless access network using mesh technology for growing communities to provide users with secure wireless roaming beyond traditional wireless local area network (LAN) boundaries, and which are readily deployed in areas that lack wired backhaul.

It applies to individuals who have proficient technical skills such as planning and field officers from private and public organisations who undertake work on wireless networking or radio communications equipment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Research wireless mesh networks and formulate the system architecture	1.1 Confirm, with regulatory spectrum management authority, the specific regulations regarding radio characteristics 1.2 Contact customer to determine wireless mesh network design specifications 1.3 Evaluate the use of frequency bands for operation of the wireless

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	mesh networks (WMN) 1.4 Evaluate and select wireless technology, internet protocol (IP) version and mesh routing protocol to satisfy design criteria 1.5 Specify and source hardware and software requirements
2. Prepare a detailed plan for the mesh network	2.1 Evaluate the maximum line of sight distances achievable between backbone nodes and between mesh nodes 2.2 Plan sites where mesh nodes will be located and plot to scale on a map 2.3 Estimate quantity and length of the links required between mesh nodes to ensure design is within specifications 2.4 Design backbone links in mesh topology for scalability of future deployments 2.5 Select location of the internet gateway for the network 2.6 Allocate operating frequencies at mesh nodes, backbone nodes and wireless access points for optimum network performance with minimal interference from adjacent network routers
3. Plan IP addresses and subnet mask	3.1 Produce an addressing scheme and allocate IP addresses and subnet mask to mesh nodes, backbone nodes and access points 3.2 Produce a configuration scheme to secure network
4. Document the mesh network	4.1 Document plans and drawings for the mesh network 4.2 Produce an installation plan for building the mesh network 4.3 Following installation, configuration and testing of the mesh network, incorporate 'as built' amendments, if appropriate

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.3, 1.4, 2.1, 4.1	• Critically analyses plans and other documentation from a variety of sources, and consolidates information to evaluate requirements
Writing	1.5, 3.2, 4.1, 4.2	• Prepares clear and concise workplace documentation

© Commonwealth of Australia, 2025 Future Skills Organisation

		including reports and design solutions incorporating technical language to communicate complex information clearly and effectively
Numeracy	2.1-2.4	• Performs calculations, interprets results and evaluates different types of technical data for design solutions
Oral Communication	1.1, 1.2	• Uses active listening, observational and questioning techniques to identify different perspectives and confirm, clarify or revise understanding
Interact with others	1.1, 1.2	• Recognises and applies protocols governing what to communicate, with whom and how, in own work context
Get the work done	1.3-1.5, 2.1, 2.2, 2.4-2.6, 3.1, 4.3	• Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context for complex, high-impact activities with strategic implications • Selects and uses digital technologies and systems to achieve work goals and enhance work processes • Implements actions according to a predetermined plan, making adjustments if necessary and addressing unexpected issues • May use formal, analytical and lateral thinking techniques for identifying issues, generating and evaluating possible solutions

Assessment Requirements for ICTTEN517 Plan a wireless mesh network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- evaluate and select wireless technology and mesh routing protocol
- plan a wireless mesh network from a project brief
- produce an internet protocol (IP) addressing scheme
- prepare an installation plan.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- evaluate antenna gain and polarisation
- outline cable loss
- conduct calculations for effective isotropic radiated power (EIRP)
- calculate line of site radio range
- explain decibels and related units
- summarise IP addressing and subnet masks
- explain network security and firewalls
- outline a range of network topologies
- summarise radio frequency (RF) bands
- explain routing protocols
- clarify transmission control protocol (TCP)-IP protocols
- explain wireless networking hardware, access points, wireless routers and gateway
- explain wireless protocols.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- sites where planning a wireless mesh network may be conducted
- design criteria and other site-related documentation
- equipment specifications and technical documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN601 Undertake qualification testing of new or enhanced equipment and systems

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to inspect and test international telecommunications network equipment not previously installed in an Australian network. It involves assessing its suitability and compliance with local regulations and conditions for the carrier or asset owner.

It applies to individuals working as field officers, technicians or technical supervisors for carriers, contractors or other service providers, who verify compliance of new equipment or systems with Australian standards.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Ensure conformity of international design to Australian standards	1.1 Assess original international design to verify compliance with relevant Australian legislation, codes, regulations and standards 1.2 Reconfigure international design in consultation with customer 1.3 Rewrite design specifications to include configuration

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	amendments
2. Plan and establish test regime	2.1 Plan type and number of tests to ensure full trial of new or enhanced design and greatest coverage for minimal tests 2.2 Plan and establish test environment to ensure total validity of chosen tests 2.3 Design test regime of proposed system to test impact on existing systems 2.4 Confirm test regime in consultation with planners and verify test equipment meets required standards
3. Undertake tests	3.1 Conduct and document tests including live system tests in logical and sequential order to planned test regime 3.2 Negotiate problems experienced during tests with system experts or designers to plan contingency activity according to enterprise policy 3.3 Prepare and submit trouble reports according to enterprise policy
4. Analyse test results	4.1 Analyse test results against design specifications and planned outcomes 4.2 Prepare a report referring major deficiencies to designers with recommendations for design change 4.3 Analyse minor variances, plan solutions and document changes to specifications
5. Retest design changes	5.1 Implement design and specification changes and conduct further tests as required 5.2 Analyse test results to verify compliance with updated design specifications 5.3 Document results of tests according to enterprise policy

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

© Commonwealth of Australia, 2025 Future Skills Organisation

Reading	1.1, 3.2, 3.3, 4.1, 5.3	• Organises, evaluates and critiques technical specifications, legislative, regulatory and policy requirements
Writing	1.3, 3.1, 3.3, 4.2, 4.3, 5.3	• Prepares clear and concise workplace documentation including reports incorporating technical language to communicate recommendations clearly and effectively
Oral Communication	1.2, 2.4	• Uses active listening, observational and questioning techniques to identify different perspectives and confirm, clarify or revise understanding
Numeracy	4.1, 5.2	• Uses mathematical formulae to make calculations and necessary calibration changes by interpreting test results
Navigate the world of work	1.1, 3.2, 3.3, 5.3	• Adheres to organisational procedures and protocols and legal and regulatory responsibilities, and considers these when planning and undertaking work
Interact with others	2.4, 3.2	• Collaborates with others to achieve joint outcomes, playing an active role in negotiating positive outcomes • Selects and uses appropriate conventions and protocols when communicating with personnel in a range of work contexts
Get the work done	2.1-2.3, 3.1, 3.2, 4.3, 5.1	• Takes responsibility for own workload, negotiating some key aspects with others • Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context for complex, high impact activities with strategic implications • Uses sophisticated understanding of principles, concepts, language and practices associated with the digital world to identify uses and potential of new technologies • Implements actions according to a predetermined plan, making adjustments if necessary • Uses formal, analytical and lateral thinking techniques for identifying issues, and generating and evaluating possible solutions

Assessment Requirements for ICTTEN601 Undertake qualification testing of new or enhanced equipment and systems

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- apply Australian standards to international designs
- identify customer's specific requirements
- configure and set up test regimes
- identify and conduct tests, including live system tests, and interpret and analyse results
- approach problem diagnosis systematically, eliminating causes
- re-test design changes
- prepare report, including deficiencies, analysis and recommendations.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the Australian standards applicable to system and equipment compliance
- outline necessary connections to carrier infrastructure or equipment
- evaluate the system design requiring testing
- explain network and equipment tests required for compliance
- outline common network architectures
- explain relevant international standards.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

© Commonwealth of Australia, 2025 Future Skills Organisation

- a test site where qualification testing of equipment and systems may be conducted
- equipment currently used in industry
- relevant Australian and international standards, codes, design specifications, manuals and reference materials.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN602 Undertake system administration

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to maintain the integrity of network support systems and software, for both system platforms and applications of computer systems, including local area networks (LAN) and wide area networks (WAN).

It applies to individuals, working as system administration support officers for service providers and large organisations, who manage and administer networks and make recommendations for improved customer support.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Undertake proactive maintenance of system	1.1 Prepare methodology to undertake platform database optimisation and administration effectively 1.2 Produce a cost-benefit analysis of database optimisation schedule to evaluate the effective return on investment (RoI) benefit to the organisation 1.3 Produce training instructions for new users on methodology to

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	ensure effective database optimisation and administration 1.4 Interrogate and monitor system platforms to determine error logs, aging time on processes, database checks and system loadings 1.5 Notify appropriate personnel of problems and provide advice and guidance on likely solutions 1.6 Conduct system measurements from a user perspective on response times, and initiate investigations on problems where specifications are not being met 1.7 Assess availability of data storage space and initiate appropriate action where required 1.8 Develop procedures for system backup and restoration, review for efficiency of operation and amend where required
2. Provide application support to system users	2.1 Produce a set of procedures for formal meetings with users on a regular basis for effectiveness to discuss user issues and provide support 2.2 Set up a user support network to provide responsive system administration to users on an ongoing basis as critical issues arise
3. Create and delete user accounts	3.1 Create a hierarchical user profiling system to manage user accounts effectively according to enterprise policy 3.2 Establish and monitor security procedures relating to access according to policy 3.3 Assess grounds for deletion of user accounts and determine necessary action
4. Undertake special investigations	4.1 Evaluate requests for investigation to determine detail of action required 4.2 Prepare activity plan including timelines, specific goals, investigative team and resources required to conduct an investigation 4.3 Conduct investigation methodically according to plan and record findings 4.4 Analyse findings and prepare and forward reports, including recommendations to the requesting body

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

© Commonwealth of Australia, 2025 Future Skills Organisation

Skill	Performance Criteria	Description
Reading	3.1, 3.2, 4.4	• Organises, evaluates and interprets technical specifications and related documentation from a range of complex texts
Writing	1.2, 1.3, 1.8, 2.1, 4.2-4.4	• Prepares clear and concise workplace documentation including training instructions • Produces reports on system administration and investigations, incorporating technical language, to communicate complex information clearly and effectively
Oral Communication	1.5	• Provides verbal instructions and guidance using specific and relevant language suitable to audience • Employs listening and questioning techniques to confirm understanding
Numeracy	1.2, 1.6	• Uses mathematical formulae to make statistical calculations about traffic predictions • Uses mathematical formulae to complete cost-benefit analysis
Get the work done	1.1, 1.4-1.7, 2.2, 3.1-3.3, 4.1-4.3	• Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context for complex, high-impact activities with strategic implications • Considers the strategic and operational potential of digital technologies to achieve work goals, enhance work processes and enhance solutions • Uses digital systems and tools to enter, store and monitor data • Recognises and addresses some unfamiliar problems of increasing complexity within own scope • Uses formal processes to monitor implementation of solutions and reflect on outcomes

Assessment Requirements for ICTTEN602 Undertake system administration

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- prepare a methodology for system maintenance
- produce cost-benefit analysis and training for database optimisation and administration
- review development of training instructions
- conduct system measurements
- develop support processes for system users
- manage user accounts and security procedures
- investigate potential system administration problems and make recommendations.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise back-up systems
- demonstrate a deep knowledge of computer systems
- outline meeting procedures
- outline the common methodology for system administration
- summarise optimisation and administration of a database
- provide a summary of telecommunications monitoring tools
- explain the process for investigation requests and actions
- outline user account security and profiling system.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a network for maintenance and analysis of special investigations
- equipment and systems manuals, specifications and enterprise policy.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN603 Undertake network traffic management

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to monitor, analyse and improve network performance for the purpose of effectively managing traffic flow in telecommunications networks.

It applies to individuals working as field officers, technicians or technical supervisors for carriers, contractors or other service providers, who manage network traffic and make recommendations for capacity planning switching and transmission networks.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Evaluate network capacity and traffic problems	1.1 Interrogate network alarms to identify areas of route and circuit unavailability 1.2 Assess planned and unplanned outages to determine network unavailability and verify restoration times 1.3 Interrogate system to identify traffic status using network management system

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.4 Analyse system alert to identify real and potential traffic problems 1.5 Analyse customer complaints and traffic measurement data to identify network problems 1.6 Activate and deactivate semi-permanent controls active in the network on a regular basis to simulate irregular traffic
2. Develop strategies to overcome network traffic problems	2.1 Conduct traffic measurements across all identified routes 2.2 Analyse results including historical data to make assessment of traffic volume requirements 2.3 Determine specific thresholds, loading and grading levels to alter traffic flows 2.4 Liaise with personnel to determine amendments to plan, based on funding parameters and budgeted levels 2.5 Develop strategies, based on traffic analysis and patterns, to control traffic and prevent congestion or other traffic problems 2.6 Develop strategies for recovery where traffic congestion occurs 2.7 Develop contingency plans to allow for problems during network changes
3. Apply short and long term solutions	3.1 Implement software changes according to planned strategy 3.2 Develop short-term ad hoc solutions where only a temporary solution is required 3.3 Ensure reversal action can be initiated in cases of temporary solutions 3.4 Implement contingency plan where required 3.5 Undertake monitoring of changes and take measurements to assess outcomes of variations 3.6 Prepare a report based on analysis of measurements for appropriate personnel with recommendations for further changes or actions 3.7 Review and monitor strategies regularly and initiate corrective action where required
4. Detect and take action on potential traffic congestion	4.1 Measure and analyse traffic loads to assess potential congestion problems and determine possible impact 4.2 Control traffic flow to prevent processor overloads 4.3 Evaluate potential traffic increases for impact on the network and develop contingencies to control traffic flow if required

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
5. Provide traffic indicators for capacity planning	5.1 Predict future potential traffic trends and requirements using data on current and historical traffic patterns 5.2 Identify potential network traffic problems and make recommendations to network planners 5.3 Complete reports with recommendations and forward to enterprise planners and account managers

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.5, 2.2, 5.1	• Organises, evaluates and interprets technical specifications and related documentation from a range of complex texts
Writing	2.5-2.7, 3.6, 5.3	• Prepares clear and concise workplace documentation, including reports and recommendations incorporating technical language, to communicate complex information clearly and effectively
Oral Communication	2.4	• Participates in verbal exchanges using specific and relevant language suitable to audience • Employs listening and questioning techniques to confirm understanding
Numeracy	1.5, 2.1-2.4, 3.5, 4.1, 5.1	• Uses mathematical formulas to interpret data and make projections about traffic flow • Uses mathematical formulae to estimate and plan project costs within business budgets
Interact with others	2.4, 5.2, 5.3	• Collaborates with others to achieve joint outcomes • Selects and uses appropriate conventions and protocols when communicating with personnel in a range of work contexts
Get the work done	1.1-1.4, 1.6, 2.5-2.7, 3.1-3.4, 3.7, 4.2, 4.3	• Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context for complex, high-impact activities with strategic implications • Approaches problem-solving in diverse ways, recognising that there is no single formula that applies

© Commonwealth of Australia, 2025 Future Skills Organisation

		in all situations • Uses formal processes to monitor implementation of solutions and reflect on outcomes • Uses digital systems and tools to enter, store and analyse data

Assessment Requirements for ICTTEN603 Undertake network traffic management

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- implement a contingency plan
- conduct traffic measurements
- develop contingencies to control traffic flow
- identify potential network traffic problems and make recommendations
- provide information for capacity planning.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain customer policies and service level agreements
- outline network management planning principles
- summarise traffic blocking, congestion and dimensioning principles
- explain traffic engineering
- summarise traffic patterns
- outline transmission type and signals that may be encountered
- clarify typical network topologies, switching, routing and transmission techniques
- summarise various network management systems suitable for conducting traffic evaluations.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a network and equipment for traffic monitoring and management
- equipment and systems manuals, specifications and enterprise policy.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN604 Coordinate fault rectification and restoration of service following network outages

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to identify, analyse and resolve service faults by coordinating fault rectification. It describes strategies for dealing with customers, operational staff and associated system restoration.

It applies to individuals who have high-level technical skills and appropriate authority to coordinate activities of maintenance personnel and oversee compliance issues associated with service level agreements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for restoration of client services	1.1 Evaluate relevant data to determine the nature of the fault and extent of the outage 1.2 Assess impact of the fault on network and clients, and establish priority of actions to be taken 1.3 Analyse alarm and other network data and record details

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	according to contractual agreements and enterprise policy 1.4 Prepare an action plan to manage fault rectification and restoration to minimise impact on the network and affected customer 1.5 Provide a central point for all rectification and restoration activity and information, to coordinate action and progress 1.6 Prioritise service restoration based on assessment of contractual arrangements, including service level agreements with clients 1.7 Negotiate with client's account manager regarding repair arrangements where service level agreements cannot be met
2. Implement action plan for fault rectification and service restoration	2.1 Notify all relevant personnel and departments involved in the outage, according to enterprise policy 2.2 Isolate affected alarms and monitor all associated alarms to confirm no additional problems occur 2.3 Locate and rectify fault, following action plan backed up by contingency plan according to enterprise policy 2.4 Manage repair activity with appropriate technical support and adjust resource allocations or escalate if required to ensure effective restoration of network services within a specified timeline 2.5 Reset alarms and restore services to normal network configuration 2.6 Test and monitor network activity on recovery to certify effective fault clearance and service restoration
3. Finalise administrative tasks	3.1 Complete administrative tasks according to enterprise instructions 3.2 Notify customers of fault rectification and service restoration according to service level agreement

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3, 1.6, 2.1, 2.3, 3.1, 3.2	• Organises, evaluates and interprets technical readings, instructional material and workplace documentation from

© Commonwealth of Australia, 2025 Future Skills Organisation

		a range of complex texts
Writing	1.3, 1.4, 3.1	• Prepares clear and concise workplace documentation, including reports and recommendations, incorporating technical language to communicate complex information clearly and effectively
Numeracy	1.1, 1.3	• Analyses and synthesises highly embedded mathematical information
Interact with others	1.7, 2.4	• Demonstrates understanding of what to communicate, with whom and how, in a broad range of work contexts • Collaborates and cooperates with others to achieve joint outcomes
Get the work done	1.2, 1.4-1.6, 2.2-2.6	• Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context for complex, high-impact activities with strategic implications • Uses digital systems and tools to enter, store and monitor data, and for communication purposes • Uses formal, analytical and lateral thinking techniques for identifying issues, generating and evaluating possible solutions • Uses formal processes to monitor implementation of solutions and reflect on outcomes

Assessment Requirements for ICTTEN604 Coordinate fault rectification and restoration of service following network outages

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- prepare an action plan to manage fault rectification and service restoration
- coordinate implementation of action plan and manage repair activities
- apply escalation procedures
- finalise the administrative and notification processes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline alarm conditions and areas of the network or service they impact
- clarify connections to carrier infrastructure or equipment
- summarise customer care and service level agreements and policies
- outline electrical and optical principles underpinning telecommunications
- summarise escalation procedures and list appropriate tier level contacts
- summarise legislation and licensing requirements surrounding installation of telecommunications equipment
- describe network and transmission equipment faults
- outline work health and safety (WHS) requirements and work practices relevant to fault rectification
- explain power requirements and electrical safety
- outline protection switching
- list telecommunications applications and related equipment
- provide a detailed list of relevant test equipment
- outline transmission hierarchy and switching principles

© Commonwealth of Australia, 2025 Future Skills Organisation

- summarise typical performance parameters and faults that may be encountered.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- sites where fault rectification and restoration of service may be conducted
- testing equipment currently used in industry
- manufacturer's and enterprise documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN605 Implement planned network changes with minimal impact to the customer

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to effectively upgrade network equipment, increase network capacity, install new network elements and change existing network elements. It involves control of planned routine maintenance activities on the network.

It applies to individuals with high-level technical skills, working for service providers, asset owners and contractors, who coordinate activities of maintenance personnel and address compliance issues associated with service level agreements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for network changes plan	1.1 Obtain relevant legislation, codes, regulations and standards for compliance when conducting work 1.2 Evaluate work order with relevant personnel and identify likely effects, on the network and impact on customers, of the planned

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	changes 1.3 Develop network engineering strategies including management of outages with involvement of the network operations centre (NOC) 1.4 Prepare and produce a network changes plan for approval according to enterprise practice
2. Implement and test network changes prior to customer utilisation	2.1 Implement network changes according to network engineering strategies following work health and safety (WHS) and environmental requirements with minimal impact to customer traffic 2.2 Conduct integration testing of newly installed equipment to ensure interoperability with existing equipment and network 2.3 Conduct performance test to assess network changes as stated in manufacturer's specifications and enterprise acceptance testing procedures 2.4 Analyse test results and rectify problems or escalate according to enterprise procedures 2.5 Initiate quality assurance procedures to ensure confidence in quality of processes according to enterprise policy 2.6 Prepare reports for the appropriate area within the enterprise
3. Enable functionality of network changes to customer	3.1 Monitor network stability prior to connecting customer traffic and take action to rectify any problems 3.2 Enable full functionality of network changes to customer according to the network changes plan, and monitor network to ensure continued stability 3.3 Prepare appropriate documentation according to enterprise requirements
4. Assess and report on implementation of network changes	4.1 Use monitoring data to evaluate performance of the network changes and impact to customers according to network engineering strategies and customer requirements 4.2 Document implementation of planned network changes and recommend any further improvements as part of the enterprise's quality assurance system

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

© Commonwealth of Australia, 2025 Future Skills Organisation

Skill	Performance Criteria	Description
Reading	1.1, 2.3-2.5, 3.2, 3.3, 4.1	• Organises, evaluates and interprets equipment and system manuals and specifications, and relevant enterprise policy and documentation
Writing	1.4, 2.6, 3.3, 4.2	• Prepares clear and concise workplace documentation including reports and recommendations incorporating technical language to communicate complex information clearly and effectively
Oral Communication	1.2	• Uses active listening, observational and questioning techniques to identify different perspectives and confirm, clarify or revise understanding
Navigate the world of work	2.1, 2.5, 4.2	• Considers and adheres to organisational procedures and protocols and legal and regulatory responsibilities when planning and undertaking work • Seeks to improve policies and procedures to better meet organisational goals
Get the work done	1.1-1.3, 2.2-2.5, 3.1, 3.2, 4.1	• Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context for complex, high-impact activities with strategic implications • Uses digital systems and tools to enter, store and analyse data • Considers strategic and operational potential of digital trends to achieve work goals, and enhance work processes and solutions • May use formal, analytical and lateral thinking techniques for identifying issues, generating and evaluating possible solutions and escalating issues to others when appropriate

Assessment Requirements for ICTTEN605 Implement planned network changes with minimal impact to the customer

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- evaluate planned network changes, including impact on customer
- develop network engineering strategies to manage outages
- implement network changes
- conduct integration testing, analyse results and rectify faults
- enable full functionality of network changes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline compatibility and interoperability of system types
- explain factors affecting network stability
- identify and describe the function of network hardware
- summarise internet protocol (IP) based networks
- outline legislation and licensing requirements relevant to work activity
- provide a detailed summary of optical networks
- explain quality assurance procedures
- identify and describe the function of network software
- evaluate the test equipment suitable for tests to be made, and describe calibration procedures
- outline types of customer networks.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- sites where network changes may be conducted
- testing equipment currently used in industry
- systems manuals, specifications and enterprise policy.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN606 Manage a common channel signalling network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to combine technical and organisational assistance to provide signalling facilities to interconnect telecommunications over trunked networks.

It applies to individuals who may be responsible for small projects or parts of larger projects to provide a reliable service to customers and who work as technical officers or engineers for private and public organisations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Analyse signalling and digital path alarms and clear network faults	1.1 Obtain relevant legislation, codes, regulations and standards to prepare for the task 1.2 Activate alarm management system to produce a trouble report and verify common channel signalling (CCS) and data faults or problems 1.3 Investigate cause of alarm and analyse results to determine

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	appropriate repair action and allocate resources 1.4 Monitor repair and restoration procedures to ensure commitment to specified timelines and initiate escalation procedures as appropriate and according to enterprise procedures 1.5 Reset alarms on completion of repair and monitor subsequent alarms to ensure no re-occurrence of the problem
2. Monitor integrity of data received on equipment ports	2.1 Activate alarm screens and monitor port times on a regular basis to ensure procedures are running 2.2 Clear port blockage and problems on completion of planned works and log in appropriate database 2.3 Monitor repair and restoration procedures to ensure commitment to specified timelines and initiate escalation procedures as appropriate and according to enterprise procedures
3. Monitor and acceptance test repair	3.1 Verify network stabilisation throughout repair and monitor repair action to ensure minimal impact on the overall network 3.2 Undertake acceptance testing according to prescribed operating procedures 3.3 Monitor network stability on completion and refer problems to appropriate area for action 3.4 Block alarms for out-of-service circuits
4. Coordinate CCS relationships	4.1 Log requests for relationship change and follow up problems with appropriate support staff 4.2 Monitor network stability and manage loading of data until the process is completed 4.3 Update models and enterprise systems
5. Coordinate CCS rearrangements	5.1 Log requests for rearrangement scenarios and verify feasibility of the rearrangement 5.2 Enter details of rearrangement in appropriate system and update system records 5.3 Monitor completed work for accuracy and network stability on completion 5.4 Produce a copy of documentation for future reference

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 1.4, 2.3, 3.2	• Organises, evaluates and interprets information from equipment and system manuals, specifications and relevant enterprise documentation
Writing	2.2, 4.1, 5.1, 5.2	• Prepares clear and concise workplace documentation, including reports and recommendations, incorporating technical language to communicate complex information clearly and effectively
Numeracy	1.2, 1.3	• Extracts and evaluates mathematical data embedded in a range of technical information
Navigate the world of work	1.5, 2.3	• Considers and adheres to organisational procedures and protocols and legal and regulatory responsibilities when planning and undertaking work
Interact with others	3.3, 4.1	• Selects and uses appropriate conventions and protocols when communicating with personnel in a range of work contexts
Get the work done	1.1-1.5, 2.1, 2.2, 3.1-3.4, 4.2, 4.3, 5.3, 5.4	• Sequences and schedules complex activities, monitors implementation and manages relevant communication • Uses analytical processes to decide on a course of action, establishing criteria for deciding between options and seeking input and advice from others, if necessary • Uses formal processes to monitor implementation of solutions and reflect on outcomes • Uses digital systems and tools to enter, store and analyse data

Assessment Requirements for ICTTEN606 Manage a common channel signalling network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- identify and implement repair action within service assurance guidelines
- analyse and interpret alarms including common channel signalling (CCS) and digital path
- apply enterprise fault management priorities and escalation procedures
- resolve problems in a methodical and logical manner
- conduct appropriate tests and interpret results.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain acceptance tests
- summarise alarm set-ups
- explain principles of the following aspects of common channel signalling (CCS):
  - architecture
  - protocols
  - signalling
  - testing
- describe CCS data and signalling pathways
- explain repair and restoration procedures
- outline switching network equipment operation.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a site with CCS network
- tests and equipment currently used in industry
- relevant legislation, codes, regulations and standards.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN607 Analyse and organise repair of highly complex telecommunications network faults

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to identify faults across all network types, with collaboration from the network operations centre (NOC), and resolve any problems.

It applies to individuals working as network engineers, telecommunications officers, installers, maintenance staff and manufacturers or equipment specialists. It also applies to NOC staff in advisory roles and technical rectification roles.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Research fault background	1.1 Analyse current, relevant data and previous actions taken by other personnel 1.2 Research areas of similarity to network fault 1.3 Develop commercial and technical strategies with equipment vendor and NOC for diagnosing the fault

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.4 Address and discuss all work health and safety (WHS) issues with relevant personnel 1.5 Obtain appropriate clearance and access to network equipment, software and firmware codes where they apply
2. Diagnose fault	2.1 Apply a methodical approach to isolate and diagnose the problem 2.2 Simulate fault in a workshop or laboratory environment if possible 2.3 Seek support from the vendor while investigation progresses 2.4 Instruct on-site technical staff to run appropriate tests and analyse results 2.5 Diagnose network fault using established methodical strategies in a timely fashion without undue disruption to other services 2.6 Develop a plan to rectify the fault
3. Organise fault rectification	3.1 Recommend fault rectification plan to the NOC, including any outages, seek approval and adjust plans accordingly 3.2 Instruct on-site repairers with clear and methodical instructions on how to proceed in rectifying the fault 3.3 Organise replacement or repair of faulty equipment with appropriate advice from vendors and manufacturers 3.4 Reconfigure replaced or repaired equipment and test rectified fault to ensure required performance 3.5 Notify NOC, affected customers and on-site staff of fault rectification
4. Report and document fault details and rectification	4.1 Notify vendors of repair details and recommend changes to equipment design where appropriate 4.2 Conduct cause and effect studies and forward results to the appropriate area for necessary action 4.3 Complete all administrative tasks and prepare a report including deficiencies, analysis and recommendations

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

© Commonwealth of Australia, 2025 Future Skills Organisation

Skill	Performance Criteria	Description
Reading	1.1, 1.2	• Organises, evaluates and interprets technical specifications and standards from a range of complex texts
Writing	2.6, 3.1, 4.2, 4.3	• Prepares clear and concise workplace documentation, including training instructions and reports, incorporating technical language to communicate complex information clearly and effectively
Oral Communication	2.3, 2.4, 3.1, 3.2, 3.5, 4.1	• Clearly articulates requirements using language, tone and pace appropriate to audience and environment • Uses active listening, observational and questioning techniques to identify different perspectives and confirm, clarify or revise understanding
Numeracy	1.1	• Extracts and evaluates technical data, including equipment specifications
Interact with others	1.3, 2.3, 3.5, 4.1, 4.2	• Selects and uses appropriate conventions and protocols when communicating with customers, vendors or technical personnel in a range of work contexts
Get the work done	1.3, 1.4, 2.1, 2.2, 2.5, 3.3, 3.4	• Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context for complex, high-impact activities with strategic implications • Demonstrates a sophisticated understanding of principles, concepts, language and practices associated with the digital world and uses these to troubleshoot and diagnose issues • Uses systematic, analytical processes in complex, non-routine situations, setting goals, gathering relevant information and identifying and evaluating options against agreed criteria • Uses formal, analytical and lateral thinking techniques for diagnosing issues, generating and evaluating possible solutions and escalating issues to others when appropriate

Assessment Requirements for ICTTEN607 Analyse and organise repair of highly complex telecommunications network faults

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- diagnose network faults using established methodical strategies without undue disruption to other services
- recommend fault rectification plan to the network operations centre (NOC)
- instruct on-site repairers
- facilitate replacement or repair of faulty equipment with appropriate advice from vendors and manufacturers
- facilitate final testing of rectified faults to ensure required performance
- prepare report including deficiencies, analysis and recommendations.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise fault escalation procedures
- explain fault-finding techniques and use of test equipment
- outline fault types and rectification
- outline the operation of integrated packet optical transport networks (P-OTNs)
- explain the use of International Telecommunication Union (ITU) ITU-T G.709 standard
- explain network protocols
- outline safety requirements and standards
- explain service agreements
- explain synchronous digital hierarchy (SDH)
- summarise transmission control protocol (TCP)-internet protocol (IP)
- summarise the following types of networks and equipment:

© Commonwealth of Australia, 2025 Future Skills Organisation

- access
- broadband deployment
- cabling
- customer premises' equipment (CPE)
- IP networks for enterprise and customer systems and installations
- local area networks (LAN)
- telephony
- wide area networks (WAN).

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a site where highly complex network faults may be demonstrated and analysed without jeopardising live traffic
- equipment currently used in industry
- design specifications and manufacturer's manuals and reference materials.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN608 Verify new software and hardware releases

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to authenticate compliance and compatibility of software and hardware to an existing system for new software and hardware releases for an existing system or new infrastructure for convergence to Next Generation Networks (NGN).

It applies to individuals with high-level technical skills who make use of software test routines and test hardware for performance to manufacturer's and design specifications.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan testing of new software releases	1.1 Obtain manuals, specifications and instructions associated with new releases and identify areas of uncertainty for confirmation with the vendor 1.2 Plan the testing environment of the software release and likely impact with network management centre 1.3 Determine resources required to assist with the test, and

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	negotiate their availability 1.4 Determine and plan outage and notify network management centre as required 1.5 Notify customers of impact on the network during the test 1.6 Develop contingency plans to cater for likely problems during the test, including health and safety issues
2. Test software and hardware units	2.1 Load new software and conduct tests using appropriate test equipment according to vendor specifications 2.2 Evaluate test results to assess functionality and features of software and hardware according to vendor documentation 2.3 Test compatibility with existing network and take corrective action with vendor as required 2.4 Implement contingency plans in conjunction with network management if integrity of the network is compromised by the new release
3. Undertake administrative work	3.1 Document test results and store according to enterprise policy 3.2 Discuss ongoing or likely problems with the vendor and initiate follow-up arrangements to ensure a permanent solution 3.3 Provide clearance for software and hardware release to be put in service in the system, according to enterprise procedures

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 2.1, 2.2, 3.1, 3.3	• Organises, evaluates and interprets technical documentation including software and hardware manuals, specifications and relevant enterprise policy and documentation
Writing	1.4-1.6, 3.1, 3.3	• Prepares clear and concise workplace documentation, including reports and recommendations, incorporating technical language to communicate complex information clearly and effectively

© Commonwealth of Australia, 2025 Future Skills Organisation

Oral Communication	1.3-1.5, 3.2	• Clearly articulates requirements and likely challenges when engaging with enterprise personnel, customers and contractors using relevant language suitable to diverse audiences and employs listening and questioning techniques to confirm understanding
Numeracy	2.2	• Extracts and evaluates technical data, including equipment specifications during testing phase
Navigate the world of work	3.1, 3.3	• Adheres to organisational procedures and protocols when planning and undertaking work
Interact with others	1.1, 1.2, 1.5, 3.2	• Selects and uses appropriate conventions and protocols when communicating with customers, vendors or technical personnel in a range of work contexts • Collaborates and cooperates with others to achieve joint outcomes
Get the work done	1.1-1.4, 2.1, 2.3, 2.4	• Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context for complex, high-impact activities with strategic implications • Uses advanced features of digital systems and tools to enter, store, test and analyse data • Uses systematic, analytical processes in complex, non-routine situations, setting goals, gathering relevant information and identifying and evaluating options against agreed criteria • Uses formal, analytical and lateral thinking techniques for diagnosing problems, and generating and evaluating possible solutions

Assessment Requirements for ICTTEN608 Verify new software and hardware releases

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- develop a plan for testing new software releases, including functionality and performance under load conditions
- develop a contingency plan recognising potential causes of problems and their impact on service levels
- test compatibility of software and hardware with existing system
- analyse impact of integration of new hardware and software release on the network and make recommendations for improvement.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain features and operating requirements of testing routines and equipment, key performance indicators (KPIs) and service level agreements
- explain information required to operate software and hardware according to a test specification
- outline manufacturer’s requirements for operation of equipment
- summarise specific organisational requirements relating to the activity and site conditions
- clarify system maintenance and upgrade procedures, codes of practice and other formal agreements impacting the work activity
- explain test methods, performance and integration requirements
- summarise typical issues and challenges that occur with new software and hardware releases.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a system to verify compliance and compatibility of software and hardware
- test equipment currently used in industry
- systems manuals, vendor specifications and enterprise policy.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN609 Produce and evaluate architecture designs for convergent cellular mobile networks

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to specify design of the required mobile cellular general packet radio service (GPRS), third-generation (3G) and fourth-generation (4G) network architectures.

It applies to individuals with high-level technical skills who design and operate mobile wireless systems that meet the industry implementation of wireless convergence in telecommunications.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan and prepare for design of cellular mobile networks	1.1 Analyse requirements of the mobile network 1.2 Examine technical characteristics of the GPRS systems 1.3 Develop network architecture for a GPRS network, in addition to the circuit-switched domain of 2G (Generation) 1.4 Review 3G structure and identify network requirements to

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	provide a wide variety of services ranging from voice and paging services to interactive multimedia, including teleconferencing and internet access 1.5 Examine technical characteristics, data rates, operating frequencies and multiplexing schemes of the 3G system 1.6 Establish positioning and types of antennas, terminals, processors, required protocols and architecture, based on technical specifications and requirements
2. Design a GPRS (2.5G) cellular network	2.1 Investigate how 2.5G GPRS overlays the GSM network to transmit and receive transmission control protocol (TCP) and/or internet protocol (IP) based data to and from GPRS mobile devices
3. Design a 3G cellular network	3.1 Develop network architecture for a 3G network and explain functions of the network elements 3.2 Integrate a 3G network with a wireless local area network (WLAN)
4. Research and evaluate design features of proposed 4G cellular network	4.1 Investigate how a fully IP-based 4G system will provide an end-to-end IP integrated solution for voice, data and streamed multimedia to end-users roaming anytime and anywhere 4.2 Investigate access schemes of a 4G network 4.3 Investigate the implication for Internet Protocol version 6 (IPv6) in relation to 4G support of a greater number of IP-based wireless devices with applications for improved multicast, security and route minimisation capabilities 4.4 Investigate use of advanced antenna systems to enable 4G with high rate, high reliability and long range communications
5. Produce reports for architectural design for cellular networks	5.1 Present a report on the impact of competing technologies on each other and get consensus on concepts 5.2 Investigate potential interoperability and global roaming issues that may be faced by GSM, 2.5G, 3G and 4G cellular technologies

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance	Description

© Commonwealth of Australia, 2025 Future Skills Organisation

	Criteria	
Reading	1.1, 4.1-4.4, 4.6, 5.2	• Comprehends and evaluates technical specifications to plan and prepare for complex cellular design work
Writing	1.3, 5.1	• Prepares clear and concise workplace documentation, including reports and recommendations, incorporating technical language to communicate complex information clearly and effectively
Oral Communication	5.1	• Uses specific and relevant language to clearly articulate technological issues
Numeracy	1.5	• Extracts and evaluates technical data, including equipment specifications during testing phase
Get the work done	1.1-1.6, 2.1, 3.1, 3.2, 4.1-4.4, 5.2	• Plans strategic priorities and outcomes within a flexible, efficient and effective context in a diverse environment exposed to competing demands • Considers strategic and operational potential of digital trends to achieve work goals, enhance work processes and create opportunities • Uses systematic, analytical processes in complex, non-routine situations, setting goals, gathering relevant information, and identifying and evaluating options against agreed criteria • Uses formal, analytical and lateral thinking techniques for diagnosing problems and generating and evaluating possible solutions

Assessment Requirements for ICTTEN609 Produce and evaluate architecture designs for convergent cellular mobile networks

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- provide a detailed summary of the client's business domain when designing network
- provide a detailed summary of current industry-accepted network hardware and software products and their general features and capabilities, when designing a general packet radio service (GPRS) (2.5G) and 3G network
- design viable GPRS (2.5G) and 3G network solutions to meet particular business needs
- research design features of 4G cellular networks.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline general features and capabilities of current industry security products, devices and procedures
- provide detailed information regarding global system for mobile (GSM), GPRS (2.5G) and 3G network design
- provide a detailed summary of current industry-accepted cellular mobile network protocols
- summarise technical characteristics of GPRS systems including:
  - capability classes and multi-slot classes
  - coding schemes
  - data rates
  - management systems when evaluating roaming features
  - operating frequencies and modulation schemes

© Commonwealth of Australia, 2025 Future Skills Organisation

  - remote user issues when establishing siting and types of antennas, terminals, processors, required protocols and GPRS (2.5G) and 3G network architecture, based on technical specifications and user requirements
- explain concepts of three or more current industry network development and design methodologies used when designing networks.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- cellular mobile network structures
- client requirements
- expected traffic volume
- information on a range of IT business solutions
- technical specifications
- vendors and vendor offerings and pricing.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN610 Design and configure an IP-MPLS network with virtual private network tunnelling

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to design an internet protocol-multiprotocol label switching (IP-MPLS) network, examine MLPS data flow and configure virtual private network (VPN) tunnelling.

It applies to individuals with excellent technical skills including designers and installers of Next Generation Networks (NGN). These IP networks provide fast internet, voice over internet protocol (VoIP) and internet protocol TV (IPTV) services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan and design IP-MPLS network to meet business requirements	1.1 Determine IP-MPLS network design requirements in consultation with enterprise customer 1.2 Optimise factors affecting design 1.3 Use label stacking to route MPLS packets in the network to build of MPLS services

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.4 Dimension layer-3 generation of core backbone to allow MPLS IP-VPN to provide MPLS convergence services 1.5 Use MPLS control plane to set up wavelengths 1.6 Produce design topology of a MPLS network to include location and types of edge label switch routers (LSR) and core LSRs in agreement with enterprise customer
2. Configure MPLS network and verify traffic engineering (TE) considerations	2.1 Configure edge and core LSRs to provide secure methods of transporting IP packets in the MPLS network using layer 2 protocols 2.2 Configure LSRs to provide toll bypass for convergence of voice and data over IP network 2.3 Classify traffic in MPLS terms and configure edge LSR to sort traffic into forward equivalent classes (FECs) 2.4 Install and remove two standardised signalling protocols for managing traffic engineering (TE) of MPLS paths 2.5 Configure MPLS-TE to provide routing on diverse paths to avoid congestion and guarantee bandwidth services
3. Configure VPN and provide a virtual private LAN service (VPLS)	3.1 Configure a MPLS VPN tunnel for a customer network to provide multipoint-to-multipoint VPN connectivity 3.2 Build a content hosting server into a MPLS based VPN to produce a media network 3.3 Use virtual private LAN services (VPLS) as a VPN method for wide area network (WAN) multipoint-to-multipoint ethernet connectivity spanning multiple metropolitan areas 3.4 Produce VPLS topology using an internet protocol IP-MPLS cloud with provider edge (PE) routers connecting VPLS domains associated with an enterprise customer
4. Complete documentation	4.1 Produce a final design plan including network elements, configuration details and recommendations for design changes 4.2 Notify customer and obtain sign-off

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance	Description

© Commonwealth of Australia, 2025 Future Skills Organisation

	Criteria	
Writing	4.1	• ,Prepares clear and concise workplace documentation including incorporating technical language to communicate complex information clearly and effectively
Oral Communication	1.1, 1.6	• Engages with customers, about technical and operational matters, using clear language and active listening, observational and questioning techniques to confirm, clarify or revise understanding
Interact with others	1.1, 1.6, 4.2	• Selects and uses appropriate conventions and protocols when consulting or negotiating with customers
Get the work done	1.2-1.6, 2.1-2.5, 3.1-3.4	• Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context for complex, high impact activities with strategic implications • Uses systematic, analytical processes in complex, non-routine situations, setting goals, gathering relevant information and identifying and evaluating options against agreed criteria • Uses formal, analytical and lateral thinking techniques for diagnosing problems and generating and evaluating possible solutions • Considers the strategic and operational potential of digital trends to achieve work goals, enhance work processes and create opportunities • Uses digital systems and tools to enter, store and analyse data

Assessment Requirements for ICTTEN610 Design and configure an IP-MPLS network with virtual private network tunnelling

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- plan and design a multiprotocol label switching (MPLS) network that meets business requirements
- configure and test the MPLS network according to specified guidelines
- produce design topology of a MPLS network
- produce a final design plan including network elements, configuration details and recommendations for design changes
- implement secure virtual private network (VPN) tunnelling.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explore current industry-accepted hardware and software products used in an IP-MPLS network
- explain MPLS IP-VPN network operating systems including:
  - transmission technologies
  - protocols
- describe the effect of the customer's business domain, function and organisation on customer requirements and network equipment.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering of work and include access to:

- a live network and networked computers
- network design documentation, equipment specifications and organisational guidelines
- network components, routers, switches and multi-layer switches.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN611 Produce an ICT network architecture design

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to compile and evaluate business specifications from a client, and produce a set of architecture design solutions to cater for present and future forecast demands.

It applies to individuals working in the field who carry out design and implementation of technical solutions of information communications technology (ICT) networks, employed by telecommunications and information technology networking provisioning companies specialising in integrating converging and emerging technologies of ICT networks.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to produce ICT architecture design	1.1 Obtain the client's business specifications and business requirements from appropriate person 1.2 Review specifications and requirements to identify the type of ICT network and network specifications required 1.3 Consult with key stakeholders to identify their requirements

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.4 Assess business problems, opportunities and objectives, and confirm details with appropriate person
2. Produce preliminary ICT network architecture design	2.1 Ascertain technical requirements, including hardware, software and network elements according to specifications 2.2 Select software solutions to suit business platform 2.3 Develop preliminary physical network diagrams as a preface to architecture blueprint 2.4 Produce a document on the possible impact of the network design on the business requirements
3. Evaluate preliminary design and likely performance using forecast demands	3.1 Predict forecast traffic demands, and impact on network design, from current and future demand requirements 3.2 Benchmark design using expected performance parameters 3.3 Review design's likely performance profile 3.4 Determine costs involved with a range of supplier products 3.5 Produce an evaluation report on predicted performance and costs of the network architecture design, addressing business specifications and recommendations
4. Finalise network design and obtain approval	4.1 Review benchmarks, requirements and final design proposed 4.2 Determine support and training requirements needed 4.3 Obtain latest technical specifications and pricing by contacting possible vendors 4.4 Document network design and present documentation to appropriate person for approval 4.5 Obtain sign off on final business solution

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 2.1, 4.1	• Organises, evaluates and interprets technical documentation and relevant enterprise policy and documentation

© Commonwealth of Australia, 2025 Future Skills Organisation

Writing	2.3, 2.4, 3.5, 4.4	• Prepares clear and concise workplace documentation, including diagrammatic material, incorporating technical language to communicate complex information clearly and effectively
Oral Communication	1.1, 1.3, 1.4	• Participates in verbal exchanges using clear language and active listening, observational and questioning techniques to confirm, clarify or revise understanding
Numeracy	3.4, 3.5	• Interprets numerical information according to business requirements and specifications to evaluate possible technical design scenarios within budgetary constraints
Interact with others	1.3, 4.3-4.5	• Selects and uses appropriate conventions and protocols when communicating with stakeholders in a range of work contexts
Get the work done	1.4, 2.2, 3.1-3.3, 4.2	• Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context for complex, high-impact activities with strategic implications • Demonstrates a sophisticated understanding of principles, concepts, language and practices associated with the digital world and uses this to propose solutions • Uses systematic, analytical processes in complex, non-routine situations, setting goals, gathering relevant information, and identifying and evaluating options against agreed criteria • Uses formal, analytical and lateral thinking techniques for diagnosing problems and generating and evaluating possible solutions

Assessment Requirements for ICTTEN611 Produce an ICT network architecture design

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- adapt technologies to specified technical solutions
- use site design software and hardware
- evaluate client specifications against accepted industry practices
- produce technical designs from business specifications
- analyse feedback from client and make proposal adjustments
- apply design concepts to business solutions
- produce technical reports
- make recommendations and offer optimum design solutions.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise principles of the following technologies:
  - access networks
  - core networks
  - information communications technologies (ICT) network topologies
  - mobile cellular networks
  - network protocols and operating systems
  - optical networks and principles
  - radio frequency (RF) technologies and principles
  - radio frequency identification (RFID) hardware and software
- explain what is meant in the ICT sector by business processes

© Commonwealth of Australia, 2025 Future Skills Organisation

- explain compatibility issues and resolution procedures
- summarise configuration of internet protocol (IP) networks
- outline desktop applications and operating systems
- summarise security protocols, standards and data encryption.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a site for design work
- client functional requirements
- business specifications
- database software
- simulation software
- organisational guidelines
- a network or computer layout
- site design software and hardware
- information on a range of ICT business solutions.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN612 Design and manage internet protocol TV in a service provider network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to design a multiprotocol label switching (MPLS) network for internet protocol TV (IPTV) and manage delivery of IPTV services. This includes core and access networks for the service provider.

It applies to individuals with outstanding technical skills, including designers and installers of Next Generation Networks (NGN), IP networks providing fast internet, voice over internet protocol (VoIP), IPTV and internet TV services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Produce and evaluate design requirements for an IPTV network	1.1 Analyse major video models and the impact video challenges have on design of an IPTV network 1.2 Evaluate IPTV against other competing TV broadcast technologies to determine optimum design approach 1.3 Produce the topology of an IPTV network, showing network architecture from IPTV standards' bodies and determine design requirements

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.4 Plan dimensioning of network parameters for multicast and unicast video delivery over broadband in a service provider network
2. Design an IPTV network for video on demand (VoD) delivery	2.1 Design the content delivery system (CDS) to cache IPTV content in each major metropolitan area for broadcast or streaming VoD models to eliminate performance variability introduced by internet transport or core peering relationships 2.2 Design a video network to provide VoD loads with network solutions using VoD design requirements 2.3 Design a VoD application to meet bandwidth requirements and quality of service (QoS) requirements for commercial viability of IPTV network
3. Design and configure an MPLS IPTV network to meet business requirements	3.1 Determine IP-MPLS network design requirements 3.2 Investigate factors that affect design considerations and ways they can be minimised 3.3 Produce the design topology of a MPLS network to provide secure methods of transporting IP packets using layer 2 protocols 3.4 Design a MPLS layer over the IP networking structure, to combine efficiency of multicast protocols with traffic engineering (TE) facilities to enable fast packet forwarding for real time video streaming applications
4. Manage delivery of IPTV services	4.1 Determine operational processes required to support IPTV by operators 4.2 Produce a plan of the management and customer support model, including strategies dealing with delivery of VoD issues 4.3 Produce a plan of a video network using video delivery strategies to deliver optimum average revenue per user (ARPU) to serve the demographic of an area and the nature of an operator's business 4.4 Manage and monitor video across the network using a management tool

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance	Description

© Commonwealth of Australia, 2025 Future Skills Organisation

	Criteria	
Reading	1.3	• Organises, evaluates and interprets standards documentation to properly evaluate design requirements
Writing	1.3, 3.3, 4.2, 4.3	• Prepares clear and concise workplace documentation, including diagrammatic material, incorporating technical language to communicate complex information clearly and effectively
Numeracy	4.3	• Undertakes a cost-benefit analysis of services based on the nature of the operator's business and the demographic area served
Get the work done	1.1-1.4, 2.1-2.3, 3.1,-3.4, 4.1-4.4	• Uses a mix of intuitive and formal processes to identify key information and issues, evaluate alternative strategies, anticipate consequences and consider implementation issues and contingencies • Experiments with possibilities of new systems, devices and applications before conducting a more sophisticated analysis of benefits and costs • Uses digital tools to access and organise complex data and analyse multiple sources of information for strategic purposes • Uses formal, analytical and lateral thinking techniques for identifying issues, generating and evaluating possible solutions

Assessment Requirements for ICTTEN612 Design and manage internet protocol TV in a service provider network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- produce and evaluate design requirements for an internet protocol TV (IPTV) network
- design IPTV network for voice on demand (VoD) delivery
- design and configure a multiprotocol label switching (MPLS) IPTV network to meet business requirements
- manage delivery of IPTV services.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- evaluate competing video delivery over broadband networks
- explore current industry-accepted IPTV hardware and software products
- summarise networking technologies including:
  - network operating systems
  - internet protocol (IP) networks
  - MPLS networks
- explain IPTV transmission technologies and protocols.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

© Commonwealth of Australia, 2025 Future Skills Organisation

- protocols, configuration documents, management tools and standards
- network and demographic trends, and customer demand data.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN801 Plan a transmission network

Modification History

Release	Comments
Version 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to analyse requirements and plan a new or upgraded telecommunication transmission network or convergence to Next Generation Networks (NGN).

It applies to individuals with high-level technical skills working as technical officers, supervisors and engineers working with optical, dense wavelength division multiplexing (DWDM), fibre networks and wireless networks.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Scope the project	1.1 Obtain and interpret relevant legislation, codes, regulations and standards including work health and safety (WHS) and environmental requirements for the given work 1.2 Obtain project brief from appropriate person 1.3 Evaluate potential transmission options and select most suitable type of transmission network that meets criteria outlined

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	in project brief 1.4 Analyse limitations of transmission path characteristics and develop solutions for transmission impairments 1.5 Produce a report outlining reasons for selection of a transmission network, together with a shortlist of suitable equipment vendors and products 1.6 Obtain traffic load from network information sources or forecasts, and then dimension the proposed network service 1.7 Produce brief on relationship between transmission network architecture components and overall network, and their impact on the work 1.8 Evaluate equipment type and technologies to determine availability, cost and compatibility with existing network equipment 1.9 Determine resources and equipment needed for work according to enterprise procedures and check for correct operation and safety 1.10 Assess capacity limitation of various platforms in context of the work to optimise maximum network performance 1.11 Determine product capability and calculate allowable capacity of transmission network to allow for network growth
2. Produce link budget	2.1 Critically analyse transmission system using equipment and vendor's specifications to produce a link budget and assess resulting margin 2.2 Document results of link budget analysis
3. Produce deployment plan for transmission network	3.1 Conduct planning work using current equipment components and complying with transmission network deployment rules and exemption process criteria 3.2 Produce preliminary plan on network deployment that maintains transmission network integrity 3.3 Establish a solution to unexpected situations through discussion with appropriate personnel, with consideration to job specifications, safety and enterprise procedures 3.4 Review plan to ensure it complies with all standards and codes required when working on network access, and make adjustments where appropriate
4. Complete work	4.1 Produce final deployment plan including recommendations agreed with customer 4.2 Provide report on network management and performance

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	monitoring system to be incorporated in the transmission network to ensure network is performing at optimum level

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.9, 3.4	• Organises, evaluates and interprets complex technical and non-technical information including legislative, enterprise and policy documentation
Writing	1.5, 1.7, 2.2, 3.2, 3.4, 4.1, 4.2	• Prepares clear and concise workplace documentation, including reports and recommendations, incorporating technical language to communicate complex information clearly and effectively
Oral Communication	1.2	• Uses highly developed listening, observational and questioning skills to understand project scope and clarify and explore meaning
Numeracy	1.8, 1.11, 2.1	• Interprets numerical information to determine business costs and undertake link budget calculations, interpret results and evaluate different types of technical data
Navigate the world of work	1.1, 1.9, 3.3, 3.4	• Monitors adherence to organisational policies and protocols and legal and regulatory requirements of self and others
Interact with others	1.6, 3.3	• Selects and uses appropriate conventions and protocols when communicating with stakeholders in various work contexts • Collaborates with others to achieve joint outcomes, taking the lead in identifying all issues and facilitating agreement
Get the work done	1.3, 1.4, 1.8, 1.9, 1.10, 1.11, 2.1, 3.1, 3.3	• Uses combination of formal, logical planning processes and an increasingly intuitive understanding of context for complex, high impact activities with strategic implications • Demonstrates a sophisticated understanding of principles, concepts, language and practices associated with the digital world and uses these to understand uses and potential of technology • Implements actions according to a predetermined plan,

© Commonwealth of Australia, 2025 Future Skills Organisation

		making adjustments if necessary • Takes responsibility for high-impact decisions in complex situations involving many variables and constraints • Uses formal analytical and lateral thinking techniques for identifying issues, generating and evaluating possible solutions

Unit Mapping Information

Code and title current version	**Code and title previous version**	**Comments**	**Equivalence status**
ICTTEN801 Plan a transmission network	ICTTEN7193B Plan a transmission network	Updated to meet Standards for Training Packages. Recoded and minor changes to PC's to meet AQF requirements.	Equivalent unit

Assessment Requirements for ICTTEN801 Plan a transmission network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- evaluate potential transmission options and select most suitable type of transmission network
- analyse effect of transmission path characteristics on transmission systems
- develop solutions for transmission impairments
- select appropriate testing regimes for transmission technologies
- determine key multiplexing features of transmission technologies
- develop transmission network work plan.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline impact of relevant legislation, codes, regulations and standards involved with planning networks
- explain alternating current and transmission line theory
- compare emerging telecommunications switching and transmission technologies
- define network capacity and capability management
- outline capacity limitation of various platforms
- explain commercial considerations of Access Network deployment
- outline common switching and transmission support services
- explore compatibility issues for new technologies and equipment
- evaluate currency of technology and equipment under consideration
- explain data transmission
- summarise digital multiplexing techniques and hierarchies

© Commonwealth of Australia, 2025 Future Skills Organisation

- clarify enterprise deployment rules
- explain exemption process criteria
- outline network topologies
- formulate product capability and availability that are allowable within a transmission network
- establish aspects of telecommunications when planning a network, including:
  - alarm management
  - bearers
  - performance monitoring systems
  - transmission:
  - architectures and geographical categorisation
  - information sources
  - technology and equipment
- determine a cost analysis for a planned network.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the Telecommunications – Telecommunications Networks Engineering field of work and include access to:

- a site to plan transmission network
- equipment and system manuals and specifications
- legislation and documentation to plan a transmission network.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTTEN802 Manage alignment of systems with product and technology strategy

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to develop a technology roadmap and interface management system to align and integrate systems with a product and technology strategy.

It applies to individuals with technical and task management skills who measure network performance according to manufacturer's design specifications.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Develop technology roadmap	1.1 Critically analyse market research information and determine customer needs within product and technology strategy from a technology roadmap 1.2 Evaluate enterprise and technology issues which will affect design of the system, and translate them into system requirements 1.3 Evaluate program, product and technology needs that affect

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	definition of the system life-cycle 1.4 Develop systems integration, verification and validation plans from the design requirements 1.5 Develop and communicate key aspects on implementation of the technology roadmap to stakeholders and customers
2. Develop interface management of system elements	2.1 Determine system element interfaces and sources of complexity for interface management of the system 2.2 Develop a process and appropriate techniques to be adopted for interface management of system elements 2.3 Create a control process of system element interfaces of the management system 2.4 Liaise and arbitrate conflicts in the interfaces definition process
3. Implement systems integration	3.1 Evaluate suitability of system integration, verification and validation plans for the product and technology strategy of the technology road map for a consumer product 3.2 Develop systems integration, verification and validation plans for complex systems, including method and timing for each activity 3.3 Manage system integration plan and diagnose complex faults 3.4 Document fault conditions, report to appropriate person and follow up corrective actions 3.5 Prepare evidence for customer acceptance and certification of the system integration management plan for consumer product 3.6 Plan and manage a transition to operational activity of product

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.4, 3.1	• Organises, evaluates and interprets technical documentation, software and hardware manuals, specifications and relevant enterprise policy
Writing	1.4, 3.2, 3.4, 3.5	• Prepares clear and concise workplace documentation, including diagrammatic material incorporating

Assessment Requirements for ICTTEN802 Manage alignment of systems with product and technology strategy

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- plan implementation and testing of new system requirements, including system functionality and performance under load conditions
- manage interface elements of a new system
- implement systems integration
- recognise potential causes of problems and service level impact
- analyse impact of integration of system changes on network
- prepare documentation for customer acceptance and certification of system integration.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise technology issues for a specified enterprise
- explain integration, verification and validation plans
- summarise interface management systems
- outline legislation, codes of practice and other formal agreements directly impacting system integration
- summarise specific work health and safety (WHS) requirements that impact activity in terms of safety of self and the general public
- explain system element interfaces
- summarise system integration solutions techniques
- explain system life cycles
- define technology roadmaps.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the Telecommunications – Telecommunications Networks Engineering field of work and include access to:

- a site where alignment of computer support systems with a product and technology strategy may be conducted
- software tools currently used in industry
- vendor products, specifications, equipment and enterprise policy required for the activity.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTTEN803 Translate domain and solution architectures into platform requirements and designs

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to develop, deploy, manage and optimise the entire solution life cycle via translation for an existing or new infrastructure of Next Generation Technology (NGN).

It applies to individuals with highly developed technical skills who use design software and simulation to test system performance to a manufacturer's or design specification.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Develop system design requirements	1.1 Produce system requirements specifications for a complex project involving enterprise and technology issues using the simplest possible technology and making the system modular 1.2 Resolve and negotiate requirement conflicts to establish a complete and consistent requirement set 1.3 Produce and develop acceptance criteria for requirements

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.4 Design a requirements management plan with categorisations, structures and sources of complexity 1.5 Develop a process to manage requirements, enabling users to influence future improvements
2. Produce system design based on requirements	2.1 Evaluate strengths and weaknesses of relevant technologies in context of the design requirement and needs for systems integration 2.2 Create range of alternative interdisciplinary concepts and assess their attributes 2.3 Plan for incorporation of later life-cycle design attributes while developing design requirements 2.4 Devise a system design strategy and approach, using tools and techniques to conduct functional analysis 2.5 Produce a set of parameters to track critical aspects of the design 2.6 Use documentation, modelling and simulation tools and techniques to represent a system or system element 2.7 Use complex simulations to evaluate design concepts for a system or system element 2.8 Produce a report to evaluate and advise on risks, suitability and limitations of models and simulations 2.9 Identify underlying domain-specific issues, strategy and approach to be adopted for ensuring system robustness 2.10 Produce a robust design using domain-specific strategy and approach for platform requirements and designs
3. Verify solution design and traceability	3.1 Align specific aspects of the design to original intent 3.2 Verify and track specific aspects of current design against original intent throughout the supply chain 3.3 Compare verification requirements with system requirements 3.4 Use change control and configuration management to implement remedial actions and change control for inconsistencies

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

© Commonwealth of Australia, 2025 Future Skills Organisation

Skill	Performance Criteria	Description
Reading	2.6	• Organises, evaluates and critiques ideas and information from a wide range of complex texts
Writing	1.1, 1.3-1.5, 2.5, 2.8, 2.10	• Demonstrates sophisticated writing skills by selecting appropriate conventions and stylistic devices to express precise meaning
Oral Communication	1.2	• Participates in verbal exchanges using appropriate tone and clear language to address key personnel • Uses listening and questioning skills to confirm understanding
Interact with others	1.2	• Collaborates and negotiates to achieve agreeable outcomes in potentially contentious situations
Get the work done	1.1, 1.5, 2.1-2.4, 2.6, 2.7, 2.9, 2.10, 3.1-3.4	• Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context for complex, high-impact activities with strategic implications • Demonstrates a sophisticated understanding of principles, concepts, language and practices associated with the digital world and uses this to analyse and design solutions • Uses systematic, analytical processes in complex, non-routine situations, setting goals, gathering relevant information and identifying and evaluating options against agreed criteria • Uses formal analytical and lateral thinking techniques for diagnosing problems and generating and evaluating possible solutions

Assessment Requirements for ICTTEN803 Translate domain and solution architectures into platform requirements and designs

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop system design requirements
- evaluate design concepts for system or system element using complex simulations
- produce a system design using domain specific strategy to platform requirements and design
- use functional analysis tools
- verify solution design and traceability.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain complex simulation techniques
- summarise current enterprise platforms and designs
- outline design of management plans
- explain domain and solution architectures
- determine and summarise technological issues for a specified enterprise
- outline information required to simulate computer system elements according to a test specification
- explain interdisciplinary concepts and attributes
- explain life cycle design attributes
- contrast remedial actions and select control for inconsistencies
- explain solution design and traceability
- provide a detailed summary of tools required to conduct functional analysis.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the Telecommunications – Telecommunications Networks Engineering field of work and include access to:

- a site where development, deployment, management and optimisation of domain and solution architectures into platform requirements and designs can be undertaken
- documentation, modelling and simulation tools currently used in industry
- tests and equipment currently used in industry.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTTEN804 Manage end to end architectural solutions across multiple domains

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to analyse business options and design for network infrastructure service providers and implement end-to-end architectural solutions.

It applies to individuals with excellent technical, communication and planning skills working in project management roles with authority to direct installation activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Evaluate tools and techniques for architectural design	1.1 Apply principles of architectural design within the life cycle of application software 1.2 Develop a process to apply appropriate tools and techniques for architectural design of end-to-end solutions 1.3 Evaluate and select appropriate analysis and selection techniques to develop a partition between discipline technologies and derive discipline-specific requirements

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
2. Analyse design options for optimal solutions	2.1 Critically analyse business options to support architectural design trade-offs for an optimal design solution 2.2 Develop alternative architectural designs traceable to the requirements 2.3 Evaluate a range of architectural solutions and justify selection of the optimum solution
3. Develop interface requirements for effective solutions across multiple domains	3.1 Evaluate system element interfaces and sources of complexity for interface management of the system across multiple domains 3.2 Develop a process and appropriate techniques to be adopted for the interface management of system elements for end-to-end architectural solutions 3.3 Produce a control process for system element interfaces of the management system 3.4 Liaise and arbitrate between stakeholders where there are conflicts in the definition of interfaces
4. Manage end-to-end systems integration	4.1 Evaluate suitability of system integration, verification and validation plans for end-to-end architectural solutions across multiple domains 4.2 Develop systems integration, verification and validation plans for complex systems to ensure a viable integration process 4.3 Manage system integration plan and diagnose complex faults 4.4 Document fault conditions, report to appropriate person and follow up corrective actions 4.5 Prepare evidence for customer acceptance and certification of the system integration management plan 4.6 Plan and manage a transition to operational activity for the end-to-end solution
5. Incorporate components of an architecture from a third party	5.1 Negotiate with vendor for acceptable vendor agreements and agreed roles and responsibilities of each party 5.2 Manage vendor within a clearly defined process for dealing with defects and scope changes 5.3 Plan beyond delivery of specific elements and establish requirements for ongoing maintenance and support from vendor
6. Manage requirements for the architecture solution	6.1 Negotiate minimum component costs with vendors and analyse vendor component costs as part of assessment for the appropriateness of vendor’s quote

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	6.2 Manage vendor selection process to provide high-quality solutions within appropriate costings

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	2.1	• Organises, evaluates and interprets a range of complex documentation to evaluate product and technology needs
Writing	2.2, 2.3, 3.3, 4.2, 4.4, 4.5	• Prepares clear and concise workplace documentation including reports and designs incorporating technical language to communicate complex information clearly and effectively
Oral Communication	3.4, 4.4, 5.1, 5.2, 6.1	• Participates in verbal exchanges with key personnel, customers and contractors using appropriate tone and clear language • Uses listening and questioning skills to confirm understanding
Interact with others	3.4, 4.4, 5.1, 5.2, 6.1	• Selects and uses appropriate conventions and protocols when communicating with customers, vendors or technical personnel in a range of work contexts • Collaborates and negotiates to achieve agreeable outcomes in potentially contentious situations
Numeracy	6.1	• Interprets numerical information to determine best value-for-money solutions according to business requirements
Get the work done	1.1-1.3, 2.1, 2.3, 3.1, 3.2, 4.1, 4.3, 4.4, 4.6, 5.3, 6.2	• Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context for complex, high-impact activities with strategic implications • Demonstrates a sophisticated understanding of principles, concepts, language and practices associated with the digital world and uses these to plan complex systems • Uses systematic, analytical processes in complex, non-routine situations, setting goals, gathering relevant information and identifying and evaluating options

© Commonwealth of Australia, 2025 Future Skills Organisation

		against agreed criteria • Uses formal analytical and lateral thinking techniques for diagnosing problems and generating and evaluating possible solutions

Assessment Requirements for ICTTEN804 Manage end to end architectural solutions across multiple domains

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- evaluate tools and techniques for architectural design
- analyse design options for optimal solutions
- develop interface requirements for effective solutions across multiple domains
- manage end-to-end systems integration
- incorporate components of a third party architecture
- manage requirements for the architecture solution.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- provide a detailed summary of architectural design tools
- explain interface management
- outline management of end-to-end system integration
- summarise new end-to-end architecture design solutions
- explain solutions for business options across multiple domains
- outline system integration solution techniques
- summarise system interfaces
- explain validation plans
- explain importance of vendors' agreements with specific reference to roles and responsibilities of each party
- identify and quantify components’ costs.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the Telecommunications – Telecommunications Networks Engineering field of work and include access to:

- a site where architecture solutions across multiple domains can be managed
- simulation software tools currently used in industry
- vendor products, specifications, equipment and enterprise policy required for the activity.

Assessors must satisfy NVR/AQTF assessor requirements.

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to analyse business options to plan, develop and manage solution architecture systems integration across multiple architectures for a telecommunications service provider.

It applies to individuals with excellent technical, communication and planning skills working in project management roles with authority to direct installation activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Develop plan to support architectural design process	1.1 Prepare a plan with techniques to support the architectural design process and communicate the solution to different stakeholder groups 1.2 Critically analyse business options to support architectural design trade-offs for optimal design solution 1.3 Evaluate strengths and weaknesses of relevant technologies in

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	context of the requirement 1.4 Assess a range of interdisciplinary concept ideas and effect their attributes would have on the design requirements 1.5 Prepare a solutions architecture plan detailing all possible solutions
2. Develop interface requirements for effective solutions across multiple architectures	2.1 Evaluate system element interfaces and sources of complexity for interface management of the system across multiple architectures 2.2 Develop a process and appropriate techniques to be adopted for interface management of system elements for solution architecture 2.3 Produce a control process of system element interfaces of the management system 2.4 Liaise and arbitrate between stakeholders where there are conflicts in definition of interfaces
3. Manage solution architecture systems integration	3.1 Evaluate suitability of system integration, verification and validation plans for solution architecture from requirements 3.2 Develop systems integration, verification and validation plans for complex systems to ensure viable integration process 3.3 Manage system integration plan and diagnose complex faults 3.4 Document fault conditions, report to appropriate person and follow up corrective actions 3.5 Prepare evidence for customer acceptance and certification of system integration management plan 3.6 Plan and manage a transition to operational activity for the solution architecture
4. Manage solution implementation and notify stakeholder groups	4.1 Produce final project management requirements against solution architecture plan and notify stakeholder groups of impending implementation 4.2 Evaluate impact of proposed project solutions on customers and enterprise 4.3 Manage solution architecture activities as part of overall project plan and monitor solution architecture risks 4.4 Manage amendments to solution architecture processes to meet needs of the project and apply necessary corrective actions

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	3.1	• Organises, evaluates and interprets a range of complex documentation such as software and hardware manuals
Writing	1.1, 1.5, 3.2, 3.4, 3.5, 4.1	• Prepares clear and concise workplace documentation, including recommendations, incorporating technical language to communicate complex information clearly and effectively
Oral Communication	2.4	• Participates in verbal exchanges using tone and language appropriate to audience and environment
Interact with others	2.4, 3.4, 4.1	• Selects and uses appropriate conventions and protocols when communicating with stakeholders in a range of work contexts • Collaborates and negotiates to achieve agreeable outcomes in potentially contentious situations
Get the work done	1.2-1.4, 2.1-2.3, 3.1, 3.3, 3.4, 3.6, 4.2-4.4	• Operates from a broad conceptual plan, developing operational detail in stages, regularly reviewing priorities and performance during implementation, identifying and addressing issues • Demonstrates a sophisticated understanding of principles, concepts, language and practices associated with the digital world and uses this to prepare proposals • Takes responsibility for high-impact decisions in complex situations involving many variables and constraints • Uses formal analytical and lateral thinking techniques to resolve domain, technology and logistics problems • Monitors outcomes of decisions, considering results from a range of perspectives and identifying key concepts and principles and their impact on customers and enterprise

Assessment Requirements for ICTTEN805 Manage solution architecture and impacts in line with organisational processes

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- prepare an architecture plan exploring a range of alternative solutions
- develop interface requirements for effective solutions across multiple architectures
- manage solution architecture systems integration
- analyse impact of proposed project solutions on customers and enterprise
- prepare evidence for customer acceptance and certification of system integration management plan
- produce final project management requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and define features and operating requirements of complex systems, key performance indicators (KPIs) and service level agreements
- outline information required to define solution architecture and impacts in line with organisational processes
- summarise interdisciplinary concepts across multiple architectures
- outline issues and challenges occurring with system changes
- explain legislation, codes of practice and other formal agreements directly impacting system integration
- summarise manufacturer’s requirements for operation of systems equipment
- identify and critique relevant organisational policies and procedures
- outline performance and integration requirements
- summarise solutions architecture alternatives

© Commonwealth of Australia, 2025 Future Skills Organisation

- summarise specific work health and safety (WHS) requirements that impact activity in terms of safety of self and the public
- outline system element interfaces for solution architecture
- explain system integration plans
- explain validation plans.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the Telecommunications – Telecommunications Networks Engineering field of work and include access to:

- a site where development and management of solution architecture systems integration across multiple architectures may be conducted
- software tools currently used in industry
- vendor products, specifications, equipment and enterprise policy required for the activity.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTTEN806 Manage application layer solutions

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to develop, evaluate, manage, deploy and maintain application layer solutions for new solutions or existing network telecommunications service.

It applies to individuals with highly developed technical skills working as network engineering staff or senior technical officers with appropriate project management roles and authority to direct activities of installation staff, manufacturers and vendors.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications networks engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Develop application layer solutions	1.1 Produce requirements for applications layer solutions for delivery of new applications layer solutions to customers using forecasting demand data 1.2 Prepare a plan for an organisational change control process and integration of new solutions within a complete network infrastructure

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.3 Produce a test management schedule for the testing process of application product 1.4 Translate complex design and architecture requirements to traceable application characteristics according to design requirements 1.5 Develop application architecture solution specifications using an industry process according to design requirements 1.6 Develop application software resource profiling and select suitable vendor for negotiations 1.7 Translate complex requirements into software packaging 1.8 Produce software deployment mapping and version control to ensure complete integration and compatibility of application solution with existing system 1.9 Complete configuration management and provide complex input network design requirements
2. Critically analyse test results of application layer solutions	2.1 Use design document and integration document software to replicate issues exhibited in test environment 2.2 Certify software solution compatibility and compliance to requirements using a web-based test management tool (quality centre) to conduct performance evaluation tests 2.3 Critically analyse test reports to evaluate load balancing and network security issues in test environment 2.4 Resolve complex issues in interface to isolate defects
3. Manage deployment of application layer solutions	3.1 Plan and prepare evidence for customer acceptance and certification 3.2 Plan and manage transition to operation activities required for transition to operation of integrated application layer solution 3.3 Prepare installation failures procedure to make changes while maintaining service levels 3.4 Manage change implementation plan to maintain system stability
4. Maintain currency of application layer solutions	4.1 Manage ongoing monitoring activities to prolong new applications layer solution life cycle for cost-effective business reasons 4.2 Produce tuning activities to make efficient use of resources 4.3 Analyse current demands for resources to derive forecasts and future requirements

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	4.4 Produce a capacity plan predicting infrastructure resource needs to achieve agreed service levels

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.4, 1.5, 2.3	• Organises, evaluates and interprets a range of complex technical documentation including software and hardware manuals
Writing	1.2, 1.3, 1.8, 3.3, 4.4	• Prepares clear and concise workplace documentation including complex plans incorporating technical language to communicate complex information clearly and effectively
Numeracy	1.1, 2.3, 4.1	• Analyses and synthesises highly embedded mathematical information in a broad range of tasks and texts
Get the work done	1.4-1.6, 1.8, 1.9, 2.1-2.4, 3.1, 3.2, 3.4, 4.1-4.4	• Operates from a broad conceptual plan, developing operational detail in stages, regularly reviewing priorities and performance during implementation, and identifying and addressing issues • Demonstrates a sophisticated understanding of principles, concepts, language and practices associated with the digital world and uses this to devise solutions • Uses a broad range of strategies to store, access and organise virtual information, recognising design choices will influence what information is retrieved and how it may be interpreted and used • Takes responsibility for high-impact decisions in complex situations involving many variables and constraints • Uses formal analytical and lateral thinking techniques to resolve logistics problems • Monitors outcomes of decisions, considering results from a range of perspectives and identifying key concepts and principles and their impact on customers and enterprise

Assessment Requirements for ICTTEN806 Manage application layer solutions

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- produce a test management schedule for testing process of application product
- develop application architecture solution specifications using an industry process
- produce software deployment mapping and version control
- analyse test results of application layer solutions
- prepare evidence for customer acceptance and certification
- prepare an installation failures procedure
- manage ongoing monitoring activities
- produce tuning activities
- produce a capacity plan predicting infrastructure resource needs.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain installation failure procedures
- summarise legislation, codes of practice and other formal agreements that directly impact activity
- explain important tenets of managing change
- explain new applications layer solutions
- define software and hardware resources required by an application layer
- outline specific workplace health and safety (WHS) requirements that impact activity in terms of safety of self and the public
- outline system integration techniques
- explain test management scheduling

© Commonwealth of Australia, 2025 Future Skills Organisation

- summarise tuning activities to maintain currency
- explain use of forecasting demand data
- explain use and purpose of test management tools.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the Telecommunications – Telecommunications Networks Engineering field of work and include access to:

- a site where management of application layer solutions may be conducted
- software tools currently used in industry
- vendor products, specifications, equipment and enterprise policy required for the activity.

Assessors must satisfy NVR/AQTF assessor requirements.

Assessment Requirements for ICTTEN807 Manage voice, data and internet protocol network solutions

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- produce a test management schedule
- develop network architecture solution specifications
- develop software and hardware resource profiling and select suitable vendor for negotiations
- undertake configuration management of voice, data and internet protocol (IP) network, and provide complex input network design requirements
- analyse test reports to evaluate load balancing and network security issues
- plan and prepare evidence for customer acceptance
- prepare installation failures procedure
- produce tuning activities to enable efficiencies
- produce capacity plan predicting infrastructure resource needs.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise installation failure procedures
- investigate change management strategies relevant to introduction of new technologies
- explain new IP network solutions
- identify and contrast software and hardware resources relevant to project
- explain system integration techniques
- explain test management scheduling
- provide detailed summary of tuning activities necessary to maintain currency
- explain use of forecasting demand data

© Commonwealth of Australia, 2025 Future Skills Organisation

- identify and contrast various test management tools.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the Telecommunications – Telecommunications Networks Engineering field of work and include access to:

- a site where management of voice, data and IP network solutions can be undertaken
- software and hardware resources suitable for developing, deploying and managing voice, data and IP network solutions
- tests and equipment currently used in industry.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTTEN808 Manage network testing strategies

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to plan and manage a test regime for evaluation of application software for a telecommunications network.

It applies to individuals with high-level technical skills working as network engineers or senior technical staff within project management roles.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan test effort and develop test strategy for an application software	1.1 Critically analyse functionalities of an application software from the system design document and create test strategy for new telecommunications product line 1.2 Produce steps for test strategy, including attributes of each step according to enterprise policy 1.3 Produce test strategy for evaluating suitability of application software for integration into telecommunications network 1.4 Critically analyse test strategy and identify types of risks that

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	would hinder test performance or reality
2. Plan test strategy for regime	2.1 Produce phases of a test cycle for a test regime according to system design document 2.2 Assess a range of tests required to evaluate performance and functionality of application software and determine tests required to suit the test regime 2.3 Evaluate features of testing tool and debuggers and select an appropriate tool to test software application and detect faults 2.4 Evaluate elements of test plan that cover testing functionality of the application software
3. Design test plan and produce test reviews	3.1 Determine forecast time, effort and cost for low and medium intensity projects to perform testing 3.2 Develop a test case or test scenario with prerequisite states based on requirements to generate expected test results for test plan 3.3 Produce test plan for specific phases based on requirements of project specifications for the application software 3.4 Produce test reporting associated with particular test phases within test plan 3.5 Critically analyse test reports and evaluate impact of test plan on the testing environment 3.6 Manage progress of test plan to minimise risks associated with testing and ensure test compliance with test requirements 3.7 Report any detected defects to product evaluation personnel, and prepare a strategy to manage defects
4. Manage test traceability	4.1 Create a traceability matrix to correlate relationship between marketing requirements and detailed requirements of software product to matching parts of design, test plan and test cases 4.2 Critically analyse testing metrics produced by test tool to manage tracking of defects and plan process improvements based on the metrics 4.3 Produce an evaluation report from traceability matrix to manage defects or failures from the test plan

© Commonwealth of Australia, 2025 Future Skills Organisation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 3.5	• Organises, evaluates and critiques ideas and information from a wide range of complex texts
Writing	1.1, 1.2, 1.3, 3.3, 3.7, 4.3	• Prepares clear and concise workplace documentation including reports and recommendations incorporating technical language to communicate complex information clearly and effectively
Numeracy	3.1, 3.5, 4.2	• Uses numerical information to interpret and evaluate different types of technical data, take measurements and determine cost-effective outcomes
Navigate the world of work	1.2	• Adheres to organisational procedures and protocols
Interact with others	3.7	• Selects and uses appropriate conventions and protocols when communicating with technical personnel in a range of work contexts
Get the work done	1.1-1.4, 2.1-2.4, 3.1-3.4, 3.6, 4.1, 4.2	• Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context for complex, high impact activities with strategic implications • Demonstrates a sophisticated understanding of principles, concepts, language and practices associated with the digital world and uses this to devise strategies • Implements actions according to a predetermined plan, making adjustments as necessary • Takes responsibility for high-impact decisions in complex situations involving many variables and constraints • May use formal analytical and lateral thinking techniques resolving software, hardware and logistics problems

Assessment Requirements for ICTTEN808 Manage network testing strategies

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- produce steps in developing test strategy
- produce test strategy for evaluating suitability of application software
- design test plan and produce test reviews
- develop a test case or test scenario
- produce a test plan for specific phases
- produce test reporting associated with particular test phases within test plan
- create traceability matrix
- produce an evaluation report from the traceability matrix to manage defects or failures from the test plan.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain applications software features and functionalities
- summarise configuration of software testing tools
- outline creation of a traceability matrix
- provide detailed summary of different elements of test plans and risks associated with implementation
- outline features of testing tools and debuggers
- explain identification of types of risks
- consider legislation, codes of practice and other formal agreements that directly impact testing
- explain how to manage software defects

© Commonwealth of Australia, 2025 Future Skills Organisation

- summarise management of test traceability
- outline phases of test cycles
- outline production of test reviews
- consider specific workplace health and safety (WHS) requirements that impact activity in terms of safety of self and the public
- explain relevant steps in developing test strategy
- outline testing procedures and testing cycles for various system applications.
-

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the Telecommunications – Telecommunications Networks Engineering field of work and include access to:

- a site where planning and management of a test regime for evaluation of application software may be conducted
- software tools currently used in industry
- vendor products, specifications, equipment and enterprise policy required for the activity.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTTEN809 Analyse business specifications to produce technical solutions

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to apply technical solutions in network designs for telecommunications and ICT networking provisioning companies specialising in integrating converging and emerging technologies of ICT networks.

It applies to individuals working as telecommunication officers in service and provision work who carry out design and implementation of technical solutions of information communication technology (ICT) networks.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to critically analyse business specifications	1.1 Research application of a suitable business model for telecommunication service provisioning that meets agreed customer requirements 1.2 Obtain business requirements and business specifications to provide data for the model

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.3 Determine business drivers and requirements of key stakeholders and customers, both internal and external 1.4 Evaluate business objectives and customer requirements for input into the model
2. Produce technical solutions to meet business imperatives	2.1 Research tools and templates for analysing business models and provide reports on technical design and specifications 2.2 Develop technical solutions for customer in response to drivers and business requirements 2.3 Evaluate costs involved in implementing ICT technical solutions for customer 2.4 Produce cost benefit analysis to assess viability and optimum timing for deploying the technical solution for maximum return on investment (ROI) 2.5 Investigate a range of vendor products to determine most suitable to meet technical requirements and customer needs 2.6 Produce a report documenting technical solutions addressing business specifications and recommendations against customer requirements
3. Evaluate impact of technical requirements on the business	3.1 Review and assess business constraints, opportunities and objectives 3.2 Determine technical requirements according to input-output, interface, process flow or quality requirements 3.3 Critically analyse hardware, software and network requirements to suit the business plan 3.4 Build business platform based on IT/ICT technical solutions 3.5 Investigate processes in need of being changed by a business solution 3.6 Document impact of technical requirements on the business
4. Document and validate agreed solutions	4.1 Submit technical requirements and solution overview to management for feedback 4.2 Analyse feedback and incorporate change as required 4.3 Document changes and distribute final business solution to internal and external stakeholders

© Commonwealth of Australia, 2025 Future Skills Organisation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.4, 2.1, 3.1-3.3, 4.2	• Organises, evaluates and critiques information from a wide range of complex texts
Writing	1.3, 2.4, 2.6, 3.6, 4.2, 4.3	• Generates complex written texts, demonstrating control over a broad range of writing styles and purposes
Oral Communication	1.3, 4.2	• Establishes and maintains complex and effective spoken communication in a broad range of contexts • Displays depth of understanding of complex oral texts which include multiple and unstated meanings
Numeracy	2.3, 2.4	• Uses mathematical formulas and calculations to estimate and plan project costs and evaluate cost-benefits of completed project
Interact with others	4.1, 4.3	• Selects and uses appropriate conventions and protocols when communicating with stakeholders in a range of work contexts
Get the work done	1.2, 2.1, 2.2, 2.5, 3.2-3.4	• Monitors workload in terms of personal and stakeholder goals and outcomes, adjusting or renegotiating priorities and plans as required • Develops plans for complex, high-impact activities with strategic implications that involve a diverse range of stakeholders • Implements actions according to a predetermined plan, making adjustments if necessary and addressing unexpected issues • Considers strategic and operational potential of digital trends to achieve work goals, and enhance work processes and solutions • Uses formal analytical and lateral thinking techniques for identifying issues, generating and evaluating possible solutions • Uses formal decision-making processes as scaffolding for thinking, seeking input, advice and feedback from others as required

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Requirements for ICTTEN809 Analyse business specifications to produce technical solutions

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- research and critically analyse client specifications against accepted industry practices
- produce technical solutions from business specifications
- analyse feedback from client and make adjustments to proposal
- apply design concepts to business solutions
- produce technical reports regarding design of the solution
- make recommendations and offer optimum design solutions
- produce an evaluation document on impact of technical requirements on the business.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline business models and tools
- summarise business processes
- explain client business domain, business function and organisation
- explain compatibility issues and resolution procedures
- explain configuration of internet protocol (IP) networks
- establish customer and business liaison protocols
- summarise desktop applications and operating systems
- provide a detailed explanation of documenting technical specifications
- explain linkage between processes
- summarise security protocols, standards and data encryption
- outline technologies:
  - access networks

© Commonwealth of Australia, 2025 Future Skills Organisation

- core networks
- information and communications technology (ICT) network topologies
- mobile cellular networks
- network protocols and operating systems
- optical networks and principles
- radio frequency (RF) networks and principles.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the Telecommunications – Telecommunications Networks Engineering field of work and include access to:

- client functional requirements
- business specifications
- database software
- simulation software
- organisational guidelines
- network and computer layout
- site design software and hardware
- information on a range of ICT business solutions.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTTEN810 Investigate the application of cloud networks in telecommunications switching

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to develop strategies to accommodate shortfalls in capacity and functionality for a switching network. It also covers how to develop solutions for network growth using emerging technologies, including cloud computing.

It applies to individuals with excellent technical and strategic management skills working as telecommunications planning engineers and senior technical staff.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Evaluate current physical network infrastructure	1.1 Analyse scalability, functionality, cost, security and energy consumption of existing physical network infrastructure 1.2 Report on shortfalls and risks of existing physical infrastructure in accommodating network growth and increased functionality 1.3 Investigate capacity and functionality shortfalls of existing physical infrastructure to highlight limitations of the existing

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	switching network 1.4 Document estimated costs and issues associated with meeting capacity and functionality shortfalls using existing physical infrastructure
2. Investigate the application of cloud networks	2.1 Analyse trends in cloud networks (infrastructure-as-a-service), technologies and multiprotocol label switching (MPLS) architectures against rapid changes in the landscape 2.2 Determine applicability of cloud networks (infrastructure-as-a-service) to meet capacity and functionality requirements of the network 2.3 Assess risks in using cloud networks to meet capacity and functionality requirements of the network 2.4 Evaluate a range of cloud network solutions and justify selection of an optimum network switching solution 2.5 Develop solution elements using a series of small project elements 2.6 Produce a cloud network alternative solution to emulate the existing core network of a service provider
3. Analyse the impact of the cloud network solution for system integration and across business domains	3.1 Prepare a plan for organisational change control processes and integration of cloud network solutions within a complete network infrastructure 3.2 Prepare a test scenario and produce a test management schedule for the testing process of system elements and interfaces using simulation 3.3 Use integration document software to replicate issues exhibited in test environment 3.4 Certify cloud network solution compatibility and compliance to requirements using the web-based test management tool (quality centre) to conduct performance evaluation tests 3.5 Analyse test reports to evaluate load balancing and network security issues in test environment 3.6 Document and resolve conflicts detected in simulation testing
4. Develop a business case for implementation of a cloud network	4.1 Prepare a cost-benefit analysis of the cloud network solution as a business case to evaluate the return on investment (RoI) 4.2 Investigate staging of the solution and timing implementation of project elements as a scenario for real life implementation 4.3 Research and report on key features of cloud network

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	implementation in a business case study

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 2.1, 3.5, 4.3	• Researches, evaluates and interprets complex technical documentation, such as software and hardware manuals and design specifications
Writing	1.2, 1.4, 3.1, 3.2, 3.6, 4.1, 4.3	• Prepares clear and concise workplace documentation, including reports and recommendations incorporating technical language, to communicate complex information
Numeracy	1.1, 1.3, 1.4, 3.5, 4.1	• Uses numerical information to interpret results, evaluate different types of technical data, take measurements and determine cost-effective outcomes for RoI
Get the work done	1.1, 1.3, 1.4, 2.1-2.5, 3.1-3.4, 3.6, 4.2	• Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context for complex, high-impact activities with strategic implications • Implements actions according to a predetermined plan, making adjustments if necessary • Takes responsibility for high-impact decisions in complex situations involving many variables and constraints • Uses formal, analytical and lateral thinking techniques to resolve problems or to generate ideas • Actively identifies digital systems, devices and applications with potential to meet current and/or future needs • Uses main features and functions of digital tools to complete work tasks

Assessment Requirements for ICTTEN810 Investigate the application of cloud networks in telecommunications switching

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- evaluate the current physical network infrastructure's capacity and functionality shortfalls
- investigate application of cloud networks and plan architectural design
- develop components of cloud networking solution for meeting capacity and functionality requirements of the network
- assess risks in using cloud networks to meet capacity and functionality requirements of the network
- analyse impact of integration of cloud network solution on network
- prepare a test plan with test scenario and produce a test management schedule
- use integration document and software test management tools to replicate issues exhibited in test environment
- certify cloud network solution compatibility and compliance
- prepare a cost-benefit analysis of the cloud network solution
- develop a business case for implementation of a cloud network.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- analyse components of infrastructure-as-a-service solutions
- summarise existing digital switching technology in service provider's core network
- outline information required to develop architectural solutions
- explain *integration document software*
- explain new cloud network technologies
- provide a detailed summary of cloud networking transmission, transmitter and receiver architecture and their associated infrastructure

© Commonwealth of Australia, 2025 Future Skills Organisation

- outline performance and integration requirements
- prepare and/or interpret technical documentation
- outline protocols as used on multiprotocol label switching (MPLS) and infrastructure-as-a-service
- provide a detailed explanation of network components and their functions
- explain specific organisational requirements relating to computer systems
- summarise typical issues and challenges that occur with system changes.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a site where the application of cloud networks in telecommunications switching may be investigated
- software tools currently used in industry
- vendor products, specifications, equipment and enterprise policy required for the activity.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN811 Evaluate and apply network security

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to evaluate security of information communications technology (ICT) networks, using converging switching and transmission technologies in local area networks (LAN) and wide area networks (WAN), broadband networks, internet protocol TV (IPTV) and virtual networks.

It applies to individuals with excellent communication and IT skills working as telecommunications engineers.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Analyse operation of the internet	1.1 Evaluate the interrelationship of IP to open systems interconnect (OSI) seven layer model and the impact on network topologies and network elements 1.2 Assess media access control (MAC) and IP addressing, and their application in security 1.3 Report on transmission control protocol/internet protocol

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	(TCP/IP) operations and use of transport protocols for transmitting data over the network 1.4 Examine various types of routing protocols and the implications on security 1.5 Analyse forms of label switching as applied to data packets 1.6 Use software to simulate least-cost algorithms
2. Analyse internetwork protocols	2.1 Compare connection-oriented and connection-less networks in internetworking applications 2.2 Research design parameters used in networks 2.3 Produce a report on IP multi-casting protocols and systems, including IP frame fields of data frames
3. Research and report internetwork operations	3.1 Analyse protocol considerations of voice over internet protocol (VoIP) 3.2 Research protocols G723.1, G729 and G729A standards and evaluate their application in internetworking 3.3 Determine the format of JPEG and GIF files as applied to still pictures 3.4 Determine the format of MPEG-2 and H.32x series multimedia protocols for motion pictures 3.5 Evaluate features of different of multi-service protocols and of different email system protocols in networking operations 3.6 Produce a report on features different web-based protocols used in internetworking operations
4. Analyse features and types of network security	4.1 Analyse procedures and processes used for security attacks and use of protection mechanisms 4.2 Research conventional encryption algorithms and determine possible locations of encryption devices 4.3 Produce a report on conventional encryption key distribution problems and how message authentication and verification is achieved 4.4 Research one-way hashing and secure hashing functions 4.5 Produce a report on digital signature standard (DSS) principles, including public key cryptography algorithms for network security
5. Research features of public key authentication and email network	5.1 Research public key authentication using Kerberos 5.2 Analyse how electronic mail security is achieved using pretty good privacy (PGP)

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
security protocols	5.3 Research and report on internet protocol security (IPSec) 5.4 Produce a report on encapsulating security payload (ESP), including internet key management processes
6. Research features of web, network management and system security	6.1 Analyse how web threats and attacks occur in an IP network and determine system intruders and threats 6.2 Research operation of transaction protocols 6.3 Evaluate processes used for selection and protection of system passwords 6.4 Evaluate system threats and methods used to counteract the threats 6.5 Produce a report on anti-virus protection strategies, including firewall design principles, types and configurations
7. Document evaluation report	7.1 Present a final report to include research and evaluation of network security management principles and network application in the workplace with enhancement recommendations

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	2.2, 3.2, 4.1, 4.2, 4.4, 5.1, 5.3, 6.2-6.4	• Researches, evaluates and interprets complex technical documentation, such as technical standards
Writing	1.3, 2.3, 3.6, 4.3, 4.5, 5.3, 5.4, 6.5	• Prepares clear and concise workplace documentation, including reports and recommendations incorporating technical language, to communicate complex information clearly and effectively
Numeracy	1.6, 4.2, 4.5	• Uses mathematical subtlety and a clear set of steps to solve public-key encryption and least-cost algorithms
Interact with others	7.1	• Selects and uses appropriate conventions and protocols to communicate findings to stakeholders in a range of work contexts
Get the work done	1.1-1.6, 2.1, 2.3, 3.1-3.5, 4.1, 4.2, 4.4,	• Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context for complex, high-impact activities with strategic

© Commonwealth of Australia, 2025 Future Skills Organisation

	5.1, 5.2, 6.1, 6.3, 6.4	implications • Implements actions according to a predetermined plan, making adjustments if necessary • Takes responsibility for high-impact decisions in complex situations involving many variables and constraints • Uses formal, analytical and lateral thinking techniques to resolve problems or generate ideas • Actively identifies digital systems, devices and applications with potential to meet current and/or future needs • Uses main features and functions of digital tools to complete work tasks

Assessment Requirements for ICTTEN811 Evaluate and apply network security

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- investigate and report on protocols used for data transmission over IP networks
- investigate and report on network security in terms of internet protocols, digital signature standard (DSS) principles and asymmetric key cryptography on IP networks
- research and report features of web, network management and system security management in IP networks
- recommend enhancements to security management in IP networks.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain administrative network management systems
- evaluate algorithms used in IP network security
- specify the purpose of cryptography in security systems
- explain encapsulation and encryption in data transmission
- describe examples of enterprise solutions
- explain firewalls
- outline common network topologies
- summarise operations network management systems
- explain routing theory
- explain and give examples of system threats
- outline transaction protocols.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a telecommunications operations site
- a mentor or supervisor appropriately experienced in relevant telecommunications technology and infrastructure
- networked computers and relevant software.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN812 Evaluate and apply digital signal processing to communications system

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to analyse, apply and simulate operation of digital signal processing (DSP) to signals in a telecommunications system.

It applies to individuals with excellent information technology (IT) and design skills working as field officers. They develop solutions in modern applications, such as internet protocol TV (IPTV), digital TV, fast broadband and internet applications.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Apply DSP design criteria to telecommunications system	1.1 Review DSP criteria applied to signal processing 1.2 Perform frequency domain analysis on telecommunications signals 1.3 Apply digital processing techniques to DSP baseband communications signals used in digital systems 1.4 Generate output of a comb filter in digital filtering application

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	using convolution theorem and autocorrelation
2 Determine linear time invariant (LTI) system properties	2.1 Simulate telecommunication entities using simulation software functions 2.2 Perform calculations to find numerical approximations of the continuous-time convolution process 2.3 Simulate echo cancellation by applying simulation software using adaptive DSP algorithms and an inverse filtering method
3 Analyse digital telecommunication signals processing	3.1 Analyse the result of digitally passing a signal through a first-order recursive discrete-time filter 3.2 Determine frequency response of a simple continuous-time system using Fourier transform 3.3 Analyse amplitude modulated signals using Fourier transform
4 Analyse time and frequency forms of signals by applying simulation of signal processing	4.1 Program a simulated software application to represent a comb filter with a signal applied from a telecommunications system 4.2 Produce a report analysing simulated output results and relevance of a DSP filter to a telecommunications system

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1	• Researches, evaluates and interprets complex technical documentation
Writing	4.2	• Prepares clear and concise workplace documentation including reports that incorporate technical language to communicate complex information clearly and effectively
Numeracy	1.2, 1.4, 2.2, 2.3, 3.1-3.3	• Performs a range of complex, algorithmic calculations and analyses • Analyses and synthesises highly embedded mathematical information in a broad range of tasks and texts
Get the work done	1.1-1.4, 2.1, 2.3, 3.1-3.3, 4.1	• Uses a mix of intuitive and formal processes to identify key information and issues, evaluate alternative strategies, anticipate consequences and consider

© Commonwealth of Australia, 2025 Future Skills Organisation

		implementation issues and contingencies • Takes responsibility for high-impact decisions in complex situations involving many variables and constraints • Uses advanced features and functions of digital tools to complete work tasks

Assessment Requirements for ICTTEN812 Evaluate and apply digital signal processing to communications system

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- apply digital signal processing (DSP) criteria to a telecommunications system
- evaluate linear time invariant (LTI) system properties
- analyse digital and amplitude modulated signals using DSP methods and principles
- demonstrate an awareness of radio frequency issues relevant to DSP processes
- report on finding of analysis and use of DSP in a telecommunications system.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise digital communications systems
- explain Fourier transforms
- explain linear time invariant (LTI)
- explain various modulation methods, amplitude (AM), frequency (FM), phase (PM) and digital formats
- explain organisational policy and procedures for digital signal processing
- outline common non-compliance issues and responses.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a telecommunications operations site

© Commonwealth of Australia, 2025 Future Skills Organisation

- digital communication systems
- simulation software
- telecommunications test equipment currently used in industry.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN813 Produce engineering solutions using numerical computations and simulation

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to design and evaluate systems and networks to resolve specialised telecommunications network problems.

It applies to individuals who analyse, calculate and solve complex mathematical engineering problems for advanced telecommunication systems requiring numerical simulation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Use advanced engineering mathematics for a range of complex engineering solutions	1.1 Solve mathematical functions using complex trigonometric ratios 1.2 Solve mathematical functions using manipulation of matrices and determinants to perform standard calculations 1.3 Solve trigonometric functions using operations on complex numbers

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.4 Solve complex functions using integral and differential calculus 1.5 Solve mathematical functions using ordinary differential equations (ODE) 1.6 Solve mathematical equations using Laplace transforms 1.7 Solve mathematical problems using algorithmic control structures 1.8 Use software simulations where possible to produce simulated calculations for a range of engineering solutions 1.9 Analyse results from the simulated solution and compare to the derived solutions to adjust any variables in the calculation process
2. Design a simulation control system with queues	2.1 Design a simple control system using simulation software 2.2 Design a queuing system using simulation software 2.3 Design a stochastic system using simulation software 2.4 Document and present all numerical software simulations for the engineering problems

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Writing	2.4	• Prepares clear and concise workplace documentation that incorporates technical language to communicate complex information clearly and effectively
Numeracy	1.1-1.9	• Uses a range of advanced mathematical skills to perform a variety of complex engineering solutions and interpret complex measurement data
Get the work done	1.8, 2.1-2.3	• Uses a mix of intuitive and formal processes to identify key information and issues, evaluate alternative strategies, anticipate consequences and consider implementation issues and contingencies • Takes responsibility for high-impact decisions in complex situations involving many variables and constraints • Uses main features and functions of digital tools to

Assessment Requirements for ICTTEN813 Produce engineering solutions using numerical computations and simulation

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- solve a range of complex mathematical functions related to telecommunications engineering
- use software systems to produce simulations of mathematical solutions
- analyse results of software simulations
- design telecommunications systems using software simulations
- document and present software solutions for engineering problems.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- analyse and manipulate functions using symbolic and numerical software, including operations of entering and manipulating polynomials in suitable software and then substitution of values and graphing
- analyse and manipulate matrices and determinants, numerically with and without symbolic and numerical software
- design and debug programs using algorithmic control structures and output results to the screen, a graph and a file
- analyse and manipulate complex numbers numerically and with symbolic software
- determine and manipulate equations using advanced calculus operations of differentiation and integration numerically and with symbolic software
- determine and manipulate equations of the type called ordinary differential equations (ODE) met in telecommunications engineering applications numerically and with symbolic software

© Commonwealth of Australia, 2025 Future Skills Organisation

- determine and manipulate Laplace transforms met in telecommunications engineering applications numerically and with symbolic software
- design a simulation control system and simulate queues using software.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- networked computers
- simulation software
- relevant documentation
- a range of industry scenarios or workplace examples.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN814 Manage development and application of testing artefacts

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to plan and manage a test regime by developing testing artefacts to evaluate application software for a telecommunications network.

It applies to individuals working as network engineers or senior technical staff within project management roles, and includes technologies in mobile phones, wireless modems, set top boxes, media centres, web applications and content servers using application software to provide a telecommunications service.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan the test effort and develop test strategy for software testing	1.1 Critically analyse functionalities of an application software from the system design document and create a test strategy for a new telecommunications product line 1.2 Produce steps in developing test strategy and attributes of each

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	step, according to enterprise policy 1.3 Produce a test strategy to evaluate suitability of application software for integration into the telecommunications network 1.4 Assess a range of tests required to evaluate performance and functionality of application software and determine tests required to suit the test regime 1.5 Evaluate features of testing tool and debuggers, and select an appropriate tool to test the software application and detect faults 1.6 Produce a test plan based on requirements of the project specifications, and identify testing artefacts required for model-based software testing
2. Plan the development of testing artefacts	2.1 Develop software testing strategies for uncovering evidence of defects in software systems as part of the quality assurance process 2.2 Produce a test dependency model of the relationship between the test regime and test levels in software testing for referencing and validation 2.3 Critically analyse software testing requirements to determine domain testing and application testing artefacts requirements to validate the software product
3. Develop and manage testing artefacts	3.1 Create reusable domain artefacts to detect early defects in domain testing 3.2 Modify domain test artefacts by binding variability to create application test artefacts to detect defects in product line applications 3.3 Produce test reporting associated with test cycle phases within the test plan 3.4 Critically analyse test reports and evaluate the impact of the test plan with testing artefacts on the testing environment 3.5 Manage progress of the test plan to minimise risks associated with testing and ensure the test complies with test requirements 3.6 Report detected defects to product evaluation personnel and prepare a strategy to manage defects 3.7 Critically analyse testing metrics produced by the test tool to manage tracking of defects, and use metrics to plan process improvements 3.8 Produce an evaluation report from the traceability matrix to manage defects or failures from the test plan

© Commonwealth of Australia, 2025 Future Skills Organisation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.6, 2.3, 3.3, 3.4	• Organises, evaluates and critiques ideas and information from a wide range of complex texts
Writing	1.3, 1.6, 3.3, 3.6, 3.8	• Prepares clear and concise workplace documentation, including reports and recommendations incorporating technical language, to communicate complex information
Numeracy	3.4, 3.7	• Uses numerical information to interpret and evaluate different types of technical data and take measurements
Interact with others	3.6	• Selects and uses appropriate conventions and protocols when communicating with technical personnel in a range of work contexts
Get the work done	1.1-1.5, 2.1-2.3, 3.1, 3.5	• Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context for complex, high-impact activities with strategic implications • Demonstrates a sophisticated understanding of principles, concepts, language and practices associated with the digital world and uses this to devise strategies • Implements actions according to a predetermined plan, making adjustments if necessary • Takes responsibility for high-impact decisions in complex situations involving many variables and constraints • Uses formal, analytical and lateral thinking techniques for resolving software, hardware and logistics problems

Assessment Requirements for ICTTEN814 Manage development and application of testing artefacts

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- produce steps in developing test strategy
- produce a test strategy to evaluate suitability of application software
- develop software testing strategies for uncovering evidence of defects in software systems
- create reusable domain artefacts to detect early defects in domain testing
- produce test reporting associated with phases of a test cycle within the test plan
- produce an evaluation report from the traceability matrix.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline applications' software features and functionalities
- specify the configuration of software testing tools
- define *software artefact* and explain the process for testing artefacts
- summarise creation of the traceability matrix
- summarise steps in developing the test strategy and specify various tests that may be applied
- outline domain and application testing
- explain essential elements of test plans
- evaluate features of testing tools and debuggers
- explain the identification of types of risks
- outline the management of:
  - software defects
  - test traceability

© Commonwealth of Australia, 2025 Future Skills Organisation

- explain phases of test cycles
- summarise production of test reviews
- outline steps in developing a test strategy
- explain testing procedures.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- a site where testing artefacts can be developed and applied
- software tools currently used in industry
- vendor products, specifications, equipment and enterprise policy required for the activity.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN815 Manage project requirements and process implementations

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to analyse forecast data, develop specifications and resource requirements, and plan implementation of the process solution for products and services.

It applies to individuals with excellent planning and organising skills, working as network engineering staff or senior technical officers within project management roles, who have authority to direct activities of implementation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Manage forecast service demand requirements	1.1 Develop a project plan to review forecasting data and generate planning forecasts using forecasting tools 1.2 Critically analyse and review forecasts according to enterprise policy and produce forecast figures considering new developments in the area and technological changes where appropriate

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
2. Manage network development growth requirements	2.1 Critically analyse market intelligence on customer demand and demand data to plan for potential network traffic quantity and flow 2.2 Assess overall planning parameters, including approved business plan prior to commencing the planning process 2.3 Critically analyse gathered information and produce a project plan with specifications to meet network growth
3. Manage project resource requirements	3.1 Assess resource requirements to manage the project from the scoping phase through to project completion 3.2 Critically analyse outcomes of the project deliverables to determine effectiveness of the project process
4. Develop process solutions	4.1 Produce requirements for process solutions for delivery of product and services to customers using forecasting demand data 4.2 Prepare a plan for the organisational change control process and integration of new solutions within a complete network infrastructure 4.3 Produce a test management schedule for the testing process of the product solution 4.4 Develop solution specifications using industry process according to design requirements 4.5 Develop software and hardware resource profiling and select a suitable vendor for negotiations 4.6 Complete configuration management and provide complex input design requirements
5. Critically analyse test results for process solutions	5.1 Use design document and integration document software to replicate issues exhibited in test environment 5.2 Certify software solution compatibility and compliance with requirements using web-based test management tool to conduct performance evaluation tests 5.3 Critically analyse test reports to evaluate compatibility and security issues in a test environment 5.4 Resolve complex issues in interface to isolate defects
6. Manage process implementation	6.1 Plan and prepare evidence for customer acceptance and certification 6.2 Plan and manage transition to operation activities required for transition to operation of integrated IP solution 6.3 Prepare an installation failures procedure to make changes while

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	maintaining service levels 6.4 Manage the change implementation plan to maintain system stability

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 2.1-2.3, 3.2, 4.4, 5.3	• Organises, evaluates and critiques ideas and information from a wide range of complex texts
Writing	1.1, 1.2, 2.3, 4.1-4.4, 6.1, 6.3	• Demonstrates sophisticated writing skills by selecting appropriate conventions and stylistic devices to express precise meaning
Numeracy	1.2, 2.1, 3.1, 4.1, 5.3	• Analyses and synthesises highly embedded mathematical information in statistical data to apply forecasting techniques and assess planning parameters
Get the work done	1.1, 2.2, 3.1, 4.5, 4.6, 5.1, 5.2, 5.4, 6.1, 6.2, 6.4	• Operates from a broad conceptual plan, developing operational detail in stages, regularly reviewing priorities and performance during implementation, and identifying and addressing issues • Demonstrates a sophisticated understanding of the potential of new technology including principles, concepts, language and practices associated with the digital world • Takes responsibility for high-impact decisions in complex situations involving many variables and constraints • Uses formal, analytical and lateral thinking techniques to manage unexpected changes in demand requirements • Monitors outcomes of decisions, considering results from a range of perspectives, and identifying key concepts and principles and their impact on customers and enterprise

Assessment Requirements for ICTTEN815 Manage project requirements and process implementations

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- manage forecast service demand requirements
- manage network development growth requirements
- manage project resource requirements
- develop process solutions following critical analysis of test results.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- evaluate principles of managing change and implications for managing a project
- summarise customer applications and usage levels
- outline forecasting tools and techniques, and specify data that contributes to forecasting
- explore various industry processes that impact project management strategy
- outline integration of new solutions
- explain market intelligence and its value to forecasting and project assessment
- explore various types of data used to evaluate demand
- summarise performance evaluation
- provide a detailed summary of planning procedures
- describe the limitations of compatibility on the integration of telecommunications solutions
- evaluate products and services embedded in a project
- define project management and evaluate a project management plan
- explain test management.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- forecast data and tools involved in planning
- a range of software and hardware currently used in industry
- relevant regulations and specifications that impact forecasting activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTTEN816 Scope project requirements and process solutions

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to develop scope management strategies and plans, in line with business requirements and organisational strategies, for the delivery of products and services.

It applies to individuals with excellent planning and problem-solving skills, working as network engineering staff or senior technical officers within project management roles. They work with new and emerging technologies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – Telecommunications Networks Engineering

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Conduct project scope definition activities	1.1 Develop and confirm procedures for project authorisation with an appropriate authority for commitment of resources and effort 1.2 Establish agreement of desired project outcomes with relevant stakeholders 1.3 Develop scope management plan to determine scoping requirements

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
2. Define and plan scoping project requirements and process solutions	2.1 Critically analyse needs in consultation with client and relevant stakeholders to verify project scope 2.2 Prepare project specifications with project objectives, deliverables, constraints, exclusions, assumptions and principal work activities for delivery of products and services 2.3 Determine and agree measurable project outcomes and benefits to enable quantified evaluation of program performance 2.4 Develop and communicate scope definition, scope management strategies and plans to stakeholders, and seek agreement 2.5 Align program scope to business requirements and organisational strategy
3. Manage scoping process	3.1 Conduct regular program reviews to measure project performance and ensure stated program, business and strategic objectives are met 3.2 Establish and maintain the change management system to form the basis of ongoing scope management 3.3 Conduct reviews of scope changes and take action to ensure project and program objectives are achieved or modified 3.4 Measure project outcomes against defined program scope and aligned strategic objectives 3.5 Communicate results of program outcomes to appropriate authority 3.6 Manage the impact of scope changes within established time, cost and quality constraints according to change control procedures and to meet project objectives 3.7 Review the project planning process and document recommendations for improvements to future projects

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	3.4	• Organises, evaluates and interprets a range of complex documentation, including project plans

© Commonwealth of Australia, 2025 Future Skills Organisation

Writing	1.3, 2.2, 2.4, 3.7	• Prepares clear and concise workplace documentation, including project briefs and reports incorporating technical language, to communicate complex information clearly and effectively
Oral Communication	1.1, 1.2, 2.1, 2.3, 2.4	• Uses highly developed listening, observational and questioning skills to understand others' perspectives, and clarify and explore meaning • Clearly articulates requirements using language appropriate to audience and environment
Numeracy	3.4, 3.6	• Analyses and synthesises mathematical information to assess project parameters, including budget requirements and limitations
Interact with others	1.2, 2.1, 3.5	• Selects and uses appropriate conventions and protocols when communicating with stakeholders in a range of work contexts • Collaborates with others to achieve joint outcomes, playing an active role in facilitating agreement
Get the work done	2.2, 2.3, 2.5, 3.1-3.3, 3.6, 3.7	• Operates from a broad conceptual plan, developing operational detail in stages, regularly reviewing priorities and performance during implementation, and identifying and addressing issues • Monitors outcomes of process and decisions made, considering results from a range of perspectives and identifying key concepts and principles that may be adaptable to future situations • Takes responsibility for high-impact decisions in complex situations involving many variables and constraints • Uses formal, analytical and lateral thinking techniques to resolve problems such as unexpected variations to requirements and control proposed changes in scope • Monitors outcomes of decisions, considering results from a range of perspectives and identifying key concepts and principles and their impact on customers and enterprise

Assessment Requirements for ICTTEN816 Scope project requirements and process solutions

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- prepare project specifications with project objectives
- develop scope management plan
- develop scope management strategies
- conduct regular program reviews
- measure project outcomes
- manage the impact of scope changes within established budget and timeline.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- examine a range of products, services and solutions as they apply to various project outcomes
- explore various stakeholders and relevant levels of authorisation required for the duration of a project
- explain project life-cycle and the significance of scope management
- outline scope management plans, methodologies, techniques and tools
- summarise typical challenges and issues encountered in project scope management and options for addressing them
- identify and explore various project performance indicators and how project performance can be measured
- evaluate various vendor products and solutions.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications networks engineering field of work and include access to:

- sites on which projects may be conducted
- forecast data and tools involved in planning
- a range of software and hardware currently used in industry
- relevant regulations and specifications that impact forecasting activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTWEB201 Use social media tools for collaboration and engagement

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to establish a social networking presence, using social media tools and applications. It includes the requirement to review, compare, and use different types of social networking tools and applications.

It applies to information and communications technology (ICT) personnel who need to develop a social networking web presence for a small or large office environment, using social media tools and applications.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Web

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Describe the different types of social media tools and applications	1.1 Explain the characteristics of the term ‘social media’ 1.2 Identify different types of social-media tools and applications 1.3 Illustrate some of the issues associated with the use of social media tools and applications

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
2. Compare different types of social media tools and applications	2.1 Select one social media type to review 2.2 Review the most popular tools, and applications, within that social media type 2.3 Itemise the benefits across a range of the most popular tools and applications 2.4 Select the most appropriate social media tool or application
3. Set up and use, popular social media tools and applications	3.1 Identify the social media tools and applications available for possible implementation 3.2 Initiate the preferred social media tools, and applications, for use 3.3 Establish the social media interface, using text and file content 3.4 Initiate social networking interaction 3.5 Test and evaluate tools, and applications, for ease of use 3.6 Present the findings

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 2.2	• Extract the relevant information from technical and organisational documents
Writing	1.1, 2.2, 2.3, 3.3, 3.4, 3.6	• Develop the content in a manner that supports and conveys information, using the appropriate structures and specialised language
Navigate the world of work	1.3	• Understands legal and ethical responsibilities, regarding the use of social media tools
Get the work done	2.1, 2.2, 2.4, 3.1, 3.2, 3.5, 3.6	• Makes routine decisions and implements standard procedures for routine tasks • Understands the purposes, specific functions, and the key features of common digital systems and tools, and operates them effectively to complete routine tasks

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Requirements for ICTWEB201 Use social media tools for collaboration and engagement

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify different types of social media tools and applications, and the issues associated with their use
- access the internet, set up a social networking presence and upload and link a wide variety of files
- use and evaluate social media tools and applications.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list basic technical terminology in relation to social networking, social media applications, and tools
- outline basic methods of uploading images, text files, portable document format (PDF) files, audio files, video files, and link the associated files
- state the features, and functions, of social media applications
- list import and export software functions
- explain how to link documents
- explain the process of tagging, in order to facilitate collaborative folksonomy
- list social media applications and procedures, for connecting to social networking sites
- identify and describe, input and output devices
- describe, and use, really simple syndication (RSS) feeds to connect a social network.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the website technologies field of work, and include access to:

- a personal computer (PC) and printer
- the internet
- social-media tools and applications
- online instructional documents.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTWEB423 Ensure dynamic website security

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to ensure, and maintain, the security of a dynamic commercial website.

It applies to individuals working as website developers responsible for security of dynamic websites, who are proficient communicators and can analyse technical data capably and with efficiency.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Web

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Undertake the risk assessment	1.1 Identify the functionality and features of the website, and confirm these with the client 1.2 Identify security threats, with reference to the functionality of the site and organisational security policy, legislation and standards 1.3 Complete a risk analysis to prioritise the security threats, and identify system vulnerabilities

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.4 Identify resource and budget constraints, and validate with the client as required 1.5 Source the appropriate products, security services and equipment, according to enterprise purchasing policies
2. Secure the operating systems	2.1 Identify operating system (OS) and cross-platform vulnerabilities 2.2 Make the appropriate scripting or configuration adjustments, with reference to the functionality of the site and the security policy 2.3 Identify and rectify weaknesses specific to the OS
3. Secure the site server	3.1 Configure the web server securely, with reference to the required functionality and the security policy 3.2 Review and analyse, server-side scripting with reference to the required functionality and the security policy 3.3 Install firewalls as required 3.4 Establish access control permissions to the server and database
4. Secure data transactions	4.1 Identify data transactions, with reference to the functionality and features of the website 4.2 Identify and apply, the channel protocols related to the requirements 4.3 Install and configure, the payment systems
5. Monitor and document the security framework	5.1 Develop a program of selective independent audits and penetration tests 5.2 Determine the performance benchmarks 5.3 Implement audit and test programs, and record, analyse and report the results 5.4 Make security framework changes based on the test results 5.5 Develop the site-security plan, with reference to the security policy and requirements 5.6 Develop and distribute, related policy and procedures to the client

© Commonwealth of Australia, 2025 Future Skills Organisation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.3-1.5, 2.1, 2.3, 3.2, 4.1, 4.2, 5.4	• Reads and interprets plans, specifications, computer program interface, and other documentation from a variety of sources, and consolidates information to determine requirements
Writing	1.1, 1.3, 1.4, 2.2, 3.3, 4.3, 5.1, 5.2, 5.3, 5.5, 5.6	• Makes adjustments to software scripting, and creates procedural and related workplace documentation, for a specific audience, using clear and detailed language in order to convey explicit information
Oral Communication	1.1, 1.3, 1.4, 5.3, 5.6	• Uses listening and questioning skills to confirm understanding for technical, operational and business requirements, participates in a verbal exchange of ideas/solutions, and uses appropriate, detailed and clear language to address the client
Numeracy	1.4, 1.5, 4.3	• Undertakes numerical analyses during testing, and calculates, and evaluates system results and performance
Navigate the world of work	1.2, 1.5, 3.1, 3.2, 5.5	• Accepts responsibility and ownership of tasks, and makes decisions on completion parameters, and the need for coordination with others • Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements
Interact with others	1.1, 1.4, 5.6	• Selects and uses, the appropriate conventions and protocols, when communicating with clients and co-workers in a range of work contexts
Get the work done	1.1-1.5, 2.2, 2.3, 3.2-3.4, 4.3, 5.1-5.5	• Takes responsibility for planning, sequencing and prioritising tasks and own workload, for efficiency and effective outcomes • Makes routine decisions and implements standard procedures for routine tasks, using formal decision-making processes for more complex and non-routine situations • Addresses less predictable problems and initiates standard procedures in response to these problems, applying problem-solving processes in determining a solution • Uses familiar digital technologies and systems to access information, search and enter, data and code,

Assessment Requirements for ICTWEB423 Ensure dynamic website security

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- determine the client security framework, and its requirements
- identify any potential security threats to a website, and document the risk and performance benchmarks
- develop and implement, strategies to secure a dynamic website.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise the Australian Computer Society Code of Ethics
- explain a client business domain, its structure, function and organisation, including the organisational issues surrounding security
- identify and outline the legislation, regulations, and codes of practice pertinent to website information, including:
  - copyright
  - intellectual property
  - privacy
  - ethics
- outline current industry-accepted hardware and software products
- describe desktop applications and operating systems (OS), as they relate to website security
- explain the functions and features of:
  - automated intrusion detection software
  - authentication and access control

© Commonwealth of Australia, 2025 Future Skills Organisation

    - common stored account payment systems
    - cryptography
    - common gateway interface (CGI) scripts
    - generic secure protocols
    - stored-value payment systems
- explain the implications of network address translation (NAT), related to:
    - securing internal, internet protocol (IP) addresses
    - buffer overruns and stack smashing
    - operating system deficiencies
    - the protocol stack for internet communications
    - physical web server security, particularly remote
- describe the advantages, and disadvantages, of using a range of security features
- identify and describe, host security threats.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the website technologies field of work, and include access to:

- a dynamic website
- a security plan
- the user requirements
- all relevant legislation, standards and organisational requirements.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTWEB430 Produce server-side script for dynamic web pages

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Application

This unit describes the skills and knowledge required to produce server-side scripts for dynamic web pages using a range of relevant features from different languages.

It applies to individuals working as web designers who apply a wide range of knowledge and skills across different information and communications technology (ICT) environments to support organisations that require broad ICT support.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Web

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Analyse the requirements for web documents requiring server-side dynamic interaction	1.1 Review and assess user requirements with user to determine the necessary web document 1.2 Determine and document dynamic functionality of web document to meet user requirements 1.3 Determine appropriate language based on required dynamic functionality 1.4 Finalise web document requirements

© Commonwealth of Australia, 2025 Future Skills Organisation

2. Design server-side scripts	2.1 Design web document and server-side code to interact with an external data source 2.2 Design web document and server-side code to allow administrator to insert, update, and delete entries to external data source 2.3 Implement security features in web document based on user requirements
3. Produce the web documents	3.1 Write extensible hypertext markup language (XHTML) in line with XHTML standards, to define web page structure 3.2 Write server-side scripts in line with XHTML standards to enable customised page content generation 3.3 Upload images to web-hosted database to enable dynamic retrieval for web page
4. Test the scripts and debug	4.1 Test web document and rectify issues to meet user requirements 4.2 Complete test results documentation and submit it to superior for discussion and acceptance
5. Set up security	5.1 Determine and implement permissions to prevent error messages displaying to the public 5.2 Configure server software to minimise potential database attacks

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	**Description**
Reading	• Identifies, analyses and evaluates workplace instructions and technical documentation, to determine all organisational requirements
Writing	• Develops clear and well-organised material for a specific audience, using precise language to convey explicit information requirements and recommendations
Oral Communication	• Clearly articulates requirements using the language appropriate to the audience, and participates in a verbal exchange of ideas/solutions
Navigate the world of work	• Identifies and complies with the current standards
Interact with	• Uses strategies to establish a sense of connection, and to build rapport,

© Commonwealth of Australia, 2025 Future Skills Organisation

others	with clients and colleagues
Get the work done	• Takes responsibility for planning, sequencing and prioritising tasks and own workload, for efficiency and effective outcomes • Makes routine decisions and implements standard procedures for routine tasks, using formal decision making processes for more complex and non-routine situations • Uses familiar digital technologies and systems to access information, search and enter, data and code, present information and communicate with others, cognisant of data security and safety

Assessment Requirements for ICTWEB430 Produce server-side script for dynamic web pages

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit; including evidence of the ability to:

- Create a dynamic web page according to one set of user requirements
- Use server-side scripting to retrieve information from a web-hosted database in two different instances
- Analyse three language options and the associated advantages and disadvantages based on web document requirements to select most appropriate language
- Configure one webserver to deliver the website using HTTPS
- Create one script for each of the following:
  - inserting, updating, and deleting data from a web server database
  - implementing security features
  - uploading and retrieving images
  - managing sessions and creating secure logins
- Test web document and undertake corrective actions to meet requirements
-

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

- Server-side technologies and at least three web scripting languages and associated advantages and disadvantages
- Server-side web analysis and design parameters
- XHTML standards
- Testing tools and processes and associated advantages and disadvantages
- Control structures and object-oriented programming
- Web-programming concepts including:

© Commonwealth of Australia, 2025 Future Skills Organisation

- the hypertext transfer protocol (HTTP) and HTTP Secure (HTTPS)
- stateless programming
- session management
- authentication and web security
- database vulnerabilities and preventative software configuration and programming practices

- Organisational procedures to document test results
-

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in an ICT working environment or workplace. This includes access to:

- Web-hosted database
- Server with software for configuration
- User requirements relating to web documents
- Software development environment
- XHTML standards
- Individual users as well as superior in the organisation

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

ICTWEB431 Create and style simple markup language documents

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Application

This unit describes the skills and knowledge required to design and create basic markup language documents and cascading style sheets (CSS) in order to define the structure and style of a website.

It applies to individuals in ICT roles who are required to create web pages with consistency in appearance and user experience.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Web

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Review the requirements	1.1 Review user requirements to determine website design 1.2 Develop testing approach and test cases based on requirements and refine with user 1.3 Select appropriate markup language based on user requirements
2. Create the document structure	2.1 Create and assign basic elements of documents based on user requirements

© Commonwealth of Australia, 2025 Future Skills Organisation

	2.2 Mark-up sections of documents to depict structure and refine with user
3. Format, style and lay out the elements on a web page	3.1 Style and format documents using CSS according to user requirements 3.2 Lay out document elements using CSS according to user requirements
4. Test and validate the web pages	4.1 Test website in different browsers according to test approach and cases, and correct and re-test issues 4.2 Document test results and provide to user to explain any outstanding issues and corrective actions 4.3 Recommend, agree, and undertake any outstanding corrective actions with the user to achieve user acceptance

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	**Description**
Reading	• Identifies, interprets and uses information from technical and organisational documents to complete a work task
Writing	• Develops content in a manner that supports and conveys information, using the appropriate structures and specialised language • Uses specific software and technical language to create, format, review, save and access web-based documents, diagrams and images
Oral Communication	• Identifies work outcomes through open-ended questioning, active listening, paraphrasing and summarising • Uses clear and detailed verbal language in order to convey explicit information
Navigate the world of work	• Understands own role and responsibilities, and follows organisational standards • Completes work to user requirements and industry standards
Get the work done	• Sequences and schedules complex activities within the specified timeframe, monitors implementation, and manages relevant communication • Analyses documentation in order to apply and obtain desired results, and to resolve problems • Utilises a combination of lateral and analytical thinking, to design and refine solutions that are adaptable to different contexts • Uses a range of digitally-based technologies, and the software

Assessment Requirements for ICTWEB431 Create and style simple markup language documents

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 4.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit; including evidence of the ability to:

- Interpret and implement one set of user requirements, including the ability to
  - select markup language according to requirements
  - use a markup language without the automated generation of code
  - customise website style and layout according to user requirements
  - create consistent style and format using CSS across multiple documents on the web page
  - identify testing approach and test cases based on user requirements
  - develop a website style and format using cascading style sheets (CSS)
- Test website in at least two common browsers and take corrective action according to test results
-

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

- Markup languages and their associated standards, advantages, and disadvantages
- Standard web and CSS design principles
- Application of the following to CSS:
  - hypertext mark-up language (HTML)
  - extensible hypertext mark-up language (XHTML)
  - standards for design
- Hypertext transfer protocol (HTTP) and HTTP Secure (HTTPS)
- Testing tools and processes and associated advantages and disadvantages
- Troubleshooting processes relating to CSS and websites
- Features and limitations of common web browsers

© Commonwealth of Australia, 2025 Future Skills Organisation

- Organisational procedures to document test results
-

Assessment Conditions

Skills must be demonstrated in a workplace or simulated environment where conditions are typical of those in an ICT working environment or workplace. This includes, but is not limited to:

- Software package
- Computer with internet connection
- User requirements relating to website
- Common web browsers to allow testing of website
- Individual users

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

ICTWHS201 Provide telecommunications services safely on roofs

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge to engage in safe work practices when installing or repairing telecommunications equipment on roof structures.

It applies to individuals employed as technicians and installers who are required to safely install or repair telecommunications equipment on roof structures. It includes planning, risk assessment and implementing control measures while undertaking telecommunications installation or repairs.

No licensing, legislative or certification requirements apply to this unit at the time of publication

Unit Sector

Telecommunications – Occupational Health and Safety

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Follow workplace procedures for hazard identification and risk control	1.1 Notify customer and arrange site access 1.2 Recognise and report hazards in the work area to designated personnel according to workplace procedures 1.3 Follow work health and safety (WHS) legislative requirements, workplace procedures and work instructions to control risks

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.4 Comply with safe work practices for working safely on roofs and adhere to workplace environmental requirements throughout the work 1.5 Implement duty of care requirements to provide a safe working environment 1.6 Complete job safety analysis (JSA) sheets according to work requirements, including hazard identification and risk assessment 1.7 Use and maintain personal protective equipment and personal safety equipment according to work requirements and apply fall protection and personal safety requirements according to regulatory requirements
2. Prepare for work on rooftop	2.1 Assess scope of work according to workplace procedures, relevant legislation, codes, regulations and standards and relevant job information details 2.2 Inspect site to determine layout and equipment requirements according to work order 2.3 Select materials, tools and equipment, including personal protective equipment, and check for serviceability 2.4 Inspect and install fall protection and perimeter protection equipment, ensuring adequacy for work and conformance to regulatory requirements 2.5 Install roof safety system according to workplace and regulatory requirements 2.6 Select and install appropriate signage and barricades
3. Perform telecommunications work on rooftop	3.1 Inspect access from ground to work area ensuring it is safe and according to regulatory requirements 3.2 Estimate total weight of material to be raised to rooftop to carry out the work 3.3 Determine and use the safest lifting method to bring materials and equipment to rooftop according to regulatory requirements. 3.4 Secure test equipment, hardware and tools safely on rooftop and distribute weight to eliminate risk of damage to roof cover 3.5 Inspect safety system periodically for compliance with regulations according to workplace procedures and report faults 3.6 Monitor risk control measures to ensure they are effective and appropriate to the task and work environment 3.7 Reassess risk control measures as required, according to changed work practices or site conditions and make alterations within scope of authority

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
4. Complete activities and documentations	4.1 Dismantle safety system according to prescribed sequence and remove from worksite 4.2 Clear work area and dispose of materials or recycle according to state and territory legislation and workplace procedures 4.3 Clean, check and maintain tools and equipment according to manufacturer's recommendations and workplace procedures 4.4 Complete documentation according to workplace requirements and notify customer for sign off

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	2.6	• Interprets textual information from sources to identify relevant safety signs
Writing	1.2, 1.6, 4.4	• Prepares documentation and correspondence using clear language, correct spelling and terminology in the preparation of reports, JSA, SWMS and other reports
Oral Communication	1.1, 1.2, 4.4	• Uses clear language and concepts, and tone and pace appropriate for the audience and purpose
Numeracy	3.2	• Performs mathematical calculations to estimate, interpret and confirm safe roof loading
Navigate the world of work	1.3-1.5, 1.7, 2.1, 2.4, 2.5, 3.1, 3.3, 3.6, 3.7, 4.1-4.3	• Complies with explicit policies and procedures. • Explores and implements, where identified, the implicit expectations of policies and procedures
Interact with others	1.1, 1.2, 4.4	• Identifies and takes steps to follow accepted communication practices and protocols • Uses a limited range of accepted practices for communicating in a work environment
Get the work done	1.1, 1.2, 1.4-1.7, 2.1-2.6, 3.1-3.4, 3.6, 3.7, 4.1-4.4	• Plans and implements routine tasks and workload making limited decisions on sequencing, timing and collaboration, and seeks assistance in setting priorities • Responds to predictable routine problems,

© Commonwealth of Australia, 2025 Future Skills Organisation

		implementing standard or logical solutions

Assessment Requirements for ICTWHS201 Provide telecommunications services safely on roofs

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of ability to:

- locate, interpret and apply relevant information, standards and specifications for working safely on roofs
- apply safety requirements throughout the work sequence, including the use of personal protective equipment
- provide for erection, maintenance and dismantling of the fall and perimeter protection requirements for the site
- carry out a risk assessment ensuring:
  - correct identification of risks and safety requirements
  - correct selection and use of appropriate processes, tools and equipment
  - completion of all work to specification
  - compliance with regulations, standards and organisational quality procedures and processes
  - open communication and the ability to work effectively and safely with others.

Note: As a minimum, given the plans and specifications for the roof working area of a corner, extending at least 4 metres in either direction and greater than 1.8 m high, incorporating harnesses and harness fixing points for safe personal and stores access to the roof, stores and equipment locations

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the purpose of job safety analysis (JSA) and safe work method statements
- identify the various hazards associated with working on roofs
- identify levels of responsibility when operating in a hazardous situation
- specify workplace procedures relating to working on roofs

© Commonwealth of Australia, 2025 Future Skills Organisation

- describe the hierarchy of control in a workplace health and safety environment in the context of:
  - hazards
  - risk
  - control
- list and describe common workplace practices that impact health and safety
- explain ‘duty of care’ and its relevance to workplace health and safety
- list and describe the use of safety personal protective equipment (PPE) and equipment used for working on roofs
- describe safe lifting methods
- explain reporting methods for safe work practices
- explain the nature of work undertaken on roofs
- list and apply processes of providing for safe working practices
- identify and comply with relevant statutory and regulatory authority requirements related to working safely on roofs
- identify and use roof safety equipment and systems and considerations to facilitate working safely on roofs
- apply SI system of measurement for measurement.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the Telecommunications – Occupational Health and Safety field of work and include access to:

- site on roof where operations may be conducted
- induction procedure and requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe working practices and addressing hazards and emergencies
- relevant regulations, standards specifications and manuals, including industry related systems information.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTWHS202 Work safely in a radio frequency electromagnetic radiation environment

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the performance outcomes, skills and knowledge required to use organisational risk control procedures when working with a risk of exposure to radio frequency (RF) electromagnetic radiation (EMR) hazards.

The unit applies to site maintenance staff, technicians and installers who install or maintain equipment at installations that are sources of RF EMR.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Unit Sector

Telecommunications – work health and safety

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to work in RF EMR environment	1.1 Identify characteristics of RF EMR and situations that can lead to exposure to RF EMR hazards 1.2 Identify potential effects of RF EMR on human body and contributing factors that affect it 1.3 Research relevant regulations and standards that apply to

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	working with and controlling RF EMR hazards 1.4 Obtain and review RF EMR information required for work environment
2. Assess RF EMR risks	2.1 Assess potential RF EMR hazards in telecommunications work environment 2.2 Estimate likely field strength pattern of potential RF EMR hazard
3. Control RF EMR risks	3.1 Explain typical organisational controls to manage and control identified RF EMR hazards 3.2 Choose and apply appropriate RF EMR controls 3.3 Report EMR exposure that exceeds acceptable levels according to organisational work health and safety (WHS) requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.4, 2.1, 2.2, 3.1	• Uses a number of reading strategies to identify and interpret relevant information within familiar text types
Writing	3.3	• Prepares organisational WHS documentation using clear language, correct spelling and terminology
Oral Communication	3.3	• Uses clear language and concepts, and tone and pace appropriate for the audience and purpose
Numeracy	2.2	• Performs mathematical calculations to estimate, interpret and compare RF signal strength
Navigate the world of work	1.3, 1.4, 3.1-3.3	• Understands responsibility to comply with legal and regulatory requirements
Interact with others	3.3	• Identifies and takes steps to follow accepted communication practices and protocols
Get the work done	1.1-1.4, 2.1, 3.1, 3.2	• Follows clearly defined instructions and sequencing, and monitors own progress for the task, seeking assistance when necessary

© Commonwealth of Australia, 2025 Future Skills Organisation

		• Makes low-impact decisions within familiar situations, based on a range of predefined or routine solutions • Responds to predictable routine problems and implements standard or logical solutions

Assessment Requirements for ICTWHS202 Work safely in a radio frequency electromagnetic radiation environment

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- identify the effect of radio frequency (RF) electromagnetic radiation (EMR) on the human body
- locate, interpret and apply relevant information, standards and specifications for working safely with RF EMR
- identify organisational controls for exposure to RF EMR, including lock-out procedures and the use of personal protective equipment
- identify risks and safety requirements and record in a job safety analysis (JSA) sheet or safe work method statement (SWMS) or similar record sheet
- select and use appropriate processes, tools and equipment to minimise RF EMR risk
- comply with regulations, standards and organisational procedures and processes
- communicate and work effectively and safely with others.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the characteristics of RF EMR and sources of RF EMR, and state their effect on the human body
- describe the nature of work undertaken close to sources of RF EMR and identify the associated risks and hazards
- identify and summarise the regulations and standards that govern the generation of RF and EMR
- identify the relevant statutory and regulatory requirements relating to working safely with RF EMR
- describe the organisational control processes for managing exposure to RF EMR.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications – work health and safety field of work and include access to:

- induction procedures and requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- relevant regulations, standards, specifications and manuals, including industry related systems information.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTWHS204 Follow work health and safety and environmental policy and procedures

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to follow safe working practices and environmental policy in the management of a telecommunications workplace.

It applies to telecommunications staff working under supervision in a technical environment and includes school based workers, entry-level workers, trainees and apprentices, and field officers deploying broadband access networks using optical technologies and other work on live systems.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Unit Sector

Telecommunications – work health and safety

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Identify work health and safety (WHS) legislative requirements	1.1 Locate WHS legislative requirements relevant to own work, role and responsibilities 1.2 Explain own responsibilities in relation to duty of care 1.3 Identify the relationship between legislative requirements and

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	safe work practices
2 Identify construction hazards and control measures	2.1 Identify basic principles of risk management 2.2 Identify common construction hazards 2.3 Identify measures for controlling hazards and risks
3 Follow workplace procedures for hazard identification and risk control	3.1 Recognise and report hazards in work area to designated personnel according to workplace procedures 3.2 Follow WHS legislative requirements, workplace procedures and work instructions to control risks 3.3 Comply with safe work practices 3.4 Implement duty of care requirements 3.5 Complete job safety analysis (JSA) sheets or safe work method statement (SWMS) according to work requirements, including hazard identification and risk assessment 3.6 Use and complete checks of personal protective equipment according to work requirements 3.7 Assess and test for harmful gases associated with workplace
4 Follow safety requirements for working with optical fibre equipment	4.1 Identify and use safe work practices when handling optical fibre, lasers and optical connectors according to the relevant Australian Standards 4.2 Identify and use safe working practices when handling and disposing of chemical waste
5 Identify and implement WHS communication and reporting processes	5.1 Apply WHS communication processes, information and documentation 5.2 Identify designated WHS personnel 5.3 Comply with safety signs and symbols 5.4 Identify procedures and relevant authorities for reporting emergencies, incidents and injuries
6 Follow WHS incident response procedures	6.1 Follow general procedures for responding to incidents and emergencies 6.2 Identify procedures for accessing first aid 6.3 Select and use relevant personal protective equipment 6.4 Explain and apply workplace procedures for fire safety
7 Contribute to management of WHS	7.1 Raise WHS issues with designated personnel according to workplace procedures and relevant WHS legislation

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	7.2 Contribute to participative arrangements for WHS management in workplace, within organisational procedures and scope of responsibilities and competencies
8 Contribute to management of workplace environmental issues	8.1 Raise environmental issues with designated personnel according to workplace procedures and relevant environmental requirements and legislation 8.2 Contribute to participative arrangements for environmental management in workplace, within organisational procedures and scope of responsibilities and competencies 8.3 Record and report all WHS issues, risks and hazards to designated personnel
9 Identify and respond appropriately to asbestos containing materials (ACM) hazards	9.1 Identify asbestos containing materials (ACM) hazards or their likelihood 9.2 Respond to asbestos containing materials hazards or their likelihood 9.3 Report identified or suspected asbestos containing materials hazards to designated personnel according to workplace procedures
10 Identify minor traffic management	10.1 Assess traffic safety requirement of general location with respect to regulatory and enterprise requirements 10.2 Identify safe work zone around vehicle and work space using traffic cones and signs according to regulatory requirements 10.3 Identify changed traffic conditions and act in accordance
11 Recognise and respond appropriately to confined space	11.1 Identify confined space in accordance with regulatory or enterprise guidelines that can only be entered by personnel with specialist training 11.2 Refer identified confined space to appropriate personnel

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 4.1, 5.4, 6.1-6.4	• Analyses and consolidates information and data from a range of sources, against

© Commonwealth of Australia, 2025 Future Skills Organisation

		defined criteria and requirements, to identify safety requirements
Writing	1.1, 3.1, 3.5, 7.1, 7.2, 8.1-8.3, 9.3, 11.2	• Accurately records information and prepares documentation using clear language and organisational formats and protocols
Oral Communication	1.1, 7.1, 7.2, 8.1-8.3, 9.3, 11.2	• Uses clear language and concepts, and tone and pace appropriate for the audience and purpose
Navigate the world of work	1.1-1.3, 2.1-2.3, 3.1-3.6, 4.1, 5.1, 5.3, 5.4, 6.4, 7.1, 7.2, 8.1, 8.2, 9.3, 10.2, 11.1	• Builds an understanding of personal roles and responsibilities for work • Explores and implements, where identified, the implicit expectations of policies and procedures • Understands rights and responsibilities, and complies with legal and regulatory requirements
Interact with others	1.1, 7.1, 7.2, 8.1- 8.3, 11.2	• Complies with work instructions and contributes to work group discussions using accepted conventions • Recognises common differences in other people and implements basic strategies to address own reaction to these differences
Get the work done	1.1-1.3, 2.1-2.3, 3.1, 3.4-3.7, 4.1-4.2, 5.1-5.4, 6.1- 6.4, 9.1, 9.2, 9.3, 10.1-10.3, 11.1	• Follows clearly defined instructions and sequencing, and monitors own progress for the task, seeking assistance when necessary • Makes low impact decisions within familiar situations, based on a range of predefined or routine solutions • Identifies ideas for other applications and considers them in current contexts • Responds to predictable routine problems and implements standard and logical solutions

Assessment Requirements for ICTWHS204 Follow work health and safety and environmental policy and procedures

Modification History

Release	Comments
Release 2	This version first released with ICT Information and Communications Technology Training Package Version 3.1. Release created to correct numbering in performance criteria.
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- identify and apply the work health and safety (WHS) legislative and safety requirements for construction work
- identify the range of common construction hazards and procedures for the assessment of risk and application of the hierarchy of control
- apply WHS communication processes, information and documentation
- contribute to the WHS committees and support representatives
- recognise the common safety signs and symbols
- identify and apply procedures for reporting hazards, incidents and injuries
- identify and apply the general procedures for responding to incidents and emergencies, including evacuation, first aid, fire safety equipment and personal protective equipment
- recognise and report hazards to designated personnel
- follow workplace procedures necessary to control risks in the workplace
- recognise the safe handling procedures for optical fibres and laser sources.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

© Commonwealth of Australia, 2025 Future Skills Organisation

- describe the relevant Commonwealth, state and territory WHS legislation, regulations, codes of practice, and industry standards and guidance notes relevant to own workplace, role and responsibilities
- describe the differences between Commonwealth, state and territory WHS legislation and regulations
- identify and describe the common construction hazards
- identify different types of asbestos containing materials (ACM) (via photographs) and common sources of asbestos containing materials (ACM) found in the work environment and describe the controls required to mitigate risk
- identify the general construction work activities that require licences, tickets or certificates of competency
- identify and discuss the information and documentation used to maintain and inform on safe work practices
- explain the purpose of environmental control processes for the following:
  - air quality management
  - disposal and handling of hazardous and dangerous substances
  - noise pollution
  - safe disposal of fibre offcuts
  - stormwater and materials spillage
  - waste disposal
- describe the WHS responsibilities and rights of duty holders and workplace parties under environmental and WHS legislation, regulations and codes of practice, including:
  - persons in control of construction work and/or projects
  - employers and self-employed persons
  - persons in control of a business or undertaking (PCBU) and officers
  - supervisors
  - employees and workers
  - designers
  - inspectors
  - manufacturers and suppliers
- describe how individuals engage and participate in WHS activities in the workplace
- list the safety implications of working with optical fibres and equipment including:
  - hazards relating to handling of optical fibre and laser light source in the workplace
  - injuries that may occur:
    - damage to retina from lasers
    - damage to lungs from inhalation of fibre offcuts and particles
    - needle stick injury from fibres and offcuts
  - laser warning signs and labels relating to optical fibre components and equipment
  - safety requirements when handling and working with:
    - devices
    - laser light sources

© Commonwealth of Australia, 2025 Future Skills Organisation

    - optical fibre connectors
    - optical fibres
    - patchcords
- state the personal responsibilities in complying with safe work practices including those relating to:
    - housekeeping
    - identification of hazards
    - preventing bullying or harassment
    - smoking
    - use of amenities
    - use of drugs and alcohol
- discuss the principles of risk management (including hazard identification, risk assessment and control) for construction work
- state ways in which WHS is managed in the workplace, and activities required under WHS legislation including:
    - hazard identification
    - hazards that exist in the workplace
    - WHS instruction
    - preferred order of ways to control risks (known as the hierarchy of control)
    - risk assessment and controls
    - role of WHS committees and representatives
    - training and provision of WHS information
    - types of common personal protective equipment and fire safety equipment
    - types of WHS information and documentation
- describe the workplace environmental and WHS procedures relevant to various types of work being undertaken, including procedures for:
    - designated personnel responsible for WHS
    - employee and worker participation in WHS management
    - general first aid response requirements
    - general workers compensation and injury management
- describe the procedure for recognising, reporting and responding to WHS for:
    - accidents
    - dangerous occurrences
    - emergencies
    - hazards
    - incidents
    - injuries
    - fires
    - near misses
    - evacuation procedures

© Commonwealth of Australia, 2025 Future Skills Organisation

- identify and describe the function of WHS communications processes within an organisation
- discuss the purpose and process for completing job safety analysis or safe work method statements
- describe the meaning of WHS symbols found on signs and labels in the workplace
- describe the work operations to control risks
- explain the process of traffic control for a single vehicle
- describe the risks associated with confined spaces and harmful gasses, and explain the appropriate responses.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances should be typical of those experienced in the telecommunications – work health and safety field of work and include access to:

- relevant WHS legislation, regulations and codes of practice
- WHS implementation resources, such as sample forms, signs and procedures
- enterprise WHS policies and procedures
- personal protective equipment
- first aid equipment
- fire safety equipment
- relevant work areas for identification of hazards and control measures
- optic fibre cabling and equipment.

Note: Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Refer to the ICT Implementation Guide Companion Volume for recommended assessor details.

ICTWOR301 Organise resources

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to organise resources for a telecommunications project in a client environment, including preparing and evaluating tenders, organising equipment and labour resources, and client training.

It applies to individuals who may be involved in assessing installation requirements, planning and performing installations, testing installed equipment and fault finding. It involves a degree of autonomy and may include limited supervision of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – workplace effectiveness

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Organise for third party supply	1.1 Develop specifications and company criteria for material supply and purchasing, and include in appropriate tender documents 1.2 Prepare tender documents according to company policy 1.3 Identify likely material suppliers and invite to tender and supply

© Commonwealth of Australia, 2025 Future Skills Organisation

	1.4 Evaluate and accept tenders as appropriate to company policy 1.5 Negotiate price and conditions of purchase to company guidelines and satisfaction
2. Organise supply of equipment and material	2.1 Develop specifications detailing types and quantities of equipment and material 2.2 Notify supplier to deliver equipment and material to designated location within specified timeframe
3. Organise client training	3.1 Ascertain detail of training required from client and establish timeframe for client training 3.2 Determine and organise resources to undertake level of training required
4. Assess and organise labour resources	4.1 Produce estimate of total labour resources required, using standard installation times and allowing for contingencies 4.2 Determine required labour skills to meet resource allocation for planned activities 4.3 Establish workforce with required numbers and skills of staff to meet demand 4.4 Notify workforce of job requirements including work health and safety (WHS) considerations, and organise priorities to ensure agreed timeframe with client is met

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.3, 1.4	• Recognises and interprets written and visual text to determine key information and specific requirements and responsibilities
Writing	1.1-1.3, 1.5, 2.1, 2.2, 3.1, 4.4	• Develops material for a specific audience, using clear and detailed language to convey explicit information, requirements and recommendations
Oral Communication	1.3, 1.5, 2.3, 3.1, 4.1	• Participates in a verbal exchange of ideas and elicits the view and opinions of others by listening and questioning

© Commonwealth of Australia, 2025 Future Skills Organisation

Numeracy	1.1, 1.4, 1.5, 2.1, 3.1, 4.1-4.3	• Uses mathematical skills to estimate materials and resource requirements
Navigate the world of work	1.4, 1.5	• Recognises and follows company policies and guidelines when evaluating and selecting tenders and negotiating price and conditions
Get the work done	All	• Applies formal processes when planning material and labour supply and client training tasks, producing plans with logically sequenced steps, reflecting some awareness of time and resource constraints and the needs of others in the immediate vicinity • Initiates standard procedures when responding to familiar problems within labour supply context

Assessment Requirements for ICTWOR301 Organise resources

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- accurately develop tenders for customer premises equipment (CPE) products, equipment, peripherals and associated equipment
- assess tenders and provide a clear report outlining all options, including recommendations with supporting reasons
- organise supply of equipment and material to designated location to meet specified timeframe
- identify labour needs and organise labour to meet installation schedules
- determine client training needs.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline appropriate engineering and design practices and procedures
- identify appropriate tools, equipment and materials required to do the work
- identify enterprise permit procedures and recording procedures
- identify the work health and safety (WHS) practices
- outline work planning and organisation theory
- identify relevant plant and equipment operations
- identify relevant statutory requirements
- explain time management techniques.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – workplace effectiveness field of work and include access to:

- a site for organising resources
- enterprise and site-related documentation
- regulatory, supplier and equipment documentation than impacts on activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTWOR302 Organise material supply

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the, skills and knowledge required to organise material supplies for a telecommunications project, including preparing and evaluating tenders from third party suppliers.

It applies to individuals who may be involved in assessing installation requirements, planning and performing installations, testing installed equipment and fault finding. It involves a degree of autonomy and may include limited supervision of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – workplace effectiveness

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Determine material needs	1.1 Assess material needs from design plans and comply with relevant legislation, codes, regulations and standards 1.2 Check availability of required materials within existing stock 1.3 Assess availability of material from preferred suppliers

© Commonwealth of Australia, 2025 Future Skills Organisation

2. Prepare and evaluate tenders	2.1 Develop specifications and criteria for material supply and purchasing 2.2 Prepare tender documents and invite quotes from material suppliers according to enterprise policy 2.3 Evaluate tenders and ensure they are detailed in accordance with enterprise procedures
3. Organise delivery of equipment and material to site	3.1 Select types and quantities of equipment available from existing stocks and pack for distribution 3.2 Arrange delivery of equipment and material within specified timeframe 3.3 Organise third party supply according to agreed timeframe and supply agreements
4. Undertake administrative tasks	4.1 Record warranty details and distribute to relevant parties as required 4.2 Issue relevant financial documents according to enterprise policy 4.3 Record materials received in asset register according to enterprise procedures 4.4 Complete administrative requirements according to enterprise procedures

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	**Performance Criteria**	**Description**
Reading	1.1-1.3, 2.3	• Recognises and interprets written and visual text to determine key information and specific requirements and responsibilities
Writing	2.1, 2.2, 3.2, 3.3, 4.1, 4.4	• Develops material for a specific audience using clear and detailed language to convey explicit information, requirements and recommendations • Employs the expected writing and formatting conventions to meet the expectations of a specific audience
Oral Communication	2.2, 3.2, 3.3, 4.1	• Participates in a verbal exchange of ideas and elicits the view and opinions of others by listening and questioning

© Commonwealth of Australia, 2025 Future Skills Organisation

Numeracy	1.1, 2.2, 2.3, 3.1, 4.2, 4.3	• Uses mathematical skills to estimate materials and resource requirements
Navigate the world of work	1.1, 4.2-4.4	• Takes personal responsibility for adherence to relevant legislation, codes, regulations and standards, and enterprise policies and procedures
Get the work done	1.1-1.3, 2.1-2.3, 3.1-3.3	• Plans purchasing and supply of materials and equipment, accepting stated goals and aiming to achieve them efficiently • Implements actions in relation to supply and delivery as per plan, making slight adjustments if necessary, and addressing some unexpected issues • Uses a formal decision making process, setting or clarifying goals, gathering information, and identifying and evaluating several choices against a limited set of criteria in relation to assessing needs, selecting materials and equipment, and evaluating tenders

Assessment Requirements for ICTWOR302 Organise material supply

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- accurately apply the tender process according to both enterprise and legislative requirements
- comply with all related work health and safety (WHS) requirements and work practices
- determine material needs:
  - from design plans
  - from relevant databases
  - beyond current holdings
- organise supply of equipment and material to site
- record materials received on asset register.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify appropriate engineering and design practices and procedures
- outline enterprise permit and recording procedures
- describe WHS practices
- outline work planning and organisational theory
- describe relevant plant and equipment operations
- identify relevant statutory requirements
- identify time management techniques
- identify tools, equipment and materials required to do the work.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – workplace effectiveness field of work and include access to:

- a site for ordering materials
- relevant regulatory, enterprise, supplier and equipment documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTWOR303 Schedule resources

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to undertake scheduling of resources for a new installation or upgrade of an existing system for all telecommunications applications including telephony, data, video and multimedia.

It applies to individuals who may be involved in assessing installation requirements, planning and performing installations, testing installed equipment and fault finding. It involves a degree of autonomy and may include limited supervision of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – workplace effectiveness

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Scope project resources	1.1 Collate and analyse design and estimation documents from appropriate personnel for resource needs and deadlines, complying with relevant legislation, codes, regulations and standards 1.2 Consult interested parties for input to schedule
2. Schedule	2.1 Coordinate resource requirements for project to match available

© Commonwealth of Australia, 2025 Future Skills Organisation

resources for project	labour to quantity and type of work required 2.2 Schedule availability of resources to suit relevant interested parties and according to works schedules, including start and finish dates 2.3 Document and clearly communicate resources schedule to appropriate personnel for approval
3. Monitor and coordinate resources schedule according to project progress	3.1 Monitor and coordinate quantity, quality and timing of supply of each input and service according to progress of projects being undertaken 3.2 Reschedule resources based on priorities and report to appropriate person according to enterprise guidelines 3.3 Complete administrative tasks

Foundation Skills

This section describes the Foundation Skills incorporated in the performance criteria that are required for competent performance.

Skill	**Performance Criteria**	**Description**
Reading	1.1, 3.3	• Recognises and interprets written and visual text to determine key information and specific requirements and responsibilities
Writing	1.1, 1.2, 2.2, 2.3, 3.2, 3.3	• Develops material for a specific audience using clear and detailed language to convey explicit information, requirements and recommendations
Oral Communication	1.2, 2.3, 3.2	• Participates in a verbal exchange of ideas and elicits the view and opinions of others by listening and questioning
Numeracy	1.1, 2.1-2.3, 3.1, 3.2	• Uses mathematical skills to estimate resource allocation and work schedules
Navigate the world of work	1.1, 2.3, 3.2	• Takes personal responsibility for adherence to legal and regulatory responsibilities relevant to scoping of project resources • Recognises and follows explicit and implicit enterprise protocols regarding gaining approval for resources schedule and any rescheduling
Interact with others	1.2	• Understands what to communicate, with whom and how in consultations regarding input to schedule

© Commonwealth of Australia, 2025 Future Skills Organisation

Get the work done	All	• Sequences and schedules complex activities, monitors implementation and manages relevant communication when scoping, scheduling, monitoring and coordinating resources schedule • Uses systematic, analytical processes in matching labour supply to work required and monitoring progress, gathering relevant information and evaluating options against agreed criteria • Recognises and takes responsibility for addressing predictable and less predictable problems when rescheduling according to priorities

Assessment Requirements for ICTWOR303 Schedule resources

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- identify resource requirements from plans, equipment and system manuals, specifications and relevant enterprise policy
- plan and provision to meet key dates and milestones for:
  - appropriately skilled labour
  - volume and type of material
- monitor work progress, and coordinate and adjust resource requirements to meet client needs and cost parameters.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify appropriate engineering and design practices and procedures
- identify enterprise permit procedures and enterprise recording procedures
- identify relevant industrial awards and work health and safety (WHS) practices
- outline relevant plant and equipment operations
- identify relevant statutory requirements
- describe team communication processes and deadline setting
- explain time management techniques
- identify tools, equipment and materials required to do the work
- outline work planning and organisational theory.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – workplace effectiveness field of work and include access to:

- a suitable telecommunications operations site
- current equipment
- relevant enterprise and site related documentation
- relevant regulatory, supplier and equipment documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTWOR304 Manage spare parts

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to manage spare parts in all areas of telecommunications and includes maintenance of a database, stock control and dispatch.

It applies to individuals who may be involved in assessing installation requirements, planning and performing installations, testing installed equipment and fault finding. It involves a degree of autonomy and may include limited supervision of others.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Unit Sector

Telecommunications – workplace effectiveness

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Manage receipt and dispatch of spare parts	1.1 Obtain relevant legislation, codes, regulations and standards, and follow work health and safety (WHS) and environmental requirements for given work 1.2 Identify hazards and make worksite safe according to relevant safety legislation and company work practices, and use personal

© Commonwealth of Australia, 2025 Future Skills Organisation

	protective equipment 1.3 Unload, unpack and store incoming spare parts using appropriate methods and enterprise procedures, and check off delivered items on documentation 1.4 Package, label and relocate outgoing spare parts ready for dispatch using enterprise procedures 1.5 Update parts database to reflect current spare parts movements and holdings, following each dispatch or delivery, and complete any other administrative task required by enterprise
2. Store spare parts	2.1 Label spare parts using appropriate identification scheme and place in predefined storage locations 2.2 Observe antistatic precautions when handling equipment susceptible to damage by electrostatic discharge 2.3 Display, maintain and update material safety data sheets (MSDS) on site
3. Manage stock flow	3.1 Action spare parts requests by checking database for availability and location, and organise the dispatch 3.2 Monitor levels of spare parts stock by examining database reports against enterprise usage and replenishing stock when necessary 3.3 Investigate and keep records of alternative suppliers of spare parts to minimise impact of availability and cost issues with regular suppliers 3.4 Monitor spare parts with limited shelf life, and dispose of and replace when necessary 3.5 Audit spare parts holdings for ready supply of items to minimise disruptions to job completions 3.6 Update database from appropriate documentation each time a store’s transaction occurs to maintain validity of data

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	**Performance Criteria**	**Description**
Reading	1.1, 1.5, 2.2, 3.1, 3.3, 3.4	• Recognises and interprets written and visual text to determine key information, and specific requirements and responsibilities

© Commonwealth of Australia, 2025 Future Skills Organisation

Writing	1.3-1.5, 2.1, 2.3, 3.1, 3.3	• Develops material for a specific audience, using clear and detailed language to convey explicit information, requirements and recommendations • Uses expected writing conventions and forms
Oral Communication	3.1	• Participates in a verbal exchange of ideas and elicits the view and opinions of others by listening and questioning
Numeracy	1.3-1.5, 3.2-3.5	• Uses mathematical skills to estimate materials and evaluate and predict resource requirements
Navigate the world of work	1.1-1.4, 2.1-2.3	• Takes personal responsibility for adherence to legal and regulatory requirements relevant to spare parts work context, and draws attention to any issues that may affect self or others • Recognises and follows explicit and implicit company and health and safety protocols, and meets expectations associated with own role
Get the work done	All	• Takes responsibility for planning and organising own workload, identifying ways of sequencing and combining elements for greater efficiency, when managing receipt and dispatch, storage and stock flow • Uses systematic, analytical processes when monitoring and auditing, setting goals, gathering relevant information, and identifying and evaluating options against agreed criteria • Initiates standard problem solving procedures when identifying hazards within immediate context • Seeks to improve a future response through investigating alternative suppliers • Uses database systems and tools to access, organise, analyse and display information relevant to role

Assessment Requirements for ICTWOR304 Manage spare parts

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- safely apply spare parts management procedures
- efficiently arrange for storage and ordering of spare parts
- research alternative parts replacements
- accurately update spare parts management database.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain computer and database operation
- describe handling of:
  - chemicals and dangerous materials
  - sensitive electronic equipment using antistatic procedures and safeguards
- outline modern storage practices and identification of parts location
- outline work health and safety (WHS) procedures
- identify service level agreements
- describe stocktake and audit of spare parts holdings
- identify telecommunications components and assemblies.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – workplace effectiveness field of work and include access to:

© Commonwealth of Australia, 2025 Future Skills Organisation

- a site where work may be conducted
- current equipment
- a database for relevant regulations
- organisational procedures
- equipment documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTWOR305 Supervise worksite activities

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to supervise small-scale projects with a limited range of technical skills.

It applies to individuals who may be involved in assessing installation requirements, planning and performing installations, testing installed equipment and fault finding. It involves a degree of autonomy and may include limited supervision of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – workplace effectiveness

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for worksite activities	1.1 Clarify requirements of job with client and project personnel, and arrange access to site 1.2 Confirm resource requirements and allocate time and schedule activities with project manager following relevant legislation, codes, regulations and standards, site specific safety requirements and enterprise procedures

© Commonwealth of Australia, 2025 Future Skills Organisation

	1.3 Document or articulate worksite activities plan and verify with project manager 1.4 Source materials and equipment and place orders according to enterprise policy 1.5 Confirm external agency licences and approvals 1.6 Notify affected parties of works to be undertaken 1.7 Inform staff of their responsibilities on site
2. Supervise and monitor worksite activities	2.1 Direct and supervise staff in work activities, following plan 2.2 Account for staff, activities and resource usage 2.3 Recognise contingency situations and take corrective actions in consultation with project manager
3. Perform administrative tasks	3.1 Undertake administrative tasks 3.2 Prepare simple report and present to project manager

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	**Performance Criteria**	**Description**
Reading	1.2, 1.4, 1.5, 3.1	• Recognises and interprets text to determine key information and specific requirements and responsibilities
Writing	1.1-1.3, 1.5-1.7, 2.1, 2.3, 3.1, 3.2	• Develops material for a specific audience using clear and detailed language
Oral Communication	1.1-1.3, 1.5-1.7, 2.1, 2.3, 3.2	• Participates in a verbal exchange of ideas and elicits the views and opinions of others by listening and questioning
Numeracy	1.2, 2.2	• Uses mathematical skills to estimate materials and evaluate and predict resource requirements
Navigate the world of work	1.2-1.5	• Appreciates the implications of legal and regulatory responsibilities related to own work, and recognises some general legal principles applicable across work contexts • Recognises and follows explicit and implicit

© Commonwealth of Australia, 2025 Future Skills Organisation

		enterprise policies and protocols, and meets expectations associated with own role
Interact with others	1.1-1.7, 2.1-2.3	• Understands what to communicate, with whom and how when preparing, monitoring and supervising worksite activities • Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction, influencing direction and taking a leadership role when supervising and monitoring activities • Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context to identify relevant information and risks, and identify and evaluate alternative strategies and resources when preparing, supervising and monitoring worksite activities • Recognises and takes responsibility for addressing predictable and less predictable problems in familiar work contexts

Unit Mapping Information

Assessment Requirements for ICTWOR305 Supervise worksite activities

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- accurately plan work activities, prioritising and allocating tasks
- liaise effectively with client or project manager
- monitor work progress and reallocate resources to meet completion requirements
- supervise staff, ensuring compliance with work health and safety (WHS) and relevant regulations.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify appropriate tools, equipment and materials required for the work
- identify enterprise permit procedures and recording procedures
- describe WHS practices
- identify relevant plant and equipment operations
- identify relevant statutory requirements and industrial awards
- explain team communication processes
- describe typical worksite issues
- describe work planning and organisation theory.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – workplace effectiveness field of work and include access to:

© Commonwealth of Australia, 2025 Future Skills Organisation

- a telecommunications operations site
- equipment currently used in industry
- enterprise and site related documentation
- agency licences and relevant regulatory, supplier and equipment documentation that impacts on worksite activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTWOR306 Resolve technical enquiries using multiple information systems

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to remotely support the resolution of complex technical enquiries related to a product or service.

It applies to individuals in a call centre environment with a background in telecommunications and experience in client access networks and client infrastructure, including equipment and cabling, who use multiple information systems to both obtain and record client information.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – workplace effectiveness

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Initiate contact with client	1.1 Apply all relevant legislation, codes, regulations and standards in resolution process 1.2 Receive and analyse enquiry to efficiently select initial course of action

© Commonwealth of Australia, 2025 Future Skills Organisation

	1.3 Engage effectively with client to confirm initial referral details and propose initial course of action
2. Obtain information from multiple information systems	2.1 Identify information needs and sources of this information 2.2 Log on to and navigate relevant information systems efficiently 2.3 Record details of informant and enquiry in information systems according to enterprise requirements 2.4 Identify and verify information relevant to enquiry and its resolution with informant
3. Develop plan to resolve enquiry	3.1 Review critical information with informant and apply technical expertise to develop options for resolving enquiry 3.2 Consider all inputs and recommend course of action, including escalation 3.3 Negotiate suitable course of action with informant 3.4 Record details of course of action as required by enterprise information systems
4. Implement plan to resolve enquiry	4.1 Confirm negotiated course of action with informant prior to initiating actions and seek agreement on schedule of actions for longer term resolutions 4.2 Identify and initiate actions to be taken by technical support operator, informant or other parties 4.3 Contact informant to confirm success of planned actions 4.4 Record outcomes of resolution as required by information systems

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	**Performance Criteria**	**Description**
Reading	1.1, 1.2, 2.1, 2.2, 2.4, 3.1, 3.2, 4.2	• Recognises and interprets text to determine key information and specific requirements and responsibilities
Writing	1.3, 2.3, 2.4, 3.1, 3.3, 3.4, 4.1-4.4	• Prepares specific information that conveys an understanding of outcomes and alternatives, and uses terminology appropriate to present to relevant personnel

© Commonwealth of Australia, 2025 Future Skills Organisation

Oral Communication	1.3, 2.4, 3.1, 3.3, 4.1-4.3	• Participates in a verbal exchange of ideas and elicits the views and opinions of others by listening and questioning • Articulates requirements and strategies clearly, distinctively and creatively, based on techniques and language appropriate to the audience and environment
Navigate the world of work	1.1	• Takes personal responsibility for adherence to legal and regulatory requirements relevant to own work context
Interact with others	1.3, 2.4, 4.1, 4.3	• Initiates and contributes to conversations with clients, responding, explaining, clarifying and expanding on ideas and information as required
Get the work done	1.2, 1.3, 2.2, 2.3, 3.1-3.3, 4.4	• Plans and implements client enquiry resolution, accepting stated goals and aiming to achieve them efficiently • Selects from a range of pre-determined options when determining action to be taken by others, identifying and taking situational factors into account • Applies formal problem solving processes when tackling an unfamiliar problem, breaking complex issues into manageable parts and identifying and evaluating several options for action • Uses multiple digital information systems and tools to access, organise, analyse and display information relevant to role

Assessment Requirements for ICTWOR306 Resolve technical enquiries using multiple information systems

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- apply efficient computer usage to efficiently navigate relevant systems for the required information
- use effective interpersonal skills to develop a plan of action to deal with the enquiry
- develop agreement to resolve the enquiry
- accurately document all dealings for future reference and follow up resolution effectively.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain a range of conflict resolution approaches
- identify database and spreadsheet concepts
- describe enterprise escalation policies and procedures
- identify enterprise information systems
- identify legislation, codes of practice and other formal agreements that directly impact on resolution processes
- outline typical issues and challenges that occur when dealing with clients in a telecommunications environment.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – workplace effectiveness field of work and include access to:

© Commonwealth of Australia, 2025 Future Skills Organisation

- a client contact centre
- current client contact technologies
- relevant regulatory and equipment documentation that impacts on work activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTWOR307 Collect and analyse technical information

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to investigate a technical situation involving the collection and analysis of information from a variety of sources, including interviews and database systems. The technical situation under investigation may be the result of a fault or failure of a product, service or process.

It applies to individuals who undertake investigations. It may involve a degree of autonomy and some accountability for the quality of outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunication – workplace effectiveness

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Obtain recorded information	1.1 Apply all relevant legislation, codes, regulations and standards in analysis process 1.2 Verify situation to be investigated and identify appropriate sources of information for this situation 1.3 Obtain relevant information from computer systems and analyse

© Commonwealth of Australia, 2025 Future Skills Organisation

	and record information
2. Conduct simple interview	2.1 Select interviewees with correct information about matter being investigated and select interview process to suit circumstances of interviewee 2.2 Prepare for interview by performing preliminary research 2.3 Develop interview questions to identify key points for effective interview 2.4 Inform interviewee how the information will be used and observe their right to privacy 2.5 Conduct interview using effective listening and questioning techniques, and focus interviewee on information relevant to matter being investigated 2.6 Record information obtained in interview
3. Analyse information	3.1 Analyse critical information by reviewing situation being investigated 3.2 Distinguish between factual information and assumptions, and make deductions based on factual critical information 3.3 Incorporate assumptions into reasoning process where it assists in forming valid inferences 3.4 Analyse inferences from those deductions and assumptions, and produce resolution of situation being investigated
4. Implement outcomes of analysis	4.1 Identify practical actions based on inferences arising from analysis process 4.2 Implement practical actions to resolve situation 4.3 Review outcomes of practical action by assessing their impact on situation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	**Performance Criteria**	**Description**
Reading	1.1, 1.2, 3.1, 3.2, 4.1	• Recognises and evaluates text to determine key information and specific requirements and responsibilities
Writing	1.2, 1.3, 2.1, 2.3, 2.5,	• Develops material for a specific audience using clear and detailed language

© Commonwealth of Australia, 2025 Future Skills Organisation

	2.6, 3.1, 3.3, 3.4, 4.3	• Records information in a sequential manner using clear and appropriate terminology for reference purposes
Oral Communication	1.2, 2.1, 2.4, 2.5	• Participates in a verbal exchange of ideas and elicits the view and opinions of others by listening and questioning, modifying the approach according to individual responses • Presents expectations of workplace procedures, choosing language appropriate to the audience
Numeracy	3.1, 3.2	• Performs mathematical calculations to check, interpret and confirm results of analysis
Navigate the world of work	1.1	• Takes personal responsibility for adherence to legal and regulatory requirements relevant to the analysis process
Get the work done	All	• Takes responsibility for planning and organising the resolution process, identifying ways of sequencing and combining elements for greater efficiency, and considering how to link with the work of others • Applies formal processes when planning analysis, producing plans with logically sequenced steps and reflecting some awareness of time and resource constraints and the needs of others • Implements practical actions as per plan, making slight adjustments if necessary, and addressing some unexpected issues • Uses a formal decision making process in analysing information, setting or clarifying goals, gathering information, and identifying and evaluating against a limited set of criteria • Applies formal problem solving processes when tackling an unfamiliar problem, breaking complex issues into manageable parts and identifying and evaluating several options for action

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Requirements for ICTWOR307 Collect and analyse technical information

Modification History

Release	Comments
Release 2	This version first released with ICT Information and Communications Technology Training Package Version 3.1. Release created to correct numbering in performance criteria.
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- apply keyboard skills and computer literacy to accurately use a database
- demonstrate appropriate listening, questioning and interviewing techniques
- develop an accurate record of interview
- integrate information from varied sources
- draw logical inferences from information gathered and make sound recommendations for action based on inferences.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe analytical techniques appropriate for information analysis, especially deductive reasoning
- explain conflict resolution approaches
- explain database and spreadsheet concepts and enterprise information systems
- explain information types and their sources
- identify sources of legislation, codes of practice and other formal agreements that directly impact on resolution processes
- describe listening, questioning and interviewing techniques

© Commonwealth of Australia, 2025 Future Skills Organisation

- identify privacy issues
- outline the influence of human factors on information analysis, including prejudice, biases and fallacies in reasoning
- describe typical issues and challenges that occur when dealing with clients.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – workplace effectiveness field of work and include access to:

- a client contact centre
- current client contact technologies
- interview and evidence recording equipment
- relevant regulatory and equipment documentation that impacts on work activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTWOR401 Undertake a civil site survey

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to assess a site for a telecommunications project, including gathering information about the site and the project, surveying the site and evaluating the suitability of the site for the work.

It applies to individuals who work as technical staff with a range of telecommunications skills, involves a degree of autonomy and may include limited supervision of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – workplace effectiveness

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for survey	1.1 Discuss detailed requirements and arrange access to site with key stakeholders 1.2 Examine regulatory and statutory requirements associated with telecommunications project 1.3 Determine need for specialist studies for site
2. Survey land,	2.1 Survey existing buildings to assess capability of meeting changes

© Commonwealth of Australia, 2025 Future Skills Organisation

buildings and facilities	required for project 2.2 Collect information through site survey 2.3 Determine environmental impact of development 2.4 Estimate impact of prevailing weather conditions on planned changes 2.5 Assess and document building options should new structure be necessary 2.6 Assess geographical nature of land and determine barriers to signalling
3. Report findings and recommendations	3.1 Outline survey findings and recommendations to accommodate project requirements on site 3.2 Develop options to meet planned changes and associated cost-benefit data 3.3 Complete report and forward to relevant stakeholders following relevant procedures

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance

Skill	**Performance Criteria**	**Description**
Reading	1.2, 1.3, 2.3-2.5	• Evaluates complex texts to determine key information, and specific requirements and responsibilities
Writing	1.1, 2.1, 2.2, 2.4-2.6, 3.1-3.3	• Develops written and complex diagrammatic material for a specific audience using appropriate forms and conventions • Records information in a sequential manner using clear and appropriate terminology for reference purposes
Oral Communication	1.1, 3.1, 3.3	• Conveys details that incorporate evaluation of information and specialised and cohesive language in a format and style appropriate to a specific audience
Numeracy	2.1, 2.2, 2.5, 2.6, 3.2	• Uses complex mathematical equations to calculate accurately required measurements and diagrams

© Commonwealth of Australia, 2025 Future Skills Organisation

Navigate the world of work	1.2, 3.3	• Keeps up to date on changes to legislation or regulations relevant to own rights and responsibilities, and considers implications of these when negotiating, planning and undertaking telecommunications project work • Recognises and follows explicit and implicit protocols and meets expectations associated with own role in relation to communication with stakeholders
Get the work done	1.1-1.3, 2.1-2.6	• Sequences and schedules survey activities, monitors implementation and manages relevant communication with stakeholders • Uses systematic, analytical processes in planning and implementing a survey, setting goals, gathering relevant information, and identifying and evaluating options against agreed criteria • Uses analytical processes to decide on a course of action, establishing criteria for deciding between options in relation to new structures and planned changes

Assessment Requirements for ICTWOR401 Undertake a civil site survey

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- negotiate with key stakeholders, enterprise personnel, clients, community representatives, specialists and other contractors on environmental and network needs
- accurately undertake a survey of environmental conditions, land, buildings and facilities for a telecommunications project
- apply legislative requirements to the project, including relevant operational codes, work health and safety (WHS) requirements and work practices
- report survey findings, outlining options and including recommendations with supporting reasons and coverage of existing and proposed needs.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the background information required to undertake a civil site survey
- explain basic meteorology and weather conditions
- describe the features and operating requirements of construction equipment
- describe geographical barriers to signalling
- identify legislation, codes of practice and other formal agreements that impact on the work activity
- describe licensing and regulatory issues applying to a civil site survey on telecommunications sites
- outline soil testing methods and requirements
- describe
  - civil site safety practices
  - personal protective equipment for civil survey projects

© Commonwealth of Australia, 2025 Future Skills Organisation

  - WHS requirements relating to surveys and site conditions
- outline typical issues and challenges that occur on site.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – workplace effectiveness field of work and include access to:

- a site for survey
- current equipment
- relevant regulatory and enterprise documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTWOR402 Schedule equipment maintenance

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to schedule maintenance of telecommunications equipment and networks on client premises and service provider networks.

It applies to individuals with a range of telecommunications skills, involves a degree of autonomy and may include limited supervision of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Telecommunications – workplace effectiveness

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify preventative maintenance program for clients	1.1 Verify details of client system and equipment type to assess level of maintenance required 1.2 Determine type and extent of maintenance agreed and check against existing service level agreement with client 1.3 Contact client and agree on suitable time to carry out maintenance program
2. Plan maintenance and	2.1 Verify details of warranties and service agreements for

© Commonwealth of Australia, 2025 Future Skills Organisation

fault clearance activity	client equipment and advise client of charging details where warranty or agreement does not exist 2.2 Negotiate and agree on commitments and responsibility with client 2.3 Organise work priorities so that maintenance staff are available to meet scheduled commitments
3. Arrange allocation of labour resources	3.1 Evaluate expertise and competencies of staff in relation to skills required to maintain equipment noted in service level agreement 3.2 Allocate staff member with appropriate skills and competency to task to minimise risk of failure 3.3 Advise designated repair officer of responsibilities, warranties and service agreements in conducting maintenance and fault repair 3.4 Prepare schedule of maintenance program and confirm with client
4. Organise assistance to fault staff	4.1 Provide additional resources if required 4.2 Arrange delivery of additional materials and parts 4.3 Escalate fault to appropriate level when it cannot be rectified in specified timeframe 4.4 Organise product manufacturer support as appropriate

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	**Performance Criteria**	**Description**
Reading	1.1, 1.2, 2.1, 3.1	• Recognises and evaluates text to determine key information and specific requirements and responsibilities
Writing	1.1-1.3, 2.1-2.3, 3.1-3.4, 4.2-4.4	• Develops material for a specific audience using clear and detailed language • Records information in a sequential manner using clear and appropriate terminology for reference purposes
Oral	1.1-1.3, 2.1-2.3,	• Articulates requirements and strategies clearly, distinctively and creatively, based on

© Commonwealth of Australia, 2025 Future Skills Organisation

Communication	3.1-3.4, 4.2-4.4	techniques and language appropriate to the audience and environment • Participates in a verbal exchange of ideas, and elicits the views and opinions of others by listening and questioning
Get the work done	All	• Sequences and schedules maintenance activities, monitors implementation and manages relevant communication • Determines the best course of action when organising work priorities and allocating staff to tasks, with consideration of possible implications of different courses of action • Uses analytical processes to decide on a course of action in relation to organising additional resources and logistics

Assessment Requirements for ICTWOR402 Schedule equipment maintenance

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- plan and organise a preventive maintenance schedule according to vendor specified requirements and client agreements
- negotiate fault clearance arrangements with clients, applying related work health and safety (WHS) requirements and work practices
- plan and schedule fault clearance activity, allocating an appropriately skilled repair officer to rectify faults.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe electronic databases, spreadsheets and schedulers
- describe equipment to be maintained
- outline legislation, codes of practice and other formal agreements that impact on the work activity
- describe the process for the procurement of spare parts
- explain service level agreements
- outline specific WHS requirements relating to the activity and site conditions
- describe typical issues and challenges that occur on site
- outline vendor procedures.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – workplace effectiveness field of work and include access to:

- a site where equipment maintenance may be conducted
- enterprise and site-related documentation
- regulatory, enterprise, supplier and equipment documentation that impacts on work activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBCMM101 Apply basic communication skills

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to develop basic communication skills in the workplace in particular gathering, conveying and receiving information together with completing assigned written information.

It applies to individuals working under direct supervision who are developing basic skills and knowledge of workplace communication in preparation for working in a broad range of settings

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Communication – Interpersonal Communication

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Identify workplace communication procedures	1.1 Identify organisational communication requirements and workplace procedures with assistance from appropriate people 1.2 Identify appropriate lines of communication with supervisors and colleagues 1.3 Seek advice on the communication method/equipment most appropriate for the task

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
2 Communicate in the workplace	2.1 Use effective questioning, and active listening and speaking skills to gather and convey information 2.2 Use appropriate non-verbal behaviour at all times 2.3 Encourage, acknowledge and act upon constructive feedback
3 Draft written information	3.1 Identify relevant procedures and formats for written information 3.2 Draft and present assigned written information for approval, ensuring it is written clearly, concisely and within designated timeframes 3.3 Ensure written information meets required standards of style, format and detail 3.4 Seek assistance and/or feedback to aid communication skills development

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 3.1	• Reviews textual information to identify communication requirements and organisational procedures
Writing	3.2, 3.3	• Drafts simple texts using appropriate grammar, spelling and punctuation in accordance with organisational standards • Proofreads own texts for accuracy and compliance with organisational requirements
Oral Communication	1.1, 1.2, 1.3, 2.1, 2.2, 2.3, 3.2, 3.4	• Asks questions and listens to gain information or confirm understanding • Listens and follows instructions
Navigate the world of work	1.1, 1.2, 3.1, 3.3, 3.4	• Follows organisational policies and procedures and practices relevant to own role • Develops skills required to carry out own role by seeking and acting on feedback

© Commonwealth of Australia, 2025 Future Skills Organisation

Interact with others	1.1, 1.2, 1.3, 2.1, 2.2, 2.3, 3.4	• Follows instructions regarding what and how to communicate • Seeks to cooperate with others to achieve results in immediate work context
Get the work done	1.3, 2.3, 3.1, 3.2, 3.3	• Follows clearly defined instructions, seeking assistance when necessary • Uses digital technologies following instructions to enter and retrieve data

Assessment Requirements for BSBCMM101 Apply basic communication skills

Modification History

Release	Comments
Release 1	This version first released with Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- gather information about procedures, methods and equipment requirements for workplace communication, with the assistance of others
- use appropriate verbal and non-verbal skills to seek and convey information in face-to-face situations
- draft routine written documents within designated timeframes and check that the documents meet organisational requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline organisational policies, plans and procedures related to the organisation's standards or protocols for workplace communication
- describe different communication styles.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals using interpersonal communication skills in the workplace and include access to:

- office equipment
- business resources
- workplace policies and procedures relating to communication
- case studies and, where possible, real situations
- interaction with others.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessors must satisfy NVR/AQTF assessor requirements.

BSBCRT501 Originate and develop concepts

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to originate and develop concepts for products, programs, processes or services to an operational level.

It applies to individuals who develop concepts for any business or community activity or process, such as marketing and advertising campaigns, staff development programs, information technology and communication systems, radio and television programs, entertainment events, films, exhibitions and digital media products. Individuals operate with a high degree of autonomy, but collaborate with others to generate ideas and refine concepts to the point where they can be implemented.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Creativity and Innovation – Creative Thinking

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Evaluate and explore needs and opportunities	1.1 Research and evaluate existing information that informs new concept development 1.2 Where appropriate, identify and use gaps in current range of products, programs, processes or services as the catalyst for generating new ideas or concepts

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.3 Expand the potential of new ideas through exploration of opportunities beyond the obvious 1.4 Identify factors that could have an impact on ideas or concepts to be developed, including potential for commercialisation 1.5 Determine whether other players are filling identified gaps or investigating similar opportunities 1.6 Develop preliminary ideas on innovative and different ways to address needs and opportunities 1.7 In consultation with relevant stakeholders, agree on broad parameters for developing ideas and concepts to meet market requirements
2 Develop a range of creative approaches	2.1 Use a range of creative thinking techniques to generate innovative and creative concepts to address identified needs 2.2 Challenge, test and experiment with different concepts and ideas as part of a collaborative process 2.3 Evaluate concepts in terms of their suitability for the target audience or purpose, their feasibility and their commercial potential 2.4 Take account of social, ethical and environmental issues as concepts and ideas are generated and discussed 2.5 Identify resources required to achieve desired creative and innovative outcomes 2.6 Evaluate the effectiveness of different strategies for achieving desired outcomes 2.7 Select concepts or approaches that achieve required outcomes in an innovative and feasible way 2.8 Present proposed concepts or approaches in an appropriate format
3 Refine concepts	3.1 Ensure concept development process is open to ongoing refinement and testing 3.2 Seek input and feedback on concepts from relevant stakeholders 3.3 Seek specialist advice on creative and technical aspects of proposals as required 3.4 Compare concepts with best practice examples of similar products, programs, processes or services 3.5 Use a range of creative and practical criteria to determine the

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	advantages and disadvantages of different concepts 3.6 Evaluate constraints on the realisation of concepts or ideas 3.7 Refine proposals based on analysis and feedback
4 Develop concepts to an operational level	4.1 Use refined concepts as the basis for developing detailed implementation specifications 4.2 Present specifications to relevant parties for approval, funding or endorsement 4.3 Reflect on methodology used to generate concepts and ideas and note ways of improving this in the future

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	3.1, 3.7, 4.3	• Reflects and evaluates methods used to develop concepts and seeks ways to improve • Actively elicits the views and opinions of others to develop and refine ideas
Reading	1.1-1.5, 2.3, 2.6, 3.4, 3.5, 3.6, 3.7, 4.1	• Interprets and evaluates a range of complex information and considers how to develop and adopt ideas to deliver products or services at an operational level
Writing	1.1-1.4, 1.6, 2.4-2.6, 2.8, 3.2-3.7, 4.1, 4.2	• Documents findings and ideas using language and structure to suit the purpose • Develops documents designed to gain feedback from others • Prepares proposals and plans for relevant stakeholders incorporating appropriate vocabulary and grammatical structures
Oral Communication	1.7, 2.2, 2.4, 3.2, 3.3, 4.2	• Expresses thoughtful and challenging opinions using engaging language and non-verbal features • Elicits views and information from others using a range of active listening and questioning techniques
Interact with	1.7, 2.2, 2.4, 2.8,	• Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group

© Commonwealth of Australia, 2025 Future Skills Organisation

others	3.2, 3.3, 4.2	interaction and influencing direction • Selects and uses appropriate conventions and protocols when communicating with internal and external stakeholders to seek or share information
Get the work done	1.1- 1.5, 2.1-2.7 , 3.1, 3.4-3.6, 4.2, 4.3	• Plans and implements complex activities with multiple considerations, monitors implementation, and manages relevant feedback • Uses systematic, analytical processes in complex, non-routine situations to gather required information, identify and evaluate possible concepts, and select the most appropriate concept for development • Develops new and innovative ideas through exploration, analysis and critical thinking • Monitors outcomes, considering results from a range of perspectives and identifying key concepts and principles that may be adaptable to future situations

Assessment Requirements for BSBCRT501 Originate and develop concepts

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- generate concepts and ideas that provide innovative solutions to identified issues
- evaluate and test concepts and ideas
- present ideas and information to others and reflect on responses
- develop at least two concepts, substantiated and supported with sufficient information to allow implementation to occur.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must :

- describe the broad context in which concepts are being developed
- outline cultural, social and environmental issues and impacts to be considered in developing new concepts
- identify issues and requirements to commercialise the concept
- outline practical and operational issues to be considered in a specific work or community context
- describe the range of broad practical and operational issues that determine whether a concept can be implemented
- identify techniques for generating creative ideas and solutions, and for translating these ideas into workable concepts.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the creativity and innovation – critical thinking field of work and include access to:

- a full range of background information required to evaluate the operational factors that will affect the implementation of concepts
- opportunities to collaborate with others throughout the concept development process.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBCUS201 Deliver a service to customers

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to deliver all aspects of customer service at an introductory level. It includes creating a relationship with customers, identifying their needs, delivering services or products and processing customer feedback.

It applies to individuals who perform a range of routine tasks in the workplace using a limited range of practical skills and fundamental knowledge of customer service in a defined context under direct supervision or with limited individual responsibility.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Stakeholder Relations – Customer Service

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Establish contact with customers	1.1 Acknowledge and greet customer in a professional, courteous and concise manner according to organisational and legislative requirements 1.2 Maintain personal dress and presentation in line with organisational requirements 1.3 Communicate using appropriate interpersonal skills to facilitate accurate and relevant exchange of information

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.4 Maintain sensitivity to customer specific needs and any cultural, family and individual differences 1.5 Establish rapport/relationship with customer and express a genuine interest in customer needs/requirements
2 Identify customer needs	2.1 Use appropriate questioning and active listening to determine customer needs 2.2 Assess customer needs for urgency to identify priorities for service delivery 2.3 Provide customer with information about available options for meeting customer needs and assist customer to identify preferred option/s 2.4 Identify personal limitations in addressing customer needs and seek assistance from designated persons where required
3 Deliver service to customers	3.1 Provide prompt customer service to meet identified needs according to organisational requirements 3.2 Provide information regarding problems and delays, and follow-up within appropriate timeframes as necessary 3.3 Communicate with customers in a clear, concise and courteous manner 3.4 Identify opportunities to enhance the quality of service and products, and take action to improve the service whenever possible
4 Process customer feedback	4.1 Promptly recognise customer feedback and handle sensitively according to organisational and legislative requirements 4.2 Accurately record any feedback and communication between customers and the organisation according to organisational standards, policies and procedures and legislative requirements 4.3 Identify any unmet customer needs and discuss suitability of other products/services 4.4 Support customers to make contact with other services according to organisational policies and procedures

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

© Commonwealth of Australia, 2025 Future Skills Organisation

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 3.1, 4.1, 4.2, 4.4	• Understands requirements in organisational policy and procedure documents • Interprets product and service information in a range of formats to provide customer advice
Writing	4.2	• Records customer information according to organisational requirements
Oral Communication	1.1, 1.3, 1.4, 1.5, 2.1-2.4, 3.2, 3.3, 4.3	• Provides information or advice using structure and language to suit the audience • Asks questions and listens to gain information or confirm understanding
Navigate the world of work	1.1, 1.2, 3.1, 4.1, 4.2, 4.4	• Follows organisational procedures and practices relevant to own role
Interact with others	1.1, 1.3-1.5, 2.1-2.4, 3.1, 3.2, 3.3, 4.1, 4.3, 4.4	• Uses accepted communication practices to establish connections, build rapport and develop professional working relationships • Adjusts personal communication style in response to the opinions, values and particular needs of others
Get the work done	3.2, 3.4, 4.1- 4.3	• Addresses routine problems in familiar work contexts • Recognises opportunities to enhance work practices and outcomes

Assessment Requirements for BSBCUS201 Deliver a service to customers

Modification History

Release	Comments
Release 1	This version first released with Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- greet customer and establish rapport/relationship in accordance with organisational requirements
- identify customer needs using appropriate interpersonal skills
- provide prompt service to address customer needs in accordance with organisational requirements
- identify and follow up opportunities to increase the quality of service and products
- respond to and record all customer feedback according to organisational standards, policies and procedures.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and briefly describe key provisions of relevant legislation from all forms of government that apply to provision of customer services
- identify and explain workplace organisational policies and procedures relating to customer service and the customer service process.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the customer service field of work and include access to:

- office equipment and technology
- workplace documents, organisational policies and procedures for customer service

© Commonwealth of Australia, 2025 Future Skills Organisation

- examples of customer complaints and feedback
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBCUS402 Address customer needs

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0 Version created to clarify assessment conditions
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to manage an ongoing relationship with a customer over a period of time. This includes helping customers articulate their needs and managing networks to ensure customer needs are addressed.

It applies to individuals who are expected to have detailed product knowledge in order to recommend customised solutions. In this role, individuals would be expected to apply organisational procedures and be aware of, and apply as appropriate, broader factors involving ethics, industry practice and relevant government policies and regulations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Stakeholder Relations – Customer Service

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Assist customer to articulate needs	1.1 Ensure customer needs are fully explored, understood and agreed 1.2 Explain and match available services and products to customer

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	needs 1.3 Identify and communicate rights and responsibilities of customers to the customer as appropriate
2 Satisfy complex customer needs	2.1 Explain possibilities for meeting customer needs 2.2 Assist customers to evaluate service and/or product options to satisfy their needs 2.3 Determine and prioritise preferred actions 2.4 Identify potential areas of difficulty in customer service delivery and take appropriate actions in a positive manner
3 Manage networks to ensure customer needs are addressed	3.1 Establish effective regular communication with customers 3.2 Establish, maintain and expand relevant networks to ensure appropriate referral of customers to products and services from within and outside the organisation 3.3 Ensure procedures are in place to ensure that decisions about targeting of customer services are based on up-to-date information about the customer and the products and services available 3.4 Ensure procedures are put in place to ensure that referrals are based on the matching of the assessment of customer needs and availability of products and services 3.5 Maintain records of customer interaction in accordance with organisational procedures

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.3, 2.2, 2.3, 2.4, 3.2, 3.3, 3.4, 3.5	• Interprets textual information obtained from a range of sources and determines how content may be applied to individuals and to organisational requirements
Writing	1.1, 3.1, 3.2, 3.3, 3.4, 3.5	• Prepares written reports, up-to-date procedures and other workplace documentation that communicate complex information clearly and effectively
Oral	1.1, 1.2, 1.3, 2.1,	• Clearly articulates customer's needs using language suitable to diverse audiences and employs listening

© Commonwealth of Australia, 2025 Future Skills Organisation

Communication	2.2, 3.1, 3.2	and questioning techniques to confirm understanding
Navigate the world of work	3.5	• Recognises and applies organisational protocols and meets expectations associated with own work
Interact with others	1.1-1.3, 2.1, 2.2, 3.1, 3.2	• Selects and uses appropriate communication techniques to establish and maintain positive working relationships • Establishes connections and shares information with others who can contribute to effective work outcomes
Get the work done	2.3, 2.4, 3.3-3.5	• Develops and implements plans for routine and non-routine tasks recognising the importance of aligning goals and expectations to achieve outcomes • Recognises and takes responsibility for addressing predictable and non-predictable problems in own work context • Uses digital systems to organise and store information relevant to own work

Assessment Requirements for BSBCUS402 Address customer needs

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0 Version created to clarify assessment conditions
Release 1	This version first released with Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- communicate effectively with customers including
  - helping customers to articulate their needs and evaluate options
  - explaining products/services and how they match customer needs
  - establishing regular communication
  - explaining customer rights and responsibilities
- address customer's needs
- use organisational procedures to document customer satisfaction
- develop and maintain networks to support meeting customer needs
- identify potential difficulties in meeting customer needs and taking appropriate action.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain organisational procedures and standards for establishing and maintaining customer service relationships

© Commonwealth of Australia, 2025 Future Skills Organisation

- describe informed consent
- explain consumer rights and responsibilities
- describe ways to establish effective regular communication with customers
- outline details of products or services including with reference to:
  - possible alternative products and services
  - variations within a limited product and service range.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the customer service field of work and include access to:

- office equipment and resources
- business technology
- organisational policies, procedures, quality systems, manuals and guidelines for customer management
- examples of products/services and promotional strategies
- case studies and, where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBDES401 Generate design solutions

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to generate design solutions in response to a particular design need.

It applies to individuals who generate concepts and solutions in response to a design challenge in any industry context. The starting point may be an open or closed brief; a spontaneous idea; modification of an existing product, service, process or system; or a point in an ongoing design process.

This unit builds on BSBDES201 Follow a design process, and places greater focus on research, concept generation and collaboration with others as key aspects of the design process.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Design – Design Process

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Define the design challenge	1.1 Determine and evaluate user/client needs 1.2 Clarify specifications, parameters and constraints of the

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	design challenge in consultation with relevant stakeholders 1.3 Articulate essence of the design challenge in an appropriate format
2 Undertake research to inform the design solution	2.1 Source, evaluate and acknowledge information that may assist in responding to the design challenge 2.2 Consider historical, current and future perspectives and trends that might inform design solutions 2.3 Consider relevant social, economic, environmental, ethical and cultural issues that may impact design solutions 2.4 Analyse, distil and collate information to inform the development of the design solution
3 Communicate and collaborate with others	3.1 Establish and develop working relationships with key stakeholders 3.2 Seek and integrate input and ideas from others during design process 3.3 Inform key stakeholders about progress of the design and related implications 3.4 Negotiate and agree on any changed requirements or modifications
4 Generate ideas and responses to the design challenge	4.1 Reflect on and integrate ideas generated from research and consultation 4.2 Use a range of creative thinking techniques to generate different options and ideas 4.3 Apply relevant principles of functionality, ergonomics, aesthetics and sustainability to development of different options
5 Select a design solution	5.1 Develop and use a range of criteria to evaluate different options and ideas 5.2 Select a preferred solution based on agreed criteria and in consultation with relevant key stakeholders 5.3 Adjust and refine proposed design solution based on research, testing and reflection 5.4 Present proposed design solution with appropriate supporting documentation according to project requirements

© Commonwealth of Australia, 2025 Future Skills Organisation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 2.4	• Researches, collates and analyses textual information from a wide range of sources
Writing	1.2, 1.3, 2.1, 2.4, 5.1, 5.3, 5.4	• Documents ideas, sources and concepts using appropriate formats and specific language • Refines and edits work
Oral Communication	1.2, 1.3, 3.2-3.4, 5.2, 5.4	• Actively participates in verbal exchanges of ideas and elicits views and opinions of others by listening and questioning • Clarifies, explains or presents information relating to design solution using clear and specific language appropriate to audience
Numeracy	1.3, 4.3, 5.1, 5.4	• Interprets numeric data and applies mathematical calculations relevant to design solution
Navigate the world of work	2.3	• Understands nature and purpose of own role and associated responsibilities and how it contributes to the work of others in immediate work context
Interact with others	1.3, 3.1, 5.4	• Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role • Cooperates with others as part of familiar routine activities and contributes to specific activities requiring joint responsibility and accountability
Get the work done	1.1, 2.1, 2.2, 2.4, 4.1-4.3, 5.1-5.3	• Takes responsibility for planning and implementing tasks required to achieve outcomes, including those times when interaction with others is • Systematically analyses and evaluates information to aid in decision making and problem solving • Applies some basic principles of lateral thinking to generate new or innovative ideas

Assessment Requirements for BSBDES401 Generate design solutions

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop and document a design solution through research, reflection, and generation and refinement of ideas
- demonstrate effective collaboration with others in the design process.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the elements and principles of design and their application in the relevant design context
- describe key features of the wider industry, and the economic, social and historical context design solutions are being generated in
- discuss design trends and technologies including other designs and the work of other design practitioners in the relevant industry context
- identify sources of information that support the development of technical and other knowledge
- describe the materials, tools, equipment, techniques and processes used in the generation of design solutions in the relevant industry context.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the design process field of work and include access to:

- interaction with others to reflect the collaborative nature of the design process

© Commonwealth of Australia, 2025 Future Skills Organisation

- sources of information on design for the relevant industry context.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBDES402 Interpret and respond to a design brief

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to interpret and creatively respond to a design brief through the production of work.

It applies to individuals working in any industry or design context where work is prescribed by a commissioning agent/client in a brief. Individuals are required to integrate the creative, communication and planning processes that support effective response to a design brief.

Work is carried out independently, although guidance is available if required.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Design – Design Process

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Interpret design brief	1.1 Correctly interpret the specifications of design brief 1.2 Establish and clarify user or client for the proposed product/service to inform design decisions 1.3 Identify and clarify specifications, parameters or constraints of design brief in consultation with relevant colleagues

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.4 Source and evaluate information pertinent to design brief
2 Explore and develop design concept	2.1 Generate ideas for design concept through research, exploration and experimentation 2.2 Develop initial design concept consistent with design brief parameters 2.3 Evaluate and explore options for refining concept to best meet design brief parameters 2.4 Refine options and select approach which best meets design brief requirements
3 Liaise with client	3.1 Agree on communication process and frequency of communication with client 3.2 Present concepts for work at appropriate stages during design process as required 3.3 Present and explore different options and creative ideas with client when appropriate 3.4 Proactively seek and act on client feedback 3.5 Reach agreement on concept for work which complies with design brief
4 Plan production of work	4.1 Assess specific design production risks 4.2 Identify all components required to produce a prototype 4.3 Assess technical requirements for production against specified guidelines 4.4 Identify and consult with support services required for production 4.5 Produce a prototype and evaluate against design brief requirements 4.6 Analyse prototype and determine any further adjustments to production requirements 4.7 Finalise production specifications supported by accurate and complete documentation
5 Complete production of work	5.1 Collect and/or organise required components for the work 5.2 Produce or monitor the production of work ensuring all parameters of design brief are met 5.3 Accurately document work progress in a format appropriate to the nature of the design and requirements of design brief

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	5.4 Seek client approval for work where appropriate

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3, 1.4, 2.1, 4.3, 4.5	• Analyses textual information to accurately interpret job specifications
Writing	1.3, 3.2-3.5, 4.4, 4.5, 4.7, 5.3, 5.4	• Uses specific industry-related terminology and appropriate formats to develop, document and amend workplace documentation
Oral Communication	1.3, 3.1-3.5, 4.4, 5.4	• Actively participates in verbal exchanges of ideas and elicits the views and opinions of others by listening and questioning • Uses clear language to clarify, explain and present information
Numeracy	1.1, 1.3, 4.5, 5.3	• Interprets numeric data and applies mathematical calculations to produce prototype according to design specification
Interact with others	1.3, 3.1-3.5, 4.4, 5.4	• Actively identifies the requirements of important communication exchanges, selecting appropriate channels, format, tone and content to suit purpose and audience • Collaborates and negotiates with others to achieve joint outcomes
Get the work done	1.1, 1.2, 2.1-2.4, 3.2, 4.1-4.3, 4.6, 4.7, 5.1, 5.2	• Takes responsibility for planning and implementing tasks required to achieve outcomes, including those times when interaction with others is • Systematically analyses and evaluates information to aid in decision making and problem solving • Applies some basic principles of lateral thinking to generate new or innovative ideas • Understands and explicitly applies some basic principles of lateral thinking to generate new or innovative ideas

Assessment Requirements for BSBDES402 Interpret and respond to a design brief

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- articulate and document the process of developing own design practice by learning to develop new skills, ideas and a unique voice
- adjust work processes via peer feedback and self-evaluation
- identify work options and incorporate networking in career development.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list current and emerging designers in the relevant design discipline
- discuss current and emerging trends and technologies in the relevant design discipline, and the opportunities and challenges they represent
- identify professional development information and resources available to designers
- summarise sources of information relating to work opportunities and career planning.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the design process field of work and include access to materials, resources and equipment used in the development of technical and conceptual skills in the relevant design context.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBDES403 Develop and extend design skills and practice

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to develop and extend skills as a practising designer.

It applies to individuals who work as a designer, in any industry context, either independently or employed by an organisation.

Designers must continually refine, develop and evaluate their own conceptual and technical skills. Research, experimentation and collaboration are key factors in this process.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Design – Design Process

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Acquire and develop technical skills	1.1 Plan strategies to ensure the development of appropriate technical skills in design practice 1.2 Plan and use opportunities to develop and assess technical skills 1.3 Identify and use practice, feedback, discussion and evaluation

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	opportunities to continuously improve technical skills 1.4 Develop and extend technical skills through testing capabilities of materials, tools and equipment 1.5 Identify and use relevant media to stimulate technical and professional development
2 Develop conceptual skills and ideas	2.1 Engage in ongoing experimentation and exploration of different ideas and techniques 2.2 Discuss ideas with others and apply knowledge gained to inform own work 2.3 Use work practice to gain experience in a range of genres and interpretations 2.4 Study the work of others to stimulate conceptual and technical skills development 2.5 Research and share ideas across a range of design disciplines 2.6 Identify and use a range of opportunities to develop own skills and keep informed about current design practice
3 Develop own voice	3.1 Explore and experiment with new ideas in making and/or interpreting design work 3.2 Explore and use technology, where appropriate, to develop own voice and expand practice 3.3 Demonstrate own voice through design project realisation implementation
4 Evaluate own work	4.1 Seek and apply constructive criticism from others to improve own work 4.2 Evaluate own work against planned strategy for own practice 4.3 Evaluate own work in the context of work by others to extend own practice 4.4 Adjust work processes and practice as necessary to improve technical, conceptual and commercial outcomes
5 Research work opportunities	5.1 Correctly identify sources of information relating to work opportunities for designers 5.2 Identify networks and promotional opportunities for designers which may be helpful in developing career opportunities 5.3 Incorporate research results and information into own work and career planning

© Commonwealth of Australia, 2025 Future Skills Organisation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	1.1-1.5, 2.2, 2.4, 2.6, 3.2, 4.1-4.3	• Uses practical strategies to identify and implement improvements in own creative skills and technical design skills and practice
Reading	1.5, 2.4, 2.5, 5.1-5.3	• Researches and evaluates a variety of textual information from a wide range of sources
Writing	2.5, 4.1, 5.3	• Uses clear and specific language to document ideas, feedback and research results
Oral Communication	1.3, 2.2, 2.5, 4.1	• Participates in a range of verbal exchanges and presentations using appropriate tone and vocabulary to suit the audience • Uses active listening and questioning techniques to clarify and confirm understanding
Navigate the world of work	1.2, 1.3, 2.3, 4.1, 5.2	• Recognises the importance of developing technical skills and of learning from feedback and self-reflection • Begins to broaden areas of interest and focus, seeking new challenges and recognising that expertise can be adapted and applied in diverse contexts
Interact with others	2.5, 4.1, 5.2	• Begins to cultivate relationships with people with the knowledge, skills and influence to provide collaborative support
Get the work done	1.1, 1.2, 1.4, 1.5, 2.1, 2.3, 2.6, 3.1-3.3, 4.2, 4.4, 5.1	• Takes responsibility for planning and implementing tasks required to achieve outcomes, including those times when interaction with others is • Systematically analyses and evaluates information to aid in decision making and problem solving • Applies some basic principles of lateral thinking to generate new or innovative ideas • Recognises the potential of new approaches to enhance work practices and outcomes • Evaluates effectiveness of decisions on how well they meet stated goals • Understands key principles and concepts underpinning the design and operation of digital systems and applies these when seeking to understand the potential of new technology

BSBDES501 Implement design solutions

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to take a design concept or solution to the implementation stage. The outcome of work could be a completed product, object, system or service, but is more likely to be a complete or partial prototype or model for the design. The focus of the unit is on a general knowledge of design techniques and processes, and practical application to a specific design context.

It applies to individuals who implement concepts and solutions in response to a design challenge in any industry context.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Design – Design Process

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Organise resources for realising the design solution	1.1 Confirm the nature and scope of the proposed design solution 1.2 Research resources required for developing the design concept to implementation stage 1.3 Investigate different factors impacting the selection and use of resources 1.4 Select and prepare resources based on research and other

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	legislative or organisational requirements
2 Test the design solution	2.1 Experiment with a range of different techniques and processes to test the design solution 2.2 Evaluate, challenge and refine testing processes 2.3 Gain input and feedback from key stakeholders during testing 2.4 Accurately document outcomes of testing 2.5 Select final design solution based on outcomes of testing and input from others
3 Develop prototype or model	3.1 Create prototype or model based on agreed approaches 3.2 Select and organise materials, tools and equipment, where appropriate, according to chosen design solution 3.3 Expose model or prototype to quality checks and ongoing analysis, enhancement and refinement 3.4 Compare completed prototype or model against identified needs and other considerations and make adjustments as required
4 Present prototype or model	4.1 Identify key stakeholders design should be presented to 4.2 Select appropriate format for presentation based on nature of audience and design 4.3 Present prototype or model to optimise clarity, conciseness and appeal

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.4, 3.4	• Researches and accurately interprets textual information from a wide range of sources
Writing	1.2, 1.3, 2.3, 2.4, 3.4, 4.3	• Documents research, resource requirements and testing outcomes using appropriate language and formats
Oral Communication	1.1, 2.3, 4.3	• Participates in a range of verbal exchanges and presentations using appropriate tone and vocabulary to suit audience

© Commonwealth of Australia, 2025 Future Skills Organisation

		• Uses active listening and questioning techniques to gain input and feedback
Numeracy	1.1-1.3, 2.4, 2.5	• Interprets and applies numeric information relevant to design solution • Compares numerical data gathered from testing
Navigate the world of work	1.4	• Understands and adheres to organisational policies, procedures and legislative requirements during planning and implementation of design solution
Interact with others	4.3	• Recognises importance of taking audience, purpose and contextual factors into account when making decisions about what to communicate, with whom, why and how
Get the work done	1.1-1.4, 2.1, 2.2, 2.5, 3.1-3.4, 4.1, 4.2	• Sequences and schedules routine and complex activities, monitors implementation, and manages relevant communication • Applies formal problem-solving processes when responding to unpredictable issues and challenges that arise during the testing process • Makes a range of critical and non-critical decisions in relatively complex situations, taking client requirements and range of constraints into account • Creates new or innovative ideas through exploration, analysis and critical thinking

Assessment Requirements for BSBDES501 Implement design solutions

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- undertake critical analysis, testing and development of a model, prototype or aspect of a design solution to meet an identified need
- present model to key stakeholders using the most appropriate best practice methods.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the elements and principles of design and their application in relevant design context
- describe key features of the wider industry, with the economic, social and historical context for the design solution
- discuss design trends and technologies including other designs and the work of other design practitioners in the relevant context
- summarise sources of information that support the development of technical and other knowledge
- describe the technical expertise, resources, materials, tools, equipment, techniques and industry processes required for the area the design solutions are being implemented in.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the design process field of work and include access to:

- other people to reflect the collaborative nature of the design process

© Commonwealth of Australia, 2025 Future Skills Organisation

- resources required to test a design solution in a given industry context including materials, tools, equipment and expertise.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBDES502 Establish, negotiate and refine a design brief

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to work proactively with a client or commissioning organisation to develop and negotiate a design brief.

It applies to individuals working in any industry or design context where the designer plays a key role in determining the scope and nature of work required. Establishment, negotiation and refinement of a design brief requires the integration of highly-developed creative thinking, communication and planning skills in a process that may not be linear. Adaptability and effective responses to change and new ideas are crucial.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Design – Design Process

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Establish design requirements	1.1 Identify and make appropriate contact with relevant stakeholders for the design project, in addition to the client 1.2 Identify and source information and references relevant to the design project 1.3 Undertake critical analysis of sources and extract key information to inform the design project

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.4 Liaise with client and other key stakeholders to determine overall objectives and parameters for the design project 1.5 Proactively seek, review and act on information needed to inform constructive communication with client 1.6 Build trust and respect between self and client through effective communication and demonstration of professional integrity
2 Develop and refine design brief	2.1 Develop concepts and ideas for inclusion in design brief, taking account of overall objectives and parameters 2.2 Undertake own analysis of concept and challenge ideas and approaches taken to ensure responsiveness to project needs 2.3 Present ideas in an appropriate format/medium and seek feedback from key stakeholders 2.4 Use effective communication techniques to generate discussion, debate and critical analysis 2.5 Re-evaluate and refine options based on own analysis and discourse with others 2.6 Establish and agree on final nature and scope of design brief with client and accurately document details
3 Negotiate terms and conditions	3.1 Negotiate and agree terms and conditions of brief in accordance with relevant organisational and professional standards 3.2 Clarify, agree and document roles and responsibilities of those involved in the project 3.3 Confirm agreements in writing in accordance with organisational requirements 3.4 Identify the need for specialist advice when developing formal agreements or contracts, and seek appropriate assistance

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 1.3, 2.2, 2.5	• Identifies and interprets textual information from

© Commonwealth of Australia, 2025 Future Skills Organisation

		various sources to develop ideas and concepts
Writing	1.1, 1.3-1.5, 2.1-2.3, 2.6, 3.1-3.3	• Develops a range of documents using appropriate vocabulary, context and formatting for different audiences
Oral Communication	1.1, 1.4-1.6, 2.3, 2.4, 2.6, 3.1, 3.2	• Participates in discussions to elicit views of others by asking questions and listening to responses • Presents ideas and seeks feedback from others using appropriate tone, vocabulary and language structures
Numeracy	1.2-1.4	• Interprets and applies numeric information relevant to design brief
Navigate the world of work	1.2, 1.3, 3.1, 3.3, 3.4	• Identifies and adheres to organisational policies and procedures, industry standards and legislative requirements during planning and design of design solution
Interact with others	1.1, 1.4-1.6, 2.3, 2.4, 2.6, 3.1, 3.4	• Uses appropriate communication conventions and protocols to seek information from stakeholders • Uses a range of collaborative techniques to clarify and refine ideas and negotiate agreeable outcomes with others
Get the work done	1.1-1.3, 1.5, 2.1, 2.2, 2.5, 3.2	• Sequences and schedules complex activities, monitors implementation, and manages relevant communication • Applies formal problem-solving processes when responding to unpredictable issues and challenges that arise during the testing process • Makes a range of critical and non-critical decisions in relatively complex situations, taking client and organisational requirements and possible constraints into account • Generates new or innovative ideas or concepts through exploration, analysis and critical thinking

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Information and references relevant to the design brief must include consideration of:	• legislative and regulatory context • financial/budgetary information • organisational materials • technical reports/data.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Requirements for BSBDES502 Establish, negotiate and refine a design brief

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop and finalise at least TWO design briefs for a specific industry purpose
- demonstrate highly-developed interpersonal skills, self-evaluation techniques and the ability to seek expert advice when required.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss the legal issues that affect negotiations and contracts in the relevant work context
- explain the design process within the specific industry context/design discipline
- compare and contrast the scope, nature and potential variations that occur within design briefs relevant to a specific context
- identify sources of information to assist the development of design concepts within a specific industry context.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the design process field of work and include access to:

- appropriate equipment and media to communicate and present ideas and concepts
- sources of information relevant to industry context
- interaction with others to reflect the collaborative nature of the work, and communication and negotiation skills required.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessors must satisfy NVR/AQTF assessor requirements.

BSBDES601 Manage design realisation

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to manage the process of taking a design from concept to final realisation or production. It has a strong focus on planning, implementation and monitoring skills, combined with a sound knowledge of design and production issues and challenges in a given context.

It applies to individuals working in any industry context or design discipline who take responsibility for turning design concept into reality – a product or service of value to the end-user. This person could be an individual designer-maker or a designer working as part of a larger design/production team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Design – Design Process

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Plan realisation of design	1.1 Collect, analyse and maintain relevant information on the design 1.2 Discuss and agree on standards of work and monitoring requirements with appropriate stakeholders 1.3 Develop clear plan and schedule for design realisation,

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	including key roles and responsibilities linked to timelines and budget
2 Implement and monitor realisation of design	2.1 Organise and/or allocate resources to achieve realisation of design within required standards, timeframes and budget 2.2 Liaise with others involved in design realisation to ensure obligations and quality standards are met within time, budget and technical resources 2.3 Maintain accurate, relevant and complete documentation in accordance with agreed standards 2.4 Monitor process to ensure integrity of design is maintained at all times, including through the process of challenging and interrogating own design work 2.5 Promptly identify difficulties or problems that arise in relation to realisation of design and take action to rectify situation
3 Liaise and negotiate with stakeholders	3.1 Establish and maintain appropriate communication channels with relevant stakeholders 3.2 Proactively seek and provide information to facilitate effective design realisation 3.3 Adhere to agreed terms and conditions or negotiate appropriate changes in light of changed circumstances 3.4 Negotiate and agree on revisions with relevant parties in a professional manner, to enhance quality of outcome
4 Complete design process	4.1 Finalise design outcomes in accordance with terms and conditions 4.2 Seek feedback from key stakeholders on finished design and make final adjustments as agreed 4.3 Evaluate completed design in relation to own work and overall process, to inform future practice

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

© Commonwealth of Australia, 2025 Future Skills Organisation

Reading	1.1, 2.3	• Collates and analyses textual information from a range of sources relevant to the design realisation
Writing	2.3, 3.1, 3.2, 4.3	• Produces documentation using appropriate structure, language and context to articulate own ideas and positions
Oral Communication	1.2, 3.2-3.4, 4.2	• Articulates clearly using specific language and appropriate tone to convey information • Uses active questioning and listening techniques to confirm understanding
Numeracy	1.3, 2.1	• Interprets and uses numeric information in budgets and to determine work schedules
Navigate the world of work	2.3, 3.3, 4.1	• Works independently and collectively within broad parameters, with a strong sense of responsibility and ownership of plans, decisions and outcomes • Adheres to organisational policies and procedures
Interact with others	1.2, 2.2, 3.1, 3.2, 3.4	• Recognises the importance of taking audience, purpose and contextual factors into account when making decisions about what to communicate, with whom, why and how • Fosters a collaborative culture within own sphere of influence, facilitating a sense of cohesion and commitment
Get the work done	1.1, 1.3, 2.1, 2.4, 2.5	• Takes responsibility for planning and organising tasks to meet workplace deadlines, including those tasks that require liaison with other people • Applies formal problem-solving processes when responding to unpredictable issues and challenges that arise during the design process • Uses each experience to reflect on how variables impact outcomes to inform future practices

Assessment Requirements for BSBDES601 Manage design realisation

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- produce a design according to all brief requirements
- demonstrate highly-developed interpersonal and negotiation skills to deliver the finished product.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline key responsibilities of relevant personnel in this context
- describe best practices when dealing with setbacks in the production process
- explain production processes in a particular industry context or discipline including required materials, tools and equipment.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the design process field of work and include access to:

- resources, tools, materials and equipment required for realising a design in a specific context
- a design concept that the candidate can take to realisation stage
- other people to reflect the collaborative nature of the work.

Assessors must satisfy NVR/AQTF assessor requirements.

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to research and critically evaluate global design trends. The focus is on research and analysis of information and ideas at a complex level, plus the evaluation and extension of the individual's professional skills.

It applies to individuals who need to maintain a current and comprehensive knowledge of global design trends to inform their own professional practice. Although predominantly for designers, this unit may also be relevant to those who work in related management, marketing and production areas.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Design – Design Process

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Research design trends	1.1 Analyse and select formal and informal research strategies to source information on global design trends 1.2 Identify and explore new and alternative sources 1.3 Evaluate the credibility of information gathered and ensure research scope is sufficiently broad

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
2 Analyse design trends to inform own practice	2.1 Use information to challenge and extend own perspectives and ways of thinking 2.2 Examine and assess implications and consequences of design trends on own work 2.3 Use critical analysis to identify creative or commercial opportunities presented by emerging trends and technologies 2.4 Develop systems to identify and respond to future opportunities
3 Develop and articulate positions and ideas	3.1 Develop substantiated positions and ideas on global design trends 3.2 Generate informed discussion, debate and critical analysis with peers and colleagues 3.3 Use debate and feedback to challenge and refine own positions
4 Extend own design skills	4.1 Proactively identify and use opportunities presented by research to extend own design skills 4.2 Re-evaluate and refine approaches to work in the context of current and emerging trends 4.3 Use practice, discussion and ongoing evaluation to continuously improve skills

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	4.1-4.3	• Plans and implements strategies to improve and extend own knowledge and skills
Reading	1.1-1.3, 2.1, 2.2	• Analyses and synthesises complex and varied information from a range of sources
Writing	2.4	• Documents methods for identifying future opportunities using vocabulary and structure appropriate to context and purpose
Oral Communication	3.2, 3.3, 4.3	• Elicits the views others by participating in critical discourse and debate on conceptual and technical

© Commonwealth of Australia, 2025 Future Skills Organisation

		design trends • Uses active listening techniques to gain input and feedback
Navigate the world of work	2.3	• Keeps abreast of trends and issues, appreciating the world of work is dynamic, with changing needs and priorities, and that career development is not a linear process that can be closely controlled
Get the work done	1.1-1.3, 2.1-2.4, 3.1, 3.3, 4.2	• Takes responsibility for planning and organising tasks required to conduct required research, including how to link with the work of others • Keeps abreast of innovations and good practice beyond own context, borrowing, adapting, combining and redesigning for own purposes • Uses reflection and feedback from others to evaluate outcomes to inform future practices • Actively identifies digital systems, devices and applications with potential to meet current and/or future needs

Assessment Requirements for BSBDES602 Research global design trends

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- conduct research on a complex range of design issues, trends and ideas
- document the analysis, critique and synthesis of complex sources to develop own positions and ideas
- use opportunities to refine own design skills.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe broad global design trends that apply to all design disciplines
- discuss the business implications/consequences of adopting trends and emergent technologies
- compare and contrast different research methodologies and options
- outline sources of information on global design, design trends and broader references that may inform emerging and innovative design practice
- critique specific current and emerging design technologies and trends (at a global level) in at least one area of design.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the design process field of work and include access to a current and varied range of familiar and unfamiliar information sources.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessors must satisfy NVR/AQTF assessor requirements.

BSBEBU401 Review and maintain a website

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to undertake data analysis, review website content, and update and maintain a website.

It applies to individuals who have knowledge of the relationship between a website and the core functions of an organisation. They also have working knowledge and skills to perform basic updates to website content. They may provide administrative support within an organisation or be other individuals who have been delegated this responsibility.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Information and Communications Technology – E-Business

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Review website content and use	1.1 Monitor and analyse customer and user feedback in accordance with organisational timelines 1.2 Analyse automatically collected website data and identify trends 1.3 Make recommendations on changes to website and its content in response to feedback and data analysis, and approve changes scheduled for implementation

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.4 Review cost implications of the recommended changes to determine their viability
2 Update website	2.1 Replace superseded and inaccurate information with current information and add additional material in accordance with organisational requirements 2.2 Follow protocols for ensuring the accuracy and authenticity of information 2.3 Remove services no longer available or required and add new ones in accordance with organisational requirements 2.4 Check offline information against that posted on the website and rectify any discrepancies in accordance with organisational timelines 2.5 Follow security procedures for updating the website
3 Carry out non-technical site maintenance	3.1 Analyse user feedback to confirm website faults are not user issues 3.2 Rectify faults and make improvements to website in response to user feedback approved by the organisation 3.3 Add new web pages and/or active links and remove redundant pages and links in accordance with organisational requirements 3.4 Make website changes in response to changes in marketing strategy, in accordance with organisational requirements and consideration of cost benefits

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.4, 2.1, 2.3-2.5, 3.1-3.4	• Recognises text within job specifications and work processes related to the outcomes of the job
Writing	1.3, 1.4, 2.1-2.5, 3.2-3.4	• Records key information related to the outcomes of the job

© Commonwealth of Australia, 2025 Future Skills Organisation

Oral Communication	1.3, 3.2	• Makes recommendations on changes to website content • Analyses and responds to user feedback
Numeracy	1.4	• Uses basic numeracy skills to determine cost implications and viability
Navigate the world of work	1.1-1.4, 2.1-2.5, 3.1-3.4	• Accepts responsibility and ownership for the task and makes decisions on completion parameters and the need to coordinate with others • Takes personal responsibility for following security procedures and meeting organisational requirements
Interact with others	1.3, 3.2	• Selects and uses appropriate conventions and protocols when communicating with clients and users in a range of work contexts
Get the work done	1.1-1.4, 2.1-2.5, 3.1-3.4	• Takes responsibility for planning, sequencing tasks for efficient and effective organisational outcomes • Uses problem solving processes to identify and analyse technical issues • Contributes to continuous improvement of website by applying basic principles of analytical thinking • Understands the purposes, specific functions and key features of common digital systems and tools and operates them effectively to complete tasks in accordance with security requirements

Assessment Requirements for BSBEBU401 Review and maintain a website

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- analyse data to make recommendations about changes to website
- update web pages according to organisational requirements
- analyse data, identify and resolve faults, errors and/or complaints on website.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and review knowledge of key provisions of relevant legislation, regulations, and standards and codes of practice that may affect aspects of business operations
- explain basic principles of website design and maintenance
- outline online security issues.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the information and communications technology – e-business field of work. This includes access to:

networked computers

- computers and office equipment
- industry software packages
- documentation relating to analysis and strategies/policies for implementation.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBFIM501 Manage budgets and financial plans

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to undertake financial management within a work team in an organisation. It includes planning and implementing financial management approaches, supporting team members whose role involves aspects of financial operations, monitoring and controlling finances and reviewing and evaluating effectiveness of financial management processes.

It applies to managers in a wide range of organisations and sectors who have responsibility for ensuring that work team financial resources are used effectively and are managed in line with financial objectives of the team and organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Finance - Financial Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Plan financial management approaches	1.1 Access budget/financial plans for the work team 1.2 Clarify budget/financial plans with relevant personnel within the organisation to ensure that documented outcomes are achievable, accurate and comprehensible 1.3 Negotiate any changes required to be made to budget/financial

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	plans with relevant personnel within the organisation 1.4 Prepare contingency plans in the event that initial plans need to be varied
2 Implement financial management approaches	2.1 Disseminate relevant details of the agreed budget/financial plans to team members 2.2 Provide support to ensure that team members can competently perform required roles associated with the management of finances 2.3 Determine and access resources and systems to manage financial management processes within the work team
3 Monitor and control finances	3.1 Implement processes to monitor actual expenditure and to control costs across the work team 3.2 Monitor expenditure and costs on an agreed cyclical basis to identify cost variations and expenditure overruns 3.3 Implement, monitor and modify contingency plans as required to maintain financial objectives 3.4 Report on budget and expenditure in accordance with organisational protocols
4 Review and evaluate financial management processes	4.1 Collect and collate for analysis, data and information on the effectiveness of financial management processes within the work team 4.2 Analyse data and information on the effectiveness of financial management processes within the work team and identify, document and recommend any improvements to existing processes 4.3 Implement and monitor agreed improvements in line with financial objectives of the work team and the organisation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 2.3, 3.1-3.4, 4.2, 4.3	• Interprets and analyses information to determine activities required

© Commonwealth of Australia, 2025 Future Skills Organisation

Writing	1.1, 1.4, 4.1-4.3	• Records information in correct forms and prepares materials which convey detailed and factual content in accordance with internal procedures
Oral Communication	1.2, 1.3, 2.1-2.3	• Presents information about financial issues and requirements to a range of audiences using structure and language to suit the audience • Uses active listening and questioning to clarify information and to confirm understanding
Numeracy	1.1-1.3, 2.1-2.3, 3.1-3.4, 4.1-4.3	• Uses a wide range of mathematical calculations to analyse numeric information in budgets or financial plans
Navigate the world of work	2.2, 3.3, 3.4, 4.3	• Recognises, understands and adheres to organisational requirements in undertaking own work
Interact with others	1.2, 1.3, 2.1, 2.2, 3.1, 2.3, 4.2, 4.3	• Uses a range of strategies to connect, collaborate and cooperate with other work colleagues in activities requiring collective effort and diverse skills and knowledge
Get the work done	1.1, 1.4, 2.3, 3.1-3.4, 4.1-4.3	• Uses logical processes in planning, implementing and evaluating complex tasks and developing alternative strategies in achieving goals and timelines • Uses a range of digital technologies to access, filter, compile, integrate and logically present complex information from multiple sources

Assessment Requirements for BSBFIM501 Manage budgets and financial plans

Modification History

Release	Comments
Release 1	This version first released with Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- use financial skills to work with and interpret budgets, ageing summaries, cash flow, petty cash, Goods and Services Tax (GST), and profit and loss statements
- communicate with relevant people to clarify budget/financial plans, negotiate changes and disseminate information
- prepare, implement and modify financial contingency plans
- monitor expenditure and control costs
- support and monitor team members
- report on budget and expenditure
- review and make recommendations for improvements to financial processes
- meet record keeping requirements for the Australian Taxation Office (ATO) and for auditing purposes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe basic accounting principles
- identify and explain the relevant legislation and current requirements of the Australian Taxation Office, including the Goods and Services Tax (GST)
- explain the key requirements for financiall record keeping and auditing
- describe the principles and techniques involved in managing:
  - budgeting
  - cash flows
  - electronic spreadsheets

© Commonwealth of Australia, 2025 Future Skills Organisation

- GST
- ledgers and financial statements
- profit and loss statements.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the financial management field of work and include access to:

- resources and documentation used in the workplace
- workplace policies and procedures
- workplace budgets and financial plans
- business technology
- case studies and, where available, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBINN601 Lead and manage organisational change

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes skills and knowledge required to determine strategic change requirements and opportunities; and to develop, implement and evaluate change management strategies.

It applies to managers with responsibilities that extend across the organisation or across significant parts of a large organisation. They may have a dedicated role in human resources management, human resources development, or work in a strategic policy or planning area.

The unit takes a structured approach to change management and applies to people with considerable work experience and organisational knowledge.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Creativity and innovation – innovation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Identify change requirements and opportunities	1.1 Identify strategic change needs through an analysis of organisational objectives 1.2 Review existing policies and practices against strategic objectives to identify where changes are required

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.3 Monitor the external environment to identify events or trends that impact on the achievement of organisational objectives 1.4 Identify major operational change requirements due to performance gaps, business opportunities or threats, or management decisions 1.5 Review and prioritise change requirements or opportunities with relevant managers 1.6 Consult stakeholders, specialists and experts to assist in the identification of major change requirements and opportunities
2 Develop change management strategy	2.1 Undertake cost-benefit analysis for high priority change requirements and opportunities 2.2 Undertake risk analysis and apply problem solving and innovation skills to identify barriers to change and agree and record mitigation strategies 2.3 Develop change management project plan 2.4 Obtain approvals from relevant authorities to confirm the change management process 2.5 Assign resources to the project and agree reporting protocols with relevant managers
3 Implement change management strategy	3.1 Develop communication or education plan, in consultation with relevant groups and individuals, to promote the benefits of the change to the organisation and to minimise loss 3.2 Arrange and manage activities to deliver the communication or education plans to relevant groups and individuals 3.3 Consult with relevant groups and individuals for input into the change process 3.4 Identify and respond to barriers to the change according to risk management plans 3.5 Action interventions and activities set out in project plan according to project timetable 3.6 Activate strategies for embedding the change 3.7 Conduct regular evaluation and review and modify project plan where appropriate to achieve change program objectives

© Commonwealth of Australia, 2025 Future Skills Organisation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 2.2	• Interprets detailed information that may deal with complex ideas related to issues both within and outside the workplace context
Writing	2.1, 2.2, 2.3, 2.4, 3.1	• Uses clear and precise language to develop information about objectives, requirements, activities and recommendations • Develops complex plans and strategies in appropriate format for the audience and purpose
Oral Communication	1.6, 2.2, 2.4, 2.5, 3.3	• Discusses and seeks information using appropriate structure and language for the particular audience • Uses questioning and active listening to clarify or confirm understanding
Numeracy	2.1, 2.3, 2.3	• Interprets, analyses and presents numeric/financial information in complex documents
Navigate the world of work	1.1-1.6, 2.4, 2.5, 3.1, 3.2	• Takes a lead role in the development of organisational strategic goals and associated roles and responsibilities
Interact with others	1.5, 1.6, 2.4, 2.5, 3.1-3.3	• Uses a variety of communication tools and strategies to build and maintain effective working relationships • Uses inclusive and collaborative techniques to seek feedback, negotiate and consult with a range of stakeholders
Get the work done	1.1-1.5, 2.1-2.5, 3.1, 3.2, 3.4-3.7	• Plans, organises and implements activities required to achieve strategic priorities and outcomes, including consulting with others and sequencing events to minimise uncertainty for staff • Uses problem-solving skills to identify and analyse issues or barriers, and develop responses • Develops new and innovative ideas through exploration and lateral thinking

Assessment Requirements for BSBINN601 Lead and manage organisational change

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- analyse and interpret information about the organisation's internal and external environment and consult with stakeholders to identify requirements and opportunities for changes that support organisational objectives
- prioritise opportunities for changes with input from managers
- develop a change management project plan for the priority changes incorporating resource requirements, risk management and timelines
- develop strategies to communicate or educate the changes and embed them
- obtain approvals and agree reporting protocols with relevant managers and implement the plan including addressing barriers to change
- review and evaluate the change management project plan and modify as needed to achieve objectives.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the change management process or cycle and strategies for communicating and embedding change
- explain how organisational behaviour and the external environment can impact on change strategies
- describe the components of a change management project plan
- list potential barriers to change and explain possible strategies to address barriers.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the creativity and innovation and include access to:

- workplace documentation and resources
- office equipment, materials and software packages
- case studies or, where available, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBINN801 Lead innovative thinking and practice

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to generate, lead and sustain innovative organisational thinking and practice.

It applies to individuals who initiate and lead innovation in any industry or community context. Each organisation's thinking and practice will be different depending on its core business, purpose, size, complexity and broader operating context.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Creativity and Innovation – Innovation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Generate innovative thinking and creativity	1.1 Research and use a range of techniques and tools to generate new ideas and thinking 1.2 Research and analyse trends shaping organisation's current and future thinking and practice 1.3 Introduce and promote creative thinking techniques to foster personal and team innovation 1.4 Evaluate overall context for individual and collective

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	innovative thinking and creativity 1.5 Research and analyse specific conditions for innovation and issues that impact on individual and collective innovative thinking and creativity 1.6 Research and review innovation drivers and enablers
2 Lead innovative practices	2.1 Develop personal leadership style to model positive innovative thinking and practice 2.2 Review, challenge and refine own style and practice in relation to modelling and supporting innovation 2.3 Assess and determine the requirements to promote sustainable innovative activity for the operational context and people involved 2.4 Devise and implement most appropriate means to promote knowledge transfer 2.5 Identify, evaluate and manage risks associated with innovation within an organisation
3 Generate and support a culture of innovation	3.1 Introduce and promote innovative practices, processes, products or services appropriate to audience and organisational requirements 3.2 Establish ways to capture, communicate and share innovative ideas and practices 3.3 Initiate and foster communication, consultation and team development approaches that support innovation 3.4 Identify, assess and provide adequate resources for innovation to occur 3.5 Develop and apply strategies to foster a workplace culture capable of encouraging innovation 3.6 Establish mechanisms at system and process level that can support innovation
4 Sustain innovative thinking and practice	4.1 Develop strategies to make innovation an integral part of organisational activity 4.2 Develop and monitor processes to ensure ongoing awareness of individual and collective contributions to innovative thinking and practice 4.3 Analyse potential barriers and risks to innovation and devise strategies to respond 4.4 Analyse and reflect on innovation performance as a basis for developing strategies for improvement

© Commonwealth of Australia, 2025 Future Skills Organisation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	2.1, 2.2, 4.4	• Evaluates and reflects on personal effectiveness to develop strategies to enhance own performance
Reading	1.1, 1.2, 1.5, 1.6	• Identifies, analyses, interprets and evaluates visual and textual information from a range of sources to identify innovation strategies, practices and trends
Writing	1.1, 1.2, 1.5, 1.6, 3.2	• Uses clear and precise language to document research findings for reference purposes • Develops complex plans, strategies and systems to integrate innovation into the organisation using appropriate formats for the audience and purpose
Oral Communication	1.3, 3.2, 3.3, 3.5	• Discusses, presents and seeks information using appropriate structure and language for the particular audience • Uses questioning and active listening to encourage discussion and to clarify or confirm understanding
Numeracy	1.1, 1.2, 1.5, 1.6, 3.2	• Interprets, analyses and presents numeric/financial information in complex documents
Navigate the world of work	2.1, 2.2, 2.3, 2.5, 3.1, 3.5, 4.1	• Understands how own role meshes with others and contributes to broader work goals • Leads in the development of strategies to integrate innovative practices into the organisation
Interact with others	1.3, 3.2, 3.3, 3.5	• Uses a variety of relevant communication tools and strategies to build and maintain effective working relationships • Uses inclusive and collaborative techniques to communicate, negotiate and consult effectively with a range of stakeholders • Actively seeks the perspectives of others as part of work role
Get the work done	1.1,1.2, 1.3-1.6, 2.3-2.5, 3.2-3.6, 4.1-4.4	• Plans, develops, implements and monitors practical strategies to introduce and support innovation in the workplace • Develops new and innovative ideas through exploration, evaluation, analysis and critical thinking

© Commonwealth of Australia, 2025 Future Skills Organisation

		• Uses formal analytical and lateral thinking techniques to identify issues, generate and evaluate possible solutions, and select most appropriate option

Assessment Requirements for BSBINN801 Lead innovative thinking and practice

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- use various techniques and tools to stimulate creative or innovative thinking
- research, review and critically analyse trends in thinking and emerging practices as they relate to an organisation's current thinking and practices
- develop own capacity to lead innovative thinking and practice in an organisational context
- complete a workplace project or case study to demonstrate a comprehensive understanding and application of key concepts, current theories and processes for introducing, communicating, promoting, supporting and sustaining innovative thinking and practices in an organisational context.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- compare and contrast current and past theories and thinking about innovation
- explain how theory and thinking on innovation and creativity can contribute to applied practice
- discuss the impact of leadership style on innovation in organisations, including how specific approaches may encourage or inhibit innovation
- discuss the relevance of organisational and industry context on innovation
- analyse the internal and external conditions or factors that impact on organisational innovation
- outline strategies for identifying, assessing and managing risks associated with innovation
- provide examples of innovation drivers in an organisation
- provide examples of innovation enablers in an organisation

© Commonwealth of Australia, 2025 Future Skills Organisation

- list and describe mechanisms at system or process level that can support innovative practices
- discuss typical challenges and barriers to innovation within an organisation and ways of overcoming these challenges and barriers.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the creativity and innovation field of work and include access to:

- workplace documentation and resources
- office equipment and materials
- case studies or, where available, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBLDR402 Lead effective workplace relationships

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit defines skills, knowledge and outcomes required to use leadership to promote team cohesion. It includes motivating, mentoring, coaching and developing the team and forming the bridge between the management of the organisation and team members.

This unit applies to team leaders, supervisors and new or emerging managers where leadership plays a role in developing and maintaining effective workplace relationships. It applies in any industry or community context.

At this level work will normally be carried out within routine and non-routine methods and procedures, which require planning and evaluation and leadership and guidance of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership - Leadership

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Collect, analyse and communicate information and ideas	1.1 Collect relevant information from appropriate sources and analyse and share with the work team to improve work performance 1.2 Communicate ideas and information in a manner which is appropriate and sensitive to the cultural and social diversity of the

Assessment Requirements for BSBLDR402 Lead effective workplace relationships

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- access and analyse information to achieve planned outcomes
- apply techniques for resolving problems and conflicts and dealing with poor performance within organisational and legislative requirements
- review and improve workplace outcomes in consultation with relevant personnel
- adjust interpersonal style and communications to respond to cultural and social diversity
- apply relationship management and communication skills with a range of people that:
  - demonstrate integrity, respect, empathy and cultural sensitivity and promote trust
  - forge effective relationships with internal and/or external people and help to maintain these networks
  - encourage participation and foster contribution of and respect for ideas and feedback
  - provide support to colleagues to resolve difficulties.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- give examples of how work relationships, and the cultural and social environment, can support or hinder achieving planned outcomes
- explain techniques for developing positive work relationships and building trust and confidence in a team including interpersonal styles, communications, consultation, cultural and social sensitivity, networking
- explain the impact of legislation and organisational policies on workplace relationships
- describe a range of methods and techniques for communicating information and ideas to a range of stakeholders
- outline problems solving methods

© Commonwealth of Australia, 2025 Future Skills Organisation

- explain methods to resolve workplace conflict
- explain methods to manage poor work performance
- explain how to monitor, analyse and introduce ways to improve work relationships.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBLDR803 Develop and cultivate collaborative partnerships and relationships

Modification History

Release	Comments
Release 2	This version first released with BSB Business Services Training Package Version 1.1. Version created to correct mapping table information
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to establish collaborative partnerships and relationships with business and industry stakeholders.

This unit covers communicating to influence others, cultivating new and existing partnerships, establishing positive collaborative relationships, leading the establishment of a partnership program and establishing reporting mechanisms.

It applies to people who use cognitive and creative skills to review, critically analyse, consolidate and synthesise knowledge, in order to generate ideas and provide solutions to complex problems. They use communication skills to demonstrate their understanding of theoretical concepts and to transfer knowledge and ideas to others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership - Leadership

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	**PERFORMANCE CRITERIA**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Communicate to influence relevant individuals and stakeholders	1.1 Generate trust, confidence and support from relevant stakeholders by demonstrating a high standard of personal performance and conduct 1.2 Implement communication strategies to represent the organisation positively to media, local community and stakeholders 1.3 Make decisions in consultation with relevant stakeholders and relevant individuals where appropriate 1.4 Use a range of influencing strategies to increase commitment from staff and stakeholders to achieve organisational requirements and to contribute to desired culture 1.5 Undertake selected community and/or professional engagements that project a positive image of the organisation to the broader community and stakeholders
2. Cultivate new and existing partnerships with stakeholders	2.1 Establish outcomes to be achieved from the partnership 2.2 Analyse and apply models for effective consultation and collaboration within partnerships 2.3 Cultivate collaborative communities and partnerships through application of a range of communication solutions 2.4 Forge relationships, collaborative communities or partnerships between organisations
3. Establish positive collaborative relationships	3.1 Establish processes that contribute to the creation and maintenance of a positive culture that embraces collaboration 3.2 Establish processes to resolve conflict in a fair, equitable and collaborative manner 3.3 Organise and allocate work activities in a cost effective and equitable manner with clear, quantifiable and agreed performance standards 3.4 Encourage staff to undertake activities that develop their personal competence and performance 3.5 Empower individuals to develop their own ways of working within agreed boundaries of competence, cultural, diversity and organisational and legal requirements 3.6 Establish indicators and feedback processes that can be used to evaluate the health of the work environment
4. Lead establishment of a	4.1 Identify and address relevant organisational policies and

Modification History

Release	Comments
Release 2	This version first released with BSB Business Services Training Package Version 1.1. Version created to correct mapping table information
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- demonstrate and model skills and knowledge to foster partnerships, conduct stakeholder consultation and use strategic and personally enhancing communication skills
- develop collaborative approaches to enhance individual, team and organisational outcomes
- initiate and implement partnerships in line with relevant regulatory, employment and organisational requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the legislative and regulatory context of the organisation
- outline the organisation's mission, purpose, values, objectives and strategies
- explain techniques that cultivate collaborative relationships and partnerships
- describe data collection methods
- explain the external context including social, political, economic and technological developments
- explain emotional intelligence and its relationship to individual and team effectiveness
- explain organisational transformation and the management of the stages of change.

BSBMGT401 Show leadership in the workplace

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to lead teams and individuals by modelling high standards of conduct to reflect the organisation's standards and values.

It applies to individuals who are making the transition from being a team member to taking responsibility for the work and performance of others and providing the first level of leadership within the organisation. These managers have a strong influence on the work culture, values and ethics of the teams they supervise.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Model high standards of management performance and behaviour	1.1 Ensure management performance and behaviour meets the organisation’s requirements 1.2 Ensure management performance and behaviour serves as a positive role model for others 1.3 Develop and implement performance plans in accordance with organisation’s goals and objectives 1.4 Establish and use key performance indicators to meet

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	organisation's goals and objectives
2. Enhance organisation's image	2.1 Use organisation's standards and values in conducting business 2.2 Question, through established communication channels, standards and values considered to be damaging to the organisation 2.3 Ensure personal performance contributes to developing an organisation which has integrity and credibility
3. Make informed decisions	3.1 Gather and organise information relevant to the issue/s under consideration 3.2 Facilitate individual's and team's active participation in decision-making processes 3.3 Examine options and assess associated risks to determine preferred course/s of action 3.4 Ensure decisions are timely and communicate them clearly to individuals and teams 3.5 Prepare plans to implement decisions and ensure they are agreed by relevant individuals and teams 3.6 Use feedback processes effectively to monitor the implementation and impact of decisions

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3, 1.4, 2.1, 3.1, 3.3, 3.5, 3.6	• Gathers, interprets and analyses text relating to organisational goals, standards and values to aid planning and decision making
Writing	1.3, 1.4, 3.1, 3.3, 3.5, 3.6	• Records and reports key information related to the organisational goals, standards and objectives • Researches, plans and prepares documentation for relevant stakeholders
Oral Communication	1.2, 1.3, 2.2, 2.3, 3.2, 3.4, 3.5, 3.6	• Uses appropriate structure and language when developing performance plans, or when seeking and providing information about organisational goals and

© Commonwealth of Australia, 2025 Future Skills Organisation

		objectives
Numeracy	1.4	• Identifies and comprehends mathematical information in familiar texts to establish key performance indicators
Navigate the world of work	1.1, 1.2, 1.3, 1.4, 2.1, 2.3	• Understands how own role meshes with others and contributes to broader work goals • Monitors adherence to organisational policies and procedures and considers own role in terms of its contribution to broader goals of the work environment
Interact with others	1.2, 1.3, 2.2, 2.3, 3.2, 3.4, 3.5, 3.6	• Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective outcomes • Recognises the importance of taking audience, purpose and contextual factors into account when making decisions about what to communicate with whom, why and how
Get the work done	1.1, 1.3, 1.4, 3.1, 3.2, 3.3, 3.4, 3.5, 3.6	• Develops plans to manage relatively complex, non-routine tasks with an awareness of how they contribute to longer term operational and strategic goals • Uses systematic, analytical processes in complex, non-routine situations, setting goals, gathering relevant information and identifying and evaluating options against agreed criteria • Evaluates effectiveness of decisions in terms of how well they meet stated goals

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Organisation's standards and values must be identified by considering:	• explicitly stated values • values that are implied by the way the organisation conducts its business.

Assessment Requirements for BSBMGT401 Show leadership in the workplace

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify the organisation's standards and values, whether stated or implied by the way the organisation conducts its business
- evaluate own behaviour and performance against these and adjust to achieve required standards
- develop and implement performance plans and key performance indicators (KPIs) to meet organisation's goals and objectives
- use established communication channels to raise questions about standards and values that may be damaging to the organisation
- ensure own behaviour and performance contributes to the integrity and credibility of the organisation
- facilitate processes to make decisions that are based on:
  - relevant information
  - examination of options and associated risks
  - input from relevant people
- communicate about making and implementing decisions including:
  - facilitating agreement on the preferred course of action and implementation plans
  - monitoring and feedback on the implementation and impact of decisions.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain how to identify an organisation's standards and values when they are:
  - stated

© Commonwealth of Australia, 2025 Future Skills Organisation

  - implied
- articulate organisational values and expectations of behaviour
- explain basic theory of group behaviour
- outline the organisation's process for raising questions about standards and values
- give examples of behaviours and performance that would typically be considered damaging to an organisation
- explain concepts including:
  - organisational values
  - role modelling
  - integrity and credibility
  - leadership.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBMGT608 Manage innovation and continuous improvement

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to sustain and develop an environment in which continuous improvement, innovation and learning are promoted and rewarded.

It applies to people with managerial responsibilities who aim to build a better and more effective work environment. Continuous improvement and innovation have links with the model of the learning organisation and people working at this level play an important role in building the culture, values and attitudes of the organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Review programs, systems and processes	1.1 Establish strategies to monitor and evaluate performance and sustainability of key systems and processes 1.2 Undertake detailed analyses of supply chains, and operational, product and service delivery systems 1.3 Identify performance measures, and assessment tools and techniques, and evaluate their effectiveness 1.4 Analyse performance reports and variance from plans for key

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	3.6	• Plans and implements strategies to review and improve own performance
Reading	1.1-1.5, 2.5, 2.6, 3.2-3.5, 3.7	• Analyses, evaluates and integrates facts and ideas to construct meaning from a range of text types
Writing	1.1-1.5, 2.1, 2.5, 3.2, 3.3, 3.5, 3.6, 3.7, 3.8	• Integrates information and ideas from a range of sources, utilising appropriate support materials • Communicates complex relationships between ideas and information, matching style of writing to purpose and audience
Oral Communication	1.6, 2.1-2.4, 3.1, 3.5, 3.8	• Participates in a variety of spoken exchanges with co-workers and stakeholders when developing options and implementing the continuous improvement plan
Numeracy	1.1-1.5, 2.5, 3.3	• Selects and interprets mathematical information to analyse performance • Performs calculations required to establish timeframes, cost-benefits and measures for continuous improvement and innovation processes
Navigate the world of work	2.6	• Adheres to organisational policies and procedures and considers own role in terms of its contribution to broader goals of the work environment
Interact with others	1.6, 2.1-2.4, 3.1, 3.5, 3.8	• Recognises the importance of taking audience, purpose and contextual factors into account when making decisions about what to communicate, with whom, why and how • Recognises the importance of building rapport to establish positive and effective working relationships • Collaborates with others to achieve joint outcomes, playing an active role in encouraging innovation and facilitating effective group interaction
Get the work done	1.1, 1.2, 1.3, 1.5, 1.6, 2.3, 2.4, 2.5, 3.1, 3.2, 3.3, 3.4, 3.5, 3.7	• Plans, organises, implements or reviews organisational strategies, systems and processes • Applies problem-solving processes to identify risks, evaluate options and determine solutions • Uses lateral and analytical thinking to evaluate options against needs, resources and constraints before making decisions • Facilitates a climate in which creativity and innovation

© Commonwealth of Australia, 2025 Future Skills Organisation

		are accepted as an integral part of achieving outcomes • Recognises that the current way is only one way of doing something and explores possibilities that challenge current approaches • Actively identifies systems, devices and applications with potential to meet current and or future needs, with the help of specialists

Assessment Requirements for BSBMGT608 Manage innovation and continuous improvement

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- analyse and evaluate systems and performance in key areas of the organisation and identify opportunities for improvement, seeking advice from experts as appropriate
- promote the value of creativity, innovation and sustainability and recognise successes
- support the testing and trialling of new ideas and undertake risk management and cost-benefit analysis for options
- plan for and implement improvements using organisation's processes for approvals, project management and change management
- facilitate effective contributions to and communications about continuous improvement and innovation
- capture insights, experiences and ideas for improvements and incorporate them into the organisation's knowledge management systems and future planning.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline cost-benefit analysis methods
- describe creativity and innovation theories and concepts
- list organisational learning principles
- identify quality management and continuous improvement theories
- describe relevant risk management concepts
- outline relevant sustainability practices.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBPMG517 Manage project risk

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to manage risks that may impact achievement of project objectives. It involves identifying, analysing, treating and monitoring project risks, and assessing risk management outcomes.

It applies to individuals responsible for managing and leading a project in an organisation, business, or as a consultant.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify project risks	1.1 Determine risk objectives and standards, with input from stakeholders 1.2 Establish project risk context to inform risk management processes 1.3 Identify project risks using valid and reliable risk identification methods 1.4. Classify project risks within agreed risk categories

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
2. Analyse project risks	2.1 Determine risk analysis classification criteria and apply to agreed risk ranking system 2.2 Use risk analysis processes, within delegated authority, to analyse and qualify risks, threats and opportunities 2.3 Determine risk priorities in agreement with project client and other stakeholders 2.4 Document risk analysis outcomes for inclusion in risk register and risk management plan
3. Establish risk treatments and controls	3.1 Identify and document existing risk controls 3.2 Consider and determine risk treatment options using agreed consultative methods 3.3 Record and implement agreed risk treatments 3.4 Update risk plans and allocate risk responsibilities to project team members
4. Monitor and control project risks	4.1 Establish regular risk review processes to maintain currency of risk plans 4.2 Regularly monitor risk environment to identify changed circumstances impacting project risks 4.3 Determine risk responses to changed environment 4.4 Implement agreed risk responses and modify plans to maintain currency of risk treatments and controls
5. Assess risk management outcomes	5.1 Review project outcomes to determine effectiveness of risk-management processes and procedures 5.2 Identify and document risk management issues and recommended improvements for application to future projects

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.4, 2.1, 2.2, 3.1, 3.2, 4.2, 5.1, 5.2	• Interprets and critically analyses complex texts from a range of sources and determines how content may be applied according to organisational requirements

© Commonwealth of Australia, 2025 Future Skills Organisation

Writing	1.3, 1.4, 2.1, 2.4, 3.1, 3.3, 3.4, 4.1, 4.3, 4.4, 5.2	• Documents risks, risk analysis and risk controls using required formats and structure • Modifies and updates workplace documentation according to requirements
Oral Communication	1.1, 2.3, 3.4	• Participates in verbal exchanges using clear language to provide and seek information • Uses active listening and questioning techniques to confirm understanding
Numeracy	1.3, 2.1, 2.3	• Analyses numerical data to identify project risk levels and rank risks according to agreed system of classification
Navigate the world of work	1.1, 2.2	• Determines and adheres to organisational policies and standards • Considers own role in terms of its contribution to broader goals of work environment
Interact with others	1.1, 2.3, 3.4	• Selects and uses appropriate conventions and protocols when communicating with internal and external stakeholders to seek or share information • Actively identifies requirements of important communication exchanges, selecting appropriate channels, format and content to suit purpose and audience
Get the work done	1.1-1.4, 2.1, 3.2, 4.1, 4.4, 5.1	• Identifies and develops approaches to risk management and implements complex tasks to achieve outcomes • Analyses information to make decisions, involving others when appropriate • Uses formal and informal processes to monitor implementation of decisions and reflect on outcomes

Assessment Requirements for BSBPMG517 Manage project risk

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- conduct effective risk management for a project of sufficient complexity to demonstrate the full range of performance requirements
- apply risk management techniques, strategies and tools.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify project risks in a range of risk categories
- explain key components of a risk management plan
- outline industry sector risk classifications and relate these to different risk contexts
- summarise organisational and industry standard risk frameworks
- identify and describe characteristics, techniques and appropriate applications of quantitative and qualitative risk management techniques and approaches.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:

- workplace risk management documentation
- feedback from project stakeholders about how risks were managed.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBPMG521 Manage project integration

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to integrate and balance overall project management functions of scope, time, cost, quality, human resources, communications, risk and procurement across the project life cycle; and to align and track project objectives to comply with organisational goals, strategies and objectives.

It applies to individuals responsible for managing and leading a project in an organisation, business, or as a consultant.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Establish project	1.1 Identify, clarify and prepare project initiation documentation 1.2 Identify relationship between the project and broader organisational strategies and goals 1.3 Negotiate and document project objectives, outcomes and benefits 1.4 Negotiate project governance structure with relevant

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	authorities and stakeholders 1.5 Prepare and submit project charter for approval by relevant authorities
2. Undertake project planning and design processes	2.1 Establish and implement a methodology to disaggregate project objectives into achievable project deliverables 2.2 Identify project stages and key requirements for stage completion against client requirements and project objectives 2.3 Analyse project management functions to identify interdependencies and impacts of constraints 2.4 Develop a project management plan that integrates all project-management functions with associated plans and baselines 2.5 Establish designated mechanisms to monitor and control planned activity 2.6 Negotiate approval of project plan with relevant stakeholders and project authority
3. Execute project in work environment	3.1 Manage the project in an established internal work environment to ensure work is conducted effectively throughout the project 3.2 Maintain established links to align project objectives with organisational objectives throughout the project 3.3 Within authority levels, resolve conflicts negatively affecting attainment of project objectives
4. Manage project control	4.1 Ensure project records are updated against project deliverables and plans at required intervals 4.2 Analyse and submit status reports on project progress and identified issues with stakeholders and relevant authorities 4.3 Analyse and submit impact analysis of change requests for approval, where required 4.4 Maintain relevant project logs and registers accurately and regularly to assist with project audit 4.5 Ensure associated plans are updated to reflect project progress against baselines and approved changes
5. Manage project finalisation	5.1 Identify and allocate project finalisation activities 5.2 Ensure project products and associated documentation are prepared for handover to client in a timely manner 5.3 Finalise financial, legal and contractual obligations

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	5.4 Undertake project review assessments as input to future projects

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.4, 4.1, 4.2, 4.3	• Applies appropriate strategies to construct meaning from complex texts
Writing	1.1, 1.3, 1.5, 2.2, 2.4, 4.1, 4.4, 4.5	• Develops and maintains project documentation using formats and language appropriate to context
Oral Communication	1.3, 1.4, 2.6	• Participates in verbal exchanges using clear and detailed language to provide and seek information • Uses active listening and questioning to confirm understanding
Numeracy	1.1, 2.1-2.4, 4.2, 4.3, 5.3	• Uses a wide range of mainly formal and some informal, oral and written mathematical language and representation to communicate mathematically
Navigate the world of work	1.2, 1.5, 5.3	• Adheres to organisational and legislative requirements
Interact with others	1.3,1.4, 2.6, 3.3	• Selects and uses appropriate communication practices to seek or share information with stakeholders • Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction and negotiating outcomes
Get the work done	1.1, 1.2, 1.5, 2.1-2.5, 3.1, 3.2, 4.1-4.5, 5.1-5.4	• Organises time and effort around priorities and results, focusing beyond immediate tasks to consider work performance of the group • Sequences and schedules complex activities, monitors implementation and manages relevant communication • Reflects on outcomes to contribute to future projects

Assessment Requirements for BSBPMG521 Manage project integration

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- work closely with others to integrate all project management functions across a project life cycle according to organisational objectives
- negotiate with internal and external stakeholders
- create accurate project management documentation
- make suggestions for improvements to managing project integration in the future.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise project governance models
- describe range of methodologies to break project objectives into achievable project deliverables
- outline role of project life cycle stages, phases and structures relevant to industry and project context
- identify and describe appropriate organisational documentation for recording strategies and goals for integration processes.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:

- project documentation
- case studies and, where possible, real situations

© Commonwealth of Australia, 2025 Future Skills Organisation

- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBPMG522 Undertake project work

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to undertake a straightforward project or a section of a larger project. It covers developing a project plan, administering and monitoring the project, finalising the project and reviewing the project to identify lessons learned for application to future projects.

This unit applies to individuals who play a significant role in ensuring a project meets timelines, quality standards, budgetary limits and other requirements set for the project.

The unit does not apply to specialist project managers. For specialist project managers, the other units of competency in the project management field (BSBPMG) will be applicable.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Define project	1.1 Access project scope and other relevant documentation 1.2 Define project stakeholders 1.3 Seek clarification from delegating authority of issues related to

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	project and project parameters 1.4 Identify limits of own responsibility and reporting requirements 1.5 Clarify relationship of project to other projects and to the organisation's objectives 1.6 Determine and access available resources to undertake project
2. Develop project plan	2.1 Develop project plan in line with the project parameters 2.2 Identify and access appropriate project management tools 2.3 Formulate risk management plan for project, including Work Health and Safety (WHS) 2.4 Develop and approve project budget 2.5 Consult team members and take their views into account in planning the project 2.6 Finalise project plan and gain necessary approvals to commence project according to documented plan
3. Administer and monitor project	3.1 Take action to ensure project team members are clear about their responsibilities and the project requirements 3.2 Provide support for project team members, especially with regard to specific needs, to ensure that the quality of the expected outcomes of the project and documented time lines are met 3.3 Establish and maintain required recordkeeping systems throughout the project 3.4 Implement and monitor plans for managing project finances, resources and quality 3.5 Complete and forward project reports as required to stakeholders 3.6 Undertake risk management as required to ensure project outcomes are met 3.7 Achieve project deliverables
4. Finalise project	4.1 Complete financial recordkeeping associated with project and check for accuracy 4.2 Ensure transition of staff involved in project to new roles or reassignment to previous roles 4.3 Complete project documentation and obtain necessary sign-offs for concluding project
5. Review project	5.1 Review project outcomes and processes against the project scope and plan

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	5.2 Involve team members in the project review 5.3 Document lessons learned from the project and report within the organisation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 3.4, 3.5, 4.1, 4.3, 5.1	• Organises, evaluates and critiques ideas and information from a range of complex texts
Writing	2.1, 2.3, 2.6, 3.3, 3.5, 4.1, 4.3, 5.3	• Develops plans, reports and recommendations using vocabulary, structure and conventions appropriate to text • Establishes and maintains records according to organisational requirements
Numeracy	1.6, 2.4, 3.4, 4.1	• Uses formal and some informal, oral and written mathematical language and representation to prepare and communicate budgetary and financial information
Oral communication	2.5, 5.2	• Participates in verbal discussions using clear language and appropriate features to present or seek information • Using listening and questioning skills to seek information and confirm understanding
Navigate the world of work	1.3, 1.4, 2.3, 3.1, 4.3	• Recognises and responds to organisational and legislative/regulatory requirements
Interact with others	2.5, 3.1, 3.2, 4.2, 5.2	• Selects and uses appropriate communication protocols and practices to ensure shared understanding of project roles and expectations • Uses collaborative techniques to engage stakeholders in consultations and negotiations
Get the work done	1.2, 1.5, 1.6, 2.1, 2.2, 2.3, 2.6, 3.1-3.7, 4.1, 4.2, 4.3, 5.1, 5.3	• Develops and implements plans to manage projects that involve diverse stakeholders with potentially competing demands • Systematically gathers and analyses all relevant information and evaluates options to make informed decisions • Evaluates outcomes of decisions to identify

© Commonwealth of Australia, 2025 Future Skills Organisation

		opportunities for improvement • Uses digital technologies and applications to access, organise and share information

Assessment Requirements for BSBPMG522 Undertake project work

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- define the parameters of the project including:
  - project scope
  - project stakeholders, including own responsibilities
  - relationship of project to organisational objectives and other projects
  - reporting requirements
  - resource requirements
- use project management tools to develop and implement a project plan including:
  - deliverables
  - work breakdown
  - budget and allocation of resources
  - timelines
  - risk management
  - recordkeeping and reporting
- consult and communicate with relevant stakeholders to generate input and engagement in planning, implementing and reviewing the project
- provide support to team members to enable them to achieve deliverables and to transition them as appropriate at completion of the project
- finalise the project including documentation, sign-offs and reporting
- review and document the project outcomes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

© Commonwealth of Australia, 2025 Future Skills Organisation

- give examples of project management tools and how they contribute to a project
- outline types of documents and other sources of information commonly used in defining the parameters of a project
- explain processes for identifying and managing risk in a project
- outline the organisation's mission, goals, objectives and operations and how the project relates to them
- explain the organisation's procedures and processes that are relevant to managing a project including:
  - lines of authority and approvals
  - quality assurance
  - human resources
  - budgets and finance
  - recordkeeping
  - reporting
- outline the legislative and regulatory context of the organisation in relation to project work, including work health and safety (WHS) requirements.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBSMB305 Comply with regulatory, taxation and insurance requirements for the micro business

Modification History

Release	Comments
Release 2	This version first released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to source advice and specialist services to manage business compliance requirements.

It applies to individuals who are establishing or operating a micro business providing self-employment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Small and Micro Business

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify regulatory, taxation and insurance requirements of the business	1.1 Identify regulatory, taxation and insurance requirements that might be relevant to operation of the business 1.2 Gather information that assists in interpreting and explaining regulatory, taxation and insurance requirements

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.3 Investigate relationships between legislation, regulations, codes of practice, associated standards and written material to determine compliance requirements of the business
2. Develop procedures to ensure compliance and risk minimisation	2.1 Identify business advisors and other sources of assistance relevant to compliance requirements and business type 2.2 Explain business type and operations to advisors, covering full scope of the business 2.3 Clarify and confirm compliance requirements and risk minimisation needs with advisors 2.4 Access sources of advice and specialist services for regulatory, taxation and insurance compliance 2.5 Review advice and procedures against compliance requirements and their appropriateness for the business
3. Implement compliance procedures	3.1 Implement procedures within provided guidelines 3.2 Take action to ensure the business complies with relevant taxation and business registration requirements, legislation, regulations, codes of practice and associated standards 3.3 Arrange appropriate insurance cover for the business

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 2.1, 2.4, 2.5, 3.1-3.3	• Identifies and interprets legislative and regulatory information pertinent to business requirements
Writing	1.1, 2.1, 3.2, 3.3	• Develops material for a specific audience using clear and detailed language to clarify information and requirements
Oral Communication	2.2, 2.3, 3.3	• Articulates clearly using specific and relevant language suitable to audience to convey requirements, and listening and questioning techniques to confirm understanding
Numeracy	2.5, 3.3	• Analyses numerical information to calculate specific business requirements

© Commonwealth of Australia, 2025 Future Skills Organisation

		• Uses formal and informal mathematical language to discuss compliance
Navigate the world of work	1.1, 1.3, 3.1, 3.2	• Takes some personal responsibility for adherence to legal and regulatory requirements
Get the work done	1.2, 1.3, 2.1, 2.4, 3.3	• Plans routine tasks with familiar goals and outcomes, taking some limited responsibility for decisions regarding sequencing and timing • Understands and explicitly applies some basic principles of analytical and lateral thinking • Takes responsibility for the outcomes of routine decisions related directly to own role • Determines priorities and sequences steps involved in clearly defined familiar tasks, and identifies and assembles resources required

Assessment Requirements for BSBSMB305 Comply with regulatory, taxation and insurance requirements for the micro business

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify regulatory, taxation and insurance compliance requirements, and risk minimisation needs of the business
- identify, select and access sources of advice on compliance and risk minimisation procedures for the business
- complete a development and review of procedures for compliance and risk minimisation (with assistance from advisors).

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify micro business registration and licensing requirements
- list government legislative requirements relating to business operation
- categorise the nature of legal responsibility
- pinpoint relevant industry codes of practice
- list relevant WHS responsibilities and procedures
- name sources of advice and specialist services
- identify sources of information about regulatory, taxation and insurance requirements and issues
- outline taxation requirements.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- business technology including internet access for research
- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies or where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBSMB306 Plan a home based business

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to assess the viability and create a plan to operate a business in the home environment.

It applies to individuals who are establishing or operating a micro business providing self-employment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Small and Micro Business

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Determine viability of basing a business in a home environment	1.1 Identify activities that will be undertaken by the business and what facilities and workspace are needed 1.2 Identify what licences, permits, regulations or restrictions apply to operating a home based business

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.3 Identify availability of services and infrastructure to support the business 1.4 Calculate costs of suitable fittings and equipment for the business and any modifications required to existing facilities and infrastructure in the home 1.5 Determine access requirements of clients or delivery vehicles to the business premises 1.6 Identify insurance requirements for operation of the business in the home
2. Plan workplace in a home environment	2.1 Prepare a floor plan or layout that meets needs of the business and home occupants 2.2 Prepare any concept plans for modifications to buildings or structures in accordance with local government requirements 2.3 Obtain approvals from relevant authorities 2.4 Identify work health and safety (WHS) issues and develop procedures to eliminate or minimise any risks 2.5 Design workplace to provide appropriate client access and facilities while retaining privacy for home occupants 2.6 Allocate adequate and secure space for business machinery, equipment and storage of materials
3. Minimise potential sources of conflict	3.1 Identify possible sources of conflict with neighbours or home occupants 3.2 Develop protocols for home occupants, visitors and clients to enable the business to successfully operate in the home environment 3.3 Prepare a work schedule that identifies business and personal activities 3.4 Establish contingency plans for unanticipated events

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

© Commonwealth of Australia, 2025 Future Skills Organisation

Reading	1.2, 1.3, 1.6, 2.2, 2.4	• Interprets all legislative and regulatory information pertinent to business requirements
Writing	1.6, 2.1, 2.3, 2.4, 3.2-3.4	• Uses factual information to complete required forms and workplace documentation
Oral Communication	1.6, 2.3	• Articulates clearly using specific and relevant language suitable to audience to convey requirements, and listening and questioning techniques to confirm understanding
Numeracy	1.4	• Analyses numerical information to calculate equipment and infrastructure costs
Navigate the world of work	1.2, 2.2, 2.4, 3.2	• Appreciates implications of legal and regulatory responsibilities related to own work and recognises specific legal principles and protocols applicable across work context
Interact with others	2.3	• Selects appropriate form, channel and mode of communication for a specific purpose relevant to own role
Get the work done	1.1, 1.3-1.6, 2.1, 2.5, 2.6, 3.1, 3.3, 3.4	• Takes responsibility for planning and organising own workload, identifying ways of sequencing work efficiently • Takes responsibility for outcomes of decisions related directly to own role • Recognises and takes responsibility for addressing and rectifying potential problems in the work place

Assessment Requirements for BSBSMB306 Plan a home based business

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify practical requirements of running a home based business, including calculation of costs
- plan suitable workspace, including:
  - preparing concept plan for possible modifications to structure of building
  - obtaining relevant approvals from external sources
  - identifying and meeting required legislative requirements
- implement procedures and protocols to ensure home based business runs smoothly including:
  - creating work schedule
  - identifying and establishing contingency plans for areas of possible conflict.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list prohibitive factors in setting up a home based business
- list commonwealth, state/territory and local government legislative requirements relating to business operation, especially for work health and safety (WHS) and environmental issues
- outline constraints of home based businesses

© Commonwealth of Australia, 2025 Future Skills Organisation

- summarise relevant services and available infrastructure.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies or where possible, real situations.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBSMB401 Establish legal and risk management requirements of small business

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to identify and comply with all regulations affecting the business.

It applies to individuals operating a small business who use analytical skills to interpret legislation and regulations and develop procedures to manage compliance.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Small and Micro Business

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify and implement business legal requirements	1.1 Identify and research possible options for the business legal structure using appropriate sources 1.2 Determine legislation and regulatory requirements affecting

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	operations of the business under its chosen structure 1.3 Develop and implement procedures to ensure full compliance with relevant legislation and regulatory requirements
2. Comply with legislation, codes and regulatory requirements	2.1 Establish systems to ensure legal rights and responsibilities of the business are identified and the business is adequately protected, specifically in relation to work health and safety (WHS), business registration and environmental requirements 2.2 Identify taxation principles and requirements relevant to the business, and follow procedures to ensure compliance 2.3 Identify and carefully maintain legal documents and maintain and update relevant records to ensure their ongoing security and accessibility 2.4 Monitor provision of products and services of the business to protect legal rights and to comply with legal responsibilities 2.5 Conduct investigations to identify areas of non-compliance with legal and regulatory requirements, and take corrective action where necessary
3. Negotiate and arrange contracts	3.1 Seek legal advice on contractual rights and obligations, if required, to clarify business liabilities 3.2 Investigate and assess potential products and services to determine procurement rights and ensure protection of business interests where applicable 3.3 Negotiate and secure contractual procurement rights for goods and services including contracts with relevant people, as required, in accordance with the business plan 3.4 Identify options for leasing or ownership of business premises and complete contractual arrangements in accordance with the business plan
4. Identify and treat business risks	4.1 identify potential internal and external risks to the business 4.2 assess the probability and impact of identified risks 4.3 prioritise risks for treatment 4.4 develop actions to mitigate risks including identifying insurance requirements and adequate cover

© Commonwealth of Australia, 2025 Future Skills Organisation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 2.1-2.4, 3.2-3.5	• Identifies, analyses and evaluates a range of complex text to determine legislative, regulatory and related business requirements
Writing	1.3, 2.1, 2.3, 2.5, 3.1, 3.3, 3.5	• Prepares written reports and workplace documentation that communicate complex information clearly and effectively
Oral Communication	2.5, 3.1, 3.3	• Uses specific and relevant language to clearly articulate legal issues, and uses questioning and listening techniques to clarify solutions • Participates in verbal negotiations using tone and language suitable to audience
Numeracy	2.2, 2.5, 3.3, 3.4	• Reviews, analyses, compares and contrasts numerical data which may be embedded in documents • Calculates business insurance costs and compares costing options
Navigate the world of work	1.2, 1.3, 2.1	• Monitors adherence to organisational policies and legislative responsibilities and considers own role in terms of its contribution to broader goals of work environment
Interact with others	3.1, 3.3	• Plays a lead role in situations requiring effective collaboration, demonstrating high-level influencing skills, focusing and shaping awareness, and engaging and motivating others
Get the work done	1.1-1.3, 2.1	• Takes responsibility for planning and organising own workload, identifying ways of sequencing and combining elements for greater efficiency • Implements actions as per plan, making adjustments if necessary and addressing unexpected issues • Understands importance of secure information and privacy in relation to own work and takes personal responsibility for identifying and managing risk factors • Makes a range of critical and non-critical decisions in complex situations, taking a range of constraints into account

Assessment Requirements for BSBSMB401 Establish legal and risk management requirements of small business

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- demonstrate a systematic approach to identifying, managing and meeting legal and regulatory requirements, specifically in regard to WHS, business registration and environmental requirements
- ensure compliance, by:
  - following taxation and industrial relations principles
  - updating and maintaining legal documents
  - investigating areas of non-compliance
  - monitoring provision of products and services
  - taking corrective action where necessary
- negotiate and arrange contracts, including:
  - seeking legal advice
  - investigating procurement rights
  - identifying options of leasing or ownership of business premises.
- Identify, assess and treat risks specific to the business including
  - prioritising risks with highest probability of occurrence and greatest negative impact on the business
  - identifying insurance requirements

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

© Commonwealth of Australia, 2025 Future Skills Organisation

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline business registration and licensing requirements
- identify all government legislative requirements relating to the specific business operation
- explain creation and termination of relevant legal contracts
- summarise relevant cultural differences and legal implications
- describe legal rights and obligations of alternative ownership structures
- outline necessary record keeping to meet minimum legal and taxation requirements
- summarise relevant consumer legislation and industry codes of practice
- outline the key steps in the risk management process
- explain relevant insurance requirements and products.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- office equipment and resources
- business technology including internet access
- specialist software for analysis of data
- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies, or where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBSMB407 Manage a small team

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to select, induct, train and develop staff members to enhance business operations within the parameters of all relevant legislative requirements.

It applies to individuals who operate a small business that stands alone, or is part of a department within a larger organisation. Individuals in this role have a good knowledge of industrial relations and team management and use effective, responsive and supportive communication in workplace interactions.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Small and Micro Business

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Develop staffing plan	1.1 Determine staffing requirements to allow the business to run effectively, in accordance with requirements outlined in the

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	business plan 1.2 Identify and compare existing skills of owner/s and staff with business requirements to identify any gaps 1.3 Develop policies and procedures for owner/s and staff, in accordance with the business plan
2. Recruit, induct, train and retain team	2.1 Develop job or position descriptions, competencies required and selection criteria to meet business' needs 2.2 Judge information obtained from each candidate against specified selection criteria, and select according to business needs and legal requirements 2.3 Induct new staff members in accordance with policies and procedures of the business 2.4 Make team members aware of their responsibilities and performance requirements as soon as practicable, and take opportunities to coach team members who are unfamiliar with procedures of the business 2.5 Develop and implement a staff development program and career paths based on requirements of business and staff competencies 2.6 Advertise staff vacancies appropriately in accordance with staffing plan
3. Comply with industrial relations obligations	3.1 Clarify workplace rights and obligations of employers and employees, in accordance with legal requirements and codes of practice 3.2 Counsel staff, if required, in a positive and constructive manner and record outcomes accurately
4. Maintain staff records	4.1 Develop staff records system to provide timely and accurate information, in accordance with confidentiality, legal and taxation requirements 4.2 Monitor and accurately maintain system for recording and retrieving personnel and payroll information, and seek specialist advice where required
5. Manage staff	5.1 Regularly review contribution and skills of self and other team members to ensure performance is in line with agreed performance measures 5.2 Monitor and adjust staffing requirements to respond to any changes in tasks and functions required by the business 5.3 Support and encourage staff, and acknowledge and reward

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	their contribution 5.4 Regularly provide opportunities for staff to discuss work related issues 5.5 Develop contingency plans to cope with unexpected or extreme situations and take appropriate corrective action as required
6. Review team performance	6.1 Develop positive and constructive relationships with and between team members 6.2 Review and update team objectives in support of business goals on a regular basis in consultation with team members 6.3 Identify strengths and weaknesses of team against current and expected work requirements 6.4 Schedule time, on a regular basis, for team members to review work operations to maintain and improve operational efficiency 6.5 Encourage team members to monitor their own performance, suggest improvements and identify professional development needs, in accordance with personal and business requirements 6.6 Monitor and review staff turnover rate

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 2.2, 2.3, 2.5, 2.6, 3.1, 4.1, 5.1, 6.3, 6.5, 6.6	• Evaluates complex text to determine legislative, regulatory and workplace documentation
Writing	1.3, 2.1-2.6, 3.1, 3.2, 4.1, 4.2, 5.5, 6.1-6.3, 6.5	• Prepares written reports and workplace documentation that communicate complex information clearly and effectively
Oral Communication	1.2, 2.2-2.4, 3.1, 3.2, 4.2, 5.3, 5.4, 6.1, 6.2, 6.4, 6.5	• Articulates clearly using specific and relevant language suitable to audience to convey requirements, and employs listening and questioning techniques to confirm understanding • Participates in verbal negotiations and coaching using tone and language suitable to audience

© Commonwealth of Australia, 2025 Future Skills Organisation

Numeracy	6.4	• Uses basic mathematical formulas to review staff performances within available work schedules
Navigate the world of work	1.3, 2.2. 3.1, 4.1	• Understands own legal rights and responsibilities and is extending understanding of general legal principles across work contexts • Monitors adherence to organisational policies and procedures and considers own role for its contribution to broader goals of the work environment
Interact with others	2.4, 2.6, 5.3, 6.1, 6.5	• Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction, influencing direction and taking a leadership role on occasion • Looks for ways of establishing connections and building genuine understanding with a diverse range of people • Actively identifies important communication exchanges, selecting appropriate channels, format, tone and context to suit purpose and audience, and monitors impact
Get the work done	1.1, 1.2, 2.2, 2.3, 2.5, 4.2, 5.1, 5.2, 5.5, 6.3, 6.6	• Uses digital technologies and systems safely, legally and ethically when gathering, storing, accessing and sharing information • Develops plans to manage relatively complex, non-routine tasks with an awareness of how they may contribute to longer-term operational and strategic goals • Makes a range of critical and non-critical decisions in relatively complex situations, taking a range of constraints into account • Uses formal and informal processes to monitor implementation of ideas and reflect on outcomes • Recognises and anticipates an increasing range of familiar problems, their symptoms and causes, actively looking for early warning signs and implementing contingency plans

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- use the business plan to:
  - determine staffing requirements
  - coordinate skill-gap training where required
  - develop human resource policies and procedures
- develop job descriptions and selection criteria
- determine induction processes
- implement staff development program
- adhere to legal requirements and codes of practice
- develop staff records system
- conduct ongoing performance measures
- communicate effectively with staff members
- develop contingency plans
- develop strategies to review team performance
- monitor and review staff.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss all government legislative requirements relating to staffing the business operation

© Commonwealth of Australia, 2025 Future Skills Organisation

- explain work health and safety (WHS) responsibilities and procedures for managing hazards
- summarise relevant industry awards or enterprise agreements
- outline staff development pathways
- identify training course options for staff development
- summarise staff counselling, grievance and disciplinary procedures
- identify unfair dismissal legislation and procedures.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- business equipment and resources
- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies or where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBSUS201 Participate in environmentally sustainable work practices

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to effectively measure current resource use and carry out improvements, including reducing the negative environmental impact of work practices.

It applies to individuals, working under supervision or guidance, who are required to follow workplace procedures and instructions, and work in an environmentally sustainable manner within scope of competency, authority and own level of responsibility.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Industry Capability – Sustainability

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify current resource use	1.1 Identify workplace environmental and resource efficiency issues 1.2 Identify resources used in own work role 1.3 Document and measure current usage of resources using appropriate techniques 1.4 Record and file documentation measuring current usage, using

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	technology (such as software systems) where applicable 1.5 Identify and report workplace environmental hazards to appropriate personnel
2. Comply with environmental regulations	2.1 Follow workplace procedures to ensure compliance 2.2 Report breaches or potential breaches to appropriate personnel
3. Seek opportunities to improve resource efficiency	3.1 Follow organisational plans to improve environmental practices and resource efficiency 3.2 Work as part of a team, where relevant, to identify possible areas for improvements to work practices in own work area 3.3 Make suggestions for improvements to workplace practices in own work area

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3, 2.1, 3.1	• Recognises and interprets textual information to establish job requirements from relevant information
Writing	1.3, 1.4, 1.5, 2.2	• Completes documents using required formats
Oral Communication	1.5, 2.2, 3.3	• Articulates ideas clearly and uses simple and relevant language to identify and report issues to designated person
Numeracy	1.3	• Calculates basic metric measurements to determine resource usage
Navigate the world of work	2.1	• Understands and adheres to legal and regulatory responsibilities related to own work
Interact with others	1.5, 2.2, 3.2, 3.3	• Selects and uses appropriate conventions and protocols when communicating with co-workers in range of work contexts • Collaborates and cooperates with others to achieve joint outcomes
Get the work	1.1-1.4, 3.1, 3.3	• Implements actions as per plan, taking some responsibility for sequencing and timing of tasks

© Commonwealth of Australia, 2025 Future Skills Organisation

done		• Uses main features and functions of digital tools to complete work tasks and access information • Analyses current practices to identify opportunities for improvement.

Assessment Requirements for BSBSUS201 Participate in environmentally sustainable work practices

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- locate and interpret a range of environment/sustainability legislation and procedural requirements
- participate in and support discussions for an improved resource efficiency process
- identify, document and measure usage of resources
- collaborate with team members on suggestions for improving workplace practices.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify environmental and resource hazards/risks as well as environmental or sustainability legislation, regulations and codes of practice applicable to own role
- outline sustainability requirements in the workplace
- identify reporting channels and procedures to report breaches and potential issues
- identify where to find environmental and resource efficiency systems and procedures.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the sustainability field of work and include access to:

- documentation, information and resources related to workplace environmental and resource efficiency issues
- office equipment and resources
- case studies and, where possible, real situations

BSBSUS501 Develop workplace policy and procedures for sustainability

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to develop and implement a workplace sustainability policy and to modify the policy to suit changed circumstances.

It applies to individuals with managerial responsibilities who undertake work developing approaches to create, monitor and improve strategies and policies within workplaces and engage with a range of relevant stakeholders and specialists.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Industry Capability – Sustainability

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Develop workplace sustainability policy	1.1 Define scope of sustainability policy 1.2 Gather information from a range of sources to plan and develop policy 1.3 Identify and consult stakeholders as a key component of the policy development process 1.4 Include appropriate strategies in policy at all stages of work for

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	minimising resource use, reducing toxic material and hazardous chemical use and employing life cycle management approaches 1.5 Make recommendations for policy options based on likely effectiveness, timeframes and cost 1.6 Develop policy that reflects the organisation's commitment to sustainability as an integral part of business planning and as a business opportunity 1.7 Agree to appropriate methods of implementation, outcomes and performance indicators
2. Communicate workplace sustainability policy	2.1 Promote workplace sustainability policy, including its expected outcome, to key stakeholders 2.2 Inform those involved in implementing the policy about expected outcomes, activities to be undertaken and assigned responsibilities
3. Implement workplace sustainability policy	3.1 Develop and communicate procedures to help implement workplace sustainability policy 3.2 Implement strategies for continuous improvement in resource efficiency 3.3 Establish and assign responsibility for recording systems to track continuous improvements in sustainability approaches
4. Review workplace sustainability policy implementation	4.1 Document outcomes and provide feedback to key personnel and stakeholders 4.2 Investigate successes or otherwise of policy 4.3 Monitor records to identify trends that may require remedial action and use to promote continuous improvement of performance 4.4 Modify policy and or procedures as required to ensure improvements are made

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

© Commonwealth of Australia, 2025 Future Skills Organisation

Reading	1.1, 1.2, 4.2, 4.3	• Identifies, analyses and evaluates complex textual information to determine legislative and regulatory requirements, trends and outcomes
Writing	1.2-1.7, 2.1, 2.2, 3.1, 3.3, 4.1, 4.3, 4.4	• Researches, plans and prepares documentation using format and language appropriate to context, organisational requirements and audience
Oral Communication	1.2, 1.3, 2.1, 2.2, 3.1, 4.1	• Presents information and seeks advice using language appropriate to audience • Participates in discussions using listening and questioning to elicit the views of others and to clarify or confirm understanding
Numeracy	1.5, 4.3	• Interprets and uses mathematical equations to calculate numerical information relating to time durations and costs
Navigate the world of work	1.1-1.6, 3.1, 4.4	• Develops, monitors and modifies organisational policies and procedures in accordance with legislative requirements and organisation goals
Interact with others	1.2, 1.3, 2.1, 2.2, 3.1, 3.3, 4.1, 4.3	• Selects and uses appropriate conventions and protocols when communicating with internal and external stakeholders to seek or share information • Plays a lead role in consulting and negotiating positive outcomes with a range of stakeholders
Get the work done	1.2, 1.4-1.7, 2.3, 2.4, 3.1, 3.2, 3.3, 3.5, 3.6, 4.1, 4.3, 4.4	• Plans, organises and implements work activities of self and others that ensure compliance with organisational policies and procedures, and legislative requirements • Sequences and schedules complex activities, monitors implementation, and manages relevant communication • Uses systematic, analytical processes in relatively complex, situations, setting goals, gathering relevant information, and identifying and evaluating options against agreed criteria • Evaluates outcomes of decisions to identify opportunities for improvement

Assessment Requirements for BSBSUS501 Develop workplace policy and procedures for sustainability

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- scope and develop organisational policies and procedures that comply with legislative requirements and support the organisation's sustainability goals covering at a minimum:
  - minimising resource use
  - resource efficiency
  - reducing toxic material and hazardous chemical use
  - employing life cycle management approaches
  - continuous improvement
- plan and implement sustainability policy and procedures including:
  - agreed outcomes
  - performance indicators
  - activities to be undertaken
  - assigned responsibilities
  - record keeping, review and improvement processes
- consult and communicate with relevant stakeholders to generate engagement with sustainability policy development, implementation and continuous improvement
- review and improve sustainability policies.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the environmental or sustainability legislation, regulations and codes of practice applicable to the organisation identify internal and external sources of information and explain how they can be used to plan and develop the organisation's sustainability policy

© Commonwealth of Australia, 2025 Future Skills Organisation

- explain policy development processes and practices
- outline organisational systems and procedures that relate to sustainability
- outline typical barriers to implementing policies and procedures in an organisation and possible strategies to address them.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the sustainability field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWHS201 Contribute to health and safety of self and others

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to work in a manner that is healthy and safe in relation to self and others and to respond to emergency incidents. It covers following work health and safety (WHS) and emergency procedures and instructions, implementing WHS requirements and participating in WHS consultative processes.

It applies to individuals who require a basic knowledge of WHS to carry out work in a defined context under direct supervision or with some individual responsibility, in a range of industry and workplace contexts.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the Model WHS *Act* has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Work safely	1.1 Follow provided safety procedures and instructions when

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	working 1.2 Carry out pre start systems and equipment checks according to workplace procedures 1.3 Follow workplace procedures for responding to emergency incidents
2. Implement work safety requirements	2.1 Identify designated persons to whom queries and concerns about safety in the workplace should be directed 2.2 Identify existing and potential hazards in the workplace, report them to designated persons and record them according to workplace procedures 2.3 Identify and implement WHS procedures and work instructions 2.4 Identify and report emergency incidents and injuries to designated persons according to workplace procedures 2.5 Identify WHS duty holders and their duties for own work area
3. Participate in WHS consultative processes	3.1 Contribute to workplace meetings, inspections and other WHS consultative activities 3.2 Raise WHS issues with designated persons according to organisational procedures 3.3 Take actions to eliminate workplace hazards and reduce risks

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.3, 2.1, 2.3, 2.4, 2.5	• Identifies and interprets information in relation to WHS and emergency incidents
Writing	1.2, 2.2, 2.4, 3.2	• Uses structures and language appropriate to audience and context in reports giving factual information
Oral Communication	2.2, 2.3, 2.4, 3.1, 3.2	• Uses structures and language appropriate to audience and context in reports, descriptions, opinions and explanations • Extracts meaning from reports,

Assessment Requirements for BSBWHS201 Contribute to health and safety of self and others

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- follow all relevant procedures and instructions relating to work health and safety (WHS) and emergency incidents
- identify and report hazards to designated personnel
- contribute to WHS consultative processes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain workplace safety procedures and instructions including:
  - checking systems and equipment
  - conducting routine work operations
  - requirements for personal protective equipment (PPE)
  - how to report incidents and injuries
- explain emergency procedures including those for fires and incidents
- define the meaning of commonly used hazard signs and safety symbols
- summarise the duty holder responsibilities, as specified in WHS Acts, regulations and codes of practice, of:
  - self and fellow workers
  - persons conducting businesses or undertakings (PCBUs)
  - officers
  - others in the workplace
- explain the difference between hazards and risks

© Commonwealth of Australia, 2025 Future Skills Organisation

- describe typical WHS hazards that may be present in the workplace, the harm they can cause and how this harm occurs
- outline the process of hazard identification and risk reduction.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- relevant organisational policies, standard operating procedures and work instructions
- relevant Acts, regulations, codes of practice
- workplace tools, equipment and resources
- personal protective equipment appropriate to the role and work area.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWHS501 Ensure a safe workplace

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to establish, maintain and evaluate the organisation's work health and safety (WHS) policies, procedures and programs in the relevant work area, according to WHS legislative requirements. It takes a systems approach and addresses compliance with relevant legislative requirements.

This unit applies to managers working in a range of contexts who have, or are likely to have responsibility for WHS as part of their broader management role. It is relevant for people with obligations under WHS legislation, for example persons conducting a business or undertaking (PCBUs) or officers, as defined by relevant legislation.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
1 Establish a WHS management system in a work area	1.1 Locate, adapt, adopt and communicate WHS policies that clearly define the organisation's commitment to complying with WHS legislation 1.2 Identify duty holders and define WHS responsibilities for all workplace personnel in the work area according to WHS legislation, policies, procedures and programs 1.3 Identify and approve financial and human resources required by the WHS management system (WHSMS)
2 Establish and maintain effective and compliant participation arrangements for managing WHS in a work area	2.1 Work with workers and their representatives to set up and maintain participation arrangements according to relevant WHS legislation 2.2 Appropriately resolve issues raised through participation and consultation arrangements according to relevant WHS legislation 2.3 Promptly provide information about the outcomes of participation and consultation to workers and ensure it is easy for them to access and understand
3 Establish and maintain procedures for effectively identifying hazards, and assessing and controlling risks in a work area	3.1 Develop procedures for ongoing hazard identification, and assessment and control of associated risks 3.2 Include hazard identification at the planning, design and evaluation stages of any change in the workplace to ensure that new hazards are not created by the proposed changes and existing hazards are controlled 3.3 Develop and maintain procedures for selecting and implementing risk controls according to the hierarchy of control and WHS legislative requirements 3.4 Identify inadequacies in existing risk controls according to the hierarchy of control and WHS legislative requirements, and promptly provide resources to enable implementation of new measures 3.5 Identify requirements for expert WHS advice, and request this advice as required
4 Evaluate and maintain a work area WHS management system	4.1 Develop and provide a WHS induction and training program for all workers in a work area as part of the organisation's training program 4.2 Use a system for WHS record keeping to allow identification of patterns of occupational injury and disease in the organisation, and to maintain a record of WHS decisions made, including reasons for the decision 4.3 Measure and evaluate the WHSMS in line with the

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	organisation's quality systems framework 4.4 Develop and implement improvements to the WHSMS to achieve organisational WHS objectives 4.5 Ensure compliance with the WHS legislative framework to achieve, as a minimum, WHS legal requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 4.2, 4.3, 4.5	• Organises, evaluates and critiques ideas and information from WHS legislation, policies, procedures and programs
Writing	1.1, 2.3, 3.2, 3.5, 4.1, 4.2	• Produces WHS policies, procedures and programs • using appropriate vocabulary, grammatical structure and conventions to produce • Records WHS decisions according to organisational requirements
Oral communication	1.1, 2.1, 2.2, 2.3	• Presents and seeks information from others using structure and language suitable for the audience • Provides information on resolution of WHS issues varying level of technical vocabulary to suit audience
Numeracy	1.3	• Selects from, and applies, an expanding range of mathematical and problem solving strategies in identifying financial and human resources required
Navigate the world of work	1.1, 1.2, 2.1, 2.2, 3.3, 3.4, 4.5	• Monitors adherence to legal and regulatory rights and responsibilities for self and others in relation to WHS • Takes responsibility for developing, implementing and reviewing policies, procedures and processes in accordance with organisational and legislative requirements
Interact with others	1.1, 2.1, 2.3, 3.5	• Plays a lead role in situations requiring effective collaboration demonstrating the ability to guide discussions and negotiate agreeable outcomes • Provides feedback to others in forms they can

© Commonwealth of Australia, 2025 Future Skills Organisation

		understand and use
Get the work done	1.1, 1.3, 2.1, 2.2, 2.3, 3.2, 3.3, 3.4, 3.5, 4.1, 4.2 4.3, 4.4, 4.5	• Develops plans or processes to manage relatively complex, WHS management tasks with an awareness of how they contribute to operational and strategic goals • Uses systematic, analytical processes, setting goals, gathering relevant information, and identifying and evaluating options against agreed criteria • Considers whether, and how, others should be involved, using consultative or collaborative processes as an integral part of the decision-making process • Uses digital systems and tools to enter, store and retrieve relevant information

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

WHS legislation must include:	• applicable Commonwealth and state or territory WHS Acts, regulations and codes of practice.

Assessment Requirements for BSBWHS501 Ensure a safe workplace

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- establish, implement, maintain and evaluate a work health and safety (WHS) management system for a work area of an organisation in accordance with WHS legislation including policies, procedures and record keeping
- ensure organisational WHS compliance
- establish, implement, maintain and evaluate effective and compliant participation arrangements for managing WHS including identifying duty holders, identifying and approving the required resources and developing and implementing a training program
- establish, implement, maintain and evaluate procedures for effectively identifying hazards, and assessing and controlling risks using the hierarchy of risk control
- provide information and complete documentation for a WHS management system
- identify requirements for and request expert WHS advice.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and detail relevant WHS Acts, regulations and codes of practice
- specify relevant WHS organisational policies, procedures, programs and practices
- explain hazard identification and risk-management processes
- describe the hierarchy of risk control and how it is applied in the workplace
- specify in-house and WHS legislative reporting requirements.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- organisational WHS policies and procedures
- WHS legislation, regulations and codes of practice
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWHS504 Manage WHS risks

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to conduct work health and safety (WHS) risk management processes.

It applies to individuals who manage WHS risks, based on the organisation's WHS management system (WHSMS), WHS information system (WHSIS) and risk-management approach (as covered in BSBWHS503 Contribute to the systematic management of WHS risk). These individuals will work in a range of WHS roles across all industries and apply a substantial knowledge base and well-developed skills in a wide variety of WHS contexts.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Access information and	1.1 Identify sources of information and data

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
data on WHS hazards and risk management	1.2 Obtain information and data to determine the nature and scope of hazards, the range of harms they may cause, and how these harms are caused 1.3 Obtain information and data to determine techniques, tools and processes to assess risk associated with identified hazards, and identify risk control options
2 Prepare to manage WHS risks	2.1 Apply knowledge of the organisation's WHSMS and WHSIS to identify WHS risk management requirements 2.2 Apply knowledge of WHS legislation to identify duty holders and legislative requirements for WHS risk management
3 Develop and implement WHS risk-management processes	3.1 Apply techniques, tools and processes to identify hazards, assess associated risks and identify risk control options 3.2 Apply knowledge of hazards and risks to select appropriate risk controls 3.3 Develop and implement a risk control plan and evaluate risk controls 3.4 Carry out hazard identification and risk management according to organisational and legal requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.3	• Organises, interprets evaluates and critiques ideas and information in relation to WHS risk management
Writing	3.1, 3.2, 3.3, 3.4	• Uses industry specific terminology and appropriate formats to draft and develop risk control plans and processes • Records results of risk-management processes according to organisational requirements
Navigate the world of work	2.1, 2.2, 3.4	• Monitors adherence to legal, regulatory and organisational rights and responsibilities for self and others in relation to WHS risk management

© Commonwealth of Australia, 2025 Future Skills Organisation

Interact with others	3.1, 3.2, 3.3	• Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction and taking a leadership role when required
Get the work done	1.2, 1.3, 3.1, 3.2, 3.3	• Uses logical planning processes, and an increasingly intuitive understanding of context, to identify relevant information and risks, and to identify and evaluate strategies and resources for risk management planning • Sequences and schedules complex activities, monitors implementation, and manages relevant communication in relation to risk management planning • Uses systematic, analytical processes in complex, non-routine situations, setting goals, gathering relevant information, identifying and evaluating options against agreed criteria • Uses common digital systems and tools to locate and store information

Assessment Requirements for BSBWHS504 Manage WHS risks

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- access information and data on hazards and how to manage associated risks
- identify duty holders and legislative requirements for work health and safety (WHS) risk management
- use the organisation's WHS management system (WHSMS) and WHS information system (WHSIS) to conduct the following risk management processes:
  - identify hazards and potential hazards
  - assess the associated risks
  - identify control options
  - select suitable options
  - develop and implement a risk control plan
  - evaluate risk controls
- carry out hazard identification and risk management.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the basic principles of workplace incident, injury and disease causation
- explain the meanings of 'hazard' and 'risk' and how they differ
- identify formal and informal communication and consultation processes and key personnel related to communication
- describe how the characteristics and composition of the workforce impact on WHS risk and the management of WHS, including:
  - communication skills
  - cultural background and diversity

© Commonwealth of Australia, 2025 Future Skills Organisation

  - gender
  - labour market changes
  - language, literacy and numeracy levels of the workforce
  - structure and organisation of the workforce, including part-time, casual and contract workers; shift rosters and geographical location
  - workers with specific needs and limitations
  - workplace culture in relation to alcohol and other drug use
- identify internal and external sources of WHS information and data and how to access them
- explain the limitations of generic hazard identification and risk assessment checklists and risk ranking processes
- outline methods for providing evidence of compliance with WHS legislation
- describe the nature of workplace processes (work flow, planning and control) and hazards relevant to the workplace
- describe organisational culture as it impacts on the work team
- summarise organisational WHS policies, procedures, processes and systems
- list other functional areas that impact on the management of WHS
- outline the principles and practices of a systematic approach to managing WHS
- outline Commonwealth and state or territory WHS Acts, regulations, codes of practice, standards and guidance material and other publications relevant to the organisation
- outline risk management as a duty of persons conducting businesses or undertakings or officers under WHS legislation
- describe the roles and responsibilities of individuals and parties under WHS legislation
- outline standard industry controls for a range of hazards
- identify techniques, tools and processes for identifying health and safety hazards and assessing and controlling the associated risks, including:
  - hazard and risk checklists
  - hazard hunts
  - job safety analyses
  - manifests and registers, including for dangerous goods, hazardous chemicals and plant
  - safe work method statements
  - surveys using questionnaires, interviews and other survey techniques
  - workplace inspections and walk-throughs.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- workplace policies and procedures
- office equipment and resources

© Commonwealth of Australia, 2025 Future Skills Organisation

- relevant Acts, regulations, codes of practice, standards and guidelines relating to risks found in the workplace
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWOR404 Develop work priorities

Modification History

Release	Comments
Release 2	This version first released with BSB Business Services Training Package Version 1.1. Version created to correct mapping table information
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to monitor and obtain feedback on own work performance and access learning opportunities for professional development.

This unit applies to individuals who are required to design their own work schedules and work plans and to establish priorities for their work. They will typically hold some responsibilities for the work of others and have some autonomy in relation to their own role.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Industry Capability – Workplace Effectiveness

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan and complete own work schedule	1.1 Prepare workgroup plans which reflect consideration of resources, client needs and workgroup targets 1.2 Analyse and incorporate work objectives and priorities into personal schedules and responsibilities

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.3 Identify factors affecting the achievement of work objectives and establish contingencies and incorporate them into work plans 1.4 Efficiently and effectively use business technology to manage and monitor planning completion and scheduling of tasks
2. Monitor own work performance	2.1 Identify and analyse personal performance through self-assessment and feedback from others on the achievement of work objectives 2.2 Seek and evaluate feedback on performance from colleagues and clients in the context of individual and group requirements 2.3 Routinely identify and report on variations in the quality of service and performance in accordance with organisational requirements
3. Co-ordinate professional development	3.1 Assess personal knowledge and skills against organisational benchmarks to determine development needs and priorities 3.2 Research and identify sources and plan for opportunities for improvement in consultation with colleagues 3.3 Use feedback to identify and develop ways to improve competence within available opportunities 3.4 Identify, access and complete professional development activities to assist career development 3.5 Store and maintain records and documents relating to achievements and assessments in accordance with organisational requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	3.1, 3.2, 3.3, 3.4	• Develops strategies to reflect on own performance, obtain feedback, and plan and source professional development opportunities
Reading	1.2, 2.1, 2.3, 3.1, 3.5	• Recognises and interprets textual information from relevant sources to understand organisation's policies and practices

© Commonwealth of Australia, 2025 Future Skills Organisation

Writing	1.1, 1.3, 2.2, 2.3, 3.2, 3.5	• Prepares written reports and workplace documentation that communicate complex information clearly and effectively
Oral Communication	2.2, 2.3, 3.2	• Provides or seeks information using language suitable to audience and context • Employs listening and questioning techniques to confirm understanding
Numeracy	1.1, 1.2, 1.3	• Interprets numerical information related to budgets and timeframes
Navigate the world of work	1.2, 2.1, 2.3, 3.1, 3.5	• Identifies and understands roles and responsibilities in relation to organisational objectives, policies and procedures
Interact with others	2.2, 2.3, 3.2	• Selects and uses appropriate practices when communicating with internal and external stakeholders to seek or share information • Establishes and builds rapport and relationships with others to foster a culture of trust and honesty in communications
Get the work done	1.1-1.4, 2.3, 3.1, 3.2, 3.4, 3.5	• Plans, organises and implements tasks to meet organisational requirements • Systematically gathers and analyses information and evaluates options in order to anticipate potential problems and develop contingency plans • Uses the main features and functions of digital technologies and tools to complete work tasks efficiently and effectively

Assessment Requirements for BSBWOR404 Develop work priorities

Modification History

Release	Comments
Release 2	This version first released with BSB Business Services Training Package Version 1.1. Version created to correct mapping table information
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- prepare and communicate own work plan
- schedule work objectives and tasks to support the achievement of the workgroup goals
- review own work performance against workgroup objectives through self-assessment and seeking and acting on feedback from clients and colleagues
- plan and access learning opportunities to extend personal work competencies.

Note: if a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain how business technology applications can be used to schedule tasks and plan work
- explain techniques to prepare personal plans and establish priorities
- identify methods to identify and prioritise personal learning needs
- outline a range of professional development options
- explain methods to elicit, analyse and interpret feedback
- provide a detailed explanation of methods that can be used to evaluate own performance.

BSBWOR502 Lead and manage team effectiveness

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to lead teams in the workplace and to actively engage with the management of the organisation.

It applies to individuals working at a managerial level who facilitate work teams and build a positive culture within their work teams. At this level, work will normally be carried out using complex and diverse methods and procedures requiring the exercise of considerable discretion and judgement, using a range of problem solving and decision making strategies.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Industry Capability – Workplace Effectiveness

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Establish team performance plan	1.1 Consult team members to establish a common understanding of team purpose, roles, responsibilities and accountabilities in accordance with organisational goals, plans and objectives 1.2 Develop performance plans to establish expected outcomes, outputs, key performance indicators (KPIs) and goals for work team 1.3 Support team members in meeting expected performance

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	outcomes
2. Develop and facilitate team cohesion	2.1 Develop strategies to ensure team members have input into planning, decision making and operational aspects of work team 2.2 Develop policies and procedures to ensure team members take responsibility for own work and assist others to undertake required roles and responsibilities 2.3 Provide feedback to team members to encourage, value and reward individual and team efforts and contributions 2.4 Develop processes to ensure that issues, concerns and problems identified by team members are recognised and addressed
3. Facilitate teamwork	3.1 Encourage team members and individuals to participate in and to take responsibility for team activities, including communication processes 3.2 Support the team in identifying and resolving work performance problems 3.3 Ensure own contribution to work team serves as a role model for others and enhances the organisation's image for all stakeholders
4. Liaise with stakeholders	4.1 Establish and maintain open communication processes with all stakeholders 4.2 Communicate information from line manager/management to the team 4.3 Communicate unresolved issues, concerns and problems raised by team members and follow-up with line manager/management and other relevant stakeholders 4.4 Evaluate and take necessary corrective action regarding unresolved issues, concerns and problems raised by internal or external stakeholders

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

© Commonwealth of Australia, 2025 Future Skills Organisation

Reading	1.1, 4.4	• Analyses and interprets textual information from the organisation's policies, goals and objectives to establish team goals or to determine corrective action
Writing	1.2, 2.1, 2.2, 2.4, 4.2, 4.3, 4.4	• Prepares written reports and workplace documentation that communicate complex information clearly and effectively
Oral Communication	1.1, 2.3, 3.1, 4.1, 4.2, 4.3	• Engages in discussions or provides information using appropriate vocabulary and non-verbal features • Uses listening and questioning techniques to confirm understanding and to engage the audience
Navigate the world of work	1.1, 2.1, 2.2, 3.3	• Understands how own role contributes to broader organisational goals • Modifies or develops policies and procedures to achieve organisational goals
Interact with others	1.1, 1.3, 2.2, 2.3, 3.1, 3.2, 4.2, 4.3	• Selects and uses appropriate conventions and protocols when communicating with diverse stakeholders • Uses interpersonal skills to gain trust and confidence of team and provides feedback to others in forms that they can understand and use • Adapts personal communication style to build positive working relationships and to show respect for the opinions, values and particular needs of others • Plays a lead role in situations requiring effective collaboration, demonstrating high level conflict resolution skills and ability to engage and motivate others
Get the work done	1.2, 2.1, 2.2, 2.4, 3.2, 4.1, 4.3, 4.4	• Develops, implements and monitors plans and processes to ensure team effectiveness • Monitors and actively supports processes and development activities to ensure the team is focused on work outcomes • Plans for unexpected outcomes and implements creative responses to overcome challenges

Assessment Requirements for BSBWOR502 Lead and manage team effectiveness

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- use leadership techniques and strategies to facilitate team cohesion and work outcomes including:
  - encouraging and fostering shared understanding of purpose, roles and responsibilities
  - identifying and resolving problems
  - providing feedback to encourage, value and reward others
  - modelling desired behaviour and practices
- develop policies and procedures to ensure team members take responsibility for own work and assist others to undertake required roles and responsibilities
- establish processes to address issues and resolve performance issues
- support team to meet expected performance outcomes including providing formal and informal learning opportunities as needed
- develop performance plans with key performance indicators (KPIs), outputs and goals for individuals or the team which incorporate input from stakeholders
- communicate effectively with a range of stakeholders about team performance plans and team performance
- facilitate two-way flow of information between team and management relevant to team performance
- evaluate and take necessary corrective action regarding unresolved issues, concerns and problems raised by internal or external stakeholders.

Note: if a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain how group dynamics can support or hinder team performance

© Commonwealth of Australia, 2025 Future Skills Organisation

- outline strategies that can support team cohesion, participation and performance
- explain strategies for gaining consensus
- explain issue resolution strategies.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the industry capability - workplace effectiveness field of work and include access to:

- workplace documents
- case studies and, where possible, real situations
- office equipment and resources
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

CPCCDE3014A Remove non-friable asbestos

Modification History

New to CPC08

Replaces unit CPCCDE3012A Encapsulate and remove asbestos

Not equivalent

Unit Descriptor

This unit of competency specifies the outcomes required to remove non-friable asbestos containing material (ACM). The unit includes preparing, containing and removing non-friable ACM, and includes knowledge of decontamination and disposal requirements.

Application of the Unit

Site location for work may be either domestic or commercial, and may be a demolition site, a new work site or an existing structure being renovated, extended, restored or maintained. Project sites may be construction sites and may also include ships, soils in relation to the non-friable asbestos removal process, and fences.

Licensing/Regulatory Information

Occupational licenses are required nationally.

Work must be completed according to relevant legislative, industry, customer and organisational requirements, including work health and safety (WHS) policies and procedures.

Regulatory mechanisms apply to this unit. This unit is required for all ACM removal workers engaged in the removal of non-friable ACM. Candidates are advised to check for regulatory requirements.

Pre-Requisites

CPCCOHS1001A Work safely in the construction industry

© Commonwealth of Australia, 2025 Future Skills Organisation

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Prepare for asbestos removal.	1.1	Work instructions and asbestos removal control plan (ARCP) are obtained and confirmed for preparation purposes.
		1.2	***Safety requirements*** and data gathered from an on-site assessment, an asbestos register where available, and other information sources are used to prepare for a safe and compliant removal process.
		1.3	***Tools, equipment*** and ***personal protective equipment*** (PPE) consistent with job requirements are selected to carry out tasks and checked for serviceability; and faults are rectified or reported prior to commencement.
		1.4	ARCP is accessed according to legislative and company requirements, and understood.
2	Prepare asbestos removal area and removal site.	2.1	***Non-friable asbestos containing materials*** to be removed are identified, referring to the asbestos register or following clarification by an approved competent person as required and according to ***workplace procedures***.
		2.2	Signage and barricade requirements are identified and implemented to delineate the work area.
		2.3	Decontamination procedure is tested according to workplace procedures.
		2.4	Materials and equipment required for removal of ACM

© Commonwealth of Australia, 2025 Future Skills Organisation

			from ***project sites*** are identified, checked and prepared for operation.
		2.5	Processes are undertaken to ensure the safety of the site, including deactivating or securing ***utilities*** where necessary prior to commencing work.
3	Isolate removal site.	3.1	***Requirements to isolate the removal site*** safely are identified from the ARCP, and implemented according to legislative and company requirements.
		3.2	Boundaries of asbestos removal site are designated according to ARCP requirements.
		3.3	Occupants, neighbours and other affected parties are notified according to legislation and within limits of own responsibility and the code of practice.
4	Carry out asbestos removal process.	4.1	***Asbestos is removed*** from work area and work site as specified by the supervisor and in the appropriate manner, ensuring the safe use of tools and according to ARCP, legislative and regulatory requirements, and codes of practice.
		4.2	Removed ***asbestos is contained***, wrapped or otherwise sealed, and placed into removal bags or bins, sealed, labelled and, where loaded into a truck, the tray or skip is lined prior to removal of ACM from site according to regulatory requirements and company standards.
5	Carry out decontamination process.	5.1	Decontamination of the work area and tools is carried out according to workplace procedures, ARCP and regulatory requirements.
		5.2	***Decontamination of asbestos removal workers is carried out*** according to workplace procedures, ARCP and regulatory requirements.
		5.3	Asbestos removal and decontamination equipment is removed from the area according to ARCP and regulatory requirements.

© Commonwealth of Australia, 2025 Future Skills Organisation

6	Clean up work site.	6.1	Work area is cleared and materials disposed of according to legislation, regulations, codes of practice and job specification.
		6.2	Plant, tools and equipment are cleaned, decontaminated, checked, maintained, removed from the work area, and stored according to manufacturer recommendations and regulatory requirements.
7	Contribute to and use documentation in line with regulatory requirements.	7.1	Contribution is made within limits of own responsibility to the preparation and use of ***documentation*** for regulatory notification processes according to legislative and company requirements.
		7.2	Steps are taken within limits of own responsibility to ensure clearance inspection requirements are met and clearance certificate is gained from a competent person or licensed asbestos assessor.
		7.3	Contribution is made within limits of own responsibility to the preparation and use of an emergency plan according to legislative and company requirements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication and appropriate level of language skills to:
  - determine requirements
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - follow instructions
  - read and apply:
    - documentation from a variety of sources
    - drawings and specifications
  - use language and concepts appropriate to cultural differences

© Commonwealth of Australia, 2025 Future Skills Organisation

- initiative and enterprise skills to:
  - evaluate own actions and make judgements about performance and necessary improvements
  - identify and report faults in tools, equipment and materials to appropriate personnel
- planning and organising skills to:
  - set out work
  - recognise procedures, follow instructions and contribute to workplace responsibilities, such as current environmental and safety systems and the ARCP
- teamwork skills to:
  - coordinate own work with others to action tasks
  - relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- self-management skills to:
  - work independently and in teams to read and interpret relevant documentation and to prepare for non-friable asbestos removal tasks according to the recommended safe work method and ARCP
  - set up the asbestos removal area and removal site according to the safe work method and ARCP
  - check, fit and use PPE, and hand and power tools safely
  - apply general WHS procedures for construction work, including:
    - identifying, avoiding and eliminating electrical hazards
    - working safely at heights and in confined spaces
    - applying safe work practices to the use of tools appropriate to ACM removal
    - handling hazardous materials safely
    - applying safe work methods for the removal of non-friable asbestos
- follow correct cleaning, decontamination and disposal procedures

Required knowledge

- range of materials manufactured using asbestos, the type of asbestos used in each material, and the usual applications associated with the material, together with an understanding of:
  - health effects caused by exposure to ACM and requirement for safe handling and removal
  - health impacts on the community and requirement for safe handling and disposal
- general WHS procedures for construction work as required, including identifying and mitigating risks
- health hazards associated with friable ACM and circumstances that may change the nature of ACM from non-friable to friable, such as:
  - weathering
  - wear and tear
  - application of tools and equipment
  - accidental damage

© Commonwealth of Australia, 2025 Future Skills Organisation

- licensing requirements for the use of specific equipment, such as excavators
- safe work methods for the removal of non-friable asbestos
- requirements of current legislation and standards relating to asbestos safety, and the decontamination, transport and disposal of asbestos waste
- general construction terminology
- handling requirements of differing types of asbestos materials
- hazards associated with removal processes
- work area procedures
- job safety analysis (JSA) and safe work method statements (SWMS) if required for construction
- safety data sheets (SDS)
- materials storage and hazardous waste management
- method of operation, and cleaning, use and maintenance requirements of equipment
- plans, drawings and specifications, asbestos registers and register amendments
- quality requirements relating to the removal of non-friable asbestos
- risk assessment processes and contingency planning relating to the removal of non-friable asbestos
- techniques associated with enclosing and removing asbestos
- types, characteristics, uses and limitations of plant and equipment involved in enclosing and removing asbestos
- workplace and equipment safety requirements
- purpose and application of documentation for notification; and use of ARCP and clearance inspections

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, providing that simulated or project-based assessment techniques fully replicate workplace conditions, materials, activities, responsibilities and procedures.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person should demonstrate the ability to: • obtain and apply work instructions for the safe and correct removal of non-friable asbestos • set up the work area and test equipment for use in the removal process of non-friable asbestos • isolate the site prior to removal, complying with regulatory requirements

© Commonwealth of Australia, 2025 Future Skills Organisation

	• remove non-friable asbestos safely and comply with regulatory requirements • contain the ACM and ensure its handling and disposal are safe and comply with requirements • decontaminate self, work equipment, and the work site safely and correctly • complete documentation that supports the removal process within limits of own responsibility.
Context of and specific resources for assessment	This unit is to be assessed using standard and authorised work practices, safety requirements and environmental constraints. Assessment of essential underpinning knowledge will usually be conducted in an off-site context. Assessment is to comply with relevant regulatory or Australian standards' requirements. Resource implications for assessment include: • an induction procedure and requirement • realistic tasks or simulated tasks covering the mandatory task requirements • relevant specifications and work instructions • tools and equipment appropriate to applying safe work practices • support materials appropriate to activity • workplace instructions relating to safe work practices and addressing hazards and emergencies • research resources, including industry-related systems information • safety data sheets. Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.
Method of assessment	Assessment methods must: • satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package • include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application • reinforce the integration of employability skills with workplace tasks and job roles • confirm that competency is verified and able to be transferred to other circumstances and environments.

© Commonwealth of Australia, 2025 Future Skills Organisation

	Validity and sufficiency of evidence requires that: • competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace • where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge • all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence. Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed. Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Safety requirements will be specified from a range of sources that include:	• asbestos removal control plan
	• company policies and procedures, including:
	  • accessing toilets and other amenities
	  • managing work hours to minimise risk from tiredness
	  • working in heat and avoiding heat stress
	• JSA
	• legislation and regulations, including the Code of Practice for the Safe Removal of Asbestos
	• operating manuals and specifications for materials and equipment
	• SWMS
	• asbestos register.

© Commonwealth of Australia, 2025 Future Skills Organisation

Tools and equipment may require separate licensing for use and may include:	• high efficiency particulate air (HEPA) vacuum cleaners to comply with AS3544-1988 and AS4260-1997 as amended from time to time • atomiser and water spray bottles (not pressurised) • hoses and spray fittings • barricades, including tape, para-webbing and fencing • bars (crow and pinch) • bolt cutters • buckets • cold chisels • excavators • hand drills (manual and low-speed only) • fire extinguishers • hammers • hand tools (full kit) • ladders conforming to construction regulations • scaffolds • scrapers • shovels and spades • staple guns.

Personal protective equipment will be specified to the requirements of the job and must include:	• protective clothing, such as:
	  • disposable coveralls with fitted hood and cuffs
	  • safety footwear (pull-on, not lace-up)
	  • protective eyewear
	  • disposable or protective gloves
	• correct face fitting and use of respiratory protective equipment (RPE)
	• respiratory protection required for the job, including class P1 and P2 face masks
	• spare sets of PPE.

Materials may include:	• approved and branded plastic bags, including heavy-duty polythene bags (200 μm minimum thickness) • duct tape • foam infill spray • acrylic paint to seal ACM • polyvinyl alcohol (PVA) adhesive as spray to seal ACM • rags or other material wipes (used once) • signs • 200 μm unused (not recycled) plastic sheeting or drop sheet.
Non-friable asbestos containing materials	• asbestos cement • asbestos cement moulded guttering • asbestos cement sheets

© Commonwealth of Australia, 2025 Future Skills Organisation

may include: Note: • Non-friable asbestos is also known as bonded asbestos • ACM notionally listed as non-friable may become friable due to weathering or damage	• asbestos tiles • bitumastic felts and materials • adhesives and glues • compressed asbestos cement panels • floor vinyl covering • mortar • resinous backing board • sealant mastic • tape.

Workplace procedures may include:	• environmental requirements, such as:
	  • clean-up management
	  • dust and noise management
	  • notification to occupants, neighbours and other affected parties
	  • sedimentation control
	  • vibration management
	  • waste management, including the safe disposal of ACM
	• quality requirements, such as:
	  • internal company quality policy and standards
	  • manufacturer specifications
	  • relevant regulations, including Australian standards
	  • workplace operations and procedures.

Project sites may include:	• residential, commercial, industrial and public buildings • plant, equipment and fire boards (e.g. friction plant and gaskets) • demolition sites • electricity supply authority or work site • fences • ships and other forms of transport • sites for new building development.
Utilities may include:	• air conditioning • electricity • water services.

Requirements to isolate the removal site:	• will reflect the nature of the site
	• must comply with legislative requirements and the ARCP
	• may include:
	  • using barriers
	  • using signage
	  • ensuring occupants are aware of the need to stay away

© Commonwealth of Australia, 2025 Future Skills Organisation

	from the removal site • ensuring isolation has occurred by a licensed electrician and that this is documented.
Asbestos is removed in a manner that complies with legislative and company requirements, and may include:	• wet method (most preferred): • saturate material by gently spraying with water and surfactant mixture (PVA in water ratio of 5:1) • remove materials in sections with the minimum amount of cutting and separation and using hand tools as appropriate • place removed sections in appropriate containers or packaging • Note: The application of the wet asbestos removal method requires the disconnection of the building's power supply and use of a temporary power source fitted with earth leakage and residual current device (RCD) • dry method (least preferred): • to be used only where conditions prohibit use of the wet spray method, i.e. in the vicinity of electrical conductors • fully encapsulate the work area with plastic sheeting • use air respirators appropriate to the job • ensure removal methods minimise the production of airborne material, for example the use of asbestos vacuum cleaners for shadow vacuuming **(Note:** domestic vacuum cleaners even fitted with a HEPA filter are unsuitable) • place removed material immediately in appropriate containers and dampen with sprayed mist.
Asbestos is contained and sealed using a range of techniques, including:	• double-bagging • using heavy-duty polythene bags (200 μm minimum thickness) labelled with an appropriate warning • using drums or bins in good condition with well-fitting lids labelled with appropriate warning signage or labels. **Note:** If too large for a bin or bag, a skip or vehicle tray may be used provided it is double-lined with heavy-duty thick plastic sheeting. When ACMs are loaded on a truck tray, the ACMs must be wetted down and then fully wrapped and sealed with a layer of 200 μm sheeting or bagged. Labelling must occur.
Decontamination of asbestos removal workers is carried out:	• **using a range of techniques, including**: • 'buddy' vacuum**i**ng • decontamination unit for large non-friable removals in certain circumstances • wet wiping.
Documentation may	• air-monitoring results, where necessary

© Commonwealth of Australia, 2025 Future Skills Organisation

include:	• asbestos register • notification to regulator of asbestos removal work • clearance certificates • asbestos removal control plans • procedures for the WHS management system and the emergency plan • equipment test reports • health-monitoring program • RPE face fits • competency training certificates.

CPCCLDG3001A Licence to perform dogging

Modification History

Not Applicable

Unit Descriptor

Unit descriptor This unit specifies the outcomes required to perform slinging techniques, including the selection and inspection of lifting gear and/or the directing of the crane operator in the movement of the load when the load is out of view of the crane/ operator for licensing purposes.

Application of the Unit

Application of the unit

This unit covers the scope of work to demonstrate competency in the application of slinging techniques, selection and inspection of lifting gear and/or the directing of the crane/ operator in the movement of the load.

This unit is based upon the National Standard for Licensing Persons Performing High Risk Work.

This unit in its current form meets state and territory licensing requirements. Any alteration will result in a unit which is not acceptable to regulators for the purpose of licensing.

Licensing/Regulatory Information

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan job.	1.1. ***Site information*** is obtained and related to the task. 1.2. ***Hazard*** s and potential hazards associated with the slinging and directing of loads are identified. 1.3. ***Hazard control measures*** consistent with ***appropriate standards*** are identified to ensure the safety of personnel and equipment. 1.4. The weight, dimensions and centre of gravity of the load are identified and assessed. 1.5. Suitable lifting/slinging points on the load are identified. 1.6. Appropriate ***lifting equipment*** needs are assessed. 1.7. Appropriate ***communication methods*** are assessed with ***crane***/ operators and other ***appropriate personnel***. 1.8. Manufacturer's specifications/information is obtained for special loads where necessary.
2. Select and inspect equipment.	2.1. Lifting equipment appropriate to the task is selected. 2.2. Lifting equipment is inspected for serviceability. 2.3. Damaged or excessively worn lifting equipment is identified, labelled and rejected.

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	2.4. Appropriate communication methods for the crane/operator and appropriate personnel are selected. 2.5. Appropriate ***communication equipment*** is selected and its serviceability is checked. 2.6. Appropriate ***personal protective equipment*** (PPE) is selected and checked.
3. Prepare site and equipment.	3.1. Hazard prevention/control measures are applied consistent with appropriate standards to ensure the safety of personnel and equipment. 3.2. Appropriate slinging method is selected. 3.3. Lifting equipment is prepared and assembled where appropriate. 3.4. Load destination is prepared.
4. Perform task.	4.1. Lifting equipment is attached and secured to the lifting hook using appropriate techniques. 4.2. Lifting hook is positioned over the load centre of gravity. 4.3. Lifting equipment is attached and secured to the load in an appropriate manner. 4.4. Tag line is attached and secured where appropriate. 4.5. Test lift is conducted to ensure security of load. 4.6. Load is moved maintaining stability and control at all times. 4.7. Appropriate communication methods and ***communication signals*** are applied to safely coordinate the load movement both within sight and out-of-sight of crane operator. 4.8. The load is landed to ensure that it is stable and secure from movement. 4.9. Lifting equipment is removed or disconnected from load and prepared for next task or storage.
5. Shut down job and clean up.	5.1. Unserviceable lifting equipment inspected and rejected. 5.2. ***Defective equipment*** is isolated and tagged. 5.3. Lifting equipment is stored in accordance with procedures and appropriate standards. 5.4. Hazard prevention/control measures are removed where appropriate. 5.5. Excess materials from the work area are removed (where applicable).

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	5.6. Defects are reported and recorded according to procedures and appropriate action is taken.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication techniques in the workplace including whistles, hand signals and use of fixed channel two-way radios
- communication skills at a level sufficient to communicate with other site personnel
- calculate rated capacity of lifting equipment
- apply different methods for making temporary connections to loads using fibre and synthetic ropes
- ability to interpret rated capacity and working load limit tags
- hazard identification and control
- slinging techniques
- selection and inspection of lifting equipment
- directing crane operators in the moving of loads in a safe manner, using a slewing crane
- inspection and care of a wide range of lifting equipment to appropriate Australian Standards and/or manufacturer's specifications.

Required knowledge

Required knowledge for this unit is:

- appropriate mathematical procedures for estimation and measurement of loads
- basic knowledge of types of cranes and their functions
- Commonwealth, state or territory OHS legislation, standards and codes of practice relevant to the full range of techniques for undertaking dogging activities
- load stability and safety factors in line with manufacturer's specifications
- types of lifting equipment and slinging techniques for use, and their limitations and performance in a wide range of conditions (including but not limited to slings, beams, accessories, clamps, work-boxes, bins and pallets)
- understanding of the hierarchy of control.

© Commonwealth of Australia, 2025 Future Skills Organisation

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	Successful assessment of this unit meets the competency requirement of the National Standard for licensing Persons Performing High Risk Work. State/Territory OHS regulators have mandated the use of Assessment Instruments and Instructions for Assessment of this unit which have been endorsed by the national body responsible for OHS matters.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the ability to: • comply with Commonwealth, state or territory OHS legislation, standards relevant to safe dogging and crane operations. • communicate and work safely with others in the work area. • apply Hazard prevention and control measures consistent with appropriate standards. • apply to move loads in conjunction with cranes including, the reading of tags, slinging, loading, directing and landing loads with a slewing mobile crane with a telescopic boom and a winch, in and out of sight of the crane/ operator, moving four loads of varying shapes, sizes and weights. • use fibre and/or synthetic rope as tag lines, and connecting to loads using clove hitch, rolling hitch, bowline and single sheetbend. • conduct pre and post operational checks of the lifting equipment.
Context of and specific resources for assessment	• Assessment of the safe and effective application of knowledge and skill to workplace tasks (performance) must be undertaken using the national OHS endorsed Assessment Instrument • Assessment of performance must be

© Commonwealth of Australia, 2025 Future Skills Organisation

EVIDENCE GUIDE

	undertaken either in the workplace or in a realistically simulated workplace setting
	• Assessors must ensure that the assessment in the workplace is organised through a workplace supervisor to ensure that all the required equipment and materials and a suitable working area is made available to suit the assessment and the workplace
	• Assessment must occur under standard and authorised work practices, safety requirements and environmental constraints
	• Assessment is to comply with the requirements of any relevant Standards or operating procedures for dogging activities
	• Applicants must have access to:
	  • personal protective equipment (PPE) for the purpose of the performance assessment.
	  • four different loads as prescribed in the endorsed assessment instrument
	  • lifting and associated equipment
	  • suitable slewing crane
	  • communication equipment (eg. fixed channel, two-way radios) as applicable.

Method of assessment	Assessment must be conducted using the national OHS endorsed Assessment Instrument. This Instrument provides instruction on the application of the assessment. Assessment may be in conjunction with the assessment of other units of competency. The use of **'simulators'** in the assessment of this unit of competency is **not acceptable**. Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge. Assessment must confirm a reasonable inference that competency is not only able to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.
Guidance information for assessment	Further information about endorsed Assessment Instruments may be obtained from state/territory OHS regulators.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Site informationmay include but not be limited to	• local conditions such as access and egress • work method statements.
Hazards may include but not limited to:	• ground stability (eg. ground condition, recently filled trenches, slopes) • overhead hazards (e.g. power lines, service pipes, trees, buildings, etc) • insufficient lighting • traffic (e.g. pedestrians, vehicles, plant) • weather (e.g. wind, lightning, storms) • other specific hazards (e.g. trip hazards, heights, radio interference, etc).
Hazard prevention/control measures	The systematic process of eliminating or reducing the risk to personnel and property through the application of controls. It includes the application of the hierarchy of controls, including: 1. elimination. 2. substitution. 3. isolation. 4. engineered control measures. 5. safe work practices. 6. personal protective equipment.
Appropriate standard s may include:	• codes of practice • legislation • Australian Standards • manufacturer's specifications • industry standards.

© Commonwealth of Australia, 2025 Future Skills Organisation

RANGE STATEMENT

Lifting Equipment may include but not limited to:	• fibre ropes • wire ropes • chain • wire and synthetic slings • shackles • eyebolts • beam clamps • plate clamps • spreader beams • lifting beams • pallet forks and cages • concrete kibbles • personnel boxes.
Communication Methods may include but are not limited to:	• written instructions • signage, • hand signals • listening • questioning to confirm understanding • appropriate worksite protocol.
Cranes may include but not limited to:	• tower cranes (including self erecting) • portal boom cranes • vehicle loading cranes • slewing mobile cranes • non-slewing cranes • derrick cranes.
Appropriate personnel may include but are not limited to:	• supervisors • colleagues • managers who are authorised to take responsibility for the workplace or operations.
Communication Equipment may include but not limited to:	• fixed channel two-way radios • whistles • bells.
Personal protective equipment (PPE) may include but not limited to:	• hard hat • safety boots • gloves • high visibility clothing • reflective vest • relevant breathing, hearing, sight, skin and sun protection.
Load destination may include but	• ground

© Commonwealth of Australia, 2025 Future Skills Organisation

RANGE STATEMENT

not limited to:	• loading platforms • suspended floors • vehicles.
Communication signals may include but not limited to:	• stop - hand • stop - whistle • hoist up - hand • hoist up - whistle • hoist down - hand • hoist down - whistle • luff boom down - hand • luff boom down - whistle • luff boom up - hand • luff boom up - whistle • telescope out - hand • telescope out - whistle • telescope in - hand • telescope in - whistle • slew left - hand • slew left - whistle • slew right - hand • slew right - whistle.
Defective Equipment may include but not limited to:	• excessive wear • damage • stretched • broken wires • cut/damaged fibres.

CPCCLRG3001A Licence to perform rigging basic level

Modification History

Not Applicable

Unit Descriptor

Unit descriptor This unit specifies the outcomes required to perform basic rigging work associated with movement of plant and equipment, steel erections, hoists (including mast climbing hoists), placement of pre-cast concrete, safety nets and static lines, perimeter safety screens and shutters; and cantilever crane loading platforms for licensing purposes.

Application of the Unit

Application of the unit

This unit requires the applicant to be able plan the work, select and inspect equipment, set up task, erect structures and plant and dismantle structures and plant.

This unit is based upon the National Standard for Licensing Persons Performing High Risk Work.

This unit in its current form meets state and territory licensing requirements. Any alteration will result in a unit which is not acceptable to regulators for the purpose of licensing.

This unit has a pre-requisite requirement. This requirement may be met by either the successful completion of the unit *CPCCLDG3001A Licence to perform dogging* or holding a valid licence for dogging.

Licensing/Regulatory Information

Refer to Unit Descriptor

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan job.	1.1. Task to be undertaken is assessed. 1.2. Potential workplace ***hazards*** are identified. 1.3. ***Hazard control measures*** are identified consistent with ***appropriate standards*** to ensure the safety of personnel and equipment. 1.4. Site information is obtained. 1.5. All ***forces and loads*** associated with erecting and dismantling ***structures*** and ***associated plant*** are considered in consultation with ***appropriate personnel***. 1.6. ***Rigging equipment*** and ***associated equipment*** are identified in consultation with appropriate personnel according to ***procedures*** and site information.

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.7. *Safety equipment* is identified.
	1.8. Appropriate ***communication methods*** are identified with appropriate personnel.
2. Select and inspect equipment.	2.1. Rigging equipment and associated equipment are selected and inspected according to procedures and the appropriate standard.
	2.2. Safety equipment is selected and inspected according to procedures.
	2.3. All defective rigging equipment, associated equipment and safety equipment is isolated, reported and recorded according to procedures.
	2.4. ***Communication equipment*** is selected and inspected for serviceability (where applicable.
3. Set up task.	3.1. Appropriate ***hazard prevention***/***control measures*** are applied to the work area according to procedures.
	3.2. ***Ground suitability*** is inspected and checked (where appropriate).
	3.3. Site information is reviewed, interpreted and communicated to appropriate personnel and ***appropriate personnel***.
	3.4. All forces and loads associated with erecting and dismantling structures and associated plant are determined in consultation with appropriate personnel.
	3.5. Safety equipment is fitted and worn correctly (where appropriate).
	3.6. Rigging equipment and associated plant are positioned for work application and stability according to procedures.
	3.7. Methods of applying ***temporary connections*** using fibre rope are applied according to procedures and the appropriate standard.
4. Erect structures and plant.	4.1. Structures and associated plant are erected according to procedures and site information.
	4.2. Stability of structures and associated plant is maintained during erection according to procedures.
	4.3. Work is conducted safely at heights including safe and effective use of safety equipment.
	4.4. Appropriate communication methods and communication equipment, are used to co-ordinate the tasks.
	4.5. Associated plant and rigging equipment is used

ELEMENT	PERFORMANCE CRITERIA
	according to procedures and the appropriate standard. 4.6. Temporary guys, ties, propping and shoring, including ***flexible steel wire rope***, and tubing, are connected where required. 4.7. Associated equipment is used in a safe and appropriate manner. 4.8. The completed task is inspected according to the appropriate standard. 4.9. Excess materials are removed from the work area (where applicable).
5. Dismantle structures and plant.	5.1. Structures and associated plant are dismantled according to procedures and the appropriate standard. 5.2. Work is conducted safely at heights including safe and effective use of safety equipment. 5.3. Stability of structures and associated plant is maintained during dismantling according to procedures. 5.4. Rigging equipment, associated equipment, safety equipment and associated plant are inspected for damage and defects. 5.5. All defective rigging equipment, associated equipment, associated plant and safety equipment are isolated reported and recorded according to procedures. 5.6. Rigging equipment and associated equipment are stored. according to procedures and the appropriate standard. 5.7. Hazard prevention/control measures are removed (where appropriate).

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

© Commonwealth of Australia, 2025 Future Skills Organisation

REQUIRED SKILLS AND KNOWLEDGE

Required skills for this unit are:

- ability to calculate Safe Working Load (SWL) and Working Load Limit (WLL)
- ability to erect and dismantle, level, plumb and stabilise associated plant and structures
- ability to work safely at heights including the correct application of safety equipment.
- accurate interpretation of basic structural charts and structural plans (site information)
- applying methods for making temporary connections of ropes using fibre and synthetic types
- apply methods of splicing and whipping fibre and synthetic ropes
- correct application and use of all rigging and associated equipment
- risk assessment and hazard control strategies
- interpersonal and communication skills at a level sufficient to site/workplace requirements. This includes the relevant communication methods and equipment.
- verify problems and equipment faults and demonstrate appropriate response.

Required knowledge

Required knowledge for this unit is:

- appropriate mathematical procedures for estimation and measurement of loads
- ability to interpret manufacturer's specifications for all plant and equipment use in rigging operations
- knowledge of principles relating to all plant, equipment and structural stability
- knowledge of the types and functions of rigging, safety and associated equipment including an understanding of their limitations.
- organisational and workplace standards, requirements, policies and procedures for rigging
- understanding of the hierarchy of hazard identification and control
- relevant Commonwealth, state or territory and local government OHS legislation, standards and codes of practice for undertaking rigging activities
- understanding of inspection and maintenance requirements of a wide range of appropriate plant and equipment in line with Australian Standards or manufacturer's specifications
- estimation of ground bearing pressures of the full range of soil types and associated ground conditions for setting up plant and equipment.

© Commonwealth of Australia, 2025 Future Skills Organisation

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Successful assessment of this unit meets the competency requirement of the National Standard for licensing Persons Performing High Risk Work.

State/Territory OHS regulators have mandated the use of Assessment Instruments and Instructions for Assessment endorsed by the national body responsible for OHS matters for the assessment of this unit.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- comply with OHS licensing legislation.
- effectively communicate and work safely with others in the work area.
- effectively conduct risk assessment and management procedures.
- effectively complete the following tasks:-
  - inspection of all plant and equipment, and
  - installation of a fall arrest system (Static line), and
  - use of a safety harness / fall arrest system, and
  - installation of crane loading platforms and
  - installation of a safety net, and
  - installation of a shutter and safety screen, and
  - demonstrated ability to work safely at heights, and
  - erection of structural steel, and
  - erection of precast panel, and
  - set up and operation of a winch for load movement, and
  - installation of a materials hoist, or
  - installation of a mast climber.
- effectively demonstrate the following knots,

© Commonwealth of Australia, 2025 Future Skills Organisation

EVIDENCE GUIDE

	bends and hitches:- • Sheet bend, • Becket hitch, • Running bowline, • Double bowline. • effectively demonstrate the following splices and whippings:- • Eye splice, • Back splice, • Short splice, • Sail makers whipping, • Common whipping, • West countryman's
Context of and specific resources for assessment	Assessment of the safe and effective application of knowledge and skill to workplace tasks (performance) must be undertaken using the National OHS endorsed Assessment Instrument. Assessment of performance must be undertaken either in the workplace or in a realistically simulated workplace setting. Assessors must ensure that the assessment in the workplace is organised to ensure that all the required equipment and materials and a suitable working area is made available to suit the assessment and the workplace. Assessment must occur under standard and authorised work practices, safety requirements and environmental constraints. Assessment is to comply with the requirements of any relevant Standards or operating procedures for basic rigging. Applicants must have access to: • personal protective equipment (PPE) for the purpose of the Performance Assessment. • appropriate safety equipment in safe condition • appropriate rigging equipment, associated equipment associated plant in safe condition as described in the endorsed assessment instrument • communication equipment (e.g. two-way

© Commonwealth of Australia, 2025 Future Skills Organisation

EVIDENCE GUIDE

	radios) where applicable • appropriate materials as required for safe erection of structures • appropriate materials for conducting fibre rope slicing, whipping, knots, bends and hitches.
Method of assessment	Assessment must be conducted using the national OHS endorsed Assessment Instruments. These Instruments provide advice on their application. The use of **'simulators'** in the assessment of this unit of competency is **not acceptable**. Assessment may be in conjunction with the assessment of other units of competency. Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge. Assessment must confirm a reasonable inference that competency is not only able to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.
Guidance information for assessment	Further information about endorsed Assessment Instruments may be obtained from state/territory OHS regulators.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Hazards may include but are not limited to:	• ground stability (e.g. ground condition, recently filled trenches, slopes) • overhead hazards (e.g. power lines, service pipes) (**NB**: minimum clearance distance from powerlines or electrical equipment as determined by relevant state authority or

© Commonwealth of Australia, 2025 Future Skills Organisation

RANGE STATEMENT

	electrical supply authority.) • traffic (e.g. pedestrians, vehicles, other plant) • insufficient lighting • environmental conditions (e.g. wind, lightning, storms) • other specific hazards (e.g. dangerous materials).
Hazard control measures:	Refers to the systematic process of eliminating or reducing the risk to personnel and property through the application of controls. It includes the application of the hierarchy of control, the six-step preference of control measures to manage and control risk: • elimination • substitution • isolation • engineering control measures • using safe work practices • personal protective equipment.
Appropriate standards may include:	• codes of practice • legislation • Australian Standards • manufacturer's specifications • industry standards (where applicable).
Site Information may include, but not limited to:	• local conditions such as access and egress, • work method statements, • site specific job safety analyses and other site specific documentation as required. • task plans / Schedules and structural plans.
Forces and Loads may include, but not limited to:	• dead loads • live loads • static load • dynamic loads • wind loads.
Structures may include but are not limited to:	• structural steel • precast panels.
Associated plant may include but not limited to:	• static lines • safety nets • hoists

© Commonwealth of Australia, 2025 Future Skills Organisation

RANGE STATEMENT

	• mast climbers • loading platforms.
Appropriate personnel may include:	• engineers • supervisors • colleagues • managers who are authorised to take responsibility for the workplace or operations.

Rigging Equipment may include but is not limited to:	• scaffolds
	• elevated work platforms
	• personnel box
	• cantilevered crane loading platforms
	• mast climbers.
	• safety screens and shutters
	• cranes including but not limited to:
	  • non-slewing cranes
	  • mobile slewing cranes
	  • vehicle loading cranes
	  • tower cranes
	  • self-erecting tower cranes
	  • portal boom cranes
	  • derrick cranes
	  • bridge and gantry cranes.

Associated equipment may include but is not limited to:	• all types of power and manually operated lifting gear • fibre ropes • flexible steel wire rope (FSWR) • chains • wire and synthetic slings • shackles • terminations • wedge sockets • eye bolts • beam clamps • plate clamps • rope grips • turnbuckles • rigging screws • chain blocks • lever blocks • lever-action winches

© Commonwealth of Australia, 2025 Future Skills Organisation

RANGE STATEMENT

	• sheaves • spreader bars • lifting beams • jacks • levers • skates • wedges • rollers • girder trolley
Procedures may include but is not limited to:	• manufacturer's guidelines (instructions, specifications or checklists) • industry operating procedures, relevant codes of practice • workplace procedures (work instructions, operating procedures, checklists).
Safety Equipment may include but not limited to:	• safety harness • energy absorber • lanyard • inertia reel • static safety lines • safety nets.
Communication Methods may include but is not limited to:	• verbal and non-verbal language • written instructions • signage • hand signals • listening, • questioning to confirm understanding, and appropriate worksite protocol. **NB**: Mobile phones are not to be used for signalling purposes during the rigging process.
Communication equipment may include but is not limited to:	• fixed channel two-way radios
Hazard prevention/control measures may include but is not limited to:	• safety tags on electrical switches/isolators • powerlines are insulated • safety observer used inside exclusion zone • power disconnected • traffic barricades and control • pedestrian barricades • trench covers

© Commonwealth of Australia, 2025 Future Skills Organisation

RANGE STATEMENT

	• movement of obstructions • personal protective equipment • adequate illumination • safety shutters and screens.
Ground suitability may include but is not limited to:	• rough uneven ground • backfilled ground • soft soils • hard compacted soil • rock • bitumen • concrete • suspended concrete floors • building roofs • landings • ground bearing pressure.
Appropriate personnel may include but not limited to	• other riggers • doggers • crane operators.
Temporary connections may include but not limited to:	• knots • bends • hitches • spicing • whipping.
Flexible Steel Wire Rope (***FSWR***) includes:	• identification, uses and connections. May include termination for: • static lines, • guys, • purchase systems, • lashing, • cranes, • hoist and winch ropes.

FNSORG506 Prepare financial forecasts and projections

Modification History

Release	Comments
Release 1	This version first released with FNS Financial Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to plan a financial forecast or projection, identify assumptions and parameters, collect, consolidate and analyse data, make forecasts or projections, document results and obtain approval.

It applies to experienced individuals who use a range of specialist and managerial techniques to plan and carry out their work, and provide direction to others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Organisational skills

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan preparation timetable	1.1 Identify all critical milestones to ensure financial forecasts and projections can be prepared within timeframes 1.2 Review business plans, financial forecasting and processing systems to identify timeframes and parameters, and any potential conflicts
2. Identify assumptions and parameters	2.1 Review business plans and exception reports to identify and resolve conflicts in assumptions

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	2.2 Review assumptions and parameters to ensure compliance with organisational policy and procedures 2.3 Analyse current and historical financial reports to establish trends, and examine external environment to gain objective overview
3. Issue instructions and relevant aids for preparation of forecasts and projections	3.1 Issue clear instructions that comply with organisational format to facilitate use and ensure consistent interpretation 3.2 Identify business types to enable selection of effective financial models, and provide training to users to ensure comprehensive understanding and effective use of models
4. Collect, consolidate, model and analyse data	4.1 Review data to ensure consistency with model used and document analysis results clearly 4.2 Collect reliable, valid, complete and comprehensive data 4.3 Process and consolidate data in logical structured format that enables ready analysis according to established timetable
5. Document results and obtain approval	5.1 Document results clearly in suitable format that meets needs of target users 5.2 Obtain all approvals in accordance with management objectives and financial and organisational policy, and distribute results within timetable

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 2.1-2.3, 4.1-4.3, 5.2	• Interprets, analyses and reviews a variety of structurally complex textual information for accuracy, consistency and compliance with legislation and organisational requirements
Writing	2.1, 3.1, 3.2, 4.1-4.3, 5.1, 5.2	• Produces analytical financial reports from an extensive range of data and modelling to clearly and accurately convey forecasts and projections in required formats • Develops content using clear and detailed language organised in a manner that supports the purposes and audience of the document

© Commonwealth of Australia, 2025 Future Skills Organisation

Oral Communication	1.1, 1.2, 2.1, 2.2, 3.1, 3.2	• Participates in verbal exchanges using careful listening and questioning techniques to elicit relevant information from others, and clear and direct language to convey instructions and confirm understanding • Uses language, tone and pace appropriate to the audience and environment
Numeracy	1.1, 2.1-2.3, 3.2, 4.1-4.3, 5.1	• Collects, analyses and reviews relevant numerically expressed data, formulae and ratios from a range of sources • Uses advanced mathematical skills to identify assumptions and inconsistencies, and complete accurate result analysis • Performs calculations necessary to estimate timelines and prepare accurate timetables
Navigate the world of work	2.2, 2.3, 3.2, 5.2	• Takes full responsibility for understanding and complying with organisational policy and procedures regarding financial forecasts and projections • Maintains and updates knowledge required to carry out work role
Interact with others	3.2	• Selects and uses appropriate conventions and protocols to gain and elicit information relevant to financial forecasts and projections
Get the work done	1.1, 1.2, 2.1, 2.2, 3.1, 3.2, 4.1-4.3, 5.1, 5.2	• Accepts responsibility for planning, sequencing and scheduling complex tasks and workload according to organisational requirements • Applies systematic and analytical decision-making processes to make forecasts and projections in complex and non-routine situations • Uses formal analytical thinking techniques to identify issues and generate possible solutions • Uses the main features and functions of digital tools to complete work tasks, store data and access information

Assessment Requirements for FNSORG506 Prepare financial forecasts and projections

Modification History

Release	Comments
Release 1	This version first released with FNS Financial Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- comply with organisational policy and procedures that relate to the preparation of financial forecasts and projections
- apply standard accounting principles and techniques
- accurately identify assumptions and parameters of forecasts
- collect, consolidate, model and analyse data in a timely manner
- document forecasts and projections, and obtain approval where required.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe relevant financial industry codes of practice
- explain financial forecasting techniques, models and best practice
- identify key users or audience for financial forecasts and projections
- outline factors in the external environment that can impact on financial forecasts
- outline the relevance of historical financial reports to forecasting
- identify and interpret relevant organisational policy and procedures
- explain key requirements of relevant legislation and regulations that influence the financial services industry.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the organisational skills field of work and include access to:

© Commonwealth of Australia, 2025 Future Skills Organisation

- office equipment, technology, software and consumables
- an integrated financial software system and data
- organisational policy and procedures documentation.

Assessors must satisfy NVR/AQTF assessor requirements.

HLTAID001 Provide cardiopulmonary resuscitation

Modification History

Release	Notes
Release 5	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 4	Updated mapping information. Changes to assessment requirements. Equivalent outcome.
Release 3	Updated mapping information. Equivalent outcome.
Release 2	Updated mapping information. Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. Revised evidence requirements, including volume and frequency of assessment.

Application

This unit describes the skills and knowledge required to perform cardiopulmonary resuscitation (CPR) in line with the Australian Resuscitation Council (ARC) Guidelines.

This unit applies to all workers who may be required to provide CPR, in a range of situations, including community and workplace settings.

Specific licensing /regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.

© Commonwealth of Australia, 2025 Future Skills Organisation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Respond to an emergency situation	1.1 Recognise an emergency situation 1.2 Identify, assess and minimise immediate hazards to health and safety of self and others 1.3 Assess the casualty and recognise the need for CPR 1.4 Seek assistance from emergency response services
2. Perform CPR procedures	2.1 Perform cardiopulmonary resuscitation in accordance with ARC guidelines 2.2 Display respectful behaviour towards casualty 2.3 Operate automated external defibrillator (AED) according to manufacturer's instructions
3. Communicate details of the incident	3.1 Accurately convey incident details to emergency response services 3.2 Report details of incident to workplace supervisor as appropriate 3.3 Maintain confidentiality of records and information in line with statutory and/or organisational policies

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2025 Future Skills Organisation

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTAID001 Provide cardiopulmonary resuscitation

Modification History

Release	Notes
Release 5	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 4	Updated mapping information. Changes to assessment requirements. Equivalent outcome.
Release 3	Updated mapping information. Equivalent outcome.
Release 2	Updated mapping information. Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. Revised evidence requirements, including volume and frequency of assessment.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has completed the following tasks in line with state/territory regulations, first aid codes of practice, Australian Resuscitation Council (ARC) guidelines and workplace procedures:

- Followed DRSABCD in line with ARC guidelines, including:
  - performed at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor

© Commonwealth of Australia, 2025 Future Skills Organisation

  - performed at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
  - responded appropriately in the event of regurgitation or vomiting
  - managed the unconscious breathing casualty
  - followed single rescue procedure, including the demonstration of a rotation of operators with minimal interruptions to compressions
  - followed the prompts of an automated external defibrillator (AED)
- Responded to at least one simulated first aid scenario contextualised to the candidate's workplace/community setting, including:
  - demonstrated safe manual handling techniques
  - provided an accurate verbal or written report of the incident

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- State/Territory regulations, first aid codes of practice and workplace procedures including:
  - ARC Guidelines relevant to the provision of CPR
  - safe work practices to minimise risks and potential hazards
  - infection control principles and procedures, including use of standard precautions
  - requirements for currency of skill and knowledge
- Legal, workplace and community considerations, including:
  - awareness of potential need for stress-management techniques and available support following an emergency situation
  - duty of care requirements
  - respectful behaviour towards a casualty
  - own skills and limitations
  - consent
  - privacy and confidentiality requirements
  - importance of debriefing
- Considerations when providing CPR, including:
  - airway obstruction due to body position
  - appropriate duration and cessation of CPR
  - appropriate use of an AED
  - chain of survival
  - standard precautions
- Basic anatomy and physiology relating to:
  - how to recognise a person is not breathing normally
  - chest

© Commonwealth of Australia, 2025 Future Skills Organisation

- response/consciousness
- upper airway and effect of positional change

Assessment Conditions

Skills must be demonstrated working individually in an environment that provides realistic in-depth, industry-validated scenarios and simulations to assess candidates' skills and knowledge.

Assessment resources must include:

- adult and infant resuscitation manikins in line with ARC Guidelines for the purpose of assessment of CPR procedures
- AED training device
- workplace injury, trauma and/or illness record, or other appropriate workplace incident report form

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessor Requirements

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition hold current first aid certificate HLTAID003 or higher.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Respond to an emergency situation	1.1 Recognise an emergency situation 1.2 Identify, assess and manage immediate hazards to health and safety of self and others 1.3 Assess the casualty and recognise the need for first aid response 1.4 Assess the situation and seek assistance from emergency response services
2. Apply appropriate first aid procedures	2.1 Perform cardiopulmonary resuscitation (CPR) in accordance with Australian Resuscitation Council (ARC) guidelines 2.2 Provide first aid in accordance with established first aid principles 2.3 Display respectful behaviour towards casualty 2.4 Obtain consent from casualty where possible 2.5 Use available resources and equipment to make the casualty as comfortable as possible 2.6 Operate first aid equipment according to manufacturer's instructions 2.7 Monitor the casualty's condition and respond in accordance with first aid principles
3. Communicate details of the incident	3.1 Accurately convey incident details to emergency response services 3.2 Report details of incident to workplace supervisor as appropriate 3.3 Maintain confidentiality of records and information in line with statutory and/or organisational policies

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
4. Evaluate the incident and own performance	4.1 Recognise the possible psychological impacts on self and other rescuers involved in critical incidents 4.2 Participate in debriefing to address individual needs

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Performance Evidence

e candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has completed the following tasks in line with state/territory regulations, first aid codes of practice, Australian Resuscitation Council (ARC) guidelines and workplace procedures:

- Followed DRSABCD in line with ARC guidelines, including:

© Commonwealth of Australia, 2025 Future Skills Organisation

  - performed at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
  - performed at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
  - responded appropriately in the event of regurgitation or vomiting
  - managed the unconscious breathing casualty
  - followed single rescue procedure, including the demonstration of a rotation of operators with minimal interruptions to compressions
  - followed the prompts of an Automated External Defibrillator (AED)
- Responded to at least two simulated first aid scenarios contextualised to the candidate's workplace/community setting, including:
  - conducted a visual and verbal assessment of the casualty
  - demonstrated safe manual handling techniques
  - post-incident debrief and evaluation
  - provided an accurate verbal or written report of the incident
- Applied first aid procedures for the following:
  - allergic reaction
  - anaphylaxis
  - bleeding control
  - choking and airway obstruction
  - envenomation, using pressure immobilisation
  - fractures, sprains and strains, using arm slings, roller bandages or other appropriate immobilisation techniques
  - respiratory distress, including asthma
  - shock

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- State/Territory regulations, first aid codes of practice and workplace procedures including:
  - ARC Guidelines relevant to provision of CPR and first aid
  - safe work practices to minimise risks and potential hazards
  - infection control principles and procedures, including use of standard precautions
  - requirements for currency of skill and knowledge
- legal, workplace and community considerations including:
  - awareness of potential need for stress-management techniques and available support following an emergency situation
  - duty of care requirements

  - respectful behaviour towards a casualty
  - own skills and limitations
  - consent
  - privacy and confidentiality requirements
  - importance of debriefing
- considerations when providing first aid including:
  - airway obstruction due to body position
  - appropriate duration and cessation of CPR
  - appropriate use of an AED
  - chain of survival
  - standard precautions
  - how to conduct a visual and verbal assessment of the casualty
- principles and procedures for first aid management of the following scenarios:
  - abdominal injuries
  - allergic reaction
  - anaphylaxis
  - basic care of a wound
  - bleeding control
  - burns
  - cardiac conditions, including chest pain
  - choking and airway obstruction
  - crush injuries
  - diabetes
  - dislocations
  - drowning
  - envenomation
  - environmental impact, including hypothermia, hyperthermia, dehydration and heat stroke
  - eye and ear injuries
  - fractures
  - febrile convulsions
  - head, neck and spinal injuries
  - minor skin injuries
  - needle stick injuries
  - poisoning and toxic substances
  - respiratory distress, including asthma
  - seizures, including epilepsy
  - shock
  - soft tissue injuries, including strains and, sprains
  - stroke

© Commonwealth of Australia, 2025 Future Skills Organisation

  - unconsciousness
- basic anatomy and physiology relating to:
  - how to recognise a person is not breathing normally
  - chest
  - response/consciousness
  - upper airway and effect of positional change
  - considerations in provision of first aid for specified conditions

Assessment Conditions

Skills must be demonstrated working individually in an environment that provides realistic in-depth, industry-validated scenarios and simulations to assess candidates' skills and knowledge.

Assessment resources must include:

- adult and infant resuscitation manikins in line with ARC Guidelines for the purpose of assessment of CPR procedures
- adrenaline auto-injector training device
- AED training device
- placebo bronchodilator and spacer device
- roller bandages
- triangular bandages
- workplace First Aid kit
- workplace injury, trauma and/or illness record, or other appropriate workplace incident report form for written reports
- wound dressings

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessor requirements

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTAID009 Provide cardiopulmonary resuscitation

Modification History

Not applicable.

Application

This unit describes the skills and knowledge required to perform cardiopulmonary resuscitation (CPR) in line with the Australian Resuscitation Council (ARC) guidelines.

This unit applies to all persons who may be required to provide CPR, in a range of situations, including community and workplace settings.

Specific licensing/regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Respond to an emergency situation.	1.1. Recognise and assess an emergency situation. 1.2. Ensure safety for self, bystanders and casualty. 1.3. Assess the casualty and recognise the need for cardiopulmonary resuscitation (CPR). 1.4. Seek assistance from emergency services.
2. Perform CPR procedures.	2.1. Perform CPR in accordance with the ARC guidelines. 2.2. Display respectful behaviour towards casualty. 2.3. Operate an automated external defibrillator (AED) according to manufacturers' instructions.
3. Communicate details of the incident.	3.1. Accurately convey incident details to emergency services. 3.2. Report details of incident in line with appropriate workplace or site procedures. 3.3. Maintain privacy and confidentiality of information in line with statutory or organisational policies.

© Commonwealth of Australia, 2025 Future Skills Organisation

4. Review the incident.	4.1. Recognise the possible psychological impacts on self and other rescuers and seek help when required. 4.2. Contribute to a review of the first aid response as required.

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the workplace or community setting.

There must be evidence that the candidate has completed the following tasks in line with State/Territory regulations, first aid codes of practice, first aid guidelines determined by the Australian Resuscitation Council (ARC) and other Australian national peak clinical bodies and workplace or site procedures:

- managed, in line with ARC guidelines, the unconscious, breathing casualty including appropriate positioning to reduce the risk of airway compromise
- managed, in line with ARC guidelines, the unconscious, non-breathing adult, including:
  - performing at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
  - following the prompts of an automated external defibrillator (AED) to deliver at least one shock
  - demonstrating a rotation of single rescuer operators with minimal interruptions to compressions
  - responding appropriately in the event of regurgitation or vomiting
  - handing over to emergency services
  - providing an accurate verbal report of the incident
  - reviewing the incident
- managed, in line with ARC guidelines, the unconscious, non-breathing infant, including:
  - performing at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- guidelines and procedures including:
  - relevant ARC guidelines to managing the unconscious breathing and non-breathing casualty and provision of CPR
  - potential incident hazards and risk minimisation processes when providing first aid

© Commonwealth of Australia, 2025 Future Skills Organisation

  - infection control procedures, including use of standard precautions and resuscitation barrier devices
  - requirements for currency of skill and knowledge
  - first aid codes of practice
  - appropriate workplace or site procedures relevant to the provision of first aid
- legal, workplace and community considerations, including:
  - duty of care requirements
  - own skills and limitations
  - consent and how it relates to the conscious and unconscious casualty
  - privacy and confidentiality requirements
  - awareness of potential need for stress management techniques and available support for rescuers
- considerations when providing CPR, including:
  - upper airway and effect of positional change
  - appropriate duration and cessation of CPR
  - appropriate use of an AED
  - safety and maintenance procedures for an AED
  - chain of survival
  - how to access emergency services
- techniques for providing CPR to adults, children and infants including:
  - how to recognise that a casualty is unconscious and not breathing normally
  - rate, ratio and depth of compressions and ventilations
  - correct hand positioning for compressions
  - basic anatomy, physiology and the differences between adults, children and infants relating to CPR.

Assessment Conditions

Each candidate to demonstrate skills in an environment that provides realistic in-depth, scenarios and simulations to assess candidates' skills and knowledge.

Due to the nature of this type of training, it is acceptable for the performance evidence to be collected in a simulated environment.

Compression and ventilation skills must be demonstrated on resuscitation manikins following ARC guidelines for the purpose of assessment of CPR procedures.

Assessment must ensure access to:

- adult and infant resuscitation manikins following ARC guidelines for the purpose of assessment of CPR procedures
- AED training devices
- personal protective equipment (PPE).

© Commonwealth of Australia, 2025 Future Skills Organisation

Simulated assessment environments must simulate real-life situations where these skills and knowledge would be performed, with all the relevant equipment and resources of that workplace or community environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors and must hold this unit or demonstrate equivalent skills and knowledge to that contained within this unit.

ICPDMT321 Capture a digital image

Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to evaluate and use digital camera technology and alter and upload digital images.

It applies to individuals who may work in a team environment with some responsibility for producing quality outcomes based on requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Digital media technologies

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Assess digital camera qualities	1.1 Camera software compatibility with hardware system is assessed and appropriate software is selected for job 1.2 Pixel resolution of camera is matched to required quality and resolution of outcome 1.3 RAM capacity of camera is checked to be sufficient for number of images required to be captured 1.4 Shutter speed, focal lengths and camera feature modes are assessed as suitable for quality and use of photographic images

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	required 1.5 Lithium batteries are handled and stored according to work health and safety (WHS) requirements
2 Set up for image capture	2.1 Camera is set up for image composition according to job specifications 2.2 Lighting is arranged according to job specifications 2.3 Light intensity is set for correct exposure
3 Preview image	3.1 Tone curves are adjusted according to job specifications 3.2 Neutral balance of image is arranged and adjusted 3.3 Adjustments to image composition and exposure are made
4 Photograph and upload digital image	4.1 Digital camera is loaded and operated according to manufacturer's and job specifications appropriate to quality of image to be photographed 4.2 File is uploaded on to relevant computer and image saved on hard disk 4.3 Photographic image files are created and stored on computer 4.4 Photographic images are enhanced, cropped and altered electronically to deliver required image 4.5 Photographic images are checked to ensure they meet job brief 4.6 Photographic images are delivered using required delivery mode

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.5, 2.1, 2.2, 3.1, 4.1, 4.5	• Interprets textual information to determine and confirm job requirements
Writing	4.3	• Uses required conventions to name electronic files
Numeracy	1.2-1.4, 2.3	• Recognises mathematical data related to memory capacity • Uses basic mathematical calculations to select

© Commonwealth of Australia, 2025 Future Skills Organisation

		appropriate camera features related to shutter speed, focal length or pixel resolutions
Navigate the world of work	1.5	• Adheres to legislative requirements related to own role with specific reference to safety
Get the work done	1.1-1.4, 2.1-2.3, 3.1-3.3, 4.1-4.6	• Plans and implements tasks required to complete jobs according to specifications • Assesses job requirements to make decisions related to camera settings and image outputs • Analyses image quality problems and identifies and implements appropriate correction methods • Understands the purposes, specific functions and key features of common digital systems and tools and operates them effectively to produce digital images

Unit Mapping Information

Assessment Requirements for ICPDMT321 Capture a digital image

Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- find and use information relevant to the task from various sources
- set up a digital camera correctly and safely
- use a digital camera to:
  - preview and capture THREE digital images
  - transfer images to a computer
  - use relevant software to produce final images that meet job requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and explain the key features of the digital camera that impact on the quality of the photographic image
- determine the safety requirements for handling and storing lithium batteries
- explain how to transfer and store images from a camera to a computer list and describe ways that photographic images can be altered or enhanced electronically
- explain why the required delivery mode is important when preparing a photographic image.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the digital media technologies field of work and include access to:

© Commonwealth of Australia, 2025 Future Skills Organisation

- a digital camera
- computer hardware and software
- photographic equipment and materials.

Assessors must satisfy NVR/AQTF assessor requirements.

ICPDMT3460 Incorporate video into multimedia presentations

Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 4.0.

Application

This unit describes the skills and knowledge required to edit and add video to multimedia presentations.

It applies to individuals who select and use industry standard software and hardware to produce digital video sequences to meet required outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Digital media technologies

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to incorporate digital video	1.1 Identify job requirements and video specifications 1.2 Identify and select digital video software 1.3 Identify methods for saving and producing multimedia presentation
2. Design digital video	2.1 Select digital video software 2.2 Use digital video editing software to combine video assets 2.3 Control variations in video frame rates 2.4 Apply time stamping techniques to video frames 2.5 Save digital video according to enterprise procedures
3. Edit and present digital	3.1 Edit single and multiple video tracks

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
video	3.2 Join multiple tracks of digital video 3.3 Apply digital effects to modify and integrate digital video tracks 3.4 Apply time encoding to single and multiple edited digital video tracks 3.5 Insert video track into multimedia production sequence 3.6 Test and combine digital video with other digital imaging, sound and animation to create multimedia sequence 3.7 Save and present multimedia sequence with video to client

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	• Evaluates textual information to establish and confirm job requirements
Oral Communication	• Uses clear technical terminology to provide information about video to others
Numeracy	• Uses simple mathematical calculations to verify image quality and image size and to measure frame frequencies and track lengths
Problem Solving	• Determines requirements and makes routine decisions directly related to completion of tasks
Planning and Organising	• Plans and implements tasks required to complete jobs according to specifications
Technology	• Identifies the purposes, functions and features of digital systems and tools used for video recording and editing, and uses them to complete tasks

Unit Mapping Information

Supersedes and is equivalent to ICPDMT346 Incorporate video into multimedia presentations.

Assessment Requirements for ICPDMT3460 Incorporate video into multimedia presentations

Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 4.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of the unit, including evidence of the ability to:

- design, compile, edit and present at least two multimedia sequences incorporating video.

In the course of the above the candidate must respond to client requirements and modify video as required.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- factors affecting combining digital videos with other digital imaging, sound and animation in a multimedia sequence
- features and uses of current video software programs
- limiting factors of video production on computers
- methods of obtaining differences of image quality and image size
- data input, processing and output for videos
- process of combining video assets
- process for controlling variations in video frame rates
- process and reason for applying time stamping techniques to video frames.

© Commonwealth of Australia, 2025 Future Skills Organisation

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the area of work.

This includes access to:

- video-editing software
- multimedia output devices
- materials required for construction and editing of sound files.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

PSPPCM023 Manage strategic contracts

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPPROC607A Manage strategic contracts. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to manage contracts for strategic purchases, to effectively minimise risks and achieve value for money to meet an organisation's core objectives. It includes managing the establishment, performance and evaluation of strategic contracts.

This unit applies to those working in roles that involve the acquisition of strategic assets.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently seeking advice as required, performing complex tasks in a range of familiar and unfamiliar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Procurement

© Commonwealth of Australia, 2025 Future Skills Organisation

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Manage contract establishment	1.1 Discuss and agree upon requirements of contracts and strategic initiatives with all parties. 1.2 Assign responsibilities for establishing and carrying out procedures to achieve contract outcomes. 1.3 Establish and implement effective communication strategies and processes to assist ongoing communication between internal and external stakeholders and contractors. 1.4 Perform relationship management with all levels of personnel involved in procurement and contract management, within probity boundaries. 1.5 Establish strategic relationships within probity boundaries to improve procurement capability and performance. 1.6 Update risk management plans.
2. Manage contract performance	2.1 Monitor progress of contracts against set targets and performance measures to ensure success of procurement activities. 2.2 Take action to rectify performance where set targets, performance measures and probity requirements are not being met. 2.3 Provide advice and support to solve problems, make improvements and maintain progress. 2.4 Manage disputes promptly according to contractual conditions to achieve resolution and maintain contract performance and progress. 2.5 Seek and negotiate opportunities to continuously improve procurement outcomes with contractors. 2.6 Provide or gain approvals for contract variations that are negotiated and agreed between the parties. 2.7 Provide opportunities for stakeholders and contractors to have input into and receive feedback on progress during the performance of the contract. 2.8 Engage internal and external stakeholders as necessary throughout the life of the contract to maintain progress.
3. Manage contract evaluation	3.1 Evaluate contract performance relative to planned performance measures and in consultation with stakeholders and contractors. 3.2 Undertake dispute resolution where stakeholders and contractors do not agree. 3.3 Detail conclusions against agreed criteria to provide a complete

© Commonwealth of Australia, 2025 Future Skills Organisation

	picture of performance of contractors, organisation's procurement processes and value for money. 3.4 Measure performance of strategic initiatives relative to planned outcomes in consultation with industry and other stakeholders. 3.5 Document lessons learnt from evaluations of contracts and strategic initiatives and use to continuously improve future procurement activities. 3.6 Advise contractors and stakeholders of evaluation outcomes.

Foundation Skills

Foundation skills are embedded within the elements and performance criteria of this unit.

Unit Mapping Information

This unit supersedes and is equivalent to PSPPROC607A Manage strategic contracts.

Assessment Requirements for PSPPCM023 Manage strategic contracts

Modification History

Release	Comments
1	These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- writing complex documents
- managing teams of expert negotiators in functions identifying and resolving strategic contract management issues
- identifying, assessing and implementing opportunities for performance improvement
- manage strategic procurement contracts, contract management plans and sub-plans

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- Commonwealth, state or territory, and local government legislation, policies, practices and guidelines relating to managing strategic contracts, including environmental purchasing guidance.
- organisational procurement policies, practices and approval processes
- aspects of law of contract, trade practices law, and commercial law relating to managing strategic contracts
- codes of conduct, codes of practice and standards of individual behaviour relating to management of contracts and relationships with contractors
- government procurement environment
- implications of particular contracting arrangements
- whole-of-life considerations
- cultural issues relating to contract management and industry development

© Commonwealth of Australia, 2025 Future Skills Organisation

- relationship management at all personnel levels
- environmental, sustainability and corporate social responsibility principles relevant to managing strategic contracts

Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

RIICCM202D Identify, locate and protect underground services

Modification History

Release	Comment
1	This unit replaces RIICCM202A Identify, locate and protect underground services.
2	Editorial corrections.
3	Amended Performance Evidence.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Application

This unit describes a participant's skills and knowledge required to identify, locate and protect underground services in Civil Construction.

This unit is appropriate for those working in operational roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

Unit Sector

Civil construction

Elements and Performance Criteria

1. Plan and prepare for identify, locate and protect underground services	1.1 Access, interpret and apply underground services documentation and ensure the work activity is compliant 1.2 Obtain, read, interpret, clarify and confirm work requirements 1.3 Identify, obtain and implement traffic signage requirements 1.4 Select, and check for faults, equipment/tools for work activities 1.5 Identify and apply environmental protection requirements

© Commonwealth of Australia, 2025 Future Skills Organisation

	1.6 Obtain and prepare information for search requirements prior to making contact with the service provider (Dial Before You Dig) 1.7 Determine location, alignment direction, level and grade of services and/or utilities from the plans and location details
2. Locate underground services	2.1 Obtain details of services and utilities location from the site owners 2.2 Determine emergency numbers, contact details and procedures for types, and owners, of the services/utilities 2.3 Contact owners of the services/utilities and confirm plans and location details 2.4 Select appropriate plant/equipment, and search for services/utilities on which construction may impact 2.5 Use visual or physical means to search for services and/or utilities prior to commencing construction 2.6 Move, protect and support services/utilities from the construction process in conjunction with the service/utility owner 2.7 Report any damage to services/utilities during activity
3. Conduct housekeeping activities	3.1 Clear work area and dispose of or recycle materials 3.2 Clean and maintain condition of equipment, ensure suitability for use, and address/report issues 3.3 Manage/report hazards, and maintain a safe working environment 3.4 Process written records

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Unit Mapping Information

Assessment Requirements for RIICCM202D Identify, locate and protect underground services

Modification History

Release	Comment
1	This unit replaces RIICCM202A Identify, locate and protect underground services.
2	Editorial corrections.
3	Amended Performance Evidence.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies applicable documentation, policies and procedures
- implements the requirements, procedures and techniques for the safe, effective and efficient completion of the identification, location and protection of underground services including:
  - selecting and using relevant tools and equipment
  - communicating effectively to clarify instructions/information
  - completion of housekeeping activities
- works effectively with others to undertake and complete the identification, location and protection of underground services in a way that meets all of the required outcomes:
  - using a range of communications techniques and equipment
  - complying with written and verbal reporting requirements and procedures
- demonstrates completion of identifying, locating and protecting underground services that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
  - identifying and locating underground services employing appropriate techniques, plant and equipment to search for services and utilities
  - identifying services and owners of services and utilities

© Commonwealth of Australia, 2025 Future Skills Organisation

Knowledge Evidence

The candidate must demonstrate knowledge of the following when identifying, locating and protecting underground services:

- accessing, interpreting and applying the organisation and site requirements and procedures for:
  - identifying and reporting on hazards
  - using operational tools and equipment safely and effectively
  - achieving project quality and accuracy
  - using JSA's/JSEA/Safe work methods
  - applying site isolation and traffic control
- planning and organising work activities
- working with civil construction terminology
- identifying types of services/utilities and providers
- using construction principles
- identifying equipment types, characteristics, technical capabilities and limitations
- using safety data sheet and materials handling methods
- carrying out operational, maintenance and basic diagnostic procedures

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector's work environment;
- where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,

© Commonwealth of Australia, 2025 Future Skills Organisation

- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.	

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level

Links

RIIWHS202D Enter and work in confined spaces

Modification History

Release	Comment
1	The unit replaces RIIOHS202A Enter and work in confined spaces.
2	Editorial corrections.
3	Amended Application field.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Application

This unit describes a participant's skills and knowledge required to enter and work in confined spaces in the Resources and Infrastructure Industries.

This unit is appropriate for those working in operational roles undertaking work in confined spaces.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

Note: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

Elements and Performance Criteria

1 Plan and prepare for working in confined space	1.1 Access, interpret and apply procedures for confined space entry and the environmental management plan and ensure the work activity is compliant 1.2 Obtain, confirm, clarify and apply work instructions and agreed procedure 1.3 Obtain, confirm, clarify and apply safety requirements

© Commonwealth of Australia, 2025 Future Skills Organisation

	1.4 Obtain and confirm authorisation (entry permit) meets regulatory requirements 1.5 Confirm the emergency response procedure is with the stand-by person and understood 1.6 Identify, obtain and implement signage and barrier requirements 1.7 Select tools and equipment for the tasks, check for serviceability and rectify or report any faults 1.8 Identify, confirm and apply the environmental protection requirements 1.9 Position rescue equipment by the entry permit
2 Work in confined space	2.1 Gain access to confined space 2.2 Ensure that the atmosphere is tested and monitored for harmful elements 2.3 Correctly apply tagging and lock-out procedures 2.4 Enter the confined space correctly 2.5 Maintain ongoing communication with the stand-by person 2.6 Comply with entry permit requirements 2.7 Monitor and adhere to allocated entry time
3 Exit confined space	3.1 Exit confined space correctly 3.2 Recover tools, equipment and materials 3.3 Conduct inspection of the confined space 3.4 Secure access to the confined space 3.5 Remove tagging and lock-out 3.6 Accurately complete confined space entry permit
4 Clean up	4.1 Clear work area and dispose of or recycle materials 4.2 Clean, check, maintain and store tools and equipment 4.3 Remove, clean and store barriers and signs

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Assessment Requirements for RIIWHS202D Enter and work in confined spaces

Modification History

Release	Comment
1	The unit replaces RIIOHS202A Enter and work in confined spaces.
2	Editorial corrections.
3	Amended Application field.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- demonstrates completion of entering and working in confined spaces that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
  - obtain appropriate entry permit and instructions for performing work in confined space
  - interpreting and applying safe work method statements
  - apply tagging and lock out
  - selecting, wearing and caring for personal protective equipment applicable to all tasks and environment identified
  - entering the confined space
  - using atmospheric monitoring devices prior to entering the confined space
  - working in the confined space
  - using atmospheric monitoring devices during confined space activity
  - applying safe materials handling methods
  - exiting the confined space
  - remove tagging and lock out

© Commonwealth of Australia, 2025 Future Skills Organisation

Knowledge Evidence

The candidate must demonstrate knowledge of enter and work in confined spaces through:

- identifying areas that constitute confined spaces
- complying with site and equipment safety requirements
- complying with the entry and exit procedures, risks and regulations
- types of air contaminants and toxic gases
- identifying the limitations of breathing apparatus
- identifying equipment types, characteristics, technical capabilities and limitations
- complying with site isolation and site control responsibilities and authorities
- locations of safety data sheets (SDS) information and application
- using confined space and Industry terminology

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector's work environment;
- where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

© Commonwealth of Australia, 2025 Future Skills Organisation

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.	

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level

RIIWHS204D Work safely at heights

Modification History

Release	Comments
1	This unit replaces RIIOHS204A Work safely at heights.
2	Formatting corrections.
3	Inserted Application information.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Application

This unit describes a participant's skills and knowledge required to work safety at heights in the Resources and Infrastructure Industries.

This unit it appropriate for those working in operational roles where they are required to perform work at heights.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

Note: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

Elements and Performance Criteria

1. Identify work requirements	1.1 Access, interpret and apply height safety procedures and ensure the work activity is compliant 1.2 Inspect site to determine layout and physical condition, condition of structures, prevailing weather conditions, equipment requirements and potential hazards

© Commonwealth of Australia, 2025 Future Skills Organisation

	1.3 Adhere to WHS requirements 1.4 Identify, select and check safety equipment for serviceability 1.5 Identify, manage and report potential risks and hazards
2. Identify work procedures and instructions	2.1 Consult with authorised personnel to select materials, tools and equipment and check for serviceability 2.2 Select, wear and care for personal protective equipment 2.3 Inspect/install fall protection and perimeter protection equipment 2.4 Identify approved methods of moving tools and equipment to work area and minimise potential hazards associated with tools at heights 2.5 Ensure safety system has been installed correctly 2.6 Select and install appropriate signs and barricades
3. Access and install equipment	3.1 Consult with authorised personnel to ensure anchor fall protection and associated equipment is correctly fitted and adjusted 3.2 Ensure all required equipment is installed 3.3 Use recommended methods to access work area for people, tools and equipment 3.4 Locate tools and materials to eliminate or minimise the risk of items being knocked down
4. Perform work at heights	4.1 Check access from ground to work area and ensure it is safe 4.2 Keep fall equipment in place and adjusted appropriately for movement during work 4.3 Undertake manual handling of materials and equipment 4.4 Locate materials and equipment ensuring that they are safely secured and distributed 4.5 Check safety system periodically for compliance 4.6 Monitor risk control measures to ensure that they are effective and appropriate 4.7 Reassess risk control measures, as required, in accordance with changed work practices and/or site conditions and undertake alterations
5. Clean up work area	5.1 Consult with authorised personnel to ensure safety system is dismantled and removed 5.2 Clear work area and dispose of or recycle materials 5.3 Clean, check, maintain and store tools and equipment

© Commonwealth of Australia, 2025 Future Skills Organisation

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Assessment Requirements for RIIWHS204D Work safely at heights

Modification History

Release	Comments
1	This unit replaces RIIOHS204A Work safely at heights.
2	Formatting corrections.
3	Inserted Application information.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- demonstrates completion of working safely at heights that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
  - accessing, interpreting and applying technical and safety information for working at heights
  - assessing hazards and risk associated with working at heights and implement control methods
  - selecting wearing and caring for personal protective equipment
  - identifying required safety systems including fall protection and associated equipment
  - checking that fitting, adjusting and anchoring of fall protection and associated equipment is correct
  - performing work safely at heights

Knowledge Evidence

The candidate must demonstrate knowledge of the following when working safely at heights:

- names and functions of equipment, components and materials

© Commonwealth of Australia, 2025 Future Skills Organisation

- complying with equipment manufacturer's instructions and specifications
- safe shifting and handling of tools and materials
- adhering to statutory and regulatory authority requirements
- the nature of work undertaken at heights
- complying with heights safety systems
- the processes of providing for safe working practices
- using safety equipment/systems and considerations to facilitate working safely at heights
- complying with safe work methods

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector's work environment;
- where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year

RIIWHS205D Control traffic with stop-slow bat

Modification History

Release	Comment
1	The unit replaces RIIOHS205A Control traffic with stop-slow bat.
2	Editorial corrections; Performance Criteria numbering for element 1 corrected.
3	Amended Application field.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Application

This unit describes a participant's skills and knowledge required to control traffic with stop-slow bat in the Resources and Infrastructure Industries.

This unit is appropriate for those working in operational roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

Note: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

Elements and Performance Criteria

1. Plan and prepare	1.1 Access, interpret and apply site traffic plan procedures and ensure the work activity is compliant 1.2 Obtain, confirm, clarify and apply work instructions 1.3 Obtain, confirm, clarify and apply safety requirements 1.4 Identify, obtain and implement signage and devices 1.5 Select tools and equipment, check for serviceability and rectify or report any faults

© Commonwealth of Australia, 2025 Future Skills Organisation

	1.6 Identify, confirm, clarify and apply environmental protection requirements
2. Control traffic	2.1 Position or confirm temporary traffic signs and barriers 2.2 Direct traffic correctly 2.3 Control vehicles and pedestrian traffic and ensure safety 2.4 Monitor traffic, make adjustments for changing conditions and position waiting vehicles for smooth traffic flow 2.5 Use hand held stop/slow bats 2.6 Use visibly clear and unobstructed hand signals 2.7 Report traffic offenders
3. Operate communication devices	3.1 Adjust communication device controls for optimum reception/transmission results 3.2 Transmit messages clearly and concisely 3.3 Maintain communication device power supply 3.4 Check communications contact after nominated period of non-contact
4. Clean up	4.1 Remove or cover signs and devices sequentially to provide warning to motorists during shutdown 4.2 Clean, check, maintain and store tools and equipment

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Assessment Requirements for RIIWHS205D Control traffic with stop-slow bat

Modification History

Release	Comment
1	The unit replaces RIIOHS205A Control traffic with stop-slow bat.
2	Editorial corrections; Performance Criteria numbering for element 1 corrected.
3	Amended Application field.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- demonstrates completion of controlling traffic with a stop-slow bat that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
  - reading and interpreting the work instruction and planning work activity accordingly
  - positioning signage and barriers
  - directing and controlling vehicle traffic
  - directing and controlling pedestrian traffic
  - communicating to drivers and pedestrians clearly using hand signals
  - using approved communication devices such as hand held radios or phones to transmit message and report of offenders
  - removing or covering signs after work completion

Knowledge Evidence

The candidate must demonstrate knowledge of controlling traffic with stop-slow bat through:

- site and equipment safety requirements

© Commonwealth of Australia, 2025 Future Skills Organisation

- traffic controlling requirements and procedures
- complying with traffic management plans
- erecting traffic control signage and barricades
- communication device operations
- determine equipment types, characteristics, technical capabilities and limitations
- operational and maintenance procedures for equipment
- detailing site isolation and traffic control responsibilities and authorities
- describing the effects of travel speed and vehicle mass on stopping distances
- interpreting and implementing safe work method statement

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector's work environment;
- where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal	1	1 Year

RIIWHS302D Implement traffic management plan

Modification History

Release	Comment
1	The unit replaces RIIOHS302A Implement traffic management plan.
2	Editorial corrections.
3	Amended Application field.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Application

This unit develops a participant's skills and knowledge required to implement a traffic management plan in Civil construction.

This unit is appropriate for those working in supervisory roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

Note: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

Elements and Performance Criteria

1 Plan and prepare to implement traffic management plan	1.1 Access, interpret and apply traffic management documentation and ensure the work activity is compliant 1.2 Obtain, read, interpret, clarify and confirm work requirements 1.3 Identify, address and report potential risks, hazards and environmental issues and implement control measures 1.4 Select and wear personal protective equipment appropriate for the work activity

© Commonwealth of Australia, 2025 Future Skills Organisation

	1.5 Identify, obtain and implement traffic control signage and devices 1.6 Select, and check for faults, tools and equipment to carry out tasks 1.7 Identify, confirm and apply environmental protection requirements 1.8 Check the designated traffic controllers' training and qualifications for currency 1.9 Advise traffic controllers of the traffic flow requirements
2 Set out the traffic guidance scheme	2.1 Select traffic guidance scheme to suit site conditions, traffic volumes and work activities 2.2 Determine and ensure adherence to work schedule, maximum traffic delays, signals and site communications 2.3 Ensure signs and devices are correctly positioned on the approaches to the work area 2.4 Ensure that signs and devices are positioned and displayed on each approach 2.5 Ensure signs and devices are positioned and displayed laterally 2.6 Ensure traffic is controlled effectively to protect the work crew
3 Monitor traffic guidance scheme	3.1 Ensure traffic flow is monitored and effectiveness of guidance scheme determined 3.2 Monitor work activities and provide guidance to adjust scheme 3.3 Apply process for dealing with traffic controllers who fail to adhere to approved procedures 3.4 Apply procedures to deal with offending motorists
4 Close down traffic guidance scheme	4.1 Ensure traffic is controlled to protect work crew removing traffic control devices 4.2 Ensure signs are removed in sequence to provide maximum warning during removal 4.3 Ensure guidance scheme details are recorded and reported as required 4.4 Ensure incidents are recorded and reported as required
5 Clean up	5.1 Ensure work area is appropriately cleared 5.2 Ensure tools and equipment are cleaned, checked, maintained

Assessment Requirements for RIIWHS302D Implement traffic management plan

Modification History

Release	Comment
1	The unit replaces RIIOHS302A Implement traffic management plan.
2	Editorial corrections.
3	Amended Application field.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- works effectively with others to undertake and complete the traffic management plans that meet all of the required outcomes including:
  - complying with written and verbal reporting requirements and procedures
  - communicating clearly and concisely with others to receive and clarify work instructions
  - communicating clearly and concisely with others to resolve coordination requirements prior to commencing and during work activities
- demonstrates completion of implementing traffic management plans that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
  - complying with State/Territory regulations on three separate live traffic projects, and
  - completing one (1) project controlling site construction vehicles
  - identify and select traffic guidance scheme according to conditions
  - identify and select traffic guidance scheme according to conditions select and implement signage and device requirements, position and display according to site plan

© Commonwealth of Australia, 2025 Future Skills Organisation

- monitor and adjust scheme according to variances in requirements
- apply procedures to deal with non-compliant crew and motorists

Knowledge Evidence

The candidate must demonstrate knowledge of implementing a traffic management plan through:

- accessing, interpreting and applying legislative, organization and site requirements and procedures for:
  - JSAs/JSEA/Safe work method statement
  - potential hazards and risks
  - controlling traffic
  - basic signalling
  - signs and devices
  - radio operations
- identifying equipment types, characteristics, technical capabilities and limitations
- identifying site isolation and traffic control responsibilities and authorities
- identifying quality requirements
- applying civil construction terminology

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector's work environment;
- where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,

SIRXCEG006 Provide online customer service

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to interact with customers using online communication tools. It requires the ability to provide information to customers, handle customer difficulties, and provide customer service and support in an online environment.

It applies to individuals who interact with customers online in a diverse range of businesses with an online presence. They operate with some independence, under limited supervision and guidance from others, and within established organisational policies and procedures.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Customer Engagement

Unit Sector

Cross-Sector

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Communicate with customers online.	1.1. Use digital communication tools to communicate with customers online according to organisational online customer

© Commonwealth of Australia, 2025 Future Skills Organisation

	service standards and procedures.
	1.2. Communicate with customers online using appropriate communication styles and within designated response times.
	1.3. Use correct spelling and grammar when communicating with customers in written form.
	1.4. Identify and take opportunities to improve customer experience within scope of own responsibility.
	1.5. Promote customer loyalty and repeat business when communicating with customers online.
	1.6. Request referrals, ratings and user-generated content from customers.
	1.7. Monitor customer demand for products and services and inform relevant personnel to ensure customer needs are met.
	1.8. Record customer interactions and feedback according to organisational policies and procedures.
	1.9. Make suggestions for improved customer service standards and procedures to relevant personnel.
2. Respond to customer difficulties online.	2.1. Identify customer difficulties and provide required support.
	2.2. Identify customer dissatisfaction and take action to avoid escalation.
	2.3. Follow organisational online customer service standards and procedures to respond to customer complaints.
	2.4. Refer complex customer complaints to relevant personnel for action.
	2.5. Maintain a professional manner during online customer interactions.
	2.6. Identify consistent and potential customer difficulties and report to relevant personnel to minimise future customer dissatisfaction.
3. Process online refunds and exchanges.	3.1. Identify reasons for refunds and exchanges, and offer a replacement or alternative product or solution to maximise sales opportunities.
	3.2. Process online refunds and exchanges according to organisational policies and procedures.

© Commonwealth of Australia, 2025 Future Skills Organisation

Foundation Skills

FOUNDATION SKILLS

Foundation skills essential to performance in this unit, but not explicit in the performance criteria, are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Self-management skills to:	• maintain professionalism in difficult situations related to customer complaints.
Technology skills to:	• use online technology and tools to communicate with customers.

Unit Mapping Information

No equivalent unit

Assessment Requirements for SIRXCEG006 Provide online customer service

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- identify customer requirements and provide online customer service to address requirements, across four different online customer interactions
- provide service to the above customers following organisational online customer service standards and procedures
- follow organisational customer service standards and procedures to:
  - resolve a customer complaint
  - resolve a customer difficulty
  - process an online refund
  - process an online exchange
- make suggestions for improved online customer service standards and procedures.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- key legal and ethical considerations as related to online customer service provision:
  - Australian Consumer Law
  - privacy
- organisational policies and procedures:
  - processing refunds and exchanges online
  - recording customer information
- organisational online customer service standards:
  - response times
  - communication styles
  - handling customer complaints
  - reporting customer services issues
- key aspects of online communication:
  - written communication techniques
  - appropriate communication styles

© Commonwealth of Australia, 2025 Future Skills Organisation

    - role and use of tone in written communication
    - maintaining brand integrity
- common causes of customer complaints and difficulties in an online environment
- online customer service provision and techniques for:
    - identifying customer dissatisfaction
    - handling customer complaints
    - handling customer difficulties
    - generating customer loyalty
    - building rapport with customers
    - seeking referrals and user generated content
- role and impact of customer feedback in an online environment:
    - positive feedback
    - negative feedback
- commercial impact of:
    - unresolved customer complaints
    - customer dissatisfaction
    - refunds and exchanges.

Assessment Conditions

Skills must be demonstrated in a service industries environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- relevant documentation:
    - organisational policies and procedures:
        - processing refunds and exchanges online
        - recording customer information
    - organisational online customer service standards:
        - response times
        - communication styles
        - handling customer complaints
        - reporting customer service issues
- information technology hardware and software
- online communication tools
- online information systems
- online customers with whom the individual can interact. These can be:
    - individuals in an industry workplace, or

© Commonwealth of Australia, 2025 Future Skills Organisation

- individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SIRXMKT002 Use social media to engage customers

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to manage the use of social media platforms to interact with customers and promote products and services.

It applies to individuals working in customer service management roles in a diverse range of industry sectors and business contexts that have a social media presence. They operate independently with some responsibility for decision making, and within established organisational policies and procedures.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Marketing

Unit Sector

Cross-Sector

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to use social media.	1.1. Review organisational social media requirements and policies and procedures. 1.2. Research various social media platforms, and identify and compare their audience, functionality and reach.

© Commonwealth of Australia, 2025 Future Skills Organisation

	1.3.Research emerging trends in social media platform use. 1.4.Select social media platforms that meet brand needs and reach target customer. 1.5.Source information and content from internal and external sources for use on social media platforms 1.6.Develop content in line with target audience, brand cultures and social media requirements as required. 1.7.Source or create a social media calendar.
2. Use social media to enhance customer engagement.	2.1.Create opportunities to attract and promote user-generated content. 2.2.Respond to customers in a timely manner, directing them to relevant information as required. 2.3.Identify potential brand damage, and take action to prevent escalation. 2.4.Promptly respond to customer complaints and issues according to social media policies and procedures. 2.5.Adhere to legal and ethical practices for social media use.
3. Promote products and services.	3.1.Identify social media marketing opportunities and curate and post content to promote products and services. 3.2.Use social media to promote special offers, events and promotions as required. 3.3.Post content according to social media policies and procedures.
4. Review social media use.	4.1.Track social media activity using monitoring tools. 4.2.Identify opportunities to improve customer experience, and recommend to relevant personnel. 4.3.Update the look and feel of the social media account to maximise effectiveness. 4.4.Report on social media engagement and reach to relevant personnel.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Reading skills to:	• interpret technical terminology relevant to the use of social media platforms.

© Commonwealth of Australia, 2025 Future Skills Organisation

Writing skills to:	• use correct spelling and grammar in social media posts.
Technology skills to:	• upload images, text files, PDF files, audio files, video files and link associated files • import and export software functions • conduct online research for appropriate content • compare social media platform functionality.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for SIRXMKT002 Use social media to engage customers

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- research four social media platforms and select two platforms for use, appropriate to business needs and target customer
- use the above two social media platforms to engage the customer by:
  - curating and posting written and visual content appropriate to the target customer
  - promote one organisational marketing activity
  - respond to two of the following types of customer social media posts:
    - customer reviews
    - user generated content
    - questions
    - complaints
    - troll
- review effectiveness of social media platform across a one month period by:
  - reporting on social media activity
  - making at least one recommendation for continuous improvement of social media use.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for social media use
- rules and regulations and terms of use of specific social media platforms:
  - privacy
  - spamming
  - copyright
  - creative commons
- social media trends:
  - trending platforms
  - consumer behaviour
  - trending content

© Commonwealth of Australia, 2025 Future Skills Organisation

- various social media platforms:
  - demographic of primary users
  - key features and uses
  - integration into business activity
  - useability
  - privacy and security features
  - costs
- legal and ethical practices for use of social media:
  - responsible use of platforms
  - responsible marketing practices
  - fair competition guidelines
  - duty of care
  - bullying and harassment policy
- types of social media users and their impacts:
  - troll
  - angry customer
  - misguided customer
  - unhappy customer
  - complimentary customers
  - brand advocates
- techniques for:
  - marketing the business using social media platforms:
    - promoting products
    - promoting special events
    - creating brand awareness
  - responding to customer posts on social media:
    - customer reviews
    - user generated content
    - questions
    - complaints
    - troll
- social media tools, and their use, for:
  - monitoring
  - scheduling social media content
  - capturing engagement and reach data
- commercial impact of social media platform both favourable and unfavourable:
  - importance of consumer reviews and user generated content
  - value of building a community of advocates on a social media platform
  - types of crisis issues or conflicts that can arise on social media locally, nationally and internationally

© Commonwealth of Australia, 2025 Future Skills Organisation

- sources and types of social media content:
  - product information
  - images and photos
  - links to other websites
  - videos
  - text and graphics
  - current trends
  - Internet.

Assessment Conditions

Skills must be demonstrated in:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- relevant documentation:
  - organisational policies and procedures for social media use
  - legal and ethical use of social media
- social media content calendar that details:
  - key events and promotions
  - milestones and relevant dates
  - content for release
- files for use across social media platforms:
  - image files
  - text files
  - PDF files
  - audio files
  - video files
  - link associated files
- computer or mobile device with Internet access
- social media monitoring tools
- social media platforms
- customer postings on social media platforms
- assessment activities that allow the individual to work with commercial speed, timing and productivity.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

TLID2010 Operate a forklift

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to operate a forklift in compliance with the relevant state/territory authority licence requirements and regulations, in a variety of operational contexts.

It includes checking forklift condition, driving forklift to fulfil operational requirements, and monitoring and maintaining forklift performance and site conditions.

Assessment of this unit will usually be undertaken within a licensing examination conducted by, or under the authority of, the relevant state/territory work health and safety (WHS)/occupational health and safety (OHS) authority.

Operation of a forklift is performed under some supervision, generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

© Commonwealth of Australia, 2025 Future Skills Organisation

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Check forklift condition	1.1 Condition of forklift is checked for compliance with WHS/OHS and workplace requirements for warning devices, manufacturer specifications and nature of load shifting task
	1.2 Attachments are checked to ensure appropriate adjustment and operation
	1.3 Mirrors and seats are adjusted for safe operation by driver
	1.4 Logbooks are checked and appropriate workplace documentation is completed in accordance with workplace requirements
2 Drive forklift	2.1 Forklift is started, steered, manoeuvred, positioned and stopped in accordance with regulations and manufacturer instructions
	2.2 Engine power is managed to ensure efficiency and performance and to minimise engine and gear damage
	2.3 Operational hazards are identified and/or anticipated and avoided or controlled through defensive driving and appropriate hazard control techniques
	2.4 Forklift is driven in reverse, maintaining visibility and achieving accurate positioning
	2.5 Forklift is parked, shut down and secured in accordance with manufacturer specifications, regulations and workplace procedures
3 Operate forklift to handle loads	3.1 Lifting task to be undertaken is appropriately planned, and correct lifting truck and attachments are selected
	3.2 Load is lifted, carried, lowered and set down in accordance with WHS/OHS legislation, manufacturer specifications and company procedures
4 Monitor site conditions	4.1 Hazards and traffic flow are identified when selecting the most efficient route and appropriate adjustments are made
	4.2 Site conditions are assessed to enable safe operations and to ensure no injury to people or damage to property, equipment, loads or facilities occurs

© Commonwealth of Australia, 2025 Future Skills Organisation

5 Monitor and maintain forklift performance	5.1 Performance and efficiency of vehicle operation is monitored during use
	5.2 Defective/irregular performance and malfunctions are reported to relevant personnel
	5.3 Forklift records are maintained/updated in accordance with workplace procedures and legislative requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID2010A Operate a forklift.

Links

Companion Volume implementation guides are found in VETNet - https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851

Assessment Requirements for TLID2010 Operate a forklift

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- checking and replenishing fluids, and carrying out lubrication processes
- communicating and working effectively with others
- completing relevant documentation
- ensuring forklift and its equipment are maintained in terms of service schedule and standard operating procedures
- identifying points of balance and safe lifting positions on a range of loads when operating a forklift (including accessories)
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring performance of forklift and its equipment, and taking appropriate action as required
- monitoring and prioritising work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with standard operating procedures
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment conforming to industry and WHS/OHS standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

© Commonwealth of Australia, 2025 Future Skills Organisation

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- efficient driving techniques
- engine power management and safe operating strategies
- forklift controls, instruments and indicators, and their use
- forklift handling procedures
- high risk work licence requirements
- operating hazards and related defensive driving and hazard control techniques
- operational emergency procedures
- pre-operational checks carried out on forklift and related action
- principles of stress management when driving a forklift
- relevant duty of care requirements for operating a forklift
- relevant WHS/OHS and environmental procedures and regulations
- site layout and obstacles
- workplace operating procedures.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

UETTDREL14A Working safely near live electrical apparatus as a non-electrical worker

Modification History

Not applicable.

Unit Descriptor

Unit Descriptor

1) Scope:

1.1) Descriptor

This Competency Standard Unit covers compliance with working safely up to the defined "safe approach distance" near energised electrical apparatus (inc. electrical powerlines) for non-electrical workers. It includes work functions that may be performed, such as vegetation control, scaffolding, rigging, painting, and/or any other activity that requires working safely and complying with requirements and/or established procedures near live electrical apparatus by a non-electrical worker. Also included is the preparation of risk assessment control measures that encompass job safety assessment. It does not include any work that is or may be performed by other competent operatives within the defined "safe working zone". The defined "safe working zone" is that so defined by relevant State or Territory regulatory agencies/bodies, local government legislation, Industry bi-partite body – Guidelines/Codes of Practices or other related requirements for Safe work and access near live Electrical and Mechanical Apparatus.

Application of the Unit

Application of the Unit

2)

This competency standards unit shall apply to Transmission, Distribution, Rail Traction, Telecommunications and Vegetation Management Control industry sectors.

© Commonwealth of Australia, 2025 Future Skills Organisation

Licensing/Regulatory Information

License to practice **3)**

The skills and knowledge described in this unit may require a licence/registration to practice in the work place subject to regulations for undertaking of electrical work. Practice in workplace and during training is also subject to regulations directly related to Occupational Health and Safety, electricity/telecommunications/gas/water industry safety and compliance, industrial relations, environmental protection, anti discrimination and training. Commonwealth, State/Territory or Local Government legislation and regulations may exist that limits the age of operating certain equipment.

Pre-Requisites

Prerequisite Unit(s) **4)**

Competencies **4.1)**

Granting of competency in this unit shall be made only after competency in the following unit(s) has/have been confirmed.

Where pre-requisite pathways have been identified. All competencies in the Common Unit Group must be have been completed plus all the competencies in one (1) of the identified Pathway Unit Group(s):

There are no prerequisite competencies to this unit.

Literacy and numeracy skills **4.2)**

Participants are best equipped to achieve this unit if they have reading, writing and numeracy skills indicated by the following scales. Description of each scale is given in Volume 2, Part 3 “Literacy and Numeracy”.

Reading 3 Writing 3 Numeracy 3

© Commonwealth of Australia, 2025 Future Skills Organisation

Employability Skills Information

Employability Skills **5)**

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this unit of competency is packaged will assist in identifying Employability Skill requirements.

Elements and Performance Criteria Pre-Content

6) Elements describe the essential outcomes of a competency standard unit

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Prepare to work safely near live electrical apparatus as non-electrical worker	1.1 Instructions related to the work to be performed safely near live electrical apparatus as non-electrical worker are received and confirmed.
	1.2 Relevant requirements and established procedures to be followed and, relevant personnel to be communicated with for the work to be performed are identified.
	1.3 OHS policies and procedures to be followed for the work to be performed are received and confirmed.
	1.4 Suggestions to assist in meeting the safety requirements for working near live electrical apparatus as a non-electrical worker are made to others involved in the work.
	1.5 Hazards are identified, OHS risks assessed and control measures are prioritised, implemented and monitored including emergency exits kept

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA	
		clear according to established procedures.
	1.6	Scope of responsibility and process of relevant work permit(s) issue is identified, received and confirmed according to requirements and established procedures.
	1.7	Relevant responsibility associated with First Aid, Safety Observers and/or other related work safety procedures at the worksite are identified in accordance with requirements and established procedures to ensure safety measures are followed in the instance of an incident.
	1.8	Processes for identifying and reporting client issues to appropriate personnel in accordance with industry/acceptable /community standards are identified.
	1.9	Site and the work schedule to be prepared are confirmed according to given instructions for a quality outcome and to minimise risk and damage to property, commerce, stock and individuals in accordance and established procedures.
	1.10	Electricity infrastructure assets, related voltages and requirements for working safely near live electrical apparatus as non-electrical worker are identified.
	1.11	Safe approach distances including any zones thereof that may apply, as defined in industry guidelines, requirements and/or established procedures for the intended work are confirmed.
2 Carry out the work safely near live electrical apparatus as non-electrical worker.	2.1	OHS principles and practices to reduce the incidents of accidents are identified in accordance with given instructions, requirements and/or established procedures.
	2.2	Working safely and complying with all safety requirements for working near live electrical apparatus as a non-electrical worker are followed in accordance with given instructions and

© Commonwealth of Australia, 2025 Future Skills Organisation

ELEMENT	PERFORMANCE CRITERIA	
		established routines/procedures.
	2.3	Processes for monitoring and reporting/referring hazards and OHS risks to the immediate authorised personnel for directions according to established procedures are followed.
	2.4	Non-routine events are referred to the immediate authorised personnel for directions according to established procedures.
	2.5	Unexpected events associated with working safely near live electrical apparatus as a non-electrical worker are responded to using acquired known solutions and skills related to routine procedures to ensure work instructions and established procedures are met.
3 Complete the work safely near live electrical apparatus as non-electrical worker.	3.1	Work schedule and anomalies for completion and checking of the work are reported to authorised personnel in accordance with established procedures.
	3.2	Processes for reporting to authorised personnel accidents and/or incidents are confirmed in accordance with established procedures.
	3.3	Requirements for returning work permit(s) and/or access authorisation permits are confirmed.
	3.4	Appropriate personnel are notified of work completion according to established procedures.
	3.5	Works completion records, report forms/data sheets are completed accurately in accordance with given instructions and established procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

8) Essential Knowledge and Associated Skills (EKAS): This describes the essential

© Commonwealth of Australia, 2025 Future Skills Organisation

REQUIRED SKILLS AND KNOWLEDGE

skills and knowledge and their level, required for this unit.

Evidence shall show that knowledge has been acquired of working safely near live electrical apparatus as non electrical worker.

All knowledge and skills detailed in this unit should be contextualised to current industry practices and technologies.

KS01-TEL14A Power Line Safety – Non Electrical Workers

Evidence shall show an understanding of power line safety – non electrical workers to an extent indicated by the following aspects:

T1 Basic electrical principles encompassing:

- Fundamental units - basic measurement of units
- Electrical characteristics of material: characteristics of solid materials, insulators; terms electrical charge, electrical current, electromagnetic forces
- Nature of electrical current and change - basic rules of electrical current flow
- Sources of Electricity: basic fundaments of alternating current, direct current and single EMF source (induction)
- A simple circuit - circuit protection devices used on the network, effects of an open circuit, a closed circuit and a short circuit and earthing – using the ground as a form of conductor to return current back to a source
- Resistance - relationship between voltage and current and resistance (Ohms Law)
- Effects of current - physiological effects and protection for physiological effects; basic principle by which electrical current can result in the production of heat, light and electromagnetic fields and typical effects of current.
- Three phase and single phase power systems: star delta configurations, three phase star connections, relationship between line and phase voltages, three phase 4 wire systems - purpose of the neutral
- Consequences of short circuits - arc flash, ESI Protection schemes
- Magnetism - magnetic field patterns, concepts of electromagnetism, effects of electromagnetism and magnetic fields around straight conductors
- Hazards encountered in an ESI environment - touch and step potentials, electric shock, fire, chemicals, falls, safe use of tools and equipment.

T2 Transmission, distribution and rail power systems encompassing:

- Relationship between the transmission, distribution and rail/tram system within an overall power system - different organisations responsible for generation, transmission, distribution and rail/tram and, how they correlate and their functions
- Characteristics of a transmission, a distribution and a rail system - principal components, typical voltage levels and methods of transmission and distribution including grid type transmission systems, radial, parallel and ring main feeders
- Relationship between an overhead and underground supply systems within an overall power system - advantages/disadvantages, applications.
- Single line drawings and layouts - drawings and layouts of transmission and distribution systems including, radial, parallel and ring main feeders and the HV

© Commonwealth of Australia, 2025 Future Skills Organisation

REQUIRED SKILLS AND KNOWLEDGE

equipment associated with substations

T3 Fundamentals for working safely near live electrical apparatus for non-electrical worker encompassing:

- Standards, guidelines/codes of practice, State/Territory/local government legislation, supply authority regulations and or enterprise requirements including relevant certification and licensing, applicable to working safely up to the defined "safe working zone" near energised electrical apparatus (inc. electrical powerlines) for non-electrical worker
- Definitions of terminologies - 'safe working zone', 'risk assessment', 'safe approach distances zones', 'safe working distances',' work permits', access authorisation permits', 'Technical standards', 'isolation procedures' and compliance requirements'
- OHS policies and procedures for working safely - duties of a safety observer, permit to work systems and isolation procedures, safe application of different types of tools and equipment and operation of mobile plant and machinery (e.g. EWP) near live electrical apparatus
- Techniques and precautions in undertaking different work functions and working safely up to the defined "safe working zone" near energised electrical apparatus (inc. electrical powerlines) for non-electrical worker (work functions that may be performed include, vegetation control, scaffolding, rigging, painting, and/or any other activity that requires working safely near live electrical apparatus by a non-electrical worker)

Evidence Guide

EVIDENCE GUIDE

9) This provides essential advice for assessment of the competency standard unit and must be read in conjunction with the Performance Criteria and the range statement of the competency standard unit and the Training Package Assessment Guidelines.

The Evidence Guide forms an integral part of this Competency Standard Unit and shall be used in conjunction with all component parts of this unit and, performed in accordance with the Assessment Guidelines of this Training Package.

Overview of Assessment	**9.1)**
	Longitudinal competency development approaches to assessment, such as Profiling, require data to be reliably gathered in a form that can be consistently interpreted over time. This approach is best utilised in Apprenticeship programs and reduces assessment

© Commonwealth of Australia, 2025 Future Skills Organisation

intervention. It is the Industry's preferred model for apprenticeships. However, where summative (or final) assessment is used it is to include the application of the competency in the normal work environment or, at a minimum, the application of the competency in a realistically simulated work environment. It is recognised that, in some circumstances, assessment in part or full can occur outside the workplace. However, it must be in accord with Industry and, Regulatory policy in this regard.

Methods chosen for a particular assessment will be influenced by various factors. These include the extent of the assessment, the most effective locations for the assessment activities to take place, access to physical resources, additional safety measures that may be required and the critical nature of the competencies being assessed.

The critical safety nature of working with electricity, electrical equipment, gas or any other hazardous substance/material carries risk in deeming a person competent. Hence, sources of evidence need to be 'rich' in nature so as to minimise error in judgment.

Activities associated with normal every day work have a bearing on the decision as to how much and how detailed the data gathered will contribute to its 'richness'. Some skills are more critical to safety and operational requirements while the same skills may be more or less frequently practiced. These points are raised for the assessors to consider when choosing an assessment method and developing assessment instruments. Sample assessment instruments are included for Assessors in the Assessment Guidelines of this Training Package.

Critical aspects of evidence required to demonstrate competency in this unit

9.2)

Before the critical aspects of evidence are considered all prerequisites shall be met.

Evidence for competence in this unit shall be considered holistically. Each element and associated Performance Criteria shall be demonstrated on at least two occasions in accordance with the "Assessment Guidelines – UET12". Evidence shall also comprise:

- A representative body of Performance Criteria demonstrated within the timeframes typically expected of the discipline,

© Commonwealth of Australia, 2025 Future Skills Organisation

work function and industrial environment. In particular this shall incorporate evidence that shows a candidate is able to:

- Implement Occupational Health and Safety workplace procedures and practices including the use of risk control measures as specified in the Performance Criteria and range; and
- Apply sustainable energy principles and practices as specified in the Performance Criteria and range; and
- Demonstrate an understanding of the essential knowledge and associated skills as described in this unit to such an extent that the learner's performance outcome is reported in accordance with the preferred approach; namely a percentile graded result, where required by the regulated environment; and
- Demonstrate an appropriate level of employability skills; and
- Conduct work observing the relevant Anti Discrimination legislation, regulations, policies and workplace procedures; and

- Demonstrated performance across a representative range of contexts from the prescribed items below:

Range of tools/equipment/materials/procedures/workplaces/other variables		
Group No	**The minimum number of items on which skill is to be demonstrated**	**Item List**
A	All of the following:	Confirmation of the "safe working zone" for Safe work and access near live Electrical Apparatus Identification of the relevant technical standards. Acts, regulations and codes/guidelines Identification of established (Enterprise) procedures
B	All of the following:	Confirmation of the principles of electricity,

© Commonwealth of Australia, 2025 Future Skills Organisation

		the three phase power system, electric shock and resuscitation, power system Recognition of aerial voltage systems Identification of Low Voltage Aerial Circuits Identification of High Voltage
C	All of the following:	Procedures in the event of an incident Events constituting an incident Procedures for responding to incidents Hazard and risk assessment procedure Conduct Work-site Hazard Assessment Confirmation of essential components of Hazard Assessment Checks Applying Hazard Identification in Electrical Work Confirmation of the Basic Safety Principles for Work on Electrical works Hazard Identification and Risk Assessment Hazard Control Risk Assessment and Management (JSAs) Control The Hierarchy of Controls including Evaluation, Worksite Hazard and Risk

© Commonwealth of Australia, 2025 Future Skills Organisation

		Assessment Checklist, Pre-job Hazard Assessment Check (HAC) Items, Planned Inspection and Pre-Work Hazard Risk Assessment Form
D	All of the following:	Use of work permits and/or authorisation permits Sustainable energy principles and practices Possible affects of weather conditions on working near electrical apparatus as a non-electrical worker
E	At least one occasion	Dealing with an unplanned event by drawing on essential knowledge and associated skills to provide appropriate solutions incorporated in the holistic assessment with the above listed items.

Context of and specific resources for assessment **9.3)**

This unit should be assessed as it relates to normal work practice using procedures, information and resources typical of a workplace. This should include:

- OHS policy and work procedures and instructions.
- Suitable work environment, facilities, equipment and materials to safely undertake actual work near live electrical apparatus

In addition to the resources listed above, in context of and specific resources for assessment, evidence should show demonstrated

© Commonwealth of Australia, 2025 Future Skills Organisation

competency working below ground, in limited spaces, with different structural/construction types and method and in a variety of environments.

Method of assessment

9.4)

This Competency Standard Unit shall be assessed by methods given in Volume 1, Part 3 “Assessment Guidelines”.

Note:

Competent performance with inherent safe working practices is expected in the Industry to which this Competency Standard Unit applies. This requires that the specified essential knowledge and associated skills are assessed in a structured environment which is primarily intended for learning/assessment and incorporates all necessary equipment and facilities for learners to develop and demonstrate the essential knowledge and associated skills described in this unit.

Concurrent assessment and relationship with other units

9.5)

For optimisation of training and assessment effort, competence in this unit is not recommended to be assessed concurrently with any other unit.

Range Statement

RANGE STATEMENT

10) This relates to the competency standard unit as a whole providing the range of contexts and conditions to which the Performance Criteria apply. It allows for different work environments and situations that will affect performance.

This Competency Standard Unit shall be demonstrated in relation to safe working so defined by relevant State or Territory regulatory agencies/bodies, local government legislation, Industry bi-partite body – Guidelines/Codes of Practices or other related requirements for Safe work and access near live Electrical Apparatus.

Work functions that may be performed, such as vegetation control, operation of cranes, elevating work platforms, excavators, concrete pumps etc, scaffolding,

© Commonwealth of Australia, 2025 Future Skills Organisation

RANGE STATEMENT

rigging, painting, and/or any other activity that requires working safely and complying with requirements and/or established procedures near live electrical apparatus by a non-electrical worker/

Working safely up to the defined “safe working zone” near energised electrical apparatus (inc. electrical powerlines) for non-electrical worker including an understanding of risk assessment control measures that encompass job safety assessment but excluding any work that is or may be performed by other competent operatives within the defined “safe working zone”.

Safe use of plant, equipment and tools within electrical environments including but not limited by the electricity supply infrastructure assets, infrastructure constructions and excavations including an understanding of safe approach distances zones/Safe Working Clearance, work permit(s) and/or access authorisation permits, technical standards and Industry Guidelines, rural applications, road construction, pavements and effect of inclement weather

The following constants and variables included in the element/Performance Criteria in this unit are fully described in the Definitions Section 1 of this volume and form an integral part of the Range Statement of this unit:

- Appropriate and relevant persons
- Appropriate authorities
- Assessing risk
- Authorisation
- Drawings and specifications
- Emergency
- Established procedures
- Hazards
- Identifying hazards
- Legislation
- Notification
- OHS practices
- OHS issues
- Permits and/or permits to work
- Work clearance systems

ICT Information and Communications Technology

Modification History

Release Number	***Release Date***	***Comments***
Release 6.1	October 2020	SSO (Skills Service Organisation) upgrade. **Qualifications** Minor update to one ICT Information and Communications Technology Training Package version 6.0 qualification: • ICT30120 Certificate III in Information Technology Minor update to three ICT Information and Communications Technology Training Package version 6.0 qualifications: • ICT40120 Certificate IV in Information Technology • ICT50120 Diploma of Information Technology • ICT60120 Diploma of Information Technology **Skill sets** Two new skill sets were created: • ICTSS00108 Digital Skills in Small Business Skill Set • ICTSS00109 Entry to Tech Skill Set Minor update to one ICT Information and Communications Technology Training Package version 6.0 skill set: • ICTSS00099 Cloud Design and Configuration Skill Set **Units of competency** Minor update to six ICT Information and Communications Technology Training Package version 6.0 units of competency: • ICTCYS406 Respond to cyber security incidents • ICTCYS601 Create cyber security standards for organisations • ICTICT216 Design and create basic organisational documents • ICTNWK544 Design and implement a security perimeter for ICT networks • ICTPRG549 Apply intermediate object-oriented language skills

		• ICTSAS446 Fault find and troubleshoot ICT equipment, hardware and software problems • ICTSAS524 Develop, implement and evaluate an incident response plan • ICTSAS526 Review and update disaster recovery and contingency plans • ICTSAS528 Review and develop ICT maintenance strategy • ICTSAS529 Prioritise ICT change requests • ICTWEB304 Build simple web pages • ICTWEB305 Produce digital images for the web • ICTWEB432 Design website layouts • ICTWEB433 Confirm accessibility of websites • ICTWEB434 Transfer content to websites • ICTWEB435 Maintain website performance • ICTWEB436 Monitor traffic and compile website traffic reports • ICTWEB437 Create website testing procedures • ICTWEB438 Conduct operational acceptance tests of websites • ICTWEB439 Confirm basic website security • ICTWEB440 Use web authoring tools • ICTWEB441 Produce basic client-side script • ICTWEB442 Produce interactive web animation • ICTWEB443 Implement search engine optimisations • ICTWEB445 Implement content management systems • ICTWEB446 Integrate social web technologies • ICTWEB447 Build basic website using development software and ICT tools • ICTWEB448 Confirm website content meets technical protocols and standards • ICTWEB449 Confirm website access and useability • ICTWEB450 Evaluate and select a web hosting service • ICTWEB451 Apply structured query language in relational databases • ICTWEB452 Create a markup language document • ICTWEB513 Build dynamic websites • ICTWEB514 Create dynamic web pages • ICTWEB517 Create web-based programs • ICTWEB518 Build a document using extensible markup language • ICTWEB519 Develop complex web page layouts • ICTWEB520 Develop complex cascading style sheets • ICTWEB521 Customise complex ICT content management systems • ICTWEB522 Develop website information architecture • ICTWEB523 Manage transactions using site server tools

© Commonwealth of Australia, 2025 Future Skills Organisation

		• ICTWEB524 Analyse information and assign meta tags • ICTWEB525 Implement quality assurance process for websites • ICTWEB526 Implement and use web services • ICTWEB527 Research and apply emerging web technology trends 12 units of competency: • ICTGAM535 Develop complex 3-D software for games and interactive media • ICTICT519 Develop detailed component specifications from project specifications • ICTNWK423 Manage network and data integrity • ICTNWK540 Design, build and test network servers • ICTNWK546 Manage network security • ICTPMG505 Manage ICT projects • ICTPMG613 Manage ICT project planning • ICTPRG605 Manage development of technical solutions from business specifications • ICTSAS525 Develop and conduct client acceptance test • ICTSAS527 Manage client problems • ICTSAS602 Implement change management processes • ICTWEB451 Apply structured query language in relational databases were updated and supersede 12 units of competency from the ICT Information and Communications Training Package Version 5.1 and are not equivalent to their previous versions: • ICTGAM507 Develop intermediate 3-D software for games and interactive media • ICTPMG504 Prepare project specifications • ICTPMG610 Develop a project management plan • ICTPMG802 Manage a telecommunications project • ICTPRG425 Use structured query language • ICTTEN501 Provide consultancy and technical support in the customer premises equipment sector • ICTTEN504 Acceptance test new systems and equipment • ICTTEN511 Administer a data communications network • ICTTEN514 Install, configure and test a server • ICTTEN516 Produce technical solutions from business specifications • ICTTEN605 Implement planned network changes with minimal impact to the customer • ICTTEN811 Evaluate and apply network security.

© Commonwealth of Australia, 2025 Future Skills Organisation

		38 units of competency were deleted from the ICT Information and Communications Training Package Version 5.1: • ICTDBS408 Link an RFID system to a database • ICTGAM415 Develop simple environments for 3-D games • ICTGAM417 Apply digital effects to interactive products • ICTGAM506 Create complex code for mobile game devices • ICTICT402 Determine project specifications and secure client agreement • ICTICT412 Coordinate and maintain ICT work teams • ICTICT416 Contribute to the development of strategic plans • ICTICT512 Plan process re-engineering strategies for business • ICTICT802 Direct ICT services • ICTICT804 Direct ICT in a supply chain • ICTICT805 Direct ICT procurement • ICTICT806 Direct outsourced ICT services • ICTICT807 Direct research and business response to new ICT technology • ICTICT810 Synchronise ICT projects • ICTICT813 Manage ICT services • ICTNWK414 Create a common gateway interface script • ICTNWK521 Install, configure and test a payment gateway • ICTPMG601 Establish ICT project governance • ICTPMG606 Manage ICT project quality • ICTPMG607 Manage and control ICT project risks • ICTPRG416 Manage a software component re-use library • ICTPRG428 Use regular expressions in programming languages • ICTPRG512 Prepare for the build phase of an ICT system • ICTPRG513 Coordinate the build phase of an ICT system • ICTPRG525 Build Java applets • ICTPRG526 Maintain functionality of legacy code programs • ICTSAS402 Implement configuration management strategies • ICTSAS403 Review site environmental factors prior to ICT system implementation • ICTSAS404 Acquire ICT system components • ICTSAS407 Conduct pre-installation audit for software installation • ICTSAS408 Complete data transition in data migration process • ICTSAS409 Manage risks involving ICT systems and technology • ICTSAS507 Implement and evaluate systems for regulatory and standards compliance • ICTSUS802 Conduct a business case study for integrating

© Commonwealth of Australia, 2025 Future Skills Organisation

		sustainability in ICT planning and design projects • ICTSUS803 Research strategies using SAP solutions for sustainable economic and environmental outcomes • ICTSUS808 Plan and manage virtualisation for ICT sustainability • ICTWEB419 Develop guidelines for uploading information to a website • ICTWEB512 Administer business websites and servers.
Release 5.1	January 2020	Minor updates to Companion Volume
Release 5.0	May 2019	**Qualifications** Six qualifications were updated from the ICT Information and Communications Technology Training Package Version 4.0 and supersede but are not equivalent to their previous versions: • ICT20219 Certificate II in Telecommunications Network Build and Operation supersedes ICT20215 Certificate II in Telecommunications Network Build and Operate and is deemed not equivalent (updated to increase core unit requirement from five to six and to decrease elective unit requirement from seven to six; remove two elective units of competency and insert four elective units of competency; modify title, packaging rules and groups.) • ICT20319 Certificate II in Telecommunications Technology supersedes ICT20315 Certificate II in Telecommunications Technology and is deemed not equivalent (updated to increase core unit requirement from six to seven and to decrease elective unit requirement from nine to six; insert one elective unit of competency; modify packaging rules and groups to introduce two specialisations.) • ICT30419 Certificate III in Telecommunications Network Build and Operation supersedes ICT30415 Certificate III in Telecommunications Network Build and Operate and is deemed not equivalent (updated to increase core unit requirement from five to six and to decrease elective core unit requirement from nine to eight; remove one elective unit of competency and insert 18 elective units of competency; modify title, packaging rules and groups.) • ICT30519 Certificate III in Telecommunications Technology supersedes ICT30515 Certificate III in Telecommunications Technology and is deemed not equivalent (updated to decrease core unit requirement from seven to six and to increase elective unit requirement from nine to ten; remove 12 elective units of competency and insert 27 elective units of competency; modify packaging rules and groups to introduce four specialisations.) • ICT41119 Certificate IV in Telecommunications Network Design supersedes ICT41115 Certificate IV in Telecommunications

© Commonwealth of Australia, 2025 Future Skills Organisation

		Network Design and is deemed not equivalent (updated to decrease core unit requirement from eight to six and to increase elective unit requirement from eight to 10; remove one elective unit of competency and insert nine elective units of competency; modify packaging rules and groups and introduce qualification entry requirements.) • ICT41219 Certificate IV in Telecommunications Engineering Technology supersedes ICT41215 Certificate IV in Telecommunications Engineering Technology and is deemed not equivalent (updated to decrease core unit requirement from eight to five and increase the elective unit requirement from eight to 12; remove four elective units and insert ten elective units; modify packaging rules and groups to introduce one specialisation and introduce qualification entry requirements.) Two qualifications were deleted from the ICT Information and Communications Technology Training Package: • ICT30215 Certificate III in Telecommunications Digital Reception Technology • ICT30315 Certificate III in Telecommunications Rigging Installation. Three qualifications were updated as part of an SSO upgrade to reflect changed elective units: • ICT30118 Certificate III in Information, Digital Media and Technology • ICT40215 Certificate IV in Information Technology Support (equivalent and non-equivalent elective units updated) • ICT40418 Certificate IV in Information Technology Networking (non-equivalent elective unit updated). **Units of competency** 13 new units of competency were newly created for this ICT Information and Communications Technology Training Package Version 5.0: • ICTBWN306 Use radio frequency measuring instruments • ICTBWN307 Use optical measuring instruments • ICTCBL248 Install and terminate hard-line coaxial cable • ICTCBL331 Conduct basic identification and fault-finding within cabling networks and customer equipment • ICTCBL332 Locate, identify and rectify copper cable faults • ICTDRE308 Install a cable broadband multi-dwelling unit system

© Commonwealth of Australia, 2025 Future Skills Organisation

		• ICTTEN210 Install underground telecommunications infrastructure
		• ICTTEN211 Work effectively in a telecommunications network environment
		• ICTTEN315 Determine and apply technologies within a telecommunications system
		• ICTTEN316 Conduct basic tests and analyses of telecommunications copper cabling
		• ICTTEN317 Locate, identify and rectify telecommunications network faults
		• ICTTEN435 Solve electrical-based telecommunications circuitry and cabling problems
		• ICTWOR308 Provide customer service to telecommunications customers.
		
		42 units of competency were updated from the ICT Information and Communications Technology Training Package Version 4.0:
		
		• 27 units supersede and are equivalent to their previous versions:
		  • ICTCBL239 Install customer cable support systems (recoded from ICTCBL201)
		  • ICTCBL240 Place and secure customer cable (recoded from ICTCBL202)
		  • ICTCBL241 Terminate metallic conductor customer cable recoded from ICTCBL203
		  • ICTCBL242 Install functional and protective telecommunications earthing system (recoded from ICTCBL204)
		  • ICTCBL246 Install, maintain and modify customer premises communications cabling: ACMA Restricted Rule (recoded from ICTCBL236)
		  • ICTCBL247 Install, maintain and modify customer premises communications cabling: ACMA Open Rule (recoded from ICTCBL237)
		  • ICTCBL252 Joint and terminate coaxial cable (recoded from ICTCBL209)
		  • ICTCBL253 Construct underground telecommunications infrastructure (recoded from ICTTCBL213)
		  • ICTCBL254 Joint metallic conductor cable in access network (recoded from ICTCBL215)
		  • ICTCBL324 Cut over new systems and equipment on customer premises (recoded from ICTCBL312)
		  • ICTCBL325 Maintain cable network (recoded from ICTCBL315)
		  • ICTCBL326 Cut over metallic conductor cable in the access network (recoded from ICTCBL317)

© Commonwealth of Australia, 2025 Future Skills Organisation

		• ICTCBL334 Install underground enclosures and conduit (recoded from ICTCBL307) • ICTCBL335 Construct aerial cable supports (recoded from ICTCBL309 • ICTCBL336 Install and cut over metallic conductor cable to access network cabinet (recoded from ICTCBL318) • ICTCMP203 Perform restricted customer premises broadband cabling work: ACMA Restricted Rule (recoded from ICTCMP202) • ICTDRE314 Design communications wiring systems for customer premises (recoded from ICTDRE304) • ICTOPN405 Install and test a dense wavelength division multiplexing system (recoded from ICTOPN401) • ICTRFN407 Conduct radio frequency measurements (recoded from ICTRFN401) • ICTTEN312 Install telecommunications network equipment (recoded from ICTTEN302). • ICTTEN313 Work on and resolve recurrent network faults (recoded from ICTTEN303) • ICTTEN319 Recover customer premises equipment (recoded from ICTTEN304) • ICTTEN320 Commission an electronic unit (recoded from ICTTEN306) • ICTTEN321 Maintain an electronic system (recoded from ICTTEN308) • ICTTEN322 Provide infrastructure for telecommunications network customer equipment (recoded from ICTTEN309) • ICTTEN432 Identify requirements for customer telecommunications equipment (recoded from ICTTEN401). • ICTTEN433 Install configuration programs on PC based customer equipment (recoded from ICTTEN405) • 15 units supersede but are not equivalent to their previous versions: • ICTBWN308 Work safely on live optical fibre installations (recoded from ICTBWN304) • ICTBWN309 Perform tests on optical communication system and components (recoded from ICTBWN301) • ICTCBL249 Haul underground cable for installation and maintenance work (recoded from ICTCBL207) • ICTCBL250 Haul and fix aerial cable (recoded from ICTCBL214) • ICTCBL251 Install aerial and underground cable lead-ins (recoded from ICTCBL220) • ICTCBL322 Install, test and terminate optical fibre cable on

© Commonwealth of Australia, 2025 Future Skills Organisation

		customer premises recoded from ICTCBL302) • ICTCBL323 Test cables and systems on customer premises (recoded from ICTCBL304) • ICTCBL329 Install underground cable for communications applications (recoded from ICTCBL308) • ICTCBL330 Splice and terminate optical fibre cable for telecommunications projects (recoded from ICTCBL208) • ICTCBL333 Install aerial cable for communications applications (recoded from ICTCBL310) • ICTOPN404 Test optical communications systems and components (recoded from ICTOPN402) • ICTTEN208 Use electrical skills when working with telecommunications networks (recoded from ICTTEN201) • ICTTEN318 Inspect, clean and handle optical fibre cable and connectors (recoded from ICTTEN311) • ICTWHS205 Work safely near power infrastructure at a telecommunications workplace (recoded from ICTWHS203) • ICTWOR202 Work effectively in the digital and telecommunications industry (recoded from ICTWOR201). Two units of competency were deleted from the ICT Information and Communications Technology Training Package Version 4.0: • ICTBWN305 Use optical and radio frequency measuring instruments • ICTTEN305 Refurbish customer premises equipment. Four new skill sets were newly created from the ICT Information and Communications Technology Training Package Version 4.0: • ICTSS00087 Basic Technician Network Build and Operate Skill Set • ICTSS00096 Technician Hybrid Fibre Coaxial Skill Set • ICTSS00097 Telecommunications Customer Service Technician HFC Technician Skill Set • ICTSS00098 Network Technician HFC Skill Set. Ten skill sets were updated and are deemed not equivalent to ICT Information and Communications Technology Training Package Version 4.0: • ICTSS00084 Basic Open Cabler Registration Skill Set supersedes ICTSS00062 Basic Open Cabler Registration Skill Set • ICTSS00085 Basic Restricted Cabler Registration Skill Set

© Commonwealth of Australia, 2025 Future Skills Organisation

		supersedes ICTSS00063 Basic Restricted Cabler Registration Skill Set • ICTSS00088 Advanced Telecommunications Rigging Installation Skill Set supersedes ICTSS00060 Advanced Telecommunications Rigging Installation Skills Set • ICTSS00089 Basic Telecommunications Rigging Installation Skill Set supersedes ICTSS00064 Basic Telecommunications Rigging Installation Skill Set • ICTSS00090 Advanced IoT Installation Skill Set supersedes ICTSS00067 Convergent Technology Skill Set • ICTSS00091 Radio Technician Skill Set supersedes ICTSS00074 Radio Technician Skill Set • ICTSS00092 Technical Help Desk supersedes ICTSS00075 Technical Help Skill Set • ICTSS00093 Telecommunications Linesworker HFS Skill Set supersedes ICTSS00093 Telecommunications Linesworker Skill Set • ICTSS00094 Technician Fibre Skill Set supersedes ICTSS00081 Technician Fibre Skill Set • ICTSS00095 Fibre Splicer Skill Set supersedes ICTSS00082 Fibre Splicer Skill Set. Ten skill sets were updated to include unit code updates: • ICTSS00058 ACMA Advanced Cabler Registration Skill Set • ICTSS00065 Civil Works – Installation of Pit and Pipe and FDH Skill Set • ICTSS00066 Commercial Digital Television Antenna Systems Installation Skill Set • ICTSS00069 Domestic Digital Television Antenna Installation Skill Set • ICTSS00071 IP Convergence Installations for Home and SME Skill Set • ICTSS00076 Wireless LAN and IP Network Installation Skill Set • ICTSS00077 Telecommun8ications Linesworker Copper Skill Set • ICTSS00078 Telecommunications Linesworker Fibre Skill Set • ICTSS00080 Copper Cable Jointer Skill Set • ICTSS00083 Underground Installations Skill Set. Non-endorsable units of competency 21 units of competency were updated to fix minor typographical errors and are equivalent to ICT Information and Communications Technology Training Package Version 4.0:

© Commonwealth of Australia, 2025 Future Skills Organisation

		• ICTCBL205 Joint metallic conductor cable on customer premises • ICTCBL206 Alter services to existing cable system • ICTCBL210 Install a telecommunications service to a building • ICTCBL238 Install, maintain and modify customer premises communications cabling: ACMA Lift Rule • ICTCBL301 Install, terminate and certify structured cabling installation • ICTCBL303 Install and terminate coaxial cable • ICTCBL305 Hand over cable systems and equipment • ICTCBL306 Locate and identify cable system faults • ICTCBL313 Modify and cutover cable • ICTCBL316 Install ribbon fibre cable in the FTTX distribution network • ICTCBL319 Rearrange large size copper cable • ICTDRE301 Install digital reception equipment • ICTDRE303 Install a complex digital reception system • ICTPMG201 Prepare site for support installation • ICTRFN406 Maintain hybrid fibre coaxial broadband cable network • ICTTEN202 Use hand and power tools • ICTTEN307 Repair and replace telecommunications network hardware • ICTWOR307 Collect and analyse technical information • ICTWHS204 Follow work health and safety and environmental policy and procedures • ICTSAS410 Identify and resolve client ICT problems • ICTPRG415 Apply skills in object-oriented design
Release 4.0	November 2018	**Qualifications** Nine qualifications were updated from the ICT Information and Communications Technology Training Package Version 3.1: • ICT30118 Certificate III in Information, Digital Media and Technology supersedes ICT30115 Certificate III in Information, Digital Media and Technology and is equivalent (updated to change one out of six core units of competency) • ICT40118 Certificate IV in Information Technology supersedes ICT40115 Certificate IV in Information Technology and is not equivalent (updated to change three core units of competency, remove four elective units of competency, insert 17 elective units of competency, and modify the packaging rules and groups) • ICT40418 Certificate IV in Information Technology Networking supersedes ICT40415 Certificate IV in Information Technology Networking and is equivalent (updated to change one out of eight core units of competency)

© Commonwealth of Australia, 2025 Future Skills Organisation

		• ICT40518 Certificate IV in Programming supersedes ICT40515 Certificate IV in Programming and is equivalent (updated to change one out of ten core units of competency) • ICT50118 Diploma of Information Technology supersedes ICT50115 Diploma of Information Technology and is equivalent (updated to change one out of four core units of competency) • ICT50318 Diploma of Information Technology Systems Administration supersedes ICT50315 Diploma of Information Technology Systems Administration and is equivalent (updated to change one out of ten core units of competency) • ICT50418 Diploma of Information Technology Networking supersedes ICT50415 Diploma of Information Technology Networking and is equivalent (updated to change one out of five core units of competency) • ICT50718 Diploma of Software Development supersedes ICT50715 Diploma of Software Development and is equivalent (updated to change one out of ten core units of competency) • ICT50818 Diploma of Systems Analysis and Design supersedes ICT50815 Diploma of Systems Analysis and Design and is equivalent (updated to change one out of nine core units of competency). Three qualifications were deleted from the ICT Information and Communications Technology Training Package: • ICT40615 Certificate IV in Information Technology Testing • ICT40715 Certificate IV in Systems Analysis and Design • ICT80215 Graduate Certificate in Information Technology Sustainability. **Units of competency** Four units of competency were newly created: • ICTICT424 Address cyber security requirements • ICTICT425 Implement WHS, environmental sustainability and anti-discrimination practices in an ICT workplace • ICTICT426 Identify and evaluate emerging technologies and practices • ICTWEB431 Create and style simple markup language documents. 20 units of competency were updated from the ICT Information and Communications Technology Training Package version 3.1: • ICTDBS413 Determine database requirements (updated Title, Application, Elements, and Assessment Requirements to clarify intent) (recoded from ICTDBS401)

© Commonwealth of Australia, 2025 Future Skills Organisation

		• ICTDBS414 Complete database backup and restore (updated Application, Elements, and Assessment Requirements to clarify intent) (recoded from ICTDBS402) • ICTDBS415 Build a database (updated Elements, and Assessment Requirements to clarify intent) (recoded from ICTDBS412) • ICTICT427 Identify, evaluate and apply current industry-specific technologies to meet organisational needs (updated Title, Application, Elements, and Assessment Requirements to clarify intent) (recoded from ICTICT417) • ICTICT428 Select cloud storage solutions (updated Title, Application and Element 1 to clarify intent and scope; integrated Element 3 into Element 2; and updated Foundation Skills to reflect unit content) (recoded from ICTICT423) • ICTICT517 Match ICT needs with the strategic direction of the organisation (updated Title, Application, Elements, and Assessment Requirements to clarify intent and scope) (recoded from ICTICT511) • ICTNWK420 Install and configure virtual machines (updated Assessment Requirements and typographical edit to title to clarify intent) (recoded from ICTNWK402) • ICTNWK421 Install, configure and test network security (updated Application, Elements and Assessment Requirements to clarify intent and scope; and updated Foundation Skills to reflect unit content) (recoded from ICTNWK406) • ICTNWK536 Plan, implement and test enterprise communication solutions (updated Application, Elements and Assessment Requirements to clarify intent and scope; and updated Foundation Skills to reflect unit content) (recoded from ICTNWK501) • ICTPRG430 Apply introductory object-oriented language skills (updated Elements, Foundation Skills and Assessment Requirements to clarify intent) (recoded from ICTPRG406) • ICTPRG531 Prepare for application development using current methods (updated Title, Application, Elements, and Assessment Requirements to modify intent and scope) (recoded from ICTPRG514) • ICTPRG532 Apply advanced object-oriented language skills (updated Elements and Assessment Requirements to clarify intent) (recoded from ICTPRG501) • ICTSAS308 Run standard diagnostic tests (updated Application, Elements and Assessment Requirements to clarify intent and scope) (recoded from ICTSAS301) • ICTSAS519 Perform systems tests (updated unit of competency to incorporate relevant content from ICTSAS401) (recoded from ICTSAS503) • ICTSAS520 Develop detailed test plans (updated unit of competency to reflect industry requirements) (recoded from

© Commonwealth of Australia, 2025 Future Skills Organisation

		ICTSAS513) • ICTSAS521 Perform integration tests (updated unit of competency to reflect industry requirements) (recoded from ICTSAS514) • ICTSAS522 Manage the testing process (updated unit of competency to reflect industry requirements) (recoded from ICTSAS515) • ICTSAS523 Perform stress and load tests on integrated platforms (updated unit of competency to reflect industry requirements) (recoded from ICTSAS516) • ICTSUS808 Plan and manage virtualisation for ICT sustainability (updated unit of competency to reflect industry requirements) (recoded from ICTSUS801) • ICTWEB430 Produce server-side script for dynamic web pages (updated unit of competency to reflect industry requirements) (recoded from ICTWEB415). Six units of competency were deleted from the ICT Information and Communications Technology Training Package: • ICTSAS401 Perform unit test for a class • ICTSAS405 Identify and evaluate ICT industry vendor technologies • ICTSUS401 Install and test renewable energy system for ICT networks • ICTWEB301 Create a simple markup language document • ICTWEB409 Develop cascading style sheets ICTWEB420 Write content for web pages.
Release 3.1		SSO (Skills Service Organisation) upgrades to correct minor mapping errors. **Qualifications** Six qualifications were updated and equivalent to ICT Information and Communications Technology Training Package version 3: • ICT20215 Certificate II in Telecommunications Network Build and Operate (minor update to the specialist stream elective groups) • ICT30415 Certificate III in Telecommunications Network Build and Operate (packaging rules updated to require six electives, minor update to the specialist stream elective groups) • ICT40815 Certificate IV in Digital Media Technologies (updated to clarify packaging rules) • ICT40915 Certificate IV in Digital and Interactive Games

© Commonwealth of Australia, 2025 Future Skills Organisation

		(updated to clarify packaging rules) • ICT80215 Graduate Certificate in Information Technology Sustainability (updated qualification description). Two qualifications were updated and equivalent to ICT Information and Communications Technology Training Package version 3 to reflect changes in unit of competency titles in this release: • ICT50415 Diploma of Information Technology Networking • ICT51015 Diploma of Telecommunications Engineering. **Skill sets** Seven new skill sets: • ICTSS00077 Telecommunications Linesworker Copper Skill Set • ICTSS00078 Telecommunications Linesworker Fibre Skill Set • ICTSS00079 Telecommunications Linesworker HFC Skill Set • ICTSS00080 Copper Cable Jointer Skill Set • ICTSS00081 Technician Fibre Skill Set • ICTSS00082 Fibre Splicer Skill Set • ICTSS00083 Underground Installations Skill Set. Three skill sets were removed: • ICTSS00070 Installing NBN Wireless and Infrastructure Skill Set • ICTSS00072 National Broadband Network Advanced Linesworker/Installer Skill Set • ICTSS00073 National Broadband Network Splicer Skill Set. **Units of competency** Six units of competency were updated and equivalent to ICT Information and Communications Technology Training Package version 3: • ICTCBL236 Install, maintain and modify customer premises communications cabling: ACMA Restricted Rule (updated to include the ACMA's assessment standards for persons seeking registration) • ICTCBL237 Install, maintain and modify customer premises communications cabling: ACMA Open Rule (updated to include the ACMA's assessment standards for persons seeking registration) • ICTNWK405 Build a small wireless local area network (updated to reinstate performance element from ICT Information and

© Commonwealth of Australia, 2025 Future Skills Organisation

		Communications Technology version 2) • ICTTEN512 Design and implement an enterprise voice over internet protocol and a unified communications network (unit of competency title updated to correct typographical error) • ICTWHS204 Follow work health and safety and environmental policy and procedures (updated to correct typographical errors) ICTWOR307 Collect and analyse technical information (updated to correct typographical errors).
Release 3.0	January 2016	**Units of competency** Six new units of competency: • ICTCBL317 Cut over metallic conductor cable in the access network • ICTCBL318 Install and cut over metallic conductor cable to access network cabinet • ICTCBL319 Rearrange large size copper cable • ICTCBL320 Jumper metallic conductor cable in the access network • ICTTEN310 Remove and replace electronic circuit boards in carrier equipment • ICTTEN311 Inspect, clean and handle optical fibre cable and connectors. **Industry Skills Council upgrades** Unit code updates and/or modifications to elective banks in two qualifications: • ICT20215 Certificate II in Telecommunications Network Build and Operate ICT30415 Certificate III in Telecommunications Network Build and Operate.
Release 2.0	January 2016	Qualifications, skill sets and units from ICT10 Integrated Telecommunications Training Package were reviewed and updated to meet Standards for Training Packages and included in the ICT Information and Communications Technology Training Package version 2. **Qualifications** 12 qualifications: • ICT20215 Certificate II in Telecommunications Network Build and Operate • ICT20315 Certificate II in Telecommunications Technology

© Commonwealth of Australia, 2025 Future Skills Organisation

		• ICT30215 Certificate III in Telecommunications Digital Reception Technology • ICT30315 Certificate III in Telecommunications Rigging Installation • ICT30415 Certificate III in Telecommunications Network Build and Operate • CT30515 Certificate III in Telecommunications Technology • ICT41115 Certificate IV in Telecommunications Network Design • ICT41215 Certificate IV in Telecommunications Engineering Technology • ICT51015 Diploma of Telecommunications Engineering • ICT51115 Diploma of Telecommunications Planning and Design • ICT60615 Advanced Diploma of Telecommunications Network Engineering • ICT80615 Graduate Certificate in Telecommunications Network Engineering. **Skill sets** 19 skill sets. **Units of competency** 239 units of competency were updated to meet the Standards for Training Packages. One new unit of competency: • ICTNWK617 Configure and manage a storage area network. **Industry Skills Council upgrades** Unit codes were corrected or updated in 26 qualifications from ICT Information and Communications Technology Training Package version 1. Unit codes were corrected or updated in 27 skill sets from ICT Information and Communications Technology Training Package version 1.
Release 1.0	March 2015	Primary release of restructured ICT Information Communications Technology Training Package. This release of ICT Information Communications Technology Training Package contains 32 qualifications, 27 skill sets and 417 native units of competency comprising 417 units updated to meet

© Commonwealth of Australia, 2025 Future Skills Organisation

		Standards for Training Packages) and 106 imported units. • ICT80115 Graduate Certificate in Information Technology and Strategic Management (updated to meet AQF Requirements) • ICT80215 Graduate Certificate in Information Technology Sustainability (updated to meet AQF Requirements) • ICT80415 Graduate Diploma of Telecommunications Network Engineering (updated to meet AQF Requirements) • ICT80315 Graduate Certificate in Telecommunications – added ICT80515 Graduate Diploma of Telecommunications and Strategic Management – added.

Credit Arrangements

Credit Arrangements for ICT Information and Communications Technology Training Package Version 6.1	
At the time of endorsement of this Training Package no national credit arrangements exist for the ICT Information and Communications Technology Training Package.

ICTSS00031 Application Development Specialist Skill Set

Modification History

Release	Comments
Release 4	This version released with ICT Information and Communications Technology Training Package version 6.0. Release 4 created to reflect the updated units of competency.
Release 3	This version released with ICT Information and Communications Technology Training Package version 4.0. Release 3 created to update the new unit code of ICTPRG532.
Release 2	This version released with ICT Information and Communications Technology Training Package version 2.0 Release 2 created to update typographical error
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Description

This skill set has been designed for individuals who wish to meet competency requirements for working as applications programmers and software development specialists.

Pathways Information

This skill set provides credit towards ICT50718 Diploma of Software Development.

Licensing/Regulatory Information

Not applicable.

© Commonwealth of Australia, 2025 Future Skills Organisation

Skill Set Requirements

ICTPRG532 Apply advanced object-oriented language skills

ICTPRG535 Build advanced user interfaces

ICTPRG536 Design application architecture

ICTPRG537 Implement security for applications

ICTPRG547 Apply advanced programming skills in another language

Target Group

This skill set is for persons who are able to work as application programmers and software developers.

Suggested words for Statement of Attainment

These units of competency from ICT Information and Communications Technology Training Package meet competency requirements for skills in working as a software development specialist.

© Commonwealth of Australia, 2025 Future Skills Organisation

ICTSS00032 Basic Application Development Programmer Skill Set

Modification History

Release	Comments
Release 4	This version released with ICT Information and Communications Technology Training Package version 6.0. Release 4 created to reflect the updated units of competency.
Release 3	This version released with ICT Information and Communications Technology Training Package version 4.0. Release 3 created to update the new unit code of ICTPRG430.
Release 2	This version released with ICT Information and Communications Technology Training Package version 2.0 Release 2 created to update typographical error
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Description

This skill set has been designed for individuals who wish to meet competency requirements for working as basic applications programmers using a range of programming languages

Pathways Information

This skill set provides credit towards ICT40518 Certificate IV in Programming.

Licensing/Regulatory Information

Not applicable.

© Commonwealth of Australia, 2025 Future Skills Organisation

Skill Set Requirements

ICTPRG430 Apply introductory object-oriented language skills

ICTPRG439 Use pre-existing components

ICTPRG440 Apply introductory programming skills in different languages

ICTPRG443 Apply intermediate programming skills in different languages

ICTPRG549 Apply intermediate object-oriented language skills

Target Group

This skill set is for persons who are able to work as basic application programmers.

Suggested words for Statement of Attainment

These units of competency from ICT Information and Communications Technology Training Package meet competency requirements for skills in working as a basic application programmer.

© Commonwealth of Australia, 2025 Future Skills Organisation

ICTSS00034 Basic Web Development Specialist Skill Set

Release	Comments
Release 3	This version released with ICT Information and Communications Technology Training Package version 6.0 Release 2 created to reflect the updated units of competency.
Release 2	This version released with ICT Information and Communications Technology Training Package version 2.0 Release 2 created to update typographical error.
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Description

This skill set provides the requirements to meet competency requirements for skills in reviewing, developing and maintaining a simple websites.

Pathways Information

This skill set provides credit towards ICT30115 Certificate III in Information, Digital Media and Technology.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

BSBEBU401 Review and maintain a website

ICTWEB304 Build simple web pages

ICTWEB434 Transfer content to websites

© Commonwealth of Australia, 2025 Future Skills Organisation

Target Group

This skill set is for persons wanting to develop and maintain a basic website.

Suggested words for Statement of Attainment

These units of competency from ICT Information and Communications Technology and BSB Business Services Training Packages meet competency requirements for skills in developing and maintaining a simple website.

ICTSS00035 Certified IT Network Enterprise, Security or Server Administrator Skill Set

Modification History

Release	Comments
Release 4	This version released with ICT Information and Communications Technology Training Package version 4.0. Release 4 created to reflect the updated units of competency.
Release 3	This version released with ICT Information and Communications Technology Training Package version 4.0. Release 3 created to update the new unit code of ICTNWK421.
Release 2	This version released with ICT Information and Communications Technology Training Package version 2.0 Release 2 created to update typographical error.
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Description

This skill set has been designed for individuals who wish to meet competency requirements for the installation, configuration and administration of enterprise security systems, servers and networks.

Pathways Information

This skill set provides credit towards ICT40418 Certificate IV in Information Technology Networking.

Licensing/Regulatory Information

Not applicable.

© Commonwealth of Australia, 2025 Future Skills Organisation

Skill Set Requirements

ICTNWK421 Install, configure and test network security

ICTNWK423 Manage network and data integrity

Target Group

This skill set is for persons who are able to work as certified IT enterprise, security or server administrators.

Suggested words for Statement of Attainment

These units of competency from ICT Information and Communications Technology Training Package meet competency requirements for skills in administering security, servers or enterprise networks.

© Commonwealth of Australia, 2025 Future Skills Organisation

ICTSS00036 Certified Network Associate Technology Specialist Skill Set

Modification History

Release	Comments
Release 3	This version released with ICT Information and Communications Technology Training Package version 6.0 Release 2 created to reflect the updated units of competency.
Release 2	This version released with ICT Information and Communications Technology Training Package version 2.0 Release 2 created to update typographical error.
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Description

This skill set has been designed for individuals who wish to meet competency requirements at an associate level for managing, troubleshooting networks, routers and switches.

Pathways Information

This skill set provides credit towards ICT50415 Diploma of Information Technology Networking.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

ICTNWK529 Install and manage complex ICT networks

ICTNWK541 Configure, verify and troubleshoot WAN links and IP services

ICTNWK542 Install, operate and troubleshoot medium enterprise routers

© Commonwealth of Australia, 2025 Future Skills Organisation

ICTNWK543 Install, operate and troubleshoot medium enterprise switches

Target Group

This skill set is for persons who are able to work as certified network associate technology specialists.

Suggested words for Statement of Attainment

These units of competency from ICT Information and Communications Technology Training Package meet competency requirements for associate level skills in networking.

ICTSS00037 Certified Network Professional Specialist - Voice and Wireless Skill Set

Modification History

Release	Comments
Release 3	This version released with ICT Information and Communications Technology Training Package version 6.0 Release 3 created to reflect the updated units of competency.
Release 2	This version released with ICT Information and Communications Technology Training Package version 2.0 Release 2 created to update typographical error.
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Description

This skill set has been designed for individuals who wish to meet competency requirements for skills in working as a network professional specialising in wireless and voice networks.

Pathways Information

This skill set provides credit towards ICT60215 Advanced Diploma of Network Security.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

ICTNWK605 Design and configure secure integrated wireless systems

ICTNWK606 Implement voice applications over secure wireless networks

ICTNWK620 Design and implement wireless network security

© Commonwealth of Australia, 2025 Future Skills Organisation

Target Group

This skill set is for persons who are able to work as certified network professional specialists – voice and wireless.

Suggested words for Statement of Attainment

These units of competency from ICT Information and Communications Technology Training Package meet competency requirements for skills in working as a network professional specialising in voice and wireless networks.

© Commonwealth of Australia, 2025 Future Skills Organisation

ICTSS00038 Certified Network Professional Specialist Skill Set

Modification History

Release	Comments
Release 2	This version released with ICT Information and Communications Technology Training Package version 2.0 Release 2 created to update typographical error
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Description

This skill set has been designed for individuals who wish to meet competency requirements for skills in working as a network specialist planning, configuring and troubleshooting network and internetwork solutions.

Pathways Information

This skill set provides credit towards ICT60215 Advanced Diploma of Network Security.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

ICTNWK603 Plan, configure and test advanced internetwork routing solutions

ICTNWK604 Plan and configure advanced internetwork switching solutions

ICTNWK612 Plan and manage troubleshooting advanced integrated IP networks

Target Group

This skill set is for persons who are able to work as certified network professional specialists.

ICTSS00042 Certified Technology Specialist - Graphical User Interfaces Skill Set

Modification History

Release	Comments
Release 3	This version released with ICT Information and Communications Technology Training Package version 6.0. Release 3 created to reflect the updated units of competency.
Release 2	This version released with ICT Information and Communications Technology Training Package version 2.0 Release 2 created to update typographical error.
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Description

This skill set has been designed for individuals who wish to meet competency requirements for skills as a technician specialising in the configuration and management of graphics user interfaces.

Pathways Information

This skill set provides credit towards ICT40415 Certificate IV in Information Technology Networking.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

ICTNWK423 Manage network and data integrity

ICTNWK427 Configure desktop environments

© Commonwealth of Australia, 2025 Future Skills Organisation

Target Group

This skill set is for persons who are able to work as graphical user interface (GUI) certified technology specialists.

Suggested words for Statement of Attainment

These units of competency from ICT Information and Communications Technology Training Package meet competency requirements for skills in developing and maintaining GUIs.

© Commonwealth of Australia, 2025 Future Skills Organisation

ICTSS00043 Certified Web Design Specialist Skill Set

Modification History

Release	Comments
Release 4	This version released with ICT Information and Communications Technology Training Package version 6.0. Release 3 created to reflect the updated units of competency.
Release 3	This version released with ICT Information and Communications Technology Training Package version 4.0. Release 3 created to delete ICTWEB409 from this skillset.
Release 2	This version released with ICT Information and Communications Technology Training Package version 2.0 Release 2 created to update typographical error
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Description

This skill set has been designed for individuals who wish to meet competency requirements for skills as a technician in the design, construction, testing and maintenance of web sites.

Pathways Information

This skill set provides credit towards ICT40315 Certificate IV in Web-Based Technologies.

Licensing/Regulatory Information

Not applicable.

© Commonwealth of Australia, 2025 Future Skills Organisation

Skill Set Requirements

ICTWEB440 Use web authoring tools

ICTWEB441 Produce basic client-side script

ICTWEB442 Produce interactive web animation

ICTWEB444 Create responsive website layouts

Target Group

This skill set is for persons who are able to work as website designers.

Suggested words for Statement of Attainment

These units of competency from ICT Information and Communications Technology Training Package meet competency requirements for skills in working as a website designer.

ICTSS00044 Computing and Application Fundamentals Skill Set

Modification History

Release	Comments
Release 3	This version released with ICT Information and Communications Technology Training Package version 6.0 Release 3 created to reflect the updated units of competency.
Release 2	This version released with ICT Information and Communications Technology Training Package version 2.0 Release 2 created to update typographical error.
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Description

This skill set has been designed for individuals who wish to meet competency requirements for skills at a foundation level for the safe use of an operating system and basic applications software.

Pathways Information

This skill set provides credit towards ICT20115 Certificate II in Information, Digital Media and Technology

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

BSBWHS201 Contribute to health and safety of self and others

ICTICT210 Operate database applications

ICTICT213 Use computer operating systems and hardware

ICTICT214 Operate application software packages

© Commonwealth of Australia, 2025 Future Skills Organisation

Target Group

This skill set is for persons wanting to use basic information and communications technology (ICT) and application software and work safely in any industry.

Suggested words for Statement of Attainment

These units of competency from ICT Information and Communications Technology and BSB Business Services Training Packages meet competency requirements for basic use of computers and applications.

© Commonwealth of Australia, 2025 Future Skills Organisation

ICTSS00046 Digital Literacy - eCitizen Skill Set

Modification History

Release	Comments
Release 2	This version released with ICT Information and Communications Technology Training Package version 2.0 Release 2 created to update typographical error
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Description

This skill set has been designed for individuals who wish to meet competency requirements for foundation skills in personal computing.

Pathways Information

This skill set provides credit towards ICT10115 Certificate I in Information, Digital Media and Technology.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

ICTICT101 Operate a personal computer

ICTICT102 Operate word-processing applications

ICTICT103 Use, communicate and search securely on the internet

Target Group

This skill set is for persons wanting to gain basic digital literacy skills in using a personal computer.

© Commonwealth of Australia, 2025 Future Skills Organisation

Suggested words for Statement of Attainment

These units of competency from ICT Information and Communications Technology Training Package meet competency requirements for using a personal computer.

© Commonwealth of Australia, 2025 Future Skills Organisation

ICTSS00047 Digital Literacy Skill Set

Modification History

Release	Comments
Release 2	This version released with ICT Information and Communications Technology Training Package version 2.0 Release 2 created to update typographical error
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Description

This skill set has been designed for individuals who wish to meet competency requirements for a broad range of digital literacy skills including the use of basic computing, web searching and basic applications software.

Pathways Information

This skill set provides credit towards ICT10115 Certificate I in Information, Digital Media and Technology.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

ICTICT101 Operate a personal computer

ICTICT102 Operate word-processing applications

ICTICT103 Use, communicate and search securely on the internet

ICTICT105 Operate spreadsheet applications

ICTICT106 Operate presentation packages

© Commonwealth of Australia, 2025 Future Skills Organisation

Target Group

This skill set is for persons wanting to gain digital literacy skills in the use of a personal computer, software applications and digital devices.

Suggested words for Statement of Attainment

These units of competency from ICT Information and Communications Technology Training Package meet competency requirements for digital literacy.

ICTSS00048 Hardware Technician Skill Set

Modification History

Release	Comments
Release 4	This version released with ICT Information and Communications Technology Training Package version 6.0. Release 4 created to reflect the updated units of competency.
Release 3	This version released with ICT Information and Communications Technology Training Package version 4.0. Release 3 created to update the new unit code ICTSAS308.
Release 2	This version released with ICT Information and Communications Technology Training Package version 2.0 Release 2 created to update typographical error
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Description

This skill set has been designed for individuals who wish to meet competency requirements for skills as a basic technician for the installation and configuration of hardware for clients.

Pathways Information

This skill set provides credit towards ICT30118 Certificate III in Information, Digital Media and Technology.

Licensing/Regulatory Information

Not applicable.

© Commonwealth of Australia, 2025 Future Skills Organisation

Skill Set Requirements

ICTICT302 Install and optimise operating system software

ICTICT303 Connect internal hardware components

ICTSAS305 Provide IT advice to clients

ICTSAS308 Run standard diagnostic tests

ICTSAS309 Maintain and repair ICT equipment and software

ICTSAS310 Install, configure and secure a small office or home office network

Target Group

This skill set is for persons who are able to work as hardware technicians, providing support in a range of ICT work areas and activities.

Suggested words for Statement of Attainment

These units of competency from ICT Information and Communications Technology Training Package meet competency requirements for support skills in hardware, software, operating systems and networks.

© Commonwealth of Australia, 2025 Future Skills Organisation

ICTSS00049 Internetworking Systems Coordinator - Administrator Skill Set

Modification History

Release	Comments
Release 2	This version released with ICT Information and Communications Technology Training Package version 2.0 Release 2 created to update typographical error
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Description

This skill set has been designed for individuals who wish to meet competency requirements as an internetworking systems coordinator or administrator.

Pathways Information

This skill set provides credit towards ICT60515 Advanced Diploma of Computer Systems Technology.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

ICTNWK603 Plan, configure and test advanced internetwork routing solutions

ICTNWK605 Design and configure secure integrated wireless systems

ICTNWK610 Design and build integrated VoIP networks

ICTNWK611 Configure call processing network elements for secure VoIP networks

ICTNWK612 Plan and manage troubleshooting advanced integrated IP networks

© Commonwealth of Australia, 2025 Future Skills Organisation

Target Group

This skill set is for persons who are able to work as an internetworking systems administrator or coordinator.

Suggested words for Statement of Attainment

These units of competency from ICT Information and Communications Technology Training Package meet competency requirements for skills in working as an internetworking coordinator or administrator.

© Commonwealth of Australia, 2025 Future Skills Organisation

ICTSS00050 Rich Interactive Content Specialist Skill Set

Modification History

Release	Comments
Release 2	This version released with ICT Information and Communications Technology Training Package version 2.0 Release 2 created to update typographical error and update unit codes
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Description

This skill set has been designed for individuals who wish to meet competency requirements in interactive digital media.

Pathways Information

This skill set provides credit towards ICT30115 Certificate III in Information, Digital Media and Technology.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

CUADIG304 Create visual design components

ICTGAM301 Apply simple modelling techniques

ICTGAM302 Design and apply simple textures to digital art

Target Group

This skill set is for persons who are able to work with interactive digital media content.

© Commonwealth of Australia, 2025 Future Skills Organisation

Suggested words for Statement of Attainment

These units of competency from ICT Information and Communications Technology and CUA Creative Arts and Culture Training Packages meet competency requirements for skills in interactive digital media.

ICTSS00056 Enterprise Desktop Virtualisation Specialist Skill Set

Modification History

Release	Comments
Release 3	This version released with ICT Information and Communications Technology Training Package version 6.0. Release 3 created to reflect the updated units of competency.
Release 2	This version released with ICT Information and Communications Technology Training Package version 2.0 Release 2 created to update typographical error.
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Description

This skill set has been designed for individuals who wish to meet competency requirements as a professional desktop virtualisation technology specialists for business and enterprises.

Pathways Information

This skill set provides credit towards ICT60215 Advanced Diploma of Network Security.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

ICTCLD602 Manage information security compliance of cloud service deployment

ICTICT617 Lead the evaluation and implementation of current industry specific technologies

ICTPRG605 Manage development of technical solutions from business specifications

ICTNWK615 Design and configure desktop virtualisation

© Commonwealth of Australia, 2025 Future Skills Organisation

Target Group

This skill set is for persons wanting to work as certified professional desktop virtualisation technology specialists.

Suggested words for Statement of Attainment

These units of competency from ICT Information and Communications Technology Training Package meet competency requirements for skills in working as a network professional specialising in desktop virtualisation technology.

ICTSS00059 Advanced ICT Sustainability Skill Set

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Description

This skill set addresses the skills and knowledge required in the installation of sustainable information and communications technology (ICT) networks using internet protocol convergence and virtualisation technologies.

Pathways Information

This skill set provides credit towards ICT51015 Diploma of Telecommunications Engineering.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

ICTSUS404 Install thin client applications for power over ethernet

ICTSUS501 Implement server virtualisation for a sustainable ICT system

BSBSUS501 Develop workplace policy and procedures for sustainability

Target Group

This skill set is targeted at existing workers in the telecommunications industry.

Suggested words for Statement of Attainment

These units of competency meet industry requirements for installing sustainable information and communications technology (ICT) network equipment.

ICTSS00065 Civil Works - Installation of Pit and Pipe and FDH Skill Set

Modification History

Release	Comments
Release 2	This version released with ICT Information and Communications Technology Training Package Version 5.0.
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Description

This skill set addresses the skills and knowledge required to work in National Broadband Network (NBN) construction roles.

^ From 1 July 2022 the unit HLTAID001 must no longer be delivered and will be replaced in the Packaging Rules by the unit HLTAID009 - for more information see: https://asqa.gov.au/news-events/news/reminder-about-superseded-hlt-first-aid-units

Pathways Information

This skill set provides credit towards the ICT20219 Certificate II in Telecommunications Network Build and Operation.

Licensing/Regulatory Information

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Skill Set Requirements

CPCCOHS1001A Work safely in the construction industry

HLTAID001 Provide cardiopulmonary resuscitation

^ HLTAID009 Provide cardiopulmonary resuscitation (must be delivered from 1 July 2022)

ICTCBL211 Install an above ground equipment enclosure

© Commonwealth of Australia, 2025 Future Skills Organisation

ICTCBL253 Construct underground telecommunications infrastructure

ICTPMG201 Prepare site for support installation

ICTTEN202 Use hand and power tools

ICTWHS204 Follow work health and safety and environmental policy and procedures

Target Group

This skill set is for new of existing workers in the telecommunications industry who wish to work in NBN construction.

Suggested words for Statement of Attainment

These units of competency meet industry requirements for the installation of pit and pipe and fibre distribution hub (FDH) cabinets.

ICTSS00066 Commercial Digital Television Antenna Systems Installation Skill Set

Modification History

Release	Comments
Release 2	This version released with ICT Information and Communications Technology Training Package Version 5.0.
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Description

This skill set addresses the skills and knowledge required to work within the digital reception sector of the telecommunication industry in commercial antenna installation. The more complex antenna installations include Master Antenna TV (MATV) and Communal Antenna TV (CATV) systems.

Pathways Information

This skill set provides credit towards ICT30519 Certificate III in Telecommunications Technology.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

ICTCBL206 Alter services to existing cable system

ICTCBL306 Locate and identify cable system faults

ICTDRE303 Install a complex digital reception system

ICTWHS204 Follow work health and safety and environmental policy and procedures

ICTRFN407 Conduct radio frequency measurements

© Commonwealth of Australia, 2025 Future Skills Organisation

Target Group

This skill set is for experienced personnel who may have undertaken the domestic antenna installation program, or similar, and wish to work in commercial antenna installation.

Suggested words for Statement of Attainment

These units of competency meet industry requirements for working in commercial antenna installation.

ICTSS00069 Domestic Digital Television Antenna Installation Skill Set

Modification History

Release	Comments
Release 2	This version released with ICT Information and Communications Technology Training Package Version 5.0.
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Description

This skill set addresses the skills and knowledge required to work in the digital reception sector of the telecommunication industry installing basic terrestrial antenna systems in single dwelling installations.

Pathways Information

This skill set provides credit towards ICT20319 Certificate II in Telecommunications Technology and the ICT30519 Certificate III in Telecommunications Technology.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

ICTCBL303 Install and terminate coaxial cable

ICTDRE301 Install digital reception equipment

ICTRFN202 Install a terrestrial antenna

ICTRFN407 Conduct radio frequency measurements

ICTTEN202 Use hand and power tools

ICTWHS204 Follow work health and safety and environmental policy and procedures

© Commonwealth of Australia, 2025 Future Skills Organisation

Target Group

This skill set is for new or existing workers who wish to gain the skills and knowledge required to install and maintain terrestrial antenna systems and associated digital reception equipment.

Suggested words for Statement of Attainment

These units of competency meet industry requirements for the installation and maintenance of antenna systems and associated digital reception equipment.

ICTSS00071 IP Convergence Installations for Home and SME Skill Set

Modification History

Release	Comments
Release 2	This version released with ICT Information and Communications Technology Training Package Version 5.0.
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Description

This skill set addresses the skills and knowledge required to use internet protocol (IP) technologies in the installation and maintenance of secure telecommunication networks in homes and small to medium enterprises.

Pathways Information

This skill set provides credit towards ICT20319 Certificate II in Telecommunications Technology.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

ICTTEN207 Install and test internet protocol devices in convergence networks

ICTTEN203 Install and configure a home or small office network

ICTTEN204 Install and configure a small to medium business network

ICTTEN205 Build and maintain a secure network

ICTTEN206 Operate new media software packages

© Commonwealth of Australia, 2025 Future Skills Organisation

Target Group

This skill set is for individuals who wish to work in the installation of modern telecommunications networks.

Suggested words for Statement of Attainment

These units of competency meet industry requirements for work in the installation and maintenance of secure telecommunications networks in homes and small to medium enterprises.

ICTSS00076 Wireless LAN and IP Network Installation Skill Set

Modification History

Release	Comments
Release 4	This version released with ICT Information and Communications Technology Training Package version 6.0. Release 4 created to reflect the updated units of competency.
Release 3	This version released with ICT Information and Communications Technology Training Package Version 5.0.
Release 2	This version released with ICT Information and Communications Technology Training Package version 4.0. Release 2 created to update the new unit code ICTNWK421.
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Description

This skill set addresses the skills and knowledge required in the installation of a secure wireless local access network (LAN) and associated networking elements.

Pathways Information

This skill set provides credit towards ICT41219 Certificate IV in Telecommunications Engineering Technology.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

ICTNWK421 Install, configure and test network security

© Commonwealth of Australia, 2025 Future Skills Organisation

ICTNWK432 Build an enterprise wireless network

ICTWHS202 Work safely in a radio frequency electromagnetic radiation environment

ICTTEN312 Install telecommunications network equipment

ICTTEN417 Install, configure and test a router

ICTTEN434 Install, configure and test internet protocol networks

Target Group

This skill set is for those individuals who require further training in the installation of information and communication technology networks.

Suggested words for Statement of Attainment

These units of competency meet industry requirements for installing secure wireless local access networks.

ICTSS00077 Telecommunications Linesworker Copper Skill Set

Modification History

Release	Comments
Release 2	This version released with ICT Information and Communications Technology Training Package Version 5.0.
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Description

This skill set addresses the skills and knowledge required to install copper telecommunications cable. Each unit of competency includes relevant work, health and safety awareness training. Other health, safety and environment requirements, relevant to the role specified in this skill set, may be stipulated as part of workplace requirements.

Pathways Information

This skill set provides credit towards the ICT20219 Certificate II in Telecommunications Network Build and Operation.

Licensing/Regulatory Information

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Skill Set Requirements

ICTCBL211 Install an above ground equipment enclosure

ICTCBL249 Haul underground cable

ICTCBL250 Haul and fix aerial cable

ICTCBL253 Construct underground telecommunications infrastructure

ICTCBL320 Jumper metallic conductor cable in the access network

© Commonwealth of Australia, 2025 Future Skills Organisation

ICTPMG201 Prepare site for support installation

Target Group

This skill set is for entry level telecommunications workers.

Suggested words for Statement of Attainment

These units of competency meet industry requirements for the installation of copper telecommunications cable.

© Commonwealth of Australia, 2025 Future Skills Organisation

ICTSS00078 Telecommunications Linesworker Fibre Skill Set

Modification History

Release	Comments
Release 2	This version released with ICT Information and Communications Technology Training Package Version 5.0.
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Description

This skill set addresses the skills and knowledge required to install telecommunications optical fibre cable. Each unit of competency includes relevant work, health and safety awareness training. Other health, safety and environment requirements, relevant to the role specified in this skill set, may be stipulated as part of workplace requirements.

Pathways Information

This skill set provides credit towards the ICT20519 Certificate II in Telecommunications Network Build and Operation.

Licensing/Regulatory Information

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Skill Set Requirements

ICTCBL249 Haul underground cable

ICTCBL211 Install an above ground equipment enclosure

ICTCBL250 Haul and fix aerial cable

ICTCBL253 Construct underground telecommunications infrastructure

ICTPMG201 Prepare site for support installation

© Commonwealth of Australia, 2025 Future Skills Organisation

ICTTEN310 Remove and replace electronic circuit boards in carrier equipment

ICTTEN318 Inspect, clean and handle optical fibre cable and connectors

Target Group

This skill set is for entry level telecommunications workers.

Suggested words for Statement of Attainment

These units of competency meet industry requirements for the installation of telecommunications optical fibre cable.

ICTSS00080 Copper Cable Jointer Skill Set

Modification History

Release	Comments
Release 2	This version released with ICT Information and Communications Technology Training Package Version 5.0.
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Description

This skill set addresses the skills and knowledge required to joint copper telecommunications cable. Each unit of competency includes relevant work, health and safety awareness training. Other health, safety and environment requirements, relevant to the role specified in this skill set, may be stipulated as part of workplace requirements.

Pathways Information

This skill set provides credit towards the ICT30419 Certificate III in Telecommunications Network Build and Operation.

Licensing/Regulatory Information

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Skill Set Requirements

ICTCBL254 Joint metallic conductor cable in access network

ICTCBL326 Cut over metallic conductor cable in the access network

ICTCBL319 Rearrange large size copper cable

ICTCBL336 Install and cut over metallic conductor cable to access network cabinet

ICTTEN312 Install telecommunications network equipment

© Commonwealth of Australia, 2025 Future Skills Organisation

ICTTEN313 Work on and resolve recurrent network faults

Target Group

This skill set is for telecommunications workers.

Suggested words for Statement of Attainment

These units of competency meet industry requirements for the jointing of copper telecommunications cable.

© Commonwealth of Australia, 2025 Future Skills Organisation

ICTSS00083 Underground Installations Skill Set

Modification History

Release	Comments
Release 2	This version released with ICT Information and Communications Technology Training Package Version 5.0.
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Description

This skill set addresses the skills and knowledge required to install underground telecommunications cable. This Skill Set includes the requirements for the underground specialisation units for ACMA. Each unit of competency includes relevant work, health and safety awareness training. Other health, safety and environment requirements, relevant to the role specified in this skill set, may be stipulated as part of workplace requirements.

Pathways Information

This skill set provides credit towards:

ICT20219 Certificate II in Telecommunications Network Build and Operation

ICT30419 Certificate III in Telecommunications Network Build and Operation

ICT30519 Certificate III in Telecommunications Technology.

Licensing/Regulatory Information

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Skill Set Requirements

ICTCBL329 Install underground cable

ICTCBL334 Install underground enclosures and conduit

© Commonwealth of Australia, 2025 Future Skills Organisation

Target Group

This skill set is for telecommunications workers.

Suggested words for Statement of Attainment

These units of competency meet industry requirements to install underground telecommunications cable within the ACMA Regulatory framework for Customer Premises.

© Commonwealth of Australia, 2025 Future Skills Organisation

ICTSS00084 Basic Open Cabler Registration Skill Set

Modification History

Release	Comments
Release 1	This version released with ICT Information and Communications Technology Training Package Version 5.0.

Description

This skill set addresses the skills and knowledge required to install, maintain and modify telecommunications customer cabling in domestic and commercial premises in accordance with Australian Communications and Media Authority (ACMA) requirements.

Pathways Information

This skill set provides credit towards ICT30519 Certificate III in Telecommunications Technology.

Licensing/Regulatory Information

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Skill Set Requirements

ICTCBL247 Install, maintain and modify customer premises communications cabling: ACMA Open Rule

ICTTEN208 Use electrical skills in telecommunications work

ICTTEN202 Use hand and power tools

ICTWHS204 Follow work health and safety and environmental policy and procedures

© Commonwealth of Australia, 2025 Future Skills Organisation

Target Group

This skill set is for new or existing workers in the telecommunications industry who wish to be employed as open registered cablers in accordance with ACMA requirements.

Suggested words for Statement of Attainment

These units of competency contribute to the Australian Communications and Media Authority training requirements for open cabling registration.

© Commonwealth of Australia, 2025 Future Skills Organisation

ICTSS00085 Basic Restricted Cabler Registration Skill Set

Modification History

Release	Comments
Release 1	This version released with ICT Information and Communications Technology Training Package Version 5.0.

Description

This skill set addresses the skills and knowledge required to perform a restricted range of residential and small business cabling work in accordance with Australian Communications and Media Authority (ACMA) requirements.

Pathways Information

This skill set provides credit towards ICT20319 Certificate II in Telecommunications Technology.

Licensing/Regulatory Information

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Skill Set Requirements

ICTCBL246 Install, maintain and modify customer premises communications cabling: ACMA Restricted Rule

ICTCMP203 Perform restricted customer premises broadband cabling work: ACMA Restricted Rule

ICTTEN202 Use hand and power tools

ICTTEN208 Use electrical skills when working with telecommunications networks

ICTWHS204 Follow work health and safety and environmental policy and procedures

© Commonwealth of Australia, 2025 Future Skills Organisation

Target Group

This skill set is for new or existing workers in the telecommunications industry who wish to be employed as restricted registered cablers in accordance with ACMA requirements.

Suggested words for Statement of Attainment

These units of competency contribute to the Australian Communications and Media Authority training requirements for restricted cabling registration.

© Commonwealth of Australia, 2025 Future Skills Organisation

ICTSS00086 ACMA Advanced Cabler Registration Skill Set

Modification History

Release	Comments
Release 1	This version released with ICT Information and Communications Technology Training Package Version 5.0.

Description

This skill set covers the additional training required for an open registered cabler to install, maintain, test and certify copper, fibre and coaxial installations in customer premises in accordance with Australian Communications and Media Authority (ACMA) requirements.

Pathways Information

This skill set provides credit towards ICT30519 Certificate III in Telecommunications Technology.

Licensing/Regulatory Information

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Skill Set Requirements

ICTCBL247 Install, maintain and modify customer premises communications cabling: ACMA Open Rule

ICTCBL301 Install, terminate and certify structured cabling installation

ICTCBL303 Install and terminate coaxial cable

ICTCBL322 Install and terminate optical fibre cable on customer premises

ICTCBL323 Perform cable and system test on customer premises

ICTTEN208 Use electrical skills when working with telecommunications networks

ICTWHS204 Follow work health and safety and environmental policy and procedures

© Commonwealth of Australia, 2025 Future Skills Organisation

Target Group

This skill set is for ACMA open registered cablers who need additional training to carry out specialist work.

Suggested words for Statement of Attainment

These units of competency contribute to the Australian Communications and Media Authority requirements for mandatory specialist cabling endorsement of an existing open registered cabler.

© Commonwealth of Australia, 2025 Future Skills Organisation

ICTSS00087 Basic Technician Network Build and Operate Skill Set

Modification History

Release	Comments
Release 1	This version released with ICT Information and Communications Technology Training Package Version 5.0.

Description

This skill set addresses the introductory skills and knowledge required in a range of NBN broadband industry occupations specifically for the national rollout construction and maintenance of the high-speed broadband infrastructure.

Pathways Information

This skill set provides credit towards the ICT30419 Certificate II in Telecommunications Network Build and Operation.

Licensing/Regulatory Information

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Skill Set Requirements

ICTTEN208 Use electrical skills in telecommunications work

ICTTEN202 Use hand and power tools

ICTWHS204 Follow work health and safety and environmental policy and procedures

ICTTEN315 Understand telecommunications principles

ICTWOR308 Provide customer service to telecommunications clients

ICTTEN317 Locate, identify and rectify telecommunications network faults

© Commonwealth of Australia, 2025 Future Skills Organisation

Target Group

This skill set is for entry level workers.

Suggested words for Statement of Attainment

These units of competency meet industry requirements for construction and maintenance of the high-speed broadband infrastructure.

© Commonwealth of Australia, 2025 Future Skills Organisation

ICTSS00088 Advanced Telecommunications Rigging Installation Skill Set

Modification History

Release	Comments
Release 1	This version released with ICT Information and Communications Technology Training Package Version 5.0.

Description

This skill set addresses the advanced level skills and knowledge required to install telecommunications network infrastructure on structures. It prepares individuals to work for carriers in the practical application of network equipment on structures.

Pathways Information

This skill set provides credit towards ICT30319 Certificate III in Telecommunications Technology.

Licensing/Regulatory Information

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Skill Set Requirements

ICTTCR201 Use rigging practices and systems on telecommunications network structures

ICTTCR202 Use operational safety in a telecommunications rigging environment

ICTTCR203 Use safe rigging practices to climb and perform rescues on telecommunications network structures

ICTTCR301 Build a telecommunications radio structure

ICTTCR302 Install radio plant and equipment on telecommunications structures

ICTTCR303 Protect against electromagnetic radiation and systems hazards when working on telecomms radio sites

© Commonwealth of Australia, 2025 Future Skills Organisation

Target Group

This skill set is designed for individuals who are experienced in basic rigging practices and the installation of telecommunications network infrastructure on structures.

Suggested words for Statement of Attainment

These units of competency meet the industry requirements for advanced level skills in installing telecommunications network infrastructure on structures.

© Commonwealth of Australia, 2025 Future Skills Organisation

ICTSS00089 Basic Telecommunications Rigging Installation Skill Set

Modification History

Release	Comments
Release 1	This version released with ICT Information and Communications Technology Training Package Version 5.0.

Description

This skill set addresses the skills and knowledge required to install telecommunications network infrastructure on structures.

Pathways Information

This skill set provides credit towards ICT20319 Certificate II in Telecommunications Technology.

Licensing/Regulatory Information

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Skill Set Requirements

CPCCLDG3001A Licence to perform dogging

CPCCLRG3001A Licence to perform rigging basic level

ICTRFN301 Install a radio communications antenna and feedline

ICTTCR201 Use rigging practices and systems on telecommunications network structures

ICTTCR202 Use operational safety in a telecommunications rigging environment

ICTTCR203 Use safe rigging practices to climb and perform rescues on telecommunications network structures

© Commonwealth of Australia, 2025 Future Skills Organisation

Target Group

This skill set is targeted at new or existing workers in the telecommunications industry who wish to develop basic skills in rigging.

Suggested words for Statement of Attainment

These units of competency meet the industry requirements for advanced level skills in installing telecommunications network infrastructure on structures.

© Commonwealth of Australia, 2025 Future Skills Organisation

ICTSS00090 Advanced IoT Installation Skill Set

Modification History

Release	Comments
Release 1	This version released with ICT Information and Communications Technology Training Package Version 5.0.

Description

This skill set addresses the skills and knowledge required to use internet protocol (IP) technologies in the installation of information and communication technology (ICT) networks in homes and small to medium enterprises.

The skill set addresses all DRT delivery methods including but not limited to

- Wireless
- Satellite
- Fibre (FTTX)
- HFC

This Skill Set is for cablers who have completed:

ICTCBL247 Install, maintain and modify customer premises communications cabling: ACMA Open Rule

ICTCBL301 Install, terminate and certify structured cabling installation

Pathways Information

This skill set provides credit towards ICT41219 Certificate IV in Telecommunications Engineering Technology.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

© Commonwealth of Australia, 2025 Future Skills Organisation

Skill Set Requirements

ICTDRE302 Locate and rectify digital reception equipment faults

ICTEDU301 Train customers in new technology

ICTRFN407 Conduct radio frequency measurements

ICTTEN415 Install and configure internet protocol TV in a home network

ICTTEN425 Design, install and configure a customer smart technology network

Target Group

This skill set is for personnel who require training in the installation of ICT and convergent networks.

Suggested words for Statement of Attainment

These units of competency meet industry requirements related to the installation of information and communication technology networks in homes and small to medium enterprises.

© Commonwealth of Australia, 2025 Future Skills Organisation

ICTSS00091 Radio Technician Skill Set

Modification History

Release	Comments
Release 1	This version released with ICT Information and Communications Technology Training Package Version 5.0.

Description

This skill set addresses the skills and knowledge required to install, modify and maintain basic radio communications networks.

Pathways Information

This skill set provides credits towards ICT41219 Certificate IV in Telecommunications Engineering Technology.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

ICTRFN301 Install a radio communications antenna and feedline

ICTRFN304 Construct and test a radio communications device

ICTRFN407 Conduct radio frequency measurements

ICTTEN208 Use electrical skills in telecommunications work

ICTTEN312 Install telecommunications network equipment

ICTTEN410 Locate, diagnose and rectify faults

ICTTEN414 Repair telecommunication system faults

ICTWHS204 Follow work health and safety and environmental policy and procedures

© Commonwealth of Australia, 2025 Future Skills Organisation

Target Group

This skill set is suitable for individuals with limited experience in the telecommunications industry who wish to specialise in radio communications.

Suggested words for Statement of Attainment

These units of competency meet industry requirements for working in the installation, modification and maintenance of basic radio communications networks.

© Commonwealth of Australia, 2025 Future Skills Organisation

ICTSS00092 Technical Help Desk Support Skill Set

Modification History

Release	Comments
Release 1	This version released with ICT Information and Communications Technology Training Package Version 5.0.

Description

This skill set addresses the skills and knowledge required to provide information and communication technology (ICT) advice to customers and to resolve technical enquiries.

Pathways Information

This skill set provides credit towards ICT30519 Certificate III in Telecommunications Technology.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

ICTSAS305 Provide ICT advice to clients

ICTWOR306 Resolve technical enquiries using multiple information systems

ICTWOR308 Provide Customer Service to telecommunications clients

Target Group

This skill set is for Telecommunications Cablers who wish to provide help desk support.

© Commonwealth of Australia, 2025 Future Skills Organisation

Suggested words for Statement of Attainment

These units of competency meet industry requirements for help desk support roles.

© Commonwealth of Australia, 2025 Future Skills Organisation

ICTSS00093 Telecommunications Linesworker HFC Skill Set

Modification History

Release	Comments
Release 1	This version released with ICT Information and Communications Technology Training Package Version 5.0.

Description

This skill set addresses the skills and knowledge required for TAP down installation of hybrid fibre coaxial (HFC) cable. Each unit of competency includes relevant work, health and safety awareness training. Other health, safety and environment requirements, relevant to the role specified in this skill set, may be stipulated as part of workplace requirements.

Pathways Information

This skill set provides credit towards the ICT20219 Certificate II in Telecommunications Network Build and Operation.

Licensing/Regulatory Information

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Skill Set Requirements

ICTCBL249 Haul underground cable

ICTCBL250 Haul and fix aerial cable

ICTCBL251 Install a cable lead-in

ICTCBL252 Joint and terminate coaxial cable

ICTBWN306 Use radio frequency measuring instruments

ICTPMG201 Prepare site for support installation

© Commonwealth of Australia, 2025 Future Skills Organisation

Target Group

This skill set is for entry level telecommunications workers.

Suggested words for Statement of Attainment

These units of competency meet industry requirements for TAP down installation of HFC cable.

© Commonwealth of Australia, 2025 Future Skills Organisation

ICTSS00094 Technician Fibre Skill Set

Modification History

Release	Comments
Release 2	This version released with ICT Information and Communications Technology Training Package Version 6.0. Release 2 created to reflect the updated units of competency.
Release 1	This version released with ICT Information and Communications Technology Training Package Version 5.0.

Description

This skill set addresses the skills and knowledge required to install, test and terminate telecommunications optical fibre cable. Each unit of competency includes relevant work, health and safety awareness training. Other health, safety and environment requirements, relevant to the role specified in this skill set, may be stipulated as part of workplace requirements.

Pathways Information

This skill set provides credit towards the ICT30419 Certificate III in Telecommunications Network Build and Operation.

Licensing/Regulatory Information

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Skill Set Requirements

ICTBWN308 Work safely on live optical fibre installations

ICTBWN307 Use optical measuring instruments

ICTWHS204 Follow work health and safety and environmental policy and procedures

© Commonwealth of Australia, 2025 Future Skills Organisation

ICTCBL322 Install and terminate optical fibre cable on customer premises

ICTTEN310 Remove and replace electronic circuit boards in carrier equipment

ICTTEN318 Inspect, clean and handle optical fibre cable and connectors

ICTTEN409 Commission an electronic system

ICTTEN434 Install, configure and test internet protocol networks

Target Group

This skill set is for entry level telecommunications workers.

Suggested words for Statement of Attainment

These units of competency meet industry requirements for working with telecommunications optical fibre cable.

© Commonwealth of Australia, 2025 Future Skills Organisation

ICTSS00095 Fibre Splicer Skill Set

Modification History

Release	Comments
Release 1	This version released with ICT Information and Communications Technology Training Package Version 5.0.

Description

This skill set addresses the skills and knowledge required to splice telecommunications fibre. Each unit of competency includes relevant work, health and safety awareness training. Other health, safety and environment requirements, relevant to the role specified in this skill set, may be stipulated as part of workplace requirements.

Pathways Information

This skill set provides credit towards the ICT30419 Certificate III in Telecommunications Network Build and Operation.

Licensing/Regulatory Information

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Skill Set Requirements

ICTBWN302 Install optical fibre splitters in fibre distribution hubs

ICTBWN308 Work safely on live optical fibre installations

ICTBWN307 Use optical measuring instruments

ICTWHS204 Follow work health and safety and environmental policy and procedures

ICTCBL316 Install ribbon fibre cable in the FTTX distribution network

ICTCBL330 Splice and terminate optical fibre cable for carriers and service providers

ICTTEN318 Inspect, clean and handle optical fibre cable and connectors.

© Commonwealth of Australia, 2025 Future Skills Organisation

Target Group

This skill set is for entry level telecommunications workers.

Suggested words for Statement of Attainment

These units of competency meet industry requirements to splice telecommunications fibre.

© Commonwealth of Australia, 2025 Future Skills Organisation

ICTSS00096 Technician Hybrid Fibre Coaxial Skill Set

Modification History

Release	Comments
Release 1	This version released with ICT Information and Communications Technology Training Package Version 5.0.

Description

This skill set reflects the role of operators in performing underground and aerial equipment and system installations from the tap to the optical node. This role works on access network to enable efficient interconnection to the NBN broadband services. This includes connection and termination of HFC cabling, diagnosing and rectifying HFC system faults.

Pathways Information

This skill set provides credit towards the ICT30419 Certificate III in Telecommunications Network Build and Operation.

Licensing/Regulatory Information

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Skill Set Requirements

ICTBWN306 Use radio frequency measuring instruments

ICTCBL248 Install and terminate hard-line coaxial cable

ICTCBL333 Install aerial cable for communications applications

ICTTEN312 Install telecommunications network equipment

Target Group

This skill set is for entry level telecommunications workers.

© Commonwealth of Australia, 2025 Future Skills Organisation

Suggested words for Statement of Attainment

These units of competency meet industry requirements for tap to the optical node work on Hybrid Fibre Coaxial access network to enable efficient access and interconnection to the NBN broadband services.

© Commonwealth of Australia, 2025 Future Skills Organisation

ICTSS00097 Telecommunications Customer Service Technician - HFC Technician Skill Set

Modification History

Release	Comments
Release 1	This version released with ICT Information and Communications Technology Training Package Version 5.0.

Description

This skill set reflects the role of operators installing, activating and assuring HFC equipment and systems from the last connection point of the network to the customer premises (tap to NTD) to enable efficient access and interconnection to the NBN broadband services.

Pathways Information

This skill set provides credit towards the ICT30419 Certificate III in Telecommunications Network Build and Operation.

Licensing/Regulatory Information

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Skill Set Requirements

ICTBWN306 Use radio frequency measuring instruments

ICTCBL303 Install and terminate coaxial cable

ICTDRE314 Design communications wiring systems for customer premises

ICTTEN312 Install telecommunications network equipment

ICTCBL251 Install aerial and underground cable lead-ins

ICTCBL306 Locate and identify cable system faults

ICTDRE308 Install a cable broadband multi-dwelling unit system

© Commonwealth of Australia, 2025 Future Skills Organisation

ICTTEN207 Install and test internet protocol devices in convergence networks

Target Group

This skill set is for entry level telecommunications workers.

Suggested words for Statement of Attainment

These units of competency meet industry requirements for tap to NTD work on Hybrid Fibre Coaxial access network to enable efficient interconnection to the NBN broadband services.

© Commonwealth of Australia, 2025 Future Skills Organisation

ICTSS00098 Network Technician HFC Skill Set

Modification History

Release	Comments
Release 1	This version released with ICT Information and Communications Technology Training Package Version 5.0.

Description

This skill set provides individuals with skills and knowledge that reflects the role of an advanced Hybrid Fibre Coaxial (HFC) technician (technical officer), team leader or supervisor with a wide range of telecommunications skills. This role works on the access network to enable efficient interconnection to the NBN broadband services. This includes diagnosing and rectifying complex HFC system faults, commissioning and verifying the HFC network performance.

Pathways Information

This skill set provides credit towards the ICT41219 Certificate IV in Telecommunications Engineering Technology.

Licensing/Regulatory Information

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Skill Set Requirements

ICTTEN208 Use electrical skills in telecommunications work

ICTTEN410 Locate, diagnose and rectify faults

ICTRFN406 Maintain hybrid fibre coaxial broadband cable network

ICTTEN409 Commission an electronic system

ICTTEN312 Install telecommunications network equipment

ICTRFN405 Conduct radio frequency measurements

© Commonwealth of Australia, 2025 Future Skills Organisation

Target Group

This skill set is for telecommunications workers.

Suggested words for Statement of Attainment

These units of competency meet industry requirements to meet a wide range of telecommunications skills.

© Commonwealth of Australia, 2025 Future Skills Organisation

ICTSS00099 Cloud Design and Configuration Skill Set

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.
Release 2	Correcting an error. No change to skill set content.

Description

This skill set addresses the skills and knowledge required to assess, design, improve and monitor cloud architecture within Information and Communications Technology (ICT) environments.

Pathways Information

The units provide credit towards ICT50120 Diploma of Information Technology and other qualifications that allow for selection of these units.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

ICTCLD501 Develop cloud disaster recovery plans

ICTCLD502 Design and implement highly available cloud infrastructure

ICTCLD503 Implement web-scale cloud infrastructure

ICTCLD504 Improve cloud-based infrastructure

Target Group

This skill set is for cloud architects, cloud network engineers, cloud consultants and cloud developers who use cloud computing solutions for organisations.

© Commonwealth of Australia, 2025 Future Skills Organisation

Suggested words for Statement of Attainment

These units of competency from ICT Information and Communications Technology Training Package meet industry requirements for cloud computing in organisations.

© Commonwealth of Australia, 2025 Future Skills Organisation

ICTSS00100 Cloud Implementation and Maintenance Skill Set

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Description

This skill set addresses the skills and knowledge required to implement and maintain cloud computing solutions within organisations.

Pathways Information

The units provide credit towards ICT50120 Diploma of Information Technology and other qualifications that allow for selection of these units.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

ICTCLD505 Implement cloud infrastructure with code

ICTCLD506 Implement virtual network in cloud environments

ICTCLD507 Build and deploy resources on cloud platforms

ICTCLD508 Manage infrastructure in cloud environments

Target Group

This skill set is for cloud engineers, cloud systems administrators and those who work within cloud computing operations to program, implement and maintain cloud computing solutions for businesses.

© Commonwealth of Australia, 2025 Future Skills Organisation

Suggested words for Statement of Attainment

These units of competency from ICT Information and Communications Technology Training Package meet industry requirements for cloud engineering in organisations.

© Commonwealth of Australia, 2025 Future Skills Organisation

ICTSS00101 Cyber Incident Response Skill Set

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Description

This skill set addresses the skills and knowledge required to respond to cyber security incidents within organisations in Information and Communication Technology (ICT) environments.

Pathways Information

The units provide credit towards ICT40120 Certificate IV in Information Technology and other qualifications that allow for selection of these units.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

ICTCYS402 Identify and confirm cyber security incidents

ICTCYS403 Plan and implement information security strategies for an organisation

ICTCYS406 Respond to cyber security incidents

Target Group

This skill set is for information technology security administrators and network administrators who work in information technology security within business environments.

Suggested words for Statement of Attainment

These units of competency from ICT Information and Communications Technology Training Package meet industry requirements for cyber security incident response organisations.

© Commonwealth of Australia, 2025 Future Skills Organisation

© Commonwealth of Australia, 2025

ICTSS00102 Cyber Incident Threat Detection and Prevention Skill Set

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Description

This skill set addresses the skills and knowledge required to run vulnerability assessments, interpret information for threats and develop incident response plans to maintain cyber security.

Pathways Information

The units provide credit towards ICT40120 Certificate IV in Information Technology and other qualifications that allow for selection of these units.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

ICTCYS404 Run vulnerability test assessments for an organisation

ICTCYS405 Develop cyber security incident response plans

ICTCYS407 Gather, analyse and interpret threat data

Target Group

This skill set is for network penetration testers, information and technology security consultants, and network and security consultants who work in business environments.

© Commonwealth of Australia, 2025 Future Skills Organisation

Suggested words for Statement of Attainment

These units of competency from ICT Information and Communications Technology Training Package meet industry requirements for cyber security threat detection and prevention in ICT contexts.

© Commonwealth of Australia, 2025 Future Skills Organisation

ICTSS00103 Cyber Security Strategy and Governance Skill Set

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Description

This skill set addresses the skills and knowledge required to identify and implement cyber security standards within organisations.

Pathways Information

The units provide credit towards ICT60120 Advanced Diploma of Information Technology and other qualifications that allow for selection of these units.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

ICTCYS601 Create cyber security standards for organisations

ICTCYS604 Implement best practices for identity management

ICTCYS606 Evaluate an organisation’s compliance with relevant cyber security standards and law

ICTCYS608 Perform cyber security risk assessments

Target Group

This skill set is for Information and Communications Technology security (ICT) consultants, cyber security analysts, business development managers, cyber risk and assurance managers, network security consultants and administrators, ICT risk managers, cyber security solutions architects and network engineers who implement cyber security standards within businesses.
